RE: Case No. 2006-00320
Bluegrass Cellular

Dear Mr. and Mrs. Piercy:

This is in response to your letter received on July 10, 2006 requesting information regarding the application for approval to construct a wireless tower facility. The letter has been placed in the official case file of this proceeding and the Commission will carefully analyze this application before rendering its final decision. By this letter, the attached request for information has been forwarded to the Applicant for a response.

Commission Staff requests the Applicant to submit a written response to the request for information, with a copy to the Commission, within 15 days of the date of this letter. After receipt of the Applicant's response, the party requesting the information should submit to the Commission a request for intervention, if intervention is desired. If no request for intervention is received within 30 days of the date of this letter, the Commission Staff will presume that the Applicant's reply has satisfied the concerns raised in the attached request for information.

It may be helpful for you to know the state authority, specifically that of the Public Service Commission, in this matter has been limited by federal law. For example, Section 704 of the federal Telecommunications Act of 1996 prohibits this Commission from regulating the placement of wireless facilities on the basis of environmental effects of the radio frequency emissions to the extent that facilities comply with Federal Communications Commission regulations. Section 704 also prohibits a state or local government from prohibiting telecommunications facilities construction if such denial will have the effect of prohibiting service. In addition, this Commission is required by statute to ensure that utility service, including telecommunications service, is adequate and reliable. The Commission does, however, consider appropriate placement of necessary facilities within applicable engineering boundaries. It also pursues a policy of collocation of facilities whenever possible.

Mr. and Mrs. Piecy

Case # 2006-00320

RECEIVED

JUL 10 2006

PUBLIC SERVICE
COMMISSION

Dear Commission,

I have some concerns about the proposed construction of a cell facility & tower in our residential neighborhood. Research has shown the connection between living in areas with cell towers and an increase in cancer and other health issues. As a mother of 4 children this concerns me greatly. Is this construction a health hazard?

What is this 500' radius for?

We need more information on the 200' offset from variable access & utility easement that seems to take in a great percentage of our property. Why the need for this huge access area? I don't understand. We strongly object to their use of our land. Unclear what they want. Need more info.

These are all heartfelt concerns for me & my family.

Sincerely,

Dallas & Connie Piercy
