Dear Ms. O'Donnell:

I have enclosed for filing in the above-styled cases the original and eleven (11) copies of the RLECs' Response to the CMRS Providers' Consolidated Motion to Compel and Supplemental Responses to the CMRS Providers' First Set of Discovery Requests. Please file-stamp one copy of each and return it in the self-addressed stamped envelope.

Thank you, and if you have any questions, please call me.

Sincerely,

Jane W. Nall

RESPONSE TO CMRS PROVIDERS' MOTION TO COMPEL

Ballard Rural Telephone Cooperative Corporation, Inc. ("Ballard"), Brandenburg Telephone Company, ("Brandenburg"), Duo County Telephone Cooperative Corporation, Inc. ("Duo County"), Foothills Rural Telephone Cooperative Corporation, Inc. ("Foothills"), Gearheart Communications Inc. ("Gearheart"), Logan Telephone Cooperative, Inc. ("Logan"), Mountain Rural Telephone Cooperative Corporation, Inc. ("Mountain"), North Central Telephone Cooperative Corporation ("North Central"), Peoples Rural Telephone Cooperative, Inc. ("Peoples"), South Central Rural Telephone Cooperative Corporation, Inc. ("South Central"), Thacker-Grigsby Telephone Company, Inc. ("Thacker-Grigsby"), and West Kentucky Rural Telephone Cooperative Corporation, Inc. ("West Kentucky") (collectively, the "Petitioners"), for their response to the CMRS Providers' motion to compel, state as follows.

FACTUAL BACKGROUND

This motion to compel arises from the RLECs' initial responses to the CMRS Providers' first set of discovery requests, filed in the above-styled arbitration matters. Subsequent to receiving the RLECs' responses, counsel for the CMRS Providers *first* threatened to file a motion to compel, then suggested a conference call to discuss the issues in lieu of filing a motion. Counsel for the RLECs, hoping to reach a resolution without involving the Commission, agreed to a conference call at the convenience of the CMRS Providers.

Counsel for the RLECs also requested a list of the specific issues identified by the CMRS Providers in order to enable the RLECs time to evaluate the issues and locate additional relevant and responsive information before the conference call, so that the conference call between the parties might actually resolve some of the discovery disputes. However, counsel for the CMRS Providers refused to identify the specific issues to be addressed at the conference call between the parties,

essentially acknowledging that the conference call would be a one-sided endeavor not likely to result in any meaningful resolution of the issues.

During the conference call on September 18, 2006, counsel for the CMRS Providers identified eleven discovery requests to which the RLECs had, by their estimation, partially responded. Counsel for the CMRS Providers then set an arbitrary and unilateral deadline for September 20, 2006, two days after the conference call, to resolve these various issues. A forty-eight hour deadline is anything but reasonable under ordinary circumstances, given the nature of the information sought, but the circumstances here were far from ordinary. Counsel for the CMRS Providers set this "deadline" knowing that many of the people who would be able to provide the responsive information on behalf of the RLECs, to the extent it was relevant and existed, were attending the NECA national conference and would be unavailable.

Nevertheless, the RLECs worked diligently to provide supplemental information to the CMRS Providers, where the requested information was relevant and existed. The RLECs' initially transmitted the supplemental responses by electronic mail, and filed the supplemental responses simultaneously herewith. Despite the RLECs' efforts to resolve the discovery disputes and their willingness to continue working with the CMRS Providers to resolve remaining issues without involving the Commission, the CMRS Providers apparently were not satisfied, hence their consolidated motion to compel.

SUMMARY OF THE ARGUMENT

The CMRS Providers contend that the RLECs failed to fully respond to the remaining disputed requests primarily because the RLECs did not complete the electronic forms propounded by the CMRS Providers as "Exhibit 2" to their discovery requests or provide the requested data in the precise form in which was requested. Nevertheless, the RLECs fully responded by providing the

relevant and responsive information in the form in which the RLECs maintain this data. The RLECs are not required to compile new forms of data or create new documents at the behest of the CMRS Providers. To require the RLECs to generate new forms of data would result in extreme hardship to the RLECs, especially in light of the strict timeframe in which the parties are working.

In addition, the CMRS Providers have failed to show why the information sought, in the precise form they request it, is relevant and necessary here, or why the information provided by the RLECs is deficient. Furthermore, the CMRS Providers contend that some of the requested information is "relevant" because the type of information requested is routinely provided in these proceedings. What is relevant in other proceedings in other states has no bearing on the individual issues presented here. The CMRS Providers have set forth no countervailing justification for the hardship that will fall upon the RLECs if they are required to generate new forms of data, especially when the data that has been produced serves the same purpose. Accordingly, the CMRS Providers' consolidated motion to compel should be denied.

ARGUMENT

The scope of discovery is generally governed by Kentucky Rule of Civil Procedure 26.02, which states in relevant part:

(1) In general. Parties may obtain discovery regarding any matter, not privileged, which is relevant to the subject matter involved in the pending action, whether it relates to the claim or defense of the party seeking discovery or to the claim or defense of any other party . . . *if the information sought appears reasonably calculated to lead to the discovery of admissible evidence.*

CR 26.02(1)(emphasis added). While the scope of discovery is more broadly defined under this rule than for relevancy of evidence at trial, nevertheless the discovery sought must, at a minimum, have "substantial relevancy to a sensible investigation." *Carpenter v. Wells*, 358 S.W.2d 524, 526 (Ky.

Ct. App. 1962)(quoting *Foremost Promotions v. Pabst Brewing Co.*, 15 F.R.D. 128, 130 (N.D. IL. 1953)).

With respect to requests for documents and other tangible things, CR 34.02 permits a party to serve requests upon another party to produce or make available documents or other "tangible things which constitute or contain matters within the scope of Rule 26.02 and which are in the possession, custody or control of the party upon whom the request is served . . ." *Id.* (emphasis added). Under CR 34.02, the responding party is under a duty to,

search for and ascertain whether the requested documents exist and, if they do, where they are located. This duty is tempered by: (1) the fact that the documents requested must be relevant to the subject matter involved in the pending action; (2) the documents requested must be described with "reasonable particularity" before the duty is triggered; and (3) a party can seek a protective order when it believes the request creates annoyance, embarrassment, oppression, undue burden or undue expense.

