Beth O'Donnell  
Executive Director  
Kentucky Public Service Commission  
P O Box 615  
Frankfort, KY 40602

Ms O'Donnell:

This is in regard to the public hearing on March 14, 2007 pertaining to the fuel adjustment for the period November 1, 2004 to October 31, 2006 in case number 2006-00512, Blue Grass Energy Cooperative Corp.

When I received my February 2005 edition of "Kentucky Living", The Magazine of Blue Grass Energy, I opened the cover to the first page. There was a nice letter written by Governor Ernie Fletcher. It was a full page that in essence said he would do everything to keep electric rates down. A full page of nothing but blah, blah, blah, etc. I could tell who supported who. With Blue Grass Energy publishing his nice letter, who is going to object if they receive more money?

In January 2006, my electric bill had an additional \$40 added to it, twenty four dollars and nineteen cents for a fuel adjustment fee and a \$15.85 environmental fee.

Yes, Blue Grass Energy will say they have not had an increase in rates, but, why do they need a rate increase when all they have to do is add fees. And is this process within the laws, regulations and/or policies of the Commonwealth of Kentucky? Is the Governor going to object to this in an election year? I think not.

As I was led to believe years ago, electric companies contracted for coal for periods of one year or maybe three years. Prices were reasonably stable, then some twenty years or so, three to five dollars or so would be credited to our electric bill as a fuel adjustment.

I wondered then why that money wasn't put into some type of fund for later use.

Although my fuel fee is not as much as \$15 dollars every month, it exceeds ten dollars.

No, they should not be authorized to go back and collect for expenses/charges for time already past. If that has turned out to be a problem, so be it. I may have a monetary shortfall during that period, also.

What if General Motors decided to charge me additional fees for the Chevrolet truck I purchased in 2002? Something like this could cause every one to do it.

Protect the consumer and disallow this requested action.

Let the Blue Grass Energy managers/purchasing agents earn their pay by applying their education and skills. It seems like collective, the more educated society gets the more stupid we act.

In case my point is missed, I oppose any authorization to allow the electric corporation to collect any further adjustment fee for the period in question. I am not happy with what they have already done. Your office/agency has the authority to "stop the buck".

Respectfully.
