)

**PETITION FOR REVIEW, APPLICATION FOR GRANT OF NUMBERING  
RESOURCES, AND REQUEST FOR EXPEDITED TREATMENT**

Windstream Kentucky East, LLC, ("Windstream") petitions the Public Service Commission of Kentucky ("Commission") pursuant to 47 C.F.R. § 52.15(g)(4) to review and overturn on an expedited basis recent decisions by the North American Number Pooling Administrator ("NANPA") to withhold certain numbering resources from Windstream needed by the company to continue to provide reliable and adequate service to customers. In support of its Petition Windstream states:

**Windstream's Application And NANPA's Denial**

1. Windstream has commenced work on its U.S. Department of Agriculture Rural Utilities Service Broadband Initiatives Program ("BIP") projects that are being partially funded by the American Recovery and Reinvestment Act. These projects entail, among other things, deploying packet switches that will be compatible with the new broadband infrastructure. Such packet switches require their own location routing numbers ("LRNs") distinct from those currently assigned to Windstream's time division multiplexing ("TDM") switches. Pertinent industry guidelines state that "[a] unique LRN will be provisioned to identify each recipient switch or POI in the number portability capable network" and that "a service provider will

establish one (1) LRN per LATA from an assigned NXX for each recipient switch or POI in the number portability capable network.”<sup>1</sup>

2. In addition, to use the new broadband loop carrier (“BLC”) equipment being deployed downstream of the packet switches to also provide voice service using native numbers, an additional one-thousand block of telephone numbers must be assigned to the exchange in which the new services will be provided.

3. Windstream does not have any NXX codes that could be moved for the purpose of establishing an LRN, nor does it have clean one-thousand number blocks that could be intra-service provider ported to the new switches. Further, with regard to the exchanges pertinent to this Application, Windstream does not possess clean one-thousand number blocks that can be assigned to the exchanges served by the BLCs.

4. On October 20, 2011 Windstream filed twenty-four applications with NANPA relating to these projects. With regard to the LRNs (which accounted for twenty-two of these applications),<sup>2</sup> Windstream narrowly-tailored its request for numbering resources so as to only seek a single block of one-thousand numbers so that the remaining nine one-thousand number blocks would be available to other carriers (a copy of such applications is attached as **EXHIBIT 1**). With regard to the pertinent exchanges in which the new BLCs are being deployed in which LRNs were not already sought, Windstream sought only the minimum single one-thousand number block (a copy of such applications is attached as **EXHIBIT 2**).

<sup>2</sup> Windstream’s LRN applications pertained to the following rate centers: Ashland, Burnside, Campbellsville, Clarkson, Evarts, Flemingsburg, Garrison, Glasgow, Greenup, Hazard, Hodgenville, Irvine, Lancaster, Liberty, London, Meads, Nicholasville, Owingsville, Tollesboro, Vanceburg, Versailles, and Washington.

5. On October 20, 2011 NANPA denied Windstream's request on the grounds that Windstream had not satisfied the months-to-exhaust ("MTE") criteria established in the Central Office Code Assignment Guidelines. A copy of NANPA's denial is attached as **EXHIBIT 3**.

6. Windstream has demonstrated a verifiable need due to its needs in connection with a Broadband Stimulus project upgrade to these rural exchanges.

7. Windstream can not satisfy the need for numbering resources from its current inventory or in any other manner and has exhausted all other available remedies.

### **Basis For Commission Review and Action**

8. Federal Communications Commission rules make clear that a carrier may challenge a numbering resource denial by the PA before the appropriate state regulatory commission and that the state commission has jurisdiction to affirm or overturn the PA's decision to withhold numbering resources.<sup>3</sup> The FCC specifically grants state commissions "flexibility to direct the NANPA or Pooling Administrator to assign additional numbering resources to carriers that have demonstrated a verifiable need for additional numbering resources outside of these specifically enumerated instances."<sup>4</sup> In particular, in establishing the safety valve, the FCC recognized that conditions that could give rise to a need for additional numbering resources "might include situations where a carrier has multiple switches within a rate center but it is unable to readily share numbering resources among those switches."<sup>5</sup>

<sup>5</sup> *Id.* at ¶ 58. See also *id.* at ¶¶ 61 and 65.

