

From the Desk of Pam Castle

To: Mr. Woolley, McDonald's, Heaberlin, Mackey, Pickard, Public Service Commission, Methodists, other e-mail cc's Date: January 12, 2007

From: Pam

Subject: Mr. Whitaker

You will need to contact him. I WILL fax this to the Methodists, but I am not contacting him any more.

McDonald's second envelope will also include some information about their trans fat issue which may help them out as well as keep us from ingesting even more harmful stuff about which they will learn 20 years or so from now. I would prefer that it get done now and PREVENT things. I don't have their answers, but I do know some folks who can give them some.

Brian Freeman did not get copies. I had called his office prior to calling the Public Service Commission to see if he was just a property owner in the area or the owner of the cell phone place. His phone answering person said he would return the call. He has not for two days. I am assuming that shows lack of interest so I did not waste my time copying him.

I spoke to Mackey's office, Pickard's and Heaberlin and received permission to fax a copy of the first information. You did not request it, but I was given your fax number when I called the bank. You may share this with the other banks and Belks and whomever you think might be interested. Tell them NOT to contact me. I have a DSL problem at the Clinic and a computer that has disconnected from their network so I have too many things on plate to do any more in this than I have done. Then there is also the thing that I was told to stop all that I was doing and take care of myself. Well, I have an obligation to the people who have worked at the Clinic and helped put the food on our table for years. They are all younger than me and should have the opportunity to live to my age without added health issues, in my opinion.

If I die a little sooner than necessary because I took the time to do this, then so be it.

HOWEVER, this IS where I draw the line and quit. I have given you all resources, the Commissioner more than you. Make sure they do their job which I was told was partially to send questions they could not answer on to FCC.
