RE: Docket No.: 2007-00321

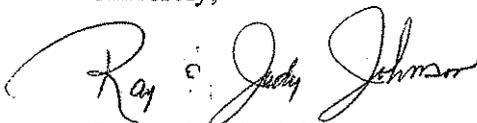

Dear David:

I am writing to you with very much concern on the cellular tower being constructed on 910 Old Perryville Loop, Springfield, Ky 40069. Our concern is we own and operate a private air field and the tower will interfere with the flight pattern of our pilots landing and taking off. In the years past Fort Knox used our landing strip as a practice night drill.

We also have a historic house that would be right across the road where this tower would be and I think it would take away from the historic value of this home.

We would ask you to please reconsider the location of this tower. Our cellular service is so bad here that we would like to have better service but we don't want the tower so close to the flight pattern of our pilots. Also, we are concerned about the waves that the tower could have in the future of our health.

Sincerely,

Ray and Judy Johnson