9. Based upon the need described above, Windstream seeks the Commission's reversal of Neustar's decision and requests that the Commission provide Windstream authorization for the new LRNs and new thousand-number blocks.

10. As set forth above, Windstream has demonstrated a verifiable need due to deployment of a new switch and corresponding new service in connection with a Broadband Stimulus project upgrade to these rural exchanges. In other cases, the Commission has granted the requested numbering relief despite NANPA's determination that the carrier did not meet the MTE or utilization thresholds.<sup>6</sup>

11. Granting Windstream's Petition will not adversely affect the numbering resources available for use by carriers throughout the state in providing telecommunications services to their customers. Granting Windstream's request is in the public interest and consistent with the FCC's rules and decisions.

#### **Request for Expedited Treatment**

12. Windstream respectfully requests that the Commission act upon this Petition within ten business days. Expedited treatment is required to meet the needs of the persons to be served through the switch and Windstream's internal business plans and schedule.

13. The FCC also has recognized the importance of timely action:

[W]e recognize that in many instances, the failure to address a request for additional numbering resources can impair a carrier's ability to stay in or expand business. We therefore direct states to act on carrier requests for a safety valve as expeditiously as possible. Although we do not establish a specific time limit for states to act on these requests, we believe that, in most instances, 10 business days from receipt of a request that the state determines

to be sufficiently detailed and complete will be sufficient time to review and act upon safety valve requests.<sup>7</sup>

14. Therefore, Windstream respectfully requests that the Commission:
1. Overturn the North American Number Pooling Administrator's decision;
  2. Direct NANPA to grant Windstream's requests for numbering resources; and
  3. Enter its Order doing so within ten business days, or as soon thereafter as is possible; and
  4. Grant Windstream such further relief as may be appropriate.

### **Instructions for filling out each Section of the Part 1A form:**

Section 1.1 Contact information requires that Service Providers supply under "Block Applicant" the company name, company headquarters address, a contact within the company, an address where the contact person may be reached, in addition to the correct phone, fax, and e-mail address. The Pooling Administrator section also requires the Service Provider to fill in the Pooling Administrator s name, address, phone, fax and e-mail.

Section 1.2 Service Providers who need a thousands-block assignment or for an Location Routing Number (LRN) are required to fill in this section. If needed for an LRN, a CO Code Application needs to also be submitted to the PA. The Service Provider should supply the Numbering Plan Area (NPA); the Local Access Transport Area (LATA), which is a three-digit number that can be found in the Telcordia<sup>TM</sup> LERG<sup>TM</sup> Routing Guide. The Operating Company Number (OCN) assigned to the service provider and the OCN its parent company. An OCN is a four-character alphanumeric assigned by Telcordia<sup>TM</sup> Routing Administration (TRA). In addition, the number of thousands-blocks requested should be supplied. The Switch Identification as well as the city or wire center name, rate center, rate center sub zone, homing tandem and CLI<sup>TM</sup> tandem of the facilities based provider <sup>xi</sup>. Explanations of these terms may be found in the footnotes.

Section 1.3 The date the Service Provider completes the application should be entered in this section, as well as the Effective Date of the requested thousands-block.

Section 1.4 Service Providers should indicate their type, e.g., local exchange carrier, competitive local exchange carrier, interexchange carrier, CMRS. They also indicate the primary type of business in which the numbering resource is to be used. Service Providers also may indicate their preference for a particular thousands-block, e.g., 321-9XXX, or indicate any thousands-blocks that may be undesirable, e.g., 321-6XXX.

Section 1.5 Service Providers indicate the type of request. Initial requests are for first applications for thousands-blocks in a rate center, growth for additional thousands-blocks in a rate center in which the applicant already has numbering resources, and provide the required evidence as ordered by the FCC.

