RE: Application of Tower Access Group, LLC, for Issuance of a Certificate of Public Convenience and Necessity to Construct RECEIVED Wireless Communications Facility On The Campus off Eastern Kentucky University at 320 Madison Avenue, Richmond,

Madison County, Kentucky ("Application") PSC Case No. 2015-00145 (Brockton Facility)

Dear Mr. Derouen:

Please be advised that the undersigned represents Tower Access Group, LLC ("TAG") in regard to the above-referenced Application which has been previously filed with the Commission.

Enclosed please find an original and 11 copies of TAG's Response to the Commission Staff's First Request for Information. Please return one filed-stamped copy to the me in the enclosed self-addressed stamped envelope. Should you require any additional information please do not hesitate to contact the undersigned. Thank you for your assistance in this matter.

Sincerely,

W. Brent Rice

Andrew H. Trimble

COMMONWEALTH OF KENTUCKY BEFORE THE PUBLIC SERVICE COMMISSION CASE NO. 2015-00145

RECEIVED

IN RE:

APPLICATION OF TOWER ACCESS GROUP, LLC, FOR ISSUANCE AZ 2015
OF A CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY OF SERVICE
TO CONSTRUCT AND OPERATE AN ADDITIONAL WIRELESS
COMMUNICATIONS FACILITY ON THE CAMPUS OF EASTERN
KENTUCKY UNIVERSITY AT 320 MADISON AVENUE, RICHMOND,
MADISON COUNTY, KENTUCKY

TOWER ACCESS GROUP LLC'S RESPONSE TO COMMISSION STAFF'S FIRST REQUEST FOR INFORMATION

Comes Applicant, Tower Access Group, LLC ("TAG"), by and through counsel, and pursuant to 807 KAR 5:001 §12(d), hereby tenders its Response to the Kentucky Public Service Commission's ("the Commission") First Request for Information. The Witness responsible for responding to the Commission's Request is Mr. David L. Ginter, President and CEO of TAG.

- On May 8, 2015, TAG filed an Application with the Commission for a Certificate of Public Convenience and Necessity to construct and operate a wireless communications facility on the campus of Eastern Kentucky University.
- 2. The Application correctly states that the Cell Facility's coordinates are Latitude 37° 44' 29"; Longitude: 84° 17' 41". However, in Exhibit F to the Application, TAG inadvertently included a Federal Aviation Administration ("FAA") Determination of No Hazard to Air Navigation and Federal Communications Commission ("FCC") Antenna Structure Registration for a separate site also located on the EKU campus with coordinates of 37° 43' 52.06"; Longitude: 84° 17' 52.57".

- 3. The Commission's Request for Information states that "if the correct coordinates for the proposed construction site are other than those listed in the FAA Determination of No Hazard to Air Navigation and a revised FAA determination is required, provide a revised FAA Determination containing the correct coordinates." Therefore, attached hereto as **Exhibit A** is the correct FAA Determination of No Hazard to Air Navigation for the site at coordinates Latitude 37° 44′ 29"; Longitude: 84° 17′ 41", which is the subject of this Application. TAG respectfully requests that the Commission accept **Exhibit A** to this Response in place of Exhibit F of the previously submitted Application.
- 4. Additionally, the Commission states that, "If the correct coordinates for the proposed construction site are other than those listed in the FCC Antenna Structure Registration and a revised FCC registration is required, provide the FCC Antenna Structure Registration containing the correct coordinates." Therefore, attached hereto as **Exhibit B** is the correct FCC Antenna Structure Registration for the site at coordinates Latitude 37° 44' 29"; Longitude: 84° 17' 41", which is the subject of this Application. TAG respectfully requests that the Commission accept **Exhibit B** to this Response in place of Exhibit F of the previously submitted Application.

