**MOTION OF CITY OF PRESTONSBURG TO INTERVENE**

City of Prestonsburg, acting by and through its Utilities Commission, the Prestonsburg City's Utilities Commission, 2560 South Lake Drive, Prestonsburg, Kentucky 41653-1048, (collectively, the "Movant"), hereby moves the Kentucky Public Service Commission (the "Commission"), pursuant to KRS §278.310 and 807 KAR 5:001 Section 3(8), for full intervention in this case. As grounds for this Motion, Movant states as follows:

1. Movant is a municipal corporation, acting by and through its Utilities Commission. The Utilities Commission is a "public project" established by the City of Prestonsburg pursuant to Chapter 58 of the Kentucky Revised Statutes.
2. Movant and its counsel appear herein pursuant to the jurisdiction of the Public Service Commission ("Commission") set forth by the Kentucky Supreme Court in Simpson County Water District v. City of Franklin, Ky., 872 S.W. 2d 460 (1994) ("Simpson County"). On August 10, 1994, in Administrative Case No. 351, the Commission notified municipal utilities of the Commission's assertion of jurisdiction over the wholesale rates and service of municipal utilities which provide utility service to

any public utility. With respect to the Commission's assertion of jurisdiction over Movant's wholesale rates and service to "public utilities" pursuant to Simpson County, Movant offers its full cooperation and assistance to the Commission and its Staff in fulfilling these responsibilities.

3. The City of Pikeville states in its Joint Petition that it has wholesale water sales to Sandy Valley Water District ("Sandy Valley"). Sandy Valley is also a major wholesale water customer of Movant. To the extent, this Joint Petition and the operations proposed therein affect Movant's rights, duties and responsibilities under its existing Water Contract dated October 1, 1997 (See Exhibit 1), Movant has a direct interest in this proceeding.

4. In December, 1994, Movant expanded its water treatment plant to 4.0 MGD, effective capacity, at a cost of \$2,000,000.00 to ensure an adequate supply of potable water to Sandy Valley and to other existing customers. The cost of construction was financed by a note from the Kentucky Infrastructure Authority ("KIA") at a rate of 2.9% with annual debt service of approximately \$130,000.00, that matures June 1, 2014. Sandy Valley purchases 125,000 gallons per day on average from Movant which generates monthly cash flow that approximates the annual debt service on the KIA loan. The term of Sandy Valley's Water Contract expires on October 1, 2021, and was intended to extend beyond the maturity date of the KIA loan.

5. The wastewater project represented in this Joint Petition is not an isolated project. This project is the initial step in a much larger project that would extend into the Southern portion of Floyd County, Kentucky, an area that has been previously designated by the Cabinet for Environmental Protection, Kentucky Division of Water as part of the

territory allocated to Movant pursuant to Movant's Regional Facility Plan. Movant's Regional Facility Plan has been prepared pursuant to the authority granted by 401 KAR 5:006. (See Exhibit 2) To the extent that the Commission's decision in this case affects the re-allocation of Movant's assigned territory under the Regional Facility Plan, Movant has a direct interest in this case. The City of Pikeville's "piecemeal" approach in making the initial filing with the Commission is an ineffective use of the Commission's resources and is an attempt to gain an unfair advantage in the next application to be filed jointly by the City of Pikeville, Sandy Valley and Southern Water & Sewer District ("Southern").

6. The City of Pikeville has entered into a "Interlocal Agreement Relating to Water and Sewer Along US 23 in the Harold/Betsy Layne/Mare Creek Area of Floyd County and the Mossy Bottom/Coal Run Area of Pike County, Kentucky" ("Interlocal Agreement") (See Exhibit 3) with Floyd County Fiscal Court, Sandy Valley Water District and Southern Water & Sewer District. The Interlocal Agreement, without the knowledge or consent of Movant, re-allocated the assigned wastewater territory of Movant initially to the City of Pikeville and subsequently (post-construction) to Southern, all contrary to applicable Federal and State law.

7. Said Interlocal Agreement provides that the City of Pikeville will assume complete control of all operations and assets of Sandy Valley effective February 1, 2006, until certain debts are satisfied. The City of Pikeville has not obtained the Commission's approval for such management. Upon information and belief, the City of Pikeville has taken preliminary steps necessary to implement this portion of the Interlocal Agreement, contrary to KRS 278.020(5) and KRS 278.218.

8. Said Interlocal Agreement provides that the City of Pikeville will provide wastewater service to a portion of the customers of Sandy Valley in Floyd County. This is the same territory that was previously assigned to Movant as part of its Regional Facility Plan. A significant purpose of preparing such plan and designating such territories is to provide for the orderly and efficient delivery of wastewater service which has not occurred in this situation. The Interlocal Agreement does not require the City of Pikeville to provide wastewater service to all the customers of Sandy Valley, and limits the amount of effluent that the City of Pikeville is required to accept. Thus, portions of this territory will likely be under served, if served at all. This is contrary to Movant's Regional Facility Plan and to the stated goals of the regulatory scheme implemented pursuant to Federal and state law.

9. Despite the knowledge that the US 23 corridor in Southern Floyd County, Kentucky had been designated as part of the Movant's territory, the parties to the Interlocal Agreement proceeded with the planning for development of the said territory without the knowledge and involvement of Movant. Despite the fact that Movant has been designated as a "regional planning agency", Movant was excluded from the planning process.

10. The Interlocal Agreement provides for the transfer of the Floyd County portion of Sandy Valley's potable water and wastewater (post-construction) systems to Southern and the portion of the system located in Pike County to the City of Pikeville. However, Southern does not have the financial or managerial capacity required by KRS §278.020(5) and (6) and KRS §278.218 to permit such a transfer, and presently, does not operate a wastewater system. Interestingly, Southern cannot accept the Floyd County

portion of the wastewater system from the City of Pikeville until it constructs a wastewater treatment plant, which Southern has not committed to do.

11. Movant states that it intends to provide wastewater service as described in its Regional Facility Plan, as funding is available. Presently, it has pending requests for applicable permits to extend its existing wastewater collection system by 3,600 linear feet to service customers in this territory. Movant intends to use funds generated by its operations to finance this proposed extension. Further, Movant has previously had prepared preliminary engineering designs for a wastewater treatment plant that can serve the entire designated territory in the U.S. 23 Corridor in Southern Floyd County. Movant has expended significant amounts of funds and management efforts in developing its Regional Facility Plan, including engineering designs for a 1 MGD wastewater treatment plant.

