5	Direct Testimony and Exhibits

Tab#	Filing Requirement	Description	Volume No(s).	Sponsoring Witness(es)
1	807 KAR 5:001 Section 10(1)(a)1	A statement of the reason the adjustment is required.	ſ	Lonnie E. Bellar
2	807 KAR 5:001 Section 10(1)(a)2	A statement that the utility's annual reports, including the annual report for the most recent calendar year, are on file with the Commission in accordance with 807 KAR 5:006, Section 3(1).	1	Lonnie E. Bellar
3	807 KAR 5:001 Section 10(1)(a)3	If the utility is incorporated, a certified copy of the utility's articles of incorporation and all amendments thereto or all out-of-state documents of similar import. If the utility's articles of incorporation and amendments have already been filed with the commission in a prior proceeding, the application may state this fact making reference to the style and case number of the prior proceeding.	l	Lonnie E. Bellar
4	807 KAR 5:001 Section 10(1)(a)4	If the utility is a limited partnership, a certified copy of the limited partnership agreement and all amendments thereto or all out-of-state documents of similar import. If the utility's limited partnership agreement and amendments have already been filed with the commission in a prior proceeding, the application may state this fact making reference to the style and case number of the prior proceeding.	ļ	Lonnie E. Bellar
5	807 KAR 5:001 Section 10(1)(a)5	If the utility is incorporated or a is a limited partnership, a certificate of good standing or certificate of authorization dated within sixty (60) days of the date the application is filed.	Į.	Lonnie E. Bellar
6	807 KAR 5:001 Section 10(1)(a)6	A certified copy of a certificate of assumed name as required by KRS 365.015 or a statement that such a certificate is not necessary.	Í	Lonnie E. Bellar
7	807 KAR 5:001 Section 10(1)(a)7	The proposed tariff in a form which complies with 807 KAR 5:011 with an effective date not less than thirty (30) days from the date the application is filed.	1	Lonnie E. Bellar
8	807 KAR 5:001 Section 10(1)(a)8	The utility's proposed tariff changes, identified in compliance with 807 KAR 5:011, shown either by: (a) Providing the present and proposed tariffs in comparative form on the same sheet side by side; or, (b) Providing a copy of the present tariff indicating proposed additions by italicized inserts or underscoring and striking over proposed deletions.	11	Lonnie E. Bellar
9	807 KAR 5:001 Section 10(1)(a)9	A statement that customer notice has been given in compliance with subsections (3) and (4) of this section with a copy of the notice.	į.	Lonnie E. Bellar
10	807 KAR 5:001 Section 10(2)	Notice of Intent. Utilities with gross annual revenues greater than \$1,000,000 shall file with the commission a written notice of intent to file a rate application at least four (4) weeks prior to filing their application. The notice of intent shall state whether the rate application shall be supported by a historical test period or a fully forecasted test period. This notice shall be served upon the Attorney General, Utility Intervention and Rate Division.	l	Lonnie E. Bellar

Tab #	Filing Requirement	Description	Volume No(s).	Sponsoring Witness(es)
11	807 KAR 5:001 Section 10(3)	Form of notice to customers. Every utility filing an application pursuant to this section shall notify all affected customers in the manner prescribed herein. The notice shall include the following information: (a) The amount of the change requested in both dollar amounts and percentage change for each customer classification to which the proposed rate change will apply; (b) The present rates and the proposed rates for each customer class to which the proposed rates would apply; (c) Electric, gas, water and sewer utilities shall include the effect upon the average bill for each customer class to which the proposed rate change will apply; (d) Local exchange companies shall include the effect upon the average bill for each customer class for the proposed rate change in basic local service; (e) A statement that the rates contained in this notice are the rates proposed by (name of utility); however, the Public Service Commission may order rates to be charged that differ from the proposed rates contained in this notice; (f) A statement that any corporation, association, or person with a substantial interest in the manner.		Lonnie E. Bellar
12	807 KAR 5:001 Section 10(4)(a)	Manner of notification. Sewer utilities shall give the required typewritten notice by mail to all of their customers pursuant to KRS 278.185.]	Lonnie E. Bellar
13	807 KAR 5:001 Section 10(4)(b)	Manner of notification. Applicants with twenty (20) or fewer customers affected by the proposed general rate adjustment shall mail the required typewritten notice to each customer no later than the date the application is filed with the commission.		Lonnie E. Bellar
14	807 KAR 5:001 Section 10(4)(c)	Manner of notification. Except for sewer utilities, applicants with more than twenty (20) customers affected by the proposed general rate adjustment shall give the required notice by one (1) of the following methods: 1. A typewritten notice mailed to all customers no later than the date the application is filed with the commission; 2. Publishing the notice in a trade publication or newsletter which is mailed to all customers no later than the date on which the application is filed with the commission; or 3. Publishing the notice once a week for three (3) consecutive weeks in a prominent manner in a newspaper of general circulation in the utility's service area, the first publication to be made within seven (7) days of the filing of the application with the commission.		Lonnie E. Bellar
15	807 KAR 5:001 Section 10(4)(d)	Manner of notification. If the notice is published, an affidavit from the publisher verifying the notice was published, including the dates of the publication with an attached copy of the published notice, shall be filed with the commission no later than forty-five (45) days of the filed date of the application.	<u> </u>	Lonnie E. Bellar
16	807 KAR 5:001 Section 10(4)(e)	Manner of notification. If the notice is mailed, a written statement signed by the utility's chief officer in charge of Kentucky operations verifying the notice was mailed shall be filed with the commission no later than thirty (30) days of the filed date of the application.		Lonnie E. Bellar
17	807 KAR 5:001 Section 10(4)(f)	Manner of notification. All utilities, in addition to the above notification, shall post a sample copy of the required notification at their place of business no later than the date on which the application is filed which shall remain posted until the commission has finally determined the utility's rates.	****	Lonnie E. Bellar

Tab#	Filing Requirement	Description	Volume No(s).	Sponsoring Witness(es)
18	807 KAR 5:001 Section 10(4)(g)	Manner of notification. Compliance with this subsection shall constitute compliance with 807 KAR 5:051, Section 2.	1	Lonnie E. Bellar
19	807 KAR 5:001 Section 10(5)	Notice of hearing scheduled by the commission upon application by a utility for a general adjustment in rates shall be advertised by the utility by newspaper publication in the areas that will be affected in compliance with KRS 424.300		Lonnie E. Bellar
20	807 KAR 5:001 Section 10(6)(a)	A complete description and quantified explanation for all proposed adjustments, with proper support for any proposed changes in price or activity levels, and any other factors which may affect the adjustment.	1	S. Bradford Rives
21	807 KAR 5:001 Section 10(6)(b)	If the utility has gross annual revenues greater than \$1,000,000, the prepared testimony of each witness the utility proposes to use to support its application.	1	Lonnie E. Bellar
22	807 KAR 5:001 Section 10(6)(c)	If the utility has gross annual revenues less than \$1,000,000, the prepared testimony of each witness the utility proposes to use to support its application or a statement that the utility does not plan to submit any prepared testimony.	1	S. Bradford Rives
23	807 KAR 5:001 Section 10(6)(d)	A statement estimating the effect that the new rates will have upon the revenues of the utility including, at minimum, the total amount of revenues resulting from the increase or decrease and the percentage of the increase or decrease.	- Instruction of the contract	Robert M. Conroy
24	807 KAR 5:001 Section 10(6)(e)	If the utility provides electric, gas, water, or sewer service the effect upon the average bill for each customer classification to which the proposed rate change will apply.	1	Robert M. Conroy
25	807 KAR 5:001 Section 10(6)(f)	If the utility is a local exchange company, the effect upon the average bill for each customer class for the proposed rate change in basic local service.	1	Lonnie E. Bellar
26	807 KAR 5:001 Section 10(6)(g)	An analysis of customers' bills in such detail that revenues from the present and proposed rates can be readily determined for each customer class.	1	Robert M. Conroy
27	807 KAR 5:001 Section 10(6)(h)	A summary of the utility's determination of its revenue requirements based on return on net investment rate base, return on capitalization, interest coverage, debt service coverage, or operating ratio, with supporting schedules.	İ	S. Bradford Rives
28	807 KAR 5:001 Section 10(6)(i)	A reconciliation of the rate base and capital used to determine its revenue requirement.		S. Bradford Rives
29	807 KAR 5:001 Section 10(6)(j)	A current chart of accounts if more detailed that the Uniform System of Accounts prescribed by the commission.	- Lui-	Shannon L. Charnas
30	807 KAR 5:001 Section 10(6)(k)	The independent auditor's annual opinion report, with any written communication from the independent auditor to the utility which indicates the existence of a material weakness in the utility's internal controls.	i i	S. Bradford Rives
31	807 KAR 5:001 Section 10(6)(1)	The most recent Federal Energy Regulatory Commission or Federal Communication Commission audit reports.	2	Valerie L. Scott
32	807 KAR 5:001 Section 10(6)(m)	The most recent Federal Energy Regulatory Commission Form 1 (electric), Federal Energy Regulatory Commission Form 2 (gas), or Automated Reporting Management information System Report (telephone) and Public Service Commission Form T (telephone);	2	Valerie L. Scott

Tab#	Filing Requirement	Description	Volume No(s).	Sponsoring Witness(es)
33	807 KAR 5:001 Section 10(6)(n)	A summary of the utility's latest deprectation study with schedules by major plant accounts, except that telecommunications utilities that have adopted the commission's average deprectation rates shall provide a schedule that identifies the current and test period deprectation rates used by major plant accounts. If the required information has been filed in another commission case a reference to that case's number and style will be sufficient.	2	Shannon L. Charnas & John J. Spanos
34	807 KAR 5:001 Section 10(6)(o)	A list of all commercially available or in-house developed computer software, programs, and models used in the development of the schedules and work papers associated with the filing of the utility's application. This list shall include each software, program, or model; what the software, program, or model was used for; identify the supplier of each software, program, or model; a brief description of the software, program, or model; the specifications for the computer hardware and the operating system required to run the program.	2	Valerie L. Scott
35	807 KAR 5:001 Section 10(6)(p)	Prospectuses of the most recent stock or bond offerings.	2	S. Bradford Rives
36	807 KAR 5:001 Section 10(6)(q)	Annual report to shareholders, or members, and statistical supplements covering the two (2) most recent years from the utility's application filing date.	2	S. Bradford Rives
37	807 KAR 5:001 Section 10(6)(r)	The monthly management reports providing financial results of operations for the twelve (12) months in the test period.	3	Valerie L. Scott
38	807 KAR 5:001 Section 10(6)(s)	Securities and Exchange Commission's annual report for the most recent two (2) years, Form 10-Ks and any Form 8-Ks issued within the past two (2) years, and Form 10-Qs issued during the past six (6) quarters updated as current information becomes available.	3	S. Bradford Rives
39	807 KAR 5:001 Section 10(6)(t)	If the utility had any amounts charged or allocated to it by an affiliate or general or home office or paid any monies to an affiliate or general or home office during the test period or during the previous three (3) calendar years, the utility shall file: 1. A detailed description of the method and amounts allocated or charged to the utility by the affiliate or general or home office for each charge allocation or payment; 2. An explanation of how the allocator for the test period was determined; and 3. All facts relied upon, including other regulatory approval, to demonstrate that each amount charged, allocated or paid during the test period was reasonable:	3	Valene L. Scott

Tab #	Filing Requirement	Description	Volume No(s).	Sponsoring Witness(es)
40	807 KAR 5:001 Section 10(6)(u)	If the utility provides gas, electric or water utility service and has annual gross revenues greater than \$5,000,000, a cost of service study based on a methodology generally accepted within the industry and based on current and reliable data from a single time period.	3	W. Steven Seelye
41	807 KAR 5:001 Section 10(6)(v)	Local exchange carriers with fewer than 30,000 access lines shall not be required to file cost of service studies, except as specifically directed by the commission. Local exchange carriers with more than 50,000 access lines shall file: 1. A jurisdictional separations study consistent with Part 36 of the Federal Communications Commission's rules and regulations: and 2. Service specific cost studies to support the pricing of all services that generate annual revenue greater than \$1,000,000, except local exchange access: a. Based on current and reliable data from a single time period; and b. Using generally recognized fully allocated embedded or uncommitted cost privateles.	3	Lonnie E. Bellar
42	807 KAR 5:001 Section 10(7)(a)	b. Using renerally recognized fully allocated, embedded, or incremental cost principles. Upon good cause shown, a utility may request pro forma adjustments for known and measurable changes to ensure fair, just and reasonable rates based on the historical test period. The following information shall be filed with applications requesting pro forma adjustments or a statement explaining why the required information does not exist and is not applicable to the utility's application: (a) A detailed income statement and balance sheet reflecting the impact of all proposed adjustments:	3	Valerie L. Scott
43	807 KAR 5:001 Section 10(7)(b)	Upon good cause shown, a utility may request pro forma adjustments for known and measurable changes to ensure fair, just and reasonable rates based on the historical test period. The following information shall be filed with applications requesting pro forma adjustments or a statement explaining why the required information does not exist and is not applicable to the utility's application: (b) The most recent capital construction budget containing at least the period of time as proposed for any pro forma adjustment for plant additions.	3	Valerie L. Scott

Tab #	Filing Requirement	Description	Volume No(s).	Sponsoring Witness(es)
44	807 KAR 5:001 Section 10(7)(c)	Upon good cause shown, a utility may request pro forma adjustments for known and measurable changes to ensure fair, just and reasonable rates based on the historical test period. The following information shall be filed with applications requesting pro forma adjustments or a statement explaining why the required information does not exist and is not applicable to the utility's application: (c) For each proposed pro forma adjustment reflecting plant additions provide the following information: 1. The starting date of the construction of each major component of plant; 2. The proposed in-service date; 3. The total estimated cost of construction at completion; 4. The amount contained in construction work in progress at the end of the test period; 5. A schedule containing a complete description of actual plant retirements and anticipated plant retirements related to the pro forma plant additions including the actual or anticipated date of retirement: 6. The original cost, cost of removal and salvage for each component of plant to be retired during the period of the proposed pro forma adjustment for plant additions; 7. An explanation of any differences in the amounts contained in the capital construction budge. 8. The impact on depreciation expense of all proposed pro forma adjustments for plant	§ :	Valerie L. Scott
45	807 KAR 5:001 Section 10(7)(d)	Upon good cause shown, a utility may request pro forma adjustments for known and measurable changes to ensure fair, just and reasonable rates based on the historical test period. The following information shall be filed with applications requesting pro forma adjustments or a statement explaining why the required information does not exist and is not applicable to the utility's application: (d) The operating budget for each period encompassing the pro forma adjustments.	3	Valerie L. Scott
46	807 KAR 5:001 Section 10(7)(e)	Upon good cause shown, a utility may request pro forma adjustments for known and measurable changes to ensure fair, just and reasonable rates based on the historical test period. The following information shall be filed with applications requesting pro forma adjustments or a statement explaining why the required information does not exist and is not applicable to the utility's application: (e) The number of customers to be added to the test period-end level of customers and the related revenue requirements impact for all pro forma adjustments with complete details and supporting work papers.	3	W.Steven Seelye

Kentucky Utilities Company Case No. 2008-00251 Historical Test Period Filing Requirements

Filing Requirement 807 KAR 5:001 Section 10(6)(r) Sponsoring Witness: Valerie L. Scott

Description of Filing Requirement:

The monthly managerial reports providing financial results of operations for the twelve (12) months in the test period.

Response:

See attached.

# Kentucky Utilities Company Case No. 2008-00251 Historical Test Period Filing Requirements

Filing Requirement 807 KAR 5:001 Section 10(6)(s) Sponsoring Witness: S. Bradford Rives

# Description of Filing Requirement:

Securities and Exchange Commission's annual report for the most recent two (2) years, Form 10-Ks and any Form 8-Ks issued within the past two (2) years, and Form 10-Qs issued during the past six (6) quarters updated as current information becomes available.

# Response:

The below-listed documents are provided. Please note that Securities and Exchange Commission (SEC) periodic reports, including Form 10-K, Form 10-Q and Form 8-K are provided through spring 2007 when KU terminated its status as an SEC registrant and ceased filing periodic reports under the Securities and Exchange Act of 1934. KU's deregistration was effective on March 1, 2007. KU's deregistration occurred in connection with a restructuring transaction to refinance various issuances of secured debt for the purpose of converting them to unsecured debt, which restructuring transaction and the SEC deregistration, were considered by the Kentucky Commission in Case No. 2006-00390 and discussed in the order dated January 22, 2007.

## Business

# **GENERAL**

KU, incorporated in Kentucky in 1912 and in Virginia in 1991, is a regulated public utility engaged in the generation, transmission, distribution and sale of electric energy in Kentucky, Virginia and Tennessee. KU provides electricity to approximately 506,000 customers in 77 counties in central, southeastern and western Kentucky, to approximately 30,000 customers in 5 counties in southwestern Virginia and 5 customers in Tennessee. KU's service area covers approximately 6,600 square miles. KU's coal-fired electric generating stations produce most of KU's electricity. The remainder is generated by a hydroelectric power plant and natural gas and oil fueled CTs. In Virginia, KU operates under the name Old Dominion Power Company. KU also sells wholesale electric energy to 12 municipalities.

KU is a wholly-owned subsidiary of E.ON U.S., formerly known as LG&E Energy LLC. E.ON U.S. is an indirect wholly-owned subsidiary of E.ON, a German corporation, making KU an indirect wholly-owned subsidiary of E.ON. KU's affiliate, LG&E, is a regulated public utility engaged in the generation, transmission, distribution and sale of electric energy and the distribution and sale of natural gas in Kentucky.

# **OPERATIONS**

The sources of operating revenues and volumes of sales for the years ended December 31, 2007 and 2006, were as follows:

	2	007	200	06
	Revenues Volumes		Revenues	Volumes
	(millions)	(000Mwh)	<u>(millions)</u>	(000Mwh)
Residential	\$ 430	6,847	\$ 380	6,313
Industrial & Commercial	597	11,047	547	10,776
Municipals	90	2,058	85	1,978
Other Retail	98	1,691	89	1,608
Wholesale	58	1,582	<u> </u>	2,473
Total	<b>\$1,273</b>	23,225	\$1,210	23,148

KU set a new record peak load of 4,344 Mw on August 9, 2007, when the temperature reached 98 degrees Fahrenheit in Lexington.

KU's power generating system includes coal-fired units operated at its four steam generating stations. Natural gas and oil fueled CTs supplement the system during peak or emergency periods. As of December 31, 2007, KU owned and operated the following generating stations while maintaining a 12%-14% reserve margin:

	Summer Capability Rating (Mw)
Steam Stations:	
Tyrone - Woodford County, KY	71
Green River - Muhlenberg County, KY	163
E.W. Brown - Mercer County, KY	697
Ghent - Carroll County, KY	<u>1,932</u>
Total Steam Stations	2,863
Dix Dam Hydroelectric Station - Mercer County, KY	24
CT Generators (Peaking capability):	
E.W. Brown - Mercer County, KY*	757
Haefling – Fayette County, KY	36
Paddy's Run – Jefferson County, KY *	74
Trimble County – Trimble County, KY *	<u>632</u>
Total CT Generators	<u>1,499</u>
Total Capability Rating	<u>4,386</u>

^{*} Some of these units are jointly owned with LG&E. See Note 10 of Notes to Financial Statements for information regarding jointly owned units.

At December 31, 2007, KU's transmission system included 111 substations (39 of which are shared with the distribution system) with a total capacity of approximately 17,223 MVA and approximately 4,030 miles of lines. The distribution system included 481 substations (39 of which are shared with the transmission system) with a total capacity of approximately 6,653 MVA, 14,082 miles of overhead lines and 2,046 miles of underground conduit.

KU has a purchase power agreement with OMU, owns 20% of EEI's common stock and owns 2.5% of OVEC's common stock. Additional information regarding these relationships is provided in Notes 1 and 9 of Notes to Financial Statements.

KU was formerly a member of the MISO, a non-profit independent transmission system operator that serves the electrical transmission needs of much of the Midwest. KU withdrew from the MISO effective September 1, 2006. KU now contracts with the Tennessee Valley Authority to act as its transmission reliability coordinator and Southwest Power Pool, Inc. to function as its independent transmission operator, pursuant to FERC requirements. See Note 2 of Notes to Financial Statements.

## RATES AND REGULATIONS

E.ON, KU's ultimate parent, is a registered holding company under PUHCA 2005. E.ON, its utility subsidiaries, including KU, and certain of its non-utility subsidiaries are subject to extensive regulation by the FERC with respect to numerous matters, including: electric utility facilities and operations, wholesale sales of power and related transactions, accounting practices, issuances and sales of securities, acquisitions and sales of utility properties, payments of dividends out of capital and surplus, financial matters and inter-system sales of non-power goods and services. KU believes that it has adequate authority (including financing authority) under

existing FERC orders and regulations to conduct its business and will seek additional authorization when necessary.

In February 2007, KU completed a series of financial transactions that allowed it to cease periodic reporting under the Securities Exchange Act of 1934. See Note 7 of Notes to Financial Statements.

KU is subject to the jurisdiction of the Kentucky Commission, the Virginia Commission, the Tennessee Regulatory Authority and the FERC in virtually all matters related to electric utility regulation, and as such, its accounting is subject to SFAS No. 71, Accounting for the Effects of Certain Types of Regulation. Given its competitive position in the marketplace and the status of regulation in Kentucky and Virginia, KU has no plans or intentions to discontinue its application of SFAS No. 71.

For a further discussion of regulatory matters, see Notes 2 and 9 of Notes to Financial Statements.

# **COAL SUPPLY**

Coal-fired generating units provided approximately 96% of KU's net Kwh generation for 2007. The remaining net generation for 2007 was provided by natural gas and oil fueled CT peaking units and a hydroelectric plant. Coal is expected to be the predominant fuel used by KU in the foreseeable future, with natural gas and oil being used for peaking capacity and flame stabilization in coal-fired boilers or in emergencies. KU has no nuclear generating units and has no plans to build any in the foreseeable future.

KU maintains its fuel inventory at levels estimated to be necessary to avoid operational disruptions at its coalfired generating units. Reliability of coal deliveries can be affected from time to time by a number of factors including fluctuations in demand, coal mine production issues and other supplier or transporter operating difficulties.

KU has entered into coal supply agreements with various suppliers for coal deliveries for 2008 and beyond and normally augments its coal supply agreements with spot market purchases. KU has a coal inventory policy which it believes provides adequate protection under most contingencies.

KU expects to continue purchasing most of its coal, which has sulfur content in the 0.7% - 3.5% range, from western and eastern Kentucky, West Virginia, southern Indiana, southern Illinois and Ohio for the foreseeable future. With the installation of FGDs (SO₂ removal systems), KU expects its use of higher sulfur coal to increase. Coal is delivered to KU generating stations by a mix of transportation modes, including barge, truck and rail.

# **ENVIRONMENTAL MATTERS**

Protection of the environment is a major priority for KU. Federal, state and local regulatory agencies have issued KU permits for various activities subject to air quality, water quality and waste management laws and regulations. See Note 9 of Notes to Financial Statements for additional information.

# COMPETITION

At this time, neither the Kentucky General Assembly nor the Kentucky Commission has adopted or approved a plan or timetable for retail electric industry competition in Kentucky. The nature or timing of the ultimate legislative or regulatory actions regarding industry restructuring and their impact on KU, which may be

significant, cannot currently be predicted. Some states that have already deregulated have begun discussions that could lead to re-regulation. See Note 2 of Notes to Financial Statements for additional information.

# EMPLOYEES AND LABOR RELATIONS

KU had 951 full-time regular employees at December 31, 2007, 152 of which were operating, maintenance and construction employees represented by the IBEW Local 2100 and the United Steelworkers of America ("USWA") Local 9447-01. Effective August 1, 2006, KU and its employees represented by the IBEW Local 2100 entered into a new three-year collective bargaining agreement. The new agreement provides for negotiated increases or changes to wages, benefits or other provisions and for annual wage re-openers. A wage re-opener was negotiated and agreed to in July 2007. KU and employees represented by the USWA Local 9447-01 entered into a three-year collective bargaining agreement in August 2005, with provisions for annual wage re-openers. Wage re-openers were negotiated in July 2006 and July 2007.

# OFFICERS OF THE COMPANY

# At December 31, 2007: **

At December 31, 2007: ***			Effective Date of Election to
<u>Name</u>	Age	Position	Present Position
Victor A. Staffieri	52	Chairman of the Board, President and Chief Executive Officer	May 2001
John R. McCall	64	Executive Vice President, General Counsel, Corporate Secretary and Chief Compliance Officer	July 1994
S. Bradford Rives	49	Chief Financial Officer	September 2003
Martyn Gallus *	43	Senior Vice President - Energy Marketing	December 2000
Chris Hermann	60	Senior Vice President - Energy Delivery	February 2003
Paula H. Pottinger	50	Senior Vice President - Human Resources	January 2006
Paul W. Thompson	50	Senior Vice President - Energy Services	June 2000
Wendy C. Welsh	53	Senior Vice President - Information Technology	December 2000
Michael S. Beer	49	Vice President - Federal Regulation and Policy	September 2004
Lonnie E. Bellar	43	Vice President - State Regulation and Rates	August 2007
Kent W. Blake	41	Vice President – Corporate Planning and Development	August 2007
D. Ralph Bowling	50	Vice President - Power Operations - WKE	August 2002
Laura G. Douglas	58	Vice President – Corporate Responsibility and Community Affairs	November 2007
R. W. Chip Keeling	51	Vice President - Communications	March 2002
John P. Malloy	46	Vice President - Energy Delivery - Retail Business	April 2007
Dorothy E. O'Brien	54	Vice President and Deputy General Counsel – Legal and Environmental Affairs	October 2007
George R. Siemens	58	Vice President - External Affairs	January 2001
P. Greg Thomas	51	Vice President – Energy Delivery – Distribution Operations	April 2007
John N. Voyles, Jr.	53	Vice President - Regulated Generation	June 2003
Daniel K. Arbough	46	Treasurer	December 2000
Valerie L. Scott	51	Controller	January 2005

Officers generally serve in the same capacities at KU and its affiliates, E.ON U.S. and LG&E.

^{*} Mr. Gallus is serving in a position with an international E.ON affiliate, effective January 2008.

^{**} David Sinclair, age 46, was promoted to Vice President - Energy Marketing in January 2008.

### **Risk Factors**

KU is subject to a number of risks, including without limitation, those listed below and elsewhere in this document. Such risks could affect actual results and cause results to differ materially from those expressed in any forward-looking statements made by KU.

The rates that KU charges customers, as well as other aspects of the business, are subject to significant and complex governmental regulation. Federal and state entities regulate many aspects of utility operations, including financial and capital structure matters; siting and construction of facilities; rates, terms and conditions of service and operations; mandatory reliability and safety standards; accounting and cost allocation methodologies; tax matters; acquisition and disposal of utility assets and securities and other matters. Such regulations may subject KU to higher operating costs or increased capital expenditures and failure to comply could result in sanctions or possible penalties. In any rate-setting proceedings, federal or state agencies, intervenors and other permitted parties may challenge KU's rate request and ultimately reduce, alter or limit the rates KU seeks.

Changes in transmission and wholesale power market structures, as well as KU's exit from the MISO, could increase costs or reduce revenues. The resulting changes to transmission and wholesale power market structures and prices are not estimable and may result in unforeseen effects on energy purchases and sales, transmission and related costs or revenues.

Transmission and interstate market activities of KU, as well as other aspects of the business, are subject to significant FERC regulation. KU's business is subject to extensive regulation under the FERC covering matters including rates charged to transmission users and wholesale customers; interstate power market structure; construction and operation of transmission facilities; mandatory reliability standards; standards of conduct and affiliate restrictions and other matters. Existing FERC regulation, changes thereto or issuances of new rules or situations of non-compliance, can affect the earnings, operations or other activities of KU.

KU undertakes significant capital projects and is subject to unforeseen costs, delays or failures in such projects, as well as risk of full recovery of such costs. The completion of these facilities without delays or cost overruns is subject to risks in many areas, including approval and licensing; permitting; construction problems or delays; increases in commodity prices or labor rates; contractor performance; weather and geological issues and political, labor and regulatory developments.

KU's costs of compliance with environmental laws are significant and are subject to continuing changes. Extensive federal, state and local environmental regulations are applicable to KU's air emissions, water discharges and the management of hazardous and solid waste, among other areas; and the costs of compliance or alleged non-compliance cannot be predicted with certainty. Costs may take the form of increased capital or operating and maintenance expenses; monetary fines, penalties or forfeitures or other restrictions.

KU's operating results are affected by weather conditions, including storms and seasonal temperature variations, as well as by significant man-made or accidental disturbances, including terrorism or natural disasters. These weather or man-made factors can significantly affect KU's finances or operations by changing demand levels; causing outages; damaging infrastructure or requiring significant repair costs; affecting capital markets or impacting future growth.

KU is subject to risks regarding potential developments concerning global climate change matters. Such developments could include potential federal or state legislation or industry initiatives limiting GHG emissions; establishing costs or charges on GHG emissions or on fuels relating to such emissions; requiring GHG

remediation or sequestration; establishing renewable portfolio standards or generation fleet-diversification requirements to address GHG emissions; promoting energy efficiency and conservation or other measures. KU's generation fleet is predominantly coal-fired and may be highly impacted by developments in this area.

**KU's business is concentrated in the Midwest United States, specifically Kentucky.** Local and regional economic conditions, such as population growth, industrial growth or expansion and economic development, as well as the operational or financial performance of major industries or customers, can affect the demand for energy.

KU is subject to operational risks relating to its generating plants, transmission facilities and distribution equipment. Operation of power plants, transmission and distribution facilities subjects KU to many risks, including the breakdown or failure of equipment; accidents; labor disputes; delivery/transportation problems; disruptions of fuel supply and performance below expected levels.

KU could be negatively affected by rising interest rates, downgrades to company or bond insurer credit ratings that could impact the Company's bond credit ratings or other negative developments in its ability to access capital markets. In the ordinary course of business, KU is reliant upon adequate long-term and short-term financing means to fund its significant capital expenditures, debt interest or maturities and operating needs. Increases in interest rates could result in increased costs to KU.

KU is subject to commodity price risk, credit risk, counterparty risk and other risks associated with the energy business. General market or pricing developments or failures by counterparties to perform their obligations relating to energy, fuels, other commodities, goods, services or payments could result in potential increased costs to KU.

KU is subject to risks associated with defined benefit retirement plans, health care plans, wages and other employee-related matters. Risks include adverse developments in legislation or regulation, future costs or funding levels, returns on investments, interest rates and actuarial matters, as well as, changing wage levels, whether related to collective bargaining agreements or employment market conditions, ability to attract and retain key personnel and changing costs of providing health care benefits.

### **Legal Proceedings**

### Rates and Regulatory Matters

For a discussion of current rates and regulatory matters, including base rate increase proceedings, merger surcredit proceedings, VDT proceedings, TC2 proceedings, Kentucky Commission, FERC and MISO proceedings and other rates or regulatory matters affecting KU, see Notes 2 and 9 of Notes to Financial Statements.

### Environmental

For a discussion of environmental matters including additional reductions in SO₂, NOx and other emissions mandated by recent or potential regulations; items regarding notices of violations and other emissions proceedings; global warming or climate change matters and other environmental items affecting KU, see Note 9 of Notes to Financial Statements.

### Litigation

For a discussion of litigation matters, see Note 9 of Notes to Financial Statements.

### Other

In the normal course of business, other lawsuits, claims, environmental actions and other governmental proceedings arise against KU. To the extent that damages are assessed in any of these lawsuits, KU believes that its insurance coverage is adequate. Management, after consultation with legal counsel, does not anticipate that liabilities arising out of currently pending or threatened lawsuits and claims will have a material adverse effect on KU's financial position or results of operations.

Management's Discussion and Analysis and Notes to Financial Statements should be read in conjunction with the above information.

### Management's Discussion and Analysis

The following discussion and analysis by management focuses on those factors that had a material effect on KU's financial results of operations and financial condition during 2007 and 2006 and should be read in connection with the financial statements and notes thereto.

### Forward Looking Statements

Some of the following discussion may contain forward-looking statements that are subject to risks, uncertainties and assumptions. Such forward-looking statements are intended to be identified in this document by the words "anticipate," "expect," "estimate," "objective," "possible," "potential" and similar expressions. Actual results may materially vary. Factors that could cause actual results to materially differ include: general economic conditions; business and competitive conditions in the energy industry; changes in federal or state legislation; unusual weather; actions by state or federal regulatory agencies; actions by credit rating agencies and other factors described from time to time in KU's reports, including as noted in the Risk Factors section of this report.

### RESULTS OF OPERATIONS

The electric utility business is affected by seasonal temperatures. As a result, operating revenues (and associated operating expenses) are not generated evenly throughout the year.

#### Net Income

Net income in 2007 increased \$15 million compared to 2006. The increase was primarily the result of increased retail sales volumes, increased ECR surcharge and decreased purchased power expense. Partially offsetting these items were decreased wholesale sales, higher interest expense, decreased MISO related revenue and decreased equity in earnings of EEI.

### Revenues

Revenues in 2007 increased \$63 million primarily due to:

- Increased fuel costs (\$57 million) billed to customers through the FAC due to increased fuel prices and sales volumes delivered
- Increased sales volumes delivered (\$30 million) resulting from a 2% increase in heating degree days and a 46% increase in cooling degree days
- Increased ECR surcharge (\$25 million) due to increased recoverable capital spending
- Increased transmission service revenues (\$4 million)

These increases were partially offset by:

- Lower wholesale sales (\$37 million) due to decreased volumes and lower wholesale market pricing
- Lower MISO related revenue (\$16 million) resulting from the exit from the MISO

### Expenses

Fuel for electric generation comprises a large component of total operating expenses. Increases or decreases in the cost of fuel are reflected in retail rates through the FAC, subject to the approval of the Kentucky Commission, the Virginia Commission and the FERC.

10

Fuel for electric generation increased \$37 million in 2007 primarily due to:

- Increased cost of fuel burned (\$20 million) due to higher coal prices
- Increased generation (\$17 million) due to higher demand

Power purchased expense decreased \$14 million in 2007 primarily due to:

- Decreased volumes purchased (\$19 million) due to increased internal generation
- Increased cost per Mwh of purchases (\$5 million) due to higher fuel prices

Other operation and maintenance expenses increased \$1 million in 2007 primarily due to increased maintenance expenses (\$12 million), partially offset by decreased other operation expenses (\$11 million).

Other maintenance expenses increased \$12 million in 2007 primarily due to:

- Increased boiler maintenance expense (\$7 million)
- Increased electric plant maintenance (\$5 million)
- Increased vegetation management expense (\$1 million)
- Decreased overhead conductor and devices maintenance (\$1 million)

Other operation expenses decreased \$11 million in 2007 primarily due to:

- Decreased MISO Day 1 and Day 2 expenses (\$16 million) due to the exit from the MISO effective September 1, 2006, and refunds from the MISO for certain charges
- Decreased VDT workforce reduction expense (\$3 million) due to completion of VDT amortization in March 2006
- Increased MISO Day 1 expense (\$3 million) due to credit received from the MISO for financial transmission rights in 2006
- Increased outside services expense (\$3 million)
- Increased wholesale expense (\$1 million) due to a recorded credit in April 2006 for a FERC ordered refund from the MISO for charges assessed in excess of the rates in the MISO transmission tariff
- Increased research and development expenses (\$1 million)

Equity earnings in EEI decreased \$3 million in 2007 primarily due to decreased other electric earnings at EEI, resulting from decreased emission allowance sales in 2007 and increased purchased power expense.

Other income – net increased \$5 million in 2007 primarily due to increased other income (\$7 million) relating to increased allowance for funds used during construction, gain on disposal of property and increased interest income from bond proceeds on deposit with a trustee, partially offset by increased other expenses (\$2 million) relating to penalties.

Interest expense increased \$17 million in 2007, primarily due to increased interest expense to affiliated companies resulting from increased affiliate borrowings to fund increased capital additions

### CRITICAL ACCOUNTING POLICIES/ESTIMATES

Preparation of financial statements and related disclosures in compliance with generally accepted accounting principles requires the application of appropriate technical accounting rules and guidance, as well as the use of estimates. The application of these policies necessarily involves judgments regarding future events, including legal and regulatory challenges and anticipated recovery of costs. These judgments could materially impact the financial statements and disclosures based on varying assumptions, which may be appropriate to use. In addition, the financial and operating environment also may have a significant effect, not only on the operation of the business,

but on the results reported through the application of accounting measures used in preparing the financial statements and related disclosures, even if the nature of the accounting policies applied has not changed. Specific risks for these critical accounting policies are described in the Notes to Financial Statements. Each of these has a higher likelihood of resulting in materially different reported amounts under different conditions or using different assumptions. Events rarely develop exactly as forecasted and the best estimates routinely require adjustment.

Critical accounting policies and estimates including unbilled revenue, allowance for doubtful accounts, regulatory mechanisms, pension and postretirement benefits and income taxes are detailed in Notes 1, 2, 3, 5, 6 and 9 of Notes to Financial Statements.

**Recent Accounting Pronouncements.** Recent accounting pronouncements affecting KU are detailed in Note 1 of Notes to Financial Statements.

### LIQUIDITY AND CAPITAL RESOURCES

KU uses net cash generated from its operations and external financing (including financing from affiliates) to fund construction of plant and equipment and the payment of dividends. KU believes that such sources of funds will be sufficient to meet the needs of its business in the foreseeable future.

As of December 31, 2007, KU is in a negative working capital position in part because of the classification of certain variable-rate pollution control bonds totaling \$33 million that are subject to tender for purchase at the option of the holder as current portion of long-term debt. Credit facilities totaling \$35 million are in place to fund such tenders, if necessary. KU has never needed to access these facilities. KU expects to cover any working capital deficiencies with cash flow from operations, money pool borrowings and borrowings from Fidelia.

### Operating Activities

Cash provided by operations was \$302 million and \$223 million in 2007 and 2006, respectively.

The 2007 increase of \$79 million was primarily the result of increases in cash due to changes in:

- Earnings, net of non-cash items (\$55 million)
- Material and supplies (\$33 million) due to lower coal inventories on hand at December 31, 2007
- MISO exit fee (\$20 million) due to the MISO exit being completed effective September 1, 2006
- Accrued income taxes (\$15 million) due to income tax accrued during 2007 being greater than estimated payments
- ECR recovery (\$11 million)
- Prepayments and other current assets (\$9 million)
- Other current liabilities (\$8 million)
- Other liabilities (\$7 million)
- Other regulatory assets (\$4 million)
- FAC recovery (\$3 million)

These increases were partially offset by cash used for changes in:

- Pension and postretirement funding (\$36 million)
- Accounts payable (\$26 million)
- Property and other taxes payable (\$14 million)
- Accounts receivable (\$10 million)

### **Investing Activities**

The primary use of funds for investing activities continues to be for capital expenditures. Net cash used for investing activities increased \$382 million in 2007 compared to 2006 primarily due to increased capital expenditures of \$395 million, offset by decreased restricted cash of \$13 million. Restricted cash represents the escrowed proceeds of the Pollution Control Bonds issued, which are disbursed as qualifying costs are incurred.

### Financing Activities

Net cash inflows from financing activities were \$422 million and \$124 million in 2007 and 2006, respectively. See Note 7 of Notes to Financial Statements for information of redemptions, maturities and issuances of longterm debt.

### **Future Capital Requirements**

KU expects its capital expenditures for the three-year period ending December 31, 2010, to total approximately \$1,465 million, consisting primarily of construction estimates for installation of FGDs on Ghent and Brown units totaling approximately \$425 million, construction of TC2 totaling approximately \$360 million, the Brown ash pond totaling approximately \$40 million, a customer care system totaling approximately \$25 million and on-going construction related to generation and distribution assets. See Note 9 of Notes to Financial Statements for additional information.

KU's construction program is designed to ensure that there will be adequate capacity and reliability to meet the electric needs of its service area and to comply with environmental regulations. These needs are continually being reassessed and appropriate revisions are made, when necessary, in construction schedules. Future capital requirements may be affected in varying degrees by factors such as electric energy demand load growth, changes in construction expenditure levels, rate actions by regulatory agencies, new legislation, market entry of competing electric power generators, changes in commodity prices and labor rates, changes in environmental regulations and other regulatory requirements. See Contractual Obligations further below and Note 9 of Notes to Financial Statements for current commitments. KU anticipates funding future capital requirements through operating cash flow, debt and/or infusions of capital from its parent.

Regulatory approvals are required for KU to incur additional debt. The Virginia Commission and the FERC authorize the issuance of short-term debt while the Kentucky Commission, the Virginia Commission and the Tennessee Regulatory Authority authorize the issuance of long-term debt. In November 2007, KU received a two-year authorization from the FERC to borrow up to \$400 million in short-term funds. KU also has authorization from the Virginia Commission that expires at the end of 2009 allowing short-term borrowing of up to \$400 million.

KU's debt ratings as of December 31, 2007, were:

	Moody's	<u>S&amp;P</u>
Pollution control revenue bonds	A2	BBB+
Issuer rating	A2	•
Corporate credit rating	-	BBB+

These ratings reflect the views of Moody's and S&P. A security rating is not a recommendation to buy, sell or hold securities and is subject to revision or withdrawal at any time by the rating agency. See Note 7 of Notes to Financial Statements for a discussion of recent downgrade actions related to the pollution control revenue bonds.

### **Contractual Obligations**

The following is provided to summarize contractual cash obligations for periods after December 31, 2007. KU anticipates cash from operations and external financing will be sufficient to fund future obligations. Future interest obligations cannot be quantified because most of KU's debt is variable rate. See Statements of Capitalization.

(in millions)	Payments Due by Period						
Contractual Cash Obligations	<u> 2008</u>	<u> 2009</u>	<u> 2010</u>	<u> 2011</u>	<u> 2012</u>	<u>Thereafter</u>	<u>Total</u>
Short-term debt (a)	\$ 23	\$ -	\$ -	\$ -	\$ -	\$ -	\$ 23
Long-term debt	-		33	-	50	1,181 (b)	1,264
Operating leases (c)	6	5	3	2	2	4	22
Unconditional power							
purchase obligations (d)	23	25	16	8	9	143	224
Coal and gas purchase							
obligations (e)	329	146	93	57	57	-	682
Retirement obligations (f)	.23	24	23	23	23	124	240
Other obligations (g)	_307	<u>79</u>	6	=			392
Total contractual							
cash obligations	<u>\$711</u>	<u>\$279</u>	<u>\$174</u>	<u>\$90</u>	<u>\$141</u>	<u>\$1,452</u>	<u>\$2,847</u>

- (a) Represents borrowings from affiliated company due within one year.
- (b) Includes long-term debt of \$33 million classified as current liabilities because these bonds are subject to tender for purchase at the option of the holder and to mandatory tender for purchase upon the occurrence of certain events. These bonds mature in 2032, KU does not expect to pay these amounts in 2008.
- (c) Represents future operating lease payments.
- (d) Represents future minimum payments under OMU and OVEC power purchase agreements through 2010 and 2026, respectively
- (e) Represents contracts to purchase coal and natural gas
- (f) Represents currently projected cash flows for pension, postretirement and other post-employment benefit plans as calculated by the actuary.
- (g) Represents construction commitments, including commitments for TC2 and the FGDs.

### CONTROLS AND PROCEDURES

The Company is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The Company has assessed the effectiveness of its internal control over financial reporting as of December 31, 2007. In making this assessment, the Company used the criteria set forth by the Committee of Sponsoring

Organizations of the Treadway Commission in Internal Control - Integrated Framework ("COSO"). The Company has concluded that, as of December 31, 2007, the Company's internal control over financial reporting was effective based on those criteria.

KU is no longer subject to the internal control and other requirements of the Sarbanes-Oxley Act of 2002 and associated rules (the "Act") and consequently has not issued Management's Report on Internal Controls over Financial Reporting pursuant to Section 404 of the Act.

### Kentucky Utilities Company Notes to Financial Statements

### Note 1 - Summary of Significant Accounting Policies

KU, incorporated in Kentucky in 1912 and in Virginia in 1991, is a regulated public utility engaged in the generation, transmission, distribution and sale of electric energy in Kentucky, Virginia and Tennessee. KU provides electricity to approximately 506,000 customers in 77 counties in central, southeastern and western Kentucky, to approximately 30,000 customers in 5 counties in southwestern Virginia and 5 customers in Tennessee. KU's coal-fired electric generating stations produce most of KU's electricity. The remainder is generated by a hydroelectric power plant and natural gas and oil fueled CTs. In Virginia, KU operates under the name Old Dominion Power Company. KU also sells wholesale electric energy to 12 municipalities.

KU is a wholly-owned subsidiary of E.ON U.S., formerly known as LG&E Energy LLC. E.ON U.S. is an indirect wholly-owned subsidiary of E.ON, a German corporation, making KU an indirect wholly-owned subsidiary of E.ON. KU's affiliate, LG&E, is a regulated public utility engaged in the generation, transmission, distribution and sale of electric energy and the distribution and sale of natural gas in Kentucky.

Certain reclassification entries have been made to the previous years' financial statements to conform to the 2007 presentation with no impact on net assets, liabilities and capitalization or previously reported net income and cash flows.

Regulatory Accounting. KU is subject to SFAS No. 71, under which regulatory assets are created based on expected recovery from customers in future rates to defer costs that would otherwise be charged to expense. Likewise, regulatory liabilities are created based on expected return to customers in future rates to defer credits that would otherwise be reflected as income, or, in the case of costs of removal, are created to match long-term future obligations arising from the current use of assets. The accounting for regulatory assets and liabilities is based on specific ratemaking decisions or precedent for each item as prescribed by the FERC, the Kentucky Commission or the Virginia Commission. See Note 2, Rates and Regulatory Matters, for additional detail regarding regulatory assets and liabilities.

Cash and Cash Equivalents. KU considers all highly liquid investments with an original maturity of three months or less to be cash equivalents.

**Restricted Cash.** Proceeds from bond issuances for environmental equipment (primarily related to the installation of FGDs) are held in trust pending expenditure for qualifying assets.

Allowance for Doubtful Accounts. The allowance for doubtful accounts is based on the ratio of the amounts charged-off during the last twelve months to the retail revenues billed over the same period multiplied by the retail revenues billed over the last four months. Accounts with no payment activity are charged-off after four months, although collection efforts continue thereafter.

Materials and Supplies. Fuel and other materials and supplies inventories are accounted for using the average-cost method. Emission allowances are included in other materials and supplies and are not currently traded by KU. At December 31, 2007 and 2006, the emission allowances inventory was less than \$1 million and approximately \$2 million, respectively.

Other Property and Investments. Other property and investments on the balance sheets consists of KU's investment in EEI, economic development loans provided to various communities in KU's service territory, KU's investment in OVEC, funds related to KU's long-term purchased power contract with OMU and non-utility plant.

Although KU holds investment interests in OVEC and EEI, it is not the primary beneficiary, therefore, neither are consolidated into KU's financial statements. KU and 11 other electric utilities are participating owners of OVEC, located in Piketon, Ohio. OVEC owns and operates two power plants that burn coal to generate electricity, Kyger Creek Station in Ohio and Clifty Creek Station in Indiana. Pursuant to current contractual arrangements, KU's share of OVEC's output is 2.5%, approximately 55 Mw of generation capacity.

As of December 31, 2007 and 2006, KU's investment in OVEC totaled less than \$1 million and is accounted for under the cost method of accounting. KU's maximum exposure to loss as a result of its involvement with OVEC is limited to the value of its investment. In the event of the inability of OVEC to fulfill its power provision requirements, KU anticipates substituting such power supply with either owned generation or market purchases and believes it would generally recover associated incremental costs through regulatory rate mechanisms. See Note 9, Commitments and Contingencies, for further discussion of developments regarding KU's ownership interests and power purchase rights.

KU owns 20% of the common stock of EEI, which owns and operates a 1,162-Mw generating station in southern Illinois. Prior to 2006, KU was entitled to take 20% of the available capacity of the station under a pricing formula comparable to the cost of other power generated by KU. This contract governing the purchases from EEI terminated on December 31, 2005. Since December 31, 2005, EEI has sold power under general market-based pricing and terms. KU has not contracted with EEI for power under the new arrangements, but maintains its 20% ownership in the common stock of EEI. Replacement power for the EEI capacity has been largely provided by KU generation.

KU's investment in EEI is accounted for under the equity method of accounting and, as of December 31, 2007 and 2006, totaled \$23 million and \$18 million, respectively. KU's direct exposure to loss as a result of its involvement with EEI is generally limited to the value of its investment.

**Utility Plant.** KU's utility plant is stated at original cost, which includes payroll-related costs such as taxes, fringe benefits and administrative and general costs. Construction work in progress has been included in the rate base for determining retail customer rates in Kentucky. KU has not recorded a significant allowance for funds used during construction.

The cost of plant retired or disposed of in the normal course of business is deducted from plant accounts and such cost is charged to the reserve for depreciation. When complete operating units are disposed of, appropriate adjustments are made to the reserve for depreciation and gains and losses, if any, are recognized.

**Depreciation and Amortization.** Depreciation is provided on the straight-line method over the estimated service lives of depreciable plant. The amounts provided were approximately 3.2% in 2007 and 3.1% in 2006 of average depreciable plant. Of the amount provided for depreciation at December 31, 2007 and 2006, approximately 0.5% was related to the retirement, removal and disposal costs of long lived assets.

Unamortized Debt Expense. Debt expense is capitalized in deferred debits and amortized using the straight line method, which approximates the effective interest method, over the lives of the related bond issues.

**Income Taxes.** Income taxes are accounted for under SFAS No. 109, Accounting for Income Taxes and FIN 48, Accounting for Uncertainty in Income Taxes, an Interpretation of SFAS No. 109. In accordance with these

statements, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases, as measured by enacted tax rates that are expected to be in effect in the periods when the deferred tax assets and liabilities are expected to be settled or realized. Significant judgment is required in determining the provision for income taxes, and there are transactions for which the ultimate tax outcome is uncertain. FIN 48 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. Uncertain tax positions are analyzed periodically and adjustments are made when events occur to warrant a change. See Note 6, Income Taxes.

**Deferred Income Taxes.** Deferred income taxes are recognized at currently enacted tax rates for all material temporary differences between the financial reporting and income tax bases of assets and liabilities.

Investment Tax Credits. The EPAct 2005 added Section 48A to the Internal Revenue Code, which provides for an investment tax credit to promote the commercialization of advanced coal technologies that will generate electricity in an environmentally responsible manner. KU and LG&E received an investment tax credit related to TC2, for more details see Note 6, Income Taxes. Investment tax credits prior to 2006 resulted from provisions of the tax law that permitted a reduction of KU's tax liability based on credits for construction expenditures. Deferred investment tax credits are being amortized to income over the estimated lives of the related property that gave rise to the credits.

Revenue Recognition. Revenues are recorded based on service rendered to customers through month-end. KU accrues an estimate for unbilled revenues from each meter reading date to the end of the accounting period based on allocating the daily system net deliveries between billed volumes and unbilled volumes. The allocation is based on a daily ratio of the number of meter reading cycles remaining in the month to the total number of meter reading cycles in each month. Each day's ratio is then multiplied by each day's system net deliveries to determine an estimated billed and unbilled volume for each day of the accounting period. The unbilled revenue estimates included in accounts receivable were \$59 million and \$42 million at December 31, 2007 and 2006, respectively.

Fuel Costs. The cost of fuel for generation is charged to expense as used.

Management's Use of Estimates. The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported assets and liabilities and disclosure of contingent items at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Accrued liabilities, including legal and environmental, are recorded when they are probable and estimable. Actual results could differ from those estimates.

Recent Accounting Pronouncements. The following are recent accounting pronouncements affecting KU:

### SFAS No. 160

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements*, which is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008. The objective of this statement is to improve the relevance, comparability and transparency of financial information in a reporting entity's consolidated financial statements. The Company expects the adoption of SFAS No. 160 to have no impact on its statements of operations, financial position and cash flows.

### SFAS No. 159

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities – Including an Amendment of FASB Statement No. 115. SFAS No. 159 permits entities to choose to measure many financial instruments and certain other assets and liabilities at fair value on an instrument-by-instrument basis (the fair value option). Unrealized gains and losses on items for which the fair value option has been elected are to be recognized in earnings at each subsequent reporting date. SFAS No. 159 is effective for fiscal years beginning after November 15, 2007. SFAS No. 159 was adopted effective January 1, 2008 and had no impact on the statements of operations, financial position and cash flows.

### SFAS No. 157

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements, which, except as described below, is effective for fiscal years beginning after November 15, 2007. This statement defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles and expands disclosures about fair value measurements. SFAS No. 157 does not expand the application of fair value accounting to new circumstances. In February 2008, the FASB issued FASB Staff Position 157-2, Effective Date of FASB Statement No 157, which delays the effective date of SFAS No. 157 for all nonfinancial assets and liabilities, except those that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually), to fiscal years beginning after November 15, 2008 and interim periods within those fiscal years. SFAS No. 157 was adopted effective January 1, 2008, except as it applies to those nonfinancial assets and liabilities, and had no impact on the statements of operations, financial position and cash flows, however, the Company will provide additional disclosures relating to its financial derivatives, AROs and pension assets as required in 2008.

### FIN 48

In July 2006, the FASB issued FIN 48 which clarifies the accounting for the uncertainty of income tax positions recognized in an enterprise's financial statements in accordance with SFAS No. 109. This interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return.

The evaluation of a tax position in accordance with FIN 48 is a two-step process. The first step is recognition based on the determination of whether it is "more likely than not" that a tax position will be sustained upon examination. The second step is to measure a tax position that meets the "more likely than not" threshold. The tax position is measured as the amount of potential benefit that exceeds 50% likelihood of being realized.

FIN 48 is effective for fiscal years beginning after December 15, 2006, and was adopted effective January 1, 2007. The impact of FIN 48 on the statements of operations, financial position and cash flows was not material.

### Note 2 - Rates and Regulatory Matters

KU is subject to the jurisdiction of the Kentucky Commission, the Virginia Commission, the Tennessee Regulatory Authority and the FERC in virtually all matters related to electric utility regulation, and as such, its accounting is subject to SFAS No. 71. Given its competitive position in the marketplace and the status of regulation in Kentucky and Virginia, KU has no plans or intentions to discontinue its application of SFAS No. 71.

### Rate Case

In December 2003, KU filed an application with the Kentucky Commission requesting an adjustment in KU's rates. The revenue increase requested was \$58 million. In June 2004, the Kentucky Commission issued an Order approving an increase in KU's base rates of approximately \$46 million (7%). The rate increase took effect on July 1, 2004.

Final proceedings took place during the first quarter of 2006 concerning the sole remaining open issue relating to state income tax rates used in calculating the granted rate increase. On March 31, 2006, the Kentucky Commission issued an Order resolving this issue in KU's favor consistent with the original rate increase order.

### Regulatory Assets and Liabilities

The following regulatory assets and liabilities were included in the balance sheets as of December 31:

(in millions)	<u> 2007</u>	<u>2006</u>
ARO	\$ 24	\$ 22
MISO exit	20	20
FAC	17	16
Unamortized loss on bonds	10	10
ECR	11	10
Other	4	5
Subtotal	86	83
Pension and postretirement benefits	28	64
Total regulatory assets	<u>\$ 114</u>	<u>\$ 147</u>
Accumulated cost of removal of utility plant	\$ 310	\$ 297
Deferred income taxes – net	22	27
Other	10	6
Total regulatory liabilities	<u>\$ 342</u>	<u>\$ 330</u>

KU does not currently earn a rate of return on the FAC regulatory asset, which is a separate recovery mechanism with recovery within twelve months. No return is earned on the pension and postretirement benefits regulatory asset which represents the changes in funded status of the plans. The Company will seek recovery of this asset in future proceedings with the Kentucky and Virginia Commissions. No return is currently earned on the ARO asset. This regulatory asset will be offset against the associated regulatory liability, ARO asset and ARO liability at the time the underlying asset is retired. The MISO exit amount represents the costs relating to the withdrawal from MISO membership. KU will seek recovery of this asset in future proceedings with the Kentucky and Virginia Commissions. KU currently earns a rate of return on the remaining regulatory assets. Other regulatory assets include VDT costs, the merger surcredit and deferred storm costs. Other regulatory liabilities include DSM and MISO costs included in base rates that will be netted against costs of withdrawing from the MISO in the next rate case.

ARO. A summary of KU's net ARO assets, regulatory assets, liabilities and cost of removal established under FIN 47, Accounting for Conditional Asset Retirement Obligations, an Interpretation of SFAS No. 143, and SFAS No. 143, Accounting for Asset Retirement Obligations, follows:

	ARO Net	ARO	Regulatory	Regulatory	Accumulated	Cost of Removal
(in millions)	<u>Assets</u>	<u>Liabilities</u>	<u>Assets</u>	<u>Liabilities</u>	Cost of Removal	<u>Depreciation</u>
As of December 31, 2005	\$ 6	\$(27)	\$20	\$ (2)	\$ 2	\$ 1
ARO accretion	-	(1)	1	-	•••	-
ARO depreciation	_(1)		1	<u>_</u>	<u> </u>	****
As of December 31, 2006	5	(28)	22	(2)	2	1
ARO accretion	***	<u>(2</u> )	2		_ <del>_</del>	
As of December 31, 2007	<u>\$ 5</u>	<u>\$(30</u> )	<u>\$24</u>	<u>\$ (2)</u>	<u>\$_2</u>	<u>\$ 1</u>

Pursuant to regulatory treatment prescribed under SFAS No. 71, an offsetting regulatory credit was recorded in depreciation and amortization in the income statement of \$2 million in 2007 and 2006 for the ARO accretion and depreciation expense. KU AROs are primarily related to the final retirement of assets associated with generating units. For assets associated with AROs, the removal cost accrued through depreciation under regulatory accounting is established as a regulatory liability pursuant to regulatory treatment prescribed under SFAS No. 71. There were no FIN 47 net asset additions during 2007 or 2006. For the years ended December 31, 2007 and 2006, KU recorded less than \$1 million of depreciation expense related to the cost of removal of ARO related assets. An offsetting regulatory liability was established pursuant to regulatory treatment prescribed under SFAS No. 71.

KU transmission and distribution lines largely operate under perpetual property easement agreements which do not generally require restoration upon removal of the property. Therefore, under SFAS No. 143, no material asset retirement obligations are recorded for transmission and distribution assets.

MISO Exit. Following receipt of applicable FERC, Kentucky Commission and other regulatory orders, KU withdrew from the MISO effective September 1, 2006. Specific proceedings regarding the costs and benefits of the MISO and exit matters had been underway since July 2003. Since the exit from the MISO, KU has been operating under a FERC-approved open access-transmission tariff. KU now contracts with the Tennessee Valley Authority to act as its transmission Reliability Coordinator and Southwest Power Pool, Inc. to function as Independent Transmission Organization, pursuant to FERC requirements.

KU and the MISO have agreed upon overall calculation methods for the contractual exit fee to be paid by the Company following its withdrawal. In October 2006, KU paid approximately \$20 million to the MISO pursuant to an invoice regarding the exit fee and made related FERC compliance filings. The Company's payment of this exit fee amount was with reservation of its rights to contest the amount, or components thereof, following a continuing review of its calculation and supporting documentation. In December 2006, KU provided notice to the MISO of its disagreement with the calculation of the exit fee. KU and the MISO have resolved their dispute regarding the calculation of the exit fee and, in November 2007, filed an application with the FERC for approval of a recalculation agreement. In March 2008, the FERC approved the parties' recalculation of the exit fee, and the approved agreement provides KU with an immediate recovery of \$1 million and will provide an estimated \$3 million over the next eight years for credits realized from other payments the MISO will receive, plus interest. Orders of the Kentucky Commission approving the Company's exit from the MISO have authorized the establishment of a regulatory asset for the exit fee, subject to adjustment for possible future MISO credits, and a regulatory liability for certain revenues associated with former MISO administrative charges, which may continue to be collected via base rates. The treatment of the regulatory asset and liability will be determined in KU's next rate case, however, the Company historically has received approval to recover and refund regulatory assets and liabilities.

FAC. KU's retail rates contain an FAC, whereby increases and decreases in the cost of fuel for generation are reflected in the rates charged to retail customers. The FAC allows the Company to adjust customers' accounts for the difference between the fuel cost component of base rates and the actual fuel cost, including transportation costs. Refunds to customers occur if the actual costs are below the embedded cost component. Additional charges to customers occur if the actual costs exceed the embedded cost component. The amount of the regulatory asset or liability is the amount that has been under- or over-recovered due to timing or adjustments to the mechanism.

The Kentucky Commission requires public hearings at six-month intervals to examine past fuel adjustments, and at two-year intervals to review past operations of the fuel clause and transfer of the then current fuel adjustment charge or credit to the base charges.

In January 2008, the Kentucky Commission initiated a routine examination of KU's FAC for the six-month period May 1, 2007 through October 31, 2007. Data discovery is ongoing and a public hearing is scheduled in March 2008.

In August 2007, the Kentucky Commission initiated a routine examination of KU's FAC for the six-month period of November 1, 2006 through April 30, 2007. Data discovery has concluded and a public hearing was held in October 2007. The Kentucky Commission issued an Order in January 2008, approving the charges and credits billed through the FAC during the review period.

In December 2006, the Kentucky Commission initiated its periodic two-year review of KU's past operations of the fuel clause and transfer of fuel costs from the FAC to base rates for November 1, 2004 through October 31, 2006. In March 2007, the KIUC challenged KU's recovery of approximately \$5 million in aggregate fuel costs KU incurred during a period prior to its exit from the MISO and requested the Kentucky Commission disallow this amount. A public hearing was held in May 2007. In October 2007, the Kentucky Commission issued its Order approving the calculation and application of KU's FAC charges and fuel procurement practices and indicated that KU was in compliance with the provisions of Administrative Regulation 807 KAR 5:5056. The Kentucky Commission further approved KU's recommendation for the transfer of fuel cost from the FAC to base rates. In November 2007, the KIUC filed a petition for rehearing, claiming the Kentucky Commission misinterpreted the KIUC's arguments in the proceeding. In the same month, the Kentucky Commission issued an Order denying the KIUC's request for rehearing. An appeal was not filed by the KIUC.

In July 2006, the Kentucky Commission initiated a six-month review of the FAC for KU for the period of November 1, 2005 through April 30, 2006. The Kentucky Commission issued an Order in November 2006, approving the charges and credits billed through the FAC during the review period.

In January 2003, the Kentucky Commission reviewed KU's FAC for the six-month period ended October 31, 2001. The Kentucky Commission ordered KU to reduce its fuel costs for purposes of calculating its FAC by less than \$1 million. At issue was the purchase of approximately 102,000 tons of coal from Western Kentucky Energy Corp., a non-regulated affiliate, for use at KU's Ghent facility. The Kentucky Commission further ordered that an independent audit be conducted to examine operational and management aspects of both KU's and LG&E's fuel procurement functions. The final report's recommendations, issued in February 2004, related to documentation and process improvements. Management Audit Action Plans were agreed upon by KU and the Kentucky Commission Staff in the second quarter of 2004, and resulted in Audit Progress Reports being filed by KU with the Kentucky Commission. In February 2007, the Kentucky Commission staff indicated that KU fully complied with all audit recommendations and that no further reports are required.

KU also employs an FAC mechanism for Virginia customers that uses an average fuel cost factor based primarily on projected fuel costs. The fuel cost factor may be adjusted annually for over or under collections of fuel costs from the previous year. In February 2007, KU filed an application with the Virginia Commission seeking approval of an increase of approximately \$4 million in its fuel cost factor to reflect higher fuel costs incurred and under-collected during 2006, and anticipated higher fuel costs to be incurred in 2007. The Virginia Commission approved KU's request in April 2007. In February 2008, KU filed an application with the Virginia Commission seeking approval of a decrease of 0.599 cents/KWh in its fuel cost factor applicable during the billing period April 2008 through March 2009. The decrease was requested because KU has fully recovered its under-recovered fuel expenses from the prior periods.

Unamortized Loss on Bonds. The costs of early extinguishment of debt, including call premiums, legal and other expenses, and any unamortized balance of debt expense are amortized using the straight line method, which approximates the effective interest method, over the life of either replacement debt (in the case of refinancing) or the original life of the extinguished debt.

ECR. Kentucky law permits KU to recover the costs of complying with the Federal Clean Air Act, including a return of operating expenses, and a return of and on capital invested, through the ECR mechanism. The amount of the regulatory asset or liability is the amount that has been under- or over-recovered due to timing or adjustments to the mechanism.

In September 2007, the Kentucky Commission initiated six-month and two-year reviews for periods ending October 31, 2006 and April 30, 2007, respectively, of KU's environmental surcharge. Data discovery concluded in December 2007, and all parties to the case submitted requests with the Kentucky Commission to waive rights to a hearing on this matter. The case is submitted for decision and an order is anticipated in the second quarter of 2008.

In June 2006, KU filed an application for a CCN to construct an SCR at the Ghent station and to amend its ECR plan with the Kentucky Commission seeking approval to recover investments in environmental upgrades at the Company's generating facilities. The estimated capital cost of the upgrades for the years 2008 through 2010 is approximately \$125 million, of which approximately \$115 million is for the Air Quality Control System at TC2. A final Order was issued by the Kentucky Commission in December 2006, approving all expenditures and investments as submitted. In October 2007, KU met with the Kentucky Commission and other interested parties to discuss the status of the Ghent Unit 2 SCR construction. KU informed the Kentucky Commission that construction of the Ghent Unit 2 SCR was not going to commence before the CCN expired in December 2007, due to a change in the economics for the project. The CCN expired in December 2007, and KU has delayed construction of the Ghent Unit 2 SCR.

In April 2006, the Kentucky Commission initiated six-month and two-year reviews of KU's environmental surcharge for six-month periods ending July 2003, January 2004, January 2005, July 2005 and January 2006 and for the two-year period ending July 2004. A final Order was received in January 2007, approving the charges and credits billed through the ECR during the review period as well as approving billing adjustments, a roll-in to base rates, revisions to the monthly surcharge filing and the rate of return on capital.

**VDT.** In December 2001, the Kentucky Commission issued an Order approving a settlement agreement allowing KU to set up a regulatory asset of \$54 million for workforce reduction costs and begin amortizing it over a five-year period starting in April 2001. Some employees rescinded their participation in the voluntary enhanced severance program which, along with the non-recurring charge of \$7 million for FERC and Virginia jurisdictions, thereby decreased the charge to the regulatory asset from \$64 million to \$54 million. The Order reduced revenues by approximately \$11 million through a surcredit on bills to ratepayers over the same five-

year period, reflecting a sharing (40% to the ratepayers and 60% to KU) of savings as stipulated by KU, net of amortization costs of the workforce reduction. The five-year VDT amortization period expired in March 2006.

As part of the settlement agreement in the rate case, in September 2005, KU filed with the Kentucky Commission a plan for the future ratemaking treatment of the VDT surcredit and costs. In February 2006, the AG, KIUC and KU reached a settlement agreement on the future ratemaking treatment of the VDT surcredits and costs and subsequently submitted a joint motion to the Kentucky Commission to approve the unanimous settlement agreement. Under the terms of the settlement agreement, the VDT surcredit will continue at the current level until such time as KU files for a change in base rates. The Kentucky Commission issued an Order in March 2006, approving the settlement agreement.

Merger Surcredit. As part of the LG&E Energy merger with KU Energy Corporation in 1998, KU estimated non-fuel savings over a ten-year period following the merger. Costs to achieve these savings were deferred and amortized over a five-year period pursuant to regulatory orders. In approving the merger, the Kentucky Commission adopted KU's proposal to reduce its retail customers' bills based on one-half of the estimated merger-related savings, net of deferred and amortized amounts, over a five-year period. The surcredit mechanism provides that 50% of the net non-fuel cost savings estimated to be achieved from the merger be provided to ratepayers through a monthly bill credit, and 50% be retained by KU over a five-year period. In that same order, the Kentucky Commission required KU, after the end of the five-year period, to present a plan for sharing with ratepayers the then-projected non-fuel savings associated with the merger. KU submitted this filing in January 2003, proposing to continue to share with ratepayers, on a 50%/50% basis, the estimated fifth-year gross level of non-fuel savings associated with the merger. In October 2003, the Kentucky Commission issued an Order approving a settlement agreement reached with the parties in the case. According to the Order, KU's merger surcredit would remain in place for another five-year term beginning July 1, 2003, the merger savings would continue to be shared 50% with ratepayers and 50% with shareholders and KU would file a plan for the merger surcredit six months before its expiration.

In December 2007, KU submitted to the Kentucky Commission its plan to allow the merger surcredit to terminate as scheduled on June 30, 2008. The Kentucky Commission has not issued a procedural schedule for this proceeding.

**Deferred Storm Costs.** Based on an Order from the Kentucky Commission in June 2004, KU reclassified from maintenance expense to a regulatory asset, \$4 million related to costs not reimbursed from the 2003 ice storm. These costs will be amortized through June 2009. KU earns a return of these amortized costs, which are included in KU's jurisdictional operating expenses.

Pension and Postretirement Benefits. KU adopted SFAS No. 158, Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans, in 2006. This statement requires employers to recognize the overfunded or under-funded status of a defined benefit pension and postretirement plan as an asset or liability in the balance sheet and to recognize through comprehensive income the changes in the funded status in the year in which the changes occur. Under SFAS No. 71, KU can defer recoverable costs that would otherwise be charged to expense or equity by non-regulated entities. Current rate recovery in Kentucky and Virginia is based on SFAS No. 87, Employers' Accounting for Pensions, and SFAS No. 106, Employers' Accounting for Postretirement Benefits Other than Pensions, both of which were amended by SFAS No. 158. Regulators have been clear and consistent with their historical treatment of such rate recovery, therefore, KU has recorded a regulatory asset representing the probable recovery of the portion of the change in funded status of the pension and postretirement plans that is expected to be recovered. The regulatory asset will be adjusted annually as prior service cost and actuarial gains and losses are recognized in net periodic benefit cost.

Accumulated Cost of Removal of Utility Plant. As of December 31, 2007 and 2006, KU has segregated the cost of removal, previously embedded in accumulated depreciation, of \$310 million and \$297 million, respectively, in accordance with FERC Order No. 631. This cost of removal component is for assets that do not have a legal ARO under SFAS No. 143. For reporting purposes in the balance sheets, KU has presented this cost of removal as a regulatory liability pursuant to SFAS No. 71.

**Deferred Income Taxes – Net.** Deferred income taxes represent the future income tax effects of recognizing the regulatory assets and liabilities in the income statement. Deferred income taxes are recognized at currently enacted tax rates for all material temporary differences between the financial reporting and income tax bases of assets and liabilities.

**DSM.** KU's rates contain a DSM provision. The provision includes a rate mechanism that provides for concurrent recovery of DSM costs and provides an incentive for implementing DSM programs. The provision allows KU to recover revenues from lost sales associated with the DSM programs based on program plan engineering estimates and post-implementation evaluations.

In July 2007, KU and LG&E filed an application with the Kentucky Commission requesting an order approving enhanced versions of the existing DSM programs along with the addition of several new cost effective programs. The total annual budget for these programs is approximately \$26 million, an increase over the existing annual budget of approximately \$10 million. Data discovery concluded in November 2007, and the Community Action Council ("CAC") for Lexington-Fayette, Bourbon, Harrison and Nicholas counties and the Kentucky Association for Community Action ("KACA"), filed a motion for hearing. In January 2008, the CAC and KACA filed a motion with the Kentucky Commission to withdraw the request because the parties reached a settlement. The Kentucky Commission is allowing the current tariffs to remain in effect until a final order is issued.

### Other Regulatory Matters

Utility Competition in Virginia. The Commonwealth of Virginia passed the Virginia Electric Utility Restructuring Act in 1999. This act gave Virginia customers the ability to choose their electric supplier. Rates are capped at current levels through December 2010. The Virginia Commission will continue to require each Virginia utility to make annual filings of either a base rate change or an Annual Informational Filing consisting of a set of standard financial schedules. The Virginia Commission Staff will issue a Staff Report regarding the individual utility's financial performance during the historic 12-month period. The Staff Report can lead to an adjustment in rates, but through December 2010, rates are subject to the capped rate period and essentially "frozen". In April 2007, Virginia passed legislation terminating this competitive market and commencing reregulation of utility rates in Virginia. The new act will end the cap on rates at the end of 2008, rather than through December 2010, and end customer choice for most consumers in the applicable regions of the state. Thereafter, a hybrid model of regulation is expected to apply in Virginia, whereby utility rates would be reviewed every two years and a utility's rate of return on equity shall not be set lower than the average of the rates of return for other regional utilities, with certain caps, floors or adjustments. The legislation was effective in July 2007, and also includes a 10% nonbinding goal for renewable power generation by 2022, as well as incentives for new generation, including renewables. Under the legislation, KU retains an existing exemption from customer choice and other restructuring activities as applicable to KU's limited service territory in Virginia, However, subject to future developments, KU may or may not undertake such a rate proceeding in the first six months of 2009 based on calendar year 2008 financial data under the hybrid model of regulation, or make biennial rate filings with the Virginia Commission thereafter.

Regional Reliability Council. KU has changed its regional reliability council membership from the Reliability First Corporation to the SERC Reliability Corporation ("SERC"), effective January 1, 2007. Regional reliability councils are industry consortiums that promote, coordinate and ensure the reliability of the bulk electric supply systems in North America.

