

For Commissioners Seat on Adair County WATER Board.

To Whom it may concern:

I LARRY R. BRYANT WAS ASKED by former Adair Co Judge Exec ANN Melton Along with the blessings of new Judge Exec. Mike Stevens to serve as commissioner. Their concern mainly was to move the black cloud that was hanging over the water district.

I feel I am highly qualified for this position, I worked out of the Judge Execs. office as Judge Pro-Tem under Joe England for 2 yrs and James Brock for 4 yrs. During this time I represented Adair Co on the Lake Cumberland Area Development District Board.

During this time I applied for numerous grants, receiving HUD funding to start and to build the initial parts of the Adair Co WATER District. Since then I have been self employed starting several new businesses. Putting my money where my mouth is, I've always been pro-Adair Co, and concerned about the future of its citizens.

Unfortunately, lately Frankfort politics and the ones who enter to their agendas have threatened our top officials to get their game together at the WATER District, This makes it hard to do the right things.

① I am a conservative

② I have the back-bone to stand for what's right

③ I have been in the Road-Boring Business 17 yrs

④ I have never done a bit Job for ACWD.

⑤ Code of Ethics & KRS may not apply in this situation. ACWD

⑥ Board Member AND Family Business received 4 million plus in last four years.

⑦ Why would manager tell me the first month I was on Board, this District has been raped financially, the last few years?

⑧ BANK tells me the ACWD LOAN ratio doesn't look good

⑨ An Audit would be in order for this District

⑩ Employees are unware and disgruntled (NOT GOOD)

I appreciate your time & concerns, this situation was brought to the forefront about not meeting a deadline. They (the politically connected) don't like the fact that I along with 2 other board members was gonna try to stop the leaking of funds through change orders and alternate projects by giving full authority to engineers and the management.

Our hospital has recently been going through Bankruptcy. It's been gossiped that our water district could be next.

Poor management, high salaries, greed, jealousy are all common factors that usually causes a fall. This situation will certainly be a challenge to whoever serves, my ONLY goal is to make it as good and feasible as possible for now and our future generations.

I would appreciate your consideration

Sincerely,

RECEIVED