Section 1.6 Service Providers must indicate the updated/current information in regards to contaminated TNs on the block they are returning to the pool. Blocks with over 10% contamination (101 TNs or more) shall not be returned to the pool unless they meet criteria outlined in section 9.1.2 of these Guidelines. If the block being returned is over 10% contaminated the PA shall seek a new block holder. If question c and/or d have a response of No, the request for return shall be denied. The thousands-block applicant certifies veracity of this form by signing their name, and providing their title and date.

Explanation: \_\_\_\_\_

<sup>1</sup>A copy of this worksheet is required to be submitted to the Pooling Administrator when requesting additional numbering resources in a rate center. For auditing purposes, the applicant must retain a copy of this document.

<sup>2</sup>Quantity of numbers activated in the past 90 days is based on blocks and/or codes received from the administrator and shall be reported in increments of 1,000 or 10,000 TNs (e. g.: 2 blocks received=2,000 and 1 code received =10,000).

<sup>3</sup>Net change in TNs no longer available for assignment in each previous month, starting with the most distant month as Month #1, and Month #6 as the current month.

<sup>4</sup>Forecast of TNs needed in each following month, starting with the most recent month as Month #1.

<sup>5</sup>To be assigned an additional thousands-block (NXX-X) for growth, "Months to Exhaust" must be less than or equal to 6 months. (FCC 00-104, section 52.15 (g) (3) (iii)).

Companies with no prior CO Code or Company Code assignments may contact NECA (800-228-8597) to be assigned a Company Code (s). Since multiple OCNs and/or Company Codes may be associated with a given company, companies with prior assignment should direct questions regarding appropriate OCN usage to the Telcordia™ Routing Administration (TRA) on 732-699-6700.

<sup>5</sup> This is an eleven-character descriptor of the switch provided by the owning entity for the purpose of routing calls. This is the eleven-character Telcordia™ COMMON LANGUAGE CLLI™ Location Identification of the applicant's switch or POI. (Telcordia and CLLI are trademarks and COMMON LANGUAGE is a registered trademarks of Telcordia Technologies, Inc.)

<sup>6</sup> Rate Center name must be a tariffed Rate Center associated with toll billing.

<sup>7</sup> Applies to any code applicant connecting to the Public Switched Telephone Network via a tandem owned by a different carrier.

<sup>8</sup> This is an eleven-character descriptor provided by the owning entity for the purpose of routing calls. This must be the CLLI™ Location Identification Code of the switching entity/POI, and is the same on Part 2, Form 1, Page 2 of 2.

<sup>9</sup> Code applicants should request an effective date that is at least 66 calendar days from the submission of this form. It should be noted that interconnection arrangements and facilities need to be in place prior to activation of a code. Such arrangements are outside the scope of these guidelines.

<sup>10</sup> Requests for code assignment shall not be made more than six months prior to the requested effective date.

<sup>11</sup> Select if you are the current Code Holder

<sup>12</sup> Select if you are not the current Code Holder

<sup>13</sup> The Applicant will indicate "YES" if the NXX being requested will be used for thousands-block number pooling and will leave this field blank if it is not.

<sup>14</sup> An incomplete form may result in delays in processing this request.

The Pooling Administrator section also requires the Service Provider to fill in the Pooling Administrator s name, address, phone, fax and e-mail.

Section 1.2 Service Providers who need a thousands-block assignment or for an Location Routing Number (LRN) are required to fill in this section. If needed for an LRN, a CO Code Application needs to also be submitted to the PA. The Service Provider should supply the Numbering Plan Area (NPA); the Local Access Transport Area (LATA), which is a three-digit number that can be found in the Telcordia™ LERG™ Routing Guide. The Operating Company Number (OCN) assigned to the service provider and the OCN its parent company. An OCN is a four-character alphanumeric assigned by Telcordia™ Routing Administration (TRA). In addition, the number of thousands-blocks requested should be supplied. The Switch Identification as well as the city or wire center name, rate center, rate center sub zone, homing tandem and CLLI™ tandem of the facilities based provider <sup>xi</sup>. Explanations of these terms may be found in the footnotes.