TC2 CCN Application. A CCN application for construction of the new, base-load, coal fired unit TC2, which will be jointly owned by KU and LG&E, was approved by the Kentucky Commission in November 2005, and initial CCN applications for three transmission lines were approved in September 2005 and May 2006. In August 2006, KU obtained dismissal of a judicial review of such CCN approvals by certain property owners. In December 2007, the Kentucky Court of Appeals reversed and remanded the lower Court's dismissal. Both parties have filed for reconsideration of elements of the appellate court's ruling. The transmission lines are also subject to routine regulatory filings and the right-of-way acquisition process. See Note 9, Commitments and Contingencies, for further discussion regarding the TC2 air permit.

Ghent FGD Inquiry. In October 2006, the Kentucky Commission commenced an inquiry into elements of KU's planned construction of one of its three new FGDs at the Ghent generating station. The proceeding requested, and KU provided, additional information regarding configuration details, expenditures and the proposed construction sequence applicable to future construction phases of the Ghent FGD project. In January 2007, the Kentucky Commission issued an Order completing its inquiry in the matter and confirming its approval of KU's construction plan. The Order also provided general guidance for jurisdictional utilities regarding applicable information and data requirements for future CCN applications and subsequent proceedings.

Market-Based Rate Authority. In July 2006, the FERC issued an Order in KU's market-based rate proceeding accepting KU's further proposal to address certain market power issues the FERC had claimed would arise upon an exit from the MISO. In particular, KU received permission to sell power at market-based rates at the interface of control areas in which it may be deemed to have market power, subject to a restriction that such power not be collusively re-sold back into such control areas. However, restrictions exist on sales by KU of power at market-based rates in the KU/LG&E and Big Rivers Electric Corporation control areas. In June 2007, the FERC issued Order No. 697 implementing certain reforms to market-based rate regulations, including restrictions similar to those previously in place for KU's power sales at control area interfaces. As a condition of receiving and retaining market-based rate authority, KU must comply with applicable affiliate restrictions set forth in FERC's regulation.

FERC Audit Results. In July 2006, the FERC issued a final report under a routine audit that its Office of Enforcement (formerly its Office of Market Oversight and Investigations) had conducted regarding the compliance of E.ON U.S. and its subsidiaries, including KU, under the FERC's standards of conduct and codes of conduct requirements, as well as other areas. The final report contained certain findings calling for improvements in E.ON U.S. and its subsidiaries' structures, policies and procedures relating to transmission, generation dispatch, energy marketing and other practices. E.ON U.S. and its subsidiaries have agreed to certain corrective actions and have submitted procedures related to such corrective actions to the FERC. The corrective actions are in the nature of organizational and operational improvements as described above and are not expected to have a material adverse impact on the Company's results of operations or financial condition.

Mandatory Reliability Standards. As a result of EPAct 2005, certain formerly voluntary reliability standards became mandatory in June 2007, and authority was delegated to various regional reliability organizations ("RRO") by the Electric Reliability Organization, which was authorized by the FERC to enforce compliance with such standards, including promulgating new standards. Failure to comply with mandatory reliability standards can subject a registered entity to sanctions, including potential fines of up to \$1 million per day as

well as non-monetary penalties, depending upon the circumstances of the violation. KU is a member of the SERC, which acts as KU's RRO. The SERC is currently assessing KU's compliance with certain existing mitigation plans resulting from a prior RRO's audit of various reliability standards. While KU believes itself to be in substantial compliance with the mandatory reliability standards generally, KU cannot predict the outcome of the current SERC proceeding or of other analysis which may be conducted regarding compliance with particular reliability standards.

**IRP.** Integrated resource planning regulations in Kentucky require major utilities to make triennial IRP filings with the Kentucky Commission. In April 2005, KU and LG&E filed their 2005 joint IRP with the Kentucky Commission. The IRP provides historical and projected demand, resource and financial data, and other operating performance and system information. The AG and the KIUC were granted intervention in the IRP proceeding. The Kentucky Commission issued its staff report with no substantive issues noted and closed the case by Order in February 2006. KU and LG&E will submit the next joint triennial filing in April 2008.

PUHCA 2005. E.ON, KU's ultimate parent, is a registered holding company under PUHCA 2005. E.ON, its utility subsidiaries, including KU, and certain of its non-utility subsidiaries, are subject to extensive regulation by the FERC with respect to numerous matters, including: electric utility facilities and operations, wholesale sales of power and related transactions, accounting practices, issuances and sales of securities, acquisitions and sales of utility properties, payments of dividends out of capital and surplus, financial matters and inter-system sales of non-power goods and services. KU believes that it has adequate authority (including financing authority) under existing FERC orders and regulations to conduct its business and will seek additional authorization when necessary.

**EPAct 2005.** The EPAct 2005 was enacted in August 2005. Among other matters, this comprehensive legislation contains provisions mandating improved electric reliability standards and performance; granting enhanced civil penalty authority to the FERC; providing economic and other incentives relating to transmission, pollution control and renewable generation assets; increasing funding for clean coal generation incentives; repealing the Public Utility Holding Company Act of 1935; enacting PUHCA 2005 and expanding FERC jurisdiction over public utility holding companies and related matters via the Federal Power Act and PUHCA 2005.

In February 2006, the Kentucky Commission initiated an administrative proceeding to consider the requirements of the EPAct 2005, Subtitle E Section 1252, Smart Metering, which concerns time-based metering and demand response, and Section 1254, Interconnections. EPAct 2005 requires each state regulatory authority to conduct a formal investigation and issue a decision on whether or not it is appropriate to implement certain Section 1252, Smart Metering standards within eighteen months after the enactment of EPAct 2005 and to commence consideration of Section 1254. Interconnection standards within one year after the enactment of EPAct 2005. Following a public hearing with all Kentucky jurisdictional electric utilities, in December 2006. the Kentucky Commission issued an Order in this proceeding indicating that the EPAct 2005 Section 1252, Smart Metering and Section 1254, Interconnection standards should not be adopted. However, all five Kentucky Commission jurisdictional utilities are required to file real-time pricing pilot programs for their large commercial and industrial customers. KU developed a real-time pricing pilot for large industrial and commercial customers and filed the details of the plan with the Kentucky Commission in April 2007. Data discovery concluded in July 2007, and no parties to the case requested a hearing. In February 2008, the Kentucky Commission issued an Order approving the real-time pricing pilot program proposed by KU for implementation within approximately eight months. KU will notify the Kentucky Commission 10 days prior to the actual implementation date and will file annual reports on the program within 90 days of each plan year-end for the 3-year pilot period.

**Green Energy Riders.** In February 2007, KU and LG&E filed a Joint Application and Testimony for Proposed Green Energy Riders. The AG and KIUC were granted full intervention. In May 2007, a Kentucky Commission Order was issued authorizing KU to establish Small and Large Green Energy Riders, allowing customers to contribute funds to be used for the purchase of renewable energy credits.

**Home Energy Assistance Program.** In July 2007, KU filed an application with the Kentucky Commission for the establishment of a new Home Energy Assistance program. During September 2007, the Kentucky Commission approved KU's new five-year program as filed, effective in October 2007. The program terminates in September 2012, and is funded through a \$0.10 per month meter charge.

**Depreciation Study.** In December 2007, KU filed a depreciation study with the Kentucky Commission requesting a change in the depreciation rates as required by a previous Order. An adjustment to the depreciation rates is dependent on an order being received by the Kentucky Commission, the timing of which cannot currently be determined.

### Note 3 - Financial Instruments

The cost and estimated fair values of KU's non-trading financial instruments as of December 31 follow:

	<u>200°</u>	<u>2006</u>		
	Carrying	Fair	Carrying	Fair
(in millions)	<u>Value</u>	<u>Value</u>	<u>Value</u>	<u>Value</u>
Long-term debt (including				
current portion of \$33 million)	\$333	\$333	\$360	\$360
Long-term debt from affiliate	\$931	\$996	\$483	\$487

All of the above valuations reflect prices quoted by exchanges except for the loans from affiliate which are fair valued using accepted valuation models. The fair values of cash and cash equivalents, accounts receivable, cash surrender value of key man life insurance, accounts payable and notes payable are substantially the same as their carrying values.

Interest Rate Swaps (hedging derivatives). KU has used over-the-counter interest rate swaps to hedge exposure to market fluctuations in certain of its debt instruments. Pursuant to Company policy, use of these financial instruments has been intended to mitigate risk, earnings and cash flow volatility and was not speculative in nature. Management had designated all of the interest rate swaps as hedge instruments. Financial instruments designated as fair value hedges and the underlying hedged items are periodically marked to market with the resulting net gains and losses recorded directly into net income. Upon termination of any fair value hedge, the resulting gain or loss is recorded into net income.

KU had no outstanding interest rate swap agreements at December 31, 2007. KU was party to an interest rate swap agreement with a notional amount of \$53 million as of December 31, 2006. The interest rate swap was terminated in February 2007, when the underlying debt was defeased. Under this swap agreement, KU paid variable rates based on the London Interbank Offer Rate averaging 7.44% and received fixed rates averaging 7.92% at December 31, 2006. The swap agreement in effect at December 31, 2006 had been designated as a fair value hedge. The fair value designation was assigned because the underlying fixed rate debt had a firm future commitment. For 2007 and 2006, the effect of marking these financial instruments and the underlying debt to market resulted in pre-tax gains of less than \$1 million recorded in interest expense.

Interest rate swaps hedge interest rate risk on the underlying debt under SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended, in addition to swaps being marked to market, the item being hedged must also be marked to market. Consequently, at December 31, 2006, KU's debt reflects a mark-to-market adjustment of less than \$1 million.

Energy Risk Management Activities (non-hedging derivatives). KU conducts energy trading and risk management activities to maximize the value of power sales from physical assets it owns. Energy trading activities are principally forward financial transactions to hedge price risk and are accounted for on a mark-to-market basis in accordance with SFAS No. 133, as amended.

The table below summarizes KU's energy trading and risk management activities:

(in millions)	<u> 2007</u>	<u>2006</u>
Fair value of contracts at beginning of period, net asset	\$ 1	\$ 1
Unrealized gains and losses recognized at contract		
inception during the period	•	**
Realized gains and losses recognized during the period	-	1
Changes in fair values attributable to changes in valuation		
techniques and assumptions	(1)	(2)
Other unrealized gains and losses and changes in fair values	**********	1
Fair value of contracts at end of period, net asset	<u>\$ -</u>	<u>\$ 1</u>

No changes to valuation techniques for energy trading and risk management activities occurred during 2007 or 2006. Changes in market pricing, interest rate and volatility assumptions were made during both years. All contracts outstanding at December 31, 2007 and 2006, have a maturity of less than one year and are valued using prices actively quoted for proposed or executed transactions or quoted by brokers.

KU maintains policies intended to minimize credit risk and revalues credit exposures daily to monitor compliance with those policies. At December 31, 2007, 100% of the trading and risk management commitments were with counterparties rated BBB-/Baa3 equivalent or better.

KU hedges the price volatility of its forecasted electric wholesale sales with the sales of market-traded electric forward contracts for periods of less than one year. Hedge accounting treatment has not been elected for these transactions, and therefore gains and losses are shown in the statements of income in other income – net. No material pre-tax gains and losses resulted in 2007. Pre-tax gains of \$1 million resulted in 2006.

#### Note 4 - Concentrations of Credit and Other Risk

Credit risk represents the accounting loss that would be recognized at the reporting date if counterparties failed to perform as contracted. Concentrations of credit risk (whether on- or off-balance sheet) relate to groups of customers or counterparties that have similar economic or industry characteristics that would cause their ability to meet contractual obligations to be similarly affected by changes in economic or other conditions.

KU's customer receivables and revenues arise from deliveries of electricity to approximately 506,000 customers in over 600 communities and adjacent suburban and rural areas in 77 counties in central, southeastern and western Kentucky, to approximately 30,000 customers in five counties in southwestern Virginia and 5 customers in Tennessee. For the years ended December 31, 2007 and 2006, 100% of total revenue was derived from electric operations.

Effective August 1, 2006, KU and its employees represented by the IBEW Local 2100 entered into a new three-year collective bargaining agreement. The new agreement provides for negotiated increases or changes to wages, benefits or other provisions and for annual wage re-openers. A wage re-opener was negotiated in July 2007. KU and its employees represented by the USWA Local 9447-01 entered into a three-year collective bargaining agreement effective August 2005, with authorized annual wage re-openers. The employees represented by these two bargaining units comprise approximately 16% of KU's workforce at December 31, 2007. Wage re-openers were negotiated in July 2006, and July 2007.

### Note 5 - Pension and Other Postretirement Benefit Plans

KU has both funded and unfunded non-contributory defined benefit pension plans and other postretirement benefit plans that together cover substantially all of its employees. The healthcare plans are contributory with participants' contributions adjusted annually. KU uses December 31 as the measurement date for its plans.

**Obligations and Funded Status.** The following tables provide a reconciliation of the changes in the plans' benefit obligations and fair value of assets over the two-year period ending December 31, 2007, and a statement of the funded status as of December 31 for KU's sponsored defined benefit plans:

					Oth	ier Post	retire	ment
(in millions)		Pension	Bene	fits	Benefits			
,	2	007	2	006	20	007	2(	006
Change in benefit obligation					-			
Benefit obligation at beginning of year	\$	303	\$	318	\$	88	\$	95
Service cost		6		6		2		2
Interest cost		17		17		5		5
Benefits paid, net of retiree contributions		(19)		(19)		(5)		(5)
Actuarial gain and other		(23)		(19)		(14)		(9)
Benefit obligation at end of year	\$	284	\$	303	\$	76	\$	88
Change in plan assets								
Fair value of plan assets at beginning of year	\$	253	\$	247	\$	12	\$	9
Actual return on plan assets		17		26		-		1
Employer contributions		13		-		6		7
Benefits paid, net of retiree contributions		(19)		(19)		(5)		(5)
Administrative expenses and other		Me		(1)				-
Fair value of plan assets at end of year	\$	264	\$	253	\$	13	\$	12
Funded status at end of year		(20)	\$	(50)	\$	(63)	\$	(76)

Amounts Recognized in Statement of Financial Position. The following tables provide the amounts recognized in the balance sheets and information for plans with benefit obligations in excess of plan assets as of December 31:

					Ot	her Post	retire	ment	
(in millions)	Pension Benefits					Benefits			
•	2	007	2	006	2	007	2	006	
Regulatory assets	\$	37	\$	59	\$	(9)	\$	5	
Accrued benefit liability (non-current)		(20)		(50)		(63)		(76)	

Additional year-end information for plans with accumulated benefit obligations in excess of plan assets:

(in millions)	Pension	Benefits	Other Postretirement Benefits				
,	2007	2006	2007	2006			
Benefit obligation	\$ 284	\$ 303	\$ 76	\$ 88			
Accumulated benefit obligation	243	258	-	-			
Fair value of plan assets	264	253	13	12			

Components of Net Periodic Benefit Cost. The following table provides the components of net periodic benefit cost for the plans:

					Oth	er Post	tretirer	nent
(in millions)	Pension Benefits			fits	Benefits			
	20	007	2	006	20	07	20	06
Service cost	\$	6	\$	6	\$	2	\$	2
Interest cost		17		17		5		5
Expected return on plan assets		(21)		(20)		(1)		(1)
Amortization of prior service costs		1		1				1
Amortization of actuarial loss		2		4		-		-
Amortization of transitional obligation								1
Benefit cost at end of year	\$	5	\$	8	\$	6	\$	8

The assumptions used in the measurement of KU's pension benefit obligation are shown in the following table:

	<u>2007</u>	<u> 2006</u>
Weighted-average assumptions as of December 31:		
Discount rate	6.66%	5.96%
Rate of compensation increase	5.25%	5.25%

The discount rate is based on the November Mercer Pension Discount Yield Curve, adjusted by the basis point change in the Moody's Corporate Aa Bond Rate in December.

The assumptions used in the measurement of KU's net periodic benefit cost are shown in the following table:

	<u>2007</u>	<u> 2006</u>
Discount rate	5.90%	5.50%
Expected long-term return on plan assets	8.25%	8.25%
Rate of compensation increase	5.25%	5.25%

To develop the expected long-term rate of return on assets assumption, KU considered the current level of expected returns on risk free investments (primarily government bonds), the historical level of the risk premium associated with the other asset classes in which the portfolio is invested and the expectations for future returns of each asset class. The expected return for each asset class was then weighted based on the target asset allocation to develop the expected long-term rate of return on assets assumption for the portfolio.

The following describes the effects on pension benefits by changing the major actuarial assumptions discussed above:

- A 1% change in the assumed discount rate could have an approximate \$30 million positive or negative impact to the 2007 accumulated benefit obligation and an approximate \$40 million positive or negative impact to the 2007 projected benefit obligation.
- A 25 basis point change in the expected rate of return on assets would have an approximate \$1 million positive or negative impact on 2007 pension expense.

Assumed Healthcare Cost Trend Rates. For measurement purposes, a 9% annual increase in the per capita cost of covered healthcare benefits was assumed for 2007. The rate was assumed to decrease gradually to 5% by 2015 and remain at that level thereafter.

Assumed healthcare cost trend rates have a significant effect on the amounts reported for the healthcare plans. A 1% change in assumed healthcare cost trend rates would have resulted in an increase or decrease of less than \$1 million on the 2007 total of service and interest costs components and an increase or decrease of \$4 million in year-end 2007 postretirement benefit obligations.

**Expected Future Benefit Payments and Medicare Subsidy Receipts.** The following list provides the amount of expected future benefit payments, which reflect expected future service and the estimated gross amount of Medicare subsidy receipts:

		Other	Medicare
	Pension	Postretirement	Subsidy
(in millions)	<u>Plans</u>	<b>Benefits</b>	<u>Receipts</u>
2008	\$ 18	\$ 6	\$ (1)
2009	18	7	(1)
2010	17	7	(1)
2011	17	7	(1)
2012	17	7	(1)
2013-17	90	37	(3)

**Plan Assets.** The following table shows KU's weighted-average asset allocation by asset category at December 31:

Pension Plans	Target Range	<u> 2007</u>	<u> 2006</u>
Equity securities	45% - 75%	57%	61%
Debt securities	30% - 50%	43%	39%
Other	0% - 10%	0%	<u>0%</u>
Totals		<u>100%</u>	<u>100%</u>

The investment policy of the pension plans was developed in conjunction with financial consultants, investment advisors and legal counsel. The goal of the investment policy is to preserve the capital of the fund and maximize investment earnings. The return objective is to exceed the benchmark return for the policy index comprised of the following: Russell 3000 Index, MSCI-EAFE Index, Lehman Aggregate and Lehman U.S. Long Government/Credit Bond Index in proportions equal to the targeted asset allocation.

Evaluation of performance focuses on a long-term investment time horizon of at least three to five years or a complete market cycle. The assets of the pension plans are broadly diversified within different asset classes (equities, fixed income securities and cash equivalents).

To minimize the risk of large losses in a single asset class, no more than 5% of the portfolio will be invested in the securities of any one issuer with the exclusion of the U.S. government and its agencies. The equity portion of the fund is diversified among the market's various subsections to diversify risk, maximize returns and avoid undue exposure to any single economic sector, industry group or individual security. The equity subsectors include, but are not limited to, growth, value, small capitalization and international.

In addition, the overall fixed income portfolio may have an average weighted duration, or interest rate sensitivity which is within +/- 20% of the duration of the overall fixed income benchmark. Foreign bonds in the aggregate shall not exceed 10% of the total fund. The portfolio may include a limited investment of up to 20% in below investment grade securities provided that the overall average portfolio quality remains "AA" or better. The below investment grade securities include, but are not limited to, medium-term notes, corporate debt, non-dollar and emerging market debt and asset backed securities. The cash investments should be in securities that either are of short maturities (not to exceed 180 days) or readily marketable with modest risk.

Derivative securities are permitted only to improve the portfolio's risk/return profile, to modify the portfolio's duration or to reduce transaction costs and must be used in conjunction with underlying physical assets in the portfolio. Derivative securities that involve speculation, leverage, interest rate anticipation, or any undue risk whatsoever are not deemed appropriate investments.

The investment objective for the postretirement benefit plan is to provide current income consistent with stability of principal and liquidity while maintaining a stable net asset value of \$1.00 per share. The postretirement funds are invested in a prime cash money market fund that invests primarily in a portfolio of short-term, high-quality fixed income securities issued by banks, corporations and the U.S. government.

Contributions. KU made a discretionary contribution to the pension plan of \$13 million in January 2007. After this payment, KU's pension plan assets are in excess of the December 31, 2007 accumulated benefit obligation.

In addition, KU made contributions to other postretirement benefit plans of \$6 million and \$7 million in 2007 and 2006, respectively. In 2008, KU anticipates making voluntary contributions to fund the Voluntary Employee Beneficiary Association trusts to match the annual postretirement expense and funding the 401(h) plan up to the maximum amount allowed by law.

**Pension Legislation.** The Pension Protection Act of 2006 was enacted in August 2006. The new rules are generally effective for plan years beginning after 2008. Among other matters, this comprehensive legislation contains provisions applicable to defined benefit plans which generally (i) mandate 100% funding of current liabilities within seven years; (ii) increase tax-deduction levels regarding contributions; (iii) revise certain actuarial assumptions, such as mortality tables and discount rates; and (iv) raise federal insurance premiums and other fees for under-funded and distressed plans. The legislation also contains similar provisions relating to defined-contribution plans and qualified and non-qualified executive pension plans and other matters.

**Thrift Savings Plans.** KU has a thrift savings plan under section 401(k) of the Internal Revenue Code. Under the plan, eligible employees may defer and contribute to the plan a portion of current compensation in order to provide future retirement benefits. KU makes contributions to the plan by matching a portion of the employee contributions. The costs of this matching were \$2 million for 2007 and 2006.

### Note 6 - Income Taxes

A United States consolidated income tax return is filed by E.ON U.S.'s direct parent, E.ON US Investments Corp., for each tax period. Each subsidiary of the consolidated tax group, including KU, will calculate its separate income tax for the tax period. The resulting separate-return tax cost or benefit will be paid to or received from the parent company or its designee. KU also files income tax returns in various state jurisdictions. With few exceptions, KU is no longer subject to U.S. federal income tax examinations for years before 2004. Statutes of limitations related to 2004 and later returns are still open. Tax years 2005, 2006 and 2007 are under audit by the IRS with the 2007 return being examined under an IRS pilot program named "Compliance Assurance Process". This program accelerates the IRS's review to the actual calendar year applicable to the return and ends 90 days after the return is filed.

KU adopted the provisions of FIN 48 effective January 1, 2007. At the date of adoption, KU had less than \$1 million of unrecognized tax benefits, primarily related to federal income taxes. If recognized, the less than \$1 million of unrecognized tax benefits would reduce the effective income tax rate. Additions and reductions of uncertain tax positions during 2007 were less than \$1 million.

Possible amounts of uncertain tax positions for KU that may decrease within the next 12 months total less than \$1 million and are based on the expiration of statutes during 2008.

KU, upon adoption of FIN 48, adopted a new financial statement classification for interest and penalties. Prior to the adoption of FIN 48, KU recorded interest and penalties for income taxes on the income statements in income tax expense and in the taxes accrued balance sheet account, net of tax. Upon adoption of FIN 48, interest is recorded as interest expense and penalties are recorded as operating expenses on the income statement and accrued expenses in the balance sheets, on a pre-tax basis. Interest of less than \$1 million was accrued for 2007 and 2006 based on IRS and Kentucky Department of Revenue large corporate interest rates for underpayment of taxes. No penalties were accrued by KU upon adoption of FIN 48 or through December 31, 2007.

Components of income tax expense are shown in the table below:

(in millions	3)	<u>2007</u>	<u>2006</u>
Current	- federal	\$ 28	\$ 51
	- state	13	11
Deferred	- federal – net	(5)	-
	- state – net	(1)	1
Investment	tax credit – deferred	43	12
Amortizati	on of investment tax credit	(1)	_(1)
Total incon	ne tax expense	<u>\$ 77</u>	<u>\$ 74</u>

Current federal income tax expense decreased and investment tax credit – deferred increased primarily due to the recording of investment tax credits of \$43 million and \$12 million at December 31, 2007 and 2006, respectively, as discussed below.

In June 2006, KU and LG&E filed a joint application with the U.S. Department of Energy ("DOE") requesting certification to be eligible for investment tax credits applicable to the construction of TC2. The EPAct 2005 added Section 48A to the Internal Revenue Code, which provides for an investment tax credit to promote the commercialization of advanced coal technologies that will generate electricity in an environmentally responsible manner. KU's and LG&E's application requested up to the maximum amount of "advanced coal project" credit allowed per taxpayer, or \$125 million, based on an estimate of 15% of projected qualifying TC2 expenditures. In November 2006, the DOE and the IRS announced that KU and LG&E were selected to receive the tax credit. A final IRS certification required to obtain the investment tax credit was received in August 2007. KU's portion of the TC2 tax credit will be approximately \$100 million over the construction period and will be amortized to income over the life of the related property beginning when the facility is placed in service. Based on eligible construction expenditures incurred, KU recorded investment tax credits of \$43 million and \$12 million in 2007 and 2006, respectively, decreasing current federal income taxes.

In September 2007, KU received Order 2007-00178 from the Kentucky Commission approving the accounting of the investment tax credit. In March 2008, certain groups filed suit in federal court in North Carolina against the DOE and IRS claiming the investment tax credit program was violative of certain environmental laws and demanded relief, including suspension or termination of the program. KU is not able to predict the ultimate outcome of this proceeding.

Components of net deferred tax liabilities included in the balance sheets are shown below:

(in millions) Deferred tax liabilities:	<u>2007</u>	<u>2006</u>
Depreciation and other plant-related items	\$292	\$291
Regulatory assets and other	<u>40</u>	<u>37</u>
Total deferred tax liabilities	<u>332</u>	_328
Deferred tax assets:		
Income taxes due to customers	9	10
Pensions and related benefits	17	11
Liabilities and other	_23	23
Total deferred tax assets	<u>49</u>	44
Net deferred income tax liability	<u>\$283</u>	<u>\$284</u>
Balance sheet classification		
Current assets	\$ (2)	\$ (5)
Non-current liabilities	<u> 285</u>	<u> 289</u>
Net deferred income tax liability	<u>\$283</u>	<u>\$284</u>

A reconciliation of differences between the statutory U.S. federal income tax rate and KU's effective income tax rate follows:

	<u> 2007</u>	<u> 2006</u>
Statutory federal income tax rate	35.0%	35.0%
State income taxes, net of federal benefit	3.4	3.9
Reduction of income tax accruals	(0.4)	(0.5)
Qualified production deduction	(1.2)	(0.4)
EEI dividend	(2.9)	(3.4)
Amortization of investment tax credit	(0.4)	(0.5)
Other differences	<u>(1.9</u> )	<u>(1.4)</u>
Effective income tax rate	<u>31.6</u> %	<u>32.7</u> %

The EEI dividend for 2007 and 2006 reflects tax benefits associated with the receipt of dividends from KU's investment in EEI. Subsequent to an EEI management decision regarding changes in the distribution of EEI's previous earnings, KU elected to provide deferred taxes for all book and tax temporary differences in this investment.

Other differences primarily relate to excess deferred taxes which reflect the benefits of deferred taxes reversing at tax rates that differ from statutory rates and various other permanent differences.

H. R. 4520, known as the "American Jobs Creation Act of 2004", allows electric utilities to take a deduction for qualified production activities income starting in 2005.

Kentucky House Bill 272, also known as "Kentucky's Tax Modernization Plan", was signed into law in March 2005. This bill contains a number of changes in Kentucky's tax system, including the reduction of the Corporate income tax rate from 8.25% to 7% effective January 1, 2005, and a further reduction to 6% effective January 1, 2007. As a result of the income tax rate changes, KU's deferred tax reserve amount will exceed its actual deferred tax liability attributable to existing temporary differences, since the new statutory rates are lower than

rates when the deferred tax liability originated. In December 2006, KU received approval from the Kentucky Commission to establish and amortize a regulatory liability of \$11 million for these net excess deferred income tax balances. KU will amortize these depreciation-related excess deferred income tax balances under the average rate assumption method which matches the amortization of the excess deferred income taxes with the life of the timing differences to which they relate. Excess deferred income tax balances related to non-depreciation timing differences were expensed in 2006 due to their immaterial amount. There were no additional adjustments in 2007.

KU expects to have adequate levels of taxable income to realize its recorded deferred tax assets.

### Note 7 - Long-Term Debt

As of December 31, 2007 and 2006, long-term debt and the current portion of long-term debt consist primarily of pollution control bonds and long-term loans from affiliated companies as summarized below.

	Stated		Principal
(in millions)	Interest Rates	<u>Maturities</u>	<u>Amounts</u>
Outstanding at December 31, 2007:			
Noncurrent portion	Variable – 6.33%	2010-2037	\$1,231
Current portion	Variable	2032	\$ 33
Outstanding at December 31, 2006:			
Noncurrent portion	Variable – 6.33%	2010-2036	\$ 702
Current portion	Variable – 7.92%	2007-2032	\$ 141

Pollution control series bonds are obligations of KU issued in connection with tax-exempt pollution control revenue bonds issued by various governmental entities, principally counties in Kentucky. A loan agreement obligates KU to make debt service payments to the county that equate to the debt service due from the county on the related pollution control revenue bonds. Until a series of financing transactions was completed during February 2007, the county's debt was also secured by an equal amount of KU's first mortgage bonds that were pledged to the trustee for the pollution control revenue bonds that match the terms and conditions of the county's debt, but require no payment of principal and interest unless KU defaults on the loan agreement. Proceeds from bond issuances for environmental equipment (primarily related to the installation of FGDs) are held in trust pending expenditure for qualifying assets. At December 31, 2007, and 2006, KU had \$11 million and \$23 million, respectively, of bond proceeds in trust, included in restricted cash in the balance sheets.

Several of the KU pollution control bonds are insured by monoline bond insurers whose ratings have been under pressure due to exposures relating to insurance of sub-prime mortgages. At December 31, 2007, KU had an aggregate \$333 million of outstanding pollution control indebtedness, of which \$300 million is in the form of insured auction rate securities wherein interest rates are reset either weekly or every 35 days via an auction process. Beginning in late 2007, the interest rates on these insured bonds began to increase due to investor concerns about the creditworthiness of the bond insurers. In 2008, interest rates have continued to increase, and the Company has experienced "failed auctions" when there are insufficient bids for the bonds. When there is a failed auction, the interest rate is set pursuant to a formula stipulated in the indenture which can be as high as 15%. During 2007, the average rate on the auction rate bonds was 3.96%, whereas the average rate in January and February of 2008 was 4.72%. The instruments governing these auction rate bonds permit KU to convert the bonds to other interest rate modes, such as various short-term variable rates, long-term fixed rates or intermediate-term fixed rates that are reset infrequently. In the first quarter of 2008, the ratings of the Carroll County 2004 Series A bonds were downgraded from AAA to AA and subsequently to A by S&P and from Aaa to A2 by Moody's, and the Carroll County 2006 Series C bonds were downgraded from Aaa to A2 by Moody's

and from AAA to A- by S&P due to downgrades of the bond insurer. In February 2008, KU issued a notice to bondholders of its intention to convert the Carroll County 2007 Series A bonds and the Trimble County 2007 Series A bonds from the auction rate mode to a fixed interest rate mode, as permitted under the loan documents. In March 2008, KU will issue notices to bondholders of its intention to convert the Carroll County 2006 Series C bonds and the Mercer County 2000 Series A bonds from the auction mode to a weekly interest rate mode, as permitted under the loan documents. KU expects to purchase such bonds and hold some or all such bonds until a later date, including potential further conversion, remarketings or refinancings. Uncertainty in markets relating to auction rate securities or steps KU has taken or may take to mitigate such uncertainty, such as additional conversions, subsequent restructurings or redemptions and refinancings, could result in KU incurring increased interest expense, transaction expenses or other costs and fees or experiencing reduced liquidity relating to existing or future pollution control financing structures. See Note 13, Subsequent Events.

All of KU's first mortgage bonds were released and terminated in February 2007. Only the tax-exempt pollution control revenue bonds issued by the counties remain. Under the provisions for certain of KU's variable-rate pollution control bonds, the bonds are subject to tender for purchase at the option of the holder and to mandatory tender for purchase upon the occurrence of certain events, causing the bonds to be classified as current portion of long-term debt in the balance sheets. The average annualized interest rate for these bonds during 2007 and 2006 was 3.72% and 3.56%, respectively.

At December 31, 2006, KU had an interest rate swap used to hedge KU's underlying debt obligations. The swap hedged specific debt issuances and, consistent with management's designation, was accorded hedge accounting treatment. The swap effectively converted the fixed rate obligation on KU's first mortgage bond Series P to variable-rate. At December 31, 2006, the remaining swap had a notional value of \$53 million. The swap was terminated in February 2007, when the underlying bond was defeased. See Note 3, Financial Instruments.

Redemptions and maturities of long-term debt for 2007 and 2006 are summarized below:

(\$ in n	nillions)	Principal		Secured/	
<u>Year</u>	Description	<u>Amount</u>	<u>Rate</u>	<u>Unsecured</u>	<b>Maturity</b>
2007	Pollution control bonds	\$ 54	Variable	Secured	2024
2007	First mortgage bonds	\$ 54	7.92%	Secured	2007
2006	First mortgage bonds	\$ 36	5.99%	Secured	2006

Issuances of long-term debt for 2007 and 2006 are summarized below:

(\$ in mi	illions)	Principal		Secured/	
Year	<u>Description</u>	<u>Amount</u>	<u>Rate</u>	<u>Unsecured</u>	<u>Maturity</u>
2007	Pollution control bonds	\$ 54	Variable	Unsecured	2034
2007	Pollution control bonds	\$ 18	Variable	Unsecured	2026
2007	Pollution control bonds	\$ 9	Variable	Unsecured	2037
2007	Due to Fidelia	\$ 53	5.69%	Unsecured	2022
2007	Due to Fidelia	\$ 75	5.86%	Unsecured	2037
2007	Due to Fidelia	\$ 50	5.98%	Unsecured	2017
2007	Due to Fidelia	\$100	5.96%	Unsecured	2028
2007	Due to Fidelia	\$ 70	5.71%	Unsecured	2019
2007	Due to Fidelia	\$100	5.45%	Unsecured	2014
2006	Pollution control bonds	\$ 17	Variable	Unsecured	2036
2006	Pollution control bonds	\$ 17	Variable	Unsecured	2036
2006	Due to Fidelia	\$ 50	5.675%	Unsecured	2016
2006	Due to Fidelia	\$ 50	6,33%	Unsecured	2036

In February 2007, KU completed a series of financial transactions impacting its periodic reporting requirements. The \$54 million Pollution Control Series 10 bond was refinanced and replaced with a new unsecured tax-exempt bond of the same amount maturing in 2034. The \$53 million Series P bond was defeased and replaced with an intercompany loan totaling \$53 million from Fidelia. In conjunction with the defeasance, the Company terminated the related interest rate swap. Fidelia also agreed to eliminate the second lien on its two secured loans. Pursuant to the terms of the remaining tax-exempt bonds, the first mortgage bonds were cancelled and the underlying lien on substantially all of KU's assets was released following the completion of these steps. KU no longer has any secured debt and is no longer subject to periodic reporting under the Securities Exchange Act of 1934.

Long-term debt maturities for KU are shown in the following table:

(in millions)		
2008 - 2009	\$ -	
2010	33	
2011	-	
2012	50	
Thereafter	1,181	(a)
Total	<u>\$1,264</u>	

(a) Includes long-term debt of \$33 million classified as current liabilities because these bonds are subject to tender for purchase at the option of the holder and to mandatory tender for purchase upon the occurrence of certain events. These bonds mature in 2032. KU does not expect to pay these amounts in 2008.

## Note 8 - Notes Payable and Other Short-Term Obligations

KU participates in an intercompany money pool agreement wherein E.ON U.S. and/or LG&E make funds available to KU at market-based rates (based on an index of highly rated commercial paper issues) up to \$400 million.

	Total Money	Amount	Balance	Average
(\$ in millions)	Pool Available	<b>Outstanding</b>	<u>Available</u>	Interest Rate
December 31, 2007	\$400	\$23	\$377	4.75%
December 31, 2006	\$400	\$97	\$303	5.25%

As of December 31, 2007 and 2006, E.ON U.S. maintained a revolving credit facility totaling \$150 million and \$200 million, respectively, with an affiliated company, E.ON North America, Inc., to ensure funding availability for the money pool. The balance is as follows:

	Total	Amount	Balance	Average
(\$ in millions)	<u>Available</u>	<b>Outstanding</b>	<u>Available</u>	Interest Rate
December 31, 2007	\$150	\$ 62	\$88	4.97%
December 31, 2006	\$200	\$102	\$98	5.49%

During June 2007, KU entered into a short-term bilateral line of credit totaling \$35 million. During the third quarter of 2007, KU extended the maturity date on this facility to June 2012. There was no outstanding balance under this facility at December 31, 2007.

The covenants under this revolving line of credit include:

- The debt/total capitalization ratio must be less than 70%
- E.ON must own at least 66.667% of voting stock of KU directly or indirectly
- The corporate credit rating of the Company must be at or above BBB- and Baa3 as determined by S&P and Moody's
- A limitation on disposing of assets aggregating more than 15% of total assets as of December 31, 2006

## Note 9 - Commitments and Contingencies

Operating Leases. KU leases office space, office equipment and vehicles and accounts for these leases as operating leases. In addition, KU reimburses LG&E for a portion of the lease expense paid by LG&E for KU's usage of office space leased by LG&E. Total lease expense was \$6 million for 2007 and 2006. The future minimum annual lease payments for operating leases for years subsequent to December 31, 2007, are shown in the following table:

(in millions)	
2008	\$ 6
2009	5
2010	.3
2011	2
2012	2
Thereafter	_4
Total	<u>\$22</u>

Owensboro Contract Litigation. In May 2004, the City of Owensboro, Kentucky and OMU commenced a suit now removed to the U.S. District Court for the Western District of Kentucky, against KU concerning a longterm power supply contract (the "OMU Agreement") with KU. The dispute involves interpretational differences regarding issues under the OMU Agreement, including various payments or charges between KU and OMU and rights concerning excess power, termination and emissions allowances. The complaint seeks in excess of \$6 million in damages in connection with one of its claims for periods prior to 2004, plus damages in an unspecified amount for later-occurring periods on that claim and for other claims. OMU has additionally requested injunctive and other relief, including a declaration that KU is in material breach of the contract. KU has filed an answer in that court denying the OMU claims and presenting counterclaims and amended such filing in January 2007, to include further counterclaims alleging additional damages. During 2005, the FERC declined KU's application to exercise exclusive jurisdiction on matters. In July 2005, the district court resolved a summary judgment motion made by KU in OMU's favor, ruling that a contractual provision grants OMU the ability to terminate the contract without cause upon four years' prior notice, for which ruling KU retains certain rights to appeal. A motion to reconsider that ruling is presently pending before the Court. The parties are continuing various discovery proceedings, as well as settlement negotiations. A trial date has been set for October 2008. In May 2006, OMU issued a notification of its intent to terminate the OMU agreement contract in May 2010, without cause, absent any earlier relief which may be permitted by the proceeding. The Company is currently unable to determine the final outcome of this matter.

Sale and Leaseback Transaction. KU is a participant in a sale and leaseback transaction involving its 62% interest in two jointly owned CTs at KU's E.W. Brown generating station (Units 6 and 7). Commencing in December 1999, KU and LG&E entered into a tax-efficient, 18-year lease of the CTs. KU and LG&E have provided funds to fully defease the lease, and have executed an irrevocable notice to exercise an early purchase option contained in the lease after 15.5 years. The financial statement treatment of this transaction is no different than if KU had retained its ownership. The leasing transaction was entered into following receipt of required state and federal regulatory approvals.

In case of default under the lease, KU is obligated to pay to the lessor its share of certain fees or amounts. Primary events of default include loss or destruction of the CTs, failure to insure or maintain the CTs and unwinding of the transaction due to governmental actions. No events of default currently exist with respect to the lease. Upon any termination of the lease, whether by default or expiration of its term, title to the CTs reverts jointly to KU and LG&E.

At December 31, 2007, the maximum aggregate amount of default fees or amounts was \$10 million, of which KU would be responsible for 62% (approximately \$6 million). KU has made arrangements with E.ON U.S., via guarantee and regulatory commitment, for E.ON U.S. to pay KU's full portion of any default fees or amounts.

Letter of Credit. KU has provided a letter of credit totaling less than \$1 million to support certain obligations related to workers' compensation.

**Purchased Power.** KU has purchased power arrangements with OMU and OVEC. Under the OMU agreement, which could last through January 1, 2020, KU purchases all of the output of an approximately 400-Mw coal-fired generating station not required by OMU. The amount of purchased power available to KU during 2008-2010, which is expected to be approximately 6% of KU's total Kwh native load energy requirements, is dependent upon a number of factors including the OMU units' availability, maintenance schedules, fuel costs and OMU requirements. Payments are based on the total costs of the station allocated per terms of the OMU agreement. Included in the total costs is KU's proportionate share of debt service requirements on \$246 million of OMU bonds outstanding at December 31, 2007. The debt service is allocated to KU based on its annual

allocated share of capacity, which averaged approximately 39% in 2007. KU does not guarantee the OMU bonds, or any requirements therein, in the event of default by OMU.

KU has a contract for purchased power with OVEC, terminating in 2026, for various Mw capacities. KU has an investment of 2.5% ownership in OVEC's common stock, which is accounted for on the cost method of accounting. KU's share of OVEC's output is 2.5%, approximately 55 Mw of generation capacity. Future obligations for power purchases are shown in the following table:

(in millions)		
2008	\$	2.3
2009		25
2010		16
2011		8
2012		9
Thereafter	-	143
Total	\$	224

**Construction Program.** KU had approximately \$392 million of commitments in connection with its construction program at December 31, 2007.

In June 2006, KU and LG&E entered into a construction contract regarding the TC2 project. The contract is generally in the form of a lump-sum, turnkey agreement for the design, engineering, procurement, construction, commissioning, testing and delivery of the project, according to designated specifications, terms and conditions. The contract price and its components are subject to a number of potential adjustments which may serve to increase or decrease the ultimate construction price paid or payable to the contractor. The contract also contains standard representations, covenants, indemnities, termination and other provisions for arrangements of this type, including termination for convenience or for cause rights.

TC2 Air Permit. The Sierra Club and other environmental groups filed a petition challenging the air permit issued for the TC2 baseload generating unit which was issued by the Kentucky Division of Air Quality in November 2005. The filing of the challenge did not stay the permit, so the Company was free to proceed with construction during the pendancy of the action. In June 2007, the state hearing officer assigned to the matter recommended upholding the air permit with minor revisions. In September 2007, the Secretary of the Kentucky Environmental and Public Protection Cabinet issued a final Order approving the hearing officer's recommendation and upholding the permit. In September 2007, KU administratively applied for a permit revision to reflect minor design changes. In October 2007, the environmental groups submitted comments objecting to the draft permit revisions and, in part, attempting to reassert general objections to the generating unit. An agency decision on the final permit revisions may occur during 2008. The Company is currently unable to determine the final outcome of this matter.

Mine Safety Compliance Costs. In March 2006, the Mine Safety and Health Administration enacted Emergency Temporary Standards regulations and has issued additional regulations as the result of the passage of the Mine Improvement and New Emergency Response Act of 2006, which was signed into law in June 2006. At the state level, Kentucky and other states that supply coal to KU, have passed new mine safety legislation. These pieces of legislation require all underground coal mines to implement new safety measures and install new safety equipment. Under the terms of some of the coal contracts KU has in place, provisions are made to allow for price adjustments for compliance costs resulting from new or amended laws or regulations. KU has begun to receive information from the mines it contracts with regarding price adjustments related to these compliance costs and has hired a consultant to review all supplier claims for validity and reasonableness. At this

time KU has not been notified of claims by all mines and is reviewing those claims it has received. An adjustment will be made to the value of the coal inventory once the amount is determinable, however, the amount cannot be estimated at this time. The Company expects to recover these costs through the FAC.

**Environmental Matters.** KU's operations are subject to a number of environmental laws and regulations in each of the jurisdictions in which it operates, governing, among other things, air emissions, wastewater discharges, the use, handling and disposal of hazardous substances and wastes, soil and groundwater contamination and employee health and safety.

Clean Air Act Requirements. The Clean Air Act establishes a comprehensive set of programs aimed at protecting and improving air quality in the United States by, among other things, controlling stationary sources of air emissions such as power plants. While the general regulatory framework for these programs is established at the federal level, most of the programs are implemented and administered by the states under the oversight of the EPA. The key Clean Air Act programs relevant to KU's business operations are described below.

Ambient Air Quality The Clean Air Act requires the EPA to periodically review the available scientific data for six criteria pollutants and establish concentration levels in the ambient air sufficient to protect the public health and welfare with an extra margin for safety. These concentration levels are known as national ambient air quality standards ("NAAQS"). Each state must identify "nonattainment areas" within its boundaries that fail to comply with the NAAQS and develop a SIP to bring such nonattainment areas into compliance. If a state fails to develop an adequate plan, the EPA must develop and implement a plan. As the EPA increases the stringency of the NAAQS through its periodic reviews, the attainment status of various areas may change, thereby triggering additional emission reduction obligations under revised SIPs aimed to achieve attainment.

In 1997, the EPA established new NAAQS for ozone and fine particulates that required additional reductions in SO₂ and NOx emissions from power plants. In 1998, the EPA issued its final "NOx SIP Call" rule requiring reductions in NOx emissions of approximately 85% from 1990 levels in order to mitigate ozone transport from the midwestern U.S. to the northeastern U.S. To implement the new federal requirements, Kentucky amended its SIP in 2002 to require electric generating units to reduce their NOx emissions to 0.15 pounds weight per MMBtu on a company-wide basis. In 2005, the EPA issued the CAIR which requires additional SO₂ emission reductions of 70% and NOx emission reductions of 65% from 2003 levels. The CAIR provides for a two-phase cap and trade program, with initial reductions of NOx and SO₂ emissions due by 2009 and 2010, respectively, and final reductions due by 2015. The final rule is currently under challenge in a number of federal court proceedings. In 2006, Kentucky proposed to amend its SIP to adopt state requirements similar to those under the federal CAIR. Depending on the level of action determined necessary to bring local nonattainment areas into compliance with the new ozone and fine particulate standards, KU's power plants are potentially subject to additional reductions in SO₂ and NOx emissions. KU's weighted-average company-wide emission rate for SO₂ in 2007 was approximately 1.33 lbs./MMBtu of heat input, with every generating unit below its emission limit established by the Kentucky Division for Air Quality.

Hazardous Air Pollutants. As provided in the 1990 amendments to the Clean Air Act, the EPA investigated hazardous air pollutant emissions from electric utilities and submitted a report to Congress identifying mercury emissions from coal-fired power plants as warranting further study. In 2005, the EPA issued the CAMR establishing mercury standards for new power plants and requiring all states to issue new SIPs including mercury requirements for existing power plants. The EPA issued a model rule which provides for a two-phase cap and trade program with initial reductions due by 2010 and final reductions due by 2018. The CAMR provides for reductions of 70% from 2003 levels. The EPA closely integrated the CAMR and CAIR programs to ensure that the 2010 mercury reduction targets will be achieved as a "co-benefit" of the controls installed for purposes of compliance with the CAIR. The final rule is also currently under challenge in the federal courts. In

February 2008, a federal appellate court issued a decision in one of the proceedings vacating the current CAMR, an outcome that may have the effect of resulting in more stringent mercury reduction rules. However, the ruling could be subject to further appeal. In 2006, Kentucky proposed to amend its SIP to adopt state requirements similar to those under the federal CAMR. In 2006, the Kentucky air agency adopted a regulation aimed at regulating additional hazardous air pollutants from sources including power plants, but it was withdrawn in 2007. To the extent those rules are final, they are not expected to have a material impact on KU's power plant operations.

Acid Rain Program The 1990 amendments to the Clean Air Act imposed a two-phased cap and trade program to reduce SO₂ emissions from power plants that were thought to contribute to "acid rain" conditions in the northeastern U.S. The 1990 amendments also contained requirements for power plants to reduce NOx emissions through the use of available combustion controls.

Regional Haze. The Clean Air Act also includes visibility goals for certain federally designated areas, including national parks, and requires states to submit SIPs that will demonstrate reasonable progress toward preventing future impairment and remedying any existing impairment of visibility in those areas. In 2005, the EPA issued its Clean Air Visibility Rule detailing how the Clean Air Act's BART requirements will be applied to facilities, including power plants, built between 1962 and 1974 that emit certain levels of visibility impairing pollutants. Under the final rule, as the CAIR will result in more visibility improvement than BART, states are allowed to substitute CAIR requirements in their regional haze SIPs in lieu of controls that would otherwise be required by BART. The final rule has been challenged in the courts.

Installation of Pollution Controls. Many of the programs under the Clean Air Act utilize cap and trade mechanisms that require a company to hold sufficient emissions allowances to cover its authorized emissions on a company-wide basis and do not require installation of pollution controls on every generating unit. Under cap and trade programs, companies are free to focus their pollution control efforts on plants where such controls are particularly efficient and utilize the resulting emission allowances for smaller plants where such controls are not cost effective. KU met its Phase I SO₂ requirements primarily through installation of FGD equipment on Ghent Unit 1. KU's combined strategy for its Phase II SO₂ requirements, which commenced in 2000, includes the installation of additional FGD equipment, as well as using accumulated emissions allowances and fuel switching to defer certain additional capital expenditures. In order to achieve the NOx emission reductions and associated obligations, KU installed additional NOx controls, including SCR technology, during the 2000 to 2007 time period at a cost of \$220 million. In 2001, the Kentucky Commission granted approval to recover the costs incurred by KU for these projects through the environmental surcharge mechanism. Such monthly recovery is subject to periodic review by the Kentucky Commission.

In order to achieve the emissions reductions mandated by the CAIR and CAMR, KU expects to incur additional capital expenditures totaling approximately \$675 million during the 2008 through 2010 time period for pollution controls including FGD and SCR equipment, and additional operating and maintenance costs in operating such controls. In 2005, the Kentucky Commission granted approval to recover the costs incurred by KU for these projects through the ECR mechanism. Such monthly recovery is subject to periodic review by the Kentucky Commission. KU believes its costs in reducing SO₂, NOx and mercury emissions to be comparable to those of similarly situated utilities with like generation assets. KU's compliance plans are subject to many factors including developments in the emission allowance and fuels markets, future legislative and regulatory enactments, legal proceedings and advances in clean air technology. KU will continue to monitor these developments to ensure that its environmental obligations are met in the most efficient and cost-effective manner.

Potential GHG Controls. In 2005, the Kyoto Protocol for reducing GHG emissions took effect, obligating 37 industrialized countries to undertake substantial reductions in GHG emissions. The U.S. has not ratified the Kyoto Protocol and there are currently no mandatory GHG emission reduction requirements at the federal level. Legislation mandating GHG reductions has been introduced in the Congress, but no federal legislation has been enacted to date. In the absence of a program at the federal level, various states have adopted their own GHG emission reduction programs. Such programs have been adopted in various states including 11 northeastern U.S. states and the District of Columbia under the Regional GHG Initiative program and California. Substantial efforts to pass federal GHG legislation are ongoing. In addition, litigation is currently pending before various courts to determine whether the EPA and the states have the authority to regulate GHG emissions under existing law. In April 2007, the U.S. Supreme Court ruled that the EPA has the authority to regulate GHG under the Clean Air Act. KU is monitoring ongoing efforts to enact GHG reduction requirements at the state and federal level and is assessing potential impacts of such programs and strategies to mitigate those impacts. KU is unable to predict whether mandatory GHG reduction requirements will ultimately be enacted. As a Company with significant coal-fired generating assets, KU could be substantially impacted by programs requiring mandatory reductions in GHG emissions, although the precise impact on the operations of KU, including the reduction targets and deadlines that would be applicable, cannot be determined prior to the enactment of such programs.

Brown New Source Review Litigation In April 2006, the EPA issued an NOV alleging that KU had violated certain provisions of the Clean Air Act's new source review rules relating to work performed in 1997, on a boiler and turbine at KU's E.W. Brown generating station. In December 2006, the EPA issued a second NOV alleging the Company had exceeded heat input values in violation of the air permit for the unit. During 2006, KU provided data responses to the EPA with respect to the allegations in the NOVs. In March 2007, the Department of Justice filed a complaint in federal court in Kentucky alleging the same violations specified in the prior NOVs. The complaint seeks civil penalties, including potential per-day fines, remedial measures and injunctive relief. In April 2007, KU filed an answer in the civil suit denying the allegations. In July 2007, a July 2009 date for trial on the merits was scheduled. The parties continue periodic settlement discussions and a \$2 million accrual has been recorded based on the current status of those discussions, however, KU cannot determine the overall outcome or potential effects of these matters, including whether substantial fines, penalties or remedial construction may result.

Section 114 Requests In August 2007, the EPA issued administrative information requests under Section 114 of the Clean Air Act requesting new source review-related data regarding certain construction and maintenance activities at LG&E's Mill Creek 4 and Trimble County 1 generating units and KU's Ghent 2 generating unit. The Companies are complying with the information requests and are not able to predict further proceedings in this matter at this time.

Ghent Opacity NOV. In September 2007, the EPA issued an NOV alleging that KU had violated certain provisions of the Clean Air Act's operating rules relating to opacity during June and July of 2007 at Units 1 and 3 of KU's Ghent generating station. The parties have commenced initial discussions on this matter. KU is not able to estimate the outcome or potential effects of these matters, including whether substantial fines, penalties or remedial construction may result.

General Environmental Proceedings KU has recently settled certain environmental matters. During 2005 and 2006, final judicial and administrative approvals were received regarding a consent decree relating to the October 1999 leak of approximately 38,000 gallons of diesel fuel (of which 34,000 gallons were recovered) from an underground pipeline at KU's E.W. Brown Station. Under the terms of the settlement, KU paid a civil penalty in 2006 and has agreed to construct a supplemental environmental project and maintain the project for ten years, each at a cost of less than \$1 million. During 2006, final judicial and administrative approvals were received regarding a settlement associated with a former transformer scrap-yard which had been the subject of

April 2002 correspondence to KU and other potentially responsible parties. Under the terms of the settlement, the parties bore aggregate cleanup costs of approximately \$2 million, of which KU's share was less than \$1 million, which was paid in December 2006.

From time to time, KU appears before the EPA, various state or local regulatory agencies and state and federal courts regarding matters involving compliance with applicable environmental laws and regulations. Such matters include liability under the Comprehensive Environmental Response, Compensation and Liability Act for cleanup at various off-site waste sites and ongoing claims regarding GHG emissions from KU's generating stations. Based on analysis to date, the resolution of such matters is not expected to have a material impact on the operations of KU.

## Note 10 - Jointly Owned Electric Utility Plant

KU and LG&E have begun construction of TC2, a jointly owned unit at the Trimble County site. KU and LG&E own undivided 60.75% and 14.25% interests, respectively, in TC2. Of the remaining 25% of TC2, Illinois Municipal Electric Agency ("IMEA") owns a 12.12% undivided interest and Indiana Municipal Power Agency ("IMPA") owns a 12.88% undivided interest. Each company is responsible for its proportionate share of capital cost during construction, and fuel, operation and maintenance cost when TC2 begins operation, which is expected to occur in 2010.

_			TC2		
_	LG&E	KU	IMPA	IMEA	Total
Ownership interest	14.25%	60.75%	12.88%	12.12%	100%
Mw capacity	107	455	97	91	750
(in millions) Construction work in progress	LG&E \$74	KU \$332	<del></del>		

KU and LG&E jointly own the following CTs and related equipment:

(\$ in millions) KU		LG&E			Total							
				(\$)				(\$)				(\$)
			(\$)	Net			(\$)	Net			(\$)	Net
	Mw	(\$)	Depre-	Book	Mw	(\$)	Depre-	Book	Mw	(\$)	Depre-	Book
Ownership Percentage	Capacity	Cost	ciation	Value	Capacity	Cost	ciation	Value	Capacity	Cost	ciation	Value
KU 47%, LG&E 53% (1)	129	51	(11)	40	146	58	(12)	46	275	109	(23)	86
KU 62%, LG&E 38% (2)	190	78	(14)	64	118	50	(10)	40	308	128	(24)	104
KU 71%, LG&E 29% (3)	228	80	(14)	66	92	32	(6)	26	320	112	(20)	92
KU 63%, LG&E 37% (4)	404	137	(17)	120	236	79	(8)	71	640	216	(25)	191
KU 71%, LG&E 29% (5)	n/a	9	(2)	7	n/a	3	-	3	n/a	12	(2)	10

- 1) Comprised of Paddy's Run 13 and E.W. Brown 5. In addition to the above jointly owned utility plant, there is an inlet air cooling system attributable to Unit 5 and units 8-11 at the E.W. Brown facility. This inlet air cooling system is not jointly owned, however, it is used to increase production on the units to which it relates, resulting in an additional 88 Mw of capacity for KU.
- 2) Comprised of units 6 and 7 at the E.W. Brown facility.
- 3) Comprised of units 5 and 6 at the Trimble County facility.
- 4) Comprised of CT Substation 7-10 and units 7, 8, 9 and 10 at the Trimble County facility.
- 5) Comprised of CT Substation 5 and 6 and CT Pipeline at the Trimble County facility.

Both KU's and LG&E's participating share of direct expenses of the jointly owned plants is included in the corresponding operating expenses on its respective income statement (e.g., fuel, maintenance of plant, other operating expense).

## **Note 11 - Related Party Transactions**

KU, subsidiaries of E.ON U.S. and subsidiaries of E.ON engage in related party transactions. Transactions between KU and E.ON U.S. subsidiaries are eliminated upon consolidation of E.ON U.S. Transactions between KU and E.ON subsidiaries are eliminated upon consolidation of E.ON. These transactions are generally performed at cost and are in accordance with the FERC regulations under PUHCA 2005 and the applicable Kentucky Commission and Virginia Commission regulations. The significant related party transactions are disclosed below.

## Electric Purchases

KU and LG&E purchase energy from each other in order to effectively manage the load of their retail and wholesale customers. These sales and purchases are included in the statements of income as operating revenues and purchased power operating expense. KU intercompany electric revenues and purchased power expense for the years ended December 31, were as follows:

(in millions)	<u>2007</u>	<u> 2006</u>
Electric operating revenues from LG&E	\$46	\$77
Purchased power from LG&E	93	99

## Interest Charges

See Note 8, Notes Payable and Other Short-Term Obligations, for details of intercompany borrowing arrangements. Intercompany agreements do not require interest payments for receivables related to services provided when settled within 30 days.

KU's intercompany interest income and expense for the years ended December 31, were as follows:

(in millions)	<u>2007</u>	<u> 2006</u>
Interest on money pool loans	\$ 6	\$ 3
Interest on Fidelia loans	35	21

## Other Intercompany Billings

E.ON U.S. Services provides KU with a variety of centralized administrative, management and support services. These charges include payroll taxes paid by E.ON U.S. on behalf of KU, labor and burdens of E.ON U.S. Services employees performing services for KU and vouchers paid by E.ON U.S. Services on behalf of KU. The cost of these services is directly charged to KU, or for general costs which cannot be directly attributed, charged based on predetermined allocation factors, including the following ratios: number of customers, total assets, revenues, number of employees and other statistical information. These costs are charged on an actual cost basis.

In addition, KU and LG&E provide services to each other and to E.ON U.S. Services. Billings between KU and LG&E relate to labor and overheads associated with union employees performing work for the other utility, charges related to jointly owned CTs and other miscellaneous charges. Billings from KU to E.ON U.S. Services

## **Business**

## **GENERAL**

KU, incorporated in Kentucky in 1912 and in Virginia in 1991, is a regulated public utility engaged in the generation, transmission, distribution and sale of electric energy in Kentucky, Virginia and Tennessee. KU provides electricity to approximately 501,000 customers in 77 counties in central, southeastern and western Kentucky, to approximately 30,000 customers in 5 counties in southwestern Virginia and 5 customers in Tennessee. KU's coal-fired electric generating plants produce most of KU's electricity, the remainder is generated by a hydroelectric power plant and natural gas and oil fueled CTs. In Virginia, KU operates under the name Old Dominion Power Company.

KU is a wholly-owned subsidiary of E.ON U.S., formerly known as LG&E Energy LLC. E.ON U.S. is an indirect wholly-owned subsidiary of E.ON, a German corporation, making KU an indirect wholly-owned subsidiary of E.ON. KU's affiliate LG&E, is a regulated public utility engaged in the generation, transmission distribution and sale of electric energy and the distribution of natural gas in Kentucky.

## **OPERATIONS**

The sources of operating revenues and volumes of sales for the two years ended December 31, 2006, were as follows:

	20	06	2005			
	Revenues (millions)	<u>Volumes</u> (000 Mwh)	<del></del>			
Residential	\$ 380	6,313	\$ 364	6,599		
Industrial & Commercial	505	9,946	461	9,925		
Municipals	85	1,978	80	2,014		
Other Retail	208	4,741	216	5,578		
Off System Sales	32_	<u> 170</u>	<u>86</u>	<u>641</u>		
Total	<u>\$1,210</u>	23,148	<u>\$1,207</u>	<u> 24,757</u>		

KU set an annual peak load of 4,207 Mw on August 2, 2006, when the temperature reached 95 degrees Fahrenheit. This was the highest hourly customer demand in KU's history.

KU's power generating system consists of the coal-fired units operated at its four steam generating stations. Natural gas and oil fueled CTs supplement the system during peak or emergency periods. As of December 31, 2006, KU owned and operated the following generating stations while maintaining a 12%-14% reserve margin:

	Summer Capability Rating (Mw)
Steam Stations:	
Tyrone - Woodford County, KY	129
Green River - Muhlenberg County, KY	163
E.W. Brown - Mercer County, KY	697
Ghent – Carroll County, KY	<u>1,945</u>
Total steam stations	2,934
Dix Dam hydroelectric station - Mercer County, KY	24
CT Generators (Peaking capability):	
E.W. Brown - Mercer County, KY	757
Haefling – Fayette County, KY	36
Paddy's Run – Jefferson County, KY *	74
Trimble County – Trimble County, KY *	<u>632</u>
Total CT generators	<u>1,499</u>
Total capability rating	<u>4,457</u>

^{*} LG&E operates these units on behalf of KU. See Note 10 of Notes to Financial Statements for information regarding these and other jointly-owned units.

At December 31, 2006, KU's transmission system included 110 substations (36 of which are shared with the distribution system) with a total capacity of approximately 16,978 Mva and approximately 4,031 miles of lines. The distribution system included 480 substations with a total capacity of approximately 6,180 Mva, 13,805 miles of overhead lines and 1,881 miles of underground conduit.

KU has a purchased power agreement with OMU, owns 20% of EEI's common stock and owns 2.5% of OVEC's common stock. Additional information regarding these relationships is provided in Notes 1 and 9 of Notes to Financial Statements.

KU was formerly a member of the MISO, a non-profit independent transmission system operator that serves the electrical transmission needs of much of the Midwest. KU withdrew from the MISO effective September 1, 2006. KU now contracts with the Tennessee Valley Authority to act as its transmission reliability coordinator and Southwest Power Pool Inc. to function as its independent transmission operator, pursuant to FERC requirements. See Note 2 of Notes to Financial Statements.

## RATES AND REGULATIONS

E.ON, KU's ultimate parent, is a registered holding company under PUHCA 2005. E.ON, its utility subsidiaries, including KU, and certain of its non-utility subsidiaries are subject to extensive regulation by the FERC with respect to numerous matters, including: electric utility facilities and operations, wholesale sales of power and related transactions, accounting practices, issuances and sales of securities, acquisitions and sales of utility properties, payments of dividends out of capital and surplus, financial matters and inter-system sales of non-power goods and services. KU believes that it has adequate authority (including financing authority) under existing FERC orders and regulations to conduct its business and will seek additional authorization when necessary.

In February 2007, KU completed a series of financial transactions that allow it to cease periodic reporting under the Securities Exchange Act of 1934. See Note 13 of Notes to Financial Statements for additional information.

KU is subject to the jurisdiction of the Kentucky Commission, the Virginia Commission, the Tennessee Regulatory Authority and the FERC in virtually all matters related to electric utility regulation, and as such, its accounting is subject to SFAS No. 71, Accounting for the Effects of Certain Types of Regulation. Given its competitive position in the marketplace and the status of regulation in Kentucky and Virginia, KU has no plans or intentions to discontinue its application of SFAS No. 71.

For a further discussion of regulatory matters, see Notes 2, 9 and 13 of Notes to Financial Statements.

## COAL SUPPLY

Coal-fired generating units provided approximately 97% of KU's net kilowatt-hour generation for 2006. The remaining net generation for 2006 was provided by natural gas and oil-fueled CT peaking units and a hydroelectric plant. Coal is expected to be the predominant fuel used by KU in the foreseeable future, with natural gas and oil being used for peaking capacity and flame stabilization in coal-fired boilers or in emergencies. KU has no nuclear generating units and has no plans to build any in the foreseeable future.

KU maintains its fuel inventory at levels estimated to be necessary to avoid operational disruptions at its coalfired generating units. Reliability of coal deliveries can be affected from time to time by a number of factors including fluctuations in demand, coal mine production issues and other supplier or transporter operating difficulties.

KU has entered into coal supply agreements with various suppliers for coal deliveries for 2007 and beyond and normally augments its coal supply agreements with spot market purchases. KU has a coal inventory policy which it believes provides adequate protection under most contingencies.

KU expects to continue purchasing most of its coal, which has sulfur content in the 0.7%-3.5% range, from western and eastern Kentucky, West Virginia, southern Indiana, southern Illinois and Ohio for the foreseeable future. Coal is delivered to KU generating stations by a mix of transportation modes, including barge, truck and rail.

## **ENVIRONMENTAL MATTERS**

Protection of the environment is a major priority for KU. Federal, state and local regulatory agencies have issued KU permits for various activities subject to air quality, water quality and waste management laws and regulations. See Note 9 of Notes to Financial Statements for additional information.

## COMPETITION

At this time, neither the Kentucky General Assembly nor the Kentucky Commission has adopted or approved a plan or timetable for retail electric industry competition in Kentucky. The nature or timing of the ultimate legislative or regulatory actions regarding industry restructuring and their impact on KU, which may be significant, cannot currently be predicted. Some states that have already deregulated have begun discussions that could lead to re-regulation. See Note 2 of Notes to Financial Statements for additional information.

## **EMPLOYEES AND LABOR RELATIONS**

KU had approximately 941 full-time regular employees at December 31, 2006. Approximately 150 operating, maintenance and construction employees were represented by the IBEW Local 2100 and the USWA Local 9447-01. Effective August 1, 2006, KU and its employees represented by the IBEW Local 2100 entered into a new three-year collective bargaining agreement. The new agreement provides for negotiated increases or changes to wages, benefits or other provisions and for annual wage re-openers. KU and employees represented by the USWA Local 9447-01 entered into a three-year collective bargaining agreement in August 2005 with provisions for annual wage re-openers.

## OFFICERS OF THE COMPANY

## At December 31, 2006:

<u>Name</u>	<u>Age</u>	Position	Effective Date of Election to Present Position
Victor A. Staffieri	51	Chairman of the Board, President and Chief Executive Officer	May 2001
John R. McCall	63	Executive Vice President, General Counsel and Corporate Secretary	July 1994
S. Bradford Rives	48	Chief Financial Officer	September 2003
Martyn Gallus	42	Senior Vice President - Energy Marketing	December 2000
Chris Hermann	59	Senior Vice President - Energy Delivery	February 2003
Paula H. Pottinger	49	Senior Vice President - Human Resources	January 2006
Paul W. Thompson	49	Senior Vice President - Energy Services	June 2000
Wendy C. Welsh	52	Senior Vice President – Information Technology	December 2000
Michael S. Beer	48	Vice President – Federal Regulation and Policy	September 2004
D. Ralph Bowling	49	Vice President – Power Operations WKE	August 2002
R. W. Chip Keeling	50	Vice President – Communications	March 2002
George R. Siemens	57	Vice President - External Affairs	January 2001
David A. Vogel*	41	Vice President – Retail and Gas Storage Operations	March 2003
John N. Voyles	52	Vice President - Regulated Generation	June 2003
Daniel K. Arbough	45	Treasurer	December 2000
Valerie L. Scott	50	Controller	January 2005

Officers generally serve in the same capacities at KU and its affiliates, E.ON U.S. and LG&E.

^{*}Mr. Vogel announced his resignation from the Company during March 2007.

#### Risk Factors

KU is subject to a number of risks, including without limitation, those listed below and elsewhere in this document. Such risks could affect actual results and cause results to differ materially from those expressed in any forward-looking statements made by KU.

The rates that KU charges customers, as well as other aspects of the business, are subject to significant and complex governmental regulation. Federal and state entities regulate many aspects of utility operations, including financial and capital structure matters; siting and construction of facilities; rates, terms and conditions of service, safety and operations; accounting and cost allocation methodologies; acquisition and disposal of utility assets and securities and other matters.

KU's exit from the MISO, as well as changes in transmission and wholesale power market structures, could increase costs or reduce revenues. The resulting changes to transmission and wholesale power market structures and prices are not completely estimable and may result in unforeseen effects on energy purchases and sales, transmission and related costs or revenues.

KU undertakes significant capital projects and is subject to unforeseen costs, delays or failures in such projects, as well as risk of full recovery of such costs. The completion of these facilities without delays or cost overruns is subject to risks in many areas, including approval and licensing; permitting; construction problems or delays; increases in commodity prices or labor rates; contractor performance; weather and geological issues and political, labor and regulatory developments.

KU's costs of compliance with environmental laws are significant and are subject to continuing changes. Extensive federal, state and local environmental regulations are applicable to KU's air emissions, water discharges and the management of hazardous and solid waste, among other areas, and the costs of compliance or of alleged non-compliance cannot be predicted with certainty.

KU's operating results are affected by weather conditions, including storms and seasonal temperature variations, as well as by significant man-made or accidental disturbances. These weather or man-made factors can significantly affect KU's finances or operations by changing demand levels, causing outages, damaging infrastructure or requiring significant repair costs.

KU is subject to risks regarding potential developments concerning global climate change matters. Such developments could include potential federal or state legislation or industry initiatives limiting GHG emissions, establishing costs or charges on GHG emissions or on fuels relating to such emissions, requiring remediation, sequestration or generation fleet-diversification to address GHG emissions, promoting energy efficiency or other measures.

KU's businesses are concentrated in the Midwest United States, specifically Kentucky. Local and regional economic conditions, such as population growth, industrial growth or expansion and economic development, as well as the operational or financial performance of major industries or customers, can affect the demand for energy.

KU is subject to operational risks relating to its generating plants, transmission facilities and distribution equipment. Operation of power plants, transmission and distribution facilities subject KU to many risks, including the breakdown or failure of equipment, accidents, labor disputes, delivery/transportation problems, disruptions of fuel supply and performance below expected levels.

KU could be negatively affected by rising interest rates, downgrades to credit ratings or other negative developments in its ability to access capital markets. In the ordinary course of business, KU is reliant upon adequate long-term and short-term financing means to fund its significant capital expenditures, debt interest or maturities and operating needs. Increases in interest rates could result in increased costs to KU.

KU is subject to commodity price risk, credit risk, counterparty risk and other risks associated with the energy business. General market or pricing developments or failures by counterparties to perform their obligations relating to energy, fuels, other commodities, goods, services or payments could result in potential increased costs to KU.

KU is subject to risks associated with defined benefit retirement plans, health care plans, wages and other employee-related matters. Risks include adverse developments in legislation or regulation, future costs or funding levels, returns on investments, interest rates and actuarial matters, as well as, changing wage levels, whether related to collective bargaining agreements or employment market conditions, and changing costs of providing health care benefits.

## **Legal Proceedings**

## Rates and Regulatory Matters

For a discussion of current rate and regulatory matters, including base rate increase proceedings, the Kentucky AG investigation, VDT proceedings, TC2 proceedings, Kentucky Commission, FERC and MISO proceedings and other rate or regulatory matters affecting KU, see Notes 2, 9 and 13 of Notes to Financial Statements.

#### Environmental

For a discussion of environmental matters including additional reductions in SO₂, NOx and other emissions mandated by recent regulations; items regarding the E.W. Brown and Ghent stations and the manufactured gas plant sites; global warming or climate change matters and other environmental items, see Note 9 of Notes to Financial Statements.

## Litigation

For a discussion of litigation matters, including the OMU contract dispute, see Note 9 of Notes to Financial Statements.

## Other

In the normal course of business, other lawsuits, claims, environmental actions and other governmental proceedings arise against KU. To the extent that damages are assessed in any of these lawsuits, KU believes that its insurance coverage is adequate. Management, after consultation with legal counsel, does not anticipate that liabilities arising out of other currently pending or threatened lawsuits and claims will have a material adverse effect on KU's financial position or results of operations.

