Dear Ms. Matthews:

RE: Case #2016-00142

The water we are forced to use in Martin County is unfit to drink or cook with. Breaks in the lines cause long periods of no water. This is very hard on people of my age, eighty-eight, not only physical but financial. It is almost impossible to get a call thru to the water company to air complaints or get information.

This problem here in Martin County has gone on far too long and a permanent solution put in place. We will appreciate any help given to solve our water problem. A complete change is my suggestion. Thank you.

Sincerely,

Lois L. Horne