Wal-Mart Stores v. Dickinson, 29 S.W.3d 796, 804 (Ky. 2000). There is no authority for the proposition that a responding party must generate new forms of data or new documents, different from the data that it keeps in the regular course of business, solely for purposes of responding to a discovery request. Indeed, the responding party is only required to produce existing information and documents within its possession, custody and control that have been identified with sufficient particularity to permit that party to effectively respond. *See* CR 34.01, 34.02 and 26.02. *See also Sithon Maritime Co. v. Holiday Mansion*, 1998 U.S. Dist. LEXIS 5432(D. Kan. 1998)(electronic publication only). Furthermore, as a practical matter, a "court cannot compel a defendant to produce documents that it does not have." *Sithon Maritime Co.*, 1998 U.S. Dist. LEXIS at * 27.

While the use of the discovery process is liberally construed, it is not without limits. As the Kentucky Supreme Court has articulated, "[d]iscovery was never intended to be used as a tactical tool to harass an adversary . . . nor was it intended to make the discovery process so expensive that it

could effectively deny access to information and witnesses or force parties to resolve their disputes unjustly.'" *Primm v. Isaac*, 127 S.W.3d 630, 635(Ky. 2004)(quoting *Sylken v. Elkins*, 644 So.2d 538, 546 (Fla. Dist. Ct. App. 1994)).

In light of these general principles governing the scope and manner of discovery, the requests which remain in dispute will be addressed individually. Set forth below are the requests, the initial responses and the supplemental responses, which have been filed with the Commission in these matters and are intended to replace the excerpts from electronic mail correspondence between the parties, cited in the CMRS Providers' consolidated motion to compel.

I. Requests 1.8, 1.13 and 1.15.

1.8 Identify all of your tandem or end office switches connected to a BellSouth tandem, and the type of trunks (e.g., one-way, two-way, Feature Group C) between the two switches.

ANSWER: The Company objects that this interrogatory is overbroad and unduly burdensome. Without waiving its objection, the Company refers the CMRS Providers to the charts attached hereto as Exhibit 1.

SUPPLEMENTAL ANSWER: Without waiving any objections, the RLECs state that they typically exchange BellSouth toll traffic by means of 2-way FGC toll trunks connecting RLEC and BellSouth tandems. The exchange of other IXC traffic is typically accomplished by means of 2-way FGD trunks connecting RLEC and BellSouth tandems. EAS traffic is typically different in that connectivity is typically made by means of a 2-way EAS trunk between an RLEC tandem and a BellSouth end-office.

1.13 Please identify where (i.e., physical interconnection location(s)) and describe how (i.e., type of trunk group, and nature of traffic currently exchanged over each trunk group) Respondent's network is currently interconnected with the BellSouth network.

ANSWER: The Company objects that this interrogatory is overbroad, unduly burdensome, not relevant to the subject matter of the pending action, and not reasonably calculated to lead to the discovery of admissible evidence. Without waiving its objections, the Company refers the CMRS Providers to the charts attached hereto as Exhibit 1. In addition, see information readily available in the Local Exchange Routing Guide ("LERG") and the Commission's website.

SUPPLEMENTAL ANSWER: Without waiving any objections, the RLECs state that they typically exchange BellSouth toll traffic by means of 2-way FGC toll trunks connecting RLEC and BellSouth tandems. The exchange of other IXC traffic is typically accomplished by means of 2-way FGD trunks connecting RLEC and BellSouth tandems. EAS traffic is typically different in that

connectivity is typically made by means of a 2-way EAS trunk between an RLEC tandem and a BellSouth end-office.

1.15 Does BellSouth currently combine CMRS Provider traffic with other traffic types and deliver such combined traffic to you over the same trunk group(s)? If so, please identify each trunk group over which combined traffic is delivered to you by BellSouth, and each type of traffic that you contend BellSouth has combined for delivery over that trunk group.

ANSWER: The Company objects that this interrogatory is overbroad, unduly burdensome, not relevant to the subject matter of the pending action, and not reasonably calculated to lead to the discovery of admissible evidence. The Company further objects that the phrase "trunk group" is vague and ambiguous. The Company further objects that it cannot answer a question directed at the practices of a non-party to this proceeding because it has no direct knowledge of that non-party's practices. Without waiving its objections, the Company refers the CMRS Providers to the charts attached hereto as Exhibit 1.

SUPPLEMENTAL ANSWER: Without waiving any objections, to the best of the RLECs knowledge, BellSouth currently combines its own intraLATA toll traffic with that of the CMRS carriers and delivers that traffic to the RLECs over BellSouth access toll trunks.

The CMRS Providers argue that the RLECs have failed to fully respond to these requests, which generally seek information about interconnection between the RLECs and BellSouth, because the responses do not provide specific enough information about the RLECs' networks. As the responses and supplemental responses illustrate, the RLECs have fully responded to these requests in accordance with their duty under the Kentucky Rules of Civil Procedure by producing all of the responsive information in their possession, custody and control, in the form in which such information is routinely maintained.

The RLECs have no legal duty to generate new forms of data solely for the purpose of responding to the CMRS Providers' discovery requests. The RLECs do not generate and maintain a trunk-by-trunk inventory and, therefore, this information is not readily available to the RLECs. Moreover, the RLECs cannot easily ascertain the precise information sought, to the extent the information can be ascertained at all, especially in the strict timeframe in which the parties are operating.

The CMRS Providers also argue that that the information is relevant to the issue of whether "the current indirect interconnection arrangements are technically feasible and do not create any undue burden or hardship upon the RLECs." (CMRS Providers' Consolidated Motion to Compel at p. 7.) The information already provided by the RLECs is responsive to this issue. The CMRS Providers have failed to show why it is necessary for the RLECs to generate a trunk-by-trunk inventory in order to evaluate the technical feasibility of the existing indirect interconnection arrangements, or why the information which the RLECs have already provided is not sufficient with respect to this issue. Essentially, the CMRS Providers have failed to demonstrate why the specific information sought is relevant to any issue in these arbitration proceedings.

The RLECs should not be compelled to respond to requests 1.8, 1.13 and 1.15 with any additional information, because the RLECs have fully responded by providing the responsive information within their possession, custody and control, and the CMRS Providers have failed to show any countervailing justification for requiring the RLECs to generate new forms of data.

II. Request 1.11.

1.11 Complete the form attached as Exhibit 2, providing the requested local calling and EAS calling information for each exchange you serve. Provide your response in electronic form.

ANSWER: The Company objects that this interrogatory is overbroad, unduly burdensome, not relevant to the subject matter of the pending action, and not reasonably calculated to lead to the discovery of admissible evidence. Without waiving its objections, see answer to information request 1.9.