## Selected Financial Data

Grand Warre	Years Ended December 31						
(in millions)	<u>2006</u>	2005	<u>2004</u>	<u>2003</u>	<u>2002</u>		
Operating revenues	<u>\$1,210</u>	<u>\$1,207</u>	<u>\$ 995</u>	<u>\$ 892</u>	<u>\$_862</u>

Management's Discussion and Analysis and Notes to Financial Statements should be read in conjunction with the above information.

## Management's Discussion and Analysis

The following discussion and analysis by management focuses on those factors that had a material effect on KU's financial results of operations and financial condition during 2006 and 2005 and should be read in connection with the financial statements and notes thereto.

## Forward Looking Statements

Some of the following discussion may contain forward-looking statements that are subject to risks, uncertainties and assumptions. Such forward-looking statements are intended to be identified in this document by the words "anticipate," "expect," "estimate," "objective," "possible," "potential" and similar expressions. Actual results may materially vary. Factors that could cause actual results to materially differ include: general economic conditions; business and competitive conditions in the energy industry; changes in federal or state legislation; unusual weather; actions by state or federal regulatory agencies; actions by credit rating agencies and other factors described from time to time in KU's reports, including as noted in the Risk Factors section of this report.

## RESULTS OF OPERATIONS

The electric utility business is affected by seasonal weather patterns. As a result, operating revenues (and associated operating expenses) are not generated evenly throughout the year.

## Net Income

Net income in 2006 increased \$40 million compared to 2005. The increase was primarily the result of higher equity in earnings from EEI of \$27 million and a decrease in other operation and maintenance expenses of \$33 million largely as a result of lower MISO Day 2 expenses. Partially offsetting these items was an increase in income tax expense of \$10 million primarily due to increased income before income tax and an increase in interest expense to affiliates of \$8 million.

#### Revenues

Revenues in 2006 increased \$3 million primarily due to:

- Increased fuel costs (\$58 million) billed to customers through the FAC
- Increased ECR surcharge (\$18 million) billed to customers
- Increased revenue due to lower merger surcredit given to customers based on lower sales volumes (\$4 million)
- Decreased wholesale sales (\$37 million) primarily resulting from lower sales volumes due to regional demand
- Decreased MISO related revenue (\$29 million) due to the exit from the MISO
- Decreased sales volumes and other (\$11 million) resulting from an 11% decrease in cooling degree days in 2006 as compared to the same period in 2005 (the number of cooling degree days in 2006 was 8% below the 20-year average)

## Expenses

Fuel for generation comprises a large component of total operating expenses. Increases or decreases in the cost of fuel are reflected in retail rates through the FAC, subject to the approval of the Kentucky Commission, the Virginia Commission and the FERC.

Fuel for generation increased \$40 million in 2006 primarily due to:

• Increased cost of fuel burned (\$39 million) due to higher coal prices

Power purchased expense decreased \$37 million in 2006 primarily due to:

• Decreased volumes purchased (\$33 million) due to increased internal generation

Other operation and maintenance expenses decreased \$33 million in 2006 primarily due to decreased other operation expenses (\$35 million), partially offset by increased property and other taxes (\$2 million) and increased maintenance expenses (\$1 million).

Other operation expenses decreased \$35 million in 2006 primarily due to:

- Decreased other power supply expenses (\$29 million) resulting from lower MISO Day 2 expenses
- Decreased transmission expenses (\$7 million) due to lower MISO related expenses
- Decreased administrative and general expenses (\$5 million) primarily due to the completion of the VDT amortization
- Increased steam generation operation expense (\$4 million) primarily due to the increased cost of fees, permits and licenses

Equity earnings in EEI increased \$27 million in 2006 primarily due to increased revenues at EEI from its sales of electricity at market-based rates versus cost, commencing January 1, 2006.

Interest expense, including interest expense to affiliated companies, increased \$8 million in 2006 primarily due to:

- Increased interest to affiliated companies (\$8 million)
- Increased interest rates on variable rate debt (\$3 million)
- Increased cost of the interest rate swap (\$2 million)
- Decreased external fixed rate debt (\$4 million)

#### CRITICAL ACCOUNTING POLICIES/ESTIMATES

Preparation of financial statements and related disclosures in compliance with generally accepted accounting principles requires the application of appropriate technical accounting rules and guidance, as well as the use of estimates. The application of these policies necessarily involves judgments regarding future events, including legal and regulatory challenges and anticipated recovery of costs. These judgments, in and of themselves, could materially impact the financial statements and disclosures based on varying assumptions, which may be appropriate to use. In addition, the financial and operating environment also may have a significant effect, not only on the operation of the business, but on the results reported through the application of accounting measures used in preparing the financial statements and related disclosures, even if the nature of the accounting policies applied has not changed. Specific risks for these critical accounting policies are described in the following paragraphs. Each of these has a higher likelihood of resulting in materially different reported amounts under different conditions or using different assumptions. Events rarely develop exactly as forecasted and the best estimates routinely require adjustment.

Critical accounting policies and estimates including unbilled revenue, allowance for doubtful accounts, regulatory mechanisms, pension and postretirement benefits and income taxes are detailed in Notes 1, 2, 3, 5, 6 and 9 of Notes to Financial Statements.

**Recent Accounting Pronouncements.** Recent accounting pronouncements affecting KU are detailed in Note 1 of Notes to Financial Statements.

## LIQUIDITY AND CAPITAL RESOURCES

KU uses net cash generated from its operations and external financing (including financing from affiliates) to fund construction of plant and equipment and the payment of dividends. KU believes that such sources of funds will be sufficient to meet the needs of its business in the foreseeable future.

As of December 31, 2006, KU is in a negative working capital position in part because of the classification of certain variable-rate pollution control bonds totaling \$87 million which bonds are subject to tender for purchase at the option of the holder as current portion of long-term debt. KU expects to cover any working capital deficiencies with cash flow from operations, money pool borrowings and borrowings from Fidelia.

## Operating Activities

Cash provided by operations was \$223 million and \$221 million in 2006 and 2005, respectively.

The 2006 increase of \$2 million was primarily the result of increases in cash due to changes in:

- Higher earnings, net of non-cash items (\$64 million)
- Accounts receivable (\$48 million) largely due to decreased sales volume growth due to milder weather. These increases were partially offset by cash used for:
  - Accounts payable (\$31 million)
  - Payment of the fee required to exit the MISO (\$20 million)
  - Accrued income taxes due to the timing of payments at the end of the year (\$20 million)
  - Prepayments and other current assets (\$13 million)
  - ECR revenues (\$12 million)
  - Materials and supplies (\$7 million)

## Investing Activities

The primary use of funds for investing activities continues to be for capital expenditures. Capital expenditures were \$347 million and \$140 million in 2006 and 2005, respectively. KU expects its capital expenditures for the three-year period ending December 31, 2009 to total approximately \$1.9 billion, which consists primarily of construction estimates associated with installation of FGDs on Ghent and Brown units and an SCR at Ghent totaling approximately \$725 million, the construction of TC2 totaling approximately \$605 million and on-going construction related to generation and distribution assets. See Note 9 of Notes to Financial Statements for additional information.

Net cash used for investing activities increased \$186 million in 2006 compared to 2005 primarily due to increased capital expenditures of \$207 million. Restricted cash represents the escrowed proceeds of the Pollution Control Bonds issued which are disbursed as qualifying costs are incurred.

## Financing Activities

Net cash inflows (outflows) from financing activities were \$124 million and \$(57) million in 2006 and 2005, respectively.

See Notes 7 and 13 of Notes to Financial Statements for information of redemptions, maturities and issuances of long-term debt.

## Future Capital Requirements

KU's construction program is designed to ensure that there will be adequate capacity and reliability to meet the electric needs of its service area and to comply with environmental regulations. These needs are continually being reassessed and appropriate revisions are made, when necessary, in construction schedules. Future capital requirements may be affected in varying degrees by factors such as electric energy demand load growth, changes in construction expenditure levels, rate actions by regulatory agencies, new legislation, market entry of competing electric power generators, changes in commodity prices and labor rates, changes in environmental regulations and other regulatory requirements. See Contractual Obligations further below and Note 9 of Notes to Financial Statements for current commitments. KU anticipates funding future capital requirements through operating cash flow, debt and/or infusions of capital from its parent.

Regulatory approvals are required for KU to incur additional debt. The Virginia Commission and the FERC authorize the issuance of short-term debt while the Kentucky Commission, the Virginia Commission and the Tennessee Regulatory Authority authorize the issuance of long-term debt. In February 2006, KU received a two-year authorization from the FERC to borrow up to \$400 million in short-term funds. KU also has authorization from the Virginia Commission that expires at the end of 2007 allowing short-term borrowing of up to \$400 million.

KU's debt ratings as of December 31, 2006, were:

	Moody's	S&P
First mortgage bonds	A1	<u> 3001</u> A
Pollution control revenue bonds	A1	A
Preferred stock	Baal	BBB-
Issuer rating	A2	-
Corporate credit rating	•	BBB+

^{*}Effective February 23, 2007, KU no longer had first mortgage bonds outstanding and S&P has adjusted its rating for the pollution control revenue bonds to BBB+ following the completion of certain financing transactions which eliminated the lien on the assets of the Company.

These ratings reflect the views of Moody's and S&P. A security rating is not a recommendation to buy, sell or hold securities and is subject to revision or withdrawal at any time by the rating agency.

## Contractual Obligations

The following is provided to summarize contractual cash obligations for periods after December 31, 2006. KU anticipates cash from operations and external financing will be sufficient to fund future obligations. Future interest obligations cannot be quantified because most of KU's debt is variable rate. (See Statements of Capitalization)

(in millions)		***************************************				Pay	ment	s Due	by Pe	riod

- (a) Represents borrowings from affiliated company due within one year.
- (b) Includes long-term debt of \$87 million classified as current liabilities because these bonds are subject to tender for purchase at the option of the holder and to mandatory tender for purchase upon the occurrence of certain events Maturity dates for these bonds range from 2024 to 2032. KU does not expect to pay these amounts in 2007.
- (c) Represents future operating lease payments.
- (d) Represents future minimum payments under OVEC and OMU power purchase agreements through 2024
- (e) Represents contracts to purchase coal.
- (f) Represents currently projected cash flows for pension, postretirement and other post-employment benefit plans as calculated by the actuary
- (g) Represents construction commitments, including commitments for TC2 and the FGDs

## Kentucky Utilities Company Notes to Financial Statements

## Note 1 - Summary of Significant Accounting Policies

KU, incorporated in Kentucky in 1912 and in Virginia in 1991, is a regulated public utility engaged in the generation, transmission, distribution and sale of electric energy in Kentucky, Virginia and Tennessee. KU provides electricity to approximately 501,000 customers in 77 counties in central, southeastern and western Kentucky, to approximately 30,000 customers in 5 counties in southwestern Virginia and 5 customers in Tennessee. KU's coal-fired electric generating plants produce most of KU's electricity, with the remainder generated by a hydroelectric power plant and natural gas and oil fueled CTs. In Virginia, KU operates under the name Old Dominion Power Company.

KU is a wholly-owned subsidiary of E.ON U.S., formerly known as LG&E Energy LLC. E.ON U.S. is an indirect wholly-owned subsidiary of E.ON, a German corporation, making KU an indirect wholly-owned subsidiary of E.ON. KU's affiliate, LG&E, is a regulated public utility engaged in the generation, transmission, distribution and sale of electric energy and the distribution of natural gas in Kentucky.

Certain reclassification entries have been made to the previous years' financial statements to conform to the 2006 presentation with no impact on net assets, liabilities and capitalization or previously reported net income and cash flows.

Regulatory Accounting. KU is subject to SFAS No. 71, under which costs that would otherwise be charged to expense are deferred as regulatory assets based on expected recovery from customers in future rates. Likewise, credits that would otherwise be reflected as income are deferred as regulatory liabilities based on expected return to customers in future rates. The current or expected recovery of deferred costs and expected return of deferred credits is based on specific ratemaking decisions or precedent for each item as prescribed by the FERC, the Kentucky Commission or the Virginia Commission. See Note 2, Rates and Regulatory Matters, for additional detail regarding regulatory assets and liabilities.

Cash and Cash Equivalents. KU considers all debt instruments purchased with an original maturity of three months or less to be cash equivalents.

**Restricted Cash.** Proceeds from bond issuances for environmental equipment (primarily related to the installation of FGDs) are held in trust pending expenditure for qualifying assets, which is expected to occur during 2007.

Allowance for Doubtful Accounts. The allowance for doubtful accounts is based on the ratio of the amounts charged-off during the last twelve months to the retail revenues billed over the same period multiplied by the retail revenues billed over the last four months. Accounts with no payment activity are charged-off after four months, although collection efforts continue thereafter.

Materials and Supplies. Fuel and other materials and supplies inventories are accounted for using the average-cost method. Emission allowances are included in other materials and supplies and are not currently traded by KU. At December 31, 2006 and 2005, the emission allowances inventory was approximately \$2 million.

Other Property and Investments. Other property and investments on the balance sheets consists of KU's investment in EEI, economic development loans provided to various communities in KU's service territory, KU's investment in OVEC, funds related to KU's long-term purchased power contract with OMU and non-utility plant.

Although KU holds investment interests in OVEC and EEI, it is not the primary beneficiary, therefore, neither are consolidated into KU's financial statements. KU and 11 other electric utilities are participating owners of OVEC, located in Piketon, Ohio. OVEC owns and operates two power plants that burn coal to generate electricity, Kyger Creek Station in Ohio and Clifty Creek Station in Indiana. Pursuant to current contractual arrangements, KU's share of OVEC's output is 2.5%, approximately 55 Mw of generation capacity.

As of December 31, 2006 and 2005, KU's investment in OVEC totaled less than \$1 million and is accounted for under the cost method of accounting. KU's maximum exposure to loss as a result of its involvement with OVEC is limited to the value of its investment. In the event of the inability of OVEC to fulfill its power provision requirements, KU anticipates substituting such power supply with either owned generation or market purchases and believes it would generally recover associated incremental costs through regulatory rate mechanisms. See Note 9, Commitments and Contingencies, for further discussion of developments regarding KU's ownership interests and power purchase rights.

KU owns 20% of the common stock of EEI, which owns and operates a 1,000-Mw generating station in southern Illinois. Prior to 2006, KU was entitled to take 20% of the available capacity of the station under a pricing formula comparable to the cost of other power generated by KU. This contract governing the purchases from EEI terminated on December 31, 2005. Since December 31, 2005, EEI has sold power under general market-based pricing and terms. KU has not contracted with EEI for power under the new arrangements, but maintains its 20% ownership in the common stock of EEI. Replacement power for the EEI capacity has been largely provided by KU generation.

KU's investment in EEI is accounted for under the equity method of accounting and, as of December 31, 2006 and 2005, totaled \$18 million and \$16 million, respectively. KU's direct exposure to loss as a result of its involvement with EEI is generally limited to the value of its investment.

**Utility Plant.** KU's utility plant is stated at original cost, which includes payroll-related costs such as taxes, fringe benefits and administrative and general costs. Construction work in progress has been included in the rate base for determining retail customer rates in Kentucky. KU has not recorded a significant allowance for funds used during construction.

The cost of plant retired or disposed of in the normal course of business is deducted from plant accounts and such cost, plus removal expense less salvage value, is charged to the reserve for depreciation. When complete operating units are disposed of, appropriate adjustments are made to the reserve for depreciation and gains and losses, if any, are recognized.

**Depreciation and Amortization.** Depreciation is provided on the straight-line method over the estimated service lives of depreciable plant. The amounts provided were approximately 3.1% in 2006 and 3.2% in 2005 of average depreciable plant. Of the amount provided for depreciation at December 31, 2006 and 2005, approximately 0.5% was related to the retirement, removal and disposal costs of long lived assets.

Unamortized Debt Expense. Debt expense is capitalized in deferred debits and amortized over the lives of the related bond issues.

Income Taxes. Income taxes are accounted for under SFAS No. 109, Accounting for Income Taxes. In accordance with this statement, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases, as measured by enacted tax rates that are expected to be in effect in the periods when the deferred tax assets and liabilities are expected to be settled or realized. Significant judgment is required in

determining the provision for income taxes, and there are transactions for which the ultimate tax outcome is uncertain. To provide for these uncertainties or exposures, an allowance is maintained for tax contingencies based on management's best estimate of probable loss. Tax contingencies are analyzed periodically and adjustments are made when events occur to warrant a change. See Note 6, Income Taxes.

**Deferred Income Taxes.** Deferred income taxes are recognized at currently enacted tax rates for all material temporary differences between the financial reporting and income tax bases of assets and liabilities.

Investment Tax Credits. The EPAct 2005 added Section 48A to the Internal Revenue Code, which provides for an investment tax credit to promote the commercialization of advanced coal technologies that will generate electricity in an environmentally responsible manner. KU and LG&E received an investment tax credit related to TC2, for more details see Note 6, Income Taxes. Investment tax credits prior to 2006 resulted from provisions of the tax law that permitted a reduction of KU's tax liability based on credits for construction expenditures. Deferred investment tax credits are being amortized to income over the estimated lives of the related property that gave rise to the credits.

Revenue Recognition. Revenues are recorded based on service rendered to customers through month-end. KU accrues an estimate for unbilled revenues from each meter reading date to the end of the accounting period based on allocating the daily system net deliveries between billed volumes and unbilled volumes. The allocation is based on a daily ratio of the number of meter reading cycles remaining in the month to the total number of meter reading cycles in each month. Each day's ratio is then multiplied by each day's system net deliveries to determine an estimated billed and unbilled volume for each day of the accounting period. The unbilled revenue estimates included in accounts receivable were approximately \$42 million and \$48 million at December 31, 2006 and 2005, respectively.

Fuel Costs. The cost of fuel for generation is charged to expense as used.

Management's Use of Estimates. The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported assets and liabilities and disclosure of contingent items at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Accrued liabilities, including legal and environmental, are recorded when they are probable and estimable. Actual results could differ from those estimates.

Recent Accounting Pronouncements. The following are recent accounting pronouncements affecting KU:

## **FIN 48**

In July 2006, the FASB issued FIN 48, Accounting for Uncertainty in Income Taxes, an Interpretation of SFAS No. 109, which clarifies the accounting for the uncertainty of income taxes recognized in an enterprise's financial statements in accordance with SFAS No. 109. This interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return.

The evaluation of a tax position in accordance with FIN 48 is a two-step process. The first step is recognition based on the determination of whether it is "more likely than not" that a tax position will be sustained upon examination. The second step is to measure a tax position that meets the "more likely than not" threshold. The tax position will be measured as the amount of potential benefit that exceeds 50% likelihood of being realized.

FIN 48 is effective for fiscal years beginning after December 15, 2006. FIN 48 was adopted effective January 1, 2007. The impact of FIN 48 on the statements of operations, financial position and cash flows is not expected to be material.

#### SFAS No. 157

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements, which is effective for fiscal years beginning after November 15, 2007. This statement defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles and expands disclosures about fair value measurements. KU is now analyzing the future impacts of SFAS No. 157 on results of operations and financial condition.

#### **SFAS No. 158**

In September 2006, the FASB issued SFAS No. 158, Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans, which is effective for fiscal years ending after December 15, 2006 for employers with publicly traded equity securities, and for employers controlled by entities with publicly traded equity securities, which is applicable for KU. This statement requires employers to recognize the over-funded or under-funded status of a defined benefit pension and postretirement plan as an asset or a liability in the balance sheet and to recognize changes in that funded status in the year in which the changes occur through comprehensive income. This statement also requires employers to measure the funded status of a plan as of the date of its year-end balance sheet. This statement amended SFAS No. 87, Employers' Accounting for Pensions, SFAS No. 88, Employers' Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits, SFAS No. 106 Employers' Accounting for Postretirement Benefits Other Than Pensions, and SFAS No. 132, Employers' Disclosures about Pensions and Other Postretirement Benefits.

SFAS No. 71 provides guidance to regulated utilities for deferring costs that would otherwise be charged to expense or equity by non-regulated enterprises. In applying the provisions of this statement to the requirements of SFAS No. 158, KU recorded a regulatory asset representing the adjustment to the pension liability in recognizing the funded status of the pension liability. This adjustment would have been represented in Accumulated Other Comprehensive Income without the application of SFAS No. 71.

KU has adopted SFAS No. 158 effective for fiscal year ending December 31, 2006. The incremental effects of applying SFAS No. 158 are shown in the following table:

	Before		After
	Adoption		Adoption
	of SFAS		of SFAS
(in millions)	No. 158*	<u>Adjustments</u>	<u>No. 158</u>
Accrued pension and postretirement liability	\$ (75)	\$ (51)	\$ (126)
Pension and postretirement regulatory asset	13	51	64

^{*} Balances before the application of SFAS No. 158 include the effects of 2006 plan experience and changes in actuarial assumptions on the additional minimum liability, coupled with the regulatory impacts of SFAS No. 71.

#### Note 2 - Rates and Regulatory Matters

KU is subject to the jurisdiction of the Kentucky Commission, the Virginia Commission, the Tennessee

Regulatory Authority and the FERC in virtually all matters related to electric utility regulation, and as such, its accounting is subject to SFAS No. 71. Given its competitive position in the marketplace and the status of regulation in Kentucky and Virginia, KU has no plans or intentions to discontinue its application of SFAS No. 71.

#### Rate Case

In December 2003, KU filed an application with the Kentucky Commission requesting an adjustment in KU's rates. The revenue increase requested was \$58 million. In June 2004, the Kentucky Commission issued an Order approving an increase in the base rates of KU of approximately \$46 million (6.8%). The rate increase took effect on July 1, 2004.

During 2004 and 2005, the AG conducted an investigation of KU, as well as of the Kentucky Commission and its staff, requesting information regarding allegedly improper communications between KU and the Kentucky Commission, particularly during the period covered by the rate case. Concurrently, the AG had filed pleadings with the Kentucky Commission requesting rehearing of the rate case on computational components of the increased rates, including income taxes, cost of removal and depreciation amounts. In August 2004, the Kentucky Commission denied the AG's rehearing request on the cost of removal and depreciation issues and granted rehearing on the income tax component. The Kentucky Commission further agreed to hold in abeyance further proceedings in the rate case, until the AG filed its investigative report regarding the allegations of improper communication.

In January 2005 and February 2005, the AG filed a motion summarizing its investigative report as containing evidence of improper communications and record-keeping errors by KU in its conduct of activities before the Kentucky Commission or other state governmental entities and forwarded such report to the Kentucky Commission under continued confidential treatment to allow it to consider the report, including its impact, if any, on completing its investigation and any remaining steps in the rate case. To date, KU has neither seen nor requested copies of the report or its contents.

In December 2005, the Kentucky Commission issued an Order noting completion of its inquiry, including review of the AG's investigative report. The Order concluded that no improper communications occurred during the rate proceedings. Final proceedings took place during the first quarter of 2006 concerning the sole remaining open issue relating to state income tax rates used in calculating the granted rate increase. In March 2006, the Kentucky Commission issued an Order resolving this issue in KU's favor consistent with the original rate increase order.

KU believes no improprieties have occurred in its communications with the Kentucky Commission and has cooperated with the proceedings before the AG and the Kentucky Commission. KU is currently unable to predict whether there will be any remaining actions or consequences as a result of the AG's report or investigation.

#### Regulatory Assets and Liabilities

The following regulatory assets and liabilities were included in the balance sheets as of December 31:

(in millions)	<u> 2006</u>	<u>2005</u>
ARO	\$ 22	\$ 20
MISO exit	20	-
FAC	16	12
Unamortized loss on bonds	10	11
ECR	10	4
VDT costs	-	.3
Other	5	8
Subtotal	83	58
Pension and postretirement benefits	<u>64</u>	***
Total regulatory assets	<u>\$ 147</u>	<u>\$ 58</u>
Accumulated cost of removal of utility plant	\$ 297	\$ 281
Deferred income taxes-net	27	23
Other	6	11
Total regulatory liabilities	\$ 330	<u>\$ 315</u>

KU does not currently earn a rate of return on the FAC regulatory asset, which is a separate recovery mechanism with recovery within twelve months. No return is earned on the pension and postretirement benefits regulatory asset which represents the changes in funded status of the plans that the Company will seek recovery of in future proceedings with the Kentucky and Virginia Commissions. No return is currently earned on the ARO asset. This regulatory asset will be offset against the associated regulatory liability, ARO asset and ARO liability at the time the underlying asset is retired. The MISO exit amount represents the costs relating to the withdrawal from MISO membership. KU expects to seek recovery of this asset in future proceedings with the Kentucky and Virginia Commissions. KU currently earns a rate of return on the remaining regulatory assets. Other regulatory assets include the merger surcredit and deferred storm costs. Other regulatory liabilities include DSM and MISO Schedule 10. See Note 1, Summary of Significant Accounting Policies.

Pension and Postretirement Benefits. KU adopted SFAS No. 158 in 2006. This statement requires employers to recognize the over-funded or under-funded status of a defined benefit pension and postretirement plan as an asset or liability in the balance sheet and to recognize through comprehensive income the changes in the funded status in the year in which the changes occur. Under SFAS No. 71, KU can defer recoverable costs that would otherwise be charged to expense or equity by non-regulated entities. Current rate recovery in Kentucky and Virginia is based on SFAS No. 87 and SFAS No. 106, both of which were amended by SFAS No. 158. Regulators have been clear and consistent with their historical treatment of such rate recovery, therefore, KU has recorded a regulatory asset representing the probable recovery of the portion of the change in funded status of the pension and postretirement plans that is expected to be recovered. The regulatory asset will be adjusted annually as prior service cost and actuarial gains and losses are recognized in net periodic benefit cost.

**ARO.** A summary of KU's net ARO assets, regulatory assets, liabilities and cost of removal established under FIN 47 and SFAS No. 143, *Accounting for Asset Retirement Obligations*, follows:

(in millions)	ARO Net Assets	ARO Liabilities	Regulatory Assets	Regulatory <u>Liabilities</u>	Accumulated Cost of Removal	Cost of Removal  Depreciation
As of December 31, 2004	\$ 7	\$ (21)	\$ 13	\$ (1)	\$ 2	\$ -
FIN 47 net asset additions	1	(5)	4	•	-	-
ARO accretion	-	(1)	1	_	-	-
ARO depreciation	(2)	-	2	-	-	-
Cost of removal depreciation				_(1)	***************************************	
As of December 31, 2005	6	(27)	20	(2)	2	1
ARO accretion	_	(1)	1		-	-
ARO depreciation	_(1)	-	1			w
As of December 31, 2006	<u>\$_5</u>	<u>\$_(28)</u>	<u>\$_22</u>	<u>\$_(2)</u>	<u>\$_2</u>	<u>\$1</u>

Removal costs incurred in 2005 and 2006 and cost of removal depreciation and FIN 47 net asset additions during 2006 are all less than \$1 million.

Pursuant to regulatory treatment prescribed under SFAS No. 71, an offsetting regulatory credit was recorded in depreciation and amortization in the income statement of \$2 million in 2006 and \$3 million in 2005 for the ARO accretion and depreciation expense. KU AROs are primarily related to the final retirement of assets associated with generating units. For assets associated with AROs, the removal cost accrued through depreciation under regulatory accounting is established as a regulatory asset or liability pursuant to regulatory treatment prescribed under SFAS No. 71. For the years ended December 31, 2006 and 2005, KU recorded less than \$1 million of depreciation expense related to the cost of removal of ARO related assets. An offsetting regulatory liability was established pursuant to regulatory treatment prescribed under SFAS No. 71.

KU transmission and distribution lines largely operate under perpetual property easement agreements which do not generally require restoration upon removal of the property. Therefore, under SFAS No. 143, no material asset retirement obligations are recorded for transmission and distribution assets.

Unamortized Loss on Bonds. The costs of early extinguishment of debt, including call premiums, legal and other expenses, and any unamortized balance of debt expense are amortized over the life of either replacement debt (in the case of refinancing) or the original life of the extinguished debt.

MISO Exit. Following receipt of applicable FERC, Kentucky Commission and other regulatory orders, KU withdrew from the MISO effective September 1, 2006. Specific proceedings regarding the costs and benefits of the MISO and exit matters had been underway since July 2003. Since the exit from the MISO, KU has been operating under a FERC-approved open access-transmission tariff. KU now contracts with the Tennessee Valley Authority to act as its transmission reliability coordinator and Southwest Power Pool, Inc. to function as its independent transmission operator, pursuant to FERC requirements.

KU and the MISO have agreed upon overall calculation methods for the contractual exit fee to be paid by the Company following its withdrawal. In October 2006, KU paid approximately \$20 million to the MISO pursuant to an invoice regarding the exit fee and made related FERC compliance filings. The Company's payment of this exit fee amount was with reservation of its rights to contest the amount, or components thereof, following a continuing review of its calculation and supporting documentation. In December 2006, KU provided notice to the MISO of its disagreement with the calculation of the exit fee. KU and the MISO continue to discuss the specifics of the exit fee calculation. The outcome of these discussions and the eventual settlement of the disputed amount cannot be estimated at this time. Orders of the Kentucky Commission approving the Company's exit from the MISO have authorized the establishment of a regulatory asset for the exit fee, subject

to adjustment for possible future MISO credits, and a regulatory liability for certain revenues associated with former MISO Schedule 10 charges, which may continue to be collected via base rates. The treatment of the regulatory asset and liability will be determined in KU's next rate case, however, the Company historically has received approval to recover or refund regulatory assets and liabilities.

ECR. Kentucky law permits KU to recover the costs of complying with the Federal Clean Air Act, including a return of operating expenses, and a return of and on capital invested, through the ECR mechanism. The amount of the regulatory asset or liability is the amount that has been under- or over-recovered due to timing or adjustments to the mechanism.

In April 2006, the Kentucky Commission initiated six-month and two-year reviews of KU's environmental surcharge. A final order was received in January 2007, approving the charges and credits billed through the ECR during the review period as well as approving billing adjustments, a roll-in to base rates, revisions to the monthly surcharge filing and a rate of return on capital.

In June 2004, the Kentucky Commission issued an Order approving a settlement agreement that, among other things, revised the rate of return for KU's post-1994 plan. The Order also approved the elimination of KU's 1994 Plan from its ECR billing mechanism, with all remaining costs associated with that plan to be included in their entirety in base rates.

In December 2004, KU filed an application with the Kentucky Commission for approval of a CCN to construct new SO₂ control technology (FGDs) at the Ghent and Brown stations and to amend its compliance plan to allow recovery of costs associated with new and additional environmental compliance facilities. The estimated capital cost of the additional facilities over the next three years is approximately \$670 million, of which approximately \$630 million is related to the FGDs at Ghent and Brown. Hearings in these cases occurred in May 2005 and final orders were issued in June 2005, granting approval of the CCN and amendments to KU's compliance plan.

In June 2006, KU filed an application for a CCN to construct a SCR at the Ghent station and to amend its ECR plan with the Kentucky Commission seeking approval to recover investments in environmental upgrades at the Company's generating facilities. The estimated capital cost of the upgrades for the years 2007 through 2009 is approximately \$295 million, of which \$175 million is for the Air Quality Control System at TC2 and \$95 million for Ghent's Unit 2 SCR. A final Order was issued by the Kentucky Commission in December 2006 approving all expenditures and investments as submitted.

Merger Surcredit. As part of the LG&E Energy merger with KU Energy Corporation in 1998, KU estimated non-fuel savings over a ten-year period following the merger. Costs to achieve these savings were deferred and amortized over a five-year period pursuant to regulatory orders. In approving the merger, the Kentucky Commission adopted KU's proposal to reduce its retail customers' bills based on one-half of the estimated merger-related savings, net of deferred and amortized amounts, over a five-year period. The surcredit mechanism provides that 50% of the net non-fuel cost savings estimated to be achieved from the merger be provided to ratepayers through a monthly bill credit, and 50% be retained by KU over a five-year period. In that same order, the Kentucky Commission required KU, after the end of the five-year period, to present a plan for sharing with ratepayers the then-projected non-fuel savings associated with the merger. KU submitted this filling in January 2003, proposing to continue to share with ratepayers, on a 50%/50% basis, the estimated fifth-year gross level of non-fuel savings associated with the merger. In October 2003, the Kentucky Commission issued an Order approving a settlement agreement reached with the parties in the case. KU's merger surcredit will remain in place for another five-year term beginning July 1, 2003, and the merger savings will continue to be shared 50% with ratepayers and 50% with shareholders.

VDT. In December 2001, the Kentucky Commission issued an Order approving a settlement agreement allowing KU to set up a regulatory asset of \$54 million for the workforce reduction costs and begin amortizing it over a five-year period starting in April 2001. Some employees rescinded their participation in the voluntary enhanced severance program which, along with the non-recurring charge of \$7 million for FERC and Virginia jurisdictions, thereby decreased the original charge to the regulatory asset from \$64 million to \$54 million. The Order reduced revenues by approximately \$11 million through a surcredit on bills to ratepayers over the same five-year period, reflecting a sharing (40% to the ratepayers and 60% to KU) of savings as stipulated by KU, net of amortization costs of the workforce reduction. The five-year VDT amortization period expired in March 2006.

As part of the settlement agreement in the rate case, in September 2005, KU filed with the Kentucky Commission a plan for the future ratemaking treatment of the VDT surcredit and costs. In February 2006, the AG, KIUC and KU reached a settlement agreement on the future ratemaking treatment of the VDT surcredits and costs and subsequently submitted a joint motion to the Kentucky Commission to approve the unanimous settlement agreement. Under the terms of the settlement agreement, the VDT surcredit will continue at the current level until such time as KU files for a change in base rates. The Kentucky Commission issued an Order in March 2006, approving the settlement agreement.

FAC. KU's retail rates contain an FAC, whereby increases or decreases in the cost of fuel for generation are reflected in the rates charged to retail customers. The FAC allows the Company to adjust customers' accounts for the difference between the fuel cost component of base rates and the actual fuel cost, including transportation costs. Refunds to customers occur if the actual costs are below the embedded cost component. Additional charges to customers occur if the actual costs exceed the embedded cost component. The amount of the regulatory asset or liability is the amount that has been under- or over-recovered due to timing or adjustments to the mechanism.

In January 2003, the Kentucky Commission reviewed KU's FAC for the six month period ended October 31, 2001. The Kentucky Commission ordered KU to reduce its fuel costs for purposes of calculating its FAC by less than \$1 million. At issue was the purchase of approximately 102,000 tons of coal from Western Kentucky Energy Corp., a non-regulated affiliate, for use at KU's Ghent facility. The Kentucky Commission further ordered that an independent audit be conducted to examine operational and management aspects of both KU's and LG&E's fuel procurement functions. The final report was issued in February 2004. The report's recommendations related to documentation and process improvements. Management Audit Action Plans were agreed upon by KU and the Kentucky Commission Staff in the second quarter of 2004. KU filed its first Audit Progress Report with the Kentucky Commission Staff in November 2004. The second Audit Progress Report was filed in May 2005. The third Audit Progress Report was filed in December 2005. In January 2006, the Kentucky Commission staff informed KU and LG&E that reporting on all of the original recommendations, but one, has been concluded. KU filed another Audit Progress Report on the remaining open recommendation in August 2006.

The Kentucky Commission requires public hearings at six-month intervals to examine past fuel adjustments, and at two-year intervals to review past operations of the fuel clause and transfer of the then current fuel adjustment charge or credit to the base charges. In July 2006, the Kentucky Commission initiated a six-month review of the FAC for KU for the period of November 1, 2005 through April 30, 2006. The Kentucky Commission issued an Order in November 2006 approving the charges and credits billed through the FAC during the review period.

KU also employs an FAC mechanism for Virginia customers that uses an average fuel cost factor based primarily on projected fuel costs. The fuel cost factor may be adjusted annually for over or under collections of

fuel costs from the previous year. In February 2006, KU filed an application with the Virginia Commission seeking approval of an increase of approximately \$6 million in its fuel cost factor to reflect higher fuel costs incurred during 2005, and anticipated to be incurred in 2006. The Virginia Commission approved KU's request in April 2006. An FAC filing seeking an approval of an additional increase in KU's fuel cost factor to reflect higher fuel costs was made with the Virginia Commission in February 2007.

In December 2006, the Kentucky Commission initiated a two-year review of KU's past operations of the fuel clause and transfer of fuel costs from the FAC to base rates. KU anticipates Kentucky Commission approval of the charges and credits billed and the fuel procurement practices of KU during the second quarter of 2007.

**DSM.** KU's rates contain a DSM provision. The provision includes a rate mechanism that provides for concurrent recovery of DSM costs and provides an incentive for implementing DSM programs. The provision allows KU to recover revenues from lost sales associated with the DSM programs based on program plan engineering estimates and post-implementation evaluations.

**Deferred Storm Costs.** Based on an Order from the Kentucky Commission in September 2004, KU reclassified from maintenance expense to a regulatory asset, \$4 million related to costs not reimbursed from the 2003 ice storm. These costs will be amortized through June 2009. KU earns a return of these amortized costs, which are included in KU's jurisdictional operating expenses.

Accumulated Cost of Removal of Utility Plant. As of December 31, 2006 and 2005, KU has segregated the cost of removal, embedded in accumulated depreciation, of \$297 million and \$281 million, respectively, in accordance with FERC Order No. 631. This cost of removal component is for assets that do not have a legal ARO under SFAS No. 143. For reporting purposes in the balance sheets, KU has presented this cost of removal as a regulatory liability pursuant to SFAS No. 71.

**Deferred Income Taxes-Net.** Deferred income taxes represent the future income tax effects of recognizing the regulatory assets and liabilities in the income statement. Deferred income taxes are recognized at currently enacted tax rates for all material temporary differences between the financial reporting and income tax bases of assets and liabilities.

#### Other Regulatory Matters

Utility Competition in Virginia. The Commonwealth of Virginia passed the Virginia Electric Utility Restructuring Act in 1999. This act gave Virginia customers the ability to choose their electric supplier. Rates are capped at current levels through December 2010. The Virginia Commission will continue to require each Virginia utility to make annual filings of either a base rate change or an Annual Informational Filing consisting of a set of standard financial schedules. The Virginia Commission Staff will issue a Staff Report regarding the individual utility's financial performance during the historic 12-month period. The Staff Report can lead to an adjustment in rates, but through December 2010, rates are subject to the capped rate period and essentially "frozen". In March 2007, the Virginia General Assembly adopted legislation which will end the cap on rates at the end of 2008, rather than through December 2010, and end customer choice for most consumers in the applicable regions of the state. Thereafter, a hybrid model of regulation would apply in Virginia, whereby utility rates would be reviewed every two years and a utility's rate of return on equity would be based upon the average of the rates of return for other regional utilities, with certain caps, floors or adjustments. As currently drafted, the legislation maintains an existing exemption from restructuring, allowing KU's Virginia service territory to continue under prior traditional utility regulation. KU continues to analyze the potential effects of such legislation on the future rates and operations relating to its Virginia service territory and cannot estimate the impact, if any, at this time.

Regional Reliability Council. KU has changed its regional reliability council membership from the Reliability First Corporation to the Southeastern Electric Reliability Council, effective January 1, 2007. Regional reliability councils are industry consortiums that promote, coordinate and ensure the reliability of the bulk electric supply systems in North America.

TC2 CCN Application. A CCN application for construction of the new, base-load, coal fired unit TC2, which will be jointly-owned by KU and LG&E, was filed with the Kentucky Commission in December 2004, and initial CCN applications for three transmission lines were filed in early 2005, with further applications submitted in December 2005. The proposed air permit was filed with the Kentucky Division for Air Quality in December 2004. In November 2005, the Kentucky Commission approved the application to expand the Trimble County generating station. Kentucky Commission approval for one transmission line CCN was granted in September 2005, and a ruling that a second transmission line was not subject to the CCN process was received in February 2006. The Kentucky Commission granted approval for the remaining transmission line CCN in May 2006. In August 2006, KU obtained dismissal of a judicial review of such CCN approval by certain property owners. A further appeal of such dismissal was thereafter filed, which action remains pending. The transmission lines are also subject to routine regulatory filings and the right-of-way acquisition process. In November 2005, the Kentucky Division for Air Quality issued the final air permit, which was challenged via a request for remand in December 2005 by three environmental advocacy groups, including the Sierra Club. Administrative proceedings with respect to the challenge continued throughout 2006. A ruling may occur during the first half of 2007.

Ghent FGD Inquiry. In October 2006, the Kentucky Commission commenced an inquiry into elements of KU's planned construction of one of its three new FGD's at the Ghent generating station. The proceeding requested, and KU provided, additional information regarding configuration details, expenditures and the proposed construction sequence applicable to future construction phases of the Ghent FGD project. In January 2007, the Kentucky Commission issued an Order completing its inquiry in the matter and confirming its approval of KU's construction plan. The Order also provided general guidance for jurisdictional utilities regarding applicable information and data requirements for future CCN applications and subsequent proceedings.

Market-Based Rate Authority. Beginning in April 2004, the FERC initiated proceedings to modify its methods used to assess generation market power and has established more stringent interim market screen tests. During 2005, in connection with KU's tri-annual market-based rate tariff renewals, the FERC continued to contend that KU failed such market screens in certain regions. KU disputed this contention.

In July 2006, the FERC issued an Order in KU's market-based rate proceeding accepting KU's further proposal to address certain market power issues the FERC had claimed would arise upon an exit from the MISO. In particular, KU received permission to sell power at market-based rates at the interface of control areas in which they may be deemed to have market power, subject to a restriction that such power not be collusively re-sold back into such control areas. However, restrictions exist on sales by KU of power at market-based rates in the KU/LG&E and Big Rivers Electric Corporation control areas. Certain general FERC proceedings continue with respect to market-based rate matters, and KU's market-based rate authority is subject to such future developments. KU cannot predict the ultimate impact of the current or potential mitigation mechanisms on its future wholesale power sales.

**FERC Audit Results**. In July 2006, the FERC issued a final report under a routine audit that its Office of Enforcement (formerly its Office of Market Oversight and Investigations) had conducted regarding the compliance of E.ON U.S. and subsidiaries, including KU, under the FERC's standards of conduct and codes of

conduct requirements, as well as other areas. The final report contained certain findings calling for improvements in E.ON U.S. and subsidiaries' structures, policies and procedures relating to transmission, generation dispatch, energy marketing and other practices. E.ON U.S. and subsidiaries have agreed to certain corrective actions and have submitted procedures related to such corrective actions to the FERC. The corrective actions are in the nature of organizational and operational improvements as described above and are not expected to have a material adverse impact on the Company's results of operations or financial condition.

IRP. Integrated resource planning regulations in Kentucky require major utilities to make triennial IRP filings with the Kentucky Commission. In April 2005, KU and LG&E filed their 2005 joint IRP with the Kentucky Commission. The IRP provides historical and projected demand, resource and financial data, and other operating performance and system information. The AG and the KIUC were granted intervention in the IRP proceeding. The Kentucky Commission issued its staff report with no substantive issues noted and closed the case by Order in February 2006.

PUHCA 2005. E.ON, KU's ultimate parent, is a registered holding company under PUHCA 2005. E.ON, its utility subsidiaries, including KU, and certain of its non-utility subsidiaries are subject to extensive regulation by the FERC with respect to numerous matters, including: electric utility facilities and operations, wholesale sales of power and related transactions, accounting practices, issuances and sales of securities, acquisitions and sales of utility properties, payments of dividends out of capital and surplus, financial matters and inter-system sales of non-power goods and services. KU believes that it has adequate authority (including financing authority) under existing FERC orders and regulations to conduct its business and will seek additional authorization when necessary.

EPAct 2005. The EPAct 2005 was enacted in August 2005. Among other matters, this comprehensive legislation contains provisions mandating improved electric reliability standards and performance; providing economic and other incentives relating to transmission, pollution control and renewable generation assets; increasing funding for clean coal generation incentives; repealing PUHCA 1935; enacting PUHCA 2005 and expanding FERC jurisdiction over public utility holding companies and related matters via the Federal Power Act and PUHCA 2005.

The FERC was directed by the EPAct 2005 to adopt rules to address many areas previously regulated by the other agencies under other statutes, including PUHCA 1935. The FERC is in various stages of rulemaking on these issues and KU is monitoring these rulemaking activities and actively participating in these and other rulemaking proceedings. KU is still evaluating the potential impacts of the EPAct 2005 and the associated rulemakings and cannot predict what impact the EPAct 2005, and any such rulemakings, will have on its operations or financial position.

In February 2006, the Kentucky Commission initiated an administrative proceeding to consider the requirements of the EPAct 2005, Subtitle E Section 1252, Smart Metering, which concerns time-based metering and demand response, and Section 1254, Interconnections. EPAct 2005 requires each state regulatory authority to conduct a formal investigation and issue a decision on whether or not it is appropriate to implement certain Section 1252, Smart Metering standards within eighteen months after the enactment of EPAct 2005 and to commence consideration of Section 1254, Interconnection standards within one year after the enactment of EPAct 2005. The Kentucky Commission held a public hearing in July 2006 in this proceeding with all Kentucky jurisdictional electric utilities. In December 2006, the Kentucky Commission issued an Order in this proceeding indicating that the EPAct 2005 Section 1252, Smart Metering and Section 1254, Interconnection standards should not be adopted. However, all five Kentucky Commission jurisdictional utilities are required to file real-time pricing pilot programs for their larger commercial and industrial customers. KU will develop a real-time pricing pilot for large industrial and commercial customers and file the details of the real-time pricing

pilot with the Kentucky Commission in April 2007.

#### Note 3 - Financial Instruments

The cost and estimated fair values of KU's non-trading financial instruments as of December 31 follow:

	<u>2006</u>		<u>2005</u>		
	Carrying	Fair	Carrying	Fair	
(in millions)	<u>Value</u>	<u>Value</u>	<u>Value</u>	<u>Value</u>	
Long-term debt (including					
current portion)	\$360	\$360	\$363	\$363	
Long-term debt					
from affiliate (including current portion)	\$483	\$487	\$383	\$382	
Interest-rate swaps-asset	\$ -	\$ -	\$ 1	\$ 1	

All of the above valuations reflect prices quoted by exchanges except for the swaps and intercompany loans. The fair values of the swaps and intercompany loans reflect price quotes from dealers or amounts calculated using accepted pricing models. The fair values of cash and cash equivalents, accounts receivable, cash surrender value of key man life insurance, accounts payable and notes payable are substantially the same as their carrying values.

Interest Rate Swaps (hedging derivatives). KU uses over-the-counter interest rate swaps to hedge exposure to market fluctuations in certain of its debt instruments. Pursuant to Company policy, use of these financial instruments is intended to mitigate risk, earnings and cash flow volatility and is not speculative in nature. Management has designated all of the interest rate swaps as hedge instruments. Financial instruments designated as fair value hedges and the underlying hedged items are periodically marked to market with the resulting net gains and losses recorded directly into net income. Upon termination of any fair value hedge, the resulting gain or loss is recorded into net income. Financial instruments designated as cash flow hedges have resulting gains and losses recorded within other comprehensive income and stockholders' equity.

KU was party to an interest rate swap agreement with a notional amount of \$53 million as of December 31, 2006 and 2005. Under this swap agreement, KU paid variable rates based on the London Interbank Offer Rate averaging 7.44% and 6.41% at December 31, 2006 and 2005, respectively, and received fixed rates averaging 7.92% at December 31, 2006 and 2005. The swap agreement in effect at December 31, 2006 has been designated as a fair value hedge and matures in 2007. The fair value designation was assigned because the underlying fixed rate debt has a firm future commitment. For 2006 and 2005, the effect of marking these financial instruments and the underlying debt to market resulted in pre-tax gains of less than \$1 million recorded in interest expense. The interest rate swap was terminated in February 2007 when the underlying debt was defeased.

Interest rate swaps hedge interest rate risk on the underlying debt under SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities, as amended, in addition to swaps being marked to market, the item being hedged must also be marked to market, consequently at December 31, 2006 and 2005, KU's debt reflects a mark-to-market adjustment of \$1 million and \$2 million, respectively.

Energy Risk Management Activities (non-hedging derivatives). KU conducts energy trading and risk management activities to maximize the value of power sales from physical assets it owns. Energy trading activities are principally forward financial transactions to hedge price risk and are accounted for on a mark-to-market basis in accordance with SFAS No. 133, as amended. Prior to the MISO establishing its Day 2 energy market in April 2005, wholesale forward transactions were primarily physically settled and thus were treated as

normal sales under SFAS No. 133, as amended, and were not marked to market.

The table below summarizes KU's energy trading and risk management activities:

(in millions)	<u> 2006</u>	<u> 2005</u>
Fair value of contracts at beginning of period, net asset	\$ 1	\$ -
Fair value of contracts when entered into during the period	3	1
Contracts realized or otherwise settled during the period	(6)	_
Changes in fair values due to changes in assumptions	3	_=
Fair value of contracts at end if period, net asset	<u>\$_1</u>	<u>\$ 1</u>

No changes to valuation techniques for energy trading and risk management activities occurred during 2006 or 2005. Changes in market pricing, interest rate and volatility assumptions were made during both years. All contracts outstanding at December 31, 2006 and 2005, have a maturity of less than one year and are valued using prices actively quoted for proposed or executed transactions or quoted by brokers.

KU maintains policies intended to minimize credit risk and revalues credit exposures daily to monitor compliance with those policies. At December 31, 2006, 100% of the trading and risk management commitments were with counterparties rated BBB-/Baa3 equivalent or better.

KU hedges the price volatility of its forecasted electric off-system sales with the sales of market-traded electric forward contracts for periods of less than one year. These electric forward sales have been designated as cash flow hedges and are not speculative in nature. Gains or losses on these instruments, to the extent that the hedging relationship has been effective, are deferred in other comprehensive income. Gains and losses resulting from ineffectiveness are shown in the statements of income in other income-net. Upon completion of the underlying hedge transaction, the amount recorded in other comprehensive income is recorded in earnings. No material pre-tax gains and losses resulted from these cash flow hedges in 2006 and 2005.

#### Note 4 - Concentrations of Credit and Other Risk

Credit risk represents the accounting loss that would be recognized at the reporting date if counterparties failed to perform as contracted. Concentrations of credit risk (whether on- or off-balance sheet) relate to groups of customers or counterparties that have similar economic or industry characteristics that would cause their ability to meet contractual obligations to be similarly affected by changes in economic or other conditions.

KU's customer receivables and revenues arise from deliveries of electricity to approximately 501,000 customers in over 600 communities and adjacent suburban and rural areas in 77 counties in central, southeastern and western Kentucky, to approximately 30,000 customers in five counties in southwestern Virginia and 5 customers in Tennessee. For the years ended December 31, 2006 and 2005, 100% of total utility revenue was derived from electric operations.

Effective August 1, 2006, KU and its employees represented by the IBEW Local 2100 entered into a new three-year collective bargaining agreement. The new agreement provides for negotiated increases or changes to wages, benefits or other provisions and for annual wage re-openers. KU and its employees represented by the USWA Local 9447-01 entered into a three-year collective bargaining agreement effective August 2005 with authorized annual wage reopeners. The employees represented by these two bargaining units comprise approximately 16% of KU's workforce at December 31, 2006.

#### Note 5 - Pension and Other Postretirement Benefit Plans

KU has both funded and unfunded non-contributory defined benefit pension plans and other postretirement benefit plans that together cover substantially all of its employees. The healthcare plans are contributory with participants' contributions adjusted annually. KU uses December 31 as the measurement date for its plans.

**Obligations and Funded Status.** The following tables provide a reconciliation of the changes in the plans' benefit obligations and fair value of assets over the two-year period ending December 31, 2006, and a statement of the funded status as of December 31 for KU's sponsored defined benefit plans:

21 112 1	מ	lannian '	Done	ıfita	Oth	er Posti		ment
(in millions)	n millions) Pension Benefits 2006 2005			2006		enefits 200		
Change in benefit obligation				··········			,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,

(in millions)	2006	2005	2006	2005
Benefit obligation	\$ 303	\$ 318	\$ 88	\$ 95
Accumulated benefit obligation	258	270	-	-
Fair value of plan assets	253	247	12	9

Components of Net Periodic Benefit Cost. The following table provides the components of net periodic benefit cost for the plans:

Other Destructions

					Othe	er Post	retire	ment
	Pension Benefits		fits		Ben	efits		
(in millions)	20	)06	2(	005	20	06	20	005
Service cost	\$	6	\$	5	\$	2	\$	2
Interest cost		17		16		5		5
Expected return on plan assets		(20)		(19)		(1)		(1)
Amortization of prior service costs		1		1		1		1
Amortization of actuarial loss		4		2				
Amortization of transitional obligation		-		-		1		1
Benefit cost at end of year	\$	8	\$	5	\$	8	\$	8

The assumptions used in the measurement of KU's pension benefit obligation are shown in the following table:

	<u> 2006</u>	<u> 2005</u>
Weighted-average assumptions as of December 31:		
Discount rate	5.96%	5.50%
Rate of compensation increase	5.25%	5.25%

The discount rate is based on the November Mercer Pension Discount Yield Curve, adjusted by the basis point change in the Moody's Corporate Aa Bond Rate in December.

The assumptions used in the measurement of KU's net periodic benefit cost are shown in the following table:

	<u>2006</u>	<u>2005</u>
Discount rate	5,50%	5.75%
Expected long-term return on plan assets	8.25%	8.25%
Rate of compensation increase	5.25%	4.50%

To develop the expected long-term rate of return on assets assumption, KU considered the current level of expected returns on risk free investments (primarily government bonds), the historical level of the risk premium associated with the other asset classes in which the portfolio is invested and the expectations for future returns of each asset class. The expected return for each asset class was then weighted based on the target asset allocation to develop the expected long-term rate of return on assets assumption for the portfolio.

The following describes the effects on pension benefits by changing the major actuarial assumptions discussed above:

- A 1% change in the assumed discount rate could have an approximate \$32 million positive or negative impact to the 2006 accumulated benefit obligation and an approximate \$43 million positive or negative impact to the 2006 projected benefit obligation.
- A 25 basis point change in the expected rate of return on assets would have an approximate \$1 million positive or negative impact on 2006 pension expense.

Assumed Healthcare Cost Trend Rates. For measurement purposes, a 10% annual increase in the per capita cost of covered healthcare benefits was assumed for 2006. The rate was assumed to decrease gradually to 5% by 2015 and remain at that level thereafter.

Assumed healthcare cost trend rates have a significant effect on the amounts reported for the healthcare plans. A 1% change in assumed healthcare cost trend rates would have resulted in an increase or decrease of less than \$1 million on the 2006 total of service and interest costs components and an increase or decrease of \$5 million in year-end 2006 postretirement benefit obligations.

**Expected Future Benefit Payments and Medicare Subsidy Receipts.** The following list provides the amount of expected future benefit payments, which reflect expected future service and the estimated gross amount of medicare subsidy receipts:

		Other	Medicare
	Pension	Postretirement	Subsidy
(in millions)	<u>Plans</u>	<u>Benefits</u>	<u>Receipts</u>
2007	\$ 19	\$7	\$ -
2008	18	7	(1)
2009	18	7	(1)
2010	17	8	(1)
2011	17	8	(1)
2012-16	87	40	(3)

**Plan Assets.** The following table shows KU's weighted-average asset allocation by asset category at December 31:

	Target Range	2006	2005
Pension Plans:			
Equity securities	45% - 75%	61%	57%
Debt securities	30% - 50%	39%	42%
Other	0% - 10%	<u> </u>	<u> </u>
Totals		100%	100 <u>%</u>

The investment policy of the pension plans was developed in conjunction with financial consultants, investment advisors and legal counsel. The goal of the investment policy is to preserve the capital of the fund and maximize investment earnings. The return objective is to exceed the benchmark return for the policy index comprised of the following: Russell 3000 Index, MSCI-EAFE Index, Lehman Aggregate and Lehman Long Duration Gov/Corporate Bond Index in proportions equal to the targeted asset allocation.

Evaluation of performance focuses on a long-term investment time horizon of at least three to five years or a complete market cycle. The assets of the pension plans are broadly diversified within different asset classes (equities, fixed income securities and cash equivalents).

To minimize the risk of large losses in a single asset class, no more than 5% of the portfolio will be invested in the securities of any one issuer with the exclusion of the U.S. government and its agencies. The equity portion of the fund is diversified among the market's various subsections to diversify risk, maximize returns and avoid undue exposure to any single economic sector, industry group or individual security. The equity subsectors include, but are not limited to, growth, value, small capitalization and international.

In addition, the overall fixed income portfolio may have an average weighted duration, or interest rate sensitivity which is within +/- 20% of the duration of the overall fixed income benchmark. Foreign bonds in the

aggregate shall not exceed 10% of the total fund. The portfolio may include a limited investment of up to 20% in below investment grade securities provided that the overall average portfolio quality remains "AA" or better. The below investment grade securities include, but are not limited to, medium-term notes, corporate debt, non-dollar and emerging market debt and asset backed securities. The cash investments should be in securities that either are of short maturities (not to exceed 180 days) or readily marketable with modest risk.

Derivative securities are permitted only to improve the portfolio's risk/return profile, to modify the portfolio's duration or to reduce transaction costs and must be used in conjunction with underlying physical assets in the portfolio. Derivative securities that involve speculation, leverage, interest rate anticipation, or any undue risk whatsoever are not deemed appropriate investments.

The investment objective for the postretirement benefit plan is to provide current income consistent with stability of principal and liquidity while maintaining a stable net asset value of \$1.00 per share. The postretirement funds are invested in a prime cash money market fund that invests primarily in a portfolio of short-term, high-quality fixed income securities issued by banks, corporations and the U.S. government.

Contributions. KU did not make a contribution to the pension plan in 2005 or 2006, but did make a contribution of \$13 million in January 2007. After this payment, KU's pension plan assets are in excess of the December 31, 2006 accumulated benefit obligation. KU does not expect to make any further contributions in 2007. See Note 13, Subsequent Events.

In addition, KU made contributions to the other postretirement benefit plans of approximately \$7 million in 2006 and 2005. In 2007, KU anticipates making voluntary contributions to fund the Voluntary Employee Beneficiary Association (VEBA) trusts to match the annual postretirement expense and funding the 401(h) plan up to the maximum amount allowed by law.

Pension Legislation. The Pension Protection Act of 2006 was enacted in August 2006. The new rules are generally effective for plan years beginning after 2008. Among other matters, this comprehensive legislation contains provisions applicable to defined benefit plans which generally (i) mandate 100% funding of current liabilities within seven years; (ii) increase tax-deduction levels regarding contributions; (iii) revise certain actuarial assumptions, such as mortality tables and discount rates; and (iv) raise federal insurance premiums and other fees for under-funded and distressed plans. The legislation also contains similar provisions relating to defined-contribution plans and qualified and non-qualified executive pension plans and other matters. KU continues to examine the potential impacts of the Pension Protection Act of 2006. KU's \$13 million contribution in January 2007 resulted in assets that are in excess of the December 31, 2006 accumulated benefit obligation.

Thrift Savings Plans. KU has a thrift savings plan under section 401(k) of the Internal Revenue Code. Under the plan, eligible employees may defer and contribute to the plan a portion of current compensation in order to provide future retirement benefits. KU makes contributions to the plan by matching a portion of the employee contributions. The costs of this matching were approximately \$2 million for 2006 and 2005.

Note 6 - Income Taxes

(in millione)

Components of income tax expense are shown in the table below:

(in million	s)	<u>2006</u>	<u>2005</u>
Current	- federal	\$ 51	\$ 57
	- state	11	11
Deferred	- federal – net	***	(2)
	- state – net	1	
Investment	t tax credit-deferred	12	-
Amortizati	on of investment tax credit	(1)	_(2)
Total incor	me tax expense	<u>\$ 74</u>	<u>\$ 64</u>

In June 2006, KU and LG&E filed a joint application with the Department of Energy requesting certification to be eligible for investment tax credits applicable to the construction of TC2. The EPAct 2005 added Section 48A to the Internal Revenue Code, which provides for an investment tax credit to promote the commercialization of advanced coal technologies that will generate electricity in an environmentally responsible manner. KU's and LG&E's application requested up to a maximum amount of "advanced coal project" credit allowed per taxpayer, or \$125 million, based on an estimate of 15% of projected qualifying TC2 expenditures.

In November 2006, the Department of Energy and the Internal Revenue Service announced that KU and LG&E were selected to receive the tax credit. KU's portion of the tax credit will be approximately \$101 million over the construction period of TC2. This tax credit will be amortized to income over the life of the related property. In 2006, based on eligible construction expenditures incurred in 2006, KU recorded a federal investment tax credit, decreasing current federal income taxes in 2006 by \$12 million.

H. R. 4520, known as the "American Jobs Creation Act of 2004" allows electric utilities to take a deduction of up to 3% of their qualified production activities income starting in 2005. This deduction reduced KU's effective tax rate by less than 1% for 2006.

2006

2005

Components of net deferred tax liabilities included in the balance sheet are shown below:

(in millions)	<u>2006</u>	<u> 2003</u>
Deferred tax liabilities:		
Depreciation and other plant-related items	\$291	\$301
Regulatory assets and other	<u>37</u>	26
Total deferred tax liabilities	328	327
Deferred tax assets:		
Income taxes due to customers	10	9
Pensions and related benefits	11	23
Liabilities and other	23	21
Total deferred tax assets	44	53
Net deferred income tax liability	<u>\$284</u>	<u>\$274</u>

A reconciliation of differences between the statutory U.S. federal income tax rate and KU's effective income tax rate follows:

	<u>2006</u>	<u> 2005</u>
Statutory federal income tax rate	35.0%	35.0%
State income taxes, net of federal benefit	3.9	3.9
Reduction of income tax accruals	(0.5)	(2.7)
EEI undistributed earnings adjustment	**	1.8
EEI dividend	(3.4)	-
Amortization of investment tax credit	(0.5)	(1.0)
Other differences	(1.8)	<u>(0,6</u> )
Effective income tax rate	<u>32.7</u> %	<u>36.4</u> %

Other differences primarily relate to excess deferred taxes which reflect the benefits of deferred taxes reversing at tax rates that differ from statutory rates and various other permanent differences.

The EEI dividend for 2006 reflects tax benefits associated with the receipt of dividends from KU's investment in EEI. KU recognized additional deferred income tax expense in the third quarter of 2005 (\$3 million) related to the undistributed earnings of its EEI unconsolidated investment. Subsequent to an EEI management decision regarding changes in the distribution of EEI's previous earnings, KU elected to provide deferred taxes for all book and tax temporary differences in this investment.

In September 2005, KU received notice from the Congressional Joint Committee on Taxation approving the Internal Revenue Service's audit of KU's income tax returns for the periods December 1999 through December 2003. As a result of resolving numerous tax matters during these periods, KU reduced income tax accruals by \$5 million during 2005.

Kentucky House Bill 272, also known as "Kentucky's Tax Modernization Plan", was signed into law in March 2005. This bill contains a number of changes in Kentucky's tax system, including the reduction of the Corporate income tax rate from 8.25% to 7% effective January 1, 2005, and a further reduction to 6% effective January 1, 2007. As a result of the income tax rate change, KU's deferred tax reserve amount will exceed its actual deferred tax liability attributable to existing temporary differences, since the new statutory rates are lower than the rates were when the deferred tax liability originated. This excess amount is referred to as excess deferred income taxes. In June 2005 and December 2006, KU received approval from the Kentucky Commission to establish and amortize a regulatory liability (\$11 million) for its net excess deferred income tax balances. KU will amortize its depreciation-related excess deferred income tax balances under the average rate assumption method. The average rate assumption method matches the amortization of the excess deferred income taxes with the life of the timing differences to which they relate. Excess deferred income tax balances related to non-depreciation timing differences were expensed in 2005 and 2006 due to their immaterial amount.

KU expects to have adequate levels of taxable income to realize its recorded deferred tax assets.

#### Note 7 - Long-Term Debt

As of December 31, 2006 and 2005, long-term debt and the current portion of long-term debt consist primarily of first mortgage bonds, pollution control bonds and long-term loans from affiliated companies as summarized below.

	Stated		Principal
(in millions)	Interest Rates	<u>Maturities</u>	<u>Amounts</u>
Outstanding at December 31, 2006:			
Noncurrent portion	Variable – 6.33%	2010-2036	\$702
Current portion	Variable – 7.92%	2007-2032	\$141
Outstanding at December 31, 2005:			
Noncurrent portion	Variable – 7.92%	2007-2035	\$623
Current portion	Variable – 5.99%	2006-2032	\$123

Under the provisions for KU's variable-rate pollution control bonds, Series 10, 12, 13, 14 and 15, the bonds are subject to tender for purchase at the option of the holder and to mandatory tender for purchase upon the occurrence of certain events, causing the bonds to be classified as current portion of long-term debt in the balance sheets. The average annualized interest rate for these bonds during 2006 and 2005 was 3.56% and 2.55%, respectively.

Pollution control series bonds are obligations of KU issued in connection with tax-exempt pollution control revenue bonds issued by various governmental entities, principally counties in Kentucky. A loan agreement obligates KU to make debt service payments to the county that equate to the debt service due from the county on the related pollution control revenue bonds. Until a series of financing transactions completed during February 2007, the county's debt was also secured by an equal amount of KU's first mortgage bonds that were pledged to the trustee for the pollution control revenue bonds, and that match the terms and conditions of the county's debt, but require no payment of principal and interest unless KU defaults on the loan agreement.

Interest rate swaps are used to hedge KU's underlying debt obligations. These swaps hedge specific debt issuances and, consistent with management's designation, are accorded hedge accounting treatment. The swaps effectively convert fixed rate obligations on KU's first mortgage bonds Series P to variable-rate obligations. As of December 31, 2006 and 2005, KU had one remaining swap with a notional value of \$53 million. This swap was terminated in February 2007, when the underlying bond was defeased. See Note 3, Financial Instruments.

Redemptions and maturities of long-term debt for 2006 and 2005 are summarized below:

(\$ in n	nillions)	Principal		Secured/	
Year	<u>Description</u>	<u>Amount</u>	Rate	<u>Unsecured</u>	<b>Maturity</b>
2006	First mortgage bonds	\$36	5.99%	Secured	Jan 2006
2005	First mortgage bonds	\$50	7.55%	Secured	Jun 2025
2005	Due to Fidelia	\$75	2.29%	Secured	Dec 2005

Issuances of long-term debt for 2006 and 2005 are summarized below:

(\$ in n	nillions)	Principal		Secured/	
<u>Year</u>	<u>Description</u>	<u>Amount</u>	<u>Rate</u>	<u>Unsecured</u>	<u>Maturity</u>
2006	Due to Fidelia	\$50	5.675%	Unsecured	Oct 2016
2006	Due to Fidelia	\$50	6.33%	Unsecured	Jun 2036
2006	Pollution control bonds	\$17	Variable	Secured	Jun 2036
2006	Pollution control bonds	\$17	Variable	Secured	Jun 2036
2005	Pollution control bonds	\$13	Variable	Secured	Jun 2035
2005	Pollution control bonds	\$13	Variable	Secured	Jun 2035
2005	Due to Fidelia	\$50	4.735%	Unsecured	Jul 2015
2005	Due to Fidelia	\$75	5.36%	Unsecured	Dec 2015

In May 2005, KU repaid a \$27 million loan against the cash surrender value of life insurance policies.

In October 2005, KU redeemed all of its outstanding shares of preferred stock for \$41 million. KU paid \$101 per share for the 4.75% Series and \$102.939 per share for the 6.53% Series.

In February 2007, KU completed a series of financial transactions impacting its periodic reporting requirements. The \$54 million Pollution Control Series 10 bond was refinanced and replaced with a new unsecured tax-exempt bond of the same amount maturing in 2034. The \$53 million Series P bond was defeased and replaced with an intercompany loan totaling \$53 million from Fidelia. In conjunction with the defeasance, the Company terminated the related interest rate swap. Fidelia also agreed to eliminate the second lien on its two secured loans. Pursuant to the terms of the remaining tax-exempt bonds, the first mortgage bonds were cancelled and the underlying lien on substantially all of KU's assets was released following the completion of these steps. KU no longer has any secured debt and is no longer subject to periodic reporting under the Securities Exchange Act of 1934. See Note 13, Subsequent Events.

Long-term debt maturities for KU are shown in the following table:

(in millions)	
2007	\$ 53
2008-09	-
2010	33
2011	-
Thereafter	<u>757</u> (a)
Total	<u>\$843</u>

(a) Includes long-term debt of \$87 million classified as current liabilities because these bonds are subject to tender for purchase at the option of the holder and to mandatory tender for purchase upon the occurrence of certain events. Maturity dates for these bonds range from 2024 to 2032. KU does not expect to pay these amounts in 2007.

#### Note 8 - Notes Payable and Other Short-Term Obligations

KU participates in an intercompany money pool agreement wherein E.ON U.S. and/or LG&E make funds available to KU at market-based rates (based on an index of highly rated commercial paper issues) up to \$400 million.

	Total Money	Amount	Balance	Average
(\$ in millions)	Pool Available	Outstanding	<u>Available</u>	Interest Rate
December 31, 2006	\$400	\$97	\$303	5.25%
December 31, 2005	\$400	\$70	\$330	4.21%

As of December 31, 2006 and 2005, E.ON U.S. maintained a revolving credit facility totaling \$200 million with an affiliated company, E.ON North America, Inc., to ensure funding availability for the money pool. The balance is as follows:

	Total	Amount	Balance	Average
(\$ in millions)	<u>Available</u>	<b>Outstanding</b>	<u>Available</u>	Interest Rate
December 31, 2006	\$200	\$102	\$98	5.49%
December 31, 2005	\$200	\$105	\$95	4.49%

#### Note 9 - Commitments and Contingencies

Operating Leases. KU leases office space, office equipment and vehicles and accounts for these leases as operating leases. In addition, KU reimburses LG&E for a portion of the lease expense paid by LG&E for KU's usage of office space leased by LG&E. Total lease expense was \$6 million and \$3 million for 2006 and 2005, respectively. The future minimum annual lease payments for operating leases for years subsequent to December 31, 2006, are shown in the following table:

(in millions)	
2007	\$ 6
2008	5
2009	3
2010	2
2011	2
Thereafter	_5
Total	<u>\$23</u>

Owensboro Contract Litigation. In May 2004, the City of Owensboro, Kentucky and OMU commenced a suit now removed to the U.S. District Court for the Western District of Kentucky, against KU concerning a long-term power supply contract (the "OMU Agreement") with KU. The dispute involves interpretational differences regarding issues under the OMU Agreement, including various payments or charges between KU and OMU and rights concerning excess power, termination and emissions allowances. The complaint seeks in excess of \$6 million in damages in connection with one of its claims for periods prior to 2004, plus damages in an unspecified amount for later-occurring periods on that claim and for other claims. OMU has additionally requested injunctive and other relief, including a declaration that KU is in material breach of the contract. KU has filed an answer in that court denying the OMU claims and presenting counterclaims and amended such filing in January 2007, to include further counterclaims alleging additional damages. During 2005, the FERC declined KU's application to exercise exclusive jurisdiction on matters. In July 2005, the district court resolved a summary judgment motion made by KU in OMU's favor, ruling that a contractual provision grants OMU the ability to terminate the contract without cause upon four years' prior notice, for which ruling KU retains certain

rights to appeal. At this time, the district court case is in the discovery stage and currently a trial date of January 2008 has been scheduled. In May 2006, OMU issued a notification of its intent to terminate the OMU agreement contract in May 2010, without cause, absent any earlier relief which may be permitted by the proceeding.

Sale and Leaseback Transaction. KU is a participant in a sale and leaseback transaction involving its 62% interest in two jointly-owned CTs at KU's E.W. Brown generating station (Units 6 and 7). Commencing in December 1999, KU and LG&E entered into a tax-efficient, 18-year lease of the CTs. KU and LG&E have provided funds to fully defease the lease, and have executed an irrevocable notice to exercise an early purchase option contained in the lease after 15.5 years. The financial statement treatment of this transaction is no different than if KU had retained its ownership. The leasing transaction was entered into following receipt of required state and federal regulatory approvals.

In case of default under the lease, KU is obligated to pay to the lessor its share of certain fees or amounts. Primary events of default include loss or destruction of the CTs, failure to insure or maintain the CTs and unwinding of the transaction due to governmental actions. No events of default currently exist with respect to the lease. Upon any termination of the lease, whether by default or expiration of its term, title to the CTs reverts jointly to KU and LG&E.

At December 31, 2006, the maximum aggregate amount of default fees or amounts was \$9 million, of which KU would be responsible for 62% (approximately \$6 million). KU has made arrangements with E.ON U.S., via guarantee and regulatory commitment, for E.ON U.S. to pay KU's full portion of any default fees or amounts.

Letter of Credit. KU has provided a letter of credit totaling less than \$1 million to support certain obligations related to workers' compensation.

Purchased Power. KU has purchased power arrangements with OMU and OVEC. Under the OMU agreement, which could last through January 1, 2020, KU purchases all of the output of an approximately 400-Mw coal-fired generating station not required by OMU. The amount of purchased power available to KU during 2007-2010, which is expected to be approximately 8% of KU's total Kwh native load energy requirements, is dependent upon a number of factors including the OMU units' availability, maintenance schedules, fuel costs and OMU requirements. Payments are based on the total costs of the station allocated per terms of the OMU agreement. Included in the total costs is KU's proportionate share of debt service requirements on \$266 million of OMU bonds outstanding at December 31, 2006. The debt service is allocated to KU based on its annual allocated share of capacity, which averaged approximately 41% in 2006. KU does not guarantee the OMU bonds, or any requirements therein, in the event of default by OMU.

