TAYLOR COUNTY RECC  
P O BOX 100  
CAMPBELLSVILLE KY 42719

RESPONSE TO PSC ORDER IN CASE NO 2012-00428

ITEM 6

Taylor County RECC is fully deployed with its AMR system. All office/field processes related to metering are based on the framework that is inherent to functionality of the AMR system. Any opt-out would require purchase of additional meters and would cause office/field processes to be changed as these locations would have to be dealt with outside of our established day-to-day processes. To fully utilize capabilities of an AMR system, full deployment is obviously desired.

ITEM 12

Data is viewed daily noting meters which failed to communicate to the AMR system. Lack of communication can/could be related to a meter specific issue or could be related to an issue on the customer side. Additionally, there are reports that can be viewed that detail usage outside a particular plus/minus tolerance. Large variances outside these tolerances can be indicative of issues at the location.