SUPPLEMENTAL ANSWER: Without waiving any objections, the RLECs state that they do not maintain the data requested in this interrogatory on a NPA-NXX by NPA-NXX basis. Therefore, the RLECs are not in possession of responsive data in the form requested. The RLECs provided the responsive data regarding the exchanges for which local or EAS calling is available in the form in which this information is maintained on Exhibit 1 to the initial responses.

Again, the CMRS Providers argue that the RLECs' response to this interrogatory is deficient because the RLECs failed to complete "Exhibit 2," which the CMRS Providers attached to their discovery requests. As stated above, the RLECs do not maintain the data sought in Exhibit 2 in the

form that the CMRS Providers have requested. The RLECs fully responded in accordance with their duty under the Kentucky Rules of Civil Procedure by providing all of the responsive information in their possession, custody and control in the form in which such data is maintained. The RLECs are under no legal duty to complete Exhibit 2, or to generate new forms of data solely for the purposes of responding to the CMRS Providers' discovery requests. To require the RLECs to produce data on a NPA-NXX by NPA-NXX basis would be unduly burdensome, to the extent this information could be ascertained at all, especially in light of the strict timeframes in these proceedings.

The CMRS Providers state as grounds for their motion that "[t]his is basic information that is requested and provided as a matter of course in RLEC arbitrations." (CMRS Providers consolidated motion at p. 10.) Frankly, what happens in other RLEC arbitrations is immaterial to these proceedings. The CMRS Providers must show that they are entitled to the information sought because it "is relevant to the subject matter involved in the pending action" CR 26.02(1)(emphasis added). The CMRS Providers have failed to state any reason why this information is relevant and necessary to these proceedings. Therefore, in light of the undue hardship caused by requiring the RLECs to generate this data and the total lack of countervailing justification, the CMRS Providers' motion to compel pertaining to request 1.11 should be denied.

III. Requests 1.44 and 1.48.

1.44 If a CMRS Provider has not established direct interconnection trunks with you, will you allow your customers to make a local call to a CMRS Provider number assigned in the originating exchange or EAS area?

ANSWER: The Company objects that the phrase "direct interconnection trunks" is vague and ambiguous. The Company further objects that this interrogatory seeks the mental impressions of counsel and other information and advice that is subject to the attorney-client and attorney work product privileges. The Company further objects to any implication that it is required or able to exchange traffic with a third-party intermediary. Without waiving its objections, the Company states that the interrogatory does not provide enough information for the Company to answer.

SUPPLEMENTAL ANSWER: Without waiving any objections, the RLECs state that they do not route CMRS calls as local based on the telephone numbers of the CMRS end-user. Instead, the RLECs route calls in accordance with applicable law and regulations.

1.48 If a CMRS Provider does not establish direct interconnection trunks with you, do you intend to block inbound or outbound CMRS Provider traffic?

ANSWER: The Company objects that the phrase "direct interconnection trunks" and the word "block" are vague and ambiguous. The Company further objects that this interrogatory seeks the mental impressions of counsel and other information and advice that is subject to the attorney-client and attorney work product privileges. The Company further objects to any implication that it is required or able to exchange traffic with a third-party intermediary. Without waiving its objections, the Company states that the interrogatory does not provide enough information for the Company to answer.

SUPPLEMENTAL ANSWER: Without waiving any of the objections, the RLECs respond in the negative.

The CMRS Providers state in their motion that the RLECs failed to respond to its request for supplemental information with respect to requests 1.44 and 1.48. In light of the RLECs' supplemental responses, the CMRS Providers' motion to compel with respect to requests 1.44 and 1.48 is now moot.

CONCLUSION

The RLECs should not be compelled to respond to requests 1.8, 1.13, 1.15, 1.11, 1.44 and 1.48 with any additional information, because the RLECs have fully responded by providing all existing responsive information within their possession, custody and control. Furthermore, the CMRS Providers have failed to show any countervailing justification for requiring the RLECs to generate new forms of data. Accordingly, the CMRS Providers' consolidated motion to compel should be denied.

**SUPPLEMENTAL RESPONSES TO CMRS PROVIDERS'
FIRST SET OF INFORMATION REQUESTS**

Ballard Rural Telephone Cooperative Corporation, Inc. ("Ballard"), Brandenburg Telephone Company, ("Brandenburg"), Duo County Telephone Cooperative Corporation, Inc. ("Duo County"), Foothills Rural Telephone Cooperative Corporation, Inc. ("Foothills"), Gearheart Communications Inc. ("Gearheart"), Logan Telephone Cooperative, Inc. ("Logan"), Mountain Rural Telephone Cooperative Corporation, Inc. ("Mountain"), North Central Telephone Cooperative Corporation ("North Central"), Peoples Rural Telephone Cooperative, Inc. ("Peoples"), South Central Rural Telephone Cooperative Corporation, Inc. ("South Central"), Thacker-Grigsby Telephone Company, Inc. ("Thacker-Grigsby"), and West Kentucky Rural Telephone Cooperative Corporation, Inc. ("West Kentucky") (collectively, the "Petitioners"), hereby submit their supplemental responses to the CMRS Providers' First Set of Information Requests, and state as follows.

Interrogatories and Requests for Production

1.8 Identify all of your tandem or end office switches connected to a BellSouth tandem, and the type of trunks (e.g., one-way, two-way, Feature Group C) between the two switches.

ANSWER: The Company objects that this interrogatory is overbroad and unduly burdensome. Without waiving its objection, the Company refers the CMRS Providers to the charts attached hereto as Exhibit 1.

SUPPLEMENTAL ANSWER: Without waiving any objections, the RLECs state that they typically exchange BellSouth toll traffic by means of 2-way FGC toll trunks connecting RLEC and BellSouth tandems. The exchange of other IXC traffic is typically accomplished by means of 2-way FGD trunks connecting RLEC and BellSouth tandems. EAS traffic is typically different in that connectivity is typically made by means of a 2-way EAS trunk between an RLEC tandem and a BellSouth end-office.

1.10 Provide a network diagram for your network showing your switches, transmission nodes, interoffice routes, intercompany transmission facilities, feeder facilities and call record data collection points. Include capacity and in-service plant associated with each switch, node, route, and/or facility.

ANSWER: The Company objects that this interrogatory is overbroad, unduly burdensome, not relevant to the subject matter of the pending action, and not reasonably calculated to lead to the

discovery of admissible evidence. Without waiving its objections, the Company refers the CMRS Providers to the charts attached hereto as Exhibit 1. In addition, see information readily available in the Local Exchange Routing Guide ("LERG") and the Commission's website.

SUPPLEMENTAL ANSWER: Without waiving any objections, the RLECs state that they do not produce as a matter of course, and are not in possession of, diagrams containing the information requested in this interrogatory.

