I'm a concerned citizen of Martin Co. I would like to meet with you no person but no chance. First and most off I was diagnosed by several neurologist with Parkinson in the year of 2003 everyone of these visits to Ashland, Ky & Huntington WVa ask me the question about my water I have lived here for 46 yrs. I have a husband that is a bad diabetic and a little 11 yr old grandson that we adopted that stays broke out. All of these problems are due to the water in this county. It's ashame we cannot bath in this so called City water. My husband has to put plastic and bin over before he showers can't cook or drink this water. The leaders of this county just look for a big payday!

2018-00017

The people they hire are ~~no~~ uneducated, lazy just hire them for personal gain because of Big families that vote the way they are told. Oh they have their Master Co water trucks to sit in and sleep. I think when their country had the coal rolling out and getting Big Bucks we have been promised Clear water for so long its pitiful

We pay huge water bills 65.00 months plus, the water we buy has to run 60-80 dollars We are below the poverty level people are on fixed incomes same as us. This place is pitiful everything comes down to the dollar If you help us poverty level Citizens from getting higher water bills which we cannot afford it would be greatly appreciated
