RE: Case# 2007-00062

Dear Mr. Bowman,

Enclosed, please find a revised application (and four copies) for our Case# 2007-00062. Please disregard our original submittal for this case which was received by your office on June 4, 2007.

As stated in our telephone conversation, after submitting our original application we discovered that we needed to increase the tower height from 300' to 325'. Instead of submitting multiple amendments to the original application, we felt it best to submit an entire revised application.

New notification letters were sent (see exhibits O and P) on June 15, 2007.

Please feel free to contact me with any questions regarding this information

Sincerely,

Matthew J. Wallack

**COMMONWEALTH OF KENTUCKY
BEFORE THE PUBLIC SERVICE COMMISSION**

IN THE MATTER OF:

APPLICATION OF SHARED SITES WV, LLC.)
AND AMERICAN CELLULAR CORPORATION)
FOR ISSUANCE OF A CERTIFICATE OF PUBLIC)
CONVIENENCE AND NECESSITY TO CONSTRUCT)
A WIRELESS COMMUNICATIONS FACILITY AT)
8150 ALBANY ROAD)
BURKESVILLE, KY 42717)
IN THE WIRELESS COMMUNICATIONS LICENSE AREA)
IN THE COMMONWEALTH OF KENTUCKY)
IN THE COUNTY OF CUMBERLAND)

SITE NAME: GREEN GROVE

* * * * *

UNIFORM APPLICATION: CONFIDENTIAL AND PROPRIETARY

Shared Sites WV, LLC. ("Shared Sites"), as ultimate owner, and American Cellular Corporation ("Provider") as a licensed public utility in the Commonwealth of Kentucky, hereinafter jointly referred to as "Applicants", respectfully submit their Application for a Certificate of Public Convenience and Necessity from the Public Service Commission to construct, maintain, and operate a Wireless Communications Facility ("WCF") to serve the customers of the Provider with wireless and telecommunications services, and other wireless service provider collocations in the area described herein.

In support of this Application, the Applicants respectfully provide and state the following information:

1. The complete names and addresses of the Applicants are:

Shared Sites WV, LLC., a Kentucky Limited Liability Company, having a mailing address of 1390 Chain Bridge Road #40, McLean, Virginia 22101 (703) 893-0806.

American Cellular Corporation, a Delaware Corporation, 3910 South Ave. Youngstown, OH 44512, 73134 having a local address of 124 South Keeneland Drive, Suite 1, Richmond, KY 40475, (606) 544-2355.

2. Shared Sites constructs, owns, manages, maintains, and operates independent communications networks. Shared Sites owns and manages safe, clean and well maintained facilities. Shared Sites facilities do not generate smoke, odors, noise, noxious gases, vibrations, or traffic increase. Shared Sites facilities will not pollute air, soil, or water, nor will they adversely affect radio or television reception or transmission. A certified copy of the Certificate of a Limited Liability Company issued by the Secretary of State of the State of West Virginia and a copy of the Certificate of Authorization which was issued by the Secretary of State of the Commonwealth of Kentucky for Shared Sites WV, LLC. are attached or described as part of **Exhibit A**. A copy of the Certificate of Authorization issued by the Secretary of State of the Commonwealth of Kentucky and a copy of the Certificate of Merger issued by the Secretary of State of the State of Delaware for the Provider are attached or described as part of **Exhibit B**.

3. After completion of the proposed WCF, Shared Sites will lease or license space on said tower and the surrounding site so the Provider may locate and operate its facility including all required antennas and appurtenances. The proposed WCF will serve an area completely within the Provider's Federal Communications Commission ("FCC")

licensed service area in the Commonwealth of Kentucky. The Provider is authorized to provide wireless service by the FCC and the PSC. A copy of the Provider's FCC license to provide wireless service is attached to this Application or described as part of **Exhibit C**. Shared Sites has located the proposed site in a manner such that other wireless communications service providers will desire to collocate on said tower, and will endeavor to provide all necessary facilities to make collocation attractive to them.

4. The public convenience and necessity require the construction of the proposed WCF. The construction of the WCF will bring the Provider's services to an area currently not served or not adequately served by the Provider and will thereby enhance the public's access to innovative and competitive wireless telecommunications services. The WCF will provide a necessary link in the Provider's telecommunications network that is designed to meet the increasing demands for wireless services in Kentucky's wireless communications licensed area. The WCF is an integral link in the Provider's network design that must be in place to cover the proposed service area.

5. Shared Sites' construction of the described WCF is desirable because it allows for the collocation of additional wireless service providers within this portion of the Kentucky wireless communications licensed area. These services may include telecommunications, wireless data transfer and internet services, wireless cable, paging systems, 911 service, and other new products currently being developed in the wireless industry. In addition, the WCF will be available for use by governmental agencies and providers of emergency services. The WCF will provide a necessary link in Shared Sites' and the Provider's wireless infrastructure networks, and Shared Sites, as part of its business structure, will diligently pursue and encourage other wireless providers to collocate on the WCF. These services will provide increased competition in the in the local

Kentucky telecommunications market, which will, in turn, promote competitive pricing, quality, and coverage options to users of telecommunications services in this area. Shared Sites' vested interest in the collocation of wireless service providers promotes the same goals for the local consumers.

6. The Applicants propose to construct a WCF at 150 Albany Road, Burkesville, Kentucky 42717 (36° 46' 35.55" North latitude, 85° 14' 42.72" West longitude). In an area located entirely within the county referenced in the caption of this application. The property on which the WCF will be located is owned by the J.E. Willen Trust. The proposed WCF will consist of a 325 foot guyed tower with an approximately 10-foot lightning arrester attached to the top, for a total height of 335 feet. The WCF will also include concrete foundations to accommodate the placement of the Provider's proprietary radio electronics equipment. The equipment will be housed in a prefabricated cabinet or shelter that will contain: (i) the transmitting and receiving equipment required to connect the WCF with the Provider's users in Kentucky, (ii) telephone lines that will link the WCF with the Provider's other facilities, (iii) battery back-up that will allow the Provider to operate even after a loss of outside power, and (iv) all other necessary appurtenances. The Provider's equipment cabinet or shelter will be approved for use in the commonwealth of Kentucky by the relevant building inspector. The WCF compound will be fenced and all access gate(s) will be secured. A description of the manner in which the proposed WCF will be constructed is attached as **Exhibit D** and **Exhibit E**. Periodic inspections will be performed on the WCF in accordance with the applicable regulations or requirements of the PSC. The list of competing utilities, corporations, or persons is attached as **Exhibit F**.

