PUBLIC SERVICE COMMISSION

BEFORE THE PUBLIC SERVICE COMMISSION

In the Matter of:

GARRISON-QUINCY-KY-O-HEIGHTS WATER	)	
DISTRICT REQUEST FOR A DEVIATION FROM	)	CASE NO.
THE DAILY INSPECTION OF SEWER GRINDING	)	2017-00201
PUMP STATIONS	)	

#### MOTION FOR EXTENSION OF TIME

Comes the Garrison-Quincy-KY-O-Heights Water District, by counsel, and moves the Public Service Commission for an extension of time in which to fully and completely respond to the Commission's Order dated September 7, 2017. Specifically, the Order directs the Garrison-Quincy-KY-O-Heights Water District to provide certain information requested within 14 days of the date of the Order.

Movant submits the Answers to the Commission's Request which are enclosed herewith.

The delay in its response was due to a misunderstanding among District staff and counsel for the District as to the formality and format that is required by KAR.

Wherefore, the Movant requests that this Motion be sustained, that the Response be accepted, for all other relief for which it may be entitled and appropriate Orders consistent with this request.

THOMAS M. BERTRAM

COUNSEL FOR WESTERN LEWIS RECTORVILLE WATER AND GAS

DISTRICT

GARRISON-QUINCY-KY-O-HEIGHTS WATER	)	
DISTRICT REQUEST FOR A DEVIATION FROM	)	CASE NO.
THE DAILY INSPECTION OF SEWER GRINDING	. ),	2017-00201
PUMP STATIONS	)	

### ANSWER TO COMMISSION STAFF'S FIRST REQUEST FOR INFORMATION

Comes the Garrison-Quincy-KY-O-Heights Water District (the District), by counsel, and for its Answer to Commission Staff's First Request for Information, states as follows:

Answer to Request #1: The District's wastewater facilities are a pressure system.

Answer to Request #2 a: The District has a check valve assembly for each grinding pump station in the District's system.

Answer to Request #2 b: Each grinding pump station in the District's system has a storage tank for holding wastewater with a 50 gallon capacity.

Answer to Request #2 c: Each grinding pump station in the District's system has a sewer relief valve.

Answer to Request #2 d: Each grinding pump station in the District's system is designed to bypass water to the area surrounding the station in the event of an overflow.

Answer to Request #3: When a grinding pump fails, there is an audible and visual alarm that is tripped in the event of a high level.

Answer to Request #4: The District staff responds to the failed grinding pump at first notification of the failure.

Answer to Request #5: The District instructs its customers to call the District in the event of a grinding pump failure. See attached Exhibit A.

Answer to Request #6 a: The manufacturer of the District's grinding pumps is E One.

Answer to Request #6 b: The model of the District's grinding pumps is Extreme.

Answer to Request #6 c 1: The residential grinding pumps are simple models. The District has one duplex model grinding pump located at the Garrison Elementary School

Answer to Request #6 c 2: There is an audibly high pitched alarm that sounds and a red warning light flashes. The high pitched alarm can be heard for a long distance away. Service alerts have been received by Garrison staff by neighbors several houses away from the grinding pump that is emitting the alarm.

Answer to Request #6 c 3: The manufacturer's technical specifications supplied with the grinding pump is attached as Exhibit B.

Answer to Request #6 c 4: The service life of grinding pump per the manufacturer's recommendation is 20 years.

Answer to Request #6 c 5: The manufacturer of the grinding pump does not have recommended routine maintenance.

Answer to Request #6 c 6: It is unknown the depreciable life assigned to the grinding pumps.

Answer to Request #6 c 7: There are 310 simple grinding pumps in use and 1 duplex grinding pump in use.

Answer to Request #7: District staff inspects grinding pump stations anytime staff are on or near the property that contains a grinding pump station.

Answer to Request #8: The District proposes to continue its procedure for inspecting grinding pump stations in that staff checks the grinding pump stations when they are on or near property that contains a grinding pump station.

Answer to Request #9: For the years 2010 to present, there were 258 work orders for grinding pump station failures.

Answer to Request #10: The District staff responded to numerous calls for service to the grinder pumps for various issues from the years 2010 to present. See attached Exhibit C. The District responded to these calls by replacing the grinding pump or performing maintenance on the pump and/or station to get the grinding pump station back in working order. It would too voluminous to provide the Commission staff with each individual call/complaint with the resolution of the complaint. District staff state that this would contain around 400 pages of information.

Enclosed herewith are responses to the Commission that were provided prior to this request.

The information provided is true and correct to the best of my and those that singed below, knowledge, information, and belief formed after a reasonable inquiry.

### CERTIFICATE OF SERVICE

I hereby certify that on this <u>and</u> day of September 2017, a copy of the foregoing Motion has been mailed, USPS postage prepaid, to the following:

Public Service Commission PO Box 615 Frankfort, KY 40602

THOMAS M. BERTRAM

Exhibit A - page 1

### GARRISON QUINCY WATER DISTRICT, WASTEWATER DIVISION GUIDELINE FOR LOW PRESSURE SEWER SYSTEM

Please keep this letter in your telephone book or other readily available place for future use. By referring to it, you may save yourself some problems later and you will be able to make a call for service and/or repairs.