12. The customers of Sandy Valley are opposed to the transfer of the assets and related debt of the water system of Sandy Valley. All of the utility systems that are parties to this proceeding and to the Interlocal Agreement, currently have higher utility rates than Sandy Valley, except for Movant. In fact, in excess of one thousand customers of Sandy Valley have signed a "Petition" in opposition of the proposed take-over of Sandy Valley (See Exhibit 4). The transfer of the assets and related debt of Sandy Valley pursuant to the Interlocal Agreement is not in the public interest as required by KRS 278.218.

#### RELIEF REQUESTED

Movant requests that the Commission consolidated all parties to the Interlocal Agreement with the parties to the this proceeding to determine whether: 1) Sandy

Valley's potable water distribution system and other assets and related debt should be transferred to the City of Pikeville and Southern; 2) Movant's wastewater territory should be re-allocated initially to the City of Pikeville and subsequently to Southern; 3) the City of Pikeville may lawfully assume control of the operations and management of Sandy Valley's potable water distribution system; and 4) the wastewater collection system in Mossy Bottom should be transferred to the City of Pikeville.

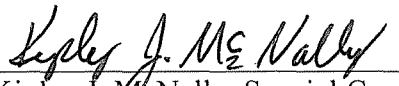

Respectfully submitted,

Special Counsel For the City of Prestonsburg and  
the Prestonsburg City's Utilities Commission

**CERTIFICATE OF SERVICE**

This is to certify that an original and ten copies of the foregoing Motion of City of Prestonsburg to Intervene in the above-referenced case was hand delivered to Beth O'Donnell, Executive Director, Public Service Commission, 211 Sower Boulevard, Frankfort, Kentucky 40601; and copies were mailed to John N. Hughes, Esq., 124 W. Todd Street, Frankfort, Kentucky 40601 and Joseph G. Jacobs, Chairman of Sandy Valley Water District, P.O. Box 127, Betsy Layne, Kentucky 41605.

  
Kipley J. McNally, Special Counsel for the  
City of Prestonsburg and the Prestonsburg  
City's Utilities Commission

**CITY OF PRESTONSBURG  
INDEX TO EXHIBITS**

1. Water Contract dated October 1, 1997 with Sandy Valley;
2. 401 KAR 5:006;
3. Interlocal Agreement; and
4. Petition of Customers of Sandy Valley.

## WATER CONTRACT

THIS AGREEMENT, made and entered into effective this 1st day of October, 1997, by and between the PRESTONSBURG CITY'S UTILITIES COMMISSION ("Prestonsburg") and SANDY VALLEY WATER DISTRICT ("Sandy Valley").

## WITNESSETH:

That the parties hereto, for and in consideration of the covenants of this Agreement hereinafter set out, hereby agree as follows:

1. Water Delivery Point. Prestonsburg agrees to furnish and sell to Sandy Valley during the term of this contract at the existing point of delivery, which is located at Mare Creek, Floyd County, Kentucky ("Delivery Point"), and Sandy Valley agrees to receive and purchase from Prestonsburg, potable treated water meeting applicable purity standards of the Kentucky Department of Health at the Delivery Point. Water will be furnished at a reasonably constant pressure calculated at 60 p.s.i.; provided that the requirement that water be delivered at 60 p.s.i. shall not apply until Prestonsburg is able to place in service a new water tank of 300,000 gallon capacity near Ivel, Kentucky, which tank is expected to be in service prior to the end of 1998.
2. Maximum and Minimum Quantities of Water. Prestonsburg shall deliver and Sandy Valley shall purchase quantities of water not to exceed 225,000 gallons per day of twenty-four hours, and not to exceed a cumulative total of 6,000,000 gallons per month. For these purposes, "per day" or "daily" shall mean the 24-hour period starting at 12:00 midnight and

ending at 11:59 p.m. Prestonsburg shall have the right to install equipment to restrict the flow of water on an hourly basis or establish temporary shut-offs to restrict the flow so that the quantities can be limited to the contract maximums set forth herein. It shall be the sole responsibility of Sandy Valley to control its customer load so that the water flow at the Delivery Point need not be restricted. A minimum contract quantity of 3,000,000 gallons per month shall be paid for by Sandy Valley.

} contract minimum

3. Metering Equipment and Testing. Prestonsburg agrees to furnish, install, operate and maintain at its own expense at the Delivery Point, the necessary metering equipment, including a meter house or pit and required devices of standard type for properly measuring the quantity of water delivered to Sandy Valley and to calibrate such metering equipment whenever requested by Sandy Valley, but not more frequently than once every twelve (12) months. A meter registering not more than two percent (2%) above or below the test result shall be deemed to be accurate. The previous readings of any meter disclosed by test to be inaccurate shall be corrected for the three (3) months previous to such test in accordance with the percentage of inaccuracy found by such tests. If any meter fails to register for any period, the amount of water furnished during such period shall be deemed to be the amount of water delivered in the corresponding period immediately prior to the failure. An appropriate official of Sandy Valley, at all reasonable times, shall have access to the meter for the purpose of verifying its readings.

4. Statement of Water Supplied. Prestonsburg agrees to furnish Sandy Valley, once each month, a statement of the quantity of water furnished Sandy Valley during the applicable billing period.

5. Payment Policy. Payment shall be made by Sandy Valley in accordance with Prestonsburg's wholesale customer payment policy ("Wholesale Payment Policy"), as it may be modified pursuant to public notice from time to time, subject to review by the Kentucky Public Service Commission, which is as follows:

Customers' bills will be mailed on the last business day of each month. Payment is due when bills are mailed. Prestonsburg City's Utilities Commission is not responsible for mail delivery. If payment is not received in our office by the 15th day of the following month, a 10% penalty will be added to the accounts of customers who have not paid their bills in full. On the 16th day of the month, Prestonsburg City's Utilities Commission will mail a disconnect notice to those customers who have not paid their bills in full. The disconnect notice, mailed on the 16th, will be the only notice sent to delinquent customers before their utilities services will be subject to disconnection for non-payment. A copy of the disconnect notice will be mailed to the Public Service Commission. Meters will be scheduled for removal ninety days after the date of the disconnect notice and service may be disconnected. Customers receiving disconnect notices will have five business days to bring or mail their payments to our office located at 2103 South Lake Drive, Prestonsburg, Kentucky. Thereafter, interest will accrue until paid at nine percent per annum. Our office hours are Monday through Friday, 8:00 A.M. to 5:00 P.M. For the convenience of our customers, we have a night deposit box located at the front of our building. If it is necessary to send a service representative to collect a bill, a \$200 collection fee will be charged. If it is necessary to remove the meter for non-payment, customers will be required to pay their bills in full, plus a \$500 reconnection fee before service is restored. If customers' bills and/or notices are mailed late by Prestonsburg City's Utilities Commission, the payment period will be extended the same amount of time the bill and/or notices were mailed late.

6. Rate Schedule. Sandy Valley agrees to pay Prestonsburg, according to Prestonsburg's Wholesale Payment Policy, for water delivered in accordance with this Agreement at the rates for each metered delivery point as set forth in Appendix A to this Agreement.

7. Overrun Volumes. Prestonsburg has no obligation to deliver more than 225,000 gallons per day or 6,000,000 gallons per month in total to Sandy Valley. Any quantities of water taken by Sandy Valley above these contract maximums shall be considered overrun volumes (“Overrun Volumes”). Overrun Volumes shall be fully interruptible for any reason and at any time in the sole discretion of Prestonsburg. Prestonsburg will give as much notice as is reasonably practicable before interrupting overrun volumes. The rate for overrun volumes shall be the current rate for gallons of water delivered monthly in excess of 100,000 gallons, plus the booster pump rate, multiplied by one hundred and twenty percent per 1,000 gallons; provided that the increased rate for Overrun Volumes shall not be assessed for Overrun Volumes which do not exceed 5% of the daily contract maximum volume (e.g. rate for Overrun Volumes applies to all volumes above 236,250 gallons per day while the regular rate applies to volumes up to 236,250 gallons per day). The increased rate for Overrun Volumes shall not be applicable if the overrun is due to an event of force majeure as defined in Section 15 and for no longer than the duration of the force majeure condition, provided that Sandy Valley gives immediate notice to Prestonsburg’s designated representative following Sandy Valley’s discovery of the force majeure condition, that the event of force majeure is documented to the satisfaction of Prestonsburg’s representative, and that Sandy Valley acts with diligence to promptly remove the force majeure condition.

8. Rate Schedule Modifications.

- (a) Subject to subsection (b) of this section, Prestonsburg may make a rate filing with the Kentucky Public Service Commission at any time requesting

a rate increase for service to Sandy Valley, and this Agreement is subject to rate increase adjustments approved by the Kentucky Public Service Commission or its successor agency or entity. In the event of such rate increase, Appendix A to this Agreement will be amended to reflect the lawfully effective charges.

- (b) Prestonsburg shall not file a wholesale rate case for which new, increased rates will become effective to Sandy Valley prior to October 1, 1998.

9. Termination. This Agreement shall commence on the effective date hereof and continue for a period of twenty-four years. This Agreement supersedes and replaces the Water Purchase Contract of March 19, 1981, between the parties. This Agreement shall terminate automatically at the end of the twenty-four year term. It may be renewed or extended as may be agreed upon by the parties.

10. Fire Protection and System Reliability. Prestonsburg shall not be responsible in any way for the failure of Sandy Valley to furnish sufficient water for fire protection purposes, or sufficient water storage tanks for system reliability purposes, and Sandy Valley shall indemnify Prestonsburg from any such claims related thereto.

11. Additional Service Provisions. Any booster pump or meter equipment to be used by Prestonsburg shall not be required to exceed a 150 gallon per minute booster pump or a three inch water meter. If Sandy Valley requires booster pumps or other apparatus to increase the p.s.i.

oct 1  
2021

for its own system, said pumps or other apparatus shall be supplied by Sandy Valley but shall, in no event, exceed 150 gallons per minute capacity.

12. Indemnification. Each party ("Indemnifying Party") shall indemnify the other party ("Indemnified Party"), its directors, commissioners, employees, and agents from all claims, demands, and liabilities of any kind caused by the Indemnifying Party relating to or arising out of this Agreement, except where such claims, demands, or liabilities result from or arise out of the sole negligence of the Indemnified Party.

13. Chlorination. Sandy Valley shall be responsible for any chlorination of the water furnished by Prestonsburg if such chlorination is required by the Floyd County Department of Health or any other Federal or State governmental agency.

14. Interruptible Service. If Prestonsburg does not have a sufficient supply of water to supply its retail customers, then Prestonsburg, at its sole discretion, may reduce on a proportional basis with its other customers the amount of water to be furnished to Sandy Valley; provided that Prestonsburg shall be entitled at all times to retain sufficient water to provide adequate fire flow within the City of Prestonsburg and to provide adequate water to critical medical facilities. Prestonsburg will give as much notice as reasonably practicable before interrupting service to Sandy Valley.

15. Force Majeure. All obligations of either party with respect to service hereunder shall be excused without liability during the pendency of any condition of force majeure. Force majeure shall include any act, event or condition beyond the reasonable control of the party

claiming force majeure, and shall include, but not be limited to, any act of God, fire, storm, earthquake, freezing condition, wind, flood, drought, snow, water used to fight fires, line breaks, environmental release, breakage of or delay in receiving parts, equipment or supplies, or shortage thereof, strike or lockout, or any act, event or requirement of any governmental law, regulation or entity. Force majeure shall not include routine leakage or line loss or financial inability to pay.

16. Notices. All notices and other communications (other than routine billing and service communications) provided hereunder shall be in writing and shall be delivered personally or transmitted by registered or certified mail, return receipt requested or by a recognized overnight courier service. Such notice shall be deemed to have been given at the time of personal delivery or upon delivery to the United States Postal Service for delivery by registered or certified mail, or upon receipt thereof, as reflected on the signed certificate or delivery statement of the courier service. Notice must be delivered or sent to the party at the following address or to such other address as a party may have designated by notice:

TO PRESTONSBURG:      Prestonsburg City's Utilities Commission  
2103 South Lake Drive  
Prestonsburg, Kentucky 41653

TO SANDY VALLEY:      Sandy Valley Water District  
P.O. Box 127  
524 George Road  
Betsy Layne, Kentucky 41605

17. Amendment - Governing Law. This Agreement may be amended in writing only, duly signed by both parties, and will be governed by and construed in accordance with the laws of the Commonwealth of Kentucky.

18. Binding Effect and Benefit. Upon execution, this Agreement shall inure to the benefit of and be binding upon the parties hereto and their respective heirs, personal representatives, successors and assigns, subject to regulatory approval as set forth below; provided, however, neither this Agreement nor any rights and obligations hereunder may be assigned by Sandy Valley without the written consent of Prestonsburg, which consent shall not unreasonably be withheld.

19. Severability. The terms and provisions of this Agreement shall not be severable, and in the event that any material term or provision hereof is held to be invalid or unenforceable, the remaining terms or provisions hereof shall be invalid and unenforceable, and neither party shall have any further obligation hereunder.

20. Regulatory Approval. This Agreement is contingent upon and subject to approval by the Kentucky Public Service Commission. Should the Commission fail to approve this Agreement in its entirety, neither party shall be bound by the terms hereof, and this Agreement shall be considered null and void and of no force or effect.

21. Wholesale Service. Sandy Valley shall not resell at wholesale water supplied hereunder to any new or additional wholesale customer so as to make Prestonsburg, directly or indirectly, a wholesale supplier to any other water system, without Prestonsburg's consent.

22. Non-Waiver. Either party's failure to exercise any of its rights hereunder at any time will not operate as a waiver of its right to exercise same at any other time(s).

23. Counterparts. This Agreement may be executed in several counterparts with the same effect as if the parties executing the several counterparts had all executed one counterpart.

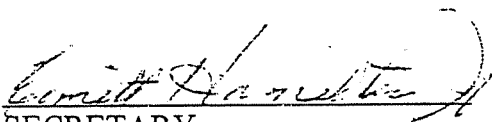

24. Designated Representatives. To promote communications and to resolve service, operations, and collection issues on a timely basis, each party will designate a specific individual as a primary point of contact between the parties. Prestonsburg hereby designates its Superintendent, currently, Seldon Horne, as its representative. Sandy Valley hereby designates Joe Jacobs, or his successor in office as Secretary of Sandy Valley, as its representative.

IN WITNESS WHEREOF, the parties hereto have caused their duly authorized officers or agents to execute this Agreement the day and year first above written.

## RATE SCHEDULE

**APPLICABILITY:** This Rate Schedule is applicable for wholesale water service by the Prestonsburg City's Utilities Commission ("Prestonsburg") to the Sandy Valley Water District ("Sandy Valley") pursuant to the Water Contract of October 1, 1997, between the parties.

**CONTRACT QUANTITIES:** The maximum daily contract quantity for service pursuant to the Water Contract is 225,000 gallons per day. The maximum monthly contract quantity for such service is 6,000,000 gallons per month. All volumes taken by Sandy Valley above these daily or monthly contract maximums shall be considered Overrun Volumes. A minimum contract quantity of 3,000,000 gallons per month shall be paid for by Sandy Valley.

**RATES:** Rates for each metered delivery point are set forth as follows:

Monthly volumes:	Charge per 1000 gallons:
0 - 2,000 gallons	\$6.97 minimum
next 98,000 gallons	3.02
over 100,000 gallons	2.02

**Booster pump service:** For each metered delivery point that requires booster pump service, an additional charge of \$.10 per 1000 gallons shall be charged for each booster pump used in providing service.

**OVERRUN RATE:** Sandy Valley shall be allowed a 5% tolerance above the daily contract maximum volume before assessment of the Overrun Rate. The Overrun Rate shall apply to all volumes exceeding 236,250 gallons per day or 6,000,000 gallons per month. The Overrun Rate shall be the charge for monthly volumes over 100,000 gallons specified above, plus the booster pump rate, multiplied by 120% per 1000 gallons.

**RATE MODIFICATIONS:** These rates are subject to modification at any time subsequent to October 1, 1998, pursuant to a rate adjustment filing made by Prestonsburg with the Kentucky Public Service Commission, or its successor entity or agency, and approved by said Commission.

**CONTRACT PROVISIONS:** This Rate Schedule is part of and is made applicable pursuant to the terms of the Water Contract of October 1, 1997 between the parties, which terms are incorporated into and made a part hereof.

**EFFECTIVE DATE:** This Rate Schedule is effective October 1, 1997.

## EXHIBIT 2

**401 KAR 5:006. Wastewater planning requirements for regional areas.**

RELATES TO: KRS 224.10, 224.70, 224.73, 224A.040, 224A.050, 224A.055, 224A.070, 224A.080, 33 U.S.C. 1251 et seq.

STATUTORY AUTHORITY: KRS 224.10-100, 224.16-050, 224.70-100, 224.70-110, 224A.111, 224A.112, 224A.113, 40 C.F.R. 25.4, Parts 35, 130, 33 U.S.C. 1281, 1285, 1288, 1313

NECESSITY, FUNCTION, AND CONFORMITY: KRS 224.10-100 requires the Natural Resources and Environmental Protection Cabinet to develop a comprehensive plan for the management of water resources and to provide for the prevention, abatement, and control of all water pollution. The Clean Water Act, 33 USC 1281 et seq. and more specifically, 33 USC 1313(e), requires the implementation of a continuing planning process by governmental bodies to provide for the control of water pollution. 33 USC 1288 requires the governor of the state to designate a boundary for areas within the state and single representative organizations within the areas to develop a wastewater treatment management plan applicable to all wastewaters generated within an area. 40 CFR Part 130 specifies further detail for compliance with Section 208 of the Clean Water Act, including the requirement that the state establish and maintain a continuing planning process that includes the process for incorporating elements of any applicable areawide wastewater treatment management plans under Section 208, applicable basin plans under Section 209 of the Clean Water Act, and a process for updating and maintaining water quality management plans, including schedules for revision. 40 CFR 130.6(e) also requires the state and areawide agencies to update the plans as needed to reflect changing water quality conditions, results of implementation actions, and new requirements, or to remove conditions in prior conditional or partial plan approvals. This administrative regulation implements the required planning process for point sources of pollution for the Commonwealth of Kentucky in order to conform with federal requirements and provides for the preparation of wastewater treatment management plans by governmental agencies for point sources of pollution.

Section 1. Applicability. This administrative regulation shall govern the regional planning process for the development of water quality management plans to control point sources of pollution in given areas throughout the Commonwealth. This administrative regulation establishes the process by which regional planning agencies and the Commonwealth shall comply with Sections 201, 205, 208, and 303(e) of the Clean Water Act to provide planning for wastewater control in particular areas for point sources of pollution.

Section 2. Requirements. (1) No new regional facility shall be constructed, no average daily design capacity of an existing regional facility shall be expanded by more than thirty (30) percent, or no existing regional sewage collection system shall expand its equivalent population served by more than thirty (30) percent of the existing population, without the regional planning agency submitting a regional facility plan and the cabinet approving the plan. All regional facility plans shall be prepared by a registered professional engineer.