7. Reduced copies of the site development plan have been included as **Exhibit D** and **Exhibit E** of this application. A vertical profile sketch of the WCF signed and sealed

by a professional engineer registered in Kentucky depicting the tower height, as well as a proposed configuration for the antennas of the provider and future antenna mounts, has also been included as part of **Exhibit E**. Foundation design plans and a description of the standards according to which the tower was designed signed and sealed by a professional engineer registered in Kentucky is included as part of **Exhibit D**.

8. The Applicants have considered the likely effects of the installation of the proposed WCF on nearby land uses and values and have concluded there is no more suitable location reasonably available from which adequate services can be provided, and that there are no reasonably available opportunities to collocate. The Applicants have attempted to collocate on suitable existing structures such as telecommunications towers or other suitable structures capable of supporting the Provider's facilities. No other suitable and available collocation site was found to be located in the vicinity of the site. Information regarding the Applicants' efforts to achieve collocation in the vicinity are presented as **Exhibit G**.

9. The Applicants have conducted a preliminary aeronautical evaluation for the proposed WCF. The evaluation determined that the proposed structure height at this site meets Federal Aviation Administration ("FAA") Regulation requirements. Furthermore, FAA notice is required for the proposed construction, and lighting or marking requirements may be applicable to this facility. A copy of the FAA Application is attached as **Exhibit H**. Upon receiving a "Determination" from the FAA, the Applicants will forward a copy as a supplement to this Application Proceeding

10. A copy of the Kentucky Airport Zoning Commission ("KAZC") Application for the proposed WCF is attached as **Exhibit I**. Upon receiving authorization from the KAZC,

the Applicants will forward a copy of the determination as a supplement to this Application Proceeding

11. The WCF will be registered with the FCC pursuant to applicable federal requirements. Appropriate required signage will be posted on this site upon receipt of the tower registration number.

12. A geotechnical-engineering firm has performed soil boring(s) and subsequent geotechnical-engineering studies at the WCF site under the supervision of a professional engineer registered in the Commonwealth of Kentucky who specializes in geotechnical engineering, including subsurface exploration. The geotechnical-engineering firm has performed many such studies for the communications industry. A copy of the geotechnical-engineering report and evaluation signed and sealed by a professional engineer registered in the Commonwealth of Kentucky who specializes in geotechnical engineering, including subsurface exploration, is attached as **Exhibit J**. The name and address of the geotechnical-engineering firm and the professional engineer registered in the Commonwealth of Kentucky who supervised the examination of this WCF site are included in **Exhibit J**.

13. Clear directions to the proposed WCF site from the County seat are attached as **Exhibit K**. The name and address of the preparer of **Exhibit K** is included in **Exhibit K**.

14. Shared Sites, pursuant to a written agreement, has acquired the right to use the WCF site and associated property rights. A copy of the agreement or an abbreviated agreement recorded with the County Clerk is attached as **Exhibit L**. Also included as part of **Exhibit L** is the portion of the full agreement demonstrating that in the case of abandonment a method is provided to dismantle and remove the cellular antenna tower .

15. Personnel directly responsible for the design and construction of the proposed WCF are well-qualified and experienced. World Tower Company, Inc. (the Tower Manufacturer) performed the tower and foundation design. The Tower Manufacturer is a nationally recognized manufacturer and designer of communication towers. The Tower Manufacturer has designed and installed communications towers throughout North America. The Tower Manufacturer has assigned Peter Jernigan and/or Kirk R. Hall, both professional engineers registered in the commonwealth of Kentucky, to design the Tower for the WCF. Both engineers specialize in the design and engineering of guyed, self support and monopole structures, and have extensive experience in the design and construction of projects similar to the Applicants'. These projects include the design of towers and the required foundations of many other wireless facilities. All of the designs have been/will be signed and sealed by Peter Jernigan or Kirk R. Hall. The construction of the proposed WCF will be performed by Shared Sites or their agents who are insured and experienced tower erection specialists. The Project Manager, David Jantzi, will manage the construction of the WCF and the tower erection. David has been erecting towers for the telecommunications industry for over 15 years. All tower designs will meet or exceed applicable laws and regulations.

16. Based on a review of Federal Emergency Management Agency Flood Insurance Rate Maps, the registered land surveyor has certified in **Exhibit M** that the proposed WCF is not located within any flood hazard area.

17. The possibility of high winds has been considered in the design of this tower. The tower has been designed and engineered by professional engineers using computer assistance and the same accepted codes and standards as are typically used for high-rise building construction. The tower has been designed to withstand a wind loading of 70

m.p.h. with ½ inch of radial ice. This tower has been designed in accordance with the Electronic Industries Association (“EIA”) 222-F 1996 Standards, which have been accepted and approved by ANSI and is a nationally recognized tower design standard. Similarly, the proposed WCF design has been developed with consideration of potential ground shaking based on a negligible seismic zone of 1. Seismic loading is regarded as secondary to the wind loading.

18. The site development plan signed and sealed by a professional engineer registered in Kentucky was prepared by David B. Sharp, and was designed from a survey performed by Michael E. McKinney. This site development plan is drawn to a scale of no less than one (1) inch equals 200 feet, and identifies every owner of real estate within 500 feet of the proposed tower (according to the Property Valuation Administrator) and is incorporated in the survey as part of **Exhibit E**. Every structure and every easement within 500 feet of the proposed tower or within 200 feet of the access road including intersection with the public street system is incorporated in the survey as part of **Exhibit E**.

19. Shared Sites, on behalf of itself and the Provider, has notified every person who owns property within 500 feet of the proposed tower by certified mail, return receipt requested, of the proposed construction. Each property owner has been informed of their right to request intervention. A list of the nearby property owners who received the notices, together with copies of the certified letters, are attached as **Exhibit N** and **Exhibit O**, respectively.

