Re: Case No. 2006-00174 Status Request

Dear Mr. Burford,

I apologize that you did not receive notice on our project at the 50 per cent completion point. Both the building project and the waterline extensions were held up by permit approvals, (building permits and encroachment permits). However, all work has been done.

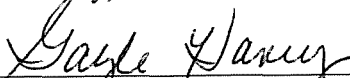

We have moved to our new office location at 16 East Mill Street, under a 45 day temporary certificate of occupancy issued by the Office of Housing, Buildings and Construction.

The loan closing and final inspection on both the building project , and the waterline project, is scheduled for January 23, 2007.

The district will file a copy of the "as-built" drawings and a certified statement that construction has been satisfactorily completed within 60 days, (when we receive the certificate of completion from both contractors).

Once again, I am sorry that I didn't get anything to you earlier. The engineer usually takes care of these details; but that is no excuse.

Sincerely,

Gayle Haney, Manager/Distribution Operator
