RE: Page 1 of 3
Docket Number 2005-00467
KU/LGE/E-ON Proposed 345,000 KV Transmission Line

Dear Executive Director,

Please find enclosed a Motion for Full Intervention in the matter of Docket Number 2005-00467 proposed 345,000 KV Transmission Line to be constructed by KU/LGE/E-ON on private property located in Hardin County. We are opposed to the placement of transmission lines on the property proposed. Because we are members of the public and because we are unable to afford the legal power to match the legal staff for KU/LGE/E-ON, we request that the Public Service Commission provide legal assistance to help us through the intervention process and any hearings that result. We further request that the Commission contact each of the following individuals as to any meeting pertaining to their property.

Sincerely,

Violet Monroe

COMMONWEALTH OF KENTUCKY
BEFORE THE PUBLIC SERVICE COMMISSION

In the Matter of:

JOINT APPLICATION OF LOUISVILLE
GAS AND ELECTRIC COMPANY AND
KENTUCKY UTILITIES COMPANY FOR
A CERTIFICATE OF PUBLIC CONVENIENCE
AND NECESSITY FOR CONSTRUCTION
OF TRANSMISSION FACILITIES IN
JEFFERSON, BULLITT, MEADE,
AND HARDIN COUNTIES, KENTUCKY

DOCKET NO 2005-00467

MOTION TO INTERVENE

Comes, property owners listed below, and for their Motion for Full Intervention in the above-captioned proceeding state as follows:

1. Movants are property owners and/or interested parties located in Hardin County that will be directly affected by the proposed Transmission Line to run from Elizabethtown Substation to Mill Creek Generation Station.
2. The movants are concerned with the unnecessary destruction of land and cluttering of land with more poles and wires that will result if the Transmission Lines are allowed to be placed on the proposed properties.
3. The movants are concerned with the resulting loss of esthetic quality and the destruction of the rural scenic beauty of rural Kentucky by this unnecessary cluttering and thus the resulting loss of growth potential to the Hardin County area.
4. The movants are concerned with the loss in value of the property that will result if the proposed Transmission Lines are allowed to be placed on the proposed properties.
5. The movants are concerned that significant means of their livelihood will be taken away with the destruction of timber, development, and farm land if the transmission lines are allowed to be placed on their property.
6. The movants are concerned with the possible health risks and illnesses to humans that may result if the proposed Transmission Lines are allowed to be placed on the proposed properties.
7. The movants are concerned with negative environmental issues (ie endangerment of life of birds, fish, frogs, turtles, deer, turkey, raccoons, and opossums due to herbicide contamination during and after construction; threat to the life and habitat of endangered species, specifically the Endangered Whooping Crane and Endangered Indiana Bat; destruction of wetland woods, old growth forest and farm land).

RE: Page 2 of 4
Motion for Full Intervention in DOCKET NO 2005-00467

8. Movants are concerned that a private owned company will be able to take over the property of small land owners who have worked hard all of their life, but without the same means to contest.
9. The movants are KU/LG & E/E-ON consumers and the rate changes due to cost of construction of the Transmission Line and TC-2 addition will have a direct impact on our electric rates.
10. The movants request KU/LG & E/E-ON follow the directives established by the Public Service Commission on September 8, 2005 which stated "The commission invites LG & E/KU to reapply for a CPCN to construct the needed transmission facilities after the company has conducted a more thorough review of all reasonable alternatives, including locating the line partially or fully along existing transmission corridors." (Case No. 2005-00142). Other routes for the transmission lines which follow existing corridors need to be taken.
11. Movants request that Certificate of Need and Necessity be denied since the application submitted by LG & E for Transmission Lines and TC-2 expansion is not necessary to meet the future energy demands of its customers.

Wherefore the following moves pursuant to KRS Section 278.020 (8) and 807 KAR 5:001 3 (8) to intervene and are asking the Public Service Commission to provide a lawyer at no cost to the movants to assist in the intricacies of the proceedings and to give timely notification to each of the following movants as to meetings pertaining to the cases involving their property.

Respectfully submitted:
