PUBLIC SERVICE  
COMMISSION

Jan. 23, 2018  
Inez, Ky.

To members of PSC:

I live in Martin Co. Ky. Our water is not safe to drink and has not been for some time, and it probably is not good to use for anything else. The Martin Co. Water Board wants to raise our water bill by 50%.

That would put a hardship on the people of Martin Co. because most people live on Social Security or Welfare. I think most people are concerned about giving the Water Dept. more money because the people in charge have been there a long time and we do not trust them to use the money for what they say they are going to. It appears that they have let everything go until all is in bad shape. The water lines, pumps, holding tanks and treatment plant. It has been said that it could take 8 to 10 years to get everything fixed. What do the people of Martin Co. do until then? We need clean safe drinking water now. We really need help and we need someone to find out what is going on in the Water Dept. and someone to help us get clean safe drinking water.

Thank you for your time

Sincerely  
Linda J. Duce
