Cumberland Valley Cable TV Co.
(Science Hill)

AGREEMENT

THIS AGREEMENT, made this 1st day of January, 1979, by and between CONTINENTAL TELEPHONE CO. OF KENTUCKY, a corporation of the State of KENTUCKY, having its principal State of Business office in the City of London, hereinafter called Licensor, a party of the first part, and TELEVISION RECEPTION CORPORATION, a corporation of the State of KENTUCKY, hereinafter called Licensee, party of the second part.

WITNESSETH:

WHEREAS, Licensee proposes to furnish community antenna television service to persons residing in the City of SCIENCE HILL, KY. and vicinity, pursuant to Licensee's authority under a certain franchise granted to it on the 13 day of MAY, 1977, by the TOWN BOARD, J.D. PHELPS, Chairman of the City of SCIENCE HILL, KY.

and in connection therewith will need to erect and maintain aerial cables, wires, and associated appliances throughout the area to be served, and desires to attach such cables, wires and appliances to poles of Licensor; and

WHEREAS, Licensor is willing to permit, to the extent that it may lawfully do so, the attachment of said cables, wires and appliances to Licensor's poles for the purposes authorized by Licensee's franchise where in its judgment such use will not interfere with its own service requirements or the service requirements of others using such poles; including considerations of economy and safety;

NOW THEREFORE, in consideration of the mutual covenants, terms and conditions herein contained, the parties hereto do hereby mutually covenant and agree as follows:

1. As used in this Agreement, certain terms listed below shall have the following meanings:
 - (a) "Licensor's poles" means poles owned by Licensor located in or in the immediate vicinity of Science Hill, Kentucky.
 - (b) "Licensee's equipment" means aerial wires, cables, amplifiers, associated power supply equipment, and other transmission apparatus necessary for the proper operation of Licensee's system in the City of SCIENCE HILL, KY. and vicinity

in accord with the authority granted to Licensee by its franchise.

2. Before attaching Licensor's poles, Licensee shall make application and receive a permit therefor on the form provided in the Appendix attached hereto and made a part thereof. If Licensee accepts the permit, it may attach the poles covered by said permit subject to the terms and conditions of this Agreement. In granting or denying a permit, Licensor reserves the right to determine whether a grant would adversely affect its common carrier communication services and its ability to meet its duties and obligations with respect thereto, including questions of economy, safety and future needs of Licensor and other joint users.
- * 3. If Licensor's pole or poles are inadequate to support Licensee's proposed attachments in accordance with the specifications referred to in Section 5 hereof, and Licensor is willing to replace such poles to permit the attachment of Licensee's equipment thereto, Licensor shall indicate on the application permit form the changes necessary and the estimated nonbetterment costs thereof and return said form to Licensee. If Licensee still desires to make the attachments and returns the form marked so to indicate, Licensor will replace such inadequate poles and Licensee will on demand reimburse Licensor and other joint users for the nonbetterment portion of the cost and expense thereof, including the increased cost of larger poles, sacrificed life value of poles removed, cost of removal less any salvage recovery and the expense of transferring existing facilities from the old to the new poles. Where Licensee's attachments are accommodated on existing poles by rearranging the facilities thereon, Licensee will on demand compensate Licensor and owners of said facilities for the expense incurred in rearranging their respective facilities. Licensee will also on demand reimburse Licensor for any strengthening of poles by guys, anchors or other means, to accommodate the attachment of Licensee's equipment. Should Licensor at any time require the space occupied by Licensee's attachments on poles which have not been replaced at Licensee's expense, Licensor shall give notice to Licensee and Licensee shall either vacate the space by

removing its attachments or shall authorize Licensor to replace said poles at the expense of Licensee, in the same manner as provided above. Licensor reserves the right to deny Licensee the use of any pole or poles where, in Licensor's judgment, the replacement or rearrangement work necessary to make space available will result in an undue interference or interruption of Licensor's service to its customers.

4. Licensee hereby agrees not to sell or lease the use of its facilities on Licensor's poles, or any portion thereof, without the prior consent in writing of the Licensor.
5. Licensee's equipment, in each and every location (including all equipment which is not attached to Licensor's poles, but which in any way may result in excessive or improper voltages or current being impressed upon any facilities of Licensor or in any hazard to Licensor's facilities or employees or to the public), shall be erected, installed, maintained and removed in accordance with the requirements and specifications of the National Electric Safety Code, Sixth Edition, or any revisions thereof, and in compliance with any applicable rules, regulations or orders now in effect or hereafter issued by any Federal or State commission or any other public authority having jurisdiction. Drawings marked Exhibits 1 to 8, inclusive, included in the Appendix attached hereto and made a part thereof, are descriptive of required construction under some typical conditions where span lengths are not over one hundred fifty (150) feet and the voltage of the power conductors does not exceed fifteen thousand (15,000) volts to ground. All attachments of Licensee shall be placed within the space and at the location designated by the Licensor. All bonding that may be required under the terms of this agreement including Exhibits 1 through 8 will be performed as follows:

Licensee will furnish the bond and attach the same to its cable and Licensor will then attach the bond to its cable. Licensor and Licensee agree to cooperate in scheduling such work so that it may be performed as expeditiously as possible. Licensee shall, on demand, reimburse Licensor for its expense incurred in performing such work. Licensor will, upon request, provide Licensee with a written estimate of its charges for performing such bonding prior to commencing work.

6. Licensee shall, at its own expense, make and maintain its attachments in safe condition and in thorough repair, and in a manner suitable to Licensor so as not to conflict with the use of said poles by Licensor or by others, or interfere with the working use of facilities thereon or which may from time to time be placed thereon by Licensor and other joint users. Licensee shall at any time, at its own expense, upon notice from Licensor, relocate, replace or remove its facilities placed on said poles, and transfer them to substituted poles, or perform any other work in connection with said facilities that may be required by Licensor; provided, however, that in cases of emergency (Licensor's judgement as to what constitutes an emergency to be accepted by Licensee as conclusive), Licensor may arrange to relocate, replace or remove the facilities placed on said poles by Licensee, transfer them to substituted poles or perform any other work in connection with said facilities that may be required in the maintenance, replacement, removal or relocation of said poles, the facilities thereon or which may be placed thereon, or for the service needs of Licensor; and Licensee shall, on demand, reimburse Licensor for the expense thereby incurred.
7. Licensor reserves the right to maintain or to discontinue the use of any poles it owns, and to operate its facilities in such manner as will best enable it to fulfill its respective service requirements. It shall not be liable to Licensee, its customers, or any other, for any interruption to service of Licensee or for interference with the operator of Licensee's equipment arising in any manner out of the use or discontinuance of such poles hereunder. Whenever possible, thirty (30) days' notice shall be given the Licensee prior to any move or discontinuance of any pole or poles.
8. Licensor, because of the importance of its common carrier services, reserves the right to inspect each new installation of Licensee's equipment on Licensor's poles and to make periodic inspections of the entire plant of Licensee; and Licensee shall, on demand, reimburse Licensor for the reasonable expense of such inspections. The making of such inspections or the omission thereof shall not operate to relieve Licensee or Licensee's insurer of any responsibility, obligation or liability assumed under this Agreement.

9. Licensee shall pay to Licensor, for attachments made to the Licensor's poles under this Agreement, a rental at the rate of \$ [REDACTED] per pole per year. Said rental shall be payable semi-annually in advance on the fifteenth day of January and July of each year during which this Agreement remains in effect. Semi-annual rental payments shall be based on the number of poles on which Licensee has attachments on the first day of the month in which said rentals are payable. The number of poles attached by Licensee shall be mutually determined by the parties in the manner specified in the Appendix attached hereto and made a part hereof. At the end of the first five-year period, and of every two -year period thereafter during the term of this Agreement, at the request of either party, the parties hereto shall review and may adjust the pole rental in accordance with then existing economic conditions which might require such adjustment in order to maintain a fair fee for the ensuing term. If agreement cannot be reached as to an adjusted fee, either party can terminate this Agreement upon twelve (12) months' advance notice.
10. Licensee shall exercise special precautions to avoid causing damage to facilities of Licensor and others located on Licensor's poles and to equipment connected or associated with such facilities, and in the event any such damage occurs, Licensee assumes all responsibility for, and agrees promptly to reimburse Licensor and the other users of Licensor's poles in full for all loss and expense occasioned by such damage. Licensee shall make an immediate report to Licensor of the occurrence of any such damage.
11. Licensee shall submit to Licensor evidence, satisfactory to Licensor, of Licensee's authority to erect and maintain its equipment within public streets, highways, alleys and other thoroughfares and shall secure any necessary consent from Federal, state, municipal, or other public authorities, or from the owners of private lands and property involved, to construct and maintain Licensee's equipment at the locations of Licensor's poles which it desires to use. Licensee shall indemnify and reimburse Licensor for all loss and expense which result from any claims of governmental bodies or others that either Licensee or Licensor has not a sufficient right or authority for placing and

maintaining Licensee's equipment at the locations of the Licensor's poles.

12. Licensee shall indemnify, protect, save harmless, and insure Licensor from and against any and all claims and demands for damages to property and injury or death to persons, including payments made under any Workmans' Compensation Law or under any plan for employees' disability and death benefits, and including all expenses incurred in defending any such claims or demands, which may arise out of or be caused by the erection, maintenance, presence, use, rearrangement or removal of the attachments of Licensee's equipment to Licensor's poles, or which may result by reason of the proximity of the cables, wires, equipment, apparatus and appliances of Licensee to the poles of Licensor, or by reason of any negligence of Licensee on or in the vicinity of Licensor's poles notwithstanding any negligence of Licensor or others lawfully using said Licensor's poles. Without limiting the foregoing, it is the general intent of Licensor and Licensee that Licensee shall save Licensor harmless from any liability or risk arising out of or in any manner connected with the operation of Licensee's business or with the operation of Licensee's business or with the facilities of Licensee installed hereunder whether or not due in whole or in part to any act, omission, or negligence of Licensor. It is not the intent of Licensor or Licensee that Licensee shall assume any liability of Licensor that does not arise out of or is not connected with the operation of Licensee's business or with the installation, operation, maintenance, presence, use, rearrangement or removal of Licensee's facilities.

Without limiting the scope or extent of the protection afforded Licensor or the liabilities assumed by Licensee herein, Licensee shall obtain and maintain in effect at its own expense for the entire life of this Agreement, the following insurance:

- (a) General liability insurance on the premises and operations covered by this Agreement and specifically including contractual liability insurance to cover the liability assumed by Licensee under the agreement of indemnity set forth in Paragraph 12 hereof, all with limits of not less than Two Hundred Thousand Dollars (\$200,000.00) as to any one person and Five Hundred Thousand Dollars (\$500,000.00)

as to any one accident with respect to bodily injury, including death, and with limits of One Hundred Thousand Dollars (\$100,000.00) as to any one accident and Three Hundred Thousand Dollars (\$300,000.00) in the aggregate with respect to property damage; and

- (b) Workmen's Compensation Insurance with statutory limits and employers liability insurance with limits of not less than One Hundred Thousand Dollars (\$100,000.00).

Prior to making any attachments to Licensor's poles, Licensee shall furnish Licensor with a certificate from an insurance carrier acceptable to Licensor stating that policies of insurance have been issued by it to Licensee providing for the insurance coverage listed above and that such policies are in force. Such certificates shall state that the insurance carrier will give Licensor thirty (30) days' prior written notice of any cancellation or material change in policies. Failure to maintain such insurance at any time shall constitute a default of this Agreement but shall not relieve the Licensee from any liabilities assumed under this Agreement.

13. In the event Licensee should make any attachments to Licensor's poles without first having received and accepted a permit as provided in Paragraph 2 hereof, the Licensor shall have the right to summarily and without notice to Licensee, remove such attachments at the cost and expense of Licensee and without any liability therefor.
- * 14. Should Licensee sell or lease the use of its facilities on Licensor's poles without the prior consent in writing of the Licensor as provided for in Section 4 hereof, such action shall constitute forthwith a breach of this Agreement, and Licensor may, at its option, at any time after such breach occurs, forthwith terminate Licensee's attachment rights under this Agreement and require Licensee to remove at once all of Licensee's equipment from Licensor's poles. If Licensee does not so remove the equipment, Licensor shall have the right to remove it at the cost and expense of Licensee.
15. Should Licensee for any reason cease to furnish the services authorized by its franchise, which this Agreement is designed to

facilitate, then and in that event all of Licensee's rights under this Agreement shall automatically terminate and Licensee shall immediately remove its equipment from all of Licensor's poles and if not so removed, Licensor shall have the right to remove it at the cost and expense of Licensee.

- 16. Licensee may at any time remove its equipment from any poles of Licensor, and shall give Licensor written notice of removal as provided in the appendix attached hereto and made a part hereof. No adjustment prorated or refund of any rental will be due on account of such removal. Should Licensee thereafter again wish to make attachments to such pole or poles, it shall make application and receive a permit therefor, as provided in Paragraph 2 hereof.
- 17. No use, however extended, of Licensor's poles, or any payments made under this Agreement or other action of Licensee shall create or vest in Licensee any ownership or property rights in Licensor's poles or associated equipment, but Licensee's right therein shall be and remain such as established a mere license under the terms of this Agreement.
- 18. Nothing herein contained shall be construed as affecting the rights or privileges previously granted by Licensor, by contract or otherwise, to others not parties to this Agreement, to use any poles covered by this Agreement; and Licensor retains the right to continue and extend such rights or privileges. The attachment privileges herein granted shall at all times be subject to such existing contracts and arrangements. Nothing herein contained shall be construed as affecting or limiting the right of Licensor to make other and additional contracts with other persons, firms, corporations or associations for the joint use of Licensor's poles and facilities.
- 19. Bills for inspections, expenses, and other charges for work performed by Licensor or other joint users under this Agreement other than for attachment rentals shall be payable to the parties presenting such bills within thirty (30) days after presentation. Nonpayment of bills shall constitute a default of this Agreement.
- 20. Licensee shall furnish a surety bond in form and with sureties satisfactory to Licensor in an amount not less than \$5,000 for each 1,000

poles attached or fraction thereof to guarantee the payment of any sums which may become due to Licensor for rentals, inspection fees, or for any work performed or expense incurred by Licensor or other joint users under the terms of this Agreement including the removal of Licensee's equipment upon termination of its attachment rights under this Agreement.

21. If Licensee shall fail to comply with any of the provisions of this Agreements, including the specifications herein before referred to, or shall default in any of its obligations under the terms hereof or breach this Agreement and shall fail within ten (10) days after or breach, Licensor may, at its option, forthwith terminate in whole or in part Licensee's attachment rights hereunder, provided, however, that nothing in this section shall affect the provisions and obligations agreed upon in Sections 14 and 15 hereof. Upon such termination, Licensee shall immediately remove its equipment from the pole or poles involved and if not so removed, Licensor shall have the right to remove it at the cost and expense of Licensee.
22. This Agreement shall become effective upon the date hereof, and if the attachment rights are not terminated in accordance with the provisions of other sections of this agreement which provide for such terminations, shall remain in effect for a term of five (5) years from said date and from year to year thereafter subject to the right of either party hereto to terminate this Agreement at any time following the initial term by giving to the other party at least ninety (90) days' prior written notice of said party's desire to terminate this Agreement, in which case this Agreement shall terminate on the date specified but in no event within less than ninety (90) days. Within thirty (30) days after the termination of this Agreement, as provided in this section, Licensee shall remove Licensee's equipment from Licensor's poles. If not removed within thirty (30) days after the termination date, Licensor shall have the right to remove all of Licensee's equipment remaining attached to Licensor's poles at the cost and expense of Licensee without any liability therefor.
23. Upon termination of this Agreement by either party as provided in Paragraph 22, the pole rental for the contract year in which Licensee's equipment is removed from Licensor's poles shall be adjusted and

prorated as of the date of such removal. In all other instances where Licensee's permit or right to attach its equipment to Licensor's pole or poles is terminated as provided in this Agreement, no adjustment or prorate of the pole rental shall be made.

24. Should Licensor under any sections of this Agreement remove Licensee's equipment from Licensor's poles, Licensor will deliver to Licensee the equipment so removed upon payment by Licensee of the cost of removal, storage and delivery, and all other amounts due Licensor hereunder.
25. This Agreement shall not inure to the successors of Licensee nor shall Licensee assign, transfer, or sublet the privileges hereby granted without the prior consent in writing of Licensor. Licensee agrees that it will not grant, sell, rent, loan, or lease to others for any period of time the use of all or any part of Licensee's equipment while attached to Licensor's poles. The parties do not intend by Paragraph 22 of this Agreement to in any manner impair the ability of the Licensee to procure financing through normal accepted channels, and the parties expressly agree that nothing contained in said Paragraph is intended to limit or restrict or impair Licensee's right to execute any mortgage or security agreement covering all or any part of its equipment whether attached to Licensee's poles or otherwise.
26. Failure of Licensor to enforce or insist upon compliance with any of the terms or conditions of this Agreement or to give notice or declare this Agreement or the attachment rights hereunder terminated shall not constitute a general waiver or relinquishment of any terms or conditions of the Agreement but the same shall be and remain at all times in full force and effect.
27. The Appendix attached to and made a part of this Agreement covers construction and operating practices to be observed by the parties hereto. Said practices may be revised by the parties hereto from time to time as changes in operating conditions and experience warrant. Such revisions which do not conflict with the provisions of this Agreement shall be effective when transmitted to the Licensee in writing by the General Plant Manager of the Telephone Company.

28. Subject to the provisions of Paragraph 25 hereof, this Agreement shall extend and bind the successors and assigns of the parties hereto.

29. If, within one year from the effective date of this Agreement, attachments of Licensee's facilities have not been made to at least _____ poles of Licensor, then, at the option of the Licensor, this Agreement may be terminated forthwith in its entirety. Licensor may exercise its option to terminate this Agreement at any time after the expiration of said one-year period by notifying Licensee in writing of Licensor's election to terminate. In the event of said termination, Licensee shall remove promptly all attachments of its facilities theretofore made to Licensor's poles, and if Licensee fails to so remove them, Licensor may remove them at the cost and expense of the Licensee.

IN WITNESS WHEREOF, the parties hereto have, respectively, caused this Agreement to be duly executed the day and year first above written.

AGREEMENT

THIS AGREEMENT, made this 25th day of JUNE, 19 86, by and between CONTINENTAL TELEPHONE COMPANY OF KENTUCKY a corporation of the State of KENTUCKY, having its principal State of Business office in the City of London, hereinafter called Licensor, a party of the first part, and SOUTHERN CABLE VISION OF CORBIN, Inc. a corporation of the State of KENTUCKY, hereinafter called Licensee, party of the second part.

WITNESSETH:

WHEREAS, Licensee proposes to furnish Community Antenna Television service to persons residing in LILY and vicinity, pursuant to Licensee's authority under a certain franchise granted to it on the 25 day of JUNE, 19 86, by the FISCAL COURT of the ~~CLAY~~ COUNTY of LAUREL and in connection therewith will need to erect and maintain aerial cables, wires, and associated appliances throughout the area to be served, and desires to attach such cables, wires and appliances to poles of Licensor: and

WHEREAS, Licensor is willing to permit, to the extent that it may lawfully do so, the attachment of said cables, wires and appliances to Licensor's poles for the purposes authorized by Licensee's franchise where in its judgment such use will not interfere with its own service requirements or the service requirements of others using such poles, including considerations of economy and safety;

NOW THEREFORE, in consideration of the mutual covenants, terms and conditions herein contained, the parties hereto do hereby mutually covenant and agree as follows:

1. As used in this Agreement, certain terms listed below shall have the following meanings:
 - (a) "Licensor's poles" means pole owned by Licensor located in the immediate vicinity of LILY, KENTUCKY.
 - (b) "Licensee's equipment" means aerial wires, cables, amplifiers, associated power supply equipment, and other transmission apparatus necessary for the proper operation of Licensee's system in LILY, KENTUCKY and vicinity in accord with the authority granted to Licensee by its franchise.

2. Before attaching to Licensor's poles, Licensee shall make application and receive a permit therefor on the form provided in the Appendix attached hereto and made a part thereof. If Licensee accepts the permit, it may attach to the poles covered by said permit subject to the terms and conditions of this Agreement. In granting or denying a permit, Licensor reserves the right to determine whether a grant would adversely affect its common carrier communication services and its ability to meet its duties and obligations with respect thereto, including questions of economy, safety and future needs of Licensor and other joint users.
3. If Licensor's pole or poles are inadequate to support Licensee's proposed attachments in accordance with the specifications referred to in Section 5 hereof, and Licensor is willing to replace such poles to permit the attachment of Licensee's equipment thereto, Licensor shall indicate on the application permit form the changes necessary and the estimated nonbetterment costs thereof and return said form to Licensee. If Licensee still desires to make the attachments and returns the form marked so to indicate, Licensor will replace such inadequate poles and Licensee will on demand reimburse Licensor and other joint users for the nonbetterment portion of the cost and expense thereof, including the increased cost of larger poles, sacrificed life value of poles removed, cost of removal less any salvage recovery and the expense of transferring existing facilities from the old to the new poles. Where Licensee's attachments are accommodated on existing poles by rearranging the facilities thereon, Licensee will on demand compensate Licensor and owners of said facilities for the expense incurred in rearranging their respective facilities. Licensee will also on demand reimburse Licensor for any strengthening of poles by guys, anchors or other means, to accommodate the attachment of Licensee's equipment. Should Licensor at any time require the space occupied by Licensee's attachments on poles which have not been replaced at Licensee's expense, Licensor shall give notice to Licensee and Licensee shall either vacate the space by removing its attachments or shall authorize Licensor to replace said poles at the expense of Licensee, in the same manner as

Licensor reserves the right to deny Licensee the use of any pole or poles where, in Licensor's judgment, the replacement or re-arrangement work necessary to make space available will result in an undue interference or interruption of Licensor's services to its customers.

4. Licensee hereby agrees not to sell or lease the use of its facilities or Licensor's poles, or any portion thereof, without the prior consent in writing of the Licensor.
5. Licensee's equipment, in each and every location (including all equipment which is not attached to Licensor's poles, but which in any way may result in excessive or improper voltages or current being impressed upon any facilities of Licensor or in any hazard to Licensor's facilities or employees or to the public), shall be erected, installed, maintained and removed in accordance with the requirements and specifications of the National Electric Safety Code, Sixth Edition, or any revisions thereof, and in compliance with any applicable rules, regulations or orders now in effect or hereafter issued by any Federal or State commission or any other public authority having jurisdiction. Drawings marked Exhibits 1 to 8, inclusive, included in the Appendix attached hereto and made a part thereof, are descriptive of required construction under some typical conditions where span lengths are not over one hundred fifty (150) feet and the voltage of the power conductors does not exceed fifteen thousand (15,000) volts to ground. All attachments of Licensee shall be placed within the space and at the location designated by the Licensor. All bonding that may be required under the terms of this agreement including Exhibits 1 through 8 will be performed as follows:

Licensee will furnish the bond and attach the same to its cable and Licensor will then attach the bond to its cable. Licensor and Licensee agree to cooperate in scheduling such work so that it may be performed as expeditiously as possible. Licensee shall on demand, reimburse Licensor for its expense incurred in performing such work. Licensor will, upon request, provide Licensee with a written estimate of its charges for performing such bonding prior to commencing work.

6. Licensee shall, at its own expense, make and maintain its attachments in safe condition and in thorough repair, and in a manner suitable to Licensor so as not to conflict with the use of said poles by Licensor or by others, or interfere with the working use of facilities thereon or which may from time to time be placed thereon by Licensor and other joint users. Licensee shall at any time, at its own expense, upon notice from Licensor, relocate, replace or remove its facilities placed on said poles, and transfer them to substituted poles, or perform any other work in connection with said facilities that may be required by Licensor; provided, however, that in cases of emergency (Licensor's judgment as to what constitutes an emergency to be accepted by Licensee as conclusive), Licensor may arrange to relocate, replace or remove the facilities placed on said poles by Licensee, transfer them to substituted poles or perform any other work in connection with said facilities that may be required in the maintenance, replacement, removal or relocation of said poles, the facilities thereon or which may be placed thereon, or for the service needs of Licensor; and Licensee shall, on demand, reimburse Licensor for the expense thereby incurred.
7. Licensor reserves the right to maintain or to discontinue the use of any poles it owns, and to operate its facilities in such manner as will best enable it to fulfill its respective service requirements. It shall not be liable to Licensee, its customers, or any other, for any interruption to service of Licensee or for interference with the operator of Licensee's equipment arising in any manner out of the use or discontinuance of such poles hereunder. Whenever possible, thirty (30) days' notice shall be given the Licensee prior to any move or discontinuance of any pole or poles.
8. Licensor, because of the importance of its common carrier services, reserves the right to inspect each new installation of Licensee's equipment on Licensor's poles and to make periodic inspections of the entire plant of Licensee; and Licensee shall, on demand, reimburse Licensor for the reasonable expense of such inspections. The making of such inspections or the omission thereof shall not operate to relieve Licensee or Licensee's insurer of any responsibility, obligation or liability assumed under this Agreement.

9. Licensee shall exercise special precautions to avoid causing damage to facilities of Licensor and others located on Licensor's poles and to equipment connected or associated with such facilities, and in the event any such damage occurs, Licensee assumes all responsibility for, and agrees promptly to reimburse Licensor and the other users of Licensor's poles in full for all loss and expense occasioned by such damage. Licensee shall make an immediate report to Licensor of the occurrence of any such damage.
10. Licensee shall submit to Licensor evidence, satisfactory to Licensor, of Licensee's authority to erect and maintain its equipment within public streets, highways, alleys and other thoroughfares and shall secure any necessary consent from Federal, state, municipal, or other public authorities, or from the owners of private lands and property involved, to construct and maintain Licensee's equipment at the locations of Licensor's poles which it desires to use. Licensee shall indemnify and reimburse Licensor for all loss and expense which result from any claims of governmental bodies or others that either Licensee or Licensor has not a sufficient right or authority for placing and maintaining Licensee's equipment at the locations of the Licensor's poles.
11. Licensee shall indemnify, protect, save harmless, and insure Licensor from and against any and all claims and demands for damages to property and injury or death to persons, including payments made under any Workmans' Compensation Law or under any plan for employees' disability and death benefits, and including all expenses incurred in defending any such claims or demands, which may arise out of or be caused by the erection, maintenance, presence, use, rearrangement or removal of the attachments of Licensee's equipment to Licensor's poles, or which may result by reason of the proximity of the cables, wires, equipment, apparatus and appliances of Licensee to the poles of Licensor, or by reason of any negligence of Licensee on or in the vicinity of Licensor's poles notwithstanding any negligence of Licensor or others lawfully using said Licensor's poles. Without limiting the foregoing, it is the general intent of Licensor and Licensee that Licensee shall save Licensor harmless from any liability or risk arising out of or in any manner connected with the operation of Licensee's business or with the operation of Licensee's business or with the

operation of Licensee's business or with the facilities of Licensee installed hereunder whether or not due in whole or in part to any act, omission, or negligence of Licensor. It is not the intent of Licensor or Licensee that Licensee shall assume any liability of Licensor that does not arise out of or is not connected with the operation of Licensee's business or with the installation, operation, maintenance, presence, use, rearrangement or removal of Licensee's facilities.

Without limiting the scope or extent of the protection afforded Licensor or the liabilities assumed by Licensee herein, Licensee shall obtain and maintain in effect at its own expense for the entire life of this Agreement, the following insurance:

- (a) Workmen's Compensation Insurance with statutory limits and employers liability insurance with limits of not less than One Hundred Thousand Dollars (\$100,000.00). Prior to making any attachments to Licensor's poles, Licensee shall furnish Licensor with a certificate from an insurance carrier acceptable to Licensor stating that policies of insurance have been issued by it to Licensee providing for the insurance coverage listed above and that such policies are in force. Such certificates shall state that the insurance carrier will give Licensor thirty (30) days' prior written notice of any cancellation or material change in policies. Failure to maintain such insurance at any time shall constitute a default of this Agreement but shall not relieve the Licensee from any liabilities assumed under this Agreement.
12. In the event Licensee should make any attachments to Licensor's poles without first having received and accepted a permit as provided in Paragraph 2 hereof, the Licensor shall have the right to summarily and without notice to Licensee, remove such attachments at the cost and expense of Licensee and without any liability therefor.
 13. Should Licensee sell or lease the use of its facilities on Licensor's poles without the prior consent in writing of the Licensor as provided for in Section 4 hereof, such action shall constitute forthwith a breach of this Agreement, and Licensor may, at its option, at any time after such breach occurs, forthwith terminate Licensee's attachment rights under this Agreement and require Licensee to

- remove at once all of Licensee's equipment from Licensor's poles. If Licensee does not so remove the equipment, Licensor shall have the right to remove it at the cost and expense of Licensee.
14. Should Licensee for any reason cease to furnish the services authorized by its franchise, which this Agreement is designed to facilitate, then and in that event all of Licensee's rights under this Agreement shall automatically terminate and Licensee shall immediately remove its equipment from all of Licensor's poles and if not so removed, Licensor shall have the right to remove it at the cost and expense of Licensee.
 15. Licensee may at any time remove its equipment from any poles of Licensor, and shall give Licensor written notice of removal as provided in the appendix attached hereto and made a part hereof. No adjustment prorated or refund of any rental will be due on account of such removal. Should Licensee thereafter again wish to make attachments to such pole or poles, it shall make application and receive a permit therefor, as provided in Paragraph 2 hereof.
 16. No use, however extended, of Licensor's poles, or any payments made under this Agreement or other action of Licensee shall create or vest in Licensee any ownership or property rights in Licensor's poles or associated equipment, but Licensee's right therein shall be and remain such as established a mere license under the terms of this Agreement.
 17. Nothing herein contained shall be construed as affecting the rights or privileges previously granted by Licensor, by contract or otherwise, to others not parties to this Agreement, to use any poles covered by this Agreement; and Licensor retains the right to continue and extend such rights or privileges. The attachment privileges herein granted shall at all times be subject to such existing contracts and arrangements. Nothing herein contained shall be construed as affecting or limiting the right of Licensor to make other and additional contracts with other persons, firms, corporations or associations for the joint use of Licensor's poles and facilities.

18. Bills for inspections, expenses, and other charges for work performed by Licensor or other joint users under this Agreement other than for attachment rentals shall be payable to the parties presenting such bills within thirty (30) days after presentation. Nonpayment of bills shall constitute a default of this Agreement.
19. Licensee shall furnish a surety bond in form and with sureties satisfactory to Licensor in an amount not less than \$5,000 for each 1,000 poles attached or fraction thereof to guarantee the payment of any sums which may become due to Licensor for rentals, inspection fees, or for any work performed or expense incurred by Licensor or other joint users under the terms of this Agreement including the removal of Licensee's equipment upon termination of its attachment rights under this Agreement.
20. If Licensee shall fail to comply with any of the provisions of this Agreements, including the specifications herein before referred to, or shall default in any of its obligations under the terms hereof or breach this Agreement and shall fail within ten (10) days after or breach, Licensor may, at its option, forthwith terminate in whole or in part Licensee's attachment rights hereunder, provided, however, that nothing in this section shall affect the provisions and obligations agreed upon in Sections 14 and 15 hereof. Upon such termination, Licensee shall immediately remove its equipment from the pole or poles involved and if not so removed, Licensor shall have the right to remove it at the cost and expense of Licensee.
21. This Agreement shall become effective upon the date hereof, and if the attachment rights are not terminated in accordance with the provisions of other sections of this agreement which provide for such terminations, shall remain in effect for a term of five (5) years from said date and from year to year thereafter subject to the right of either party hereto to terminate this Agreement at any time following the initial term by giving to the other party at least ninety (90) days' prior written notice of said party's desire to terminate this Agreement, in which case this Agreement shall terminate on the date specified but in no event within less than ninety (90) days, Within thirty (30) days after the termination of this Agreement, as provided in this section, Licensee shall remove Licensee's equipment from Licensor's poles.

- 26. The Appendix attached to and made a part of this Agreement covers construction and operating practices to be observed by the parties hereto. Said practices may be revised by the parties hereto from time to time as changes in operating conditions and experience warrant. Such revisions which do not conflict with the provisions of this Agreement shall be effective when transmitted to the Licensee in writing by the General Plant Manager of the Telephone Company.
- 27. Subject to the provisions of Paragraph 25 hereof, this Agreement shall extend and bind the successors and assigns of the parties hereto.
- 28. If, within one year from the effective date of this Agreement, attachments of Licensee's facilities have not been made to at least 100 poles of Licensor, then, at the option of the Licensor, this Agreement may be terminated forthwith in its entirety. Licensor may exercise its option to terminate this Agreement at any time after the expiration of said one-year period by notifying Licensee in writing of Licensor's election to terminate. In the event of said termination, Licensee shall remove promptly all attachments of its facilities theretofore made to Licensor's poles, and if Licensee fails to so remove them, Licensor may remove them at the cost and expense of the Licensee.

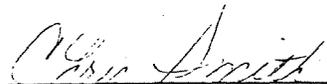

IN WITNESS WHEREOF, the parties hereto have, respectively, caused this Agreement to be duly executed the day and year first above written.

APPENDIX

1. Application and Permit for Attachments

- (a) The Licensee shall prepare an application-permit on the form marked Exhibit (A), attached hereto and made a part hereof, when applying for permission to make attachments to any pole or poles owned by Licensor. The original and three copies of the application-permit form shall be forwarded to Licensor as far in advance of construction as possible. The information provided on said form shall show the location of poles with respect to streets, alleys, addresses and other geographical markings with sufficient accuracy that the exact location and ownership of the poles can be readily determined. The application shall be reviewed and field checked by Licensor, and an estimate shall be made by each party of its nonbetterment cost of any rearrangements and/or pole replacements required to provide suitable space for Licensee's attachments. The ownership of the poles involved shall be determined and recorded on the form at this time.
- (b) If permission to make the proposed attachments can be granted as provided in the Agreement, Licensor shall indicate on the form the estimated nonbetterment costs of any work to be performed by Licensor and will sign it and forward the original and two copies to Licensee for further consideration.
- (c) If acceptable to Licensee, two copies of the form shall be signed and returned to Licensor. The form as thus approved shall constitute a permit for Licensee to make attachments to said pole or poles pursuant to the provisions of the Agreement. Licensor shall consider the accepted permit as its authority to proceed with the rearrangements and/or pole replacements required to provide suitable space for Licensee's attachments. Licensor will advise Licensee when the poles are ready for occupancy.
- (d) Billing for actual nonbetterment costs of plant changes, as covered by application-permit forms, will be issued as soon as practical after completion of the work. Separate billing, if any, shall be submitted directly to the Licensee by Licensor and the Licensee shall promptly reimburse it for the amount of such billing.

2. Effective Date of Attachments

- (a) The effective date of attachments to Licensor's poles for rental purposes shall be the date the permit is accepted by Licensee or the date the first attachment is made to said poles, whichever date is earliest.
- (b) Licensee shall not attach poles covered by this Agreement unless an application-permit form has been fully executed except in special cases where verbal permission may be granted. Such attachments, in all cases, shall be subsequently covered by an application-permit form for record purposes.

3. Termination of Attachments by Licensee

- (a) When all of Licensee's attachments have been removed from a pole or group of poles, Licensee shall prepare a notice of removal on the form marked Exhibit (B), attached hereto and made a part hereof, and forward the original and two copies thereof to Licensor. The information provided on this form should show the location of the poles involved with respect to streets, alleys, addresses and other suitable geographical markings with sufficient accuracy that the exact location and ownership of the poles can be determined.
- (b) Licensor shall determine the ownership of the vacated poles and records said information on the form before signing it and returning the original to the Licensee.

4. Billing for Pole Rentals

- (a) A tabulation of the poles on which the Licensee has attachments as of January 1st and July 1st shall be made by Licensor in cooperation with the Licensee each year this Agreement remains in effect. This tabulation shall include all poles covered by accepted permits plus any poles not covered by accepted permits on which Licensee's attachments are discovered by Licensor in connection with routine inspections of Licensee's facilities.
- (b) The pole attachment records to be maintained by Licensor and the Licensee shall be verified from time to time by means of a complete field check of Licensee's pole attachments which shall be made jointly by Licensor and the Licensee at least once every three years.
- (c) Billing for pole rentals shall be rendered to the Licensee semi-annually.

as of January 1st and July 1st from a billing summary to be prepared by Licensor and approved by the Licensee. The summary shall be based on the joint tabulation of poles attached by Licensee provided for in item (a) above and shall indicate the ownership of such poles.

5. Construction and Maintenance of Attachments

- (a) Licensee's attachments shall be installed, maintained and removed in accordance with the requirements of the National Electric Safety Code, Sixth Edition, or the requirements of any state or local authority having jurisdiction, whichever may be more stringent. All attachments shall be placed within the space and at the location designated by Licensor.
- (b) Drawings marked Exhibits 1 to 8, inclusive, attached to this Appendix, are descriptive of the construction required under some typical conditions where span lengths do not exceed one hundred fifty (150) feet and the voltage of the power conductors does not exceed fifteen thousand (15,000) volts to ground.

AGREEMENT

THIS AGREEMENT, made this 5th day of May, 1972, by and between Kentucky Telephone Company, a corporation of the State of Kentucky, having its principal State of business office in the City of London, hereinafter called Licensor, a party of the first part, and C & W Cable, Inc., a corporation of the State of Kentucky, hereinafter called Licensee, party of the second part.

WITNESSETH:

WHEREAS, Licensee proposes to furnish community antenna television service to persons residing in the City of Clay County and vicinity, pursuant to Licensee's authority under a certain franchise granted to it on the 1st day of January, 1967, by the County of Clay of the City of Manchester, and in connection therewith will need to erect and maintain aerial cables, wires, and associated appliances throughout the area to be served, and desires to attach such cables, wires and appliances to poles of Licensor; and

WHEREAS, Licensor is willing to permit, to the extent that it may lawfully do so, the attachment of said cables, wires and appliances to Licensor's poles for the purposes authorized by Licensee's franchise where in its judgment such use will not interfere with its own service requirements or the service requirements of others using such poles, including considerations of economy and safety;

NOW THEREFORE, in consideration of the mutual covenants, terms and conditions herein contained, the parties hereto do hereby mutually covenant and agree as follows:

1. As used in this Agreement, certain terms listed below shall have the following meanings:
 - (a) "Licensor's poles" means poles owned by Licensor located in or in the immediate vicinity of Clay County.
 - (b) "Licensee's equipment" means aerial wires, cables, amplifiers, associated power supply equipment, and other transmission apparatus necessary for the proper operation of Licensee's system in the City of Clay County and vicinity

removing its attachments or shall authorize Licensor to replace said poles at the expense of Licensee, in the same manner as provided above. Licensor reserves the right to deny Licensee the use of any pole or poles where, in Licensor's judgment, the replacement or rearrangement work necessary to make space available will result in an undue interference or interruption of Licensor's service to its customers.

4. Licensee hereby agrees not to sell or lease the use of its facilities on Licensor's poles, or any portion thereof, without the prior consent in writing of the Licensor.
5. Licensee's equipment, in each and every location (including all equipment which is not attached to Licensor's poles, but which in any way may result in excessive or improper voltages or current being impressed upon any facilities of Licensor or in any hazard to Licensor's facilities or employees or to the public), shall be erected, installed, maintained and removed in accordance with the requirements and specifications of the National Electric Safety Code, Sixth Edition, or any revisions thereof, and in compliance with any applicable rules, regulations or orders now in effect or hereafter issued by any Federal or State commission or any other public authority having jurisdiction. Drawings marked Exhibits 1 to 8, inclusive, included in the Appendix attached hereto and made a part thereof, are descriptive of required construction under some typical conditions where span lengths are not over one hundred fifty (150) feet and the voltage of the power conductors does not exceed fifteen thousand (15,000) volts to ground. All attachments of Licensee shall be placed within the space and at the location designated by the Licensor. All bonding that may be required under the terms of this Agreement including Exhibits 1 through 8 will be performed as follows:
Licensee will furnish the bond and attach the same to its cable and Licensor will then attach the bond to its cable. Licensor and Licensee agree to cooperate in scheduling such work so that it may be performed as expeditiously as possible. Licensee shall, on demand, reimburse Licensor for its expense incurred in performing such work. Licensor will, upon request, provide Licensee with a written estimate of its charges for performing such bonding prior to commencing work.

6. Licensee shall, at its own expense, make and maintain its attachments in safe condition and in thorough repair, and in a manner suitable to Licensor so as not to conflict with the use of said poles by Licensor or by others, or interfere with the working use of facilities thereon or which may from time to time be placed thereon by Licensor and other joint users. Licensee shall at any time, at its own expense, upon notice from Licensor, relocate, replace or remove its facilities placed on said poles, and transfer them to substituted poles, or perform any other work in connection with said facilities that may be required by Licensor; provided, however, that in cases of emergency (Licensor's judgement as to what constitutes an emergency to be accepted by Licensee as conclusive), Licensor may arrange to relocate, replace or remove the facilities placed on said poles by Licensee, transfer them to substituted poles or perform any other work in connection with said facilities that may be required in the maintenance, replacement, removal or relocation of said poles, the facilities thereon or which may be placed thereon, or for the service needs of Licensor; and Licensee shall, on demand, reimburse Licensor for the expense thereby incurred.
7. Licensor reserves the right to maintain or to discontinue the use of any poles it owns, and to operate its facilities in such manner as will best enable it to fulfill its respective service requirements. It shall not be liable to Licensee, its customers, or any other, for any interruption to service of Licensee or for interference with the operator of Licensee's equipment arising in any manner out of the use or discontinuance of such poles hereunder. Whenever possible, thirty (30) days' notice shall be given the Licensee prior to any move or discontinuance of any pole or poles.
8. Licensor, because of the importance of its common carrier services, reserves the right to inspect each new installation of Licensee's equipment on Licensor's poles and to make periodic inspections of the entire plant of Licensee; and Licensee shall, on demand, reimburse Licensor for the reasonable expense of such inspections. The making of such inspections or the omission thereof shall not operate to relieve Licensee or Licensee's insurer of any responsibility, obligation or liability assumed under this Agreement.

9. Licensee shall pay to Licensor, for attachments made to the Licensor's poles under this Agreement, a rental at the rate of \$ [REDACTED] per pole per year. Said rental shall be payable semi-annually in advance on the fifteenth day of January and July of each year during which this Agreement remains in effect. Semi-annual rental payments shall be based on the number of poles on which Licensee has attachments on the first day of the month in which said rentals are payable. The number of poles attached by Licensee shall be mutually determined by the parties in the manner specified in the Appendix attached hereto and made a part hereof. At the end of the first five-year period, and of every two-year period thereafter during the term of this Agreement, at the request of either party, the parties hereto shall review and may adjust the pole rental in accordance with then existing economic conditions which might require such adjustment in order to maintain a fair fee for the ensuing term. If agreement cannot be reached as to an adjusted fee, either party can terminate this Agreement upon twelve (12) months' advance notice.

10. Licensee shall exercise special precautions to avoid causing damage to facilities of Licensor and others located on Licensor's poles and to equipment connected or associated with such facilities, and in the event any such damage occurs, Licensee assumes all responsibility for, and agrees promptly to reimburse Licensor and the other users of Licensor's poles in full for all loss and expense occasioned by such damage. Licensee shall make an immediate report to Licensor of the occurrence of any such damage.

11. Licensee shall submit to Licensor evidence, satisfactory to Licensor, of Licensee's authority to erect and maintain its equipment within public streets, highways, alleys and other thoroughfares and shall secure any necessary consent from Federal, state, municipal, or other public authorities, or from the owners of private lands and property involved, to construct and maintain Licensee's equipment at the locations of Licensor's poles which it desires to use. Licensee shall indemnify and reimburse Licensor for all loss and expense which result from any claims of governmental bodies or others that either Licensee or Licensor has not a sufficient right or authority for placing and

maintaining Licensee's equipment at the locations of the Licensor's poles.

12. Licensee shall indemnify, protect, save harmless, and insure Licensor from and against any and all claims and demands for damages to property and injury or death to persons, including payments made under any Workmans' Compensation Law or under any plan for employees' disability and death benefits, and including all expenses incurred in defending any such claims or demands, which may arise out of or be caused by the erection, maintenance, presence, use, rearrangement or removal of the attachments of Licensee's equipment to Licensor's poles, or which may result by reason of the proximity of the cables, wires, equipment, apparatus and appliances of Licensee to the poles of Licensor, or by reason of any negligence of Licensee on or in the vicinity of Licensor's poles notwithstanding any negligence of Licensor or others lawfully using said Licensor's poles. Without limiting the foregoing, it is the general intent of Licensor and Licensee that Licensee shall save Licensee harmless from any liability or risk arising out of or in any manner connected with the operation of Licensee's business or with the operation of Licensee's business or with the facilities of Licensee installed hereunder whether or not due in whole or in part to any act, omission, or negligence of Licensor. It is not the intent of Licensor or Licensee that Licensee shall assume any liability of Licensor that does not arise out of or is not connected with the operation of Licensee's business or with the installation, operation, maintenance, presence, use, rearrangement or removal of Licensee's facilities.

Without limiting the scope or extent of the protection afforded Licensor or the liabilities assumed by Licensee herein, Licensee shall obtain and maintain in effect at its own expense for the entire life of this Agreement, the following insurance:

- (a) General liability insurance on the premises and operations covered by this Agreement and specifically including contractual liability insurance to cover the liability assumed by Licensee under the agreement of indemnity set forth in Paragraph 12 hereof, all with limits of not less than Two Hundred Thousand Dollars (\$200,000.00) as to any one person and Five Hundred Thousand Dollars (\$500,000.00)

as to any one accident with respect to bodily injury, including death, and with limits of One Hundred Thousand Dollars (\$100,000.00) as to any one accident and Three Hundred Thousand Dollars (\$300,000.00) in the aggregate with respect to property damage; and

(b) Workmen's Compensation Insurance with statutory limits and employers liability insurance with limits of not less than One Hundred Thousand Dollars (\$100,000.00).

Prior to making any attachments to Licensor's poles, Licensee shall furnish Licensor with a certificate from an insurance carrier acceptable to Licensor stating that policies of insurance have been issued by it to Licensee providing for the insurance coverage listed above and that such policies are in force. Such certificates shall state that the insurance carrier will give Licensor thirty (30) days' prior written notice of any cancellation or material change in policies. Failure to maintain such insurance at any time shall constitute a default of this Agreement but shall not relieve the Licensee from any liabilities assumed under this Agreement.

- 13. In the event Licensee should make any attachments to Licensor's poles without first having received and accepted a permit as provided in Paragraph 2 hereof, the Licensor shall have the right to summarily and without notice to Licensee, remove such attachments at the cost and expense of Licensee and without any liability therefor.
- 14. Should Licensee sell or lease the use of its facilities on Licensor's poles without the prior consent in writing of the Licensor as provided for in Section 4 hereof, such action shall constitute forthwith a breach of this Agreement, and Licensor may, at its option, at any time after such breach occurs, forthwith terminate Licensee's attachment rights under this Agreement and require Licensee to remove at once all of Licensee's equipment from Licensor's poles. If Licensee does not so remove the equipment, Licensor shall have the right to remove it at the cost and expense of Licensee.
- 15. Should Licensee for any reason cease to furnish the services authorized by its franchise, which this Agreement is designed to

facilitate, then and in that event all of Licensee's rights under this Agreement shall automatically terminate and Licensee shall immediately remove its equipment from all of Licensor's poles and if not so removed, Licensor shall have the right to remove it at the cost and expense of Licensee.

- 16. Licensee may at any time remove its equipment from any poles of Licensor, and shall give Licensor written notice of removal as provided in the appendix attached hereto and made a part hereof. No adjustment prorated or refund of any rental will be due on account of such removal. Should Licensee thereafter again wish to make attachments to such pole or poles, it shall make application and receive a permit therefor, as provided in Paragraph 2 hereof.
- 17. No use, however extended, of Licensor's poles, or any payments made under this Agreement or other action of Licensee shall create or vest in Licensee any ownership or property rights in Licensor's poles or associated equipment, but Licensee's right therein shall be and remain such as establishes a mere license under the terms of this Agreement.
- 18. Nothing herein contained shall be construed as affecting the rights or privileges previously granted by Licensor, by contract or otherwise, to others not parties to this Agreement, to use any poles covered by this Agreement; and Licensor retains the right to continue and extend such rights or privileges. The attachment privileges herein granted shall at all times be subject to such existing contracts and arrangements. Nothing herein contained shall be construed as affecting or limiting the right of Licensor to make other and additional contracts with other persons, firms, corporations or associations for the joint use of Licensor's poles and facilities.
- 19. Bills for inspections, expenses, and other charges for work performed by Licensor or other joint users under this Agreement other than for attachment rentals shall be payable to the parties presenting such bills within thirty (30) days after presentation. Nonpayment of bills shall constitute a default of this Agreement.
- 20. Licensee shall furnish a surety bond in form and with sureties satisfactory to Licensor in an amount not less than \$5,000 for each 1,000

poles attached or fraction thereof to guarantee the payment of any sums which may become due to Licensor for rentals, inspection fees, or for any work performed or expense incurred by Licensor or other joint users under the terms of this Agreement including the removal of Licensee's equipment upon termination of its attachment rights under this Agreement.

21. If Licensee shall fail to comply with any of the provisions of this Agreements, including the specifications herein before referred to, or shall default in any of its obligations under the terms hereof or breach this Agreement and shall fail within ten (10) days after or breach, Licensor may, at its option, forthwith terminate in whole or in part Licensee's attachment rights hereunder, provided, however, that nothing in this section shall affect the provisions and obligations agreed upon in Sections 14 and 15 hereof. Upon such termination, Licensee shall immediately remove its equipment from the pole or poles involved and if not so removed, Licensor shall have the right to remove it at the cost and expense of Licensee.
22. This Agreement shall become effective upon the date hereof, and if the attachment rights are not terminated in accordance with the provisions of other sections of this Agreement which provide for such terminations, shall remain in effect for a term of five (5) years from said date and from year to year thereafter subject to the right of either party hereto to terminate this Agreement at any time following the initial term by giving to the other party at least ninety (90) days' prior written notice of said party's desire to terminate this Agreement, in which case this Agreement shall terminate on the date specified but in no event within less than ninety (90) days. Within thirty (30) days after the termination of this Agreement, as provided in this section, Licensee shall remove Licensee's equipment from Licensor's poles. If not removed within thirty (30) days after the termination date, Licensor shall have the right to remove all of Licensee's equipment remaining attached to Licensor's poles at the cost and expense of Licensee without any liability therefor.
23. Upon termination of this Agreement by either party as provided in Paragraph 22, the pole rental for the contract year in which Licensee's equipment is removed from Licensor's poles shall be adjusted and

- prorated as of the date of such removal. In all other instances where Licensee's permit or right to attach its equipment to Licensor's pole or poles is terminated as provided in this Agreement, no adjustment or prorate of the pole rental shall be made.
24. Should Licensor under any sections of this Agreement remove Licensee's equipment from Licensor's poles, Licensor will deliver to Licensee the equipment so removed upon payment by Licensee of the cost of removal, storage and delivery, and all other amounts due Licensor hereunder.
25. This Agreement shall not inure to the successors of Licensee nor shall Licensee assign, transfer, or sublet the privileges hereby granted without the prior consent in writing of Licensor. Licensee agrees that it will not grant, sell, rent, loan, or lease to others for any period of time the use of all or any part of Licensee's equipment while attached to Licensor's poles. The parties do not intend by Paragraph 22 of this Agreement to in any manner impair the ability of the Licensee to procure financing through normal accepted channels, and the parties expressly agree that nothing contained in said Paragraph is intended to limit or restrict or impair Licensee's right to execute any mortgage or security agreement covering all or any part of its equipment whether attached to Licensee's poles or otherwise.
26. Failure of Licensor to enforce or insist upon compliance with any of the terms or conditions of this Agreement or to give notice or declare this Agreement or the attachment rights hereunder terminated shall not constitute a general waiver or relinquishment of any terms or conditions of the Agreement but the same shall be and remain at all times in full force and effect.
27. The Appendix attached to and made a part of this Agreement covers construction and operating practices to be observed by the parties hereto. Said practices may be revised by the parties hereto from time to time as changes in operating conditions and experience warrant. Such revisions which do not conflict with the provisions of this Agreement shall be effective when transmitted to the Licensee in writing by the General Plant Manager of the Telephone Company.

- 28. Subject to the provisions of Paragraph 25 hereof, this Agreement shall extend and bind the successors and assigns of the parties hereto.
- 29. If, within one year from the effective date of this Agreement, attachments of Licensee's facilities have not been made to at least 10 poles of Licensor, then, at the option of the Licensor, this Agreement may be terminated forthwith in its entirety. Licensor may exercise its option to terminate this Agreement at any time after the expiration of said one-year period by notifying Licensee in writing of Licensor's election to terminate. In the event of said termination, Licensee shall remove promptly all attachments of its facilities theretofore made to Licensor's poles, and if Licensee fails to so remove them, Licensor may remove them at the cost and expense of the Licensee.

IN WITNESS WHEREOF, the parties hereto have, respectively, caused this Agreement to be duly executed the day and year first above written.

1. Application and Permit for Attachments

- (a) The Licensee shall prepare an application-permit on the form marked Exhibit (A), attached hereto and made a part hereof, when applying for permission to make attachments to any pole or poles owned by Licensor. The original and three copies of the application-permit form shall be forwarded to Licensor as far in advance of construction as possible. The information provided on said form shall show the location of poles with respect to streets, alleys, addresses and other geographical markings with sufficient accuracy that the exact location and ownership of the poles can be readily determined. The application shall be reviewed and field checked by Licensor, and an estimate shall be made by each party of its nonbetterment cost of any rearrangements and/or pole replacements required to provide suitable space for Licensee's attachments. The ownership of the poles involved shall be determined and recorded on the form at this time.
- (b) If permission to make the proposed attachments can be granted as provided in the Agreement, Licensor shall indicate on the form the estimated nonbetterment costs of any work to be performed by Licensor and will sign it and forward the original and two copies to Licensee for further consideration.
- (c) If acceptable to Licensee, two copies of the form shall be signed and returned to Licensor. The form as thus approved shall constitute a permit for Licensee to make attachments to said pole or poles pursuant to the provisions of the Agreement. Licensor shall consider the accepted permit as its authority to proceed with the rearrangements and/or pole replacements required to provide suitable space for Licensee's attachments. Licensor will advise Licensee when the poles are read for occupancy.
- (d) Billing for actual nonbetterment costs of plant changes, as covered by application-permit forms, will be issued as soon as practical after completion of the work. Separate billing, if any, shall be submitted directly to the Licensee by Licensor and the Licensee shall promptly reimburse it for the amount of such billing.

2. Effective Date of Attachments

- (a) The effective date of attachments to Licensor's poles for rental purposes shall be the date the permit is accepted by Licensee or the date the first attachment is made to said poles, whichever date is earliest.
- (b) Licensee shall not attach poles covered by this Agreement unless an application-permit form has been fully executed except in special cases where verbal permission may be granted. Such attachments, in all cases, shall be subsequently covered by an application-permit form for record purposes.

3. Termination of Attachments by Licensee

- (a) When all of Licensee's attachments have been removed from a pole or group of poles, Licensee shall prepare a notice of removal on the form marked Exhibit (B), attached hereto and made a part hereof, and forward the original and two copies thereof to Licensor. The information provided on this form should show the location of the poles involved with respect to streets, alleys, addresses and other suitable geographical markings with sufficient accuracy that the exact location and ownership of the poles can be determined.
- (b) Licensor shall determine the ownership of the vacated poles and records said information on the form before signing it and returning the original to the Licensee.

4. Billing for Pole Rentals

- (a) A tabulation of the poles on which the Licensee has attachments as of January 1st and July 1st shall be made by Licensor in cooperation with the Licensee each year this Agreement remains in effect. This tabulation shall include all poles covered by accepted permits plus any poles not covered by accepted permits on which Licensee's attachments are discovered by Licensor in connection with routine inspections of Licensee's facilities.
- (b) The pole attachment records to be maintained by Licensor and the Licensee shall be verified from time to time by means of a complete field check of Licensee's pole attachments which shall be made jointly by Licensor and the Licensee at least once every three years.
- (c) Billing for pole rentals shall be rendered to the Licensee semi-annually

as of January 1st and July 1st from a billing summary to be prepared by Licensor and approved by the Licensee. The summary shall be based on the joint tabulation of poles attached by Licensee provided for in item (a) above and shall indicate the ownership of such poles.

5. Construction and Maintenance of Attachments

- (a) Licensee's attachments shall be installed, maintained and removed in accordance with the requirements of the National Electric Safety Code, Sixth Edition, or the requirements of any state or local authority having jurisdiction, whichever may be more stringent. All attachments shall be placed within the space and at the location designated by Licensor.
- (b) Drawings marked Exhibits 1 to 8, inclusive, attached to this Appendix, are descriptive of the construction required under some typical conditions where span lengths do not exceed one hundred fifty (150) feet and the voltage of the power conductors does not exceed fifteen thousand (15,000) volts to ground.

Re: Agreement between Kentucky Telephone Company and C & W Cable, Inc., dated 5/5/72 (the "Agreement")

Dear Sir or Madam:

On October 31, 2001, Verizon South Inc. ("Verizon") entered into a definitive agreement (the "Purchase Agreement") with Kentucky ALLTEL, Inc., a subsidiary of ALLTEL Corporation ("ALLTEL"). Under the terms of the Purchase Agreement Verizon will transfer to ALLTEL certain telephone operations and related assets located in Kentucky (the "Transaction"). The above referenced Agreement is one of the assets to be transferred as a part of the Transaction.

Until the closing of the Transaction, Verizon will continue to operate in the current manner and will continue to be responsible to perform those obligations under the Agreement that arise prior to the transfer to ALLTEL. Upon Closing of the Transaction, ALLTEL will be assigned all of Verizon's rights and obligations under the Agreement, to the extent such obligations arise after the closing date.

By this letter, Verizon is requesting your consent to the assignment of the Agreement to ALLTEL as a part of the Transaction. Please indicate your consent by executing the letter where indicated in the space provided below and returning it in the enclosed pre-paid envelope at your earliest convenience, but by no later than **February 21, 2002**. The enclosed copy should be retained for your records. By consenting to the assignment of the Agreement you also agree that, after the closing of the Transaction, Verizon will have no further obligations to you under the Agreement, and that ALLTEL shall be responsible for all obligations thereunder after the closing.

Your consent will remain effective through the closing of the Transaction. You will be contacted by ALLTEL who will advise you of the closing date and the new contact information.

ORIGINAL CATV CONTRACT

REVISED SEPTEMBER 22, 1988

BY JAMES C. PAINTER, SR.

WIN1768

REVISED SEPTEMBER 1988

AGREEMENT

THIS AGREEMENT, made this 16th day of APRIL, 19 92,
by and between CONTEL OF KENTUCKY, INC. a corporation of the State of KENTUCKY,
having its principal State of Business office in the City of London, hereinafter
called Licensor, a party of the first part, and TELE-MEDIA CABLE COMPANY a
corporation of the State of KENTUCKY, hereinafter called Licensee,
party of the second party.

WITNESSETH:

WHEREAS, Licensee proposes to furnish Community Antenna Television service to
persons residing in BARBOURVILLE and vicinity, pursuant to Licensee's
authority under a certain franchise granted to it on the 16th day of
APRIL, 19 92, by the JUDGE EXECUTIVE of the City
of BARBOURVILLE and in connection therewith will need to erect and
maintain aerial cables, wires, and associated appliances throughout the area to
be served, and desires to attach such cables, wires and appliances to poles of
Licensor: and

WHEREAS, Licensor is willing to permit, to the extent that it may lawfully
do so, the attachment of said cables, wires and appliances to Licensor's poles for
the purposes authorized by Licensee's franchise where in its judgement such use
will not interfere with its own service requirements or the service requirements
of others using such poles, including considerations of economy and safety;

NOW THEREFORE, in consideration of the mutual covenants, terms and conditions
herein contained, the parties hereto do hereby mutually covenant and agree as follows:

1. As used in this Agreement, certain terms listed below shall have the
following meanings:

(a) "Licensor's poles" means poles owned by Licensor located in the
immediate vicinity of BARBOURVILLE "KAY JAY"

WIN1769

- (b) "Licensee's equipment" means aerial wires, cables, amplifiers, associated power supply equipment, and other transmission apparatus necessary for the proper operation of Licensee's system in BARBOURVILLE "KAY JAY" and vicinity in accord with the authority granted to Licensee by its franchise.
2. Before attaching to Licensor's poles, Licensee shall make application and receive a permit therefor on the form provided in the Appendix attached hereto and made a part thereof. If Licensee accepts the permit, it may attach to the poles covered by said permit subject to the terms and conditions of this Agreement. In granting or denying a permit, Licensor reserves the right to determine whether a grant would adversely affect its common carrier communication services and its ability to meet its duties and obligations with respect thereto, including questions of economy, safety and future needs of Licensor and other joint users.
3. If Licensor's pole or poles are inadequate to support Licensee's proposed attachments in accordance with the specifications referred to in Section 5 hereof, and Licensor is willing to replace such poles to permit the attachment of Licensee's equipment thereto, Licensor shall indicate on the application permit form the changes necessary and the estimated nonbetterment costs thereof and return said form to Licensee. If Licensee still desires to make the attachments and returns the form marked so to indicate, Licensor will replace such inadequate poles and Licensee will on demand reimburse Licensor and other joint users for the nonbetterment portion of the cost and expense thereof, including the increased cost of larger poles, sacrificed life value of poles removed, cost of removal less any salvage recovery and the expense of transferring existing facilities from the old to the new poles. Where Licensee's attachments are accommodated on existing poles by

demand compensate Licensor and owners of said facilities for the expense incurred in rearranging their respective facilities. Licensee will also on demand reimburse Licensor for any strengthening of poles by guys, anchors or other means, to accomodate the attachment of Licensee's equipment. Should Licensor at any time require the space occupied by Licensee's attachments on poles which have not been replaced at Licensee's expense, Licensor shall give notice to Licensee and Licensee shall either vacate the space by removing its attachments or shall authorize Licensor to replace said poles at the expense of Licensee, in the same manner as provided above. Licensor reserves the right to deny Licensee the use of any pole or poles where, in Licensor's judgment, the replacement or rearrangement work necessary to make space available will result in an undue interference or interruption of Licensor's services to its customers.

4. Licensee hereby agrees not to sell or lease the use of its facilities or Licensor's poles, or any portion thereof, without the prior consent in writing of the Licensor.
5. Licensee's equipment, in each and every location (including all equipment which is not attached to Licensor's poles, but which in any way may result in excessive or improper voltages or current being impressed upon any facilities of Licensor or in any hazard to Licensor's facilities or employees or to the public), shall be erected, installed, maintained and removed in accordance with the requirements and specifications of the National Electric Safety Code, Sixth Edition, or any revisions thereof, and in compliance with any applicable rules, regulations or orders now in effect or hereafter issued by any Federal or State commission or any other public authority having jurisdiction. Drawings marked Exhibits 1 to 3, inclusive, included in the Appendix attached hereto and made a part thereof, are descriptive of required construction under some ~~WINP~~ 771

conditions where span lengths are not over one hundred fifty (150) feet and the voltage of the power conductors does not exceed fifteen thousand (15,000) volts to ground. All attachments of Licensee shall be placed within the space and at the location designated by the Licensor. All bonding that may be required under the terms of this agreement including Exhibits 1 through 3 will be performed as follows:

Licensee will furnish the bond and attach the same to its cable and Licensor will then attach the bond to its cable. Licensor and Licensee agree to cooperate in scheduling such work so that it may be performed as expeditiously as possible. Licensee shall on demand, reimburse Licensor for its expense incurred in performing such work. Licensor will, upon request, provide Licensee with a written estimate of its charges for performing such bonding prior to commencing work.

6. Licensee shall, at its own expense, make and maintain its attachments in safe condition and in thorough repair, and in a manner suitable to Licensor so as not to conflict with the use of said poles by Licensor or by others, or interfere with the working use of facilities thereon or which may from time to time be placed thereon by Licensor and other joint users. Licensee shall at any time, at its own expense, upon notice from Licensor, relocate, replace or remove its facilities placed on said poles, and transfer them to substituted poles, or perform any work in connection with said facilities that may be required by Licensor; provided, however, that in cases of emergency (Licensor's judgement as to what constitutes an emergency to be accepted by Licensee as conclusive), Licensor may ~~arrange to relocate, replace or remove the facilities placed on said poles~~ by Licensee, transfer them to substituted poles or perform any other work in connection with said facilities that may be required in the maintenance, replacement, removal or relocation of said poles, the facilities thereon

or which may be placed thereon, or for the service needs of Licensor; and Licensee shall, on demand, reimburse Licensor for the expense thereby incurred.

