

12/21/16

Sir/Madam,

I am writing to oppose the general rate case being presented to you by Notin RECC. If I read Michael Miller's info correctly, I understand from the last page of the Official Notice that Schedule 1 for Farm & Home will increase 11.9% for the average usage kWh. I am a retired (early-retirement ∴ smaller income) teacher ^(72 yrs old) & am living on this fixed-income with a bare minimum raise for COLA. It has not exceeded 3% mostly below that since 2002. NEVER will my COLA be raised by 11.9% ∴ therefore, I morally & fiscally oppose this proposition.

Sincerely,
Robertina Tilburn
