**Date:** Monday, January 13, 2014 2:44:21 PM

---

Mr. Jones:

One additional issue has arisen in the course of PSC Staff's review of Hyden-Leslie Water District's application.

In the application, the water district states that the cost of the proposed project, including various fees and contingencies is \$3,825,000 (see Exhibit A of the Application). Funding sources include a proposed KRWFC loan of \$2,455,000 and appropriated funds of \$1,505,497. These funding sources total \$3,960,497. This produces a surplus of \$135,497. For what purpose will the additional funds be used? Will the loan amount be reduced? If not, explain why not.

Thank you for your attention to these questions and your patience in this matter.

**Date:** Monday, January 13, 2014 3:42:03 PM  
**Attachments:** [KRWFC Final 12.12.13.XLS](#)

---

Mr. Wuetcher,

The as-bid project cost is \$3,825,000. The coal severance grants amounted to \$1,505,497. The final KRWFC loan amount is \$2,435,000 (less than the preliminary figure of \$2,455,000 due to receiving a more favorable interest rate on the KRWFC Bonds). The loan proceeds are broken down as outlined in the final spreadsheet attached hereto. As you can see, the net amount to be received by the District for construction purposes is \$2,320,000 (the shortfall amount listed in Exhibit "A" of the Application). The remainder of the loan proceeds are used for capitalized interest, costs of issuance and underwriter's discount.

Please let me know if you need more information.

## ENCLOSURE 4

**From:** [Wuetcher, Jerry \(PSC\)](#)  
**To:** [W. Randall Jones Esq.](#)  
**Subject:** Case No. 2013-00388: Hyden-Leslie Water District  
**Date:** Tuesday, January 14, 2014 4:18:15 AM  
**Importance:** High

---

Mr. Jones:

Some additional questions have arisen in the above-referenced proceeding.

First, in the application and in your message of 1/13/2014, reference is made to coal severance grants of \$1,505,497. In HB 608 (2008 Ky. Acts Ch. 191), the General Assembly appropriated \$2,000,000 to Hyden-Leslie WD for the proposed project. (In HB 608, three projects are specifically mentioned: WX21131007, WX21131008, and WX2113111. These projects are listed in Exhibit A to the Application.) Explain why only \$1,505,497 is available for use on the proposed project. If a portion of the appropriated funds has already been used, please advise as to how Hyden-Leslie WD used these funds.

Second, based upon the present number of applicants for service, the proposed project will provide water service to 210 customers at an average cost per customer of \$18,214 (\$3,825,000/210 customers). Based upon the WD's expectations of 300 customers by completion of the project, the average cost per customer is \$12,750. To the extent that the WD has any knowledge, how does this level of expenditure compare with other projects that the WD has constructed or with other water utilities within the area development district in which the WD is located?

Third, the WD's Application does not explain why the proposed extension of water service is necessary other than to indicate that the area is not currently served by a water supplier. In the Drinking Water Project Profiles for Projects WX21131007, WX21131008, and WX2113111, the WD indicated that the existing water supply to persons in the area to be served was failing or subject to contamination. Please indicate how the persons in the area to be served by the proposed project are obtaining water and what problems, in any, presently exist with that water source. Please provide either a copy or a reference to all studies or reports on the quality of that water source.

Your assistance in addressing these questions is greatly appreciated.

Sincerely,

Gerald E. Wuetcher

---

Jerry,

Please find attached the responses to the last questions that you asked Randy Jones .

Thanks,

Michael K. Maggard  
Sisler - Maggard Engineering

1. The funds were used for construction of Project Phase I which included a portion of – WX 21131007.
2. Usually the average cost per customer for the District is approximately \$10,000 per customer. As the District expands further and further away from the previous projects the cost of installation increases and the areas that contained the higher population densities have already been served. Therefore, these areas contain less population density and increased construction costs.
3. The proposed customers currently obtain their drinking water from wells, springs and hauling water. A portion of the existing wells are contaminated with ecoli, high sulphur and high iron contents.

## ENCLOSURE 6

**From:** [Wuetcher, Jerry \(PSC\)](#)  
**To:** [Covington, John \(KIA\)](#)  
**Subject:** Request For Assistance  
**Date:** Tuesday, January 14, 2014 4:33:13 AM

---

Mr. Covington:

The Public Service Commission is currently reviewing Hyden-Leslie County Water District's application for public convenience and necessity to construct certain water improvement projects. These projects are listed in the WRIS as Project Nos. WX21131007, WX21131008, and WX21131111. WRIS reports that the Kentucky General Assembly appropriated \$2.0 million for these projects. The specific language of HB 608 (2008 Ky. Acts ch. 191) also indicates a combined appropriation of \$2.0 million for these projects. The WD is reporting to the PSC that only \$1,505,497 is available to finance its proposed projects.

It is my understanding that the Kentucky Infrastructure Authority (KIA) administers these appropriations. Do KIA records indicate that the original appropriation has been reduced or directed to another project? If not, do KIA's records indicate whether any of the appropriated \$2.0 million already been spent by the WD? If some funds have been expended, what was the nature of the expenditure?

Any assistance that KIA could provide in addressing these questions would be greatly appreciated. If you or your staff requires additional information to answer this inquiry, please contact me. Again, any assistance would be especially appreciated.

