1 **REQUEST NO. 1:** Please refer to Mr. Quick's testimony, page 7, beginning at line 18,  
2 where Mr. Quick states that "Big Rivers is required to generate only that energy which  
3 Henderson schedules or takes, up to Henderson's reserved capacity."

4 a. Is Big Rivers required by the Station Two Contracts or otherwise to generate  
5 any energy from Station Two above the energy which Henderson schedules or takes, up to  
6 Henderson's reserved capacity?

7 b. If the answer to subpart a of this information request is "yes," please explain  
8 in detail the amount of energy Henderson contends Big Rivers is required to generate from  
9 Station Two and the source of that requirement in the Station Two Contracts or elsewhere.

10 c. Does Henderson contend that Big Rivers is required to generate any energy  
11 associated with the capacity from Station Two that is allotted to Big Rivers after  
12 Henderson's annual capacity reservation?

13 d. If the answer to subpart c of this information request is "yes," please explain  
14 in detail the amount of energy Henderson contends Big Rivers is required to generate from  
15 Station Two and the source of that requirement in the Station Two Contracts or elsewhere.

16 e. Is it Henderson's position that Big Rivers' physical control over Station Two  
17 generating facilities gives Big Rivers the unilateral right to decide when to generate or not  
18 generate energy from those facilities? Please explain in detail the reasons for your response.

19 **RESPONSE:**

20 a. Section 13.2 of the Power Plant Construction & Operation Agreement requires  
21 Big Rivers to maintain continuous operation of the Station Two Units. Section 13.4 of the Power  
22 Plant Construction & Operation Agreement requires Big Rivers to operate the units on a best  
23 efforts basis, in an efficient and economical manner. If the testimony of Robert W. Berry is

1 correct (see page 4 of Mr. Berry's direct testimony, attached as Exhibit 10 to Big Rivers'  
2 Application for a Declaratory Order), and the efficient and economical operation of the units  
3 requires the generation of a minimum 115 MW for Unit One, and 120 MW for Unit Two, then  
4 the answer to this question is yes.

5 b. Each year, Henderson provides to Big Rivers a five-year forecast of Henderson's  
6 reserved capacity needs at Station Two, and allocates the remaining capacity to Big Rivers for  
7 the same five-year period. Henderson reserves capacity from Station Two as a whole, and not  
8 from either unit individually. Big Rivers is contractually obligated to maintain Station Two in  
9 continuous operation. Therefore, Big Rivers does not have the right to decide to operate only one  
10 of the units. As stated previously, the Power Plant Construction & Operation Agreement requires  
11 Big Rivers to maintain both units in continuous operation, and to operate them in an efficient and  
12 economical manner. None of the Station Two Contracts provide Big Rivers the unilateral right to  
13 idle one or both units in response to market conditions.

14 c. See Responses to Request Nos. 1(a) and 1(b).

15 d. See Responses to Request Nos. 1(a) and 1(b).

16 e. See Responses to Request Nos. 1(a) and 1(b).

17 **WITNESS: Gary Quick**

1 **REQUEST NO. 2:** Mr. Quick testified that Henderson's capacity reservation from  
2 Station Two for the current contract year is 115 MW. Mr. Berry states on page 10 of his  
3 testimony, beginning at line 20, that to maintain a minimum operating temperature for safe  
4 and continuous operation of Station Two in compliance with environmental regulations,  
5 Unit 1 of Station Two must generate a minimum of 115 MW of energy.

6 a. Does Henderson agree with that statement from Mr. Berry's testimony? If  
7 your answer is "no," please explain in detail the reasons for your answer.

8 b. Would Henderson agree that, during the current Station Two contract year,  
9 Big Rivers is authorized by the Station Two Contracts to reduce the generation from Unit 1  
10 of Station Two to 115 MW and temporarily idle Unit 2 of Station Two if, for any reason,  
11 Big Rivers does not want the energy associated with the remaining generation capacity of  
12 Station Two?

13 c. If the answer to subpart b of this information request is "no," please explain  
14 in detail Henderson's position about the extent of Big Rivers' authority to reduce  
15 generation from Station Two under those circumstances, and identify with specificity all  
16 authority for that position in the Station Two Contracts or elsewhere.

17 d. Assuming hypothetically that Henderson requires the energy associated with  
18 90 MW to meet the requirements that Henderson schedules and takes, would Henderson  
19 agree that Big Rivers is authorized by the Station Two Contracts to reduce the generation  
20 from Unit 1 of Station Two to 90 MW and temporarily idle Unit 2 of Station Two if, for any  
21 reason, Big Rivers does not want to purchase the energy associated with the remaining  
22 generation capacity of Station Two?

1 e. If the answer to subpart d of this information request is “no,” please explain  
2 in detail Henderson’s position about the extent of Big Rivers’ authority to reduce  
3 generation from Station Two under those circumstances, and identify with specificity all  
4 authority for that position in the Station Two Contracts or elsewhere.

5 **RESPONSE:**

6 a. Henderson is unaware of any empirical data supporting Mr. Berry’s statement,  
7 and thus has insufficient knowledge to either agree or disagree with Mr. Berry’s statement.

8 b. See Responses to Request Nos. 1(a) and 1(b).

9 c. See Responses to Request Nos. 1(a) and 1(b).

10 d. See Responses to Request Nos. 1(a) and 1(b).

11 e. See Responses to Request Nos. 1(a) and 1(b).

12 **WITNESS: Gary Quick**

1 **REQUEST NO. 3:** Does Henderson contend that Big Rivers is required, by the Station  
2 **Two Contracts** or otherwise, to keep both units of Station Two in continuous operation at  
3 **generation levels that at least produce the minimum operating temperature for safe and**  
4 **continuous operation of the Station Two SCR system in compliance with applicable**  
5 **environmental laws and regulations? Please explain your response in detail, and identify**  
6 **with specificity all authority for that position in the Station Two Contracts or elsewhere.**

7 **RESPONSE:** Section 13.2 of the Power Plant Construction & Operation Agreement  
8 requires Big Rivers to provide, as an independent contractor, all operating personnel, materials,  
9 supplies and technical services for the continuous operation of Station Two so as to fulfill City's  
10 obligations (a) to provide the needs of City and its inhabitants as defined in the Power Sales  
11 Contract, (b) to Big Rivers as provided in the Power Sales Contract, (c) to the KII Pool members,  
12 as provided in the KII Pool Agreement, and (d) to others to whom City may, from time to time,  
13 become contractually obligated in connection with its Station Two. Section 13.4 of the Power  
14 Plant Construction & Operation Agreement obligates Big Rivers to operate Station Two on a  
15 best efforts basis in an efficient and economical manner.

16 **WITNESS: Gary Quick**

17

18

19

20

21

22

1 **REQUEST NO. 4:** Please refer to Mr. Quick's testimony regarding Exhibit A to the  
2 **Indemnification Agreement between Big Rivers and WKEC.**

3 a. Does Henderson contend that, for purposes of the Power Sales Contract, the  
4 amount of Excess Henderson Energy in an hour should be calculated as provided in that  
5 Exhibit A?

6 b. If the answer to subpart a of this information request is "no," please explain  
7 how Henderson contends that the amount of Excess Henderson Energy in an hour should  
8 be calculated for purposes of the Power Sales Contract.

9 c. If the answer to subpart a of this information request is "yes," do you  
10 contend that Big Rivers and Henderson have agreed, explicitly or implicitly, that for  
11 purposes of the Power Sales Contract, Excess Henderson Energy should be calculated as  
12 provided in that Exhibit A? If your answer is "yes," please identify and provide a copy of  
13 any documents or other authority on which you rely to support your conclusion, and  
14 identify any persons who participated in the negotiation of that agreement or have  
15 knowledge of that agreement.

16 d. Please identify any contractual or other authority that Henderson contends  
17 concerns, relates to or controls determination of the amount of Excess Henderson Energy  
18 in an hour for purposes of the Power Sales Contract.

19 **RESPONSE:**

20 a. No.

21 b. Henderson contends that "Excess Henderson Energy" should be calculated  
22 according to the following methodology: generated energy within Henderson's reserved capacity  
23 for Henderson's native load, followed by generated energy within Henderson's reserved capacity

1 scheduled or taken by Henderson, followed by energy associated with the Station Two capacity  
2 allocated to Big Rivers, followed by energy generated and taken by Big Rivers from  
3 Henderson's reserved capacity.

4 c. N/A

5 d. See the Power Sales Contract

20

21

22

23

1 **REQUEST NO. 5:** Please refer to pages 6 and 7 of Mr. Quick's testimony.

2 a. Please describe in detail the differences between "Excess Henderson Energy"  
3 and "mere 'excess' or 'surplus' energy" as defined by Mr. Quick.

4 b. Please describe Henderson's view of the significance for this proceeding of  
5 the differences between Mr. Quick's definitions of "Excess Henderson Energy" and "mere  
6 'excess' or 'surplus' energy."

7 **RESPONSE:**

8 a. Section 3.8(a) of the Power Sales Contract defines "Excess Henderson Energy" as  
9 that energy which is associated with Henderson's reserved capacity, but which is not scheduled  
10 or taken by City. Any energy which exceeds Henderson's native load in a given time period, and  
11 is within Henderson's reserved capacity for that time period, and which Henderson either  
12 schedules or takes, does not meet the contractual definition of "Excess Henderson Energy." This  
13 energy is more properly characterized as "excess" or "surplus" energy which simply exceeds  
14 Henderson's native load in a given time period, but lies within Henderson's reserved capacity for  
15 that time period, and must be generated in the event Henderson schedules or takes that energy.

16 b. Henderson's position is that "Excess Henderson Energy" as defined in Section  
17 3.8(a) of the Power Sales Contract need not be generated unless Big Rivers wishes to exercise its  
18 contractual right to purchase that energy at the price of \$1.50 per MWh. If Big Rivers is not  
19 required to generate "Excess Henderson Energy," then it is not required to sell "Excess  
20 Henderson Energy" into the unprofitable MISO market and attempt to pass the losses on to  
21 Henderson. Big Rivers also is not required in that event to bill Henderson for the variable costs  
22 of producing "Excess Henderson Energy."

1           Additionally, Section 6.7 of the Power Sales Contract, as amended, requires each party to  
2 replace, at its own cost, all fuel and reagents consumed for production of that party's Station  
3 Two energy. Nothing in Section 6.7 or elsewhere permits Big Rivers to take Henderson's supply  
4 of coal and lime inventories to generate energy and sell that energy to a third party without  
5 Henderson's approval.

23

1 **REQUEST NO. 6:** What does Henderson propose should be done with energy that must  
2 be generated as a result of minimum operating levels of the Station Two units, that  
3 Henderson does not schedule or take, and that Big Rivers does not want to generate or  
4 take?

5 a. Does Henderson agree that Big Rivers has the operating authority to  
6 determine unilaterally what to do with that energy? Please explain in detail the reasons for  
7 your response.

8 b. Please identify which party Henderson contends should be responsible for  
9 the variable costs of producing that energy, and explain in detail the reasons for your  
10 response.

11 c. Is it Henderson's position that Big Rivers is required by the Station Two  
12 Contracts or otherwise to pay for, and to be responsible for the variable costs of producing,  
13 energy associated with Henderson's capacity allocation generated from Station Two in any  
14 hour that Big Rivers neither wants to purchase nor wants to produce, that is in excess of  
15 the requirements of Henderson for itself and its native load customers, and that Henderson  
16 does not sell to a third party pursuant to a firm, bona fide offer? Please explain in detail the  
17 reasons for your response.

18 d. Please identify the contractual and other authority that Henderson contends  
19 supports its response to subparts b and c of this information request.

20 **RESPONSE:** Big Rivers frequently and for various reasons reduces the output of the  
21 Station Two Units to levels that are generally equal to or slightly above the amount of energy  
22 needed by Henderson to serve its native load. As recently as November 11-13, 2016, Big Rivers  
23 reduced the output of the Station Two Units to 79 MWh and 74 MWh per hour respectively for

1 the purpose of testing mercury emissions. This would suggest that it is possible to operate the  
2 units so as to generate little, if any, energy which exceeds Henderson's native load in a given  
3 time period. If the above-referenced figures, provided by Big Rivers, reflect the minimum  
4 operating levels of the Station Two Units, then it is unnecessary to determine what should be  
5 done with energy that Henderson does not schedule and does not take, and that Big Rivers does  
6 not want to generate or take.

7         Should it be determined that minimum operating levels are higher than those reported  
8 during these recent periods of reduced output, and that minimum operating levels require the  
9 generation of energy which exceeds Henderson's native load, plus energy scheduled or taken by  
10 Henderson, then Henderson contends that the excess is generated from the Station Two capacity  
11 allocated to Big Rivers (currently 197 MW). In the event that Big Rivers elects for whatever  
12 reason to generate "Excess Henderson Energy," i.e. energy which exceeds Henderson's native  
13 load, plus energy scheduled or taken by Henderson, and is within Henderson's reserved capacity,  
14 then Henderson contends that Big Rivers is responsible for the variable costs of producing any  
15 such energy. As the party responsible for the variable costs of producing the energy, Big Rivers  
16 would be entitled to dispose of the energy as it sees fit, and would be obligated to pay Henderson  
17 \$1.50 per MWh for that energy.

18         a.         In the event that Big Rivers generates energy which exceeds Henderson's native  
19 load in a given time period, plus energy scheduled or taken by Henderson for that time period,  
20 and is within Henderson's reserved capacity for that time period, then Big Rivers is responsible  
21 for the variable costs of producing that energy, and for determining unilaterally what to do with  
22 that energy.

23         b.         See responses to Request Nos. 6 and 6(a) above.

1 c. See responses to Request Nos. 6 and 6(a) above. Please note that the term  
2 "allocation" contained in this request is misused. Henderson reserves capacity from Station Two,  
3 and the remaining capacity is allocated to Big Rivers.

4 d. See responses to Request Nos. 6 and 6(a) above.

20

21

22

23

1 **REQUEST NO. 7:** Please refer to Mr. Quick’s testimony, page 6, line 22 through page 7,  
2 line 3.

3 a. Explain in detail the contractual basis of your claim that “[i]n the event that  
4 Henderson’s reserved capacity is used to generate energy above Henderson’s native load,  
5 the energy above native load does not become ‘Excess Henderson Energy’ until and unless  
6 Henderson elects to either not schedule or not take the energy for its own use, or offer the  
7 energy for sale to third parties.”

8 b. How and when does Henderson make an “election” “to either not schedule or  
9 not take the energy for its own use, or offer the energy for sale to third parties.”? Please  
10 explain in detail the reasons for your response.

11 c. How does Henderson inform Big Rivers of any such election, and when?

12 d. Please provide all documents that evidence, require, concern or relate to a  
13 written election by Henderson “to either not schedule or not take the energy for its own  
14 use, or offer the energy for sale to third parties” provided to Big Rivers since July 2009.

15 e. How and when does Henderson schedule energy, and how and when does  
16 Henderson inform Big Rivers that Henderson is scheduling energy? Please explain in detail  
17 the reasons for your response.

18 f. Please provide all documents that evidence, concern or relate to any schedule  
19 of energy Henderson has provided to big Rivers since July 2009.

20 **RESPONSE:**

21 a. See response to Request No. 5(a).

22 b. The amount of energy Henderson takes for its own use in a given time period is  
23 determined by its native load, i.e. the amount of energy needed to serve the needs of the City and

1 its inhabitants for that time period. As evidenced by the correspondence attached as **Exhibit 1** to  
2 Request No. 2 of the Commission Staff's First Request for Information, Henderson has  
3 approached Big Rivers on multiple occasions seeking approval of a protocol whereby Henderson  
4 could schedule its excess energy for sale to third parties when it would be profitable to do so. Big  
5 Rivers has repeatedly rejected Henderson's proposed protocol. As a result, Henderson has been  
6 denied the opportunity to make an election as to whether to schedule or not schedule its energy  
7 for sale to third parties.

8 c. See response to Request No. 7(b).

9 d. See correspondence attached as **Exhibit 1** to Request No. 2 of the Commission  
10 Staff's Request for Information.

11 e. See response to Request No. 7(b).

12 f. See response to Request No. 7(d).

14

15

16

17

18

19

20

21

22

23

1 **REQUEST NO. 8:** Under what circumstances, if any, does Henderson contend that Big  
2 Rivers has the contractual operating discretion to place one or both of the Station Two  
3 units in Economic Commitment status or to cycle or idle one of both of the Station Two  
4 units for economic reasons?

5 a. Does Henderson contend that any such decision by Big Rivers is subject to  
6 Henderson's prior review and approval?

7 b. Please explain the reasons for your response to each part of this information  
8 request.

9 **RESPONSE:** Henderson is unaware of any contractual provision that would permit Big  
10 Rivers to cycle or idle one or both units for economic reasons. The parties have agreed that  
11 Henderson is to provide standby capacity for its generating capacity reserved from Station Two  
12 in an amount equal to such reserved generating capacity. The standby capacity shall be provided  
13 out of the alternate generating unit of Station Two as provided in Section 5 of the parties' Power  
14 Sales Contract dated August 1, 1970. (see Section 2.2(b) of the System Reserves Agreement,  
15 attached hereto as **Exhibit 1**).

16 a. Yes.

17 b. As to the introductory portion of Request No. 8, Henderson states that there  
18 simply exists no provision in any of the Station Two Contracts to permit the activity Big Rivers  
19 describes. As to Subpart (a), Henderson states that Big Rivers operates and maintains Station  
20 Two subject to Henderson's ownership and control, and subject to the requirements set forth in  
21 the Station Two Contracts.

22

23 **WITNESS: Gary Quick**

1 **REQUEST NO. 9:** Please provide the amount of Excess Henderson Energy that  
2 Henderson contends was generated each month from June 2016 through September 2016,  
3 inclusive, provide all calculations, workpapers and supporting documents, and provide all  
4 spreadsheets in electronic format with all formulas intact. For purposes of your response,  
5 please identify and utilize the definition of Excess Henderson Energy and the method of  
6 calculating Excess Henderson Energy that Henderson believes are correct.

7 **RESPONSE:** See Exhibit 2. The term “Excess Henderson Energy” is defined in Section  
8 3.8 of the Power Sales Contract, as amended. The methodology for calculating “Excess  
9 Henderson Energy” is set forth in response to Request No. 4.

**WITNESS: Brad Bickett**

1 **REQUEST NO. 10:** Please refer to the discussion of Excess Henderson Energy on pages 6  
2 and 7 of Mr. Quick's testimony, and identify and utilize the definition of Excess Henderson  
3 Energy and the method of calculating Excess Henderson Energy that Henderson believes  
4 are correct in responding to the following questions. For purposes of answering these  
5 questions, please assume that Henderson's annual capacity reservation from Station Two is  
6 115 MW.

7 a. How much Excess Henderson Energy would there be in an hour in which  
8 Henderson utilizes 90 MWh for itself and its native load customers, Henderson makes no  
9 sales to third parties, both Station Two units are operating, and the Station Two units  
10 generate 312 MWh.

11 i. Please explain in detail how you arrived at your answer, provide all  
12 calculations, workpapers and supporting documents, and provide all spreadsheets in  
13 electronic format with all formulas intact.

14 ii. How much of the 312 MWh that are generated are attributable to Big  
15 Rivers' capacity allocation?

16 iii. If Big Rivers does not exercise its option to take any of the Excess  
17 Henderson Energy, but instead delivers all of the Excess Henderson Energy into MISO and  
18 allocates to Henderson the net revenues from the sale of that energy, who does Henderson  
19 contend is responsible for the variable costs of producing that energy, and does Big Rivers  
20 have any obligation to pay Henderson for that energy? Explain your answers in detail and  
21 provide the contractual basis supporting your answers.

22 b. How much Excess Henderson Energy would there be in an hour in which  
23 Henderson utilizes 90 MWh for itself and its native load customers, Henderson makes no

1 sales to third parties, only one of the Station Two units is operating, and the Station Two  
2 unit that is operating generates 115 MWh.

3 i. Please explain in detail how you arrived at your answer, provide all  
4 calculations, workpapers and supporting documents, and provide all spreadsheets in  
5 electronic format with all formulas intact.

6 ii. How much of the 115 MWh that are generated does Henderson  
7 contend are attributable to Big Rivers' capacity allocation?

8 iii. If Big Rivers does not exercise its option to take any of the Excess  
9 Henderson Energy, but instead delivers all of the Excess Henderson Energy into MISO and  
10 allocates to Henderson the net revenues from the sale of that energy, who does Henderson  
11 contend is responsible for the variable costs of producing that energy, and does Big Rivers  
12 have any obligation to pay Henderson for that energy? Explain your answers in detail and  
13 provide the contractual basis supporting your answers.

14 c. How much Excess Henderson Energy would there be in an hour in which  
15 Henderson utilizes 90 MWh for itself and its native load customers, Henderson makes no  
16 sales to third parties, only one of the Station Two units is operating, and the Station Two  
17 unit that is operating generates 120 MWh.