Garrison Quincy Water District has put together Rules and Regulations governing the use and maintenance of the sewer system. Please make note of the following guidelines and inform all guests about the sewer system.

Basically speaking, "if it isn't toilet paper or hasn't passed through your mouth, it should not be flushed". There are eight (8) items, which cause problems if introduced into the grinder pump:

- 1. Large amounts of grease.
- 2. Large amounts of sand or grit.
- 3. Panty hose or elastic bands.
- 4. Any disposable sanitary items (including diapers).
- 5. Q-tips.
- 6. Prophylactics.
- 7. Petroleum products includes paint thinner, kerosene, gasoline, etc.
- 9. Plastic products.
- 10. Metal products.

Each homeowner/customer should be aware of where their sewer control box is and familiarize themselves with the alarm silence button. It is a small rubber covered button on the bottom left hand side of the electric control box. To silence the alarm, push up on the button.

If the pump should in some way malfunction, the red warning light will illuminate and the alarm buzzer will sound. At such time, stop ALL water usage, silence the alarm on the control box and call 606-757-4898, give a brief description of the problem and be sure to the District representative your name, address, and phone number. The pump repair personnel may need to call you back. Do not use any water until the service personnel have informed you that is all right to do so. DO NOT ATTEMPT TO REPAIR THE PUMP YOURSELF. The District must authorize their maintenance personnel to do all repairs.

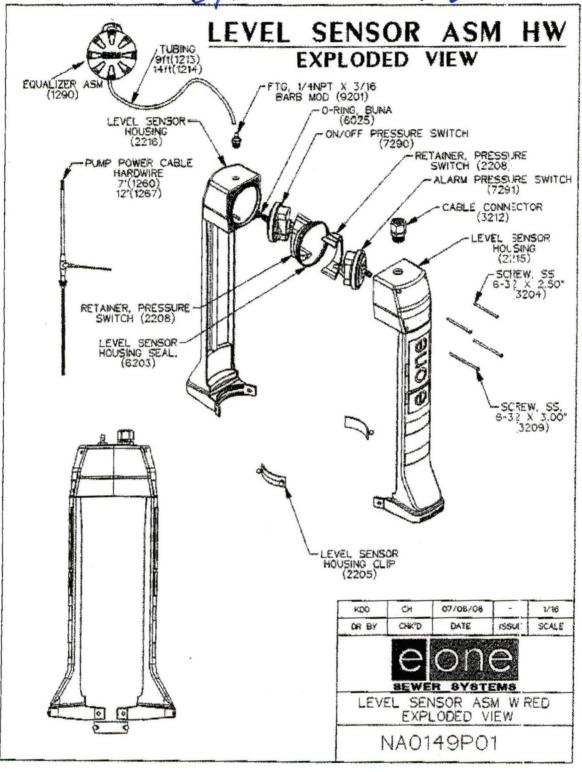

If there is a power outage, the pump wetwell has a limited holding capacity. Since the power is off, many appliances will not work (washer, dishwasher, etc.). and only basic living needs will be met anyway. Any extensive use of water may cause damage to back up into the house.

Exhibit A-page 2

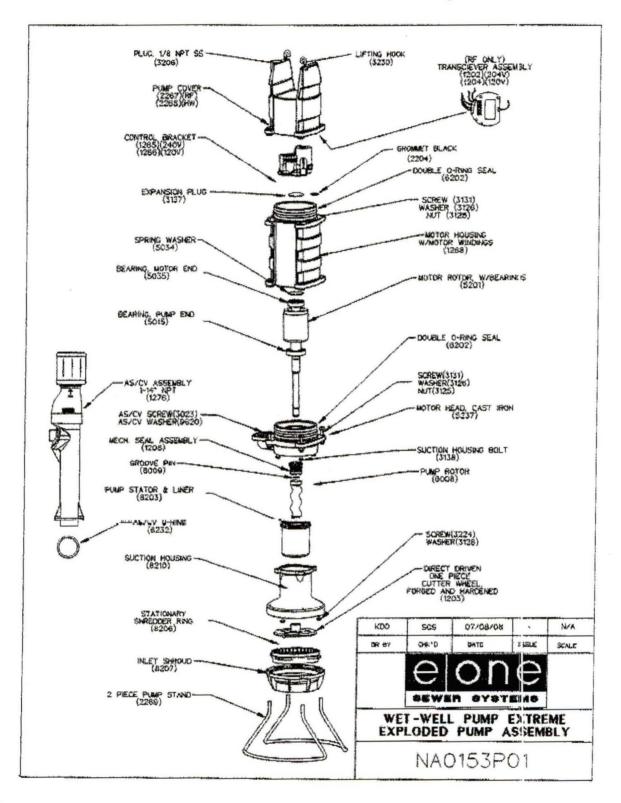

We hope you will keep these things in mind as they are intended to help your grinder pump last longer and better serve you. If a household/customer continually abuses the system by introducing the above referenced banned items causing repeated service calls, charges for these will be billed to the Customer.

