PARTIES OF RECORD

Re: Case No. 2014-00267

Attached is a copy of a memorandum which is being filed in the record of the above-referenced case. If you have any comments you would like to make regarding the contents of the memorandum, please do so within five days of receipt of this letter. If you have any questions, please contact John Park, Staff Attorney, at (502) 782-2589.

Sincerely,

A handwritten signature in blue ink that reads "Talina Mathews".

Talina Mathews
Executive Director

INTRA-AGENCY MEMORANDUM
KENTUCKY PUBLIC SERVICE COMMISSION

TO: Case File No. 2014-00267

FROM: John B. Park, Staff Attorney 

DATE: April 25, 2017

RE: Informal Conference of April 17, 2017

Pursuant to Commission Staff's Notice of Informal Conference issued on March 21, 2017, an informal conference was held in this matter on April 17, 2017. A representative of Cannonsburg Water District ("Cannonsburg") and State Representative Kevin Sinnette, counsel for Cannonsburg, participated in the conference with Commission Staff. A copy of the attendance roster is attached.

Commission Staff Attorney John Park began the meeting by advising representatives of Cannonsburg Water District ("CWD") that notes would be taken during the conference and that Commission Staff ("Staff") would prepare and enter into the record a memorandum regarding the conference. Mr. Park further advised that the parties would have five days after the memorandum is entered into the record to file comments on the memorandum.

Cannonsburg brought a revised coverage map of its water system, and identified for Staff where it would like to install additional meters as part of a revised water loss detection plan. Cannonsburg stated the goal would be to get 80% of system flow covered by meters and monitored, and that currently only 21% of the system flow is covered. Cannonsburg estimates that it needs to install around 30 new meters to get this coverage, and has asked C.I. Thornburg for a recommendation on meter manufacturers. Cannonsburg stated that it is still waiting on replacements for the two defective master meters.

Cannonsburg stated that since the last informal conference, it had identified and repaired line leaks, and that it hopes the April report will show a decrease in water loss from approximately 50% to 30%. Cannonsburg stated that what it had thought was a 30,000 gallon per day line loss in the Big Run area was not in fact an actual loss but instead was due to a line segment not being in the tap count.

Cannonsburg stated that it has started to develop a capital plan that would involve the replacement of some lines and pump station rehab.

Cannonsburg requested that Staff schedule another informal conference to help the district develop a plan to refine its water loss detection plan. Staff stated it would schedule another informal conference in four weeks.

There being no further business, the informal conference adjourned.
