RE: TESTIMONY IN CASE 2007-00134

Dear Commission,

From all the analysis I have read regarding our future water supply in the Bluegrass, I urge you to reject the proposal from the Kentucky-American Water Company. It seems most prudent for the KAW to come back with a more cost effective proposal, which would probably entail a partnership with the Louisville Water Company. This seems to be the best long-term solution for the water needs of the Bluegrass Region.

Thank you for your attention to my input.

Sincerely,

John W. Hackworth