1.11 Complete the form attached as Exhibit 2, providing the requested local calling and EAS calling information for each exchange you serve. Provide your response in electronic form.

ANSWER: The Company objects that this interrogatory is overbroad, unduly burdensome, not relevant to the subject matter of the pending action, and not reasonably calculated to lead to the discovery of admissible evidence. Without waiving its objections, see answer to information request 1.9.

SUPPLEMENTAL ANSWER: Without waiving any objections, the RLECs state that they do not maintain the data requested in this interrogatory on a NPA-NXX by NPA-NXX basis. Therefore, the RLECs are not in possession of responsive data in the form requested. The RLECs provided the responsive data regarding the exchanges for which local or EAS calling is available in the form in which this information is maintained on Exhibit 1 to the initial responses.

1.13 Please identify where (i.e., physical interconnection location(s)) and describe how (i.e., type of trunk group, and nature of traffic currently exchanged over each trunk group) Respondent's network is currently interconnected with the BellSouth network.

ANSWER: The Company objects that this interrogatory is overbroad, unduly burdensome, not relevant to the subject matter of the pending action, and not reasonably calculated to lead to the discovery of admissible evidence. Without waiving its objections, the Company refers the CMRS Providers to the charts attached hereto as Exhibit 1. In addition, see information readily available in the Local Exchange Routing Guide ("LERG") and the Commission's website.

SUPPLEMENTAL ANSWER: Without waiving any objections, the RLECs state that they typically exchange BellSouth toll traffic by means of 2-way FGC toll trunks connecting RLEC and BellSouth tandems. The exchange of other IXC traffic is typically accomplished by means of 2-way FGD trunks connecting RLEC and BellSouth tandems. EAS traffic is typically different in that connectivity is typically made by means of a 2-way EAS trunk between an RLEC tandem and a BellSouth end-office.

1.15 Does BellSouth currently combine CMRS Provider traffic with other traffic types and deliver such combined traffic to you over the same trunk group(s)? If so, please identify each trunk group over which combined traffic is delivered to you by BellSouth, and each type of traffic that you contend BellSouth has combined for delivery over that trunk group.

ANSWER: The Company objects that this interrogatory is overbroad, unduly burdensome, not relevant to the subject matter of the pending action, and not reasonably calculated to lead to the discovery of admissible evidence. The Company further objects that the phrase "trunk group" is

vague and ambiguous. The Company further objects that it cannot answer a question directed at the practices of a non-party to this proceeding because it has no direct knowledge of that non-party's practices. Without waiving its objections, the Company refers the CMRS Providers to the charts attached hereto as Exhibit 1.

SUPPLEMENTAL ANSWER: Without waiving any objections, to the best of the RLECs knowledge, BellSouth currently combines its own intraLATA toll traffic with that of the CMRS carriers and delivers that traffic to the RLECs over BellSouth access toll trunks.

1.22 For each type of traffic that BellSouth delivers to you, please state what call detail information BellSouth provides to you, if any, that identifies such traffic by traffic type, message quantity, call duration, or originating party.

ANSWER: The Company objects that this interrogatory is overly broad, unduly burdensome, not relevant to the subject matter of the pending action, and not reasonably calculated to lead to the discovery of admissible evidence. The Company further objects to any implication that it has an obligation (after the expiration of the parties' settlement agreement) to accept transit traffic from a third-party. Without waiving its objections, the Company states that BellSouth's obligations with respect to delivery of CMRS traffic data should be consistent with the terms of the existing CMRS settlement agreement attached to the Companies petition in this matter.

SUPPLEMENTAL ANSWER: Without waiving any objections, the RLECs state that BellSouth typically provides them with EMR ("110101") records for CMRS traffic. The RLECs object to producing copies of these records due to the presence of CPNI in the records, the otherwise highly confidential nature of those records, and the fact that the CMRS carriers are familiar with the type of information contained in the records. Therefore, producing the actual EMR records is unnecessary and further risks disclosure of highly confidential information.

1.23 Have you ever received from BellSouth or another third party a report (regardless of format) listing minutes of use of traffic that you have terminated from a Telecommunications Carrier with whom you have not established direct interconnection trunks? If so, please provide a copy of such report for the most recent one-month period.

ANSWER: The Company objects that this interrogatory is unduly burdensome, and not reasonably calculated to lead to the discovery of admissible evidence. The Company further objects to any implication that it has an obligation (after the expiration of the parties' settlement agreement) to accept transit traffic from a third-party. The Company further objects that the phrase "direct interconnection trunks" is vague and ambiguous. Without waiving its objections, the Company refers the CMRS Providers to the response to Interrogatory No. 1.22.

SUPPLEMENTAL ANSWER: Without waiving any objections, the RLECs state that BellSouth typically provides them with EMR ("110101") records for CMRS traffic. The RLECs object to producing copies of these records due to the presence of CPNI in the records, the otherwise highly confidential nature of those records, and the fact that the CMRS carriers are familiar with the type of information contained in the records. Therefore, producing the actual EMR records is unnecessary and further risks disclosure of highly confidential information.

1.24 If the answer to Interrogatory 1.23 is "no," has BellSouth or another third party ever offered to provide such a report to you? If so, identify the terms of the offer made to you.

ANSWER: The Company objects that this interrogatory is overly broad, unduly burdensome, not relevant to the subject matter of the pending action, and not reasonably calculated to lead to the discovery of admissible evidence. The Company further objects to any implication that it has an obligation (after the expiration of the parties' settlement agreement) to accept transit traffic from a third-party. Without waiving its objections, the Company refers the CMRS Providers to the response to Interrogatory 1.22.

SUPPLEMENTAL ANSWER: Without waiving any objections, the RLECs state that BellSouth typically provides them with EMR ("110101") records for CMRS traffic. The RLECs object to producing copies of these records due to the presence of CPNI in the records, the otherwise highly confidential nature of those records, and the fact that the CMRS carriers are familiar with the type of information contained in the records. Therefore, producing the actual EMR records is unnecessary and further risks disclosure of highly confidential information.

1.29 Provide your most recent interstate and intrastate access cost studies.

ANSWER: The Company objects that this interrogatory is overbroad, unduly burdensome, and not reasonably calculated to lead to the discovery of admissible evidence. The Company further objects to any implication that it has ever been obligated under applicable federal law to perform cost studies in relation with the proposed interconnection. In addition, the Company objects on the grounds that it seeks confidential, proprietary information. Without waiving its objections, the Company states that it has never performed TELRIC studies.

