RE: dPi Teleconnect Petition for Designation as an Eligible Telecommunications
Carrier

Dear Ms. Stumbo:

Enclosed please find an original and ten copies of dPi Teleconnect's Petition for Designation as an Eligible Telecommunications Carrier in the Commonwealth of Kentucky. A list of exhibits is included. After a case number is assigned we will file the necessary forms to obtain Kentucky Bar Association approval for dPi Teleconnect's counsel, Mr. Lance Steinhart, to practice this case before the Commission.

Please indicate receipt of this filing by your office by placing a file stamp on the extra copy and returning to me via our runner.

Sincerely yours,

Douglas F. Brent

c: Lance J. M. Steinhart

COMMONWEALTH OF KENTUCKY

JUN 2 3 2008

PUBLIC SERVICE COMMISSION

IN THE MATTER OF

PETITION OF DPI TELECONNECT, LLC)	
FOR DESIGNATION AS AN ELIGIBLE)	721
TELECOMMUNICATIONS CARRIER)	CASE NO. 2008-
IN THE COMMONWEALTH OF KENTUCKY	ì	 ,

PETITION OF DPI TELECONNECT, LLC FOR DESIGNATION AS AN ELIGIBLE TELECOMMUNICATIONS CARRIER IN THE COMMONWEALTH OF KENTUCKY

dPi Teleconnect, LLC ("dPi" or the "Applicant"), pursuant to Section 214(e)(2) of the Communications Act of 1934, as amended (the "Act") and Sections 54.101 through 54.207 of the Rules of the Federal Communications Commission ("FCC"), and the rules and regulations of the Kentucky Public Service Commission (the "Commission"), hereby applies to the Commission for certification as an Eligible Telecommunications Carrier ("ETC") throughout the BellSouth Telecommunications, Inc. d/b/a AT&T Kentucky ("AT&T) service territory (the "Designated Service Area") for the purpose of receiving federal universal service support. The Applicant is seeking only low income support, and is not requesting high cost support. As demonstrated below, dPi satisfies all of the statutory and regulatory requirements for designation as an ETC in the Designated Service Area. Furthermore, designation of dPi as an ETC in the Designated Service Area will serve the public interest. Accordingly, dPi respectfully requests that the Commission grant this Application.

¹ 47 U.S.C. § 214(e)(2).

² 47 C.F.R. §§ 54.101-54.207.

A list of each wire center which the Applicant is requesting ETC status in the Commonwealth of Kentucky is attached hereto as Exhibit 1.

All correspondence, communications, pleadings, notices, orders and decisions relating to this Application should be addressed to:

I. Background

1. dPi is a Texas limited liability company⁴ and is authorized to conduct business as a foreign corporation in the Commonwealth of Kentucky. Copies of the Applicant's Articles of Incorporation and authority to transact business in the Commonwealth of Kentucky are on file with the Commission and incorporated herein by reference. The Applicant is authorized to provide competitive local exchange services throughout Kentucky (Utility ID No. 5019200). The principal office of the Applicant is located at 2997 LBJ Freeway, Suite 225, Dallas, TX 75234. The telephone number of the Applicant is 972-488-5500. The Applicant provides local exchange and exchange access services in the Designated Service Area using a combination of

dPi was organized in the State of Texas on January 15, 1999.

resale and unbundled network elements, or unbundled network equivalents obtained through agreements ("UNEs") that allows end-to-end switching and delivery of calls.

- 2. As set forth in Section 214(e)(2) of the Act, the Commission "shall upon its own motion or upon request designate a common carrier that meets the requirements of [Section 214(e)(1)] as an eligible telecommunications carrier for a service area designated by the State commission." Upon designation as an ETC, the carrier shall be eligible to receive universal support in accordance with Section 254 of the Act.⁶
- 3. The requirements for designation as an ETC set forth in Section 214(e)(1) are that the carrier must:
 - (a) offer the services that are supported by Federal universal support mechanisms under section 254(c), either using its own facilities or a combination of its own facilities and resale of another carrier's services (including the services offered by another eligible telecommunications carrier); and
 - (b) advertise the availability of such services and the charges therefore using the media of general distribution.⁷

II. dPi Satisfies the Requirements for Designation as an ETC to Serve the Designated Service Area

4. dPi is a common carrier as that term is defined in the Act.⁸ The Applicant provides competitive local telecommunications services in the Designated Service Area pursuant to Utility ID No. 5019200 referenced above.

⁵ 47 U.S.C. § 214(e)(2); see 47 C.F.R. § 54.201(b) (FCC Rules citing the Act's requirements).

