This letter is in regards to Case No. 2015-00377 for a proposed 300 –foot self supporting tower to provide cellar communications in Breathitt County, Kentucky. My wife and I, as adjacent property owners of the proposed site, have unanswered concerns about the placement of the tower. We also have concerns about the adverse environmental effects this tower and structure may have on the environment, the community and our adjoining property.

We would like to meet on site with person or persons who could give us some information and data on the effects of the microwaves emitted from this tower and structure installation. Also we have concerns about the location of tower and guide wires as to property line locations.

We have additional concerns about the 300 foot self supporting tower falling in some future event. If this should happen, would it be confined within the agreed leased boundaries? Also will there be a vehicle access road to the tower for maintaining the structure? If so this may be a good place for us to meet to have our concerns addressed.

Sincerely,

A handwritten signature in black ink, appearing to read "Lynn Haney", written in a cursive style.

C: Lynn Haney
