Re: "Smart Metering"

- unfair

Another dumb idea - Your article in C/f.
Feb 25 states "would likely" cost consumers less -
not will.

It amounts to another tax on the poor + those who
do not have auto on/off appliances + must use peak hours.
It won't affect rich who can pay.

How about declaring off periods for T.V.'s, Computers,
other electronics to save electricity?

Put some of the burden on the rich who can pay.