20. Shared Sites, on behalf of itself and the Provider, has notified the Cumberland County Judge Executive by certified mail, return receipt requested, of the proposed construction. This notice informed the Lincoln County Judge Executive of his/her right to request intervention. A copy of this notice is attached as **Exhibit P**.

21. Two appropriate notice signs measuring at least two (2) feet in height and four (4) feet in width with all required language in letters of required height have been posted in a visible location on the proposed site and on the nearest public road and shall remain posted for at least two (2) weeks after filing of the Application. Copies of the postings are attached as **Exhibit Q**. The location of the proposed facility has been published in a newspaper of general circulation in the county where the WCF is located.

22. The property where WCF is proposed to be constructed is not zoned.

23. The process that was used in selecting the site for the proposed WCF by the Applicants' radio frequency engineers was consistent with the process used for selecting generally all other existing and proposed WCF facilities within the proposed network design area. Before beginning the acquisition process, the Applicants carefully evaluated the location of the required WCF for possible collocation opportunities on existing structures. Radio Frequency Engineers used computer programs to evaluate the most effective coverage design for facilitating collocation potential on the proposed tower. Shared Sites and the Provider's radio frequency engineers have combined their efforts in order to develop a highly efficient network that is designed to serve the Federal Communications Commission licensed territory without extending beyond the Provider's approved boundary. The engineers selected the optimum vicinity in terms of elevation and location to provide the best quality service to customers in the service area. A proposed coverage area was considered by the Applicants when searching for sites that would provide both (i) the coverage deemed necessary by the Provider, and (ii) the coverage deemed necessary by Shared Sites to permit the integration of the proposed WCF into Shared Sites' overall network design. No suitable towers or existing structures were found in the immediate area which would meet the technical requirements for this element of the telecommunications

network. A map of the area in which the tower is proposed to be located which is drawn to scale and clearly depicts the necessary search area within which the site, pursuant to radio frequency requirements, be located is attached as **Exhibit R**.

24. A grid map showing the location of all existing cellular antenna towers that includes the general position of proposed construction sites for new cellular antenna towers within the Commission's jurisdiction and one-half mile outside the boundary of the planning unit's jurisdiction if that area contains either existing or proposed construction sites for cellular antenna towers is attached as **Exhibit S**.

25. All Exhibits to this application are hereby incorporated by reference as if fully set out as part of the Application.

26. All responses and requests associated with this Application may be directed
to:

David Jantzi
Boulevard Properties, LLC
7383 Utica Blvd.

TOWER AND FOUNDATION DESIGN

February 13, 2007

Boulevard Properties
7383 Utica Blvd.
Lowville, NY 13367

Attn: Mr. Dave Jantzi

Re: Tower and Foundation Designs for Kentucky
EOM#8959A

Dear Dave,

This letter is in response to your inquiry about the design of your towers and foundations being located in Kentucky:

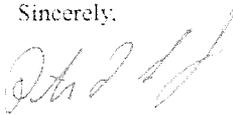

- The tower and foundation designs are reviewed and sealed by a Professional Engineer actively licensed in the State of Kentucky. More specifically, it is planned that the structural drawings will be sealed by me or Mr. Kirk R. Hall, P.E.
- We use site-specific soils reports (as provided by the tower owner) to design tower foundations. The soils reports are then referenced in the foundation general notes of the structural drawings.
- The full tower loading and reactions are used for the foundation designs. The foundation design reactions are listed on the tower and foundation drawings.

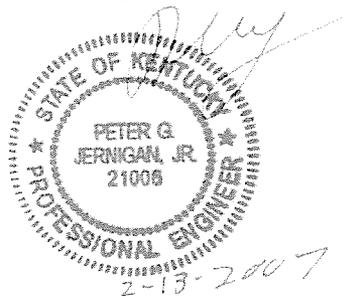

This criteria will be applied to the following proposed sites:

- Craycraft, Adair County
- Little Clifty, Adair County
- Duff, Lincoln County
- Horntown, Russell County
- Kings Mountain, Lincoln County
- Wilderness Trail, Lincoln County
- Neals Creek, Lincoln County
- Zula, Wayne County
- Cartwright, Clinton County
- Snow, Clinton County
- Greene Grove, Cumberland County

If you have any questions regarding this information, please do not hesitate to contact us at (740) 522-2287 x 356.

Sincerely,

Pete Jernigan, P.E.

GENERAL NOTES

1. TOWER IS DESIGNED TO SUPPORT THE GIVEN LOADS AND MEET THE PROVISIONS OF TIA/EIA-222-F FOR A 70 MPH BASIC WIND SPEED WITH NO ICE OR 60.6 MPH WITH 1/2 ICE.
2. TOWER IS DESIGNED FOR ALL LINES TO BE MOUNTED IN ACCORDANCE WITH DWG. Q07235WG
3. WELDED CONNECTIONS SHALL CONFORM TO THE LATEST REVISION OF THE AMERICAN WELDING SOCIETY AWS.D 1.1.
4. TOWER AND ALL FABRICATED ACCESSORIES ARE HOT-DIP GALVANIZED IN ACCORDANCE WITH ASTM A123.
5. ALL BOLTS SHALL BE GALVANIZED ACCORDING TO THE STANDARD SPECIFICATION FOR ZINC COATING OF IRON AND STEEL HARDWARE ASTM A153.
6. LEG STEEL IS 50 KSI MIN. YIELD SOLID ROUND AND BRACING STEEL IS 36 KSI MIN. YIELD SOLID ROUND.
7. ALL STRUCTURAL BOLTS ARE ASTM A325.
8. GUY LENGTHS SHOWN ARE CHORD LENGTHS PLUS 30'.
9. TOWER SECTIONS ARE NUMBERED CONSECUTIVELY FROM BASE TO TOP.
10. TOWER SHOULD BE INSPECTED IN ACCORDANCE WITH TIA/EIA-222-F EVERY 3 YEARS.
11. TOWER INSPECTION SHOULD ONLY BE PERFORMED BY EXPERIENCED QUALIFIED PERSONNEL. FOR ASSISTANCE IN PROPER MAINTENANCE OF YOUR TOWER, CALL WORLD TOWER @ 270-247-3642.

