

INTRA-AGENCY MEMORANDUM

KENTUCKY PUBLIC SERVICE COMMISSION

TO: 2007-00305 and 2007-00309 Case File

FROM: Eric Bowman, Engineer, Engineering Division

DATE: September 5, 2007

SUBJECT: Informal Teleconference Held on 9/5/07

Commission Staff conducted a teleconference on September 5, 2007 to discuss the proposed cell tower constructions as proposed in Case Nos. 2007-00305 and 2007-00309. Representatives for the Applicant in each case, Alltel and Verizon Wireless, were present on the call. The purpose of the teleconference was to discuss the possibility of consolidating the two proposed towers into a single facility due to the close proximity of the proposed constructions. As proposed, the two towers will be approximately one-half mile apart.

Both parties indicated their coverage objectives on the call. Alltel stated that collocating their facility on the proposed Verizon tower would not allow them to meet their objective of providing in-building service to a nearby refinery and covering the Mayo Trail area. Additionally, Verizon stated that collocating on the proposed Alltel tower would impair their ability to meet their specific objectives of covering certain areas of Highway 23.

Comments and or corrections by parties regarding the contents of this memorandum should be filed within 10 days of receipt.