(2) A regional planning agency shall submit a regional facility plan or regional facility plan update when the following occurs:

- (a) A new regional facility is proposed to be constructed within the planning area;
- (b) The average daily design capacity of an existing regional facility is proposed to be expanded by more than thirty (30) percent;
- (c) The equivalent population served by an existing regional sewage collection system is proposed to be expanded by more than thirty (30) percent of the existing population served;
- (d) A regional facility or other governmental agency applies for a grant from the U.S. EPA or applies for a loan from the federally assisted wastewater revolving fund pursuant to the requirements of 40 CFR Part 35 and 200 KAR Chapter 17. A plan of study shall be submitted to the cabinet for the project to be eligible to be placed on the project priority list and receive priority points;
- (e) A regional planning agency considers the submission of the plan to be in the best interest of the public and the environment; or
- (f) It has been twenty (20) years since the regional planning agency or its successor has submitted a regional facility plan.

Section 3. Regional Planning Agencies. (1) Governmental entities such as cities, counties, and other public bodies that are created by KRS Chapter 67, 67A, 74, 76, 96, 108, or 220 may apply to the cabinet to become a regional planning agency, if they have not already been designated as a regional planning agency, by submitting a regional facility plan. The cabinet may designate the entity as a regional planning agency if it finds that the proposed area is not served by another regional planning agency; the development of this agency would be in the best interest of the public and the environment; or the agency has the legal, institutional, managerial, and financial capability, and specific activities necessary to carry out its responsibilities in accordance with Section 208(c)(2)(A) through (I) of the CWA.

(2) Designation. Regional planning agencies may be designated by the cabinet in accordance with Section 208(a)(2) and (3) of the CWA and this administrative regulation. Designations and de-designations shall be subject to approval by the U.S. EPA in accordance with Section 208(a)(7) of the CWA.

(3) De-designation. The cabinet may modify or withdraw the planning designation of a regional planning agency if:

- (a) The regional planning agency requests the cancellation;
- (b) The regional planning agency fails to meet its planning requirements as specified in grant or loan agreements, contracts, or memoranda of understanding; or
- (c) The regional planning agency no longer has the resources or the commitment to continue water quality planning activities within the designated boundaries.

(4) Impact of de-designation. When a regional planning agency's designation has been withdrawn, the cabinet shall assume direct responsibility for continued water quality planning and oversight of implementation of planning activities within the area.

Section 4. Contents of Plan. The regional facility plan shall include the necessary information to allow for an environmental assessment and to assure that the most cost-effective and environmentally sound means of achieving the established water quality goals can be implemented. These plans shall contain the following information:

(1) Maps showing the planning area. In the determination of a planning area, appropriate attention shall be given to include the entire area where cost savings, regionalization, other management advantages, or environmental gains may result from interconnection of individual sewage facilities or collective management of the systems. At least one (1) original seven and one-half (7 1/2) minute USGS topographic map shall be submitted showing the planning area. Computer generated USGS data compatible with the cabinet's computer system may be substituted for the USGS map.

(2) A description of the existing regional facilities, including physical condition, hydraulic and organic design capacities, characteristics of wastewater, ability to meet permit limits, method of sludge handling and disposal, existing flows including average and peak flows, a waste load allocation for the proposed project, inflow and infiltration problems including location and frequency of bypasses or overflows, combined sewers if any, the collection system including location of pump stations and their capacities, and operation and maintenance problems. The location and identification of any other sewage treatment plants located in, or serving a part of, the planning area shall also be shown.

(3) A description of the planning area characteristics, including the location of wetlands, delineation of the 100 year floodplain area, topography, groundwater, surface streams, geology, soils with specific mention of suitability or unsuitability of soils, and topography for on-site sewage disposal systems.

(4) If there is a proposed project, a discussion of the need for the project including current compliance status, applicable permit limits, and if proposed sewers are involved, documentation as to why on-site systems are not acceptable. Discussions and documentation of any water quality or public health problems in the area shall be included. The applicant shall also describe any type of state or federal enforcement actions that may exist against any wastewater treatment plant within the area.

(5) A discussion of the current and projected population in the planning area including existing population in the current service area, twenty (20) year projected population in the current service area, existing population in unsewered parts of the planning area, and twenty (20) year projected population in the unsewered parts of the planning area. Current and projected industrial and commercial users of the system shall be included. When appropriate, those areas of the planning area not currently sewered should be divided into three (3) time frames: present to two (2) years, three (3) to ten (10) years, and eleven (11) to twenty (20) years. The current and projected populations shall be shown for each area on the planning area map. If available, a local planning and zoning land use map shall be included. The basis for the projected population change shall be identified.

(6) A detailed evaluation of alternatives, along with a twenty (20) year present worth cost analysis for each alternative. All wastewater management alternatives considered, including no action, and the basis for the engineering judgement for selection of the alternatives chosen for detailed evaluation, shall be included. Sufficient detail shall be provided to allow for a thorough cost analysis to be conducted. Nonmonetary effectiveness criteria shall be limited to implementability, environmental impact, engineering evaluation, public support, and regionalization. The alternatives shall reflect a comprehensive regional plan for the planning area and shall minimize the number of point source discharges. Intended sources of funding shall be listed along with estimated user fees.

(7) In addition to the cost for the current project being proposed, cost estimates shall be given for the entire twenty (20) year planning period. Cost estimates shall be provided for each time frame identified in subsection (5) of this section and shall be broken down by the following categories: secondary wastewater treatment, advanced wastewater treatment, inflow and infiltration correction, major sewer rehabilitation, new collector sewers, interceptor sewers, combined sewer overflow corrections, and storm water pollution corrections.

(8) Documentation of public participation. A copy of the advertisement for the public hearing required by Section 5 of this administrative regulation and a copy of the minutes of the public hearing and any written comments and responses shall be submitted as part of the regional facility plan. If more than one (1) public hearing was held or if there were public meetings or public notices of the project, copies of all documentation of these events shall be submitted as part of the plan. At the required public hearing, the scope of the project, cost of the project, alternatives considered, and estimated user charges and hook-up fees shall be discussed.

Section 5. Public Notice, Public Comment, and Public Hearing Requirements. (1) Prior to the approval of the regional facility plan or updates to the plan, the regional facility planning agency shall give public notice of its draft plan and shall hold a public hearing on the draft plan. Public notice of the draft plan and the public hearing on the draft plan shall be given pursuant to KRS Chapter 424.