SUPPLEMENTAL ANSWER: Without waiving any objections, the RLECs refer to the cost studies for the seven RLECs that are cost-regulated companies, which are attached hereto. The remaining RLECs are average schedule regulated companies and, therefore, are not in possession of responsive documents.

1.30 If your rates are not reflected in NECA Tariff F.C.C. No. 5, please identify your interstate switched access rates for local switching, tandem switched facility, tandem switched termination, and tandem switching.

ANSWER: Not Applicable.

SUPPLEMENTAL RESPONSE: South Central Rural Telephone Cooperative refers the CMRS Providers to the tariff documentation showing its access rates, which is attached hereto.

1.44 If a CMRS Provider has not established direct interconnection trunks with you, will you allow your customers to make a local call to a CMRS Provider number assigned in the originating exchange or EAS area?

ANSWER: The Company objects that the phrase "direct interconnection trunks" is vague and ambiguous. The Company further objects that this interrogatory seeks the mental impressions of counsel and other information and advice that is subject to the attorney-client and attorney work

product privileges. The Company further objects to any implication that it is required or able to exchange traffic with a third-party intermediary. Without waiving its objections, the Company states that the interrogatory does not provide enough information for the Company to answer.

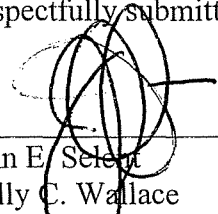

SUPPLEMENTAL ANSWER: Without waiving any objections, the RLECs state that they do not route CMRS calls as local based on the telephone numbers of the CMRS end-user. Instead, the RLECs route calls in accordance with applicable law and regulations.

1.48 If a CMRS Provider does not establish direct interconnection trunks with you, do you intend to block inbound or outbound CMRS Provider traffic?

ANSWER: The Company objects that the phrase "direct interconnection trunks" and the word "block" are vague and ambiguous. The Company further objects that this interrogatory seeks the mental impressions of counsel and other information and advice that is subject to the attorney-client and attorney work product privileges. The Company further objects to any implication that it is required or able to exchange traffic with a third-party intermediary. Without waiving its objections, the Company states that the interrogatory does not provide enough information for the Company to answer.

SUPPLEMENTAL ANSWER: Without waiving any of the objections, the RLECs respond in the negative.

Respectfully submitted,

John E. Seibert

Birmingham, AL 35203

August 18, 2006

Greg Hale – General Manager
Logan Telephone Cooperative
10725 Bowling Green Road
Auburn, Kentucky 42206

Dear Mr. Hale:

Thank you for your response to the letter I sent to you on July 14, 2006, a copy of which I enclose for your convenience.

As I indicated in that letter, there are no provisions for BellSouth to pay for the termination of traffic between CMRS providers and independent companies after December 31, 2006, the termination date for the existing agreement. While we remain hopeful that negotiations and/or arbitration with the CMRS providers will result in a satisfactory compensation arrangement, the existing agreement also calls for BellSouth and the independent companies to negotiate a transit arrangement. Therefore, as I have previously requested, we need to discuss and negotiate the transit traffic issues we have before the end of the year.

In a good faith effort to get these negotiations started, I am enclosing a draft Third Party Traffic Agreement relating to transit traffic issues for your review and consideration. Please send me any comments you have on the agreement. Additionally, in a further attempt to get our negotiations started, I am offering to host a meeting in Louisville, Kentucky at 10:00 AM EST on October 11, 2006 with the independent companies in Kentucky to discuss the enclosed agreement. If this time is not convenient for you, please provide me with an alternative date and time. If you would like me to negotiate with a representative on your behalf, please provide me with the name and contact information for that individual, and I will contact him or her directly.

Please confirm by September 15 that you or your representative will be available on October 11 for these discussions or provide me with further information on how you would like to proceed. Upon receiving confirmation from you that you or your representative will be able to meet on October 11, I will finalize the meeting arrangements.

I look forward to our discussions and to our successful negotiation of these matters.

Sincerely,

A handwritten signature in cursive script that reads "Gene Lunceford".

Enclosures

July 14, 2006

To: All Kentucky ICO's
From: Gene Lunceford, BellSouth Telecommunications
Subject: Transit Traffic in Kentucky

On December 7, 2005, I wrote to you concerning the CMRS transit traffic Settlement Agreement. I appreciate the response from many of you that indicated your intent to negotiate new agreements with the CMRS providers in Kentucky. Hopefully, these negotiations are progressing successfully.

Several of the letters I received from you expressed the expectation that BellSouth would inform the CMRS providers that BellSouth would no longer provide intermediary services unless contracts were in place between the CMRS providers and independent companies after December 31, 2006. To ensure that traffic will flow between carriers as intended for the benefit of all end user customers, BellSouth will not block traffic unless ordered by a state Public Service Commission to do so.

In addition, there are no provisions for BellSouth to pay for the termination of traffic between CMRS providers and independent companies after December 31, 2006, the termination date for the existing agreement. Provisions for the payment of this terminating traffic should be negotiated between the carriers who originate and terminate the traffic in question. The Settlement Agreement provides verbiage on an arbitration process if negotiations with the CMRS providers prove to be unsuccessful.

We would like to propose a meeting with the independent companies in Kentucky to discuss and negotiate CMRS transit traffic and related transit traffic issues. We are open to an industry meeting, meeting with a representative group of ICO's or meeting with an ICO representative. Please let me know by July 28, 2006 how you would like to proceed and when would be a convenient time for a meeting.

Sincerely,

Gene Lunceford

Gene Lunceford
Account Manager
BellSouth Telecommunications
205-321-2013

THIRD PARTY TRAFFIC AGREEMENT

This Third Party Traffic Agreement (Agreement) is made and entered into by and between BellSouth Telecommunications, Inc., having its principal place of business in Atlanta, Georgia, (BellSouth), and _____, an Independent Telephone Company (ITC) having its principal place of business in _____, Kentucky, and sets forth terms and conditions regarding BellSouth's provision of Third Party Traffic services. BellSouth and ITC may be referred to herein individually as a "Party" and collectively as the "Parties."

WHEREAS, BellSouth has offered to provide Third Party Traffic services to ITC pursuant to the terms and conditions set forth in this Agreement; and

WHEREAS, ITC may, from time to time, purchase or otherwise utilize BellSouth's Third Party Traffic services pursuant to the rates, terms and conditions set forth herein;

NOW THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties hereby agree as follows.

