Cumberland Valley Electric  
PSC Case No. 2015-00281  
Response to Commission Staff's  
Second Request for Information

Request No. 3

This question is addressed to Cumberland Valley. Refer to the response to Staff's First Request, Item 8. The response indicates the billing period of May 2015 was used for calculating the residential bill impact. The supporting schedules indicate that the billing factors used in the residential bill impact calculation were for March 2015. Explain this discrepancy. Provide a revised residential bill impact calculation if required.

Response:

May 2015 was the billing period used for calculation. There is a two month lag between the time the environmental surcharge percentage is calculated and when it is applied to the billing. The March 2015 Pass Through Mechanism Factor would be the correct percentage applied to the May 2015 billing.

Witness: Robert Tolliver