(2) All public notices issued under this administrative regulation shall contain the following information:

(a) The name and address of the regional planning agency which drafted the plan;

(b) A brief description of the contents of the draft plan and the area to be served;

(c) The name, address, and telephone number of persons from whom interested persons may obtain further information including copies of the draft regional facility plan;

(d) A brief description of the procedures for the public's right to comment required by this administrative regulation;

(e) A reference to the date of any previous public notices relating to the draft regional facility plan;

(f) The date, time, and place of the hearing on the draft plan; and

(g) A brief description of the nature and purpose of the hearing.

(3) The public shall be given an opportunity to comment on the draft plan and the period for comment shall remain open for thirty (30) days from the date of the first publication of the notice of the public hearing or until the termination of the hearing, whichever is later. Commentors may request longer comment periods, which may be granted by the regional planning agency, if appropriate.

(4) Any person may submit written or oral statements and data to the regional planning agency concerning the draft regional facility plan. Reasonable limits may be set up on the time limit for oral statements and the submission of statements in writing may be required.

(5) All persons who believe any condition of the draft plan is inappropriate, inaccurate, incomplete, or otherwise not in the best interest of the public and the environment, shall raise all reasonably ascertainable issues and submit all reasonably available arguments and factual background supporting their position, including all supporting materials, by the close of the public comment period.

Section 6. Action on the Plan. (1) An environmental assessment report will be written by the cabinet which summarizes the regional facility plan. The cabinet will submit the assessment report to the State Clearinghouse for review and comments. Mitigative measures may be required to address any negative comments as a result of this review.

(2) If the cabinet finds that the regional facility plan has been properly submitted and is in the best interest of the environment and the public, the cabinet will approve the plan.

Section 7. Consistency with Plans. Construction grant, loan, and permit decisions shall be made in accordance with certified and approved water quality management plans, including regional facility plans, as described in 40 CFR 130.12(a) and (b) and this administrative regulation.

Section 8. Nonpoint Source Controls. Regional planning agencies may implement plans for nonpoint source controls, other than plans for agricultural nonpoint source controls, in their designated areas. Regional planning agencies may develop plans for agricultural nonpoint source controls in their areas, if the plans are developed in coordination with the Agriculture Water Quality Authority, established pursuant to KRS 224.71. These plans may be included in the comprehensive water quality management plan that may include the regional facility plan. (23 Ky.R. 1814; Am. 2780; eff. 5-14-97.)

LITROD

**INTERLOCAL COOPERATION AGREEMENT** TREY GRAYSON  
**RELATING TO WATER AND SEWER SERVICE ALONG US 23 IN THE** SECRETARY OF STATE  
**HAROLD / BETSY LAYNE / MARE CREEK AREA OF FLOYD COUNTY AND** COMMONWEALTH OF KENTUCKY  
**THE MOSSY BOTTOM / COAL RUN AREA OF PIKE COUNTY, KENTUCKY**

**THIS INTERLOCAL COOPERATION AGREEMENT** (the "Agreement") is made and entered into and deemed effective as of the 1<sup>st</sup> day of January, 2006, by and between the Floyd County Fiscal Court, (herein "Floyd County"), Floyd County Courthouse Annex, 149 South Central Avenue, Prestonsburg, KY 41653, the City of Pikeville (herein "Pikeville"), 118 College Street, Pikeville KY 41501, Sandy Valley Water District (herein "Sandy Valley") 525 George Road, Betsy Layne, KY 41642; and Southern Water and Sewer District (herein "Southern") 245 KY Route 680, McDowell, KY 41647; each a "Party", (or collectively the "Parties") and each a political subdivision of the Commonwealth of Kentucky.

**WHEREAS**, Kentucky Revised Statutes §65.210 et seq. (Interlocal Cooperation Act) permits local governments to work together to achieve economies of scale by consolidation of public utilities, expansion of service areas across county and city boundaries, sharing of facilities and other similar means to benefit their citizenry; and

**WHEREAS**, the Parties agree that it is in the best interest of public health and safety that a sewer project entitled "PRIDE on the River" be constructed, that includes a) an extension of the Pikeville sewer collection system to serve the communities of Harold, Betsy Layne and Mare Creek in Floyd County (Phase 1); b) a new treatment plant in Floyd County (Phase 2); and c) construction of extensions to serve the many communities of Mud Creek in Floyd County (Phase 3), wherein the new treatment plant will then handle flows generated by Phases 1 and 2; and

**WHEREAS**, all components relating to Phase 1 of the "PRIDE on the River" project, including design and construction of lines and appurtenances, are referred to collectively herein as the "Sewer Project" as illustrated by a project map, attached to and made part of this Agreement as Exhibit 1; and

**WHEREAS**, by separate agreement with Mountain Water District, Pikeville shall soon take ownership and all attendant obligations of the Mossy Bottom / Coal Run Area Sewer Collection System and incorporate same into its system, and thereby allow for additional extensions to its system, including the Sewer Project that is the subject of this Agreement.

**WHEREAS**, the Parties seek to keep customer rates for service as low as reasonably possible, and to best achieve this goal Floyd County and Pikeville intend to jointly apply for all available grant funding assistance for construction costs for the Sewer Project; and

**WHEREAS**, to further assure that the Project has the lowest possible customer rates and to provide for appropriate management control of the wastewater system, it is reasonable to have a single utility own and operate both water and wastewater services. Consequently, Sandy Valley will join with Pikeville and Southern in making application to the Kentucky Public

Service Commission to transfer that portion of Sandy Valley's water facilities located in Pike County and that portion located in Floyd County, together with the debt obligation associated with each portion, to Pikeville and Southern, respectively.

**NOW, THEREFORE,** it is mutually acknowledged and agreed by and between the Parties and so ordered as follows:

A. The Parties agree that the foregoing statements are not mere recitals, but represent findings of fact by the respective bodies, and as such represent statements of public interest affecting all Parties hereto, including their respective citizens. The Parties further agree that, for purposes of this Agreement, the phrase "Sewer Project" shall be defined and refer to all components of Phase 1 of the "PRIDE on the River" sewer project, including design and construction of lines and appurtenances, as illustrated by the project map, attached to and made part of this Agreement as Exhibit 1.

B. Agreement relating to water facilities:

1. Immediately, upon execution of this Agreement, Sandy Valley, Southern and Pikeville shall make joint application to the Kentucky Public Service Commission (PSC) to transfer Sandy Valley's assets and associated debt relating to facilities in Floyd County to Southern and those assets and associated debt relating to its facilities in Pike County to Pikeville.