18 i. Please explain in detail how you arrived at your answer, provide all  
19 calculations, workpapers and supporting documents, and provide all spreadsheets in  
20 electronic format with all formulas intact.

21 ii. How much of the 120 MWh that are generated does Henderson  
22 contend are attributable to Big Rivers' capacity allocation?

1           iii.    If Big Rivers does not exercise its option to take any of the Excess  
2 Henderson Energy, but instead delivers all of the Excess Henderson Energy into MISO and  
3 allocates to Henderson the net revenues from the sale of that energy, who does Henderson  
4 contend is responsible for the variable costs of producing that energy, and does Big Rivers  
5 have any obligation to pay Henderson for that energy? Explain your answers in detail and  
6 provide the contractual basis supporting your answers.

7           d.    How much Excess Henderson Energy would there be in an hour in which  
8 Henderson utilizes 90 MWh for itself and its native load customers, Henderson makes no  
9 sales to third parties, both of the Station Two units are operating, and the Station Two  
10 units generate 235 MWh.

11           i.    Please explain in detail how you arrived at your answer, provide all  
12 calculations, workpapers and supporting documents, and provide all spreadsheets in  
13 electronic format with all formulas intact.

14           ii.   How much of the 115 MWh that are generated does Henderson  
15 contend are attributable to Big Rivers' capacity allocation?

16           iii.   If Big Rivers does not exercise its option to take any of the Excess  
17 Henderson Energy, but instead delivers all of the Excess Henderson Energy into MISO and  
18 allocates to Henderson the net revenues from the sale of that energy, who does Henderson  
19 contend is responsible for the variable costs of producing that energy, and does Big Rivers  
20 have any obligation to pay Henderson for that energy? Explain your answers in detail and  
21 provide the contractual basis supporting your answers.

1 **RESPONSE:** The definition of “Excess Henderson Energy” used for purposes of  
2 responding to this request is that definition set forth in Section 3.8(a) of the Power Sales  
3 Contract, as amended, which defines “Excess Henderson Energy” as energy which is associated  
4 with Henderson’s reserved capacity, and which is not scheduled or taken by City. The  
5 methodology used for calculating “Excess Henderson Energy” is that methodology set forth in  
6 response to Request No. 4. All calculations reflect the current amount of Henderson’s annual  
7 reservation of Station Two capacity (115 MW), and the allocation of the remaining capacity (197  
8 MW) to Big Rivers.

9 a. 25 MWh.

10 i. See Response to Request No. 4.

11 ii. 197 MWh.

12 iii. If Big Rivers does not wish to exercise its option to purchase “Excess  
13 Henderson Energy” from Henderson, then “Excess Henderson Energy” should not be generated.  
14 In the event that Big Rivers makes the unilateral decision to generate “Excess Henderson  
15 Energy,” then Big Rivers is responsible for the variable costs of producing that energy, and for  
16 paying Henderson \$1.50 per MWh for that energy. Big Rivers in turn would be entitled to retain  
17 any revenue from the sale of “Excess Henderson Energy.”

18 b. None.

19 i. See Response to Request No. 4.

20 ii. 25 MWh.

21 iii. No “Excess Henderson Energy” would be generated under the described  
22 scenario.

23 c. None.

- i. See Response to Request No. 4.
- ii. 30 MWh.
- iii. No "Excess Henderson Energy" would be generated under the described scenario.
- d. None.
  - i. See Response to Request No. 4.
  - ii. Presuming Big Rivers intended to use the "235" figure set forth in Request No. 10(d), then 145 of the MWh generated under that scenario would be attributable to Big Rivers' capacity allocation.
  - iii. No "Excess Henderson Energy" would be generated under the described scenario.

**WITNESS: Gary Quick**

1 **REQUEST NO. 11:** What is the net book value of Station Two on Henderson's books?

2 Please provide all documents supporting your response.

3 **RESPONSE:** \$17,957,726.25. See Exhibit 3.

