

March 2, RECEIVED

To Public Service Commission

MAR 03 2016

CASE NO. 2015-00404

PUBLIC SERVICE COMMISSION

IN Response to your letter dated Feb. 25, 2016, I still Oppose the Construction of the Cell Phone Tower At 395 Miller Ridge Road. I AGAIN ASK For INTERVENTION STATUS.

I don't believe ANY person At the Public Service Commission would WANT to Gamble with their Family's HEALTH AND Safety by living NEAR A Cell Phone Tower. ENCLOSED is AN Article written About The dangers of living NEAR A Cell Phone Tower

The Mayor of Campton AND the Magistrate IN this district ALSO Agree with me AS they Both Oppose the Tower AND have ASK For

INTERVENTION STATUS, CONCERNING this Tower. If you LOOK At The Petition I sent to you It Shows that SEVERAL Other LAND Owners

Living Near the proposed Tower Site do NOT WANT it built At that location. The proposed Tower site would be Approx 350 ft. From our property line. And we feel that we would be forced to Abandon our property because of Health and Safety Concerns. I Urge the Public Safety Commission To Not Approve this Application to Construct A Cell Phone Tower At this Site.

As the Picture I sent to you shows there Are Mobile Homes And Small Childred living Near the Site

If New Cingular Wireless And American Tower Want And Need to build A Tower there. Are Other Locations Near by that Could be used without Gambling with the Health And Safety of the people IN this Community.

There Are Already Two Cell phone Towers IN this location Now. THANK YOU

DAVID R. Graham

If you live within a quarter mile of a cell phone antenna or tower, you may be at risk of serious harm to your health, according to a German study cited at www.EMF-Health.com, a site devoted to exposing hazards associated with electromagnetic frequencies from cell phone towers and other sources.

Cancer rates more than tripled among people living within 400 meters of cell phone towers or antennas, a German study found. Those within 100 meters were exposed to radiation at 100 times normal levels. An Israeli study found risk of cancer quadrupled among people living within 350 meters (1,148 feet) of a cell phone transmitter—and seven out of eight cancer victims were women. Both studies focused only on people who had lived at the same address for many years.

Other studies have found that levels of radiation emitted from cell phone towers can damage cell tissues and DNA, causing miscarriage, suppressing immune function, and causing other health problems.

March 2, 2016

CASE NO. 2015-0044

To Public Service Commissioner

I oppose the Cell Phone Tower

At 395 Miller Ridge, Campton, Waite

County Ky, 41301

Due to Safety, Health and

Environmental Reasons. A Cell Phone

Tower could be built at another

location if one is needed,

I also want to request

INTERVENTION STATUS CONCERNING

THIS CELL PHONE TOWER

CASE NO. 2015-0044

THANK YOU