KU has a contract for purchased power with OVEC for various Mw capacities. KU has an investment of 2.5% ownership in OVEC's common stock, which is accounted for on the cost method of accounting. KU's share of OVEC's output is 2.5%, approximately 55 Mw of generation capacity. Future obligations for power purchases are shown in the following table:

(in millions)	
2007	\$ 22
2008	24
2009	23
2010	25
2011	25
Thereafter	<u>306</u>
Total	<u>\$425</u>

Construction Program. KU had approximately \$1.1 billion of commitments in connection with its construction program at December 31, 2006.

In June 2006, KU and LG&E entered into a construction contract regarding the TC2 project. The contract is generally in the form of a lump-sum, turnkey agreement for the design, engineering, procurement, construction, commissioning, testing and delivery of the project, according to designated specifications, terms and conditions. The contract price and its components are subject to a number of potential adjustments which may serve to increase or decrease the ultimate construction price paid or payable to the contractor. The contract also contains standard representations, covenants, indemnities, termination and other provisions for arrangements of this type, including termination for convenience or for cause rights.

**Environmental Matters.** KU's operations are subject to a number of environmental laws and regulations in each of the jurisdictions in which it operates, governing, among other things, air emissions, wastewater discharges, the use, handling and disposal of hazardous substances and wastes, soil and groundwater contamination and employee health and safety.

Clean Air Act Requirements The Clean Air Act establishes a comprehensive set of programs aimed at protecting and improving air quality in the United States by, among other things, controlling stationary sources of air emissions such as power plants. While the general regulatory framework for these programs is established at the federal level, most of the programs are implemented and administered by the states under the oversight of the EPA. The key Clean Air Act programs relevant to KU's business operations are described below.

Ambient Air Quality. The Clean Air Act requires the EPA to periodically review the available scientific data for six criteria pollutants and establish concentration levels in the ambient air sufficient to protect the public health and welfare with an extra margin for safety. These concentration levels are known as national ambient air quality standards ("NAAQS"). Each state must identify "nonattainment areas" within its boundaries that fail to comply with the NAAQS and develop a SIP to bring such nonattainment areas into compliance. If a state fails to develop an adequate plan, the EPA must develop and implement a plan. As the EPA increases the stringency of the NAAQS through its periodic reviews, the attainment status of various areas may change, thereby triggering additional emission reduction obligations under revised SIPs aimed to achieve attainment.

In 1997, the EPA established new NAAQS for ozone and fine particulates that required additional reductions in SO₂ and NOx emissions from power plants. In 1998, the EPA issued its final "NOx SIP Call" rule requiring reductions in NOx emissions of approximately 85 percent from 1990 levels in order to mitigate ozone transport

from the midwestern U.S. to the northeastern U.S. To implement the new federal requirements, in 2002, Kentucky amended its SIP to require electric generating units to reduce their NO_x emissions to 0.15 pounds weight per MMBtu on a company-wide basis. In 2005, the EPA issued the CAIR which requires additional SO₂ emission reductions of 70 percent and NOx emission reductions of 65 percent from 2003 levels. The CAIR provides for a two-phase cap and trade program, with initial reductions of NOx and SO₂ emissions due by 2009 and 2010, respectively, and final reductions due by 2015. The final rule is currently under challenge in a number of federal court proceedings. In 2006, Kentucky proposed to amend its SIP to adopt state requirements similar to those under the federal CAIR. Depending on the level of action determined necessary to bring local non-attainment areas into compliance with the new ozone and fine particulate standards, KU's power plants are potentially subject to additional reductions in SO₂ and NOx emissions. KU's weighted-average company-wide emission rate for SO₂ in 2006 was approximately 1.25 lbs./MMBtu of heat input, with every generating unit below its emission limit established by the Kentucky Division for Air Quality.

Hazardous Air Pollutants. As provided in the 1990 amendments to the Clean Air Act, the EPA investigated hazardous air pollutant emissions from electric utilities and submitted a report to Congress identifying mercury emissions from coal-fired power plants as warranting further study. In 2005, the EPA issued the CAMR establishing mercury standards for new power plants and requiring all states to issue new SIPs including mercury requirements for existing power plants. The EPA issued a model rule which provides for a two-phase cap and trade program with initial reductions due by 2010 and final reductions due by 2018. The CAMR provides for reductions of 70 percent from 2003 levels. The EPA closely integrated the CAMR and CAIR programs to ensure that the 2010 mercury reduction targets will be achieved as a "co-benefit" of the controls installed for purposes of compliance with the CAIR. The final rule is also currently under challenge in the federal courts. In 2006, Kentucky proposed to amend its SIP to adopt state requirements similar to those under the federal CAMR. In addition, in 2005 and 2006, state and local air agencies in Kentucky have proposed or adopted rules aimed at regulating additional hazardous air pollutants from sources including power plants. To the extent those rules are final, they are not expected to have a material impact on KU's power plant operations.

Acid Rain Program. The 1990 amendments to the Clean Air Act imposed a two-phased cap and trade program to reduce SO₂ emissions from power plants that were thought to contribute to "acid rain" conditions in the northeastern U.S. The 1990 amendments also contained requirements for power plants to reduce NOx emissions through the use of available combustion controls.

Regional Haze. The Clean Air Act also includes visibility goals for certain federally designated areas, including national parks, and requires states to submit SIPs that will demonstrate reasonable progress toward preventing future impairment and remedying any existing impairment of visibility in those areas. In 2005, the EPA issued its CAVR detailing how the Clean Air Act's best available retrofit technology ("BART") requirements will be applied to facilities, including power plants, built between 1962 and 1974 that emit certain levels of visibility impairing pollutants. Under the final rule, as the CAIR will result in more visibility improvement than BART, states are allowed to substitute CAIR requirements in their regional haze SIPs in lieu of controls that would otherwise be required by BART. The final rule has been challenged in the courts.

Installation of Pollution Controls. Many of the programs under the Clean Air Act utilize cap and trade mechanisms that require a company to hold sufficient emissions allowances to cover its authorized emissions on a company-wide basis and do not require installation of pollution controls on every generating unit. Under cap and trade programs, companies are free to focus their pollution control efforts on plants where such controls are particularly efficient and utilize the resulting emission allowances for smaller plants where such controls are not cost effective. KU met its Phase I SO₂ requirements primarily through installation of FGD equipment on Ghent Unit 1. KU's combined strategy for its Phase II SO₂ requirements, which commenced in 2000, include the installation of additional FGD equipment, as well as using accumulated emissions allowances and fuel

switching to defer certain additional capital expenditures. In order to achieve the NOx emission reductions mandated by the NOx SIP Call, KU installed additional NOx controls, including SCR technology, during the 2000 to 2006 time period at a cost of \$215 million. In 2001, the Kentucky Commission granted recovery in principal of these costs incurred by KU under its periodic environmental surcharge review mechanisms.

In order to achieve the emissions reductions mandated by the CAIR and CAMR, KU expects to incur additional capital expenditures totaling \$1.0 billion during the 2007 through 2009 time period for pollution controls including FGD and SCR and incur additional operating and maintenance costs in operating such controls. In 2005, the Kentucky Commission granted recovery in principal of these costs incurred by KU under its periodic environmental surcharge review mechanisms. KU believes its costs in reducing SO₂, NOx and mercury emissions to be comparable to those of similarly situated utilities with like generation assets. KU's compliance plans are subject to many factors including developments in the emission allowance and fuels markets, future legislative and regulatory enactments, legal proceedings and advances in clean air technology. KU will continue to monitor these developments to ensure that its environmental obligations are met in the most efficient and cost-effective manner.

Potential GHG Controls. In 2005, the Kyoto Protocol for reducing GHG emissions took effect, obligating 37 industrialized countries to undertake substantial reductions in GHG emissions. The U.S. has not ratified the Kyoto Protocol and there are currently no mandatory GHG emission reduction requirements at the federal level. Legislation mandating GHG reductions has been introduced in the Congress, but no federal legislation has been enacted to date. In the absence of a program at the federal level, various states have adopted their own GHG emission reduction programs. Such programs have been adopted in various states including 11 northeastern U.S. states under the Regional GHG Initiative program and California. Substantial efforts to pass federal GHG legislation are ongoing. In addition, litigation is currently pending before various courts to determine whether the EPA and the states have the authority to regulate GHG emissions under existing law. KU is monitoring ongoing efforts to enact GHG reduction requirements at the state and federal level. KU is unable to predict whether mandatory GHG reduction requirements will ultimately be enacted or to determine the reduction targets and deadlines that would be applicable under such programs. As a Company with significant coal-fired generating assets, KU could be substantially impacted by programs requiring mandatory reductions in GHG emissions, although the precise impact on the operations of KU cannot be determined prior to the enactment of such programs.

General Environmental Proceedings In April 2006, the EPA sent correspondence to KU constituting a possible notice of violation of the Clean Air Act's new source review rules relating to 1997 work on a boiler and turbine at KU's E.W. Brown generating station. In December 2006, the EPA issued a second notice of violation relating to potential heat input permit threshold matters at the unit. During 2006, KU completed certain data responses to the EPA in these proceedings and discussions with the EPA are continuing. In March 2007, the EPA indicated that more formal enforcement action or proceedings may be possible in this matter. KU is not able to estimate the outcome or potential effects of these matters. See Note 13, Subsequent Events.

In January 2005, approximately 1,000 gallons of fuel oil leaked from a cracked weld in a storage tank at KU's Green River generating station. KU commenced immediate spill containment, recovery and remediation actions and has received satisfactory inspections from state regulators to date. The cost related to the cleanup of the oil spill was less than \$1 million and no penalties or fines are anticipated.

KU has recently settled certain environmental matters. During 2005 and 2006, final judicial and administrative approvals were received regarding a consent decree relating to the October 1999 leak of approximately 38,000 gallons of diesel fuel (of which 34,000 gallons were recovered) from an underground pipeline at KU's E.W. Brown Station. Under the terms of the settlement, KU paid a civil penalty in 2006 and has agreed to construct a

supplemental environmental project and maintain the project for ten years, each at a cost of less than \$1 million. During 2006 final judicial and administrative approval were received regarding a settlement associated with a former transformer scrap-yard which had been the subject of April 2002 correspondence to KU and other potentially responsible parties. Under the terms of the settlement, the parties bore aggregate cleanup costs of approximately \$2 million, of which KU's share was less than \$1 million, which was paid in December 2006.

From time to time, KU appears before the EPA, various state or local regulatory agencies and state and federal courts regarding matters involving compliance with applicable environmental laws and regulations. Such matters include liability under the Comprehensive Environmental Response, Compensation and Liability Act for cleanup at various off-site waste sites and ongoing claims regarding GHG emissions from KU's generating stations. Based on analysis to date, the resolution of such matters is not expected to have a material impact on the operations of KU.

#### Note 10 - Jointly Owned Electric Utility Plant

KU and LG&E have begun construction of a jointly owned unit at the Trimble County site. KU and LG&E own undivided 60.75% and 14.25% interests, respectively in TC2. Of the remaining 25% of TC2, IMEA owns a 12.12% undivided interest and IMPA owns a 12.88% undivided interest. Each company is responsible for its proportionate share of capital cost during construction, and fuel, operation and maintenance cost when TC2 begins operation, which is expected to occur in 2010.

			TC2		
	LG&E	KU	IMPA	IMEA	Total
Ownership interest	14.25%	60.75%	12.88%	12.12%	100%
Mw capacity	107	455	97	91	750
(in millions) Construction work in progress	LG&E \$25	<u>KU</u> \$96			

KU and LG&E jointly own the following CTs and related equipment:

(\$ in millions)		K	J			LG	&E	·		Tot	al

- (1) Comprised of Paddy's Run 13 and E W Brown 5 In addition to the above jointly owned utility plant, there is an inlet air cooling system attributable to Unit 5 and Units 8-11 at the E W Brown facility This inlet air cooling system is not jointly owned, however it is used to increase production on the units to which it relates, resulting in an additional 88Mw of capacity for KU
- (2) Comprised of units 6 and 7 at the E W Brown facility
- (3) Comprised of units 5 and 6 at the Trimble County facility
- (4) Comprised of CT Substation 7-10 and units 7, 8, 9 and 10 at the Trimble County facility
- (5) Comprised of CT Substation 5 and 6 and CT Pipeline at the Trimble County facility

Both KU's and LG&E's participating share of direct expenses of the joint fuel plants is included in the corresponding operating expenses on its respective income statement (e.g., fuel, maintenance of plant, other operating expense).

#### Note 11 - Related Party Transactions

KU, subsidiaries of E.ON U.S. and other subsidiaries of E.ON engage in related party transactions. Transactions between KU and E.ON U.S. subsidiaries are eliminated upon consolidation of E.ON U.S. Transactions between KU and E.ON subsidiaries are eliminated upon consolidation of E.ON. These transactions are generally performed at cost and are in accordance with the FERC regulations under PUHCA 2005 and the applicable Kentucky Commission and Virginia Commission regulations. The significant related party transactions are disclosed below.

#### Electric Purchases

KU and LG&E purchase energy from each other in order to effectively manage the load of their retail and offsystem customers. These sales and purchases are included in the statements of income as operating revenues and purchased power operating expense. KU intercompany electric revenues and purchased power expense for the years ended December 31 were as follows:

(in millions)	<u>2006</u>	<u>2005</u>
Electric operating revenues from LG&E	\$77	\$96
Purchased power from LG&E	99	92

#### Interest Charges

See Note 8, Notes Payable and Other Short-Term Obligations, for details of intercompany borrowing arrangements. Intercompany agreements do not require interest payments for receivables related to services provided when settled within 30 days.

KU's intercompany interest income and expense for the years ended December 31 were as follows:

(in millions)	<u> 2006</u>	<u> 2005</u>
Interest on money pool loans	\$ 3	\$ 1
Interest on Fidelia loans	21	15

#### Other Intercompany Billings

E.ON U.S. Services provides KU with a variety of centralized administrative, management and support services. These charges include payroll taxes paid by E.ON U.S. on behalf of KU, labor and burdens of E.ON U.S. Services employees performing services for KU and vouchers paid by E.ON U.S. Services on behalf of KU. The cost of these services are directly charged to KU, or for general costs which cannot be directly attributed, charged based on predetermined allocation factors, including the following ratios: number of customers, total assets, revenues, number of employees and other statistical information. These costs are charged on an actual cost basis.

In addition, KU and LG&E provide services to each other and to E.ON U.S. Services. Billings between KU and LG&E relate to labor and overheads associated with union employees performing work for the other utility, charges related to jointly-owned CTs and other miscellaneous charges. Billings from KU to E.ON U.S. Services relate to information technology-related services provided by KU employees, cash received by E.ON U.S. Services on behalf of KU and services provided by KU to other non-regulated businesses which are paid through E.ON U.S. Services.

Intercompany billings to and from KU for the years ended December 31 were as follows:

(in millions)	<u> 2006</u>	<u> 2005</u>
E.ON U.S. Services billings to KU	\$353	\$185
KU billings to LG&E	56	29
LG&E billings to KU	53	101
KU billings to E.ON U.S. Services	23	7

#### Note 12 - Accumulated Other Comprehensive Income

Accumulated other comprehensive income (loss) consisted of the following:

	Minimum Pension Liability		Income	
(in millions)	<u>Adjustment</u>	Pre-Tax	<u>Taxes</u>	<u>Net</u>
Balance at December 31, 2004	\$ (22)	\$ (22)	\$ 9	\$(13)
Minimum pension liability adjustment	<u>(10</u> )	<u>(10</u> )	4	<u>(6)</u>
Balance at December 31, 2005	(32)	(32)	13	(19)
Minimum pension liability adjustment Balance at December 31, 2006	<u>32</u> \$	<u>32</u> <u>\$ ~</u>	<u>(13)</u> \$	<u>19</u> <u>\$_</u> =

#### Note 13 – Subsequent Events

On January 16, 2007, KU made a discretionary contribution to the pension plan in the amount of \$13 million. After this payment, KU's pension plan assets are in excess of the December 31, 2006, accumulated benefit obligation.

On January 31, 2007, KU received an Order from the Kentucky Commission approving the charges and credits billed through the ECR during the review period as well as approving billing adjustments, a roll-in to base rates, revisions to the monthly surcharge filing and a rate of return on capital.

On January 31, 2007, KU received an Order from the Kentucky Commission closing the investigation into KU's Ghent FGD construction with no changes to KU's proposed revised construction plans.

In February 2007, KU completed a series of financial transactions impacting its periodic reporting requirements. The \$54 million Pollution Control Series 10 bond was refinanced and replaced with a new unsecured tax-exempt bond of the same amount maturing in 2034. The \$53 million Series P bond was defeased and replaced with an intercompany loan totaling \$53 million from Fidelia. The Company terminated the related interest swap and agreed with Fidelia to eliminate the second lien on its two secured loans. Pursuant to the terms of the remaining tax-exempt bonds, the first mortgage bonds were cancelled and the underlying lien on KU's assets was released following completion of these steps. KU no longer has any secured debt and, having deregistered applicable securities with the SEC effective March 1, 2007, is no longer subject to periodic reporting under the Securities Exchange Act of 1934.

On February 9, 2007, KU filed with the Kentucky Commission an application for approval of a green energy rider. This application details KU's plans to offer its customers a "green energy" program that contributes funds

to the maintenance and growth of renewable energy in Kentucky and contiguous states. An order is expected during the second quarter of 2007.

On February 23, 2007, KU made an FAC filing with the Virginia Commission seeking approval of an additional increase in KU's fuel cost factor to reflect higher fuel costs.

Tyrone generating units 1 and 2 were retired in March 2007, as a result of on-going life assessment studies. These units were mothballed in September 2006, and represented 58 Mw of the total 129 Mw capacity at Tyrone generating station.

On March 12, 2007, the Department of Justice filed a complaint in federal court in Kentucky in connection with the prior EPA notices of violation concerning new source review aspects of the Clean Air Act at the E. W. Brown generating station. The complaint seeks civil penalties, remedial measures, and injunctive relief. KU is not able to estimate the outcome or potential effects of these matters. For additional information, see Note 9, Commitments and Contingencies.

#### Report of Independent Registered Public Accounting Firm

To the Shareholder of Kentucky Utilities Company:

In our opinion, the accompanying balance sheets and the related statements of capitalization, income, retained earnings, cash flows and comprehensive income present fairly, in all material respects, the financial position of Kentucky Utilities Company at December 31, 2006 and December 31, 2005, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As discussed in Note 1 to the financial statements, Kentucky Utilities Company changed the manner in which it accounts for defined benefit pension and other postretirement benefit plans as of December 31, 2006.

#### Kentucky Utilities Company Notes to Financial Statements (Unaudited)

#### Note 1 - General

The unaudited financial statements include the accounts of the Company. KU's common stock is wholly-owned by E.ON U.S., an indirect wholly-owned subsidiary of E.ON. In the opinion of management, the unaudited interim financial statements include all adjustments, consisting only of normal recurring adjustments, necessary for a fair statement of financial position, results of operations, retained earnings and cash flows for the periods indicated. Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted, although the Company believes that the disclosures are adequate to make the information presented not misleading. These unaudited financial statements and notes should be read in conjunction with the Company's annual report for the year ended December 31, 2007, including management's discussion and analysis and the audited financial statements and notes therein.

Certain reclassification entries have been made to the previous years' financial statements to conform to the 2008 presentation with no impact on net assets, liabilities and capitalization or previously reported net income and cash flows.

#### RECENT ACCOUNTING PRONOUNCEMENTS

#### **SFAS No. 161**

In March 2008, the FASB issued SFAS No. 161, Disclosures about Derivative Instruments and Hedging Activities, an amendment of FASB Statement No. 133, which is effective for fiscal years, and interim periods within those fiscal years, beginning on or after November 15, 2008. The objective of this statement is to enhance the current disclosure framework in FASB Statement No. 133, Accounting for Derivative Instruments and Hedging Activities, as amended. The Company is currently evaluating the impact of adoption of SFAS No. 161 on its statements of operations, financial position and cash flows.

#### SFAS No. 160

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements*, which is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008. The objective of this statement is to improve the relevance, comparability and transparency of financial information in a reporting entity's consolidated financial statements. The Company expects the adoption of SFAS No. 160 to have no impact on its statements of operations, financial position and cash flows.

#### SFAS No. 159

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities – Including an Amendment of FASB Statement No. 115. SFAS No. 159 permits entities to choose to measure many financial instruments and certain other assets and liabilities at fair value on an instrument-by-instrument basis (the fair value option). Unrealized gains and losses on items for which the fair value option has been elected are to be recognized in earnings at each subsequent

reporting date. SFAS No. 159 is effective for fiscal years beginning after November 15, 2007. SFAS No. 159 was adopted effective January 1, 2008 and had no impact on the statements of operations, financial position and cash flows.

#### SFAS No. 157

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements, which, except as described below, is effective for fiscal years beginning after November 15, 2007. This statement defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles and expands disclosures about fair value measurements. SFAS No. 157 does not expand the application of fair value accounting to new circumstances. In February 2008, the FASB issued FASB Staff Position 157-2, Effective Date of FASB Statement No. 157, which delays the effective date of SFAS No. 157 for all nonfinancial assets and liabilities, except those that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually), to fiscal years beginning after November 15, 2008, and interim periods within those fiscal years. SFAS No. 157 was adopted effective January 1, 2008, except as it applies to those nonfinancial assets and liabilities, and had no impact on the statements of operations, financial position and cash flows, however, the Company will provide additional disclosures relating to its financial derivatives, AROs and pension assets, as required, in 2008.

#### Note 2 - Rates and Regulatory Matters

For a description of each line item of regulatory assets and liabilities, reference is made to KU's Annual Report, Note 2 of the financial statements, for the year ended December 31, 2007.

The following regulatory assets and liabilities were included in KU's Balance Sheets:

# Kentucky Utilities Company (unaudited)

(in millions)	March 31, <u>2008</u> \$ 25	December 31, 2007 \$ 24
ARO Unamortized loss on bonds	s 25 10	5 24 10
MISO exit	19	20
FAC	5	17
ECR	14	11
Other	5	4
Subtotal	78	86
Pension and postretirement benefits	28	28
Total regulatory assets	<u>\$_106</u>	<u>\$ 114</u>
Accumulated cost of removal of utility plant	\$ 314	\$ 310
Deferred income taxes – net	21	22
Other	12	<u> </u>
Total regulatory liabilities	<u>\$347</u>	<u>\$ 342</u>

KU does not currently earn a rate of return on the FAC regulatory asset, which is a separate recovery mechanism with recovery within twelve months. No return is earned on the pension and postretirement benefits regulatory asset which represents the changes in funded status of the plans. The Company will

seek recovery in future proceedings with the Kentucky and Virginia Commissions. No return is currently earned on the ARO asset. This regulatory asset will be offset against the associated regulatory liability, ARO asset and ARO liability at the time the underlying asset is retired. The MISO exit amount represents the costs relating to the withdrawal from MISO membership. KU will seek recovery of this asset in future proceedings with the Kentucky and Virginia Commissions. KU currently earns a rate of return on the remaining regulatory assets. Other regulatory assets include the merger surcredit and deferred storm costs. Other regulatory liabilities include DSM and MISO costs currently included in base rates that will be netted against costs of withdrawing from the MISO in the next rate case.

MISO Exit. KU and the MISO have agreed upon overall calculation methods for the contractual exit fee to be paid by the Company following its withdrawal. In October 2006, KU paid approximately \$20 million to the MISO pursuant to an invoice regarding the exit fee and made related FERC compliance filings. The Company's payment of this exit fee amount was with reservation of its rights to contest the amount, or components thereof, following a continuing review of its calculation and supporting documentation. KU and the MISO resolved their dispute regarding the calculation of the exit fee and, in November 2007, filed an application with the FERC for approval of a recalculation agreement. In March 2008, the FERC approved the parties' recalculation of the exit fee, and the approved agreement provided KU with an immediate recovery of \$1 million and will provide an estimated \$3 million over the next eight years for credits realized from other payments the MISO will receive, plus interest. Orders of the Kentucky Commission approving the Company's exit from the MISO have authorized the establishment of a regulatory asset for the exit fee, subject to adjustment for possible future MISO credits, and a regulatory liability for certain revenues associated with former MISO administrative charges, which may continue to be collected via base rates. The treatment of the regulatory asset and liability will be determined in KU's next rate case, however, the Company historically has received approval to recover and refund regulatory assets and liabilities.

FAC. In January 2008, the Kentucky Commission initiated a routine examination of KU's FAC for the six-month period May 1, 2007 through October 31, 2007. A public hearing was held in March 2008. An order is anticipated in the third quarter of 2008.

In August 2007, the Kentucky Commission initiated a routine examination of KU's FAC for the sixmonth period of November 1, 2006 through April 30, 2007. A public hearing was held in October 2007. The Kentucky Commission issued an Order in January 2008, approving the charges and credits billed through the FAC during the review period.

KU also employs an FAC mechanism for Virginia customers using an average fuel cost factor based primarily on projected fuel costs. The factor may be adjusted annually for over-or-under collections of fuel costs from the prior year. In February 2008, KU filed an application with the Virginia Commission seeking approval of a decrease in its fuel cost factor applicable during the billing period April 2008 through March 2009. The Virginia Commission allowed the new rates to be in effect for the April 2008, customer billings. In April 2008, the Virginia Commission Staff recommended a change to the fuel factor KU filed in its application. The recommended change, which KU has agreed to, would result in a decrease of 0.482 cents/kWh and will become effective beginning in June 2008 pending Virginia Commission approval. A public hearing was held in May 2008, and an order is anticipated in the second quarter of 2008.

ECR. In September 2007, the Kentucky Commission initiated six-month and two-year reviews for periods ending October 31, 2006 and April 30, 2007, respectively, of KU's environmental surcharge. All parties to the case submitted requests with the Kentucky Commission to waive rights to a hearing on this matter. The Kentucky Commission issued final Orders in March 2008, approving the charges and credits billed

through the ECR during the review period, as well as approving billing adjustments, roll-in adjustments to base rates, revisions to the monthly surcharge filing and the rates of return on capital.

#### Other Regulatory Matters

TC2 CCN Application and Transmission Matters. A CCN application for construction of the new base-load, coal fired unit known as TC2, which will be jointly owned by KU and LG&E, together with the Illinois Municipal Electric Agency and the Indiana Municipal Power Agency, was approved by the Kentucky Commission in November 2005, and was never appealed.

Initial CCN applications for two transmission lines associated with the TC2 unit were approved in September 2005 and May 2006. One of those CCNs, for a line running from Jefferson County into Hardin County, was brought up for review to the Franklin Circuit Court by a group of landowners. In August 2006, KU, LG&E and the Kentucky Commission obtained dismissal of that action, on grounds that the landowners had failed to comply with the statutory procedures governing the action for review. That dismissal was appealed by the landowners to the Kentucky Court of Appeals, and in December 2007, that Court reversed the lower court's dismissal and remanded the challenge of the CCN to the Franklin Circuit Court for further proceedings. KU, LG&E and the Kentucky Commission filed for reconsideration of the appellate court's ruling, but those requests were denied in April 2008. KU and LG&E will file a motion for discretionary review with the Kentucky Supreme Court in May 2008, asking that Court to hear the matter and, ultimately, to reverse the Court of Appeals and uphold the Franklin Circuit Court's dismissal.

The referenced transmission lines are also subject to routine regulatory filings and require the acquisition of easements. In April 2008, in proceedings involving the condemnation of an easement for a portion of the Jefferson County to Hardin County transmission line (all rights of way for the other line have been acquired), a Meade County, Kentucky circuit court judge issued a ruling upholding the objections of two co-owners of the property crossed by the easement and dismissed that eminent domain proceeding pending the completion of the CCN appeal described above. KU and LG&E have filed responsive pleadings, including a motion to vacate that decision by the trial court and a procedural request with the Court of Appeals seeking expedited review on a petition to direct the circuit court to proceed with the eminent domain litigation. Additional condemnation proceedings involving other parcels of property to support this same transmission line are also pending in neighboring Hardin County, and three landowners there have now sought dismissal of certain of those proceedings in Hardin County, on the same grounds cited by the Meade County court. KU and LG&E have opposed those efforts to dismiss, and are awaiting ruling by the Hardin County Circuit Court.

Merger Surcredit. In December 2007, KU submitted to the Kentucky Commission its plan to allow the merger surcredit to terminate as scheduled on June 30, 2008. The Kentucky Commission issued a procedural schedule for this proceeding in March 2008, with data discovery to be completed in May 2008. A public hearing is scheduled in May 2008, and an order is expected by the end of the second quarter of 2008.

**DSM.** In July 2007, KU and LG&E filed an application with the Kentucky Commission requesting an order approving enhanced versions of the existing DSM programs along with the addition of several new cost effective programs. The total annual budget for these programs is approximately \$26 million, an increase over the previous annual costs of approximately \$10 million. In March 2008, the Kentucky Commission issued an Order approving the application, with minor modifications. KU and LG&E filed revised tariffs in April 2008, under authority of this Order.

Mandatory Reliability Standards. As a result of the EPAct 2005, certain formerly voluntary reliability standards became mandatory in June 2007, and authority was delegated to various RROs by the Electric Reliability Organization, which was authorized by the FERC to enforce compliance with such standards, including promulgating new standards. Failure to comply with mandatory reliability standards can subject a registered entity to sanctions, including potential fines of up to \$1 million per day, as well as non-monetary penalties, depending upon the circumstances of the violation. KU is a member of the SERC, which acts as KU's RRO. The SERC is currently assessing KU's compliance with certain existing mitigation plans resulting from a prior RRO's audit of various reliability standards, and KU and SERC are in discussions regarding potential settlement, further mitigation steps or other resolution actions regarding these items. While KU believes itself to be in substantial compliance with the mandatory reliability standards, KU cannot predict the outcome of the current SERC proceeding or of other analysis which may be conducted regarding compliance with particular reliability standards.

**Depreciation Study.** In December 2007, KU filed a depreciation study with the Kentucky Commission as required by a previous Order. An adjustment to the depreciation rates is dependent on an order being received by the Kentucky Commission, the timing of which cannot currently be determined. KU also filed the depreciation study with the Virginia Commission, but has not requested formal review and approval of the depreciation rates from the Virginia Commission. Such a review will take place either during KU's next base rate case in Virginia or when KU makes a formal application to the Virginia Commission for approval of the proposed rates.

Brownfield Development Rider Tariff. In March 2008, KU and LG&E received Kentucky Commission approval for a Brownfield Development Rider, which offers a discounted rate to electric customers who meet certain usage and location requirements, including taking new service at a brownfield site, as certified by the appropriate Kentucky state agency. The rider would permit special contracts with such customers which provide for a series of declining partial rate discounts over an initial five year period of a longer service arrangement. The tariff is intended to promote local economic redevelopment and efficient usage of utility resources by aiding potential reuse of vacant brownfield sites.

Real-Time Pricing. In December 2006, the Kentucky Commission issued an Order indicating that the EPAct 2005 Section 1252, Smart Metering and Section 1254, Interconnection standards should not be adopted. However, five Kentucky Commission jurisdictional utilities were required to file real-time pricing pilot programs for their large commercial and industrial customers. KU developed a real-time pricing pilot for large industrial and commercial customers and filed the details of the plan with the Kentucky Commission in April 2007. Data discovery concluded in July 2007, and no parties to the case requested a hearing. In February 2008, the Kentucky Commission issued an Order approving the real-time pricing pilot program proposed by KU, for implementation within approximately eight months, for its large commercial and industrial customers.

Utility Competition in Virginia. The Commonwealth of Virginia passed the Virginia Electric Utility Restructuring Act in 1999. This act gave Virginia customers the ability to choose their electric supplier. Rates are capped at current levels through December 2010. In April 2007, Virginia passed legislation terminating this competitive market and commencing re-regulation of utility rates in Virginia. The new act will end the cap on rates at the end of 2008, rather than through December 2010, and end customer choice for most consumers in the applicable regions of the state. Thereafter, a hybrid model of regulation is expected to apply in Virginia, whereby utility rates would be reviewed every two years and a utility's rate of return on equity shall not be set lower than the average of the rates of return for other regional utilities, with certain caps, floors or adjustments. The legislation was effective in July 2007, and also includes a 10% nonbinding goal for renewable power generation by 2022, as well as incentives for new generation, including renewables. Under the legislation, KU retains an existing exemption from customer

choice and other restructuring activities as applicable to KU's limited service territory in Virginia. However, subject to future developments, KU may or may not undertake such a rate proceeding in the first six months of 2009 based on calendar year 2008 financial data under the hybrid model of regulation, or make biennial rate filings with the Virginia Commission thereafter.

#### Note 3 - Financial Instruments

Effective January 1, 2008, KU adopted the required provisions of SFAS No. 157, excluding the exceptions related to nonfinancial assets and liabilities, which will be adopted effective January 1, 2009, consistent with FASB Staff Position 157-2.

Energy Trading and Risk Management Activities (non-hedging derivatives). KU conducts energy trading and risk management activities to maximize the value of power sales from physical assets it owns. Energy trading activities are principally forward financial transactions to hedge price risk and are accounted for on a mark-to-market basis in accordance with SFAS No. 133, as amended.

The table below summarizes KU's energy trading and risk management activities for the three months ended March 31, 2007:

(in millions)		
Fair value of contracts at beginning of period, net asset	\$	1
Unrealized gains and losses recognized at contract		
inception during the period		-
Realized gains and losses recognized during the period		-
Changes in fair values attributable to changes in valuation		
techniques and assumptions		(2)
Other unrealized gains and losses and changes in fair values		
Fair value of contracts at end of period, net (liability) asset	<u>\$_</u>	(1)

No changes to valuation techniques for energy trading and risk management activities occurred during 2008 or 2007. Changes in market pricing, interest rate and volatility assumptions were made during both years. All contracts outstanding at March 31, 2007, had a maturity of less than one year. There were no contracts outstanding at March 31, 2008. All amounts for 2008 are less than \$1 million. Energy trading and risk management contracts are valued using Level 1, prices actively quoted for proposed or executed transactions or quoted by brokers.

#### Note 4 - Pension and Other Postretirement Benefit Plans

The following table provides the components of net periodic benefit cost for pension and other benefit plans for the three months ended March 31:

	Pension	n Benefits		tretirement <u>efits</u>
(in millions)	<u>2008</u>	<u>2007</u>	<u>2008</u>	2007
Service cost	\$ 1	\$ 2	\$ -	\$ 1
Interest cost	5	6	1	1
Expected return on plan assets	(5)	(7)	-	-
Amortization of actuarial loss	<u> </u>	1	***	
Benefit cost year-to-date	<u>\$1</u>	<u>\$ 2</u>	<u>\$1</u>	<u>\$_2</u>

Net periodic benefit costs incurred by employees of KU are reflected in both utility plant on the balance sheet and in operating expense on the income statement. The above costs do not include allocations of net periodic benefit costs from affiliates whose employees provide services to KU.

The pension plans are funded in accordance with all applicable requirements of the Employee Retirement Income Security Act of 1974 and the Internal Revenue Code. In March 2008, KU made contributions to other postretirement benefit plans of approximately \$1 million. KU anticipates making further voluntary contributions in 2008 to fund the Voluntary Employee Beneficiary Association trusts to match the annual postretirement expense and funding the postretirement medical account under the pension plan up to the maximum amount allowed by law.

#### Note 5 - Income Taxes

A United States consolidated income tax return is filed by E.ON U.S.'s direct parent, EUSIC, for each tax period. Each subsidiary of the consolidated tax group, including KU, will calculate its separate income tax for the tax period. The resulting separate-return tax cost or benefit will be paid to or received from the parent company or its designee. KU also files income tax returns in various state jurisdictions. With few exceptions, KU is no longer subject to U.S. federal income tax examinations for years before 2004. Statutes of limitations related to 2004 and later returns are still open. Tax years 2005, 2006 and 2007 are under audit by the IRS with the 2007 return being examined under an IRS pilot program named "Compliance Assurance Process". This program accelerates the IRS's review to the actual calendar year applicable to the return and ends 90 days after the return is filed.

KU adopted the provisions of FIN 48, Accounting for Uncertainty in Income Taxes, an Interpretation of SFAS No. 109, effective January 1, 2007. At the date of adoption, KU had less than \$1 million of unrecognized tax benefits, primarily related to federal income taxes. If recognized, the less than \$1 million of unrecognized tax benefits would reduce the effective income tax rate.

Possible amounts of uncertain tax positions for KU that may decrease within the next 12 months total less than \$1 million, and are based on the expiration of statutes during 2008.

KU, upon adoption of FIN 48, adopted a new financial statement classification for interest and penalties. Prior to the adoption of FIN 48, KU recorded interest and penalties for income taxes on the income statement in income tax expense and in the taxes accrued balance sheet account, net of tax. Upon adoption of FIN 48, interest is recorded as interest expense and penalties are recorded as operating expenses on the income statement and accrued expenses in the balance sheets, on a pre-tax basis. The interest accrued is based on IRS and Kentucky Department of Revenue large corporate interest rates for underpayment of taxes.

The amount KU recognized as interest accrued related to unrecognized tax benefits in interest expense in operating expenses was less than \$1 million at March 31, 2008 and March 31, 2007. At the date of adoption, KU accrued less than \$1 million in interest expense on uncertain tax positions. No penalties were accrued by KU upon adoption of FIN 48, or through March 31, 2008.

In June 2006, KU and LG&E filed a joint application with the U.S. Department of Energy ("DOE") requesting certification to be eligible for investment tax credits applicable to the construction of TC2. In November 2006, the DOE and the IRS announced that KU and LG&E were selected to receive the tax credit. A final IRS certification required to obtain the investment tax credit was received in August 2007. In September 2007, KU received an Order from the Kentucky Commission approving the accounting of the investment tax credit. KU's portion of the TC2 tax credit will be approximately \$100 million over the

construction period and will be amortized to income over the life of the related property beginning when the facility is placed in service. Based on eligible construction expenditures incurred, KU recorded investment tax credits of \$3 million and \$10 million during the three months ended March 31, 2008 and March 31, 2007, respectively, decreasing current federal income taxes.

In March 2008, certain groups filed suit in federal court in North Carolina against the DOE and IRS claiming the investment tax credit program was violative of certain environmental laws and demanded relief, including suspension or termination of the program. KU is monitoring, but is not currently a party to, this proceeding and is not able to predict the ultimate outcome of this matter.

#### Note 6 - Short-Term and Long-Term Debt

KU's long-term debt includes \$33 million classified as current liabilities because these bonds are subject to tender for purchase at the option of the holder and to mandatory tender for purchase upon the occurrence of certain events. These bonds include Carroll County Series 2002 A and B, Muhlenberg County Series 2002 A and Mercer County Series 2002 A. These bonds mature in 2032. KU does not expect to pay these amounts in 2008. The average annualized interest rate for these bonds during the three months ended March 31, 2008, was 2.30%.

During June 2007, KU entered into a short-term bilateral line of credit facility totaling \$35 million. There was no outstanding balance under this facility at March 31, 2008. During the third quarter of 2007, KU extended the maturity date of this facility through June 2012.

Pollution control series bonds are obligations of KU issued in connection with tax-exempt pollution control revenue bonds issued by various governmental entities, principally counties in Kentucky. A loan agreement obligates KU to make debt service payments to the county that equate to the debt service due from the county on the related pollution control revenue bonds. Until a series of financing transactions was completed during February 2007, the county's debt was also secured by an equal amount of KU's first mortgage bonds that were pledged to the trustee for the pollution control revenue bonds that match the terms and conditions of the county's debt, but require no payment of principal and interest unless KU defaults on the loan agreement. Proceeds from bond issuances for environmental equipment (primarily related to the installation of FGDs) are held in trust pending expenditure for qualifying assets. At March 31, 2008 and December 31, 2007, KU had \$6 million and \$11 million, respectively, of bond proceeds in trust, included in restricted cash in the balance sheets.

Several of the KU pollution control bonds are insured by monoline bond insurers whose ratings have been under pressure due to exposures relating to insurance of sub-prime mortgages. At March 31, 2008, KU had an aggregate \$333 million of outstanding pollution control indebtedness, of which \$300 million is in the form of insured auction rate securities wherein interest rates are reset either weekly or every 35 days via an auction process. Beginning in late 2007, the interest rates on these insured bonds began to increase due to investor concerns about the creditworthiness of the bond insurers. In 2008, interest rates have continued to increase, and the Company has experienced "failed auctions" when there are insufficient bids for the bonds. When there is a failed auction, the interest rate is set pursuant to a formula stipulated in the indenture, which can be as high as 15%. During the three months ended March 31, 2008 and March 31, 2007, the average rate on the auction rate bonds was 4.82% and 3.66%, respectively. The instruments governing these auction rate bonds permit KU to convert the bonds to other interest rate modes, such as various short-term variable rates, long-term fixed rates or intermediate-term fixed rates that are reset infrequently. In the first quarter of 2008, the ratings of the Carroll County 2004 Series A bonds were downgraded from AAA to AA and subsequently to A and then to BBB+ by S&P and from Aaa to A2 by Moody's, and the Carroll County 2006 Series C bonds were downgraded from Aaa to A2 by Moody's and

from AAA to A- by S&P due to downgrades of the bond insurer. In February 2008, KU issued a notice to bondholders of its intention to convert the Carroll County 2007 Series A bonds and the Trimble County 2007 Series A bonds from the auction rate mode to a fixed interest rate mode, as permitted under the loan documents. The conversion was completed in April 2008, and the new rates on the bonds are 5.75% and 6.00%, respectively. In March 2008, KU issued notices to bondholders of its intention to convert the Carroll County 2006 Series C bonds and the Mercer County 2000 Series A bonds from the auction rate mode to a weekly interest rate mode, as permitted under the loan documents. The Carroll County conversion was completed in April 2008, and the Mercer County conversion was completed in May 2008. In connection with these conversions, KU purchased the bonds from the remarketing agent. KU will hold some or all of such bonds until a later date, at which time KU may refinance or further convert such bonds. Uncertainty in markets relating to auction rate securities or steps KU has taken or may take to mitigate such uncertainty, such as additional conversion, subsequent restructuring or redemption and refinancing, could result in KU incurring increased interest expense, transaction expenses or other costs and fees or experiencing reduced liquidity relating to existing or future pollution control financing structures. See Note 9, Subsequent Events.

KU participates in an intercompany money pool agreement wherein E.ON U.S. and/or LG&E make funds available to KU at market-based rates (based on highly rated commercial paper issues) of up to \$400 million. Details of the balances were as follows:

	Total Money	Amount	Balance	Average
(\$ in millions)	Pool Available	<b>Outstanding</b>	<u>Available</u>	Interest Rate
March 31, 2008	\$400	\$ 50	\$350	3.08%
December 31, 2007	\$400	\$ 23	\$377	4.75%

E.ON U.S. maintains a revolving credit facility totaling \$311 million at March 31, 2008 and \$150 million at December 31, 2007, with an affiliated company, E.ON North America, Inc., to ensure funding availability for the money pool. The balance is as follows:

		Amount	Balance	Average
(\$ in millions)	Total Available	Outstanding	<u>Available</u>	Interest Rate
March 31, 2008	\$311	\$94	\$217	3.36%
December 31, 2007	\$150	\$62	\$ 88	4.97%

There were no redemptions or issuances of long-term debt year-to-date through March 31, 2008.

#### Note 7 - Commitments and Contingencies

Except as may be discussed in this quarterly report (including Note 2), material changes have not occurred in the current status of various commitments or contingent liabilities from that discussed in KU's Annual Report for the year ended December 31, 2007 (including in Notes 2 and 9 to the financial statements of KU contained therein). See the above-referenced notes in KU's Annual Report regarding such commitments or contingencies.

Owensboro Contract Litigation. In May 2004, the City of Owensboro, Kentucky and OMU commenced a suit now removed to the U.S. District Court for the Western District of Kentucky, against KU concerning a long-term power supply contract (the "OMU Agreement") with KU. The dispute involves interpretational differences regarding issues under the OMU Agreement, including various payments or charges between KU and OMU and rights concerning excess power, termination and emissions allowances. The complaint seeks in excess of \$6 million in damages in connection with one of its claims

for periods prior to 2004, plus damages in an unspecified amount for later-occurring periods on that claim and for other claims. OMU has additionally requested injunctive and other relief, including a declaration that KU is in material breach of the contract. KU has filed an answer in this proceeding denying the OMU claims and presenting counterclaims and amended such filing in January 2007, to include further counterclaims alleging additional damages. During 2005, the FERC declined KU's application to exercise exclusive jurisdiction on matters. In July 2005, the district court resolved a summary judgment motion made by KU in OMU's favor, ruling that a contractual provision grants OMU the ability to terminate the contract without cause upon four years' prior notice, for which ruling KU retains certain rights to appeal. A motion to reconsider that ruling is presently pending before the Court. The parties are continuing various discovery proceedings, as well as settlement negotiations. A trial date has been set for October 2008. In May 2006, OMU issued a notification of its intent to terminate the OMU agreement contract in May 2010, without cause, absent any earlier relief which may be permitted by the proceeding. The Company is currently unable to determine the final outcome of this matter.

Construction Program. KU had approximately \$440 million of commitments in connection with its construction program at March 31, 2008.

In June 2006, KU and LG&E entered into a construction contract regarding the TC2 project. The contract is generally in the form of a lump-sum, turnkey agreement for the design, engineering, procurement, construction, commissioning, testing and delivery of the project, according to designated specifications, terms and conditions. The contract price and its components are subject to a number of potential adjustments which may serve to increase or decrease the ultimate construction price paid or payable to the contractor. The contract also contains standard representations, covenants, indemnities, termination and other provisions for arrangements of this type, including termination for convenience or for cause rights.

TC2 Air Permit. The Sierra Club and other environmental groups filed a petition challenging the air permit issued for the TC2 baseload generating unit which was issued by the Kentucky Division for Air Quality in November 2005. The filing of the challenge did not stay the permit, so the Company was free to proceed with construction during the pendancy of the action. In June 2007, the state hearing officer assigned to the matter recommended upholding the air permit with minor revisions. In September 2007, the Secretary of the Kentucky Environmental and Public Protection Cabinet issued a final Order approving the hearing officer's recommendation and upholding the permit. In September 2007, KU administratively applied for a permit revision to reflect minor design changes. In October 2007, the environmental groups submitted comments objecting to the draft permit revisions and, in part, attempting to reassert general objections to the generating unit. In January 2008, the Kentucky Division for Air Quality issued a final permit revision. The environmental groups did not appeal the final Order upholding the permit or file a petition challenging the permit revision by the applicable deadlines. However, in October 2007, the environmental groups filed a lawsuit in federal court seeking an order for the EPA to grant or deny their pending petition for the EPA to "veto" the state air permit. The Company is currently unable to determine the final outcome of this matter or the impact of an unfavorable determination upon the Company's financial condition or results of operations.

Environmental Matters. KU's operations are subject to a number of environmental laws and regulations in each of the jurisdictions in which it operates, governing, among other things, air emissions, wastewater discharges, the use, handling and disposal of hazardous substances and wastes, soil and groundwater contamination and employee health and safety.

Clean Air Act Requirements. The Clean Air Act establishes a comprehensive set of programs aimed at protecting and improving air quality in the United States by, among other things, controlling stationary sources of air emissions such as power plants. While the general regulatory framework for these programs

is established at the federal level, most of the programs are implemented and administered by the states under the oversight of the EPA. The key Clean Air Act programs relevant to KU's business operations are described below.

Ambient Air Quality. The Clean Air Act requires the EPA to periodically review the available scientific data for six criteria pollutants and establish concentration levels in the ambient air sufficient to protect the public health and welfare with an extra margin for safety. These concentration levels are known as NAAQS. Each state must identify "nonattainment areas" within its boundaries that fail to comply with the NAAQS and develop a SIP to bring such nonattainment areas into compliance. If a state fails to develop an adequate plan, the EPA must develop and implement a plan. As the EPA increases the stringency of the NAAQS through its periodic reviews, the attainment status of various areas may change, thereby triggering additional emission reduction obligations under revised SIPs aimed to achieve attainment.

In 1997, the EPA established new NAAQS for ozone and fine particulates that required additional reductions in SO₂ and NOx emissions from power plants. In 1998, the EPA issued its final "NOx SIP Call" rule requiring reductions in NOx emissions of approximately 85% from 1990 levels in order to mitigate ozone transport from the midwestern U.S. to the northeastern U.S. To implement the new federal requirements, Kentucky amended its SIP in 2002 to require electric generating units to reduce their NOx emissions to 0.15 pounds weight per MMBtu on a company-wide basis. In 2005, the EPA issued the CAIR which requires additional SO₂ emission reductions of 70% and NOx emission reductions of 65% from 2003 levels. The CAIR provides for a two-phase cap and trade program, with initial reductions of NOx and SO₂ emissions due by 2009 and 2010, respectively, and final reductions due by 2015. The final rule is currently under challenge. In 2006, Kentucky proposed to amend its SIP to adopt state requirements similar to those under the federal CAIR. Depending on the level of action determined necessary to bring local nonattainment areas into compliance with the new ozone and fine particulate standards, KU's power plants are potentially subject to additional reductions in SO₂ and NOx emissions. KU's weighted-average company-wide emission rate for SO₂ in the first quarter of 2008 was approximately 1.32 lbs./MMBtu of heat input, with every generating unit below its emission limit established by the Kentucky Division for Air Quality. In March 2008, the EPA issued a revised NAAQS for ozone, which contains a more stringent standard than that contained in the previous regulation. At present, LG&E is unable to determine what, if any, additional requirements may be imposed to achieve compliance with the new ozone standard.

Hazardous Air Pollutants As provided in the 1990 amendments to the Clean Air Act, the EPA investigated hazardous air pollutant emissions from electric utilities and submitted a report to Congress identifying mercury emissions from coal-fired power plants as warranting further study. In 2005, the EPA issued the CAMR establishing mercury standards for new power plants and requiring all states to issue new SIPs including mercury requirements for existing power plants. The EPA issued a model rule which provides for a two-phase cap and trade program with initial reductions due by 2010 and final reductions due by 2018. The CAMR provides for reductions of 70% from 2003 levels. The EPA closely integrated the CAMR and CAIR programs to ensure that the 2010 mercury reduction targets would be achieved as a "co-benefit" of the controls installed for purposes of compliance with the CAIR. In February 2008, a federal appellate court issued a decision vacating the CAMR, but the EPA and other parties have filed a motion for rehearing. Depending on the final outcome of the pending appeal, the CAMR could be superceded by new mercury reduction rules with different or more stringent requirements. In 2006, Kentucky proposed to amend its SIP to adopt state requirements similar to those under the federal CAMR, but those state requirements are likely to be revised to reflect the outcome of the challenge to the CAMR at the federal level.

Acid Rain Program The 1990 amendments to the Clean Air Act imposed a two-phased cap and trade program to reduce SO₂ emissions from power plants that were thought to contribute to "acid rain"

conditions in the northeastern U.S. The 1990 amendments also contained requirements for power plants to reduce NOx emissions through the use of available combustion controls.

Regional Haze. The Clean Air Act also includes visibility goals for certain federally designated areas, including national parks, and requires states to submit SIPs that will demonstrate reasonable progress toward preventing future impairment and remedying any existing impairment of visibility in those areas. In 2005, the EPA issued its CAVR detailing how the Clean Air Act's BART requirements will be applied to facilities, including power plants, built between 1962 and 1974 that emit certain levels of visibility impairing pollutants. Under the final rule, as the CAIR will result in more visibility improvement than BART, states are allowed to substitute CAIR requirements in their regional haze SIPs in lieu of controls that would otherwise be required by BART. The final rule has been challenged in the courts.

Installation of Pollution Controls. Many of the programs under the Clean Air Act utilize cap and trade mechanisms that require a company to hold sufficient emissions allowances to cover its authorized emissions on a company-wide basis and do not require installation of pollution controls on every generating unit. Under cap and trade programs, companies are free to focus their pollution control efforts on plants where such controls are particularly efficient and utilize the resulting emission allowances for smaller plants where such controls are not cost effective. KU met its Phase I SO₂ requirements primarily through installation of FGD equipment on Ghent Unit 1. KU's strategy for its Phase II SO₂ requirements, which commenced in 2000, includes the installation of additional FGD equipment, as well as using accumulated emission allowances and fuel switching to defer certain additional capital expenditures. In order to achieve the NOx emission reductions and associated obligations, KU installed additional NOx controls, including SCR technology, during the 2000 to 2007 time period at a cost of \$220 million. In 2001, the Kentucky Commission granted approval to recover the costs incurred by KU for these projects through the environmental surcharge mechanism. Such monthly recovery is subject to periodic review by the Kentucky Commission.

In order to achieve the emissions reductions mandated by the CAIR, KU expects to incur additional capital expenditures totaling approximately \$675 million during the 2008 through 2010 time period for pollution controls, including FGD and SCR equipment, and additional operating and maintenance costs in operating such controls. In 2005, the Kentucky Commission granted approval to recover the costs incurred by KU for these projects through the ECR mechanism. Such monthly recovery is subject to periodic review by the Kentucky Commission. KU believes its costs in reducing SO₂, NOx and mercury emissions to be comparable to those of similarly situated utilities with like generation assets. KU's compliance plans are subject to many factors including developments in the emission allowance and fuels markets, future legislative and regulatory enactments, legal proceedings and advances in clean air technology. KU will continue to monitor these developments to ensure that its environmental obligations are met in the most efficient and cost-effective manner.

Potential GHG Controls. In 2005, the Kyoto Protocol for reducing GHG emissions took effect, obligating 37 industrialized countries to undertake substantial reductions in GHG emissions. The U.S. has not ratified the Kyoto Protocol and there are currently no mandatory GHG emission reduction requirements at the federal level. Legislation mandating GHG reductions has been introduced in the Congress, but no federal legislation has been enacted to date. In the absence of a program at the federal level, various states have adopted their own GHG emission reduction programs. Such programs have been adopted in various states including 11 northeastern U.S. states and the District of Columbia under the Regional GHG Initiative program and California. Substantial efforts to pass federal GHG legislation are ongoing. In April 2007, the U.S. Supreme Court ruled that the EPA has the authority to regulate GHG under the Clean Air Act. KU is monitoring ongoing efforts to enact GHG reduction requirements at the state and federal level and is assessing potential impacts of such programs and strategies to mitigate those impacts. KU is unable to

predict whether mandatory GHG reduction requirements will ultimately be enacted. As a Company with significant coal-fired generating assets, KU could be substantially impacted by programs requiring mandatory reductions in GHG emissions, although the precise impact on the operations of KU, including the reduction targets and deadlines that would be applicable, cannot be determined prior to the enactment of such programs.

Brown New Source Review Litigation In April 2006, the EPA issued an NOV alleging that KU had violated certain provisions of the Clean Air Act's new source review rules relating to work performed in 1997, on a boiler and turbine at KU's E.W. Brown generating station. In December 2006, the EPA issued a second NOV alleging the Company had exceeded heat input values in violation of the air permit for the unit. In March 2007, the U.S. Department of Justice filed a complaint in federal court in Kentucky alleging the same violations specified in the prior NOVs. The complaint seeks civil penalties, including potential per-day fines, remedial measures and injunctive relief. In April 2007, KU filed an answer in the civil suit denying the allegations. In July 2007, the court entered a schedule providing for a July 2009 date for trial. The parties are currently proceeding with discovery while concurrently discussing settlement. A \$2 million accrual has been recorded based on the current status of those discussions, however, KU cannot determine the overall outcome or potential effects of these matters, including whether substantial fines, penalties or remedial measures may result.

Section 114 Requests In August 2007, the EPA issued administrative information requests under Section 114 of the Clean Air Act requesting new source review-related data regarding certain projects undertaken at LG&E's Mill Creek 4 and Trimble County 1 generating units and KU's Ghent 2 generating unit. The Companies have complied with the information requests and are not able to predict further proceedings in this matter at this time.

Ghent Opacity NOV. In September 2007, the EPA issued an NOV alleging that KU had violated certain provisions of the Clean Air Act's operating rules relating to opacity during June and July of 2007 at Units 1 and 3 of KU's Ghent generating station. The parties have conducted an initial meeting on this matter. KU is not able to estimate the outcome or potential effects of these matters, including whether substantial fines, penalties or remedial measures may result.

General Environmental Proceedings. From time to time, KU appears before the EPA, various state or local regulatory agencies and state and federal courts regarding matters involving compliance with applicable environmental laws and regulations. Such matters include liability under the Comprehensive Environmental Response, Compensation and Liability Act for cleanup at various off-site waste sites and ongoing claims regarding GHG emissions from KU's generating stations. Based on analysis to date, the resolution of these matters is not expected to have a material impact on the operations of KU.

#### Note 8 - Related Party Transactions

KU, subsidiaries of E.ON U.S. and subsidiaries of E.ON engage in related party transactions. Transactions between KU and E.ON U.S. subsidiaries are eliminated upon consolidation of E.ON U.S. Transactions between KU and E.ON subsidiaries are eliminated upon consolidation of E.ON. These transactions are generally performed at cost and are in accordance with the FERC regulations under PUHCA 2005 and the applicable Kentucky Commission and Virginia Commission regulations. The significant related party transactions are disclosed below.

#### Electric Purchases

KU and LG&E purchase energy from each other in order to effectively manage the load of their retail and wholesale customers. These sales and purchases are included in the statements of income as operating revenues and purchased power operating expense. KU intercompany electric revenues and purchased power expense for the three months ended March 31, were as follows:

(in millions)	<u>2008</u>	<u> 2007</u>
Electric operating revenues from LG&E	\$14	\$18
Purchased power from LG&E	27	30

#### Interest Charges

See Note 6, Short-Term and Long-Term Debt, for details of intercompany borrowing arrangements. Intercompany agreements do not require interest payments for receivables related to services provided when settled within 30 days.

KU's intercompany interest expense for the three months ended March 31, was as follows:

(in millions)	<u>2008</u>	<u> 2007</u>
Interest on money pool loans	\$ -	\$ 1
Interest on Fidelia loans	13	7

#### Other Intercompany Billings

E.ON U.S. Services provides KU with a variety of centralized administrative, management and support services. These charges include payroll taxes paid by E.ON U.S. on behalf of KU, labor and burdens of E.ON U.S. Services employees performing services for KU and vouchers paid by E.ON U.S. Services on behalf of KU. The cost of these services is directly charged to KU, or for general costs which cannot be directly attributed, charged based on predetermined allocation factors, including the following ratios: number of customers, total assets, revenues, number of employees and other statistical information. These costs are charged on an actual cost basis.

In addition, KU and LG&E provide services to each other and to E.ON U.S. Services. Billings between KU and LG&E relate to labor and overheads associated with union employees performing work for the other utility, charges related to jointly-owned combustion turbines and other miscellaneous charges. Billings from KU to E.ON U.S. Services relate to cash received by E.ON U.S. Services on behalf of KU, primarily tax settlements, and other payments made by KU on behalf of other non-regulated businesses which are paid through E.ON U.S. Services.

Intercompany billings to and from KU for the three months ended March 31, were as follows:

(in millions)	<u> 2008</u>	<u>2007</u>
E.ON U.S. Services billings to KU	\$39	\$170
KU billings to LG&E	23	14
LG&E billings to KU	1	10
KU billings to E.ON U.S. Services	1	2

#### Note 9 - Subsequent Events

On April 16, 2008, the Carroll County 2006 Series C bonds converted from an auction rate mode to a weekly interest rate mode. In connection with the conversion, KU purchased the bonds from the remarketing agent.

On May 1, 2008, the Mercer County 2000 Series A bonds converted from an auction rate mode to a weekly interest rate mode. In connection with the conversion, KU purchased the bonds from the remarketing agent.

#### Management's Discussion and Analysis of Financial Condition and Results of Operations

#### General

The following discussion and analysis by management focuses on those factors that had a material effect on KU's financial results of operations and financial condition during the three month period ended March 31, 2008, and should be read in connection with the financial statements and notes thereto.

Some of the following discussion may contain forward-looking statements that are subject to certain risks, uncertainties and assumptions. Such forward-looking statements are intended to be identified in this document by the words "anticipate," "expect," "estimate," "objective," "possible," "potential" and similar expressions. Actual results may vary materially. Factors that could cause actual results to differ materially include: general economic conditions; business and competitive conditions in the energy industry; changes in federal or state legislation; unusual weather; actions by state or federal regulatory agencies; and other factors described from time to time in the Company's reports, including the Annual Report for the year ended December 31, 2007.

#### **Executive Summary**

#### Business

KU, incorporated in Kentucky in 1912 and in Virginia in 1991, is a regulated public utility engaged in the generation, transmission, distribution and sale of electric energy in Kentucky, Virginia and Tennessee. As of December 31, 2007, KU provided electricity to approximately 506,000 customers in 77 counties in central, southeastern and western Kentucky, to approximately 30,000 customers in 5 counties in southwestern Virginia and 5 customers in Tennessee. KU's service area covers approximately 6,600 square miles. KU's coal-fired electric generating plants produce most of KU's electricity. The remainder is generated by a hydroelectric power plant and natural gas and oil fueled combustion turbines. In Virginia, KU operates under the name Old Dominion Power Company. KU also sells wholesale electric energy to 12 municipalities.

KU is a wholly-owned subsidiary of E.ON U.S., an indirect wholly-owned subsidiary of E.ON, a German corporation, making KU an indirect wholly-owned subsidiary of E.ON. KU's affiliate, LG&E, is a regulated public utility engaged in the generation, transmission, distribution and sale of electric energy and the distribution of natural gas in Kentucky.

#### Environmental Matters

Protection of the environment is a major priority for KU. Federal, state and local regulatory agencies have issued KU permits for various activities subject to air quality, water quality and waste management laws and regulations. See Note 7 of Notes to Financial Statements for more information.

#### Results of Operations

The electric utility business is affected by seasonal temperatures. As a result, operating revenues (and associated operating expenses) are not generated evenly throughout the year.

#### Net Income

Net income for the three months ended March 31, 2008, increased \$1 million compared to the same period in 2007. The increase was primarily the result of increased electric revenues (\$36 million), increased other income (\$3 million) and decreased income taxes (\$2 million), partially offset by increased operating expenses (\$36 million) and increased interest expense, including interest expense to affiliated companies (\$4 million).

#### Revenues

Revenues in the three months ended March 31, 2008, increased \$36 million primarily due to:

- Increased fuel costs (\$17 million) billed to customers through the FAC due to higher fuel costs (coal and natural gas) and higher transportation costs
- Increased ECR surcharge (\$14 million) due to increased recoverable capital spending
- Increased sales volumes delivered (\$8 million) resulting from an 8% increase in heating degree days in the first quarter of 2008 as compared to the same period in 2007
- Decreased wholesale and transmission revenues (\$3 million) due to decreased power available for wholesale sales as a result of higher native load demand and lower transmission rates

#### Expenses

Fuel for electric generation comprises a large component of total operating expenses. Increases or decreases in the cost of fuel are reflected in retail rates through the FAC, subject to the approval of the Kentucky Commission, the Virginia Commission and the FERC.

Fuel for electric generation increased \$14 million in the three months ended March 31, 2008, primarily due to:

- Increased generation to meet sales (\$9 million), due to 8% more heating degree days
- Increased spot market pricing for coal/natural gas generation (\$5 million) due to mine safety compliance costs and higher transportation costs

Purchased power expense increased \$11 million in the three months ended March 31, 2008, primarily due to:

- Increased cost per mWh of purchases (\$17 million) due to increased third party purchases and higher fuel prices
- Decreased volumes purchased (\$6 million) due to increased internal generation as a result of higher native load demand

Other operation and maintenance expenses increased \$7 million in the three months ended March 31, 2008, primarily due to increased other operation expenses (\$4 million) and increased maintenance expenses (\$3 million).

Other operation expenses increased \$4 million in the three months ended March 31, 2008, primarily due to:

- Increased generation, transmission and distribution expenses, including labor for storm restoration (\$2 million)
- Increased outside services (\$1 million)
- Increased expense for uncollectible accounts (\$1 million)

Maintenance expenses increased \$3 million in the three months ended March 31, 2008, primarily due to increased contractor and overtime labor expense for storm restoration

Interest expense, including interest expense to affiliated companies, increased \$4 million in the three months ended March 31, 2008, primarily due to:

- Increased interest expense to affiliated companies (\$5 million) due to increased affiliate borrowings
- Decreased interest expense (\$1 million) due to the refinancing of First Mortgage bonds with loans from Fidelia and defeasance of pollution control bonds (\$2 million), partially offset by higher interest rates on auction rate pollution control bonds (\$1 million)

	Three Months	Three Months
	Ended	Ended
	March 31, 2008	March 31, 2007
Effective Rate		
Statutory federal income tax rate	35.0%	35.0%
State income taxes net of federal benefit	3.1	3.7
Amortization of investment tax credits	(0.1)	(0.1)
EEI Dividend	(3.5)	(2.5)
Other differences	<u>(2.1)</u>	<u>(1.3)</u>
Effective income tax rate	<u>32.4</u> %	<u>34.8</u> %

The effective income tax rate decreased for the three months ended March 31, 2008 compared to the three months ended March 31, 2007, due primarily to an increase in dividends received from EEI, a decrease in Other Differences due to an increase in Section 199, Manufacturing deduction and a decrease in state income taxes net of federal benefit due to an increase in state coal credits.

#### Liquidity and Capital Resources

KU uses net cash generated from its operations and external financing (including financing from affiliates) to fund construction of plant and equipment and the payment of dividends. KU believes that such sources of funds will be sufficient to meet the needs of its business in the foreseeable future.

#### Operating Activities

Cash provided by operations was \$127 million and \$113 million for the three months ended March 31, 2008 and 2007, respectively.

The 2008 increase of \$14 million was primarily the result of increases in cash due to changes in:

- FAC receivable, net (\$17 million)
- Pension and postretirement funding (\$14 million) due to higher pension funding in 2007
- Accrued income taxes (\$12 million)
- Prepayments and other current assets (\$1 million)

These increases were partially offset by cash provided by changes in:

- Accounts payable (\$8 million)
- Accounts receivable (\$7 million)
- Other current liabilities (\$6 million)
- Materials and supplies (\$5 million)
- Earnings, net of non-cash items (\$3 million)
- Other (\$1 million)

#### Investing Activities

The primary use of funds for investing activities continues to be for capital expenditures. Capital expenditures were \$184 million and \$125 million in the three months ended March 31, 2008 and 2007, respectively. Net cash used for investing activities increased \$56 million in the three months ended March 31, 2008, compared to 2007 primarily due to increased capital expenditures of \$59 million. Restricted cash increased \$3 million and represents the escrowed proceeds of the Pollution Control Bonds issued which are disbursed as qualifying costs are incurred.

#### Financing Activities

Net cash inflows from financing activities were \$52 million and \$10 million in the three months ended March 31, 2008 and 2007, respectively.

See Note 6 of Notes to Financial Statements for information of redemptions, maturities and issuances of long-term debt.

#### Future Capital Requirements

KU expects its capital expenditures for the three year period ending December 31, 2010, to total approximately \$1,465 million, consisting primarily of construction estimates for installation of FGDs on Ghent and Brown units totaling approximately \$425 million, construction of TC2 totaling approximately \$360 million, the Brown ash pond totaling approximately \$40 million, a customer care system totaling approximately \$25 million and on-going construction related to generation and distribution assets.

Future capital requirements may be affected in varying degrees by factors such as electric energy demand load growth, changes in construction expenditure levels, rate actions by regulatory agencies, new legislation, market entry of competing electric power generators, changes in commodity prices and labor rates, changes in environmental regulations and other regulatory requirements. KU anticipates funding future capital requirements through operating cash flow, debt and/or infusions of capital from its parent.

KU has a variety of funding alternatives available to meet its capital requirements. KU participates in an intercompany money pool agreement wherein E.ON U.S. and/or LG&E make funds of up to \$400 million available to KU at market-based rates. Fidelia also provides long-term intercompany funding to KU. See Note 6 of Notes to Financial Statements.

KU's construction program is designed to ensure that there will be adequate capacity and reliability to meet the electric needs of its service area and to comply with environmental regulations. These needs are continually being reassessed and appropriate revisions are made, when necessary, in construction schedules. Future capital requirements may be affected in varying degrees by factors such as electric energy demand load growth, changes in construction expenditure levels, rate actions by regulatory agencies, new legislation, market entry of competing electric power generators, changes in commodity prices and labor rates, changes in environmental regulations and other regulatory requirements. See Note 7 of Notes to Financial Statements for current commitments. KU anticipates funding future capital requirements through operating cash flow, debt and/or infusions of capital from its parent.

Regulatory approvals are required for KU to incur additional debt. The Virginia Commission and the FERC authorize the issuance of short-term debt while the Kentucky Commission, the Virginia Commission and the Tennessee Regulatory Authority authorize the issuance of long-term debt. In

November 2007, KU received a two-year authorization from the FERC to borrow up to \$400 million in short-term funds. KU also has authorization from the Virginia Commission that expires at the end of 2009 allowing short-term borrowing of up to \$400 million.

KU's debt ratings as of March 31, 2008, were:

	<u>Moody's</u>	<u>S&amp;P</u>
Issuer rating	A2	
Corporate credit rating	***	BBB+

These ratings reflect the views of Moody's and S&P. A security rating is not a recommendation to buy, sell or hold securities and is subject to revision or withdrawal at any time by the rating agency. See Note 6 of Notes to Financial Statements for a discussion of recent downgrade actions related to the pollution control revenue bonds.

#### Controls and Procedures

The Company is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The Company has assessed the effectiveness of its internal control over financial reporting as of December 31, 2007. In making this assessment, the Company used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in Internal Control - Integrated Framework. The Company has concluded that, as of December 31, 2007, the Company's internal control over financial reporting was effective based on those criteria. There has been no change in the Company's internal control over financial reporting that occurred during the quarter ended March 31, 2008, that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

KU is no longer subject to the internal control and other requirements of the Sarbanes-Oxley Act of 2002 and associated rules (the "Act") and consequently has not issued Management's Report on Internal Controls over Financial Reporting pursuant to Section 404 of the Act.

#### **Legal Proceedings**

For a description of the significant legal proceedings involving KU, reference is made to the information under the following captions of KU's Annual Report for the year ended December 31, 2007: Business, Risk Factors, Legal Proceedings, Management's Discussion and Analysis, Financial Statements and Notes to Financial Statements. Reference is also made to the matters described in Notes 2 and 7 of this quarterly report. Except as described in this quarterly report, to date, the proceedings reported in KU's Annual Report have not materially changed.

#### Other

In the normal course of business, other lawsuits, claims, environmental actions and other governmental proceedings arise against KU. To the extent that damages are assessed in any of these lawsuits, KU believes that its insurance coverage is adequate. Management, after consultation with legal counsel, does not anticipate that liabilities arising out of other currently pending or threatened lawsuits and claims will have a material adverse effect on KU's financial position or results of operations.

#### **Kentucky Utilities Company**

Notes to Financial Statements (Unaudited)

#### Note 1 - General

The unaudited financial statements include the accounts of the Company. KU's common stock is wholly-owned by E.ON U.S., an indirect wholly-owned subsidiary of E.ON. In the opinion of management, the unaudited interim financial statements include all adjustments, consisting only of normal recurring adjustments, necessary for a fair statement of financial position, results of operations, retained earnings and cash flows for the periods indicated. Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted, although the Company believes that the disclosures are adequate to make the information presented not misleading. These unaudited financial statements and notes should be read in conjunction with the Company's annual report for the year ended December 31, 2006, including management's discussion and analysis and the audited financial statements and notes therein.

Certain reclassification entries have been made to the previous year's financial statements to conform to the 2007 presentation with no impact on net assets, liabilities and capitalization or previously reported net income and cash flows.

#### RECENT ACCOUNTING PRONOUNCEMENTS

In July 2006, the FASB issued FIN 48, Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109, Accounting for Income Taxes. FIN 48 clarifies accounting for income taxes to provide improved consistency of criteria used to recognize, derecognize and measure benefits related to income taxes. KU adopted the provisions of FIN 48 effective January 1, 2007. See Note 5, Income Taxes.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities – Including an Amendment of FASB Statement No. 115. SFAS No. 159 permits entities to choose to measure many financial instruments and certain other assets and liabilities at fair value on an instrument-by-instrument basis (the fair value option). Unrealized gains and losses on items for which the fair value option has been elected are to be recognized in earnings at each subsequent reporting date. SFAS No. 159 is effective for fiscal years beginning after November 15, 2007. KU will adopt SFAS No. 159 effective January 1, 2008, and expects no impact on its financial statements upon adoption.

#### Note 2 - Rates and Regulatory Matters

For a description of each line item of regulatory assets and liabilities, reference is made to KU's Annual Report, Note 2 of the financial statements, for the year ended December 31, 2006.