Section 1.3 The date the Service Provider completes the application should be entered in this section, as well as the Effective Date of the requested thousands-block.

Section 1.4 Service Providers should indicate their type, e.g., local exchange carrier, competitive local exchange carrier, interexchange carrier, CMRS. They also indicate the primary type of business in which the numbering resource is to be used. Service Providers also may indicate their preference for a particular thousands-block, e.g., 321-9XXX, or indicate any thousands-blocks that may be undesirable, e.g., 321-6XXX.

Section 1.5 Service Providers indicate the type of request. Initial requests are for first applications for thousands-blocks in a rate center, growth for additional thousands-blocks in a rate center in which the applicant already has numbering resources, and provide the required evidence as ordered by the FCC.

Section 1.6 Service Providers must indicate the updated/current information in regards to contaminated TNs on the block they are returning to the pool. Blocks with over 10% contamination (101 TNs or more) shall not be returned to the pool unless they meet criteria outlined in section 9.1.2 of these Guidelines. If the block being returned is over 10% contaminated the PA shall seek a new block holder. If question c and/or d have a response of No, the request for return shall be denied. The thousands-block applicant certifies veracity of this form by signing their name, and providing their title and date.

The Service Provider should supply the Numbering Plan Area (NPA); the Local Access Transport Area (LATA), which is a three-digit number that can be found in the Telcordia™ LERG™ Routing Guide. The Operating Company Number (OCN) assigned to the service provider and the OCN its parent company. An OCN is a four-character alphanumeric assigned by Telcordia™ Routing Administration (TRA). In addition, the number of thousands-blocks requested should be supplied. The Switch Identification as well as the city or wire center name, rate center, rate center sub zone, homing tandem and CLLI™ tandem of the facilities based provider <sup>xi</sup>. Explanations of these terms may be found in the footnotes.

Section 1.3 The date the Service Provider completes the application should be entered in this section, as well as the Effective Date of the requested thousands-block.

Section 1.4 Service Providers should indicate their type, e.g., local exchange carrier, competitive local exchange carrier, interexchange carrier, CMRS. They also indicate the primary type of business in which the numbering resource is to be used. Service Providers also may indicate their preference for a particular thousands-block, e.g., 321-9XXX, or indicate any thousands-blocks that may be undesirable, e.g., 321-6XXX.

Section 1.5 Service Providers indicate the type of request. Initial requests are for first applications for thousands-blocks in a rate center, growth for additional thousands-blocks in a rate center in which the applicant already has numbering resources, and provide the required evidence as ordered by the FCC.

Section 1.6 Service Providers must indicate the updated/current information in regards to contaminated TNs on the block they are returning to the pool. Blocks with over 10% contamination (101 TNs or more) shall not be returned to the pool unless they meet criteria outlined in section 9.1.2 of these Guidelines. If the block being returned is over 10% contaminated the PA shall seek a new block holder. If question c and/or d have a response of No, the request for return shall be denied. The thousands-block applicant certifies veracity of this form by signing their name, and providing their title and date.

<sup>1</sup>A copy of this worksheet is required to be submitted to the Pooling Administrator when requesting additional numbering resources in a rate center. For auditing purposes, the applicant must retain a copy of this document.

<sup>2</sup>Quantity of numbers activated in the past 90 days is based on blocks and/or codes received from the administrator and shall be reported in increments of 1,000 or 10,000 TNs (e. g.: 2 blocks received=2,000 and 1 code received =10,000).

<sup>3</sup>Net change in TNs no longer available for assignment in each previous month, starting with the most distant month as Month #1, and Month #6 as the current month.

<sup>4</sup>Forecast of TNs needed in each following month, starting with the most recent month as Month #1.

<sup>5</sup>To be assigned an additional thousands-block (NXX-X) for growth, "Months to Exhaust" must be less than or equal to 6 months. (FCC 00-104, section 52.15 (g) (3) (iii)).