4. CONTRACTOR SHALL VERIFY ALL EXISTING SET CONDITIONS, INCLUDING SURVEYING CONDITIONS, THE PRESENCE OF WHETHER ABOVE GROUND OR UNDERGROUND UTILITIES, AND DETERMINE IF ANY UTILITIES EXIST WITHIN THE PROPOSED UNDERGROUND. THE CONTRACTOR SHALL NOTIFY THE PROJECT MANAGER IN WRITING TO KNOW AND CHARACTER, AND AT THE EXISTING GRADE PRIOR TO CONSTRUCTION.
5. CONTRACTOR SHALL VERIFY THE LOCATION OF ALL EXISTING UNDERGROUND UTILITY LINES AND CONNECTIONS PRIOR TO ANY EXCAVATION AND CONTRACTOR SHALL MAINTAIN THE LOCATION OF ALL EXISTING LINES COVER ALL SIZES (4000 PSI CMCC).
6. CONTRACTOR SHALL CONDUIT PROTECT ANY EXISTING CONDUITS PASSING UNDER NEW STRUCTURES (1" MIN. WALLS) WITH 2" CONCRETE.
7. ALL WORK SHALL BE COMPARED TO THE LATEST AND/OR ACCESS ASBEST (EXCEPT ROADWAY) UNLESS OTHERWISE NOTED OTHERWISE.
8. CONTRACTOR SHALL MAINTAIN THE DISTANCE OF 12" BETWEEN EXISTING/NEW FIELD & ELECTRIC CONDUITS UNLESS OTHERWISE NOTED OTHERWISE.
9. CONTRACTOR SHALL BE RESPONSIBLE FOR ANY DAMAGE TO EXISTING PROPERTY RESULTING FROM THE CONSTRUCTION ACTIVITIES, INCLUDING BUT NOT LIMITED TO ERECTION, FINISHED GRADES, LANDSCAPING, AND/OR OTHER DAMAGES TO THE SITE.
10. CONTRACTOR SHALL MAINTAIN ALL REQUIRED TRAFFIC CONTROL DEVICES IN PLACE THROUGHOUT THE CONSTRUCTION PERIOD. CONTRACTOR SHALL MAINTAIN ALL REQUIRED TRAFFIC CONTROL DEVICES IN PLACE AS REQUIRED.
11. CONTRACTOR SHALL PERFORM GRADING AND FINISH GRADE THE SITE IN SLOPE AND CONTAINMENTS TO PROTECT EXCESS EXCAVATION FROM THE SITE, AND PROVIDE CLEAN ENGINEERED BACKFILL WHERE NECESSARY FROM THE SITE.
12. CONTRACTOR SHALL AT THE COMPLETION OF WORK REMOVE ALL DEBRIS FROM THE SITE AND AREAS DISTURBED PERFORM FINAL GRADING, AND SEED AND MULCH ALL AREAS DISTURBED (WHERE APPLICABLE).
13. CONTRACTOR SHALL RETURN ALL DISTURBED AREAS WITHIN EXISTING GAME COMPASS BACK TO ITS ORIGINAL CONDITION UTILIZING MATERIALS OF LIKE KIND AND CHARACTER AS REMOVED.
14. IF THE SITE INCLUDES AN EXISTING CONDUIT, THE CONTRACTOR SHALL MAINTAIN THE HEIGHT AND SECURITY OF THE EXISTING GAME COMPASS AND SHALL RESTORE THE CONDUIT TO ITS ORIGINAL LOCATION AND CHARACTER. THE CONTRACTOR SHALL PROVIDE A PATCH TO THE FIBER IN ANY LOCATION WHERE IT IS BROKEN, CUT OR TORN. THE PATCH SHALL CONSIST OF MATCHING OR APPROVED EQUAL FIBER TO THAT WHICH IS DAMAGED AND SHALL EXTEND ONE (1') FOOT BEYOND THE BREAK IN ALL DIRECTIONS.
15. CONTRACTOR SHALL BE RESPONSIBLE FOR ATTACHING OR SECURING ANY ACCESSORY OR LOOSE ITEMS IN THE INSTALLATION PORTION OF THE BID.
16. ROAD EQUIPMENT:
CONTRACTOR SHALL PROVIDE ALL LABOR EQUIPMENT AND MATERIAL FOR THE PROPER LIFTING AND SETTING OF FOUNDATION. THE EQUIPMENT SHALL BE LIFTED INTO PLACE BY LEAVING A MINIMUM OF FOUR (4) INCH LIFTING STRAPS. EACH STRAP SHALL BE RATED AT 8000# EACH.
17. TOWER ANALYSIS:
EXISTING TOWER IF EXISTING AND FOUNDATION ANALYSIS ARE BY OTHERS NOT DESIGN & ASSUREMENTS INC. THE CONTRACTOR SHALL VERIFY AND RECORD FACILITY WITH THIS DOCUMENT AND KEEP COPY RECORDS AND ALL ADJUNCT ESTIMATIONS.
18. AMERICAN CELLULAR SHALL FINISH ANTENNAS FRAMES, ANTENNAS AND CABLE CAGES CONTRACTOR SHALL INSTALL.
19. CONTRACTOR SHALL COORDINATE WITH OWNER (SHARED SITES) BY DELIVERING OF ALL EQUIPMENT & MATERIAL FURNISHED BY OWNER. CONTRACTOR SHALL BE RESPONSIBLE FOR PACKING OF EQUIPMENT AND ROAD TRAILER FACILITIES AND DELIVER TO SITE. MULTIPLE VISITS MAY BE REQUIRED FOR ROADWAY AND ROAD WORKS IN ADVANCE.

Green Grove

Discussion of site need and configuration

Currently, coverage falls off as one leaves Albany, KY to the west along KY-90. It does not return until near Burkesville, KY. This leaves a 9 mile stretch of a major highway without coverage. The terrain rises and falls sharply along KY-90 to the west of Albany starting at the KY-90 and KY-1590 intersection and ending up following a valley a mile west of KY Route 1880 adding to the challenges of providing coverage along the route.

