

Dec 1, 2016

Dear Public Service Commission,

I am writing in response to L.G. & E request for a new rate increase. Again L.G. & E uses Florida's typical usage for gas (I am a Salt River Coop Electric customer) of 5.5 monthly. And again I have to correct them. Kentucky still has cold, cold winters and we have monthly usage of natural gas of about 73 ccf. Our summer bill does have a ccf usage of 5. My summer bill is less than L.G. & E's request just for the Basic Service Charge increase (22.28 vs. 24.00).

How L.G. & E comes to the conclusion of "only" a ~~4~~ 9.6% increase is beyond me - how about 33%.

It seems the Grinch is alive and well this holiday season and wants to continue with his greedy ways.

Isn't it funny how L.G. & E requests comes during the busy holiday season.

Please do not allow L.G. & E to push this 33% increase

on their customers (who have no other real choices.

I can do solar for electricity but not gas. And right now

Solar is expensive to me. Salt River