A. Terms and Definitions.

1. Facility Based Telecommunications Service Provider – A Telecommunications Service Provider, including ITC, that utilizes its own switches or switches leased from another Telecommunications Service Provider to offer local exchange and exchange access services to its end users.
2. ISP-bound Traffic – Calls to an information service provider or internet service provider (ISP) that are dialed by a caller using a local dialing pattern (7 or 10 digit) for delivery to an ISP server or modem.
3. Local Traffic
 - a. For landline-to-landline traffic, Local Traffic is any intraLATA circuit switched call transiting BellSouth's network that originates from and terminates to other Telecommunications Service Providers, and for which BellSouth does not collect toll charges or access charges, either directly or indirectly, as the intraLATA toll provider for the end user.
 - b. For wireless-to-wireless traffic, landline-to-wireless traffic, and wireless-to-landline traffic, Local Traffic is any circuit switched call transiting BellSouth's network that originates from and terminates to other Telecommunications Service Providers within the same Major Trading Area (MTA), subject to BellSouth's LATA restrictions.
4. Telecommunications Service Provider - A provider of local exchange and/or exchange access telecommunications service that is legally certified to provide service within the Commonwealth of Kentucky or is licensed by the Federal Communications Commission (FCC) to provide Commercial Mobile Radio Service (CMRS). For purposes of this Agreement, the term Telecommunications Service Provider does not include BellSouth, but does include ITC.

DRAFT – For discussion purposes only between BellSouth and KY Independent Companies

5. Platform Provider – A Telecommunications Service Provider that utilizes BellSouth’s switching, with or without other network components, to offer local exchange and exchange access services to its end users.
6. Platform Traffic – Local Traffic or ISP-bound Traffic (1) originating on ITC’s network and terminating to a Platform Provider or (2) originating from a Platform Provider and terminating to ITC.
7. Platform Traffic Service – BellSouth’s provision of services necessary to allow for the exchange of Platform Traffic between two Telecommunications Service Providers.
8. Third Party Traffic Service – Transit Traffic Service or Platform Traffic Service.
9. Transit Traffic – Local Traffic or ISP-bound Traffic (1) originating on ITC’s network that is switched and transported by BellSouth and delivered to another Facility Based Telecommunications Service Provider’s network for termination, or (2) originating on the network of a Facility Based Telecommunications Service Provider other than ITC that is switched and transported by BellSouth and delivered to ITC for termination.
10. Transit Traffic Service – BellSouth’s provision of the functions necessary to allow ITC and another Facility Based Telecommunications Service Provider to exchange Transit Traffic.

B. Transit Traffic Service

1. Transit Traffic Originated by ITC

- (a) BellSouth shall provide Transit Traffic Service to ITC for ITC originated Transit Traffic utilizing the existing interconnection facilities between ITC and BellSouth for the routing of such Transit Traffic. Provided that Transit Traffic is properly routed by ITC pursuant to the Local Exchange Routing Guide (LERG), BellSouth shall deliver Transit Traffic to the terminating Facility Based Telecommunications Service Provider to the extent such terminating Telecommunications Service Provider is interconnected with BellSouth’s network.
- (b) Where BellSouth provides Transit Traffic Service to ITC, BellSouth is not liable or responsible for payment to the terminating Telecommunications Service Provider. Such payment is the sole responsibility of ITC. ITC will establish traffic exchange agreements or other appropriate agreements to address compensation with terminating Telecommunications Service Providers for the Transit Traffic delivered pursuant to this Agreement. In the event that the terminating Telecommunications Service Provider imposes on BellSouth any charges or costs for the delivery of ITC originated Transit Traffic, BellSouth shall dispute such charges with the terminating carrier. BellSouth also shall notify ITC in writing of the disputed charges. If, after BellSouth’s formal challenge to the charges for the delivery of ITC originated Transit Traffic, a court of competent jurisdiction issues a final order requiring BellSouth to pay any such terminating charges to a terminating Telecommunications Service Provider for the delivery of ITC Transit Traffic, ITC shall pay the third party terminating

carrier directly for such Transit Traffic or shall reimburse BellSouth for the amounts paid by BellSouth for ITC originated Transit Traffic.

- (c) BellSouth shall bill ITC for ITC originated Transit Traffic at the rate of \$.0025/MOU beginning with the Effective Date of this Agreement. Beyond the initial three-year term of this Agreement, BellSouth shall continue billing ITC at the \$.0025/MOU rate unless and until the Parties negotiate a successor agreement (including rates). The Parties shall incorporate the billing for Transit Traffic Service for ITC originated Transit Traffic into the existing settlements processes between the Parties. Upon request, BellSouth shall provide to ITC supporting documentation and usage/summary reports associated with ITC originated Transit Traffic for purposes of verifying Transit Traffic billing.
- (d) ITC may elect one of two options for measuring ITC originated Transit Traffic minutes of use for which charges are due.
 - (i) ITC may utilize its originating switch recordings to compensate BellSouth based upon actual ITC Transit Traffic minutes of use (“Actual Measurements”). If ITC elects to utilize Actual Measurements, ITC shall provide a monthly report to BellSouth reflecting actual ITC Transit Traffic minutes of use, along with payment on a per minute of use basis at the applicable rate within sixty (60) days of the date of usage.
 - (ii) In lieu of Actual Measurements, ITC may provide to BellSouth a percent local usage factor (PLU) estimating the percentage of total minutes of use delivered to BellSouth that constitutes ITC Transit Traffic (“Estimated Measurements”). The PLU must be provided to BellSouth in writing within 30 days of the Effective Date hereof, or within 30 days of delivering ITC Transit Traffic to BellSouth. In the event ITC fails to provide a PLU to BellSouth during this timeframe, BellSouth shall calculate a PLU to be used until a PLU is provided. To the extent a PLU is provided after the default PLU has taken effect, the PLU provided by ITC shall be applied on a prospective basis only. The PLU may be updated annually or sooner in the event of a change in Local Traffic or ISP-bound Traffic volume. The Party calculating the PLU shall provide the other Party with the data, including any available call detail records that support the PLU calculation.

BellSouth reserves the right to contest the accuracy of both the Actual Measurements and Estimated Measurements provided by ITC and may conduct audits or internal studies for verification. In the event a dispute arises regarding Actual Measurements or Estimated Measurements, BellSouth will continue to bill based upon information provided by ITC or utilizing the assigned PLU until the dispute is resolved. If BellSouth and ITC are unable to successfully negotiate a resolution of the dispute within 30 days of written notice of the existence of a dispute, the aggrieved Party shall seek dispute resolution with a court of competent jurisdiction. Once the dispute is resolved, the Parties shall utilize the resulting Actual Measurements or Estimated Measurements on a going forward basis. The Parties shall make any corrections retroactive to the point in time when the dispute was initiated.