The following regulatory assets and liabilities were included in KU's Balance Sheets:

# Kentucky Utilities Company (unaudited)

(in millions)	September 30, <u>2007</u>	December 31, <u>2006</u>			
FAC	\$ 38	\$ 16			
ARO	24	22			
MISO exit	20	20			
ECR	11	10			
Unamortized loss on bonds	10	10			
Other	8	<u>5</u>			
Subtotal	111	83			
Pension and postretirement benefits	66	64			
Total regulatory assets	<u>\$ 177</u>	<u>\$ 147</u>			
Accumulated cost of removal of utility plant	\$304	\$ 297			
Deferred income taxes – net	29	27			
Other	10	<u>6</u>			
Total regulatory liabilities	<u>\$ 343</u>	<u>\$330</u>			

KU does not currently earn a rate of return on the FAC regulatory asset, which is a separate recovery mechanism with recovery within twelve months. No return is earned on the pension and postretirement benefits regulatory asset which represents the changes in funded status of the plans. The Company will seek recovery of this asset in future proceedings with the Kentucky and Virginia Commissions. No return is currently earned on the ARO asset. This regulatory asset will be offset against the associated regulatory liability, ARO asset and ARO liability at the time the underlying asset is retired. The MISO exit amount represents the costs relating to the withdrawal from MISO membership. KU expects to seek recovery of this asset in future proceedings with the Kentucky and Virginia Commissions. KU currently earns a rate of return on the remaining regulatory assets.

FAC. In December 2006, the Kentucky Commission initiated its periodic two-year review of KU's past operations of the fuel clause and transfer of fuel costs from the FAC to base rates. In March 2007, intervenors representing industrial customers challenged KU's recovery of \$5.1 million in aggregate fuel costs KU incurred during a period prior to its exit from the MISO and requested the Kentucky Commission disallow this amount. A public hearing was held in May 2007. Final briefs were filed by the Company and the intervenors in June 2007. In October 2007, the Kentucky Commission issued its Order in this proceeding. The Kentucky Commission findings were that KU incurred no improper fuel cost during the two-year review period and that KU was in compliance with the provisions of Administrative Regulation 807 KAR 5:5056. The Kentucky Commission further approved KU's recommendation for the transfer of fuel cost from the FAC to base rates. In November 2007, the KIUC filed a petition for rehearing, claiming the Kentucky Commission misinterpreted the KIUC's arguments in the proceeding. The Company expects a ruling from the Kentucky Commission by the end of November 2007.

KU also employs an FAC mechanism for Virginia customers using an average fuel cost factor based primarily on projected fuel costs. The factor may be adjusted annually for over- or under- collections of fuel costs from the prior year. In February 2007, KU filed an application with the Virginia Commission seeking approval of an increase of approximately \$4 million in its fuel cost factor to reflect higher fuel costs incurred and under collection during 2006, and anticipated higher fuel costs to be incurred in 2007. The Virginia Commission approved KU's request in April 2007.

ECR. Kentucky law permits KU to recover the costs of complying with the Clean Air Act, including a return of operating expenses, and a return of and on capital invested, through the ECR mechanism. The amount of the regulatory asset or liability is the amount that has been under- or over- recovered due to timing or adjustments to the mechanism once approved by the Kentucky Commission.

In September 2007, the Kentucky Commission initiated six-month and two-year reviews of KU's environmental surcharge. These proceedings are expected to be completed in the first quarter of 2008.

In April 2006, the Kentucky Commission initiated six-month and two-year reviews of KU's environmental surcharge. A final Order was received in January 2007, approving the charges and credits billed through the ECR during the review period as well as approving billing adjustments, a roll-in to base rates, revisions to the monthly surcharge filing and the rate of return on capital.

#### Other Regulatory Matters

Regional Reliability Council. KU has changed its regional reliability council membership from the Reliability First Corporation to the SERC Reliability Corporation, effective January 1, 2007. Regional reliability councils are industry consortiums that promote, coordinate and ensure the reliability of the bulk electric supply systems in North America.

Market-Based Rate Authority. KU has received permission to sell power at market-based rates at the interface of control areas in which they may be deemed to have market power, subject to a restriction that such power not be collusively re-sold back into such control areas. However, restrictions exist on sales by KU of power at market-based rates in the KU/LG&E and Big Rivers Electric Corporation control areas. In June 2007, the FERC issued Order No. 697 implementing certain reforms to market-based rate regulations, including restrictions similar to those previously in place for KU's power sales at control area interfaces. As a condition of receiving and retaining market-based rate authority, KU must comply with affiliate restrictions housed in FERC's Commissions regulation unless otherwise permitted by Commission rule or order.

Real-Time Pricing. In December 2006, the Kentucky Commission issued an administrative order indicating that the EPAct 2005 Section 1252, Smart Metering and Section 1254, Interconnection standards, should not be adopted. However, all five Kentucky Commission jurisdictional utilities are required to file real-time pricing pilot programs for their large commercial and industrial customers. KU has developed a real-time pricing pilot for large industrial and commercial customers and filed the details of the plan with the Kentucky Commission in April 2007.

Utility Re-regulation in Virginia. The Commonwealth of Virginia passed the Virginia Electric Utility Restructuring Act in 1999. This act gave Virginia customers the ability to choose their electric supplier. Rates are capped at current levels through December 2010. In April 2007, Virginia passed legislation terminating this competitive market and commencing re-regulation of utility rates in Virginia. The new act will end the cap on rates at the end of 2008, rather than through December 2010, and end customer

choice for most consumers in the applicable regions of the state. Thereafter, a hybrid model of regulation is expected to apply in Virginia, whereby utility rates would be reviewed every two years and a utility's rate of return on equity shall not be set lower than the average of the rates of return for other regional utilities, with certain caps, floors or adjustments. The legislation is effective in July 2007, and also includes a 10% nonbinding goal for renewable power generation by 2022, as well as incentives for new generation, including renewables. Under the legislation KU retains an existing exemption from customer choice and other restructuring activities as applicable to KU's limited service territory in Virginia. However, KU will be subject to a rate proceeding in the first six months of 2009 based on calendar year 2008 financial data under the hybrid model of regulation. Beginning in 2011, KU will make biennial rate filings with the Virginia Commission.

Ghent FGD Inquiry. In October 2006, the Kentucky Commission commenced an inquiry into elements of KU's planned construction of one of its three new FGDs at the Ghent generating station. The proceeding requested, and KU provided, additional information regarding configuration details, expenditures and the proposed construction sequence applicable to future construction phases of the Ghent FGD project. In January 2007, the Kentucky Commission issued an Order completing its inquiry in the matter and confirming its approval of KU's construction plan. The Order also provided general guidance for jurisdictional utilities regarding applicable information and data requirements for future CCN applications and subsequent proceedings.

#### Note 3 - Financial Instruments

Interest Rate Swaps (hedging derivatives). KU has used over-the-counter interest rate swaps to hedge exposure to market fluctuations in certain of its debt instruments. Pursuant to Company policy, use of these financial instruments is intended to mitigate risk, earnings and cash flow volatility and is not speculative in nature. Management has designated all of the interest rate swaps as hedge instruments. Financial instruments designated as fair value hedges and the underlying hedged items are periodically marked to market with the resulting net gains and losses recorded directly into net income. Upon termination of any fair value hedge, the resulting gain or loss is recorded into net income. Financial instruments designated as cash flow hedges have resulting gains and losses recorded within stockholders' equity.

KU was party to an interest rate swap agreement with a notional amount of \$53 million as of December 31, 2006. The interest rate swap was terminated in February 2007, when the underlying debt was defeased. Under this swap agreement, KU paid variable rates based on LIBOR averaging 7.44% and received fixed rates averaging 7.92% in 2007, prior to the termination of the swap. The swap agreement in effect at December 31, 2006, had been designated as a fair value hedge. The fair value designation was assigned because the underlying fixed rate debt had a firm future commitment. For the nine months ended September 30, 2006, the effect of marking these financial instruments and the underlying debt to market resulted in pre-tax gains of less than \$1 million recorded in interest expense. There was no activity related to the swap in the third quarter of 2007, due to its termination in February 2007.

Interest rate swaps hedge interest rate risk on the underlying debt. Under SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities, as amended, in addition to swaps being marked to market, the item being hedged must also be marked to market. Consequently for the year ended December 31, 2006, KU's debt reflects a mark-to-market adjustment of less than \$1 million.

Energy Trading and Risk Management Activities (non-hedging derivatives). KU conducts energy trading and risk management activities to maximize the value of power sales from physical assets it owns. Energy trading activities are principally forward financial transactions to hedge price risk and are accounted for on a mark-to-market basis in accordance with SFAS No. 133, as amended.

The table below summarizes KU's energy trading and risk management activities for the nine months ended September 30:

(in millions)	<u> 2007</u>	<u> 2006</u>
Fair value of contracts at beginning of period, net asset	\$ 1	\$ 1
Fair value of contracts when entered into during the period	***	2
Contracts realized or otherwise settled during the period	₩	(3)
Changes in fair values due to changes in assumptions	_(1)	5
Fair value of contracts at end of period, net asset	<u>\$ -</u>	<u>\$ 5</u>

No changes to valuation techniques for energy trading and risk management activities occurred during 2007 or 2006. Changes in market pricing, interest rate and volatility assumptions were made during both years. All contracts outstanding at September 30, 2007 and 2006, had a maturity of less than one year and were valued using prices actively quoted for proposed or executed transactions or quoted by brokers.

#### Note 4 - Pension and Other Postretirement Benefit Plans

The following table provides the components of net periodic benefit cost for pension and other postretirement benefit plans:

	Three Months Ended September 30,									Nine Months Ended September 30,							
	Other										•	Other					
	Pension Postretirement						Pension				Postretireme						
		Вет	efits	į		Ber	efits	į		Be	enefits Bene				<u>nefits</u>		
	4	2007	20	006	2	007	20	006	20	007		<u> 2006</u>	<u> 200</u>	07	200	6	
(in millions)																	
Service cost	\$	2	\$	1	\$	-	\$	-	\$	5	\$	4	\$	1	\$ 1		
Interest cost		4		5		]		2		14		12		3	4		
Expected return on plan assets	(5) (5)			-		(1)	(	17)	+	(14)	(	(1)	(1	)			
Amortization of prior service costs		-		~		-		1		1		1		-	1		
Amortization of actuarial loss		_		1			-	1			3		-	-			
Amortization of transitional obligation	_			~				<del></del>			-		1	1			
Benefit cost	\$	_1	<u>\$</u>	<u>2</u>	\$_	1	\$_	_2	\$	4	<u>\$</u>	_6	\$	4	<u>\$ 6</u>		

Net periodic benefit costs incurred by employees of KU are reflected in both utility plant on the balance sheet and in operating expense on the income statement. The above costs do not include allocations of net periodic benefit costs from affiliates whose employees provide services to KU.

The pension plans are funded in accordance with all applicable requirements of the Employee Retirement Income Security Act of 1974 and the Internal Revenue Code. In January 2007, KU made a discretionary contribution to the pension plan in the amount of \$13 million. After this payment, KU's pension plan assets are in excess of the December 31, 2006 accumulated benefit obligation. KU does not expect to make any further contributions to the pension plans in 2007. KU made contributions of approximately \$4 million to other postretirement benefit plans for the nine months ended September 30, 2007. KU

anticipates making further voluntary contributions in 2007 to fund the Voluntary Employee Beneficiary Association trusts to match the annual postretirement expense and funding the postretirement medical account under the pension plan up to the maximum amount allowed by law.

## Note 5 - Income Taxes

A United States consolidated income tax return is filed by E.ON U.S.'s direct parent, EUSIC, for each tax period. Each subsidiary of the consolidated tax group, including KU, will calculate its separate income tax for the tax period. The resulting separate-return tax cost or benefit will be paid to or received from the parent company or its designee. KU also files income tax returns in various state jurisdictions. With few exceptions, KU is no longer subject to U.S. federal, state or non-U.S. income tax examinations by tax authorities for years before 2004. Statutes of limitations related to the 2004 and later returns are still open. Tax years 2005, 2006 and 2007 are under audit by the IRS with the 2007 return being examined under an IRS pilot program named "Compliance Assurance Process". This program accelerates the IRS's review to the actual calendar year applicable to the return and ends 90 days after the return is filed.

KU adopted the provisions of FIN 48 effective January 1, 2007. At the date of adopting FIN 48, KU had \$2 million of unrecognized tax benefits, primarily related to federal income taxes. If recognized, the entire \$2 million of unrecognized tax benefits would reduce the effective tax rate.

Included in other liabilities at September 30, 2007, is less than \$1 million of tax positions for which the ultimate deductibility is highly certain but for which there is uncertainty about the timing of such deductibility. Furthermore, possible amounts of uncertain tax positions for KU that may decrease within the next 12 months total \$1 million. The estimated amount of the change in uncertain tax position is based on the expiration of statutes during 2007.

KU, upon adoption of FIN 48, adopted a new financial statement classification for interest and penalties. Prior to the adoption of FIN 48, KU recorded interest and penalties for income taxes on the income statement in income tax expense and in the taxes accrued balance sheet account, net of tax. Upon adoption of FIN 48, interest and penalties are recorded as operating expenses on the income statement and accrued expenses in the balance sheet, on a pre-tax basis. The interest accrued is based on federal and state large corporate underpayment interest rates.

The amount KU recognized as interest accrued related to unrecognized tax benefits in interest expense in operating expenses was less than \$1 million at both September 30, 2007 and December 31, 2006. No penalties were accrued by KU upon adoption of FIN 48 or through September 30, 2007.

In June 2006, KU and LG&E filed a joint application with the DOE requesting certification to be eligible for investment tax credits applicable to the construction of TC2. In November 2006, the DOE and the IRS announced that KU and LG&E were selected to receive the tax credit. An additional IRS certification required to obtain the investment tax credit was received in August 2007. KU's portion of the tax credit will be approximately \$101 million over the construction period of TC2 and will be amortized to income over the life of the related property. In the third quarter of 2007, based on eligible construction expenditures incurred in 2007, KU recorded \$10 million of federal investment tax credit. The credit recorded decreased current federal income taxes by \$10 million, during the three months ended September 30, 2007, and \$30 million for the nine months ended September 30, 2007.

## Note 6 - Short-Term and Long-Term Debt

All KU first mortgage bonds were released and terminated in February 2007. Only the tax-exempt pollution control revenue bonds issued by the counties remain. Under the provisions for certain of KU's variable-rate pollution control bonds, the bonds are subject to tender for purchase at the option of the holder and to mandatory tender for purchase upon the occurrence of certain events, causing the bonds to be classified as current portion of long-term debt in the balance sheets. The average annualized interest rate for these bonds during the nine months ended September 30, 2007 was 3.78%.

During June 2007, KU entered into a short-term bilateral line of credit facility totaling \$35 million. There was no outstanding balance under this facility at September 30, 2007. During the third quarter of 2007, KU extended the maturity date of this facility through June 2012.

Pollution control series bonds are obligations of KU issued in connection with tax-exempt pollution control revenue bonds issued by various governmental entities, principally counties in Kentucky. A loan agreement obligates KU to make debt service payments to the county that equate to the debt service due from the county on the related pollution control revenue bonds. Until a series of financing transactions completed during February 2007, the county's debt had also been secured by an equal amount of KU's first mortgage bonds that were pledged to the trustee for the pollution control revenue bonds, and that matched the terms and conditions of the county's debt, but required no payment of principal and interest unless KU defaulted on the loan agreement. In February 2007, all of KU's first mortgage bonds were released. Proceeds from bond issuances for environmental equipment (primarily related to the installation of FGDs) are held in trust pending expenditure for qualifying assets. At September 30, 2007, KU had approximately \$38 million of bond proceeds in trust, included in restricted cash in the balance sheet.

At December 31, 2006, KU had an interest rate swap used to hedge KU's underlying debt obligations. The swap hedged specific debt issuances and, consistent with management's designation, was accorded hedge accounting treatment. The swap effectively converted the fixed rate obligation on KU's first mortgage bond Series P to variable-rate. At December 31, 2006, the remaining swap had a notional value of \$53 million. The swap was terminated in February 2007, when the underlying bond was defeased. See Note 3, Financial Instruments.

KU participates in an intercompany money pool agreement wherein E.ON U.S. and/or LG&E make funds available to KU at market-based rates (based on highly rated commercial paper issues) of up to \$400 million. Details of the balances are as follows:

	Total Money	Amount	Balance	Average
(\$ in millions)	Pool Available	Outstanding	<u>Available</u>	Interest Rate
September 30, 2007	\$400	\$105	\$295	5.62%
December 31, 2006	\$400	\$ 97	\$303	5.25%

E.ON U.S. maintains a revolving credit facility totaling \$150 million and \$200 million at September 30, 2007 and December 31, 2006, respectively, with an affiliated company, E.ON North America, Inc., to ensure funding availability for the money pool. The balance is as follows:

		Amount	Balance	Average
(\$ in millions)	Total Available	Outstanding	<u>Available</u>	Interest Rate
September 30, 2007	\$150	\$122	\$28	5.45%
December 31, 2006	\$200	\$102	\$98	5.49%

Redemptions of long-term debt year-to-date through September 30, 2007, are summarized below:

		Principal			
	Deportuation	Amount		Secured/	
<u>Year</u>	<u>Description</u>	(in millions)	<u>Rate</u>	Unsecured	<u>Maturity</u>
2007	Pollution control bonds	\$54	Variable	Secured	2024
2007	First mortgage bonds	\$53	7.92%	Secured	2007

Issuances of long-term debt year-to-date through September 30, 2007, are summarized below:

		Principal			
		Amount		Secured/	
<u>Year</u>	<u>Description</u>	(in millions)	Rate	<u>Unsecured</u>	<u>Maturity</u>
2007	Pollution control bonds	\$ 54	Variable	Unsecured	2034
2007	Pollution control bonds	\$ 18	Variable	Unsecured	2026
2007	Pollution control bonds	\$ 9	Variable	Unsecured	2037
2007	Due to Fidelia	\$ 53	5.69%	Unsecured	2022
2007	Due to Fidelia	\$ 75	5.86%	Unsecured	2037
2007	Due to Fidelia	\$ 50	5.98%	Unsecured	2017
2007	Due to Fidelia	\$100	5.96%	Unsecured	2028

KU no longer has any secured debt and is no longer subject to periodic reporting under the Securities Exchange Act of 1934.

In October 2007, KU entered into a long-term borrowing arrangement with Fidelia in principal amount of \$70 million.

## Note 7 - Commitments and Contingencies

Except as may be discussed in this quarterly report (including Note 2), material changes have not occurred in the current status of various commitments or contingent liabilities from that discussed in KU's Annual Report for the year ended December 31, 2006 (including in Notes 2 and 9 to the financial statements of KU contained therein). See the above-referenced notes in KU's Annual Report regarding such commitments or contingencies.

Owensboro Contract Litigation. In May 2004, the City of Owensboro, Kentucky and OMU commenced a suit now removed to the U.S. District Court for the Western District of Kentucky, against KU concerning a long-term power supply contract (the "OMU Agreement") with KU. The dispute involves interpretational differences regarding issues under the OMU Agreement, including various payments or charges between KU and OMU and rights concerning excess power, termination and emissions

allowances. The complaint seeks in excess of \$6 million in damages in connection with one of its claims for periods prior to 2004, plus damages in an unspecified amount for later-occurring periods on that claim and for other claims. OMU has additionally requested injunctive and other relief, including a declaration that KU is in material breach of the contract. KU has filed an answer in that court denying the OMU claims and presenting counterclaims and amended such filing in January 2007, to include further counterclaims alleging additional damages. During 2005, the FERC declined KU's application to exercise exclusive jurisdiction on matters. In July 2005, the district court resolved a summary judgment motion made by KU in OMU's favor, ruling that a contractual provision grants OMU the ability to terminate the contract without cause upon four years' prior notice, for which ruling KU retains certain rights to appeal. A motion to reconsider that ruling is presently pending before the Court. The district court case otherwise remains in the discovery stage and currently a trial date of August 2008 has been scheduled. In May 2006, OMU issued a notification of its intent to terminate the OMU agreement contract in May 2010, without cause, absent any earlier relief which may be permitted by the proceeding.

**Construction Program.** KU had approximately \$427 million of commitments in connection with its construction program at September 30, 2007.

In June 2006, KU and LG&E entered into a construction contract regarding the TC2 project. The contract is generally in the form of a lump-sum, turnkey agreement for the design, engineering, procurement, construction, commissioning, testing and delivery of the project, according to designated specifications, terms and conditions. The contract price and its components are subject to a number of potential adjustments which may serve to increase or decrease the ultimate construction price paid or payable to the contractor. The contract also contains standard representations, covenants, indemnities, termination and other provisions for arrangements of this type, including termination for convenience or for cause rights.

TC2 Air Permit. In December 2005, the Sierra Club and other environmental groups filed a petition challenging the air permit issued for the TC2 baseload generating unit. The filing of the challenge did not stay the permit, so the Company was free to proceed with construction during the pendancy of the action. In June 2007, the state hearing officer assigned to the matter recommended upholding the air permit with minor revisions. In September 2007, the Secretary of the Kentucky Environmental and Public Protection Cabinet issued a final order approving the hearing officer's recommendation and upholding the permit. The Sierra Club did not seek judicial review of the final order. In addition, the Company applied for a permit revision to reflect minor design changes to TC2. In October 2007, the Sierra Club submitted comments to the Cabinet objecting to the draft permit revision and attempting to reassert its previous general objections to the generating unit. The Company is currently unable to predict the ultimate outcome of this matter.

**Environmental Matters.** KU's operations are subject to a number of environmental laws and regulations in each of the jurisdictions in which it operates, governing, among other things, air emissions, wastewater discharges, the use, handling and disposal of hazardous substances and wastes, soil and groundwater contamination and employee health and safety.

Clean Air Act Requirements. The Clean Air Act establishes a comprehensive set of programs aimed at protecting and improving air quality in the United States by, among other things, controlling stationary sources of air emissions such as power plants. While the general regulatory framework for these programs is established at the federal level, most of the programs are implemented and administered by the states under the oversight of the EPA. The key Clean Air Act programs relevant to KU's business operations are described below.

Ambient Air Quality. The Clean Air Act requires the EPA to periodically review the available scientific data for six criteria pollutants and establish concentration levels in the ambient air sufficient to protect the public health and welfare with an extra margin for safety. These concentration levels are known as NAAQS. Each state must identify "nonattainment areas" within its boundaries that fail to comply with the NAAQS and develop an SIP to bring such nonattainment areas into compliance. If a state fails to develop an adequate plan, the EPA must develop and implement a plan. As the EPA increases the stringency of the NAAQS through its periodic reviews, the attainment status of various areas may change, thereby triggering additional emission reduction obligations under revised SIPs aimed to achieve attainment.

In 1997, the EPA established new NAAQS for ozone and fine particulates that required additional reductions in SO₂ and NOx emissions from power plants. In 1998, the EPA issued its final "NOx SIP Call" rule requiring reductions in NOx emissions of approximately 85 percent from 1990 levels in order to mitigate ozone transport from the midwestern U.S. to the northeastern U.S. To implement the new federal requirements, in 2002, Kentucky amended its SIP to require electric generating units to reduce their NOx emissions to 0.15 pounds weight per MMBtu on a company-wide basis. In 2005, the EPA issued the CAIR which requires additional SO₂ emission reductions of 70 percent and NOx emission reductions of 65 percent from 2003 levels. The CAIR provides for a two-phase cap and trade program, with initial reductions of NOx and SO₂ emissions due by 2009 and 2010, respectively, and final reductions due by 2015. The final rule is currently under challenge in a number of federal court proceedings. In 2006, Kentucky proposed to amend its SIP to adopt state requirements similar to those under the federal CAIR. Depending on the level of action determined necessary to bring local non-attainment areas into compliance with the new ozone and fine particulate standards, KU's power plants are potentially subject to additional reductions in SO₂ and NOx emissions. KU's weighted-average company-wide emission rate for SO₂ in the third quarter of 2007 was approximately 1.21 lbs./MMBtu of heat input, with every generating unit below its emission limit established by the Kentucky Division for Air Quality.

Hazardous Air Pollutants As provided in the 1990 amendments to the Clean Air Act, the EPA investigated hazardous air pollutant emissions from electric utilities and submitted a report to Congress identifying mercury emissions from coal-fired power plants as warranting further study. In 2005, the EPA issued the CAMR establishing mercury standards for new power plants and requiring all states to issue new SIPs including mercury requirements for existing power plants. The EPA issued a model rule which provides for a two-phase cap and trade program with initial reductions due by 2010 and final reductions due by 2018. The CAMR provides for reductions of 70 percent from 2003 levels. The EPA closely integrated the CAMR and CAIR programs to ensure that the 2010 mercury reduction targets will be achieved as a "co-benefit" of the controls installed for purposes of compliance with the CAIR. The final rule is also currently under challenge in the federal courts. In 2006, Kentucky proposed to amend its SIP to adopt state requirements similar to those under the federal CAMR. In addition, in 2005 and 2006, state and local air agencies in Kentucky have proposed or adopted rules aimed at regulating additional hazardous air pollutants from sources including power plants. To the extent those rules are final, they are not expected to have a material impact on KU's power plant operations.

Acid Rain Program The 1990 amendments to the Clean Air Act imposed a two-phased cap and trade program to reduce SO₂ emissions from power plants that were thought to contribute to "acid rain" conditions in the northeastern U.S. The 1990 amendments also contained requirements for power plants to reduce NOx emissions through the use of available combustion controls.

Regional Haze. The Clean Air Act also includes visibility goals for certain federally designated areas, including national parks, and requires states to submit SIPs that will demonstrate reasonable progress toward preventing future impairment and remedying any existing impairment of visibility in those areas.

In 2005, the EPA issued its CAVR detailing how the Clean Air Act's BART requirements will be applied to facilities, including power plants, built between 1962 and 1974 that emit certain levels of visibility impairing pollutants. Under the final rule, because the CAIR will result in more visibility improvement than BART, states are allowed to substitute CAIR requirements in their regional haze SIPs in lieu of controls that would otherwise be required by BART. The final rule has been challenged in the courts.

Installation of Pollution Controls. Many of the programs under the Clean Air Act utilize cap and trade mechanisms that require a company to hold sufficient emissions allowances to cover its authorized emissions on a company-wide basis and do not require installation of pollution controls on every generating unit. Under cap and trade programs, companies are free to focus their pollution control efforts on plants where such controls are particularly efficient and utilize the resulting emission allowances for smaller plants where such controls are not cost effective. KU met its Phase I SO₂ requirements primarily through installation of FGD equipment on Ghent Unit 1. KU's combined strategy for its Phase II SO₂ requirements, which commenced in 2000, includes the installation of additional FGD equipment, as well as using accumulated emission allowances and fuel switching to defer certain additional capital expenditures. In order to achieve the NOx emission reductions mandated by the NOx SIP Call, KU installed additional NOx controls, including SCR technology, during the 2000 to 2006 time period, at a cost of \$215 million. In 2001, the Kentucky Commission granted recovery in principle of these costs incurred by KU under its periodic environmental surcharge review mechanisms.

In order to achieve the emissions reductions mandated by the CAIR and CAMR, KU expects to incur additional capital expenditures totaling \$880 million during the 2007 through 2009 time period for pollution controls including FGD and incur additional operating and maintenance costs in operating such controls. In 2005, the Kentucky Commission granted recovery in principle of these costs incurred by KU under its periodic environmental surcharge review mechanisms. KU believes its costs in reducing SO₂, NOx and mercury emissions to be comparable to those of similarly situated utilities with like generation assets. KU's compliance plans are subject to many factors including developments in the emission allowance and fuels markets, future legislative and regulatory enactments, legal proceedings and advances in clean air technology. KU will continue to monitor these developments to ensure that its environmental obligations are met in the most efficient and cost-effective manner.

Potential GHG Controls. In 2005, the Kyoto Protocol for reducing GHG emissions took effect, obligating 37 industrialized countries to undertake substantial reductions in GHG emissions. The U.S. has not ratified the Kyoto Protocol and there are currently no mandatory GHG emission reduction requirements at the federal level. Legislation mandating GHG reductions has been introduced in the Congress, but no federal legislation has been enacted to date. In the absence of a program at the federal level, various states, including 11 northeastern U.S. states under the Regional GHG Initiative program and California, have adopted their own GHG emission reduction programs. Substantial efforts to pass federal GHG legislation are ongoing. A Supreme Court decision has clarified the authority of the EPA to regulate GHG emissions under certain circumstances, and other litigation currently pending before various courts may provide additional clarification of the authority of the EPA and the states. KU is monitoring ongoing efforts to enact GHG reduction requirements at the state and federal level and is assessing potential impacts of such programs and strategies to mitigate those impacts.

KU is unable to predict whether mandatory GHG reduction requirements will ultimately be enacted. As a company with significant coal-fired generating assets, KU could be substantially impacted by programs requiring mandatory reductions in GHG emissions, although the precise impact on the operations of KU, including the reduction targets and deadlines that would be applicable, cannot be determined prior to the enactment of such programs.

Brown New Source Review Litigation In April 2006, the EPA issued an NOV alleging that KU had violated certain provisions of the Clean Air Act's new source review rules relating to work performed in 1997, on a boiler and turbine at KU's E.W. Brown generating station. In December 2006, the EPA issued a second NOV alleging the Company had exceeded heat input values in violation of the air permit for the unit. During 2006, KU provided data responses to the EPA with respect to the allegations in the NOVs. In March 2007, the Department of Justice filed a complaint in federal court in Kentucky alleging the same violations specified in the prior NOVs. The complaint seeks civil penalties, including potential per-day fines, remedial measures and injunctive relief. In April 2007, KU filed an answer in the civil suit denying the allegations. In July 2007, a July 2009 date for trial on the merits was scheduled. The parties continue periodic settlement discussions. KU cannot determine the overall outcome or potential effects of these matters, including whether substantial fines, penalties or remedial construction may result.

Section 114 Requests. In August 2007, the EPA issued administrative information requests under Section 114 of the Clean Air Act requesting new source review-related data regarding certain construction and maintenance activities at LG&E's Mill Creek 4 and Trimble County 1 generating units and KU's Ghent 2 generating unit. The Companies are complying with the information requests and are not able to predict further proceedings in this matter at this time.

Ghent Opacity NOV. In September, 2007, the EPA issued an NOV alleging that KU had violated certain provisions of the Clean Air Act's operating rules relating to opacity during June and July 2007 at Units 1 and 3 of KU's Ghent generating station. KU is not able to estimate the outcome or potential effects of these matters, including whether substantial fines, penalties or remedial construction may result.

General Environmental Proceedings. From time to time, KU appears before the EPA, various state or local regulatory agencies and state and federal courts regarding matters involving compliance with applicable environmental laws and regulations. Such matters include liability under the Comprehensive Environmental Response, Compensation and Liability Act for cleanup at various off-site waste sites and ongoing claims regarding GHG emissions from KU's generating stations. Based on analysis to date, the resolution of these matters is not expected to have a material impact on the operations of KU.

## Note 8 - Related Party Transactions

KU and other subsidiaries of E.ON engage in related party transactions. Transactions between KU and E.ON U.S. subsidiaries are eliminated upon consolidation of E.ON U.S. Transactions between KU and E.ON subsidiaries are eliminated upon consolidation of E.ON. These transactions are generally performed at cost and are in accordance with the FERC regulations under PUHCA 2005 and the applicable Kentucky Commission and Virginia Commission regulations. The significant related party transactions are disclosed below.

### Electric Purchases

KU and LG&E purchase energy from each other in order to effectively manage the load of their retail customers and to satisfy off-system sales. These sales and purchases are included in the statements of

income as operating revenues and purchased power operating expense. KU intercompany electric revenues and purchased power expense are as follows:

	Three Mo	onths Ended	Nine Months Ended		
	<u>Septer</u>	<u>nber 30,</u>	September 30,		
(in millions)	<u> 2007</u>	<u>2006</u>	<u> 2007</u>	<u>2006</u>	
Electric operating revenues from LG&E	\$ 7	\$17	\$33	\$52	
Purchased power from LG&E	18	23	71	67	

## Interest Charges

See Note 6, Short-Term and Long-Term Debt, for details of intercompany borrowing arrangements. Intercompany agreements do not require interest payments for receivables related to services provided when settled within 30 days.

KU's intercompany interest expense is as follows:

	Three Months Ended		Nine Months Ended		
	Septer	<u>nber 30,</u>	September 30,		
(in millions)	<u>2007</u>	<u>2006</u>	<u> 2007</u>	<u>2006</u>	
Interest on money pool loans	\$2	\$1	\$ 5	\$2	
Interest on Fidelia loans	9	5	24	15	

## Other Intercompany Billings

E.ON U.S. Services provides KU with a variety of centralized administrative, management and support services. These charges include payroll and income taxes paid by E.ON U.S. on behalf of KU, labor and overhead charges of E.ON U.S. Services employees performing services for KU and vouchers paid by E.ON U.S. Services, including fuel purchases, on behalf of KU. The cost of these services are directly charged to KU, or for general costs which cannot be directly attributed, charged based on predetermined allocation factors, including the following ratios: number of customers, total assets, revenues, number of employees and other statistical information. These costs are charged on an actual cost basis.

In addition, KU and LG&E provide services to each other and to E.ON U.S. Services. Billings between KU and LG&E relate to labor and overheads associated with union employees performing work for the other utility, charges related to jointly-owned combustion turbines and other miscellaneous charges. Billings from KU to E.ON U.S. Services relate to cash received by E.ON U.S. Services on behalf of KU, primarily tax settlements.

Intercompany billings to and from KU are as follows:

	Three Months Ended		Nine Mon	ths Ended	
	<u>Septer</u>	<u>nber 30,</u>	September 30,		
(in millions)	<u> 2007</u>	<u> 2006</u>	<u> 2007</u>	<u>2006</u>	
E.ON U.S. Services billings to KU	\$42	\$99	\$389	\$221	
KU billings to LG&E	11	14	33	29	
LG&E billings to KU	2	21	35	31	
KU billings to E.ON U.S. Services	22	1	24	3	

In September 2007, KU received a capital contribution from its common shareholder, E.ON U.S. in the amount of \$55 million.

## Note 9 - Subsequent Events

On October 25, 2007, KU entered into a long-term borrowing agreement with Fidelia with a principal amount of \$70 million, interest rate of 5.71% and a maturity date of October, 25, 2019.

## Kentucky Utilities Company Notes to Financial Statements (Unaudited)

### Note 1 - General

The unaudited financial statements include the accounts of the Company. KU's common stock is wholly-owned by E.ON U.S., an indirect wholly-owned subsidiary of E.ON. In the opinion of management, the unaudited interim financial statements include all adjustments, consisting only of normal recurring adjustments, necessary for a fair statement of financial position, results of operations, retained earnings and cash flows for the periods indicated. Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted, although the Company believes that the disclosures are adequate to make the information presented not misleading.

See KU's Annual Report for the year ended December 31, 2006, for information relevant to the accompanying financial statements, including information as to the Company's significant accounting policies.

Certain reclassification entries have been made to the previous years' financial statements to conform to the 2007 presentation with no impact on net assets, liabilities and capitalization or previously reported net income and cash flows.

## RECENT ACCOUNTING PRONOUNCEMENTS

In July 2006, the FASB issued FIN 48, Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109, Accounting for Income Taxes. FIN 48 clarifies accounting for income taxes to provide improved consistency of criteria used to recognize, derecognize and measure benefits related to income taxes. KU adopted the provisions of FIN 48 effective January 1, 2007. See Note 5, Income Taxes.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities – Including an Amendment of FASB Statement No. 115. SFAS No. 159 permits entities to choose to measure many financial instruments and certain other assets and liabilities at fair value on an instrument-by-instrument basis (the fair value option). Unrealized gains and losses on items for which the fair value option has been elected are to be recognized in earnings at each subsequent reporting date. SFAS No. 159 is effective for fiscal years beginning after November 15, 2007. KU will adopt SFAS No. 159 effective January 1, 2008, and expects no impact on its financial statements upon adoption.

## Note 2 - Rates and Regulatory Matters

For a description of each line item of regulatory assets and liabilities, reference is made to KU's Annual Report, Note 2 of the financial statements, for the year ended December 31, 2006.

The following regulatory assets and liabilities were included in KU's Balance Sheets:

## Kentucky Utilities Company (unaudited)

(in millions)	June 30, <u>2007</u>	December 31, <u>2006</u>
ARO	\$ 23	\$ 22
Unamortized loss on bonds	10	10
MISO exit	20	20
ECR	10	10
FAC	25	16
Other	9	5
Subtotal	97	83
Pension and postretirement benefits	66	64
Total regulatory assets	<u>\$ 163</u>	<u>\$ 147</u>
Accumulated cost of removal of utility plant	\$ 301	\$ 297
Deferred income taxes – net	30	27
Other	8	<u>6</u>
Total regulatory liabilities	<u>\$ 339</u>	<u>\$ 330</u>

KU does not currently earn a rate of return on the FAC regulatory asset, which is a separate recovery mechanism with recovery within twelve months. No return is earned on the pension and postretirement benefits regulatory asset which represents the changes in funded status of the plans that the Company will seek recovery of in future proceedings with the Kentucky and Virginia Commissions. No return is currently earned on the ARO asset. This regulatory asset will be offset against the associated regulatory liability, ARO asset and ARO liability at the time the underlying asset is retired. The MISO exit amount represents the costs relating to the withdrawal from MISO membership. KU expects to seek recovery of this asset in future proceedings with the Kentucky and Virginia Commissions. KU currently earns a rate of return on the remaining regulatory assets.

ECR. Kentucky law permits KU to recover the costs of complying with the Clean Air Act, including a return of operating expenses, and a return of and on capital invested, through the ECR mechanism. The amount of the regulatory asset or liability is the amount that has been under- or over-recovered due to timing or adjustments to the mechanism once approved by the Kentucky Commission.

In April 2006, the Kentucky Commission initiated six-month and two-year reviews of KU's environmental surcharge. A final Order was received in January 2007, approving the charges and credits billed through the ECR during the review period as well as approving billing adjustments, a roll-in to base rates, revisions to the monthly surcharge filing and the rate of return on capital.

FAC. In December 2006, the Kentucky Commission initiated its periodic two-year review of KU's past operations of the fuel clause and transfer of fuel costs from the FAC to base rates. In March 2007, intervenors representing industrial customers challenged KU's recovery of \$5.1 million in aggregate fuel costs KU incurred during a period prior to its exit from the MISO and requested the Kentucky Commission disallow this amount. A public hearing was held in May 2007. Final briefs were filed by the Company and the intervenors in June 2007. A Kentucky Commission decision is expected in the third quarter of 2007.

KU also employs an FAC mechanism for Virginia customers using an average fuel cost factor based primarily on projected fuel costs. The factor may be adjusted annually for over- or under- collections of fuel costs from the prior year. In February 2007, KU filed an application with the Virginia Commission seeking approval of an increase of approximately \$4 million in its fuel cost factor to reflect higher fuel costs incurred and under collection during 2006, and anticipated higher fuel costs to be incurred in 2007. The Virginia Commission approved KU's request in April 2007.

## Other Regulatory Matters

Regional Reliability Council. KU has changed its regional reliability council membership from the Reliability First Corporation to the SERC Reliability Corporation, effective January 1, 2007. Regional reliability councils are industry consortiums that promote, coordinate and ensure the reliability of the bulk electric supply systems in North America.

Market-Based Rate Authority. KU has received permission to sell power at market-based rates at the interface of control areas in which they may be deemed to have market power, subject to a restriction that such power not be collusively re-sold back into such control areas. However, restrictions exist on sales by KU of power at market-based rates in the KU/LG&E and Big Rivers Electric Corporation control areas. In June 2007, the FERC issued Order No. 697 implementing certain reforms to market-based rate regulations. KU continues to analyze the revised FERC regulations and their impacts, if any, on its market-based rate authority and/or wholesale power sales.

Real-Time Pricing. In December 2006, the Kentucky Commission issued an administrative order indicating that the EPAct 2005 Section 1252, Smart Metering and Section 1254, Interconnection standards, should not be adopted. However, all five Kentucky Commission jurisdictional utilities are required to file real-time pricing pilot programs for their large commercial and industrial customers. KU has developed a real-time pricing pilot for large industrial and commercial customers and filed the details of the plan with the Kentucky Commission in April 2007.

Utility Re-regulation in Virginia. The Commonwealth of Virginia passed the Virginia Electric Utility Restructuring Act in 1999. This act gave Virginia customers the ability to choose their electric supplier. Rates are capped at current levels through December 2010. In April 2007, Virginia passed legislation terminating this competitive market and commencing re-regulation of utility rates in Virginia. The new act will end the cap on rates at the end of 2008, rather than through December 2010, and end customer choice for most consumers in the applicable regions of the state. Thereafter, a hybrid model of regulation is expected to apply in Virginia, whereby utility rates would be reviewed every two years and a utility's rate of return on equity would be based upon the average of the rates of return for other regional utilities, with certain caps, floors or adjustments. The legislation is effective in July 2007, and also includes a 10% nonbinding goal for renewable power generation by 2022, as well as incentives for new generation, including renewables. KU believes the legislation substantially retains an existing exemption from restructuring activities as applicable to KU's limited service territory in Virginia. KU anticipates its

operations, following certain filings during 2007 or 2008, which may be required or otherwise appropriate as a result of the new legislation, will remain largely under traditional utility rate regulation.

Ghent FGD Inquiry. In October 2006, the Kentucky Commission commenced an inquiry into elements of KU's planned construction of one of its three new FGDs at the Ghent generating station. The proceeding requested, and KU provided, additional information regarding configuration details, expenditures and the proposed construction sequence applicable to future construction phases of the Ghent FGD project. In January 2007, the Kentucky Commission issued an Order completing its inquiry in the matter and confirming its approval of KU's construction plan. The Order also provided general guidance for jurisdictional utilities regarding applicable information and data requirements for future CCN applications and subsequent proceedings.

## Note 3 - Financial Instruments

Interest Rate Swaps (hedging derivatives). KU has used over-the-counter interest rate swaps to hedge exposure to market fluctuations in certain of its debt instruments. Pursuant to Company policy, use of these financial instruments is intended to mitigate risk, earnings and cash flow volatility and is not speculative in nature. Management has designated all of the interest rate swaps as hedge instruments. Financial instruments designated as fair value hedges and the underlying hedged items are periodically marked to market with the resulting net gains and losses recorded directly into net income. Upon termination of any fair value hedge, the resulting gain or loss is recorded into net income. Financial instruments designated as cash flow hedges have resulting gains and losses recorded within other comprehensive income and stockholders' equity.

KU was party to an interest rate swap agreement with a notional amount of \$53 million as of December 31, 2006. The interest rate swap was terminated in February 2007, when the underlying debt was defeased. Under this swap agreement, KU paid variable rates based on LIBOR averaging 7.44% and received fixed rates averaging 7.92% in 2007, prior to the termination of the swap. The swap agreement in effect at December 31, 2006, had been designated as a fair value hedge. The fair value designation was assigned because the underlying fixed rate debt had a firm future commitment. For the six months ended June 30, 2006, the effect of marking these financial instruments and the underlying debt to market resulted in pre-tax gains of less than \$1 million recorded in interest expense. There was no activity related to the swap in the second quarter of 2007, due to its termination in February 2007.

Interest rate swaps hedge interest rate risk on the underlying debt under SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities, as amended, in addition to swaps being marked to market, the item being hedged must also be marked to market, consequently for the year ended December 31, 2006, KU's debt reflects a mark-to-market adjustment of less than \$1 million, this swap was terminated in February 2007.

Energy Trading and Risk Management Activities (non-hedging derivatives). KU conducts energy trading and risk management activities to maximize the value of power sales from physical assets it owns. Energy trading activities are principally forward financial transactions to hedge price risk and are accounted for on a mark-to-market basis in accordance with SFAS No. 133, as amended. Prior to the MISO establishing its Day 2 energy market in April 2005, wholesale forward transactions were primarily physically settled and thus were treated as normal sales under SFAS No. 133, as amended, and were not marked to market.

The table below summarizes KU's energy trading and risk management activities for the six months ended

June 30:

(in millions)	<u> 2007</u>	<u>2006</u>
Fair value of contracts at beginning of period, net asset	\$ 1	\$ 1
Fair value of contracts when entered into during the period	1	1
Contracts realized or otherwise settled during the period	-	(3)
Changes in fair values due to changes in assumptions	<u>(2</u> )	3
Fair value of contracts at end of period, net asset	<u>\$_</u>	<u>\$_2</u>

No changes to valuation techniques for energy trading and risk management activities occurred during 2007 or 2006. Changes in market pricing, interest rate and volatility assumptions were made during both years. All contracts outstanding at June 30, 2007 and 2006, had a maturity of less than one year and were valued using prices actively quoted for proposed or executed transactions or quoted by brokers.

## Note 4 - Pension and Other Postretirement Benefit Plans

The following table provides the components of net periodic benefit cost for pension and other postretirement benefit plans:

	Three Months Ended June 30,				Six Months Ended June 30.										
		Other				t Pension Pos			_	ther	nent				
	Pension <u>Benefits</u>		<u>}</u>	Benefits			Benefits		Postretiremer <u>Benefits</u>		<u>s</u>				
	4	<u> 2007                                   </u>	2	<u>006</u>	±	<u>2007                                   </u>	<u> 2006</u>		2007	2	006	<u>200</u>	7	2	<u>006</u>
(in millions)															
Service cost	\$	1	\$	2	\$	-	\$ -	\$	3	\$	3	\$	]	\$	1
Interest cost		4		4		1	1		10		7		2		2
Expected return on plan assets		(5)		(5)		(1)	-		(12)		(9)	(	1)		-
Amortization of prior service costs		1		1		_			]		1		_		-
Amortization of actuarial loss		-		1		_	-		1		2		-		-
Amortization of transitional obligation		<u>-</u>		-	_	1	1		_ <del>_</del>	_			1	-	1
Benefit cost	\$	_1	\$	_3	\$		<u>\$_2</u>	<u>\$</u>	3	\$	4	\$	3	<u>\$</u>	4

Net periodic benefit costs incurred by employees of KU are reflected in both utility plant on the balance sheet and in operating expense on the income statement. The above costs do not include allocations of net periodic benefit costs from affiliates whose employees provide services to KU.

The pension plans are funded in accordance with all applicable requirements of the Employee Retirement Income Security Act of 1974 and the Internal Revenue Code. In January 2007, KU made a discretionary contribution to the pension plan in the amount of \$13 million. After this payment, KU's pension plan assets are in excess of the December 31, 2006 accumulated benefit obligation. KU does not expect to make any further contributions to the pension plans in 2007. KU made contributions of approximately \$1 million to other postretirement benefit plans during each of the first and second quarters of 2007. KU anticipates making further voluntary contributions in 2007 to fund the Voluntary Employee Beneficiary Association trusts to match the annual postretirement expense and funding the postretirement medical account under the pension plan up to the maximum amount allowed by law.

## Note 5 - Income Taxes

A United States consolidated income tax return is filed by E.ON U.S.'s direct parent, EUSIC, for each tax period. Each subsidiary of the consolidated tax group, including KU, will calculate its separate income tax for the tax period. The resulting separate-return tax cost or benefit will be paid to or received from the parent company or its designee. KU also files income tax returns in various state jurisdictions. With few exceptions, KU is no longer subject to U.S. federal, state or non-U.S. income tax examinations by tax authorities for years before 2003. Statutes of limitations related to the 2003 and later returns are still open. The 2003 year has been reviewed by the IRS with no proposed changes. Tax years 2005 and 2006 are included with the federal audit of tax year 2007. The 2007 return is being examined under an IRS pilot program named "Compliance Assurance Process". This program accelerates the IRS's review to the actual calendar year applicable to the return and ends 90 days after the return is filed.

KU adopted the provisions of FIN 48 effective January 1, 2007. At the date of adopting FIN 48, KU had \$2 million of unrecognized tax benefits, primarily related to federal income taxes. If recognized, the entire \$2 million of unrecognized tax benefits would affect the effective tax rate.

Included in other liabilities at June 30, 2007, is less than \$1 million of tax positions for which the ultimate deductibility is highly certain but for which there is uncertainty about the timing of such deductibility. Furthermore, possible amounts of uncertain tax positions for KU that may decrease within the next 12 months total \$1 million. The estimated amount of the change in uncertain tax position is based on the expiration of statutes during 2007.

KU, upon adoption of FIN 48, adopted a new financial statement classification for interest and penalties. Prior to the adoption of FIN 48, KU recorded interest and penalties for income taxes on the income statement in income tax expense and in the taxes accrued balance sheet account, net of tax. Upon adoption of FIN 48, interest and penalties are recorded as operating expenses on the income statement and accrued expenses in the balance sheet, on a pre-tax basis. The interest accrued is based on federal and state large corporate underpayment interest rates.

The amount KU recognized as interest accrued related to unrecognized tax benefits in interest expense in operating expenses was less than \$1 million at June 30, 2007 and December 31, 2006. At the date of adoption, KU accrued less than \$1 million in interest expense on uncertain tax positions. No penalties were accrued by KU upon adoption of FIN 48 or through June 30, 2007.

In June 2006, KU and LG&E filed a joint application with the Department of Energy ("DOE") requesting certification to be eligible for investment tax credits applicable to the construction of TC2. In November 2006, the DOE and the IRS announced that KU and LG&E were selected to receive the tax credit. KU's portion of the tax credit will be approximately \$101 million over the construction period of TC2. This tax credit will be amortized to income over the life of the related property. In the second quarter of 2007, based on eligible construction expenditures incurred in 2007, KU recorded a federal investment tax credit. The credit decreased current federal income taxes by \$10 million, during the three months ended June 30, 2007, and \$20 million for the six months ended June 30, 2007.

## Note 6 – Short-Term and Long-Term Debt

All KU first mortgage bonds were released and terminated in February 2007. Only the tax-exempt pollution control revenue bonds issued by the counties remain. Under the provisions for certain of KU's variable-rate pollution control bonds, the bonds are subject to tender for purchase at the option of the

holder and to mandatory tender for purchase upon the occurrence of certain events, causing the bonds to be classified as current portion of long-term debt in the balance sheets. The average annualized interest rate for these bonds during the six months ended June 30, 2007 was 3.74%.

During June 2007, KU entered into a short-term bilateral line of credit facility totaling \$35 million. There was no outstanding balance under this facility at June 30, 2007. KU expects to extend this short-term facility for an additional four year term, pending regulatory approval, prior to its expiration in June 2008.

Prior to February 2007, pollution control series bonds were obligations of KU issued in connection with tax-exempt pollution control revenue bonds issued by various governmental entities, principally counties in Kentucky. A loan agreement obligates KU to make debt service payments to the county that equate to the debt service due from the county on the related pollution control revenue bonds. Until a series of financing transactions completed during February 2007, the county's debt had also been secured by an equal amount of KU's first mortgage bonds that were pledged to the trustee for the pollution control revenue bonds, and that matched the terms and conditions of the county's debt, but required no payment of principal and interest unless KU defaulted on the loan agreement. In February 2007, all of KU's first mortgage bonds were released.

At December 31, 2006, KU had an interest rate swap used to hedge KU's underlying debt obligations. The swap hedged specific debt issuances and, consistent with management's designation, was accorded hedge accounting treatment. The swap effectively converted the fixed rate obligation on KU's first mortgage bond Series P to variable-rate. At December 31, 2006, the remaining swap had a notional value of \$53 million. The swap was terminated in February 2007, when the underlying bond was defeased. See Note 3, Financial Instruments.

KU participates in an intercompany money pool agreement wherein E.ON U.S. and/or LG&E make funds available to KU at market-based rates (based on highly rated commercial paper issues) of up to \$400 million. Details of the balances are as follows:

	Total Money	Amount	Balance	Average
(\$ in millions)	Pool Available	<b>Outstanding</b>	<u>Available</u>	Interest Rate
June 30, 2007	\$400	\$140	\$260	5.26%
December 31, 2006	\$400	\$ 97	\$303	5.25%

E.ON U.S. maintained a revolving credit facility totaling \$150 million and \$200 million at June 30, 2007 and December 31, 2006, respectively, with an affiliated company, E.ON North America, Inc., to ensure funding availability for the money pool. The balance is as follows:

		Amount	Balance	Average
(\$ in millions)	<u>Total Available</u>	Outstanding	<u>Available</u>	Interest Rate
June 30, 2007	\$150	\$ 69	\$81	5.65%
December 31, 2006	\$200	\$102	\$98	5.49%

Redemptions of long-term debt year-to-date through June 30, 2007, are summarized below:

		Principal			
	Daniel Alam	Amount		Secured/	
Year	<u>Description</u>	(in millions)	<u>Rate</u>	<u>Unsecured</u>	<u>Maturity</u>
2007	Pollution control bonds	\$54	Variable	Secured	2024
2007	First mortgage bonds	\$53	7.92%	Secured	2007

Issuances of long-term debt year-to-date through June 30, 2007, are summarized below:

		Principal			
		Amount		Secured/	
<u>Year</u>	Description	(in millions)	<u>Rate</u>	<u>Unsecured</u>	<u>Maturity</u>
2007	Pollution control bonds	\$54	Variable	Unsecured	2034
2007	Pollution control bonds	\$18	Variable	Unsecured	2026
2007	Pollution control bonds	\$ 9	Variable	Unsecured	2037
2007	Due to Fidelia	\$53	5.69%	Unsecured	2022
2007	Due to Fidelia	\$75	5.86%	Unsecured	2037
2007	Due to Fidelia	\$50	5.98%	Unsecured	2017

KU no longer has any secured debt and is no longer subject to periodic reporting under the Securities Exchange Act of 1934.

## Note 7 - Commitments and Contingencies

Except as may be discussed in this quarterly report (including Note 2), material changes have not occurred in the current status of various commitments or contingent liabilities from that discussed in KU's Annual Report for the year ended December 31, 2006 (including in Notes 2 and 9 to the financial statements of KU contained therein). See the above-referenced notes in KU's Annual Report regarding such commitments or contingencies.

Owensboro Contract Litigation. In May 2004, the City of Owensboro, Kentucky and Owensboro Municipal Utilities ("OMU") commenced a suit now removed to the U.S. District Court for the Western District of Kentucky, against KU concerning a long-term power supply contract (the "OMU Agreement") with KU. The dispute involves interpretational differences regarding issues under the OMU Agreement, including various payments or charges between KU and OMU and rights concerning excess power, termination and emissions allowances. The complaint seeks in excess of \$6 million in damages in connection with one of its claims for periods prior to 2004, plus damages in an unspecified amount for later-occurring periods on that claim and for other claims. OMU has additionally requested injunctive and other relief, including a declaration that KU is in material breach of the contract. KU has filed an answer in that court denying the OMU claims and presenting counterclaims and amended such filing in January 2007, to include further counterclaims alleging additional damages. During 2005, the FERC declined KU's application to exercise exclusive jurisdiction on matters. In July 2005, the district court resolved a summary judgment motion made by KU in OMU's favor, ruling that a contractual provision grants OMU the ability to terminate the contract without cause upon four years' prior notice, for which ruling KU retains certain rights to appeal. At this time, the district court case is in the discovery stage and currently a trial date of January 2008 has been scheduled. In May 2006, OMU issued a notification of its intent to terminate the OMU agreement contract in May 2010, without cause, absent any earlier relief which may be permitted by the proceeding.

Construction Program. KU had approximately \$1.0 billion of commitments in connection with its construction program at June 30, 2007.

In June 2006, KU and LG&E entered into a construction contract regarding the TC2 project. The contract is generally in the form of a lump-sum, turnkey agreement for the design, engineering, procurement, construction, commissioning, testing and delivery of the project, according to designated specifications, terms and conditions. The contract price and its components are subject to a number of potential adjustments which may serve to increase or decrease the ultimate construction price paid or payable to the contractor. The contract also contains standard representations, covenants, indemnities, termination and other provisions for arrangements of this type, including termination for convenience or for cause rights.

TC2 Air Permit. In December 2005, the Sierra Club and other environmental groups filed a petition challenging the air permit issued for the TC2 baseload generating unit. The filing of the appeal did not stay the permit, so the Company was free to proceed with construction during the pendancy of the action. In June 2007, the state hearing officer assigned to the matter recommended upholding the air permit with minor revisions. After considering the hearing officer's recommendation and exceptions filed by the parties, the Secretary of the Kentucky Environmental and Public Protection Cabinet is expected to issue a final order with respect to the permit during the fourth quarter of 2007.

Environmental Matters. KU's operations are subject to a number of environmental laws and regulations in each of the jurisdictions in which it operates, governing, among other things, air emissions, wastewater discharges, the use, handling and disposal of hazardous substances and wastes, soil and groundwater contamination and employee health and safety.

Clean Air Act Requirements. The Clean Air Act establishes a comprehensive set of programs aimed at protecting and improving air quality in the United States by, among other things, controlling stationary sources of air emissions such as power plants. While the general regulatory framework for these programs is established at the federal level, most of the programs are implemented and administered by the states under the oversight of the EPA. The key Clean Air Act programs relevant to KU's business operations are described below.

Ambient Air Quality. The Clean Air Act requires the EPA to periodically review the available scientific data for six criteria pollutants and establish concentration levels in the ambient air sufficient to protect the public health and welfare with an extra margin for safety. These concentration levels are known as NAAQS. Each state must identify "nonattainment areas" within its boundaries that fail to comply with the NAAQS and develop an SIP to bring such nonattainment areas into compliance. If a state fails to develop an adequate plan, the EPA must develop and implement a plan. As the EPA increases the stringency of the NAAQS through its periodic reviews, the attainment status of various areas may change, thereby triggering additional emission reduction obligations under revised SIPs aimed to achieve attainment.

In 1997, the EPA established new NAAQS for ozone and fine particulates that required additional reductions in SO₂ and NOx emissions from power plants. In 1998, the EPA issued its final "NOx SIP Call" rule requiring reductions in NOx emissions of approximately 85 percent from 1990 levels in order to mitigate ozone transport from the midwestern U.S. to the northeastern U.S. To implement the new federal requirements, in 2002, Kentucky amended its SIP to require electric generating units to reduce their NOx emissions to 0.15 pounds weight per MMBtu on a company-wide basis. In 2005, the EPA issued the CAIR which requires additional SO₂ emission reductions of 70 percent and NOx emission reductions of 65 percent from 2003 levels. The CAIR provides for a two-phase cap and trade program, with initial

reductions of NOx and SO₂ emissions due by 2009 and 2010, respectively, and final reductions due by 2015. The final rule is currently under challenge in a number of federal court proceedings. In 2006, Kentucky proposed to amend its SIP to adopt state requirements similar to those under the federal CAIR. Depending on the level of action determined necessary to bring local non-attainment areas into compliance with the new ozone and fine particulate standards, KU's power plants are potentially subject to additional reductions in SO₂ and NOx emissions. KU's weighted-average company-wide emission rate for SO₂ in the second quarter of 2007 was approximately 1.29 lbs./MMBtu of heat input, with every generating unit below its emission limit established by the Kentucky Division for Air Quality.

Hazardous Air Pollutants. As provided in the 1990 amendments to the Clean Air Act, the EPA investigated hazardous air pollutant emissions from electric utilities and submitted a report to Congress identifying mercury emissions from coal-fired power plants as warranting further study. In 2005, the EPA issued the CAMR establishing mercury standards for new power plants and requiring all states to issue new SIPs including mercury requirements for existing power plants. The EPA issued a model rule which provides for a two-phase cap and trade program with initial reductions due by 2010 and final reductions due by 2018. The CAMR provides for reductions of 70 percent from 2003 levels. The EPA closely integrated the CAMR and CAIR programs to ensure that the 2010 mercury reduction targets will be achieved as a "cobenefit" of the controls installed for purposes of compliance with the CAIR. The final rule is also currently under challenge in the federal courts. In 2006, Kentucky proposed to amend its SIP to adopt state requirements similar to those under the federal CAMR. In addition, in 2005 and 2006, state and local air agencies in Kentucky have proposed or adopted rules aimed at regulating additional hazardous air pollutants from sources including power plants. To the extent those rules are final, they are not expected to have a material impact on KU's power plant operations.

Acid Rain Program The 1990 amendments to the Clean Air Act imposed a two-phased cap and trade program to reduce SO₂ emissions from power plants that were thought to contribute to "acid rain" conditions in the northeastern U.S. The 1990 amendments also contained requirements for power plants to reduce NOx emissions through the use of available combustion controls.

Regional Haze. The Clean Air Act also includes visibility goals for certain federally designated areas, including national parks, and requires states to submit SIPs that will demonstrate reasonable progress toward preventing future impairment and remedying any existing impairment of visibility in those areas. In 2005, the EPA issued its CAVR detailing how the Clean Air Act's BART requirements will be applied to facilities, including power plants, built between 1962 and 1974 that emit certain levels of visibility impairing pollutants. Under the final rule, because the CAIR will result in more visibility improvement than BART, states are allowed to substitute CAIR requirements in their regional haze SIPs in lieu of controls that would otherwise be required by BART. The final rule has been challenged in the courts.

Installation of Pollution Controls. Many of the programs under the Clean Air Act utilize cap and trade mechanisms that require a company to hold sufficient emissions allowances to cover its authorized emissions on a company-wide basis and do not require installation of pollution controls on every generating unit. Under cap and trade programs, companies are free to focus their pollution control efforts on plants where such controls are particularly efficient and utilize the resulting emission allowances for smaller plants where such controls are not cost effective. KU met its Phase I SO₂ requirements primarily through installation of FGD equipment on Ghent Unit 1. KU's combined strategy for its Phase II SO₂ requirements, which commenced in 2000, includes the installation of additional FGD equipment, as well as using accumulated emission allowances and fuel switching to defer certain additional capital expenditures. In order to achieve the NOx emission reductions mandated by the NOx SIP Call, KU installed additional NOx controls, including SCR technology, during the 2000 to 2006 time period, at a

cost of \$215 million. In 2001, the Kentucky Commission granted recovery in principle of these costs incurred by KU under its periodic environmental surcharge review mechanisms.

In order to achieve the emissions reductions mandated by the CAIR and CAMR, KU expects to incur additional capital expenditures totaling \$1.0 billion during the 2007 through 2009 time period for pollution controls including FGD and SCR and incur additional operating and maintenance costs in operating such controls. In 2005, the Kentucky Commission granted recovery in principle of these costs incurred by KU under its periodic environmental surcharge review mechanisms. KU believes its costs in reducing SO₂, NOx and mercury emissions to be comparable to those of similarly situated utilities with like generation assets. KU's compliance plans are subject to many factors including developments in the emission allowance and fuels markets, future legislative and regulatory enactments, legal proceedings and advances in clean air technology. KU will continue to monitor these developments to ensure that its environmental obligations are met in the most efficient and cost-effective manner.

Potential GHG Controls. In 2005, the Kyoto Protocol for reducing GHG emissions took effect, obligating 37 industrialized countries to undertake substantial reductions in GHG emissions. The U.S. has not ratified the Kyoto Protocol and there are currently no mandatory GHG emission reduction requirements at the federal level. Legislation mandating GHG reductions has been introduced in the Congress, but no federal legislation has been enacted to date. In the absence of a program at the federal level, various states, including 11 northeastern U.S. states under the Regional GHG Initiative program and California, have adopted their own GHG emission reduction programs. Substantial efforts to pass federal GHG legislation are ongoing. A Supreme Court decision has clarified the authority of the EPA to regulate GHG emissions under certain circumstances, and other litigation currently pending before various courts may provide additional clarification of the authority of the EPA and the states. KU is monitoring ongoing efforts to enact GHG reduction requirements at the state and federal level and is assessing potential impacts of such programs and strategies to mitigate those impacts.

KU is unable to predict whether mandatory GHG reduction requirements will ultimately be enacted. As a company with significant coal-fired generating assets, KU could be substantially impacted by programs requiring mandatory reductions in GHG emissions, although the precise impact on the operations of KU, including the reduction targets and deadlines that would be applicable, cannot be determined prior to the enactment of such programs.

Brown New Source Review Litigation. In April 2006, the EPA issued an NOV alleging that KU had violated certain provisions of the Clean Air Act's new source review rules relating to work performed in 1997, on a boiler and turbine at KU's E.W. Brown generating station. In December 2006, the EPA issued a second NOV alleging the Company had exceeded heat input values in violation of the air permit for the unit. During 2006, KU provided data responses to the EPA with respect to the allegations in the NOVs. In March 2007, the Department of Justice filed a complaint in federal court in Kentucky alleging the same violations specified in the prior NOVs. The complaint seeks civil penalties, including potential per-day fines, remedial measures and injunctive relief. In April 2007, KU filed an answer in the civil suit denying the allegations. The parties continue periodic settlement discussions. KU is not able to estimate the outcome or potential effects of these matters, including whether substantial fines, penalties or remedial construction may result.

General Environmental Proceedings. From time to time, KU appears before the EPA, various state or local regulatory agencies and state and federal courts regarding matters involving compliance with applicable environmental laws and regulations. Such matters include liability under the Comprehensive Environmental Response, Compensation and Liability Act for cleanup at various off-site waste sites and

ongoing claims regarding GHG emissions from KU's generating stations. Based on analysis to date, the resolution of these matters is not expected to have a material impact on the operations of KU.

## **Note 8 - Related Party Transactions**

KU and other subsidiaries of E.ON engage in related party transactions. Transactions between KU and E.ON U.S. subsidiaries are eliminated upon consolidation of E.ON U.S. Transactions between KU and E.ON subsidiaries are eliminated upon consolidation of E.ON. These transactions are generally performed at cost and are in accordance with the FERC regulations under PUHCA 2005 and the applicable Kentucky Commission and Virginia Commission regulations. The significant related party transactions are disclosed below.

## **Electric Purchases**

KU and LG&E purchase energy from each other in order to effectively manage the load of their retail customers and to satisfy off-system sales. These sales and purchases are included in the statements of income as operating revenues and purchased power operating expense. KU intercompany electric revenues and purchased power expense are as follows:

	Three Mo	nths Ended	Six Months Endec		
	<u>Jun</u>	<u>e 30,</u>	<u>June 30, </u>		
(in millions)	<u>2007</u>	<u> 2006</u>	<u> 2007</u>	<u>2006</u>	
Electric operating revenues from LG&E	\$8	\$17	\$26	\$36	
Purchased power from LG&E	23	22	53	44	

## Interest Charges

See Note 6, Short-Term and Long-Term Debt, for details of intercompany borrowing arrangements. Intercompany agreements do not require interest payments for receivables related to services provided when settled within 30 days.

KU's intercompany interest expense is as follows:

	Three Mo	Six Months Ended		
	<u>Jun</u>	<u>June 30, </u>		
(in millions)	<u>2007</u>	<u> 2006</u>	<u>2007</u>	<u>2006</u>
Interest on money pool loans	\$2	\$1	\$ 3	\$2
Interest on Fidelia loans	8	4	15	9

## Other Intercompany Billings

E.ON U.S. Services provides KU with a variety of centralized administrative, management and support services. These charges include payroll taxes paid by E.ON U.S. on behalf of KU, labor and burdens of E.ON U.S. Services employees performing services for KU and vouchers paid by E.ON U.S. Services on behalf of KU. The cost of these services are directly charged to KU, or for general costs which cannot be directly attributed, charged based on predetermined allocation factors, including the following ratios: number of customers, total assets, revenues, number of employees and other statistical information. These costs are charged on an actual cost basis.

In addition, KU and LG&E provide services to each other and to E.ON U.S. Services. Billings between KU and LG&E relate to labor and overheads associated with union employees performing work for the other utility, charges related to jointly-owned combustion turbines and other miscellaneous charges. Billings from KU to E.ON U.S. Services relate to information technology-related services provided by KU employees, cash received by E.ON U.S. Services on behalf of KU and services provided by KU to other non-regulated businesses which are paid through E.ON U.S. Services.

Intercompany billings to and from KU are as follows:

	Three Months Ended		Six Mon	ths Ended
	<u>Jur</u>	<u>ie 30,</u>	<u>June</u> 30,	
(in millions)	<u> 2007</u>	<u>2006</u>	<u> 2007</u>	<u>2006</u>
E.ON U.S. Services billings to KU	\$210	\$78	\$380	\$120
KU billings to LG&E	8	3	22	15
LG&E billings to KU	23	6	33	10
KU billings to E.ON U.S. Services	33	2	35	3

#### Kentucky Utilities Company Notes to Financial Statements (Unaudited)

#### Note 1 - General

The unaudited financial statements include the accounts of the Company KU's common stock is wholly-owned by E.ON U.S., an indirect wholly-owned subsidiary of E.ON. In the opinion of management, the unaudited interim financial statements include all adjustments, consisting only of normal recurring adjustments, necessary for a fair statement of financial position, results of operations, retained earnings, and cash flows for the periods indicated. Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted, although the Company believes that the disclosures are adequate to make the information presented not misleading.

See KU's Annual Report for the year ended December 31, 2006, for information relevant to the accompanying financial statements, including information as to the Company's significant accounting policies.

#### RECENT ACCOUNTING PRONOUNCEMENTS

In July 2006, the FASB issued FIN 48, Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No 109, Accounting for Income Taxes. FIN 48 clarifies accounting for income taxes to provide improved consistency of criteria used to recognize, derecognize and measure benefits related to income taxes. KU adopted the provisions of FIN 48 effective January 1, 2007. See Note 5, Income Taxes.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities – Including an Amendment of FASB Statement No. 115. SFAS No. 159 permits entities to choose to measure many financial instruments and certain other assets and liabilities at fair value on an instrument-by-instrument basis (the fair value option). Unrealized gains and losses on items for which the fair value option has been elected are to be recognized in earnings at each subsequent reporting date. SFAS No. 159 is effective for fiscal years beginning after November 15, 2007. KU is currently evaluating the impact of SFAS No. 159, but does not expect its adoption to have a material impact on its statements of operations, financial position and cash flows.

#### Note 2 - Rates and Regulatory Matters

For a description of each line item of regulatory assets and liabilities, reference is made to KU's Annual Report, Note 2 of the financial statements, for the year ended December 31, 2006.

The following regulatory assets and liabilities were included in KU's Balance Sheets:

### Kentucky Utilities Company (unaudited)

(in millions)	March 31, 2007	December 31, 2006
ARO	\$ 22	\$ 22
Unamortized loss on bonds	11	10
MISO exit	20	20
ECR	8	10
FAC	22	16
Other	3	5
Subtotal	86	83
Pension and postretirement benefits	66	64
Total regulatory assets	<u>\$ 152</u>	<u>\$ 147</u>
Accumulated cost of removal of utility plant	\$ 301	\$ 297
Deferred income taxes – net	26	27
Other		6
Total regulatory liabilities	<u>\$ 334</u>	<u>\$ 330</u>

KU does not currently earn a rate of return on the FAC regulatory asset, which is a separate recovery mechanism with recovery within twelve months. No return is earned on the pension and postretirement benefits regulatory asset which represents the changes in funded status of the plans that the Company will seek recovery of in future proceedings with the Kentucky and Virginia Commissions. No return is currently earned on the ARO asset. This regulatory asset will be offset against the associated regulatory liability, ARO asset and ARO liability at the time the underlying asset is retired. The MISO exit amount represents the costs relating to the withdrawal from MISO membership. KU expects to seek recovery of this asset in future proceedings with the Kentucky and Virginia Commissions. KU currently earns a rate of return on the remaining regulatory assets. Other regulatory assets include the merger surcredit and deferred storm costs. Other regulatory liabilities include DSM and MISO administrative costs currently included in base rates.

ECR. Kentucky law permits KU to recover the costs of complying with the Federal Clean Air Act, including a return of operating expenses, and a return of and on capital invested, through the ECR mechanism. The amount of the regulatory asset or liability is the amount that has been under- or over-recovered due to timing or adjustments to the mechanism once approved by the Kentucky Commission.

In April 2006, the Kentucky Commission initiated six-month and two-year reviews of KU's environmental surcharge. A final Order was received in January 2007, approving the charges and credits billed through the ECR during the review period as well as approving billing adjustments, a roll-in to base rates, revisions to the monthly surcharge filing and the rate of return on capital.

FAC. In December 2006, the Kentucky Commission initiated its periodic two-year review of KU's past operations of the fuel clause and transfer of fuel costs from the FAC to base rates. In March 2007, intervenors representing industrial customers challenged KU's recovery of \$5.1 million in aggregate fuel costs KU incurred during a period prior to its exit from the MISO and requested the Kentucky Commission disallow this amount. Remaining proceedings in this matter, including further data requests and appropriate KU responsive filings, are continuing. A public hearing is scheduled in May 2007. A Kentucky Commission decision is expected during mid-2007.

KU also employs an FAC mechanism for Virginia customers using an average fuel cost factor based primarily on projected fuel costs. The factor may be adjusted annually for over-or-under collections of fuel costs from the prior year. In February 2007, KU filed an application with the Virginia Commission seeking approval of an increase of approximately \$4 million in its fuel cost factor to reflect higher fuel costs incurred and under collection during 2006, and anticipated higher fuel costs to be incurred in 2007. The Virginia Commission approved KU's request in April 2007. See Note 9, Subsequent Events.

#### Other Regulatory Matters

Regional Reliability Council. KU has changed its regional reliability council membership from the Reliability First Corporation to the Southeastern Electric Reliability Council, effective January 1, 2007. Regional reliability councils are industry consortiums that promote, coordinate and ensure the reliability of the bulk electric supply systems in North America.

Market-Based Rate Authority. KU has received permission to sell power at market-based rates at the interface of control areas in which they may be deemed to have market power, subject to a restriction that such power not be collusively re-sold back into such control areas. However, restrictions exist on sales by KU of power at market-based rates in the KU/LG&E and Big Rivers Electric Corporation control areas. Certain general FERC proceedings continue with respect to market-based rate matters, and KU's market-based rate authority is subject to such future developments. KU cannot predict the ultimate impact of the current or potential mitigation mechanisms on its future wholesale power sales.

