RE: The application of Kentucky Utilities Company for an Order Authorizing the Issuance of Securities and the Assumption of Obligations (Case No. 2007-00024)

Dear Ms. O'Donnell:

Pursuant to Ordering Paragraph No. 8 of the Commission's Order in the aforementioned proceeding, Kentucky Utilities Company ("KU") hereby files an original and three (3) copies of information related to an issuance under said Order.

On October 25, 2007, KU borrowed \$70 million from Fidelity Corporation in accordance with the order issued March 19, 2007 in the above-referenced case. The details of the loan are shown below:

Borrower:	Kentucky Utilities Company
Lender:	Fidelity Corporation
Amount:	\$70 million
Maturity Date:	October 25, 2019
Interest Rate:	5.71%
Price Paid:	100%
Proceeds:	\$70 million
Commissions Paid:	None
Legal Costs:	None
Security for Loan:	None
Interest Payments:	April 25 and October 25 commencing April 25, 2008

The proceeds of the loan were used to fund capital projects described in the application. The issuance of this \$70 million completes the debt issued under the authority granted in this order.

Ms. Elizabeth O'Donnell
November 6, 2007

The interest rate was set using the lowest rate quoted to KU at 1.28% above the yield on the ten-year treasury bond (4.43%). The supporting price indications from the investment banks are attached along with a copy of pages from Bloomberg showing the yield on the treasury bond. The lowest rate quoted to KU by the investment banks was lower than the average bid quoted to E. ON A.G. Once again, the supporting price indications are attached. The bids are summarized in the table below:

	KU Pricing	E.ON AG Pricing
Low bid above ten-year treasury	1.28%	
Ten-year treasury rate	4.43%	
All-in cost	5.71%	
Average bid above ten-year treasury		1.32%
Ten-year treasury rate		4.43%
All-in cost		5.75%

The 128 basis point spread for this 12 year borrowing is favorable to recent ten-year debt issuances from other energy companies, one with a similar credit rating and one with a lower rating. (See table below along with attached support documentation).

Issuer	Moody's / S&P	Maturity	Spread
EDP Finance	A2 / A-	02/02/2018	+ 163 bps
Centerpoint Energy Resources	Baa3/BBB	11/01/2017	+ 165 bps

Please confirm your receipt of this information by placing the File Stamp of your Office on the enclosed additional copy and returning it in the envelope provided. Should you have any questions regarding this transaction or this information, please contact me or Don Harris at (502) 627-2021.

Sincerely,

Rick E. Lovekamp

Economic and Treasury market update

- Poor Q3 '07 earnings led by the bank sector, weak housing data, dovish Fed commentary among other negative headlines fueled a flight-to-quality move last week
 - US Treasury yields fell by 22-42 bps across the curve, led by front-end maturities
 - Notably, 2-year yields rallied by 42 bps (the steepest weekly drop in 5 years), and the 2/30s curve steepened by 20 bps
 - Equity markets fell sharply on the week, with the DJIA, S&P and Nasdaq declining 4.1%, 3.9% and 2.9% on the week, respectively
 - Credit markets also experienced a softer tone, as high grade credit spreads gave up nearly half of the gains made since the Fed's rate cut
- While JPMorgan acknowledges that there is an increased chance of a 25bp ease at the October 30/31st Fed meeting (market expectations of a Fed ease has increased to 92%), we maintain our view that the Fed will stay on hold for several reasons:
 - Although there were numerous headlines that caused last week's flight-to-quality, the majority of these risks have been well known for some time and should not have resulted in such an abrupt reaction
 - Bank balance sheet pressures have begun to show some signs of lessening
 - Despite negative headlines about Structured Investment Vehicles (SIVs) last week, the risk of a fire sale of SIV assets seems to be small
- Higher energy prices, renewed caution in the credit markets, and recent spate of weaker-than-expected economic data add downside risk to the growth outlook
 - Crude oil prices hit a record \$90 last week, which is likely to weigh on consumer spending in Q4 as household purchasing power gets pinched
 - The first reports for the September housing market indicate that supply continued to weaken, as housing starts plummeted and homebuilder sentiment hit fresh lows

 * 4.750% Treasury due Feb-2027

Historical treasury rates (%)

