

I'm on a fixed income. I unplug everything electric except my refrigerator. The only gas I use is from my furnace in the cold weather. I've tried everything to bring my bill down to be affordable. Now they want to raise both so it comes out of my food money. You are driving people further in debt. They (LGE) just had a raise in 2016. When do these greedy people stop. My account number is [REDACTED] check out how much I use. Go after the big companies, if you have too. Leave poor & fixed income people alone. Thank you.

P.S. Social Security raised my benefit \$2.00 a month. Big cost of living raise. Rent went up \$20.