2. Transit Traffic Originated by a Third Party Telecommunications Service Provider

- (a) BellSouth shall provide Transit Traffic service to ITC for Transit Traffic originated by other Telecommunications Service Providers utilizing the existing interconnection facilities

between ITC and BellSouth for the routing of such Transit Traffic. Provided that Transit Traffic is properly routed by the originating Telecommunications Service Provider pursuant to the Local Exchange Routing Guide (LERG), BellSouth shall deliver such Transit Traffic to ITC for termination.

- (b) Where BellSouth delivers Transit Traffic to ITC for termination, BellSouth shall not bill ITC any transit charges pursuant to this Agreement. Further, BellSouth is not liable or responsible for payment to ITC for traffic originated by other Telecommunications Service Providers. Amounts ITC bills BellSouth (or if ITC does not bill BellSouth, amounts BellSouth calculates for compensation to ITC through the monthly settlement process) under other agreements shall not include any minutes of use for Third Party Transit Traffic.
- (c) When delivering Transit Traffic to ITC for termination, and where available, BellSouth shall generate and deliver to ITC, at no charge to ITC, industry standard call detail records known as Exchange Message Interface (EMI) 1101-01 records for ITC's use in billing originating Telecommunications Service Providers. Where industry standard call detail records are not available, BellSouth shall provide to ITC available usage, billing and summary data sufficient for billing purposes. Where call detail records are not generated consistent with industry standard guidelines and summary data is not available, ITC shall negotiate with the originating Telecommunications Service Providers, as appropriate, to develop a methodology for compensation for such Transit Traffic. Notwithstanding the foregoing, the unavailability of such call detail records or summary data does not create any obligation for BellSouth to compensate ITC for such Transit Traffic. BellSouth shall not be liable for any terminating compensation to ITC or any third party Telecommunications Service Provider. BellSouth shall work cooperatively with ITC to identify the originating Telecommunications Service Provider and the minutes of use for ITC. BellSouth will not block traffic unless ordered by the Kentucky Public Service Commission to do so.

C. Platform Traffic Service.

- 1. Platform Traffic Service provides for ITC's exchange of traffic with Platform Providers utilizing BellSouth switching. BellSouth and ITC shall utilize the existing interconnection facilities between ITC and BellSouth for the routing of such Platform Traffic. Where BellSouth provides Platform Traffic Service, BellSouth is not liable or responsible for payment to ITC or to the Platform Provider. Such payment is the sole responsibility of the originating Telecommunications Service Provider. By utilizing BellSouth's Platform Traffic Service, the originating Telecommunications Service Providers are committing to establishing traffic exchange agreements or other appropriate agreements to address compensation between and among originating and terminating Telecommunications Service Providers.
- 2. For traffic originating from a Platform Provider, BellSouth will generate and provide to ITC, at no charge, summary usage data sufficient for billing purposes reflecting the minutes of use generated by such Platform Provider. BellSouth shall not be liable to ITC or the Platform Provider for any compensation or other costs associated with Platform Traffic.

3. For traffic originating from ITC, BellSouth will deliver such traffic to the Platform Provider at no charge to ITC.

D. General

1. Audits. ITC may audit BellSouth's records to the extent necessary to verify ITC originated Transit Traffic minutes of use or Transit Traffic or Platform Traffic minutes of use terminated to ITC. Audits may be performed no more than once each calendar year to evaluate the accuracy of the industry standard call detail records or summary reports provided by BellSouth pursuant to this Agreement. Audits may be performed on at least fifteen (15) days prior written notice to BellSouth, subject to mutually acceptable scheduling. Each Party will cooperate fully in any such audit, providing reasonable access to employees, books and records reasonably needed to assess the accuracy of the call detail records provided by BellSouth. In the event a dispute arises regarding the results of the audit, BellSouth will continue to bill based upon its records until the dispute is resolved. If BellSouth and ITC are unable to successfully negotiate a resolution of the dispute within 30 days after completion of the audit, the aggrieved Party shall seek dispute resolution with a court of competent jurisdiction. Once the dispute is resolved, the Parties shall utilize the minutes of use reflected in the audit, as determined through the dispute resolution process, on a going forward basis. The Parties shall make any corrections retroactive to the period covered by the audit.
2. ITC Transit Traffic Service. If ITC provides transit services to BellSouth, ITC will provide such services to BellSouth at the same rates, terms, and conditions that govern the provision of Transit Traffic Services by BellSouth.
3. Term. The term of this Agreement shall become effective with the date of the last signature executing the Agreement (Effective Date). It shall continue in effect thereafter for a period of three (3) years. The rates, terms, and conditions set forth in this Agreement shall remain in full force and effect until amended in writing by all Parties or unless and until the Parties negotiate a new successor agreement clearly stating that the agreement supercedes the rates, terms and conditions in this Agreement.
4. Change in Law. (i) To the extent any effective law, statute, ordinance, or state or federal regulatory ruling or order applicable to the terms of this Agreement (collectively or individually referred to herein as "Legal Requirement" but expressly excluding a Party's tariff) establishes, changes or clarifies the obligations of the Parties with respect to ITC Transit Traffic, Third Party Transit Traffic or Platform Traffic Service, and such Legal Requirement imposes obligations different from those set forth in this Agreement, then upon thirty (30) days written notice, either Party may request renegotiations of this Agreement consistent with such Legal Requirement. Any rates, terms or conditions agreed upon by the Parties shall be substituted in place of those previously in effect and shall be deemed to be effective under this Agreement as of date the Parties amend this Agreement in writing to reflect the new rate, term, or condition unless the order by the court, state commission or the Federal Communications Commission (FCC) requires a different effective date. If the

Parties are unable to reach an agreement as to an amendment to this Agreement consistent with the Legal Requirement within 60 days following the request of renegotiations, the Parties shall petition the relevant state commission to resolve the dispute. The Parties enter into this Agreement without prejudice as to any position each may take with respect to similar future agreements between the Parties or with respect to positions each may have taken previously or may take in the future in any legislative, regulatory or other public forum addressing any matters, including matters related to the rates to be charged for ITC Transit Traffic, call records for billing purposes, or the types of arrangements prescribed by this Agreement. Nothing in this Agreement shall preclude any Party from participating in any proceeding before the state commission or FCC relating to any issue related to the subject matter of this Agreement or from petitioning the state commission or FCC to address any issue related to the subject matter of this Agreement.

