Dear Mr. Derouen,

This letter serves as Fleming-Mason Energy Cooperative's official notice of its intent to file a general rate application based on a historical test year. In this application, Fleming-Mason Energy will not be seeking an increase in the revenue requirements for the cooperative as a whole for any individual rate class. The purpose of this application is strictly for rate design purposes and for the addition of some new optional rates.

If you have any questions, please contact me at your convenience.

Sincerely,

A handwritten signature in black ink that reads "Chris Perry".