7. Licensor reserves the right to maintain or to discontinue the use of any poles it owns, and to operate its facilities in such manner as will best enable it to fulfill its respective service requirements. It shall not be liable to Licensee, its customers, or any other, for any interruption to service of Licensee or for interference with the operator of Licensee's equipment arising in any manner out of the use or discontinuance of such poles hereunder. Whenever possible, thirty (30) days' notice shall be given the Licensee prior to any move or discontinuance of any pole or poles.
8. Licensor, because of the importance of its common carrier services, reserves the right to inspect each new installation of Licensee's equipment on Licensor's poles and to make periodic inspections of the entire plant of Licensee; and Licensee shall, on demand, reimburse Licensor for the reasonable expense of such inspections. The making of such inspections or the omission thereof shall not operate to relieve Licensee or Licensee's insurer of any responsibility, obligation or liability assumed under this Agreement.
9. Licensee shall exercise special precautions to avoid causing damage to facilities of Licensor and others located on Licensor's poles and to equipment connected or associated with such facilities, and in the event any such damage occurs, Licensee assumes all responsibility for, and agrees promptly to reimburse Licensor and the other users of Licensor's poles full for all loss and expense occasioned by such damage. Licensee shall make an immediate report to Licensor of the occurrence of any such damage.
10. Licensee shall submit to Licensor evidence, satisfactory to Licensor, of Licensee's authority to erect and maintain its equipment within public

streets, highways, alleys and other thorough-fares and shall secure any necessary consent from Federal, State, Municipal, or other public authorities, or from the owners of private lands and property involved, to construct and maintain Licensee's equipment at the locations of Licensor's poles which it desires to use. Licensee shall indemnify and reimburse Licensor for all loss and expense which results from any claims of governmental bodies or others that either Licensee or Licensor has not a sufficient right or authority for placing and maintaining Licensee's equipment at the locations of the Licensor's poles.

11. Licensee shall indemnify, protect, save harmless, and insure Licensor from and against any and all claims and demands for damages to property and injury or death to persons, including payments made under any Workmans' Compensation Law or under any plan for employees' disability and death benefits, and including all expenses incurred in defending any such claims or demands, which may arise out of or be caused by the erection, maintenance, presence, use, rearrangement or removal of the attachments of Licensee's equipment to Licensor's poles, or which may result by reason of the proximity of the cables, wires, equipment, apparatus and appliances of Licensee to the poles of Licensor, or by reason of any negligence of Licensee on or in the vicinity of Licensor's poles notwithstanding any negligence of Licensor or others lawfully using said Licensor's poles. Without limiting the foregoing, it is the general intent of Licensor and Licensee that Licensee shall save Licensor harmless from any liability or risk arising out of or in any manner connected with the operation of Licensee's business or with the operation of Licensee's business or with the facilities of Licensee installed hereunder whether or not due in whole or in part to any act, omission, or negligence of Licensor.

It is not the intent of Licensor or Licensee that Licensee shall assume any

liability of Licensor that does not arise out of or is not connected with the operation of Licensee's business or with the installation, operation, maintenance, presence, use, rearrangement or removal of Licensee's facilities. Without limiting the scope or extent of the protection afforded Licensor or the liabilities assumed by Licensee herein, Licensee shall obtain and maintain in effect at its own expense for the entire life of this Agreement, the following insurance:

- (a) Workmen's Compensation Insurance with statutory limits and employers liability insurance with limits of not less than Five Hundred Thousand Dollars (\$500,000.00). Prior to making any attachments to Licensor's poles, Licensee shall furnish Licensor with a certificate from an insurance carrier acceptable to Licensor stating that policies of insurance have been issued by it to Licensee providing for the insurance coverage listed above and that such policies are in force. Such certificates shall state that the insurance carrier will give Licensor thirty (30) days' prior written notice of any cancellation or material change in policies. Failure to maintain such insurance at any time shall constitute a default of this Agreement but shall not relieve the Licensee from any liabilities assumed under this Agreement.
12. In the event Licensee should make any attachments to Licensor's poles without first having received and accepted a permit as provided in Paragraph 2 hereof, the Licensor shall have the right to summarily and without notice to Licensee, remove such attachments at the cost and expense of Licensee and without any liability therefor.
13. Should Licensee sell or lease the use of its facilities on Licensor's poles without the prior consent in writing of the Licensor as provided for in Section 4 hereof, such action shall constitute forthwith a breach of this

Agreement, and Licensor may, at its option, at any time after such breach occurs, forthwith terminate Licensee's attachment rights under this Agreement and require Licensee to remove at once all of Licensee's equipment from Licensor's poles. If Licensee does not so remove the equipment, Licensor shall have the right to remove it at the cost and expense of Licensee.

14. Should Licensee for any reason cease to furnish the services authorized by its franchise, which this Agreement is designed to facilitate, then and in that event all of Licensee's rights under this Agreement shall automatically terminate and Licensee shall immediately remove its equipment from all of Licensor's poles and if not so removed, Licensor shall have the right to remove it at the cost and expense of the Licensee.
15. Licensee may at any time remove its equipment from any poles of Licensor, and shall give Licensor written notice of removal as provided in the appendix attached hereto and made a part hereof. No adjustment prorata or refund of any rental will be due on account of such removal. Should Licensee thereafter again wish to make attachments to such pole or poles, it shall make application and receive a permit therefor, as provided in Paragraph 2 hereof.
16. No use, however extended, of Licensor's poles, or any payments made under this Agreement or other action of Licensee shall create or vest in Licensee any ownership or property rights in Licensor's poles or associated equipment, but Licensee's right therein shall be and remain such as established a mere license under the terms of this Agreement.
17. ~~Nothing herein contained shall be construed as affecting the rights or privileges previously granted by Licensor, by contract or otherwise, to others not parties of this Agreement, to use any poles covered by this Agreement;~~ and Licensor retains the right to continue and extend such rights

or privileges. The attachment privileges herein granted shall at all times be subject to such existing contracts and arrangements. Nothing herein contained shall be construed as affecting or limiting the right of Licensor to make other and additional contracts with other persons, firms, corporations or associations for the joint use of Licensor's poles and facilities.

18. Bills for inspections, expenses, and other charges for work performed by Licensor or other joint users under this Agreement other than for attachment rentals shall be payable to the parties presenting such bills within thirty (30) days after presentation. Nonpayment of bills shall constitute a default of this Agreement.
19. Licensee shall furnish a surety bond in form and with sureties satisfactory to Licensor in an amount not less than \$5,000 for each 1,000 poles attached or fraction thereof to guarantee the payment of any sums which may become due to Licensor for rentals, inspection fees, or for any work performed or expense incurred by Licensor or other joint users under the terms of this Agreement including the removal of Licensee's equipment upon termination of its attachment rights under this Agreement.
20. If Licensee shall fail to comply with any of the provisions of this Agreements, including the specifications herein before referred to, or shall default in any of its obligations under the terms hereof or breach this Agreement and shall fail within then (10) days after or breach, Licensor may, at its option, forthwith terminate in whole or in part Licensee's attachment rights hereunder, provided, however, that nothing in this section shall affect the provisions and obligations agreed upon in Sections 14 of 15 hereof. Upon such termination, Licensee shall immediately remove its equipment from the pole or poles involved and if not so removed, Licensor shall have the right to remove it at the cost and expense of
Licensee

21. This Agreement shall become effective upon the date hereof, and if the attachment rights are not terminated in accordance with the provisions of other sections of this agreement which provide for such terminations, shall remain in effect for a term of five (5) years from said date and from year to year thereafter subject to the right of either party hereto to terminate this Agreement at any time following the initial term by giving to the other party at least ninety (90) days' prior written notice of said party's desire to terminate this Agreement, in which case this Agreement shall terminate on the date specified but in no event within less than ninety (90) days, Within thirty (30) days after the termination of this Agreement, as provided in this section, Licensee shall remove Licensee's equipment from Licensor's poles.
22. The Appendix attached to and made a part of this Agreement covers construction and operating practices to be observed by the parties hereto. Said practices may be revised by the parties hereto from time to time as changes in operating conditions and experience warrant. Such revisions which do not conflict with the provisions of this Agreement shall be effective when transmitted to the Licensee in writing by the General Manager of the Telephone Company.
23. If, within one year from the effective date of this Agreement, attachments of Licensee's facilities have not been made to at least 100 poles of Licensor, then, at the option of the Licensor, this Agreement may be terminated forthwith in its entirety. Licensor may exercise its option to terminate this Agreement at any time after the expiration of said one year period by notifying Licensee in writing of Licensor's election to terminate. In the event of said termination, Licensee shall remove promptly all attachments of its facilities theretofore made to Licensor's poles, and if Licensee fails to so remove them, Licensor may remove them at the

APPENDIX

1. Application and Permit for Attachments

- (a) The Licensee shall prepare an application-permit on the form marked Exhibit (A), attached hereto and made a part hereof, when applying for permission to make attachments to any pole or poles owned by Licensor. The Original and three copies of the application-permit form shall be forwarded to Licensor as far in advance of construction as possible. The information provided on said form shall show the location of poles with respect to streets, alleys, addresses and other geographical markings with sufficient accuracy that the exact location and ownership of the poles can be readily determined. The application shall be reviewed and field checked by Licensor, and an estimate shall be made by each party of its nonbetterment cost of any rearrangements and/or pole replacements required to provide suitable space for Licensee's attachments. The ownership of the poles involved shall be determined and recorded on the form at this time.
- (b) If permission to make the proposed attachments can be granted as provided in the Agreement, Licensor shall indicate on the form the estimated nonbetterment costs of any work to be performed by Licensor and will sign it and forward the original and two copies to Licensee for future consideration.
- (c) If acceptable to Licensee, two copies of the form shall be signed and returned to Licensor. The form as thus approved shall constitute a permit for Licensee to make attachments to said pole or poles pursuant to the provisions of the Agreement. Licensor shall consider the accepted permit as its authority to proceed with the rearrangement and/or pole replacements required to provide suitable space for Licensee's attachments. Licensor will advise Licensee when the poles are ready for occupancy.

- (d) Billing for actual nonbetterment costs of plant changes, as covered by application-permit forms, will be issued as soon as practical after completion of the work. Separate billing, if any, shall be submitted directly to the Licensee by Licensor and the Licensee shall promptly reimburse it for the amount of such billing.

2. Effective Date of Attachments

- (a) The effective date of attachments to Licensor's poles for rental purposes shall be the date the permit is accepted by Licensee or the date the first attachment is made to said poles, whichever date is earliest.
- (b) Licensee shall not attach poles covered by this Agreement unless an application-permit form has been fully executed except in special cases where verbal permission may be granted. Such attachments, in all cases, shall be subsequently covered by an application-permit form for record purposes.

3. Termination of Attachments by Licensee

- (a) When all of Licensee's attachments have been removed from a pole or group of poles, Licensee shall prepare a notice of removal on the form marked Exhibit (B), attached hereto and made a part hereof, and forward the original and two copies thereof to Licensor. The information provided on this form should show the location of the poles involved with respect to streets, alleys, addresses and other suitable geographical markings with sufficient accuracy that the exact location and ownership of the poles can be determined.
- (b) Licensor shall determine the ownership of the vacated poles and records said information on the form before signing it and returning the original to the Licensee.

4. Billing for Pole Rentals

- (a) A tabulation of the poles on which shall

- January 1st and July 1st shall be made by Licensor in cooperation with the Licensee each year this Agreement remains in effect. This tabulation shall include all poles covered by accepted permits plus any poles not covered by accepted permits on which Licensee's attachments are discovered by Licensor in connection with routine inspections of Licensee's facilities.
- (b) The pole attachment records to be maintained by Licensor and the Licensee shall be verified from time to time by means of a complete field check of Licensee's pole attachments which shall be made jointly by Licensor and the Licensee at least once every three years.
 - (c) Billing for pole rentals shall be rendered to the Licensee semi-annually as of January 1st and July 1st from a billing summary to be prepared by Licensor and approved by the Licensee. The summary shall be based on the joint tabulation of poles attached by Licensee provided for in item (a) above and shall indicate the ownership of such poles.

5. Construction and Maintenance of Attachments

- (a) Licensee's attachments shall be installed, maintained and removed in accordance with the requirements of the National Electric Safety Code, 1987 Edition, or the requirements of any state or local authority having jurisdiction, whichever may be more stringent. All attachments shall be placed within the space and at the location designated by Licensor.
- (b) Drawings marked Exhibits 1 thru 3, inclusive, attached to this Appendix, are descriptive of the construction required under some typical conditions where span lengths do not exceed one hundred fifty (150) feet and the voltage of the power conductors does not exceed fifteen thousand (15,000) volts to ground.

APPLICATION - PERMIT FOR POLE ATTACHMENTS

NO. _____

AGREEMENT

THIS AGREEMENT, made this 24 th. day of January, 19 83, by and between Continental Telephone Company of Kentucky a corporation of the State of Kentucky, having its principal State of Kentucky office in the City of London, hereinafter called Licensor, a party of the first part, and Tennessee - Kentucky Cable T.V., Inc. a corporation of the State of Kentucky, hereinafter called Licensee, party of the second part.

WITNESSETH:

WHEREAS, Licensee proposes to furnish Community Antenna Television service to persons residing in Clarkson & Grayson Co. and vicinity, pursuant to Licensee's authority under a certain franchise granted to it on the 11 day of November, 19 82, by the Town Council of the City of Clarkson and in connection therewith will need to erect and maintain aerial cables, wires, and associated appliances throughout the area to be served, and desires to attach such cables, wires and appliances to poles of Licensor: and

WHEREAS, Licensor is willing to permit, to the extent that it may lawfully do so, the attachment of said cables, wires and appliances to Licensor's poles for the purposes authorized by Licensee's franchise where in its judgment such use will not interfere with its own service requirements or the service requirements of others using such poles, including considerations of economy and safety;

NOW THEREFORE, in consideration of the mutual covenants, terms and conditions herein contained, the parties hereto do hereby mutually covenant and agree as follows:

1. As used in this Agreement, certain terms listed below shall have the following meanings:
 - (a) "Licensor's poles" means pole owned by Licensor located in the immediate vicinity of Clarkson & Grayson County.
 - (b) "Licensee's equipment" means aerial wires, cables, amplifiers associated power supply equipment, and other transmission apparatus necessary for the proper operation of Licensee's system in Clarkson & Grayson County and vicinity in accord with the authority granted to Licensee by its franchise.

2. Before attaching to Licensor's poles, Licensee shall make application and receive a permit therefor on the form provided in the Appendix attached hereto and made a part thereof. If Licensee accepts the permit, it may attach to the poles covered by said permit subject to the terms and conditions of this Agreement. In granting or denying a permit, Licensor reserves the right to determine whether a grant would adversely affect its common carrier communication services and its ability to meet its duties and obligations with respect thereto, including questions of economy, safety and future needs of Licensor and other joint users.
3. If Licensor's pole or poles are inadequate to support Licensee's proposed attachments in accordance with the specifications referred to in Section 5 hereof, and Licensor is willing to replace such poles to permit the attachment of Licensee's equipment thereto, Licensor shall indicate on the application permit form the changes necessary and the estimated nonbetterment costs thereof and return said form to Licensee. If Licensee still desires to make the attachments and returns the form marked so to indicate, Licensor will replace such inadequate poles and Licensee will on demand reimburse Licensor and other joint users for the nonbetterment portion of the cost and expense thereof, including the increased cost of larger poles, sacrificed life value of poles removed, cost of removal less any salvage recovery and the expense of transferring existing facilities from the old to the new poles. Where Licensee's attachments are accommodated on existing poles by rearranging the facilities thereon, Licensee will on demand compensate Licensor and owners of said facilities for the expense incurred in rearranging their respective facilities. Licensee will also on demand reimburse Licensor for any strengthening of poles by guys, anchors or other means, to accommodate the attachment of Licensee's equipment. Should Licensor at any time require the space occupied by Licensee's attachments on poles which have not been replaced at Licensee's expense, Licensor shall give notice to Licensee and Licensee shall either vacate the space by removing its attachments or shall authorize Licensor to replace said poles at the expense of Licensee, in the same manner as provided above.

6. Licensee shall, at its own expense, make and maintain its attachments in safe condition and in thorough repair, and in a manner suitable to Licensor so as not to conflict with the use of said poles by Licensor or by others, or interfere with the working use of facilities thereon or which may from time to time be placed thereon by Licensor and other joint users. Licensee shall at any time, at its own expense, upon notice from Licensor, relocate, replace or remove its facilities placed on said poles, and transfer them to substituted poles, or perform any other work in connection with said facilities that may be required by Licensor; provided, however, that in cases of emergency (Licensor's judgement as to what constitutes an emergency to be accepted by Licensee as conclusive), Licensor may arrange to relocate, replace or remove the facilities placed on said poles by Licensee, transfer them to substituted poles or perform any other work in connection with said facilities that may be required in the maintenance, replacement, removal or relocation of said poles, the facilities thereon or which may be placed thereon, or for the service needs of Licensor; and Licensee shall, on demand, reimburse Licensor for the expense thereby incurred.
7. Licensor reserves the right to maintain or to discontinue the use of any poles it owns, and to operate its facilities in such manner as will best enable it to fulfill its respective service requirements. It shall not be liable to Licensee, its customers, or any other, for any interruption to service of Licensee or for interference with the operator of Licensee's equipment arising in any manner out of the use or discontinuance of such poles hereunder. Whenever possible, thirty (30) days' notice shall be given the Licensee prior to any move or discontinuance of any pole or poles.
8. Licensor, because of the importance of its common carrier services, reserves the right to inspect each new installation of Licensee's equipment on Licensor's poles and to make periodic inspections of the entire plant of Licensee; and Licensee shall, on demand, reimburse Licensor for the reasonable expense of such inspections. The making of such inspections or the omission thereof shall not operate to relieve Licensee or Licensee's insurer of any responsibility, obligation or liability assumed under this Agreement.

9. Licensee shall pay to Licensor, for attachments made to the Licensor's poles under this Agreement, a rental at the rate of \$ [REDACTED] per pole per year. Said rental shall be payable semi-annually in advance on the fifteenth day of January and July of each year during which this Agreement remains in effect. Semi-annual rental payments shall be based on the number of poles on which Licensee has attachments on the first day of the month in which said rentals are payable. The number of poles attached by Licensee shall be mutually determined by the parties in the manner specified in the Appendix attached hereto and made a part hereof. At the end of the first five-year period, and of every two-year period thereafter during the term of this Agreement, at the request of either party, the parties hereto shall review and may adjust the pole rental in accordance with then existing economic conditions which might require such adjustment in order to maintain a fair fee for the ensuing term. If agreement cannot be reached as to an adjusted fee, either party can terminate this Agreement upon twelve (12) months' advance notice.
10. Licensee shall exercise special precautions to avoid causing damage to facilities of Licensor and others located on Licensor's poles and to equipment connected or associated with such facilities, and in the event any such damage occurs, Licensee assumes all responsibility for, and agrees promptly to reimburse Licensor and the other users of Licensor's poles in full for all loss and expense occasioned by such damage. Licensee shall make an immediate report to Licensor of the occurrence of any such damage.
11. Licensee shall submit to Licensor evidence, satisfactory to Licensor, of Licensee's authority to erect and maintain its equipment within public streets, highways, alleys and other thoroughfares and shall secure any necessary consent from Federal, state, municipal, or other public authorities, or from the owners of private lands and property involved, to construct and maintain Licensee's equipment at the locations of Licensor's poles which it desires to use. Licensee shall indemnify and reimburse Licensor for all loss and expense which result from any claims of governmental bodies or others that either Licensee or Licensor has not a sufficient right or authority for placing and

as to any one accident with respect to bodily injury, including death, and with limits of One Hundred Thousand Dollars (\$100,000.00) as to any one accident and Three Hundred Thousand Dollars (\$300,000.00) in the aggregate with respect to property damage; and

- (b) Workmen's Compensation Insurance with statutory limits and employers liability insurance with limits of not less than One Hundred Thousand Dollars (\$100,000.00).

Prior to making any attachments to Licensor's poles, Licensee shall furnish Licensor with a certificate from an insurance carrier acceptable to Licensor stating that policies of insurance have been issued by it to Licensee providing for the insurance coverage listed above and that such policies are in force. Such certificates shall state that the insurance carrier will give Licensor thirty (30) days' prior written notice of any cancellation or material change in policies. Failure to maintain such insurance at any time shall constitute a default of this Agreement but shall not relieve the Licensee from any liabilities assumed under this Agreement.

13. In the event Licensee should make any attachments to Licensor's poles without first having received and accepted a permit as provided in Paragraph 2 hereof, the Licensor shall have the right to summarily and without notice to Licensee, remove such attachments at the cost and expense of Licensee and without any liability therefor.
14. Should Licensee sell or lease the use of its facilities on Licensor's poles without the prior consent in writing of the Licensor as provided for in Section 4 hereof, such action shall constitute forthwith a breach of this Agreement, and Licensor may, at its option, at any time after such breach occurs, forthwith terminate Licensee's attachment rights under this Agreement and require Licensee to remove at once all of Licensee's equipment from Licensor's poles. If Licensee does not so remove the equipment, Licensor shall have the right to remove it at the cost and expense of Licensee.
15. Should Licensee for any reason cease to furnish the services authorized by its franchise, which this Agreement is designed to

facilitate, then and in that event all of Licensee's rights under this Agreement shall automatically terminate and Licensee shall immediately remove its equipment from all of Licensor's poles and if not so removed, Licensor shall have the right to remove it at the cost and expense of Licensee.

16. Licensee may at any time remove its equipment from any poles of Licensor, and shall give Licensor written notice of removal as provided in the appendix attached hereto and made a part hereof.. No adjustment prorated or refund of any rental will be due on account of such removal. Should Licensee thereafter again wish to make attachments to such pole or poles, it shall make application and receive a permit therefor, as provided in Paragraph 2 hereof.
17. No use, however extended, of Licensor's poles, or any payments made under this Agreement or other action of Licensee shall create or vest in Licensee any ownership or property rights in Licensor's poles or associated equipment, but Licensee's right therein shall be and remain such as established a mere license under the terms of this Agreement.
18. Nothing herein contained shall be construed as affecting the rights or privileges previously granted by Licensor, by contract or otherwise, to others not parties to this Agreement, to use any poles covered by this Agreement; and Licensor retains the right to continue and extend such rights or privileges. The attachment privileges herein granted shall at all times be subject to such existing contracts and arrangements. Nothing herein contained shall be construed as affecting or limiting the right of Licensor to make other and additional contracts with other persons, firms, corporations or associations for the joint use of Licensor's poles and facilities.
19. Bills for inspections, expenses, and other charges for work performed by Licensor or other joint users under this Agreement other than for attachment rentals shall be payable to the parties presenting such bills within thirty (30) days after presentation. Nonpayment of bills shall constitute a default of this Agreement.
20. Licensee shall furnish a surety bond in form and with sureties satisfactory to Licensor in an amount not less than \$5,000 for each 1,000

poles attached or fraction thereof to guarantee the payment of any sums which may become due to Licensor for rentals, inspection fees, or for any work performed or expense incurred by Licensor or other joint users under the terms of this Agreement including the removal of Licensee's equipment upon termination of its attachment rights under this Agreement.

21. If Licensee shall fail to comply with any of the provisions of this Agreements, including the specifications herein before referred to, or shall default in any of its obligations under the terms hereof or breach this Agreement and shall fail within ten (10) days after or breach, Licensor may, at its option, forthwith terminate in whole or in part Licensee's attachment rights hereunder, provided, however, that nothing in this section shall affect the provisions and obligations agreed upon in Sections 14 and 15 hereof. Upon such termination, Licensee shall immediately remove its equipment from the pole or poles involved and if not so removed, Licensor shall have the right to remove it at the cost and expense of Licensee.
22. This Agreement shall become effective upon the date hereof, and if the attachment rights are not terminated in accordance with the provisions of other sections of this agreement which provide for such terminations, shall remain in effect for a term of five (5) years from said date and from year to year thereafter subject to the right of either party hereto to terminate this Agreement at any time following the initial term by giving to the other party at least ninety (90) days' prior written notice of said party's desire to terminate this Agreement, in which case this Agreement shall terminate on the date specified but in no event within less than ninety (90) days. Within thirty (30) days after the termination of this Agreement, as provided in this section, Licensee shall remove Licensee's equipment from Licensor's poles. If not removed within thirty (30) days after the termination date, Licensor shall have the right to remove all of Licensee's equipment remaining attached to Licensor's poles at the cost and expense of Licensee without any liability therefor.
23. Upon termination of this Agreement by either party as provided in Paragraph 22, the pole rental for the contract year in which Licensee's equipment is removed from Licensor's poles shall be adjusted and

prorated as of the date of such removal. In all other instances where Licensee's permit or right to attach its equipment to Licensor's pole or poles is terminated as provided in this Agreement, no adjustment or prorate of the pole rental shall be made.

24. Should Licensor under any sections of this Agreement remove Licensee's equipment from Licensor's poles, Licensor will deliver to Licensee the equipment so removed upon payment by Licensee of the cost of removal, storage and delivery, and all other amounts due Licensor hereunder.
25. This Agreement shall not inure to the successors of Licensee nor shall Licensee assign, transfer, or sublet the privileges hereby granted without the prior consent in writing of Licensor. Licensee agrees that it will not grant, sell, rent, loan, or lease to others for any period of time the use of all or any part of Licensee's equipment while attached to Licensor's poles. The parties do not intend by Paragraph 22 of this Agreement to in any manner impair the ability of the Licensee to procure financing through normal accepted channels, and the parties expressly agree that nothing contained in said Paragraph is intended to limit or restrict or impair Licensee's right to execute any mortgage or security agreement covering all or any part of its equipment whether attached to Licensee's poles or otherwise.
26. Failure of Licensor to enforce or insist upon compliance with any of the terms or conditions of this Agreement or to give notice or declare this Agreement or the attachment rights hereunder terminated shall not constitute a general waiver or relinquishment of any terms or conditions of the Agreement but the same shall be and remain at all times in full force and effect.
27. The Appendix attached to and made a part of this Agreement covers construction and operating practices to be observed by the parties hereto. Said practices may be revised by the parties hereto from time to time as changes in operating conditions and experience warrant. Such revisions which do not conflict with the provisions of this Agreement shall be effective when transmitted to the Licensee in writing by the General Plant Manager of the Telephone Company.

28. Subject to the provisions of Paragraph 25 hereof, this Agreement shall extend and bind the successors and assigns of the parties hereto.
29. If, within one year from the effective date of this Agreement, attachments of Licensee's facilities have not been made to at least 19 poles of Licensor, then, at the option of the Licensor, this Agreement may be terminated forthwith in its entirety. Licensor may exercise its option to terminate this Agreement at any time after the expiration of said one-year period by notifying Licensee in writing of Licensor's election to terminate. In the event of said termination, Licensee shall remove promptly all attachments of its facilities theretofore made to Licensor's poles, and if Licensee fails to so remove them, Licensor may remove them at the cost and expense of the Licensee.

IN WITNESS WHEREOF, the parties hereto have, respectively, caused this Agreement to be duly executed the day and year first above written.

1. Application and Permit for Attachments

- (a) The Licensee shall prepare an application-permit on the form marked Exhibit (A), attached hereto and made a part hereof, when applying for permission to make attachments to any pole or poles owned by Licensor. The original and three copies of the application-permit form shall be forwarded to Licensor as far in advance of construction as possible. The information provided on said form shall show the location of poles with respect to streets, alleys, addresses and other geographical markings with sufficient accuracy that the exact location and ownership of the poles can be readily determined. The application shall be reviewed and field checked by Licensor, and an estimate shall be made by each party of its nonbetterment cost of any rearrangements and/or pole replacements required to provide suitable space for Licensee's attachments. The ownership of the poles involved shall be determined and recorded on the form at this time.
- (b) If permission to make the proposed attachments can be granted as provided in the Agreement, Licensor shall indicate on the form the estimated nonbetterment costs of any work to be performed by Licensor and will sign it and forward the original and two copies to Licensee for further consideration.
- (c) If acceptable to Licensee, two copies of the form shall be signed and returned to Licensor. The form as thus approved shall constitute a permit for Licensee to make attachments to said pole or poles pursuant to the provisions of the Agreement. Licensor shall consider the accepted permit as its authority to proceed with the rearrangements and/or pole replacements required to provide suitable space for Licensee's attachments. Licensor will advise Licensee when the poles are ready for occupancy.
- (d) Billing for actual nonbetterment costs of plant changes, as covered by application-permit forms, will be issued as soon as practical after completion of the work. Separate billing, if any, shall be submitted directly to the Licensee by Licensor and the Licensee shall promptly reimburse it for the amount of such billing.

2. Effective Date of Attachments

- (a) The effective date of attachments to Licensor's poles for rental purposes shall be the date the permit is accepted by Licensee or the date the first attachment is made to said poles, whichever date is earliest.
- (b) Licensee shall not attach poles covered by this Agreement unless an application-permit form has been fully executed except in special cases where verbal permission may be granted. Such attachments, in all cases, shall be subsequently covered by an application-permit form for record purposes.

3. Termination of Attachments by Licensee

- (a) When all of Licensee's attachments have been removed from a pole or group of poles, Licensee shall prepare a notice of removal on the form marked Exhibit (B), attached hereto and made a part hereof, and forward the original and two copies thereof to Licensor. The information provided on this form should show the location of the poles involved with respect to streets, alleys, addresses and other suitable geographical markings with sufficient accuracy that the exact location and ownership of the poles can be determined.
- (b) Licensor shall determine the ownership of the vacated poles and records said information on the form before signing it and returning the original to the Licensee.

4. Billing for Pole Rentals

- (a) A tabulation of the poles on which the Licensee has attachments as of January 1st and July 1st shall be made by Licensor in cooperation with the Licensee each year this Agreement remains in effect. This tabulation shall include all poles covered by accepted permits plus any poles not covered by accepted permits on which Licensee's attachments are discovered by Licensor in connection with routine inspections of Licensee's facilities.
- (b) The pole attachment records to be maintained by Licensor and the Licensee shall be verified from time to time by means of a complete field check of Licensee's pole attachments which shall be made jointly by Licensor and the Licensee at least once every three years.
- (c) Billing for pole rentals shall be rendered to the Licensee semi-annually

as of January 1st and July 1st from a billing summary to be prepared by Licensor and approved by the Licensee. The summary shall be based on the joint tabulation of poles attached by Licensee provided for in item (a) above and shall indicate the ownership of such poles.

5. Construction and Maintenance of Attachments

- (a) Licensee's attachments shall be installed, maintained and removed in accordance with the requirements of the National Electric Safety Code, Sixth Edition, or the requirements of any state or local authority having jurisdiction, whichever may be more stringent. All attachments shall be placed within the space and at the location designated by Licensor.
- (b) Drawings marked Exhibits 1 to 8, inclusive, attached to this Appendix, are descriptive of the construction required under some typical conditions where span lengths do not exceed one hundred fifty (150) feet and the voltage of the power conductors does not exceed fifteen thousand (15,000) volts to ground.

REVISED SEPTEMBER 1988

AGREEMENT

THIS AGREEMENT, made this 01 day of MARCH, 1989,
by and between CONTEL OF KENTUCKY, INC. a corporation of the State of KENTUCKY,
having its principal State of Business office in the City of London, hereinafter
called Licensor, a party of the first part, and CUMBERLAND RIVER CABLE, INC. a
corporation of the State of KENTUCKY, hereinafter called Licensee,
party of the second party.

WITNESSETH:

WHEREAS, Licensee proposes to furnish Community Antenna Television service to
persons residing in KNOX COUNTY and vicinity, pursuant to Licensee's
authority under a certain resolution passed on the 6th day of
March, 1989, by the Fiscal Court of the County
of Knox and in connection therewith will need to erect and
maintain aerial cables, wires, and associated appliances throughout the area to
be served, and desires to attach such cables, wires and appliances to poles of
Licensor: and

WHEREAS, Licensor is willing to permit, to the extent that it may lawfully
do so, the attachment of said cables, wires and appliances to Licensor's poles for
the purposes authorized by Licensee's franchise where in its judgment such use
will not interfere with its own service requirements or the service requirements
of others using such poles, including considerations of economy and safety;

NOW THEREFORE, in consideration of the mutual covenants, terms and conditions
herein contained, the parties hereto do hereby mutually covenant and agree as follows:

1. As used in this Agreement, certain terms listed below shall have the
following meanings:

(a) "Licensor's poles" means poles owned by Licensor located in the
immediate vicinity of KNOX COUNTY.

WIN1802

(b) "Licensee's equipment" means aerial wires, cables, amplifiers, associated power supply equipment, and other transmission apparatus necessary for the proper operation of Licensee's system in KNOX COUNTY and vicinity in accord with the authority granted to Licensee by its franchise.

2. Before attaching to Licensor's poles, Licensee shall make application and receive a permit therefor on the form provided in the Appendix attached hereto and made a part thereof. If Licensee accepts the permit, it may attach to the poles covered by said permit subject to the terms and conditions of this Agreement. In granting or denying a permit, Licensor reserves the right to determine whether a grant would adversely affect its common carrier communication services and its ability to meet its duties and obligations with respect thereto, including questions of economy, safety and future needs of Licensor and other joint users.

3. If Licensor's pole or poles are inadequate to support Licensee's proposed attachments in accordance with the specifications referred to in Section 5 hereof, and Licensor is willing to replace such poles to permit the attachment of Licensee's equipment thereto, Licensor shall indicate on the application permit form the changes necessary and the estimated nonbetterment costs thereof and return said form to Licensee. If Licensee still desires to make the attachments and returns the form marked so to indicate, Licensor will replace such inadequate poles and Licensee will on demand reimburse Licensor and other joint users for the nonbetterment portion of the cost and expense thereof, including the increased cost of larger poles, sacrificed life value of poles removed, cost of removal less any salvage recovery and the expense of transferring existing facilities from the old to the new poles. Where Licensee's attachments are accommodated on existing poles by rearranging the facilities thereon, Licensee will on

demand compensate Licensor and owners of said facilities for the expense incurred in rearranging their respective facilities. Licensee will also on demand reimburse Licensor for any strengthening of poles by guys, anchors or other means, to accomodate the attachment of Licensee's equipment. Should Licensor at any time require the space occupied by Licensee's attachments on poles which have not been replaced at Licensee's expense, Licensor shall give notice to Licensee and Licensee shall either vacate the space by removing its attachments or shall authorize Licensor to replace said poles at the expense of Licensee, in the same manner as provided above. Licensor reserves the right to deny Licensee the use of any pole or poles where, in Licensor's judgment, the replacement or rearrangement work necessary to make space available will result in an undue interference or interruption of Licensor's services to its customers.

4. Licensee hereby agrees not to sell or lease the use of its facilities or Licensor's poles, or any portion thereof, without the prior consent in writing of the Licensor.
5. Licensee's equipment, in each and every location (including all equipment which is not attached to Licensor's poles, but which in any way may result in excessive or improper voltages or current being impressed upon any facilities of Licensor or in any hazard to Licensor's facilities or employees or to the public), shall be erected, installed, maintained and removed in accordance with the requirements and specifications of the National Electric Safety Code, Sixth Edition, or any revisions thereof, and in compliance with any applicable rules, regulations or orders now in effect or hereafter issued by any Federal or State commission or any other public authority having jurisdiction. Drawings marked Exhibits 1 to 5, inclusive, included in the Appendix attached hereto and made a part thereof, are descriptive of required construction under some typical

conditions where span lengths are not over one hundred fifty (150) feet and the voltage of the power conductors does not exceed fifteen thousand (15,000) volts to ground. All attachments of Licensee shall be placed within the space and at the location designated by the Licensor. All bonding that may be required under the terms of this agreement including Exhibits 1 through 3 will be performed as follows:

Licensee will furnish the bond and attach the same to its cable and Licensor will then attach the bond to its cable. Licensor and Licensee agree to cooperate in scheduling such work so that it may be performed as expeditiously as possible. Licensee shall on demand, reimburse Licensor for its expense incurred in performing such work. Licensor will, upon request, provide Licensee with a written estimate of its charges for performing such bonding prior to commencing work.

- 6. Licensee shall, at its own expense, make and maintain its attachments in safe condition and in thorough repair, and in a manner suitable to Licensor so as not to conflict with the use of said poles by Licensor or by others, or interfere with the working use of facilities thereon or which may from time to time be placed thereon by Licensor and other joint users. Licensee shall at any time, at its own expense, upon notice from Licensor, relocate, replace or remove its facilities placed on said poles, and transfer them to substituted poles, or perform any work in connection with said facilities that may be required by Licensor; provided, however, that in cases of emergency (Licensor's judgement as to what constitutes an emergency to be accepted by Licensee as conclusive), Licensor may arrange to relocate, replace or remove the facilities placed on said poles by Licensee, transfer them to substituted poles or perform any other work in connection with said facilities that may be required in the maintenance, replacement, removal or relocation of said poles, the facilities thereon

or which may be placed thereon, or for the service needs of Licensor; and Licensee shall, on demand, reimburse Licensor for the expense thereof incurred.

7. Licensor reserves the right to maintain or to discontinue the use of any poles it owns, and to operate its facilities in such manner as will best enable it to fulfill its respective service requirements. It shall not be liable to Licensee, its customers, or any other, for any interruption to service of Licensee or for interference with the operation of Licensee's equipment arising in any manner out of the use or discontinuance of such poles hereunder. Whenever possible, thirty (30) days' notice shall be given the Licensee prior to any move or discontinuance of any pole or poles.
8. Licensor, because of the importance of its common carrier services, reserves the right to inspect each new installation of Licensee's equipment on Licensor's poles and to make periodic inspections of the entire plant of Licensee; and Licensee shall, on demand, reimburse Licensor for the reasonable expense of such inspections. The making of such inspections or the omission thereof shall not operate to relieve Licensee or Licensee's insurer of any responsibility, obligation or liability assumed under this Agreement.
9. Licensee shall exercise special precautions to avoid causing damage to facilities of Licensor and others located on Licensor's poles and to equipment connected or associated with such facilities, and in the event any such damage occurs, Licensee assumes all responsibility for, and agrees promptly to reimburse Licensor and the other users of Licensor's poles in full for all loss and expense occasioned by such damage. Licensee shall make an immediate report to Licensor of the occurrence of any such damage.
10. Licensee shall submit to Licensor evidence, satisfactory to Licensor, of Licensee's authority to erect and maintain its equipment within public

streets, highways, alleys and other thorough-fares and shall secure any necessary consent from Federal, State, Municipal, or other public authorities, or from the owners of private lands and property involved, to construct and maintain Licensee's equipment at the locations of Licensor's poles which it desires to use. Licensee shall indemnify and reimburse Licensor for all loss and expense which results from any claims of governmental bodies or others that either Licensee or Licensor has not a sufficient right or authority for placing and maintaining Licensee's equipment at the locations of the Licensor's poles.

- 11. Licensee shall indemnify, protect, save harmless, and insure Licensor from and against any and all claims and demands for damages to property and injury or death to persons, including payments made under any Workmans' Compensation Law or under any plan for employees' disability and death benefits, and including all expenses incurred in defending any such claims or demands, which may arise out of or be caused by the erection, maintenance, presence, use, rearrangement or removal of the attachments of Licensee's equipment to Licensor's poles, or which may result by reason of the proximity of the cables, wires, equipment, apparatus and appliances of Licensee to the poles of Licensor, or by reason of any negligence of Licensee on or in the vicinity of Licensor's poles notwithstanding any negligence of Licensor or others lawfully using said Licensor's poles. Without limiting the foregoing, it is the general intent of Licensor and Licensee that Licensee shall save Licensor harmless from any liability or risk arising out of or in any manner connected with the operation of Licensee's business or with the operation of Licensee's business or with the operation of Licensee's business or with the facilities of Licensee installed hereunder whether or not due in whole or in part to any act, omission, or negligence of Licensor. It is not the intent of Licensor or Licensee that Licensee shall assume any

liability of Licensor that does not arise out of or is not connected with the operation of Licensee's business or with the installation, operation, maintenance, presence, use, rearrangement or removal of Licensee's facilities. Without limiting the scope or extent of the protection afforded Licensor or the liabilities assumed by Licensee herein, Licensee shall obtain and maintain in effect at its own expense for the entire life of this Agreement, the following insurance:

(a) Workmen's Compensation Insurance with statutory limits and employers liability insurance with limits of not less than Five Hundred Thousand Dollars (\$500,000.00). Prior to making any attachments to Licensor's poles, Licensee shall furnish Licensor with a certificate from an insurance carrier acceptable to Licensor stating that policies of insurance have been issued by it to Licensee providing for the insurance coverage listed above and that such policies are in force. Such certificates shall state that the insurance carrier will give Licensor thirty (30) days' prior written notice of any cancellation or material change in policies. Failure to maintain such insurance at any time shall constitute a default of this Agreement but shall not relieve the Licensee from any liabilities assumed under this Agreement.

12. In the event Licensee should make any attachments to Licensor's poles without first having received and accepted a permit as provided in Paragraph 2 hereof, the Licensor shall have the right to summarily and without notice to Licensee, remove such attachments at the cost and expense of Licensee and without any liability therefor.
13. Should Licensee sell or lease the use of its facilities on Licensor's poles without the prior consent in writing of the Licensor as provided for in Section 4 hereof, such action shall constitute forthwith a breach of this

- Agreement, and Licensor may, at its option, at any time after such breach occurs, forthwith terminate Licensee's attachment rights under this Agreement and require Licensee to remove at once all of Licensee's equipment from Licensor's poles. If Licensee does not so remove the equipment, Licensor shall have the right to remove it at the cost and expense of Licensee.
14. Should Licensee for any reason cease to furnish the services authorized by its franchise, which this Agreement is designed to facilitate, then and in that event all of Licensee's rights under this Agreement shall automatically terminate and Licensee shall immediately remove its equipment from all of Licensor's poles and if not so removed, Licensor shall have the right to remove it at the cost and expense of the Licensee.
 15. Licensee may at any time remove its equipment from any poles of Licensor, and shall give Licensor written notice of removal as provided in the appendix attached hereto and made a part hereof. No adjustment prorated or refund of any rental will be due on account of such removal. Should Licensee thereafter again wish to make attachments to such pole or poles, it shall make application and receive a permit therefor, as provided in Paragraph 2 hereof.
 16. No use, however extended, of Licensor's poles, or any payments made under this Agreement or other action of Licensee shall create or vest in Licensee any ownership or property rights in Licensor's poles or associated equipment, but Licensee's right therein shall be and remain such as established a mere license under the terms of this Agreement.
 17. Nothing herein contained shall be construed as affecting the rights or privileges previously granted by Licensor, by contract or otherwise, to others not parties of this Agreement, to use any poles covered by this Agreement; and Licensor retains the right to continue and extend such rights

or privileges. The attachment privileges herein granted shall at all times be subject to such existing contracts and arrangements. Nothing herein contained shall be construed as affecting or limiting the right of Licensor to make other and additional contracts with other persons, firms, corporations or associations for the joint use of Licensor's poles and facilities.

- 18. Bills for inspections, expenses, and other charges for work performed by Licensor or other joint users under this Agreement other than for attachment rentals shall be payable to the parties presenting such bills within thirty (30) days after presentation. Nonpayment of bills shall constitute a default of this Agreement.
- 19. Licensee shall furnish a surety bond in form and with sureties satisfactory to Licensor in an amount not less than \$5,000 for each 1,000 poles attached or fraction thereof to guarantee the payment of any sums which may become due to Licensor for rentals, inspection fees, or for any work performed or expense incurred by Licensor or other joint users under the terms of this Agreement including the removal of Licensee's equipment upon termination of its attachment rights under this Agreement.
- 20. If Licensee shall fail to comply with any of the provisions of this Agreements, including the specifications herein before referred to, or shall default in any of its obligations under the terms hereof or breach this Agreement and shall fail within then (10) days after or breach, Licensor may, at its option, forthwith terminate in whole or in part Licensee's attachment rights hereunder, provided, however; that nothing in this section shall affect the provisions and obligations agreed upon in Sections 14 of 15 hereof. Upon such termination, Licensee shall immediately remove its equipment from the pole or poles involved and if not so removed, Licensor shall have the right to remove it at the cost and expense of Licensee.

21. This Agreement shall become effective upon the date hereof, and if the attachment rights are not terminated in accordance with the provisions of other sections of this agreement which provide for such terminations, shall remain in effect for a term of five (5) years from said date and from year to year thereafter subject to the right of either party hereto to terminate this Agreement at any time following the initial term by giving to the other party at least ninety (90) days' prior written notice of said party's desire to terminate this Agreement, in which case this Agreement shall terminate on the date specified but in no event within less than ninety (90) days, Within thirty (30) days after the termination of this Agreement, as provided in this section, Licensee shall remove Licensee's equipment from Licensor's poles.
22. The Appendix attached to and made a part of this Agreement covers construction and operating practices to be observed by the parties hereto. Said practices may be revised by the parties hereto from time to time as changes in operating conditions and experience warrant. Such revisions which do not conflict with the provisions of this Agreement shall be effective when transmitted to the Licensee in writing by the General Plant Manager of the Telephone Company.
23. If, within one year from the effective date of this Agreement, attachments of Licensee's facilities have not been made to at least 100 poles of Licensor, then, at the option of the Licensor, this Agreement may be terminated forthwith in its entirety. Licensor may exercise its option to terminate this Agreement at any time after the expiration of said one-year period by notifying Licensee in writing of Licensor's election to terminate. In the event of said termination, Licensee shall remove promptly all attachments of its facilities theretofore made to Licensor's poles, and if Licensee fails to so remove them, Licensor may remove them at the cost and expense of the Licensee.

IN WITNESS WHEREOF, the parties hereto have, respectively, caused this Agreement to be duly executed the day and year first above written.

1. Application and Permit for Attachments

- (a) The Licensee shall prepare an application-permit on the form marked Exhibit (A), attached hereto and made a part hereof, when applying for permission to make attachments to any pole or poles owned by Licensor. The Original and three copies of the application-permit form shall be forwarded to Licensor as far in advance of construction as possible. The information provided on said form shall show the location of poles with respect to streets, alleys, addresses and other geographical markings with sufficient accuracy that the exact location and ownership of the poles can be readily determined. The application shall be reviewed and field checked by Licensor, and an estimate shall be made by each party of its nonbetterment cost of any rearrangements and/or pole replacements required to provide suitable space for Licensee's attachments. The ownership of the poles involved shall be determined and recorded on the form at this time.
- (b) If permission to make the proposed attachments can be granted as provided in the Agreement, Licensor shall indicate on the form the estimated nonbetterment costs of any work to be performed by Licensor and will sign it and forward the original and two copies to Licensee for future consideration.
- (c) If acceptable to Licensee, two copies of the form shall be signed and returned to Licensor. The form as thus approved shall constitute a permit for Licensee to make attachments to said pole or poles pursuant to the provisions of the Agreement. Licensor shall consider the accepted permit as its authority to proceed with the rearrangement and/or pole replacements required to provide suitable space for Licensee's attachments. Licensor will advise Licensee when the poles are ready for occupancy.

(d) Billing for actual nonbetterment costs of plant changes, as covered by application-permit forms, will be issued as soon as practical after completion of the work. Separate billing, if any, shall be submitted directly to the Licensee by Licensor and the Licensee shall promptly reimburse it for the amount of such billing.

2. Effective Date of Attachments

(a) The effective date of attachments to Licensor's poles for rental purposes shall be the date the permit is accepted by Licensee or the date the first attachment is made to said poles, whichever date is earliest.

(b) Licensee shall not attach poles covered by this Agreement unless an application-permit form has been fully executed except in special cases where verbal permission may be granted. Such attachments, in all cases, shall be subsequently covered by an application-permit form for record purposes.

3. Termination of Attachments by Licensee

(a) When all of Licensee's attachments have been removed from a pole or group of poles, Licensee shall prepare a notice of removal on the form marked Exhibit (B), attached hereto and made a part hereof, and forward the original and two copies thereof to Licensor. The information provided on this form should show the location of the poles involved with respect to streets, alleys, addresses and other suitable geographical markings with sufficient accuracy that the exact location and ownership of the poles can be determined.

(b) Licensor shall determine the ownership of the vacated poles and records said information on the form before signing it and returning the original to the Licensee.

4. Billing for Pole Rentals

(a) A tabulation of the poles on which the Licensee has attachments as of

January 1st and July 1st shall be made by Licensor in cooperation with the Licensee each year this Agreement remains in effect. This tabulation shall include all poles covered by accepted permits plus any poles not covered by accepted permits on which Licensee's attachments are discovered by Licensor in connection with routine inspections of Licensee's facilities.

- (b) The pole attachment records to be maintained by Licensor and the Licensee shall be verified from time to time by means of a complete field check of Licensee's pole attachments which shall be made jointly by Licensor and the Licensee at least once every three years.
- (c) Billing for pole rentals shall be rendered to the Licensee semi-annually as of January 1st and July 1st from a billing summary to be prepared by Licensor and approved by the Licensee. The summary shall be based on the joint tabulation of poles attached by Licensee provided for in item (a) above and shall indicate the ownership of such poles.

5. Construction and Maintenance of Attachments

- (a) Licensee's attachments shall be installed, maintained and removed in accordance with the requirements of the National Electric Safety Code, 1987 Edition, or the requirements of any state or local authority having jurisdiction, whichever may be more stringent. All attachments shall be placed within the space and at the location designated by Licensor.
- (b) Drawings marked Exhibits 1 thru 3, inclusive, attached to this Appendix, are descriptive of the construction required under some typical conditions where span lengths do not exceed one hundred fifty (150) feet and the voltage of the power conductors does not exceed fifteen thousand (15,000) volts to ground.

Re: ALLTEL Kentucky Consent to Assignment of Tele-Media Corporation of Delaware to
Cequel III Communications II, LLC

Dear Ms. Wilfong:

Enclosed you will find 2 sets of 3 original Consents to Assignment for pole attachment agreements executed by Tele-Media Corporation of Delaware and Cequel III Communications II, LLC. Please execute all of the originals and return 2 from each set to me. I will distribute an original to Tele-Media Corporation of Delaware.

Please feel free to contact me if you have any questions.

Sincerely yours,

CERTIFIED MAIL

Mr. Gary J. Guzman
GTE
4100 Roxboro Rd
Durham, NC 27704

Re: **Pole Attachment Agreements:**

Dated 3/1/89 between GTE and Rapid Communications and assigned to Mediacom Southeast LLC on 4/6/00.
Systems serviced in Knox County.

Dear Mr. Hanson:

This letter will serve to inform you that Tele-Media Kentucky Trading Company, G.P. and Mediacom Southeast LLC, a Delaware limited liability company ("Mediacom"), have entered into an Agreement dated July 2000, providing for the Exchange of certain Assets relating to Mediacom's cable television systems (the "Systems"), including the above-referenced agreements (the "Agreements") to Tele-Media. The assignment of the Agreements to Tele-Media will be effective as of the date of the closing of the exchange of the Systems to Tele-Media (the "Effective Date").

On behalf of Mediacom, we respectfully request that you consent to the following:

- 1) the assignment and transfer of the Agreements from Mediacom to Tele-Media, together with all rights and obligations thereunder arising from and after the Effective Date,
- 2) any subsequent assignment and transfer of the Agreements from Tele-Media to an entity controlling, controlled by or under common control with Tele-Media ("Tele-Media Affiliate"), together with all rights and obligations arising from and after the date of such assignment and transfer and
- 3) the assignments and pledge of its interests under the Agreements by Tele-Media or the Tele-Media Affiliate, for collateral purposes, to such financial institutions as Tele-Media or the Tele-Media Affiliate may select from time to time.

In addition, please acknowledge that the Agreements represent the entire understanding of the parties and are in full force and effect as of the Effective Date. To your knowledge, Mediacom is materially in compliance with the provisions of the Agreements and there exists no fact or circumstance which constitutes, or which, with the passage of time or the giving of notice or both, would constitute a material default or breach of the Agreements.

As of the Effective Date, Tele-Media will be bound by and shall assume and discharge, in accordance with its terms, all obligations of Mediacom under the Agreements with respect to periods from and after the Effective Date. Mediacom shall be released from its obligations under the Agreements arising at any time on or after the Effective Date.

Please evidence your consent and agreement to the foregoing by signing, dating and returning the enclosed copy of this letter. If you have any questions or require further information, please contact me at (845) 695-2650. Your prompt attention and cooperation in this matter are greatly appreciated.

Sincerely,

Bruce Gluckman
V.P. of Legal and Regulatory Affairs

Dear Ms. Halgrimson:

**Subject: Transfer of Assets from Rapid Communications Partners, L.P.
Successor In Interest to Cumberland River Cable, Inc. to
Mediacom LLC**

This is to acknowledge that GTE South Incorporated ("GTES") has received a request for consent to an assignment from Rapid Communications Partners, L.P. successor in interest to Cumberland River Cable, Inc. ("Assignor") to Mediacom LLC. ("Assignee"). This is to advise that GTES consents to the assignment to Assignee by Assignor of all of its rights, title and interest in and duties and obligations under CATV Pole Attachment and Cable Duct Arrangement (Kentucky P.S.C. KY No. 2 Section S21) dated December 13, 1994 and Pole Lease Agreement dated March 1, 1989 provided that Assignee agrees to pay any charges or billings payable under the Agreement in the event Assignor fails or refuses to do so.

In connection with any obligations of Assignor arising before the assignment, GTES will bill the Assignor with respect to such obligations. In the event the Assignor shall fail or refuse to pay such obligations, the Assignee shall be responsible for payment of same.

Ms. Halgrimson

Knoxville, Tennessee 37933-2059

Dear Mr. Bibee:

Subject: Transfer of Assets from Cumberland River Cable, Inc.
to Rapid Communications Partners, L.P.

This is to acknowledge that GTE South Incorporated ("GTES"), has received a request for consent to an assignment from Cumberland River Cable, Inc. ("Assignor") to Rapid Communications Partners, L.P. ("Assignee"). This is to advise that GTES consents to the assignment to Assignee by Assignor of all of its rights, title and interest in and duties and obligations under CATV Pole Attachment and Cable Duct Arrangement (Kentucky P.S.C. KY No. 2 Section S21) dated December 13, 1994, provided that Assignee agrees to pay any charges or billings payable under the Arrangement in the event Assignor fails or refuses to do so.

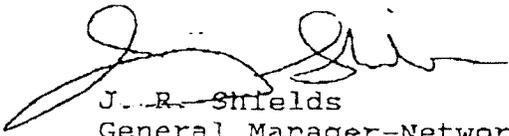

In connection with any obligations of Assignor arising before the assignment, GTES will bill the Assignor with respect to such obligations. In the event the Assignor shall fail or refuse to pay such obligations, the Assignee shall be responsible for payment of same.

Mr. Hal H. Bibee
September 26, 1995

BY: 
(Title) President of the General Partner

ASSIGNMENT EFFECTIVE:

10/1/95
(Date)

AGREEMENT

THIS AGREEMENT, made this 10 day of June, 19 82, by and between Continental Telephone Co. of Kentucky a corporation of the State of Kentucky, having its principal State of Kentucky office in the City of London, Ky., hereinafter called Licensor, a party of the first part, and Galaxy Cablevision, Inc. a corporation of the State of Missouri, hereinafter called Licensee, party of the second part.

WITNESSETH:

WHEREAS, Licensee proposes to furnish Community Antenna Television service to persons residing in Bardwell and vicinity, pursuant to Licensee's authority under a certain franchise granted to it on the 2 day of December, 19 80, by the City Council of the City of Bardwell and in connection therewith will need to erect and maintain aerial cables, wires, and associated appliances throughout the area to be served, and desires to attach such cables, wires and appliances to poles of Licensor: and

WHEREAS, Licensor is willing to permit, to the extent that it may lawfully do so, the attachment of said cables, wires and appliances to Licensor's poles for the purposes authorized by Licensee's franchise where in its judgment such use will not interfere with its own service requirements or the service requirements of others using such poles, including considerations of economy and safety;

NOW THEREFORE, in consideration of the mutual covenants, terms and conditions herein contained, the parties hereto do hereby mutually covenant and agree as follows:

1. As used in this Agreement, certain terms listed below shall have the following meanings:
 - (a) "Licensor's poles" means pole owned by Licensor located in the immediate vicinity of Bardwell, KY.
 - (b) "Licensee's equipment" means aerial wires, cables, amplifiers associated power supply equipment, and other transmission apparatus necessary for the proper operation of Licensee's system in Bardwell, KY and vicinity in accord with the authority granted to Licensee by its franchise.

Licensors reserves the right to deny Licensee the use of any pole or poles where, in Licensor's judgment, the replacement or rearrangement work necessary to make space available will result in an undue interference or interruption of Licensor's service to its customers.

4. Licensee hereby agrees not to sell or lease the use of its facilities on Licensor's poles, or any portion thereof, without the prior consent in writing of the Licensor.
5. Licensee's equipment, in each and every location (including all equipment which is not attached to Licensor's poles, but which in any way may result in excessive or improper voltages or current being impressed upon any facilities of Licensor or in any hazard to Licensor's facilities or employees or to the public), shall be erected, installed, maintained and removed in accordance with the requirements and specifications of the National Electrical Safety Code, Sixth Edition, or any revisions thereof, and in compliance with any applicable rules, regulations or orders now in effect or hereafter issued by any Federal or State commission or any other public authority having jurisdiction. Drawings marked Exhibits 1 to 8, inclusive, included in the Appendix attached hereto and made a part thereof, are descriptive of required construction under some typical conditions where span lengths are not over one hundred fifty (150) feet and the voltage of the power conductors does not exceed fifteen thousand (15,000) volts to ground. All attachments of Licensee shall be placed within the space and at the location designated by the Licensor. All bonding that may be required under the terms of this agreement including Exhibits 1 through 8 will be performed as follows:

Licensee will furnish the bond and attach the same to its cable and Licensor will then attach the bond to its cable. Licensor and Licensee agree to cooperate in scheduling such work so that it may be performed as expeditiously as possible. Licensee shall on demand, reimburse Licensor for its expense incurred in performing such work. Licensor will, upon request, provide Licensee with a written estimate of its charges for performing such bonding prior to commencing work.

9. Licensee shall pay to Licensor, for attachments made to the Licensor's poles under this Agreement, a rental at the rate of \$ [REDACTED] per pole per year. Said rental shall be payable semi-annually in advance on the fifteenth day of January and July of each year during which this Agreement remains in effect. Semi-annual rental payments shall be based on the number of poles on which Licensee has attachments on the first day of the month in which said rentals are payable. The number of poles attached by Licensee shall be mutually determined by the parties in the manner specified in the Appendix attached hereto and made a part hereof. At the end of the first five-year period, and of every two-year period thereafter during the term of this Agreement, at the request of either party, the parties hereto shall review and may adjust the pole rental in accordance with then existing economic conditions which might require such adjustment in order to maintain a fair fee for the ensuing term. If agreement cannot be reached as to an adjusted fee, either party can terminate this Agreement upon twelve (12) months' advance notice.
10. Licensee shall exercise special precautions to avoid causing damage to facilities of Licensor and others located on Licensor's poles and to equipment connected or associated with such facilities, and in the event any such damage occurs, Licensee assumes all responsibility for, and agrees promptly to reimburse Licensor and the other users of Licensor's poles in full for all loss and expense occasioned by such damage. Licensee shall make an immediate report to Licensor of the occurrence of any such damage.
11. Licensee shall submit to Licensor evidence, satisfactory to Licensor, of Licensee's authority to erect and maintain its equipment within public streets, highways, alleys and other thoroughfares and shall secure any necessary consent from Federal, state, municipal, or other public authorities, or from the owners of private lands and property involved, to construct and maintain Licensee's equipment at the locations of Licensor's poles which it desires to use. Licensee shall indemnify and reimburse Licensor for all loss and expense which result from any claims of governmental bodies or others that either Licensee or Licensor has not a sufficient right or authority for placing and

maintaining Licensee's equipment at the locations of the Licensor's poles.

12. Licensee shall indemnify, protect, save harmless, and insure Licensor from and against any and all claims and demands for damages to property and injury or death to persons, including payments made under any Workmans' Compensation Law or under any plan for employees' disability and death benefits, and including all expenses incurred in defending any such claims or demands, which may arise out of or be caused by the erection, maintenance, presence, use, rearrangement or removal of the attachments of Licensee's equipment to Licensor's poles, or which may result by reason of the proximity of the cables, wires, equipment, apparatus and appliances of Licensee to the poles of Licensor, or by reason of any negligence of Licensee on or in the vicinity of Licensor's poles not withstanding any negligence of Licensor or others lawfully using said Licensor's poles. Without limiting the foregoing, it is the general intent of Licensor and Licensee that Licensee shall save Licensor harmless from any liability or risk arising out of or in any manner connected with the operation of Licensee's business or with the operation of Licensee's business or with the facilities of Licensee installed hereunder whether or not due in whole or in part to any act, omission, or negligence of Licensor. It is not the intent of Licensor or Licensee that Licensee shall assume any liability of Licensor that does not arise out of or is not connected with the operation of Licensee's business or with the installation, operation, maintenance, presence, use, rearrangement or removal of Licensee's facilities.

Without limiting the scope or extent of the protection afforded Licensor or the liabilities assumed by Licensee herein, Licensee shall obtain and maintain in effect at its own expense for the entire life of this Agreement, the following insurance:

- (a) General liability insurance on the premises and operations covered by this Agreement and specifically including contractual liability insurance to cover the liability assumed by Licensee under the agreement of indemnity set forth in Paragraph 12 hereof, all with limits of not less than Two Hundred Thousand Dollars (\$200,000.00) as to any one person and Five Hundred Thousand Dollars (\$500,000.00)

as to any one accident with respect to bodily injury, including death, and with limits of One Hundred Thousand Dollars (\$100,000.00) as to any one accident and Three Hundred Thousand Dollars (\$300,000.00) in the aggregate with respect to property damage; and

- (b) Workmen's Compensation Insurance with statutory limits and employers liability insurance with limits of not less than One Hundred Thousand Dollars (\$100,000.00).

Prior to making any attachments to Licensor's poles, Licensee shall furnish Licensor with a certificate from an insurance carrier acceptable to Licensor stating that policies of insurance have been issued by it to Licensee providing for the insurance coverage listed above and that such policies are in force. Such certificates shall state that the insurance carrier will give Licensor thirty (30) days' prior written notice of any cancellation or material change in policies. Failure to maintain such insurance at any time shall constitute a default of this Agreement but shall not relieve the Licensee from any liabilities assumed under this Agreement.

13. In the event Licensee should make any attachments to Licensor's poles without first having received and accepted a permit as provided in Paragraph 2 hereof, the Licensor shall have the right to summarily and without notice to Licensee, remove such attachments at the cost and expense of Licensee and without any liability therefor.
14. Should Licensee sell or lease the use of its facilities on Licensor's poles without the prior consent in writing of the Licensor as provided for in Section 4 hereof, such action shall constitute forthwith a breach of this Agreement, and Licensor may, at its option, at any time after such breach occurs, forthwith terminate Licensee's attachment rights under this Agreement and require Licensee to remove at once all of Licensee's equipment from Licensor's poles. If Licensee does not so remove the equipment, Licensor shall have the right to remove it at the cost and expense of Licensee.
15. Should Licensee for any reason cease to furnish the services authorized by its franchise, which this Agreement is designed to

facilitate, then and in that event all of Licensee's rights under this Agreement shall automatically terminate and Licensee shall immediately remove its equipment from all of Licensor's poles and if not so removed, Licensor shall have the right to remove it at the cost and expense of Licensee.

16. Licensee may at any time remove its equipment from any poles of Licensor, and shall give Licensor written notice of removal as provided in the appendix attached hereto and made a part hereof.. No adjustment prorate or refund of any rental will be due on account of such removal. Should Licensee thereafter again wish to make attachments to such pole or poles, it shall make application and receive a permit therefor, as provided in Paragraph 2 hereof.
17. No use, however extended, of Licensor's poles, or any payments made under this Agreement or other action of Licensee shall create or vest in Licensee any ownership or property rights in Licensor's poles or associated equipment, but Licensee's right therein shall be and remain such as established a mere license under the terms of this Agreement.
18. Nothing herein contained shall be construed as affecting the rights or privileges previously granted by Licensor, by contract or otherwise, to others not parties to this Agreement, to use any poles covered by this Agreement; and Licensor retains the right to continue and extend such rights or privileges. The attachment privileges herein granted shall at all times be subject to such existing contracts and arrangements. Nothing herein contained shall be construed as affecting or limiting the right of Licensor to make other and additional contracts with other persons, firms, corporations or associations for the joint use of Licensor's poles and facilities.
19. Bills for inspections, expenses, and other charges for work performed by Licensor or other joint users under this Agreement other than for attachment rentals shall be payable to the parties presenting such bills within thirty (30) days after presentation. Nonpayment of bills shall constitute a default of this Agreement.
20. Licensee shall furnish a surety bond in form and with sureties satisfactory to Licensor in an amount not less than \$5,000 for each 1,000

poles attached or fraction thereof to guarantee the payment of any sums which may become due to Licensor for rentals, inspection fees, or for any work performed or expense incurred by Licensor or other joint users under the terms of this Agreement including the removal of Licensee's equipment upon termination of its attachment rights under this Agreement.

21. If Licensee shall fail to comply with any of the provisions of this Agreements, including the specifications herein before referred to, or shall default in any of its obligations under the terms hereof or breach this Agreement and shall fail within ten (10) days after or breach, Licensor may, at its option, forthwith terminate in whole or in part Licensee's attachment rights hereunder, provided, however, that nothing in this section shall affect the provisions and obligations agreed upon in Sections 14 and 15 hereof. Upon such termination, Licensee shall immediately remove its equipment from the pole or poles involved and if not so removed, Licensor shall have the right to remove it at the cost and expense of Licensee.
22. This Agreement shall become effective upon the date hereof, and if the attachment rights are not terminated in accordance with the provisions of other sections of this agreement which provide for such terminations, shall remain in effect for a term of five (5) years from said date and from year to year thereafter subject to the right of either party hereto to terminate this Agreement at any time following the initial term by giving to the other party at least ninety (90) days' prior written notice of said party's desire to terminate this Agreement, in which case this Agreement shall terminate on the date specified but in no event within less than ninety (90) days. Within thirty (30) days after the termination of this Agreement, as provided in this section, Licensee shall remove Licensee's equipment from Licensor's poles. If not removed within thirty (30) days after the termination date, Licensor shall have the right to remove all of Licensee's equipment remaining attached to Licensor's poles at the cost and expense of Licensee without any liability therefor.
23. Upon termination of this Agreement by either party as provided in Paragraph 22, the pole rental for the contract year in which Licensee's equipment is removed from Licensor's poles shall be adjusted and

prorated as of the date of such removal. In all other instances where Licensee's permit or right to attach its equipment to Licensor's pole or poles is terminated as provided in this Agreement, no adjustment or prorate of the pole rental shall be made.