⁶ 47 U.S.C. § 214(e)(1).

Id

See 47 U.S.C. § 153(10) ("the term 'common carrier' or 'carrier' means any person engaged as a common carrier for hire, in interstate or foreign communication by wire or radio or in interstate or foreign radio transmission of energy).

- 5. dPi offers all of the supported services enumerated under Section 254(c) using facilities obtained as UNEs, or the equivalents thereof. According to FCC Rules, facilities obtained as UNEs satisfy the requirement that an ETC provide the supported services using either its own facilities or a combination of its own facilities and resale of another carrier's services. Accordingly, the Applicant satisfies the requirement set forth in Section 214(e)(1)(A).
- 6. The services that are supported by Federal universal support mechanisms under section 254(c) are enumerated in the rules of the Federal Communications Commission ("FCC") at 47 C.F.R. § 54.101(a)(1)-(9). These services are:
 - (a) Voice grade access to the public switched network. "Voice grade access" is defined as a functionality that enables a user of telecommunications services to transmit voice communications, including signaling the network that the caller wishes to place a call, and to receive voice communications, including receiving a signal indicating there is an incoming call. For the purposes of this part, bandwidth for voice grade access should be, at a minimum, 300 to 3,000 Hertz. Applicant meets this requirement by providing voice-grade access to the public switched telephone network. All customers of Applicant are able to make and receive calls on the public switched telephone network within the specified bandwidth;

Section 54.201(f) of the FCC's Rules states, "[f]or the purposes of this section, the term 'own facilities' includes, but is not limited to, facilities obtained as unbundled network elements pursuant to Part 51 of this chapter, provided that such facilities meet the definition of the term 'facilities' under this subpart." 47 C.F.R. § 54.201(f). The term "facilities" under Section 54.201 is defined as "any physical components of the telecommunications network that are used in the transmission or routing of the services that are designated for support pursuant to subpart B of this part." 47 C.F.R. § 54.201(e). dPi's use of UNEs, including § 251 loops, or equivalents thereof, commingled with § 271 elements provided pursuant to an agreement filed with the Commission pursuant to § 252, meets this definition of "facilities."

- (b) Local usage. "Local usage" means an amount of minutes of use of exchange service, prescribed by the FCC, provided free of charge to end users. Applicant includes specified quantities of usage in its rate plans and thereby complies with the requirement. It is important to note, that currently, there is no specific rule that requires an ETC to include any particular amount of local usage;
- (c) Dual tone multi-frequency signaling or its functional equivalent.

 "Dual tone multi-frequency" (DTMF) is a method of signaling that facilitates the transportation of signaling through the network, shortening call set-up time. Applicant provides DTMF signaling to its customers, which is the equivalent of that offered by the incumbent LEC to its customers;
- (d) Single-party service or its functional equivalent. "Single-party service" is telecommunications service that permits users to have exclusive use of a wireline subscriber loop or access line for each call placed, or, in the case of wireless telecommunications carriers, which use spectrum shared among users to provide service, a dedicated message path for the length of a user's particular transmission. Applicant meets the requirement of single-party service by providing a dedicated message path for the length of all customer calls;
- (e) Access to emergency services. "Access to emergency services" includes access to services, such as 911 and enhanced 911, provided by local governments or other public safety organizations. 911 is defined as a service that permits a telecommunications user, by dialing the three-digit code "911,"

to call emergency services through a Public Service Access Point (PSAP) operated by the local government. "Enhanced 911" is defined as 911 service that includes the ability to provide automatic numbering information (ANI), which enables the PSAP to call back if the call is disconnected, and automatic location information (ALI), which permits emergency service providers to identify the geographic location of the calling party. "Access to emergency services" includes access to 911 and enhanced 911 services to the extent the local government in an eligible carrier's service area has implemented 911 or enhanced 911 systems. Through its agreements with AT&T, Applicant currently provides its subscribers access to 911 emergency services, and also provides Enhanced 911 services including Phase I and Phase II E911 services where requested by local public safety authorities ready to receive the information and where the local exchange carrier supports such services;

- (f) Access to operator services. "Access to operator services" is defined as access to any automatic or live assistance to a consumer to arrange for billing or completion, or both, of a telephone call. Operator services are offered by Applicant;
- (g) Access to interexchange service. "Access to interexchange service" is defined as the use of the loop, as well as that portion of the switch that is paid for by the end user, or the functional equivalent of these network elements in the case of a wireless carrier, necessary to access an interexchange carrier's network. Applicant provides long distance access to its customers;