**Real-Time Pricing**. In December 2006, the Kentucky Commission issued an Order indicating that the EPAct 2005 Section 1252, Smart Metering and Section 1254, Interconnection standards, should not be adopted. However, all five Kentucky Commission jurisdictional utilities are required to file real-time pricing pilot programs for their large commercial and industrial customers. KU has developed a real-time pricing pilot for large industrial and commercial customers and filed the details of the plan with the Kentucky Commission in April 2007.

Utility Re-regulation in Virginia. The Commonwealth of Virginia passed the Virginia Electric Utility Restructuring Act in 1999. This act gave Virginia customers the ability to choose their electric supplier. Rates are capped at current levels through December 2010. In April 2007, Virginia passed legislation terminating this competitive market and commencing re-regulation of utility rates in Virginia. The new act will end the cap on rates at the end of 2008, rather than through December 2010, and end customer choice for most consumers in the applicable regions of the state. Thereafter, a hybrid model of regulation would apply in Virginia, whereby utility rates would be reviewed every two years and a utility's rate of return on equity would be based upon the average of the rates of return for other regional utilities, with certain caps, floors or adjustments. The legislation is effective in July 2007, and also includes a 10% nonbinding goal by 2022 for renewable power generation as well as incentives for new generation, including renewable. KU is examining whether the legislation adequately retains, in whole or in part, an existing exemption from restructuring, allowing KU's Virginia service territory to continue under prior

traditional utility regulation. KU continues to analyze the potential effects of such legislation on the future rates and operations relating to its Virginia service territory and cannot estimate the impact, if any, at this time.

Ghent FGD Inquiry. In October 2006, the Kentucky Commission commenced an inquiry into elements of KU's planned construction of one of its three new FGD's at the Ghent generating station. The proceeding requested, and KU provided, additional information regarding configuration details, expenditures and the proposed construction sequence applicable to future construction phases of the Ghent FGD project. In January 2007, the Kentucky Commission issued an Order completing its inquiry in the matter and confirming its approval of KU's construction plan. The Order also provided general guidance for jurisdictional utilities regarding applicable information and data requirements for future CCN applications and subsequent proceedings.

#### Note 3 - Financial Instruments

Interest Rate Swaps (hedging derivatives). KU has used over-the-counter interest rate swaps to hedge exposure to market fluctuations in certain of its debt instruments. Pursuant to Company policy, use of these financial instruments is intended to mitigate risk, earnings and cash flow volatility and is not speculative in nature. Management has designated all of the interest rate swaps as hedge instruments. Financial instruments designated as fair value hedges and the underlying hedged items are periodically marked to market with the resulting net gains and losses recorded directly into net income. Upon termination of any fair value hedge, the resulting gain or loss is recorded into net income. Financial instruments designated as cash flow hedges have resulting gains and losses recorded within other comprehensive income and stockholders' equity.

KU was party to an interest rate swap agreement with a notional amount of \$53 million as of December 31, 2006. The interest rate swap was terminated in February 2007, when the underlying debt was defeased. Under this swap agreement, KU paid variable rates based on LIBOR averaging 7.44% and received fixed rates averaging 7.92% in 2007 prior to the termination of the swap. The swap agreement in effect at December 31, 2006, had been designated as a fair value hedge. The fair value designation was assigned because the underlying fixed rate debt had a firm future commitment. For the three months ended March 31, 2007 and 2006, the effect of marking these financial instruments and the underlying debt to market resulted in pre-tax gains of less than \$1 million recorded in interest expense.

Interest rate swaps hedge interest rate risk on the underlying debt under SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities, as amended, in addition to swaps being marked to market, the item being hedged must also be marked to market, consequently for the year ended December 31, 2006, KU's debt reflects a mark-to-market adjustment of less than \$1 million, this swap was terminated in February 2007.

Energy Trading and Risk Management Activities (non-hedging derivatives). KU conducts energy trading and risk management activities to maximize the value of power sales from physical assets it owns. Energy trading activities are principally forward financial transactions to hedge price risk and are accounted for on a mark-to-market basis in accordance with SFAS No. 133, as amended. Prior to the MISO establishing its Day 2 energy market in April 2005, wholesale forward transactions were primarily physically settled and thus were treated as normal sales under SFAS No. 133, as amended, and were not marked to market.

The table below summarizes KU's energy trading and risk management activities for the three months ended March 31:

(in millions)	<u> 2007</u>	<u>2006</u>
Fair value of contracts at beginning of period, net asset	\$ 1	\$ 1
Fair value of contracts when entered into during the period	-	1
Contracts realized or otherwise settled during the period	₩•	(2)
Changes in fair values due to changes in assumptions	<u>(2</u> )	1
Fair value of contracts at end of period, net (liability) asset	<b>\$</b> (1)	<u>\$_1</u>

No changes to valuation techniques for energy trading and risk management activities occurred during 2007 or 2006. Changes in market pricing, interest rate and volatility assumptions were made during both years. All contracts outstanding at March 31, 2007 and 2006, have a maturity of less than one year and are valued using prices actively quoted for proposed or executed transactions or quoted by brokers.

#### Note 4 - Pension and Other Postretirement Benefit Plans

The following table provides the components of net periodic benefit cost for pension and other benefit plans for the three months ended March 31:

			Other Pos	stretirement
	<u>Pensi</u>	on Benefits	<u>Be</u> :	<u>nefits</u>
(in millions)	<u>2007</u>	<u>2006</u>	<u>2007</u>	<u>2006</u>
Service cost	\$ 2	\$ 1	\$ 1	\$ 1
Interest Cost	6	3	1	1
Expected return on plan assets	(7)	(4)	-	-
Amortization of actuarial loss	1	1		
Benefit cost year-to-date	<u>\$2</u>	<u>\$_1</u>	<u>\$2</u>	<u>\$2</u>

Net periodic benefit costs incurred by employees of KU are reflected in both utility plant on the balance sheet and in operating expense on the income statement. The above costs do not include allocations of net periodic benefit costs from other affiliates.

The pension plans are funded in accordance with all applicable requirements of the Employee Retirement Income Security Act of 1974 and the Internal Revenue Code. In January 2007, KU made a discretionary contribution to the pension plan in the amount of \$13 million. After this payment, KU's pension plan assets are in excess of the December 31, 2006 accumulated benefit obligation. KU does not expect to make any further contributions to the pension plans in 2007. In the first quarter of 2007, KU made contributions to other postretirement benefit plans of approximately \$1 million. KU anticipates making further voluntary contributions in 2007 to fund the Voluntary Employee Beneficiary Association (VEBA) trusts to match the annual postretirement expense and funding the 401(h) plan up to the maximum amount allowed by law.

#### Note 5 - Income Taxes

A United States consolidated income tax return is filed by E.ON U.S.'s direct parent, EUSIC, for each tax period. Each subsidiary of the consolidated tax group, including KU, will calculate its separate income tax for the tax period. The resulting separate-return tax cost or benefit will be paid to or received from the parent company or its designee. KU also files income tax returns in various state jurisdictions. With few

exceptions, KU is no longer subject to U.S. federal, state or non-U.S. income tax examinations by tax authorities for years before 2003. The 2003 and 2004 statutes are still open. The 2003 year has been reviewed by the IRS with no proposed changes. Tax years 2005 and 2006 are expected to be included, along with an upcoming federal audit of tax year 2007. The 2007 return will be examined under an IRS pilot program named "Compliance Assurance Process". This program accelerates the IRS's review to the actual calendar year applicable to the return and ends ninety days after the return is filed.

KU adopted the provisions of FIN 48 effective January 1, 2007. At the date of adopting FIN 48, KU had \$2 million of unrecognized tax benefits, primarily related to federal income taxes. If recognized, the entire \$2 million of unrecognized tax benefits would affect the effective tax rate.

Included in the balance at March 31, 2007, is less than \$1 million of tax positions for which the ultimate deductibility is highly certain but for which there is uncertainty about the timing of such deductibility. Furthermore, possible amounts of uncertain tax positions for KU that may decrease within the next 12 months total \$1 million. The estimated amount of the change in uncertain tax position is based on the expiration of statutes during 2007.

KU, upon adoption of FIN 48, adopted a new financial statement classification for interest and penalties. Prior to the adoption of FIN 48, KU recorded interest and penalties for income taxes on the income statement in income tax expense and in the taxes accrued balance sheet account, net of tax. Upon adoption of FIN 48, interest and penalties are recorded as operating expenses on the income statement and accrued expenses in the balance sheet, on a pre-tax basis. The interest accrued is based on federal and state large corporate underpayment interest rates.

The amount KU recognized as interest accrued related to unrecognized tax benefits in interest expense in operating expenses was less than \$1 million at March 31, 2007 and December 31, 2006. At the date of adoption, KU accrued less than \$1 million in interest expense on uncertain tax positions. No penalties were accrued by KU upon adoption of FIN 48 or through March 31, 2007.

In June 2006, KU and LG&E filed a joint application with the Department of Energy ("DOE") requesting certification to be eligible for investment tax credits applicable to the construction of TC2. In November 2006, the DOE and the IRS announced that KU and LG&E were selected to receive the tax credit. KU's portion of the tax credit will be approximately \$101 million over the construction period of TC2. This tax credit will be amortized to income over the life of the related property. In the first quarter of 2007, based on eligible construction expenditures incurred in 2007, KU recorded a federal investment tax credit, decreasing current federal income taxes by \$10 million.

#### Note 6 - Short-Term and Long-Term Debt

Under the provisions for KU's variable-rate pollution control bonds, Series 12, 13, 14 and 15, the bonds are subject to tender for purchase at the option of the holder and to mandatory tender for purchase upon the occurrence of certain events, causing the bonds to be classified as current portion of long-term debt in the balance sheets. The average annualized interest rate for these bonds during the three months ended March 31, 2007 was 3.73%.

Pollution control series bonds are obligations of KU issued in connection with tax-exempt pollution control revenue bonds issued by various governmental entities, principally counties in Kentucky. A loan agreement obligates KU to make debt service payments to the county that equate to the debt service due from the county on the related pollution control revenue bonds. Until a series of financing transactions completed during February 2007, the county's debt was also secured by an equal amount of KU's first

mortgage bonds that were pledged to the trustee for the pollution control revenue bonds, and that match the terms and conditions of the county's debt, but require no payment of principal and interest unless KU defaults on the loan agreement.

At December 31, 2006, KU had an interest rate swap used to hedge KU's underlying debt obligations. The swap hedged specific debt issuances and, consistent with management's designation, was accorded hedge accounting treatment. The swap effectively converted the fixed rate obligation on KU's first mortgage bond Series P to variable-rate. At December 31, 2006, the remaining swap had a notional value of \$53 million. The swap was terminated in February 2007, when the underlying bond was defeased. See Note 3, Financial Instruments.

KU participates in an intercompany money pool agreement wherein E.ON U.S. and/or LG&E make funds available to KU at market-based rates (based on highly rated commercial paper issues) of up to \$400 million. Details of the balances were as follows:

(\$ in millions)	Total Money	Amount	Balance	Average
	<u>Pool Available</u>	Outstanding	<u>Available</u>	Interest Rate
March 31, 2007	\$400	\$ 32	\$368	5.26%
December 31, 2006	\$400	\$ 97	\$303	5.25%

E.ON U.S. maintains a revolving credit facility totaling \$150 million and \$200 million at March 31, 2007 and December 31, 2006, respectively, with an affiliated company, E.ON North America, Inc., to ensure funding availability for the money pool. The balance is as follows:

(\$ in millions)	Total Available	Amount Outstanding	Balance <u>Available</u>	Average Interest Rate
March 31, 2007	\$150	\$137	\$13	5.63%
December 31, 2006	\$200	\$102	\$98	5.49%

Redemptions of long-term debt year-to-date through March 31, 2007, are summarized below:

		Principal			
	Description	Amount		Secured/	
<u>Year</u>	<u>Description</u>	(in millions)	<u>Rate</u>	<u>Unsecured</u>	<u>Maturity</u>
2007	Pollution control bonds	\$ 54	Variable	Secured	2024
2007	First mortgage bonds	\$ 53	7.92%	Secured	2007

Issuances of long-term debt year-to-date through March 31, 2007, are summarized below:

		Principal			
		Amount		Secured/	
<u>Year</u>	<u>Description</u>	(in millions)	Rate	<u>Unsecured</u>	<u>Maturity</u>
2007	Pollution control bonds	\$ 54	Variable	Unsecured	2034
2007	Due to Fidelia	\$ 53	5.69%	Unsecured	2022
2007	Due to Fidelia	\$ 75	5.86%	Unsecured	2037

KU no longer has any secured debt and is no longer subject to periodic reporting under the Securities Exchange Act of 1934.

#### Note 7 - Commitments and Contingencies

Except as may be discussed in this quarterly report (including Note 2), material changes have not occurred in the current status of various commitments or contingent liabilities from that discussed in KU's Annual Report for the year ended December 31, 2006 (including in Notes 2 and 9 to the financial statements of KU contained therein). See the above-referenced notes in KU's Annual Report regarding such commitments or contingencies.

Owensboro Contract Litigation. In May 2004, the City of Owensboro, Kentucky and OMU commenced a suit now removed to the U.S. District Court for the Western District of Kentucky, against KU concerning a long-term power supply contract (the "OMU Agreement") with KU. The dispute involves interpretational differences regarding issues under the OMU Agreement, including various payments or charges between KU and OMU and rights concerning excess power, termination and emissions allowances. The complaint seeks in excess of \$6 million in damages in connection with one of its claims for periods prior to 2004, plus damages in an unspecified amount for later-occurring periods on that claim and for other claims. OMU has additionally requested injunctive and other relief, including a declaration that KU is in material breach of the contract. KU has filed an answer in that court denying the OMU claims and presenting counterclaims and amended such filing in January 2007, to include further counterclaims alleging additional damages. During 2005, the FERC declined KU's application to exercise exclusive jurisdiction on matters. In July 2005, the district court resolved a summary judgment motion made by KU in OMU's favor, ruling that a contractual provision grants OMU the ability to terminate the contract without cause upon four years' prior notice, for which ruling KU retains certain rights to appeal At this time, the district court case is in the discovery stage and currently a trial date of January 2008, has been scheduled. In May 2006, OMU issued a notification of its intent to terminate the OMU agreement contract in May 2010, without cause, absent any earlier relief which may be permitted by the proceeding.

**Construction Program.** KU had approximately \$1.1 billion of commitments in connection with its construction program at March 31, 2007.

In June 2006, KU and LG&E entered into a construction contract regarding the TC2 project. The contract is generally in the form of a lump-sum, turnkey agreement for the design, engineering, procurement, construction, commissioning, testing and delivery of the project, according to designated specifications, terms and conditions. The contract price and its components are subject to a number of potential adjustments which may serve to increase or decrease the ultimate construction price paid or payable to the contractor. The contract also contains standard representations, covenants, indemnities, termination and other provisions for arrangements of this type, including termination for convenience or for cause rights.

**Environmental Matters.** KU's operations are subject to a number of environmental laws and regulations in each of the jurisdictions in which it operates, governing, among other things, air emissions, wastewater discharges, the use, handling and disposal of hazardous substances and wastes, soil and groundwater contamination and employee health and safety.

Clean Air Act Requirements. The Clean Air Act establishes a comprehensive set of programs aimed at protecting and improving air quality in the United States by, among other things, controlling stationary sources of air emissions such as power plants. While the general regulatory framework for these programs is established at the federal level, most of the programs are implemented and administered by the states under the oversight of the EPA. The key Clean Air Act programs relevant to KU's business operations are described below.

Ambient Air Quality The Clean Air Act requires the EPA to periodically review the available scientific data for six criteria pollutants and establish concentration levels in the ambient air sufficient to protect the public health and welfare with an extra margin for safety. These concentration levels are known as NAAQS. Each state must identify "nonattainment areas" within its boundaries that fail to comply with the NAAQS and develop an SIP to bring such nonattainment areas into compliance. If a state fails to develop an adequate plan, the EPA must develop and implement a plan. As the EPA increases the stringency of the NAAQS through its periodic reviews, the attainment status of various areas may change, thereby triggering additional emission reduction obligations under revised SIPs aimed to achieve attainment.

In 1997, the EPA established new NAAQS for ozone and fine particulates that required additional reductions in SO₂ and NOx emissions from power plants. In 1998, the EPA issued its final "NOx SIP Call" rule requiring reductions in NOx emissions of approximately 85 percent from 1990 levels in order to mitigate ozone transport from the midwestern U.S. to the northeastern U.S. To implement the new federal requirements, in 2002, Kentucky amended its SIP to require electric generating units to reduce their NOx emissions to 0.15 pounds weight per MMBtu on a company-wide basis. In 2005, the EPA issued the CAIR which requires additional SO₂ emission reductions of 70 percent and NOx emission reductions of 65 percent from 2003 levels. The CAIR provides for a two-phase cap and trade program, with initial reductions of NOx and SO₂ emissions due by 2009 and 2010, respectively, and final reductions due by 2015. The final rule is currently under challenge in a number of federal court proceedings. In 2006, Kentucky proposed to amend its SIP to adopt state requirements similar to those under the federal CAIR. Depending on the level of action determined necessary to bring local non-attainment areas into compliance with the new ozone and fine particulate standards, KU's power plants are potentially subject to additional reductions in SO2 and NOx emissions. KU's weighted-average company-wide emission rate for SO₂ in the first quarter of 2007 was approximately 1.50 lbs./MMBtu of heat input, with every generating unit below its emission limit established by the Kentucky Division for Air Quality.

Regional Haze The Clean Air Act also includes visibility goals for certain federally designated areas, including national parks, and requires states to submit SIPs that will demonstrate reasonable progress toward preventing future impairment and remedying any existing impairment of visibility in those areas. In 2005, the EPA issued its CAVR detailing how the Clean Air Act's BART requirements will be applied to facilities, including power plants, built between 1962 and 1974 that emit certain levels of visibility impairing pollutants. Under the final rule, as the CAIR will result in more visibility improvement than BART, states are allowed to substitute CAIR requirements in their regional haze SIPs in lieu of controls that would otherwise be required by BART. The final rule has been challenged in the courts.

Installation of Pollution Controls. Many of the programs under the Clean Air Act utilize cap and trade mechanisms that require a company to hold sufficient emissions allowances to cover its authorized emissions on a company-wide basis and do not require installation of pollution controls on every generating unit. Under cap and trade programs, companies are free to focus their pollution control efforts on plants where such controls are particularly efficient and utilize the resulting emission allowances for smaller plants where such controls are not cost effective. KU met its Phase I SO₂ requirements primarily through installation of FGD equipment on Ghent Unit 1. KU's combined strategy for its Phase II SO₂ requirements, which commenced in 2000, includes the installation of additional FGD equipment, as well as using accumulated emission allowances and fuel switching to defer certain additional capital expenditures. In order to achieve the NOx emission reductions mandated by the NOx SIP Call, KU installed additional NOx controls, including SCR technology, during the 2000 to 2006 time period at a cost of \$215 million. In 2001, the Kentucky Commission granted recovery in principal of these costs incurred by KU under its periodic environmental surcharge review mechanisms.

In order to achieve the emissions reductions mandated by the CAIR and CAMR, KU expects to incur

additional capital expenditures totaling \$1.0 billion during the 2007 through 2009 time period for pollution controls including FGD and SCR and incur additional operating and maintenance costs in operating such controls. In 2005, the Kentucky Commission granted recovery in principal of these costs incurred by KU under its periodic environmental surcharge review mechanisms. KU believes its costs in reducing SO₂, NOx and mercury emissions to be comparable to those of similarly situated utilities with like generation assets. KU's compliance plans are subject to many factors including developments in the emission allowance and fuels markets, future legislative and regulatory enactments, legal proceedings and advances in clean air technology. KU will continue to monitor these developments to ensure that its environmental obligations are met in the most efficient and cost-effective manner.

Potential GHG Controls. In 2005, the Kyoto Protocol for reducing GHG emissions took effect, obligating 37 industrialized countries to undertake substantial reductions in GHG emissions. The U.S. has not ratified the Kyoto Protocol and there are currently no mandatory GHG emission reduction requirements at the federal level. Legislation mandating GHG reductions has been introduced in the Congress, but no federal legislation has been enacted to date. In the absence of a program at the federal level, various states have adopted their own GHG emission reduction programs. Such programs have been adopted in various states including 11 northeastern U.S. states under the Regional GHG Initiative program and California. Substantial efforts to pass federal GHG legislation are ongoing. A Supreme Court decision has clarified the authority of the EPA to regulate GHG emissions under certain circumstances, and other litigation currently pending before various courts will provide additional clarification of the authority of the EPA and the states. KU is monitoring ongoing efforts to enact GHG reduction requirements at the state and federal level and is assessing potential impacts of such programs and strategies to mitigate those impacts.

KU is unable to predict whether mandatory GHG reduction requirements will ultimately be enacted. As a company with significant coal-fired generating assets, KU could be substantially impacted by programs requiring mandatory reductions in GHG emissions, although the precise impact on the operations of KU, including the reduction targets and deadlines that would be applicable, cannot be determined prior to the enactment of such programs.

Brown NOVs. In April 2006, the EPA issued an NOV alleging that KU had violated certain provisions of the Clean Air Act's new source review rules relating to work performed in 1997, on a boiler and turbine at KU's E.W. Brown generating station. In December 2006, the EPA issued a second NOV alleging the Company had exceeded heat input values in violation of the air permit for the unit. During 2006, KU provided data responses to the EPA with respect to the allegations in the NOVs. In March 2007, the Department of Justice filed a complaint in federal court in Kentucky alleging the same violations specified in the prior NOVs. The complaint seeks civil penalties, including potential per-day fines, remedial measures and injunctive relief. KU has denied any violation of applicable laws or regulations and will rigorously defend itself. KU is not able to estimate the outcome or potential effects of these matters.

General Environmental Proceedings. From time to time, KU appears before the EPA, various state or local regulatory agencies and state and federal courts regarding matters involving compliance with applicable environmental laws and regulations. Such matters include liability under the Comprehensive Environmental Response, Compensation and Liability Act for cleanup at various off-site waste sites and ongoing claims regarding GHG emissions from KU's generating stations. Based on analysis to date, the resolution of these matters is not expected to have a material impact on the operations of KU.

#### **Note 8 - Related Party Transactions**

KU and other subsidiaries of E.ON engage in related party transactions. Transactions between KU and E.ON U.S. subsidiaries are eliminated upon consolidation of E.ON U.S. Transactions between KU and E.ON subsidiaries are eliminated upon consolidation of E.ON. These transactions are generally performed at cost and are in accordance with the FERC regulations under PUHCA 2005 and the applicable Kentucky Commission and Virginia Commission regulations. The significant related party transactions are disclosed below.

#### Electric Purchases

KU and LG&E purchase energy from each other in order to effectively manage the load of their retail and off-system customers. These sales and purchases are included in the statements of income as operating revenues and purchased power operating expense. KU intercompany electric revenues and purchased power expense for the three months ended March 31, were as follows:

(in millions)	<u> 2007</u>	<u> 2006</u>
Electric operating revenues from LG&E	\$18	\$19
Purchased power from LG&E	30	22

#### Interest Charges

See Note 6, Short-Term and Long-Term Debt, for details of intercompany borrowing arrangements. Intercompany agreements do not require interest payments for receivables related to services provided when settled within 30 days.

KU's intercompany interest expense for the three months ended March 31, was as follows:

(in millions)	<u>2007</u>	<u>2006</u>	
Interest on money pool loans	\$ 1	\$ 1	
Interest on Fidelia loans	7	5	

#### Other Intercompany Billings

E.ON U.S. Services provides KU with a variety of centralized administrative, management and support services. These charges include payroll taxes paid by E.ON U.S. on behalf of KU, labor and burdens of E.ON U.S. Services employees performing services for KU and vouchers paid by E.ON U.S. Services on behalf of KU. The cost of these services are directly charged to KU, or for general costs which cannot be directly attributed, charged based on predetermined allocation factors, including the following ratios: number of customers, total assets, revenues, number of employees and other statistical information. These costs are charged on an actual cost basis.

In addition, KU and LG&E provide services to each other and to E.ON U.S. Services. Billings between KU and LG&E relate to labor and overheads associated with union employees performing work for the other utility, charges related to jointly-owned combustion turbines and other miscellaneous charges. Billings from KU to E.ON U.S. Services relate to information technology-related services provided by KU employees, cash received by E.ON U.S. Services on behalf of KU and services provided by KU to other non-regulated businesses which are paid through E.ON U.S. Services.

Intercompany billings to and from KU for the three months ended March 31, were as follows:

(in millions)	<u>2007</u>	2006
E.ON U.S. Services billings to KU	\$170	\$42
KU billings to LG&E	14	12
LG&E billings to KU	10	15
KU billings to E.ON U.S. Services	2	-

#### Note 9 – Subsequent Events

On April 20, 2007, the Virginia Commission approved KU's request for an increase of approximately \$4 million in its fuel cost factor, reflecting higher fuel costs incurred and under collection during 2006, and anticipated higher fuel costs to be incurred in 2007. See Note 2, Rates and Regulatory Matters.

#### Management's Discussion and Analysis of Financial Condition and Results of Operations

#### General

The following discussion and analysis by management focuses on those factors that had a material effect on KU's financial results of operations and financial condition during the three month period ended March 31, 2007, and should be read in connection with the financial statements and notes thereto.

Some of the following discussion may contain forward-looking statements that are subject to certain risks, uncertainties and assumptions. Such forward-looking statements are intended to be identified in this document by the words "anticipate," "expect," "estimate," "objective," "possible," "potential" and similar expressions. Actual results may vary materially. Factors that could cause actual results to differ materially include: general economic conditions; business and competitive conditions in the energy industry; changes in federal or state legislation; unusual weather; actions by state or federal regulatory agencies; and other factors described from time to time in the Company's reports, including the Annual Report for the year ended December 31, 2006.

#### **Executive Summary**

#### **Business**

KU, incorporated in Kentucky in 1912 and in Virginia in 1991, is a regulated public utility engaged in the generation, transmission, distribution and sale of electric energy in Kentucky, Virginia and Tennessee. At March 31, 2007, KU supplied electricity to approximately 502,000 customers in 77 counties in central, southeastern and western Kentucky, to approximately 30,000 customers in 5 counties in southwestern Virginia and 5 customers in Tennessee. KU's coal-fired electric generating plants produce most of KU's electricity, the remainder is generated by a hydroelectric power plant and natural gas and oil fueled combustion turbines. In Virginia, KU operates under the name Old Dominion Power Company.

KU is a wholly-owned subsidiary of E.ON U.S. E.ON U.S. is an indirect wholly-owned subsidiary of E.ON, a German corporation, making KU an indirect wholly-owned subsidiary of E.ON. KU's affiliate, LG&E, is a regulated public utility engaged in the generation, transmission, distribution and sale of electric energy and the distribution of natural gas in Kentucky.

#### **Environmental Matters**

Protection of the environment is a major priority for KU. Federal, state and local regulatory agencies have issued KU permits for various activities subject to air quality, water quality and waste management laws and regulations. See Note 7 of Notes to Financial Statements for more information.

#### Results of Operations

The electric utility business is affected by seasonal weather patterns. As a result, operating revenues (and associated operating expenses) are not generated evenly throughout the year.

#### Net Income

Net income for the three months ended March 31, 2007 increased \$10 million compared to the same period in 2006. The increase was primarily the result of increased electric revenues of \$23 million, offset

by an increase in operating expenses of \$2 million, an increase in other income and expenses of \$5 million and an increase in income taxes of \$6 million, attributable to an increase in pre-tax income.

#### Revenues

Revenues in the three months ended March 31, 2007 increased \$23 million primarily due to:

- Increased sales volumes delivered (\$21 million) resulting from a 8% increase in heating degree days in the first quarter of 2007 as compared to the same period in 2006
- Increased fuel costs (\$5 million) billed to customers through the FAC
- Increased ECR surcharge (\$3) million to be billed to customers
- Decreased MISO related revenue (\$6 million) resulting from the exit from the MISO

#### Expenses

Fuel for generation comprises a large component of total operating expenses. Increases or decreases in the cost of fuel are reflected in retail rates through the FAC, subject to the approval of the Kentucky Commission, the Virginia Commission and the FERC.

Fuel for generation increased \$14 million in the three months ended March 31, 2007 primarily due to:

- Increased generation to meet sales (\$9 million), due to 8% more heating degree days
- Increased spot market pricing (\$5 million) for coal/natural gas generation

Other operation and maintenance expenses decreased \$11 million in the three months ended March 31, 2007 primarily due to decreased other operation expenses (\$10 million) and decreased maintenance expenses (\$1 million).

Other operation expenses decreased \$10 million in the three months ended March 31, 2007 primarily due to:

- Decreased other power supply expenses (\$7 million) resulting from lower MISO Day 2 expenses
- Decreased administrative and general expenses (\$3 million) resulting from the completion of the VDT amortization

Interest expense, including interest expense to affiliated companies, increased \$3 million in the three months ended March 31, 2007 primarily due to:

- Increased interest expense (\$2 million) due to the addition of two bond issues in July and December 2006, and the early retirement of the \$53 million Series P bond in February 2007
- Increased interest expense to affiliated companies (\$1 million) due to the addition of four loans with Fidelia between June 2006 and March 2007. One of the four loans noted above was used to defease the \$53 million Series P bond in February 2007

	Three Months	Three Months
	Ended	Ended
	March 31, 2007	March 31, 2006
Effective Rate		
Statutory federal income tax rate	35.0%	35.0%
State income taxes net of federal benefit	3.7	4.4
Amortization of investment tax credits	(0.1)	(0.6)
EEI Dividend	(2.5)	(4.2)
Other differences	(1.3)	(0.6)
Effective income tax rate	<u>34.8</u> %	<u>34.0</u> %

The change in the EEI dividend in the first quarter of 2007 reflects a decrease in dividends received from KU's investment in EEI. The increased tax benefit in Other differences is largely attributable to changes in the level of pre-tax income.

#### Liquidity and Capital Resources

KU uses net cash generated from its operations and external financing (including financing from affiliates) to fund construction of plant and equipment and the payment of dividends. KU believes that such sources of funds will be sufficient to meet the needs of its business in the foreseeable future.

#### Operating Activities

Cash provided by operations was \$113 million and \$56 million for the three months ended March 31, 2007 and 2006, respectively.

The 2007 increase of \$57 million was primarily the result of increases in cash due to changes in:

- Accounts payable (\$31 million) due primarily to increase in accruals for construction expenditures
- Investment tax credits (\$10 million) related to construction of TC2
- Materials and supplies (\$10 million) due primarily to decrease in coal inventories caused by greater kwh output in the first quarter
- Accounts receivable (\$7 million) due primarily to decrease in accounts receivable from affiliated company
- Taxes receivable and other current assets (\$5 million)
- FAC receivable (\$3 million)

These increases were partially offset by changes in cash used for:

• Pension contributions (\$13 million)

#### **Investing Activities**

The primary use of funds for investing activities continues to be for capital expenditures. Capital expenditures were \$125 million and \$41 million in 2007 and 2006, respectively. KU expects its capital expenditures for the three year period ending December 31, 2009 to total approximately \$2.0 billion, consisting primarily of construction estimates associated with installation of FGDs on Ghent and Brown units and an SCR at Ghent totaling approximately \$840 million, the construction of TC2 totaling approximately \$605 million and on-going construction related to generation and distribution assets.

Net cash used for investing activities increased \$88 million in 2007 compared to 2006 primarily due to increased capital expenditures of \$84 million. Restricted cash represents the escrowed proceeds of the Pollution Control Bonds issued which are disbursed as qualifying costs are incurred.

#### Financing Activities

Net cash inflows (outflows) from financing activities were \$10 million and \$(23) million in the three months ended March 31, 2007 and 2006, respectively.

See Note 6 of Notes to Financial Statements for information of redemptions, maturities and issuances of long-term debt.

#### **Legal Proceedings**

For a description of the significant legal proceedings involving KU, reference is made to the information under the following captions of KU's Annual Report for the year ended December 31, 2006: Business, Risk Factors, Legal Proceedings, Management's Discussion and Analysis, Financial Statements and Notes to Financial Statements. Reference is also made to the matters described in Notes 2 and 7 of this quarterly report. Except as described in this quarterly report, to date, the proceedings reporting in KU's Annual Report have not materially changed.

#### Other

In the normal course of business, other lawsuits, claims, environmental actions and other governmental proceedings arise against KU. To the extent that damages are assessed in any of these lawsuits, KU believes that its insurance coverage is adequate. Management, after consultation with legal counsel, does not anticipate that liabilities arising out of other currently pending or threatened lawsuits and claims will have a material adverse effect on KU's financial position or results of operations.

Louisville Gas and Electric Company
Kentucky Utilities Company
Notes to Financial Statements
(Unaudited)

#### 1. General

The unaudited financial statements include the accounts of the Companies. The common stock of each Company is wholly-owned by E.ON U.S. In the opinion of management, the unaudited interim financial statements include all adjustments, consisting only of normal recurring

adjustments, necessary for a fair statement of financial position, results of operations, retained earnings, comprehensive income and cash

flows for the periods indicated. Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted pursuant to SEC rules and regulations, although the Companies believe that the disclosures are adequate to make the information presented not misleading.

See the Companies' Annual Reports on Form 10-K for the year ended December 31, 2005, for information relevant to the accompanying financial statements, including information as to the significant accounting policies of the Companies.

#### KU INVESTMENT IN EEI

Other property and investments on the KU balance sheet consists largely

of KU's investment in EEI, which was \$17 million at September 30, 2006

and \$16 million at December 31, 2005. KU owns 20% of the common stock

of EEI, which owns and operates a 1,000-Mw generating station in southern Illinois. Prior to 2006, KU was entitled to take 20% of the available capacity of the station under a pricing formula comparable to

the cost of other power generated by KU. This contract governing the purchases from EEI terminated on December 31, 2005. Subsequent to December 31, 2005, EEI has sold power under general market-based pricing and terms, generating increases in EEI earnings in 2006.

KU's investment in EEI is accounted for under the equity method of

accounting and, accordingly, as EEI earnings have increased significantly in 2006, KU's equity in EEI earnings has also increased

and is recorded in other income on the income statement. For the three  $% \left( 1\right) =\left( 1\right) \left( 1\right)$ 

and nine months ended September 30, 2006, KU's equity in EEI earnings

was \$9 million and \$22 million, respectively, as compared with less than \$1 million and \$2 million, respectively, for the comparable periods in 2005.

#### NEW ACCOUNTING PRONOUNCEMENTS

is

In July 2006, the FASB issued FIN 48, Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109, Accounting

for Income Taxes. FIN 48 is effective for fiscal years beginning after

December 15, 2006. FIN 48 clarifies accounting for income taxes to provide improved consistency of criteria used to recognize, derecognize

and measure benefits related to income taxes. The Companies are now analyzing the future impacts of FIN 48 on results of operations and financial condition.

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements. SFAS No. 157 is effective for fiscal years ending after

November 15, 2007. This statement defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. The

Companies are now analyzing the future impacts of SFAS No. 157 on results of operations and financial condition.

In September 2006, the FASB issued SFAS No. 158, Employers' Accounting

for Defined Benefit Pension and Other Postretirement Plans. SFAS No. 158 is effective for fiscal years ending after December 15, 2006 for employers with publicly traded equity securities, and for employers controlled by entities with publicly traded equity securities, which

applicable for LG&E and KU. This statement requires employers to recognize the over-funded or under-funded status of a defined benefit

postretirement plan as an asset or a liability in the balance sheet and

to recognize changes in that funded status in the year in which the changes occur through comprehensive income. This statement also requires employers to measure the funded status of a plan as of the date of its year-end balance sheet. This statement amends SFAS No. 87,

Employers' Accounting for Pensions, SFAS No. 88, Employers' Accounting

for Settlements and Curtailments of Defined Benefit Pension Plans and

for Termination Benefits, SFAS No. 106, Employers' Accounting for

Postretirement Benefits Other than Pensions and SFAS No. 132, Employers' Disclosures about Pensions and Other Postretirement Benefits. The Companies are now analyzing the future impacts of SFAS No. 158 on results of operations and financial condition.

#### 2. Rates and Regulatory Matters

For a description of each line item of regulatory assets and liabilities for the Companies, reference is made to Part I, Item 8, Financial Statements and Supplementary Data, Note 3 of the Companies'

Annual Reports on Form 10-K for the year ended December 31, 2005.

The following regulatory assets and liabilities were included in LG&E's

Balance Sheets as of September 30, 2006 and December 31, 2005:

Louisville Gas and Electric Company (Unaudited)

	September	December
(in millions)	30,	31,
	2006	2005
ARO	\$23	\$20
Unamortized loss on bonds	20	21
Gas supply adjustments	18	29
MISO exit	13	-
FAC	10	***
ECR	5	2
VDT	_	7
Other	4	5
Total regulatory assets	\$93	\$84
Accumulated cost of removal of utility		
plant	\$230	\$219
Deferred income taxes - net	47	42
Gas supply adjustments	38	17
Other	3	3
Total regulatory liabilities	\$318	\$281

In addition to generally earning applicable returns on approved

LG&E currently earns a return on all regulatory assets, excluding

ARO regulatory assets, gas supply adjustments, MISO exit and the  ${\sf FAC}$ .

The ARO regulatory assets earn no current return and will be offset against the associated regulatory liability (included in other regulatory liabilities), ARO asset and ARO liability at the time the underlying asset is retired. The gas supply adjustments and the FAC have separate recovery mechanisms with recovery within twelve months.

The MISO exit amount represents the fee accrued at September 30, 2006

to record the applicable costs relating to the withdrawal from MISO membership. LG&E expects to seek recovery of this asset in future proceedings with the Kentucky Commission. See Note 9, Subsequent

Events.

The increase in the gas supply adjustments net liability for the nine

months ended September 30, 2006 reflects over-recovery of gas supply costs, which are in the process of being refunded to customers. The increase in FAC for the nine months ended September 30, 2006 is due to

the higher cost of fuel being passed on to customers. The decrease in

VDT for the nine months ended September 30, 2006 is due to the completion of the amortization of the VDT in the first quarter of 2006.

The following regulatory assets and liabilities were included in  ${\tt KU's}$ 

Balance Sheets as of September 30, 2006 and December 31, 2005:

### Kentucky Utilities Company (Unaudited)

(in millions)	September 30, 2006	December 31, 2005
ARO Unamortized loss on bonds	\$22 11	\$20 11
MISO exit FAC	20 36	12
ECR	6	4
VDT Other	- 6	3 8
Total regulatory assets	\$101	\$58
Accumulated cost of removal of utility		
plant	\$294	\$281
Deferred income taxes - net	19	23
Other	1.1	11
Total regulatory liabilities	\$324	\$315

In addition to generally earning applicable returns on approved assets,

KU currently earns a return on all regulatory assets, excluding the  $\Delta RO$ 

regulatory assets, MISO exit and the FAC. The ARO regulatory assets earn no current return and will be offset against the associated regulatory liability (included in other regulatory liabilities), ARO asset and ARO liability at the time the underlying asset is retired. The FAC has a separate recovery mechanism with recovery within twelve

months. The MISO exit amount represents the fee accrued at September 30, 2006 to record the applicable costs relating to the withdrawal from

MISO membership. KU expects to seek recovery of this asset in future proceedings with the Kentucky Commission. See Note 9, Subsequent Events.

The increase in FAC for the nine months ended September 30, 2006 is due

to the higher cost of fuel being passed on to customers. The decrease

in VDT for the nine months ended September 30, 2006 is due to the completion of the amortization of the VDT in the first quarter of 2006.

#### ELECTRIC AND GAS RATE CASES

On June 30, 2004, the Kentucky Commission issued an order approving an

increase in the base electric rates of the Companies and the natural gas rates of LG&E. The rate increases took effect on July 1, 2004.

During 2004 and 2005, the AG conducted an investigation of the Companies, as well as of the Kentucky Commission and its staff, requesting information regarding allegedly improper communications between the Companies and the Kentucky Commission, particularly ring

the period covered by the rate cases. Concurrently, the AG had filed pleadings with the Kentucky Commission requesting rehearing of the rate

cases on computational components of the increased rates, including income taxes, cost of removal and depreciation amounts. In August 2004.

the Kentucky Commission denied the AG's rehearing request on the cost

of removal and depreciation issues and granted rehearing on the income

tax component. The Kentucky Commission agreed to hold in abeyance further proceedings in the rate case, until the AG filed its investigative report regarding the allegations of improper communication.

In January 2005 and February 2005, the AG filed a motion summarizing its investigative report as containing evidence of improper communications and record-keeping errors by the Companies in their conduct of activities before the Kentucky Commission or other state governmental entities and forwarded such report to the Kentucky Commission under continued confidential treatment to allow it to consider the report, including its impact, if any, on completing its investigation and any remaining steps in the rate case. To date, the Companies have neither seen nor requested copies of the report or

contents.

In December 2005, the Kentucky Commission issued an order noting completion of its inquiry, including review of the AG's investigative

report. The order concluded that no improper communications occurred during the rate proceeding. The order further established a

schedule through the first quarter of 2006 for considering the sole issue for which rehearing was granted: state income tax rates used in

calculating the granted rate increase. On March 31, 2006, the Kentucky  $\,$ 

Commission issued an order resolving this issue in the Companies' favor

consistent with the original rate increase order.

The Companies believe no improprieties have occurred in their communications with the Kentucky Commission and have cooperated in the

proceedings before the AG and the Kentucky Commission. The Companies are currently unable to predict whether there will be any additional actions or consequences as a result of the AG's report and investigation.

### MISO EXIT

Following receipt of applicable FERC, Kentucky Commission and other regulatory orders, LG&E and KU withdrew from the MISO effective September 1, 2006. Specific proceedings regarding the costs and benefits of the MISO and exit matters had been underway since July 2003. Since their exit from the MISO, the Companies have been operating under a FERC-approved open access-transmission tariff providing for a return on equity of 10.88%. The Companies have further

contracted with the Tennessee Valley Authority to act as their Reliability Coordinator and Southwest Power Pool, Inc. to function

the Companies' Independent Transmission Operator, pursuant to FERC requirements, with respect to transmission matters.

The Companies and the MISO have agreed upon overall calculation methods

for the contractual exit fee to be paid by the Companies following their withdrawal. In September 2006, the MISO submitted an initial invoice for approximately \$33 million for the exit fee, which the Companies have allocated approximately \$13 million to LG&E and \$20 million to KU. The Companies and the MISO continue to discuss the specifics of the exit fee calculation. The outcome of these discussions

and the eventual settlement of any disputed amount cannot be estimated

at this time. Orders of the Kentucky Commission approving the Companies' exit from the MISO have authorized the establishment of a regulatory asset for the exit fee, subject to adjustment for possible

future MISO credits, and a regulatory liability for certain revenues associated with former MISO Schedule 10 charges, which may continue to

be collected via base rates. The treatment of the regulatory asset and

liability will be determined in the Companies' next rate cases, however, the Companies historically have received approval to recover

regulatory assets and liabilities.

See also Note 9, Subsequent Events.

FAC

On February 15, 2006, KU filed an application with the Virginia Commission seeking approval of an increase of approximately \$6 million

in its fuel cost factor to reflect higher fuel costs incurred during 2005, and anticipated to be incurred in 2006. The Virginia Commission

approved KU's request on April 5, 2006.

In July 2006, the Kentucky Commission initiated routine periodic reviews of the FAC for the Companies. The Kentucky Commission issued Orders for both Companies on November 8, 2006, approving the charges and credits billed through the FAC during the review period.

ECR

In June 2006, the Companies filed applications to amend their ECR plans

with the Kentucky Commission seeking approval to recover investments in

environmental upgrades at the Companies' generating facilities. The estimated capital cost of the upgrades for the years 2006 through 2008

is approximately \$324 million (\$48 million for LG&E and \$276 million for KU), of which \$226 million is for the Air Quality Control System

Trimble County Unit 2 (\$43 million for LG&E and \$183 million for KU) and \$95 million is for KU's Ghent Unit 2 Selective Catalytic Reduction.

The estimated total capital cost of the upgrades is \$364 million. A final order is expected to be issued by the end of 2006.

In April 2006, the Kentucky Commission initiated routine periodic reviews of the ECR mechanisms for the Companies. Hearings have been completed and the Kentucky Commission's Order is expected before year-

end.

at

In December 2004, the Companies filed applications with the Kentucky Commission for approval of a CCN to construct new SO2 control technology (FGDs) at KU's Ghent and Brown stations, and to amend LG&E's

compliance plan to allow recovery of new and additional environmental

compliance facilities. The estimated capital cost of the additional facilities for 2006 through 2008 is approximately \$840 million (\$40 million for LG&E and \$800 million for KU), of which \$680 million is

the KU FGDs at Brown and Ghent. Hearings in these cases occurred during  $% \left( 1\right) =\left( 1\right) +\left(  

May 2005 and final orders were issued in June 2005, granting approval

of the CCN and amendments to the Companies' compliance plans. In October 2006, the Kentucky Commission commenced an inquiry into elements of KU's planned construction of one of its three new FGDs

the Ghent generating station. See also Note 9, Subsequent Events.

VDT

In December 2001, the Companies received an order from the Kentucky Commission permitting them to set up regulatory assets for workforce reduction costs (VDT costs) and begin amortizing them over a five-year

period beginning in April 2001. The order also reduced revenues through

a surcredit on bills to ratepayers over the same five-year period, reflecting a sharing (40% to the ratepayers and 60% to the Companies)

of the stipulated savings, net of amortization costs, of the workforce

reduction. The five-year VDT amortization period ended March 31, 2006.

On February 27, 2006, the AG, Kentucky Industrial Utility Consumers, Inc. and the Companies reached a settlement agreement on the future ratemaking treatment of the VDT surcredits and costs and subsequently

submitted a joint motion to the Kentucky Commission to approve the unanimous settlement agreement. Under the terms of the settlement agreement, the VDT surcredit will continue at the current level

such time as LG&E or KU file for a change in electric or natural gas base rates. The Kentucky Commission issued an order on March 24, 2006.

approving the settlement agreement.

# MARKET-BASED RATE AUTHORITY

Beginning in April 2004, the FERC initiated proceedings to modify its

methods used to assess generation market power and has established more

stringent interim market screen tests. During 2005, in connection with

the Companies' tri-annual market-based rate tariff renewals, the FERC

continued to contend that the Companies failed such market screens in

certain regions. The Companies disputed this contention and, in January

2006, in an attempt to resolve the matter, the Companies submitted proposed tariff schedules to the FERC containing a mitigation mechanism

with respect to applicable power sales into the control area of Big Rivers Electric Corporation ("BREC") in western Kentucky, where Western

Kentucky Energy Corp., an affiliate of the Companies, maintains a long-

term contractual relationship with BREC. Under the proposed tariff schedule, prices for such sales would be capped at a relevant MISO power pool index price. Upon the Companies' exit from the MISO, the FERC contended that they would have market power in their own joint

control area, potentially requiring a similar mitigation mechanism for

power sales into such region. In July 2006, the FERC issued an order in

the Companies' market-based rate proceeding accepting the Companies' further proposal to address certain market power issues the FERC had claimed would arise upon an exit from the MISO. In particular, the Companies received permission to sell power at market-based rates at the interface of control areas in which they may be deemed to have market power, subject to a restriction that such power not be collusively re-sold back into such control areas. Certain general

proceedings continue with respect to market-based rate matters, and the

Companies' market-based rate authority is subject to such future developments.

Additionally, recent FERC decisions in certain other market-based rate

proceedings have proposed or required cost-based, rather than market index, price caps. The Companies cannot predict the ultimate impact of

the current or potential mitigation mechanisms on their future wholesale power sales.

EPAct 2005

The EPAct 2005 was enacted on August 8, 2005. Among other matters, this

comprehensive legislation contains provisions mandating improved electric reliability standards and performance; providing economic and

other incentives relating to transmission, pollution control and renewable generation assets; increasing funding for clean coal generation incentives (see Note 6); repealing PUHCA 1935; enacting PUHCA 2005 and expanding FERC jurisdiction over public utility dding

companies and related matters via the Federal Power Act and PUHCA 2005.

The FERC was directed by the EPAct 2005 to adopt rules to address many

areas previously regulated by the other agencies under other statutes,

including PUHCA 1935. The FERC remains in various stages of rulemaking

on these issues and the Companies are monitoring these rulemaking activities and actively participating in these and other rulemaking proceedings. The Companies continue to evaluate the potential impacts

of the EPAct 2005 and the associated rulemakings and cannot predict what impact the EPAct 2005, and any uncompleted rulemakings, will

on their operations or financial position.

### 3. Financial Instruments

INTEREST RATE SWAPS (hedging derivatives)

The Companies use over-the-counter interest rate swaps to hedge exposure to market fluctuations in certain of their debt instruments.

Pursuant to the Companies' policies, use of these financial instruments

is intended to mitigate risk, earnings and cash flow volatility and is

not speculative in nature. Management has designated all of the interest rate swaps as hedge instruments. Financial instruments designated as cash flow hedges have resulting gains and losses recorded

within comprehensive income and stockholders' equity. Financial instruments designated as fair value hedges and the underlying hedged

items are periodically marked to market with the resulting net gains and losses recorded directly into net income. Upon termination of any

fair value hedge, the resulting gain or loss is recorded into net income.

As of September 30, 2006, LG&E was party to various interest rate swap

agreements with aggregate notional amounts of \$211 million. Under these

swap agreements, LG&E paid fixed rates averaging 4.38% and received variable rates based on LIBOR or the Bond Market Association's municipal swap index averaging 3.67% at September 30, 2006. The swap agreements in effect at September 30, 2006, have been designated as cash flow hedges and mature on dates ranging from 2020 to 2033. The hedges have been deemed to be fully effective resulting in a pretax gain of \$3 million for the nine months ended September 30, 2006, recorded in comprehensive income. Upon expiration of these hedges, the

amount recorded in comprehensive income will be reclassified into earnings. The amounts expected to be reclassified from comprehensive income to earnings in the next twelve months are immaterial. A deposit

in the amount of \$9 million, used as collateral for the \$83 million interest rate swap, is classified as restricted cash on LG&E's Balance

Sheet. The amount of the deposit required is tied to the market value

of the swap.

As of September 30, 2006, KU was party to an interest rate swap agreement with a notional amount of \$53 million. Under this swap agreement, KU paid variable rates based on LIBOR averaging 7.48%, and

received fixed rates averaging 7.92% at September 30, 2006. The swap agreement in effect at September 30, 2006 has been designated as a fair

value hedge and matures in 2007. At September 30, 2006, the effect of

marking this financial instrument and the underlying debt to market

resulted in pretax gains recorded in interest expense of less than \$1

million.

Interest rate swaps hedge interest rate risk on the underlying debt.
Under SFAS No. 133, Accounting for Derivative Instruments and
Hedging

Activities, as amended, in addition to swaps being marked to market, the item being hedged using a fair value hedge must also be marked to

market. Consequently at September 30, 2006, KU's debt reflects a mark-

to-market adjustment of less than \$1 million.

At September 30, 2006, the Companies' percentage of debt having a variable rate, including the impact of interest rate swaps, was 48% (\$415 million) for LG&E and 48% (\$401 million) for KU.

ENERGY TRADING AND RISK MANAGEMENT CONTRACTS (non-hedging derivatives)

The Companies conduct energy trading and risk management activities

maximize the value of power sales from physical assets they own.

Certain energy trading activities are accounted for on a mark-tomarket

basis in accordance with SFAS No. 133, as amended. The mark-to-market

adjustment as of September 30, 2006 generated an increase in other income for each Company of approximately \$2 million during the third quarter of 2006.

The fair values of the Companies' energy trading and risk management contracts as of September 30, 2006 were each approximately \$4 million,

recorded in other assets on the balance sheets of each Company. The fair values at September 30, 2005, were less than \$1 million each.

changes to valuation techniques for energy trading and risk management

activities occurred during 2006 or 2005. All contracts outstanding

September 30, 2006, have a maturity of less than one year and are valued using prices actively quoted for proposed or executed transactions or quoted by brokers.

### 4. Pension and Other Post-retirement Benefit Plans

The following table provides the components of net periodic benefit cost for pension and other benefit plans for the three and nine months

ended September 30, 2006 and 2005:

Three Months Ended Nine Months Ended September 30, September 30, September 30, 2006 2005 (in millions) LG&E KU LG&E KU LG&E KU

Pension and Other Benefit Plans Components of net period benefit cost								
Service cost	\$2	\$2	\$1	\$2	\$5	\$6	\$4	\$6
Interest cost	6	5	5	6	17	13	17	14
Expected return on								
plan assets	(6)	(4)	(5)	(5)	(16)	(12)	(16)	(13)
Amortization of prior								
service cost	1	1	1		3	2	4	1
Recognized actuarial								
loss	1.	1	1	1	3	3	2	2
Total net period benefit								
cost	\$4	\$5	\$3	\$4	\$12	\$12	\$11	\$10

LG&E made a discretionary contribution to the pension plan of \$18 million in January 2006. LG&E made no contributions during 2005. KU made no contributions to the pension plan in 2006 or 2005.

## 5. Short-Term and Long-Term Debt

Under the provisions for LG&E's variable-rate pollution control bonds,

Series S, T, U, BB, CC, DD and EE, and KU's variable-rate pollution control bonds Series 10, 12, 13, 14 and 15, the bonds are subject to tender for purchase at the option of the holder and to mandatory ender

for purchase upon the occurrence of certain events, causing the bonds

to be classified as current portion of long-term debt in the balance sheets. The average annualized interest rate for these bonds during the

nine months ending September 30, 2006 was 3.47% for LG&E and 3.50% for  $\,$ 

KU.

During June 2006, LG&E renewed five revolving lines of credit with banks totaling \$185 million. There was no outstanding balance under any

of these facilities at September 30, 2006. LG&E expects to renew these

facilities prior to their expiration in June 2007

LG&E, KU and E.ON U.S. participate in an intercompany money pool agreement. Details of the balances at September 30, 2006 and December

31, 2005 were as follows:

	Total Money Pool Available	Amount Outstanding	Balance Available	Average Interest Rate
(\$ in millions)				
September 30, 2006:				
LG&E	\$400	\$ 52	\$348	5.27%
KU	\$400	\$ 59	\$341	5 . 27 ዩ

December 31, 2005:

LG&E	\$400	\$ 141	\$259	4、21%
KU	\$400	\$ 70	\$330	4.21%

E.ON U.S. maintains a revolving credit facility totaling \$200  $\,$  million

with an affiliated company, E.ON North America, Inc., to ensure funding

availability for the money pool. The balance outstanding on this facility at September 30, 2006, was \$52 million.

Redemptions and maturities of long-term debt year-to-date through September 30, 2006, are summarized below:

				cipal ount		Secured/	
Year Maturity	Company	Description		illions)	Rate	Unsecured	
2006	LG&E	Mand Red Stock	Pref	\$1	5 . 875ዩ	Unsecured	Jul
2006							
2006	KU	First morte		36	5、99%	Secured	Jan
2006							

Issuances of long-term debt year-to-date through September 30, 2006, are summarized below:

Year	Company	Description	Principal Amount (in millions)	Rate	Secured/ Unsecured	
Maturity						
2006 2036	KU	Fidelia note	\$50	6.33%	Unsecured	Jun
2006	KU	Pollution control bonds	\$17	Variable	Secured	Jun
2036						

# 6. Commitments and Contingencies

Except as may be discussed in this Quarterly Report on Form 10-Q (including Note 2), material changes have not occurred in the current

status of various commitments or contingent liabilities from that discussed in the Companies' Annual Report on Form 10-K for the year ended December 31, 2005 (including in Notes 3 and 10 to the financial

statements of the Companies contained therein) and Quarterly Reports on

Form 10-Q for the quarters ended March 31, 2006 and June 30, 2006 (including in Notes 2 and 6 to the financial statements contained therein). See the above-referenced notes in the Companies' Annual Report on Form 10-K and Quarterly Reports on Form 10-Q for information

regarding such commitments or contingencies.

#### TRIMBLE COUNTY UNIT 2

In June 2006, the Companies, as 75% owners, entered into and delivered

notice to proceed under an engineering, procurement and construction agreement with Bechtel Power Corporation ("Bechtel"), regarding construction of Trimble County Unit 2, valued at approximately \$1.1 billion. IMEA and IMPA, as 25% owners, are also parties to the contract. The contract is generally in the form of a lump-sum, turnkey

agreement for the design, engineering, procurement, construction, commissioning, testing and delivery of the project, according to designated specifications, terms and conditions. The contract price and

its components are subject to a number of potential adjustments

may serve to increase or decrease the ultimate construction price paid

or payable to the contractor. The contract also contains standard representations, covenants, indemnities, termination and other provisions for arrangements of this type, including termination for convenience or for cause rights. In general, termination by the owners

for convenience or by the contractor due to owners' default will limit

payment obligations to payment for work or incentives performed or earned to date and termination by owners due to contractor's default will similarly limit payment obligations, subject however to owners' rights with respect to cover damages and to certain collateral provided. In connection with this matter, the Companies dismissed their

litigation against Bechtel regarding the contract previously commenced

in April 2006 in United States District Court for the Western District

of Kentucky.

In June 2006, the Companies filed an application with the DOE requesting certification to be eligible for investment tax credits applicable to the construction of Trimble County Unit 2. The EPAct 2005

added a new 48A to the Internal Revenue Code, which provides for an investment tax credit to promote the commercialization of advanced coal

technologies that will generate electricity in an environmentally responsible manner. The application requested up to the maximum amount

of "advanced coal project" credit allowed per taxpayer, or \$125 million, based on an estimate of 15% of projected qualifying Trimble County Unit 2 expenditures. In September and October 2006, the Companies submitted a follow-on application and additionally requested information to the IRS. IRS action on such applications would also be expected to occur during the fourth quarter of 2006.

То

the extent the Companies' application is ultimately accepted by the IRS, federal income tax credits may be claimed on eligible

expenditures, as incurred.

#### LOUISVILLE DOWNTOWN ARENA

In August 2006, LG&E and the Louisville Arena Authority, Inc., a non-

profit corporation (the "Authority") entered into a non-binding Memorandum of Understanding ("MOU") to transfer certain property and relocate certain LG&E facilities so that an LG&E-owned site, in part,

could be used for the development and construction of a new multipurpose arena in Louisville, Kentucky. The MOU contemplates the parties

working in good faith toward completing definitive documents regarding

the arena transaction. The MOU notes that the cost of relocating the LG&E facilities will be approximately \$63 million and commits that the

Authority arrange for the provision of state funds necessary for the relocation, as well as up to \$10 million in state funds for the purchase of the property at fair market value. Assuming completion of

definitive documents, the transfer of the property to the Authority is

anticipated to occur before the end of 2008. In September 2006, the Kentucky Commission approved LG&E's application for authority to transfer applicable property as part of the arena transaction. In November 2006, the parties completed definitive documents relating

the arena transactions. See also Note 9, Subsequent Events.

## OMU LITIGATION

In May 2004, the City of Owensboro, Kentucky and Owensboro Municipal Utilities (collectively "OMU") commenced a suit now removed to the U.S.

District Court for the Western District of Kentucky, against KU concerning a long-term power supply contract (the "OMU Agreement") with

KU. The dispute involves interpretational differences regarding

under the OMU Agreement, including various payments or charges between

KU and OMU and rights concerning excess power, termination and emissions allowances. The complaint seeks approximately \$6 million in

damages for periods prior to 2004 and OMU is expected to claim further

amounts for later-occurring periods. OMU has additionally requested injunctive and other relief, including a declaration that KU is in material breach of the contract. KU has filed an answer in that court

denying the OMU claims and presenting counterclaims. During 2005,

FERC declined KU's application to exercise exclusive jurisdiction over

the matter. In July 2005, the district court resolved a summary

judgment motion made by KU in OMU's favor, ruling that a contractual provision grants OMU the ability to terminate the contract without cause upon four years' prior notice, for which ruling KU retains certain rights to appeal. At this time the district court case is in the discovery stage and currently a trial date of January 2008 has been

scheduled. In May 2006, OMU issued a notification of its intent to terminate the contract in May 2010, without cause, absent any earlier

relief which may be permitted by the proceeding.

#### ENVIRONMENTAL MATTERS

In April 2006, the EPA issued a notice of violation for alleged violations of the Clean Air Act involving work performed on Unit 3 of

KU's E.W. Brown Station in 1997. The EPA alleges modification of a source without a permit, failure to comply with requirements under the

Prevention of Significant Deterioration ("PSD") program, operation of a

source in violation of the New Source Performance Standards ("NSPS"),

and failure to identify the applicability of PSD and NSPS requirements

in compliance certifications. Violations, if ultimately found, could result in additional expenditures on pollution controls or civil penalties. KU has responded to certain data requests of the EPA and held initial discussions with the EPA regarding this matter. Due to the

early stage of this matter, KU is unable to determine its ultimate potential impact.

The Companies are subject to SO2 and NOx emission limits on their electric generating units pursuant to the Clean Air Act. The Companies

placed into operation significant NOx controls for their generating units prior to the 2004 summer ozone season. As of September 30, 2006,

LG&E and KU have incurred total capital costs of approximately \$187 million and \$215 million, respectively, to reduce their NOx

to required levels. In addition, the Companies incur additional operating and maintenance costs in operating the new NOx controls. On

March 10, 2005, the EPA issued the final CAIR which requires substantial additional reductions in SO2 and NOx emissions from electric generating units. The CAIR provides for a two-phased reduction

program with Phase I reductions in NOx and SO2 emissions in 2009 and 2010, respectively, and Phase II reductions in 2015. On March 15, 2005.

the EPA issued a related regulation, the final CAMR, which requires substantial mercury reductions from electric generating units. The CAMR

also provides for a two-phased reduction, with the Phase I target in

2010 achieved as a "co-benefit" of the controls installed to meet the

CAIR. Additional control measures will be required to meet the Phase  $\mbox{\sc II}$ 

target in 2018. Both the CAIR and the CAMR establish a cap and trade framework, in which a limit is set on total emissions and allowances can be bought or sold on the open market to be used for compliance, unless the state chooses another approach. LG&E currently has FGDs

all its coal-fired units, but will continue to evaluate improvements to

further reduce SO2 emissions.

on

In order to meet these new regulatory requirements, KU has implemented

a plan for adding significant additional SO2 controls to its generating

units. Installation of additional SO2 controls will proceed on a phased

basis, with construction of controls (i.e., FGDs) having commenced in

September 2005 and continuing through the final installation and operation in 2009. KU estimates that it will incur \$809 million in capital costs related to the construction of the FGDs to achieve compliance with current emission limits on a company-wide basis. Of this amount, \$126 million has been incurred through September 30,

In addition, KU will incur additional operating and maintenance costs

in operating the new SO2 controls.

The Companies are also monitoring several other air quality issues which may potentially impact coal-fired power plants, including the EPA's revised air quality standards for ozone and particulate matter and measures to implement the EPA's Clean Air Visibility Rule.

During 2006, the EPA and state environmental authorities agreed to a tentative general settlement with KU and other parties regarding recovery of remediation and other costs relating to the former Tindall

transformer scrap yard. KU's share of such overall settlement is

than \$1 million. The tentative settlement remains subject to certain actions at the EPA and state levels, including completion of certain public notice and comment procedures, following which actions final regulatory approvals can commence.

In the normal course of business, lawsuits, claims, environmental actions and various non-ratemaking governmental proceedings arise against the Companies. To the extent that damages are assessed in any

lawsuits relating to the above, the Companies believe that their insurance coverage or other appropriate reserves are adequate.

Management, after consultation with legal counsel, and based upon e

present status of these items, does not anticipate that liabilities arising out of other currently pending or threatened lawsuits and

claims of the type referenced above will have a material adverse effect

on the Companies' financial position or results of operations.

# EMPLOYEES AND LABOR RELATIONS

Effective August 1, 2006, KU and its employees represented by IBEW Local 2100 entered into a new three-year collective bargaining agreement. The new agreement provides for negotiated increases or changes to wages, benefits or other provisions and for annual wage re-

openers.

### PENSION LEGISLATION

The Pension Protection Act of 2006 was enacted in August 2006. Among other matters, this comprehensive legislation contains provisions applicable to defined benefit plans which generally (i) mandate 100% funding of current liabilities within seven years; (ii) increase

deduction levels regarding contributions; (iii) revise certain actuarial assumptions, such as mortality tables and discount rates; and

(iv) raise federal insurance premiums and other fees for funded and distressed plans. The legislation also contains similar provisions relating to defined-contribution plans and qualified and nonqualified

executive pension plans and other matters. The Companies are currently

examining the potential impacts of the Pension Protection Act of 2006.

# 7. Segments of Business

LG&E's revenues, net income and total assets by business segment for the three and nine months ended September 30, 2006 and 2005, follow:

	Three	Months	Nine
Months			
	End		Ended
	Septemb	er 30,	September
30,			
(in millions)	2006	2005	2006

104	Net Income	40		<b>J</b> (
	Total assets	3,017	2,967	3,017
2,967				

KU is an electric utility company. It does not provide natural gas service and, therefore, is presented as a single business segment.

## 8. Related Party Transactions

LG&E, KU, subsidiaries of E.ON U.S., and other subsidiaries of E.ON engage in related-party transactions. These transactions are generally

performed at cost and in accordance with applicable FERC, Kentucky Commission and Virginia Commission regulations. The significant related-

party transactions are disclosed below.

### ELECTRIC PURCHASES

The Companies' intercompany electric revenues and purchased power expense from affiliated companies for the three and nine months ended

September 30, 2006 and 2005 were as follows:

	(in millions)		Three Months Ended September 30, 2006 2005			Nine Months Ended September 30, 2006 20

4 LG&E billings to KU	21	55	31
83 KU billings to LG&E	14	8	29
21			

## 9. Subsequent Events

In October 2006, the Companies paid approximately \$33 million to the MISO pursuant to a revised MISO invoice regarding the exit fee and made

related FERC compliance filings. The Companies' payment of this exit fee amount was with reservation of their rights to contest the

or components thereof, following a continuing review of its calculation

and supporting documentation.

In October 2006, E.ON U.S., LG&E and KU announced plans to provide up  $\,$ 

to \$25 million over a period of up to twelve years to the FutureGen Industrial Alliance, Inc. ("FutureGen"), a non-profit consortium. FutureGen will conduct research, development and demonstration activities relating to advanced coal technologies, including proposed

construction of the world's first coal-fired, "near zero emissions" power plant. Among the members of FutureGen are companies with

interests in coal-fired electric power generation or coal production.

FutureGen has signed an initial cooperative agreement with the DOE and

expects to sign a full-scope cooperative agreement in 2007. Beyond their initial aggregate membership amount of \$0.3 million, E.ON U.S. and the Companies have rights at sequential future times to terminate

participation prior to incurring the obligation to contribute the relevant remaining contribution amounts. The next estimated contribution will be in the amount of \$0.8 million during the remainder

of 2006.

In October 2006, KU entered into a \$50 million long-term unsecured loan

from Fidelia. The loan matures in October 2016, and has an interest rate of 5.675%.

In October 2006, the Kentucky Commission commenced an inquiry into elements of KU's planned construction of one of its three new FGD's at

the Ghent generating station. The proceeding requests additional information from KU regarding configuration details, expenditures and

the proposed construction sequence applicable to future construction phases of the Ghent FGD project. The inquiry focuses on KU's proposal

to complete the project in a manner which would result in connecting the final new FGD to the generating unit currently served by an existing FGD and reconnecting such existing FGD to the final remaining

generating unit. Pursuant to various Kentucky Commission approvals, KU

has built and operated an FGD on one generating unit since the mid-1990's and is in varying stages of construction or pre-construction on

FGD's for the remaining three generating units at its Ghent plant.  $\kappa \tau \tau$ 

is currently unable to predict the outcome and ultimate impact, if any,

of the Kentucky Commission's proceeding.

In November 2006, the Kentucky Commission issued orders for both Companies regarding the routine periodic reviews approving the changes

and credits billed through the FAC during the review period.

In November 2006, LG&E completed certain agreements pursuant to its August 2006 MOU with the Authority regarding the proposed construction

of an arena in downtown Louisville. LG&E entered into a relocation agreement providing for the reimbursement by the Authority to LG&E of

the costs to be incurred in moving certain LG&E facilities related to

the arena transaction, which costs are currently estimated to be

approximately \$63 million. The parties further entered into a property sale contract providing for LG&E's sale of a downtown site

the Authority for approximately \$10 million, which represents the appraised value of the parcel, less certain agreed demolition costs. The amounts specified in the contracts are subject to certain adjustments. Depending upon continuing progress in the proposed

transaction generally, the transactions contemplated by the contracts

are anticipated to occur between 2006 and 2010.

Item 2. Management's Discussion and Analysis of Financial Condition

and Results of Operations.

### General

The following discussion and analysis by management focuses on those factors that had a material effect on the Companies' financial results of

operations and financial condition during the three and nine month periods

ended September 30, 2006, and should be read in connection with the financial statements and notes thereto.

Some of the following discussion may contain forward-looking statements that are subject to certain risks, uncertainties and assumptions. Such forward-looking statements are intended to be identified in this document

by the words "anticipate," "expect," "estimate," "objective," "possible,"

"potential" and similar expressions. Actual results may vary materially.

Factors that could cause actual results to differ materially include: general economic conditions; business and competitive conditions in the energy industry; changes in federal or state legislation; unusual weather;

actions by state or federal regulatory agencies; and other factors described from time to time in the Companies' reports to the SEC, including

the Annual Reports on Form 10-K for the year ended December 31, 2005.

# Executive Summary

LG&E and KU, subsidiaries of E.ON U.S. (indirect subsidiaries of E.ON), are regulated public utilities. At September 30, 2006, LG&E supplied electricity to approximately 397,000 customers and natural gas to approximately 322,000 customers in Louisville and adjacent areas in Kentucky. At September 30, 2006, KU provided electricity to approximately 499,000 customers in 77 counties in central, southeastern and western Kentucky, to approximately 30,000 customers in southwestern Virginia and 5 customers in Tennessee. KU also sells wholesale electricity to 12 municipalities.

The mission of the Companies is to build on our tradition and achieve world-class status providing reliable, low-cost energy services and superior customer satisfaction; and to promote safety, financial success

and quality of life for our employees, communities and other stakeholders.

The Companies' strategy focuses on the following:

- Achieve scale as an integrated U.S. electric and gas business through

organic growth;

- Maintain excellent customer satisfaction;
- Maintain best-in-class cost position versus U.S. utility companies;
- Develop and transfer best practices throughout the company;
- Invest in infrastructure to meet expanding load and comply with increasing environmental requirements;
- Achieve appropriate regulated returns on all investment;
- Attract, retain and develop the best people; and
- Act with a commitment to corporate social responsibility that enhances

the well being of our employees, demonstrates environmental stewardship, promotes quality of life in our communities and reflects

the diversity of the society we serve.

In a June 2004 order, the Kentucky Commission accepted the settlement agreements reached by the majority of the parties in the rate cases filed

by the Companies in December 2003. Under the ruling, the LG&E utility base

electric rates have increased \$43 million (7.7%) and base natural gas rates

have increased \$12 million (3.4%) annually. Base electric rates at KU have

increased \$46 million (6.8%) annually. The rate increases took effect on

July 1, 2004. The 2004 increases were the first increases in electric base

rates for the Companies in 13 and 20 years, respectively; the previous natural gas rate increase for the LG&E gas utility took effect in September

2000.

The Companies have begun construction of another base-load coal-fired unit

at the Trimble County site. The Companies believe this is the least cost

alternative to meet the future needs of customers. Trimble County Unit 2.

with a 750 Mw capacity rating, is expected to be jointly owned by the Companies (75% owners of the unit) and the IMEA and IMPA (25% owners). Trimble County Unit 2 is expected to cost \$1.1 billion and be completed by

2010. The Companies' aggregate 75% share of the total Trimble County Unit 2

capital cost is approximately \$879 million and is estimated to be

approximately \$151 million for LG&E and \$601 million for KU through 2008.

Through September 2006, expenditures for Trimble County Unit 2 have been

\$18 million for LG&E and \$66 million for KU. In June 2006, the Companies

entered into a construction contract regarding the Trimble County Unit 2

project. See Note 6 of the Notes to Financial Statements, in Part 1, Item

1, herein.

In November 2005, the Kentucky Commission approved the CCN construction application of the Companies to expand the Trimble County generating plant.

Kentucky Commission approvals for the related transmission line CCNs were

granted in September 2005 and May 2006. In July 2006, certain property owners filed a motion for judicial appeal of the latter transmission line

CCN ruling. A schedule for such proceeding has not been established. In November 2005, the Kentucky Division for Air Quality issued the final air

permit, which was challenged via a request for remand in December 2005 by

three environmental advocacy groups, including the Sierra Club. Administrative proceedings with respect to the challenge are expected to

continue during 2006. A ruling thereafter may be anticipated in the first

half of 2007.

In July 2006, the FERC issued a final report under a routine audit that its

Office of Enforcement (formerly its Office of Market Oversight and Investigations) had conducted regarding the compliance of E.ON U.S. and subsidiaries, including LG&E and KU, under the FERC's standards of conduct

and codes of conduct requirements, as well as other areas. The final report

contained certain findings calling for improvements in E.ON U.S. and subsidiaries' structures, policies and procedures relating to transmission,

generation dispatch, energy marketing and other practices. E.ON U.S. and

affiliates have agreed to certain corrective actions and plan to submit procedures related to such corrective actions to the FERC. The corrective

actions are in the nature of organization and operational improvements as

described above and are not expected to have a material adverse impact on

the Companies' results of operations or financial condition.