It was determined that Green Grove, properly placed, will be required to extend reliable coverage to the west along KY-90. The Green Grove site would be less than a mile west of the intersection of KY-1880 and KY-90. Due to the previously mentioned terrain the Green Grove site will need to be 300 ft above ground to properly serve its purpose.

Sincerely,

Stephen H. Jassman
RF Engineer

To Whom It May Concern:

In regard to the proposed cellular communications site known as Green Grove, this letter will seek to explain co-location issues.

To be able to serve the area, structures in the range of 300 ft above ground level will be required as explained in our "statement of need" document. According to a survey by our site acquisition team and contractor Shared Tower Sites, there are simply no tall structures in the area. Therefore, while it is the policy of Dobson Communications to pursue co-location opportunities wherever possible, there are no opportunities in this area. Thus, the construction of new facilities is the only alternative available.

Sincerely,

Stephen H. Jassman
RF Engineer

RE: Subsurface Investigation &
Foundation Recommendations
Tower Site: Green Grove
State Road 90
Burkesville, Kentucky
Alt & Witzig File: 07CN0071

Gentlemen:

In compliance with your request, we have completed a foundation investigation and evaluation for the above referenced project. It is our pleasure to transmit herewith four (4) copies of our report.

SITE LOCATION:

The site is located in Burkesville, Kentucky. Specifically, this site is located at 8150 Albany Road. The general vicinity of the site is shown on the enclosed site location map in the appendix of this report.

The purpose of this subsurface investigation was to determine the various soils profile components, determine the engineering characteristics of the materials encountered, and provide information to be used in preparing foundation designs for the proposed communication tower.

Field Services

The field investigation included reconnaissance of the project site, drilling four (4) soil borings for the tower. Additionally, investigation included performing standard penetration tests, and obtaining soil samples retained in the standard split-spoon sampler. The apparent groundwater level at the boring location was also determined.

The soil boring was performed with a conventional drilling rig equipped with a rotary head. Conventional hollow-stem augers were used to advance the holes. Representative samples were obtained employing split-spoon sampling procedures in accordance with ASTM Procedure D-1586.

During the sampling procedure, standard penetration tests were performed at regular intervals to obtain the standard penetration value of the soil. The standard penetration value is defined as the number of blows of a 140-pound hammer, falling thirty (30) inches, required to advance the split-spoon sampler one (1) foot into the soil. The results of the standard penetration tests indicate the relative density and comparative consistency of the soils, and thereby provide a basis for estimating the relative strength and compressibility of the soil profile components.

Laboratory Testing

The types of soils encountered in the borings were visually classified and are described in detail on the boring logs. Representative samples of the soils encountered in the field were placed in sample jars and are now stored in our laboratory. Unless notified to the contrary, all samples will be disposed of after three (3) months.

Recommendations for Tower

Information provided by Shared Site, LLC indicates that a guyed cellular tower will be constructed at this site. It is anticipated that the tower will not exceed 300 feet in height. It is anticipated that the structural loads of the tower will be supported by conventional spread footings.

Our borings encountered medium stiff and stiff clay, silty clay, and silt across the site. Boring B-2 encountered fine sand or very heavily weathered sandstone at approximately fourteen (14) feet below grade.

The following soil parameters can be used to design a shallow foundation. Due to the seasonal variations in moisture content and freeze thaw cycles, no skin friction or resistance to passive pressure should be considered above three (3) feet.

Soil Description	Depth Below Existing Grade	Bearing Pressure (psf) SF=3	Dry Density (pcf)	ϕ	K_p	Coefficient of Friction Against Sliding	Cohesion (psf)
Clay and Silt	4' – 19'	2,500	110	15°	1.7	0.5	1000
Sandy Clay to Silty Clay	19' +	2,000	100	12°	1.5	0.5	500

The weight of the backfill above the footings will be used to resist uplift forces; therefore, it is recommended that proper compaction techniques be maintained. It is recommended that a density of 100% maximum dry density in accordance with ASTM D-698 be achieved above the footings to finished grade for all fill. If on-site soils are used, the excavation should be ramped so that a drive or walk-behind sheepfoot can be used to compact the clayey soils.

The groundwater should be anticipated at the soil/rock interface. All borings indicated dry conditions during and upon completion of operations. However, depending upon the weather conditions while excavations are open, seepage from surface runoff may occur into shallow excavations. Since these foundation materials tend to soften when exposed to free water, every effort should be made to keep the excavations dry should water be encountered.

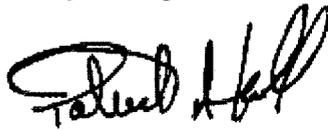

Often, because of design and construction details that occur on a project, questions rise concerning the soil conditions. If we can give further service in these matters, please contact us at your convenience.

Respectfully Submitted,

ALT & WITZIG ENGINEERING, INC.