24. Should Licensor under any sections of this Agreement remove Licensee's equipment from Licensor's poles, Licensor will deliver to Licensee the equipment so removed upon payment by Licensee of the cost of removal, storage and delivery, and all other amounts due Licensor hereunder.
25. This Agreement shall not inure to the successors of Licensee nor shall Licensee assign, transfer, or sublet the privileges hereby granted without the prior consent in writing of Licensor. Licensee agrees that it will not grant, sell, rent, loan, or lease to others for any period of time the use of all or any part of Licensee's equipment while attached to Licensor's poles. The parties do not intend by Paragraph 22 of this Agreement to in any manner impair the ability of the Licensee to procure financing through normal accepted channels, and the parties expressly agree that nothing contained in said Paragraph is intended to limit or restrict or impair Licensee's right to execute any mortgage or security agreement covering all or any part of its equipment whether attached to Licensee's poles or otherwise.
26. Failure of Licensor to enforce or insist upon compliance with any of the terms or conditions of this Agreement or to give notice or declare this Agreement or the attachment rights hereunder terminated shall not constitute a general waiver or relinquishment of any terms or conditions of the Agreement but the same shall be and remain at all times in full force and effect.
27. The Appendix attached to and made a part of this Agreement covers construction and operating practices to be observed by the parties hereto. Said practices may be revised by the parties hereto from time to time as changes in operating conditions and experience warrant. Such revisions which do not conflict with the provisions of this Agreement shall be effective when transmitted to the Licensee in writing by the General Plant Manager of the Telephone Company.

shall extend and bind the successors and assigns of the parties hereto.

29. If, within one year from the effective date of this Agreement, attachments of Licensee's facilities have not been made to at least 25 poles of Licensor, then, at the option of the Licensor, this Agreement may be terminated forthwith in its entirety. Licensor may exercise its option to terminate this Agreement at any time after the expiration of said one-year period by notifying Licensee in writing of Licensor's election to terminate. In the event of said termination, Licensee shall remove promptly all attachments of its facilities theretofore made to Licensor's poles, and if Licensee fails to so remove them, Licensor may remove them at the cost and expense of the Licensee.

IN WITNESS WHEREOF, the parties hereto have, respectively, caused this Agreement to be duly executed the day and year first above written.

ADDENDUM TO LICENSE AGREEMENT
DATED JULY, 11, 1979

Paragraph 3 is hereby amended to include the following sentence:

"Licensor also reserves the right, at any time it requires the space occupied by Licensee's attachments to poles which have been replaced at Licensee's expense, to require Licensee nevertheless to remove or relocate same upon being reimbursed 100% of Licensee's expense in connection with the prior replacement of said pole or poles if its facilities have been attached thereto for one year or less; 80% if for more than one but less than two years; 60% if for as many as two but less than three years; 40% if for as many as three years but less than four years; 20% if for as many as four but less than five years and without reimbursement if Licensee's facilities have been attached to said pole or poles for five years or more."

APPENDIX

1. Application and Permit for Attachments

- (a) The Licensee shall prepare an application-permit on the form marked Exhibit (A), attached hereto and made a part hereof, when applying for permission to make attachments to any pole or poles owned by Licensor. The original and three copies of the application-permit form shall be forwarded to Licensor as far in advance of construction as possible. The information provided on said form shall show the location of poles with respect to streets, alleys, addresses and other geographical markings with sufficient accuracy that the exact location and ownership of the poles can be readily determined. The application shall be reviewed and field checked by Licensor, and an estimate shall be made by each party of its nonbetterment cost of any rearrangements and/or pole replacements required to provide suitable space for Licensee's attachments. The ownership of the poles involved shall be determined and recorded on the form at this time.
- (b) If permission to make the proposed attachments can be granted as provided in the Agreement, Licensor shall indicate on the form the estimated nonbetterment costs of any work to be performed by Licensor and will sign it and forward the original and two copies to Licensee for further consideration.
- (c) If acceptable to Licensee, two copies of the form shall be signed and returned to Licensor. The form as thus approved shall constitute a permit for Licensee to make attachments to said pole or poles pursuant to the provisions of the Agreement. Licensor shall consider the accepted permit as its authority to proceed with the rearrangements and/or pole replacements required to provide suitable space for Licensee's attachments. Licensor will advise Licensee when the poles are ready for occupancy.
- (d) Billing for actual nonbetterment costs of plant changes, as covered by application-permit forms, will be issued as soon as practical after completion of the work. Separate billing, if any, shall be submitted directly to the Licensee by Licensor and the Licensee shall promptly reimburse it for the amount of such billing.

2. Effective Date of Attachments

- (a) The effective date of attachments to Licensor's poles for rental purposes shall be the date the permit is accepted by Licensee or the date the first attachment is made to said poles, whichever date is earliest.
- (b) Licensee shall not attach poles covered by this Agreement unless an application-permit form has been fully executed except in special cases where verbal permission may be granted. Such attachments, in all cases, shall be subsequently covered by an application-permit form for record purposes.

3. Termination of Attachments by Licensee

- (a) When all of Licensee's attachments have been removed from a pole or group of poles, Licensee shall prepare a notice of removal on the form marked Exhibit (B), attached hereto and made a part hereof, and forward the original and two copies thereof to Licensor. The information provided on this form should show the location of the poles involved with respect to streets, alleys, addresses and other suitable geographical markings with sufficient accuracy that the exact location and ownership of the poles can be determined.
- (b) Licensor shall determine the ownership of the vacated poles and records said information on the form before signing it and returning the original to the Licensee.

4. Billing for Pole Rentals

- (a) A tabulation of the poles on which the Licensee has attachments as of January 1st and July 1st shall be made by Licensor in cooperation with the Licensee each year this Agreement remains in effect. This tabulation shall include all poles covered by accepted permits plus any poles not covered by accepted permits on which Licensee's attachments are discovered by Licensor in connection with routine inspections of Licensee's facilities.
- (b) The pole attachment records to be maintained by Licensor and the Licensee shall be verified from time to time by means of a complete field check of Licensee's pole attachments which shall be made jointly by Licensor and the Licensee at least once every three years.
- (c) Billing for pole rentals shall be rendered to the Licensee semi-annually

as of January 1st and July 1st from a billing summary to be prepared by Licensor and approved by the Licensee. The summary shall be based on the joint tabulation of poles attached by Licensee provided for in item (a) above and shall indicate the ownership of such poles.

5. Construction and Maintenance of Attachments

- (a) Licensee's attachments shall be installed, maintained and removed in accordance with the requirements of the National Electric Safety Code, Sixth Edition, or the requirements of any state or local authority having jurisdiction, whichever may be more stringent. All attachments shall be placed within the space and at the location designated by Licensor.
- (b) Drawings marked Exhibits 1 to 8, inclusive, attached to this Appendix, are descriptive of the construction required under some typical conditions where span lengths do not exceed one hundred fifty (150) feet and the voltage of the power conductors does not exceed fifteen thousand (15,000) volts to ground.

TO GET TO UNDERSTANDING
AGREEMENT

0220-KY-045

THIS AGREEMENT, made this 22 nd. day of April, 19 84, by an
between Continental Telephone Company of Kentucky a corporation of the State of
Kentucky, having its principal State of Kentucky
office in the City of London, Kentucky, hereinafter called Licensor, a party
of the first part, and Arlington Cable TV Service a ^{partnership} ~~corporation~~ of
the State of Kentucky, hereinafter called Licensee, party of the
second part.

WITNESSETH:

WHEREAS, Licensee proposes to furnish Community Antenna Television
service to persons residing in Arlington, Ky and vicinity, pursuant
to Licensee's authority under a certain franchise granted to it on the
7th day of June, 19 83, by the Council of the City
of Arlington and in connection therewith will need to erect and
maintain aerial cables, wires, and associated appliances throughout the
area to be served, and desires to attach such cables, wires and appliances
to poles of Licensor: and

WHEREAS, Licensor is willing to permit, to the extent that it may
lawfully do so, the attachment of said cables, wires and appliances to
Licensor's poles for the purposes authorized by Licensee's franchise
where in its judgment such use will not interfere with its own service
requirements or the service requirements of others using such poles,
including considerations of economy and safety;

NOW THEREFORE, in consideration of the mutual covenants, terms and
conditions herein contained, the parties hereto do hereby mutually covenant
and agree as follows:

1. As used in this Agreement, certain terms listed below shall have
the following meanings:
 - (a) "Licensor's poles" means pole owned by Licensor located in
in the immediate vicinity of Arlington, Ky.
 - (b) "Licensee's equipment" means aerial wires, cables, amplifiers,
associated power supply equipment, and other transmission
apparatus necessary for the proper operation of Licensee's
system in Arlington, Ky and vicinity in accord with
the authority granted to Licensee by its franchise.

as of January 1st and July 1st from a billing summary to be prepared by Licensor and approved by the Licensee. The summary shall be based on the joint tabulation of poles attached by Licensee provided for in item (a) above and shall indicate the ownership of such poles.

5. Construction and Maintenance of Attachments

- (a) Licensee's attachments shall be installed, maintained and removed in accordance with the requirements of the National Electric Safety Code, Sixth Edition, or the requirements of any state or local authority having jurisdiction, whichever may be more stringent. All attachments shall be placed within the space and at the location designated by Licensor.
- (b) Drawings marked Exhibits 1 to 8, inclusive, attached to this Appendix, are descriptive of the construction required under some typical conditions where span lengths do not exceed one hundred fifty (150) feet and the voltage of the power conductors does not exceed fifteen thousand (15,000) volts to ground.

2. Before attaching to Licensor's poles, Licensee shall make application and receive a permit therefor on the form provided in the Appendix attached hereto and made a part thereof. If Licensee accepts the permit, it may attach to the poles covered by said permit subject to the terms and conditions of this Agreement. In granting or denying a permit, Licensor reserves the right to determine whether a grant would adversely affect its common carrier communication services and its ability to meet its duties and obligations with respect thereto, including questions of economy, safety and future needs of Licensor and other joint users.
3. If Licensor's pole or poles are inadequate to support Licensee's proposed attachments in accordance with the specifications referred to in Section 5 hereof, and Licensor is willing to replace such poles to permit the attachment of Licensee's equipment thereto, Licensor shall indicate on the application permit form the changes necessary and the estimated nonbetterment costs thereof and return said form to Licensee. If Licensee still desires to make the attachments and returns the form marked so to indicate, Licensor will replace such inadequate poles and Licensee will on demand reimburse Licensor and other joint users for the nonbetterment portion of the cost and expense thereof, including the increased cost of larger poles, sacrificed life value of poles removed, cost of removal less any salvage recovery and the expense of transferring existing facilities from the old to the new poles. Where Licensee's attachments are accommodated on existing poles by rearranging the facilities thereon, Licensee will on demand compensate Licensor and owners of said facilities for the expense incurred in rearranging their respective facilities. Licensee will also on demand reimburse Licensor for any strengthening of poles by guys, anchors or other means, to accommodate the attachment of Licensee's equipment. Should Licensor at any time require the space occupied by Licensee's attachments on poles which have not been replaced at Licensee's expense, Licensor shall give notice to Licensee and Licensee shall either vacate the space by removing its attachments or shall authorize Licensor to replace said poles at the expense of Licensee, in the same manner as

Licensors reserves the right to deny Licensee the use of any pole or poles where, in Licensor's judgment, the replacement or rearrangement work necessary to make space available will result in an undue interference or interruption of Licensor's service to its customers.

4. Licensee hereby agrees not to sell or lease the use of its facilities on Licensor's poles, or any portion thereof, without the prior consent in writing of the Licensor.
5. Licensee's equipment, in each and every location (including all equipment which is not attached to Licensor's poles, but which in any way may result in excessive or improper voltages or current being impressed upon any facilities of Licensor or in any hazard to Licensor's facilities or employees or to the public), shall be erected, installed, maintained and removed in accordance with the requirements and specifications of the National Electric Safety Code, Sixth Edition, or any revisions thereof, and in compliance with any applicable rules, regulations or orders now in effect or hereafter issued by any Federal or State commission or any other public authority having jurisdiction. Drawings marked Exhibits 1 to 8, inclusive, included in the Appendix attached hereto and made a part thereof, are descriptive of required construction under some typical conditions where span lengths are not over one hundred fifty (150) feet and the voltage of the power conductors does not exceed fifteen thousand (15,000) volts to ground. All attachments of Licensee shall be placed within the space and at the location designated by the Licensor. All bonding that may be required under the terms of this agreement including Exhibits 1 through 8 will be performed as follows:

Licensee will furnish the bond and attach the same to its cable and Licensor will then attach the bond to its cable. Licensor and Licensee agree to cooperate in scheduling such work so that it may be performed as expeditiously as possible. Licensee shall, on demand, reimburse Licensor for its expense incurred in performing such work. Licensor will, upon request, provide Licensee with a written estimate of its charges for performing such bonding prior to commencing work.

6. Licensee shall, at its own expense, make and maintain its attachments in safe condition and in thorough repair, and in a manner suitable to Licensor so as not to conflict with the use of said poles by Licensor or by others, or interfere with the working use of facilities thereon or which may from time to time be placed thereon by Licensor and other joint users. Licensee shall at any time, at its own expense, upon notice from Licensor, relocate, replace or remove its facilities placed on said poles, and transfer them to substituted poles, or perform any other work in connection with said facilities that may be required by Licensor; provided, however, that in cases of emergency (Licensor's judgement as to what constitutes an emergency to be accepted by Licensee as conclusive), Licensor may arrange to relocate, replace or remove the facilities placed on said poles by Licensee, transfer them to substituted poles or perform any other work in connection with said facilities that may be required in the maintenance, replacement, removal or relocation of said poles, the facilities thereon or which may be placed thereon, or for the service needs of Licensor; and Licensee shall, on demand, reimburse Licensor for the expense thereby incurred.
7. Licensor reserves the right to maintain or to discontinue the use of any poles it owns, and to operate its facilities in such manner as will best enable it to fulfill its respective service requirements. It shall not be liable to Licensee, its customers, or any other, for any interruption to service of Licensee or for interference with the operator of Licensee's equipment arising in any manner out of the use or discontinuance of such poles hereunder. Whenever possible, thirty (30) days' notice shall be given the Licensee prior to any move or discontinuance of any pole or poles.
8. Licensor, because of the importance of its common carrier services, reserves the right to inspect each new installation of Licensee's equipment on Licensor's poles and to make periodic inspections of the entire plant of Licensee; and Licensee shall, on demand, reimburse Licensor for the reasonable expense of such inspections. The making of such inspections or the omission thereof shall not operate to relieve Licensee or Licensee's insurer of any responsibility, obligation or liability assumed under this Agreement.

maintaining Licensee's equipment at the locations of the Licensor's poles.

12. Licensee shall indemnify, protect, save harmless, and insure Licensor from and against any and all claims and demands for damages to property and injury or death to persons, including payments made under any Workmans' Compensation Law or under any plan for employees' disability and death benefits, and including all expenses incurred in defending any such claims or demands, which may arise out of or be caused by the erection, maintenance, presence, use, rearrangement or removal of the attachments of Licensee's equipment to Licensor's poles, or which may result by reason of the proximity of the cables, wires, equipment, apparatus and appliances of Licensee to the poles of Licensor, or by reason of any negligence of Licensee on or in the vicinity of Licensor's poles not withstanding any negligence of Licensor or others lawfully using said Licensor's poles. Without limiting the foregoing, it is the general intent of Licensor and Licensee that Licensee shall save Licensor harmless from any liability or risk arising out of or in any manner connected with the operation of Licensee's business or with the operation of Licensee's business or with the facilities of Licensee installed hereunder whether or not due in whole or in part to any act, omission, or negligence of Licensor. It is not the intent of Licensor or Licensee that Licensee shall assume any liability of Licensor that does not arise out of or is not connected with the operation of Licensee's business or with the installation, operation, maintenance, presence, use, rearrangement or removal of Licensee's facilities.
- Without limiting the scope or extent of the protection afforded Licensor or the liabilities assumed by Licensee herein, Licensee shall obtain and maintain in effect at its own expense for the entire life of this Agreement, the following insurance:
- (a) General liability insurance on the premises and operations covered by this Agreement and specifically including contractual liability insurance to cover the liability assumed by Licensee under the agreement of indemnity set forth in Paragraph 12 hereof, all with limits of not less than Two Hundred Thousand Dollars (\$200,000.00) as to any one person and Five Hundred Thousand Dollars (\$500,000.00)

9. Licensee shall pay to Licensor, for attachments made to the Licensor's poles under this Agreement, a rental at the rate of \$ [redacted] / two users / \$ [redacted] / three users per pole per year. Said rental shall be payable semi-annually in advance on the fifteenth day of January and July of each year during which this Agreement remains in effect. Semi-annual rental payments shall be based on the number of poles on which Licensee has attachments on the first day of the month in which said rentals are payable. The number of poles attached by Licensee shall be mutually determined by the parties in the manner specified in the Appendix attached hereto and made a part hereof. At the end of the first five-year period, and of every two-year period thereafter during the term of this Agreement, at the request of either party, the parties hereto shall review and may adjust the pole rental in accordance with then existing economic conditions which might require such adjustment in order to maintain a fair fee for the ensuing term. If agreement cannot be reached as to an adjusted fee, either party can terminate this Agreement upon twelve (12) months' advance notice.
10. Licensee shall exercise special precautions to avoid causing damage to facilities of Licensor and others located on Licensor's poles and to equipment connected or associated with such facilities, and in the event any such damage occurs, Licensee assumes all responsibility for, and agrees promptly to reimburse Licensor and the other users of Licensor's poles in full for all loss and expense occasioned by such damage. Licensee shall make an immediate report to Licensor of the occurrence of any such damage.
11. Licensee shall submit to Licensor evidence, satisfactory to Licensor, of Licensee's authority to erect and maintain its equipment within public streets, highways, alleys and other thoroughfares and shall secure any necessary consent from Federal, state, municipal, or other public authorities, or from the owners of private lands and property involved, to construct and maintain Licensee's equipment at the locations of Licensor's poles which it desires to use. Licensee shall indemnify and reimburse Licensor for all loss and expense which result from any claims of governmental bodies or others that either Licensee or Licensor has not a sufficient right or authority for placing

as to any one accident with respect to bodily injury, including death, and with limits of One Hundred Thousand Dollars (\$100,000.00) as to any one accident and Three Hundred Thousand Dollars (\$300,000.00) in the aggregate with respect to property damage; and

- (b) Workmen's Compensation Insurance with statutory limits and employers liability insurance with limits of not less than One Hundred Thousand Dollars (\$100,000.00).

Prior to making any attachments to Licensor's poles, Licensee shall furnish Licensor with a certificate from an insurance carrier acceptable to Licensor stating that policies of insurance have been issued by it to Licensee providing for the insurance coverage listed above and that such policies are in force. Such certificates shall state that the insurance carrier will give Licensor thirty (30) days' prior written notice of any cancellation or material change in policies.

Failure to maintain such insurance at any time shall constitute a default of this Agreement but shall not relieve the Licensee from any liabilities assumed under this Agreement.

13. In the event Licensee should make any attachments to Licensor's poles without first having received and accepted a permit as provided in Paragraph 2 hereof, the Licensor shall have the right to summarily and without notice to Licensee, remove such attachments at the cost and expense of Licensee and without any liability therefor.
14. Should Licensee sell or lease the use of its facilities on Licensor's poles without the prior consent in writing of the Licensor as provided for in Section 4 hereof, such action shall constitute forthwith a breach of this Agreement, and Licensor may, at its option, at any time after such breach occurs, forthwith terminate Licensee's attachment rights under this Agreement and require Licensee to remove at once all of Licensee's equipment from Licensor's poles. If Licensee does not so remove the equipment, Licensor shall have the right to remove it at the cost and expense of Licensee.
15. Should Licensee for any reason cease to furnish the services authorized by its franchise, which this Agreement is designed to

facilitate, then and in that event all of Licensee's rights under this Agreement shall automatically terminate and Licensee shall immediately remove its equipment from all of Licensor's poles and if not so removed, Licensor shall have the right to remove it at the cost and expense of Licensee.

16. Licensee may at any time remove its equipment from any poles of Licensor, and shall give Licensor written notice of removal as provided in the appendix attached hereto and made a part hereof.. No adjustment prorate or refund of any rental will be due on account of such removal. Should Licensee thereafter again wish to make attachments to such pole or poles, it shall make application and receive a permit therefor, as provided in Paragraph 2 hereof.
17. No use, however extended, of Licensor's poles, or any payments made under this Agreement or other action of Licensee shall create or vest in Licensee any ownership or property rights in Licensor's poles or associated equipment, but Licensee's right therein shall be and remain such as established a mere license under the terms of this Agreement.
18. Nothing herein contained shall be construed as affecting the rights or privileges previously granted by Licensor, by contract or otherwise, to others not parties to this Agreement, to use any poles covered by this Agreement; and Licensor retains the right to continue and extend such rights or privileges. The attachment privileges herein granted shall at all times be subject to such existing contracts and arrangements. Nothing herein contained shall be construed as affecting or limiting the right of Licensor to make other and additional contracts with other persons, firms, corporations or associations for the joint use of Licensor's poles and facilities.
19. Bills for inspections, expenses, and other charges for work performed by Licensor or other joint users under this Agreement other than for attachment rentals shall be payable to the parties presenting such bills within thirty (30) days after presentation. Nonpayment of bills shall constitute a default of this Agreement.
20. Licensee shall furnish a surety bond in form and with sureties satisfactory to Licensor in an amount not less than \$5,000 for each 1,000

poles attached or fraction thereof to guarantee the payment of any sums which may become due to Licensor for rentals, inspection fees, or for any work performed or expense incurred by Licensor or other joint users under the terms of this Agreement including the removal of Licensee's equipment upon termination of its attachment rights under this Agreement.

21. If Licensee shall fail to comply with any of the provisions of this Agreements, including the specifications herein before referred to, or shall default in any of its obligations under the terms hereof or breach this Agreement and shall fail within ten (10) days after or breach, Licensor may, at its option, forthwith terminate in whole or in part Licensee's attachment rights hereunder, provided, however, that nothing in this section shall affect the provisions and obligations agreed upon in Sections 14 and 15 hereof. Upon such termination, Licensee shall immediately remove its equipment from the pole or poles involved and if not so removed, Licensor shall have the right to remove it at the cost and expense of Licensee.
22. This Agreement shall become effective upon the date hereof, and if the attachment rights are not terminated in accordance with the provisions of other sections of this agreement which provide for such terminations, shall remain in effect for a term of five (5) years from said date and from year to year thereafter subject to the right of either party hereto to terminate this Agreement at any time following the initial term by giving to the other party at least ninety (90) days' prior written notice of said party's desire to terminate this Agreement, in which case this Agreement shall terminate on the date specified but in no event within less than ninety (90) days. Within thirty (30) days after the termination of this Agreement, as provided in this section, Licensee shall remove Licensee's equipment from Licensor's poles. If not removed within thirty (30) days after the termination date, Licensor shall have the right to remove all of Licensee's equipment remaining attached to Licensor's poles at the cost and expense of Licensee without any liability therefor.
23. Upon termination of this Agreement by either party as provided in Paragraph 22, the pole rental for the contract year in which Licensee's equipment is removed from Licensor's poles shall be adjusted and

prorated as of the date of such removal. In all other instances where Licensee's permit or right to attach its equipment to Licensor's pole or poles is terminated as provided in this Agreement, no adjustment or prorate of the pole rental shall be made.

24. Should Licensor under any sections of this Agreement remove Licensee's equipment from Licensor's poles, Licensor will deliver to Licensee the equipment so removed upon payment by Licensee of the cost of removal, storage and delivery, and all other amounts due Licensor hereunder.
25. This Agreement shall not inure to the successors of Licensee nor shall Licensee assign, transfer, or sublet the privileges hereby granted without the prior consent in writing of Licensor. Licensee agrees that it will not grant, sell, rent, loan, or lease to others for any period of time the use of all or any part of Licensee's equipment while attached to Licensor's poles. The parties do not intend by Paragraph 22 of this Agreement to in any manner impair the ability of the Licensee to procure financing through normal accepted channels, and the parties expressly agree that nothing contained in said Paragraph is intended to limit or restrict or impair Licensee's right to execute any mortgage or security agreement covering all or any part of its equipment whether attached to Licensee's poles or otherwise.
26. Failure of Licensor to enforce or insist upon compliance with any of the terms or conditions of this Agreement or to give notice or declare this Agreement or the attachment rights hereunder terminated shall not constitute a general waiver or relinquishment of any terms or conditions of the Agreement but the same shall be and remain at all times in full force and effect.
27. The Appendix attached to and made a part of this Agreement covers construction and operating practices to be observed by the parties hereto. Said practices may be revised by the parties hereto from time to time as changes in operating conditions and experience warrant. Such revisions which do not conflict with the provisions of this Agreement shall be effective when transmitted to the Licensee in writing by the General Plant Manager of the Telephone Company.

28. Subject to the provisions of Paragraph 23 hereof, this Agreement shall extend and bind the successors and assigns of the parties hereto.
29. If, within one year from the effective date of this Agreement, attachments of Licensee's facilities have not been made to at least _____ poles of Licensor, then, at the option of the Licensor, this Agreement may be terminated forthwith in its entirety. Licensor may exercise its option to terminate this Agreement at any time after the expiration of said one-year period by notifying Licensee in writing of Licensor's election to terminate. In the event of said termination, Licensee shall remove promptly all attachments of its facilities theretofore made to Licensor's poles, and if Licensee fails to so remove them, Licensor may remove them at the cost and expense of the Licensee.

IN WITNESS WHEREOF, the parties hereto have, respectively, caused this Agreement to be duly executed the day and year first above written.

ADDENDUM TO LICENSE AGREEMENT
DATED JULY, 11, 1979

Paragraph 3 is hereby amended to include the following sentence:

"Licensor also reserves the right, at any time it requires the space occupied by Licensee's attachments to poles which have been replaced at Licensee's expense, to require Licensee nevertheless to remove or relocate same upon being reimbursed 100% of Licensee's expense in connection with the prior replacement of said pole or poles if its facilities have been attached thereto for one year or less; 80% if for more than one but less than two years; 60% if for as many as two but less than three years; 40% if for as many as three years but less than four years; 20% if for as many as four but less than five years and without reimbursement if Licensee's facilities have been attached to said pole or poles for five years or more."

2

ADDENDUM TO LICENSE AGREEMENT
DATED JULY, 11, 1979

Paragraph 3 is hereby amended to include the following sentence:

"Licensor also reserves the right, at any time it requires the space occupied by Licensee's attachments to poles which have been replaced at Licensee's expense, to require Licensee nevertheless to remove or relocate same upon being reimbursed 100% of Licensee's expense in connection with the prior replacement of said pole or poles if its facilities have been attached thereto for one year or less; 80% if for more than one but less than two years; 60% if for as many as two but less than three years; 40% if for as many as three years but less than four years; 20% if for as many as four but less than five years and without reimbursement if Licensee's facilities have been attached to said pole or poles for five years or more."

2. Effective Date of Attachments

- (a) The effective date of attachments to Licensor's poles for rental purposes shall be the date the permit is accepted by Licensee or the date the first attachment is made to said poles, whichever date is earliest.
- (b) Licensee shall not attach poles covered by this Agreement unless an application-permit form has been fully executed except in special cases where verbal permission may be granted. Such attachments, in all cases, shall be subsequently covered by an application-permit form for record purposes.

3. Termination of Attachments by Licensee

- (a) When all of Licensee's attachments have been removed from a pole or group of poles, Licensee shall prepare a notice of removal on the form marked Exhibit (B), attached hereto and made a part hereof, and forward the original and two copies thereof to Licensor. The information provided on this form should show the location of the poles involved with respect to streets, alleys, addresses and other suitable geographical markings with sufficient accuracy that the exact location and ownership of the poles can be determined.
- (b) Licensor shall determine the ownership of the vacated poles and records said information on the form before signing it and returning the original to the Licensee.

4. Billing for Pole Rentals

- (a) A tabulation of the poles on which the Licensee has attachments as of January 1st and July 1st shall be made by Licensor in cooperation with the Licensee each year this Agreement remains in effect. This tabulation shall include all poles covered by accepted permits plus any poles not covered by accepted permits on which Licensee's attachments are discovered by Licensor in connection with routine inspections of Licensee's facilities.
- (b) The pole attachment records to be maintained by Licensor and the Licensee shall be verified from time to time by means of a complete field check of Licensee's pole attachments which shall be made jointly by Licensor and the Licensee at least once every three years.
- (c) Billing for pole rentals shall be rendered to the Licensee semi-annually

THIS AGREEMENT made this 1st day of January, 1962,

Irvine Community T.V., Inc.

hereinafter called Television,
party of the first part, and the KENTUCKY TELEPHONE COMPANY, a corporation of the
State of Kentucky, hereinafter called the "Telephone Company, party of the second part,

W I T N E S S E T H:

WHEREAS, Television proposes to furnish television antenna service to
residents of Irvine and Estill County, Kentucky, and will need to erect and maintain
aerial cables, wires and associated appliances throughout the area to be served and
desires to attach such cables, wires and appliances to poles of Telephone Company; and

WHEREAS, Telephone Company is willing to permit, to the extent it may
lawfully do so, the attachment of said cables, wires and appliances to its poles where,
in its judgment, such use will not interfere with its own service requirements and of
all other licensees using Telephone Company's poles, including considerations of
economy and safety.

NOW, THEREFORE, in consideration of the mutual covenants, terms and conditions
herein contained, the parties hereto do hereby mutually covenant and agree as follows:

1. Telephone Company shall have the right to limit the attachments to any
one of its poles to 2 cables, services and one amplifier. Before making attachment to
any pole or poles of Telephone Company, Television shall make application in writing
and receive a permit therefor in writing. The information submitted by Television
with the application for a permit shall consist of drawings and associated descriptive
matter which shall be adequate in all detail to enable the Telephone Company to
thoroughly check the proposed installation of Television. Before the attachments are
made the permit must be approved by the Telephone Company and any licensees occupying
space on the pole or poles as of the date of the application by Television.

2. Television shall, at its own expense, make and maintain said attachments in safe condition and in thorough repair, and in a manner suitable to Telephone Company and so as will not conflict with the use of said poles by Telephone Company or by other utility companies using said poles, or interfere with the working use of facilities thereon or which may from time to time be placed thereon. Television shall at any time, at its own expense, upon notice from Telephone Company relocate, replace or renew its facilities placed on said poles, and transfer them to substituted poles, or perform any other work in connection with said facilities that may be required by Telephone Company; provided, however, that in cases of emergency Telephone Company may arrange to relocate, replace or renew the facilities placed on said poles by Television, transfer them to substituted poles or perform any other work in connection with said facilities that may be required in the maintenance, replacement, removal or relocation of said poles, the facilities thereon or which may be placed thereon, or for the service needs of Telephone Company, and Television shall, on demand, reimburse Telephone Company for the expense thereby incurred.

3. Television's cables, wires and appliances, in each and every location, shall be erected and maintained in accordance with the requirements and specifications of the National Electrical Safety Code, Fifth Edition and Bell System Practices of the A G, C and G Series or any amendments or revisions of said code or practices and in compliance with any rules or orders now in effect or that hereafter be issued by Public Service Commission of Kentucky or other authority having jurisdiction.

4. In the event that any pole or poles of Telephone Company to which Television desires to make attachments are inadequate to support the additional facilities in accordance with the aforesaid specifications, Telephone Company will indicate in writing the changes necessary to provide adequate poles and the estimated cost thereof to Television and forward it to Television and if Television still desires to make the attachments and so advises Telephone Company, Telephone Company will replace such inadequate poles with

suitable poles and Television will, on demand, reimburse Telephone Company for the entire non-betterment portion of the cost and expense thereof, including the increased cost of larger poles, sacrificed life value of poles removed, cost of removal less any salvage recovery and the expense of transferring Telephone Company's facilities from the old to the new poles. Where Television desired attachments can be accommodated on present poles of Telephone Company by rearranging Telephone Company's facilities thereon, Television will compensate Telephone Company for the full expense incurred in completing such rearrangements. Television will also on demand reimburse the Owner or Owners of other facilities attached to said poles for any expense incurred by it or them in transferring or rearranging said facilities. Any strengthening of poles (guying) required to accommodate the attachments of Television shall be provided by and at the expense of Television and to the satisfaction of Telephone Company.

5. Telephone Company reserves to itself, its successors and assigns, the right to maintain its poles and to operate its facilities thereon in such manner as will best enable it to fulfill its own service requirements, but in accordance with the specifications hereinbefore referred to. Telephone Company shall not be liable to Television for any interruption to service of Television or for interference with the operation of the cables, wires and appliances of Television arising in any manner out of the use of Telephone Company poles hereunder.

6. Television shall submit to Telephone Company evidence, satisfactory to Telephone Company, of its authority to erect and maintain its facilities within public streets, highways and other thoroughfares and shall secure any necessary consent from state or municipal authorities or from the owners of property to construct and maintain facilities at the locations of poles of Telephone Company which it desires to use.

7. Telephone Company, because of the importance of its service, reserves the right to inspect each new installation of Television on its poles and in the vicinity of its lines or appliances and to make periodic inspections, semi-annually or oftener as plant conditions may warrant, of the entire plant of Television; and

Television shall, on demand, reimburse Telephone Company for the expense of such inspections at the rate of Three Dollars and Seventy Cents (\$3.70) per manhour. Such inspections, made or not, shall not operate to relieve Television of any responsibility, obligation or liability assumed under this agreement.

8. Television shall pay to Telephone Company, for attachments made to poles under this agreement, a rental at the rate of One Dollar and Fifty Cents (\$) per pole per year. Said rental shall be payable semi-annually in advance on the first day of January and the first day of July of each year during which this agreement remains in effect. Semi-annual rental payments shall be based upon the number of poles on which attachments are being maintained on the first day of June and the first day of December respectively. The first payment of rental hereunder shall include such prorata amount as may be due for use of poles from the effective date hereof.

9. Television shall exercise special precautions to avoid damage to facilities of Telephone Company and of others supported on said poles; and hereby assumes all responsibility for any and all loss for such damage. Television shall make an immediate report to Telephone Company of the occurrence of any damage and hereby agrees to reimburse Telephone Company for the expense incurred in making repairs.

10. Television shall indemnify, protect and save harmless Telephone Company from and against any and all claims and demands for damages to property and injury or death to persons, including payments made under any Workmen's Compensation law or under any plan for employees' disability and death benefits, which may arise out of or be caused by the erections, maintenance, presence, use or removal of said attachments or by the proximity of the respective cables, wires, apparatus and appliances of the parties hereto, or by any act of Television on or in the vicinity of Telephone Company poles. Television shall carry insurance, to protect the parties hereto from and against all claims, demands, judgments, losses, expenses and liabilities of every name and nature which may arise or result, directly or indirectly, from or by

reason of such loss, injury or damage. The amounts of such insurance to be carried for each town in which Television operates, against liability due to damage to property shall be Twenty Five Thousand Dollars (\$25,000.00) as to any one person and One Hundred Thousand Dollars (\$100,000.00) as to any one accident, and against liability due to injury to or death of persons One Hundred Thousand Dollars (\$100,000.00) as to any one person and Three Hundred Thousand Dollars (\$300,000.00) as to any one accident. Television shall also carry such insurance as will protect it from all claims under any Workmen's Compensation Laws in effect that may be applicable to it. All insurance required shall remain in force for the entire life of this agreement and the company or companies issuing such insurance shall be approved by Telephone Company. Television shall submit to Telephone Company certificates by each company insuring Television to the effect that it has insured Television for all liabilities of Television under this agreement and that it will not cancel or change any policy of insurance issued to Television except after thirty (30) days notice to Telephone Company.

11. Television may at any time remove its attachments from any pole or poles of Telephone Company, but shall immediately give Telephone Company written notice of such removal. No refund of any rental will be due on account of such removal.

12. Upon notice from Telephone Company to Television that the use of any pole or poles is forbidden by municipal authorities or property owners, the permit covering the use of such pole or poles shall immediately terminate and the cables wires and appliances of Television shall be removed at once from the affected pole or poles.

13. If Television shall fail to comply with any of the provisions of this agreement including the specifications hereinbefore referred to, or default in any of its obligations under this agreement and shall fail within thirty (30) days after notice from Telephone Company to correct such default or non-compliance Telephone Company may, at its option, forthwith terminate this agreement or the permit covering the poles as to which such default or non-compliance shall have occurred. In

case of such termination a proportionate refund of all prepaid rentals shall be made.

14. Bills for inspections, expenses and other charges under this agreement shall be payable within thirty (30) days after presentation. Non-payment of bills shall constitute a default of this agreement.

15. Failure to enforce or insist upon compliance with any of the terms or conditions of this agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

16. Nothing herein contained shall be construed as affecting the rights or privileges previously conferred by Telephone Telephone, by contract or otherwise, to others, not parties to this agreement, to use any poles covered by this agreement; and Telephone Company shall have the right to continue and extend such rights or privileges. The attachment privileges herein granted shall at all times be subject to such existing contracts and arrangements.

17. Television shall not assign, transfer or sublet the privileges hereby granted without the prior consent in writing of Telephone Company.

18. No use, however extended, of Telephone Company poles, under this agreement, shall create or vest in Television any ownership or property rights in said poles but Television rights therein shall be and remain a mere permit. Nothing herein contained shall be construed to compel Telephone Company to maintain any of said poles for a period longer than demanded by its own service requirements.

19. This agreement shall become effective upon its execution and if not terminated in accordance with the provisions of Section 13 shall continue in effect for a term of not less than one (1) year. Either party may terminate the agreement at the end of said year or at any time thereafter by giving to the other party at least six (6) months written notice. Upon termination of the agreement in accordance with any of its terms, Television shall immediately remove its cables, wires and appliances from all poles of Telephone Company. If not so removed Telephone Company shall have the right to remove them at the cost and expense of Television and without any liability therefor.

20. Television shall furnish bond or satisfactory evidence of contractual insurance coverage for poles occupied by Television per town, as follows:

| <u>Number of Poles Occupied</u> | <u>Amount of Bond or Insurance Required</u> |
|---------------------------------|---|
| 1 to 199 | \$ 6,000.00 |
| 200 to 399 | 12,000.00 |
| 400 to 599 | 18,000.00 |
| 600 to 799 | 24,000.00 |
| 800 to 999 | 30,000.00 |
| 1000 to 1199 | 36,000.00 |
| 1200 to 1399 | 42,000.00 |
| 1400 to 1599 | 48,000.00 |
| 1600 to 1799 | 54,000.00 |
| 1800 to 1999 | 60,000.00 |

For each additional increment of 200 above 1800 the amount will be increased \$6,000.00.

Such bond or insurance shall contain the provision that it shall not be terminated prior to six months after receipt by the Telephone Company of written notice of the desire of the Bonding or Insurance Company to terminate such bond or insurance. Upon receipt of such notice the Telephone Company shall request Television to immediately remove its cables, wires and all other facilities from all poles of Telephone Company. If Television should fail to complete the removal of all of its facilities from the poles of the Telephone Company within thirty (30) days after receipt of such request from Telephone Company, then Telephone Company shall have the right to remove them at the cost and expense of Television and without being liable for any damage to Television's wires, cables, fixtures or appurtenances.

Such bond or insurance shall guarantee the payment of any sums which may become due to Telephone Company for rentals, inspections or work performed for the benefit of Television under this agreement including the removal of attachments upon termination of this agreement by any of its provisions.

21. Subject to the provisions of Section 17 hereof, this agreement shall extend to and bind the successors and assigns of the parties hereto.

IN WITNESS WHEREOF, the parties hereto have caused these present to be
duly executed the day and year first above written.

WIN1873

By this letter agreement, it is agreed that in certain areas of Estill County, Kentucky in which Irvine Community Television, Inc., has an independently established pole route and right-of-way, it is in the best interest of Contel, to follow that established utility route. By this agreement, Irvine Community Television, Inc. agrees to permit Contel to change-out those poles and anchors of Irvine Community Television that Contel finds necessary and to follow Irvine Community Television's established routes and right-of-ways. In exchange, Contel assumes ownership of said poles and anchors, agrees to maintain same, and agrees to not charge Irvine Community Television, Inc. a rental charge for the poles and anchors along the original route of Irvine Community Television as specified by this agreement. In event that poles are no longer needed or used by Contel, ownership of poles and anchors shall be transferred to Irvine Community Television, Inc., without charge, but only if Irvine Community Television determines that it still has need for said poles.

The following is a listing of routes and poles currently known to be covered by this agreement. This listing is not intended to be final or inclusive. Additional poles and anchors may be added to this agreement by addendum. Poles and anchors originally included under this agreement are as follows:

ORIGINAL CATV CONTRACT

REVISED SEPTEMBER 22, 1988

BY JAMES C. PAINTER, SR.

WIN1875

REVISED SEPTEMBER 1988

AGREEMENT

THIS AGREEMENT, made this 25th day of February, 19 92,
by and between CONTEL OF KENTUCKY, INC. a corporation of the State of KENTUCKY,
having its principal State of Business office in the City of London, hereinafter
called Licensor, a party of the first part, and GTE Kentucky a
corporation of the State of Kentucky, hereinafter called Licensee,
party of the second party.

WITNESSETH:

WHEREAS, Licensee proposes to furnish Community Antenna Television service to
persons residing in Mason County and vicinity, pursuant to Licensee's
authority under a certain franchise granted to it on the 1st day of
July, 19 70, by the Mayor of the City
of Washington and in connection therewith will need to erect and
maintain aerial cables, wires, and associated appliances throughout the area to
be served, and desires to attach such cables, wires and appliances to poles of
Licensor: and

WHEREAS, Licensor is willing to permit, to the extent that it may lawfully
do so, the attachment of said cables, wires and appliances to Licensor's poles for
the purposes authorized by Licensee's franchise where in its judgement such use
will not interfere with its own service requirements or the service requirements
of others using such poles, including considerations of economy and safety;

NOW THEREFORE, in consideration of the mutual covenants, terms and conditions
herein contained, the parties hereto do hereby mutually covenant and agree as follows:

1. As used in this Agreement, certain terms listed below shall have the
following meanings:

(a) "Licensor's poles" means poles owned by Licensor located in the
immediate vicinity of Washington Exchange.

WIN1876

- (b) "Licensee's equipment" means aerial wires, cables, amplifiers, associated power supply equipment, and other transmission apparatus necessary for the proper operation of Licensee's system in Mason County and vicinity in accord with the authority granted to Licensee by its franchise.
2. Before attaching to Licensor's poles, Licensee shall make application and receive a permit therefor on the form provided in the Appendix attached hereto and made a part thereof. If Licensee accepts the permit, it may attach to the poles covered by said permit subject to the terms and conditions of this Agreement. In granting or denying a permit, Licensor reserves the right to determine whether a grant would adversely affect its common carrier communication services and its ability to meet its duties and obligations with respect thereto, including questions of economy, safety and future needs of Licensor and other joint users.
 3. If Licensor's pole or poles are inadequate to support Licensee's proposed attachments in accordance with the specifications referred to in Section 5 hereof, and Licensor is willing to replace such poles to permit the attachment of Licensee's equipment thereto, Licensor shall indicate on the application permit form the changes necessary and the estimated nonbetterment costs thereof and return said form to Licensee. If Licensee still desires to make the attachments and returns the form marked so to indicate, Licensor will replace such inadequate poles and Licensee will on demand reimburse Licensor and other joint users for the nonbetterment portion of the cost and expense thereof, including the increased cost of larger poles, sacrificed life value of poles removed, cost of removal less any salvage recovery and the expense of transferring existing facilities from the old to the new poles. Where Licensee's attachments are accommodated on existing poles by rearranging the facilities thereon, Licensee will on

demand compensate Licensor and owners of said facilities for the expense incurred in rearranging their respective facilities. Licensee will also on demand reimburse Licensor for any strengthening of poles by guys, anchors or other means, to accomodate the attachment of Licensee's equipment. Should Licensor at any time require the space occupied by Licensee's attachments on poles which have not been replaced at Licensee's expense, Licensor shall give notice to Licensee and Licensee shall either vacate the space by removing its attachments or shall authorize Licensor to replace said poles at the expense of Licensee, in the same manner as provided above. Licensor reserves the right to deny Licensee the use of any pole or poles where, in Licensor's judgment, the replacement or rearrangement work necessary to make space available will result in an undue interference or interruption of Licensor's services to its customers.

4. Licensee hereby agrees not to sell or lease the use of its facilities or Licensor's poles, or any portion thereof, without the prior consent in writing of the Licensor.
5. Licensee's equipment, in each and every location (including all equipment which is not attached to Licensor's poles, but which in any way may result in excessive or improper voltages or current being impressed upon any facilities of Licensor or in any hazard to Licensor's facilities or employees or to the public), shall be erected, installed, maintained and removed in accordance with the requirements and specifications of the National Electric Safety Code, Sixth Edition, or any revisions thereof, and in compliance with any applicable rules, regulations or orders now in effect or hereafter issued by any Federal or State commission or any other public authority having jurisdiction. Drawings marked Exhibits 1 to 3, inclusive, included in the Appendix attached hereto and made a part thereof, are descriptive of required construction under some typical

conditions where span lengths are not over one hundred fifty (150) feet and the voltage of the power conductors does not exceed fifteen thousand (15,000) volts to ground. All attachments of Licensee shall be placed within the space and at the location designated by the Licensor. All bonding that may be required under the terms of this agreement including Exhibits 1 through 3 will be performed as follows:

Licensee will furnish the bond and attach the same to its cable and Licensor will then attach the bond to its cable. Licensor and Licensee agree to cooperate in scheduling such work so that it may be performed as expeditiously as possible. Licensee shall on demand, reimburse Licensor for its expense incurred in performing such work. Licensor will, upon request, provide Licensee with a written estimate of its charges for performing such bonding prior to commencing work.

6. Licensee shall, at its own expense, make and maintain its attachments in safe condition and in thorough repair, and in a manner suitable to Licensor so as not to conflict with the use of said poles by Licensor or by others, or interfere with the working use of facilities thereon or which may from time to time be placed thereon by Licensor and other joint users. Licensee shall at any time, at its own expense, upon notice from Licensor, relocate, replace or remove its facilities placed on said poles, and transfer them to substituted poles, or perform any work in connection with said facilities that may be required by Licensor; provided, however, that in cases of emergency (Licensor's judgement as to what constitutes an emergency to be accepted by Licensee as conclusive), Licensor may arrange to relocate, replace or remove the facilities placed on said poles by Licensee, transfer them to substituted poles or perform any other work in connection with said facilities that may be required in the maintenance, replacement, removal or relocation of said poles, the facilities thereon

or which may be placed thereon, or for the service needs of Licensor; and Licensee shall, on demand, reimburse Licensor for the expense thereby incurred.

7. Licensor reserves the right to maintain or to discontinue the use of any poles it owns, and to operate its facilities in such manner as will best enable it to fulfill its respective service requirements. It shall not be liable to Licensee, its customers, or any other, for any interruption to service of Licensee or for interference with the operator of Licensee's equipment arising in any manner out of the use or discontinuance of such poles hereunder. Whenever possible, thirty (30) days' notice shall be given the Licensee prior to any move or discontinuance of any pole or poles.
8. Licensor, because of the importance of its common carrier services, reserves the right to inspect each new installation of Licensee's equipment on Licensor's poles and to make periodic inspections of the entire plant of Licensee; and Licensee shall, on demand, reimburse Licensor for the reasonable expense of such inspections. The making of such inspections or the omission thereof shall not operate to relieve Licensee or Licensee's insurer of any responsibility, obligation or liability assumed under this Agreement.
9. Licensee shall exercise special precautions to avoid causing damage to facilities of Licensor and others located on Licensor's poles and to equipment connected or associated with such facilities, and in the event any such damage occurs, Licensee assumes all responsibility for, and agrees promptly to reimburse Licensor and the other users of Licensor's poles in full for all loss and expense occasioned by such damage. Licensee shall make an immediate report to Licensor of the occurrence of any such damage.
10. Licensee shall submit to Licensor evidence, satisfactory to Licensor, of Licensee's authority to erect and maintain its equipment within public

streets, highways, alleys and other thorough-fares and shall secure any necessary consent from Federal, State, Municipal, or other public authorities, or from the owners of private lands and property involved, to construct and maintain Licensee's equipment at the locations of Licensor's poles which it desires to use. Licensee shall indemnify and reimburse Licensor for all loss and expense which results from any claims of governmental bodies or others that either Licensee or Licensor has not a sufficient right or authority for placing and maintaining Licensee's equipment at the locations of the Licensor's poles.

11. Licensee shall indemnify, protect, save harmless, and insure Licensor from and against any and all claims and demands for damages to property and injury or death to persons, including payments made under any Workmans' Compensation Law or under any plan for employees' disability and death benefits, and including all expenses incurred in defending any such claims or demands, which may arise out of or be caused by the erection, maintenance, presence, use, rearrangement or removal of the attachments of Licensee's equipment to Licensor's poles, or which may result by reason of the proximity of the cables, wires, equipment, apparatus and appliances of Licensee to the poles of Licensor, or by reason of any negligence of Licensee on or in the vicinity of Licensor's poles notwithstanding any negligence of Licensor or others lawfully using said Licensor's poles. Without limiting the foregoing, it is the general intent of Licensor and Licensee that Licensee shall save Licensor harmless from any liability or risk arising out of or in any manner connected with the operation of Licensee's business or with the operation of Licensee's business or with the operation of Licensee's business or with the facilities of Licensee installed hereunder whether or not due in whole or in part to any act, omission, or negligence of Licensor. It is not the intent of Licensor or Licensee that Licensee shall assume any

liability of Licensor that does not arise out of or is not connected with the operation of Licensee's business or with the installation, operation, maintenance, presence, use, rearrangement or removal of Licensee's facilities. Without limiting the scope or extent of the protection afforded Licensor or the liabilities assumed by Licensee herein, Licensee shall obtain and maintain in effect at its own expense for the entire life of this Agreement, the following insurance:

(a) Workmen's Compensation Insurance with statutory limits and employers liability insurance with limits of not less than Five Hundred Thousand Dollars (\$500,000.00). Prior to making any attachments to Licensor's poles, Licensee shall furnish Licensor with a certificate from an insurance carrier acceptable to Licensor stating that policies of insurance have been issued by it to Licensee providing for the insurance coverage listed above and that such policies are in force. Such certificates shall state that the insurance carrier will give Licensor thirty (30) days' prior written notice of any cancellation or material change in policies. Failure to maintain such insurance at any time shall constitute a default of this Agreement but shall not relieve the Licensee from any liabilities assumed under this Agreement.

12. In the event Licensee should make any attachments to Licensor's poles without first having received and accepted a permit as provided in Paragraph 2 hereof, the Licensor shall have the right to summarily and without notice to Licensee, remove such attachments at the cost and expense of Licensee and without any liability therefor.
13. Should Licensee sell or lease the use of its facilities on Licensor's poles without the prior consent in writing of the Licensor as provided for in Section 4 hereof, such action shall constitute forthwith a breach of this

Agreement, and Licensor may, at its option, at any time after such breach occurs, forthwith terminate Licensee's attachment rights under this Agreement and require Licensee to remove at once all of Licensee's equipment from Licensor's poles. If Licensee does not so remove the equipment, Licensor shall have the right to remove it at the cost and expense of Licensee.

14. Should Licensee for any reason cease to furnish the services authorized by its franchise, which this Agreement is designed to facilitate, then and in that event all of Licensee's rights under this Agreement shall automatically terminate and Licensee shall immediately remove its equipment from all of Licensor's poles and if not so removed, Licensor shall have the right to remove it at the cost and expense of the Licensee.
15. Licensee may at any time remove its equipment from any poles of Licensor, and shall give Licensor written notice of removal as provided in the appendix attached hereto and made a part hereof. No adjustment prorated or refund of any rental will be due on account of such removal. Should Licensee thereafter again wish to make attachments to such pole or poles, it shall make application and receive a permit therefor, as provided in Paragraph 2 hereof.
16. No use, however extended, of Licensor's poles, or any payments made under this Agreement or other action of Licensee shall create or vest in Licensee any ownership or property rights in Licensor's poles or associated equipment, but Licensee's right therein shall be and remain such as established a mere license under the terms of this Agreement.
17. Nothing herein contained shall be construed as affecting the rights or privileges previously granted by Licensor, by contract or otherwise, to others not parties of this Agreement, to use any poles covered by this Agreement; and Licensor retains the right to continue and extend such rights

or privileges. The attachment privileges herein granted shall at all times be subject to such existing contracts and arrangements. Nothing herein contained shall be construed as affecting or limiting the right of Licensor to make other and additional contracts with other persons, firms, corporations or associations for the joint use of Licensor's poles and facilities.

18. Bills for inspections, expenses, and other charges for work performed by Licensor or other joint users under this Agreement other than for attachment rentals shall be payable to the parties presenting such bills within thirty (30) days after presentation. Nonpayment of bills shall constitute a default of this Agreement.
19. Licensee shall furnish a surety bond in form and with sureties satisfactory to Licensor in an amount not less than \$5,000 for each 1,000 poles attached or fraction thereof to guarantee the payment of any sums which may become due to Licensor for rentals, inspection fees, or for any work performed or expense incurred by Licensor or other joint users under the terms of this Agreement including the removal of Licensee's equipment upon termination of its attachment rights under this Agreement.
20. If Licensee shall fail to comply with any of the provisions of this Agreements, including the specifications herein before referred to, or shall default in any of its obligations under the terms hereof or breach this Agreement and shall fail within then (10) days after or breach, Licensor may, at its option, forthwith terminate in whole or in part Licensee's attachment rights hereunder, provided, however, that nothing in this section shall affect the provisions and obligations agreed upon in Sections 14 of 15 hereof. Upon such termination, Licensee shall immediately remove its equipment from the pole or poles involved and if not so removed, Licensor shall have the right to remove it at the cost and expense of Licensee.

21. This Agreement shall become effective upon the date hereof, and if the attachment rights are not terminated in accordance with the provisions of other sections of this agreement which provide for such terminations, shall remain in effect for a term of five (5) years from said date and from year to year thereafter subject to the right of either party hereto to terminate this Agreement at any time following the initial term by giving to the other party at least ninety (90) days' prior written notice of said party's desire to terminate this Agreement, in which case this Agreement shall terminate on the date specified but in no event within less than ninety (90) days, Within thirty (30) days after the termination of this Agreement, as provided in this section, Licensee shall remove Licensee's equipment from Licensor's poles.
22. The Appendix attached to and made a part of this Agreement covers construction and operating practices to be observed by the parties hereto. Said practices may be revised by the parties hereto from time to time as changes in operating conditions and experience warrant. Such revisions which do not conflict with the provisions of this Agreement shall be effective when transmitted to the Licensee in writing by the General Plant Manager of the Telephone Company.
23. If, within one year from the effective date of this Agreement, attachments of Licensee's facilities have not been made to at least 100 poles of Licensor, then, at the option of the Licensor, this Agreement may be terminated forthwith in its entirety. Licensor may exercise its option to terminate this Agreement at any time after the expiration of said one-year period by notifying Licensee in writing of Licensor's election to terminate. In the event of said termination, Licensee shall remove promptly all attachments of its facilities theretofore made to Licensor's poles, and if Licensee fails to so remove them, Licensor may remove them at the cost and expense of the Licensee.

IN WITNESS WHEREOF, the parties hereto have, respectively, caused this Agreement to be duly executed the day and year first above written.

AGREEMENT

THIS AGREEMENT, made this 27 day of SEPTEMBER, 19 89.

by and between CONTEL OF KENTUCKY, INC. a corporation of the State of KENTUCKY, having its principal State of Business office in the City of London, hereinafter called Licensor, a party of the first part, and ~~COMMAND CABLE CORPORATION~~ a *Command Cable Limited Partnership* *(M)* ~~corporation~~ of the State of Delaware ~~NEW JERSEY~~ *(M)*, hereinafter called Licensee, party of the second party.

(B)
Limited Partnership

WITNESSETH:

WHEREAS, Licensee proposes to furnish Community Antenna Television service to persons residing in BIG CLIFTY GRAYSON CO. and vicinity, pursuant to Licensee's authority under a certain franchise granted to it on the 1ST. day of SEPTEMBER, 19 89, by the COUNTY JUDGE EXECUTIVE of the City of LEITCHFIELD and in connection therewith will need to erect and maintain aerial cables, wires, and associated appliances throughout the area to be served, and desires to attach such cables, wires and appliances to poles of Licensor: and

WHEREAS, Licensor is willing to permit, to the extent that it may lawfully do so, the attachment of said cables, wires and appliances to Licensor's poles for the purposes authorized by Licensee's franchise where in its judgement such use will not interfere with its own service requirements or the service requirements of others using such poles, including considerations of economy and safety;

NOW THEREFORE, in consideration of the mutual covenants, terms and conditions herein contained, the parties hereto do hereby mutually covenant and agree as follows:

1. As used in this Agreement, certain terms listed below shall have the following meanings:

(a) "Licensor's poles" means poles owned by Licensor located in the immediate vicinity of BIG CLIFTY, GRAYSON COUNTY.

(b) "Licensee's equipment" means aerial wires, cables, amplifiers, associated power supply equipment, and other transmission apparatus necessary for the proper operation of Licensee's system in BIG CLIFTY, GRAYSON CO. and vicinity in accord with the authority granted to Licensee by its franchise.

2. Before attaching to Licensor's poles, Licensee shall make application and receive a permit therefor on the form provided in the Appendix attached hereto and made a part thereof. If Licensee accepts the permit, it may attach to the poles covered by said permit subject to the terms and conditions of this Agreement. In granting or denying a permit, Licensor reserves the right to determine whether a grant would adversely affect its common carrier communication services and its ability to meet its duties and obligations with respect thereto, including questions of economy, safety and future needs of Licensor and other joint users.
3. If Licensor's pole or poles are inadequate to support Licensee's proposed attachments in accordance with the specifications referred to in Section 5 hereof, and Licensor is willing to replace such poles to permit the attachment of Licensee's equipment thereto, Licensor shall indicate on the application permit form the changes necessary and the estimated nonbetterment costs thereof and return said form to Licensee. If Licensee still desires to make the attachments and returns the form marked so to indicate, Licensor will replace such inadequate poles and Licensee will on demand reimburse Licensor and other joint users for the nonbetterment portion of the cost and expense thereof, including the increased cost of larger poles, sacrificed life value of poles removed, cost of removal less any salvage recovery and the expense of transferring existing facilities from the old to the new poles. Where Licensee's attachments are accommodated on existing poles by rearranging the facilities thereon, Licensee will on

demand compensate Licensor and owners of said facilities for the expense incurred in rearranging their respective facilities. Licensee will also on demand reimburse Licensor for any strengthening of poles by guys, anchors or other means, to accomodate the attachment of Licensee's equipment. Should Licensor at any time require the space occupied by Licensee's attachments on poles which have not been replaced at Licensee's expense, Licensor shall give notice to Licensee and Licensee shall either vacate the space by removing its attachments or shall authorize Licensor to replace said poles at the expense of Licensee, in the same manner as provided above. Licensor reserves the right to deny Licensee the use of any pole or poles where, in Licensor's judgment, the replacement or rearrangement work necessary to make space available will result in an undue interference or interruption of Licensor's services to its customers.

4. Licensee hereby agrees not to sell or lease the use of its facilities or Licensor's poles, or any portion thereof, without the prior consent in writing of the Licensor.
5. Licensee's equipment, in each and every location (including all equipment which is not attached to Licensor's poles, but which in any way may result in excessive or improper voltages or current being impressed upon any facilities of Licensor or in any hazard to Licensor's facilities or employees or to the public), shall be erected, installed, maintained and removed in accordance with the requirements and specifications of the National Electric Safety Code, Sixth Edition, or any revisions thereof, and in compliance with any applicable rules, regulations or orders now in effect or hereafter issued by any Federal or State commission or any other public authority having jurisdiction. Drawings marked Exhibits 1 to 3, inclusive, included in the Appendix attached hereto and made a part thereof, are descriptive of required construction under some typical

conditions where span lengths are not over one hundred fifty (150) feet and the voltage of the power conductors does not exceed fifteen thousand (15,000) volts to ground. All attachments of Licensee shall be placed within the space and at the location designated by the Licensor. All bonding that may be required under the terms of this agreement including Exhibits 1 through 3 will be performed as follows:

Licensee will furnish the bond and attach the same to its cable and Licensor will then attach the bond to its cable. Licensor and Licensee agree to cooperate in scheduling such work so that it may be performed as expeditiously as possible. Licensee shall on demand, reimburse Licensor for its expense incurred in performing such work. Licensor will, upon request, provide Licensee with a written estimate of its charges for performing such bonding prior to commencing work.

6. Licensee shall, at its own expense, make and maintain its attachments in safe condition and in thorough repair, and in a manner suitable to Licensor so as not to conflict with the use of said poles by Licensor or by others, or interfere with the working use of facilities thereon which may from time to time be placed thereon by Licensor and other users. Licensee shall at any time, at its own expense, upon notice from Licensor, relocate, replace or remove its facilities placed on poles and transfer them to substituted poles, or perform any work in connection with said facilities that may be required by Licensor; provided, that in cases of emergency (Licensor's judgement as to what constitutes an emergency to be accepted by Licensee as conclusive), Licensor may arrange to relocate, replace or remove the facilities placed on poles by Licensee, transfer them to substituted poles or perform any other work in connection with said facilities that may be required in the maintenance, replacement, removal or relocation of said poles, the facilities

or which may be placed thereon, or for the service needs of Licensor; and Licensee shall, on demand, reimburse Licensor for the expense thereby incurred.

7. Licensor reserves the right to maintain or to discontinue the use of any poles it owns, and to operate its facilities in such manner as will best enable it to fulfill its respective service requirements. It shall not be liable to Licensee, its customers, or any other, for any interruption to service of Licensee or for interference with the operator of Licensee's equipment arising in any manner out of the use or discontinuance of such poles hereunder. Whenever possible, thirty (30) days' notice shall be given the Licensee prior to any move or discontinuance of any pole or poles.
8. Licensor, because of the importance of its common carrier services, reserves the right to inspect each new installation of Licensee's equipment on Licensor's poles and to make periodic inspections of the entire plant of Licensee; and Licensee shall, on demand, reimburse Licensor for the reasonable expense of such inspections. The making of such inspections or the omission thereof shall not operate to relieve Licensee or Licensee's insurer of any responsibility, obligation or liability assumed under this Agreement.
9. Licensee shall exercise special precautions to avoid causing damage to facilities of Licensor and others located on Licensor's poles and to equipment connected or associated with such facilities, and in the event any such damage occurs, Licensee assumes all responsibility for, and agrees promptly to reimburse Licensor and the other users of Licensor's poles in full for all loss and expense occasioned by such damage. Licensee shall make an immediate report to Licensor of the occurrence of any such damage.
10. Licensee shall submit to Licensor evidence, satisfactory to Licensor, of Licensee's authority to erect and maintain its equipment within public

streets, highways, alleys and other thorough-fares and shall secure any necessary consent from Federal, State, Municipal, or other public authorities, or from the owners of private lands and property involved, to construct and maintain Licensee's equipment at the locations of Licensor's poles which it desires to use. Licensee shall indemnify and reimburse Licensor for all loss and expense which results from any claims of governmental bodies or others that either Licensee or Licensor has not a sufficient right or authority for placing and maintaining Licensee's equipment at the locations of the Licensor's poles.

11. Licensee shall indemnify, protect, save harmless, and insure Licensor from and against any and all claims and demands for damages to property and injury or death to persons, including payments made under any Workmans' Compensation Law or under any plan for employees' disability and death benefits, and including all expenses incurred in defending any such claims or demands, which may arise out of or be caused by the erection, maintenance, presence, use, rearrangement or removal of the attachments of Licensee's equipment to Licensor's poles, or which may result by reason of the proximity of the cables, wires, equipment, apparatus and appliances of Licensee to the poles of Licensor, or by reason of any negligence of Licensee on or in the vicinity of Licensor's poles notwithstanding any negligence of Licensor or others lawfully using said Licensor's poles. Without limiting the foregoing, it is the general intent of Licensor and Licensee that Licensee shall save Licensor harmless from any liability or risk arising out of or in any manner connected with the operation of Licensee's business or with the operation of Licensee's business or with the operation of Licensee's business or with the facilities of Licensee installed hereunder whether or not due in whole or in part to any act, omission, or negligence of Licensor. It is not the intent of Licensor or Licensee that Licensee shall assume any

liability of Licensor that does not arise out of or is not connected with the operation of Licensee's business or with the installation, operation, maintenance, presence, use, rearrangement or removal of Licensee's facilities. Without limiting the scope or extent of the protection afforded Licensor or the liabilities assumed by Licensee herein, Licensee shall obtain and maintain in effect at its own expense for the entire life of this Agreement, the following insurance:

(a) Workmen's Compensation Insurance with statutory limits and employers liability insurance with limits of not less than Five Hundred Thousand Dollars (\$500,000.00). Prior to making any attachments to Licensor's poles, Licensee shall furnish Licensor with a certificate from an insurance carrier acceptable to Licensor stating that policies of insurance have been issued by it to Licensee providing for the insurance coverage listed above and that such policies are in force. Such certificates shall state that the insurance carrier will give Licensor thirty (30) days' prior written notice of any cancellation or material change in policies. Failure to maintain such insurance at any time shall constitute a default of this Agreement but shall not relieve the Licensee from any liabilities assumed under this Agreement.