- (h) Access to directory assistance. "Access to directory assistance" is defined as access to a service that includes, but is not limited to, making available to customers, upon request, information contained in directory listings. Applicant provides access to directory assistance to its customers; and
- (i) Toll limitation for qualifying low-income consumers. Toll limitation for qualifying low-income consumers is linked to participation in the Lifeline program, which Applicant will participate in and offer upon designation as an ETC. Applicant will use the appropriate toll limitation technology to provide this required service at no additional charge to Lifeline customers.
- 7. Upon certification as an ETC, dPi will participate in, and offer LifeLine and Link-Up programs to qualifying low-income consumers and publicize the availability of Lifeline and Link-Up services in a manner reasonably designed to reach those likely to qualify for those services, as required by FCC Rules.¹⁰ The FCC has concluded that even pure resellers may qualify as an ETC and properly use universal service support for the purposes for which it was intended by offering reduced price Lifeline service.¹¹
- 8. dPi will advertise the availability of the above-referenced services and the charges for those services in the Designated Service Area using media of general distribution, as required by FCC Rules.¹²

See 47 C.F.R. §§ 54.401-54.417; 54.405(b) & 54.411(d).

See Federal-State Joint Board on Universal Service, Petition of Tracfone Wireless, Inc., 20 FCC Rcd 15095 (2005) (finding that because Lifeline support is customer-specific and is directly reflected in the price that the eligible customer pays, it is impossible for any carrier to receive a double recovery of the support).

See 47 C.F.R. §§ 54.201(d)(2).

III. Area for Which ETC Certfication Is Requested

9. dPi has served and will continue to serve the exchanges where it leases UNEs or resells the services of the non-rural telephone companies in the Designated Service Area. dPi does not seek certification as an ETC in any areas served by rural telephone companies.

IV. Granting dPi's Application Will Serve the Public Interest

- 10. Congress requires that the Commission grant competitive ETC applications in non-rural areas.¹³ No specific public interest test is mentioned, as is the case for areas served by rural telephone companies.¹⁴ Thus, the Act provides that the Commission "shall" designate dPi as an ETC upon finding that the company meets the nine-point list of services and that it agrees to advertise the supported services throughout the Designated Service Area. Notwithstanding, the designation of dPi as an ETC will serve the public interest.
- 11. A central purpose of the Telecommunications Act of 1996 was to "promote competition and reduce regulation ... [thereby securing] lower prices and higher quality services ... and encourage the rapid deployment of new telecommunications technologies." Designation of dPi as an ETC would further these goals. Granting ETC status to dPi would allow the Applicant to obtain federal universal service support, which it will use to offer innovative telecommunications services at competitive prices to non-rural consumers in the Designated Service Area.
- 12. dPi will announce and advertise telecommunications services as an ETC where it provides service in its Designated Service Area in Kentucky and will publicize the availability of Lifeline and Link-Up services in a manner reasonably designed to reach those likely to qualify for those services. Accordingly, more low-income Kentucky residents will be made aware of the

¹³ See 47 U.S.C. 214(e)(2).

¹⁴ See Id.

opportunities afforded to them under the Lifeline and Link-Up programs and will be able to take advantage of those opportunities by subscribing to dPi's service. dPi advertises its services through several different media of general distribution including (but not limited to) marketing at targeted retail locations, including rent-to-own centers, as well as advertisements via television, radio, newspapers and trade magazines. A copy of a sample sales brochure is attached hereto as Exhibit 2. A copy of a sample newspaper advertisement is attached hereto as Exhibit 3.

Since dPi's service is of particular interest to credit-challenged customers—many of whom are low income—who generally cannot obtain service from the incumbent carrier, the granting of ETC status is clearly in the public interest; access to Lifeline and Link-Up programs can be critically important to a significant portion of the eligible low income consumers. To Applicant's knowledge, Lifeline and Link-Up services are not being sufficiently advertised and made available to eligible low income consumers in the Designated Service Area. According to the best data available to Applicant, as of December 31, 2006, fewer than 20 per cent of consumers eligible for Lifeline and Linkup Services in the Commonwealth of Kentucky were being provided such services. *See* attached Exhibit 4, 2006 Lifeline Participation Rates by State, which was obtained from the Universal Service Administrative Company ("USAC"), an independent not-for-profit corporation designated as the administrator of the federal Universal Service Fund by the Federal Communications Commission (FCC). USAC administers Universal Service Fund (USF) programs for high cost companies serving rural areas, low-income consumers, rural health care providers, and schools and libraries.