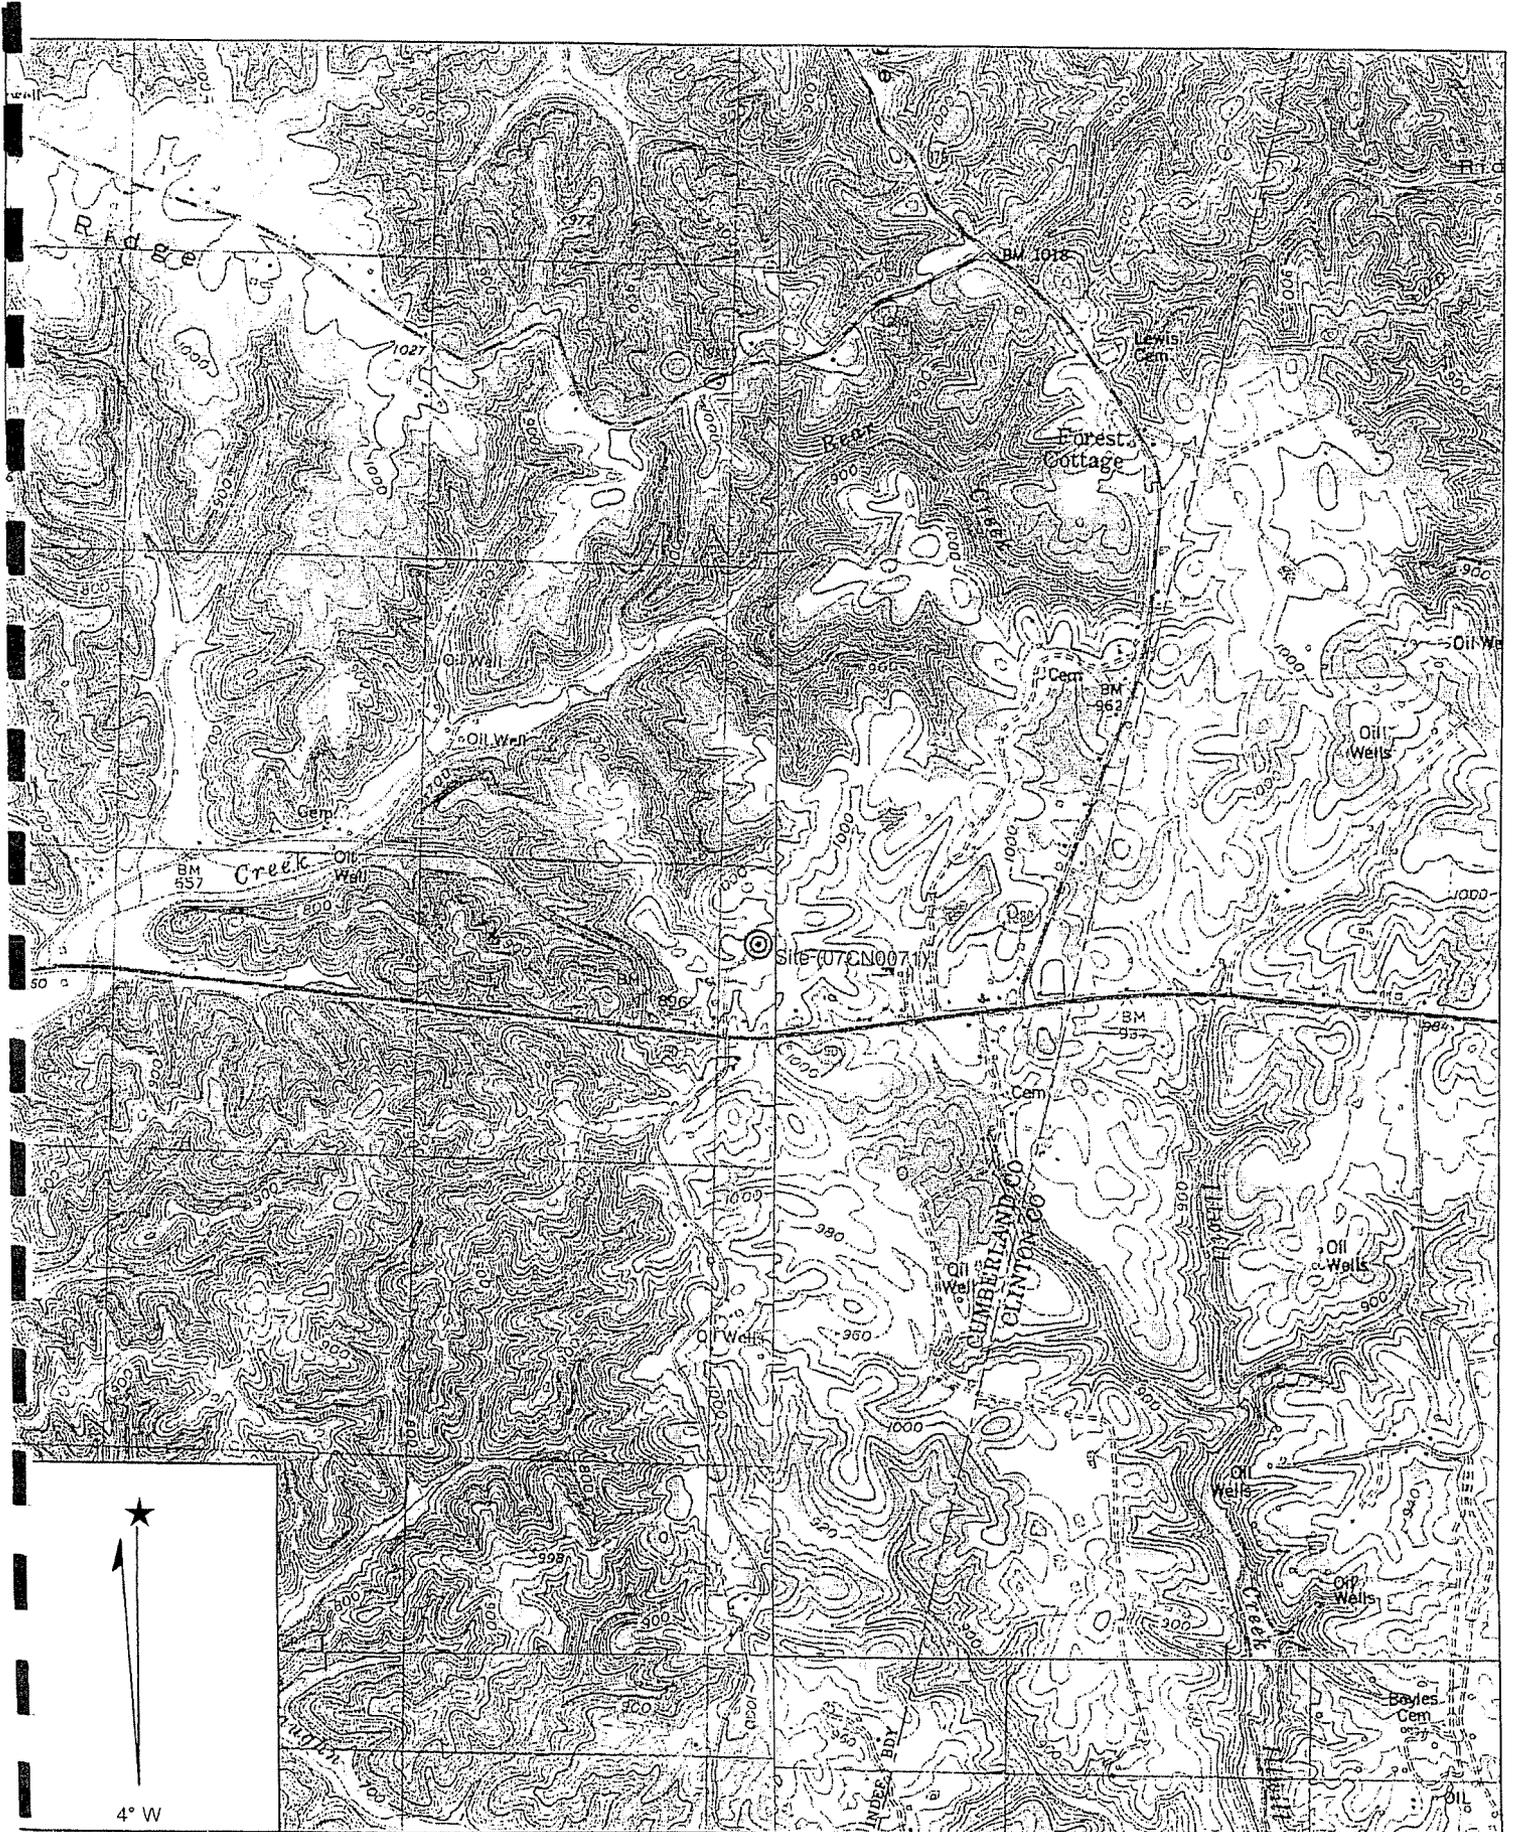

Robert Smith
Project Engineer

GENERAL NOTES

SAMPLE IDENTIFICATION

The Unified Soil Classification System is used to identify the soil unless otherwise noted.

SOIL PROPERTY SYMBOLS

- N: Standard "N" penetration: Blows per foot of a 140 pound hammer falling 30 inches on a 2 inch O.D. split-spoon.
- Qu: Unconfined compressive strength, TSF
- Qp: Penetrometer value, unconfined compressive strength, TSF
- Mc: Water content, %
- LL: Liquid limit, %
- PL: Plastic limit, %
- Dd: Natural dry density, PCF
- : Apparent groundwater level at time noted after completion

DRILLING AND SAMPLING SYMBOLS

- SS: Split-spoon - 1 3/8" I.D., 2" O.D., except where noted