Respectfully submitted,

McBRAYER, McGINNIS, LESLIE & KIRKLAND, PLLC 201 East Main Street, Suite 900 Lexington, Kentucky 40507 859-231-8780

Aeronautical Study No. 2014-ASO-9084-OE

** DETERMINATION OF NO HAZARD TO AIR NAVIGATION **

The Federal Aviation Administration has conducted an aeronautical study under the provisions of 49 U.S.C., Section 44718 and if applicable Title 14 of the Code of Federal Regulations, part 77, concerning:

Structure:

Monopole Brockton

Location:

Richmond, KY

Latitude:

37-44-29.57N NAD 83

Longitude:

84-17-41.84W

Heights:

966 feet site elevation (SE)

199 feet above ground level (AGL)

1165 feet above mean sea level (AMSL)

This aeronautical study revealed that the structure does not exceed obstruction standards and would not be a hazard to air navigation provided the following condition(s), if any, is(are) met:

It is required that FAA Form 7460-2, Notice of Actual Construction or Alteration, be e-filed any time the project is abandoned or:

	At least 10 days prior to start of construction (7460-2, Part 1)
X	Within 5 days after the construction reaches its greatest height (7460-2, Part 2)

Based on this evaluation, marking and lighting are not necessary for aviation safety. However, if marking/lighting are accomplished on a voluntary basis, we recommend it be installed and maintained in accordance with FAA Advisory circular 70/7460-1 K Change 2.

This determination expires on 04/28/2016 unless:

- (a) the construction is started (not necessarily completed) and FAA Form 7460-2, Notice of Actual Construction or Alteration, is received by this office.
- (b) extended, revised, or terminated by the issuing office.
- the construction is subject to the licensing authority of the Federal Communications Commission (FCC) and an application for a construction permit has been filed, as required by the FCC, within 6 months of the date of this determination. In such case, the determination expires on the date prescribed by the FCC for completion of construction, or the date the FCC denies the application.

NOTE: REQUEST FOR EXTENSION OF THE EFFECTIVE PERIOD OF THIS DETERMINATION MUST BE E-FILED AT LEAST 15 DAYS PRIOR TO THE EXPIRATION DATE. AFTER RE-EVALUATION OF CURRENT OPERATIONS IN THE AREA OF THE STRUCTURE TO DETERMINE THAT NO SIGNIFICANT AERONAUTICAL CHANGES HAVE OCCURRED, YOUR DETERMINATION MAY BE ELIGIBLE FOR ONE EXTENSION OF THE EFFECTIVE PERIOD.

This determination is based, in part, on the foregoing description which includes specific coordinates, heights, frequency(ies) and power. Any changes in coordinates, heights, and frequencies or use of greater power will void this determination. Any future construction or alteration, including increase to heights, power, or the addition of other transmitters, requires separate notice to the FAA.

This determination does include temporary construction equipment such as cranes, derricks, etc., which may be used during actual construction of the structure. However, this equipment shall not exceed the overall heights as indicated above. Equipment which has a height greater than the studied structure requires separate notice to the FAA.

This determination concerns the effect of this structure on the safe and efficient use of navigable airspace by aircraft and does not relieve the sponsor of compliance responsibilities relating to any law, ordinance, or regulation of any Federal, State, or local government body.

Any failure or malfunction that lasts more than thirty (30) minutes and affects a top light or flashing obstruction light, regardless of its position, should be reported immediately to (877) 487-6867 so a Notice to Airmen (NOTAM) can be issued. As soon as the normal operation is restored, notify the same number.

A copy of this determination will be forwarded to the Federal Communications Commission (FCC) because the structure is subject to their licensing authority.

If we can be of further assistance, please contact our office at (816) 329-2523. On any future correspondence concerning this matter, please refer to Aeronautical Study Number 2014-ASO-9084-OE.

This registration is effective upon completion of the described antenna structure and notification to the Commission. YOU MUST, NOTIFY THE COMMISSION WITHIN 24 HOURS OF COMPLETION OF CONSTRUCTION OR CANCELLATION OF YOUR PROJECT, please file FCC Form 854. To file electronically, connect to the antenna structure registration system by pointing your web browser to http://wireless.fcc.gov/antenna. Electronic filing is recommended: You may also file manually by submitting a paper copy of FCC Form 854. Use purpose code "NT" for notification of completion of construction, use purpose code "CA" to cancel your registration.

The Antenna Structure Registration is not an authorization to construct radio facilities or transmit radio signals. It is necessary that all radio equipment on this structure be covered by a valid FCC license or construction permit.

You must immediately provide a copy of this Registration to all tenant licensees and permittees sited on the structure described on this Registration (although not required, you may want to use Certified Mail to obtain proof of receipt), and display your Registration Number at the site. See reverse for important information about the Commission's Antenna Structure Registration rules.