5. The Parties to this Agreement are independent contractors. No Party is an agent, representative or partner of any other Party, and no Party has the right, power or authority to enter into any agreement for or on behalf of, or incur any obligation or liability of, or otherwise bind, any other Party. This Agreement shall not be interpreted or construed to create an association, joint venture, or partnership between the Parties or to impose any partnership obligation or liability upon the other Party.

6. Limitation of Liability

(a) Liability for Acts or Omissions of Third Parties. No Party to this Agreement shall be liable to another Party for any act or omission of any third party Telecommunications Service Provider originating Transit Traffic or Platform Traffic destined for ITC or terminating Transit Traffic or Platform Traffic originated by ITC.

(b) Limitation of Liability. A Party's liability for any loss, cost, claim, injury, liability or expense, including reasonable attorneys' fees, relating to or arising out of any cause whatsoever, whether based in contract, negligence or other tort, strict liability or otherwise, relating to the performance of this Agreement, shall not exceed a credit for the actual cost of the services not performed or improperly performed.

(c) Under no circumstance shall any Party be responsible or liable for indirect, incidental, or consequential damages, including, but not limited to, economic loss or lost business or profits, damages arising from the use or performance of equipment or software, or the loss of use of software or equipment, or accessories attached thereto, delay, error, or loss of data.

(d) Disclaimer. EXCEPT AS SPECIFICALLY PROVIDED TO THE CONTRARY IN THIS AGREEMENT, THE PARTIES MAKE NO REPRESENTATIONS OR WARRANTIES CONCERNING THE SPECIFIC QUALITY OF ANY SERVICES, OR FACILITIES PROVIDED UNDER THIS AGREEMENT. THE PARTIES DISCLAIM, WITHOUT LIMITATION, ANY WARRANTY OR GUARANTEE OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, ARISING FROM COURSE OF PERFORMANCE, COURSE OF DEALING, OR FROM USAGES OF TRADE.

7. Dispute Resolution. In the event any dispute arises as to the interpretation or enforcement of this Agreement, and the Parties are unable to resolve the dispute informally through negotiation, the Parties shall petition a court of competent jurisdiction for resolution of the dispute.
8. Nonexclusivity. Nothing in this Agreement shall affect a Party's right to seek interconnection with any carrier or preclude a Party from negotiating an interconnection agreement with another carrier consistent with Sections 251 and 252 of the Telecommunications Act of 1996, as amended. Nothing herein shall be construed as a waiver by a Party of any rights afforded or obligations imposed by applicable law.
9. Entire Agreement. The rates, terms, and conditions set forth in this Agreement shall comprise the complete and entire Agreement between the Parties with respect to Transit Traffic and Platform Traffic. The rates, terms and conditions of this Agreement shall govern unless and until a Party seeks changes pursuant to a Legal Requirement or the Parties negotiate a successor agreement as set forth herein. No Party shall be bound by any definition, condition, provision, representation, warranty, covenant or promise other than as expressly stated in this Agreement or as is contemporaneously or subsequently set forth in writing and executed by a duly authorized officer or representative of all Parties.
10. Force Majeure. In the event performance of this Agreement, or any obligation hereunder, is either directly or indirectly prevented, restricted, or interfered with by reason of fire, flood, earthquake or like acts of God, wars, revolution, civil commotion, explosion, acts of public enemy, embargo, acts of the government in its sovereign capacity, labor difficulties, including without limitation, strikes, slowdowns, picketing, or boycotts, unavailability of equipment from vendor, or any other circumstances beyond the reasonable control and without the fault or negligence of the Parties, an affected Party, upon giving prompt written notice, shall be excused from such performance on a day-to-day basis to the extent of such prevention, restriction, or interference; provided, however, that the Parties shall use diligent efforts to avoid or remove such causes of non performance and shall proceed whenever such causes are removed or cease.
11. Modification of Agreement. No modification, amendment, supplement to, or waiver of the Agreement or any of its provisions shall be effective and binding upon the Parties unless it is made in writing and duly signed by the Parties.
12. Severability. If any provision of this Agreement, or part thereof, shall be held invalid or unenforceable in any respect, the remainder of the Agreement or provision shall not be affected thereby, provided that the Parties shall negotiate in good faith to reformulate such invalid provision, or part thereof, or related provision, to as closely reflect the original intent of the Parties as possible, consistent with applicable law, and to effectuate such portions thereof as may be valid without defeating the intent of such provision.
13. Waivers. A failure or delay of a Party to enforce any of the provisions hereof, to exercise any option which is herein provided, or to require performance of any of the provisions hereof shall in no way be construed to be a waiver of such provisions or options, and each

Party, notwithstanding such failure, shall have the right thereafter to insist upon the performance of any and all of the provisions of this Agreement.

14. Governing Law. This Agreement shall be governed by and construed and enforced in accordance with the laws of the Commonwealth of Kentucky without regard to conflict of laws principles.
15. Assignments and Transfers. This Agreement shall not be assigned by any Party without the prior written consent of the other Parties, which shall not be unreasonably delayed, conditioned, or withheld.
16. Notices. Every notice, consent or approval of a legal nature, required or permitted by this Agreement shall be in writing and shall be delivered either by hand, by overnight courier or by US mail postage prepaid, or email if an email address is listed below, addressed to:

BellSouth Telecommunications, Inc.
BellSouth Account Manager

or at such other address as the intended recipient previously shall have designated by written notice to the other Parties. Unless otherwise provided in this Agreement, notice by mail shall be effective on the date it is officially recorded as delivered by return receipt or equivalent, and in the absence of such record of delivery, it shall be presumed to have been delivered the fifth day, or next business day after the fifth day, after it was deposited in the mails.

17. Rule of Construction. No rule of construction requiring interpretation against the drafting Party hereof shall apply in the interpretation of this Agreement.
18. Headings of No Force or Effect. The headings of Sections of this Agreement are for convenience of reference only, and shall in no way define, modify or restrict the meaning or interpretation of the terms or provisions of this Agreement.

DRAFT – For discussion purposes only between BellSouth and KY Independent Companies

- 19. Multiple Counterparts. This Agreement may be executed in multiple counterparts, each of which shall be deemed an original, but all of which shall together constitute but one and the same document.
- 20. Good Faith Performance. Each Party shall act in good faith in its performance under this Agreement and, in each case in which a Party's consent or agreement is required or requested hereunder, such Party shall not unreasonably withhold, condition, or delay such consent or agreement.
- 21. Survival. The Parties' obligations under this Agreement which by their nature are intended to continue beyond the termination or expiration of this Agreement shall survive the termination or expiration of this Agreement.

IN WITNESS WHEREOF, the Parties have executed this Agreement the day and year written below.
