 PUBLIC SERVICE
 COMMISSION

Dear Reverend Haney-

I am out of the office and therefore cannot reply to your inquiry as fully as I would like to. However, I can assure you that it would be extremely unlikely for a decision in this matter to be reached within 20 days. Without knowing specifically who sent you the letter and in which context the 20-day timeframe appears, it is impossible for me to know how it fits within the PSC's normal procedural schedule. I can tell you that the questions you raised are of the type often raised by people who participate in these proceedings as intervenors. That option would be open to you.

I will be out of the office until April 30. If you desire more information, I would suggest that you contact Kyle Willard in our Telecommunications Branch. He can be reached at 502-564-3940.

I also will see to it that your letter is placed into the case file for the Commission's consideration. Thank you for your interest.

Auto forwarded by a Rule

Dear Beth A. O'Donnell, Executive Director:

I just returned from vacation and opened a letter concerning the construction of a Wireless Communication Facility near our church property (Case No. 2007-00123). As a church body, we are not informed as to the ramifications of such a construction. Will there be noise? Interference with our communication equipment? etc. Also, are there other things we ought to know concerning the placement of this facility near our church. In other words, are there issues that a church body needs to be concerned about? Will this construction and the facility affect us in any way? Please notify me as soon as possible. We are having a church business meeting on April 25 at 7 P.M.. Twenty days seems very short for our consideration of this matter. If we can be assured that this construction will not present any problems to our church services, I do not see why anyone would be against it.

4/30/2007

Thank you, Dr. Phil Haney.

Ahhh...imagining that irresistible "new car" smell?