2. To better assure smooth transition of ownership and continuity of customer service, Sandy Valley hereby requests and authorizes Pikeville, and Pikeville agrees, effective February 1, 2006, to assume responsibility for daily operations of Sandy Valley's facilities. Pikeville will assume supervision of all Sandy Valley personnel, provide for all field services, billing and accounting services and regulatory reporting requirements and provide Sandy Valley monthly financial and operations reports, with payment requests, as appropriate. Until PSC approval of the asset transfer, Sandy Valley shall retain control of its facilities and shall make timely payment of invoices relating to cost of Sandy Valley operations each month.

3. Upon PSC approval of the transfer of Sandy Valley's assets and associated debt, Southern and Pikeville shall integrate all water facilities, lines and appurtenances into their respective systems, providing for proper management, operation and maintenance thereof in a proprietary manner to assure continued high quality and equitable service to all customers.

4. Southern and Pikeville shall offer positions to each individual who is an employee of Sandy Valley on the date of execution of this Agreement and such employment with Southern or Pikeville shall commence on the effective date of PSC approval of the asset transfer, conditioned upon the employee's possession of a valid driver's license and negative drug test results. Southern and Pikeville shall retain these individuals at his/her existing rate of pay for at least one year

*Agmt*

*where applicable* *[Signature]*

from the date of PSC approval of the asset transfer, conditioned upon adequate performance of duties and proper conduct.

5. Southern and Pikeville agree to continue charging Sandy Valley customers those water rates approved by the PSC for Sandy Valley effective May 26, 2004 for a period of one year from the effective date of this Agreement and to base all future rate adjustments on cost of service analyses made by a certified public accountant or the PSC, as appropriate.
6. Upon PSC approval of the transfer of Sandy Valley's assets and associated debt, Floyd County shall publicly acknowledge the long term service contribution and personal dedication of all members, present and past, of the Sandy Valley board of commissioners and its employees. Subsequently, Floyd County shall dissolve Sandy Valley and at that time Sandy Valley shall no longer be a Party to this Agreement.
7. Pikeville agrees to continue to sell treated drinking water and Southern agrees to purchase treated drinking water for distribution in Floyd County in the same volumes and at the same rates as approved by the PSC for Sandy Valley, effective May 26, 2004.

C. Agreement regarding Sewer Project funding:

1. Floyd County and Pikeville agree to apply jointly to the Kentucky Community Development Block Grant (CDBG) Program for \$2,000,000 in funds to be used solely to defray eligible capital development costs of the Sewer Project.
2. Pikeville agrees to serve as lead applicant, grant recipient, and project administrator of any funds which may be secured from the CDBG Program, Rural Development, US Environmental Protection Agency, PRIDE, Appalachian Regional Commission, Kentucky Infrastructure Authority, Coal Severance Funds and any other federal or state grant fund source. Further, Pikeville agrees to serve as fiscal agent for the Sewer Project and obtain in its name any loan funding available to the Project that it may deem feasible.
3. If a CDBG grant is awarded as a result of a joint application by Floyd County and Pikeville, Pikeville is authorized to act as Floyd County's agent and to execute on Floyd County's behalf all agreements with the Governor's Office for Local Development that are necessary to effectuate any award of a CDBG grant. Floyd County acknowledges and agrees that the Governor's Office for Local Development shall consider Pikeville the lead applicant and that all correspondence related to the Sewer Project shall be directed to Pikeville, with copies to Floyd County. Upon receipt of reasonable notice, Pikeville shall accord full access to all records related to the CDBG grant to authorized representatives of Floyd County.

4. Floyd County agrees to allocate or give priority status to the Sewer Project with regard to Coal Severance Funds or other funds that may become available for capital projects.
5. Pikeville shall secure CDBG project administration assistance through the Big Sandy Area Development District.

D. Agreement relating to sewer facilities:

1. Pending receipt of Sewer Project funding, Pikeville shall see to the design and construction of the Sewer Project in a timely and forthright manner, routinely engaging representatives of all parties to this Agreement, as set out below in subparagraphs E. 1. and E. 2.
2. Upon construction completion and testing of the Sewer Project, Pikeville shall convey and Southern shall accept ownership and operate that portion of the Sewer Project located in Floyd County and Pikeville shall retain ownership and operate that portion of the Sewer Project located in Pike County. Any debt incurred for construction or expenses for initial operation of Sewer Project facilities located in Floyd County shall be borne by Southern and paid from Sewer Project user fees or charges. Likewise, any debt incurred for construction or expenses for initial operation of Sewer Project facilities in Pike County shall be borne by Pikeville and paid from Sewer Project user fees or charges.
3. Pursuant to a Kentucky Inter Municipal Operation Permit, Pikeville will accept metered sewage from Southern, being only that sewage collected from those customers located in Floyd County tied onto the Sewer Project at the time of its completion, for transport and treatment at Pikeville's existing treatment plant at rates based on a cost of service analysis made by a certified public accountant.
4. When Southern constructs a new sewage treatment plant, as anticipated in Phase 2 of the "PRIDE on the River" project, or other provision is made for sewage treatment capacity by Floyd County, it is agreed that sewage flows from the Sewer Project facilities located in Floyd County shall be diverted from the Pikeville plant and treated at the new plant or otherwise treated.
5. Regardless of whether a new sewage treatment plant is constructed or treatment capacity is otherwise provided for by Floyd County, Pikeville shall be under no obligation at any time to accept flows greater than 5% more than the flow generated by the Sewer Project facilities located in Floyd County, as set out above in subparagraph D. 3.
6. If, after twenty years from the date of completion of the Sewer Project, namely, Phase 1 of the "PRIDE on the River" project, a new sewage treatment plant is not constructed in Floyd County nor other means established to provide for treatment capacity in Floyd County, Pikeville, at its sole discretion, may restrict sewage flows from Floyd County.

E. The Parties further agree and covenant:

1. Each Party acknowledges the critical importance to the Project of open and continuing communication. To this end, each Party shall designate an individual to serve as its representative and these individuals shall meet beginning in January 2006 and at least quarterly thereafter until the Sandy Valley asset transfer is approved by the PSC and the Sewer Project is completed, so as to be able to report knowledgeably regarding the status of these actions to the respective Party.
2. The Parties agree to act in a supportive and timely manner to facilitate the implementation of the elements of this Agreement. Such action shall include but not be limited to participation in planning, preparing regulatory and funding applications, prompt compliance with regulatory agency requirements, reviewing and submitting plans, granting or obtaining encroachment permits, easements, rights of way, or other similar permits or authorizations as may be required.