1 **REQUEST NO. 12:** Please provide all studies, internal and external correspondence, and  
2 other documents, in the possession of Henderson created since July of 2009 arising out of,  
3 concerning or relating to: (i) whether Henderson or its customers could save money by  
4 allowing Big Rivers to cycle, temporarily idle, or offer into MISO on an Economic  
5 Commitment basis, one or both of the Station Two units, (ii) the amount of money  
6 Henderson or its customers could save or could have saved by allowing Big Rivers to cycle,  
7 temporarily idle, or offer into MISO on an Economic Commitment basis, one or both of the  
8 Station Two units, (iii) whether Big Rivers has the contractual right to cycle, temporarily  
9 idle, or offer into MISO on an Economic Commitment basis, one or both of the Station Two  
10 units for economic reasons, (iv) Big Rivers idling, cycling, or offering into MISO on an  
11 Economic Commitment basis, one of both of the Station Two units for economic purposes,  
12 and (v) how quickly Big Rivers should return one or both of the Station Two units to  
13 service after an outage.

14 **RESPONSE:** To the best of Henderson's knowledge, there exist no documents of the  
15 type described in this request, with the exception of a memorandum which was drafted by former  
16 in-house counsel C.B. West, and dated February 14, 2013, and which is protected from  
17 disclosure under the Work Product Doctrine.

SYSTEM RESERVES AGREEMENT

THIS AGREEMENT made and entered into as of January 1, 1974, by and between CITY OF HENDERSON UTILITY COMMISSION (CITY), and BIG RIVERS ELECTRIC CORPORATION (BIG RIVERS), both having offices in Henderson, Kentucky.

WITNESSETH:

WHEREAS, the parties' electric systems are physically interconnected pursuant to the provisions of certain agreements dated September 1, 1965, April 1, 1968, August 1, 1970, and June 1, 1972, through which interconnections the parties operate their respective electric systems on an interconnected basis and transact power and energy exchanges as provided by such agreements, and

WHEREAS, by the provisions of said agreements each of the parties is required to maintain adequate reserve generating capacity on its system so as not to impose disproportionate demands upon the other for assistance in meeting the normal contingencies of operating its power system, and

WHEREAS, the parties desire to fix their responsibilities for providing reserve generating capacities and standby capacity for their respective electric systems for such time as their electric systems shall remain interconnected, or until the provisions of this agreement shall be amended or terminated as hereinafter provided.

NOW, THEREFORE, in consideration of the premises and of the mutual covenants and agreements herein made, it is stipulated, covenanted and agreed by and between the parties as follows:

1. TERM:

1.1 This agreement shall become effective upon its execution by the parties, subject to approval of the Administrator of the Rural Electrification Administration as to BIG RIVERS' execution thereof, and shall continue thereafter, from year to year (each period from November 1 through October 31 being considered a contract year) until termination of the parties' agreements of September 1, 1965; April 1, 1968, August 1, 1970, and June 1, 1972, respectively.

2. CITY'S ELECTRIC SYSTEM:

2.1 CITY agrees during the term of this agreement to provide for its electric system, at all times during each contract year, a minimum generating capacity equal to its system peak load during such contract year plus fifteen per cent (15%). Such generating capacity shall be provided through (a) installed

and operable generation at CITY's Station One, (b) reserved generation from CITY's Station Two, and/or (c) firm capacity purchased or otherwise available from others.

2.2 Standby capacity for CITY's generating capacity (as generating capacity is defined in paragraph 2.1) shall be provided as follows:

(a) BIG RIVERS shall provide standby capacity for CITY's Station One in an amount equal to the lesser of (i) the maximum net send-out capacity of all operable generating units in Station One, or (ii) the amount that CITY's load exceeds its generating capacity available from sources other than its Station One.

(b) CITY shall provide standby capacity for its generating capacity reserved from Station Two in an amount equal to such reserved generating capacity. The standby capacity referred to in this subparagraph shall be provided out of the alternate generating unit of Station Two as provided in Section 5 of the parties' Power Sales

Contract dated August 1, 1970. In the event that the alternate generating unit of Station Two is unavailable for standby service by reason of scheduled or unscheduled outage, BIG RIVERS will, on a best efforts basis, provide or procure standby capacity for CITY's reserved generating capacity from Station Two, subject to the provisions of paragraph 4.3 of this agreement.

3. BIG RIVERS ELECTRIC SYSTEM:

3.1 BIG RIVERS agrees during the term of this agreement to provide for its electric system at all times during each contract year a minimum generating capacity equal to its system peak load during such contract year plus fifteen per cent (15%). Such generating capacity shall be provided through (a) installed and operable generation at BIG RIVERS' generating stations, (b) generating capacity purchased from CITY's Station Two pursuant to the parties' Power Sales Contract dated August 1, 1970, and/or (c) firm capacity purchased or otherwise available from others.