12. In the event Licensee should make any attachments to Licensor's poles without first having received and accepted a permit as provided in Paragraph 2 hereof, the Licensor shall have the right to summarily and without notice to Licensee, remove such attachments at the cost and expense of Licensee and without any liability therefor.

13. Should Licensee sell or lease the use of its facilities on Licensor's poles without the prior consent in writing of the Licensor as provided for in Section 4 hereof, such action shall constitute forthwith a breach of this

Agreement, and Licensor may, at its option, at any time after such breach occurs, forthwith terminate Licensee's attachment rights under this Agreement and require Licensee to remove at once all of Licensee's equipment from Licensor's poles. If Licensee does not so remove the equipment, Licensor shall have the right to remove it at the cost and expense of Licensee.

14. Should Licensee for any reason cease to furnish the services authorized by its franchise, which this Agreement is designed to facilitate, then and in that event all of Licensee's rights under this Agreement shall automatically terminate and Licensee shall immediately remove its equipment from all of Licensor's poles and if not so removed, Licensor shall have the right to remove it at the cost and expense of the Licensee.
15. Licensee may at any time remove its equipment from any poles of Licensor, and shall give Licensor written notice of removal as provided in the appendix attached hereto and made a part hereof. No adjustment prorated or refund of any rental will be due on account of such removal. Should Licensee thereafter again wish to make attachments to such pole or poles, it shall make application and receive a permit therefor, as provided in Paragraph 2 hereof.
16. No use, however extended, of Licensor's poles, or any payments made under this Agreement or other action of Licensee shall create or vest in Licensee any ownership or property rights in Licensor's poles or associated equipment, but Licensee's right therein shall be and remain such as established a mere license under the terms of this Agreement.
17. Nothing herein contained shall be construed as affecting the rights or privileges previously granted by Licensor, by contract or otherwise, to others not parties of this Agreement, to use any poles covered by this Agreement; and Licensor retains the right to continue and extend such rights

or privileges. The attachment privileges herein granted shall at all times be subject to such existing contracts and arrangements. Nothing herein contained shall be construed as affecting or limiting the right of Licensor to make other and additional contracts with other persons, firms, corporations or associations for the joint use of Licensor's poles and facilities.

18. Bills for inspections, expenses, and other charges for work performed by Licensor or other joint users under this Agreement other than for attachment rentals shall be payable to the parties presenting such bills within thirty (30) days after presentation. Nonpayment of bills shall constitute a default of this Agreement.
19. Licensee shall furnish a surety bond in form and with sureties satisfactory to Licensor in an amount not less than \$5,000 for each 1,000 poles attached or fraction thereof to guarantee the payment of any sums which may become due to Licensor for rentals, inspection fees, or for any work performed or expense incurred by Licensor or other joint users under the terms of this Agreement including the removal of Licensee's equipment upon termination of its attachment rights under this Agreement.
20. If Licensee shall fail to comply with any of the provisions of the Agreements, including the specifications herein before referred to, Licensee shall default in any of its obligations under the terms hereof or shall breach this Agreement and shall fail within then (10) days after or breach of this Agreement, Licensor may, at its option, forthwith terminate in whole or in part Licensee's attachment rights hereunder, provided, however, that nothing in this section shall affect the provisions and obligations agreed to in Sections 14 of 15 hereof. Upon such termination, Licensee shall immediately remove its equipment from the pole or poles involved and if not so removed, Licensor shall have the right to remove it at the cost and expense of Licensee.

21. This Agreement shall become effective upon the date hereof, and if the attachment rights are not terminated in accordance with the provisions of other sections of this agreement which provide for such terminations, shall remain in effect for a term of five (5) years from said date and from year to year thereafter subject to the right of either party hereto to terminate this Agreement at any time following the initial term by giving to the other party at least ninety (90) days' prior written notice of said party's desire to terminate this Agreement, in which case this Agreement shall terminate on the date specified but in no event within less than ninety (90) days, Within thirty (30) days after the termination of this Agreement, as provided in this section, Licensee shall remove Licensee's equipment from Licensor's poles.
22. The Appendix attached to and made a part of this Agreement covers construction and operating practices to be observed by the parties hereto. Said practices may be revised by the parties hereto from time to time as changes in operating conditions and experience warrant. Such revisions which do not conflict with the provisions of this Agreement shall be effective when transmitted to the Licensee in writing by the General Plant Manager of the Telephone Company.
23. If, within one year from the effective date of this Agreement, attachments of Licensee's facilities have not been made to at least 100 poles of Licensor, then, at the option of the Licensor, this Agreement may be terminated forthwith in its entirety. Licensor may exercise its option to terminate this Agreement at any time after the expiration of said one-year period by notifying Licensee in writing of Licensor's election to terminate. In the event of said termination, Licensee shall remove promptly all attachments of its facilities theretofore made to Licensor's poles, and if Licensee fails to so remove them, Licensor may remove them at the cost and expense of the Licensee.

IN WITNESS WHEREOF, the parties hereto have, respectively, caused this Agreement to be duly executed the day and year first above written.

APPENDIX

1. Application and Permit for Attachments

- (a) The Licensee shall prepare an application-permit on the form marked Exhibit (A), attached hereto and made a part hereof, when applying for permission to make attachments to any pole or poles owned by Licensor. The Original and three copies of the application-permit form shall be forwarded to Licensor as far in advance of construction as possible. The information provided on said form shall show the location of poles with respect to streets, alleys, addresses and other geographical markings with sufficient accuracy that the exact location and ownership of the poles can be readily determined. The application shall be reviewed and field checked by Licensor, and an estimate shall be made by each party of its nonbetterment cost of any rearrangements and/or pole replacements required to provide suitable space for Licensee's attachments. The ownership of the poles involved shall be determined and recorded on the form at this time.
- (b) If permission to make the proposed attachments can be granted as provided in the Agreement, Licensor shall indicate on the form the estimated nonbetterment costs of any work to be performed by Licensor and will sign it and forward the original and two copies to Licensee for future consideration.
- (c) If acceptable to Licensee, two copies of the form shall be signed and returned to Licensor. The form as thus approved shall constitute a permit for Licensee to make attachments to said pole or poles pursuant to the provisions of the Agreement. Licensor shall consider the accepted permit as its authority to proceed with the rearrangement and/or pole replacements required to provide suitable space for Licensee's attachments. Licensor will advise Licensee when the poles are ready for occupancy.

- (d) Billing for actual nonbetterment costs of plant changes, as covered by application-permit forms, will be issued as soon as practical after completion of the work. *Separate billing, if any, shall be submitted directly to the Licensee by Licensor and the Licensee shall promptly reimburse it for the amount of such billing.*

2. Effective Date of Attachments

- (a) The effective date of attachments to Licensor's poles for rental purposes shall be the date the permit is accepted by Licensee or the date the first attachment is made to said poles, whichever date is earliest.
- (b) Licensee shall not attach poles covered by this Agreement unless an application-permit form has been fully executed except in special cases where verbal permission may be granted. Such attachments, in all cases, shall be subsequently covered by an application-permit form for record purposes.

3. Termination of Attachments by Licensee

- (a) When all of Licensee's attachments have been removed from a pole or group of poles, Licensee shall prepare a notice of removal on the form marked Exhibit (B), attached hereto and made a part hereof, and forward the original and two copies thereof to Licensor. The information provided on this form should show the location of the poles involved with respect to streets, alleys, addresses and other suitable geographical markings with sufficient accuracy that the exact location and ownership of the poles can be determined.
- (b) Licensor shall determine the ownership of the vacated poles and records said information on the form before signing it and returning the original to the Licensee.

4. Billing for Pole Rentals

- (a) A tabulation of the poles on which the Licensee has attachments as of

January 1st and July 1st shall be made by Licensor in cooperation with the Licensee each year this Agreement remains in effect. This tabulation shall include all poles covered by accepted permits plus any poles not covered by accepted permits on which Licensee's attachments are discovered by Licensor in connection with routine inspections of Licensee's facilities.

- (b) The pole attachment records to be maintained by Licensor and the Licensee shall be verified from time to time by means of a complete field check of Licensee's pole attachments which shall be made jointly by Licensor and the Licensee at least once every three years.
- (c) Billing for pole rentals shall be rendered to the Licensee semi-annually as of January 1st and July 1st from a billing summary to be prepared by Licensor and approved by the Licensee. The summary shall be based on the joint tabulation of poles attached by Licensee provided for in item (a) above and shall indicate the ownership of such poles.

5. Construction and Maintenance of Attachments

- (a) Licensee's attachments shall be installed, maintained and removed in accordance with the requirements of the National Electric Safety Code, 1987 Edition, or the requirements of any state or local authority having jurisdiction, whichever may be more stringent. All attachments shall be placed within the space and at the location designated by Licensor.
- (b) Drawings marked Exhibits 1 thru 3, inclusive, attached to this Agreement, are descriptive of the construction required under some typical conditions where span lengths do not exceed one hundred fifty (150) feet and the voltage of the power conductors does not exceed fifteen thousand (15,000) volts to ground.

TRANSFER OF ASSETS FROM COMMAND CABLE CORPORATION
TO RENAISSANCE CABLE

Dear Mr. DiCicco:

This is to acknowledge that GTE South Incorporated ("GTES") has received a request for consent to an assignment between Command Cable Corporation ("Assignor") to Renaissance Cable ("Assignee"). This is to advise that GTES consents to the assignment to Assignee by Assignor of all of its rights, title and interest in and duties and obligations under certain Pole Lease Agreements in the state of Kentucky and contiguous areas provided that Assignee agrees to pay any charges or billings payable under the Agreement in the event Assignor fails or refuses to do so.

In connection with any obligations of Assignor arising before the assignment, GTES will bill the Assignor with respect to such obligations. In the event the Assignor shall fail or refuse to pay such obligations, the Assignee shall be responsible for payment of same.

This letter sets forth the terms and conditions for the consent of GTES to be valid and, as a further condition to GTES's consent, a duplicate original of this letter must also be executed by the Assignee.

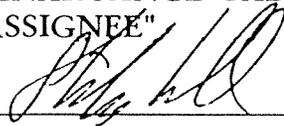

Sincerely,

W. Brent Whitton
GTE South

ATTENTION: Mr. R. W. Santora

SUBJECT: A6.1A CATV POLE LEASE AGREEMENTS

JMCI Cable have informed us that your company is purchasing their company and wishes to maintain the attachments on our poles in Kentucky in order to supply CATV service to your service areas. The rental rates and other conditions relating to such attachments are governed by Tariff, P.S.C. KY. NO. 4. Under that Tariff, a copy of which is enclosed, we are allowed to require your company to furnish a bond and proof of insurance before performing any make-ready work.

Therefore, at your earliest convenience, would you please send to this office the original copy of an acceptable bond and certificate of insurance. The bond should be from a reputable surety company, in favor of GTE South Incorporated and should be in the amount of \$5,000 for each 500 poles or fraction thereof. (For instance, attachments to 800 poles, a \$10,000 bond, etc.) We are enclosing for your convenience a sample of our insurance certificate showing the correct verbigage and amounts of coverage. These documents should be sent to:

GTE South Incorporated
P. O. Box 1412
Durham, NC 27702
Attention: Contracts Specialist
Mail Code: 8063

Also in order that we may properly maintain our records with regard to your company, we need you to furnish us with following.

1. The full legal name of your company;
2. The business form of the company (sole proprietorship, partnership, corporation, etc.) and if applicable, the State of incorporation.

Kentucky Vision, Inc.

ADDENDUM TO LICENSE AGREEMENT
DATED JULY, 11, 1979

Paragraph 3 is hereby amended to include the following sentence:

"Licensor also reserves the right, at any time it requires the space occupied by Licensee's attachments to poles which have been replaced at Licensee's expense, to require Licensee nevertheless to remove or relocate same upon being reimbursed 100% of Licensee's expense in connection with the prior replacement of said pole or poles if its facilities have been attached thereto for one year or less; 80% if for more than one but less than two years; 60% if for as many as two but less than three years; 40% if for as many as three years but less than four years; 20% if for as many as four but less than five years and without reimbursement if Licensee's facilities have been attached to said pole or poles for five years or more."

1. Application and Permit for Attachments

- (a) The Licensee shall prepare an application-permit on the form marked Exhibit (A), attached hereto and made a part hereof, when applying for permission to make attachments to any pole or poles owned by Licensor. The original and three copies of the application-permit form shall be forwarded to Licensor as far in advance of construction as possible. The information provided on said form shall show the location of poles with respect to streets, alleys, addresses and other geographical markings with sufficient accuracy that the exact location and ownership of the poles can be readily determined. The application shall be reviewed and field checked by Licensor, and an estimate shall be made by each party of its nonbetterment cost of any rearrangements and/or pole replacements required to provide suitable space for Licensee's attachments. The ownership of the poles involved shall be determined and recorded on the form at this time.
- (b) If permission to make the proposed attachments can be granted as provided in the Agreement, Licensor shall indicate on the form the estimated nonbetterment costs of any work to be performed by Licensor and will sign it and forward the original and two copies to Licensee for further consideration.
- (c) If acceptable to Licensee, two copies of the form shall be signed and returned to Licensor. The form as thus approved shall constitute a permit for Licensee to make attachments to said pole or poles pursuant to the provisions of the Agreement. Licensor shall consider the accepted permit as its authority to proceed with the rearrangements and/or pole replacements required to provide suitable space for Licensee's attachments. Licensor will advise Licensee when the poles are ready for occupancy.
- (d) Billing for actual nonbetterment costs of plant changes, as covered by application-permit forms, will be issued as soon as practical after completion of the work. Separate billing, if any, shall be submitted directly to the Licensee by Licensor and the Licensee shall promptly reimburse it for the amount of such billing.

2. Effective Date of Attachments

- (a) The effective date of attachments to Licensor's poles for rental purposes shall be the date the permit is accepted by Licensee or the date the first attachment is made to said poles, whichever date is earliest.
- (b) Licensee shall not attach poles covered by this Agreement unless an application-permit form has been fully executed except in special cases where verbal permission may be granted. Such attachments, in all cases, shall be subsequently covered by an application-permit form for record purposes.

3. Termination of Attachments by Licensee

- (a) When all of Licensee's attachments have been removed from a pole or group of poles, Licensee shall prepare a notice of removal on the form marked Exhibit (B), attached hereto and made a part hereof, and forward the original and two copies thereof to Licensor. The information provided on this form should show the location of the poles involved with respect to streets, alleys, addresses and other suitable geographical markings with sufficient accuracy that the exact location and ownership of the poles can be determined.
- (b) Licensor shall determine the ownership of the vacated poles and records said information on the form before signing it and returning the original to the Licensee.

4. Billing for Pole Rentals

- (a) A tabulation of the poles on which the Licensee has attachments as of January 1st and July 1st shall be made by Licensor in cooperation with the Licensee each year this Agreement remains in effect. This tabulation shall include all poles covered by accepted permits plus any poles not covered by accepted permits on which Licensee's attachments are discovered by Licensor in connection with routine inspections of Licensee's facilities.
- (b) The pole attachment records to be maintained by Licensor and the Licensee shall be verified from time to time by means of a complete field check of Licensee's pole attachments which shall be made jointly by Licensor and the Licensee at least once every three years.
- (c) Billing for pole rentals shall be rendered to the Licensee semi-annually

as of January 1st and July 1st from a billing summary to be prepared by Licensor and approved by the Licensee. The summary shall be based on the joint tabulation of poles attached by Licensee provided for in item (a) above and shall indicate the ownership of such poles.

5. Construction and Maintenance of Attachments

- (a) Licensee's attachments shall be installed, maintained and removed in accordance with the requirements of the National Electric Safety Code, Sixth Edition, or the requirements of any state or local authority having jurisdiction, whichever may be more stringent. All attachments shall be placed within the space and at the location designated by Licensor.
- (b) Drawings marked Exhibits 1 to 8, inclusive, attached to this Appendix, are descriptive of the construction required under some typical conditions where span lengths do not exceed one hundred fifty (150) feet and the voltage of the power conductors does not exceed fifteen thousand (15,000) volts to ground.

Telemedia

AGREEMENT

THIS AGREEMENT, made this First day of February, 19 82, between Continental Telephone Company of Kentucky a corporation of the State of Kentucky, having its principal State of Kentucky office in the City of London, hereinafter called Licensor, a party of the first part, and Kentucky Vision, Inc. a corporation of the State of Kentucky, hereinafter called Licensee, party of second part.

WITNESSETH:

WHEREAS, Licensee proposes to furnish Community Antenna Television service to persons residing in Park City and vicinity, pursuant to Licensee's authority under a certain franchise granted to it on the 7th day of October, 19 81, by the City Council of the City of Park City and in connection therewith will need to erect and maintain aerial cables, wires, and associated appliances throughout the area to be served, and desires to attach such cables, wires and appliances to poles of Licensor: and

WHEREAS, Licensor is willing to permit, to the extent that it may lawfully do so, the attachment of said cables, wires and appliances to Licensor's poles for the purposes authorized by Licensee's franchise where in its judgment such use will not interfere with its own service requirements or the service requirements of others using such poles, including considerations of economy and safety;

NOW THEREFORE, in consideration of the mutual covenants, terms and conditions herein contained, the parties hereto do hereby mutually covenant and agree as follows:

1. As used in this Agreement, certain terms listed below shall have the following meanings:
 - (a) "Licensor's poles" means pole owned by Licensor located in the immediate vicinity of Park City, Kentucky
 - (b) "Licensee's equipment" means aerial wires, cables, amplifiers, associated power supply equipment, and other transmission apparatus necessary for the proper operation of Licensee's system in Park City and vicinity in accordance with the authority granted to Licensee by its franchise.

2. Before attaching to Licensor's poles, Licensee shall make application and receive a permit therefor on the form provided in the Appendix attached hereto and made a part thereof. If Licensee accepts the permit, it may attach to the poles covered by said permit subject to the terms and conditions of this Agreement. In granting or denying a permit, Licensor reserves the right to determine whether a grant would adversely affect its common carrier communication services and its ability to meet its duties and obligations with respect thereto, including questions of economy, safety and future needs of Licensor and other joint users.
3. If Licensor's pole or poles are inadequate to support Licensee's proposed attachments in accordance with the specifications referred to in Section 5 hereof, and Licensor is willing to replace such poles to permit the attachment of Licensee's equipment thereto, Licensor shall indicate on the application permit form the changes necessary and the estimated nonbetterment costs thereof and return said form to Licensee. If Licensee still desires to make the attachments and returns the form marked so to indicate, Licensor will replace such inadequate poles and Licensee will on demand reimburse Licensor and other joint users for the nonbetterment portion of the cost and expense thereof, including the increased cost of larger poles, sacrifice in life value of poles removed, cost of removal less salvage recovery and the expense of transferring existing facilities from the old to the new poles. Where Licensee's attachments are accommodated on existing poles by rearranging facilities thereon, Licensee will on demand compensate Licensor and owners of said facilities for the expense incurred in rearranging their respective facilities. Licensee will also on demand reimburse Licensor for any strengthening of poles, cross-arms, anchors or other means, to accommodate the attachment of Licensee's equipment. Should Licensor at any time determine that the space occupied by Licensee's attachments on poles which have not been replaced at Licensee's expense, Licensor shall give notice to Licensee and Licensee shall either vacate the space by removing its attachments or shall authorize Licensor to replace said poles at the expense of Licensee, in the manner provided above.

Licensors reserves the right to deny Licensee the use of any poles or poles where, in Licensor's judgment, the replacement or rearrangement work necessary to make space available will result in an undue interference or interruption of Licensor's service to its customers.

4. Licensee hereby agrees not to sell or lease the use of its facilities on Licensor's poles, or any portion thereof, without the prior consent in writing of the Licensor.
5. Licensee's equipment, in each and every location (including all equipment which is not attached to Licensor's poles, but which in any way may result in excessive or improper voltages or currents being impressed upon any facilities of Licensor or in any hazard to Licensor's facilities or employees or to the public), shall be erected, installed, maintained and removed in accordance with the requirements and specifications of the National Electrical Safety Code, Sixth Edition, or any revisions thereof, and in compliance with any applicable rules, regulations or orders now in effect or hereafter issued by any Federal or State commission or any other public authority having jurisdiction. Drawings marked Exhibits 1 to 8, inclusive, included in the Appendix attached hereto and made a part thereof, are descriptive of required construction under some typical conditions where span lengths are not over one hundred fifty (150) feet and the voltage of the power conductors does not exceed fifteen thousand (15,000) volts to ground. All attachments of Licensee shall be placed within the space and at the location designated by the Licensor. All bonding that may be required under the terms of this agreement including Exhibits 1 through 8 will be performed as follows:

Licensee will furnish the bond and attach the same to its cable and Licensor will then attach the bond to its cable. Licensor and Licensee agree to cooperate in scheduling such work so that it may be performed as expeditiously as possible. Licensee shall on demand, reimburse Licensor for its expense incurred in performing such work. Licensor will, upon request, provide Licensee with a written estimate of its charges for performing such bonding prior to commencing work.

6. Licensee shall, at its own expense, make and maintain its attachments in safe condition and in thorough repair, and in a manner suitable to Licensor so as not to conflict with the use of said poles by Licensor or by others, or interfere with the working use of facilities thereon or which may from time to time be placed thereon by Licensor and other joint users. Licensee shall at any time, at its own expense upon notice from Licensor, relocate, replace or remove its facilities placed on said poles, and transfer them to substituted poles, or perform any other work in connection with said facilities that may be required by Licensor; provided, however, that in cases of emergency (Licensor's judgement as to what constitutes an emergency to be accepted by Licensee as conclusive), Licensor may arrange to relocate, replace or remove the facilities placed on said poles by Licensee, transfer them to substituted poles or perform any other work in connection with said facilities that may be required in the maintenance, replacement, removal or relocation of said poles, the facilities thereon or which may be placed thereon, or for the service needs of Licensor; and Licensee shall, on demand, reimburse Licensor for the expense thereby incurred.
7. Licensor reserves the right to maintain or to discontinue the use of any poles it owns, and to operate its facilities in such manner as will best enable it to fulfill its respective service requirements. It shall not be liable to Licensee, its customers, or any other, for any interruption to service of Licensee or for interference with the operator of Licensee's equipment arising in any manner out of the use or discontinuance of such poles hereunder. Whenever possible, thirty (30) days' notice shall be given the Licensee prior to any move or discontinuance of any pole or poles.
8. Licensor, because of the importance of its common carrier services, reserves the right to inspect each new installation of Licensee's equipment on Licensor's poles and to make periodic inspections of the entire plant of Licensee; and Licensee shall, on demand, reimburse Licensor for the reasonable expense of such inspections. The making of such inspections or the omission thereof shall not operate to relieve Licensee or Licensee's insurer of any responsibility, obligation or liability assumed under this Agreement.

9. Licensee shall pay to Licensor, for attachments made to the Licensor's poles under this Agreement, a rental at the rate of \$ [REDACTED] per pole per year. Said rental shall be payable semi-annually in advance on the fifteenth day of January and July of each year during which this Agreement remains in effect. Semi-annual rental payments shall be based on the number of poles on which Licensee has attachment on the first day of the month in which said rentals are payable. The number of poles attached by Licensee shall be mutually determined by the parties in the manner specified in the Appendix attached hereto and made a part hereof. At the end of the first five-year period, and of every two-year period thereafter during the term of this Agreement, at the request of either party, the parties hereto shall review and may adjust the pole rental in accordance with then existing economic conditions which might require such adjustment in order to maintain a fair fee for the ensuing term. If agreement cannot be reached as to an adjusted fee, either party can terminate this Agreement upon twelve (12) months' advance notice.
10. Licensee shall exercise special precautions to avoid causing damage to facilities of Licensor and others located on Licensor's poles and to equipment connected or associated with such facilities, and in the event any such damage occurs, Licensee assumes all responsibility for, and agrees promptly to reimburse Licensor and the other users of Licensor's poles in full for all loss and expense occasioned by such damage. Licensee shall make an immediate report to Licensor of the occurrence of any such damage.
11. Licensee shall submit to Licensor evidence, satisfactory to Licensor, of Licensee's authority to erect and maintain its equipment within public streets, highways, alleys and other thoroughfares and shall secure any necessary consent from Federal, state, municipal, or other public authorities, or from the owners of private lands and property involved, to construct and maintain Licensee's equipment at the locations of Licensor's poles which it desires to use. Licensee shall indemnify and reimburse Licensor for all loss and expense which result from any claims of governmental bodies or others that either Licensee or Licensor has not a sufficient right or authority for placing and

maintaining Licensee's equipment at the locations of the Licensor's poles.

12. Licensee shall indemnify, protect, save harmless, and insure Licensor from and against any and all claims and demands for damages to property and injury or death to persons, including payments made under any Workmans' Compensation Law or under any plan for employees' disability and death benefits, and including all expenses incurred in defending any such claims or demands, which may arise out of or be caused by the erection, maintenance, presence, use, rearrangement or removal of the attachments of Licensee's equipment to Licensor's poles, or which may result by reason of the proximity of the cables, wires, equipment, apparatus and appliances of Licensee to the poles of Licensor, or by reason of any negligence of Licensee on or in the vicinity of Licensor's poles notwithstanding any negligence of Licensor or others lawfully using said Licensor's poles. Without limiting the foregoing, it is the general intent of Licensor and Licensee that Licensee shall save Licensor harmless from any liability or risk arising out of or in any manner connected with the operation of Licensee's business or with the operation of Licensee's business or with the facilities of Licensee installed hereunder whether or not due in whole or in part to any act, omission, or negligence of Licensor. It is not the intent of Licensor or Licensee that Licensee shall assume any liability of Licensor that does not arise out of or is not connected with the operation of Licensee's business or with the installation, operation, maintenance, presence, use, rearrangement or removal of Licensee's facilities.

Without limiting the scope or extent of the protection afforded Licensor or the liabilities assumed by Licensee herein, Licensee shall obtain and maintain in effect at its own expense for the entire life of this Agreement, the following insurance:

- (a) General liability insurance on the premises and operations covered by this Agreement and specifically including contractual liability insurance to cover the liability assumed by Licensee under the agreement of indemnity set forth in Paragraph 12 hereof, all with limits of not less than Two Hundred Thousand Dollars (\$200,000.00) as to any one person and Five Hundred Thousand Dollars (\$500,000.00).

as to any one accident with respect to bodily injury, including death, and with limits of One Hundred Thousand Dollars (\$100,000.00) as to any one accident and Three Hundred Thousand Dollars (\$300,000.00) in the aggregate with respect to property damage; and

- (b) Workmen's Compensation Insurance with statutory limits and employers liability insurance with limits of not less than One Hundred Thousand Dollars (\$100,000.00).

Prior to making any attachments to Licensor's poles, Licensee shall furnish Licensor with a certificate from an insurance carrier acceptable to Licensor stating that policies of insurance have been issued by it to Licensee providing for the insurance coverage listed above and that such policies are in force. Such certificates shall state that the insurance carrier will give Licensor thirty (30) days' prior written notice of any cancellation or material change in policies. Failure to maintain such insurance at any time shall constitute a default of this Agreement but shall not relieve the Licensee from any liabilities assumed under this Agreement.

13. In the event Licensee should make any attachments to Licensor's poles without first having received and accepted a permit as provided in Paragraph 2 hereof, the Licensor shall have the right to summarily and without notice to Licensee, remove such attachments at the cost and expense of Licensee and without any liability therefor.
14. Should Licensee sell or lease the use of its facilities or Licensor's poles without the prior consent in writing of the Licensor as provided for in Section 4 hereof, such action shall constitute a breach of this Agreement, and Licensor may, at its option, at any time after such breach occurs, forthwith terminate the attachment rights under this Agreement and require Licensee to remove at once all of Licensee's equipment from Licensor's poles. If Licensee does not so remove the equipment, Licensor shall have the right to remove it at the cost and expense of Licensee.
15. Should Licensee for any reason cease to furnish the services authorized by its franchise, which this Agreement is limited to

facilitate, then and in that event all of Licensee's rights under this Agreement shall automatically terminate and Licensee shall immediately remove its equipment from all of Licensor's poles and if not so removed, Licensor shall have the right to remove it at the cost and expense of Licensee.

16. Licensee may at any time remove its equipment from any poles of Licensor, and shall give Licensor written notice of removal as provided in the appendix attached hereto and made a part hereof. No adjustment prorate or refund of any rental will be due on account of such removal. Should Licensee thereafter again wish to make attachments to such pole or poles, it shall make application and receive a permit therefor, as provided in Paragraph 2 hereof.
17. No use, however extended, of Licensor's poles, or any payments made under this Agreement or other action of Licensee shall create or vest in Licensee any ownership or property rights in Licensor's poles or associated equipment, but Licensee's right therein shall be and remain such as established a mere license under the terms of this Agreement.
18. Nothing herein contained shall be construed as affecting the rights or privileges previously granted by Licensor, by contract or otherwise, to others not parties to this Agreement, to use any poles covered by this Agreement; and Licensor retains the right to continue and extend such rights or privileges. The attachment privileges herein granted shall at all times be subject to such existing contracts and arrangements. Nothing herein contained shall be construed as affecting or limiting the right of Licensor to make other and additional contracts with other persons, firms, corporations or associations for the joint use of Licensor's poles and facilities.
19. Bills for inspections, expenses, and other charges for work performed by Licensor or other joint users under this Agreement other than for attachment rentals shall be payable to the parties presenting such bills within thirty (30) days after presentation. Nonpayment of bills shall constitute a default of this Agreement.
20. Licensee shall furnish a surety bond in form and with sureties satisfactory to Licensor in an amount not less than \$5,000 for each 1,000

poles attached or fraction thereof to guarantee the payment of any sums which may become due to Licensor for rentals, inspection fees, or for any work performed or expense incurred by Licensor or other joint users under the terms of this Agreement including the removal of Licensee's equipment upon termination of its attachment rights under this Agreement.

21. If Licensee shall fail to comply with any of the provisions of this Agreements, including the specifications herein before referred to, or shall default in any of its obligations under the terms hereof or breach this Agreement and shall fail within ten (10) days after or breach, Licensor may, at its option, forthwith terminate in whole or in part Licensee's attachment rights hereunder, provided, however, that nothing in this section shall affect the provisions and obligations agreed upon in Sections 14 and 15 hereof. Upon such termination, Licensee shall immediately remove its equipment from the pole or poles involved and if not so removed, Licensor shall have the right to remove it at the cost and expense of Licensee.
22. This Agreement shall become effective upon the date hereof, and if the attachment rights are not terminated in accordance with the provisions of other sections of this agreement which provide for such terminations, shall remain in effect for a term of five (5) years from said date and from year to year thereafter subject to the right of either party hereto to terminate this Agreement at any time following the initial term by giving to the other party at least ninety (90) days' prior written notice of said party's desire to terminate this Agreement, in which case this Agreement shall terminate on the date specified but in no event within less than ninety (90) days. Within thirty (30) days after the termination of this Agreement, as provided in this section, Licensee shall remove Licensee's equipment from Licensor's poles. If not removed within thirty (30) days after the termination date, Licensor shall have the right to remove all of Licensee's equipment remaining attached to Licensor's poles at the cost and expense of Licensee without any liability therefor.
23. Upon termination of this Agreement by either party as provided in Paragraph 22, the pole rental for the contract year in which Licensee's equipment is removed from Licensor's poles shall be adjusted and

prorated as of the date of such removal. In all other instances where Licensee's permit or right to attach its equipment to Licensor's pole or poles is terminated as provided in this Agreement, no adjustment or prorate of the pole rental shall be made.

24. Should Licensor under any sections of this Agreement remove Licensee's equipment from Licensor's poles, Licensor will deliver to Licensee the equipment so removed upon payment by Licensee of the cost of removal, storage and delivery, and all other amounts due Licensor hereunder.
25. This Agreement shall not inure to the successors of Licensee nor shall Licensee assign, transfer, or sublet the privileges hereby granted without the prior consent in writing of Licensor. Licensee agrees that it will not grant, sell, rent, loan, or lease to others for any period of time the use of all or any part of Licensee's equipment while attached to Licensor's poles. The parties do not intend by Paragraph 22 of this Agreement to in any manner impair the ability of the Licensee to procure financing through normal accepted channels, and the parties expressly agree that nothing contained in said Paragraph is intended to limit or restrict or impair Licensee's right to execute any mortgage or security agreement covering all or any part of its equipment whether attached to Licensee's poles or otherwise.
26. Failure of Licensor to enforce or insist upon compliance with any of the terms or conditions of this Agreement or to give notice or declare this Agreement or the attachment rights hereunder terminated shall not constitute a general waiver or relinquishment of any terms or condition of the Agreement but the same shall be and remain at all times in full force and effect.
27. The Appendix attached to and made a part of this Agreement covers construction and operating practices to be observed by the parties hereto. Said practices may be revised by the parties hereto from time to time as changes in operating conditions and experience warrant. Such revisions which do not conflict with the provisions of this Agreement shall be effective when transmitted to the Licensee in writing by the General Plant Manager of the Telephone Company.

28. Subject to the provisions of Paragraph 25 hereof, this Agreement shall extend and bind the successors and assigns of the parties hereto.

29. If, within one year from the effective date of this Agreement, attachments of Licensee's facilities have not been made to at least 50 poles of Licensor, then, at the option of the Licensor, this Agreement may be terminated forthwith in its entirety. Licensor may exercise its option to terminate this Agreement at any time after the expiration of said one-year period by notifying Licensee in writing of Licensor's election to terminate. In the event of said termination, Licensee shall remove promptly all attachments of its facilities theretofore made to Licensor's poles, and if Licensee fails to so remove them, Licensor may remove them at the cost and expense of the Licensee.

IN WITNESS WHEREOF, the parties hereto have, respectively, caused this Agreement to be duly executed the day and year first above written.

AGREEMENT

THIS AGREEMENT, made this 19 day of May, 19 86, by and between CONTINENTAL TELEPHONE COMPANY OF KENTUCKY a corporation of the State of KENTUCKY, having its principal State of Business office in the City of London, hereinafter called Licensor, a party of the first part, and CABLE SYSTEM USA ASSOICATES a corporation of the State of KENTUCKY, hereinafter called Licensee, party of the second part.

WITNESSETH:

WHEREAS, Licensee proposes to furnish Community Antenna Television service to persons residing in JENKINS and vicinity, pursuant to Licensee's authority under a certain franchise granted to it on the 19 day of MAY, 19 86, by the MAYOR of the City of JENKINS and in connection therewith will need to erect and maintain aerial cables, wires, and associated appliances throughout the area to be served, and desires to attach such cables, wires and appliances to poles of Licensor: and

WHEREAS, Licensor is willing to permit, to the extent that it may lawfully do so, the attachment of said cables, wires and appliances to Licensor's poles for the purposes authorized by Licensee's franchise where in its judgment such use will not interfere with its own service requirements or the service requirements of others using such poles, including considerations of economy and safety;

NOW THEREFORE, in consideration of the mutual covenants, terms and conditions herein contained, the parties hereto do hereby mutually covenant and agree as follows:

1. As used in this Agreement, certain terms listed below shall have the following meanings:

- (a) "Licensor's poles" means pole owned by Licensor located in the immediate vicinity of Jenkins - Letcher.
- (b) "Licensee's equipment" means aerial wires, cables, amplifiers, associated power supply equipment, and other transmission apparatus necessary for the proper operation of Licensee's system in JENKINS and vicinity in accord with the authority granted to Licensee by its franchise.

2. Before attaching to Licensor's poles, Licensee shall make application and receive a permit therefor on the form provided in the Appendix attached hereto and made a part thereof. If Licensee accepts the permit, it may attach to the poles covered by said permit subject to the terms and conditions of this Agreement. In granting or denying a permit, Licensor reserves the right to determine whether a grant would adversely affect its common carrier communication services and its ability to meet its duties and obligations with respect thereto, including questions of economy, safety and future needs of Licensor and other joint users.
3. If Licensor's pole or poles are inadequate to support Licensee's proposed attachments in accordance with the specifications referred to in Section 5 hereof, and Licensor is willing to replace such poles to permit the attachment of Licensee's equipment thereto, Licensor shall indicate on the application permit form the changes necessary and the estimated nonbetterment costs thereof and return said form to Licensee. If Licensee still desires to make the attachments and returns the form marked so to indicate, Licensor will replace such inadequate poles and Licensee will on demand reimburse Licensor and other joint users for the nonbetterment portion of the cost and expense thereof, including the increased cost of larger poles, sacrificed life value of poles removed, cost of removal less any salvage recovery and the expense of transferring existing facilities from the old to the new poles. Where Licensee's attachments are accommodated on existing poles by rearranging the facilities thereon, Licensee will on demand compensate Licensor and owners of said facilities for the expense incurred in rearranging their respective facilities. Licensee will also on demand reimburse Licensor for any strengthening of poles by guys, anchors or other means, to accommodate the attachment of Licensee's equipment. Should Licensor at any time require the space occupied by Licensee's attachments on poles which have not been replaced at Licensee's expense, Licensor shall give notice to Licensee and Licensee shall either vacate the space by removing its attachments or shall authorize Licensor to replace said poles at the expense of Licensee, in the same manner as provided above.

Licensor reserves the right to deny Licensee the use of any pole or poles where, in Licensor's judgment, the replacement or rearrangement work necessary to make space available will result in an undue interference or interruption of Licensor's services to its customers.

4. Licensee hereby agrees not to sell or lease the use of its facilities or Licensor's poles, or any portion thereof, without the prior consent in writing of the Licensor.
5. Licensee's equipment, in each and every location (including all equipment which is not attached to Licensor's poles, but which in any way may result in excessive or improper voltages or current being impressed upon any facilities of Licensor or in any hazard to Licensor's facilities or employees or to the public), shall be erected, installed, maintained and removed in accordance with the requirements and specifications of the National Electric Safety Code, Sixth Edition, or any revisions thereof, and in compliance with any applicable rules, regulations or orders now in effect or hereafter issued by any Federal or State commission or any other public authority having jurisdiction. Drawings marked Exhibits 1 to 8, inclusive, included in the Appendix attached hereto and made a part thereof, are descriptive of required construction under some typical conditions where span lengths are not over one hundred fifty (150) feet and the voltage of the power conductors does not exceed fifteen thousand (15,000) volts to ground. All attachments of Licensee shall be placed within the space and at the location designated by the Licensor. All bonding that may be required under the terms of this agreement including Exhibits 1 through 8 will be performed as follows:

Licensee will furnish the bond and attach the same to its cable and Licensor will then attach the bond to its cable. Licensor and Licensee agree to cooperate in scheduling such work so that it may be performed as expeditiously as possible. Licensee shall on demand, reimburse Licensor for its expense incurred in performing such work. Licensor will, upon request, provide Licensee with a written estimate of its charges for performing such bonding prior to commencing work.

6. Licensee shall, at its own expense, make and maintain its attachments in safe condition and in thorough repair, and in a manner suitable to Licensor so as not to conflict with the use of said poles by Licensor or by others, or interfere with the working use of facilities thereon or which may from time to time be placed thereon by Licensor and other joint users. Licensee shall at any time, at its own expense, upon notice from Licensor, relocate, replace or remove its facilities placed on said poles, and transfer them to substituted poles, or perform any other work in connection with said facilities that may be required by Licensor; provided, however, that in cases of emergency (Licensor's judgment as to what constitutes an emergency to be accepted by Licensee as conclusive), Licensor may arrange to relocate, replace or remove the facilities placed on said poles by Licensee, transfer them to substituted poles or perform any other work in connection with said facilities that may be required in the maintenance, replacement, removal or relocation of said poles, the facilities thereon or which may be placed thereon, or for the service needs of Licensor; and Licensee shall, on demand, reimburse Licensor for the expense thereby incurred.
7. Licensor reserves the right to maintain or to discontinue the use of any poles it owns, and to operate its facilities in such manner as will best enable it to fulfill its respective service requirements. It shall not be liable to Licensee, its customers, or any other, for any interruption to service of Licensee or for interference with the operator of Licensee's equipment arising in any manner out of the use or discontinuance of such poles hereunder. Whenever possible, thirty (30) days' notice shall be given the Licensee prior to any move or discontinuance of any pole or poles.
8. Licensor, because of the importance of its common carrier services, reserves the right to inspect each new installation of Licensee's equipment on Licensor's poles and to make periodic inspections of the entire plant of Licensee; and Licensee shall, on demand, reimburse Licensor for the reasonable expense of such inspections. The making of such inspections or the omission thereof shall not operate to relieve Licensee or Licensee's insurer of any responsibility, obligation or liability assumed under this Agreement.

9. Licensee shall exercise special precautions to avoid causing damage to facilities of Licensor and others located on Licensor's poles and to equipment connected or associated with such facilities, and in the event any such damage occurs, Licensee assumes all responsibility for, and agrees promptly to reimburse Licensor and the other users of Licensor's poles in full for all loss and expense occasioned by such damage. Licensee shall make an immediate report to Licensor of the occurrence of any such damage.
10. Licensee shall submit to Licensor evidence, satisfactory to Licensor of Licensee's authority to erect and maintain its equipment within public streets, highways, alleys and other thoroughfares and shall secure any necessary consent from Federal, state, municipal, or other public authorities, or from the owners of private lands and property involved, to construct and maintain Licensee's equipment at the locations of Licensor's poles which it desires to use. Licensee shall indemnify and reimburse Licensor for all loss and expense which result from any claims of governmental bodies or others that either Licensee or Licensor has not a sufficient right or authority for placing and maintaining Licensee's equipment at the locations of the Licensor's poles.
11. Licensee shall indemnify, protect, save harmless, and insure Licensor from and against any and all claims and demands for damages to property and injury or death to persons, including payments made under any Workmans' Compensation Law or under any plan for employees' disability and death benefits, and including all expenses incurred in defending any such claims or demands, which may arise out of or be caused by the erection, maintenance, presence use, rearrangement or removal of the attachments of Licensee's equipment to Licensor's poles, or which may result by reason of the proximity of the cables, wires, equipment, apparatus and appliances of Licensee to the poles of Licensor, or by reason of any negligence of Licensee on or in the vicinity of Licensor's poles not withstanding any negligence of Licensor or others lawfully using said Licensor's poles. Without limiting the foregoing, it is the general intent of Licensor and Licensee that Licensee shall save Licensor harmless from any liability or risk arising out of or in any manner connected with the operation of Licensee's business or with the operation of Licensee's business or with the

operation of Licensee's business or with the facilities of Licensee installed hereunder whether or not due in whole or in part to any act, omission, or negligence of Licensor. It is not the intent of Licensor or Licensee that Licensee shall assume any liability of Licensor that does not arise out of or is not connected with the operation of Licensee's business or with the installation, operation maintenance, presence, use, rearrangement or removal of Licensee's facilities.

Without limiting the scope or extent of the protection afforded Licensor or the liabilities assumed by Licensee herein, Licensee shall obtain and maintain in effect at its own expense for the entire life of this Agreement, the following insurance:

- (a) Workmen's Compensation Insurance with statutory limits and employers liability insurance with limits of not less than One Hundred Thousand Dollars (\$100,000.00). Prior to making any attachments to Licensor's poles, Licensee shall furnish Licensor with a certificate from an insurance carrier acceptable to Licensor stating that policies of insurance have been issued by it to Licensee providing for the insurance coverage listed above and that such policies are in force. Such certificates shall state that the insurance carrier will give Licensor thirty (30) days' prior written notice of any cancellation or material change in policies. Failure to maintain such insurance at any time shall constitute a default of this Agreement but shall not relieve the Licensee from any liabilities assumed under this Agreement.

12. In the event Licensee should make any attachments to Licensor's poles without first having received and accepted a permit as provided in Paragraph 2 hereof, the Licensor shall have the right to summarily and without notice to Licensee, remove such attachments at the cost and expense of Licensee and without any liability therefor.

13. Should Licensee sell or lease the use of its facilities on Licensor's poles without the prior consent in writing of the Licensor as provided for in Section 4 hereof, such action shall constitute forthwith a breach of this Agreement, and Licensor may, at its option, at any time after such breach occurs, forthwith terminate Licensee's attachment rights under this Agreement and require Licensee to

remove at once all of Licensee's equipment from Licensor's poles. If Licensee does not so remove the equipment, Licensor shall have the right to remove it at the cost and expense of Licensee.

14. Should Licensee for any reason cease to furnish the services authorized by its franchise, which this Agreement is designed to facilitate, then and in that event all of Licensee's rights under this Agreement shall automatically terminate and Licensee shall immediately remove its equipment from all of Licensor's poles and if not so removed, Licensor shall have the right to remove it at the cost and expense of Licensee.
15. Licensee may at any time remove its equipment from any poles of Licensor, and shall give Licensor written notice of removal as provided in the appendix attached hereto and made a part hereof. No adjustment prorated or refund of any rental will be due on account of such removal. Should Licensee thereafter again wish to make attachments to such pole or poles, it shall make application and receive a permit therefor, as provided in Paragraph 2 hereof.
16. No use, however extended, of Licensor's poles, or any payments made under this Agreement or other action of Licensee shall create or vest in Licensee any ownership or property rights in Licensor's poles or associated equipment, but Licensee's right therein shall be and remain such as established a mere license under the terms of this Agreement.
17. Nothing herein contained shall be construed as affecting the rights or privileges previously granted by Licensor, by contract or otherwise, to others not parties to this Agreement, to use any poles covered by this Agreement; and Licensor retains the right to continue and extend such rights or privileges. The attachment privileges herein granted shall at all times be subject to such existing contracts and arrangements. Nothing herein contained shall be construed as affecting or limiting the right of Licensor to make other and additional contracts with other persons, firms, corporations or associations for the joint use of Licensor's poles and facilities.

18. Bills for inspections, expenses, and other charges for work performed by Licensor or other joint users under this Agreement other than for attachment rentals shall be payable to the parties presenting such bills within thirty (30) days after presentation. Nonpayment of bills shall constitute a default of this Agreement.
19. Licensee shall furnish a surety bond in form and with sureties satisfactory to Licensor in an amount not less than \$5,000 for each 1,000 poles attached or fraction thereof to guarantee the payment of any sums which may become due to Licensor for rentals, inspection fees, or for any work performed or expense incurred by Licensor or other joint users under the terms of this Agreement including the removal of Licensee's equipment upon termination of its attachment rights under this Agreement.
20. If Licensee shall fail to comply with any of the provisions of this Agreements, including the specifications herein before referred to, or shall default in any of its obligations under the terms hereof or breach this Agreement and shall fail within ten (10) days after or breach, Licensor may, at its option, forthwith terminate in whole or in part Licensee's attachment rights hereunder provided, however, that nothing in this section shall affect the provisions and obligations agreed upon in Sections 14 and 15 hereof. Upon such termination, Licensee shall immediately remove its equipment from the pole or poles involved and if not so removed, Licensor shall have the right to remove it at the cost and expense of Licensee.
21. This Agreement shall become effective upon the date hereof, and if the attachment rights are not terminated in accordance with the provisions of other sections of this agreement which provide for such terminations, shall remain in effect for a term of five (5) years from said date and from year to year thereafter subject to the right of either party hereto to terminate this Agreement at any time following the initial term by giving to the other party at least ninety (90) days' prior written notice of said party's desire to terminate this Agreement, in which case this Agreement shall terminate on the date specified but in no event within less than ninety (90) days, Within thirty (30) days after the termination of this Agreement, as provided in this section, Licensee shall remove Licensee's equipment from Licensor's poles.

- 26. The Appendix attached to and made a part of this Agreement covers construction and operating practices to be observed by the parties hereto. Said practices may be revised by the parties hereto from time to time as changes in operating conditions and experience warrant. Such revisions which do not conflict with the provisions of this Agreement shall be effective when transmitted to the Licensee in writing by the General Plant Manager of the Telephone Company.
- 27. Subject to the provisions of Paragraph 25 hereof, this Agreement shall extend and bind the successors and assigns of the parties hereto.
- 28. If, within one year from the effective date of this Agreement, attachments of Licensee's facilities have not been made to at least 100 poles of Licensor, then, at the option of the Licensor, this Agreement may be terminated forthwith in its entirety. Licensor may exercise its option to terminate this Agreement at any time after the expiration of said one-year period by notifying Licensee in writing of Licensor's election to terminate. In the event of said termination, Licensee shall remove promptly all attachments of its facilities theretofore made to Licensor's poles, and if Licensee fails to so remove them, Licensor may remove them at the cost and expense of the Licensee.

IN WITNESS WHEREOF, the parties hereto have, respectively, caused this Agreement to be duly executed the day and year first above written.

APPENDIX

1. Application and Permit for Attachments

- (a) The Licensee shall prepare an application-permit on the form marked Exhibit (A), attached hereto and made a part hereof, when applying for permission to make attachments to any pole or poles owned by Licensor. The original and three copies of the application-permit form shall be forwarded to Licensor as far in advance of construction as possible. The information provided on said form shall show the location of poles with respect to streets, alleys, addresses and other geographical markings with sufficient accuracy that the exact location and ownership of the poles can be readily determined. The application shall be reviewed and field checked by Licensor, and an estimate shall be made by each party of its nonbetterment cost of any rearrangements and/or pole replacements required to provide suitable space for Licensee's attachments. The ownership of the poles involved shall be determined and recorded on the form at this time.
- (b) If permission to make the proposed attachments can be granted as provided in the Agreement, Licensor shall indicate on the form the estimated nonbetterment costs of any work to be performed by Licensor and will sign it and forward the original and two copies to Licensee for further consideration.
- (c) If acceptable to Licensee, two copies of the form shall be signed and returned to Licensor. The form as thus approved shall constitute a permit for Licensee to make attachments to said pole or poles pursuant to the provisions of the Agreement. Licensor shall consider the accepted permit as its authority to proceed with the rearrangements and/or pole replacements required to provide suitable space for Licensee's attachments. Licensor will advise Licensee when the poles are ready for occupancy.
- (d) Billing for actual nonbetterment costs of plant changes, as covered by application-permit forms, will be issued as soon as practical after completion of the work. Separate billing, if any, shall be submitted directly to the Licensee by Licensor and the Licensee shall promptly reimburse it for the amount of such billing.

2. Effective Date of Attachments

- (a) The effective date of attachments to Licensor's poles for rental purposes shall be the date the permit is accepted by Licensee or the date the first attachment is made to said poles, whichever date is earliest.
- (b) Licensee shall not attach poles covered by this Agreement unless an application-permit form has been fully executed except in special cases where verbal permission may be granted. Such attachments, in all cases, shall be subsequently covered by an application-permit form for record purposes.

3. Termination of Attachments by Licensee

- (a) When all of Licensee's attachments have been removed from a pole or group of poles, Licensee shall prepare a notice of removal on the form marked Exhibit (B), attached hereto and made a part hereof, and forward the original and two copies thereof to Licensor. The information provided on this form should show the location of the poles involved with respect to streets, alleys, addresses and other suitable geographical markings with sufficient accuracy that the exact location and ownership of the poles can be determined.
- (b) Licensor shall determine the ownership of the vacated poles and records said information on the form before signing it and returning the original to the Licensee.

4. Billing for Pole Rentals

- (a) A tabulation of the poles on which the Licensee has attachments as of January 1st and July 1st shall be made by Licensor in cooperation with the Licensee each year this Agreement remains in effect. This tabulation shall include all poles covered by accepted permits plus any poles not covered by accepted permits on which Licensee's attachments are discovered by Licensor in connection with routine inspections of Licensee's facilities.
- (b) The pole attachment records to be maintained by Licensor and the Licensee shall be verified from time to time by means of a complete field check of Licensee's pole attachments which shall be made jointly by Licensor and the Licensee at least once every three years.
- (c) Billing for pole rentals shall be rendered to the Licensee semi-annually.

as of January 1st and July 1st from a billing summary to be prepared by Licensor and approved by the Licensee. The summary shall be based on the joint tabulation of poles attached by Licensee provided for in item (a) above and shall indicate the ownership of such poles.

5. Construction and Maintenance of Attachments

- (a) Licensee's attachments shall be installed, maintained and removed in accordance with the requirements of the National Electric Safety Code, Sixth Edition, or the requirements of any state or local authority having jurisdiction, whichever may be more stringent. All attachments shall be placed within the space and at the location designated by Licensor.
- (b) Drawings marked Exhibits 1 to 8, inclusive, attached to this Appendix, are descriptive of the construction required under some typical conditions where span lengths do not exceed one hundred fifty (150) feet and the voltage of the power conductors does not exceed fifteen thousand (15,000) volts to ground.

Dear Ms. Mau:

Subject: **TRANSFER OF ASSETS FROM TRIAX CABLEVISION USA,
L.P. TO INTERLINK COMMUNICATIONS PARTNERS, LLLP**

This is to acknowledge that GTE South Incorporated ("GTES") has received a request for consent to an assignment from Triax Cablevision USA, L.P. ("Assignor") - to Interlink Communications Partners, LLLP ("Assignee"). This is to advise that GTES consents to the assignment to Assignee by Assignor of all its rights, title and interest in and duties and obligations under CATV Pole Attachment and Cable Duct Arrangement (Kentucky P.S.C. KY No. 2 Section S21) dated December 13, 1994, provided that Assignee agrees to pay any charges or billings payable under the Arrangement in the event Assignor fails or refuses to do so.

In connection with any obligations of Assignor arising before the assignment, GTES will bill the Assignor with respect to such obligations. In the event the assignor shall fail or refuse to pay such obligations, the Assignee shall be responsible for payment of same.

REVISED MAY 1986

AGREEMENT

THIS AGREEMENT, made this 1st day of December, 19 87, by and between CONTINENTAL TELEPHONE COMPANY OF KENTUCKY a corporation of the State of KENTUCKY, having its principal State of Business office in the City of London, hereinafter called Licensor, a party of the first part, and Cumberland Valley Cable TV Co. a corporation of the State of Kentucky hereinafter called Licensee, party of the second part.

WITNESSETH:

WHEREAS, Licensee proposes to furnish Community Antenna Television service to persons residing in Laurel County and vicinity, pursuant to Licensee's authority under a certain franchise granted to it on the 1st day of December, 19 87, by the _____ of the City of _____ and in connection therewith will need to erect and maintain aerial cables, wires, and associated appliances throughout the area to be served, and desires to attach such cables, wires and appliances to poles of Licensor: and

WHEREAS, Licensor is willing to permit, to the extent that it may lawfully do so, the attachment of said cables, wires and appliances to Licensor's poles for the purposes authorized by Licensee's franchise where in its judgment such use will not interfere with its own service requirements or the service requirements of others using such poles, including considerations of economy and safety;

NOW THEREFORE, in consideration of the mutual covenants, terms and conditions herein contained, the parties hereto do hereby mutually covenant and agree as follows:

1. As used in this Agreement, certain terms listed below shall have the following meanings:
 - (a) "Licensor's poles" means pole owned by Licensor located in the immediate vicinity of County of Laurel.
 - (b) "Licensee's equipment" means aerial wires, cables, amplifiers, associated power supply equipment, and other transmission apparatus necessary for the proper operation of Licensee's system in County of Laurel and vicinity in accord with the authority granted to Licensee by its franchise.

2. Before attaching to Licensor's poles, Licensee shall make application and receive a permit therefor on the form provided in the Appendix attached hereto and made a part thereof. If Licensee accepts the permit, it may attach to the poles covered by said permit subject to the terms and conditions of this Agreement. In granting or denying a permit, Licensor reserves the right to determine whether a grant would adversely affect its common carrier communication services and its ability to meet its duties and obligations with respect thereto, including questions of economy, safety and future needs of Licensor and other joint users.
3. If Licensor's pole or poles are inadequate to support Licensee's proposed attachments in accordance with the specifications referred to in Section 5 hereof, and Licensor is willing to replace such poles to permit the attachment of Licensee's equipment thereto, Licensor shall indicate on the application permit form the changes necessary and the estimated nonbetterment costs thereof and return said form to Licensee. If Licensee still desires to make the attachments and returns the form marked so to indicate, Licensor will replace such inadequate poles and Licensee will on demand reimburse Licensor and other joint users for the nonbetterment portion of the cost and expense thereof, including the increased cost of larger poles, sacrificed life value of poles removed, cost of removal less any salvage recovery and the expense of transferring existing facilities from the old to the new poles. Where Licensee's attachments are accommodated on existing poles by rearranging the facilities thereon, Licensee will on demand compensate Licensor and owners of said facilities for the expense incurred in rearranging their respective facilities. Licensee will also on demand reimburse Licensor for any strengthening of poles by guys, anchors or other means, to accommodate the attachment of Licensee's equipment. Should Licensor at any time require the space occupied by Licensee's attachments on poles which have not been replaced at Licensee's expense, Licensor shall give notice to Licensee and Licensee shall either vacate the space by removing its attachments or shall authorize Licensor to replace said poles at the expense of Licensee. in the WIN1949

Licensor reserves the right to deny Licensee the use of any pole or poles where, in Licensor's judgment, the replacement or re-arrangement work necessary to make space available will result in an undue interference or interruption of Licensor's services to its customers.

4. Licensee hereby agrees not to sell or lease the use of its facilities or Licensor's poles, or any portion thereof, without the prior consent in writing of the Licensor.
5. Licensee's equipment, in each and every location (including all equipment which is not attached to Licensor's poles, but which in any way may result in excessive or improper voltages or current being impressed upon any facilities of Licensor or in any hazard to Licensor's facilities or employees or to the public), shall be erected, installed, maintained and removed in accordance with the requirements and specifications of the National Electric Safety Code, Sixth Edition, or any revisions thereof, and in compliance with any applicable rules, regulations or orders now in effect or hereafter issued by any Federal or State commission or any other public authority having jurisdiction. Drawings marked Exhibits 1 to 8, inclusive, included in the Appendix attached hereto and made a part thereof, are descriptive of required construction under some typical conditions where span lengths are not over one hundred fifty (150) feet and the voltage of the power conductors does not exceed fifteen thousand (15,000) volts to ground. All attachments of Licensee shall be placed within the space and at the location designated by the Licensor. All bonding that may be required under the terms of this agreement including Exhibits 1 through 8 will be performed as follows:

Licensee will furnish the bond and attach the same to its cable and Licensor will then attach the bond to its cable. Licensor and Licensee agree to cooperate in scheduling such work so that it may be performed as expeditiously as possible. Licensee shall on demand, reimburse Licensor for its expense incurred in performing such work. Licensor will, upon request, provide Licensee with a written estimate of its charges for performing such bonding prior to commencing work.

6. Licensee shall, at its own expense, make and maintain its attachments in safe condition and in thorough repair, and in a manner suitable to Licensor so as not to conflict with the use of said poles by Licensor or by others, or interfere with the working use of facilities thereon or which may from time to time be placed thereon by Licensor and other joint users. Licensee shall at any time, at its own expense, upon notice from Licensor, relocate, replace or remove its facilities placed on said poles, and transfer them to substituted poles, or perform any other work in connection with said facilities that may be required by Licensor; provided, however, that in cases of emergency (Licensor's judgement as to what constitutes an emergency to be accepted by Licensee as conclusive), Licensor may arrange to relocate, replace or remove the facilities placed on said poles by Licensee, transfer them to substituted poles or perform any other work in connection with said facilities that may be required in the maintenance, replacement, removal or relocation of said poles, the facilities thereon or which may be placed thereon, or for the service needs of Licensor; and Licensee shall, on demand, reimburse Licensor for the expense thereby incurred.
7. Licensor reserves the right to maintain or to discontinue the use of any poles it owns, and to operate its facilities in such manner as will best enable it to fulfill its respective service requirements. It shall not be liable to Licensee, its customers, or any other, for any interruption to service of Licensee or for interference with the operator of Licensee's equipment arising in any manner out of the use or discontinuance of such poles hereunder. Whenever possible, thirty (30) days' notice shall be given the Licensee prior to any move or discontinuance of any pole or poles.
8. Licensor, because of the importance of its common carrier services, reserves the right to inspect each new installation of Licensee's equipment on Licensor's poles and to make periodic inspections of the entire plant of Licensee; and Licensee shall, on demand, reimburse Licensor for the reasonable expense of such inspections. The making of such inspections or the omission thereof shall not operate to relieve Licensee or Licensee's insurer of any responsibility, obligation or liability assumed under this Agreement.

9. Licensee shall exercise special precautions to avoid causing damage to facilities of Licensor and others located on Licensor's poles and to equipment connected or associated with such facilities, and in the event any such damage occurs, Licensee assumes all responsibility for, and agrees promptly to reimburse Licensor and the other users of Licensor's poles in full for all loss and expense occasioned by such damage. Licensee shall make an immediate report to Licensor of the occurrence of any such damage.
10. Licensee shall submit to Licensor evidence, satisfactory to Licensor of Licensee's authority to erect and maintain its equipment within public streets, highways, alleys and other thoroughfares and shall secure any necessary consent from Federal, state, municipal, or other public authorities, or from the owners of private lands and property involved, to construct and maintain Licensee's equipment at the locations of Licensor's poles which it desires to use. Licensee shall indemnify and reimburse Licensor for all loss and expense which result from any claims of governmental bodies or others that either Licensee or Licensor has not a sufficient right or authority for placing and maintaining Licensee's equipment at the locations of the Licensor's poles.
11. Licensee shall indemnify, protect, save harmless, and insure Licensor from and against any and all claims and demands for damages to property and injury or death to persons, including payments made under any Workmans' Compensation Law or under any plan for employees' disability and death benefits, and including all expenses incurred in defending any such claims or demands, which may arise out of or be caused by the erection, maintenance, presence use, rearrangement or removal of the attachments of Licensee's equipment to Licensor's poles, or which may result by reason of the proximity of the cables, wires, equipment, apparatus and appliances of Licensee to the poles of Licensor, or by reason of any negligence of Licensee on or in the vicinity of Licensor's poles not withstanding any negligence of Licensor or others lawfully using said Licensor's poles. Without limiting the foregoing, it is the general intent of Licensor and Licensee that Licensee shall save Licensor harmless from any liability or risk arising out of or in any manner connected with the operation of Licensee's business or with the operation of Licensor's poles.

operation of Licensee's business or with the facilities of Licensee installed hereunder whether or not due in whole or in part to any act, omission, or negligence of Licensor. It is not the intent of Licensor or Licensee that Licensee shall assume any liability of Licensor that does not arise out of or is not connected with the operation of Licensee's business or with the installation, operation maintenance, presence, use, rearrangement or removal of Licensee's facilities.

Without limiting the scope or extent of the protection afforded Licensor or the liabilities assumed by Licensee herein, Licensee shall obtain and maintain in effect at its own expense for the entire life of this Agreement, the following insurance:

- (a) Workmen's Compensation Insurance with statutory limits and employers liability insurance with limits of not less than One Hundred Thousand Dollars (\$100,000.00). Prior to making any attachments to Licensor's poles, Licensee shall furnish Licensor with a certificate from an insurance carrier acceptable to Licensor stating that policies of insurance have been issued by it to Licensee providing for the insurance coverage listed above and that such policies are in force. Such certificates shall state that the insurance carrier will give Licensor thirty (30) days' prior written notice of any cancellation or material change in policies. Failure to maintain such insurance at any time shall constitute a default of this Agreement but shall not relieve the Licensee from any liabilities assumed under this Agreement.

- 12. In the event Licensee should make any attachments to Licensor's poles without first having received and accepted a permit as provided in Paragraph 2 hereof, the Licensor shall have the right to summarily and without notice to Licensee, remove such attachments at the cost and expense of Licensee and without any liability therefor.
- 13. Should Licensee sell or lease the use of its facilities on Licensor's poles without the prior consent in writing of the Licensor as provided for in Section 4 hereof, such action shall constitute forthwith a breach of this Agreement, and Licensor may, at its option, at any time after such breach occurs, forthwith terminate Licensee's attachment rights under this Agreement and require Licensee to

remove at once all of Licensee's equipment from Licensor's poles. If Licensee does not so remove the equipment, Licensor shall have the right to remove it at the cost and expense of Licensee.

14. Should Licensee for any reason cease to furnish the services authorized by its franchise, which this Agreement is designed to facilitate, then and in that event all of Licensee's rights under this Agreement shall automatically terminate and Licensee shall immediately remove its equipment from all of Licensor's poles and if not so removed, Licensor shall have the right to remove it at the cost and expense of Licensee.
15. Licensee may at any time remove its equipment from any poles of Licensor, and shall give Licensor written notice of removal as provided in the appendix attached hereto and made a part hereof. No adjustment prorated or refund of any rental will be due on account of such removal. Should Licensee thereafter again wish to make attachments to such pole or poles, it shall make application and receive a permit therefor, as provided in Paragraph 2 hereof.
16. No use, however extended, of Licensor's poles, or any payments made under this Agreement or other action of Licensee shall create or vest in Licensee any ownership or property rights in Licensor's poles or associated equipment, but Licensee's right therein shall be and remain such as established a mere license under the terms of this Agreement.
17. Nothing herein contained shall be construed as affecting the rights or privileges previously granted by Licensor, by contract or otherwise, to others not parties to this Agreement, to use any poles covered by this Agreement; and Licensor retains the right to continue and extend such rights or privileges. The attachment privileges herein granted shall at all times be subject to such existing contracts and arrangements. Nothing herein contained shall be construed as affecting or limiting the right of Licensor to make other and additional contracts with other persons, firms, corporations or associations for the joint use of Licensor's poles and facilities.

