Dear Public Service Commission:

Please dont allow the
L. G. & E company to start
"Smart Metering"

People are already paying
more for natural gas to heat
homes and water, plus more
for gasoline for their cars.

L. G. & E already has higher
rates for electricity in the
summer when air conditioning
is needed. In fact, people
in poor health, like me, with
lung cancer, can not take
summer heat without A. C.

This would amount to a
rate increase because your
A. C. works less at night
anyway. So they will charge
more in the day time -

Please dont give in to this.

Elmer J. McFarland