- ST: Shelby tube - 3" O.D., except where noted
- AU: Auger sample
- DB: Diamond bit
- CB: Carbide bit
- WS: Washed sample

RELATIVE DENSITY AND CONSISTENCY CLASSIFICATION

<u>TERM (NON-COHESIVE SOILS)</u>	<u>BLOWS PER FOOT</u>
Very loose	0 - 4
Loose	5 - 10
Firm	11 - 30
Dense	31 - 50
Very Dense	Over 50

<u>TERM (COHESIVE SOILS)</u>	<u>Qu (TSF)</u>
Very soft	0 - 0.25
Soft	0.25 - 0.50
Medium	0.50 - 1.00
Stiff	1.00 - 2.00
Very Stiff	2.00 - 4.00
Hard	4.00+

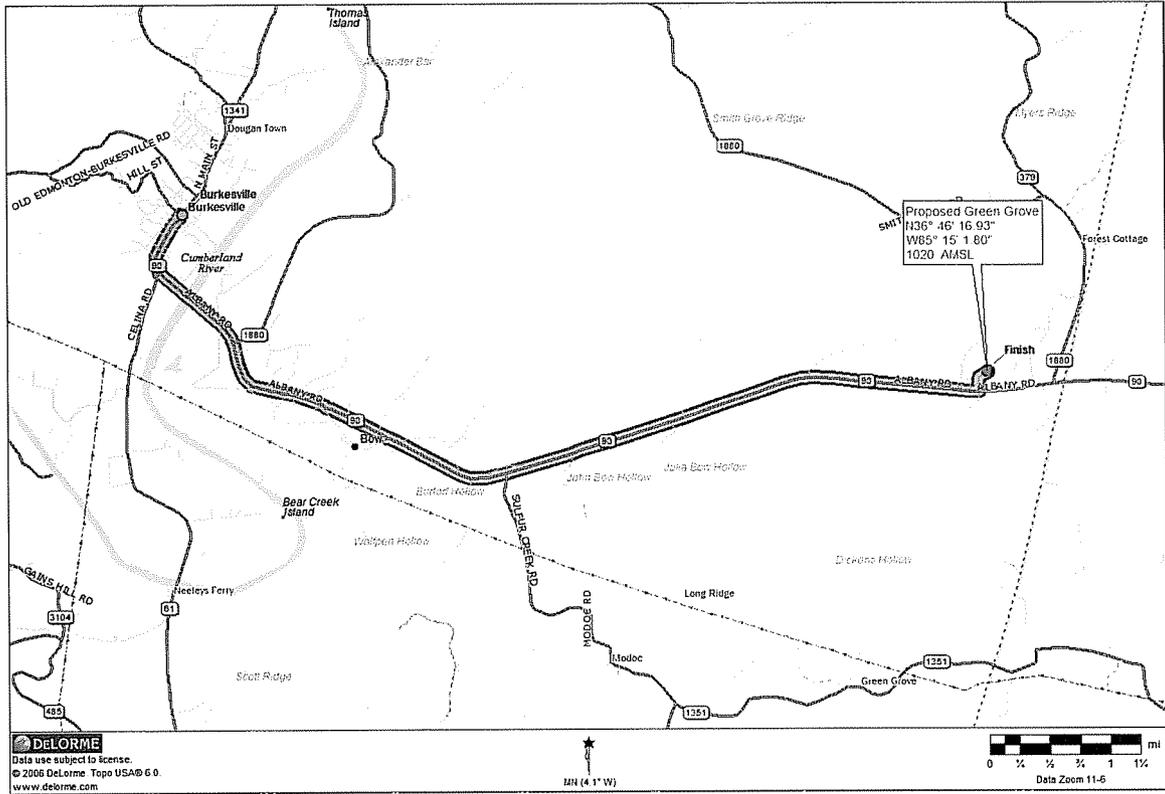

PARTICLE SIZE

Boulders	8 in.(+)	Coarse Sand	5 mm-0.6 mm	Silt	0.075 mm - 0.005 mm
Cobbles	8 in. - 3 in.	Medium Sand	0.6mm-0.2 mm	Clay	0.005mm(-)
Gravel	3 in. - 5 mm	Fine Sand	0.2mm-0.075 mm

