

2006-4/15

I'm writing in regard to the increase in the electric bill. We already have enough taxes put on our bills. How much more does people think we can pay. Don't tell me there hasn't been a raise in 20 years. In 1996 I used 763 kil. and my bill was only \$50.20 This month I used 745 and my bill was 63.24 (Compare) I have not a clue how much your salary is a year but ours is almost in the poverty level. I was hoping I could put in a heat pump when my husband retires but no way now. I

Know I couldn't pay the bill. My Manu has been a widow for 25 years and she got lucky because she is on KIL. She used 1609 kil. and her bill was 96.00. She couldn't pay Rec bill on her Social

Security check of only 400.00 month. There are a lot of people that are not lucky enough to be on KIL with a very limited income. Some of these will have to choose heat or food. I know this will not help but if there are a few caring people out there please think about this.