18. Bills for inspections, expenses, and other charges for work performed by Licensor or other joint users under this Agreement other than for attachment rentals shall be payable to the parties presenting such bills within thirty (30) days after presentation. Nonpayment of bills shall constitute a default of this Agreement.
19. Licensee shall furnish a surety bond in form and with sureties satisfactory to Licensor in an amount not less than \$5,000 for each 1,000 poles attached or fraction thereof to guarantee the payment of any sums which may become due to Licensor for rentals, inspection fees, or for any work performed or expense incurred by Licensor or other joint users under the terms of this Agreement including the removal of Licensee's equipment upon termination of its attachment rights under this Agreement.
20. If Licensee shall fail to comply with any of the provisions of this Agreements, including the specifications herein before referred to, or shall default in any of its obligations under the terms hereof or breach this Agreement and shall fail within ten (10) days after or breach, Licensor may, at its option, forthwith terminate in whole or in part Licensee's attachment rights hereunder provided, however, that nothing in this section shall affect the provisions and obligations agreed upon in Sections 14 and 15 hereof. Upon such termination, Licensee shall immediately remove its equipment from the pole or poles involved and if not so removed, Licensor shall have the right to remove it at the cost and expense of Licensee.
21. This Agreement shall become effective upon the date hereof, and if the attachment rights are not terminated in accordance with the provisions of other sections of this agreement which provide for such terminations, shall remain in effect for a term of five (5) years from said date and from year to year thereafter subject to the right of either party hereto to terminate this Agreement at any time following the initial term by giving to the other party at least ninety (90) days' prior written notice of said party's desire to terminate this Agreement, in which case this Agreement shall terminate on the date specified but in no event within less than ninety (90) days, Within thirty (30) days after the termination of this Agreement, as provided in this section, Licensee shall remove Licensee's equipment from WIN1955's poles

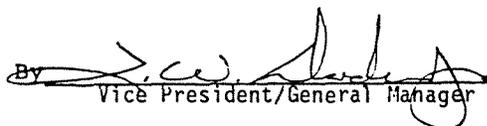

- 21. The Appendix attached to and made a part of this Agreement covers construction and operating practices to be observed by the parties hereto. Said practices may be revised by the parties hereto from time to time as changes in operating conditions and experience warrant. Such revisions which do not conflict with the provisions of this Agreement shall be effective when transmitted to the Licensee in writing by the General Plant Manager of the Telephone Company.
- 22. Subject to the provisions of Paragraph 25 hereof, this Agreement shall extend and bind the successors and assigns of the parties hereto.
- 23. If, within one year from the effective date of this Agreement, attachments of Licensee's facilities have not been made to at least 100 poles of Licensor, then, at the option of the Licensor, this Agreement may be terminated forthwith in its entirety. Licensor may exercise its option to terminate this Agreement at any time after the expiration of said one-year period by notifying Licensee in writing of Licensor's election to terminate. In the event of said termination, Licensee shall remove promptly all attachments of its facilities theretofore made to Licensor's poles, and if Licensee fails to so remove them, Licensor may remove them at the cost and expense of the Licensee.

IN WITNESS WHEREOF, the parties hereto have, respectively, caused this Agreement to be duly executed the day and year first above written.

APPENDIX

1. Application and Permit for Attachments

- (a) The Licensee shall prepare an application-permit on the form marked Exhibit (A), attached hereto and made a part hereof, when applying for permission to make attachments to any pole or poles owned by Licensor. The original and three copies of the application-permit form shall be forwarded to Licensor as far in advance of construction as possible. The information provided on said form shall show the location of poles with respect to streets, alleys, addresses and other geographical markings with sufficient accuracy that the exact location and ownership of the poles can be readily determined. The application shall be reviewed and field checked by Licensor, and an estimate shall be made by each party of its nonbetterment cost of any rearrangements and/or pole replacements required to provide suitable space for Licensee's attachments. The ownership of the poles involved shall be determined and recorded on the form at this time.
- (b) If permission to make the proposed attachments can be granted as provided in the Agreement, Licensor shall indicate on the form the estimated nonbetterment costs of any work to be performed by Licensor and will sign it and forward the original and two copies to Licensee for further consideration.
- (c) If acceptable to Licensee, two copies of the form shall be signed and returned to Licensor. The form as thus approved shall constitute a permit for Licensee to make attachments to said pole or poles pursuant to the provisions of the Agreement. Licensor shall consider the accepted permit as its authority to proceed with the rearrangements and/or pole replacements required to provide suitable space for Licensee's attachments. Licensor will advise Licensee when the poles are ready for occupancy.
- (d) Billing for actual nonbetterment costs of plant changes, as covered by application-permit forms, will be issued as soon as practical after completion of the work. Separate billing, if any, shall be submitted directly to the Licensee by Licensor and the Licensee shall promptly reimburse it for the amount of such billing.

2. Effective Date of Attachments

- (a) The effective date of attachments to Licensor's poles for rental purposes shall be the date the permit is accepted by Licensee or the date the first attachment is made to said poles, whichever date is earliest.
- (b) Licensee shall not attach poles covered by this Agreement unless an application-permit form has been fully executed except in special cases where verbal permission may be granted. Such attachments, in all cases, shall be subsequently covered by an application-permit form for record purposes.

3. Termination of Attachments by Licensee

- (a) When all of Licensee's attachments have been removed from a pole or group of poles, Licensee shall prepare a notice of removal on the form marked Exhibit (B), attached hereto and made a part hereof, and forward the original and two copies thereof to Licensor. The information provided on this form should show the location of the poles involved with respect to streets, alleys, addresses and other suitable geographical markings with sufficient accuracy that the exact location and ownership of the poles can be determined.
- (b) Licensor shall determine the ownership of the vacated poles and records said information on the form before signing it and returning the original to the Licensee.

4. Billing for Pole Rentals

- (a) A tabulation of the poles on which the Licensee has attachments as of January 1st and July 1st shall be made by Licensor in cooperation with the Licensee each year this Agreement remains in effect. This tabulation shall include all poles covered by accepted permits plus any poles not covered by accepted permits on which Licensee's attachments are discovered by Licensor in connection with routine inspections of Licensee's facilities.
- (b) The pole attachment records to be maintained by Licensor and the Licensee shall be verified from time to time by means of a complete field check of Licensee's pole attachments which shall be made jointly by Licensor and the Licensee at least once every three years.
- (c) Billing for pole rentals shall be rendered to the Licensee semi-annually.

ADDENDUM TO LICENSE AGREEMENT
DATED JULY, 11, 1979

Paragraph 3 is hereby amended to include the following sentence:

"Licensor also reserves the right, at any time it requires the space occupied by Licensee's attachments to poles which have been replaced at Licensee's expense, to require Licensee nevertheless to remove or relocate same upon being reimbursed 100% of Licensee's expense in connection with the prior replacement of said pole or poles if its facilities have been attached thereto for one year or less; 80% if for more than one but less than two years; 60% if for as many as two but less than three years; 40% if for as many as three years but less than four years; 20% if for as many as four but less than five years and without reimbursement if Licensee's facilities have been attached to said pole or poles for five years or more."

REVISED SEPTEMBER 1988

AGREEMENT

THIS AGREEMENT, made this 31 day of March, 19 89,
by and between CONTEL OF KENTUCKY, INC. a corporation of the State of KENTUCKY,
having its principal State of Business office in the City of London, hereinafter
called Licensor, a party of the first part, and Lincoln Cable TV a
corporation of the State of Kentucky, hereinafter called Licensee,
party of the second party.

WITNESSETH:

WHEREAS, Licensee proposes to furnish Community Antenna Television service to
persons residing in West Rockcastle County and vicinity, pursuant to Licensee's
authority under a certain franchise granted to it on the 28 day of
February, 19 89, by the County Judge Executive of the City
of Rockcastle and in connection therewith will need to erect and
maintain aerial cables, wires, and associated appliances throughout the area to
be served, and desires to attach such cables, wires and appliances to poles of
Licensor: and

WHEREAS, Licensor is willing to permit, to the extent that it may lawfully
do so, the attachment of said cables, wires and appliances to Licensor's poles for
the purposes authorized by Licensee's franchise where in its judgement such use
will not interfere with its own service requirements or the service requirements
of others using such poles, including considerations of economy and safety;

NOW THEREFORE, in consideration of the mutual covenants, terms and conditions
herein contained, the parties hereto do hereby mutually covenant and agree as follows:

1. As used in this Agreement, certain terms listed below shall have the
following meanings:

(a) "Licensor's poles" means poles owned by Licensor located in the
immediate vicinity of West Rockcastle County.

WIN1972

- (b) "Licensee's equipment" means aerial wires, cables, amplifiers, associated power supply equipment, and other transmission apparatus necessary for the proper operation of Licensee's system in West Rockcastle County and vicinity in accord with the authority granted to Licensee by its franchise.
2. Before attaching to Licensor's poles, Licensee shall make application and receive a permit therefor on the form provided in the Appendix attached hereto and made a part thereof. If Licensee accepts the permit, it may attach to the poles covered by said permit subject to the terms and conditions of this Agreement. In granting or denying a permit, Licensor reserves the right to determine whether a grant would adversely affect its common carrier communication services and its ability to meet its duties and obligations with respect thereto, including questions of economy, safety and future needs of Licensor and other joint users.
 3. If Licensor's pole or poles are inadequate to support Licensee's proposed attachments in accordance with the specifications referred to in Section 5 hereof, and Licensor is willing to replace such poles to permit the attachment of Licensee's equipment thereto, Licensor shall indicate on the application permit form the changes necessary and the estimated nonbetterment costs thereof and return said form to Licensee. If Licensee still desires to make the attachments and returns the form marked so to indicate, Licensor will replace such inadequate poles and Licensee will on demand reimburse Licensor and other joint users for the nonbetterment portion of the cost and expense thereof, including the increased cost of larger poles, sacrificed life value of poles removed, cost of removal less any salvage recovery and the expense of transferring existing facilities from the old to the new poles. Where Licensee's attachments are accommodated on existing poles by rearranging the facilities thereon, Licensee will on

demand compensate Licensor and owners of said facilities for the expense incurred in rearranging their respective facilities. Licensee will also on demand reimburse Licensor for any strengthening of poles by guys, anchors or other means, to accommodate the attachment of Licensee's equipment. Should Licensor at any time require the space occupied by Licensee's attachments on poles which have not been replaced at Licensee's expense, Licensor shall give notice to Licensee and Licensee shall either vacate the space by removing its attachments or shall authorize Licensor to replace said poles at the expense of Licensee, in the same manner as provided above. Licensor reserves the right to deny Licensee the use of any pole or poles where, in Licensor's judgment, the replacement or rearrangement work necessary to make space available will result in an undue interference or interruption of Licensor's services to its customers.

4. Licensee hereby agrees not to sell or lease the use of its facilities or Licensor's poles, or any portion thereof, without the prior consent in writing of the Licensor.
5. Licensee's equipment, in each and every location (including all equipment which is not attached to Licensor's poles, but which in any way may result in excessive or improper voltages or current being impressed upon any facilities of Licensor or in any hazard to Licensor's facilities or employees or to the public), shall be erected, installed, maintained and removed in accordance with the requirements and specifications of the National Electric Safety Code, Sixth Edition, or any revisions thereof, and in compliance with any applicable rules, regulations or orders now in effect or hereafter issued by any Federal or State commission or any other public authority having jurisdiction. Drawings marked Exhibits 1 to 3, inclusive, included in the Appendix attached hereto and made a part thereof, are descriptive of required construction under some typical

conditions where span lengths are not over one hundred fifty (150) feet and the voltage of the power conductors does not exceed fifteen thousand (15,000) volts to ground. All attachments of Licensee shall be placed within the space and at the location designated by the Licensor. All bonding that may be required under the terms of this agreement including Exhibits 1 through 3 will be performed as follows:

Licensee will furnish the bond and attach the same to its cable and Licensor will then attach the bond to its cable. Licensor and Licensee agree to cooperate in scheduling such work so that it may be performed as expeditiously as possible. Licensee shall on demand, reimburse Licensor for its expense incurred in performing such work. Licensor will, upon request, provide Licensee with a written estimate of its charges for performing such bonding prior to commencing work.

6. Licensee shall, at its own expense, make and maintain its attachments in safe condition and in thorough repair, and in a manner suitable to Licensor so as not to conflict with the use of said poles by Licensor or by others, or interfere with the working use of facilities thereon or which may from time to time be placed thereon by Licensor and other joint users. Licensee shall at any time, at its own expense, upon notice from Licensor, relocate, replace or remove its facilities placed on said poles, and transfer them to substituted poles, or perform any work in connection with said facilities that may be required by Licensor; provided, however, that in cases of emergency (Licensor's judgement as to what constitutes an emergency to be accepted by Licensee as conclusive), Licensor may arrange to relocate, replace or remove the facilities placed on said poles by Licensee, transfer them to substituted poles or perform any other work in connection with said facilities that may be required in the maintenance, replacement, removal or relocation of said poles, the facilities thereon

or which may be placed thereon, or for the service needs of Licensor; and Licensee shall, on demand, reimburse Licensor for the expense thereby incurred.

7. Licensor reserves the right to maintain or to discontinue the use of any poles it owns, and to operate its facilities in such manner as will best enable it to fulfill its respective service requirements. It shall not be liable to Licensee, its customers, or any other, for any interruption to service of Licensee or for interference with the operator of Licensee's equipment arising in any manner out of the use or discontinuance of such poles hereunder. Whenever possible, thirty (30) days' notice shall be given the Licensee prior to any move or discontinuance of any pole or poles.
8. Licensor, because of the importance of its common carrier services, reserves the right to inspect each new installation of Licensee's equipment on Licensor's poles and to make periodic inspections of the entire plant of Licensee; and Licensee shall, on demand, reimburse Licensor for the reasonable expense of such inspections. The making of such inspections or the omission thereof shall not operate to relieve Licensee or Licensee's insurer of any responsibility, obligation or liability assumed under this Agreement.
9. Licensee shall exercise special precautions to avoid causing damage to facilities of Licensor and others located on Licensor's poles and to equipment connected or associated with such facilities, and in the event any such damage occurs, Licensee assumes all responsibility for, and agrees promptly to reimburse Licensor and the other users of Licensor's poles in full for all loss and expense occasioned by such damage. Licensee shall make an immediate report to Licensor of the occurrence of any such damage.
10. Licensee shall submit to Licensor evidence, satisfactory to Licensor, of Licensee's authority to erect and maintain its equipment within public

streets, highways, alleys and other thorough-fares and shall secure any necessary consent from Federal, State, Municipal, or other public authorities, or from the owners of private lands and property involved, to construct and maintain Licensee's equipment at the locations of Licensor's poles which it desires to use. Licensee shall indemnify and reimburse Licensor for all loss and expense which results from any claims of governmental bodies or others that either Licensee or Licensor has not a sufficient right or authority for placing and maintaining Licensee's equipment at the locations of the Licensor's poles.

11. Licensee shall indemnify, protect, save harmless, and insure Licensor from and against any and all claims and demands for damages to property and injury or death to persons, including payments made under any Workmans' Compensation Law or under any plan for employees' disability and death benefits, and including all expenses incurred in defending any such claims or demands, which may arise out of or be caused by the erection, maintenance, presence, use, rearrangement or removal of the attachments of Licensee's equipment to Licensor's poles, or which may result by reason of the proximity of the cables, wires, equipment, apparatus and appliances of Licensee to the poles of Licensor, or by reason of any negligence of Licensee on or in the vicinity of Licensor's poles notwithstanding any negligence of Licensor or others lawfully using said Licensor's poles. Without limiting the foregoing, it is the general intent of Licensor and Licensee that Licensee shall save Licensor harmless from any liability or risk arising out of or in any manner connected with the operation of Licensee's business or with the operation of Licensee's business or with the operation of Licensee's business or with the facilities of Licensee installed hereunder whether or not due in whole or in part to any act, omission, or negligence of Licensor. It is not the intent of Licensor or Licensee that Licensee shall assume any

liability of Licensor that does not arise out of or is not connected with the operation of Licensee's business or with the installation, operation, maintenance, presence, use, rearrangement or removal of Licensee's facilities. Without limiting the scope or extent of the protection afforded Licensor or the liabilities assumed by Licensee herein, Licensee shall obtain and maintain in effect at its own expense for the entire life of this Agreement, the following insurance:

(a) Workmen's Compensation Insurance with statutory limits and employers liability insurance with limits of not less than Five Hundred Thousand Dollars (\$500,000.00). Prior to making any attachments to Licensor's poles, Licensee shall furnish Licensor with a certificate from an insurance carrier acceptable to Licensor stating that policies of insurance have been issued by it to Licensee providing for the insurance coverage listed above and that such policies are in force. Such certificates shall state that the insurance carrier will give Licensor thirty (30) days' prior written notice of any cancellation or material change in policies. Failure to maintain such insurance at any time shall constitute a default of this Agreement but shall not relieve the Licensee from any liabilities assumed under this Agreement.

12. In the event Licensee should make any attachments to Licensor's poles without first having received and accepted a permit as provided in Paragraph 2 hereof, the Licensor shall have the right to summarily and without notice to Licensee, remove such attachments at the cost and expense of Licensee and without any liability therefor.
13. Should Licensee sell or lease the use of its facilities on Licensor's poles without the prior consent in writing of the Licensor as provided for in Section 4 hereof, such action shall constitute forthwith a breach of this

Agreement, and Licensor may, at its option, at any time after such breach occurs, forthwith terminate Licensee's attachment rights under this Agreement and require Licensee to remove at once all of Licensee's equipment from Licensor's poles. If Licensee does not so remove the equipment, Licensor shall have the right to remove it at the cost and expense of Licensee.

14. Should Licensee for any reason cease to furnish the services authorized by its franchise, which this Agreement is designed to facilitate, then and in that event all of Licensee's rights under this Agreement shall automatically terminate and Licensee shall immediately remove its equipment from all of Licensor's poles and if not so removed, Licensor shall have the right to remove it at the cost and expense of the Licensee.
15. Licensee may at any time remove its equipment from any poles of Licensor, and shall give Licensor written notice of removal as provided in the appendix attached hereto and made a part hereof. No adjustment prorate or refund of any rental will be due on account of such removal. Should Licensee thereafter again wish to make attachments to such pole or poles, it shall make application and receive a permit therefor, as provided in Paragraph 2 hereof.
16. No use, however extended, of Licensor's poles, or any payments made under this Agreement or other action of Licensee shall create or vest in Licensee any ownership or property rights in Licensor's poles or associated equipment, but Licensee's right therein shall be and remain such as established a mere license under the terms of this Agreement.
17. Nothing herein contained shall be construed as affecting the rights or privileges previously granted by Licensor, by contract or otherwise, to others not parties of this Agreement, to use any poles covered by this Agreement; and Licensor retains the right to continue and extend such rights

or privileges. The attachment privileges herein granted shall at all times be subject to such existing contracts and arrangements. Nothing herein contained shall be construed as affecting or limiting the right of Licensor to make other and additional contracts with other persons, firms, corporations or associations for the joint use of Licensor's poles and facilities.

18. Bills for inspections, expenses, and other charges for work performed by Licensor or other joint users under this Agreement other than for attachment rentals shall be payable to the parties presenting such bills within thirty (30) days after presentation. Nonpayment of bills shall constitute a default of this Agreement.
19. Licensee shall furnish a surety bond in form and with sureties satisfactory to Licensor in an amount not less than \$5,000 for each 1,000 poles attached or fraction thereof to guarantee the payment of any sums which may become due to Licensor for rentals, inspection fees, or for any work performed or expense incurred by Licensor or other joint users under the terms of this Agreement including the removal of Licensee's equipment upon termination of its attachment rights under this Agreement.
20. If Licensee shall fail to comply with any of the provisions of this Agreements, including the specifications herein before referred to, or shall default in any of its obligations under the terms hereof or breach this Agreement and shall fail within then (10) days after or breach, Licensor may, at its option, forthwith terminate in whole or in part Licensee's attachment rights hereunder, provided, however, that nothing in this section shall affect the provisions and obligations agreed upon in Sections 14 of 15 hereof. Upon such termination, Licensee shall immediately remove its equipment from the pole or poles involved and if not so removed, Licensor shall have the right to remove it at the cost and expense of Licensee.

21. This Agreement shall become effective upon the date hereof, and if the attachment rights are not terminated in accordance with the provisions of other sections of this agreement which provide for such terminations, shall remain in effect for a term of five (5) years from said date and from year to year thereafter subject to the right of either party hereto to terminate this Agreement at any time following the initial term by giving to the other party at least ninety (90) days' prior written notice of said party's desire to terminate this Agreement, in which case this Agreement shall terminate on the date specified but in no event within less than ninety (90) days, Within thirty (30) days after the termination of this Agreement, as provided in this section, Licensee shall remove Licensee's equipment from Licensor's poles.
22. The Appendix attached to and made a part of this Agreement covers construction and operating practices to be observed by the parties hereto. Said practices may be revised by the parties hereto from time to time as changes in operating conditions and experience warrant. Such revisions which do not conflict with the provisions of this Agreement shall be effective when transmitted to the Licensee in writing by the General Plant Manager of the Telephone Company.
23. If, within one year from the effective date of this Agreement, attachments of Licensee's facilities have not been made to at least 100 poles of Licensor, then, at the option of the Licensor, this Agreement may be terminated forthwith in its entirety. Licensor may exercise its option to terminate this Agreement at any time after the expiration of said one-year period by notifying Licensee in writing of Licensor's election to terminate. In the event of said termination, Licensee shall remove promptly all attachments of its facilities theretofore made to Licensor's poles, and if Licensee fails to so remove them, Licensor may remove them at the cost and expense of the Licensee.

IN WITNESS WHEREOF, the parties hereto have, respectively, caused this Agreement to be duly executed the day and year first above written.

APPENDIX

1. Application and Permit for Attachments

- (a) The Licensee shall prepare an application-permit on the form marked Exhibit (A), attached hereto and made a part hereof, when applying for permission to make attachments to any pole or poles owned by Licensor. The Original and three copies of the application-permit form shall be forwarded to Licensor as far in advance of construction as possible. The information provided on said form shall show the location of poles with respect to streets, alleys, addresses and other geographical markings with sufficient accuracy that the exact location and ownership of the poles can be readily determined. The application shall be reviewed and field checked by Licensor, and an estimate shall be made by each party of its nonbetterment cost of any rearrangements and/or pole replacements required to provide suitable space for Licensee's attachments. The ownership of the poles involved shall be determined and recorded on the form at this time.
- (b) If permission to make the proposed attachments can be granted as provided in the Agreement, Licensor shall indicate on the form the estimated nonbetterment costs of any work to be performed by Licensor and will sign it and forward the original and two copies to Licensee for future consideration.
- (c) If acceptable to Licensee, two copies of the form shall be signed and returned to Licensor. The form as thus approved shall constitute a permit for Licensee to make attachments to said pole or poles pursuant to the provisions of the Agreement. Licensor shall consider the accepted permit as its authority to proceed with the rearrangement and/or pole replacements required to provide suitable space for Licensee's attachments. Licensor will advise Licensee when the poles are ready for occupancy.

- (d) Billing for actual nonbetterment costs of plant changes, as covered by application-permit forms, will be issued as soon as practical after completion of the work. Separate billing, if any, shall be submitted directly to the Licensee by Licensor and the Licensee shall promptly reimburse it for the amount of such billing.

2. Effective Date of Attachments

- (a) The effective date of attachments to Licensor's poles for rental purposes shall be the date the permit is accepted by Licensee or the date the first attachment is made to said poles, whichever date is earliest.
- (b) Licensee shall not attach poles covered by this Agreement unless an application-permit form has been fully executed except in special cases where verbal permission may be granted. Such attachments, in all cases, shall be subsequently covered by an application-permit form for record purposes.

3. Termination of Attachments by Licensee

- (a) When all of Licensee's attachments have been removed from a pole or group of poles, Licensee shall prepare a notice of removal on the form marked Exhibit (B), attached hereto and made a part hereof, and forward the original and two copies thereof to Licensor. The information provided on this form should show the location of the poles involved with respect to streets, alleys, addresses and other suitable geographical markings with sufficient accuracy that the exact location and ownership of the poles can be determined.
- (b) Licensor shall determine the ownership of the vacated poles and records said information on the form before signing it and returning the original to the Licensee.

4. Billing for Pole Rentals

- (a) A tabulation of the poles on which the Licensee has attachments as of

WIN1984

January 1st and July 1st shall be made by Licensor in cooperation with the Licensee each year this Agreement remains in effect. This tabulation shall include all poles covered by accepted permits plus any poles not covered by accepted permits on which Licensee's attachments are discovered by Licensor in connection with routine inspections of Licensee's facilities.

- (b) The pole attachment records to be maintained by Licensor and the Licensee shall be verified from time to time by means of a complete field check of Licensee's pole attachments which shall be made jointly by Licensor and the Licensee at least once every three years.
- (c) Billing for pole rentals shall be rendered to the Licensee semi-annually as of January 1st and July 1st from a billing summary to be prepared by Licensor and approved by the Licensee. The summary shall be based on the joint tabulation of poles attached by Licensee provided for in item (a) above and shall indicate the ownership of such poles.

5. Construction and Maintenance of Attachments

- (a) Licensee's attachments shall be installed, maintained and removed in accordance with the requirements of the National Electric Safety Code, 1987 Edition, or the requirements of any state or local authority having jurisdiction, whichever may be more stringent. All attachments shall be placed within the space and at the location designated by Licensor.
- (b) Drawings marked Exhibits 1 thru 3, inclusive, attached to this Appendix, are descriptive of the construction required under some typical conditions where span lengths do not exceed one hundred fifty (150) feet and the voltage of the power conductors does not exceed fifteen thousand (15,000) volts to ground.

KY-112.085

AGREEMENT

THIS AGREEMENT, made this 29th day of June, 19 72, by and between Kentucky Telephone Company, a corporation of the State of Kentucky, having its principal State of business office in the City of London, hereinafter called Licensor, a party of the first part, and Perfect T. V. Company, a corporation of the State of Kentucky, hereinafter called Licensee, party of the second part.

WITNESSETH:

WHEREAS, Licensee proposes to furnish community antenna television service to persons residing in the City of Manchester, also County and vicinity, pursuant to Licensee's authority under a certain franchise granted to it on the 1st day of December, 19 54, by the City of Manchester of the City of Manchester, and in connection therewith will need to erect and maintain aerial cables, wires, and associated appliances throughout the area to be served, and desires to attach such cables, wires and appliances to poles of Licensor; and

WHEREAS, Licensor is willing to permit, to the extent that it may lawfully do so, the attachment of said cables, wires and appliances to Licensor's poles for the purposes authorized by Licensee's franchise where in its judgment such use will not interfere with its own service requirements or the service requirements of others using such poles, including considerations of economy and safety;

NOW THEREFORE, in consideration of the mutual covenants, terms and conditions herein contained, the parties hereto do hereby mutually covenant and agree as follows:

1. As used in this Agreement, certain terms listed below shall have the following meanings:

- (a) "Licensor's poles" means poles owned by Licensor located in or in the immediate vicinity of Manchester, Clay County.
- (b) "Licensee's equipment" means aerial wires, cables, amplifiers, associated power supply equipment, and other transmission apparatus necessary for the proper operation of Licensee's system in the City of Manchester, Clay County and vicinity

6. Licensee shall, at its own expense, make and maintain its attachments in safe condition and in thorough repair, and in a manner suitable to Licensor so as not to conflict with the use of said poles by Licensor or by others, or interfere with the working use of facilities thereon or which may from time to time be placed thereon by Licensor and other joint users. Licensee shall at any time, at its own expense, upon notice from Licensor, relocate, replace or remove its facilities placed on said poles, and transfer them to substituted poles, or perform any other work in connection with said facilities that may be required by Licensor; provided, however, that in cases of emergency (Licensor's judgement as to what constitutes an emergency to be accepted by Licensee as conclusive), Licensor may arrange to relocate, replace or remove the facilities placed on said poles by Licensee, transfer them to substituted poles or perform any other work in connection with said facilities that may be required in the maintenance, replacement, removal or relocation of said poles, the facilities thereon or which may be placed thereon, or for the service needs of Licensor; and Licensee shall, on demand, reimburse Licensor for the expense thereby incurred.
7. Licensor reserves the right to maintain or to discontinue the use of any poles it owns, and to operate its facilities in such manner as will best enable it to fulfill its respective service requirements. It shall not be liable to Licensee, its customers, or any other, for any interruption to service of Licensee or for interference with the operator of Licensee's equipment arising in any manner out of the use or discontinuance of such poles hereunder. Whenever possible, thirty (30) days' notice shall be given the Licensee prior to any move or discontinuance of any pole or poles.
8. Licensor, because of the importance of its common carrier services, reserves the right to inspect each new installation of Licensee's equipment on Licensor's poles and to make periodic inspections of the entire plant of Licensee; and Licensee shall, on demand, reimburse Licensor for the reasonable expense of such inspections. The making of such inspections or the omission thereof shall not operate to relieve Licensee or Licensee's insurer of any responsibility, obligation or liability assumed under this Agreement.

9. Licensee shall pay to Licensor, for attachments made to the Licensor's poles under this Agreement, a rental at the rate of \$ [REDACTED] per pole per year. Said rental shall be payable semi-annually in advance on the fifteenth day of January and July of each year during which this Agreement remains in effect. Semi-annual rental payments shall be based on the number of poles on which Licensee has attachments on the first day of the month in which said rentals are payable. The number of poles attached by Licensee shall be mutually determined by the parties in the manner specified in the Appendix attached hereto and made a part hereof. At the end of the first five-year period, and of every two-year period thereafter during the term of this Agreement, at the request of either party, the parties hereto shall review and may adjust the pole rental in accordance with then existing economic conditions which might require such adjustment in order to maintain a fair fee for the ensuing term. If agreement cannot be reached as to an adjusted fee, either party can terminate this Agreement upon twelve (12) months' advance notice.

10. Licensee shall exercise special precautions to avoid causing damage to facilities of Licensor and others located on Licensor's poles and to equipment connected or associated with such facilities, and in the event any such damage occurs, Licensee assumes all responsibility for, and agrees promptly to reimburse Licensor and the other users of Licensor's poles in full for all loss and expense occasioned by such damage. Licensee shall make an immediate report to Licensor of the occurrence of any such damage.

11. Licensee shall submit to Licensor evidence, satisfactory to Licensor, of Licensee's authority to erect and maintain its equipment within public streets, highways, alleys and other thoroughfares and shall secure any necessary consent from Federal, state, municipal, or other public authorities, or from the owners of private lands and property involved, to construct and maintain Licensee's equipment at the locations of Licensor's poles which it desires to use. Licensee shall indemnify and reimburse Licensor for all loss and expense which result from any claims of governmental bodies or others that either Licensee or Licensor has not a sufficient right or authority for placing and

as to any one accident with respect to bodily injury, including death, and with limits of One Hundred Thousand Dollars (\$100,000.00) as to any one accident and Three Hundred Thousand Dollars (\$300,000.00) in the aggregate with respect to property damage; and

- (b) Workmen's Compensation Insurance with statutory limits and employers liability insurance with limits of not less than One Hundred Thousand Dollars (\$100,000.00).

Prior to making any attachments to Licensor's poles, Licensee shall furnish Licensor with a certificate from an insurance carrier acceptable to Licensor stating that policies of insurance have been issued by it to Licensee providing for the insurance coverage listed above and that such policies are in force. Such certificates shall state that the insurance carrier will give Licensor thirty (30) days' prior written notice of any cancellation or material change in policies. Failure to maintain such insurance at any time shall constitute a default of this Agreement but shall not relieve the Licensee from any liabilities assumed under this Agreement.

13. In the event Licensee should make any attachments to Licensor's poles without first having received and accepted a permit as provided in Paragraph 2 hereof, the Licensor shall have the right to summarily and without notice to Licensee, remove such attachments at the cost and expense of Licensee and without any liability therefor.
14. Should Licensee sell or lease the use of its facilities on Licensor's poles without the prior consent in writing of the Licensor as provided for in Section 4 hereof, such action shall constitute forthwith a breach of this Agreement, and Licensor may, at its option, at any time after such breach occurs, forthwith terminate Licensee's attachment rights under this Agreement and require Licensee to remove at once all of Licensee's equipment from Licensor's poles. If Licensee does not so remove the equipment, Licensor shall have the right to remove it at the cost and expense of Licensee.
15. Should Licensee for any reason cease to furnish the services authorized by its franchise, which this Agreement is designed to

facilitate, then and in that event all of Licensee's rights under this Agreement shall automatically terminate and Licensee shall immediately remove its equipment from all of Licensor's poles and if not so removed, Licensor shall have the right to remove it at the cost and expense of Licensee.

- 16. Licensee may at any time remove its equipment from any poles of Licensor, and shall give Licensor written notice of removal as provided in the appendix attached hereto and made a part hereof. No adjustment prorata or refund of any rental will be due on account of such removal. Should Licensee thereafter again wish to make attachments to such pole or poles, it shall make application and receive a permit therefor, as provided in Paragraph 2 hereof.
- 17. No use, however extended, of Licensor's poles, or any payments made under this Agreement or other action of Licensee shall create or vest in Licensee any ownership or property rights in Licensor's poles or associated equipment, but Licensee's right therein shall be and remain such as establishes a mere license under the terms of this Agreement.
- 18. Nothing herein contained shall be construed as affecting the rights or privileges previously granted by Licensor, by contract or otherwise, to others not parties to this Agreement, to use any poles covered by this Agreement; and Licensor retains the right to continue and extend such rights or privileges. The attachment privileges herein granted shall at all times be subject to such existing contracts and arrangements. Nothing herein contained shall be construed as affecting or limiting the right of Licensor to make other and additional contracts with other persons, firms, corporations or associations for the joint use of Licensor's poles and facilities.
- 19. Bills for inspections, expenses, and other charges for work performed by Licensor or other joint users under this Agreement other than for attachment rentals shall be payable to the parties presenting such bills within thirty (30) days after presentation. Nonpayment of bills shall constitute a default of this Agreement.
- 20. Licensee shall furnish a surety bond in form and with sureties satisfactory to Licensor in an amount not less than \$5,000 for each 1,000

poles attached or fraction thereof to guarantee the payment of any sums which may become due to Licensor for rentals, inspection fees, or for any work performed or expense incurred by Licensor or other joint users under the terms of this Agreement including the removal of Licensee's equipment upon termination of its attachment rights under this Agreement.

- 21. If Licensee shall fail to comply with any of the provisions of this Agreements, including the specifications herein before referred to, or shall default in any of its obligations under the terms hereof or breach this Agreement and shall fail within ten (10) days after or breach, Licensor may, at its option, forthwith terminate in whole or in part Licensee's attachment rights hereunder, provided, however, that nothing in this section shall affect the provisions and obligations agreed upon in Sections 14 and 15 hereof. Upon such termination, Licensee shall immediately remove its equipment from the pole or poles involved and if not so removed, Licensor shall have the right to remove it at the cost and expense of Licensee.
- 22. This Agreement shall become effective upon the date hereof, and if the attachment rights are not terminated in accordance with the provisions of other sections of this Agreement which provide for such terminations, shall remain in effect for a term of five (5) years from said date and from year to year thereafter subject to the right of either party hereto to terminate this Agreement at any time following the initial term by giving to the other party at least ninety (90) days' prior written notice of said party's desire to terminate this Agreement, in which case this Agreement shall terminate on the date specified but in no event within less than ninety (90) days. Within thirty (30) days after the termination of this Agreement, as provided in this section, Licensee shall remove Licensee's equipment from Licensor's poles. If not removed within thirty (30) days after the termination date, Licensor shall have the right to remove all of Licensee's equipment remaining attached to Licensor's poles at the cost and expense of Licensee without any liability therefor.
- 23. Upon termination of this Agreement by either party as provided in Paragraph 22, the pole rental for the contract year in which Licensee's equipment is removed from Licensor's poles shall be adjusted and

prorated as of the date of such removal. In all other instances where Licensee's permit or right to attach its equipment to Licensor's pole or poles is terminated as provided in this Agreement, no adjustment or prorate of the pole rental shall be made.

24. Should Licensor under any sections of this Agreement remove Licensee's equipment from Licensor's poles, Licensor will deliver to Licensee the equipment so removed upon payment by Licensee of the cost of removal, storage and delivery, and all other amounts due Licensor hereunder.
25. This Agreement shall not inure to the successors of Licensee nor shall Licensee assign, transfer, or sublet the privileges hereby granted without the prior consent in writing of Licensor. Licensee agrees that it will not grant, sell, rent, loan, or lease to others for any period of time the use of all or any part of Licensee's equipment while attached to Licensor's poles. The parties do not intend by Paragraph 22 of this Agreement to in any manner impair the ability of the Licensee to procure financing through normal accepted channels, and the parties expressly agree that nothing contained in said Paragraph is intended to limit or restrict or impair Licensee's right to execute any mortgage or security agreement covering all or any part of its equipment whether attached to Licensee's poles or otherwise.
26. Failure of Licensor to enforce or insist upon compliance with any of the terms or conditions of this Agreement or to give notice or declare this Agreement or the attachment rights hereunder terminated shall not constitute a general waiver or relinquishment of any terms or conditions of the Agreement but the same shall be and remain at all times in full force and effect.
27. The Appendix attached to and made a part of this Agreement covers construction and operating practices to be observed by the parties hereto. Said practices may be revised by the parties hereto from time to time as changes in operating conditions and experience warrant. Such revisions which do not conflict with the provisions of this Agreement shall be effective when transmitted to the Licensee in writing by the General Plant Manager of the Telephone Company.

1. Application and Permit for Attachments

- (a) The Licensee shall prepare an application-permit on the form marked Exhibit (A), attached hereto and made a part hereof, when applying for permission to make attachments to any pole or poles owned by Licensor. The original and three copies of the application-permit form shall be forwarded to Licensor as far in advance of construction as possible. The information provided on said form shall show the location of poles with respect to streets, alleys, addresses and other geographical markings with sufficient accuracy that the exact location and ownership of the poles can be readily determined. The application shall be reviewed and field checked by Licensor, and an estimate shall be made by each party of its nonbetterment cost of any rearrangements and/or pole replacements required to provide suitable space for Licensee's attachments. The ownership of the poles involved shall be determined and recorded on the form at this time.
- (b) If permission to make the proposed attachments can be granted as provided in the Agreement, Licensor shall indicate on the form the estimated nonbetterment costs of any work to be performed by Licensor and will sign it and forward the original and two copies to Licensee for further consideration.
- (c) If acceptable to Licensee, two copies of the form shall be signed and returned to Licensor. The form as thus approved shall constitute a permit for Licensee to make attachments to said pole or poles pursuant to the provisions of the Agreement. Licensor shall consider the accepted permit as its authority to proceed with the rearrangements and/or pole replacements required to provide suitable space for Licensee's attachments. Licensor will advise Licensee when the poles are read for occupancy.
- (d) Billing for actual nonbetterment costs of plant changes, as covered by application-permit forms, will be issued as soon as practical after completion of the work. Separate billing, if any, shall be submitted directly to the Licensee by Licensor and the Licensee shall promptly reimburse it for the amount of such billing.

2. Effective Date of Attachments

- (a) The effective date of attachments to Licensor's poles for rental purposes shall be the date the permit is accepted by Licensee or the date the first attachment is made to said poles, whichever date is earliest.
- (b) Licensee shall not attach poles covered by this Agreement unless an application-permit form has been fully executed except in special cases where verbal permission may be granted. Such attachments, in all cases, shall be subsequently covered by an application-permit form for record purposes.

3. Termination of Attachments by Licensee

- (a) When all of Licensee's attachments have been removed from a pole or group of poles, Licensee shall prepare a notice of removal on the form marked Exhibit (B), attached hereto and made a part hereof, and forward the original and two copies thereof to Licensor. The information provided on this form should show the location of the poles involved with respect to streets, alleys, addresses and other suitable geographical markings with sufficient accuracy that the exact location and ownership of the poles can be determined.
- (b) Licensor shall determine the ownership of the vacated poles and records said information on the form before signing it and returning the original to the Licensee.

4. Billing for Pole Rentals

- (a) A tabulation of the poles on which the Licensee has attachments as of January 1st and July 1st shall be made by Licensor in cooperation with the Licensee each year this Agreement remains in effect. This tabulation shall include all poles covered by accepted permits plus any poles not covered by accepted permits on which Licensee's attachments are discovered by Licensor in connection with routine inspections of Licensee's facilities.
- (b) The pole attachment records to be maintained by Licensor and the Licensee shall be verified from time to time by means of a complete field check of Licensee's pole attachments which shall be made jointly by Licensor and the Licensee at least once every three years.
- (c) Billing for pole rentals shall be rendered to the Licensee semi-annually

as of January 1st and July 1st from a billing summary to be prepared by Licensor and approved by the Licensee. The summary shall be based on the joint tabulation of poles attached by Licensee provided for in item (a) above and shall indicate the ownership of such poles.

5. Construction and Maintenance of Attachments

(a) Licensee's attachments shall be installed, maintained and removed in accordance with the requirements of the National Electric Safety Code, Sixth Edition, or the requirements of any state or local authority having jurisdiction, whichever may be more stringent. All attachments shall be placed within the space and at the location designated by Licensor.

(b) Drawings marked Exhibits 1 to 8, inclusive, attached to this Appendix, are descriptive of the construction required under some typical conditions where span lengths do not exceed one hundred fifty (150) feet and the voltage of the power conductors does not exceed fifteen thousand (15,000) volts to ground.

AGREEMENT

THIS AGREEMENT, made this 1 day of May, 19 70, by and between KENTUCKY TELEPHONE COMPANY, a corporation of the State of Kentucky, having its principal State of Kentucky office in the City of London, hereinafter called Licensor, a party of the first part, and Brodhead T. V. Service, a corporation of the State of Kentucky, hereinafter called Licensee, party of the second part.

WITNESSETH:

WHEREAS, Licensee proposes to furnish community antenna television service to persons residing in the City of Brodhead and vicinity, pursuant to Licensee's authority under a certain franchise granted to it on the 1 day of May, 19 67, by the City Council of the City of Brodhead, and in connection therewith will need to erect and maintain aerial cables, wires, and associated appliances throughout the area to be served, and desires to attach such cables, wires and appliances to poles of Licensor; and

WHEREAS, Licensor is willing to permit, to the extent that it may lawfully do so, the attachment of said cables, wires and appliances to Licensor's poles for the purposes authorized by Licensee's franchise where in its judgment such use will not interfere with its own service requirements or the service requirements of others using such poles, including considerations of economy and safety;

NOW THEREFORE, in consideration of the mutual covenants, terms and conditions herein contained, the parties hereto do hereby mutually covenant and agree as follows:

1. As used in this Agreement, certain terms listed below shall have the following meanings:

- (a) "Licensor's poles" means poles owned by Licensor located in or in the immediate vicinity of Brodhead.
- (b) "Licensee's equipment" means aerial wires, cables, amplifiers, associated power supply equipment, and other transmission apparatus necessary for the proper operation of Licensee's system in the City of Brodhead and vicinity

maintaining Licensee's equipment at the locations of the Licensor's poles.

12. Licensee shall indemnify, protect, save harmless, and insure Licensor from and against any and all claims and demands for damages to property and injury or death to persons, including payments made under any Workmans' Compensation Law or under any plan for employees' disability and death benefits, and including all expenses incurred in defending any such claims or demands, which may arise out of or be caused by the erection, maintenance, presence, use, rearrangement or removal of the attachments of Licensee's equipment to Licensor's poles, or which may result by reason of the proximity of the cables, wires, equipment, apparatus and appliances of Licensee to the poles of Licensor, or by reason of any negligence of Licensee on or in the vicinity of Licensor's poles not withstanding any negligence of Licensor or others lawfully using said Licensor's poles. Without limiting the foregoing, it is the general intent of Licensor and Licensee that Licensee shall save Licensor harmless from any liability or risk arising out of or in any manner connected with the operation of Licensee's business or with the operation of Licensee's business or with the facilities of Licensee installed hereunder whether or not due in whole or in part to any act, omission, or negligence of Licensor. It is not the intent of Licensor or Licensee that Licensee shall assume any liability of Licensor that does not arise out of or is not connected with the operation of Licensee's business or with the installation, operation, maintenance, presence, use, rearrangement or removal of Licensee's facilities.

Without limiting the scope or extent of the protection afforded Licensor or the liabilities assumed by Licensee herein, Licensee shall obtain and maintain in effect at its own expense for the entire life of this Agreement, the following insurance:

- (a) General liability insurance on the premises and operations covered by this Agreement and specifically including contractual liability insurance to cover the liability assumed by Licensee under the agreement of indemnity set forth in Paragraph 12 hereof, all with limits of not less than Two Hundred Thousand Dollars (\$200,000.00) as to any one person and Five Hundred Thousand Dollars (\$500,000.00)

as to any one accident with respect to bodily injury, including death, and with limits of One Hundred Thousand Dollars (\$100,000.00) as to any one accident and Three Hundred Thousand Dollars (\$300,000.00) in the aggregate with respect to property damage; and

- (b) Workmen's Compensation Insurance with statutory limits and employers liability insurance with limits of not less than One Hundred Thousand Dollars (\$100,000.00).

Prior to making any attachments to Licensor's poles, Licensee shall furnish Licensor with a certificate from an insurance carrier acceptable to Licensor stating that policies of insurance have been issued by it to Licensee providing for the insurance coverage listed above and that such policies are in force. Such certificates shall state that the insurance carrier will give Licensor thirty (30) days' prior written notice of any cancellation or material change in policies. Failure to maintain such insurance at any time shall constitute a default of this Agreement but shall not relieve the Licensee from any liabilities assumed under this Agreement.

- 13. In the event Licensee should make any attachments to Licensor's poles without first having received and accepted a permit as provided in Paragraph 2 hereof, the Licensor shall have the right to summarily and without notice to Licensee, remove such attachments at the cost and expense of Licensee and without any liability therefor.
- 14. Should Licensee sell or lease the use of its facilities on Licensor's poles without the prior consent in writing of the Licensor as provided for in Section 4 hereof, such action shall constitute forthwith a breach of this Agreement, and Licensor may, at its option, at any time after such breach occurs, forthwith terminate Licensee's attachment rights under this Agreement and require Licensee to remove at once all of Licensee's equipment from Licensor's poles. If Licensee does not so remove the equipment, Licensor shall have the right to remove it at the cost and expense of Licensee.
- 15. Should Licensee for any reason cease to furnish the services authorized by its franchise, which this Agreement is designed to

facilitate, then and in that event all of Licensee's rights under this Agreement shall automatically terminate and Licensee shall immediately remove its equipment from all of Licensor's poles and if not so removed, Licensor shall have the right to remove it at the cost and expense of Licensee.

16. Licensee may at any time remove its equipment from any poles of Licensor, and shall give Licensor written notice of removal as provided in the appendix attached hereto and made a part hereof.

No adjustment prorata or refund of any rental will be due on account of such removal. Should Licensee thereafter again wish to make attachments to such pole or poles, it shall make application and receive a permit therefor, as provided in Paragraph 2 hereof.

17. No use, however extended, of Licensor's poles, or any payments made under this Agreement or other action of Licensee shall create or vest in Licensee any ownership or property rights in Licensor's poles or associated equipment, but Licensee's right therein shall be and remain such as establishes a mere license under the terms of this Agreement.

18. Nothing herein contained shall be construed as affecting the rights or privileges previously granted by Licensor, by contract or otherwise, to others not parties to this Agreement, to use any poles covered by this Agreement; and Licensor retains the right to continue and extend such rights or privileges. The attachment privileges herein granted shall at all times be subject to such existing contracts and arrangements. Nothing herein contained shall be construed as affecting or limiting the right of Licensor to make other or additional contracts with other persons, firms, corporations or associations for the joint use of Licensor's poles and facilities.

19. Bills for inspections, expenses, and other charges incurred by Licensor or other joint users under this Agreement and for attachment rentals shall be payable to the parties providing such bills within thirty (30) days after presentation. Non-payment of bills shall constitute a default of this Agreement.

20. Licensee shall furnish a surety bond in form and with satisfactory factory to Licensor in an amount not less than \$5,000 (Five Thousand Dollars).

poles attached or fraction thereof to guarantee the payment of any sums which may become due to Licensor for rentals, inspection fees, or for any work performed or expense incurred by Licensor or other joint users under the terms of this Agreement including the removal of Licensee's equipment upon termination of its attachment rights under this Agreement.

21. If Licensee shall fail to comply with any of the provisions of this Agreements, including the specifications herein before referred to, or shall default in any of its obligations under the terms hereof or breach this Agreement and shall fail within ten (10) days after or breach, Licensor may, at its option, forthwith terminate in whole or in part Licensee's attachment rights hereunder, provided, however, that nothing in this section shall affect the provisions and obligations agreed upon in Sections 14 and 15 hereof. Upon such termination, Licensee shall immediately remove its equipment from the pole or poles involved and if not so removed, Licensor shall have the right to remove it at the cost and expense of Licensee.
22. This Agreement shall become effective upon the date hereof, and if the attachment rights are not terminated in accordance with the provisions of other sections of this Agreement which provide for such terminations, shall remain in effect for a term of five (5) years from said date and from year to year thereafter subject to the right of either party hereto to terminate this Agreement at any time following the initial term by giving to the other party at least ninety (90) days' prior written notice of said party's desire to terminate this Agreement, in which case this Agreement shall terminate on the date specified but in no event within less than ninety (90) days. Within thirty (30) days after the termination of this Agreement, as provided in this section, Licensee shall remove Licensee's equipment from Licensor's poles. If not removed within thirty (30) days after the termination date, Licensor shall have the right to remove all of Licensee's equipment remaining attached to Licensor's poles at the cost and expense of Licensee without any liability therefor.
23. Upon termination of this Agreement by either party as provided in Paragraph 22, the pole rental for the contract year in which Licensee's equipment is removed from Licensor's poles shall be adjusted and

prorated as of the date of such removal. In all other instances where Licensee's permit or right to attach its equipment to Licensor's pole or poles is terminated as provided in this Agreement, no adjustment or prorate of the pole rental shall be made.

24. Should Licensor under any sections of this Agreement remove Licensee's equipment from Licensor's poles, Licensor will deliver to Licensee the equipment so removed upon payment by Licensee of the cost of removal, storage and delivery, and all other amounts due Licensor hereunder.
25. This Agreement shall not inure to the successors of Licensee nor shall Licensee assign, transfer, or sublet the privileges hereby granted without the prior consent in writing of Licensor. Licensee agrees that it will not grant, sell, rent, loan, or lease to others for any period of time the use of all or any part of Licensee's equipment while attached to Licensor's poles. The parties do not intend by Paragraph 22 of this Agreement to in any manner impair the ability of the Licensee to procure financing through normal accepted channels, and the parties expressly agree that nothing contained in said Paragraph is intended to limit or restrict or impair Licensee's right to execute any mortgage or security agreement covering all or any part of its equipment whether attached to Licensee's poles or otherwise.
26. Failure of Licensor to enforce or insist upon compliance with any of the terms or conditions of this Agreement or to give notice or declare this Agreement or the attachment rights hereunder terminated shall not constitute a general waiver or relinquishment of any terms or condition of the Agreement but the same shall be and remain at all times in full force and effect.
27. The Appendix attached to and made a part of this Agreement covers construction and operating practices to be observed by the parties hereto. Said practices may be revised by the parties hereto from time to time as changes in operating conditions and experience warrant. Such revisions which do not conflict with the provisions of this Agreement shall be effective when transmitted to the Licensee in writing by the **General Plant Manager of the Telephone Company.**

23. Subject to the provisions of Paragraph 25 hereof, this Agreement shall extend and bind the successors and assigns of the parties hereto.

29. If, within one year from the effective date of this Agreement, attachments of Licensee's facilities have not been made to at least 10 poles of Licensor, then, at the option of the Licensor, this Agreement may be terminated forthwith in its entirety. Licensor may exercise its option to terminate this Agreement at any time after the expiration of said one-year period by notifying Licensee in writing of Licensor's election to terminate. In the event of said termination, Licensee shall remove promptly all attachments of its facilities theretofore made to Licensor's poles, and if Licensee fails to so remove them, Licensor may remove them at the cost and expense of the Licensee.

IN WITNESS WHEREOF, the parties hereto have, respectively, caused this Agreement to be duly executed the day and year first above written.

APPENDIX

1. Application and Permit for Attachments

- (a) The Licensee shall prepare an application-permit on the form marked Exhibit (A), attached hereto and made a part hereof, when applying for permission to make attachments to any pole or poles owned by Licensor. The original and three copies of the application-permit form shall be forwarded to Licensor as far in advance of construction as possible. The information provided on said form shall show the location of poles with respect to streets, alleys, addresses and other geographical markings with sufficient accuracy that the exact location and ownership of the poles can be readily determined. The application shall be reviewed and field checked by Licensor, and an estimate shall be made by each party of its nonbetterment cost of any rearrangements and/or pole replacements required to provide suitable space for Licensee's attachments. The ownership of the poles involved shall be determined and recorded on the form at this time.
- (b) If permission to make the proposed attachments can be granted as provided in the Agreement, Licensor shall indicate on the form the estimated nonbetterment costs of any work to be performed by Licensor and will sign it and forward the original and two copies to Licensee for further consideration.
- (c) If acceptable to Licensee, two copies of the form shall be signed and returned to Licensor. The form as thus approved shall constitute a permit for Licensee to make attachments to said pole or poles pursuant to the provisions of the Agreement. Licensor shall consider the accepted permit as its authority to proceed with the rearrangements and/or pole replacements required to provide suitable space for Licensee's attachments. Licensor will advise Licensee when the poles are read for occupancy.
- (d) Billing for actual nonbetterment costs of plant changes, as covered by application-permit forms, will be issued as soon as practical after completion of the work. Separate billing, if any, shall be submitted directly to the Licensee by Licensor and the Licensee shall promptly reimburse it for the amount of such billing.

2. Effective Date of Attachments

- (a) The effective date of attachments to Licensor's poles for rental purposes shall be the date the permit is accepted by Licensee or the date the first attachment is made to said poles, whichever date is earliest.
- (b) Licensee shall not attach poles covered by this Agreement unless an application-permit form has been fully executed except in special cases where verbal permission may be granted. Such attachments, in all cases, shall be subsequently covered by an application-permit form for record purposes.

3. Termination of Attachments by Licensee

- (a) When all of Licensee's attachments have been removed from a pole or group of poles, Licensee shall prepare a notice of removal on the form marked Exhibit (B), attached hereto and made a part hereof, and forward the original and two copies thereof to Licensor. The information provided on this form should show the location of the poles involved with respect to streets, alleys, addresses and other suitable geographical markings with sufficient accuracy that the exact location and ownership of the poles can be determined.
- (b) Licensor shall determine the ownership of the vacated poles and records said information on the form before signing it and returning the original to the Licensee.

4. Billing for Pole Rentals

- (a) A tabulation of the poles on which the Licensee has attachments as of January 1st and July 1st shall be made by Licensor in consultation with the Licensee each year this Agreement remains in effect. This tabulation shall include all poles covered by accepted permits and any poles not covered by accepted permits on which Licensee attachments are discovered by Licensor in connection with routine audits of Licensee's facilities.
- (b) The pole attachment records to be maintained by Licensor and the Licensee shall be verified from time to time by means of a periodic field check of Licensee's pole attachments which shall be conducted jointly by Licensor and the Licensee at least once every three years.
- (c) Billing for pole rentals shall be rendered to the Licensee annually

as of January 1st and July 1st from a billing summary to be prepared by Licensor and approved by the Licensee. The summary shall be based on the joint tabulation of poles attached by Licensee provided for in item (a) above and shall indicate the ownership of such poles.

5. Construction and Maintenance of Attachments

- (a) Licensee's attachments shall be installed, maintained and removed in accordance with the requirements of the National Electric Safety Code, Sixth Edition, or the requirements of any state or local authority having jurisdiction, whichever may be more stringent. All attachments shall be placed within the space and at the location designated by Licensor.
- (b) Drawings marked Exhibits 1 to 8, inclusive, attached to this Appendix, are descriptive of the construction required under some typical conditions where span lengths do not exceed one hundred fifty (150) feet and the voltage of the power conductors does not exceed fifteen thousand (15,000) volts to ground.

AGREEMENT TERMS AND CONDITIONS

1.0 SCOPE OF AGREEMENT

- 1.01 The purpose of this Agreement is to set forth the rates, terms, conditions, and procedures under which the Licensor will provide Licensee access to Licensor's poles, ducts, innerducts, conduits, and rights-of-way.
- 1.02 Subject to the provisions of this Agreement, Licensor will issue to Licensee for any lawful communications purpose, revocable, nonexclusive licenses authorizing the attachment of Licensee's cables, equipment, and facilities to Licensor's poles or the placing of Licensee's cables, equipment, and facilities in Licensor's conduit system or within right-of-way owned or controlled by Licensor.
- 1.03 No use, however extended, of Licensor's poles, conduit system or right-of-way nor payment of any fees or charges required under this Agreement shall create or vest in Licensee any ownership or property rights in said poles, conduit system or right-of-way, but Licensee's rights therein shall be and remain a mere license. Nothing herein contained shall be construed to compel Licensor to construct, retain, extend, place, or maintain any facilities not needed for its own service requirements, unless otherwise required by law.
- 1.04 Licensee recognizes that Licensor has heretofore entered into, or may in the future enter into, agreements and arrangements with others which are not party to this Agreement regarding the poles, conduit system and right-of-way covered by this Agreement. Nothing herein contained shall be construed as a limitation, restriction or prohibition against Licensor with respect to such other agreements or arrangements. The rights of Licensee shall at all times be subject to any present or future joint use arrangement between Licensor and any other public utility or government agency.

2.0 DEFINITIONS

- 2.01 "Attachments" - Any attachment to a pole, use of a duct or innerduct, use of a conduit, or using right-of-way owned or controlled by Licensor.
- 2.02 "Attachment Fee" - Fee paid annually per attachment on a pole, or in a duct, innerduct, conduit, or right-of-way.
- 2.03 "Buried Cable" - Cable located below the surface of the ground but not in Licensor's conduit system.
- 2.04 "Conduit System" - Any combination of ducts, innerducts, conduits, manholes, and handholes owned or controlled by Licensor that is a reusable passage or opening in, on, under or through the ground, or a structure such as a building or bridge. The term includes "inner ducts" created by subdividing a duct into smaller channels.
- 2.05 "Hazardous Materials" -

- (A) Any substance, material or waste now or hereafter defined or characterized as hazardous, toxic or dangerous as defined by the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA") of 1980, as amended, and other federal, state, and local health, safety, and environmental laws, ordinances, statutes, and rules, including but not limited to the Occupational Safety and Health Act ("OSHA").
 - (B) Any substance, material or waste now or hereafter classified as a contaminant or pollutant under any law, rules, ordinance, or authority.
 - (C) Any other substance, material or waste, the manufacture, processing, distribution, use, treatment, storage, placement, disposal, removal or transportation of which is now or hereafter subject to regulation under any law, ordinance, statute, rule or regulation of any governmental body or authority.
- 2.06 "Make Ready Work" - All work to prepare Licensor's poles, ducts, innerducts, conduits, rights-of-way, and related facilities for the requested occupancy or attachment of Licensee's facilities but not the actual placement of attachments or administrative activities related to inquiries, verifications, requests or applications.
- 2.07 "Poles"- Licensor owned and poles owned by others to the extent that and for so long as Licensor has the right to permit others to be attached in the communications space.
- 2.08 "Pole Attachment Request" or "PAR" - A written request from Licensee to attach its facilities to Poles, submitted in accordance with this Agreement. With respect to pole attachment agreements in effect prior to the date the Parties executed this Agreement, the term PAR shall be deemed to include Pole Attachment Requests made by letter or similar document.
- 2.09 "Right-of-Way" - Right-of-way owned or controlled by Licensor. It does not include attachment or use of cables, poles, equipment or facilities located on a particular right-of-way. It may include private easement, or in certain instances public right-of-way granted by a governmental authority or a utility easement such as in a subdivision or development.

3.0 TERM OF AGREEMENT

- 3.01 This Agreement shall become effective upon its Effective Date and if not terminated in accordance with the provisions of other Articles hereof, shall continue in effect for a term of not less than five (5) years, provided, however, that at any time after the first year of said term the rates, fees and charges set forth may be increased or decreased by written notice from Licensor to Licensee on a nondiscriminatory basis with respect to similar rates, fees and charges of other similar licensees.
- 3.02 Either Party may terminate this Agreement with at least a (6) six month written notice to the other Party.
- 3.03 Upon termination of the Agreement in accordance with any of its terms, all outstanding licenses in connection therewith shall terminate and shall be surrendered and Licensee shall within sixty (60) days of date of termination remove all cables, equipment and facilities at the cost and expense of Licensee. If Licensor in its sole discretion, deems it is impractical to remove Licensee's cable, equipment and facilities from Licensor's rights-of-way, they may be abandoned in place.

4.0 LEGAL AUTHORITY

- 4.01 Licensee will obtain from public authorities and private owners of property any and all permits, franchises, licenses and grants necessary for the lawful exercise of any license granted hereunder

5.0 APPLICABLE LAW

- 5.01 This Agreement, and the rights and obligations contained in it, shall be governed and construed under the laws of the state in which the attachments hereunder are to be located.

6.0 SUBSEQUENT LAW

- 6.01 The terms and conditions of this Agreement shall be subject to any and all applicable laws, rules, regulations or guidelines now in effect from any federal, state or local governmental authority. In the event that any effective legislative, regulatory, judicial or other legal action by a governmental body or court of competent jurisdiction materially changes any rule, law or judicial or administrative decision that was the basis of the requirement, obligation or right upon which any provision of this Agreement was negotiated, or materially impairs the ability of the pole owner or attaching party to perform any material terms of this Agreement, the attaching party or pole owner may, on thirty (30) days' written notice request that such terms be renegotiated, and the Parties shall renegotiate in good faith such mutually acceptable new terms as may be required. In the event that such new terms are not renegotiated within ninety (90) days after such notice, the Dispute shall be referred to the Dispute Resolution procedure set forth in Section 18.0. Should any term of this Agreement be determined by a court or agency with competent jurisdiction to be unenforceable, all other terms of this Agreement shall remain in full force and effect.

7.0 DISCLAIMER OF WARRANTIES

- 7.01 Except as specifically set forth in this Agreement, Licensor makes no warranties, express or implied, including, but not limited to, any implied warranties of merchantability or fitness for a particular purpose.

8.0 LICENSE NOT EXCLUSIVE

- 8.01 Nothing herein contained shall be construed as a grant of any exclusive license, right or privilege to Licensee. Licensor shall have the right to grant, renew and extend rights and privileges to others not parties to this Agreement, by contract or otherwise, to use any poles, conduit system or right-of-way covered by this Agreement, under such terms and conditions, as Licensor shall prescribe.

9.0 ASSIGNMENT OF RIGHTS

- 9.01 Licensee shall not assign; transfer or sublet the privileges hereby granted, or sell, lease or otherwise permit the use of its facilities on or any part thereof (all of the foregoing being "Transfers"), without prior consent in writing of Licensor which consent shall not be unreasonably withheld, delayed or conditioned; provided, however, that either Party may so assign its rights and obligations under this Agreement without such consent to (i) any entity

said Party, directly or indirectly, controls, is controlled by or is under common control with or (ii) any entity acquiring all or substantially all of said Party's assets or equity, by providing written notice to the other Party of such assignment. Any attempted assignment that is not permitted under this Section 9.01 is void *ab initio*.

- 9.02 Subject to the provisions of this Agreement, this Agreement shall extend to and bind the successors and authorized assigns of the Parties hereto.

10.0 LIABILITY AND DAMAGES

- 10.01 Licensor reserves to itself, its successors and assigns, the right to maintain its poles, conduit system and right-of-way and to operate its facilities thereon in such manner as will best enable it to fulfill its own service requirements. Licensor shall not be liable to Licensee for any interruption to service of Licensee or for interference with the operation of the cables, equipment or facilities of Licensee arising in any manner out of the use of Licensor's poles, conduit system and right-of-way except caused by Licensor's sole negligence, willful misconduct or material breach of this Agreement, in which case Licensor's liability shall be limited to the reasonable cost of repair of Licensee's damaged cable, equipment or facilities, if any.
- 10.02 Licensee shall exercise special precautions to avoid damaging the cables, poles, conduits, right-of-way equipment and facilities of Licensor and of other licensees. Licensee will assume responsibility for any and all loss, damages, costs and expenses as a result of the Licensee's acts or omissions excluding such loss, damage, cost and expenses resulting from the negligence or willful misconduct of the Licensor.. Licensee shall make an immediate report to Licensor of the occurrence of any such damage and hereby agrees to reimburse the respective owners for the expense incurred in making repairs.
- 10.03 Licensee shall indemnify and hold harmless Licensor against any and all claims, demands, causes of action, damages, costs or liabilities of every kind and nature whatsoever related to or arising out of this Agreement, except to the extent caused by Licensor's negligence or willful misconduct, which may arise out of or be caused by:
- (A) The erection, maintenance, presence, use or removal of Licensee's cable, equipment, and facilities on Licensor's poles, and within Licensor's conduit system and right-of-way
 - (B) Any act of Licensee on or in the vicinity of Licensor's poles, conduit system and right-of-way, or
 - (C) Any interruption, discontinuance, or interference with Licensee's service to any of its subscribers occasioned or claimed to have been occasioned by any action of Licensor pursuant to or consistent with this Agreement. Licensee shall, upon demand and at its own sole risk and expense, defend any and all suits, actions or other legal proceeding brought or instituted against Licensor on any such claim, demand or cause of action, and shall pay and satisfy any judgment or decree rendered against Licensor therein, and Licensee shall reimburse Licensor for any and all legal expense incurred by Licensor in connection therewith. Licensee shall also indemnify, protect and hold harmless Licensor from any and all claims and demands of whatever kind which arise directly or indirectly from the operation of Licensee's facilities including taxes, special charges by others,

claims and demands for damages or loss for infringement of copyright, for libel and slander for unauthorized use of television broadcast programs, and for unauthorized use of other program material, and from and/or against all claims and demands for infringement of patents with respect to the manufacturer, use and operation of Licensee's equipment whether arising from the use of Licensee's equipment in combination with Licensor's poles, conduit system, right-of-way or otherwise.