3.2 Standby capacity for BIG RIVERS' generating capacity (as generating capacity is defined in paragraph 3.1 hereof) shall be provided as

follows:

(a) BIG RIVERS shall provide out of its own generating units or by purchase or other availability from others, standby capacity equal to the greater of (i) the largest generating unit of BIG RIVERS' electric system at the time of execution of this agreement, or (ii) the largest generating unit of CITY's Station Two at the time of execution of this agreement.

(b) BIG RIVERS' generating capacity purchased or otherwise available from others shall be firm capacity with adequate standby being provided by the supplier.

4. PAYMENTS:

4.1 There shall be no capacity charge for standby service to be provided CITY by BIG RIVERS under the terms of this agreement.

4.2 Electric energy delivered under this agreement shall be settled for by the return of the equivalent energy or, at the option of the supplying party, by payment. If the equivalent energy is returned, it shall be returned at times when load conditions of the receiving party are substantially

equivalent to the load conditions of such party at the time it delivered the energy; or, if such party elects to have equivalent energy returned under different conditions, it shall be returned in such amounts as will compensate for the difference in conditions. If payment is made as herein provided, it shall be made on the basis of out-of-pocket costs as set forth in Exhibit "A" hereof plus ten per cent (10%) of such out-of-pocket costs.

4.3 If the energy requested by CITY under this agreement is not available from BIG RIVERS' generating capacity for reasons beyond BIG RIVERS' reasonable control, but is available from other sources, BIG RIVERS will purchase the energy from such other sources in order to make the delivery to CITY, in which event the costs to the CITY for such energy shall be the actual, out-of-pocket purchase costs to BIG RIVERS for making such delivery, plus an adjustment for losses incurred over BIG RIVERS' electric system.

5. GENERAL PROVISIONS:

5.1 This agreement shall be subject to and governed by the terms and provisions of the parties' Interconnection Agreement dated

June 1, 1972, the terms and provisions of which are incorporated herein by this reference.

5.2 IF there is any conflict between the terms and provisions of this agreement and the terms and provisions of the parties' Interconnection Agreement dated June 1, 1972, then the terms of this agreement shall prevail to the extent of such conflict.

6. AMENDMENTS:

6.1 This agreement may be amended only by written amendment executed by both parties hereto, which execution on the part of BIG RIVERS shall be subject to approval of the Administrator of the Rural Electrification Administration.

7. PARTIES BOUND:

7.1 This agreement shall be binding upon the parties hereto, their respective successors and assigns.

7.2 Any sale or other disposition of either party's electric system, or any portion or portions thereof which shall affect the terms and provisions of this agreement, shall be made subject to the terms and provisions of this agreement.

IN WITNESS WHEREOF the parties have caused this agreement to be executed by their respective officers, duly authorized therefor, this the day and year first above written.

EXHIBIT "A"

Out-of-Pocket Costs

DATE: June 1, 1972

FIRST PARTY: BIG RIVERS RECC

SECOND PARTY: CITY OF HENDERSON, KY.

For purposes of this agreement and the schedules attached hereto "out-of-pocket costs" shall mean the cost of fuels in the generating station or stations of the supplying party plus one mil per kwh, plus losses to point of delivery and plus any applicable startup charges. Cost of fuels as used herein shall include all fuel costs, handling charges and associated fuel charges includable within FPC Account 501.

IN WITNESS WHEREOF the parties have caused this schedule to be executed by their duly authorized officers on the date above referred to.

EXCERPT FROM THE MINUTES OF       REGULAR       MEETING OF BOARD OF DIRECTORS  
OF BIG RIVERS ELECTRIC CORPORATION  
HELD IN HENDERSON, KENTUCKY, ON  
APRIL 12, 1974

Upon motion of Texal Brooks, seconded by Robert D. Green, it was unani-  
mously moved that Contract No. 293 between Henderson Municipal Power &  
Light and Big Rivers be approved.

I, Robert D. Green, President  
of the Board of Directors of Big  
Rivers Electric Corporation hereby  
certify that the above is a true  
and correct excerpt from the  
minutes of Regular Meeting of  
said corporation held on  
April 12, 1974.
