Name: Robert E. Doiron

Case: "Seabee" ^{RATE} Case # 2013-00199
Smelter Case # 2013-00413

COMMENTS: The proposed rate increase, combined with the increase for the Hameville smelter, will result in an increase of 43% for a residential customer. These increases are going to put this customer into a major bind. I am barely making it from month to month. I see nothing in the future that will enable me to stay on my place thru the end of my life. My 1.5% increase in Soc. Sec. is being eaten up by Big Rivers and it's 3 owning Coops.

Instead of allowing Century Aluminum to purchase on the open market, it would have been better for us poor folks, if you required Big Rivers to lower their rates, to keep Century as a customer.

Are Big Rivers + their the owners (3 Coops) going to reduce the salaries of their employees, especially the management by an equal 43% rate? What's going to happen to the property, school, library tax collected when a large number of people have to lose their homes to foreclosures?