10.04 Licensee agrees to comply under the Workmen's Compensation Laws of the state in which attachments are to be located hereunder, and also agrees to cause every subcontractor of Licensee to comply with and qualify under said laws, and shall furnish copies of Certificates demonstrating such compliance to Licensor prior to commencement of the work.

11.0 DEFAULT AND REMEDIES

11.01 In addition to Material Defaults defined anywhere else in this Agreement, any one of the following shall be deemed the occurrence of a Material Default under this Agreement:

- (A) Failure by Licensee to pay any fee or other sum required to be paid under the terms of this Agreement and such default continues for a period of thirty (30) calendar days after written notice thereof to Licensee.
- (B) Failure by either Party to perform or observe any other term, condition, covenant, obligation, or provision of this Agreement and such default continues for a period of thirty (30) business days after written notice thereof from the other Party (provided that if such default is not curable within a thirty (30) business day period, the period will be extended if the Party substantially commences to cure such default and proceeds diligently thereafter to effect such cure).
- (C) The filing of any tax or mechanic's lien against Poles because of any act or omission by Licensee which is not bonded or discharged within thirty (30) calendar days of the date Licensee receives notice that such lien has been filed;
- (D) Licensor or Licensee's voluntary or involuntary bankruptcy;
- (E) Licensee's knowing use or maintenance of its Attachments in violation of any law or regulation, or in aid of any unlawful act or undertaking;
- (F) If any authorization which may be required of Licensee by any governmental or private authority for the placement, operation, or maintenance of Licensee's Attachments is denied or revoked.

11.02 In the event of a Material Default and subject to any other applicable provision of this Agreement, the Non-defaulting Party, without any further notice to the Defaulting Party (except where expressly provided for below or required by applicable law), may do any one or more of the following:

- (A) Perform on behalf and at the expense of the Defaulting Party, any obligation of the Defaulting Party under this Agreement which the Defaulting Party has failed to perform

and of which the Non-defaulting Party shall have given the Defaulting Party notice, the cost of which performance shall be paid by the Defaulting Party to the Non-defaulting Party upon demand;

- (B) Terminate this Agreement by giving sixty (60) business days written notice of such termination to the other Party. Where a Material Default is on behalf of Licensee, Licensor may remove Licensee's Attachments and store Licensee's facilities in a public warehouse or elsewhere at the expense of and for the account of Licensee without Licensor being deemed guilty of trespass or conversion, and without Licensor becoming liable for any loss or damages to Licensee occasioned thereby; or
- (C) Exercise any other legal or equitable right or remedy that the Non-defaulting Party may have.

11.03 The Defaulting Party shall repay to the Non-defaulting Party upon demand any costs and expenses incurred by the Non-defaulting Party (including, without limitation, reasonable attorneys' fees) in successfully enforcing this Agreement.

11.04 Upon termination of this Agreement by the Non-defaulting Party, the Defaulting Party shall remain liable to the Non-defaulting Party for any and all fees, other payments and damages which may be due or sustained in accord with this Agreement prior to such termination, all reasonable costs, fees and expenses, including, without limitation, reasonable attorney' fees incurred by the Non-defaulting Party in pursuit of its remedies hereunder.

11.05 All rights and remedies of the Non-defaulting Party set forth in this Agreement shall be cumulative and none shall exclude any other right or remedy, now or hereafter allowed by or available under any statute, ordinance, rule of court, or the common law, either at law or in equity, or both.

12.0 INDEMNIFICATION and INSURANCE

12.01 Whenever any liability is incurred by either or both of the parties hereto for damages for injuries to the employees or for injury to the property of either party, or for injuries to other persons or their property, arising out of the use and enjoyment of this easement, the liability for such damages, as between the parties hereto, shall be as follows:

- (A) Licensee, shall compensate Licensor for the full actual loss, damage or destruction of Licensor's property that in any way arises from or is related to this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation, or maintenance of Licensee's facilities).
- (B) Each party agrees to defend, indemnify, protect and hold harmless the other and the other's officers, directors, employees, shareholders, successors, assigns, agents, affiliates, representatives, partners, and contractors from and against any and all third party claims, actions, administrative proceedings (including, without limitation, informal proceedings), judgments, damages, penalties, fines, costs, liabilities, interests, or losses, including, without limitation, reasonable attorneys' fees and expenses, consultant fees, and expert fees, together with all other costs and expenses of any kind or nature suffered by or asserted against the indemnified party in any way arising out of or connected with

this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation or maintenance of Licensee's facilities, unless caused by the sole negligence or willful misconduct on the part of Licensor or Licensor's affiliates, agents, officers, employees and assigns). Each party expressly assumes all liability for actions by its affiliates, agents, officers, employees, or its contractors and expressly waives any immunity from the enforcement of this indemnification provision that might otherwise be provided by workers' compensation law or by other state or federal laws.

- (C) Without limiting any of the foregoing, Licensee assumes all risk of, and agrees to relieve Licensor of any and all liability for, loss or damage (and the consequences of loss or damage) to any facilities placed on Licensor's property and any other financial loss sustained by Licensee, except to the extent caused by the negligence or willful misconduct on the part of Licensor's agents, officers, employees, and assigns.
- (D) Without limiting the foregoing, Licensee expressly agrees to indemnify, defend, and hold harmless Licensor and Licensor's agents, officers, employees and assigns from any and all claims asserted by end users/customers of Licensee in any way arising out of or in connection with this Agreement or Licensee's facilities, except to the extent caused by the negligence or willful misconduct on the part of Licensor or Licensor's agents, officers, employees, and assigns, or its contractors.
- (E) In no event shall either Party be liable to the other for any special, consequential or indirect damages (including, without limitation, lost revenues and lost profits) arising out of this Agreement or any obligation arising hereunder, whether in an action for or arising out of breach of contract, or otherwise.
- (F) Licensee shall indemnify, protect, and hold harmless Licensor from and against any and all claims for libel and slander, copyright and/or patent infringement arising directly or indirectly by reason of installation of Licensee's equipment and facilities on Lessor's Property pursuant to this Agreement.

13.0 COMPLIANCE WITH LAW

13.01 Notwithstanding anything to the contrary in this Agreement, each Party shall ensure that any and all activities it undertakes pursuant to this Agreement shall comply with all applicable laws, including, without limitation, all applicable provisions of:

- (A) Workers' compensation laws
- (B) Unemployment compensation laws
- (C) The Federal Social Security Law
- (D) The Fair Labor Standards Act, and
- (E) All laws, regulations, rules, guidelines, policies, orders, permits and approvals or any governmental authority relating to environmental matters and/or Occupational Safety and Health Act ("OSHA").

14.0 INSURANCE

14.01 The each Party shall obtain and maintain, in full force and effect at all times, during operations covered by this Agreement, such minimum insurance as will cover the obligations and liabilities of said Party, its agents, and its employees which may arise from the operations under this Agreement. Insurance shall have limits of not less than:

(A) Commercial General Liability policy of minimum limits of:

| | |
|---|--------------------------------|
| General Aggregate | \$ 2,000,000 per policy period |
| Products/Completed Operations Aggregate | \$ 2,000,000 per policy period |
| Personal Injury/Advertising | \$ 2,000,000 per occurrence |
| Each Occurrence | \$ 2,000,000 per occurrence |
| Fire Legal Liability | \$ 50,000 any one fire |

14.02 The policy will be endorsed to show the above aggregate limits applying to "each" job site or, as an alternative, the General Aggregate will be increased to \$4,000,000 per policy period. Policy will also specifically state the coverage applies to all operations conducted by the respective Party, its employees, or agents on behalf of that Party's Corporation or subsidiary.

14.03 Where the performance of the work involves structural property, underground property, or blasting, each Party's Commercial General Liability insurance policy shall provide coverage to the insured for legal liability arising from operations under this Agreement for property damage:

- (A) arising out of blasting,
- (B) arising out of collapse of, or structural injury to, any building or structure or
- (C) To underground facilities and utilities.

14.04 Other general liability forms are acceptable in lieu of the Commercial General Liability Form, however, they are not to be used without written approval from the Company's Risk Management Department, 4001 Rodney Parham Road Little Rock, AR 72212. However, such written approval shall not be unreasonably withheld.

(A) Business Automobile Liability policy with minimum limits of:

| | |
|-----------------------|---------------------------|
| Bodily Injury | \$2,000,000 per accident |
| Property Damage | \$ 2,000,000 per accident |
| OR | |
| Combined Single Limit | \$ 2,000,000 per accident |

The policy will be issued using symbol "1 - any auto" coverage.

(B) Workers Compensation:

Part 1 - Medical Benefits Statutory

Part 2 - Employer's Liability as indicated:

| | |
|---------------------------|--------------------------|
| Bodily Injury by Accident | \$ 100,000 each accident |
| Bodily Injury by Disease | \$ 100,000 each employee |
| Bodily Injury by Disease | \$ 500,000 policy limit |

- 14.05 The policy will show the state in which operation on behalf of the Party and/or subsidiary is being conducted. For operations conducted within monopolistic (state fund) states, the Party will furnish a certificate of compliance from the appropriate state fund administrator.
- 14.06 In each and every policy in 14.04A and 14.04B, the other Party's Corporation and its subsidiaries shall be named an "additional insured" with respect to activities performed on behalf of the Party's Corporation and its subsidiaries.
- 14.07 Coverage provided by the policies listed in this paragraph will be issued by an insurance company, licensed in the state in which operations on behalf of the Party are to be conducted. It is acceptable to use both primary and excess/umbrella policies to obtain necessary limits.
- 14.08 -Licensee will furnish to the other Party, a certificate evidencing insurance coverage under subparagraphs 14.04-A, and 14.04-B. Such certificate shall provide for a thirty-day prior notice to the other Party of any cancellation or material changes in coverage except for ten (10) days notice of cancellation for non-payment of premium and shall be signed by a legal representative of the issuing insurance company or agent. The certificate of insurance shall be sent to the person identified at paragraph 25.03.
- 14.09 The provisions of sub-paragraphs 14.04-A and 14.04-B shall also apply to all sub-Licensees, and Licensee shall be responsible for their compliance herewith.

15.0 NON-WAIVER OF TERMS AND CONDITIONS

- 15.01 Failure to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

16.0 LICENSOR'S LIEN

- 16.01 Should Licensor under any Article of this Agreement remove Licensee's cable, equipment or facilities from Licensor's poles, conduit system or right-of-way, Licensor will deliver to Licensee the cable, equipment or facilities so removed upon payment by Licensee of the cost of removal, storage and delivery, and all other amounts due Licensor hereunder. Licensor is hereby given a lien on Licensee's cable, equipment or facilities within Licensor's conduit system or right-of-way or attached to Licensor's poles or removed therefrom, with power of public or private sale, to cover any amounts due Licensor under the provisions of this Agreement. Such liens shall not operate to prevent Licensor from pursuing, at its option, any other remedy in law, equity or otherwise, including any other remedy provided for in this Agreement.

17.0 SCHEDULE OF FEES AND CHARGES

- 17.01 Licensee may be required to furnish bond or other security satisfactory to Licensor, in a reasonable initial amount to be determined by Licensor and provided by Licensee at the time Licensee submits Exhibit B to Licensor's Attachment Application Procedures to guarantee the payment of any such sums which may become due to Licensor arising out of this Agreement including, but not limited to fees due hereunder or charges for work

performed for the benefit of Licensee under this Agreement, including the removal of Licensee's facilities upon termination of this Agreement by any of its provisions or upon termination of any License issued hereunder. Bond to be sent to person identified at paragraph 25.03. Bond is to be equal to one (1) year's annual rental fees.

17.02 The fees, rates and charges set forth in APPENDIX I or elsewhere in this Agreement are effective during the term of this Agreement subject to Section 3.01 and shall be due and payable by Licensee as set forth herein.

17.03 FEES:

All rates, charges and fees set forth in this Agreement and as shown in APPENDIX I (Schedule of Rates, Fees, and Charges) shall be subject to all applicable federal, state, and local laws, rules, regulations and commission orders.

(A) Computation:

(1) Pole and Anchor Attachment Fees:

- (a) For the purpose of computing the annual pole attachment fee hereunder, for calendar years subsequent to a first partial calendar year, said fee shall be based upon the number of poles and anchors, to which attachments are actually made, as of December 31 of the preceding year, multiplied by the per attachment pole attachment fee rate set forth on APPENDIX I. For a first partial calendar year, the pole attachment fee shall be prorated as necessary, on a daily basis from the date payment is due in accordance with Exhibit B of Licensor's Attachment Application Procedures.
- (b) For billing purposes, a single pole attachment includes the point of attachment and all facilities located in the usable space on the pole in the space assigned to Licensee (typically six inches above and six inches below the point of attachment). If Licensee occupies more than one usable space on a pole, separate attachment fees shall apply to each space occupied.

(2) Conduit Occupancy Fees :

- (a) For the purpose of computing the total conduit occupancy fee due hereunder, the duct feet of conduit shall be measured from the center to the center of manholes; or from the center of a manhole to the end of the duct; from the center of a manhole to the property line if the duct is connected at the property line to a duct owned and controlled by a third-party property owner; or the length of a conduit from pole to pole; or isolated lengths of conduit not attached to any structure (such as involved with buried cable) which will be occupied by Licensee's cable.
- (b) For billing purposes each inner duct will be billed the half duct fee. If two or more facilities occupy a duct that has not been subdivided, the half duct fee will be charged for each facility. The half duct fee will apply when others place the Licensee facility in a

duct that has not been subdivided only if the facility does not render the duct unusable.

- (3) Right-of-Way Occupancy Fees:
 - (a) This fee will be negotiated on a case by case basis. There is no established per foot rate.
- (B) Payment Date:
 - (1) If this Attachment License Agreement becomes effective on or prior to June 30, all attachment and occupancy fees for the remainder of that first partial calendar year shall be due and payable at the time required under Appendix I of Licensor's Attachment Application Procedures .
 - (2) If an Attachment License Agreement becomes effective on or after July 1, all attachment and occupancy fees for the remainder of that current partial calendar year as well as the full upcoming calendar year shall be payable at the time required under Appendix I of Licensor's Attachment Application Procedures.
 - (3) On an annual basis, all attachment and occupancy fees not previously paid are to be paid in advance, on the 31st day of January of each year or within thirty (30) days of receipt of invoice. Failure to pay such fees within thirty (30) days of the annual due date shall constitute a Material Default of this Agreement.
- (C) Termination of License:
 - (1) Upon termination or surrender of a license granted hereunder, no refund of any attachment or occupancy fee shall be made.

17.04 OTHER CHARGES:

- (A) Computation:
 - (1) All charges for inspections, engineering, or rearrangements of Licensee's facilities from Licensor's poles or conduit and, without limitation, any other work performed for Licensee shall be based upon the full cost and expense, including reasonable overhead, to Licensor for performing such work for Licensee. The cost to Licensee shall be determined in accordance with the regular and customary methods used by Licensor in determining such costs.
 - (2) The charge for replacement of poles shall include the entire non-betterment cost to Licensor including the increased cost of larger poles, sacrificed life value of the poles removed, cost of removal, less any salvage recovery and the cost of transferring Licensor's facilities from the old to the new poles.
 - (3) All other attachment or occupancy related inquiry, verification, application, administrative and miscellaneous rates, fees and charges shall be calculated and paid in accordance with APPENDIX I and/or Licensor's Attachment Application Procedures and Attachments thereto.

- (B) Payment Date:
 - (1) All bills for such other charges for work performed by Licensor shall be payable upon presentment to Licensee, and shall be deemed delinquent if not paid within thirty (30) days after presentment to Licensee.

18.0 DISPUTE RESOLUTION

18.01 Except in the case of:

- (A) A suit, action, or proceeding by one Party to compel the other Party to comply with its obligation to indemnify the other Party pursuant to this Agreement, or
- (B) A suit, action or proceeding to compel either Party to comply with the dispute resolution procedures set forth in this section, the Parties agree to use the following procedure to resolve any dispute, controversy, or claim arising out of or relating to this Agreement or its breach.

18.02 At the written request of a Party, each Party shall designate a knowledgeable, responsible representative to meet and negotiate in good faith to resolve any dispute, controversy, or claim arising under this Agreement. The Parties intend that these negotiations be conducted by industry accepted, business representatives. The substance of the negotiations shall be left to the discretion of the representatives. Upon mutual agreement, the representatives may utilize other alternative dispute resolution procedures such as mediation to assist in the negotiations. Discussions and correspondence between the representatives for the purposes of these negotiations shall be treated as confidential, undertaken for purposes of settlement, shall be exempt from discovery and production, and shall not be admissible in the arbitration described below or in any subsequent lawsuit without the concurrence of all Parties. Documents identified in or provided during such negotiations, which are not prepared for purposes of the negotiations, shall not be so exempt and may, if otherwise admissible, be admitted as evidence in any subsequent proceeding.

18.03 If a resolution of the dispute, controversy or claim is not reached within one hundred eighty (180) calendar days of the initial written request, the dispute, controversy, or claim shall be submitted to binding arbitration by a single arbitrator pursuant to the rules of the American Arbitration Association (AAA), except as hereinafter provided. Discovery in any proceeding before the AAA shall be Party controlled by the arbitrator and shall be permitted to the extent set forth in this section. Parties may exchange, in any combination, up to thirty-five (35) (none of which may contain subparts) written interrogatories, demands to produce documents and requests for admission. Each Party may also take the oral deposition of one (1) witness. Additional discovery may be permitted upon mutual agreement of the Parties. The arbitration hearing shall be commenced within sixty (60) calendar days of the demand for arbitration and shall be held in an agreed upon location. The arbitrator shall rule on the dispute, controversy or claim by issuing a written opinion within thirty (30) business days after the close of hearings. The times specified in this section may be extended upon mutual agreement of the Parties or by the arbitrator upon a showing of good cause. Judgement upon the award rendered by the arbitrator may be entered in any court having jurisdiction.

18.04 Each Party shall bear its own costs, including attorneys' fee, incurred in connection with any of the foregoing procedures. A Party-seeking discovery shall reimburse the responding Party the cost of reproducing documents (to include search time and reproduction time costs). The fees associated with any arbitration, including the fees of the arbitrator, shall be divided equally between the parties.

19.0 ENTIRE AGREEMENT

This Agreement and Licensor's related Attachment Application Procedures cancels and supersedes all previous agreements whether written or oral, except for any sums due thereunder, between Licensor and Licensee with respect to the attachment of Licensee's cable, equipment, and facilities to Licensor's poles or the placing Licensee's cable, equipment or facilities in Licensor's conduit system or right of way; and there are no other provisions, terms or conditions to this Agreement except as expressed herein. All currently effective licenses heretofore granted pursuant to such previous agreements shall continue in effect subject to the terms and conditions of this Agreement.

19.01 The terms and conditions of this Agreement and Licensor's related Attachment Application Procedures supersede all prior oral or written understandings between the Parties and constitute the entire Agreement between them concerning the subject matter of this Agreement. There are no understandings or representations, express or implied, not expressly set forth in this Agreement. This Agreement shall not be modified or amended except by writing signed by the Party to be charged. This Agreement is only applicable to pole applications submitted for attachment to **Windstream facilities in the State of Kentucky. All attachments applied for and constructed under this agreement must be owned by Rockcastle Board of Education.**

GENERAL OPERATING ROUTINE

20.0 ATTACHMENT, USE AND/OR OCCUPANCY REQUEST PROCESS

20.01 There is a multi-step pole attachment or duct, innerduct, conduit or right-of-way use and/or occupancy application process and fee determination process that the Licensee may begin upon the execution of this Agreement. It is set forth below and in Licensor's related Attachment Application Procedures.

21.0 POLE ATTACHMENT REQUESTS (PAR)

21.01 The following process can begin upon the execution of this agreement. The steps are:

- (A) Pole Attachment Quote Preparation: Licensee shall submit a Pole Attachment Request Form (Exhibit B to Licensor's related Attachment Application Procedures), which may be reasonably revised from time to time by Licensor at its sole discretion, to Licensor which will include a drawing of the proposed route and contact information (name, telephone, facsimile, and email information), and all required fees, as listed in and computed in accordance with APPENDIX I, which may be changed from time to time by Licensor to remain consistent with prevailing costs, of this Agreement. These fees consist of administrative as well as other actual costs reasonably incurred in researching the requested route. Once Licensor receives the aforementioned specific attachment information and the fee from Licensee, Licensor will report on the Poles along the route, any required make-ready work, the costs and schedule for such make-ready work, and any other requirements Licensee must satisfy prior to installing its facilities. If during this process, Licensor determines any lawful reason for denying Licensee's application, Licensor will so inform Licensee. Pole attachment quotes will be provided within thirty (30) business days for standard requests. Non-standard quantities of pole attachments and distances will be addressed on an individual case basis, and in a commercially reasonable period.
- (B) Pole Attachment Order: Upon completion of the work identified above, Licensor will inform Licensee if Licensor will provide Licensee a Pole Order Form (Appendix VI to the Licensor's related Attachment Application Procedures) which may be revised from time to time by Licensor at its sole discretion, containing estimated make-ready cost (if any), annual recurring charges and any additional information necessary for Licensee to proceed with attaching its facilities to Licensor's Poles. If Licensee desires to attach to Licensor's poles, and pole make-ready work is required, Licensee shall pay the estimated make-ready cost prior to Licensor beginning any work. Actual costs incurred by Licensor in performing the make-ready work will be applied to the estimated make-ready costs. Any reasonable costs in excess of the estimated cost will be billed to Licensee. Any payment of the estimated costs in excess of actual pole attachment make-ready costs will be returned to Licensee. If Licensee declines to proceed, all fees incurred to date will be billable to Licensee by Licensor.

21.02 Licensee has thirty (30) days to pay the estimated make-ready work or cancel the PAR.

21.03 Upon completion of the make-ready work, the receipt of all payments and fees, and the signing of this Agreement, an "Approved" Attachment I shall be returned to the Licensee. At that time

Licensee will be considered to have been granted a License with respect to the poles approved in the PARON and may attach to Licensor's facilities.

22.0 SURVEYS AND INSPECTIONS OF LICENSEE'S FACILITIES

- 21.01 Licensor reserves the right to inspect each new installation or work operation of Licensee on or within Licensor's facilities. The making of inspections or the failure to make inspections shall not relieve Licensee of any responsibility, obligation or liability imposed by this Agreement.

23.0 ISSUANCE OF LICENSES

- 23.01 Before Licensee shall have a right to attach to any pole of Licensor, Licensee shall make application for and receive a revocable, nonexclusive license therefore in the form of an approved Application for Pole License (APPENDIX VI and Exhibit B to Licensor's related Attachment Application Procedures).
- 23.02 Before Licensee shall have the right to place any cable, equipment or facilities within any conduit system or right-of-way of Licensor, Licensee shall make application for and receive a revocable, nonexclusive license therefore in the form of an approved Application for Conduit or Right-of-Way License (APPENDIX IV and Exhibit B to Licensor's related Attachment Application Procedures), hereto attached and made a part hereof.
- 23.03 Any license granted hereunder for attachment to Licensor's poles shall terminate without further notice to Licensee as to individual poles covered by the license to which Licensee has not attached within ninety (90) days from the date that Licensor has notified Licensee that such poles are available for attachment of the operating facilities of Licensee, unless Licensor, in the exercise of its sole discretion, agrees to extend said period at the request of Licensee.
- 23.05 Any license granted hereunder for placement of Licensee's facilities in Licensor's conduit system shall terminate without further notice to Licensee as to individual sections of Licensor's conduit system covered by the license in which Licensee has not placed its facilities within one hundred twenty (120) days from the date that Licensor has notified Licensee that such sections of the conduit system are available for the placement of operating facilities of Licensee, unless Licensor, in the exercise of its sole discretion, agrees to extend said period at the request of Licensee.

24.0 AUTHORITY TO PLACE ATTACHMENTS

- 24.01 Before any attachments or placement of facilities Licensee shall submit evidence that Licensee has the authority to maintain Attachments within public rights-of-way or on private right-of-way or on private property. Licensee shall be solely responsible for obtaining all licenses, authorizations, permits and consents from federal, state and local authorities or private land owners that may be required to place and maintain facilities on Licensor's poles or within Licensor's conduit, duct or right-of-way.

25.0 NOTICES (OF MODIFICATION OR ALTERATION OF POLES)

- 25.01 In the event Licensor plans to modify or alter any Licensor Poles upon which Licensee has placed Attachments, Licensor, except in emergency situations, shall provide Licensee written notice of the proposed modification or alteration at least ninety (90) business days prior to the time the proposed modification or alteration is scheduled to take place. Should Licensee decide to modify or alter Licensee's Facilities on Poles, Licensee shall so notify Licensor in writing at least ninety (90) business days prior to the day the work is to begin. In such event,

Licensee shall bear a proportionate share of the total costs incurred by Licensor to make Licensor Poles accessible. Licensee's proportionate share of the total cost shall be based on the ratio of the amount of new space occupied by Licensee to the total amount of new space occupied by all of the parties joining in the modification. Licensee is not responsible for any costs of Licensor's modifications or alterations of its Poles.

- 25.02 In the event Licensor is required to move the location of, or replace, any Licensor Pole(s) for reasons beyond its control, Licensee concurrently shall relocate Licensee's Attachments. Licensee shall be solely responsible for the costs of the relocation of Licensee's Attachments. When it is mutually agreed that it is in the best interest of Licensor and Licensee, Licensor will, after proper notification has been provided, transfer Licensee's Attachments at the same time that Licensor transfers its Attachments. The rate charged for these transfers is listed in this Agreement (APPENDIX I). The rate for transfers may be adjusted by Licensor from time to time to remain consistent with prevailing costs.
- 25.03 Notices under this Agreement may be given and shall be deemed to have been given, by posting the same in first class mail to Licensee as follows:

26.0 REQUIREMENTS AND SPECIFICATIONS FOR ATTACHMENT TO POLES

26.01 Licensee's cables, equipment, and facilities shall be placed and maintained in accordance with the requirements and specifications attached hereto and as set forth in Licensor's related Attachment Application Procedures and made a part hereof, and in accordance with the requirements and specifications of the National Electric Safety Code (most recent edition) and the National Electric Code (most recent edition), and in compliance with any other rules or orders now in effect or that may hereafter be issued by any state utility commission or other authority having jurisdiction.

27.0 PLACEMENT OF ATTACHMENTS

27.01 Licensee shall, at its own expense, place and maintain and replace its Attachments on Licensor's Poles in accordance with:

- (A) Such reasonable requirements and specifications as Licensor shall from time to time prescribe in writing in Licensor's Attachment Application Procedures or otherwise,
- (B) In compliance with any rules or orders now in effect or that hereafter may be issued by any regulatory agency or other authority having jurisdiction, and
- (C) All currently applicable requirements and specifications of the National Electrical Safety Code, National Electric Code, most current edition or any amendment or revision of said Code. Licensee agrees to comply, at its sole risk and expense, with all specifications hereto, as may be revised from time to time by Licensor. Licensor will provide supervision at Licensee's expense if Licensor believes it is required.

27.02 Licensee's Facilities shall be tagged at maximum intervals of 300 feet so as to identify Licensee as the owner of the Facility. The tags shall be of sufficient size and lettering so as to be easily read from ground level.

28.0 MODIFICATIONS, ADDITIONS OR POLE REPLACEMENTS AND REARRANGEMENTS

28.01 Licensee shall not modify, add to, or replace facilities on any pre-existing Attachment on an Licensor Pole without first notifying Licensor in writing of the intended modification, addition or replacement at least thirty (30) business days prior to the date the activity is scheduled to begin. The required notification shall include:

- (A) The date the activity is scheduled to begin,
- (B) A description of the planned modification, addition, or replacement,

- (C) A representation that the modification, addition, or replacement will not require any space other than the space previously designated for Licensee's Attachments, and
 - (D) A representation that the modification, addition, or replacement will not impair the structural integrity of the Poles involved.
- 28.02 Should Licensor determine that the modification, addition, or replacement specified by Licensee in its notice will require more space than that allocated to Licensee or will require the rearrangements of, reinforcement of, replacement of, or an addition of support equipment to the Poles involved in order to accommodate Licensee's modification, addition, or replacement, Licensor will so notify Licensee, whereupon Licensee will be required to submit a PAR in compliance with this Agreement in order to obtain authorization for the modification, addition, or replacement of its Attachments.
- 28.03 Should Licensee request Licensor to expand capacity or purchase additional plant, Licensee agrees to pay all reasonable costs. If Licensor or another party that has been granted a license joins in the request and will benefit from the expansion or purchase, Licensee agrees to pay a percentage of all costs proportionate to Licensee's share of the benefit received from the expansion or purchase.
- 28.04 When multiple applications, including application of Licensee, are received by Licensor with respect to any pole which must be replaced or rearranged to provide additional space prior to commencement of the work on that pole a Transfer Attachment Fee may be charged. Licensor will equitably prorate to the extent that it is practical between Licensee and other applicants for the pole space, the common expenses of engineering, rearrangement, and replacement, if any, which result from the processing of multiple applications. Licensee shall be bound by Licensor's determination as to any such pro-ration of Transfer Attachment Fee to Licensee.

29.0 UNAUTHORIZED ATTACHMENTS

- 29.01 If any cable, equipment or facilities of Licensee shall be found on a pole or within a conduit or right-of-way for which no license is outstanding, Licensor, without prejudice to its other rights or remedies under this Agreement or otherwise, may:
- (A) Impose a charge, and
 - (B) Require Licensee to remove such cable, equipment or facilities forthwith or Licensor may remove them without liability and the expense of removal shall be borne by Licensee. For the purpose of determining the charge, Licensee shall pay liquidated damages that will not exceed an amount equal to the annual pole attachment fee for the number of years the unauthorized attachments have existed (or, if that cannot be determined, the number or years since the most recent inventory or five years, whichever is less), plus interest at a rate set for that period by the IRS for individual underpayments pursuant to Section 6621 of the IRS Code. Any such charge imposed by Licensor shall be in addition to its rights to any other sums due and payable, including without limitation the actual costs of any audit or survey which established the existence of the unauthorized attachments and to any claims to said fees or said unlicensed use shall be deemed as a ratification or the licensing of the unlicensed use, and if any license should subsequently be issued, after application and payment of the application fee therefore,

said license shall not operate retroactively or constitute a waiver by Licensor of any of its rights or privileges under this Agreement or otherwise.

29.02 For purposes of this section, an unauthorized Attachment shall include, but not limited to:

- (A) An Attachment to a Pole which is not identified in any PARON (APPENDIX VI) issued in accordance with this Agreement;
- (B) An Attachment that occupies more space than that allocated to Licensee By Licensor;
- (C) An attachment that is not placed in accordance with the provisions of this Agreement or the appropriate PARON (APPENDIX VI) issued pursuant to this Agreement, unless Licensee can demonstrate to Licensor's reasonable satisfaction that said misplacement is not due to any act or omission of Licensee or Licensee's agents;
- (D) An addition or modification by Licensee to its pre-existing Attachment(s) that impairs the structural integrity of the involved Licensor Pole(s).
- (E) An Attachment that consists of facilities owned or controlled by, and for the use of a Party other than Licensee.

29.03 Once Licensor has notified Licensee of an unauthorized attachment. Licensee can submit a PAR to request an authorized attachment. A PAR submitted per this provision will be treated like any other PAR subject to this Agreement. Licensee will be responsible for all fees associated with a PAR (as identified in this Agreement). If a PAR is not received by Licensor within ten (10) business days of Licensee's receipt of an unauthorized attachment notification, Licensee has sixty (60) business days from the date of its receipt of the initial unauthorized attachment notification to vacate the Pole.

30.0 FAILURE TO PLACE ATTACHMENTS

30.01 Once Licensee has been issued a PARON (APPENDIX VI), Licensee shall have ninety (90) calendar days from the date of the PARON (APPENDIX VI) to begin the placement of its Attachments on the Licensor Poles covered by the PARON (APPENDIX VI). If Licensee has not begun placing its Attachments within that ninety-(90) calendar day period, Licensee shall so advise Licensor with a written explanation for the delay. If Licensee fails to advise Licensor of its delay, with a written explanation therefore, or if Licensee fails to act in good faith by not making a bona fide effort to begin placing its Attachments within the ninety (90) calendar days prescribed by this section, the previously issued PARON shall be deemed rescinded by Licensor and Licensee shall have no further right to place Attachments pursuant to that PARON.

31.0 OCCUPANCY OF CONDUIT SYSTEM

31.01 When Licensee submits an application for a license to place its cables, equipment, and facilities in the conduit system of Licensor, Licensor will advise Licensee of the availability of conduit space in accordance with Licensor's Attachment Application Procedures. In determining the

availability of space in Licensor's conduit system, Licensor reserves the right to deny the granting of a license for any non-discriminatory lawful reason, including without limitation, insufficient capacity or reasons of safety, reliability and generally applicable engineering purposes. If conduit space is available, a license to occupy a portion of conduit system will be granted to Licensee, provided, however, that Licensor does not warrant the condition of such conduit system.

- 31.02 Licensor reserves the right to exclude cable, equipment, and facilities of Licensee from Licensor's conduit system, or to limit the type, number and size of Licensee's cable, equipment, and facilities which may be placed in any of Licensor's manholes.

32.0 OCCUPANCY OF RIGHT-OF-WAY

- 32.01 Licensor and Licensee agree that neither party has the right to restrict or interfere with the other party's lawful access to and use of public right-of-way, including public right-of-way, which pass over property owned by either party. Except as otherwise specifically provided in this Agreement, Licensor and Licensee shall each be responsible for obtaining their own right-of-way and permission to use real or personal property owned or controlled by any governmental body.

- 32.02 In the event that Licensee desires to occupy right-of-way owned or controlled by Licensor, Licensor may require Licensee to make an application to do so by the terms of this Agreement. Licensor reserves the right to determine whether granting a license would adversely affect its common carrier communication services and its ability to meet its duties and obligation with respect thereto, including questions of economy, safety, and future need of Licensor.

- 32.03 Licensor may, without incurring any liability, remove the cables, equipment, and facilities of Licensee from Licensor's right-of-way, at Licensee's expense where in Licensor's judgement (such judgement to be conclusive) such removal is required in connection with the performance of Licensor's service obligation or the safety of Licensor's employees. Whenever such removal has been made, Licensee will be promptly notified.

33.0 CONSTRUCTION AND MAINTENANCE OF FACILITIES

- 33.01 Licensee shall, at its own expense, make and maintain its pole attachments in a safe condition and in thorough repair, and in a manner reasonably acceptable to Licensor, and so as not to conflict with the use of said poles by Licensor or by other authorized users of said poles, or interfere with other facilities thereon or which may from time to time be placed thereon. Licensee shall, at its own expense, upon written notice from Licensor, relocate or replace its facilities placed on said poles, or transfer them to substituted poles, or perform any other work in connection with said facilities that may be required. Licensor shall give such written notice as is reasonable in the circumstances, provided, however, that in cases of emergency, (Licensor's judgment as to what constitutes an emergency to be conclusive) Licensor may arrange to relocate, remove or replace the attachments placed on said poles by Licensee, transfer them to substituted poles or perform any other work in connection with said facilities that may be required in the maintenance, replacement, removal or relocation of said poles or of the facilities thereon or which may be placed thereon, or for the service needs of Licensor, and Licensee shall reimburse Licensor for the expense thereby incurred. Attachments of Licensee to poles of Licensor, as mentioned herein shall be understood to include attachments of Licensee in space

reserved for Licensor, or space which Licensor has the right to use, on poles of other companies with which Licensor now has or may hereafter have agreements for joint use and occupancy; and the use of such space by Licensee shall be subject to the terms and conditions of the agreements between Licensor and said other companies. Such authorization will not be unreasonably withheld.

- 33.02 Licensee's cable, equipment, and facilities shall be placed in, removed from, relocated in or maintained in Licensor's conduit system only when specific authorization for the work to be performed and approval of the person, firm or corporation selected by Licensee to perform the work, has been obtained in writing in advance from Licensor. Licensor retains the right to specify what, if any work shall be performed by Licensee. Such authorization will not be unreasonably withheld
- 33.03 In each instance where Licensee's cable, equipment, and facilities are to be placed in Licensor's conduit system, Licensor shall specify, among other things, the cable configuration and location of Licensee's cable, equipment, and facilities, the particular duct of the conduit system such cable will occupy, and the location where and manner in which Licensee's cable will enter and exit Licensor's conduit system.
- 33.04 Licensor's manholes shall be opened as reasonably permitted by Licensor's authorized employees or agents. Licensee shall be responsible for obtaining any necessary permits from appropriate governmental authorities to open manholes and to conduct the work operations. Licensee's employees or agents will be permitted to enter or work in Licensor's manholes only when an authorized agent or employee of Licensor is present except as provided in the next paragraph. Licensor's said agent or employee shall have the authority to terminate Licensee's work operations in and around Licensor's manholes if, in the sole discretion of said agent or employee, any hazardous conditions arise or any unsafe practices are being followed by Licensee's employees or agents. Licensee agrees to pay, in accordance with the terms and conditions of APPENDIX I, the full cost of having Licensor's agent or employee present when Licensee's work is being done in Licensor's manholes. The presence of Licensor's authorized agent or employee shall not relieve Licensee of its responsibility to conduct all of its work operations in and around Licensor's manholes in a safe and workmanlike manner. Licensee is responsible for all signage, traffic control, equipment, and personnel necessary to work in Licensor's manholes. All work shall meet Occupational Safety and Health Act (OSHA), and any local or state standards and requirements.
- 33.05 Licensee's employees will be permitted to enter or work in Licensor's manholes and conduit system without an authorized agent or employee of Licensor being present, provided that Licensee's work consists only of routine operations of testing, adjusting, regulating or inspecting Licensee's existing facilities and does not involve any placing, removing, changing or rearranging of Licensee's or Licensor's facilities. In such cases, Licensee shall notify Licensor's designated representative in advance of Licensee's operations as to the type of work to be performed, the time at which it is to be performed and where it is to take place. Licensee shall conduct all such work operation in a safe and workmanlike manner, and in accordance with the terms of this Agreement.
- 33.06 Licensee shall, at its own expense, maintain its buried communication facilities so as not to conflict with the use of the right-of-way by Licensor or other authorized users of the right-of-way. Licensee shall, at its own expense, relocate, change, or replace its facilities or perform any

other work in connection with said facilities that may be reasonably required by Licensor or other authorities.

34.0 TERMINATION OF LICENSES

- 34.01 Upon notice from Licensor to Licensee that Licensor has been advised by governmental authority or private property owners that the use of any pole, conduit system, or right-of-way is not authorized and is objected to by such governmental authority or private property owner, as the case may be or that any pole, any conduit system or any right-of-way is to be removed, sold or otherwise disposed of, Licensee shall, if reasonably requested by Licensor, remove its cables, equipment, and facilities at once from the affected pole or poles or shall make arrangements for the removal of its cable, equipment, and facilities from the affected portion of Licensor's conduit system or right-of-way at Licensor's expense. If not so removed, Licensor shall have the right to remove Licensee's cable, equipment, and facilities from Licensor's right of way at the cost and expense of Licensee and without any liability thereto. If Licensor and Licensee deem it is impractical to remove Licensee's cables, equipment or facilities from any right-of-way, they may be abandoned in place.
- 34.02 Licensee may at any time remove its facilities from any pole of Licensor, but shall immediately give Licensor written notice of such removal and surrender of license in the form of a Notification of Surrender (APPENDIX VII) hereto attached and made a part hereof. If Licensee surrenders its license but fails to remove its facilities from Licensor's poles, Licensor shall have the right to remove Licensee's facilities at Licensee's expense without any liability on the part of Licensor for damage or injury to Licensee's facilities. In the event that Licensee's cables, equipment, and facilities shall be removed from any pole as provided by this Agreement, no attachment shall again be made to such pole unless Licensee shall have first complied with all of the provisions of this Agreement as though no attachment had previously been made.
- 34.03 If Licensee desires to terminate its license for the right to occupy any part of Licensor's conduit system, Licensee shall give Licensor written notice of such surrender in the form of a Notification of Surrender (APPENDIX VII) hereto attached and made a part hereof. In such event, Licensee shall make arrangements with Licensor for the removal of Licensee's cables, equipment, and facilities from that part of Licensor's conduit system at Licensee's expense. In the event that Licensee's cables, equipment, and facilities shall be removed from Licensor's conduit system as provided by this Article, no cable, facilities or equipment shall again be placed in that part of such conduit system unless Licensee shall have first complied with all of the provisions of this Agreement as though no cables, equipment, and facilities of Licensee had previously been placed in that part of Licensor's conduit system.
- 34.04 If Licensee desires to terminate its license for the right to occupy any part of the right-of-way, Licensee shall give Licensor written notice of such surrender in the form of a Notification of Surrender (APPENDIX VII) attached hereto and made a part hereof. In such event, Licensee shall make arrangements with Licensor for the removal of Licensee's cables, equipment, and facilities from that part of the right-of-way at Licensee's expense. However, in the event it is impractical to remove Licensee's cable, equipment, and facilities from any right-of-way, they may be abandoned in place.

35.0 EMERGENCY RESTORATION PROCEDURES

- 35.01 In the event of an emergency, restoration procedures may be affected by the presence of Licensee's Attachments. While Licensor shall not be responsible for the repair of damaged Attachments of Licensee (except by mutual written agreement), Licensor shall nonetheless control access to its poles, conduit systems or right-of-way if the restoration is to be achieved in an orderly fashion.
- 35.02 Where Licensor and Licensee are involved in emergency restorations, access to Licensor's poles, conduit systems or right-of-way will be controlled by Licensor's Network Construction Managers or their on-site representative according to the following guidelines.
- (A) Service Disruptions/Outages
- (1) While exercising its right to first access, Licensor shall make all reasonable efforts to grant access to as many other entities with Attachments as is reasonably safe.
 - (2) Where simultaneous access is not possible, Licensor will grant access on first come, first served basis.
- (B) Service Affecting Emergencies
- (1) While exercising its right to first access, Licensor shall make all reasonable efforts to grant access to as many other entities with Attachments as is reasonably safe.
 - (2) Where Licensor is unable to grant simultaneous access to all other entities with Attachments, access will be granted according to the level of damage to the Attachments of each entity and the likelihood that a given level of damage will result in service disruption. Where the likelihood that a service disruption will result is not clearly discernible, access will be on a first come, first served basis.
- 35.03 Without limiting any other indemnification or hold harmless provisions of this Agreement, Licensee agrees that any decision by Licensor regarding access to Attachments, or any action or failure to act by Licensor, under this section shall not be the basis for any claim by Licensee against Licensor for any damage to Licensee's Attachments or disruption of Licensee's services, or any other direct or indirect damages of any kind whatsoever incurred by Licensee -.

36.0 ABANDONMENT

- 36.01 Nothing in this Agreement shall prevent or be construed to prevent Licensor from abandoning, selling, assigning, or otherwise disposing of any poles, conduit systems or other Licensor property used for Licensee's Attachments; provided, however, that Licensor shall condition any such sale, assignment, or other disposition subject to the rights granted to Licensee pursuant to this Agreement. Licensor shall promptly notify Licensee of any proposed sale, assignment, or other disposition of any poles, conduit systems or other Licensor property used for Licensee's Attachments.

AGREEMENT TERMS AND CONDITIONS

1.0 SCOPE OF AGREEMENT

- 1.01 The purpose of this Agreement is to set forth the rates, terms, conditions, and procedures under which the Licensor will provide Licensee access to Licensor's poles, ducts, innerducts, conduits, and rights-of-way. **This agreement does NOT allow access to Windstream Central Offices. A separate agreement is required for interconnection access.**
- 1.02 Subject to the provisions of this Agreement, Licensor will issue to Licensee for any lawful communications purpose, revocable, nonexclusive licenses authorizing the attachment of Licensee's cables, equipment, and facilities to Licensor's poles or the placing of Licensee's cables, equipment, and facilities in Licensor's conduit system or within right-of-way owned or controlled by Licensor.
- 1.03 No use, however extended, of Licensor's poles, conduit system or right-of-way nor payment of any fees or charges required under this Agreement shall create or vest in Licensee any ownership or property rights in said poles, conduit system or right-of-way, but Licensee's rights therein shall be and remain a mere license. Nothing herein contained shall be construed to compel Licensor to construct, retain, extend, place, or maintain any facilities not needed for its own service requirements, unless otherwise required by law.
- 1.04 Licensee recognizes that Licensor has heretofore entered into, or may in the future enter into, agreements and arrangements with others which are not party to this Agreement regarding the poles, conduit system and right-of-way covered by this Agreement. Nothing herein contained shall be construed as a limitation, restriction or prohibition against Licensor with respect to such other agreements or arrangements. The rights of Licensee shall at all times be subject to any present or future joint use arrangement between Licensor and any other public utility or government agency.

2.0 DEFINITIONS

- 2.01 "Attachments" - Any attachment to a pole, use of a duct or innerduct, use of a conduit, or using right-of-way owned or controlled by Licensor. **Antennae Attachments are excluded.**
- 2.02 "Attachment Fee" - Fee paid annually per attachment on a pole, or in a duct, innerduct, conduit, or right-of-way.
- 2.03 "Buried Cable" - Cable located below the surface of the ground but not in Licensor's conduit system.
- 2.04 "Conduit System" - Any combination of ducts, innerducts, conduits, manholes, and handholes owned or controlled by Licensor that is a reusable passage or opening in, on, under or through the ground, or a structure such as a building or bridge. The term includes "inner ducts" created by subdividing a duct into smaller channels.

- 2.05 "Hazardous Materials" -
- (A) Any substance, material or waste now or hereafter defined or characterized as hazardous, toxic or dangerous as defined by the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA") of 1980, as amended, and other federal, state, and local health, safety, and environmental laws, ordinances, statutes, and rules, including but not limited to the Occupational Safety and Health Act ("OSHA").
 - (B) Any substance, material or waste now or hereafter classified as a contaminant or pollutant under any law, rules, ordinance, or authority.
 - (C) Any other substance, material or waste, the manufacture, processing, distribution, use, treatment, storage, placement, disposal, removal or transportation of which is now or hereafter subject to regulation under any law, ordinance, statute, rule or regulation of any governmental body or authority.
- 2.06 "Make Ready Work" - All work to prepare Licensor's poles, ducts, innerducts, conduits, rights-of-way, and related facilities for the requested occupancy or attachment of Licensee's facilities but not the actual placement of attachments or administrative activities related to inquiries, verifications, requests or applications.
- 2.07 "Poles"- Licensor owned and poles owned by others to the extent that and for so long as Licensor has the right to permit others to be attached in the communications space.
- 2.08 "Pole Attachment Request" or "PAR" - A written request from Licensee to attach its facilities to Poles, submitted in accordance with this Agreement. With respect to pole attachment agreements in effect prior to the date the Parties executed this Agreement, the term PAR shall be deemed to include Pole attachment requests made by letter or similar document.
- 2.09 "Right-of-Way" - Right-of-way owned or controlled by Licensor. It does not include attachment or use of cables, poles, equipment or facilities located on a particular right-of-way. It may include private easement, or in certain instances public right-of-way granted by a governmental authority or a utility easement such as in a subdivision or development.

3.0 TERM OF AGREEMENT

- 3.01 This Agreement shall become effective upon its execution and if not terminated in accordance with the provisions of other Articles hereof, shall continue in effect for a term of not less than three (3) years, provided, however, that at any time after the first year of said term the rates, fees and charges set forth may be increased or decreased by written notice from Licensor to Licensee on a nondiscriminatory basis with respect to similar rates, fees and charges of other similar licensees.
- 3.02 Either Party may terminate this Agreement with at least a (6) six month written notice to the other Party.
- 3.03 Upon termination of the Agreement in accordance with any of its terms, all outstanding licenses in connection therewith shall terminate and shall be surrendered and Licensee shall within 60 days of date of termination remove all cables, equipment and facilities at the cost and expense

of Licensee. If Licensor in its sole discretion, deems it is impractical to remove Licensee's cable, equipment and facilities from Licensor's rights-of-way, they may be abandoned in place.

4.0 LEGAL AUTHORITY

- 4.01 Licensee will obtain from public authorities and private owners of property any and all permits, franchises, licenses and grants necessary for the lawful exercise of any license granted hereunder

5.0 APPLICABLE LAW

- 5.01 This Agreement, and the rights and obligations contained in it, shall be governed and construed under the laws of the state in which the attachments hereunder are to be located.

6.0 SUBSEQUENT LAW

- 6.01 The terms and conditions of this Agreement shall be subject to any and all applicable laws, rules, regulations or guidelines now in effect and that subsequently may be prescribed by any federal, state or local governmental authority. To the extent required by any such subsequently prescribed law, rule, regulation or guideline, the Parties agree to modify, in writing, the affected term(s) and conditions(s) of this Agreement to bring them into compliance with such law, rule, regulation or guideline. Should any term of this Agreement be determined by a court or agency with competent jurisdiction to be unenforceable, all other terms of this Agreement shall remain in full force and effect.

7.0 DISCLAIMER OF WARRANTIES

- 7.01 Except as specifically set forth in this Agreement, Licensor makes no warranties, express or implied, including, but not limited to, any implied warranties of merchantability or fitness for a particular purpose.

8.0 LICENSE NOT EXCLUSIVE

- 8.01 Nothing herein contained shall be construed as a grant of any exclusive license, right or privilege to Licensee. Licensor shall have the right to grant, renew and extend rights and privileges to others not parties to this Agreement, by contract or otherwise, to use any poles, conduit system or right-of-way covered by this Agreement, under such terms and conditions, as Licensor shall prescribe.

9.0 ASSIGNMENT OF RIGHTS

- 9.01 Licensee shall not assign; transfer or sublet the privileges hereby granted, or sell, lease or otherwise permit the use of its facilities on or any part thereof (all of the foregoing being "Transfers"), without prior consent in writing of Licensor which consent shall not be unreasonably withheld, delayed or conditioned; provided, however, that either Party may so Transfer its rights and obligations under this Agreement without such consent to (i) any entity said Party, directly or indirectly, controls, is controlled by or is under common control with or (ii) any entity acquiring all or substantially all of said Party's assets or equity, by providing written

notice to the other Party of such Transfer. Any attempted Transfer that is not permitted under this Section 9.01 is void *ab initio*.

9.02 Subject to the provisions of this Agreement, this Agreement shall extend to and bind the successors and authorized assigns of the Parties hereto.

10.0 LIABILITY AND DAMAGES

10.01 Licensor reserves to itself, its successors and assigns, the right to maintain its poles, conduit system and right-of-way and to operate its facilities thereon in such manner as will best enable it to fulfill its own service requirements. Licensor shall not be liable to Licensee for any interruption to service of Licensee or for interference with the operation of the cables, equipment or facilities of Licensee arising in any manner out of the use of Licensor's poles, conduit system and right-of-way except caused by Licensor's sole negligence, willful misconduct or material breach of this Agreement, in which case Licensor's liability shall be limited to the reasonable cost of repair of Licensee's damaged cable, equipment or facilities, if any.

10.02 Licensee shall exercise special precautions to avoid damaging the cables, poles, conduits, right-of-way equipment and facilities of Licensor and of other licenses and hereby assumes all responsibility for any and all loss, damages, costs and expenses. Licensee shall make an immediate report to Licensor of the occurrence of any such damage and hereby agrees to reimburse the respective owners for the expense incurred in making repairs.

10.03 Licensee shall indemnify and hold harmless Licensor against any and all claims, demands, causes of action, damages, costs or liabilities of every kind and nature whatsoever, except to the extent caused by Licensor's negligence or willful misconduct, which may arise out of or be caused by:

- (A) The erection, maintenance, presence, use or removal of Licensee's cable, equipment, and facilities on Licensor's poles, and within Licensor's conduit system and right-of-way
- (B) Any act of Licensee on or in the vicinity of Licensor's poles, conduit system and right-of-way, or
- (C) Any interruption, discontinuance, or interference with Licensee's service to any of its subscribers occasioned or claimed to have been occasioned by any action of Licensor pursuant to or consistent with this Agreement. Licensee shall, upon demand and at its own sole risk and expense, defend any and all suits, actions or other legal proceeding brought or instituted against Licensor on any such claim, demand or cause of action, and shall pay and satisfy any judgment or decree rendered against Licensor therein, and Licensee shall reimburse Licensor for any and all legal expense incurred by Licensor in connection therewith. Licensee shall also indemnify, protect and hold harmless Licensor from any and all claims and demands of whatever kind which arise directly or indirectly from the operation of Licensee's facilities including taxes, special charges by others, claims and demands for damages or loss for infringement of copyright, for libel and slander for unauthorized use of television broadcast programs, and for unauthorized use of other program material, and from and/or against all claims and demands for infringement of patents with respect to the manufacturer, use and operation of Licensee's equipment whether arising from the use of Licensee's equipment in combination with Licensor's poles, conduit system, right-of-way or otherwise.

10.04 Licensee agrees to comply under the Workmen's Compensation Laws of the state in which attachments are to be located hereunder, and also agrees to cause every subcontractor of Licensee to comply with and qualify under said laws, and shall furnish copies of Certificates demonstrating such compliance to Licensor prior to commencement of the work.

11.0 DEFAULT AND REMEDIES

11.01 In addition to Material Defaults defined anywhere else in this Agreement, any one of the following shall be deemed the occurrence of a Material Default under this Agreement:

- (A) Failure by Licensee to pay any fee or other sum required to be paid under the terms of this Agreement and such default continues for a period of thirty (30) calendar days after written notice thereof to Licensee.
- (B) Failure by either Party to perform or observe any other term, condition, covenant, obligation, or provision of this Agreement and such default continues for a period of thirty (30) business days after written notice thereof from the other Party (provided that if such default is not curable within a thirty (30) business day period, the period will be extended if the Party substantially commences to cure such default and proceeds diligently thereafter to effect such cure).
- (C) The filing of any tax or mechanic's lien against Poles because of any act or omission by Licensee which is not bonded or discharged within thirty (30) calendar days of the date Licensee receives notice that such lien has been filed;
- (D) Licensor or Licensee's voluntary or involuntary bankruptcy;
- (E) Licensee's knowing use or maintenance of its Attachments in violation of any law or regulation, or in aid of any unlawful act or undertaking;
- (F) If any authorization which may be required of Licensee by any governmental or private authority for the placement, operation, or maintenance of Licensee's Attachments is denied or revoked.

11.02 In the event of a Material Default and subject to any other applicable provision of this Agreement, the Non-defaulting Party, without any further notice to the Defaulting Party (except where expressly provided for below or required by applicable law), may do any one or more of the following:

- (A) Perform on behalf and at the expense of the Defaulting Party, any obligation of the Defaulting Party under this Agreement which the Defaulting Party has failed to perform and of which the Non-defaulting Party shall have given the Defaulting Party notice, the cost of which performance shall be paid by the Defaulting Party to the Non-defaulting Party upon demand;
- (B) Terminate this Agreement by giving sixty (60) business days written notice of such termination to Licensee and remove Licensee's Attachments and store Licensee's facilities in a public warehouse or elsewhere at the expense of and for the account of

Licensee without Licensor being deemed guilty of trespass or conversion, and without Licensor becoming liable for any loss or damages to Licensee occasioned thereby; or

- (C) Exercise any other legal or equitable right or remedy that the Non-defaulting Party may have.
- 11.03 The Defaulting Party shall repay to the Non-defaulting Party upon demand any costs and expenses incurred by the Non-defaulting Party (including, without limitation, reasonable attorneys' fees) in successfully enforcing this Agreement.
- 11.04 Upon termination of this Agreement by the Non-defaulting Party, the Defaulting Party shall remain liable to the Non-defaulting Party for any and all fees, other payments and damages which may be due or sustained in accord with this Agreement prior to such termination, all reasonable costs, fees and expenses, including, without limitation, reasonable attorney' fees incurred by the Non-defaulting Party in pursuit of its remedies hereunder.
- 11.05 All rights and remedies of the Non-defaulting Party set forth in this Agreement shall be cumulative and none shall exclude any other right or remedy, now or hereafter allowed by or available under any statute, ordinance, rule of court, or the common law, either at law or in equity, or both.

12.0 INDEMNIFICATION

- 12.01 Licensee shall compensate Licensor for the full actual loss, damage or destruction of Licensor's property that in any way arises from or is related to this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation, or maintenance of Licensee's Attachments).
- 12.02 Each party agrees to defend, indemnify, protect and hold harmless the other and the other's officers, directors, employees, shareholders, successors, assigns, agents, affiliates, representatives, partners, and contractors from and against any and all third party claims, actions, administrative proceedings (including, without limitation, informal proceedings), judgments, damages, penalties, fines, cost, liabilities, interests, or loss, including, without limitation, reasonable attorneys' fees and expenses, consultant fees, and expert fees, together with all other costs and expenses of any kind or nature suffered by or asserted against the indemnified party in any way arising out of or connected with this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation or maintenance of Licensee's facilities, unless caused by the sole negligence or willful misconduct on the part of Licensor or Licensor's affiliates, agents, officers, employees and assigns). Each party expressly assumes all liability for actions by its affiliates, agents, officers, employees, or its contractors and expressly waives any immunity from the enforcement of this indemnification provision that might otherwise be provided by workers' compensation law or by other state or federal laws.
- 12.03 Without limiting any of the foregoing, Licensee assumes all risk of, and agrees to relieve Licensor of any and all liability for, loss or damage (and the consequences of loss or damage) to any facilities placed on Licensor's property and any other financial loss sustained by Licensee,

except to the extent caused by the negligence or willful misconduct on the part of Licensor or Licensor's agents, officers, employees, and assigns.

- 12.04 Without limiting the foregoing, Licensee expressly agrees to indemnify, defend, and hold harmless Licensor and Licensor's agents, officers, employees and assigns from any and all claims asserted by end users/customers of Licensee in any way arising out of or in connection with this Agreement or Licensee's facilities, except to the extent caused by the negligence or willful misconduct on the part of Licensor or Licensor's agents, officers, employees, and assigns. or its contractors.
- 12.05 Notwithstanding anything to the contrary in this Agreement, Licensee further shall indemnify and hold harmless Licensor, its agents, officers, employees, and assigns from and against any claims, liabilities, losses, damages, fines, penalties, and costs (including, without limitation, reasonable attorneys' fees) whether foreseen or unforeseen, which the indemnified parties suffer or incur because of:
- (A) Any discharge of hazardous waste resulting from acts or omissions of Licensee or Licensee's predecessor in interest;
 - (B) Acts or omissions of Licensee, its agents, employees, Licensees, or representatives in connection with any cleanup required by law, or
 - (C) Failure of Licensee to comply with Environmental, Safety and Health Laws.
- 12.06 In no event shall either Party be liable to the other for any special, consequential or indirect damages (including, without limitation, lost revenues and lost profits) arising out of this Agreement or any obligation arising hereunder, whether in an action for or arising out of breach of contract, or otherwise.
- 12.07 Licensee shall indemnify, protect, and hold harmless Licensor from and against any and all claims for libel and slander, copyright and/or patent infringement arising directly or indirectly by reason of installation of Licensee's equipment on Licensor Poles, Conduit Systems or Right-of Way pursuant to this Agreement.

13.0 COMPLIANCE WITH LAW

- 13.01 Notwithstanding anything to the contrary in this Agreement, each Party shall ensure that any and all activities it undertakes pursuant to this Agreement shall comply with all applicable laws, including, without limitation, all applicable provisions of:
- (A) Workers' compensation laws
 - (B) Unemployment compensation laws
 - (C) The Federal Social Security Law
 - (D) The Fair Labor Standards Act, and

- (E) All laws, regulations, rules, guidelines, policies, orders, permits and approvals or any governmental authority relating to environmental matters and/or Occupational Safety and Health Act ("OSHA").

14.0 INSURANCE

14.01 Licensee shall obtain and maintain, in full force and effect at all times, during operations covered by this Agreement, such minimum insurance as will cover the obligations and liabilities of said Party, its agents, and its employees which may arise from the operations under this Agreement. Insurance shall have limits of not less than:

- (A) Commercial General Liability policy of minimum limits of:

| | |
|---|--------------------------------|
| General Aggregate | \$ 2,000,000 per policy period |
| Products/Completed Operations Aggregate | \$ 2,000,000 per policy period |
| Personal Injury/Advertising | \$ 2,000,000 per occurrence |
| Each Occurrence | \$ 2,000,000 per occurrence |
| Fire Legal Liability | \$ 50,000 any one fire |

14.02 The policy will be endorsed to show the above aggregate limits applying to "each" job site or, as an alternative, the General Aggregate will be increased to \$4,000,000 per policy period. Policy will also specifically state the coverage applies to all operations conducted by the respective Party, its employees, or agents on behalf of that Party's Corporation or subsidiary.

14.03 Where the performance of the work involves structural property, underground property, or blasting, each Party's Commercial General Liability insurance policy shall provide coverage to the insured for legal liability arising from operations under this Agreement for property damage:

- (A) arising out of blasting,
- (B) arising out of collapse of, or structural injury to, any building or structure or
- (C) To underground facilities and utilities.

14.04 Other general liability forms are acceptable in lieu of the Commercial General Liability Form, however, they are not to be used without written approval from the Company's Risk Management Department, 4001 Rodney Parham Road, AR 72212. However, such written approval shall not be unreasonably withheld.

- (A) Business Automobile Liability policy with minimum limits of:

| | |
|-----------------------|---------------------------|
| Bodily Injury | \$2,000,000 per accident |
| Property Damage | \$ 2,000,000 per accident |
| OR | |
| Combined Single Limit | \$ 2,000,000 per accident |

The policy will be issued using symbol "1 - any auto" coverage.

- (B) Workers Compensation:

Part 1 - Medical Benefits Statutory

Part 2 - Employer's Liability as indicated:

| | |
|---------------------------|--------------------------|
| Bodily Injury by Accident | \$ 100,000 each accident |
| Bodily Injury by Disease | \$ 100,000 each employee |
| Bodily Injury by Disease | \$ 500,000 policy limit |

- 14.05 The policy will show the state in which operation on behalf of the Party and/or subsidiary is being conducted. For operations conducted within monopolistic (state fund) states, the Party will furnish a certificate of compliance from the appropriate state fund administrator.
- 14.06 In each and every policy in 14.04A and 14.04B, the other Party's Corporation and its subsidiaries shall be named an "additional insured" with respect to activities performed on behalf of the Party's Corporation and its subsidiaries.
- 14.07 Coverage provided by the policies listed in this paragraph will be issued by an insurance company, licensed in the state in which operations on behalf of the Party are to be conducted. It is acceptable to use both primary and excess/umbrella policies to obtain necessary limits.
- 14.08 Licensee will furnish to the other Party, a certificate evidencing insurance coverage under sub-paragraphs 14.04-A, and 14.04-B. Such certificate shall provide for a thirty-day prior notice to the other Party of any cancellation or material changes in coverage and shall be signed by a legal representative of the issuing insurance company. The certificate of insurance shall be sent to the person identified at paragraph 25.03.
- 14.09 The provisions of sub-paragraphs 14.04-A and 14.04-B shall also apply to all sub-Licensees, and Licensee shall be responsible for their compliance herewith.

15.0 NON-WAIVER OF TERMS AND CONDITIONS

- 15.01 Failure to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

16.0 LICENSOR'S LIEN

- 16.01 Should Licensor under any Article of this Agreement remove Licensee's cable, equipment or facilities from Licensor's poles, conduit system or right-of-way, Licensor will deliver to Licensee the cable, equipment or facilities so removed upon payment by Licensee of the cost of removal, storage and delivery, and all other amounts due Licensor hereunder. Licensor is hereby given a lien on Licensee's cable, equipment or facilities within Licensor's conduit system or right-of-way or attached to Licensor's poles or removed therefrom, with power of public or private sale, to cover any amounts due Licensor under the provisions of this Agreement. Such liens shall not operate to prevent Licensor from pursuing, at its option, any other remedy in law, equity or otherwise, including any other remedy provided for in this Agreement.

17.0 SCHEDULE OF FEES AND CHARGES

- 17.01 Licensee may be required to furnish bond or other security satisfactory to Licensor, in a reasonable initial amount to be determined by Licensor and provided by Licensee at the

time Licensee submits Exhibit B to Licensor's Attachment Application Procedures to guarantee the payment of any such sums which may become due to Licensor arising out of this Agreement including, but not limited to fees due hereunder or charges for work performed for the benefit of Licensee under this Agreement, including the removal of Licensee's facilities upon termination of this Agreement by any of its provisions or upon termination of any License issued hereunder. Bond to be sent to person identified at paragraph 25.03. Bond is to be equal to one (1) year's annual rental fees.

17.02 The fees, rates and charges set forth in APPENDIX I or elsewhere in this Agreement are effective during the term of this Agreement subject to Section 3.01 and shall be due and payable by Licensee as set forth herein.

17.03 FEES:

All rates, charges and fees set forth in this Agreement and as shown in APPENDIX I (Schedule of Rates, Fees, and Charges) shall be subject to all applicable federal, state, and local laws, rules, regulations and commission orders.