Respectfully,

Hello Jerry.

This District started these various water projects back in 2004. They bid and construct these projects in various phases. From talking to the engineer, Sissler-Maggard, I do know they are in the process of bidding another phase. The engineer has not closed any grants out or provided the final design indicating exactly what has been constructed in the original profile narratives.

Under **WORK PERFORMED TODATE**, I have listed the projects and included a description of the work that was provided on the invoices. KIA has paid for this work.

I have listed the balance of funds for a total of \$195,604.07. I am not sure the reasoning for the

\$1,505,497 figure unless they have some coal severance funds that have not been certified to KIA from DLG or if they have other funds that DLG will be administering.

I have copied Amy Barnes, DLG, on the email and perhaps she can check and let you know of any pending projects she is administering that would be included in the \$1,505,497 figure.

**WORK PERFORMED TODATE:**

**WX21131007: awarded - \$2,628,890 – balance \$0**

Waterline extension on SR 209

Waterline extension on Bob's Fork, Sizerock and Hell for Certain

Water tank work

Scada programming changes

**WX21121008: awarded - \$500,000 – balance \$95,604.07**

Phase II - Waterline extension in the North-Central section of the county including the Grassy area

**WX21131111: awarded \$850,000 – balance \$100,000**

Phase II – Waterline extension

**Cc:** Covington, John (KIA)  
**Subject:** RE: Request For Assistance

Hello everyone:

Unfortunately, I am not showing any coal severance line-items in HB 265 for water projects in Leslie County so there is nothing yet to be certified to DLG so I can't add to the \$1.5 million figure.

Debby, there was that old HB 267 project that expired on June 30, 2007 - 21131008 HYDEN-LESLIE WATER DISTRICT GRASSY WATER LINE EXTENSIONS - \$600,000. As you will recall, we returned these funds to the Leslie County single county account because the MOA had expired and the authorization for this project lapsed.

Let me know if anyone has any additional questions.

Amy

WX21131111	97C-2008	Leslie County Fiscal Court - Waterline - McKintosh	Leslie	Leslie County Fiscal Court	\$100,000.00	\$100,000.00	608-2008	N

Hello Jerry.

This District started these various water projects back in 2004. They bid and construct these projects in various phases. From talking to the engineer, Sissler-Maggard, I do know they are in the process of bidding another phase. The engineer has not closed any grants out or provided the final design indicating exactly what has been constructed in the original profile narratives.

Under **WORK PERFORMED TODATE**, I have listed the projects and included a description of the work that was provided on the invoices. KIA has paid for this work.

I have listed the balance of funds for a total of \$195,604.07. I am not sure the reasoning for the \$1,505,497 figure unless they have some coal severance funds that have not been certified to KIA from DLG or if they have other funds that DLG will be administering.

I have copied Amy Barnes, DLG, on the email and perhaps she can check and let you know of any pending projects she is administering that would be included in the \$1,505,497 figure.

**WORK PERFORMED TODATE:**

**WX21131007: awarded - \$2,628,890 – balance \$0**

Waterline extension on SR 209  
Waterline extension on Bob's Fork, Sizerock and Hell for Certain  
Water tank work  
Scada programming changes

**WX21121008: awarded - \$500,000 – balance \$95,604.07**

Phase II - Waterline extension in the North-Central section of the county including the Grassy area

**WX21131111: awarded \$850,000 – balance \$100,000**

Phase II – Waterline extension  
SR 209  
Spur Water Booster Station

**Subject:** Request For Assistance

Mr. Covington:

The Public Service Commission is currently reviewing Hyden-Leslie County Water District's application for public convenience and necessity to construct certain water improvement projects. These projects are listed in the WRIS as Project Nos. WX21131007, WX21131008, and WX21131111. WRIS reports that the Kentucky General Assembly appropriated \$2.0 million for these projects. The specific language of HB 608 (2008 Ky. Acts ch. 191) also indicates a combined appropriation of \$2.0 million for these projects. The WD is reporting to the PSC that only \$1,505,497 is available to finance its proposed projects.

It is my understanding that the Kentucky Infrastructure Authority (KIA) administers these appropriations. Do KIA records indicate that the original appropriation has been reduced or directed to another project? If not, do KIA's records indicate whether any of the appropriated \$2.0 already been spent by the WD? If some funds have been expended, what was the nature of the expenditure?

Any assistance that KIA could provide in addressing these questions would be greatly appreciated. If you or your staff requires additional information to answer this inquiry, please contact me. Again, any assistance would be especially appreciated.

Respectfully,

Gerald E. Wuetcher

**Date:** Wednesday, January 15, 2014 12:31:58 PM

---

Mr. Jones:

In the course of reviewing the proposed project in the above-referenced case, Commission Staff contacted the Kentucky Infrastructure Authority to confirm the availability of \$1,505,497 in appropriated funds for the proposed project. KIA officials advised me this morning that these funds are not available for WRIS Projects No. WX21131007, No. WX21131008, and No. WX21131111. They report that Hyden-Leslie County Water District has a balance of funds of only \$195,604.

Please advise the Commission in writing as to the source of \$1,505,497 in funds to which the Application refers and which account for approximately 40 percent of the project's funding. If possible, please reconcile the discrepancy between the Application's statements and KIA's statement to Commission Staff.
