COMMISSION

Re: *Application of Kentucky RSA #3 Cellular General Partnership d/b/a Bluegrass Cellular Application for Approval to Construct and Operate a New Cell Site Facility to Provide Cellular Radio Service (Stephensport) in Rural Service Area #3 (Breckinridge County) of the Commonwealth of Kentucky, Kentucky Public Service Commission Case No. 2017-00143*

Dear Mr. Biddle:

We are legal counsel to Kentucky RSA #3 Cellular General Partnership d/b/a Bluegrass Cellular ("Bluegrass Cellular"). In that capacity, we are responding to your written communication addressed to the Public Service Commission of the Commonwealth of Kentucky (the "Commission") and received on May 17, 2017 regarding your concerns with respect to the proposed construction of a cell tower facility to be located at 6199 Highway 2779, Hardinsburg, Kentucky, 40143.

Bluegrass Cellular proposes to construct this cell tower facility in Breckinridge County in order to provide enhanced wireless communication services in the area. The proposed cell tower facility will accommodate the citizens of Breckinridge County and individuals traveling along Kentucky Highways 144 and 2779, and in the vicinity. The proposed cell tower facility will also accommodate emergency medical services and other emergency response services, such as 911, that are vital to all communities. To date, there have been no objections to this proposed cell tower facility from any local or other governmental agencies and officials.

The proposed location of the cell tower facility is the most suitable location in this area of the county due to: (1) its elevation; (2) the nature of the terrain in the surrounding area; and (3) its proximity to Kentucky Highways 144 and 2779. The proposed cell tower facility may accommodate other carriers in the future which may eliminate additional cell tower facilities being constructed near your property as well as others in the vicinity.

Bluegrass Cellular's radio frequency engineers have determined that this location meets its coverage objectives to provide seamless coverage within Bluegrass Cellular's network. Common practice for wireless carriers is to design and locate cell tower facilities in close

proximity to highways and interstates, that is, Kentucky Highways 144 and 2779, so as to maximize optimum cell coverage.

These were the primary reasons Bluegrass Cellular chose the proposed cell tower facility for construction.

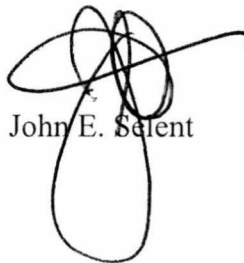

Finally, in Kentucky PSC Case No. 2005-00445, we addressed the issue of decreased property value due to the construction of a cellular tower facility. We introduced expert testimony in that case which opined that the proposed cell tower facility would not negatively affect the value of the property.

I hope that this letter satisfactorily addresses your concerns.

Thank you.

Very truly yours,

DINSMORE & SHOHL LLP