(A) Computation:

(1) Pole and Anchor Attachment Fees:

- (a) For the purpose of computing the annual pole attachment fee hereunder, for calendar years subsequent to a first partial calendar year, said fee shall be based upon the number of poles and anchors, to which attachments are actually made, as of December 31 of the preceding year, multiplied by the per attachment pole attachment fee rate set forth on APPENDIX I. For a first partial calendar year, the pole attachment fee shall be prorated as necessary, on a daily basis from the date payment is due in accordance with Exhibit B of Licensor's Attachment Application Procedures.
- (b) For billing purposes, a single pole attachment includes the point of attachment and all facilities located in the usable space on the pole in the space assigned to Licensee (typically six inches above and six inches below the point of attachment). If Licensee occupies more than one usable space on a pole, separate attachment fees shall apply to each space occupied.

(2) Conduit Occupancy Fees :

- (a) For the purpose of computing the total conduit occupancy fee due hereunder, the duct feet of conduit shall be measured from the center to the center of manholes; or from the center of a manhole to the end of the duct; from the center of a manhole to the property line if the duct is connected at the property line to a duct owned and controlled by a third-party property owner; or the length of a conduit from pole to pole; or isolated lengths of conduit not attached to any structure (such as involved with buried cable) which will be occupied by Licensee's cable.
- (b) For billing purposes each inner duct will be billed the half duct fee. If two or more facilities occupy a duct that has not been

subdivided, the half duct fee will be charged for each facility. The half duct fee will apply when others place the Licensee facility in a duct that has not been subdivided only if the facility does not render the duct unusable.

- (3) Right-of-Way Occupancy Fees:
 - (a) This fee will be negotiated on a case by case basis. There is no established per foot rate.
- (B) Payment Date:
 - (1) If this Attachment License Agreement becomes effective on or prior to June 30, all attachment and occupancy fees for the remainder of that first partial calendar year shall be due and payable at the time required under Appendix I of Licensor's Attachment Application Procedures .
 - (2) If an Attachment License Agreement becomes effective on or after July 1, all attachment and occupancy fees for the remainder of that current partial calendar year as well as the full upcoming calendar year shall be payable at the time required under Appendix I of Licensor's Attachment Application Procedures.
 - (3) On an annual basis, all attachment and occupancy fees not previously paid are to be paid in advance, on the 31st day of January of each year or within 30 days of receipt of invoice. Failure to pay such fees within 30 days of the annual due date shall constitute a Material Default of this Agreement.
- (C) Termination of License:
 - (1) Upon termination or surrender of a license granted hereunder, no refund of any attachment or occupancy fee shall be made.

17.04 OTHER CHARGES:

- (A) Computation:
 - (1) All charges for inspections, engineering, or rearrangements of Licensee's facilities from Licensor's poles or conduit and, without limitation, any other work performed for Licensee shall be based upon the full cost and expense, including reasonable overhead, to Licensor for performing such work for Licensee. The cost to Licensee shall be determined in accordance with the regular and customary methods used by Licensor in determining such costs.
 - (2) The charge for replacement of poles shall include the entire non-betterment cost to Licensor including the increased cost of larger poles, sacrificed life value of the poles removed, cost of removal, less any salvage recovery and the cost of transferring Licensor's facilities from the old to the new poles.
 - (3) All other attachment or occupancy related inquiry, verification, application, administrative and miscellaneous rates, fees and charges shall be

calculated and paid in accordance with APPENDIX I and/or Licensor's Attachment Application Procedures and Attachments thereto.

- (B) Payment Date:
 - (1) All bills for such other charges for work performed by Licensor shall be payable upon presentment to Licensee, and shall be deemed delinquent if not paid within 30 days after presentment to Licensee.

18.0 DISPUTE RESOLUTION

18.01 Except in the case of:

- (A) A suit, action, or proceeding by one Party to compel the other Party to comply with its obligation to indemnify the other Party pursuant to this Agreement, or
- (B) A suit, action or proceeding to compel either Party to comply with the dispute resolution procedures set forth in this section, the Parties agree to use the following procedure to resolve any dispute, controversy, or claim arising out of or relating to this Agreement or its breach.

18.02 At the written request of a Party, each Party shall designate a knowledgeable, responsible representative to meet and negotiate in good faith to resolve any dispute, controversy, or claim arising under this Agreement. The Parties intend that these negotiations be conducted by non-lawyer, business representatives. The substance of the negotiations shall be left to the discretion of the representatives. Upon mutual agreement, the representatives may utilize other alternative nonbinding dispute resolution procedures such as mediation to assist in the negotiations. Discussions and correspondence between the representatives for the purposes of these negotiations shall be treated as confidential, undertaken for purposes of settlement, shall be exempt from discovery and production, and shall not be admissible in any subsequent proceeding without the concurrence of all Parties. Documents identified in or provided during such negotiations, which are not prepared for purposes of the negotiations, shall not be so exempt and may, if otherwise admissible, be admitted as evidence in any subsequent proceeding.

18.03 If a resolution of the dispute, controversy or claim is not reached within ninety days of the initial written request referred to in 18.02, the dispute, controversy, or claim may be filed with the State Public Service Commission for review and determination, provided the party invoking the Commission's intervention process has in good faith negotiated, or attempted to negotiate, with the other Party pursuant to 18.02.

18.04 Each Party shall bear its own costs, including attorneys' fee, incurred in connection with any of the foregoing procedures. A Party-seeking discovery shall reimburse the responding Party the cost of reproducing documents (to include search time and reproduction time costs). The fees associated with any arbitration, including the fees of the arbitrator, shall be divided equally between the parties.

19.0 ENTIRE AGREEMENT

19.01 This Agreement and Licensor's related Attachment Application Procedures cancels and supersedes all previous agreements whether written or oral, except for any sums due thereunder, between Licensor and Licensee with respect to the attachment of Licensee's cable, equipment, and facilities to Licensor's poles or the placing Licensee's cable, equipment or facilities in Licensor's conduit system or right-of-way; and there are no other provisions, terms or conditions to this Agreement except as expressed herein. All currently effective licenses heretofore granted pursuant to such previous agreements shall continue in effect subject to the terms and conditions of this Agreement.

19.02 The terms and conditions of this Agreement supersede all prior oral or written understandings between the Parties and constitute the entire Agreement between them concerning the subject matter of this Agreement. There are no understandings or representations, express or implied, not expressly set forth in this Agreement or in Licensor's related Attachment Application Procedures. This Agreement shall not be modified or amended except by writing signed by the Party to be charged. **This Agreement is only for pole /occupancy applications submitted for the properties owned and operated by Windstream Kentucky East, LLC in the State of Kentucky. This agreement does NOT apply to Windstream Kentucky West, LLC or any other owned properties. Separate agreements must be requested for each Windstream Operating Company and for Interconnection Access to Central Offices.**

GENERAL OPERATING ROUTINE

20.0 ATTACHMENT, USE AND/OR OCCUPANCY REQUEST PROCESS

20.01 There is a multi-step pole attachment or duct, innerduct, conduit or right-of-way use and/or occupancy application process and fee determination process that the Licensee may begin upon the execution of this Agreement. It is set forth below and in Licensor's related Attachment Application Procedures.

21.0 POLE ATTACHMENT REQUESTS (PAR)

21.01 The following process can begin upon the execution of this agreement. The steps are:

- (A) Pole Attachment Quote Preparation: Licensee shall submit a Pole Attachment Request Form (Exhibit B to Licensor's related Attachment Application Procedures), which may be reasonably revised from time to time by Licensor at its sole discretion, to Licensor which will include a drawing of the proposed route and contact information (name, telephone, facsimile, and email information), and all required fees, as listed in and computed in accordance with APPENDIX I, which may be changed from time to time by Licensor to remain consistent with prevailing costs, of this Agreement. These fees consist of administrative as well as other actual costs reasonably incurred in researching the requested route. Once Licensor receives the aforementioned specific attachment information and the fee from Licensee, Licensor will report on the Poles along the route, any required make-ready work, the costs and schedule for such make-ready work, and any other requirements Licensee must satisfy prior to installing its facilities. If during this process, Licensor determines any lawful reason for denying Licensee's application, Licensor will so inform Licensee. Pole attachment quotes will be provided within thirty (30) business days for standard requests. Non-standard quantities of pole attachments and distances will be addressed on an individual case basis, and in a commercially reasonable period.
- (B) Pole Attachment Order: Upon completion of the work identified above, Licensor will inform Licensee if Licensor will provide Licensee a Pole Order Form (Appendix VI to the Licensor's related Attachment Application Procedures) which may be revised from time to time by Licensor at its sole discretion, containing estimated make-ready cost (if any), annual recurring charges and any additional information necessary for Licensee to proceed with attaching its facilities to Licensor's Poles. If Licensee desires to attach to Licensor's poles, and pole make-ready work is required, Licensee shall pay the estimated make-ready cost prior to Licensor beginning any work. Actual costs incurred by Licensor in performing the make-ready work will be applied to the estimated make-ready costs. Any reasonable costs in excess of the estimated cost will be billed to Licensee. Any payment of the estimated costs in excess of actual pole attachment make-ready costs will be returned to Licensee. If Licensee declines to proceed, all fees incurred to date will be billable to Licensee by Licensor.

21.02 Licensee has thirty (30) days to pay the estimated make-ready work or cancel the PAR.

21.03 Upon completion of the make-ready work, the receipt of all payments and fees, and the signing of this Agreement, an "Approved" Attachment I shall be returned to the Licensee. At that time Licensee will be considered to have been granted a License with respect to the poles approved in the PARON and may attach to Licensor's facilities.

22.0 SURVEYS AND INSPECTIONS OF LICENSEE'S FACILITIES

21.01 Licensor reserves the right to inspect each new installation or work operation of Licensee on or within Licensor's facilities. The making of inspections or the failure to make inspections shall not relieve Licensee of any responsibility, obligation or liability imposed by this Agreement.

23.0 ISSUANCE OF LICENSES

23.01 Before Licensee shall have a right to attach to any pole of Licensor, Licensee shall make application for and receive a revocable, nonexclusive license therefore in the form of an approved Application for Pole License (APPENDIX VI and Exhibit B to Licensor's related Attachment Application Procedures).

23.02 Before Licensee shall have the right to place any cable, equipment or facilities within any conduit system or right-of-way of Licensor, Licensee shall make application for an receive a revocable, nonexclusive license therefore in the form of an approved Application for Conduit or Right-of-Way License (APPENDIX IV and Exhibit B to Licensor's related Attachment Application Procedures), hereto attached and made a part hereof.

23.03 Any license granted hereunder for attachment to Licensor's poles shall terminate without further notice to Licensee as to individual poles covered by the license to which Licensee has not attached within ninety (90) days from the date that Licensor has notified Licensee that such poles are available for attachment of the operating facilities of Licensee, unless Licensor, in the exercise of its sole discretion, agrees to extend said period at the request of Licensee.

23.05 Any license granted hereunder for placement of Licensee's facilities in Licensor's conduit system shall terminate without further notice to Licensee as to individual sections of Licensor's conduit system covered by the license in which Licensee has not placed its facilities within ninety (90) days from the date that Licensor has notified Licensee that such sections of the conduit system are available for the placement of operating facilities of Licensee, unless Licensor, in the exercise of its sole discretion, agrees to extend said period at the request of Licensee.

24.0 AUTHORITY TO PLACE ATTACHMENTS

24.01 Before any attachments or placement of facilities Licensee shall submit evidence that Licensee has the authority to maintain Attachments within public rights-of-way or on private right-of-way or on private property. Licensee shall be solely responsible for obtaining all licenses, authorizations, permits and consents from federal, state and local authorities or private land owners that may be required to place and maintain facilities on Licensor's poles or within Licensor's conduit, duct or right-of-way.

25.0 NOTICES (OF MODIFICATION OR ALTERATION OF POLES)

25.01 In the event Licensor plans to modify or alter any Licensor Poles upon which Licensee has placed Attachments, Licensor, except in emergency situations, shall provide Licensee written notice of the proposed modification or alteration at least ninety (90) business days prior to the time the proposed modification or alteration is scheduled to take place. Should Licensee decide to modify or alter Licensee's Facilities on Poles, Licensee shall so notify Licensor in writing at least ninety (90) business days prior to the day the work is to begin. In such event, Licensee shall bear a proportionate share of the total costs incurred by Licensor to make Licensor Poles accessible. Licensee's proportionate share of the total cost shall be based on the ratio of the amount of new space occupied by Licensee to the total amount of new space

occupied by all of the parties joining in the modification. Licensee is not responsible for any costs of Licensor's modifications or alterations of its Poles.

- 25.02 In the event Licensor is required to move the location of, or replace, any Licensor Pole(s) for reasons beyond its control, Licensee concurrently shall relocate Licensee's Attachments. Licensee shall be solely responsible for the costs of the relocation of Licensee's Attachments. When it is mutually agreed that it is in the best interest of Licensor and Licensee, Licensor will, after proper notification has been provided, transfer Licensee's Attachments at the same time that Licensor transfers its Attachments. The rate charged for these transfers is listed in this Agreement (APPENDIX I). The rate for transfers may be adjusted by Licensor from time to time to remain consistent with prevailing costs.
- 25.03 Notices under this Agreement may be given and shall be deemed to have been given, by posting the same in first class mail to Licensee as follows:

LICENSOR:

Company Name: **Windstream Kentucky East, LLC**

By: Thomas A. Hudock, Jr.

26.0 REQUIREMENTS AND SPECIFICATIONS FOR ATTACHMENT TO POLES

26.01 Licensee's cables, equipment, and facilities shall be placed and maintained in accordance with the requirements and specifications attached hereto and as set forth in Licensor's related Attachment Application Procedures and made a part hereof, and in accordance with the requirements and specifications of the National Electric Safety Code (most recent edition) and the National Electric Code (most recent edition), and in compliance with any other rules or orders now in effect or that may hereafter be issued by any state utility commission or other authority having jurisdiction.

27.0 PLACEMENT OF ATTACHMENTS

27.01 Licensee shall, at its own expense, place and maintain and replace its Attachments on Licensor's Poles in accordance with:

- (A) Such reasonable requirements and specifications as Licensor shall from time to time prescribe in writing in Licensor's Attachment Application Procedures or otherwise,
- (B) In compliance with any rules or orders now in effect or that hereafter may be issued by any regulatory agency or other authority having jurisdiction, and
- (C) All currently applicable requirements and specifications of the National Electrical Safety Code, National Electric Code, most current edition or any amendment or revision of said Code. Licensee agrees to comply, at its sole risk and expense, with all specifications hereto, as may be revised from time to time by Licensor. Licensor will provide supervision at Licensee's expense if Licensor believes it is required.

27.02 Licensee's Facilities shall be tagged at maximum intervals of 300 feet so as to identify Licensee as the owner of the Facility. The tags shall be of sufficient size and lettering so as to be easily read from ground level.

28.0 MODIFICATIONS, ADDITIONS OR POLE REPLACEMENTS AND REARRANGEMENTS

28.01 Licensee shall not modify, add to, or replace facilities on any pre-existing Attachment on an Licensor Pole without first notifying Licensor in writing of the intended modification, addition or replacement at least thirty (30) business days prior to the date the activity is scheduled to begin. The required notification shall include:

- (A) The date the activity is scheduled to begin,
- (B) A description of the planned modification, addition, or replacement,
- (C) A representation that the modification, addition, or replacement will not require any space other than the space previously designated for Licensee's Attachments, and
- (D) A representation that the modification, addition, or replacement will not impair the structural integrity of the Poles involved.

- 28.02 Should Licensor determine that the modification, addition, or replacement specified by Licensee in its notice will require more space than that allocated to Licensee or will require the rearrangements of, reinforcement of, replacement of, or an addition of support equipment to the Poles involved in order to accommodate Licensee's modification, addition, or replacement, Licensor will so notify Licensee, whereupon Licensee will be required to submit a PAR in compliance with this Agreement in order to obtain authorization for the modification, addition, or replacement of its Attachments.
- 28.03 Should Licensee request Licensor to expand capacity or purchase additional plant, Licensee agrees to pay all reasonable costs. If Licensor or another party that has been granted a license joins in the request and will benefit from the expansion or purchase, Licensee agrees to pay a percentage of all costs proportionate to Licensee's share of the benefit received from the expansion or purchase.
- 28.04 When multiple applications, including application of Licensee, are received by Licensor with respect to any pole which must be replaced or rearranged to provide additional space prior to commencement of the work on that pole a Transfer Attachment Fee may be charged. Licensor will equitably prorate to the extent that it is practical between Licensee and other applicants for the pole space, the common expenses of engineering, rearrangement, and replacement, if any, which result from the processing of multiple applications. . Licensee shall be bound by Licensor's determination as to any such pro-ration of Transfer Attachment Fee to Licensee.

29.0 UNAUTHORIZED ATTACHMENTS

- 29.01 If any cable, equipment or facilities of Licensee shall be found on a pole or within a conduit or right-of-way for which no license is outstanding, Licensor, without prejudice to its other rights or remedies under this Agreement or otherwise, may:
- (A) Impose a charge, and
 - (B) Require Licensee to remove such cable, equipment or facilities forthwith or Licensor may remove them without liability and the expense of removal shall be borne by Licensee. For the purpose of determining the charge, Licensee shall pay liquidated damages that will not exceed an amount equal to the annual pole attachment fee for the number of years the unauthorized attachments have existed (or, if that cannot be determined, the number or years since the most recent inventory or five years, whichever is less), plus interest at a rate set for that period by the IRS for individual underpayments pursuant to Section 6621 of the IRS Code. Any such charge imposed by Licensor shall be in addition to its rights to any other sums due and payable, including without limitation the actual costs of any audit or survey which established the existence of the unauthorized attachments and to any claims to said fees or said unlicensed use shall be deemed as a ratification or the licensing of the unlicensed use, and if any license should subsequently be issued, after application and payment of the application fee therefore, said license shall not operate retroactively or constitute a waiver by Licensor of any of its rights or privileges under this Agreement or otherwise.
- 29.02 For purposes of this section, an unauthorized Attachment shall include, but not limited to:

- (A) An Attachment to a Pole which is not identified in any PARON (APPENDIX VI) issued in accordance with this Agreement;
- (B) An Attachment that occupies more space than that allocated to Licensee By Licensor;
- (C) An attachment that is not placed in accordance with the provisions of this Agreement or the appropriate PARON (APPENDIX VI) issued pursuant to this Agreement, unless Licensee can demonstrate to Licensor's reasonable satisfaction that said misplacement is not due to any act or omission of Licensee or Licensee's agents;
- (D) An addition or modification by Licensee to its pre-existing Attachment(s) that impairs the structural integrity of the involved Licensor Pole(s).
- (E) An Attachment that consists of facilities owned or controlled by, and for the use of a Party other than Licensee.

29.03 Once Licensor has notified Licensee of an unauthorized attachment. Licensee can submit a PAR to request an authorized attachment. A PAR submitted per this provision will be treated like any other PAR subject to this Agreement. Licensee will be responsible for all fees associated with a PAR (as identified in this Agreement). If a PAR is not received by Licensor within ten (10) business days of Licensee's receipt of an unauthorized attachment notification, Licensee has sixty (60) business days from the date of its receipt of the initial unauthorized attachment notification to vacate the Pole.

30.0 FAILURE TO PLACE ATTACHMENTS

30.01 Once Licensee has been issued a PARON (APPENDIX VI), Licensee shall have ninety (90) calendar days from the date of the PARON (APPENDIX VI) to begin the placement of its Attachments on the Licensor Poles covered by the PARON (APPENDIX VI). If Licensee has not begun placing its Attachments within that ninety-(90) calendar day period, Licensee shall so advise Licensor with a written explanation for the delay. If Licensee fails to advise Licensor of its delay, with a written explanation therefore, or if Licensee fails to act in good faith by not making a bona fide effort to begin placing its Attachments within the ninety (90) calendar days prescribed by this section, the previously issued PARON (APPENDIX VI) shall be deemed rescinded by Licensor and Licensee shall have no further right to place Attachments pursuant to that PARON (APPENDIX VI).

31.0 OCCUPANCY OF CONDUIT SYSTEM

31.01 When Licensee submits an application for a license to place its cables, equipment, and facilities in the conduit system of Licensor, Licensor will advise Licensee of the availability of conduit space in accordance with Licensor's Attachment Application Procedures. In determining the availability of space in Licensor's conduit system, Licensor reserves the right to deny the granting of a license for any non-discriminatory lawful reason, including without limitation, insufficient capacity or reasons of safety, reliability and generally applicable engineering purposes. If conduit space is available, a license to occupy a portion of conduit system will be granted to Licensee, provided, however, that Licensor does not warrant the condition of such conduit system.

- 31.02 Licensor reserves the right to exclude cable, equipment, and facilities of Licensee from Licensor's conduit system, or to limit the type, number and size of Licensee's cable, equipment, and facilities which may be placed in any of Licensor's manholes.

32.0 OCCUPANCY OF RIGHT-OF-WAY

- 32.01 Licensor and Licensee agree that neither party has the right to restrict or interfere with the other party's lawful access to and use of public right-of-way, including public right-of-way, which pass over property owned by either party. Except as otherwise specifically provided in this Agreement, Licensor and Licensee shall each be responsible for obtaining their own right-of-way and permission to use real or personal property owned or controlled by any governmental body.
- 32.02 In the event that Licensee desires to occupy right-of-way owned or controlled by Licensor, Licensor may require Licensee to make an application to do so by the terms of this Agreement. Licensor reserves the right to determine whether granting a license would adversely affect its common carrier communication services and its ability to meet its duties and obligation with respect thereto, including questions of economy, safety, and future need of Licensor.
- 32.03 Licensor may, without incurring any liability, remove the cables, equipment, and facilities of Licensee from Licensor's right-of-way, at Licensee's expense where in Licensor's judgement (such judgement to be conclusive) such removal is required in connection with the performance of Licensor's service obligation or the safety of Licensor's employees. Whenever such removal has been made, Licensee will be promptly notified.

33.0 CONSTRUCTION AND MAINTENANCE OF FACILITIES

- 33.01 Licensee shall, at its own expense, make and maintain its pole attachments in a safe condition and in thorough repair, and in a manner reasonably acceptable to Licensor, and so as not to conflict with the use of said poles by Licensor or by other authorized users of said poles, or interfere with other facilities thereon or which may from time to time be placed thereon. Licensee shall, at its own expense, upon written notice from Licensor, relocate or replace its facilities placed on said poles, or transfer them to substituted poles, or perform any other work in connection with said facilities that may be required. Licensor shall give such written notice as is reasonable in the circumstances, provided, however, that in cases of emergency, (Licensor's judgment as to what constitutes an emergency to be conclusive) Licensor may arrange to relocate, remove or replace the attachments placed on said poles by Licensee, transfer them to substituted poles or perform any other work in connection with said facilities that may be required in the maintenance, replacement, removal or relocation of said poles or of the facilities thereon or which may be placed thereon, or for the service needs of Licensor, and Licensee shall reimburse Licensor for the expense thereby incurred. Attachments of Licensee to poles of Licensor, as mentioned herein shall be understood to include attachments of Licensee in space reserved for Licensor, or space which Licensor has the right to use, on poles of other companies with which Licensor now has or may hereafter have agreements for joint use and occupancy; and the use of such space by Licensee shall be subject to the terms and conditions of the agreements between Licensor and said other companies. Such authorization will not be unreasonably withheld.

- 33.02 Licensee's cable, equipment, and facilities shall be placed in, removed from, relocated in or maintained in Licensor's conduit system only when specific authorization for the work to be performed and approval of the person, firm or corporation selected by Licensee to perform the work, has been obtained in writing in advance from Licensor. Licensor retains the right to specify what, if any work shall be performed by Licensee. Such authorization will not be unreasonably withheld
- 33.03 In each instance where Licensee's cable, equipment, and facilities are to be placed in Licensor's conduit system, Licensor shall specify, among other things, the cable configuration and location of Licensee's cable, equipment, and facilities, the particular duct of the conduit system such cable will occupy, and the location where and manner in which Licensee's cable will enter and exit Licensor's conduit system.
- 33.04 Licensor's manholes shall be opened as reasonably permitted by Licensor's authorized employees or agents. Licensee shall be responsible for obtaining any necessary permits from appropriate governmental authorities to open manholes and to conduct the work operations. Licensee's employees or agents will be permitted to enter or work in Licensor's manholes only when an authorized agent or employee of Licensor is present except as provided in the next paragraph. Licensor's said agent or employee shall have the authority to terminate Licensee's work operations in and around Licensor's manholes if, in the sole discretion of said agent or employee, any hazardous conditions arise or any unsafe practices are being followed by Licensee's employees or agents. Licensee agrees to pay, in accordance with the terms and conditions of APPENDIX I, the full cost of having Licensor's agent or employee present when Licensee's work is being done in Licensor's manholes. The presence of Licensor's authorized agent or employee shall not relieve Licensee of its responsibility to conduct all of its work operations in and around Licensor's manholes in a safe and workmanlike manner. Licensee is responsible for all signage, traffic control, equipment, and personnel necessary to work in Licensor's manholes. All work shall meet Occupational Safety and Health Act (OSHA), and any local or state standards and requirements.
- 33.05 Licensee's employees will be permitted to enter or work in Licensor's manholes and conduit system without an authorized agent or employee of Licensor being present, provided that Licensee's work consists only of routine operations of testing, adjusting, regulating or inspecting Licensee's existing facilities and does not involve any placing, removing, changing or rearranging of Licensee's or Licensor's facilities. In such cases, Licensee shall notify Licensor's designated representative in advance of Licensee's operations as to the type of work to be performed, the time at which it is to be performed and where it is to take place. Licensee shall conduct all such work operation in a safe and workmanlike manner, and in accordance with the terms of this Agreement.
- 33.06 Licensee shall, at its own expense, maintain its buried communication facilities so as not to conflict with the use of the right-of-way by Licensor or other authorized users of the right-of-way. Licensee shall, at its own expense, relocate, change, or replace its facilities or perform any other work in connection with said facilities that may be reasonably required by Licensor or other authorities.

34.0 TERMINATION OF LICENSES

- 34.01 Upon notice from Licensor to Licensee that Licensor has been advised by governmental authority or private property owners that the use of any pole, conduit system, or right-of-way is not authorized and is objected to by such governmental authority or private property owner, as the case may be or that any pole, any conduit system or any right-of-way is to be removed, sold or otherwise disposed of, Licensee shall, if reasonably requested by Licensor, remove its cables, equipment, and facilities at once from the affected pole or poles or shall make arrangements for the removal of its cable, equipment, and facilities from the affected portion of Licensor's conduit system or right-of-way at Licensor's expense. If not so removed, Licensor shall have the right to remove Licensee's cable, equipment, and facilities from Licensor's right-of-way at the cost and expense of Licensee and without any liability thereto. If Licensor deems it is impractical to remove Licensee's cables, equipment or facilities from any right-of-way, they may be abandoned in place.
- 34.02 Licensee may at any time remove its facilities from any pole of Licensor, but shall immediately give Licensor written notice of such removal and surrender of license in the form of a Notification of Surrender (APPENDIX VII) hereto attached and made a part hereof. If Licensee surrenders its license but fails to remove its facilities from Licensor's poles, Licensor shall have the right to remove Licensee's facilities at Licensee's expense without any liability on the part of Licensor for damage or injury to Licensee's facilities. In the event that Licensee's cables, equipment, and facilities shall be removed from any pole as provided by this Agreement, no attachment shall again be made to such pole unless Licensee shall have first complied with all of the provisions of this Agreement as though no attachment had previously been made.
- 34.03 If Licensee desires to terminate its license for the right to occupy any part of Licensor's conduit system, Licensee shall give Licensor written notice of such surrender in the form of a Notification of Surrender (APPENDIX VII) hereto attached and made a part hereof. In such event, Licensee shall make arrangements with Licensor for the removal of Licensee's cables, equipment, and facilities from that part of Licensor's conduit system at Licensee's expense. In the event that Licensee's cables, equipment, and facilities shall be removed from Licensor's conduit system as provided by this Article, no cable, facilities or equipment shall again be placed in that part of such conduit system unless Licensee shall have first complied with all of the provisions of this Agreement as though no cables, equipment, and facilities of Licensee had previously been placed in that part of Licensor's conduit system.
- 34.04 If Licensee desires to terminate its license for the right to occupy any part of the right-of-way, Licensee shall give Licensor written notice of such surrender in the form of a Notification of Surrender (APPENDIX VII) attached hereto and made a part hereof. In such event, Licensee shall make arrangements with Licensor for the removal of Licensee's cables, equipment, and facilities from that part of the right-of-way at Licensee's expense. However, in the event it is impractical to remove Licensee's cable, equipment, and facilities from any right-of-way, they may be abandoned in place.

35.0 EMERGENCY RESTORATION PROCEDURES

- 35.01 In the event of an emergency, restoration procedures may be affected by the presence of Licensee's Attachments. While Licensor shall not be responsible for the repair of damaged Attachments of Licensee (except by mutual written agreement), Licensor shall nonetheless

control access to its poles, conduit systems or right-of-way if the restoration is to be achieved in an orderly fashion.

35.02 Where Licensor and Licensee are involved in emergency restorations, access to Licensor's poles, conduit systems or right-of-way will be controlled by Licensor's Network Construction Managers or their on-site representative according to the following guidelines.

(A) Service Disruptions/Outages

- (1) While exercising its right to first access, Licensor shall make all reasonable efforts to grant access to as many other entities with Attachments as is reasonably safe.
- (2) Where simultaneous access is not possible, Licensor will grant access on first come, first served basis.

(B) Service Affecting Emergencies

- (1) While exercising its right to first access, Licensor shall make all reasonable efforts to grant access to as many other entities with Attachments as is reasonably safe.
- (2) Where Licensor is unable to grant simultaneous access to all other entities with Attachments, access will be granted according to the level of damage to the Attachments of each entity and the likelihood that a given level of damage will result in service disruption. Where the likelihood that a service disruption will result is not clearly discernible, access will be on a first come, first served basis.

35.03 Without limiting any other indemnification or hold harmless provisions of this Agreement, Licensee agrees that any decision by Licensor regarding access to Attachments, or any action or failure to act by Licensor, under this section shall not be the basis for any claim by Licensee against Licensor for any damage to Licensee's Attachments or disruption of Licensee's services, or any other direct or indirect damages of any kind whatsoever incurred by Licensee.

36.0 ABANDONMENT

36.01 Nothing in this Agreement shall prevent or be construed to prevent Licensor from abandoning, selling, assigning, or otherwise disposing of any poles, conduit systems or other Licensor property used for Licensee's Attachments; provided, however, that Licensor shall condition any such sale, assignment, or other disposition subject to the rights granted to Licensee pursuant to this Agreement. Licensor shall promptly notify Licensee of any proposed sale, assignment, or other disposition of any poles, conduit systems or other Licensor property used for Licensee's Attachments.

37.0 SIGNATURE

IN WITNESS WHEREOF, the parties hereto have executed this Agreement in duplicate.

POLE ATTACHMENT AGREEMENT

1. Parties.

This agreement (Agreement) is between GTE SOUTH INCORPORATED, a State of VIRGINIA corporation having its principal office at DURHAM, NC. ("GTE"), and EAST KENTUCKY NETWORK, LLC., a corporation of the State of KENTUCKY, having its principal office at WEST LIBERTY, KY. ("Licensee"). (GTE and Licensee sometimes referred to collectively as the Parties or individually as a Party).

2. Definitions.

- 2.1 Attachment Fee - the fee assessed per pole and paid by Licensee to place Attachments on GTE's poles. Attachment fees are specified in Section 12 of this Agreement.
- 2.2 Attachments - the equipment reasonably required by Licensee to provide its Telecommunications Services that is placed on GTE's poles.
- 2.3 Business Day - Monday through Friday, except for holidays on which the U. S. Mail is not delivered.
- 2.4 GTE's Poles or GTE Pole(s) - any pole or poles solely owned by GTE, jointly owned by GTE and another entity, and space on poles obtained by GTE through arrangements with the owner(s) thereof.
- 2.5 Hazardous Materials - (i) any substance, material or waste now or hereafter defined or characterized as hazardous, extremely hazardous, toxic or dangerous within the meaning of the Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended, or any similar law, ordinance, statute, rule or regulation of any governmental body or authority; (ii) any substance, material or waste now or hereafter classified as a contaminant or pollutant under any law, ordinance, statute, rule or regulation of any governmental body or authority; or (iii) any other substance, material or waste, the manufacture, processing, distribution, use, treatment, storage, placement, disposal, removal or transportation of which is now or hereafter subject to regulation under any law, ordinance, statute, rule or regulation of any governmental body or authority.
- 2.6 Make-Ready Work - all work, including, but not limited to, rearrangement, removal, or transfer of existing attachments, placement, repair, or replacement of poles, or any other changes required to accommodate the Licensee's Attachments on a pole.

2.7 **Pole Attachment Request (PAR)** - a written request from Licensee to place its Attachments on GTE's Poles, submitted in accordance with Section 6 of this Agreement. For Agreements in effect prior to date agreement is executed by the parties, the term PAR shall be deemed to include Pole Attachment requests made by letter or similar document.

2.8 **Telecommunications Services** - the offering of telecommunications for a fee directly to the public, or to such classes of users as to be effectively available directly to the public, regardless of the facilities used.

3. **Purpose.**

3.1 Licensee represents to GTE that Licensee has a need to occupy, place and maintain Attachments on GTE's poles for the purpose of providing Telecommunications Services.

3.2 GTE agrees to permit Licensee to occupy, place and maintain its Attachments on such GTE poles as GTE may allow pursuant to the terms of this Agreement.

4. **Grant of License.**

GTE grants to Licensee and Licensee accepts from GTE a non-exclusive revocable license to occupy, place and maintain in a designated space on specified GTE poles Licensee's attachments on the terms and conditions set forth herein. Licensee shall have no further right, title, or other interest in connection with GTE's poles. GTE shall have the right to grant, renew or extend privileges to others not parties to this Agreement to occupy, place or maintain Attachments on or otherwise use any or all GTE poles. Nothing herein is intended to, nor should it be construed to require GTE to construct or modify any facilities not needed for its own service requirements. GTE grants this license in reliance on the representation of Licensee that Licensee intends to provide Telecommunications Services with the Attachments covered by this Agreement.

5. **Term.**

Subject to the termination provisions contained in this Agreement, the term of this Agreement shall be two (2) years from the effective date of this Agreement and shall continue in effect for consecutive one (1) year terms until either Party gives the other Party at least ninety (90) calendar days written notice of termination, which termination shall be effective at the end of the then-current term. In the event notice is given less than ninety (90) calendar days prior to the end of the current term, this Agreement shall remain in effect for ninety (90) calendar days after such notice is received, provided, that in no case shall the term be extended beyond ninety (90) calendar days after the end of the current term.

6. Pole Attachment Requests (PARs).

- 6.1 Licensee shall submit a written Pole Attachment Request (PAR) as shown in Exhibit 1 to GTE identifying the GTE poles upon which it desires to place Attachments. Each PAR shall be in a form specified by GTE and may be revised from time to time by GTE. All PARs submitted to GTE shall be processed on a first come, first served basis. GTE, in its sole judgment, will determine the availability of space on the GTE pole(s) specified in the PAR and will provide its response to the PAR within thirty (30) Business Days of its submission. Upon approval of the PAR, GTE shall return one copy thereof to Licensee bearing an endorsement acknowledging GTE's authorization. All Attachments placed on GTE's poles pursuant to an approved PAR shall become subject to all of the terms and conditions of this Agreement. Licensee may submit subsequent PARs for approval by GTE as needed. GTE is under no obligation to provide general information respecting the location and availability of GTE poles, except as may be necessary to process a PAR. No Attachment shall be placed on any GTE pole identified in a PAR until that PAR has been approved by GTE.**
- 6.2 Licensee shall pay GTE a fee for processing a PAR to compensate GTE for the general administrative costs as well as the actual engineering costs reasonably incurred. The fee for engineering costs shall be computed by multiplying the fully loaded hourly rate for an engineer times the number of hours reasonably required by each engineer to inspect the GTE poles included in the PAR. GTE will charge its then current rates for administrative and engineering costs, as may be changed from time to time by GTE to remain consistent with prevailing costs.**
- 6.3 Upon receiving an approved PAR, Licensee shall have the right, subject to the terms of this License, to place and maintain the facilities described in the PAR in the space designated on the GTE poles identified therein.**
- 6.4 In the event Make-Ready Work is necessary to accommodate Licensee's Attachments, GTE shall notify Licensee of such fact and provide Licensee with a good faith estimate of the total cost of such Make-Ready Work needed to accommodate Licensee's Attachments. Within fifteen (15) Business Days after receiving such notice from GTE, Licensee shall notify GTE either (1) that Licensee shall pay all of the costs actually incurred to perform the Make-Ready Work and shall pay the total estimated amount to GTE at least ten (10) Business Days prior to the date the Make-Ready Work is to begin or (2) that it desires to cancel its PAR.**
- 6.5 GTE shall not be responsible to Licensee for any loss sustained by Licensee by reason of the refusal or failure of any other party with attachments on GTE's poles to rearrange or modify its attachments as may be required to accommodate Licensee's Facilities.**

6.6 Licensee is not authorized and shall have no right to place facilities on any GTE pole unless that GTE pole is identified in an approved PAR.

7. Availability of Information Regarding Space on Poles.

GTE will provide information regarding the availability of pole space within thirty (30) Business Days of a written request by Licensee. Because GTE will endeavor to determine available space as quickly as possible, a shorter interval may be experienced for requests of a limited scope where physical field verification is not necessary. In the event the thirty (30) Business Day time frame cannot be met, GTE shall so advise Licensee and shall seek a mutually satisfactory alternative response date. No representation regarding the availability of space shall be made in the absence of a physical field verification.

8. Authority to Place Attachments.

8.1 Before Licensee places any Attachments on GTE's poles pursuant to an approved PAR, Licensee shall submit evidence satisfactory to GTE including but not limited to an affidavit of its authority to erect and maintain the facilities to be placed on GTE's poles within the public streets, highways and other thoroughfares or on private property. Licensee shall be solely responsible for obtaining all ROWs, easements, licenses, authorizations, permits and consents from federal, state and municipal authorities or private property owners that may be required to place Attachments on GTE's poles. In the event Licensee must obtain any additional easements, permits, approvals, licenses and/or authorizations from any governmental authority or private individual or entity in order to utilize GTE's poles under an approved PAR, GTE shall, upon Licensee's request, provide written confirmation of its consent to Licensee's utilization of poles in a particular location in accordance with this Agreement, if needed by Licensee to obtain such additional approvals or authorizations. GTE shall also provide maps or drawings of its facilities' locations to the extent reasonably required by such governmental authority or private individual or entity for purposes of considering or granting Licensee's request to it for authority or approval.

8.2 GTE shall not unreasonably intervene in or attempt to delay the granting of any ROWs, easements, licenses, authorizations, permits and consents from federal, state or municipal authorities or private property owners that may be required for Licensee to place its Attachments on GTE's poles.

- 8.3 If any ROW, easement, license, authorization, permit or consent obtained by Licensee is subsequently revoked or denied for any reason, Licensee's permission to attach to GTE's poles shall terminate immediately and Licensee shall promptly remove its Attachments. Should Licensee fail to remove its Attachments within sixty (60) calendar days of receiving notice to do so from GTE, GTE shall have the option to remove all such Attachments and store them in a public warehouse or elsewhere at the expense of and for the account of Licensee without GTE being deemed guilty of trespass or conversion, and without GTE becoming liable for any loss or damages to Licensee occasioned thereby. All costs incurred by GTE to remove Licensee's Attachments shall be reimbursed to GTE by Licensee upon demand.
- 8.4 Upon notice from GTE to Licensee that the cessation of the use of any one or more of GTE's poles is necessary for reasons of safety or has been directed by any federal, state or municipal authority, or private property owner, permission to attach to such pole or poles shall terminate immediately and Licensee promptly shall remove its Attachments. Should Licensee fail to remove its Attachments within the time frame provided by the requesting or directing party or one hundred twenty (120) days of receiving notice to do so from GTE, whichever is less, GTE shall have the option to remove all such Attachments and store them in a public warehouse or elsewhere at the expense of and for the account of Licensee without GTE being deemed guilty of trespass or conversion, and without GTE becoming liable for any loss or damages to Licensee occasioned thereby. All costs incurred by GTE to remove Licensee's Attachments shall be reimbursed to GTE by Licensee upon demand by GTE.

9. Placement of Attachments.

- 9.1 Licensee shall, at its own expense, place and maintain its Attachments on GTE's poles in accordance with (i) such requirements and specifications as GTE shall from time to time prescribe in writing, (ii) all rules or orders now in effect or that hereafter may be issued by any regulatory agency or other authority having jurisdiction, and (iii) all currently applicable requirements and specifications of the National Electrical Safety Code, and the applicable rules and regulations of the Occupational Safety and Health Act. Licensee agrees to comply, at its sole risk and expense, with all specifications included hereto, as may be revised from time to time by GTE.
- 9.2 Licensee's Facilities shall be tagged at maximum intervals of 300 feet so as to identify Licensee as the owner of the Facilities. The tags shall be of sufficient size and lettering so as to be easily read from ground level.

10. Access to Poles, Ducts, Conduits, and Rights-of-Way.

To the extent required by the Act, GTE and licensee each afford to the other access to the poles, ducts, conduits and ROWs it owns or controls on terms, conditions and prices comparable to those offered to any other entity pursuant to each Parties tariffs and/or standard agreements. Licensee agrees that this agreement must be executed before it makes any attachments to GTE facilities or uses GTE'S conduit according to the terms of this Agreement. Unauthorized attachments or unauthorized use of conduit will be a breach of this agreement.

11. Failure of Licensee to Place Attachments.

Once Licensee has obtained an approved PAR, Licensee shall have sixty (60) calendar days from the date the PAR is approved to begin the placement of its Attachments on the GTE poles covered by the PAR. If Licensee has not begun placing its Attachments within that sixty (60)calendar day period, Licensee shall so advise GTE with a written explanation for the delay. If Licensee fails to advise GTE of its delay, with a written explanation therefor, or if Licensee fails to act in good faith by not making a bona fide effort to begin placing its Attachments within the sixty (60) calendar days prescribed by this Section, the previously approved PAR shall be deemed rescinded by GTE and Licensee shall have no further right to place Attachments pursuant to that PAR.

12. Attachment Fees.

12.1 Licensee shall pay to GTE an annual Attachment Fee, as specified in Exhibit 3 hereto, for each GTE pole upon which Licensee obtains authorization to place an Attachment. The Attachment Fee may be increased by GTE from time to time as permitted by law upon sixty (60) calendar days, or the appropriate number of days as prescribed by federal, state or local government authority, written notice to Licensee.

12.2 Attachment fees shall be billed in advance and become due and payable on the date a PAR is approved by GTE for all GTE poles identified in that PAR on a pro rata basis until the end of the calendar year and thereafter on an annual basis within thirty (30) calendar days of the receipt of a statement from GTE specifying the fees to be paid. If any undisputed amount due on the billing statement is not received by GTE on the payment due date, GTE may charge, and Licensee agrees to pay, at GTE's option, interest on the past due balance at a rate equal to the lesser of the interest rates set forth in the applicable GTE/Contel state access tariffs or the GTOC/GSTC FCC No. 1 tariff, one and one-half percent (1 1/2%) per month or the maximum nonusurious rate of interest under applicable law. Late payment charges shall be included on the next statement.

12.3 GTE shall maintain an inventory of the total number of GTE poles occupied by Licensee based upon the cumulative number of poles specified in all PARs approved by GTE. GTE may, at its option, conduct a physical inventories of Licensee's Attachments under this Section. At GTE's election, such physical inventories shall be conducted by GTE upon renegotiation of this Agreement or any subpart or appendix thereof, and a maximum of one time per calendar year thereafter. The costs incurred by GTE to conduct the physical inventory shall be reimbursed to GTE by the Licensee upon demand by GTE. It shall be Licensee's sole responsibility to notify GTE of any and all removals of Attachments from GTE's poles. Except as provided in Section 19 of this Agreement in connection with the termination of this Agreement, such notice shall be provided to GTE at least thirty (30) days prior to the removal of the Attachments. Each Notice of Removal shall be in a form specified by GTE and may be revised from time to time at GTE's sole discretion. Licensee shall remain liable for Attachment Fees until Licensee's Attachments have been physically removed from GTE's poles.

13. Modifications, Additions or Replacements to Existing Attachments.

- 13.1 Licensee shall not modify, add to or replace Facilities on any pre-existing Attachment without first notifying GTE in writing of the intended modification, addition or replacement at least thirty (30) calendar days prior to the date the activity is scheduled to begin. The required notification shall include: (1) the date the activity is scheduled to begin, (2) a description of the planned modification, addition or replacement, (3) a representation that the modification, addition or replacement will not require any space other than the space previously designated for Licensee's Attachments, and (4) a representation that the modification, addition or replacement will not impair the structural integrity of the Poles involved and (5) a representation that the modification, addition or replacement will not impact other Licensee's attachments.
- 13.2 Should GTE determine that the modification, addition or replacement specified by Licensee in its notice will require more space than that allocated to Licensee or will require the reinforcement of, replacement of or an addition of support equipment to the poles involved in order to accommodate Licensee's modification, addition or replacement, GTE will so notify Licensee, whereupon Licensee will be required to submit a PAR in compliance with this Agreement in order to obtain authorization for the modification, addition or replacement of its Attachments.
- 13.3 Access to GTE's poles for repairs, modifications, additions, or replacements required in emergency situations shall be governed by Section 23 of this Agreement.
- 13.4 Should Licensee request GTE to expand capacity or purchase additional plant, Licensee agrees to pay all costs.

14. Rearrangements to Accommodate Other Licensees.

Licensee acknowledges that at some point in the future it may become necessary to rearrange Licensee's Facilities in order to create space to accommodate the facilities of another licensee. Licensee agrees that in such event Licensee will cooperate in good faith with such other licensee to come to a mutually agreeable understanding regarding the manner in which the rearrangement of Licensee's Facilities will be achieved.

15. Unauthorized Attachments.

15.1 The parties agree that because it would be impracticable and extremely difficult to determine the actual amount of damages resulting from Licensee's unauthorized Attachment(s), a charge equal to five (5) times the amount of the then current Attachment Fee shall be paid by Licensee to GTE for each unauthorized Attachment to a GTE pole. Such payment shall be deemed liquidated damages and not a penalty. Licensee also shall pay GTE an Attachment Fee for each unauthorized Attachment accruing from the date the unauthorized Attachment was first placed on the GTE pole. In the event that the date the unauthorized Attachment was first placed on a GTE pole cannot be determined, such date shall be deemed the date of the last physical inventory made in accordance with this Agreement or, if no physical inventory has been conducted, the date the first PAR from Licensee was approved in accordance with this Agreement. Licensee also shall pay to GTE all costs incurred by GTE to rearrange any unauthorized attachment(s) of Licensee if such rearrangement is required to safeguard GTE's attachment(s) or to accommodate the attachment(s) of another party whose attachment(s) would not have required a rearrangement but for the presence of Licensee's unauthorized attachment(s). Licensee shall also pay to GTE all costs incurred by GTE to reinforce, replace or modify any GTE pole, which reinforcement, replacement or modification was required as a result of the unauthorized Attachment of Licensee. The Attachment Fee referenced in this subsection 15.1 shall be determined in the same manner as such fee would have been determined if the attachment had been authorized by GTE.

15.2 Once GTE has notified Licensee of an unauthorized attachment, the Licensee can submit a PAR to request an authorized attachment. A PAR submitted per this provision will be treated like any other PAR subject to this Agreement. Licensee will be responsible for all fees associated with a PAR (as identified in this agreement). If a PAR is not received by GTE within ten (10) Business Days of Licensee's receipt of an unauthorized Attachment notification, then Licensee has sixty (60) calendar days from the date of its receipt of the initial unauthorized Attachment notification to vacate the unauthorized attachment.

15.3 For purposes of this section, an unauthorized Attachment shall include, but not be limited to:

- 15.3.1 An Attachment to a GTE pole which pole is not identified in any PAR approved in accordance with this Agreement;
- 15.3.2 An Attachment that occupies more space than that allocated to Licensee by GTE;
- 15.3.3 An Attachment that is not placed in accordance with the provisions of this Agreement or the appropriate PAR issued pursuant to this Agreement;
- 15.3.4 An addition or modification by Licensee to its pre-existing Attachment(s) that impairs the structural integrity of the involved GTE pole(s) or other GTE facilities or those of other licensees.
- 15.3.5 An Attachment that consists of facilities owned or controlled by, and for the use of a party other than Licensee.

16. Surveys and Inspections of Pole Attachments.

- 16.1 Upon written notice to Licensee, the total number and exact location of Licensee's Attachments on GTE's poles may be determined, at GTE's discretion, through a survey to be made not more than once per calendar year by GTE. If so requested, Licensee and/or any other entity owning or jointly owning the poles with GTE may participate in the survey. The costs incurred by GTE to conduct the survey shall be reimbursed to GTE by Licensee upon demand by GTE. If the Attachments of more than one Licensee are surveyed, each such Licensee shall contribute a proportionate share of the costs reimbursed to GTE.
- 16.2 Apart from surveys conducted in accordance with this section, GTE shall have the right to inspect any Attachment of Licensee on GTE's poles as conditions may warrant upon thirty (30) calendar days written notice to Licensee. Licensee shall, upon demand by GTE, reimburse GTE all costs incurred to conduct its inspection. No joint survey or inspection, or lack thereof, by GTE shall operate to relieve Licensee of any responsibility, obligation or liability assumed under this Agreement.

17. Notice of Modification or Alteration of Poles by GTE.

17.1 In the event GTE plans to modify or alter any GTE pole(s) upon which Licensee has Attachments, GTE shall provide Licensee notice of the proposed modification or alteration at least thirty (30) calendar days prior to the time the proposed modification or alteration is scheduled to take place. Should Licensee decide to simultaneously modify or alter its Attachments on the GTE poles to be modified or altered by GTE, Licensee shall so notify GTE in writing at least fifteen (15) calendar days prior to when work is to begin. In such event, Licensee shall bear a proportionate share of the total costs incurred by GTE to make such poles accessible to Licensee.

17.2 In the event GTE is required by a federal, state, or local authority or for any other reason beyond GTE's control (e.g., normal deterioration to move, replace or change the location of any GTE pole(s)), Licensee shall concurrently relocate Licensee's Attachments. GTE and each Licensee required to relocate its Attachments shall bear its own costs for such relocation.

18. Disclaimer of Warranties.

EXCEPT AS SPECIFICALLY SET FORTH IN THIS AGREEMENT, GTE MAKES NO WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR a PARTICULAR PURPOSE.

19. Default and Remedies.

19.1 The occurrence of any one of the following shall be deemed a "Material Default" by Licensee under this Agreement:

19.1.1 Failure by Licensee to pay any fee or other sum required to be paid under the terms of this Agreement and such default continues for a period of thirty (30) calendar days after written notice thereof to Licensee;

19.1.2 Failure by Licensee to perform or observe any other term, condition, covenant, obligation or provision of this Agreement and such default continues for a period of thirty (30) calendar days after written notice thereof from GTE (provided that if such default is not curable within such thirty (30) calendar day period, the period will be extended if Licensee commences to cure such default within such thirty (30) day period and proceeds diligently thereafter to effect such cure);

19.1.3 The filing of any tax or mechanic's lien against GTE's poles which is not bonded or discharged within thirty (30) days of the date Licensee receives notice that such lien has been filed;

- 19.1.4 Licensee's voluntary or involuntary bankruptcy;
 - 19.1.5 Licensee's knowing use or maintenance of its Attachments in violation of any law or regulation, or in aid of any unlawful act or undertaking;
 - 19.1.6 The denial or revocation of any authorization which may be required of the Licensee by any governmental or private authority for the placement, operation or maintenance of Licensee's Attachments is denied or revoked.
- 19.2 In the event of a Material Default, GTE, without any further notice to the Licensee (except where expressly provided for below or required by applicable law) may do any one or more of the following:
- 19.2.1 Perform, on behalf and at the expense of Licensee, any obligation of Licensee under this Agreement which Licensee has failed to perform and of which GTE shall have given Licensee notice, the cost of which performance shall be paid by Licensee to GTE upon demand;
 - 19.2.2 Terminate this Agreement by giving notice of such termination to Licensee and upon sixty (60) calendar days written notice, remove Licensee's Attachments and store them in a public warehouse or elsewhere at the expense of and for the account of Licensee without GTE being deemed guilty of trespass or conversion, and without GTE becoming liable for any loss or damages to Licensee occasioned thereby;
or
 - 19.2.3 Exercise any other legal or equitable right or remedy which GTE may have.
- 19.3 Any costs and expenses incurred by GTE (including, without limitation, reasonable attorneys' fees) in enforcing this Agreement shall be repaid to GTE by Licensee upon demand.
- 19.4 Upon termination of this Agreement by GTE because of a Material Default by Licensee, Licensee shall remain liable to GTE for any and all fees, other payments and damages which may be due or sustained prior to such termination, all reasonable costs, fees and expenses, including, without limitation, reasonable attorneys' fees incurred by GTE in pursuit of its remedies hereunder. In addition to and notwithstanding Section 15, the parties agree that because it would be impracticable and extremely difficult to determine the actual amount of damages, additional liquidated damages for termination because of Material Default shall be an amount equal to one full year of Pole Attachment fees.

19.5 All rights and remedies of each party set forth in this Agreement shall be cumulative and none shall exclude any other right or remedy, now or hereafter allowed by or available under any statute, ordinance, rule of court, or the common law, either at law or in equity, or both.

20. Indemnification.

- 20.1 Licensee shall compensate GTE for the full actual loss, damage or destruction of GTE's property that in any way arises from or is related to this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation or maintenance of Licensee's Attachments).
- 20.2 Licensee will further indemnify, defend and hold harmless GTE and GTE's agents, officers, employees and assigns, from any and all losses, damages, costs, expenses (including, without limitation, reasonable attorneys' fees), statutory fines or penalties, actions or claims for personal injury (including death), damage to property, or other damage or financial loss of whatever nature in any way arising out of or connected with this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation or maintenance of Licensee's Attachments). Licensee will further indemnify GTE from subsequent taxes and fees that may be levied by municipalities or other governmental entities and related to or arising from the presence of Licensee's Attachments on GTE's Poles, including but not limited to taxes or fees related to use of public rights-of-way, in association with this Agreement. Such fees that are levied would be in addition to the Attachment Fees reflected in this Agreement. Licensee expressly assumes all liability for actions brought against GTE and GTE's agents, officers, employees and assigns, by Licensee's agents, officers or employees and Licensee expressly waives any immunity from the enforcement of this indemnification provision that might otherwise be provided by workers' compensation law or by other state or federal laws.
- 20.3 Without limiting any of the foregoing, Licensee assumes all risk of, and agrees to relieve GTE of any and all liability for, loss or damage (and the consequences of loss or damage) to any Attachments placed on GTE's poles and any other financial loss sustained by Licensee, whether caused by fire, extended coverage perils, or other casualty.
- 20.4 Without limiting the foregoing, Licensee expressly agrees to indemnify, defend and hold harmless GTE and GTE's agents, officers, employees and assigns from any and all claims asserted by customers of Licensee in any way arising out of or in connection with this Agreement or Licensee's Attachments.
- 20.5 Notwithstanding anything to the contrary in this Agreement, Licensee further shall indemnify and hold harmless GTE, its agents, officers, employees and assigns from and against any claims, liabilities, losses, damages, fines, penalties and costs

(including, without limitation, reasonable attorneys' fees) whether foreseen or unforeseen, which the indemnified parties suffer or incur because of: (i) any discharge of Hazardous Materials resulting from acts or omissions of Licensee or the Licensee's predecessor in interest; (ii) acts or omissions of the Licensee, its agents, employees, contractors, representatives or predecessor in interest in connection with any cleanup required by law, or (iii) failure of Licensee or the Licensee's predecessor in interest to comply with environmental, safety and health laws.

- 20.6 In no event shall either party be liable to the other party for any special, consequential or indirect damages (including, without limitation, lost revenues and lost profits) arising out of this Agreement or any obligation arising hereunder, whether in an action for or arising out of breach of contract, tort or otherwise.
- 20.7 Licensee shall indemnify, protect and hold harmless GTE from and against any and all claims for libel and slander, copyright and/or patent infringement arising directly or indirectly by reason of attachment of Licensee's equipment on GTE's poles pursuant to this Agreement.

21. Insurance.

- 21.1 Licensee shall carry insurance, at its sole cost and expense, sufficient to cover its indemnification obligations as set forth in Section 20 of this Agreement. Such insurance shall include, but not be limited to, coverage against liability due to personal injury or death of persons in the amount of \$500,000 as to any one person and \$1,000,000 as to any one accident; coverage against liability due to property damage in the amount of \$500,000 as to each accident and \$500,000 aggregate; and coverage necessary to fully protect both it and GTE from all claims under any worker's compensation laws that may be applicable.
- 21.2 All insurance required of Licensee under this Agreement shall remain in force for the entire life of this Agreement. The company or companies issuing such insurance shall be approved by GTE and GTE shall be named as an additional insured in each such policy. Licensee shall submit to GTE certificates by each insurer to the effect that the insurer has insured Licensee for all potential liabilities of Licensee under this Agreement, and that it will not cancel or change any policy of insurance issued to Licensee except upon thirty (30) calendar days notice to GTE. In the event Licensee's insurance coverage is to be canceled by reason of non-payment of premiums due, GTE shall have the option of paying any amount due and Licensee shall forthwith reimburse GTE the full amount paid by GTE.
- 21.3 Licensee shall promptly advise GTE in writing of any and all claims for damages, including, but not limited to, damage to property or injury to or death of persons, allegedly arising out of or in any manner related, directly or indirectly, to the presence or use of Licensee's Attachments.

21.4 Licensee shall furnish bond or satisfactory evidence of contractual insurance coverage, the terms of which shall be subject to GTE's approval, in the amount of ten thousand dollars (\$10,000) to guarantee the payment of any sums which may become due to GTE for rentals, inspections or for work performed by GTE for the benefit of Licensee under this Agreement, including the removal of Licensee's equipment pursuant to any of the provisions hereof. All bonds must specify that GTE be notified thirty (30) calendar days prior to the expiration or cancellation of the policy.

22. Taxes.

Any state or local excise, sales, or use taxes or other surcharges or fees (excluding any taxes levied on income) resulting from the performance of this Agreement shall be borne by the Party upon which the obligation for payment is imposed under applicable law, even if the obligation to collect and remit such taxes, surcharges or fees is placed upon the other Party. The collecting Party shall charge and collect from the obligated Party, and the obligated Party agrees to pay to the collecting Party, all applicable taxes, surcharges or fees, except to the extent that the obligated Party notifies the collecting Party and provides to the collecting Party appropriate documentation as GTE requires that qualifies the obligated Party for a full or partial exemption. Any such taxes, surcharges or fees shall be shown as separate items on applicable billing documents between the Parties. The obligated Party may contest the same in good faith, at its own expense, and shall be entitled to the benefit of any refund or recovery, provided that such Party shall not permit any lien to exist on any asset of the other Party by reason of the contest. The collecting Party shall cooperate in any such contest by the other Party. The other Party will indemnify the collecting Party from any such taxes, surcharges or fees that may be subsequently levied on payments by the other Party by the collecting Party.

23. Emergency Restoration Procedures.

In the event of an emergency, restoration procedures may be affected by the presence of Licensee's Attachments. While GTE shall not be responsible for the repair of Licensee's Attachments that are damaged (except by mutual written agreement), GTE shall nonetheless control access to its poles if the restoration is to be achieved in an orderly fashion. Licensee agrees to reimburse GTE for the cost of all labor, equipment, and/or materials furnished by GTE in support of any restoral operations from which Licensee is a beneficiary.

23.1 Where multiple parties are involved in emergency restorations, access to GTE's poles will be controlled by GTE's Maintenance District Manager or his/her on-site representative according to the following guidelines:

23.1.1 Service Disruptions/Outages

- a. In the event of service disruptions and/or outages, GTE shall make all reasonable efforts to grant access to as many other entities with Attachments as is reasonably safe.
- b. Where simultaneous access is not possible, access will be granted by GTE on a first come, first served basis.

23.1.2 Service Affecting Emergencies

- a. In the event of service affecting emergencies not resulting in service disruptions or outages, GTE shall make all reasonable efforts to grant access to as many other entities with Attachments as is reasonably safe.
- b. Where GTE is unable to grant simultaneous access to all other entities with Attachments, access will be granted according to the level of damage to the Attachments of each entity and the likelihood that a given level of damage will result in service disruption. Where the likelihood that a service disruption will result is not clearly discernible, access will be on a first come, first served basis.

23.2 Without limiting any other indemnification or hold harmless provisions of this Agreement, Licensee agrees that any decision by GTE regarding access to Attachments, or any action or failure to act by GTE, under this Section 23 shall not constitute a basis for any claim by Licensee against GTE for any damage to Licensee's Attachments or disruption of Licensee's services, or any other direct or indirect damages of any kind whatsoever incurred by Licensee.

24. Damage Suspected to Licensee's Facilities Only.

24.1 In the event Licensee receives information that Licensee's Attachments are damaged, Licensee shall notify GTE of said damage at a number to be provided later by GTE. This is a 24-hour, 7 days per week notification number. Licensee shall provide GTE all information known to it regarding the damage to Licensee's Attachments.

24.2 In the event GTE receives notice that Licensee's Attachments are damaged, GTE will notify Licensee of said damage by telephone at the Licensee's emergency telephone number. GTE shall provide Licensee all information known to it regarding the damage to Licensee's Attachments.

24.3 After the giving of such notice by either Licensee or GTE, Licensee shall be authorized to perform emergency restoration maintenance activities in connection

with Licensee's Attachments, subject to the provisions of this Agreement.

24.4 Without limiting any other indemnification or hold harmless provisions of this Agreement, Licensee agrees that any decision by GTE regarding access to Licensee's Attachments, or any action or failure to act by GTE, appropriately or inappropriately, under this Section shall not be the basis for any claim by Licensee against GTE for any damage to Licensee's Attachments or disruption of Licensee's services, or any other direct or indirect damages of any kind whatsoever incurred by Licensee and Licensee shall indemnify and hold GTE harmless from any such claim.

25. Abandonment.

Nothing in this Agreement shall prevent or be construed to prevent GTE from abandoning, selling, assigning or otherwise disposing of any poles or other GTE property used for Licensee's Attachments; provided, however, that GTE shall condition any such sale, assignment or other disposition subject to the rights granted to Licensee pursuant to this Agreement. GTE shall promptly notify Licensee of any proposed sale, assignment or other disposition of any poles or other GTE property used for Licensee's Attachments.

26. Notices.

Any written notice to be given to a party to this Agreement shall be in writing and given or made by means of telegram, facsimile transmission, certified or registered mail, express mail or other overnight delivery service, or hand delivery, proper postage or other charges prepaid, and addressed or directed to the respective parties as follows:

To Licensee: EAST KENTUCKY NETWORK, LLC.
P.O. BOX 399
WEST LIBERTY, KY 41472
ATTN: DANIEL McKENZIE

To GTE: GTE SOUTH INCORPORATED
4100 ROXBORO ROAD
DURHAM, NC. 27704
ATTN: LEE BERKLEY

Any notice given by personal delivery shall be deemed to have been given on the day of actual delivery and, if given by registered or certified mail, return receipt requested, on the date of receipt thereof and, if given by facsimile transmission, on the day of transmittal thereof if given during the normal business hours of the recipient and on the next Business Day if not given during normal business hours.

27. Non-Waiver of Terms and Conditions.

No course of dealing, course of performance or failure to enforce any of term, right, condition or other provision of this Agreement shall constitute or be construed as a waiver of any term, right or condition or other provision of this Agreement.

28. Confidential Information.

28.1 Identification. Either party may disclose to the other proprietary or confidential customer, technical, or business information in written, graphic, oral or other tangible or intangible forms ("Confidential Information"). In order for information to be considered Confidential Information under this Agreement, it must be marked "Confidential" or "Proprietary," or bear a marking of similar import. Orally or visually disclosed information shall be deemed Confidential Information only if contemporaneously identified as such and reduced to writing and delivered to the other Party with a statement or marking of confidentiality within thirty (30) calendar days after oral or visual disclosure.

28.2 Handling. In order to protect such Confidential Information from improper disclosure, each Party agrees:

28.2.1 That all Confidential Information shall be and shall remain the exclusive property of the source;

28.2.2 To limit access to such Confidential Information to authorized employees who have a need to know the Confidential Information for performance of this Agreement;

28.2.3 To keep such Confidential Information confidential and to use the same level of care to prevent disclosure or unauthorized use of the received Confidential Information as it exercises in protecting its own Confidential Information of a similar nature;

28.2.4 Not to copy, publish, or disclose such Confidential Information to others or authorize anyone else to copy, publish, or disclose such Confidential Information to others without the prior written approval of the source;

28.2.5 To return promptly any copies of such Confidential Information to the source at its request; and

28.2.6 To use such Confidential Information only for purposes of fulfilling work or services performed hereunder and for other purposes only upon such terms as may be agreed upon between the Parties in writing.

28.3 Exceptions. These obligations shall not apply to any Confidential Information that

was legally in the recipient's possession prior to receipt from the source, was received in good faith from a third party not subject to a confidential obligation to the source, now is or later becomes publicly known through no breach of confidential obligation by the recipient, was developed by the recipient without the developing persons having access to any of the Confidential Information received in confidence from the source, or that is required to be disclosed pursuant to subpoena or other process issued by a court or administrative agency having appropriate jurisdiction, provided, however, that the recipient shall give prior notice to the source and shall reasonably cooperate if the source deems it necessary to seek protective arrangements.