Investment grade primary and secondary market update

- In a sharp reversal of the month-long trend of credit market stabilization, risk aversion became the headline theme this past week in the credit markets
 - The JULI high grade corporate bond index widened by 6bps last week with the bank and financial services sectors feeling the brunt of the pain widening by 10+bps, however the utility and energy sectors outperformed only widening 3bp and 1bp respectively
- Q3'07 earnings reporting season has gotten off to a disappointing start, led by the bank sector. With 26% of the S&P 500 companies having reported as of last Friday, on a share-weighted basis, year-over-year growth is down 1.8% for the index
- Last week the Treasury and several major banks unveiled a preliminary plan to establish a master liquidity enhancement conduit ("M-LEC"), up to \$80-100bn in estimated size in order to accelerate the return of the asset-backed commercial paper market to some semblance of normalcy
 - Though the details have yet to be finalized, M-LEC will buy highly rated assets from certain existing SIVs that elect to access this new form of liquidity, which will be a positive for the market if the plan succeeds
- Despite the softer market tone observed last week, a robust \$25bn in supply priced in the new issue market, bringing October's month-to-date volume to \$57bn
 - Supply for the remainder of October is expected to remain modest in the midst of Q3 earnings season, however new issue activity is expected to accelerate in November
- Though high grade credit spreads widened last week and new issue premiums may have increased slightly for near-term issuers, the strong rally in US Treasury yields helps to mitigate these factors from an overall coupon perspective

Economic and Treasury market update

- JPMorgan's forecast of a 25bp rate cut was reinstated due to volatile credit markets, reduced growth prospects and the tone of recent Fed speeches
 - Market participants are pricing in a small probability of a 50bp cut
- Recent very weak housing activity indicators and rising oil prices are expected to have an impact on consumer spending causing JPMorgan to revise down our 4Q07 GDP growth forecast to only 1.0% increasing the likelihood of an ease at the December FOMC meeting as well
 - Existing homes sales dropped 8% (an all-time low) in September, while the report reflects activity from August, the height of the credit crunch, financial conditions are still tight and is expected to fall further in the months ahead, but the pace of declines should start to ease
 - Manufacturing data was negative as the Richmond Fed manufacturing index declined to -5 and September durable goods orders declined 1.7%, both lower than forecasted
 - Uncertainty remains elevated and we still forecast a 30% probability of a US recession but our best guess remains that the US economy will not break as healthy corporate and EM fundamentals counterbalance the negative force of US housing
- Market fundamentals are becoming less relevant in the corporate bond market as negative headlines are the significant driver of spread widening and flight to quality trades

Investment grade primary and secondary market update

- News headlines are giving investors reasons to re-assess their views toward the challenges facing the economy and financial markets. There are some key drivers that are creating a return to risk aversion
 - SIV refinancing concerns
 - A flurry of disappointing 3Q07 earnings from the financial sector and expectation of further corporate balance sheet writedowns
 - The aforementioned weak housing data that continues to plague the market
 - The surge in crude oil prices
 - Geopolitical tensions in the Middle East
- New issue supply was tighter last week at around \$12Bn as many issuers remained in earnings related blackout periods
 - In the utility and pipeline sector, JPMorgan led a \$300MM 10-year offering for Panhandle Eastern Pipe Line (Baa3/BBB-) which received a positive reception from the market and priced at +182bp
 - EDP (A2/A-), a Portuguese utility, issued \$1Bn of a 5yr at +140bp and \$1Bn of a 10yr at +163bp. The offering included a change of control put
- On Friday, Puget Energy announced that it had signed a merger agreement with a consortium of infrastructure investors led by Macquarie who will acquire 100% of the equity in a transaction with an enterprise value of approximately \$7.4Bn
 - Spread widening on Puget's FMB operating company bonds was limited to roughly 20bp given the significant equity contribution from the consortium, regulated nature of the utility and expectation of maintenance of investment grade ratings

Dear Mrs. Heintzen,

as per your request we want to inform you that we would expect a USD 70m 12 year E.ON Private Placement to come at an all-in-spread of approximately 58bp over Libor. Please note that this information is purely indicative and no tradeable price.

Best regards

Betreff: USPP Indication

Hallo Frau Heintzen

As discussed on the phone, for a 12y USPP for E.ON we would indicatively quote Benchmark + 125 Basispoints including all fees. Based on current Swaps spread of 71 Basispoints this roughly equates Midswaps + 54 Basispoints.

Benchmark is the 4.75% Treasury Bond 15Aug2017.

Kind Regards, Martin Sohn

Betreff: FW: Spread

Dear Lioba,

Please find the indicative pricing for a USD private placement of 75mm dollars with 12 year maturity:
UST + 147 bps (all-in).
Reference Treasury: On the run 10 year US Treasury 4.75% coupon 8/17 yielding 4.43%.

Many thanks,
GS Team

Subject: Spread

Good morning,

May I bother you again with an indication for an "all in spread" that E.ON would have to pay for an USD 75m private placement with a tenor of 12 years over Treasuries? As usual this is for internal purposes only. I'd appreciate if you could send me an email and mention the reference treasury as well. I know that it is a bit at short notice but do you think that I can have the indication today until 2pm our time?

Mit freundlichen Grüßen/Kind regards

Lioba