### Results of Operations

The results of operations for the Companies are affected by seasonal

fluctuations in temperature and other weather-related factors. Because of

these and other factors, the results of one interim period are not necessarily indicative of results or trends to be expected for the full year.

Three Months Ended September 30, 2006, Compared to Three Months Ended September 30, 2005

#### LG&E Results:

LG&E's net income decreased \$2 million (5%) for the three months ended September 30, 2006, as compared to the three months ended September 30, 2005, primarily due to lower retail sales volumes resulting from cooler weather than last year and a higher effective income tax rate this year,

partially offset by lower MISO expenses and lower other operation expenses

primarily from the completion of the VDT amortization earlier this year.

A comparison of LG&E's revenues for the three months ended September 30.

2006, with the three months ended September 30, 2005, reflects increases

and (decreases) which have been segregated by the following principal causes:

Cause	Electric	Gas
(in millions)	Revenues	Revenues
Retail sales:		
Fuel and gas supply adjustments	\$3	\$1
Environmental cost recovery		
surcharge	(1)	•••
Merger surcredit	1	-
Variation in sales volume and		
other	(12)	(2)
Total retail sales	(9)	(1)
Wholesale sales	4	-
MISO Day 2 RSG MWP	(10)	-
Total	\$(15)	\$(1)

Electric revenues decreased \$15 million (5%) primarily due to:

- Decreased sales volumes delivered (\$12 million) resulting from a 16%
  - decrease in cooling degree days in the third quarter of 2006 as compared to the same period in 2005
- Decreased MISO related revenue (\$10 million) due to the accounting reclassification of MISO Day 2 RSG MWP in the third quarter of 2005.

This reclass of the RSG MWP was made from an expense account to a revenue account back to the inception of MISO Day 2 on April 1, 2005.

- Increased fuel costs (\$3 million) billed to customers through the fuel
  - adjustment clause
  - Increased wholesale sales (\$4 million) largely due to 20% higher

volumes

Gas revenues for the quarter ending September 2006 as compared to the same

period last year were essentially flat with no significant variances.

Fuel for electric generation and gas supply expenses comprise a large component of LG&E's total operating expenses. Increases or decreases in the

cost of fuel and natural gas supply are reflected in LG&E's electric and

natural gas retail rates, through the fuel adjustment clause and gas supply

clause, subject to the approval of the Kentucky Commission.

Fuel for electric generation increased \$6 million (8%) in 2006 primarily

due to:

- Increased unit cost of fuel burned (\$3 million) due to higher fuel prices
- Increased generation (\$3 million) due to higher unit availability

Power purchased decreased \$8 million (24%) in 2006 primarily due to:

- Decreased volumes purchased (\$9 million) due to higher unit availability and lower retail sales volumes
- Increased unit cost of purchases (\$1 million) due to higher market prices

Gas supply expenses decreased \$1 million (5%) in 2006 primarily due to:

- Decreased unit cost of natural gas purchased (\$3 million)
- Increased volumes delivered to the distribution system (\$2 million)

Other operation and maintenance expenses decreased \$18 million (20%) in 2006.

Other operation expenses decreased \$23 million (34%) primarily due to:

- Decreased other power supply costs (\$16 million) primarily due to lower MISO Day 2 expenses
- Decreased administrative and general expenses (\$7 million) primarily

due to completion of the VDT amortization

Maintenance expense increased \$3 million (22%) primarily due to:

- Increased electric distribution maintenance (\$2 million) primarily due

to tree trimming

- Increased steam generation maintenance (\$1 million) primarily related

to Mill Creek Unit 4

Property and other taxes increased \$1 million (30%)

Other income increased \$2 million in 2006 primarily due to non-hedging derivative mark-to-market income.

Interest expense increased \$2 million (33%) in 2006 primarily due to:

- Increased interest rates on variable rate debt (\$2 million)

- Increased interest expense on tax deficiencies (\$1 million)
- Decreased interest expense on the swaps (\$1 million)

The weighted average interest rate on variable-rate bonds for the three months ended September 30, 2006, was 3.63%, compared to 2.54% for the comparable period in 2005.

A comparison of the LG&E effective income tax rate for the three months ended September 30, 2006 and 2005 follows:

	Thre	ee	Three	
	Months	Ended	Months	
Ended				
	September	30, 2006	September 30,	
2005				
Effective Rate				
Statutory federal income tax				
rate	35	0%	35.0%	
State income taxes net of federa	1			
benefit	4	. 0	3.7	
Reduction of previous accruals	(0	.6)	(9.0)	
Amortization of investment tax				
credits	(1	(6)	(1.8)	
Other differences	(1	.3)	(1.6)	
Effective income tax				
rate	35	.5%	26.3%	

In September 2005, E.ON U.S. Investments Corp., the parent of E.ON U.S. and

indirect parent of LG&E, received notice from the Congressional Joint Committee on Taxation approving the IRS audit of the consolidated group's

returns for the periods December 1999 through December 2003. As a result of

this approval, LG&E released income tax reserves of \$5.1 million in the third quarter of 2005. Further reductions of previous tax accruals were made in the third quarter of 2006 primarily due to the expiration of the

statute of limitations for a prior year.

The change in amortization of investment tax credits and other differences

is largely attributable to the change in the levels of pre-tax income.

### KU Results:

KU's net income increased \$17 million (53%) for the three months ended September 30, 2006, as compared to the three months ended September 30, 2005, primarily due to higher equity in earnings from EEI, lower MISO expenses and lower other operation expenses primarily from the completion

of the VDT amortization earlier this year, partially offset by lower retail

and wholesale sales volumes and increased interest expense.

A comparison of KU's revenues for the three months ended September 30,

2006, with the three months ended September 30, 2005, reflects increases

and (decreases) which have been segregated by the following principal causes:

Cause	Electric
(in millions)	Revenues
Retail sales:	
Fuel supply adjustments	\$27
Environmental cost recovery	
surcharge	3
Merger surcredit	2
Variation in sales volumes and	
other	(13)
Total retail sales	19
Wholesale sales	(10)
MISO Day 2 RSG MWP	(14)
Total	\$(5)

Electric revenues decreased \$5 million (1%) in 2006 primarily due to:

- Decreased MISO related revenue (\$14 million) due to the accounting reclassification of MISO Day 2 RSG MWP in the third quarter of 2005.

This reclass of the RSG MWP was made from an expense account to a revenue account back to the inception of MISO Day 2 on April 1, 2005.

- Decreased sales volumes delivered (\$13 million) resulting from a 21%

decrease in cooling degree days in the third quarter of 2006, as compared to the same period in 2005

- Decreased wholesale revenues (\$10 million) largely due to 37% lower

volumes

- Increased fuel costs (\$27 million) billed to customers through the fuel adjustment clause due to higher coal prices
- Increased environmental cost recovery (\$3 million) billed to customers
  - Increased merger surcredit revenues (\$2 million)

Fuel for electric generation comprises a large component of KU's total operating expenses. Increases or decreases in the cost of fuel are reflected in KU's retail electric rates through the fuel adjustment clause,

subject to the approval of the Kentucky Commission, the Virginia State Corporation Commission and the FERC.

Fuel for electric generation increased \$11 million (9%) in 2006 primarily due to:

- Increased unit cost of fuel burned (\$17 million) due to higher fuel

prices

- Decreased generation (\$6 million) due to lower sales volumes

Power purchased decreased \$16 million (25%) in 2006 primarily due to:

- Decreased unit cost of purchases (\$12 million) due to lower market prices

- Decreased volumes purchased (\$4 million) due to higher unit availability and lower sales volumes

Other operation and maintenance expenses decreased \$17 million (21%) in 2006.

Other operation expenses decreased \$19 million (33%) primarily due to:

- Decreased other power supply costs (\$15 million) primarily due to lower

MISO Day 2 expenses

- Decreased administrative and general expenses (\$3 million) primarily

due to the completion of the VDT amortization

- Decreased transmission expense (\$2 million) primarily due to lower MISO

Day 1 expenses

- Increased steam generation operations expense (\$1 million) Property and other taxes increased \$1 million (29%)

Other income - net increased \$11 million primarily due to:

- Increased equity in earnings from EEI as a result of EEI selling electricity at market based rates, effective January 2006 (\$9 million)
- Increased non-hedging derivative mark-to-market income (\$2 million)

Interest expense increased \$1 million (33%) primarily due to higher interest rates on variable rate debt. The weighted average interest rate on

variable-rate bonds for the three months ended September 30, 2006, was 3.63%, compared to 2.54% for the comparable period in 2005.

Interest expense to affiliated companies increased \$2 million (50%) in 2006 primarily due to increased borrowing from Fidelia.

A comparison of the KU effective income tax rate for the three months ended September 30, 2006 and 2005 follows:

	Three Months	Three
Months		
	Ended	Ended
	September	
September		
•	30, 2006	30,
2005		
Effective Rate		
Statutory federal income tax		
rate	35.0%	35.0%
State income taxes net of federal		
benefit	4.5	4.6
Reduction of previous accruals	(0.3)	(8.9)
Amortization of investment tax		
credits	(0.4)	(0.9)
EEI dividend	(3.0)	_
EEI adjustment	••	6.3

Other differences (2.0)
Effective income tax rate 33.8%

.0) (0.1) .8% 36.0%

The EEI dividend in the third quarter of 2006 reflects tax benefits associated with the receipt of dividends from KU's investment in EEI. During the third quarter in 2005, KU recognized additional deferred tax expense (\$3.1 million) related to the undistributed earnings in its EEI unconsolidated investment. An EEI management decision regarding changes in

the distribution of EEI's previous earnings led to the decision to provide

deferred income taxes for all book and tax basis differences in this investment.

The change in amortization of investment tax credits is largely attributable to the change in the levels of pre-tax income.

In September 2005, E.ON U.S. Investments Corp., the parent of E.ON U.S. and

indirect parent of KU, received notice from the Congressional Joint Committee on Taxation approving the IRS audit of the consolidated group's

returns for the periods December 1999 through December 2003. As a result of

this approval, KU released income tax reserves of \$4.4 million in the third

quarter of 2005. Further reductions of previous tax accruals were made in

the third quarter of 2006 primarily due to the expiration of the statute of

limitations for a prior year.

Nine Months Ended September 30, 2006, Compared to Nine Months Ended September 30, 2005

# LG&E Results:

LG&E's net income decreased \$14 million (13%) for the nine months ended September 30, 2006, as compared to the nine months ended September 30, 2005, primarily due to lower electric and gas retail and wholesale sales

volumes resulting from milder weather this year, higher interest

and a higher effective income tax rate, partially offset by lower other operations expenses primarily from the completion of the VDT amortization

earlier this year and lower MISO expenses.

A comparison of LG&E's revenues for the nine months ended September 30, 2006, with the nine months ended September 30, 2005, reflects increases and

(decreases) which have been segregated by the following principal causes:

Cause Electric Gas (in millions) Revenues Revenues

-				~	~	
PΩ	•	2	٦	-1	sales	٠
100	-	•	-	-	ليد سايله يان ت	٠

Fuel and gas supply adjustments	\$18	\$74
Merger surcredit	2	-
Environmental cost recovery	(1)	•••
Value delivery surcredit	-	1
Weather normalization	-	2
Variation in sales volume and		
other	(19)	(34)
Total retail sales	Mer	43
Wholesale sales	(28)	(16)
MISO Day 2 RSG MWP	(7)	***
Other	(2)	1
Total	\$(37)	\$28

Electric revenues decreased \$37 million (5%) in 2006 primarily due to:

- Decreased wholesale sales (\$28 million) resulting from 16% lower volumes
- Decreased retail sales volumes and other (\$19 million) resulting from
- a 12% decrease in cooling degree days as compared to the same períod

in 2005

- Decreased MISO related revenue (\$7 million) largely due to the accounting reclassification of MISO Day 2 RSG MWP in the third quarter
- of 2005. This reclass of the RSG MWP was made from an expense account
- to a revenue account back to the inception of MISO Day 2 on April 1,

2005.

- Increased fuel costs (\$18 million) billed to customers through the fuel adjustment clause due to higher costs of coal

Gas revenues increased \$28 million (11%) in 2006 primarily due to:

- Increased gas supply costs (\$74 million) billed to customers through
- the gas supply adjustment clause due to higher costs of natural gas
- Increased weather normalization revenues (\$2 million) due to warmer

weather

- Increased value delivery surcredit revenues (\$1 million)
- Decreased sales volumes and other (\$34 million) resulting from a
- decrease in heating degree days as compared to the same period in 2005
- Decreased wholesale sales (\$16 million) due to limited opportunities

to sell off-system

Fuel for electric generation and gas supply expenses comprise a large component of LG&E's total operating expenses. Increases or decreases in the

cost of fuel and natural gas supply are reflected in LG&E's electric and

natural gas retail rates, through the fuel adjustment clause and gas supply

clause, subject to the approval of the Kentucky Commission.

Fuel for electric generation increased \$13 million (6%) in 2006 primarily due to:

- Increased unit cost of fuel burned (\$17 million) due to higher fuel

prices

- Decreased generation (\$4 million) due to lower sales volumes

Power purchased decreased \$20 million (20%) in 2006 primarily due to:

- Decreased volumes purchased (\$30 million) due to higher unit availability and lower sales volumes
- Increased unit cost of purchases (\$10 million) due to higher market

prices

Gas supply expenses increased \$27 million (14%) in 2006 primarily due to:

- Increased unit cost of natural gas purchased (\$69 million)
- Decreased volumes delivered to the distribution system (\$41 million)

Other operation and maintenance expenses decreased \$15 million (7%) in 2006

Other operation expenses decreased \$25 million (15%) primarily due to:

- Decreased administrative and general expenses (\$14 million) primarily

due to the completion of the VDT amortization

- Decreased other power supply expenses (\$6 million) primarily due

lower MISO Day 2 expenses

- Decreased transmission expenses (\$6 million) primarily due to lower

MISO expenses

Maintenance expenses increased \$9 million (18%) primarily due to:

- Increased steam maintenance (\$4 million) primarily related Mill Creek Unit 4
- Increased distribution maintenance (\$4 million) primarily related to

storm restoration

- Increased administrative and general maintenance (\$2 million) Property and other taxes increased \$1 million (8%)

Interest expense increased \$5 million (29%) in 2006 primarily due to:

- Increased interest rates on variable rate debt (\$4 million)
- Increased interest on tax deficiencies (\$3 million)
- Decreased interest expense on the swaps (\$2 million)

The weighted average interest rate on variable-rate bonds for the nine months ended September 30, 2006, was 3.43%, compared to 2.36% for the comparable period in 2005.

A comparison of the LG&E effective income tax rate for the nine months ended September 30, 2006 and 2005 follows:

	Ended September	Ended September
	30, 2006	30, 2005
Effective Rate	50, 2000	50, 2005
Statutory federal income tax		
rate	35.0%	35.0%
State income taxes net of federal		
benefit	3.8	43
Reduction of previous accruals	(0.3)	(3.4)
Amortization of investment tax		
credits	(2.2)	(2.0)
Other differences	(2.0)	(1.4)
Effective income tax rate	34.3%	32.5%

State income taxes in 2006 reflect Kentucky Coal Tax credits earned. The

change in amortization of investment tax credits is largely attributable to

the change in the levels of pre-tax income.

In September 2005, E.ON U.S. Investments Corp., the parent of E.ON U.S. and

indirect parent of LG&E, received notice from the Congressional Joint Committee on Taxation approving the IRS audit of the consolidated group's

returns for the periods December 1999 through December 2003. As a result of

this approval, LG&E released income tax reserves of \$5.1 million in the third quarter of 2005. Further reductions of previous tax accruals were made in 2006 primarily due to the expiration of the statute of limitations

for a prior year.

# KU Results:

KU's net income increased \$22 million (25%) for the nine months ended September 30, 2006, as compared to the nine months ended September 30, 2005, primarily due to higher equity in earnings from EEI, lower MISO expenses, lower other operation expenses primarily from the completion of

the VDT amortization earlier this year and a lower effective income tax rate, partially offset by lower retail and wholesale sales volumes and increased interest expense.

A comparison of KU's revenues for the nine months ended September 30, 2006,

with the nine months ended September 30, 2005, reflects increases and (decreases) which have been segregated by the following principal causes:

Cause (in millions)	Electric
•	Revenues
Retail sales:	
Fuel supply adjustments	\$ 52
Environmental cost recovery surcharge	6
Merger surcredit	2
Rate and rate structure	2

Value delivery surcredit	1
Variation in sales volume and other	(8)
Total retail sales	55
Wholesale sales	(28)
MISO Day 2 RSG MWP	(4)
Other	(11)
Total	\$ 12

Electric revenues increased \$12 million (1%) in 2006 primarily due to:

- Increased fuel costs (\$52 million) billed to customers through the fuel

adjustment clause

- Increased environmental cost recovery surcharge (\$6 million)
- Increased merger surcredit revenues (\$2 million)
- Increased revenues from changes in Virginia rates and rate structure

(\$2 million)

- Decreased wholesale sales (\$28 million) resulting from 51% lower volumes
- Decreased transmission revenue (\$10 million) due to lower volumes
- Decreased retail sales volumes and other (\$9 million) resulting

10% decrease in cooling degree days as compared to the same period in  $2005\,$ 

- Decreased MISO related revenues (\$4 million) largely due to the accounting reclassification of MISO Day 2 RSG MWP in the third quarter of

 $2005\,. This$  reclass of the RSG MWP was made from an expense account to a

revenue account back to the inception of MISO Day 2 on April 1, 2005 .

Fuel for electric generation comprises a large component of KU's total operating expenses. Increases or decreases in the cost of fuel are reflected in KU's retail electric rates through the fuel adjustment clause.

subject to the approval of the Kentucky Commission, the Virginia State Corporation Commission and the FERC.

Fuel for electric generation increased \$35 million (12%) in 2006 primarily due to:

- Increased unit cost of fuel burned (\$37 million) due to higher fuel

prices

- Decreased generation (\$2 million) due to decreased sales volumes

Power purchased decreased \$21 million (13%) in 2006 primarily due to:

- Decreased volumes purchased (\$24 million) due to higher unit availability and lower sales volumes
- Increased unit cost of purchases (\$3 million) due to higher market prices

Other operation and maintenance expenses decreased \$12 million (6%) in 2006.

Other operation expenses decreased \$9 million (6%) primarily due to:
- Decreased other power supply expenses (\$9 million) primarily due to

lower MISO Day 2 expenses

- Decreased administrative and general expenses (\$3 million) primarily

due to the completion of the VDT amortization

- Increased transmission expenses (\$2 million)
- Increased steam generation operation expense (\$1 million)

Maintenance expenses decreased \$3 million (6%) primarily due to:

- Decreased steam generation maintenance (\$7 million) due to outages in

2005 at E.W. Brown, Ghent and Green River

- Increased administrative and general maintenance (\$2 million)
- Increased combustion turbine maintenance (\$1 million)
- Increased electric distribution maintenance (\$1 million)

Property and other taxes increased \$1 million (12%)

Other income - net increased \$21 million primarily due to increased equity

in earnings from EEI as a result of EEI selling electricity at market based

rates, effective January 2006.

Interest expense increased \$1 million (10%) in 2006 primarily due to:

- Increased cost of the interest rate swap (\$2 million)
- Increased interest rates on variable rate debt (\$2 million)
- Decreased interest due to replacing external debt with debt to affiliated companies (\$3 million)

The weighted average interest rate on variable-rate bonds for the nine months ended September 30, 2006, was 3.32%, compared to 2.39% for the comparable period in 2005.

Interest expense to affiliated companies increased \$5 million (42%) primarily due to:

- Increased borrowing from Fidelia (\$4 million)
- Increased borrowing from the money pool (\$1 million)

A comparison of the KU effective income tax rate for the nine months ended

September 30, 2006 and 2005 follows:

	Nine Months	Nine Months
	Ended	Ended
	September	September
	30, 2006	30, 2005
Effective Rate		
Statutory federal income tax		
rate	35.0%	35.0%
State income taxes net of federal		
benefit	4.4	4.7
Reduction of previous accruals	(0.1)	(3,2)
Amortization of investment tax		
credits	(0.5)	(0,9)
EEI dividend	(4.1)	-
EEI adjustment	-	2.3
Other differences	(1.6)	(0.9)
Effective income tax rate	33.1%	37.0%

The EEI dividend for the nine months ended September 30, 2006, reflects tax

benefits associated with the receipt of dividends from KU's investment in

EEI. During the third quarter in 2005, KU recognized additional deferred

tax expense (\$3.1 million) related to the undistributed earnings in its EEI

unconsolidated investment. Subsequent to an EEI management decision regarding changes in the distribution of EEI's previous earnings, KU has

elected to record deferred income taxes for all book and tax basis differences in this investment.

In September 2005, E.ON U.S. Investments Corp., the parent of E.ON U.S. and

the indirect parent of KU, received notice from the Congressional Joint Committee on Taxation approving the IRS audit of the consolidated group's

returns for the periods December 1999 through December 2003. As a result of

this approval, KU released income tax reserves of \$4.4 million in the

quarter of 2005. Further reductions of previous tax accruals were made in

2006 primarily due to the expiration of the statute of limitations for a prior year.

Liquidity and Capital Resources

The Companies' needs for capital funds are largely related to the construction of plant and equipment necessary to meet the needs of electric

and gas utility customers, in addition to debt service requirements and dividend payments. Internal and external lines of credit are maintained to

fund short-term capital requirements. The Companies believe that such sources of funds will be sufficient to meet the needs of the business in

the foreseeable future.

At September 30, 2006, the Companies were in a negative working capital position in part because of the classification of certain variable-rate pollution control bonds that are subject to tender for purchase at the option of the holder as current portion of long-term debt. The Companies

expect to cover any working capital deficiencies with cash flow from operations, money pool borrowings and borrowings from Fidelia.

Construction expenditures for the nine months ended September 30, 2006 amounted to \$104 million for LG&E and \$236 million for KU. At LG&E, capital

expenditures included Trimble County Unit 2, infrastructure for new customers, gas main replacements and capital repairs to Mill Creek Unit  $4\,$ .

At KU, capital expenditures included Trimble County Unit 2, FGD's and other

environmental equipment at the Brown and Ghent generating stations and infrastructure for new customers.

LG&E's cash balance decreased \$2 million during the nine months ended September 30, 2006, largely resulting from the retirement of debt and the

payment of dividends. KU's cash balance decreased \$2 million during the nine months ended September 30, 2006, largely resulting from increasing construction expenditures.

Variations in accounts receivable, inventories and accounts payable are generally not significant indicators of the Companies' liquidity. Such variations are primarily attributable to seasonal fluctuations in weather.

which have a direct effect on sales of electricity and natural gas. The decreases in LG&E's accounts receivable and natural gas stored underground

relate primarily to seasonal uses of natural gas.

For information regarding the Companies' use of interest rate swaps to hedge underlying variable-rate (LG&E) and fixed-rate (KU) debt obligations,

see Note 3 of the Notes to Financial Statements.

See Note 5 of the Notes to Financial Statements for information regarding

the Companies' long-term and short-term debt including: accounting treatment of bonds permitting tender for purchase at the option of the holder, re-negotiation of revolving credit lines, intercompany debt transactions and the issuance and redemption of financial instruments during the year.

Security ratings as of September 30, 2006, were:

	LG&E		KU	KU	
	Moody's	S&P	Moody's	S&P	
First mortgage bonds	A1	A	Al	А	
Preferred stock	Baal	BBB-	Baal	BBB-	
Commercial paper	P-1	A-2	₽-1	A-2	

These ratings reflect the views of Moody's and S&P. A security rating is

not a recommendation to buy, sell or hold securities and is subject to revision or withdrawal at any time by the rating agency.

LG&E made a discretionary contribution to the pension plan of \$18 million

in January 2006. LG&E made no contributions during 2005. KU made no contributions to the pension plan in 2006 or 2005.

Contingencies

For a description of significant contingencies that may affect the

Companies, reference is made to Part I, Item 3, Legal Proceedings in the

Companies' Annual Reports on Form 10-K for the year ended December 31, 2005; to Part I - Item 1 and Part II - Item 1, Legal Proceedings in the Companies' Quarterly Reports on Form 10-Q for the periods ended March 31,

2006 and June 30, 2006; and to Notes 2 and 6 of the Notes to Financial Statements in Part I - Item 1, and Part II - Item 1, Legal Proceedings herein.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

### Interest Rate Risk

The Companies use interest rate swaps to hedge exposure to market fluctuations in certain of their debt instruments. Pursuant to the Companies' policies, use of these financial instruments is intended to mitigate risk and earnings volatility and is not speculative in nature. Management has designated all of the Companies' interest rate swaps as hedge instruments. Financial instruments designated as cash flow hedges have resulting gains and losses recorded within comprehensive income and

stockholders' equity. To the extent a financial instrument or the underlying item being hedged is prematurely terminated or the hedge becomes

ineffective, the resulting gains or losses are reclassified from comprehensive income to net income. Financial instruments designated as fair value hedges are periodically marked to market with the resulting gains and losses recorded directly into net income to correspond with income or expense recognized from changes in market value of the items being hedged.

The potential change in interest expense associated with a 1% change in base interest rates of the Companies' non-hedged variable debt is estimated

at \$4 million each at September 30, 2006. The Companies' exposure to floating interest rates did not materially change during the first nine months of 2006.

The potential loss in fair value of LG&E's interest rate swaps resulting

from a hypothetical 1% change in base interest rates is estimated at approximately \$18 million as of September 30, 2006. The potential loss in

fair value of KU's interest rate swaps resulting from a hypothetical 1% change in base interest rates is estimated at less than \$1 million as of

September 30, 2006. These estimates are derived from third-party valuations. Changes in the market values of these swaps, if held to maturity, will have no effect on LG&E's or KU's net income or cash flow.

## Pension Risk

The Companies' costs of providing defined-benefit pension retirement plans

are dependent upon a number of factors, such as the rates of return on plan

assets, discount rate and contributions made to the plans. The Companies

have recognized an additional minimum liability as prescribed by SFAS  $_{\mbox{No.}}$ 

87, Employers' Accounting for Pensions because the accumulated benefit obligation exceeds the fair value of their plans' assets. The liabilities

were recorded as a reduction to comprehensive income, and did not affect

net income. The amount of the liability depends upon the discount rate, the

asset returns and contributions made by the Companies to the plans. If the

fair value of the plans' assets exceeds the accumulated benefit obligation,

the recorded liabilities will be reduced and comprehensive income will be

restored in the balance sheet. See Note 1 of the Notes to Financial Statements in Item 1, Part 1 for a discussion of the new accounting pronouncement SFAS No. 158, Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans.

A 1% increase or decrease in the assumed discount rate could have an approximate \$49 million positive or negative impact to the accumulated benefit obligation of LG&E. A 1% increase or decrease in the assumed discount rate could have an approximate \$33 million positive or negative

impact to the accumulated benefit obligation of KU.

LG&E made a discretionary contribution to the pension plan of \$18  $\min$ 

in January 2006. LG&E made no contributions during 2005. KU made no contributions to the pension plan in 2006 or 2005.

Energy & Risk Management Activities

The Companies conduct energy trading and risk management activities to maximize the value of power sales from physical assets they own. Certain

energy trading activities are accounted for on a mark-to-market basis in

accordance with SFAS No. 133, as amended. Wholesale sales of excess asset

capacity are treated as normal sales under SFAS No. 133, as amended, and

are not marked to market.

The fair values of the Companies' energy trading and risk management contracts as of September 30, 2006 were each approximately \$4 million. The

fair values at September 30, 2005, were less than \$1 million each. No changes to valuation techniques for energy trading and risk management activities occurred during 2006 or 2005. Changes in market pricing, interest rate and volatility assumptions were made during all periods. The

outstanding mark-to-market value is sensitive to changes in prices, price

volatilities and interest rates. The Companies estimate that a movement in

prices of \$1 and a change in interest and volatilities of 1% would result

in a change in the mark-to-market value of less than \$1 million. All contracts outstanding at September 30, 2006, have a maturity of less than

one year and are valued using prices actively quoted for proposed or executed transactions or quoted by brokers.

The Companies maintain policies intended to minimize credit risk and revalue credit exposures daily to monitor compliance with those policies.

As of September 30, 2006, 100% of the trading and risk management commitments were with counterparties rated BBB-/Baa3 equivalent or better.

#### MISO Exit

For further discussions of certain market risks relating to the Companies:

withdrawal from MISO, see also Part II, Item 1A, Risk Factors in this quarterly report and in the Companies' Annual Report on Form 10-K for the

year ended December 31, 2005.

Item 4. Controls and Procedures

The Companies maintain a system of disclosure controls and procedures designed to ensure that information required to be disclosed by the Companies in reports they file or submit under the Securities Exchange Act

of 1934 is recorded, processed, summarized and reported, within the time

periods specified in the Securities and Exchange Commission rules and forms. The Companies conducted an evaluation of such controls and procedures under the supervision and with the participation of the Companies' management, including the Chairman, President and Chief Executive Officer ("CEO") and the Chief Financial Officer ("CFO").

upon that evaluation, the CEO and CFO have concluded that the Companies'

disclosure controls and procedures are effective as of the end of the period covered by this report.

The Companies are not accelerated filers under the Sarbanes-Oxley Act of

2002 and associated rules (the "Act") and consequently anticipate issuing

Management's Report on Internal Control over Financial Reporting pursuant

to Section 404 of the Act in their first periodic report covering the fiscal year ended December 31, 2007 as permitted by SEC rulemaking.

In preparation for required reporting under Section 404 of the Act, the

Companies are conducting a thorough review of their internal controls over

financial reporting, including disclosure controls and procedures. Based on

this review, the Companies have made internal controls enhancements and will continue to make future enhancements to their internal control over

financial reporting. There has been no change in the Companies' internal

control over financial reporting that occurred during the fiscal quarter

ended September 30, 2006, that has materially affected, or is reasonably

likely to materially affect, the Companies' internal control over financial

reporting.

## Part II. Other Information

## Item 1. Legal Proceedings.

For a description of the significant legal proceedings involving the Companies, reference is made to the information under the following items

and captions of the Companies' respective combined Annual Report on Form 10-

K for the year ended December 31, 2005: Item 1, Business; Item 3, Legal

Proceedings; Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations; and Item 8, Financial Statements and

Supplementary Data in Notes 3 and 10. Reference is also made to the matters

described in Notes 2 and 6 of Part 1, Item 1 of the Companies' Ouarterly

Reports on Form 10-Q for the three months ended March 31, 2006 and June 30,

2006; and Notes 2 and 6 of the Notes to Financial Statements in Part I, Item 1 of this 10-Q. Except as described herein, to date, the proceedings

reported in the Companies' respective combined Annual Report on Form 10-K

have not changed materially.

## Other

In the normal course of business, other lawsuits, claims, environmental actions, and other governmental proceedings arise against the Companies. To

the extent that damages are assessed in any of these lawsuits, the Companies believe that their insurance coverage is adequate.

Management,

after consultation with legal counsel, does not anticipate that liabilities

arising out of other currently pending or threatened lawsuits and claims

will have a material adverse effect on LG&E's or KU's financial position or results of operations, respectively.

Item 1A. Risk Factors.

MISO Exit

LG&E and KU withdrew from the MISO effective September 1, 2006. The resulting changes to transmission and wholesale power market structures and

prices are not completely estimable and may result in unforeseen effects on

energy purchases and sales, transmission and related costs or revenues. As

required by the FERC, in connection with their exit, the Companies have engaged two independent third parties to perform certain oversight and functional control activities relating to transmission and related activities. Such activities may have an effect on the Companies' abilities

to access the transmission system for wholesale or native load power activities. The Companies will save certain MISO membership costs and charges, but will incur a MISO exit fee as well as fees related to the new

transmission service vendors. The Companies believe that, over time, the

benefits and savings from their exit of the MISO will outweigh the costs

and expenses. However, until post-MISO market conditions and operations have matured, the effects on financial condition, liquidity or results of

operations will remain difficult to fully predict.

See Note 2 of LG&E's and KU's Notes to Financial Statements in Part I, Item 1 of this 10-Q.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

2(c)

LG&E has an existing \$5.875 series of mandatorily redeemable preferred stock outstanding having a current redemption price of \$100 per share. The

preferred stock has a sinking fund requirement sufficient to retire a minimum of 12,500 shares on July 15 of each year commencing with July 15.

2003, and a minimum of 187,500 shares on July 15, 2008 at \$100 per share.

LG&E redeemed 12,500 shares in accordance with these provisions on July 15,

2006, leaving 200,000 shares currently outstanding. Beginning with the three months ended September 30, 2003, LG&E reclassified, at fair value,

its \$5.875 series preferred stock as long-term debt with the minimum shares

mandatorily redeemable within one year classified as current portion of long-term debt. Dividends accrued beginning July 1, 2003 are charged as

interest expense, pursuant to SFAS No. 150, Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity.

Item 4. Submission of Matters to a Vote of Security Holders.

- a)LG&E's and KU's Annual Meetings of Shareholders were held on July 20, 2006.
- b) Not applicable.
- c) The matters voted upon and the results of the voting at the Annual Meetings are set forth below:

## 1. LG&E

i) The shareholders voted to elect LG&E's nominees for election to the  $\,$ 

Board of Directors, as follows:

Victor A. Staffieri - 21,294,223 common shares and 596,501 preferred shares cast in favor of election and 7,687 preferred shares withheld.

S. Bradford Rives - 21,294,223 common shares and 595,801 preferred

shares cast in favor of election and 8,387 preferred shares withheld.

John R. McCall - 21,294,223 common shares and 596,956 preferred

shares cast in favor of election and 7,232 preferred shares withheld.

Paul W. Thompson - 21,294,223 common shares and 596,656 preferred

shares cast in favor of election and 7,532 preferred shares withheld.

Chris Hermann - 21,294,223 common shares and 596,713 preferred shares cast in favor of election and 7,475 preferred shares withheld.

No holders of common or preferred shares abstained from voting on this matter.

ii)The shareholders voted 21,294,223 common shares and 599,991 preferred shares in favor of and 2,564 preferred shares against

approval of PricewaterhouseCoopers LLP as the Independent Registered Public Accounting Firm for 2006. Holders of 1,633 preferred shares abstained from voting on this matter.

#### 2. KU

the

i) The sole shareholder voted to elect KU's nominees for election to the Board of Directors, as follows:

37,817,878 common shares cast in favor of election and no shares withheld for each of Victor A. Staffieri, S. Bradford Rives, John R. McCall, Paul W. Thompson, and Chris Hermann, respectively.

ii) The sole shareholder voted 37,817,878 common shares in favor of and

no shares withheld for approval of PricewaterhouseCoopers LLP as the  $\,$ 

Independent Registered Public Accounting Firm for 2006.

No holders of common shares abstained from voting on these matters.

d) Not applicable.

Item 5. Other Information.

In October 2006, executive officers of LG&E and KU received initial grants

of performance units under a new long-term variable compensation plan, the

E.ON AG Share Performance Plan ("New Plan") established by E.ON during 2006. These grants, which have a maturity period of three years, commencing

on January 1 of this year, are payable in cash after the end of the maturity period. The ultimate amount of compensation paid to the executives

is determined by the value E.ON AG share performance during the final 60

days of the period and the relative performance of E.ON AG stock's total

shareholder return ("TSR") against the TSR of a European utility stock index over the maturity period. Minimum E.ON AG performance against the index must be attained in order for a performance unit to have any value.

The maximum value of a performance unit granted under the New Plan is three

times the initial value of the performance unit, which initial value is set

at E.ON AG's average share price for the 60 trading days preceding the commencement of the three year period. The performance units are subject to

accelerated payment prior to their maturity date, using performance calculations to date, upon certain events of change-in-control. Additionally, acceleration of payment may occur in the event of death, disability or termination of employment of the executive officer by the Company for other than for cause. This description is qualified in its entirety by reference to the text of the New Plan and related documents,

copies of which are filed with this Form 10-Q as Exhibits 10.01 and 10.02, respectively.

Louisville Gas and Electric Company Kentucky Utilities Company Notes to Financial Statements (Unaudited)

## 1. General

The unaudited financial statements include the accounts of the Companies. The common stock of each Company is wholly-owned by E.ON U.S. In the opinion of management, the unaudited condensed interim financial statements include all adjustments, consisting only of

recurring adjustments, necessary for a fair statement of financial position, results of operations, retained earnings, comprehensive

income and cash flows for the periods indicated. Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted pursuant to SEC rules and regulations.

although the Companies believe that the disclosures are adequate to make the information presented not misleading.

See the Companies' Annual Reports on Form 10-K for the year ended December 31, 2005, for information relevant to the accompanying financial statements, including information as to the significant accounting policies of the Companies.

## New Accounting Pronouncements

In July 2006, the FASB issued FIN 48, Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109, Accounting

for Income Taxes. FIN 48 is effective for fiscal years beginning after

December 15, 2006. FIN 48 clarifies accounting for income taxes to provide improved consistency of criteria used to recognize,

and measure benefits related to income taxes. The Companies are now analyzing the future impacts of FIN 48 on results of operations and financial condition.

## 2. Rates and Regulatory Matters

For a description of each line item of regulatory assets and liabilities for the Companies, reference is made to Part I, Item 8, Financial Statements and Supplementary Data, Note 3 of the Companies'

Annual Reports on Form 10-K for the year ended December 31, 2005.

The following regulatory assets and liabilities were included in LG&E's

Balance Sheets as of June 30, 2006 and December 31, 2005:

## Louisville Gas and Electric Company (Unaudited)

		,	June 30,	December
31, (i	n millions)		2006	2005
AR	0		\$21	\$20
Ga	s supply adjustments		21	29
Un	amortized loss on bonds		20	21
EC	R.		6	2
FA	C		5	_
VD	T		_	7
Ot	her		5	5
To	tal regulatory assets		\$78	\$84
Ac	cumulated cost of removal	of utility plant	\$225	\$219
De	ferred income taxes - net		44	42
Ga	s supply adjustments		40	17

Other 2 3
Total regulatory liabilities \$311 \$281

LG&E currently earns a return on all regulatory assets, excluding the

ARO regulatory assets, gas supply adjustments and the FAC. The ARO regulatory assets earn no current return and will be offset against the

associated regulatory liability (included in other regulatory liabilities), ARO asset and ARO liability at the time the underlying asset is retired. The gas supply adjustments and the FAC have sparate

rate mechanisms with recovery within twelve months.

The increase in FAC for the period is due to the higher cost of fuel being passed on to customers. The decrease in VDT for the period is due

to the completion of the amortization of the VDT in the first quarter

of 2006. The increase in the Gas supply adjustments net liability for

the period reflects over-recovery of gas supply costs, in process of being refunded to customers.

The following regulatory assets and liabilities were included in  ${\tt KU's}$ 

Balance Sheets as of June 30, 2006 and December 31, 2005:

## Kentucky Utilities Company (Unaudited)

	June 30,	December
31, (in millions)	2006	2005
ARO	\$21	\$20
Unamortized loss on bonds	10	11
ECR	5	4
FAC	27	12
VDT	<del></del>	3
Other	7	8
Total regulatory assets	\$70	\$58
Accumulated cost of removal of utility plant	\$288	\$281
Deferred income taxes - net	22	23
Other	10	11
Total regulatory liabilities	\$320	\$315

 $\ensuremath{\mathtt{KU}}$  currently earns a return on all regulatory assets, excluding the  $\ensuremath{\mathtt{ARO}}$ 

regulatory assets and the FAC. The ARO regulatory assets earn no current return and will be offset against the associated regulatory liability (included in other regulatory liabilities), ARO asset and ARO

liability at the time the underlying asset is retired. The FAC has a separate recovery mechanism with recovery within twelve months.

The increase in FAC for the period is due to the higher cost of fuel being passed on to customers. The decrease in VDT for the period is due

to the completion of the amortization of the VDT in the first quarter  $% \left( 1\right) =\left( 1\right) \left( 1\right) +\left( 1\right) +\left( 1\right) \left( 1\right) +\left( 1\right$ 

of 2006.

## ELECTRIC AND GAS RATE CASES

On June 30, 2004, the Kentucky Commission issued an order approving

increase in the base electric rates of the Companies and the natural gas rates of LG&E. The rate increases took effect on July 1, 2004.

During 2004 and 2005, the AG conducted an investigation of the Companies, as well as of the Kentucky Commission and its staff, requesting information regarding allegedly improper communications between the Companies and the Kentucky Commission, particularly during

the period covered by the rate cases. Concurrently, the AG had filed pleadings with the Kentucky Commission requesting rehearing of the rate

cases on computational components of the increased rates, including income taxes, cost of removal and depreciation amounts. In August 2004.

the Kentucky Commission denied the AG's rehearing request on the

of removal and depreciation issues and granted rehearing on the income

tax component. The Kentucky Commission agreed to hold in abeyance further proceedings in the rate case, until the AG filed its investigative report regarding the allegations of improper communication.

In January 2005 and February 2005, the AG filed a motion summarizing its investigative report as containing evidence of improper communications and record-keeping errors by the Companies in their conduct of activities before the Kentucky Commission or other state governmental entities and forwarded such report to the Kentucky Commission under continued confidential treatment to allow it to consider the report, including its impact, if any, on completing its investigation and any remaining steps in the rate case. To date,

Companies have neither seen nor requested copies of the report or its

contents.

In December 2005, the Kentucky Commission issued an order noting completion of its inquiry, including review of the AG's investigative

report. The order concludes that no improper communications occurred during the rate proceeding. The order further established a

schedule through the first quarter of 2006 for considering the sole issue for which rehearing was granted: state income tax rates used in

calculating the granted rate increase. On March 31, 2006, the Kentucky

Commission issued an order resolving this issue in the Companies' favor

consistent with the original rate increase order.

The Companies believe no improprieties have occurred in their communications with the Kentucky Commission and have cooperated in the

proceedings before the AG and the Kentucky Commission. The Companies are currently unable to predict whether there will be any additional actions or consequences as a result of the AG's report and investigation.

ECR

In June 2006, the Companies filed applications to amend their ECR plans  ${}^{\prime}$ 

with the Kentucky Commission seeking approval to recover investments

environmental upgrades at the Companies' generating facilities. The estimated capital cost of the upgrades for the years 2006 through

is approximately \$391 million (\$66 million for LG&E and \$325 million for KU), of which \$229 million is for the Air Quality Control System t

Trimble County Unit 2 (\$44 million for LG&E and \$185 million for KU) and \$95 million is for KU's Ghent Unit 2 Selective Catalytic Reduction.

A final order is expected to be issued by the end of 2006.

In April 2006, the Kentucky Commission initiated routine periodic reviews of the ECR mechanisms for the Companies. These proceedings are

expected to be completed before the end of the third quarter of 2006.

In December 2004, KU and LG&E filed applications with the Kentucky Commission for approval of a CCN to construct new SO2 control technology (FGDs) at KU's Ghent and Brown stations, and to amend LG&E's

compliance plan to allow recovery of new and additional environmental

compliance facilities. The estimated capital cost of the additional facilities for 2006 through 2008 is approximately \$720 million (\$40 million for LG&E and \$680 million for KU), of which \$560 million is or

the KU FGDs at Brown and Ghent. Hearings in these cases occurred during May 2005 and final orders were issued in June 2005, granting approval of the CCN and amendments to the Companies' compliance plans.

FAC

On February 15, 2006, KU filed with the Virginia Commission an application seeking approval of an increase in its fuel cost factor to

reflect higher fuel costs incurred during 2005, and anticipated to be

incurred in 2006, of approximately \$6 million. The Virginia Commission

approved KU's request on April 5, 2006.

VDT

In December 2001, the Companies received an order from the Kentucky Commission permitting them to set up regulatory assets for workforce reduction costs (VDT costs) and begin amortizing them over a five-rear

period beginning in April 2001. The order also reduced revenues through

a surcredit on bills to ratepayers over the same five-year period, reflecting a sharing (40% to the ratepayers and 60% to the Companies)

of the stipulated savings, net of amortization costs, of the workforce

reduction. The five-year VDT amortization period ended March 31, 2006.

On February 27, 2006, the AG, Kentucky Industrial Utility Consumers, Inc. and the Companies reached a settlement agreement on the future ratemaking treatment of the VDT surcredits and costs and subsequently

submitted a joint motion to the Kentucky Commission to approve the unanimous settlement agreement. Under the terms of the settlement agreement, the VDT surcredit will continue at the current level until

such time as LG&E or KU file for a change in electric or natural gas base rates. The Kentucky Commission issued an order on March 24, 2006,

approving the settlement agreement.

MISO

The MISO is a non-profit independent transmission system operator that

controls more than 100,000 miles of transmission lines over 1.1  $\min$ 

square miles in 17 northern Midwest states and one Canadian province.

The MISO operates the regional power grid and wholesale electricity market in an effort to optimize efficiency and safeguard reliability in

accordance with federal energy policy.

The Companies are now involved in proceedings with the Kentucky Commission and the FERC seeking the authority to exit the MISO.

on various financial analyses performed internally due to the July 2003

Kentucky Commission investigation into MISO membership, and particularly in light of the financial impact of MISO's implementation

of the new day-ahead and real-time markets, the Companies determined

that the costs of MISO membership, both now and in the future, outweigh

the benefits. A timeline of events regarding the MISO and various proceedings is as follows:

- September 1998 The FERC granted conditional approval for the formation of the MISO. The Companies were founding members.
- October 2001 The FERC ordered that all bundled retail loads and

grandfathered wholesale loads of each member transmission owner be included in the calculation of the MISO "cost adder," the Schedule 10 charges designed to recover the MISO's cost of operation, including start-up capital (debt) costs. The Companies

and several owners opposed the FERC order and filed suit with the
United States Court of Appeals

- February 2002 The MISO began commercial operations.
- February 2003 The FERC reaffirmed its position on the Schedule  $\,$
- 10 charges and the order was subsequently upheld by the U.S. Court of Appeals.
- July 2003 The Kentucky Commission opened an investigation into the Companies' MISO membership. Testimony was filed by the Companies that supported an exit from the MISO, under certain conditions.
- August 2004 The MISO filed its FERC-required TEMT. The Companies
  and other owners filed opposition to certain conditions of the TEMT

and sought to delay the implementation. Such opposition was denied

by the FERC.

- December 2004 The Companies provided the MISO its required one-year notice of intent to exit the grid.
- April 2005 The MISO implemented its day-ahead and real-time market (MISO Day 2), including a congestion management system.
- October 2005 The Companies filed documents with the FERC seeking authority to exit the MISO.
- November 2005 The Companies requested a Kentucky Commission order authorizing the transfer of functional control of their transmission facilities from the MISO to the Companies respectively, for the purpose of withdrawing from the MISO. The

request stated that the Tennessee Valley Authority ("TVA")

would

have control to the extent necessary to act as the Companies' Reliability Coordinator and for the Southwest Power Pool, Inc. ("SPP") to perform its function as the Companies' Independent Transmission Organization. The Kentucky Commission issued an

order

authorizing this transfer in July 2006.

- March 2006 - the FERC issued an order conditionally approving the request of the Companies to exit the MISO. The FERC order contained a number of conditions that the Companies needed to satisfy to effect their exit from the MISO including:

- Submission of various compliance filings addressing:
  - the Companies' hold-harmless obligations under the MISO Transmission Owners' Agreement, and the amount of the MISO exit fee to be paid by the Companies as calculated under

the

approved methodology;

- the Companies' anticipated arrangements with Southwest

Power

Pool, Inc. and Tennessee Valley Authority, including

revisions

to address certain independence and transmission planning considerations, and reciprocity arrangements to ensure

certain

KU requirements customers do not incur pancaked rates for transmission and ancillary services;

- the Companies' proposed Open Access Transmission Tariff as revised to address possible capacity hoarding, available transmission calculation methodology, curtailment priority

and

pricing, among other matters; and

- the Companies' finalized arrangements with the Southwest

Power

Pool, Inc. and Tennessee Valley Authority.

- The Companies must also file an application of the proposed Open

Access Transmission Tariff under Section 205 of the Federal

Power

Act including a proposed return on equity. During April 2006 through the present, the Companies have submitted filings to

the

FERC addressing the majority of the conditions contained in

the

March 2006 order, including a proposed return on equity of

10.88%

as part of its open access transmission tariff effective upon

any exit from the MISO.

- May 2006 - the Kentucky Commission issued an order approving the

request of the Companies to exit the MISO. The order authorized

the Companies, upon exit of the MISO, to establish a regulatory asset for the exit fee, subject to adjustment for possible future

MISO credits, and a regulatory liability for certain revenues which

may be collected via current base rates as a result of the existing

inclusion of amounts associated with certain MISO Schedule 10 charges.

- July 2006 - the Kentucky Commission issued an order approving the

Companies' contractual arrangements with TVA and SPP to provide services to the Companies as reliability coordinator and

services to the Companies as reliability coordinator and independent transmission organization, respectively, upon a withdrawal from the MISO. This order was subject to certain conditions based upon a satisfactory outcome of pending FERC proceedings involving the Companies' market-based rate authority.

- July 2006 - the Kentucky Commission issued further orders denying

the MISO's request for a rehearing regarding the May 2006 order and denying the MISO's request for intervenor status in the proceeding concerning the Companies' TVA/SPP arrangements.

- July 2006 - the FERC issued a further decision accepting, in substantial part, certain of the Companies' steps, including compliance and other filings, which constituted conditions to

the

the

FERC's March 2006 order conditionally approving their exit from

MISO. Also in July 2006, the FERC issued an order denying the MISO's request for a rehearing regarding the FERC's March 2006 order.

The Companies now estimate that they may complete their exit from the

MISO during late summer 2006. The Companies have tendered a contractual notice to the MISO providing for a withdrawal date of September 1, 2006. There remain certain further conditions that must

be satisfied under the FERC's exit orders, which conditions the Companies currently anticipate they can accomplish. The Companies are

in continuing discussions with the MISO concerning operational elements

of the exit and transition.

On or about the date of a completed exit from the MISO, and following  $% \left( 1\right) =\left( 1\right) +\left( 1$ 

initial calculation and invoicing from the MISO, the Companies would pay an exit fee to the MISO in an amount of up to approximately \$41 million (allocated approximately \$16 million for LG&E and \$25 million

for KU). The ultimate amount would be determined based upon the actual

timing and circumstances of exit and, following payment, is subject to

confirmation, correction and true-up, as agreed between the Companies

and the MISO. The Kentucky Commission's May 2006 order granted certain

relief regarding the exit fee, including the establishment of a regulatory asset relating to such fee and continuing ability to recover

certain MISO charges in existing rates.

While the Companies believe they can reasonably achieve the remaining

conditions imposed by the FERC relating to MISO exit by the late summer, including possibly as early as September 1, 2006, the actual timing or occurrence of withdrawal cannot be assured.

Market-Based Rate Authority

Beginning in April 2004, the FERC initiated proceedings to modify its

methods used to assess generation market power and has established more

stringent interim market screen tests. During 2005, in connection with

the Companies' tri-annual market-based rate tariff renewals, the FERC

continued to contend that the Companies failed such market screens in

certain regions. The Companies disputed this contention and, in  ${\it January}$ 

2006, in an attempt to resolve the matter, the Companies submitted proposed tariff schedules to the FERC containing a mitigation mechanism

with respect to applicable power sales into the control area of Big Rivers Electric Corporation ("BREC") in western Kentucky, where Western

Kentucky Energy Corp., an affiliate of the Companies, maintains a long-

term contractual relationship with BREC. Under the proposed tariff schedule, prices for such sales would be capped at a relevant MISO power pool index price. Should the Companies exit the MISO, the FERC

contended that they would have market power in their own joint control

area, potentially requiring a similar mitigation mechanism for power sales into such region. In July 2006, the FERC issued an order in the

Companies' market-based rate proceeding accepting the Companies' further proposal to address certain market power issues the FERC had claimed would arise upon an exit from the MISO. In particular, the Companies received permission to sell power at market-based rates at the interface of control areas in which they may be deemed to have market power, subject to a restriction that such power not be

collusively re-sold back into such control areas. Certain general FERC

proceedings continue with respect to market-based rate matters, and the

Companies' market-based rate authority is subject to such future developments.

In some cases, recent FERC decisions in other market-based rate proceedings have proposed or required cost-based, rather than market index, price caps. The Companies cannot predict the ultimate impact

the current or potential mitigation mechanisms on their future wholesale power sales

EPAct 2005

of

The EPAct 2005 was enacted on August 8, 2005. Among other matters, this

comprehensive legislation contains provisions mandating improved electric reliability standards and performance; providing economic and

other incentives relating to transmission, pollution control and renewable generation assets; increasing funding for clean coal generation incentives (see Note 6); repealing PUHCA 1935; enacting PUHCA 2005 and expanding FERC jurisdiction over public utility holding

companies and related matters via the Federal Power Act and PUHCA 2005.

The FERC was directed by the EPAct 2005 to adopt rules to address many

areas previously regulated by the other agencies under other statutes,

including PUHCA 1935. The FERC remains in various stages of rulemaking

on these issues and the Companies are monitoring these rulemaking activities and actively participating in these and other rulemaking proceedings. The Companies continue to evaluate the potential impacts

of the EPAct 2005 and the associated rulemakings and cannot predict what impact the EPAct 2005, and any uncompleted rulemakings, will have

on their operations or financial position.

## 3. Financial Instruments

The Companies use over-the-counter interest rate swaps to hedge exposure to market fluctuations in certain of their debt instruments.

Pursuant to the Companies' policies, use of these financial instruments

is intended to mitigate risk, earnings and cash flow volatility and is

not speculative in nature. Management has designated all of the interest rate swaps as hedge instruments. Financial instruments designated as cash flow hedges have resulting gains and losses recorded

within comprehensive income and stockholders' equity. Financial instruments designated as fair value hedges and the underlying hedged

items are periodically marked to market with the resulting net gains and losses recorded directly into net income. Upon termination of any

fair value hedge, the resulting gain or loss is recorded into net income.

As of June 30, 2006, LG&E was party to various interest rate swap agreements with aggregate notional amounts of \$211 million. Under these swap agreements, LG&E paid fixed rates averaging 4.38% and received variable rates based on LIBOR or the Bond Market Association's

municipal swap index averaging 3.67% at June 30, 2006. The swap agreements in effect at June 30, 2006, have been designated as cash flow hedges and mature on dates ranging from 2020 to 2033. The hedges

have been deemed to be fully effective resulting in a pretax gain of \$13 million for the six months ended June 30, 2006, recorded in comprehensive income. Upon expiration of these hedges, the amount recorded in comprehensive income will be reclassified into earnings. The amounts expected to be reclassified from comprehensive income to earnings in the next twelve months are immaterial. A deposit in the amount of \$7 million, used as collateral for the \$83 million interest

rate swap, is classified as restricted cash on LG&E's Balance Sheet. The amount of the deposit required is tied to the market value of the

swap.

As of June 30, 2006, KU was party to an interest rate swap agreement with a notional amount of \$53 million. Under this swap agreement, KU paid variable rates based on LIBOR averaging 7.24%, and received fixed

rates averaging 7.92% at June 30, 2006. The swap agreement in effect at

June 30, 2006 has been designated as a fair value hedge and matures in

2007. At June 30, 2006, the effect of marking this financial instrument and the underlying debt to market resulted in pretax gains

recorded in interest expense of less than \$1 million.

Interest rate swaps hedge interest rate risk on the underlying debt. Under SFAS No. 133, Accounting for Derivative Instruments and Hedging

Activities, as amended, in addition to swaps being marked to market, the item being hedged using a fair value hedge must also be marked to

market. Consequently at June 30, 2006, KU's debt reflects a mark-to-market adjustment of less than \$1 million.

At June 30, 2006, the Companies' percentage of debt having a variable

rate, including the impact of interest rate swaps, was 44% (\$364 million)

for LG&E and 47% (\$378 million) for KU.

#### 4. Pension and Other Post-retirement Benefit Plans

The following table provides the components of net periodic benefit cost for pension and other benefit plans for the three and six months

ended June 30, 2006 and 2005:

		Thr	ee Mo	nths E	nded	Si	x Mor	iths Ended	
		June 30,				June 30,

1	Recognized actuarial loss	1	1	1	1	2	2	1	
\$6	Total net period benefit cost	\$4	\$4	\$4	\$3	\$8	\$8	\$8	

LG&E made a discretionary contribution to the pension plan of \$18 million in January 2006. LG&E made no contributions during 2005. KU made no contributions to the pension plan in 2006 or 2005.

## 5. Short-Term and Long-Term Debt

Under the provisions for LG&E's variable-rate pollution control bonds,

Series S, T, U, BB, CC, DD and EE, and KU's variable-rate pollution control bonds Series 10, 12, 13, 14 and 15, the bonds are subject to tender for purchase at the option of the holder and to mandatory tender

for purchase upon the occurrence of certain events, causing the bonds

to be classified as current portion of long-term debt in the balance sheets. The average annualized interest rate for these bonds during the

six months ending June 30, 2006 was 3.38% for LG&E and 3.41% for KU.

During June 2006, LG&E renewed five revolving lines of credit with banks totaling \$185 million. There was no outstanding balance under any

of these facilities at June 30, 2006. LG&E expects to renew these facilities prior to their expiration in June 2007.

LG&E, KU and E.ON U.S. participate in an intercompany money pool agreement. Details of the balances at June 30, 2006 and December 31, 2005 were as follows:

	Total Money	Amount	Balance	Average
	Pool Available	Outstanding	Available	Interest
Rate				
(\$ in millions)				
June 30, 2006:				
LG&E	\$400	\$ 1.	\$399	4.96%
KÜ	\$400	\$ 52	\$348	4.96%
December 31, 2005	:			
LG&E	\$400	\$141	\$259	4.21%
KU	\$400	\$ 70	\$330	4.21%

 $\hbox{E.ON}\ \hbox{U.S.}$  maintains a revolving credit facility totaling \$200 million

with an affiliated company, E.ON North America, Inc., to ensure funding

availability for the money pool. The balance outstanding on this facility at June 30, 2006, was \$64 million.

Redemptions and maturities of long-term debt year-to-date through June

30, 2006, are summarized below:

### (\$ in millions)

,,,,	,		Principa	L	Secured/	
Year Maturity	Company	Description	Amount	Rate	Unsecured	
2006 2006	KU	First mortgage b	oonds \$36	5.99%	Secured	Jan

Issuances of long-term debt year-to-date through June 30, 2006, are summarized below:

## (\$ in millions)

			Principa	Secured/		
Year Maturity	Company	Description	Amount	Rate	Unsecured	
2006 2036	KU	Fidelia note	\$50	6.33%	Unsecured	Jun

## 6. Commitments and Contingencies

Except as may be discussed in this Quarterly Report on Form 10-Q (including Note 2), material changes have not occurred in the current

status of various commitments or contingent liabilities from that discussed in the Companies' Annual Report on Form 10-K for the year ended December 31, 2005 (including in Notes 3 and 10 to the financial

statements of the Companies contained therein) and Quarterly Report on

Form 10-Q for the quarter ended March 31, 2006 (including in Notes 2 and 6 to the financial statements contained therein). See the above-referenced notes in the Companies' Annual Report on Form 10-K and Quarterly Report on Form 10-Q for information regarding such commitments or contingencies.

#### TRIMBLE COUNTY UNIT 2

In June 2006, the Companies, as 75% owners, entered into and delivered

notice to proceed under an engineering, procurement and construction agreement with Bechtel Power Corporation ("Bechtel"), regarding construction of Trimble County Unit 2 valued at approximately \$1.1 billion. IMEA and IMPA, as 25% owners, are also parties to the contract. The contract is generally in the form of a lump-sum, turnkey

agreement for the design, engineering, procurement, construction, commissioning, testing and delivery of the project, according to designated specifications, terms and conditions. The contract price and its components are subject to a number of potential adjustments which may serve to increase or decrease the ultimate construction ice

paid or payable to the contractor. The contract also contains standard

representations, covenants, indemnities, termination and other provisions for arrangements of this type, including termination for convenience or for cause rights. In general, termination by the owners

for convenience or by the contractor due to owners' default will

payment obligations to payment for work or incentives performed or earned to date and termination by owners due to contractor's default will similarly limit payment obligations, subject however to owners' rights with respect to cover damages and to certain collateral provided. In connection with this matter, the Companies dismissed their litigation against Bechtel regarding the contract previously commenced in April 2006 in United States District Court for the Western

District of Kentucky.

In June 2006, the Companies filed an application with the Department of

Energy ("DOE") requesting certification to be eligible for investment

tax credits applicable to the construction of Trimble County Unit 2. The EPAct 2005 added a new 48A to the Internal Revenue Code, which provides for an investment tax credit to promote the commercialization

of advanced coal technologies that will generate electricity in an environmentally responsible manner. The application requested up to the maximum amount of "advanced coal project" credit allowed per

taxpayer, or \$125 million, based on an estimate of 15% of projected qualifying Trimble County Unit 2 expenditures. The DOE is anticipated

to select and certify feasible and suitable qualifying projects, in their discretion, from among the applicant group during the late fall

of 2006. If selected, the Companies would submit an additional application to the Internal Revenue Service ("IRS"). IRS action on such applications would thereafter be expected to occur during the fourth quarter of 2006. If, and to the extent the Companies' applications are ultimately accepted, the Companies could thereafter claim allocated federal income tax credits on eligible expenditures,

they occur over time, relating to the Trimble County Unit 2 project.

## LOUISVILLE DOWNTOWN ARENA

as

LG&E has been asked by the Louisville Arena Authority, Inc., a non-profit corporation (the "Authority"), to transfer certain property and

relocate certain LG&E facilities so that an LG&E-owned site, in part,

could be used for the development and construction of a new multipurpose arena in Louisville, Kentucky. The Authority and LG&E are
negotiating a non-binding letter of intent regarding the arena
transactions. LG&E estimates that the cost of relocating the LG&E
facilities will be approximately \$63 million and LG&E expects to
request that the Authority arrange for the provision of state funds
necessary for the relocation, as well as up to \$10 million in state
funds for the purchase of the property at fair market value. Current
estimates are that the arena project could be completed by
approximately 2010. The anticipated letter of intent would be
subject

to a number of contingencies, including completion of definitive documents and regulatory approvals necessary for the transactions contemplated.

### OMU LITIGATION

In May 2004, the City of Owensboro, Kentucky and Owensboro Municipal Utilities (collectively "OMU") commenced a suit now removed to the

District Court for the Western District of Kentucky, against KU concerning a long-term power supply contract (the "OMU Agreement") with

KU. The dispute involves interpretational differences regarding issues

under the OMU Agreement, including various payments or charges between

KU and OMU and rights concerning excess power, termination and emissions allowances. The complaint seeks approximately \$6 million in

damages for periods prior to 2004 and OMU is expected to claim further

amounts for later-occurring periods. OMU has additionally requested injunctive and other relief, including a declaration that KU is in

material breach of the contract. KU has filed an answer in that court

denying the OMU claims and presenting counterclaims. During 2005, the

FERC declined KU's application to exercise exclusive jurisdiction over

the matter. In July 2005, the district court resolved a summary judgment motion made by KU in OMU's favor, ruling that a contractual provision grants OMU the ability to terminate the contract without cause upon four years' prior notice, for which ruling KU retains certain rights to appeal. At this time the district court case is in the discovery stage and a trial schedule has not yet been established.

In May 2006,  $O\!MU$  issued a notification of its intent to terminate the

contract in May 2010, without cause, absent any earlier termination which may be permitted by the proceeding.

#### ENVIRONMENTAL MATTERS

In April 2006, the EPA issued a notice of violation for alleged violations of the Clean Air Act involving work performed on Unit 3 of

KU's E.W. Brown Station in 1997. The EPA alleges modification of a source without a permit, failure to comply with requirements under the

Prevention of Significant Deterioration ("PSD") program, operation of a

source in violation of the New Source Performance Standards ("NSPS"),

and failure to identify the applicability of PSD and NSPS requirements

in compliance certifications. Violations, if ultimately found, could

result in additional expenditures on pollution controls or civil penalties. KU has responded to certain data requests of the EPA and held initial discussions with the EPA regarding this matter. Due to be

early stage of this matter, KU is unable to determine its ultimate potential impact.

The Companies are subject to SO2 and NOx emission limits on their electric generating units pursuant to the Clean Air Act. The Companies

placed into operation significant NOx controls for their generating units prior to the 2004 summer ozone season. As of June 30, 2006, LG&E

and KU have incurred total capital costs of approximately \$191 million

and \$217 million, respectively, to reduce their NOx emissions to required levels. In addition, the Companies incur additional operating

and maintenance costs in operating the new NOx controls. On March 10,

2005, the EPA issued the final CAIR which requires substantial additional reductions in SO2 and NOx emissions from electric generating

units. The CAIR provides for a two-phased reduction program with Phase

I reductions in NOx and SO2 emissions in 2009 and 2010, respectively,

and Phase II reductions in 2015. On March 15, 2005, the EPA issued a related regulation, the final CAMR, which requires substantial mercury

reductions from electric generating units. The CAMR also provides for a

two-phased reduction, with the Phase I target in 2010 achieved as a "co-

benefit" of the controls installed to meet the CAIR. Additional control

measures will be required to meet the Phase II target in 2018. Both the

CAIR and the CAMR establish a cap and trade framework, in which a limit

is set on total emissions and allowances can be bought or sold on the

open market to be used for compliance, unless the state chooses another

approach. LG&E currently has FGDs on all its coal-fired units, but will

continue to evaluate improvements to further reduce SO2 emissions.

In order to meet these new regulatory requirements, KU has implemented

a plan for adding significant additional SO2 controls to its generating

units. Installation of additional SO2 controls will proceed on a phased

basis, with construction of controls (i.e., FGDs) having commenced in

September 2005 and continuing through the final installation and operation in 2009. KU estimates that it will incur \$659 million in capital costs related to the construction of the FGDs to achieve compliance with current emission limits on a company-wide basis. Of this amount, \$77 million has been incurred through June 30, 2006. In addition, KU will incur additional operating and maintenance costs

operating the new SO2 controls.

in

The Companies are also monitoring several other air quality issues which may potentially impact coal-fired power plants, including the EPA's revised air quality standards for ozone and particulate matter and measures to implement the EPA's Clean Air Visibility Rule.

In the normal course of business, lawsuits, claims, environmental actions and various non-ratemaking governmental proceedings arise against the Companies. To the extent that damages are assessed in

lawsuits relating to the above, the Companies believe that their insurance coverage or other appropriate reserves are adequate.

Management, after consultation with legal counsel, and based upon se

present status of these items, does not anticipate that liabilities arising out of other currently pending or threatened lawsuits and

claims of the type referenced above will have a material adverse effect

on the Companies' financial position or results of operations.

#### 7 Segments of Business

LG&E's revenues, net income and total assets by business segment for the three and six months ended June 30, 2006 and 2005, follow:

	Three	Months	Six
Months	Ended J	une 30,	Ended June
30, (in millions) 2005	2006		2006
LG&E Electric Revenues \$457	\$223	\$228	\$435
Net income	27	30	42
Total assets 2,404	2,440	2,404	2,440
LG&E Gas			
Revenues 225	54	53	254
Net income 8	(2)	(2)	8
Total assets 454	507	454	507
Total			
Revenues	277	281	689
Net income	25	28	50
62 Total assets 2,858	2,947	2,858	2,947

KU is an electric utility company. It does not provide natural gas service and, therefore, is presented as a single business segment.

#### 8. Related Party Transactions

LG&E, KU, subsidiaries of E.ON U.S. and other subsidiaries of E.ON engage in related-party transactions. These transactions are generally

performed at cost and in accordance with applicable FERC, Kentucky Commission and Virginia Commission regulations. The significant related-party transactions are disclosed below.

#### Electric Purchases

The Companies' intercompany electric revenues and purchased power expense from affiliated companies for the three and six months ended June 30, 2006 and 2005 were as follows:

		Εn	ded	Months June 30	,		ided	Months June 30,
	(in millions)	20	06	20	05	200	)6	2005

KU billings to LG&E

3 9 15

1.3

#### 9. Subsequent Events

On July 14, 2006, LG&E redeemed 12,500 shares of its 5.875% mandatorily

redeemable preferred stock pursuant to sinking fund requirements at \$100 per share.

On July 20, 2006, KU completed a new tax-exempt financing totaling approximately \$17 million. The new bonds, due June 1, 2036, have a variable, auction rate of interest.

Effective August 1, 2006, KU and its employees represented by IBEW Local 2100 entered into a new three-year collective bargaining agreement. Such agreement provides for routine updates to wages, benefits or other provisions and provides for annual wage re-openers for the second and third years.

Item 2. Management's Discussion and Analysis of Financial Condition and

Results of Operations.

#### General

The following discussion and analysis by management focuses on those factors that had a material effect on the Companies' financial results of

operations and financial condition during the three and six month periods

ended June 30, 2006, and should be read in connection with the financial

statements and notes thereto.

Some of the following discussion may contain forward-looking statements that are subject to certain risks, uncertainties and assumptions. Such forward-looking statements are intended to be identified in this document

by the words "anticipate," "expect," "estimate," "objective," "possible,"

"potential" and similar expressions. Actual results may vary materially.

Factors that could cause actual results to differ materially include: general economic conditions; business and competitive conditions in the energy industry; changes in federal or state legislation; unusual weather;

actions by state or federal regulatory agencies; and other factors described from time to time in the Companies' reports to the SEC, including

the Annual Reports on Form 10-K for the year ended December 31, 2005.

#### Executive Summary

LG&E and KU, subsidiaries of E.ON U.S. (indirect subsidiaries of E.ON), are

regulated public utilities. At June 30, 2006, LG&E supplied electricity to

approximately 398,000 customers and natural gas to approximately 323,000

customers in Louisville and adjacent areas in Kentucky. At June 30, 2006.

KU provided electricity to approximately 497,000 customers in 77 counties

in central, southeastern and western Kentucky, to approximately 30,000 customers in southwestern Virginia and 5 customers in Tennessee. KU also

sells wholesale electricity to 12 municipalities.

The mission of the Companies is to build on our tradition and achieve world-class status providing reliable, low-cost energy services and superior customer satisfaction; and to promote safety, financial success

and quality of life for our employees, communities and other stakeholders.

The Companies' strategy focuses on the following:

- Achieve scale as an integrated U.S. electric and gas business through

organic growth;

- Maintain excellent customer satisfaction;
- Maintain best-in-class cost position versus U.S. utility companies;
- Develop and transfer best practices throughout the company;
- Invest in infrastructure to meet expanding load and comply with increasing environmental requirements;
- Achieve appropriate regulated returns on all investment;
- Attract, retain and develop the best people; and
- Act with a commitment to corporate social responsibility that enhances

the well being of our employees, demonstrates environmental stewardship, promotes quality of life in our communities and reflects

the diversity of the society we serve.

In a June 2004 order, the Kentucky Commission accepted the settlement agreements reached by the majority of the parties in the rate cases filed

by the Companies in December 2003. Under the ruling, the LG&E utility base

electric rates have increased \$43 million (7.7%) and base natural gas

have increased \$12 million (3.4%) annually. Base electric rates at KU have

increased \$46 million (6.8%) annually. The rate increases took effect on

July 1, 2004. The 2004 increases were the first increases in electric base

rates for the Companies in 13 and 20 years, respectively; the previous natural gas rate increase for the LG&E gas utility took effect in September 2000.

The Companies have begun construction of another base-load coal-fired unit

at the Trimble County site. The Companies believe this is the least cost

alternative to meet the future needs of customers. Trimble County Unit 2.

with a 750 Mw capacity rating, is expected to be jointly owned by the Companies (75% owners of the unit) and IMEA and IMPA (25% owners). Trimble

County Unit 2 is expected to cost \$1.1 billion and be completed by 2010.

The Companies' aggregate 75% share of the total Trimble County Unit 2 capital cost is approximately \$885 million and is estimated to be approximately \$120 million for LG&E and \$510 million for KU through 2008.

Through June 2006, expenditures for Trimble County Unit 2 have been \$7 million for LG&E and \$25 million for KU. In June 2006, the Companies entered into a construction contract regarding the Trimble County Unit 2

project. See Note 6 of the Notes to Financial Statements, in Part 1, Item

1, herein.

In November 2005, the Kentucky Commission approved the CCN construction application of the Companies to expand the Trimble County generating plant.

Kentucky Commission approvals for the related transmission line CCNs were

granted in September 2005 and May 2006. In July 2006, certain property owners filed a motion for judicial appeal of the latter transmission line

CCN ruling. A schedule for such proceeding has not been established. In November 2005, the Kentucky Division for Air Quality issued the final air

permit, which was challenged via a request for remand in December 2005 by

three environmental advocacy groups, including the Sierra Club. Administrative proceedings with respect to the challenge are expected to

continue during 2006 with a hearing scheduled for October 2006. A ruling

thereafter may be anticipated in the first half of 2007.

In July 2006, the FERC issued a final report under a routine audit that its

Office of Enforcement (formerly its Office of Market Oversight and Investigations) had conducted regarding the compliance of E.ON U.S. and subsidiaries, including LG&E and KU, under the FERC's standards of conduct

and codes of conduct requirements, as well as other areas. The final report

contained certain findings calling for improvements in E.ON U.S. and subsidiaries' structures, policies and procedures relating to transmission.

generation dispatch, energy marketing and other practices. E.ON U.S. and

affiliates have agreed to certain corrective actions and plan to submit

procedures related to such corrective actions to the FERC. The corrective

actions are in the nature of organization and operational improvements as

described above and are not expected to have a material adverse impact on

the Companies' results of operations or financial condition.