John Pierce, General Manager Garrison Quincy Water District Wastewater Division

WRITTEN RESPONSE FOR INSPECTION DEFICIENCY ON JULY 15, 2016

As observed by Commission Staff Member Brian Rice during the inspection, July 15, 2016, we were deficient in two different areas. The first being the lack of inspecting all mechanical equipment on a daily basis. The other was a deficiency of not having a yearly inspection of our manholes.

Regarding the first deficiency, on the lack of daily inspections of our mechanical equipment, an explanation would be that our flow was monitored at the plant as incoming flow through our Equalization Basin. At the time any fluctuation in flows were recorded, we made a v sit to our two pump stations to check for a possible problem. To correct the issue we will visit the Pump Stations and check equipment operation daily as recommended by your inspector. Also, the other mechanical things we did not check daily were the 310 grinder stations throughout the system. Due to the amount of time and manpower that it would take, we do not have a resolution at this time, it isn't feasible if even possible to make a daily visit to the 310 residences to check their grinder pump stations.

The second deficiency was the lack of a yearly inspection of our manholes. The lack of inspections done on these manholes would be because of the type that they are. They only have inside of them a pipe that contains the effluent flow to the Ohio River. Although the manholes are maintained regularly on the top of the ground, no effort was made to take the lids off and inspect the facilities below. To be in compliance of 807 KAR 5:071, Section 7 (4), the staff at Garrison Regional Wastewater Plant will now conduct and record a yearly inspection of the effluent manholes.

If you have any more questions, feel free to call me at (606) 757-4898

Trent Underwood, Operator
Garrison Water District/Garrison Regional Wastewater Treatment Plant.

SECOND WRITTEN REQUEST FOR A DEVIATION FOR THE DAILY INSPECTION OF SEWER GRINDING PUMP STATIONS

As observed by Commission Staff Member Brian Rice during the inspection, July 15, 2016, we were deficient of inspecting all mechanical equipment on a daily basis. Notably was the 350 residential grinder pump stations that we have in our system.

I have figured it would take at least 10 minutes per household to adequately inspect the pumps. This includes driving time, unlocking and unbolting the equipment and a visual inspection.

If we do this at a rate of 48 customers a day (10 minutes  $\times$  6  $\times$  8 /60 = 8 hours/day) it would take an additional 8 employees and 8 vehicles just to achieve this goal.

As I stated in my original response, it isn't feasible to our customers that the amount of charges we would have increase to hire the additional employees to consider checking each of these individual grinding stations daily. That is the reason for the deviation request.

If you have any more questions, feel free to call me at (606) 757-4898

Trent Underwood, Operator
Garrison Water District/Garrison Regional Wastewater Treatment Plant.

THIRD WRITTEN REQUEST FOR A DEVIATION FOR THE DAILY INSPECTION OF SEWER GRINDING PUMP STATIONS AFTER A CALL CONCERNING THIS ISSUE FROM JOHN LYONS

As observed by Commission Staff Member Brian Rice during the inspection, July 15, 2016, we were deficient of inspecting all mechanical equipment on a daily basis. Notably was the 350 residential grinder pump stations that we have in our system.

I have figured it would take at least 10 minutes per household to adequately inspect the pumps. This includes driving time, unlocking and unbolting the equipment and a visual inspection.

If we do this at a rate of 48 customers a day (10 minutes  $\times$  6  $\times$  8 /60 = 8 hours/day) it would take an additional 8 employees and 8 vehicles just to achieve this goal.

At a minimum wage rate, plus added expenses for the company, with retirement etc. the salary comes to around \$10.50 an hour X 40 hours  $= $420.00/\text{week} \times 8 = $3,360.00 \text{ weekly}$ .

With the overtime of time and a half on Saturday and double time on Sunday, the added expense weekly would be  $$10.50 \times 1.5 = $15.75/hr \times 8 = $126.00 \times 8$  workers = \$1008.00 for Saturday and  $$10.50 \times 2 = $21.00/hr \times 8 = $168.00 \times 8$  workers = \$1,344.00 for Sunday.

The employee salary would come to a total of \$5,712.00 a week X 52 weeks = \$297,024.00/year

The added expense of 8 trucks at an average price of \$25,000 each is an additional \$200,000.00 in cost

Fuel would cost an estimated \$100.00/week X 8 trucks = \$800.00/week X 52 weeks = \$41,600.00 year

Insurance would be around \$500.00/ monthly X 12 months = \$6,000/year

So a grand total would come to a whopping cost of \$544,624.00 for the first year and without any maintenance to the vehicles and a price of \$344,624 a year plus vehicle maintenance for the years after until trucks are once again needed.

As I stated in my original response, it isn't feasible to our customers that the amount of charges we would have increase to hire the additional employees to consider checking each of these individual grinding stations daily. That is the reason for the deviation request.
