Response to PSC Information Request
Case No. 2014-00392

2013 and 2014 Flushing Records

Parksville (PWD) has enclosed the flushing records for 2013 and 2014. We have also provided the tank overflow records for the 2013 and 2014 years. The total tank overflow is included in the flushing amount listed on line 18 of the PSC report.

The over flows were caused due to a dilapidated telemetry system that was ruined during the ice storm a few years ago. PWD has struggled to get the funds necessary to install a SCADA and this was finally completed in October 2014.

Other Water Statistics

Other Water on line 20 of the PSC Report consists of water in storage, office use, and water used for meter testing. Tank levels are reported when meter reading begins to determine how many gallons are stored. Office use is metered and the meter testing gallons are determined by the number of meters tested.

A chart for the years 2010 through 2014 is provided below.

	2010	2011	2012	2013	2014
Storage	3,157,000	3,135,000	3,144,000	3,231,000	3,075,000

Schedule of Non-Revenue Water

A Schedule of Non-Revenue Water is enclosed.

Differences in the total non-revenue water can be affected by the weather and by increased leakage due to broken lines.