F. Agreement relating to amendments, completion and termination:

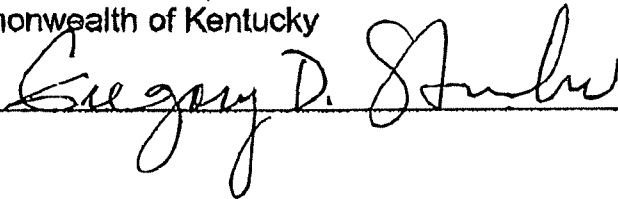

1. This Agreement shall continue and remain in effect until and at which time all those activities and actions, as set out herein, relating to the Parties, or as may otherwise be contemplated by this Agreement shall have been completed. The date of completion of the Sewer Project facilities, namely, Phase 1 of the "PRIDE on the River" project, is anticipated to be not later than January 1, 2009.
2. If CDBG funds are awarded as a result of the joint application, this Agreement shall not be terminated until five (5) years after the date the Governor's Office for Local Development approves project closeout of the CDBG grant agreement.
3. It is understood that, to effect the purpose of this Agreement, it may be necessary to amend this Agreement from time to time and, to this end, the Parties agree that action to amend may be initiated by any Party and any amendment shall require approval of the respective Parties' governing body in a regular or special session as each shall deem appropriate.
4. Prior to receipt of funding for the Sewer Project from any source, Floyd County, Southern and Pikeville may terminate this Agreement, for cause, at any time upon sixty (60) days written notice to the other Parties, with the condition that timing of notice is such that each Party shall have at least one regularly scheduled meeting of its governing body prior to the effective date of the termination. Once funding for the Sewer Project has been received by a Party from any source, this Agreement may only be terminated upon a three-fourths majority vote to terminate by a Party's governing body, which decision must be concurred in by a three-fourths majority vote to terminate by the governing bodies of the other Parties.

5. If funding is awarded for the Sewer Project, the termination of this Agreement is subject to full compliance with funding conditions of the CDBG program or other funding agency.
6. If this Agreement is terminated for any cause after PSC approval of transfer of Sandy Valley's assets and liabilities, all water system and sewer system assets and related liabilities, regardless of condition or percentage of construction completion, located in Floyd County shall become the property of Southern and all assets and related liabilities, regardless of condition or percentage of construction completion, located in Pike County shall become the property of Pikeville.
- G. The Parties to this Agreement hereby designate the Big Sandy Area Development District to be the administrator of this Agreement. The role of the administrator shall be to report to the respective Parties to this Agreement the progress of its implementation annually, on or near the anniversary of its effective date.
- H. This Agreement shall be governed by and construed in accordance with the laws of the Commonwealth of Kentucky. If any provision of this Agreement is held to be in conflict with any applicable statute or rule of law, or is otherwise held to be unenforceable, the invalidity of such portion shall not affect any or all of the remaining portions of this Agreement.
- I. The Parties agree that venue for any legal dispute that may arise relating to either water facilities or Sewer Project facilities, subject of this Agreement, shall be vested in the Circuit Court of that County where the water facilities or Sewer Project facilities giving rise to such dispute are located.

**IN WITNESS WHEREOF**, officials of the Parties execute this Agreement in triplicate originals as so authorized by their respective governing bodies effective the date set out above.

## PETITION

WE, the undersigned citizens/customers of Sandy Valley Water District of Pike and Floyd county, do hereby request/petition that the customers of this area NOT be acquired by Mountain Water systems nor any other system as operators and that it remain under the present Sandy Valley Water District control. We feel that Sandy Valley has for over 40 years maintained our system with rates that are the lowest in the area and in a dependable manner. We further request that the area between Blackburn's Green House and the Betsy Layne, Stanville and Harold area have sewage treatment capability as soon as is possible and that our Congressmen be aware that we desire Sandy Valley to implement the plans for this sewage treatment plan.

PETITION

WE, the undersigned citizens/customers of Sandy Valley Water District of Pike and Floyd county, do hereby request/petition that the customers of this area NOT be acquired by Mountain Water systems nor any other system as operators and that it remain under the present Sandy Valley Water District control. We feel that Sandy Valley has for over 40 years maintained our system with rates that are the lowest in the area and in a dependable manner. We further request that the area between Blackburn's Green House and the Betsy Layne, Stanville and Harold area have sewage treatment capability as soon as is possible and that our Congressmen be aware that we desire Sandy Valley to implement the plans for this sewage treatment plan

PETITION

WE, the undersigned citizens/customers of Sandy Valley Water District of Pike and Floyd county, do hereby request/petition that the customers of this area NOT be acquired by Mountain Water systems nor any other system as operators and that it remain under the present Sandy Valley Water District control. We feel that Sandy Valley has for over 40 years maintained our system with rates that are the lowest in the area and in a dependable manner. We further request that the area between Blackburn's Green House and the Betsy Layne, Stanville and Harold area have sewage treatment capability as soon as is possible and that our Congressmen be aware that we desire Sandy Valley to implement the plans for this sewage treatment plan.

PETITION

WE, the undersigned citizens/customers of Sandy Valley Water District of Pike and Floyd county, do hereby request/petition that the customers of this area NOT be acquired by Mountain Water systems nor any other system as operators and that it remain under the present Sandy Valley Water District control. We feel that Sandy Valley has for over 40 years maintained our system with rates that are the lowest in the area and in a dependable manner. We further request that the area between Blackburn's Green House and the Betsy Layne, Stanville and Harold area have sewage treatment capability as soon as is possible and that our Congressmen be aware that we desire Sandy Valley to implement the plans for this sewage treatment plan.

PETITION

WE, the undersigned citizens/customers of Sandy Valley Water District of Pike and Floyd county, do hereby request/petition that the customers of this area NOT be acquired by Mountain Water systems nor any other system as operators and that it remain under the present Sandy Valley Water District control. We feel that Sandy Valley has for over 40 years maintained our system with rates that are the lowest in the area and in a dependable manner. We further request that the area between Blackburn's Green House and the Betsy Layne, Stanville and Harold area have sewage treatment capability as soon as is possible and that our Congressmen be aware that we desire Sandy Valley to implement the plans for this sewage treatment plan.