- 13. dPi will provide universal service as an ETC in all of its Designated Service Area.
- 14. dPi is willing to accept carrier of last resort obligations throughout the universal service areas in which dPi is designated as an ETC by the Commission.

¹⁵ The Telecommunications Act of 1996, Pub. L. No. 104-104, 110 Stat. 56, 56 (1996).

- 15. dPi is aware that it may seek USF funding only with respect to those customers that it serves through the use of its own facilities (including unbundled network elements or equivalent facilities).
 - 16. dPi will provide equal access to interexchange service.
- 17. Under FCC guidelines, an ETC Applicant must submit a five-year plan that describes with specificity proposed improvements or upgrades to the applicant's network on a wire center-by-wire center basis throughout its proposed Designated Service Area. The only circumstance warranting deviation from this requirement is where an applicant's requested ETC serving territory would qualify it to receive no "high cost" USF support, but only "low income" USF support. Because dPi seeks ETC designation solely for purposes of reimbursement for provision of subsidized Lifeline and Link-Up services to eligible customers, submission of a Five-Year Network Improvement Plan is not required at this time. Since Lifeline support is designed to reduce the monthly cost of telecommunications services for eligible consumers, and is distributed on a per-customer basis and is directly reflected in the price that the eligible customer pays, it is assured that all support received by the carrier is used to provide Lifeline services to consumers, thus promoting Lifeline and the availability of telephone service to low income users, which is clearly in the public interest.
- 18. Applicant offers a local usage plan comparable to the one offered by the incumbent LEC in the service areas for which it seeks designation. Applicant offers a local usage plan with unlimited calling within the customer's local calling area for a flat monthly fee with the same calling scope as AT&T Kentucky.
- 19. Under FCC guidelines, an ETC Applicant must demonstrate that it will satisfy applicable consumer protection and service quality standards. 47 CFR §54.202(a)(3); see In the

Matter of Federal-State Joint Board on Universal Service, Report and Order, CC Dkt. No. 96-45, 20 FCC Rcd 6371, para. 28 (2005) (FCC ETC Order). Applicant will satisfy all such standards. As part of its certification requirements for providing local exchange services, Applicant must abide by the service quality and consumer protection rules. In addition, Applicant commits to reporting information on consumer complaints per 1,000 lines on an annual basis consistent with the FCC ETC Order. Applicant in general commits to satisfying all such applicable state and federal requirements related to consumer protection and service quality standards.

- 20. Under FCC guidelines, an ETC Applicant must demonstrate its ability to remain functional in emergency situations. 47 CFR §54.202(a)(2); see FCC ETC Order at para 25. Applicant provides to its customers the same ability to remain functional in emergency situations as currently provided by AT&T Kentucky to its own customers, including access to a reasonable amount of back-up power, rerouting of traffic around damaged facilities, and the capability of managing traffic spikes resulting from emergency situations.
- 21. Under FCC guidelines, an ETC Applicant must commit to provide service throughout its proposed designated service area to all customers making a reasonable request for service. FCC ETC Order at Para 22; 47 CFR §54.202(a)(1)(i). Applicant commits to provide service throughout its proposed ETC-designated service area to all customers making a reasonable request for service.
- 22. Applicant's account is current with the FCC in regards to regulatory fees; and its account is current with the Universal Service Administrative Company in regards to universal service contributions. The Applicant is aware that there may be an audit of the use of universal

service funds and that the eligible telecommunications service designation is reviewed annually by state commissions.

- 23. Applicant has been designated an ETC by the Alabama Public Service Commission, the North Carolina Public Utilities Commission, and the Texas Public Utility Commission. No state has denied any ETC petition filed by Applicant, nor have any such petitions been withdrawn. Applicant has petitions for ETC status pending in states of Arkansas, Florida, Georgia, Kansas, Louisiana, Missouri, Oklahoma and South Carolina.
- 24. By this application, Applicant hereby asserts its willingness and ability to comply with all the rules and regulations that the Commission may lawfully impose upon Applicant's provision of service contemplated by this application.
- 25. Upon Commission request, Applicant is prepared to answer questions or present additional testimony or other evidence about its services within the state.

IV. Relief Requested

For the foregoing reasons, dPi respectfully requests that the Commission grant its application and designate the Applicant as an ETC in the Designated Service Area.

Respectfully submitted this 23rd day of June, 2008.

2006 Lifeline Participation Rates by State

Due to the intricacy and range of criteria that are used to determine eligibility for the Lifeline program and the limitations of the data used, the methodology employed to create this map involves several estimates, assumptions, simplifications, and omissions. Therefore, the rates generated on this map should be treated as estimates only.

District of Columbia = 10% - 20%
