COMMISSION STAFF'S THIRD REQUEST FOR INFORMATION
TO KENTUCKY POWER COMPANY

Kentucky Power Company ("Kentucky Power"), pursuant to 807 KAR 5:001, is to file with the Commission the original and eight copies of the following information, with a copy to all parties of record. The information requested herein is due no later than April 11, 2014. Responses to requests for information shall be appropriately bound, tabbed and indexed. Each response shall include the name of the witness responsible for responding to the questions related to the information provided.

Each response shall be answered under oath or, for representatives of a public or private corporation or a partnership or association or a governmental agency, be accompanied by a signed certification of the preparer or person supervising the preparation of the response on behalf of the entity that the response is true and accurate to the best of that person's knowledge, information, and belief formed after a reasonable inquiry.

Kentucky Power shall make timely amendment to any prior response if it obtains information which indicates that the response was incorrect when made or, though

correct when made, is now incorrect in any material respect. For any request to which Kentucky Power fails or refuses to furnish all or part of the requested information, it shall provide a written explanation of the specific grounds for its failure to completely and precisely respond.

Careful attention should be given to copied material to ensure that it is legible. When the requested information has been previously provided in this proceeding in the requested format, reference may be made to the specific location of that information in responding to this request.

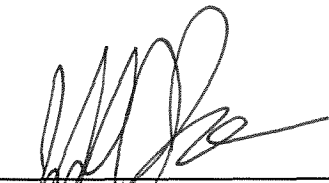

1. Refer to pages 2-3 of Alexander Desha and Sierra Club's Comments regarding Kentucky Power Company's DSM Application, which states:

Energy efficiency is the best resource option from a cost, risk and environmental perspective. Two recent studies show the tremendous value that energy efficiency resources provide. A 2014 study from the Lawrence Berkeley National Laboratory, associated with the U.S. Department of Energy, found that the national levelized cost of energy savings for electric utilities administering efficiency programs is just 2.1 cents per kilowatt-hour (kWh) (based on 2009-2011 data). Similarly, a 2014 report by the American Council for an Energy-Efficiency Economy (ACEEE) found that electric energy efficiency programs have an average cost of 2.8 cents per kWh (based on 2009-2012 data).

a. Provide Kentucky Power's average cost of energy savings for the three-year period 2009-2011.

b. Provide Kentucky Power's annual cost of energy savings for 2012 and 2013.

c. Provide, by year, Kentucky Power's projected cost of energy savings from 2014-2018.