#### Results of Operations

The results of operations for the Companies are affected by seasonal fluctuations in temperature and other weather-related factors. Because of

these and other factors, the results of one interim period are not necessarily indicative of results or trends to be expected for the full year.

Three Months Ended June 30, 2006, Compared to Three Months Ended June 30, 2005

#### LG&E Results:

LG&E's net income decreased \$3 million (11%) for the three months ended June 30, 2006, as compared to the three months ended June 30, 2005, primarily due to lower electricity and natural gas retail and wholesale sales volumes resulting largely from milder weather than in the prior year.

A comparison of LG&E's revenues for the three months ended June 30, 2006,

with the three months ended June 30, 2005, reflects increases and (decreases) which have been segregated by the following principal causes:

Cause	Electric	Gas
(in millions)	Revenues	Revenues
Retail sales:		
Fuel and gas supply adjustments	\$6	\$7
Environmental cost recovery surcharge	(3)	-
Variation in sales volume and other	(5)	(2)
Total retail sales	(2)	5
Wholesale sales	(4)	(4)
Other	1	_
Total	\$(5)	\$1

Electric revenues decreased \$5 million (2%) primarily due to:

- Decreased wholesale revenues (\$4 million) largely due to 4% lower volumes
- Decreased retail electric volumes delivered (\$5 million) resulting
  - a 14% decrease in cooling degree days in the second quarter of 2006 compared to the same period in 2005 and an 16% decrease from the 20-year average
  - Decreased environmental cost recovery (\$3 million) due to lower ECR billing rates

- Increased fuel costs billed to customers through the fuel adjustment

clause (\$6 million) due to higher costs of coal and natural gas

Gas revenues increased \$1 million (2%) primarily due to:

- Increased gas supply costs billed to customers through the gas supply
  - adjustment (\$7 million) due to the higher cost of natural gas
  - Decreased wholesale revenues (\$4 million) as a result of 7% lower volumes due to lower demand from wholesale customers
- Decreased retail gas volumes delivered (\$2 million) resulting from

17% decrease in heating degree days in the second quarter of 2006 compared to the same period in 2005 and an 20% decrease from the 20-year average

Fuel for electric generation and gas supply expenses comprise a large component of LG&E's total operating expenses. Increases or decreases in the

cost of fuel and natural gas supply are reflected in LG&E's electric and

natural gas retail rates, through the fuel adjustment clause and gas supply

clause, subject to the approval of the Kentucky Commission.

Fuel for electric generation increased \$2 million (3%) in 2006 primarily

due to:

- Increased unit cost of fuel burned (\$4 million) due to higher fuel

prices

- Decreased generation (\$2 million) due to lower wholesale and retail

sales volumes

Power purchased decreased \$2 million (7%) in 2006 primarily due to:

- Decreased volumes purchased (\$6 million) due to lower wholesale and

retail sales

- Increased unit cost of purchases (\$4 million) due to higher market

prices

Gas supply expenses increased \$2 million (6%) in 2006 primarily due to:

- Increased unit cost of natural gas purchased (\$8 million)
- Decreased volumes of natural gas delivered into the distribution system (\$6 million) due to milder weather

A comparison of the LG&E effective income tax rate for the three months ended June 30, 2006 and 2005 follows:

Three Months Three

Months

Ended Ended June 30, 2006 June 30,

Effective Rate		
Statutory federal income tax rate	35.0%	35.0%
State income taxes net of federal benefit	3.5	5.2
Amortization of investment tax credits	(2.7)	(2.3)
Other differences	(3.4)	(1.5)
Effective income tax rate	32.4%	36.4%

State income taxes in 2006 reflect Kentucky Coal Tax credits earned. The

change in amortization of investment tax credits and other differences is

largely attributable to the change in the levels of pre-tax income.

#### KU Results:

KU's net income increased \$7 million (39%) for the three months ended  $\mathcal{J}$ une

30, 2006, as compared to the three months ended June 30, 2005, primarily

due to lower maintenance costs, a lower effective income tax rate and higher earnings from EEI.

A comparison of KU's revenues for the three months ended June 30, 2006, with the three months ended June 30, 2005, reflects increases and (decreases) which have been segregated by the following principal causes:

#### Cause

	Electric
(in millions)	Revenues
Retail sales:	
Fuel supply adjustments	\$17
Environmental cost recovery surcharge	3
Variation in sales volumes and other	(7)
Total retail sales	13
Other	(2)
Total	\$11

Electric revenues increased \$11 million (4%) in 2006 primarily due to:

- Increased fuel costs billed to customers through the fuel adjustment
  - clause (\$17 million) due to higher costs of coal and natural gas
- Increased environmental cost recovery (\$3 million) due to higher ECR

billing rates

- Decreased retail electric volumes delivered (\$7 million) resulting from
  - a 17% decrease in cooling degree days in the second quarter of 2006 compared to the same period in 2005 and an 19% decrease from the 20-year average

Fuel for electric generation comprises a large component of KU's total operating expenses. Increases or decreases in the cost of fuel are reflected in KU's retail electric rates through the fuel adjustment clause,

subject to the approval of the Kentucky Commission, the Virginia State Corporation Commission and the FERC.

Fuel for electric generation increased \$16 million (19%) in 2006 primarily due to:

- Increased unit cost of fuel burned (\$9 million) due to higher fuel

prices

- Increased generation (\$7 million) largely due to higher unit availability

Power purchased decreased \$6 million (12%) in 2006 primarily due to:

- Decreased volumes purchased (\$8 million) largely due to higher unit

availability and decreased retail demand

- Increased unit cost of purchases (\$2 million) due to higher market

prices

Other operation and maintenance expenses decreased \$5 million (7%) in 2006 primarily due to:

- Decreased maintenance costs (\$3 million) largely due to an outage last

year at Brown Unit 3

- Decreased other power supply costs (\$2 million) related to lower MISO

Day 2 expenses

Other (income) - net increased \$3 million (150%) primarily due to increased

equity in earnings from EEI as a result of EEI selling electricity at market based rates, effective January 2006.

Interest expense increased \$1 million (13%) in 2006 primarily due to increased borrowing from Fidelia.

A comparison of the KU effective income tax rate for the three months ended

June 30, 2006 and 2005 follows:

Three Months	Three
Ended	Ended
June 30, 2006	June 30,
35.0%	35.0%
4.4	5.0
(0.8)	(1.4)
(6,1)	_
(1,9)	(2.9)
30.68	35.7%
	Ended June 30, 2006  35.0% 4.4 (0.8) (6.1) (1.9)

The EEI dividend in the second quarter of 2006 reflects a tax benefit associated with the receipt of dividends from KU's investment in EEI. The

change in amortization of investment tax credits and other differences is

largely attributable to the change in the levels of pre-tax income.

### Six Months Ended June 30, 2006, Compared to Six Months Ended June 30, 2005

#### LG&E Results:

LG&E's net income decreased \$12 million (19%) for the six months ended

30, 2006, as compared to the six months ended June 30, 2005, primarily due

to lower electricity and natural gas retail and wholesale sales volumes,

higher maintenance costs and higher interest expense.

A comparison of LG&E's revenues for the six months ended June 30, 2006, with the six months ended June 30, 2005, reflects increases and (decreases)

which have been segregated by the following principal causes:

Cause	Electric	Gas
(in millions)	Revenues	Revenues
Retail sales:		
Fuel and gas supply adjustments	\$15	\$73
Merger surcredit	1	-
Weather normalization	~-	2
Variation in sales volume and other	(8)	(31)
Total retail sales	8	44
Wholesale sales	(32)	(16)
Other	2	1.
Total	\$(22)	\$29

Electric revenues decreased \$22 million (5%) in 2006 primarily due to:

- Decreased wholesale revenues (\$32 million) largely due to 10% lower volumes
- Decreased retail electric volumes delivered (\$8 million) resulting from
- a 10% decrease in cooling degree days in the first six months of 2006
  - compared to the same period in 2005 and an 12% decrease from the 20-year average
- Increased fuel costs billed to customers through the fuel adjustment
  - clause (\$15 million) due to higher costs of coal and natural gas
  - Increased miscellaneous revenues (\$2 million)

Gas revenues increased \$29 million (13%) in 2006 primarily due to:

- Increased gas supply costs billed to customers through the gas supply
  - adjustment (\$73 million) due to higher natural gas costs
  - Increased weather normalization revenues (\$2 million) due to warmer weather .
- Decreased retail gas volumes delivered (\$31 million) resulting from
  - 10% decrease in heating degree days in the first six months of 2006 compared to the same period in 2005 and an 12% decrease from the 20-year average

- Decreased wholesale revenues (\$16 million) as a result of 7% lower volumes due to lower demand from wholesale customers

Fuel for electric generation and gas supply expenses comprise a large component of LG&E's total operating expenses. Increases or decreases in

the cost of fuel and natural gas supply are reflected in LG&E's electric

and natural gas retail rates, through the fuel adjustment clause and gas

supply clause, subject to the approval of the Kentucky Commission.

Fuel for electric generation increased \$6 million (5%) in 2006 primarily

due to:

- Increased unit cost of fuel burned (\$13 million) due to higher fuel

prices

- Decreased generation (\$5\$ million) due to lower wholesale and retail

sales volumes

Power purchased decreased \$13 million (19%) in 2006 primarily due to:

- Decreased volumes purchased (\$22 million) due to lower wholesale and

retail sales

- Increased unit cost of purchases (\$9 million) due to higher market prices

Gas supply expenses increased \$29 million (17%) in 2006 primarily due to:

- Increased unit cost of natural gas purchased (\$69 million)
- Decreased volumes of natural gas delivered into the distribution system (\$40 million) due to milder weather

Other operation and maintenance expenses increased \$4 million (3%) in 2006

primarily due to:

- Increased steam maintenance (\$3 million) largely due to the outage at

Mill Creek Unit 4

- Increased distribution maintenance (\$2 million) due to higher storm restoration costs

Interest expense increased \$2 million (11%) in 2006 primarily due to:

- Increased interest rates on variable rate debt (\$3 million)
- Increased interest on tax deficiencies (\$1 million)
- Increased interest rates on money pool borrowing (\$1 million)
- Decreased interest on the swaps (\$2 million)
- Decreased interest due to refinancing fixed rate debt with variable rate debt (\$1 million)

The weighted average interest rate on variable-rate bonds for the six months ended June 30, 2006, was 3.33%, compared to 2.27% for the comparable period in 2005.

A comparison of the LG&E effective income tax rate for the six months ended

June 30, 2006 and 2005 follows:

	Six Months	Six
Months		
	Ended	Ended
	June 30, 2006	June 30,
2005		
Effective Rate		
Statutory federal income tax rate	35.0%	35.0%
State income taxes net of federal benefit	3.6	4.8
Amortization of investment tax credits	(2.7)	(2.2)
Other differences	(2.6)	(2.2)
Effective income tax rate	33.3%	35,48

State income taxes in 2006 reflect Kentucky Coal Tax credits earned. The

change in amortization of investment tax credits and other differences is

largely attributable to the change in the levels of pre-tax income

#### KU Results:

KU's net income increased \$5 million (9%) for the six months ended June 30.

2006, as compared to the six months ended June 30, 2005, primarily due higher earnings from EEI and a lower effective income tax rate, which is

partially offset by higher transmission costs and higher interest charges.

A comparison of KU's revenues for the six months ended June 30, 2006, with

the six months ended June 30, 2005, reflects increases and (decreases) which have been segregated by the following principal causes:

Cause	Electric
(in millions)	Revenues
Retail sales:	
Fuel supply adjustments	\$36
Environmental cost recovery surcharge	3
Merger surcredit	1.
Rate and rate structure	2
Variation in sales volume and other	(6)
Total retail sales	36
Wholesale sales	(18)
Other	(1)
Total	\$17

Electric revenues increased \$17 million (3%) in 2006 primarily due to:
- Increased fuel costs billed to customers through the fuel
adjustment

clause (\$36 million) due to higher costs of coal and natural gas - Increased environmental cost recovery (\$3 million) due to higher ECR

billing rates

- Increased Virginia revenues due to a rate change for increased fuel recovery (\$2 million)
- Decreased wholesale sales (\$18 million) largely due to 5% lower volumes
- Decreased retail electric volumes delivered (\$7 million) resulting from
- a 9% decrease in cooling degree days in the first six months of 2006

compared to the same period in 2005 and an 11% decrease from the 20-year average

Fuel for electric generation comprises a large component of KU's total operating expenses. Increases or decreases in the cost of fuel are reflected in KU's retail electric rates through the fuel adjustment clause,

subject to the approval of the Kentucky Commission, the Virginia State Corporation Commission and the FERC

Fuel for electric generation increased \$23 million (13%) in 2006 primarily due to:

- Increased unit cost of fuel burned (\$20 million) due to higher fuel

prices

- Increased generation (\$3 million) largely due to higher unit availability

Power purchased decreased \$6 million (6%) in 2006 primarily due to:

- Decreased volumes purchased (\$18 million) largely due to higher unit

availability and decreased retail demand

- Increased unit cost of purchases (\$12 million) due to higher market

prices

Other operation and maintenance expenses increased \$7 million (6%) in 2006 primarily due to:

- Increased other power supply (\$5 million) largely due to MISO Day 2
- Increased transmission expense (\$3 million) largely due to MISO Day

Other (income) - net increased \$10 million (333%) primarily due to increased equity in earnings from EEI as a result of EEI selling electricity at market based rates, effective January 2006.

Interest expense increased \$4 million (29%) in 2006 primarily due to:

- Increased borrowing from Fidelia (\$2 million)
- Increased borrowing and increased interest rates on money pool debt (\$2 million)

A comparison of the KU effective income tax rate for the six months ended

June 30, 2006 and 2005 follows:

Six Months Six

Months

Ended Ended

	June 30, 2006	June 30,
2005		
Effective Rate		
Statutory federal income tax rate	35.0%	35.0%
State income taxes net of federal benefit	4.4	4.7
Amortization of investment tax credits	(0.6)	(0.9)
EEI dividend	(5.1)	-
Other differences	(1.1)	(0.6)
Effective income tax rate	32、6%	38.2%

The EEI dividend for the six months ended June 30, 2006, reflects a tax benefit associated with the receipt of dividends from KU's investment in FEI.

Liquidity and Capital Resources

The Companies' needs for capital funds are largely related to the construction of plant and equipment necessary to meet the needs of electric

and gas utility customers, in addition to debt service requirements and dividend payments. Internal and external lines of credit are maintained to

fund short-term capital requirements. The Companies believe that such sources of funds will be sufficient to meet the needs of the business in

the foreseeable future.

At June 30, 2006, the Companies were in a negative working capital position

in part because of the classification of certain variable-rate pollution

control bonds that are subject to tender for purchase at the option of the

holder as current portion of long-term debt. The Companies expect to cover

any working capital deficiencies with cash flow from operations, money pool

borrowings and borrowings from Fidelia.

Construction expenditures for the six months ended June 30, 2006 amounted

to \$66 million for LG&E and \$121 million for KU. At LG&E, capital expenditures included infrastructure for new customers, gas main replacements/extensions and capital repairs to Mill Creek Unit 4. At KU.

capital expenditures included construction of FGD and other environmental

equipment at the Ghent generating station and infrastructure for new customers.

LG&E's cash balance decreased \$2 million during the six months ended June

30, 2006, largely resulting from repayments of debt and the payment of dividends. KU's cash balance decreased \$2 million during the  $\sin x$  months

ended June 30, 2006, primarily due to increased capital expenditures.

Variations in accounts receivable, inventories and accounts payable are generally not significant indicators of the Companies' liquidity. Such variations are primarily attributable to seasonal fluctuations in weather,

which have a direct effect on sales of electricity and natural gas. The decreases in LG&E's accounts receivable and natural gas stored underground

relate primarily to seasonal uses of natural gas.

For information regarding the Companies' use of interest rate swaps to hedge underlying variable-rate (LG&E) and fixed-rate (KU) debt obligations,

see Note 3 of the Notes to Financial Statements.

See Note 5 of the Notes to Financial Statements for information regarding

the Companies' long-term and short-term debt including: accounting treatment of bonds permitting tender for purchase at the option of the holder, re-negotiation of revolving credit lines, intercompany debt transactions and the issuance and redemption of financial instruments during the year.

Security ratings as of June 30, 2006, were:

	LG&E		K	KU	
	Moody's	S&P	Moody's	S&P	
First mortgage bonds	Al	<b>A</b> -	Al	A	
Preferred stock	Baal	BBB-	Baa1	BBB-	
Commercial paper	P-1	A-2	P-1	A-2	

These ratings reflect the views of Moody's and S&P. A security rating is

not a recommendation to buy, sell or hold securities and is subject to revision or withdrawal at any time by the rating agency.

LG&E made a discretionary contribution to the pension plan of \$18  $\operatorname{million}$ 

in January 2006. LG&E made no contributions during 2005. KU made no contributions to the pension plan in 2006 or 2005.

#### Contingencies

For a description of significant contingencies that may affect the Companies, reference is made to Part I, Item 3, Legal Proceedings in the

Companies' Annual Reports on Form 10-K for the year ended December 31, 2005; to Part I - Item 1 and Part II - Item 1, Legal Proceedings in the Companies' Quarterly Report on Form 10-Q for the period ended March 31, 2006; and to Notes 2 and 6 of the Notes to Financial Statements in Part I

- Item 1, and Part II - Item 1, Legal Proceedings herein.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

#### Interest Rate Risk

The Companies use interest rate swaps to hedge exposure to market fluctuations in certain of their debt instruments. Pursuant to the Companies' policies, use of these financial instruments is intended to mitigate risk and earnings volatility and is not speculative in nature. Management has designated all of the Companies' interest rate swaps as hedge instruments. Financial instruments designated as cash flow hedges have resulting gains and losses recorded within comprehensive income and

stockholders' equity. To the extent a financial instrument or the underlying item being hedged is prematurely terminated or the hedge becomes

ineffective, the resulting gains or losses are reclassified from comprehensive income to net income. Financial instruments designated as fair value hedges are periodically marked to market with the resulting gains and losses recorded directly into net income to correspond with income or expense recognized from changes in market value of the items being hedged.

The potential change in interest expense associated with a 1% change in base interest rates of the Companies' unswapped variable debt is estimated

at \$4 million each at June 30, 2006. The Companies' exposure to floating

interest rates did not materially change during the first six months of 2006.

The potential loss in fair value of LG&E's interest rate swaps resulting

from a hypothetical 1% change in base interest rates is estimated at approximately \$17 million as of June 30, 2006. The potential loss in fair

value of KU's interest rate swaps resulting from a hypothetical 1% change

in base interest rates is estimated at less than \$1 million as of June 30,

2006. These estimates are derived from third-party valuations. Changes in

the market values of these swaps, if held to maturity, will have no effect

on LG&E's or KU's net income or cash flow.

#### Pension Risk

The Companies' costs of providing defined-benefit pension retirement plans

is dependent upon a number of factors, such as the rates of return on plan

assets, discount rate and contributions made to the plan. The Companies have recognized an additional minimum liability as prescribed by SFAS No.

87, Employers' Accounting for Pensions because the accumulated benefit obligation exceeds the fair value of their plans' assets. The liabilities

were recorded as a reduction to comprehensive income, and did not affect

net income. The amount of the liability depends upon the discount rate, the

asset returns and contributions made by the Companies to the plans. If the

fair value of the plans' assets exceeds the accumulated benefit obligation,

the recorded liabilities will be reduced and comprehensive income will be

restored in the balance sheet.

A 1% increase or decrease in the assumed discount rate could have an approximate \$49 million positive or negative impact to the accumulated benefit obligation of LG&E. A 1% increase or decrease in the assumed discount rate could have an approximate \$33 million positive or negative

impact to the accumulated benefit obligation of KU.

LG&E made a discretionary contribution to the pension plan for \$18 million

in January 2006. LG&E made no contributions during 2005. KU made no contributions to the pension plan in 2006 or 2005.

Energy & Risk Management Activities

The Companies conduct energy trading and risk management activities to maximize the value of power sales from physical assets they own. Certain

energy trading activities are accounted for on a mark-to-market basis in

accordance with SFAS No. 133, as amended. Wholesale sales of excess asset

capacity are treated as normal sales under SFAS No. 133, as amended, and

are not marked to market.

Since the inception of the MISO Day 2 market in April 2005, the Companies  $\,$ 

have been eligible to receive FTRs from the MISO. FTRs are assigned by the

MISO to market participants for a twelve-month period of time beginning June 1, 2006, for off-peak and peak periods based on each market participant's share of generation. FTRs are utilized to manage price risk

associated with transmission congestion. The value of FTRs is determined by

the transmission congestion charges that arise when the transmission grid

is congested in the day-ahead market. FTRs are obtained through an allocation from the MISO at zero cost, however, they can also be bought and

sold. FTRs are derivatives and their fair value is insignificant due to

the lack of liquidity in the forward market.

The fair values of the Companies' energy trading and risk management contracts as of June 30, 2006 were each approximately \$2 million. The fair

values at June 30, 2005, were less than \$1 million each. No changes to valuation techniques for energy trading and risk management activities occurred during 2006 or 2005. Changes in market pricing, interest rate and

volatility assumptions were made during all periods. The outstanding mark-

to-market value is sensitive to changes in prices, price volatilities and

interest rates. The Companies estimate that a movement in prices of \$1 and

a change in interest and volatilities of 1% would result in a change in the

mark-to-market value of less than \$1 million. All contracts outstanding at

June 30, 2006, have a maturity of less than one year and are valued using

prices actively quoted for proposed or executed transactions or quoted by

brokers.

The Companies maintain policies intended to minimize credit risk and revalue credit exposures daily to monitor compliance with those policies.

As of June 30, 2006, 100% of the trading and risk management commitments

were with counterparties rated BBB-/Baa3 equivalent or better.

#### Item 4. Controls and Procedures

The Companies maintain a system of disclosure controls and procedures designed to ensure that information required to be disclosed by the Companies in reports they file or submit under the Securities Exchange Act

of 1934 is recorded, processed, summarized and reported, within the time  $% \frac{1}{2}\left( \frac{1}{2}\right) =\frac{1}{2}\left( \frac{1}{2}\right) +\frac{1}{2}\left( \frac{1}{2$ 

periods specified in the Securities and Exchange Commission rules and forms. The Companies conducted an evaluation of such controls and procedures under the supervision and with the participation of the Companies' management, including the Chairman, President and Chief Executive Officer ("CEO") and the Chief Financial Officer ("CFO").

upon that evaluation, the CEO and CFO have concluded that the Companies'

disclosure controls and procedures are effective as of the end of the period covered by this report.

The Companies are not accelerated filers under the Sarbanes-Oxley Act of

2002 and associated rules (the "Act") and consequently anticipate issuing

Management's Report on Internal Control over Financial Reporting pursuant

to Section 404 of the Act in their first periodic report covering the fiscal year ended December 31, 2007 as permitted by SEC rulemaking.

In preparation for required reporting under Section 404 of the Act, the

Companies are conducting a thorough review of their internal controls over

financial reporting, including disclosure controls and procedures. Based

on this review, the Companies have made internal controls enhancements and

will continue to make future enhancements to their internal control over

financial reporting. There has been no change in the Companies' internal

control over financial reporting that occurred during the fiscal quarter

ended June 30, 2006, that has materially affected, or is reasonably likely

to materially affect, the Companies' internal control over financial reporting.

#### Part II. Other Information

#### Item 1. Legal Proceedings.

For a description of the significant legal proceedings involving the Companies, reference is made to the information under the following items

and captions of the Companies' respective combined Annual Report on Form 10-

K for the year ended December 31, 2005: Item 1, Business; Item 3, Legal

Proceedings; Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations; and Item 8, Financial Statements and

Supplementary Data in Notes 3 and 10. Reference is also made to the matters described in Notes 2 and 6 of Part 1, Item 1 of the Companies' Quarterly Report on Form 10-Q for the three months ended March 31, 2006.

and Notes 2 and 6 of the Notes to Financial Statements in Part I, Item 1 of

this 10-Q. Except as described herein, to date, the proceedings reported in

the Companies' respective combined Annual Report on Form 10-K have not changed materially.

#### Other

In the normal course of business, other lawsuits, claims, environmental actions, and other governmental proceedings arise against the Companies.

To the extent that damages are assessed in any of these lawsuits, the Companies believe that their insurance coverage is adequate.

Management,

after consultation with legal counsel, does not anticipate that liabilities

arising out of other currently pending or threatened lawsuits and claims

will have a material adverse effect on LG&E's or KU's financial position or

results of operations, respectively.

Item 1A. Risk Factors.

LG&E and KU currently anticipate withdrawal from the MISO effective September 1, 2006. The resulting changes to transmission and wholesale power market structures and prices are not completely estimable and may result in unforeseen effects on costs or revenues. As required by the FERC, in connection with their exit, the Companies have engaged two independent third parties to perform certain oversight and functional control activities relating to transmission and related activities.

Companies will save certain MISO membership costs and charges, but will incur an exit fee and fees related to the new transmission service vendors.

The Companies believe that, over time, the benefits and savings from an exit of the MISO will outweigh the costs and expenses. However, until post-MISO market conditions and operations have matured, the effects on financial condition, liquidity or results of operations will remain difficult to fully predict.

See Note 2 of LG&E's and KU's Notes to Financial Statements in Part I, Item

1 of this 10-Q.

Item 5. Other Information.

None.

Item 6. Exhibits.

#### tem 2.03. Creation of a Direct Financial Obligation or an Obligation under an Off-Balance Sheet Arrangement of a Registrant.

On December 7, 2006, Kentucky Utilities Company (the "Company") completed a financing transaction resulting in the issuance of 6,693,620 in new pollution control indebtedness. The indebtedness, the Company's First Mortgage Bonds, Pollution Control Series No. 21, lue June 1, 2036, will currently carry a variable, auction rate of interest. (During July 2006, the Company issued pollution control indebtedness n a similar principal amount and maturity, which transaction is distinct from this issuance,)

As part of the current transaction, the County of Carroll, Kentucky (the "County") has issued \$16,693,620 in new pollution control bonds (the "County Bonds") relating to facilities to be constructed at the Company's Ghent generating station. Pursuant to a Loan Agreement lated as of October 1, 2006 (the "Loan Agreement"), the Company has borrowed from the County the proceeds from sale of the County 3 onds. Under the Loan Agreement, the Company has agreed to repay the loan by making principal, interest, premium payments or any surchase price payments as and when due with respect to the County Bonds. The payment obligations of the Company under the Loan Agreement are absolute and unconditional.

The Company's obligations with respect to the County Bonds are secured by the Company's issuance of the above-mentioned \$16,693,620 in first mortgage bonds (the "Company Bonds") with identical principal amount, maturity and interest provisions as the County 3 onds The Company Bonds are issued pursuant to a Supplemental Indenture dated November 1, 2006, to the Company's existing first nortgage bond indenture among the Company and its first mortgage bond trustee.

The Loan Agreement, the Supplemental Indenture and other transaction documents contain standard representations, covenants and events of default for facilities of this type, including acceleration of indebtedness upon certain events of default. Events of default under the Loan Agreement or other transaction documents include a failure to punctually make payments associated with County Bonds when due; a continuing failure or default regarding performance of applicable covenants, conditions or agreements in the Loan Agreement, the insurance agreement or other relevant transaction documents; any acceleration of payments with respect to the Company Bonds or other first mortgage bonds; and certain bankruptcy or insolvency-related conditions relating to the Company

#### Item 9.01 Financial Statements and Exhibits

#### tem 2.03. Creation of a Direct Financial Obligation or an Obligation Under an Off-Balance Sheet Arrangement of a Registrant.

On October 25, 2006, Kentucky Utilities Company (the "Company" or "KU") completed a financing transaction involving the runne of \$50 million in long-term indebtedness. The indebtedness is represented by a \$50 million, 10-year, unsecured loan from Fidelia reportation ("Fidelia"), an indirect subsidiary of E.ON AG and an affiliate of KU, which will carry a 5.675% rate of interest KU is using the roceeds in connection with distribution and transmission system upgrades or expansions and other capital projects, including pollution control acilities at its Ghent generating station.

As part of the transaction, KU entered into a Loan Agreement with Fidelia, under which agreement the Company has agreed to repay he loan by making principal and interest payments as and when due with respect to the indebtedness.

The Loan Agreement contains standard representations, covenants and events of default for arrangements of this type, including acceleration of indebtedness upon certain events of default. Events of default under the Loan Agreement or other transaction documents include a failure to punctually make payments associated with the loan when due; certain bankruptcy or insolvency-related conditions relating to the Company, and departure of the Company from the E ON group.

#### Item 9.01 Financial Statements and Exhibits

#### Exhibits:

- Loan Agreement dated October 25, 2006 between Kentucky Utilities Company and Fidelia Corporation
- 4.2 Copy of Promissory Note from Kentucky Utilities Company to Fidelia Corporation, dated as of October 25, 2006.

## Item 2.03. Creation of a Direct Financial Obligation or an Obligation under an Off-Balance Sheet Arrangement of a Registrant.

On July 20, 2006, Kentucky Utilities Company (the "Company") completed a financing transaction resulting in the issuance of \$16,693,620 in new pollution control indebtedness. The indebtedness, the Company's First Mortgage Bonds, Pollution Control Series No. 20, due June 1, 2036, will currently carry a variable, auction rate of interest.

As part of the transaction, the County of Carroll, Kentucky (the "County") has issued \$16,693,620 in new pollution control bonds (the "County Bonds") relating to facilities to be constructed at the Company's Ghent generating station. Pursuant to a Loan Agreement dated as of June 1, 2006 (the "Loan Agreement"), the Company has borrowed from the County the proceeds from sale of the County Bonds. Under the Loan Agreement, the Company has agreed to repay the loan by making principal, interest, premium payments or any purchase price payments as and when due with respect to the County Bonds. The payment obligations of the Company under the Loan Agreement are absolute and unconditional.

The Company's obligations with respect to the County Bonds are secured by the Company's issuance of the above-mentioned \$16,693,620 in first mortgage bonds (the "Company Bonds") with identical principal amount, maturity and interest provisions as the County Bonds. The Company Bonds are issued pursuant to a Supplemental Indenture dated July 1, 2006, to the Company's existing first mortgage bond indenture among the Company and its first mortgage bond trustee.

The Loan Agreement, the Supplemental Indenture and other transaction documents contain standard representations, covenants and events of default for facilities of this type, including acceleration of indebtedness upon certain events of default. Events of default under the Loan Agreement or other transaction documents include a failure to punctually make payments associated with County Bonds when due; a continuing failure or default regarding performance of applicable covenants, conditions or agreements in the Loan Agreement, the insurance agreement or other relevant transaction documents; any acceleration of payments with respect to the Company Bonds or other first mortgage bonds; and certain bankruptcy or insolvency-related conditions relating to the Company.

#### Item 9.01 Financial Statements and Exhibits

#### item 8.01 Other Events.

As previously disclosed, Louisville Gas and Electric Company ("LG&E") and Kentucky Utilities Company ("KU", and collectively with LG&E, the "Companies") have been involved in proceedings before the Kentucky Public Service Commission ("KPSC") and the Federal ergy Regulatory Commission ("FERC") seeking authority to withdraw from the Midwest Independent Transmission System Operator, Inc AISO"). The Companies now estimate that they may complete their exit from MISO during late summer 2006. During spring and early summer 2006, the Companies received a number of regulatory rulings concerning aspects of the MISO exit process which have resolved or advanced certain matters involved in the pending withdrawal process

In May 2006, the KPSC issued an order in its proceeding analyzing the costs versus benefits of MISO membership to the Companies, which order approved the request of LG&E and KU to withdraw from MISO. The order authorized the Companies, upon a MISO exit, to establish a regulatory asset for an exit fee, subject to adjustment for possible future MISO credits, and a regulatory liability for certain revenues which may be collected via current base rates, as a result of the inclusion of amounts associated with certain MISO Schedule 10 charges. In July 2006, the KPSC issued an order approving the Companies' contractual arrangements with Tennessee Valley Authority ("TVA") and Southwest Power Pool, Inc ("SPP") to provide services to the Companies as reliability coordinator and independent transmission organization, respectively, upon a withdrawal from MISO. This order was subject to certain conditions based upon a satisfactory outcome of pending FERC proceedings involving the Companies' market-based rate authority. In July 2006, the KPSC issued further orders denying MISO's request for a rehearing regarding the May 2006 order and denying MISO's request for intervenor status in the proceeding concerning the Companies' IVA/SPP arrangements.

In July 2006, the FERC issued an order in the Companies' market-based rate proceeding accepting the Companies' proposal to address certain market power issues the FERC had claimed would arise upon an exit from MISO. In particular, LG&E and KU received permission to sell power at market-based rates at the interface of control areas in which they may be deemed to have market power, subject to a restriction that such power not be collusively re-sold back into such control areas. Upon a MISO exit, the relevant control areas would be LG&E's and KU's noint control area, as well as the control area of Big Rivers Electric Corporation ("BREC") in western Kentucky (the latter due to a long-term contractual arrangement between BREC and Western Kentucky Energy Corp., an affiliate of the Companies) In July 2006, the FERC issued a further decision accepting, in substantial part, certain of the Companies' steps, including compliance and other filings, which constituted conditions to the FERC's March 2006 order conditionally approving their exit from MISO. There remain certain further conditions that must be satisfied under the FERC's exit orders, which conditions the Companies currently anticipate they can accomplish. Finally, also in July 2006, the FERC issued an order denying MISO's request for a rehearing regarding the FERC's March 2006 order.

The Companies have currently tendered and not withdrawn a contractual notice to MISO providing for a withdrawal date of September 1, 36 On or about the date of a completed exit from MISO, and following initial calculation and invoicing from MISO, the Companies would pay an exit fee to MISO in an amount of up to approximately \$41 million (allocated approximately \$16 million for LG&E and \$25 million for KU.) The ultimate amount would be determined based upon the actual date of exit and, following payment, is subject to confirmation, correction and true-up, as agreed between the Companies and MISO Pursuant to the May 2006 KPSC order, concurrently with payment of a MISO exit fee, the Companies will establish a regulatory asset relating to such fee.

While LG&E and KU believe they can reasonably achieve the remaining conditions imposed by the FERC relating to MISO withdrawal by he late summer, including possibly as early as September 1, 2006, the actual timing or occurrence of withdrawal cannot be assured

Statements made in this report that state the Companies' or management's intentions, expectations or predictions of the future are forward-looking statements. The Companies' actual results could differ materially from those projected in the forward-looking statements, and there can be no assurance that estimates of future results will be achieved. The Companies' SEC filings contain additional information concerning factors that could cause actual results to differ materially from those in the forward-looking statements.

Dear Ms. Stumbo:

Pursuant to the Commission's Order, dated January 22, 2007, in the aforementioned case, Kentucky Utilities Company ("KU") hereby files a report of material changes that KU would have had to disclose to the Securities and Exchange Commission ("SEC") on a Form 8-K if the company had continued to have publicly held secured debt.

In compliance with this Commission order, KU is submitting this letter as its report. With respect to June 2008, KU believes there are no reportable events.

Should you have any questions in this regard, please do not hesitate to contact me.

Sincerely.

Case No. 2006-00390

Dear Ms. Stumbo:

Pursuant to the Commission's Order, dated January 22, 2007, in the aforementioned case, Kentucky Utilities Company ("KU") hereby files a report of material changes that KU would have had to disclose to the Securities and Exchange Commission ("SEC") on a Form 8-K if the company had continued to have publicly held secured debt.

In compliance with this Commission order, KU is submitting this letter as its report. With respect to May 2008, KU converted its Mercer County 2000 Series A tax exempt bonds from an auction rate mode to a weekly rate mode and purchased the bonds from a remarketing agent. The Company expects to hold the bonds until a permanent solution is determined for mitigating the additional interest expense caused by auction rate market disruptions resulting from credit concerns about the monoline bond insurers.

KU also entered into a new loan with Fidelia Corporation, an affiliated company. The new loan, in the amount of \$75 million, matures in May 2023 and carries an interest rate of 5.85%.

Should you have any questions in this regard, please do not hesitate to contact me.

Re: Kentucky Utilities Company - Report of Certain Material Changes
Case No. 2006-00390

Dear Ms. O'Donnell:

In its order of January 22, 2007 issued in the above-referenced proceeding, the Commission directed Kentucky Utilities Company ("KU") to file reports of material changes that they would have had to disclose to the Securities and Exchange Commission ("SEC") on a Form 8-K if each company had continued to have publicly held secured debt.

In compliance with these Commission orders, KU is submitting this letter as their report. With respect to August 2007, KU believes there are no reportable events.

Although John R. McCall will be the officer responsible for the timely filing of these materials, I will become the primary point of contact for all inquires concerning these and other state regulatory issues.

Should you have any questions in this regard, please do not hesitate to contact me.

Sincerely.

Re: Kentucky Utilities Company - Report of Certain Material Changes
Case No. 2006-00390
Louisville Gas and Electric Company - Report of Certain Material
Changes - Case No. 2006-00445

Dear Ms. O'Donnell:

In the above-referenced cases, Kentucky Utilities Company ("KU") and Louisville Gas and Electric Company ("LG&E" and collectively with KU, the "Companies"), respectively received Commission authority, pursuant to its orders in the above-referenced cases to undertake certain financial transactions which would achieve, in part, the cessation of the Companies' periodic reporting obligations under the Securities Exchange Act of 1934 (the "SEC Reports"). Consistent with the orders and the proceedings in the cases referenced-above, the Companies agreed to provide the Commission with revised or replacement reports and disclosures, in lieu of the former SEC Reports.

In connection therewith, the Companies hereby provide this periodic report of certain material changes. This initial report is being submitted for a three month period. Subsequent reports will be filed monthly as indicated by KU in its letter to the Commission dated February 1, 2007. The two events noted below, however, were reported on a timely basis to the Commission as they were the subject of proceedings under KRS 278.300. Via this report, as set forth below, the Companies list or describe, in summary fashion, those events, if any, which occurred during the indicated calendar months which would have occasioned a filing of a Form 8-K with the Securities and Exchange Commission ("SEC"):

e e		

# Kentucky Utilities Company Case No. 2008-00251 Historical Test Period Filing Requirements

Filing Requirement 807 KAR 5:001 Section 10(6)(t) Sponsoring Witness: Valerie L. Scott Page 1 of 2

### **Description of Filing Requirement:**

If the utility had any amounts charged or allocated to it by an affiliate or general or home office or paid any monies to an affiliate or general or home office during the test period or during the previous three (3) calendar years, the utility shall file:

- 1. A detailed description of the method and amounts allocated or charged to the utility by the affiliate or general or home office for each charge allocation or payment;
- 2. An explanation of how the allocator for the test period was determined; and
- 3. All facts relied upon, including other regulatory approval, to demonstrate that each amount charged, allocated or paid during the test period was reasonable;

## Response:

- 1. Please see the attached schedule for a description of the amounts charged or allocated to KU. The method of allocation is set forth in the attached Cost Allocation Manual.
- 2. The allocator for the test period was determined using the methodology set forth in the Cost Allocation Manual.
- 3. The amounts charged, allocated or paid during the test period were reasonable for the following reasons: (i) the

#### I. INTRODUCTION

PUHCA 2005 states that centralized service companies must maintain and make available to the FERC their books, accounts and other records in the specific manner and preserve them for the required periods as the FERC prescribes in 18 Code of Federal Regulations Part 368 of the FERC Uniform System of Accounts. These records must be in sufficient detail to permit examination, audit, and verification, as necessary and appropriate for the protection of utility customers with respect to jurisdictional rates. The purpose of this CAM is to document the methods, policies and procedures that SERVCO will follow in performing certain services for affiliate companies. In developing this CAM the overriding goal was to protect investors and consumers by ensuring the methods, policies and procedures contained in this CAM were PUHCA 2005 compliant so that SERVCO costs are fully segregated, and fairly and equitably allocated among the affiliate companies. SERVCO was authorized to conduct business as a service company for E.ON U.S. (formerly LG&E Energy LLC) and its various subsidiaries and affiliates by order of the SEC on December 6, 2000, and commenced operations January 1, 2001.

Periodic changes to the CAM may be necessary due to future management decisions, interpretations by state or federal regulatory bodies, changes in structure or activities of affiliates, or other internal procedures

#### II. DESCRIPTION OF SERVICES

Service descriptions are organized by SERVCO responsibility areas, or provider departments and include the costs associated with providing that service.

## **Operations Organization**

#### **Retail Business Services**

<u>Customer Services</u> – providing call center and customer communication services for both electric and gas customers.

<u>Sales and Marketing Services</u> – providing programs for establishing strategies, oversight for marketing, sales and branding of utility and related services, and conducting marketing and sales programs for economic development, and demand side management.

<u>Economic Development and Major Accounts Services</u> – maintains community development, partnerships with state, regional, and local economic development allies, and customized products and services

Page 4 07/03/08

Meter Reading Services - providing meter reading and meter data services.

<u>Meter Operations Services</u> – conducts the testing of meters, completion of all customer requested service/field credit orders and the installation of commercial/industrial meters.

<u>Meter Asset Management Services</u> – maintains inventory, quality and environmental issues, policy and standards, technical support, and logistics.

<u>Cash Remittance Services</u> – provides remittance processing, customer payments, and collection services.

<u>Billing Integrity Services</u> – administering and providing customer billings and credit reviews.

#### **Energy Services**

<u>Project Engineering Services</u> – coordinating and managing all major generation construction.

<u>System Laboratory Services</u> – providing system laboratory services to the generating stations.

<u>Generation Engineering Services</u> – providing engineering management for new and existing generation assets.

Combustion Turbines Operations and Maintenance Services

<u>Fuel Procurement Services</u> – procuring coal, natural gas, oil and other bulk materials for generation facilities and ensuring compliance with price and quality provisions of fuel contracts.

Transmission Strategy and Planning Services

Transmission Protection and Substation Services

Transmission Line Services

Transmission Reliability and Compliance Services

Page 5 07/03/08

<u>Transmission System Operations Services</u> – providing transmission system control center services.

Transmission EMS Services

### **Energy Marketing Services**

<u>Energy Marketing Services</u> - providing market services to take advantage of the highest excess generation prices in the open market.

<u>Market Forecasting Services</u> – providing management services for financial forecasts of the utility market.

<u>Load Forecasting Services</u> – providing short- and long-term load forecasting services

<u>Generation Planning Services</u> – providing short- and long-term generation planning services.

### **Distribution Operations Services**

<u>Network Trouble and Dispatch Services</u> – providing dispatch services, reporting outage situations and coordinating restoration.

<u>Mapping and Records Management Services</u> – providing and maintaining the mapping of the electric infrastructure.

<u>Electric Engineering Services</u> – providing development engineering and construction standards, distribution system planning and analysis, substation construction project management and telecommunications systems design and analyses.

<u>Distribution Asset Management Services</u> – leads management and investment decisions regarding distribution assets, including resource allocation, development of uniform standards and procedures, determining performance targets and managing assets information and data.

<u>Substation Construction and Maintenance Services</u> – providing engineering and design services for substation construction, maintenance and operations areas.

Page 6 07/03/08

### **Finance Organization**

### Finance and Corporate Development Services

<u>Budgeting Services</u> - providing services related to managing, coordinating and reporting for the budgeting process.

<u>Financial Planning Services</u> – providing services related to financial planning and forecasting services, investment analysis and investment planning reports.

<u>Financial Systems</u> – providing business support and electronic data processing services for all financial systems including Oracle Applications, PowerPlant and PowerTax.

### **Corporate Controller Organization Services**

<u>Internal Financial and Management Reporting Services</u> – providing internal financial reports including standard and ad hoc management reporting.

External Financial Reporting Services – providing financial reports required or used by various external constituencies such as the FERC, the Kentucky Public Service Commission, the Virginia State Corporation Commission, U.S. Department of Energy (DOE), Internal Revenue Service, Nationally Recognized Municipal Securities Information Repository and financial institutions.

Accounting and Reporting Services – providing to management U.S. Generally Accepted Accounting Principles (GAAP), FERC, and International Financial Reporting Standards (IFRS) accounting research and interpretation and promulgation of accounting and internal control procedures. Perform U.S. GAAP and IFRS general ledger account and project analyses, reconciliations, and consolidation.

<u>Sundry Billing Services</u> – processing miscellaneous and non-standard billings and maintaining and monitoring associated accounts receivable.

<u>Property Accounting Services</u> – maintaining, analyzing and reporting related to continuing property records.

<u>Energy Marketing Accounting Services</u> – performing month-end validation of all power transactions and resolving any discrepancies; preparing invoices and wires; validating bills from other counterparties; preparing accounting, allocation and analysis of off system sales, off system purchases, and intercompany sales and purchases; and preparing various FERC, Fuel Adjustment Clause, Southwest Power Pool, and DOE reports.

<u>Revenue Accounting Services</u> – managing and analyzing internal and external revenue reporting.

Page 7 07/03/08

### **Corporate Tax and Payroll Organization Services**

<u>Payroll Services</u> – providing payroll services including the managing of payroll systems.

<u>Tax Accounting, Compliance and Reporting Services</u> – preparation of consolidated and subsidiary federal, state and local income tax returns; current and deferred tax accounting; utility gross receipts; sales/use tax; E.ON U.S. Foundation returns and supporting roles for business development, special requests and tax legislation.

<u>Tax Planning Services</u> – providing detailed forecasting of foreign, federal and state taxes, as well as, capital based and property tax planning.

<u>Tax - Special Projects Services</u> - providing business or project development, asset dispositions, tax credit studies, review/analysis of proposed tax legislation, etc.

**Audit Services** – providing independent and objective assurance along with consulting services and internal controls system review.

### **Information Technology Services**

<u>Information Technology - Corporate Functions Services</u> – services associated with corporate functions, not specific companies or work groups, and include groups such as IT Security, IT Finance and Administration, IT Training, and IT Strategy and Planning. This is where corporate standards, security policies and procedures and programs are developed and administered for the corporation.

<u>Information Technology - Administrative Services</u> – services associated with non-project management and administrative support. Total administrative services are proportionally recovered based on the level of charges assigned from the other products and services.

<u>Information Technology - Enhancements</u> – provides discretionary, project-based work done in IT. These projects create new client value or add business value to existing products/services.

<u>Information Technology - Application Services</u> – services associated with each of the existing applications that IT provides to the business, for example Oracle Applications, PeopleSoft, etc. These services incur costs related to application license fees and application support costs.

Page 8 07/03/08

<u>Information Technology - Client Services</u> – services associated with existing end user tools and related productivity software that the users can identify and interact with, such as a personal computer, telephone, email and file and print services.

<u>Information Technology - Platform Services</u> – services associated with shared computing platforms, databases, network and IT Service Desk.

### **Corporate Finance and Treasury Services**

<u>Cash Management and Investment Services</u> – providing management and monitoring of cash flows including review and acquisition of business entity cash requirements and procurement of short-term financing and credit lines.

<u>Corporate Finance Services</u> – providing overall finance options including evaluation of new financing vehicles and instruments, analysis of existing financing positions and raising long-term funds for all entities.

<u>Risk Management Services</u> – managing outside providers of risk services comprised of providing insurance and assisting affiliated entities in managing property and liability risks including claims, security, environmental, safety and consulting services.

<u>Credit Administration Services</u> – providing management of credit risk for wholesale energy sales and major vendors.

Energy Marketing Trading Controls Services – performing daily, weekly, monthly and ad hoc reporting on the trading portfolios related to total exposure, trading limits, and mark-to-market calculations. Other activities include performing an independent valuation and validation of significant transactions, and valuation algorithms, ensuring trading system security and performing trading system enhancements.

<u>Energy Marketing Contract Administration Services</u> – negotiating contracts with counterparties, administrating contracts, and maintaining contracts within the trading systems. Additional activities include assisting various departments with contract disputes and preparing and validating confirmations.

### **Supply Chain and Logistics Services**

<u>Procurement and Major Contracts Services</u> – providing for and administering major contract negotiations, requests for quotes, supplier relations and order placement services.

<u>Strategic Sourcing Services</u> – providing strategic sourcing services such as maintaining and analyzing the supplier base and performing supplier selection activities including contract negotiations and ongoing compliance.

Page 9 07/03/08

<u>Materials Logistics Services</u> – providing order management, materials handling and logistics, and inventory management services.

<u>Sourcing Support Services</u> – providing order management and general field support services for system policy and maintenance management, developing and monitoring of key performance metrics, and supplying day to day variance and reconciliation reporting services.

<u>Accounts Payable Services</u> – processing payments for purchase orders, check requests, employees' expense reimbursements, etc., and providing ad-hoc research and analysis services.

### **General Counsel / Secretary Organization**

### Compliance, Legal, and Environmental Affairs Services

Compliance and Legal Services – providing various legal and compliance services for all affiliated entities including in-house counsel and staff assistance in the areas of, among others, corporate and securities law, employment law, energy, public utility and regulatory law, contract law, litigation, environmental law and intellectual property law, evaluating legal claims and managing legal fees for outside counsel, as well as, compliance assessment and risk management, code of conduct, anti-fraud, ethics and helpline management, etc.

<u>Environmental Affairs Services</u> – providing management services related to performing analyses, monitoring and advocacy of regulatory and legislative environmental matters including securing of permits and approvals, providing environmental technical expertise, and representing the company in industry groups and before regulatory agencies dealing with environmental issues.

#### Regulatory Affairs and Government Affairs Management Services

<u>Regulatory Affairs Services</u> – providing management services for compliance with all laws, regulations and other policy requirements, including regulatory filings, expert testimony, tariff administration and compliance, pricing support, and development and monitoring of positions regarding ongoing regulatory matters.

Government Affairs Management Services – maintaining relationships with government policy makers and conducting lobbying activities.

Page 10 07/03/08

### Corporate Communications and Public Affairs Management Services

### Internal Communications Services

<u>External and Brand Communications Services</u> – providing all administrative and management support for external communication services, brand image management and corporate events.

<u>Public Affairs Management Services</u> – providing community relations functions, communicating public information to local organizations and providing oversight and communications to employees.

### **Administration Organization**

### **Operating Services**

<u>Facilities and Building Services</u> – providing building and grounds maintenance including coordination of office furniture and equipment purchases/leases, space utilization and layout, and building code and fire protection services.

<u>Security Services</u> – providing security personnel, security and monitoring devices for all affiliated entities.

<u>Production Mail Services</u> – providing production mail services for customer bills and other large customer mailings.

<u>Document Services</u> – providing document printing, reproduction services including mail delivery, scanning, off-site storage and document service desk support.

<u>Right-of-Way Services</u> – obtaining and retaining easements or fee simple property for placement and operation of company and affiliate equipment as well as managing real estate assets and maintaining real estate records.

### **Transportation Services**

<u>Transportation Services</u> – providing and operating transportation fleet for all affiliated companies including developing fleet policy, administering regulatory compliance programs, managing repair and maintenance of vehicles and procuring vehicles.

Page 11 07/03/08

#### **Human Resource Services**

<u>Human Resources - Compensation Services - providing services relating to the</u> establishment and oversight of compensation policies for executives and employees

<u>Human Resources – Benefits Services</u> – providing services relating to the establishment and oversight of benefits policies for employees, including administrative billings to vendors and retiree and survivor services, and maintenance of all personnel records.

<u>Human Resources – Health and Safety Services</u> – providing services relating to the establishment and oversight of health and safety policies for employees.

<u>Human Resources – Organization Development and Training Services</u> – providing training services to improve organizational effectiveness with an emphasis on employee and leadership development, leadership succession planning, and the change management process.

<u>Human Resources – Corporate Headquarters Services</u> – providing services relating to operational and strategic human resources management for corporate staff.

<u>Human Resources – Energy Services</u> – providing services relating to operational and strategic human resources management for Energy Services employees.

<u>Human Resources – Energy Delivery Services</u> – providing services relating to operational and strategic human resources management for Energy Delivery employees.

<u>Technical and Safety Training Services</u> – providing training services on technical and safety matters primarily for the Energy Delivery and Energy Services businesses

<u>Industrial Relations Management Services</u> – providing communication and oversight for union matters, negotiation of union contracts, and union dispute resolution services

<u>Executive Management Services</u> – providing executive leadership to the corporation which is comprised of the compensation and benefits of the corporate officers and executive assistants.

Page 12 07/03/08

# III. CORPORATE ORGANIZATION

### **OVERVIEW**

E.ON U.S. and its utility subsidiaries are engaged principally in the generation, transmission, distribution and sale of electricity. LG&E is also engaged in the storage, distribution, and sale of natural gas. E.ON U.S. and its subsidiaries are subject to the regulatory provisions of PUHCA 2005. LG&E and KU are subject to regulation by the FERC and state utility commissions in Kentucky. KU is also subject to regulation by state utility commissions in Virginia and Tennessee.

E.ON U.S. has four direct subsidiaries: LG&E, KU, LEM, and Capital Corp., which includes WKE, E.ON U.S. Natural Gas Trading, Inc. and the Argentine Gas Distribution businesses. E.ON U.S. has an affiliate relationship with E.ON U.S. Foundation due to overseeing all operations of the foundation.

### **UTILITY OPERATIONS**

LG&E, incorporated in Kentucky in 1913, is a regulated public utility engaged in the generation, transmission, distribution and sale of electric energy and the storage, distribution and sale of natural gas LG&E is a wholly-owned subsidiary of E.ON U.S. At December 31, 2007, LG&E supplied natural gas to approximately 326,000 customers and electricity to approximately 401,000 customers in Louisville and adjacent areas in Kentucky. LG&E's service area covers approximately 700 square miles in 17 counties in Kentucky.

KU, incorporated in Kentucky in 1912 and in Virginia in 1991, is a regulated public utility engaged in the generation, transmission, distribution and sale of electric energy in Kentucky, Virginia and Tennessee. KU is a wholly-owned subsidiary of E.ON U.S. At December 31, 2007, KU provided electricity to approximately 506,000 customers in 77 counties in central, southeastern and western Kentucky, to approximately 30,000 customers in 5 counties in southwestern Virginia and 5 customers in Tennessee.

### SERVICE COMPANY

SERVCO, a Kentucky corporation is a centralized service company registered under the PUHCA 2005 and is authorized to conduct business as a service company for E.ON U.S. and its various subsidiaries and affiliates by order of the SEC dated December 6, 2000, and commencing operation January 1, 2001. SERVCO is the service company for affiliated entities, including E.ON U.S., LG&E, KU, Capital Corp, and LEM and provides a variety of administrative, management, engineering, construction, environmental and support services. SERVCO provides its services at cost, as permitted under PUHCA 2005.

Development of the SERVCO organization was predicated on the fact that if the employee performed activities benefiting more than one affiliate, that employee would become a part of the SERVCO organization. In many respects, employees residing in typical finance, administrative and general, management and other support departments are fully subject to SERVCO organizational placement.

Page 13 07/03/08

Many operational employees dedicated to providing a service to just one affiliate, by definition, are not subject to SERVCO placement. However management and support staff overseeing the business activities of more than one of these operational groups are subject to SERVCO placement.

### OTHER BUSINESS OPERATIONS

E.ON U.S. Foundation, a charitable foundation exempt from federal income tax under Section 501(c)(3) of the Internal Revenue Code, makes charitable contributions to qualified entities.

SERVCO also transacts business with E.ON AG and its affiliates on behalf of E.ON U.S.

LEM engages in asset based energy marketing which primarily involves the marketing of power generated by non-utility physical assets controlled by E.ON U.S. and its affiliates.

Capital Corp. is the primary holding company for the E.ON U.S.'s non-utility businesses. Its businesses include:

WKE and affiliates. WKE has a 25-year lease of and operates the generating facilities of Big Rivers Electric Corporation, a power generation cooperative in western Kentucky, and a coal-fired facility owned by the City of Henderson. E.ON U.S. plans to discontinue the operations of WKE.

Argentine Gas Distribution. Through its Argentine Gas Distribution operations, Capital Corp. owns interests in entities which distribute natural gas to approximately one million customers in Argentina through two distribution companies (Distribuidora de Gas Del Centro S.A. and Distribuidora de Gas Cuyana S.A.).

Natural Gas Trading: E.ON U.S. Natural Gas Trading Inc. engages in non-utility financial and physical trading of natural gas.

# IV. TRANSACTIONS WITH AFFILIATES

#### OVERVIEW

E.ON U.S. formed SERVCO, as a service company to provide goods and services for affiliated companies within the E.ON U.S. system. SERVCO and affiliated companies (or their parent entities) may enter into SAs, which may establish the general terms and conditions for providing those services, including those mentioned in Section II of the CAM.

Page 14 07/03/08

At formation certain LG&E, KU and E.ON U.S. employees became employees of SERVCO and such employees continued to provide goods and services to the regulated and non-regulated entities. SERVCO provides a variety of administrative, management, engineering, construction, environmental and support services. SERVCO also coordinates the intercompany billings with E.ON and their affiliates which mainly include transactions for expatriate services.

Regulated affiliates receive services at cost, pursuant to the service agreements. Non-regulated affiliates generally receive services at cost; however, certain services may permit pricing at fair-market value. The provisions included in contracts or service agreements govern transactions between SERVCO and the regulated and non-regulated affiliates.

### **Definitions of Cost**

Tariff Rate – The price charged to customers under applicable tariffs on file with federal or state regulatory commissions.

Fair Market Value — The price held out by a providing entity to the general public in the normal course of business (i.e. the price at which a reasonable buyer and a reasonable seller are willing to transact in the normal course of business).

Cost – The charge used for transactions with affiliates for which no tariff rate or fair market value is applicable. SERVCO follows the definition of cost defined in PUHCA 2005.

This section separately details the nature and frequency for services provided by SERVCO to affiliated companies, as described below:

Ongoing – Provided on a prearranged, continuous basis (i.e., daily)
 Frequent – Provided as requested on a regular basis (i.e., several times per month)
 Infrequent – Provided as requested on an irregular basis (i.e., several times per year)

All charges by SERVCO to affiliated entities follow the principle of fully distributed cost. Primary affiliates receiving the service are designated below as:

- R Regulated (LG&E and KU)
- NR Non-regulated (Capital Corp., LEM and E.ON U.S. Foundation)
- C Corporate (E.ON and its subsidiaries and affiliates, E.ON U.S. and Capital Corp.)
- A All

## V. COST APPORTIONMENT METHODOLOGY

#### OVERVIEW

The costs of services provided by SERVCO will be directly assigned, distributed or allocated by activity, project, program, work order or other appropriate basis. The primary basis for charges to affiliates is the direct charge method (see section VI for time reporting procedures). The methodologies listed below pertain to all other costs which are not directly assigned but which make up the fully distributed cost of providing the product or service.

Directly Assignable – Expenses incurred for activities and services exclusively for the benefit of one affiliate. In many respects, these types of expenses relate to non-SERVCO employees that perform dedicated services to one affiliate, although SERVCO employees also directly report where feasible.

**Directly Attributable** – Expenses incurred for activities and services that benefit more than one affiliate and which can be apportioned using direct measures of costs causation.

Indirectly Attributable – Expenses incurred for activities and services that benefit more than one affiliate and which can be apportioned using general measures of cost causation.

Unattributable – Expenses or portions thereof incurred for activities and services that have been determined as not appropriate for apportionment. The unattributable portions of these costs relate primarily to activities such as corporate diversification, political or philanthropic endeavors and, as such, may be charged, in whole or in part, to Capital Corp.

Page 18 07/03/08

SERVCO will allocate the costs of service among the affiliated companies using one of several methods that most accurately distributes the costs. The method of cost allocation varies based on the department rendering the service. Any of the methods may be adjusted for any known and reasonably quantifiable events, or at such time as may be required due to significant changes in the business, but are generally determined annually. The allocation methods used by SERVCO are as follows:

Contract Ratio – Based on the sum of the physical amount (i.e. tons of coal, cubic feet of natural gas) of the contract for both coal and natural gas for the immediately preceding twelve consecutive calendar months, the numerator of which is for an operating company or an affected affiliate company and the denominator of which is for all operating companies and affected affiliate companies.

Departmental Charge Ratio – A specific SERVCO department ratio based upon various factors such as labor hours, labor dollars, departmental or entity headcount, etc. The departmental charge ratio typically applies to indirectly attributable costs such as departmental administrative, support, and/or material and supply costs that benefit more than one affiliate and that require allocation using general measures of cost causation. Methods for assignment are department-specific depending on the type of product or service being performed and are documented and monitored by the Budget Coordinators for each department.

Electric Peak Load Ratio – Based on the sum of the monthly electric maximum system demands for the immediately preceding twelve consecutive calendar months, the numerator of which is for an operating company and the denominator of which is for all operating companies.

Energy Marketing Ratio – Based on the absolute value of equivalent megawatt hours purchased or sold for the immediate preceding twelve consecutive calendar months, the numerator of which is for an operating company or an affiliate and the denominator of which is for all operating companies and affected affiliate companies.

Information Systems Chargeback Rates – Rates for services, including but not limited to software, consulting, mainframe and personal computer services, are based on the costs of labor, materials and information services overheads related to the provision of each service. Such rates are applied based on the specific equipment employed and the measured usage of services by client entities.

Non-Fuel Material and Services Expenditures – A ratio based on non-fuel material and services expenditures, net of reimbursements, for the immediately preceding twelve consecutive calendar months. The numerator is equal to such expenditures for a specific entity and/or line-of-business as appropriate and the denominator is equal to such expenditures for all applicable entities.

Number of Customers Ratio – A ratio based on the number of retail electric and/or gas customers. This ratio will be determined based on the actual number of customers at the end of the previous calendar year. In some cases, the ratio may be calculated based on the type of customer class being served (i.e. Residential, Commercial or Industrial).

Page 19 07/03/08

Number of Employees Ratio – A ratio based on the number of employees benefiting from the performance of a service. This ratio will be determined based on actual counts of applicable employees at the end of the previous calendar year. A two-step assignment methodology is utilized to properly allocate SERVCO employee costs to the proper legal entity.

Number of Meters Ratio – Ratio based on the number or types of meters being utilized by all levels of customer classes within the system for the immediately preceding twelve consecutive calendar months. The numerator is equal to the number of meters for each utility and the denominator is equal to the total meters for KU and LG&E.

Number of Transactions Ratio – Based on the sum of transactions occurring in the immediately preceding twelve consecutive calendar months, the numerator of which is for an operating company or an affected affiliate company and the denominator of which is for all operating companies and affected affiliate companies. For example, services with regard to Procurement and Major Contracts would define a transaction as the number of contracts negotiated. Services pertaining to Materials Logistics would define the transaction as the number of items ordered, picked and disbursed out of the warehouse. Services pertaining to Accounts Payable would define the transaction as the number of invoices processed. The Regulatory Accounting and Reporting Department is responsible for maintaining and monitoring specific product/service methodology documentation for actual transactions related to SERVCO billings.

Payroll Ratio – Based on the sum of the payroll costs for the immediately preceding twelve consecutive calendar months, the numerator of which is for an operating company or an affected affiliate company and the denominator of which is for all operating companies and affected affiliate companies.

**Project Ratio** – Based on the total costs for any departmental or affiliate project for the immediately preceding twelve consecutive calendar months, the numerator of which is for an operating company or an affected affiliate company and the denominator of which is for all operating companies and affected affiliate companies.

Regulatory Mandate Ratios – Based on federal or state mandated percentage allocations based on regulatory proceedings and requirements. These ratios are typically developed in concert with regulatory authorities representing the results of merger or joint asset ownership negotiations and are supported by specific contracts regarding legal entity allocation requirements. Contract terms are maintained by the Regulatory Accounting and Reporting Department.

Retail Revenue Ratio – Based on utility revenues, excluding energy marketing revenues, for the immediate preceding twelve consecutive calendar months, the numerator of which is for an operating company or an affiliate and the denominator of which is for all operating companies and affected affiliate companies.

Revenue Ratio – Based on the sum of the revenue for the immediately preceding twelve consecutive calendar months, the numerator of which is for an operating company or an affected affiliate company and the denominator of which is for all operating companies and affected affiliate companies.

Page 20 07/03/08

Total Assets Ratio – Based on the total assets at year end for the preceding year, the numerator of which is for an operating company or affected affiliate company and the denominator of which is for all operating companies and affected affiliate companies. In the event of joint ownership of a specific asset, asset ownership percentages will be utilized to assign costs.

Transportation Resource Management System Chargeback Rate – Rates for use of transportation equipment are based on the costs associated with providing and operating transportation fleet for all affiliated companies including developing fleet policy, administering regulatory compliance programs, managing repair and maintenance of vehicles and procuring vehicles. Such rates are applied based on the specific equipment employment and the measured usage of services by the various company entities.

The following product and service listing details the type of assignments being employed.

Product or Service	Assignment Method
Customer Services	Number of Customers Ratio
Sales and Marketing Services	Departmental Charge Ratio
Economic Development and Major Account	Departmental Charge Ratio

# VI. TIME DISTRIBUTION, BILLING AND ASSET TRANSFER POLICIES

#### OVERVIEW

SERVCO utilizes ORACLE or other financial systems in which project/task combinations are set up to equate to products and services. In some cases, departments have set up many project/tasks that map to products and services. In many cases, there is a one to one relationship between the project/task and the product. The ORACLE system also automatically captures the home company (providing the service) and the charge company (receiving the service). Regardless of the method of reporting, charges related to specific products reside on the company receiving the service and therefore can be identified for billing purposes as well as for preparation of SERVCO financial statements. This ensures that:

- 1. Separation of costs between regulated and non-regulated affiliates will be maintained
- 2. Intercompany transactions and related billings are structured so that non-regulated activities are not subsidized by regulated affiliates
- 3. Adequate audit trails exist on the books and records

#### **BILLING POLICIES**

Billings for transactions between SERVCO and affiliates are issued on a timely basis with documentation sufficient to provide the receiving party with enough detail to understand the nature of the billing, the relevant components, and other information as required by affiliates. Financial settlements for transactions are made within 30 days. Interest charges at a reasonable rate may apply.

### ASSET TRANSFERS

Unless otherwise permitted by regulatory authority or exception, (i) transfers or sales of assets from regulated affiliates to non-regulated affiliates will be priced at the greater of cost or fair market value; (ii) transfers or sales of assets from non-regulated affiliates to regulated affiliates will be priced at the lower of cost or fair market value and (iii) transfers of assets between regulated affiliates shall be priced at no more than cost less depreciation. Settlement of liabilities will be treated in the same manner.

Page 24 07/03/08

### TIME DISTRIBUTION

SERVCO has three methods of distribution to record employee salaries and wages while providing services for the affiliated entities: Positive time reporting, allocation time reporting and exception time reporting. Each department's job activities will dictate the type of time reporting method used.

### **Positive Time Reporting**

Positive time reporting or direct time reporting requires all employees of a department to track all chargeable hours every day. Time may be charged to the nearest quarter hour.

Departments that have positive time reporting have labor-based activities that are easily trackable given the project/task code combinations noted above. All employees are given appropriate project numbers that are associated with the service that is being provided. The proper coding for direct assignment of costs is on various source documents, including the Virtual Online Time System (VOLTS) and disbursement requests. Each department or project manager is responsible for ensuring employees charge the appropriate charge codes for the services performed. This form of time reporting is documented in the VOLTS, which upon completion, is approved by the employees' immediate supervisor.

### **Allocation Time Reporting**

Allocation time reporting allows for certain departments to set up a predefined allocation percentage to affiliated company project/tasks. This is typically the case when the department is transaction-based, therefore, performing routine, similar tasks benefiting multiple affiliates. Each department will use its ratio (see ratio assignment listing in section V) that was assigned by its budget coordinator to allocate the appropriate time to individual charge numbers that are associated to that department's services. Unless otherwise permitted by regulatory authority or exception, the selection of ratios and the calculation of allocation percentages should be derived from or bear relationship to an empirical analysis of a prior representative period. These allocation percentages are reviewed on an annual basis to update to actual allocation percentages when needed.

### **Exception Time Reporting**

If an employee was working on a completely new project that had not been defined within the monthly or annual allocation process, then the employee would be given the new allocation with project/task code, update his/her time allocation accordingly and get his/her manager's approval. If an allocation from a previous pay period needs to be adjusted then that correction can be entered into the VOLTS by using the "in and out" function.

Page 25 07/03/08

Filing Requirement 807 KAR 5:001 Section 10(6)(u) Sponsoring Witness: W. Steven Seelye

# Description of Filing Requirement:

If the utility provides gas, electric or water utility service and has annual gross revenues greater than \$5,000,000, a cost of service study based on a methodology generally accepted within the industry and based on current and reliable data from a single time period.

# Response:

Please refer to the testimonies and exhibits of W. Steven Seelye.

Filing Requirement 807 KAR 5:001 Section 10(6)(v) Sponsoring Witness: Lonnie E. Bellar

# Description of Filing Requirement:

Local exchange carriers with fewer than 50,000 access lines shall not be required to file cost of service studies, except as specifically directed by the commission Local exchange carriers with more than 50,000 access lines shall file:

- 1. A jurisdictional separations study consistent with Part 36 of the Federal Communications Commission's rules and regulations; and
- 2. Service specific cost studies to support the pricing of all services that generate annual revenue greater than \$1,000,000, except local exchange access:
  - a. Based on current and reliable data from a single time period; and
  - b. Using generally recognized fully allocated, embedded, or incremental cost principles.

# Response:

Not applicable to KU's Application.

<u>:</u>			

Filing Requirement 807 KAR 5:001 Section 10(7)(a) Sponsoring Witness: Valerie L. Scott

# **Description of Filing Requirement:**

Upon good cause shown, a utility may request pro forma adjustments for known and measurable changes to ensure fair, just and reasonable rates based on the historical test period. The following information shall be filed with applications requesting pro forma adjustments or a statement explaining why the required information does not exist and is not applicable to the utility's application:

(a) A detailed income statement and balance sheet reflecting the impact of all proposed adjustments;

### Response:

See attached.

    (2) See line 21, adjustments. Electric Income Statement.

  - See lines 5, 8, 10, adjustments. Electric Income Statement.
     See line 11, adjustments. Electric Income Statement.
     Consistent with LG&E's Rate Case 2000-080, only income statement pro-forma adjustments are shown

Filing Requirement 807 KAR 5:001 Section 10(7)(b) Sponsoring Witness: Valerie L. Scott

# Description of Filing Requirement:

Upon good cause shown, a utility may request pro forma adjustments for known and measurable changes to ensure fair, just and reasonable rates based on the historical test period. The following information shall be filed with applications requesting pro forma adjustments or a statement explaining why the required information does not exist and is not applicable to the utility's application:

(b) The most recent capital construction budget containing at least the period of time as proposed for any pro forma adjustment for plant additions.

# Response:

Not applicable since no pro forma adjustments for plant additions are proposed.

Filing Requirement 807 KAR 5:001 Section 10(7)(c) Sponsoring Witness: Valerie L. Scott

# **Description of Filing Requirement:**

Upon good cause shown, a utility may request pro forma adjustments for known and measurable changes to ensure fair, just and reasonable rates based on the historical test period. The following information shall be filed with applications requesting pro forma adjustments or a statement explaining why the required information does not exist and is not applicable to the utility's application:

- (c) For each proposed pro forma adjustment reflecting plant additions provide the following information:
  - 1. The starting date of the construction of each major component of plant;
  - 2. The proposed in-service date;
  - 3. The total estimated cost of construction at completion;
  - 4. The amount contained in construction work in progress at the end of the test period;
  - 5. A schedule containing a complete description of actual plant retirements and anticipated plant retirements related to the pro forma plant additions including the actual or anticipated date of retirement;
  - 6. The original cost, cost of removal and salvage for each component of plant to be retired during the period of the proposed pro forma adjustment for plant additions;

Filing Requirement 807 KAR 5:001 Section 10(7)(c) Sponsoring Witness: Valerie L. Scott

# Description of Filing Requirement (continued):

- 7. An explanation of any differences in the amounts contained in the capital construction budget and the amounts of capital construction cost contained in the pro forma adjustment period; and
- 8. The impact on depreciation expense of all proposed pro forma adjustments for plant additions and retirements;

### Response:

Not applicable since no pro forma adjustments for plant additions are proposed.

Filing Requirement 807 KAR 5:001 Section 10(7)(d) Sponsoring Witness: Valerie L. Scott

# **Description of Filing Requirement:**

Upon good cause shown, a utility may request pro forma adjustments for known and measurable changes to ensure fair, just and reasonable rates based on the historical test period. The following information shall be filed with applications requesting pro forma adjustments or a statement explaining why the required information does not exist and is not applicable to the utility's application:

(d) The operating budget for each period encompassing the pro forma adjustments.

# Response:

See attached.

Filing Requirement 807 KAR 5:001 Section 10(7)(e) Sponsoring Witness: W. Steven Seelye

# **Description of Filing Requirement:**

Upon good cause shown, a utility may request pro forma adjustments for known and measurable changes to ensure fair, just and reasonable rates based on the historical test period. The following information shall be filed with applications requesting pro forma adjustments or a statement explaining why the required information does not exist and is not applicable to the utility's application:

(e) The number of customers to be added to the test period-end level of customers and the related revenue requirements impact for all pro forma adjustments with complete details and supporting work papers.

# Response:

Please refer to the testimonies and exhibits of W. Steven Seelye.
