Dear SIRS,

I am writing in regard to rate
Case # 2016-00371. The almost doubling
of the monthly service charge by LG&E will
hurt those people least able to pay it,
the poor and elderly.

It also discourages folks who try
to save money by using less electricity
and shrinking our carbon footprint.

If they must raise more money, they
should charge people on how much
utilities they use.

please stay calm.

THANKS,

Fennel W/Harrison