RE: Public Notice – Kentucky Public Service Commission
Docket No.: 2007-00062

Dear Sir or Madam:

Shared Sites, LLC and American Cellular Corporation are making application to the Kentucky Public Service Commission (PSC) for a Certificate of Public Convenience and Necessity to construct and operate a new facility to provide wireless communication services. In an effort to minimize the visual effect of the structure we have moved the proposed location approx. 2000' further back from Rt. 90 than the original location and increased the height from 300' to 325'. This 2nd notification letter is being sent to you because of the changes in location and height. The facility will include a 325-foot tower with appurtenances attached to a maximum height of 335 feet, and a ground level equipment shelter(s) to be located at 8150 Albany Road, Burkesville, KY 42717. The PSC regulations dictate that all owners of property within 500' of the proposed wireless facility and all owners of property which adjoins the property on which the wireless facility is proposed, are to be notified in writing. In addition, Shared Sites is required to notify the ranking local government official(s). This notice is being sent to you because you own property within a 500' radius of the proposed tower or own property which adjoins the property on which the tower is proposed.

The Kentucky Public Service Commission invites your comments regarding the proposed construction. You also have the right to intervene in this matter. Your initial communication to the PSC must be received by the PSC within 20 days of the date of the Postal cancellation on the envelope this letter was received in. Your comments and request for intervention should be addressed to: Executive Director's Office, Public Service Commission of Kentucky, 211 Sower Boulevard, Post Office Box 615, Frankfort, KY 40602-0615. Please refer to Docket No.: 2007-00062 in your correspondence.

Please feel free to contact David Jantzi at 315-376-3333, if you have any questions.

Sincerely,

David B. Jantzi

The PSC regulations dictate that all owners of property within 500' of the proposed wireless facility and all owners of property which adjoins the property on which the wireless facility is proposed, are to be notified in writing. In addition, Shared Sites is required to notify the ranking local government official(s). This notice is being sent to you because you own property within a 500' radius of the proposed tower or own property which adjoins the property on which the tower is proposed.

The Kentucky Public Service Commission invites your comments regarding the proposed construction. You also have the right to intervene in this matter. Your initial communication to the PSC must be received by the PSC within 20 days of the date of the Postal cancellation on the envelope this letter was received in. Your comments and request for intervention should be addressed to: Executive Director's Office, Public Service Commission of Kentucky, 211 Sower Boulevard, Post Office Box 615, Frankfort, KY 40602-0615. Please refer to Docket No.: 2007-00062 in your correspondence.

Please feel free to contact David Jantzi at 315-376-3333, if you have any questions.

Sincerely,

David B. Jantzi

RE: Public Notice – Kentucky Public Service Commission
Docket No.: 2007-00062

Dear Sir or Madam:

Shared Sites, LLC and American Cellular Corporation are making application to the Kentucky Public Service Commission (PSC) for a Certificate of Public Convenience and Necessity to construct and operate a new facility to provide wireless communication services. In an effort to minimize the visual effect of the structure we have moved the proposed location approx. 2000' further back from Rt. 90 than the original location and increased the height from 300' to 325'. This 2nd notification letter is being sent to you because of the changes in location and height. The facility will include a 325-foot tower with appurtenances attached to a maximum height of 335 feet, and a ground level equipment shelter(s) to be located at 8150 Albany Road, Burkesville, KY 42717. The PSC regulations dictate that all owners of property within 500' of the proposed wireless facility and all owners of property which adjoins the property on which the wireless facility is proposed, are to be notified in writing. In addition, Shared Sites is required to notify the ranking local government official(s). This notice is being sent to you because you own property within a 500' radius of the proposed tower or own property which adjoins the property on which the tower is proposed.

The Kentucky Public Service Commission invites your comments regarding the proposed construction. You also have the right to intervene in this matter. Your initial communication to the PSC must be received by the PSC within 20 days of the date of the Postal cancellation on the envelope this letter was received in. Your comments and request for intervention should be addressed to: Executive Director's Office, Public Service Commission of Kentucky, 211 Sower Boulevard, Post Office Box 615, Frankfort, KY 40602-0615. RE: Public Notice – Kentucky Public Service Commission
Docket No.: 2007-00062

Dear Sir or Madam:

Shared Sites, LLC and American Cellular Corporation are making application to the Kentucky Public Service Commission (PSC) for a Certificate of Public Convenience and Necessity to construct and operate a new facility to provide wireless communication services. In an effort to minimize the visual effect of the structure we have moved the proposed location approx. 2000' further back from Rt. 90 than the original location and increased the height from 300' to 325'. This 2nd notification letter is being sent to you because of the changes in location and height. The facility will include a 325-foot tower with appurtenances attached to a maximum height of 335 feet, and a ground level equipment shelter(s) to be located at 8150 Albany Road, Burkesville, KY 42717. The PSC regulations dictate that all owners of property within 500' of the proposed wireless facility and all owners of property which adjoins the property on which the wireless facility is proposed, are to be notified in writing. In addition, Shared Sites is required to notify the ranking local government official(s). This notice is being sent to you because you are the Judge Executive in Cumberland County where the tower is proposed.

The Kentucky Public Service Commission invites your comments regarding the proposed construction. You also have the right to intervene in this matter. Your initial communication to the PSC must be received by the PSC within 20 days of the date of the Postal cancellation on the envelope this letter was received in. Your comments and request for intervention should be addressed to: Executive Director's Office, Public Service Commission of Kentucky, 211 Sower Boulevard, Post Office Box 615, Frankfort, KY 40602-0615.
