PUBLIC SERVICE
COMMISSION

Dear Beth

My Name is Larry Reynolds. I live at 120 Stable Lane Frankfort in the Farmdale Subdivision. I recently got an envelope in the mail from Farmdale Development Corporation about them wanting to increase rates on Sewer bills. It was raised last year from \$18 to 28.00 Flat rate with a Sewer surcharge of \$9.92 added. So the total rose from 18.00 to right at 38.00 in one year now less than a year later they want more. I understand the cost of doing Business these days is increasing but so quickly, I don't understand that. I've lived at this address for 30 years. The treatment plant is right behind my house and I've had to smell it all those years. They did do a better job this year keeping the stench down. If they are allowed this increase then I think they should do the citizens of this neighborhood a good deed. The treatment plants motors whine and howl 24/7 its very noisy I can even hear it from inside my house. The other day I walked to the other side of the subdivision and could hear it. Its very loud all the time no peace what so ever. I would like to request that if this rate increase is allowed that the Sewer Treatment plant would have to build a noise proof barrier around the plant so the people around here could have a little peace and quite.

120 STABLE LANE
FRANKFORT, KY 40601

Sincerely

Larry D. Reynolds