28.4 **Survival.** The obligation of confidentiality and use with respect to Confidential Information disclosed by one party to the other shall survive any termination of this Agreement for a period of three (3) years from the date of the initial disclosure of the Confidential Information.

29. **Dispute Resolution.**

29.1 **Alternative to Litigation.** The Parties desire to resolve disputes arising out of or relating to this Agreement without litigation. Accordingly, except for action seeking a temporary restraining order or an injunction related to the purposes of this Agreement, or suit to compel compliance with this dispute resolution process, the Parties agree to use the following alternative dispute resolution procedures as the sole remedy with respect to any controversy or claim arising out of or relating to this Agreement or its breach.

29.2 **Negotiations.** At the written request of a Party, each Party will appoint a knowledgeable, responsible representative to meet and negotiate in good faith to resolve any dispute arising out of or relating to this Agreement. The Parties intend that these negotiations be conducted by non-lawyer, business representatives. The location, format, frequency, duration, and conclusion of these discussions shall be left to the discretion of the representatives. Upon agreement, the representatives may utilize other alternative dispute resolution procedures such as mediation to assist in the negotiations. Discussions and correspondence among the representatives for purposes of these negotiations shall be treated as confidential information developed for purposes of settlement, exempt from discovery, and shall not be admissible in the arbitration described below or in any lawsuit without the concurrence of all Parties. Documents identified in or provided with such communications, which are not prepared for purposes of the negotiations, are not so exempted and may, if otherwise discoverable, be discovered or otherwise admissible, be admitted in evidence, in the arbitration or lawsuit.

29.3 **Arbitration.** If the negotiations do not resolve the dispute within sixty (60) Business Days of the initial written request, the dispute shall be submitted to binding arbitration by a single arbitrator pursuant to the Commercial Arbitration

Rules of the American Arbitration Association except that the Parties may select an arbitrator outside American Arbitration Association rules upon mutual agreement. A Party may demand such arbitration in accordance with the procedures set out in those rules. Discovery shall be controlled by the arbitrator and shall be permitted to the extent set out in this section. Each Party may submit in writing to a Party, and that Party shall so respond to, a maximum of any combination of thirty-five (35) (none of which may have subparts) of the following: interrogatories, demands to produce documents, or requests for admission. Each Party is also entitled to take the oral deposition of one individual of another Party. Additional discovery may be permitted upon mutual agreement of the Parties. The arbitration hearing shall be commenced within sixty (60) Business Days of the demand for arbitration. The arbitration shall be held in a mutually agreeable city. The arbitrator shall control the scheduling so as to process the matter expeditiously. The Parties may submit written briefs. The arbitrator shall rule on the dispute by issuing a written opinion within thirty (30) Business Days after the close of hearings. The times specified in this section may be extended upon mutual agreement of the Parties or by the arbitrator upon a showing of good cause. Judgment upon the award rendered by the arbitrator may be entered in any court having jurisdiction.

29.4 Expedited Arbitration Procedures. If the issue to be resolved through the negotiations referenced in Section 29.2 directly and materially affects service to either Party's end-user customers, then the period of resolution of the dispute through negotiations before the dispute is to be submitted to binding arbitration shall be five (5) Business Days. Once such a service affecting dispute is submitted to arbitration, the arbitration shall be conducted pursuant to the expedited procedures rules of the Commercial Arbitration Rules of the American Arbitration Association (i.e., rules 53 through 57).

29.5 Costs. Each Party shall bear its own costs of these procedures. A Party seeking discovery shall reimburse the responding Party the costs of production of documents (including search time and reproduction costs). The Parties shall equally split the fees of the arbitration and the arbitrator.

29.6 Continuous Service. The Parties shall continue providing services to each other during the pendency of any dispute resolution procedure, and the Parties shall continue to perform their obligations in accordance with this Agreement.

30. Compliance With Laws and Regulations.

Each Party shall comply with all federal, state, and local statutes, regulations, rules, ordinances, judicial decisions, and administrative rulings applicable to its performance under this Agreement.

31. **Force Majeure.**

In the event performance of this Agreement, or any obligation hereunder, is either directly or indirectly prevented, restricted, or interfered with by reason of fire, flood, earthquake or likes acts of God, wars, revolution, civil commotion, explosion, acts of public enemy, embargo, acts of the government in its sovereign capacity, labor difficulties, including without limitation, strikes, slowdowns, picketing, or boycotts, unavailability of equipment from vendor, changes requested by Customer, or any other circumstances beyond the reasonable control and without the fault or negligence of the Party affected, the Party affected, upon giving prompt notice to the other party, shall be excused from such performance on a day-to-day basis to the extent of such prevention, restriction, or interference (and the other Party shall likewise be excused from performance of its obligations on a day-to-day basis until the delay, restriction or interference has ceased); *provided however*, that the Party so affected shall use diligent efforts to avoid or remove such causes of nonperformance and both Parties shall proceed whenever such causes are removed or cease.

32. **Assignment.**

Any assignment by either Party of any right, obligation, or duty, in whole or in part, or of any interest, without the written consent of the other Party shall be void, except that either Party may assign all of its rights, and delegate its obligations, liabilities and duties under this Agreement, either in whole or in part, to any entity that is, or that was immediately preceding such assignment, a Subsidiary or Affiliate of that Party without consent, but with written notification. The effectiveness of an assignment shall be conditioned upon the assignee's written assumption of the rights, obligations, and duties of the assigning Party.

33. **Applicable Law.**

This Agreement shall be governed by and construed in accordance with the domestic laws of the state where the Services are provided or the facilities reside and shall be subject to the exclusive jurisdiction of the courts therein.

34. **Subsequent Law.**

The terms and conditions of this Agreement shall be subject to any and all applicable laws, rules, or regulations that subsequently may be prescribed by any federal, state or local governmental authority. To the extent required by any such subsequently prescribed law, rule, or regulation, the Parties agree to modify, in writing, the affected term(s) and condition(s) of this Agreement to bring them into compliance with such law, rule, or regulation.

35. Headings.

The headings in this Agreement are inserted for convenience and identification only and shall not be considered in the interpretation of this Agreement.

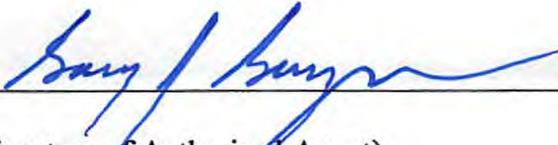

36. Entire Agreement.

This Agreement constitutes the entire agreement of the Parties pertaining to the subject matter of this Agreement and supersedes all prior agreements, negotiations, proposals, and representations, whether written or oral, and all contemporaneous oral agreements, negotiations, proposals, and representations concerning such subject matter. No representations, understandings, agreements, or warranties, expressed or implied, have been made or relied upon in the making of this Agreement other than those specifically set forth herein.

IN WITNESS WHEREOF, the parties hereto have executed this Agreement through their authorized representatives.

EXHIBIT 2

REGULATIONS GOVERNING LICENSEE'S ATTACHMENTS

The following regulations shall apply to the making of Licensee's attachments to Licensor's poles:

1. Location of Attachments

Cable and wire attachments shall be placed above telephone cable and equipment and on the same side of the pole as the telephone cable.

All attachments of Licensee must be placed to avoid interference with telephone plant, including loop attachment space, raised terminal cover, load coils, pole steps, etc.

2. Supporting Strand for Licensee's Cable

Supporting strand for Licensee's cable shall be sufficient to support the load to which it may be subjected and to maintain the required ground clearances. Strand supporting Licensee's cables shall meet the requirements of the National Electrical Safety Code for strand supporting communications cables (i.e., strand supporting communications cable crossing over railroads must have a minimum breaking strength of 6,000 lbs.; strand supporting communications cable crossing over electric supply lines carrying over 750V should not be stressed to more than 60% of rated breaking strength under the maximum load to which it may be subjected, including storm loading).

3. Drops

Type of drop conductors and construction methods shall be subject to the approval of Licensor. When used as drop conductor, RG 59/U cable or equivalent coaxial cable, because of low tensile strength, shall be supported by a wire or strand satisfactory to the Licensor. A figure-8 type coaxial cable is acceptable as standard material to be employed in this construction. Flat ribbon-type line shall not be used as a drop conductor.

4. Climbing Space

On poles to which power circuits are attached, the Licensee's cable, drops and other equipment shall be so placed as to leave adequate free climbing space.

5. Clearances

Clearances for Licensee's attachments shall be the same as for telephone attachments.

On buildings, clearances between telephone and Licensee's facilities shall be a minimum of four (4) inches.

The Licensee's drop from pole to building shall have a parallel clearance of at least one (1) foot from telephone drops, and in case of a crossing with telephone drops, the separation shall be a minimum of two (2) feet.

6. Bonding

Licensee's drop wire support strands shall be bonded to the Licensee's cable support strand.

7. Grounding

Licensee's cable shall be supported by strand, which shall be effectively grounded from its antenna towers to Licensor's poles in order to minimize lightning damage to telephone plant. Effective ground are multi-grounded power neutrals or water pipe systems, or, if these are not available, a suitable counterpoise (buried wire). Permission shall be obtained in advance from the Power Company concerned for grounding to multi-grounded power neutrals. Metal amplifier cases shall be bonded to the Licensee's cable strand.

The outer conductor of coaxial cable used as a drop conductor shall be grounded at the building, preferably to a water pipe system, as close to the point of entrance as practicable.

8. Customers' Premises

Protection shall be provided by Licensee for all drops at its customers' premises, in accordance with the specifications of the National Electrical Safety Code.

EXHIBIT 3

ATTACHMENT FEES

For the location of Kentucky

Licensee shall pay to GTE an Attachment Fee of \$ [REDACTED] per pole per year for each GTE pole upon which Licensee obtains authorization to place an attachment.

ATTACHED AND INCORPORATED EXHIBITS

EXHIBIT A – DEFINITIONS

EXHIBIT B – FORM APPLICATION FOR POLE LICENSE

EXHIBIT C – NOTIFICATION OF SURRENDER OF LICENSE

EXHIBIT D – SCHEDULE OF RATES, FEES AND CHARGES

EXHIBIT E – NOTICE CONTACTS AND ADDRESSES

1. PARTIES.

This Pole Attachment License Agreement (“Agreement”) is entered into effective on January 1, 2016 (“Effective Date”), by and between Windstream Kentucky East, LLC, a Windstream company organized and existing under the State of Kentucky (“Licensor”), and East Kentucky Network, LLC, a company organized and existing under the State of Kentucky (“Licensee”). Licensor and Licensee may sometimes be referred to in this Agreement individually as a “party” and collectively as the “parties”.

Licensee is owned by five telecommunications companies, namely, Cellular Services, LLC, a subsidiary of Foothills Rural Telephone Cooperative Corporation, Inc.; Gearheart Communications Company, Inc.; Mountain Tele-Communications, Inc., a subsidiary of Mountain Rural Telephone Cooperative Corporation, Inc.; Peoples Rural Telephone Cooperative Corporation, Inc.; and Thacker-Grigsby Telephone Company Incorporated (together with their Affiliates, the “Affiliate Parties,” and individually, an “Affiliate Party”). In certain instances, Licensee manages fiber construction projects for the Affiliate Parties. It is understood and agreed that Licensee may make requests in Licensee’s name for attachments owned by either Licensee or an Affiliate Party, subject to the terms and provisions of this Agreement. In the event that the attachments requested by Licensee are for equipment or assets actually owned by an Affiliate Party, Licensee shall remain the primary obligor, and Licensor may look to Licensee to satisfy all terms and obligations of the Agreement. Licensee represents and warrants that it will not request attachments for any Affiliate Party unless such Affiliate Party would qualify to request attachments under the provisions of Paragraph 2.B., all other terms of this Agreement, and all other applicable laws, rules, or regulations. It is the parties’ intention that attachments of an Affiliate Party be treated in the same manner as attachments by Licensee, and that Licensee be recognized as the authorized agent of the Affiliate Parties. Licensor may rely upon Licensee’s representations that it is an authorized agent of the Affiliate Parties, and Licensee shall indemnify and hold harmless Licensor for all damages arising from or relating to Licensor’s reliance on the representations contained in this paragraph.

2. SCOPE.

A. The purpose of this Agreement is to set forth the rates, terms, conditions, and procedures under which the Licensor will provide Licensee access to Licensor’s Poles (as defined herein) in the State of Kentucky for the purpose of Licensee attaching wireline facilities.

B. The parties acknowledge that Licensor is entering into this Agreement because Licensee has represented it is a regulated “telecommunications carrier” or “cable television system” provider as such terms are defined in the Communications Act of 1934, as amended (hereinafter the “Communications Act”) and desires to provide telecommunications service or cable service (“Services”), as defined in the Communications Act; and that Licensee is authorized to provide these Services under its franchise or other lawful authority within its service area where Licensor owns Poles. In the event Licensee no longer has the status as a “telecommunications carrier” or “cable television system” provider or the authority to offer these Services in the state where the Poles are located, Licensor shall have the right to immediately terminate this Agreement and require Licensee to remove all of its facilities from Licensor’s Poles. **As a condition precedent to entering into this Agreement, Licensee shall submit to Licensor a copy of its certification evidencing its status as either a regulated telecommunication carrier or cable television system provider, and until such documentation is provided to Licensor, Licensor shall not be obligated to enter into this Agreement.**

C. Subject to the provisions of this Agreement, Licensor will issue to Licensee for any lawful communications purpose, revocable, nonexclusive Licenses authorizing the placement of Licensee's Attachment to Licensor's Poles.

D. No use, however extended, of Licensor's Poles nor payment of any fees or charges required under this Agreement or License issued under this Agreement shall create or vest in Licensee any ownership or property rights in said Poles, but Licensee's rights therein shall be and remain a mere license. Nothing herein contained shall be construed to compel Licensor to construct, retain, extend, place, or maintain any facilities not needed for its own service requirements, unless otherwise required by law. Nothing contained in this Agreement or in any License issued hereunder shall in any way affect, restrict or impair the right of Licensor to convey, transfer, mortgage, or assign to any other person or entity any interest in real or personal property, including any Poles in which Licensee has attached or placed Licensee's Attachments pursuant to Licenses issued under this or other license agreements.

E. Licensee recognizes that Licensor has entered into, or may in the future enter into, agreements and arrangements with others which are not a party to this Agreement regarding the Poles covered by this Agreement. Nothing herein contained shall be construed as a limitation, restriction or prohibition against Licensor with respect to such other agreements or arrangements. The rights of Licensee shall at all times be subject to any present or future joint use or joint ownership arrangement between Licensor and any other party.

F. **This Agreement does NOT create any right for Licensee to access or place facilities in Licensor central offices, conduit or to place wireless communication equipment on Poles. A separate agreement is required for any access to Licensor facilities other than those outlined in this Agreement.**

3. DEFINITIONS.

Certain capitalized terms used in this Agreement are listed in and have the meaning as set forth in Exhibit A. Exhibit A is incorporated and made a part of this Agreement by reference.

4. TERM AND TERMINATION OF AGREEMENT

A. This Agreement shall become effective upon the Effective Date and if not terminated in accordance with the provisions of this Agreement, shall continue in effect for a term of ten (10) years ("Initial Term") and shall continue on a year –to – year basis. Notwithstanding the foregoing, any time after the first year of the Initial Term and anytime thereafter the rates, fees and charges set forth may be increased or decreased by written notice from Licensor to Licensee, in accordance with Section 6(A).

B. Either Party may terminate this Agreement for any reason after the Initial Term with at least sixty (60) days written notice to the other party. Licensor may terminate this Agreement in the Initial Term in the event of default as set forth under Article 20 of this Agreement.

C. Upon termination of the Agreement in accordance with any of its terms, all outstanding Licenses in connection therewith shall terminate and shall be surrendered and Licensee shall immediately, and at its sole expense remove all Attachments located on Poles within sixty (60) days of date of termination.

5. TERMINATION OF LICENSES

A. In addition to other termination rights set forth in this Agreement, upon notice from Licensor to Licensee that Licensor has been advised by a governmental authority or private property owners that the use of any Poles is not authorized and is objected to by such governmental authority or private property owner, as the case may be or that any Poles is to be removed, sold or otherwise disposed of, Licensee shall, immediately remove its cables, equipment, and facilities at once from the affected Poles or shall make arrangements for the removal of its cable, equipment, and facilities from the affected portion of Licensor's Poles at Licensee's sole expense. If not so removed within sixty (60) days or such timeframe as stated on the Notice, Licensor shall have the right to remove Licensee's Attachments from Licensor's Poles at the cost and expense of Licensee and without any liability thereto.

B. Licensee may at any time remove its Attachments from any Poles of Licensor, but shall immediately give Licensor written notice of such removal and surrender of License in the form of a Notification of Surrender attached hereto as Exhibit C and incorporated by reference and made a part of this Agreement. If Licensee surrenders its License but fails to remove its Attachments from Licensor's Poles, Licensor shall have the right but not the obligation to remove Licensee's Attachments at Licensee's expense without any liability on the part of Licensor for damage or injury to Licensee's Attachments or interruption to Services. Licensee's obligations with regard to maintenance and fees continue until Attachments are removed from the Poles. In the event that Licensee's Attachments shall be removed from any Poles as provided by this Agreement, no Attachment shall again be made to such Poles unless Licensee shall have first complied with all of the provisions of this Agreement as though no Attachment had previously been made.

6. RATES, FEES AND CHARGES.

A. All rates, charges and fees set forth in this Agreement and those shown in Exhibit D (Schedule of Rates, Fees, and Charges) shall be subject to and calculated in accordance with applicable law. Licensor may in its sole discretion reasonably revise the rates, charges and fees as set forth in Exhibit D upon thirty (30) day notice to Licensee. Exhibit D is incorporated and made a part of this Agreement by reference. The fees, rates and charges set forth in Exhibit D or elsewhere in this Agreement are effective during the term of this Agreement and subject to change as set forth herein.

B. Pole Attachment Fee. For the purpose of computing the annual Pole Attachment Fee due under this Agreement the Pole Attachment Fee shall be based each year upon the number of Poles where Licensor has issued a License as of the date of annual billing multiplied by the Attachment Rate set forth on Exhibit D, as may be modified by Licensor from time to time. If Licensee is a regulated cable system provider which begins to offer telecommunication Services, Licensee must notify Licensor within thirty (30) days of the change in use if it shall begin to use any attachment for telecommunication Services and Licensor may adjust the Attachment Rate and Pole Attachment Fee as appropriate consistent with the applicable FCC formula for telecommunication providers.

C. All charges for inspections, engineering, replacement or rearrangements of Licensee's Attachments from Licensor's Poles and, without limitation, any other work performed for Licensee shall be based upon the full cost and expense, including reasonable overhead, incurred by Licensor or its representative for performing such work for Licensee to include without limitation costs to transfer or moving of Licensor facilities and removal of old Poles. The cost to Licensee shall be determined in accordance with the regular and customary methods used by Licensor in determining such costs.

D. All other Attachment related inquiry, verification, application, administrative and miscellaneous rates, fees and charges shall be calculated and paid in accordance with Exhibit D and the terms of this Agreement.

E. Upon termination or surrender of a License granted hereunder, no refund of any Pole Attachment Fees shall be made and Licensee shall remain liable for all fees and charges set forth in this Agreement until Licensee has removed its Attachments.

7. PAYMENT, SECURITY BOND AND LIEN.

A. All bills for such other charges for work performed by Licensor and the fees set forth in the Agreement shall be payable upon presentment to Licensee, and shall be deemed delinquent if not paid within thirty (30) days after the date of the invoice.

B. **Bond.** Licensee shall furnish a bond or other security, and keep in place during the term of this Agreement, satisfactory to Licensor, in the amount of Ten Thousand Dollars (\$10,000) to guarantee the performance of Licensee obligations including payment of any such sums (including Unauthorized Attachment charges and liquidated damages) which may become due to Licensor arising out of this Agreement including, but not limited to rent, fees due hereunder or charges for work performed for the benefit of Licensee under this Agreement, including the removal of Licensee's facilities upon termination of this Agreement by any of its provisions or upon termination of any License issued hereunder. Such bond shall include that Licensor received 30 days prior notice of cancellation. Cancellation of a bond shall be an event of default by Licensee. Upon signing this Agreement and prior to issuance of a License, Licensee shall furnish the bond to be sent to person identified in Exhibit E. Licensor shall not be obligated to issue any License hereunder until Licensee has provided the bond as set forth herein.

C. **Lien.** Should Licensor under the terms and conditions of this Agreement remove Licensee's Attachments from Licensor's Poles, Licensor will deliver to Licensee the cable, equipment or facilities so removed upon payment by Licensee of the cost of removal, storage and delivery, and all other amounts due Licensor hereunder. Licensor is hereby given a lien on Licensee's cable, equipment or facilities attached to Licensor's Poles or removed therefrom, with power of public or private sale, to cover any amounts due Licensor under the provisions of this Agreement. Such liens shall not operate to prevent Licensor from pursuing, at its option, any other remedy in law, equity or otherwise, including any other remedy provided for in this Agreement.

8. ATTACHMENT REQUEST AND LICENSE PROCESS

A. Before Licensee shall have a right to place Attachments to any Poles of Licensor, Licensee shall make application for and receive a revocable, nonexclusive License which shall be in the form of a Licensor countersigned Application for Pole License (Exhibit B). Each Exhibit B Application for Pole License shall contain no more than twenty-five (25) Poles and Licensee may submit up to twelve (12) Exhibit B, Application for Pole License within a rolling thirty (30) day period. Licensor will process Applications for Pole Licenses in the order in which they are received; provided, however, that when Licensee has multiple Applications for Pole Licenses on file with Licensor, Licensee may designate its desired priority of completion with respect to all such Application for Pole Licenses. **Licensee shall not under any circumstances attach any equipment to any guy wires or anchors owned by Licensor.**

B. Application For Pole License and Engineering Survey. Licensee shall submit an Application for Pole License in the form of Exhibit B and shall include a drawing of the proposed route, the pole detail and contact information (name, telephone, facsimile, and email information). Upon receipt of a complete Application for Pole License, Licensor will conduct an engineering survey to determine whether and where Licensee's Attachment is feasible, and what Make Ready Work is required by Licensor or other existing attachers to accommodate Licensee's Attachment. Upon completion of the engineering survey, Licensor shall inform Licensee of its estimated make-ready charges for Licensor Make Ready Work ("Make Ready Estimate"). If during this process, Licensor determines the request is denied based on insufficient capacity or for reasons of safety, reliability and generally applicable engineering purpose Licensor shall inform Licensee that the Application for Pole License is denied together with the reason. All expenses incurred by Licensor in reviewing Licensee's Application for Pole License shall be borne by Licensee even if such request is denied by Licensor.

C. Advance Payment of Make Ready Work Estimate and Expedited Charges. If Licensee upon review of the Make Ready Estimate desires to proceed with the process to obtain a License from Licensor, Licensee shall submit payment in the amount of the Make Ready Estimate together with the Application Fee and engineering survey costs to Licensor within fourteen (14) days of receipt of the Make Ready Estimate and invoice for such amounts. Licensee shall be solely responsible for negotiating with existing attachers for Make-Ready Work relating to such other existing attacher facilities located on, within or in Licensor's Poles and shall be responsible for paying all charges incurred in transferring or rearranging existing attacher facilities to accommodate the placement of Licensee's Attachment on, within or in Licensor's Poles. In the event, Licensee declines to proceed with the project Licensee shall reimburse Licensor any costs and expenses incurred by Licensor to date including but not limited to Application Fee, engineering and administrative expenses and costs.

D. Completion of Make Ready Work and Issuance of License. Licensor shall undertake to complete any Make Ready Work of its owned facilities upon receipt of Licensee's payment of the Make Ready Estimate. Upon completion of all Make Ready Work and receipt of all fees and charges due from Licensee to Licensor, Licensor shall issue Licensee an approved License which shall be in the form of a Licensor countersigned Application for Pole License. At that time Licensee will be considered to have been granted a License with respect to the Poles approved in the License and may attach to Licensor's Poles in accordance with the terms and conditions of this Agreement.

E. Licensee shall maintain a copy of all Application for Pole Licenses and approved Licenses. Licensor may provide upon request copies of the same to the extent available and Licensee shall reimburse Licensor for its costs in preparing and sending requested copies.

9. AUTHORITY FOR PLACEMENT OF ATTACHMENT

A. Before any placement of Attachments by Licensee, regardless of whether a License may have been issued, Licensee represents and warrants that it has the authority to maintain Attachments within public rights-of-way, or on private rights-of-way or on private property, and shall upon request provide a copy of documentation evidencing such right to Licensor. Licensee shall be solely responsible for obtaining all licenses, easements, authorizations, permits and consents from federal, state and local authorities or private land owners that may be required to place and maintain Attachments on Licensor's Poles.

B. Licensor and Licensee agree that neither party has the right to restrict or interfere with the other party's lawful access to and use of public right-of-way, including public right-of-way, which pass over property owned by either party. Except as otherwise specifically provided in this Agreement, Licensor and Licensee shall each be responsible for obtaining their own right-of-way and permission to use real or personal property owned or controlled by any governmental body or private entity or person.

C. Licensor may, without incurring any liability, remove Attachments of Licensee from Licensor's Poles, at Licensee's sole expense where in Licensor's sole judgment such removal is required in connection with the performance of Licensor's service obligation or the safety of Licensor's employees. Whenever such removal has been made, Licensee will be notified.

10. CONSTRUCTION AND MAINTENANCE

A. Licensee's Attachments shall be placed and maintained in accordance with the following:

1. any and all Licensor requirements and specifications of Licensor, and
2. the terms and conditions of this Agreement, and ,
3. the National Electric Safety Code (most recent edition), and
4. the National Electric Code (most recent edition), and
5. in compliance with any other rules or orders now in effect or that may hereafter be issued by any state utility commission or other authority (state, federal, local) having jurisdiction over including but not limited to Poles, rights-of-way, and Hazardous Materials.

Each of Section 10(A)(1-5) is incorporated by reference and made a part of this Agreement, and in the event of a conflict or difference between any of these specifications and requirements, the more stringent will apply. Licensee agrees to rearrange its Attachments, within a commercially reasonable timeframe, in accordance with changes in the standards referenced herein in this Section 10(A) of this Agreement, or if required by law.

B. Licensee shall, at its own expense, make and maintain its Attachments and use Licensor Poles in a safe condition and in thorough repair, and in a manner acceptable to Licensor, and so as not to conflict with the use of said Poles by Licensor or by other authorized users of said Poles, or interfere with other facilities thereon or which may from time to time be placed thereon. Licensee shall, at its sole expense, upon written notice from Licensor, relocate or replace its Attachments placed on said Poles or transfer them to substituted Poles that may be authorized by Licensor, or perform any other work in connection with said Attachments that may be required. Licensor shall give such written notice as is reasonable in the circumstances, provided, however, that in cases of emergency, as determined by Licensor in its sole discretion, Licensor may arrange to relocate, remove or replace Licensee Attachments placed on said Poles, transfer such Attachments to substituted Poles or perform any other work in connection with said Attachments that may be required in the maintenance, replacement, removal or relocation of said Poles or Licensor or existing attacher facilities thereon or which may be placed thereon, or for the service needs of Licensor, and Licensee shall reimburse Licensor for the expense thereby incurred. For the purpose of this Section, Licensee Attachments shall be understood to include Attachments of Licensee in space reserved for Licensor, or space which Licensor has the right to use, on poles of other companies with which Licensor now has or may hereafter have agreements for joint use and occupancy; and the use of such space by Licensee shall be subject to the terms and conditions of the agreements between Licensor and said other companies.

C. Licensee shall be responsible at all times for the condition of Licensee's Attachments and its compliance with the requirements, specifications, rules, regulations, ordinances and laws specified in this Agreement. Licensor shall have no duty to Licensee to inspect, monitor or maintain the condition of Licensee's Attachments (including, but not limited to, splices and other facilities connections) located on, within or in Licensor's Poles. Licensor may make periodic or spot inspections at any time of any part of Licensee's Attachments as Licensor determines reasonable or necessary in its sole judgment, pursuant to Section 16 of this Agreement.

D. Licensee shall not authorize any person or entity acting on Licensee's behalf ("Licensee Contractor") to perform any work on, within or in Licensor's Poles without first verifying, to the extent practicable, on each date when such work is to be performed and, that the condition of the Poles is suitable for the work to be performed. If Licensee or Licensee Contractor determines that the condition of the Poles is not suitable for the work to be performed, Licensee shall notify Licensor of the condition of the Poles in question and shall not proceed with construction activities until Licensee is satisfied that the work can be safely performed.

E. Licensee shall be solely responsible for paying all persons and entities that provide materials, labor, access to real or personal property, or other goods or services in connection with the construction and placement of Licensee's Attachments and for directing the activities of all Licensee Contractors while they are physically present on, within or in the vicinity of Licensor's Poles. Licensee shall not permit any mechanic's lien, material man's lien, or any other lien, claim or security interest to attach to or encumber any of Licensor's real or personal property at any time.

F. Licensee's main line Attachments shall be tagged at maximum intervals of 300 feet so as to identify Licensee as the owner of the Attachment. Licensee shall place fiber wrap/ID at the specific Licensor Poles attaching point and at any aerial span splice location and/or slack loop. The tags shall be of sufficient size and lettering so as to be easily read from ground level.

11. OVERLASHING

A. Licensee may, upon notice to Licensor, overlash its own existing authorized Attachment and this does not constitute a separate Attachment, as it relates to the billing of Pole Attachment Fees, unless multiple/separate Attachment points are physically made at the Poles itself outside of the scope of a single Attachment. Such notice shall be in the form of an Exhibit B Application for Pole License, and any additional Attachments being installed on Poles, regardless of it being an overlash of existing Attachment or as a new Attachment, will require an engineering analysis to determine if the additional loading negatively impacts the Poles capacity. Any additional load which causes the Pole to exceed its rated capacity or no longer provides for ample ground clearance of the Attachments or other facilities will necessitate the need for the Licensee to pay any and all Make Ready Work necessary. Each overlash strand shall not exceed a 2" maximum diameter.

B. In no event shall Licensee allow a third party to overlash to Licensee's Attachments without prior notice to and consent from Licensor. Any third party must execute a License Agreement with Licensor and obtain a license thereunder.

12. MODIFICATIONS, ADDITIONS, REPLACEMENTS OR REARRANGEMENTS

A. Licensee shall not modify, overlash, add to, or replace Attachments on any Poles without first notifying Licensor in writing of the intended modification, addition or replacement at least thirty (30) days prior to the date the activity is scheduled to begin. The required notification shall include:

1. The date the activity is scheduled to begin including the Pole location and Pole number,
2. A description of the planned modification, addition, or replacement,
3. A representation that the modification, addition, or replacement will not require any space other than the space previously designated for Licensee's Attachments, and
4. A representation that the modification, addition, or replacement will not impair the structural integrity of the Poles involved.

B. Upon Licensor's receipt of a complete Exhibit B Application for Pole License, Licensor will perform, at Licensee's sole expense, a field check and if Licensor determine that the modification, addition, or replacement specified by Licensee in its notice will require more space than that allocated to Licensee or will require the rearrangements of, reinforcement of, replacement of, or an addition of support equipment to the Poles involved in order to accommodate Licensee's modification, addition, or replacement, Licensor will so notify Licensee and the parties will follow the Make Ready Work process as set forth in Section 8 of this Agreement in order to obtain authorization for the modification, addition, or replacement of its Attachments.

C. Should Licensee request Licensor to expand capacity or purchase additional plant and should Licensor so agree, Licensee agrees to pay all cost and expenses thereby incurred by Licensor. If another party that has been granted a license joins in the request and will benefit from the expansion or purchase, Licensee agrees to pay a percentage of all costs proportionate to Licensee's share of the benefit received from the expansion or purchase, but Licensee shall be responsible for all costs and expenses not paid by the other party.

D. When multiple applications, including those of Licensee, are received by Licensor with respect to any Poles which must be replaced or rearranged to provide additional space prior to commencement of the work on such Poles, Licensor's facilities may need to be transferred in which case Licensee shall pay for all costs for such transfers.

E. In the event Licensor plans to modify or alter any Poles upon which Licensee has placed Attachments, Licensor, except in emergency situations, shall provide Licensee written notice of the proposed modification or alteration at least sixty (60) days prior to the time the proposed modification or alteration is scheduled to take place. Should Licensee decide to modify or alter Licensee's Attachments on Poles, Licensee shall so notify Licensor in writing at least thirty (30) days prior to the day the work is to begin. In such event, Licensee shall bear a proportionate share of the total costs incurred by Licensor to make Licensor Poles accessible.

F. In the event Licensor is required to move the location of, or replace, any Licensor Poles for reasons beyond its control, Licensee concurrently shall relocate Licensee's Attachments. Licensee shall be solely responsible for the costs of the relocation of Licensee's Attachments. When it is mutually agreed that it is in the best interest of Licensor and Licensee, Licensor may, after proper notification has

been provided, transfer Licensee's Attachments at the same time that Licensor transfers its facilities and shall invoice Licensee for the actual costs incurred in performing the transfer of Licensee's Attachments.

13. EMERGENCY RESTORATION

A. In the event of an emergency, restoration procedures may be affected by the presence of Licensee's Attachments. While Licensor shall not be responsible for the repair of damaged Attachments, Licensor shall nonetheless control access to its Poles if the restoration is to be achieved in an orderly fashion.

B. Where Licensor and Licensee are involved in emergency restorations, access to Licensor's Poles will be controlled by Licensor according to the following guidelines.

1. Service Disruptions/Outages

- a) While exercising its right to first access, Licensor shall make all reasonable efforts to grant access to as many other entities with attachments as is reasonably safe.
- b) Where simultaneous access is not possible, Licensor will grant access on first come, first served basis.

2. Service Affecting Emergencies

- a) While exercising its right to first access, Licensor shall make all reasonable efforts to grant access to as many other entities with attachments as is reasonably safe.
- b) Where Licensor is unable to grant simultaneous access to all other entities with attachments, access will be granted according to the level of damage to the attachments of each entity and the likelihood that a given level of damage will result in service disruption. Where the likelihood that a service disruption will result is not clearly discernible, access will be on a first come, first served basis.

C. Without limiting any other indemnification or hold harmless provisions of this Agreement, Licensee agrees that any decision by Licensor regarding access to its Attachments, or any action or failure to act by Licensor, under this section shall not be the basis for any claim by Licensee against Licensor for any damage to Licensee's Attachments or disruption of Licensee's Services, or any other direct or indirect damages of any kind whatsoever incurred by Licensee.

14. FAILURE TO PLACE ATTACHMENTS

Once Licensee has been issued a License, Licensee shall have ninety (90) calendar days from the date of the License was issued to begin the placement of its Attachments on the Licensor Poles covered by the License. If Licensee has not begun placing its Attachments within the ninety (90) day period, Licensee shall so advise Licensor with a written explanation and notice for the delay. If Licensee fails to advise Licensor of its delay by notice thereof or if Licensee fails to act in good faith by not making a bona fide effort to begin placing its Attachments within the ninety (90) calendar days prescribed by this

section, the License shall be automatically rescinded by Licensor and deemed null and void, and Licensee shall have no further right to place the Attachments pursuant to such voided License.

15. ABANDONMENT

Nothing in this Agreement shall prevent or be construed to prevent Licensor from abandoning, selling, assigning, or otherwise disposing of any Poles. Licensor shall notify Licensee of any sale, assignment, or other disposition of any Poles or other Licensor property used for Licensee's Attachments.

16. INSPECTIONS AND INVENTORIES

A. Post construction and/or periodic inspection of Licensee Attachments. Licensor shall have the right, but not the obligation, to make a post construction inspection and periodic inspections at any time of any part of Licensee's Attachments on Poles and any other associated facilities for the limited purpose of determining whether Licensee's Attachments are in compliance with the terms of this Agreement and any Licenses issued hereunder. Such inspections shall be conducted at Licensor's expense with the exception of (1) a post construction inspection, (2) follow-up inspection to confirm remedial action after an observed Licensee violation of the requirements of this Agreement; and (3) inspection of Licensee Facilities in compliance with a specific mandate of appropriate governmental authority, for which inspections the cost shall be borne solely by Licensee.

B. Inventories. Upon written notice to Licensee, the total number and location of Licensee's Attachments on Licensor's Poles may be determined, at Licensor's discretion, through a survey which may be made not more than once per calendar year by Licensor. If so requested, Licensee and /or any other entity owning or jointly using the Poles with Licensor may participate in the survey. The costs incurred by Licensor to conduct the survey shall be reimbursed to Licensor by Licensee upon demand by Licensor regardless of whether or not Licensee participates in the survey. If the Attachments of more than one licensee are surveyed, each such licensee shall contribute a proportionate share of the costs reimbursed to Licensor.

C. No Duty to Licensee. Neither the act of inspection or survey by Licensor of Licensee's Attachments nor any failure to inspect such Attachments shall operate to impose on Licensor any liability of any kind whatsoever or to relieve Licensee of any responsibility, obligations or liability under this Agreement, any License issued hereunder, or applicable law, or to any third party contractor, Licensee Contractor, or otherwise.

17. UNAUTHORIZED ATTACHMENTS

A. If any Licensee Attachment shall be found on Poles for which no License has been granted by Licensor pursuant to the terms of this Agreement ("Unauthorized Attachment"), Licensor, without prejudice to its other rights or remedies under this Agreement or otherwise, may:

1. Impose charges as set forth herein, and
2. Require Licensee to remove such Unauthorized Attachment or Licensor may remove such Unauthorized Attachment without liability and the expense of removal shall be borne by Licensee.

B. For the purpose of determining the charges, Licensee shall pay an amount per Unauthorized Attachment equal to the Pole Attachment Fee that would have applied if Licensee had properly obtained a License based upon the then current Attachment Rate for the number of years the Unauthorized Attachment have existed (or, if that cannot be determined, the number or years since the most recent inventory or five (5) years, whichever is less), plus interest at a rate the greater of 1.5% per month or the maximum allowed by law. In addition, if the Unauthorized Attachment is discovered during a survey where Licensee declined to participate an additional fee of \$100 per Unauthorized Attachment shall be charged to Licensee. Licensee agrees and acknowledges in the event of an Unauthorized Attachment actual damages would be difficult to determine and the charges described herein are liquidated damages, not penalties, and represent a fair and reasonable estimate of the damages which may be incurred by Licensor for Unauthorized Attachments on Licensor's Poles including wear and tear, lost revenue, increased maintenance and repair costs for having to work on a Pole where the owner of a facility is unknown, and the risk of liability for safety violations that may be the result of an Unauthorized Attachment.

C. Any such charge as set forth in Section 17(B) imposed by Licensor shall be in addition to its rights to any other sums due and payable, including without limitation Make Ready Work costs, the actual costs of any audit or survey which established the existence of the Unauthorized Attachment and to any claims to said fees.

D. No act by Licensor with regard to any unauthorized use shall be deemed as a ratification or the licensing of the unauthorized use, and if any License should subsequently be issued, after application and payment of all applicable fees therefore, said License shall not operate retroactively or constitute a waiver by Licensor of any of its rights or privileges under this Agreement or otherwise, and Licensee shall be subject to all liabilities, obligations and responsibilities of this Agreement in regard to said unauthorized use from its inception.

E. An Unauthorized Attachment shall include, but not limited to:

1. An Attachment to Poles which is not identified in any License issued in accordance with this Agreement;
2. An Attachment that occupies more space than that allocated to Licensee by Licensor in a License;
3. An Attachment that is not placed in accordance with the provisions of this Agreement or the appropriate License issued pursuant to this Agreement, unless Licensee can demonstrate to Licensor's reasonable satisfaction that said misplacement is not due to any act or omission of Licensee or Licensee's agents;
4. An addition or modification by Licensee to its pre-existing Attachment(s) that impairs the structural integrity of the involved Licensor Poles.
5. An Attachment that consists of facilities owned or controlled by, and for the use of a party other than Licensee that is overlashed to Licensee Attachments without approval by Licensor as required under this Agreement.

F. Once Licensor has notified Licensee of an Unauthorized Attachment. Licensee shall submit an Exhibit B Application for Pole License to request an authorization for the Attachment. An Exhibit B Application for Pole License submitted per this provision will be treated like any other Exhibit B Application for Pole License subject to this Agreement. Licensee will be responsible for all fees associated with an Exhibit B Application for Pole License (as identified in this Agreement). If an Exhibit B Application for Pole License is not received by Licensor within ten (10) days of Licensor's notice of an Unauthorized Attachment, Licensee has sixty (60) days from the date of the Unauthorized Attachment notification to vacate the Pole. If Licensee fails to remove Licensee's facilities within such sixty (60) day period, Licensor shall have the right to remove Licensee's facilities at Licensee's expense and without any liability on the part of Licensor for damage or injury to Licensee's facilities or disruption of Licensee's Services.

18. COMPLIANCE WITH LAW, ASSUMPTION OF RISK, AND DISCLAIMER OF WARRANTIES

A. Notwithstanding anything to the contrary in this Agreement, Licensee shall ensure that any and all activities it undertakes pursuant to this Agreement shall comply with all applicable laws, including, without limitation, all applicable provisions of:

1. Workers' compensation laws
2. Unemployment compensation laws
3. The Federal Social Security Law
4. The Fair Labor Standards Act, and
5. All laws, regulations, rules, guidelines, policies, orders, permits and approvals or any governmental authority relating to environmental matters including but not limited to Hazardous Materials and/or Occupational Safety and Health Act ("OSHA").

B. LICENSEE ACKNOWLEDGES AND AGREES THAT LICENSOR DOES NOT MAKE ANY REPRESENTATION OR WARRANTIES AS TO THE CONDITION OR SAFETY OF LICENSOR'S POLES ANY ASSOCIATED FACILITIES AND EQUIPMENT ON, WITHIN OR SURROUNDING THE SAME, OR THE PREMISES SURROUNDING THE SAME, LICENSEE HEREBY ASSUMES ALL RISKS OF ANY DAMAGE, INJURY OR LOSS OF ANY NATURE WHATSOEVER CAUSED BY OR IN CONNECTION WITH THE USE OF POLES AND ASSOCIATED FACILITIES AND EQUIPMENT ON, WITHIN OR SURROUNDING THE SAME, AND THE PREMISES SURROUNDING THE SAME AND LICENSEE IS SOLELY RESPONSIBLE FOR ALL ALLEGED DAMAGES CLAIMED BY THIRD PARTIES ACCESSING OR WORKING ON OR NEAR LICENSOR'S POLES.

C. EXCEPT AS OTHERWISE PROVIDED HEREIN, LICENSOR MAKES NO WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, ALL OF WHICH ARE HEREBY EXPRESSLY DISCLAIMED, WITH REGARD TO THIS AGREEMENT AND ANY LICENSE ISSUED HEREUNDER INCLUDING, WITHOUT LIMITATION, ACCESS TO LICENSOR'S POLES OR OTHER FACILITIES.

19. LICENSEE CONTRACTOR QUALIFICATIONS

- A.** The parties acknowledge that from time to time Licensee may use a Licensee Contractor to perform work for Licensee on, within or in Licensor's Poles.
- B.** Licensee represents and warrants that any of its employees or Licensee Contractors shall not climb or work on any of Licensor's Poles, or work within Licensor's Right-Of-Way unless such person has the training, skill, and experience required to recognize potentially dangerous conditions relating to Poles and to perform the work safely.
- C.** Licensee assumes all risk of Licensee Contractors and agrees to indemnify, defend and hold harmless Licensor from all claims, losses, damages and liabilities, costs and expenses (including, but not limited to, reasonable attorney's fees) associated thereto in accordance with the indemnification provision of this License Agreement.
- D.** When Licensee Contractors are working on, within or in the vicinity of any part of Licensor's Poles or Right-Of-Way, all such Licensee Contractors shall follow procedures which Licensee deems appropriate for the protection of persons and property. Licensee shall be responsible at all times for determining and implementing the specific steps required to protect persons and property at the site. Licensee will provide all traffic control and warning devices required to protect pedestrian and vehicular traffic, workers and property from danger. Licensee has sole responsibility for the safety of all its employees and Licensee Contractors, for the safety of bystanders, and for insuring that all operations conform to terms and conditions set forth in this Agreement. Licensor reserves the right to suspend Licensee's activities on, within or in the vicinity of Licensor's Poles or Right-Of-Way if, in Licensor's sole judgment, any hazardous condition arises due to the activity (including both acts and omissions) of any Licensee Contractor or Licensee employee, which suspension shall cease when the condition has been rectified.
- E.** Licensee represents and warrants that all Licensee Contractors shall maintain the same insurance coverage and limits as are required of Licensee under this Agreement, and if not Licensee's insurance will provide such coverage.
- F.** Licensee acknowledges that all Licensee Contractors are not Licensor's employees or agents and Licensee assumes full responsibility for their actions or omissions to act. Licensee shall be solely responsible for the payment of compensation of Licensee's employees, contractors or agents assigned to perform work hereunder and such employees, contractors and agents shall be informed that they are not entitled to the provision of any Licensor benefits. Licensor shall not be responsible for payment of workman's compensation, disability benefits, and unemployment insurance or for withholding or paying employment related taxes for any employee of Licensee, but such responsibility shall be solely that of Licensee. In the event that any federal, state or local government agency, any court or any other applicable entity determines that the personnel provided by Licensee or any permitted Licensee Contractor are employees of Licensor for any purpose, Licensee agrees to indemnify, defend and save harmless Licensor from all liabilities, costs, and expenses (including, but not limited to, reasonable attorney fees) associated with such determination in accordance with the indemnification provision of this License Agreement.

G. Any work by Licensee Contractors on, within or in Licensor's Poles or Right-Of-Way shall be done only when specific authorization for such work has been obtained in writing in advance from Licensor pursuant to the terms and conditions of this Agreement. The parties agree that all work shall be performed according to existing industry standards and practices and the requirements and specifications set forth in this Agreement and any License issued hereunder.

20. DEFAULT

A. In addition to other events of defaults defined anywhere else in this Agreement, any one of the following shall be deemed the occurrence of a default under this Agreement:

1. Failure by Licensee to pay when due any fee or other sum required to be paid under the terms of this Agreement.
2. Failure by either party to perform or observe any other term, condition, covenant, obligation, or provision of this Agreement and such default continues for a period of thirty (30) days after written notice thereof from the other party (provided that if such default is not curable within a thirty (30) day period, the period may be extended if the party substantially commences to cure such default and proceeds diligently thereafter to effect such cure).
3. The filing of any tax or lien against Poles because of any act or omission by Licensee which is not bonded or discharged within thirty (30) days of the date of notice to Licensee that such lien has been filed;
4. Licensee's voluntary or involuntary bankruptcy;
5. Licensee's use or maintenance of its Attachments in violation of any law or regulation, or in aid of any unlawful act or undertaking;
6. If any authorization which may be required of Licensee by any governmental or private authority for the placement, operation, or maintenance of Licensee's Attachments is denied or revoked.

B. In the event of a default and subject to any other applicable provision of this Agreement, the non-defaulting party, without any further notice to the defaulting party (except where expressly provided for below or required by applicable law), may do any one or more of the following:

1. Perform on behalf and at the expense of the defaulting party, any obligation of the defaulting party under this Agreement which the defaulting party has failed to perform and of which the non-defaulting party shall have given the defaulting party notice, the cost of which performance shall be paid by the defaulting party to the non-defaulting party upon demand;
2. Terminate this Agreement by giving sixty (60) days written notice of such termination to Licensee and remove Licensee's Attachments and store Licensee's facilities in a public warehouse or elsewhere at the expense of and for the account of Licensee without

Licensor being deemed guilty of trespass or conversion, and without Licensor becoming liable for any loss or damages to Licensee occasioned thereby; or

3. Exercise any other legal or equitable right or remedy that the non-defaulting party may have.

C. The defaulting party shall repay to the non-defaulting party upon demand any costs and expenses incurred by the non-defaulting party (including, without limitation, reasonable attorneys' fees) in successfully enforcing this Agreement.

D. Upon termination of this Agreement by the non-defaulting party, the defaulting party shall remain liable to the non-defaulting party for any and all fees, other payments and damages which may be due or sustained in accord with this Agreement prior to such termination, all reasonable costs, fees and expenses, including, without limitation, reasonable attorney' fees incurred by the non-defaulting party in pursuit of its remedies hereunder.

E. All rights and remedies of the non-defaulting party set forth in this Agreement shall be cumulative and none shall exclude any other right or remedy, now or hereafter allowed by or available under any statute, ordinance, rule of court, or the common law, either at law or in equity, or both.

21. INDEMNIFICATION AND LIMITATION OF LIABILITY

A. Licensee shall compensate Licensor for the full actual loss, damage or destruction of Licensor's property that in any way arises from or is related to this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation, or maintenance of Licensee's Attachments).

B. Licensee agrees to defend, indemnify, protect and hold harmless Licensor and its officers, directors, employees, shareholders, successors, assigns, agents, affiliates, representatives, partners, and contractors from and against any and all claims, actions, administrative proceedings (including, without limitation, informal proceedings), judgments, damages, penalties, fines, cost, liabilities, interests, or loss, including, without limitation, reasonable attorneys' fees and expenses, consultant fees, and expert fees, together with all other costs and expenses of any kind or nature suffered by or asserted against Licensor in any way arising out of or connected with this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation or maintenance of Licensee's Attachments, unless caused solely by the negligence or willful misconduct of Licensor or Licensor's affiliates, agents, officers, employees and assigns). Licensee expressly assumes all liability for actions by its affiliates, agents, officers, employees, or Licensee Contractors and expressly waives any immunity from the enforcement of this indemnification provision that might otherwise be provided by workers' compensation law or by other state or federal laws.

C. Without limiting any of the foregoing, Licensee assumes all risk of, and agrees to relieve Licensor of any and all liability for, loss or damage (and the consequences of loss or damage) to any of Licensee's facilities placed on Licensor's property and any other financial loss sustained by Licensee, except to the extent caused by the sole negligence or willful misconduct on the part of Licensor or Licensor's agents, officers, employees, and assigns.

D. Without limiting the foregoing, Licensee expressly agrees to indemnify, defend, and hold harmless Licensor and Licensor's agents, officers, employees and assigns from any and all claims asserted by end users/customers of Licensee in any way arising out of or in connection with this Agreement or Licensee's Attachments, except to the extent caused solely by the negligence or willful misconduct of Licensor or Licensor's agents, officers, employees, and assigns, or its contractors.

E. Notwithstanding anything to the contrary in this Agreement, Licensee further shall indemnify and hold harmless Licensor, its agents, officers, employees, and assigns from and against any claims, liabilities, losses, damages, fines, penalties, and costs (including, without limitation, reasonable attorneys' fees) whether foreseen or unforeseen, which the Licensor suffers or incurs because of:

1. Any discharge of Hazardous Materials resulting from acts or omissions of Licensee, Licensee Contractors or Licensee's predecessor in interest;
2. Acts or omissions of Licensee, its agents, employees, Licensees, or representatives in connection with any cleanup required by law, or
3. Failure of Licensee or Licensee Contractors to comply with Environmental, Safety and Health Laws.

F. Licensee shall indemnify, protect, and hold harmless Licensor from and against any and all claims for libel and slander, copyright and/or patent infringement arising directly or indirectly by reason of installation of Licensee's Attachments pursuant to this Agreement.

G. In the event of any claim, demand or litigation specified the indemnity provision, the party to be indemnified (the "Indemnified Party") shall give prompt notice to the other party (the "Indemnifying Party") of such claim, demand or litigation. The Indemnifying Party shall have sole control of the defense of any action or litigation on such a claim or demand (including the selection of appropriate counsel) and all negotiations for the settlement or compromise of the same, except that the Indemnifying Party may not make any non-monetary settlement or compromise without the Indemnified Party's consent, which consent shall not be unreasonably withheld. The Indemnified Party shall cooperate with the Indemnifying Party in the defense and/or settlement of any claim, demand or litigation. Nothing herein shall be deemed to prevent the Indemnified Party from participating in the defense and/or settlement of any claim, demand or litigation by the Indemnified Party's own counsel at the Indemnified Party's own expense.

H. NOTWITHSTANDING ANYTHING TO THE CONTRARY CONTAINED IN THE AGREEMENT, NEITHER PARTY SHALL BE LIABLE TO THE OTHER PARTY FOR CONSEQUENTIAL, INCIDENTAL, PUNITIVE, EXEMPLARY OR INDIRECT DAMAGES SUFFERED BY SUCH PARTY OR BY ANY SUBSCRIBER, CUSTOMER OR PURCHASER OF SUCH PARTY FOR LOST PROFITS OR OTHER BUSINESS INTERRUPTION DAMAGES, WHETHER BY VIRTUE OF ANY STATUTE, IN TORT OR IN CONTRACT, UNDER ANY PROVISION OF INDEMNITY, OR OTHERWISE, REGARDLESS OF THE THEORY OF LIABILITY UPON WHICH ANY SUCH CLAIM MAY BE BASED OR WHETHER IT (a) HAS BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES OR (b) IS NEGLIGENT.

E. The policy will show the state in which operation on behalf of the Licensee and/or subsidiary is being conducted. For operations conducted within monopolistic (state fund) states, Licensee will furnish a certificate of compliance from the appropriate state fund administrator.

F. In each and every policy except workers' compensation, Licensor and its subsidiaries shall be named an "additional insured" with respect to activities performed on behalf of the Licensee and its subsidiaries.

G. Coverage provided by the policies listed in this paragraph will be issued by an insurance company, licensed in the state in which operations on behalf of the Licensee are to be conducted. It is acceptable to use both primary and excess/umbrella policies to obtain necessary limits. The worker's compensation policy must contain a waiver of subrogation clause.

H. Licensee will furnish to Licensor, a certificate evidencing insurance coverage under sub-paragraphs 22(A) and (D). Such certificate or Licensee shall provide for a thirty (30) day prior notice to the Licensor of any cancellation or material changes in coverage and shall be signed by a legal representative of the issuing insurance company. The certificate of insurance shall be sent to Licensor's contact identified in Exhibit E.

I. The provisions of sub-paragraphs 22 (A) and (D) shall also apply to all Licensee Contractors and Licensee shall be responsible for their compliance herewith.

23. NOTICES

Any and all notices to a party required or permitted under this Agreement shall be in writing and shall be: (a) delivered personally; (b) delivered by express overnight delivery service; (c) mailed, via certified mail or first class U.S. Postal Service, with postage prepaid, and a return receipt requested; or (d) delivered by electronic mail; provided that a paper copy is also sent via methods (a), (b), or (c) of this Section. Notices will be deemed given as of the earliest of: the date of actual receipt; the next business day when sent via express overnight delivery service; five (5) calendar days after mailing in the case of first class or certified U.S. Postal Service, or on the date set forth on the confirmation produced by the sent confirmation when sent prior to 5:00 p.m. in the recipient's time zone, but the next business day when delivered at 5:00 p.m. or later in the recipient's time zone. Notices will be addressed to the parties as set forth in Exhibit E as may be updated in writing by the parties from time to time in accordance with method set forth under this Section 23.

24. CONFIDENTIALITY

Neither party shall at any time disclose, provide, demonstrate or otherwise make available to any third party any of the terms or conditions of this Agreement or any materials provided by either party specifically marked as confidential, except upon written consent of the other party, or as may be required by applicable law or governmental authorities. Notwithstanding the foregoing, nothing in this Section shall prevent disclosure to a party's authorized legal counsel who shall be subject to this confidentiality section, nor shall it preclude the use of this Agreement by the parties to obtain financing, to make or report matters related to this Agreement in any securities statements, or to respond to any requests by governmental or judicial authorities; provided, however, that any such disclosure shall be limited to the extent necessary, and shall be made only after attempting to obtain confidentiality assurances.

Notwithstanding the foregoing, prior to making any disclosure in response to a request of a governmental authority or legal process, the party called upon to make such disclosure shall provide notice to the other party of such proposed disclosure sufficient to provide the other with an opportunity to timely object to such disclosure. Notwithstanding the foregoing, Licensor may, without notice to Licensee: (i) negotiate or enter into any agreement with any other person(s) or entity(ies) that is identical or similar to this Agreement; and (ii) provide the text of all or part of this Agreement to any other party, so long as Licensor shall redact therefrom all references to Licensee and shall not associate such text with Licensee or identify Licensee as having agreed to such text or terms.

25. DISPUTE RESOLUTION

A. Except in the case of:

1. A suit, action, or proceeding by one party to compel the other party to comply with its obligation to indemnify the other party pursuant to this Agreement, or
2. A suit, action or proceeding to compel either party to comply with the dispute resolution procedures set forth in this section, the parties agree to use the following procedure to resolve any dispute, controversy, or claim arising out of or relating to this Agreement or its breach.

B. At the written request of a party, each party shall designate a knowledgeable, responsible representative to meet and negotiate in good faith to resolve any dispute, controversy, or claim arising under this Agreement. The parties intend that these negotiations be conducted by non-lawyer, business representatives. The substance of the negotiations shall be left to the discretion of the representatives. Upon mutual agreement, the representatives may utilize other alternative nonbinding dispute resolution procedures such as mediation to assist in the negotiations. Discussions and correspondence between the representatives for the purposes of these negotiations shall be treated as confidential, undertaken for purposes of settlement, shall be exempt from discovery and production, and shall not be admissible in any subsequent proceeding without the concurrence of all parties. Documents identified in or provided during such negotiations, which are not prepared for purposes of the negotiations, shall not be so exempt and may, if otherwise admissible, be admitted as evidence in any subsequent proceeding.

C. If a resolution of the dispute, controversy or claim is not reached within ninety (90) days of the initial written request referred to in this Section 25, the dispute, controversy, or claim may be filed with the State utility commission or the Federal Communication Commission, if applicable, for review and determination, provided the party invoking the commission's intervention process has in good faith negotiated, or attempted to negotiate, with the other party pursuant to this Section 25.

D. Except as otherwise provided in this Agreement under the Indemnification or Default provision or elsewhere, each party shall bear its own costs, including attorneys' fee, incurred in connection with any of the foregoing procedures. A party-seeking discovery shall reimburse the responding party the cost of reproducing documents (to include search time and reproduction time costs).

26. TAXES

Each party shall pay all taxes and assessments lawfully levied on its own property and services subject to this Agreement.

27. WAIVER

Failure by either party to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

28. NO THIRD PARTY BENEFICIARIES

Except as otherwise provided in this Agreement, this Agreement is intended to benefit only the parties and may be enforced solely by the parties, their successors in interest or permitted assigns. It is not intended to, and shall not, create rights, remedies or benefits of any character whatsoever in favor of any persons, corporations, associations, or entities other than the parties, except as provided herein.

29. FORCE MAJEURE

Neither party shall be liable for any delay or failure in performance of any part of this License Agreement or License issued hereunder from any cause beyond its reasonable control and without its fault, omission or negligence, such as acts of God, acts of civil or military authority, embargoes, epidemics, war, terrorist acts, riots, insurrections, fires, explosions, earthquakes, nuclear accidents, floods, power blackouts, labor strikes, lockouts or work stoppages or severe weather (“Force Majeure Event”). In the event of a Force Majeure Event, upon giving prompt notice to the other party, the due date for performance by the affected party of its original obligation(s) shall be extended by a term equal to the time lost by reason of the Force Majeure Event. In the event that the affected party is able to partially perform its obligations, it shall perform its obligations at a performance level no less than that which it uses for its own operations.

30. ASSIGNMENT

Licensee shall not assign, transfer or sublet the privileges hereby granted, without prior consent in writing of Licensor, which will not be unreasonably withheld. No such consent granted by Licensor shall be effective until Licensee’s assignee, sublessee or other transferee has agreed, on an enforceable separate document signed and delivered to Licensor, to assume all obligations and liabilities of Licensee under this Agreement. Licensor may condition such consent upon the assignee’s, sublessee’s or transferee’s agreement to reasonable additional or modified terms or conditions. If there is a change of control of Licensee, then Licensor shall have the right, in its reasonable discretion, immediately to terminate this Agreement in its entirety without further liability. Licensor may assign or otherwise transfer this Agreement or any of its rights and interests to any firm, corporation or individual, without the prior consent of Licensee.

31. APPLICABLE LAW

This Agreement, and the rights and obligations contained in it, shall be governed and construed under the laws of the state in which the Attachments hereunder are to be located. The terms and conditions of this Agreement shall be subject to any and all applicable laws, rules, regulations or guidelines now in effect and that subsequently may be prescribed by any federal, state or local governmental authority. To the extent required by any such prescribed law, rule, regulation or guideline, the Parties agree to modify, in writing, the affected term(s) and conditions(s) of this Agreement to bring

them into compliance with such law, rule, regulation or guideline. Should any term of this Agreement be determined by a court or agency with competent jurisdiction to be unenforceable, all other terms of this Agreement shall remain in full force and effect.

32. WAIVER OF JURY TRIAL

Licensor and Licensee each expressly waive its right to a jury trial.

33. ENTIRE AGREEMENT, MODIFICATIONS, SURVIVAL AND CONFLICTS AND TARIFFS

A. This Agreement cancels and supersedes all previous agreements whether written or oral, except for any sums due thereunder, between Licensor and Licensee with respect to the Licensee's Attachments to Licensor's Poles; and there are no other provisions, terms or conditions to this Agreement except as expressed herein. All currently effective Licenses and authorizations for Attachments granted pursuant to such previous agreements shall continue in effect subject to the terms and conditions of this Agreement.

B. This Agreement may be amended or supplemented at any time only upon written agreement by the parties hereto. Notwithstanding the foregoing, all Exhibits, fees, Licensor procedures and specifications may be modified by Licensor upon thirty (30) day notice to Licensee.

C. Notwithstanding the termination of this Agreement for any reason, Section 18 Compliance with Laws, Assumption of Risk and Disclaimer of Warranties, Section 21 Indemnification and Limitation of Liability, Section 22 Insurance, Section 24 Confidentiality and any other provision intended to survive, shall survive termination to the maximum extent permitted under applicable law. Notwithstanding any provisions to the contrary, all rights, remedies, or obligations which arose or accrued prior to the termination or expiration of the terms hereof shall survive and be fully enforceable for the applicable statute of limitations period.

D. It is the intent of the parties that the terms and conditions of this Agreement and any applicable Licensor's state tariffs be construed as being consistent where possible. However, in the event of a conflict or difference between the terms and conditions of this Agreement and Licensor's state tariff, the terms of the applicable state tariff shall control.

34. AUTHORITY AND COUNTERPARTS AND ELECTRONIC SIGNATURES

A. Each party represents and warrants that it is a company duly organized, validly existing and in good standing under the laws of the state in which the obligations under this License Agreement are to be performed. Each party warrants that it has full power and authority to execute and deliver this License Agreement and to perform its obligations hereunder.

B. This Agreement may be executed using facsimile or electronic signatures and such facsimile or electronic version of the Agreement shall have the same legally binding effect as an original paper version. This Agreement may be executed in counterparts, each of which shall be deemed an original.

NAME: **W.A. Gillum**

TITLE: CEO/GM

DATE: 2/14/2017

EXHIBIT A
DEFINITIONS

“**Affiliate**” – With respect to any entity, any other entity controlling, controlled by or under common control with such entity. For purposes of this definition, “control” means direct or indirect ownership of at least 50% of the interest of such entity.

“**Application for Pole License**” - A written request submitted in the form of **Exhibit B** from Licensee to Licensor requesting authorization to attach Licensee owned facilities to Poles in accordance with this Agreement.

“**Attachment(s)**” – any facilities, cables or equipment attached to Poles or any other property owned or controlled by Licensor.

“**Effective Date**” - is January 1, 2016.

“**Force Majeure Event**” – shall have the meaning set forth in Section 29 of the Agreement.

“**Hazardous Materials**” -

Any substance, material or waste now or hereafter defined or characterized as hazardous, toxic or dangerous as defined by the Comprehensive Environmental Response, Compensation and Liability Act (“CERCLA”) of 1980, as amended, and other federal, state, and local health, safety, and environmental laws, ordinances, statutes, and rules, including but not limited to the Occupational Safety and Health Act (“OSHA”).

Any substance, material or waste now or hereafter classified as a contaminant or pollutant under any law, rules, ordinance, or authority.

Any other substance, material or waste, the manufacture, processing, distribution, use, treatment, storage, placement, disposal, removal or transportation of which is now or hereafter subject to regulation under any law, ordinance, statute, rule or regulation of any governmental body or authority.

“**License**” – is the specific nonexclusive and revocable permission from Licensor, in the form of a Licensor countersigned and returned Application for License, to Licensee authorizing Licensee to attach its facilities as applied for to Licensor Poles in accordance with this Agreement.

“**Licensee Contractors**” - shall have the meaning set forth in **Section 10(D)** of the Agreement.

“**Make Ready Estimate**” – is Licensor’s estimated cost to perform Make Ready Work on Licensor’s facilities on Poles to accommodate Licensee’s Attachment as requested in an Application for Pole License.

“**Make Ready Work**” - all Licensor, joint owner or other existing attacher work to prepare Licensor’s Poles and related facilities for the requested Attachment of Licensee’s facilities but not the actual placement of Attachments or administrative activities related to inquiries, verifications, requests or applications.

“Overlashing or overlashed” – lashing of an additional Licensee owned cable to Licensee’s own existing cable and/or strand attached to a Pole as set forth in Section 11 of this Agreement.

“Pole(s)”- a pole owned solely or jointly by Licensor or Poles owned by others to the extent that and for so long as Licensor has the right to permit others to be attached in the communications space.

“Pole Attachment Fee” - the fee paid annually per Attachment on a Pole. For billing purposes, a single Attachment includes the point of Attachment and all facilities located in the usable space on the Poles in the space assigned to Licensee (typically six inches above and six inches below the point of Attachment). If Licensee occupies more than one foot of usable space on Poles, separate Pole Attachment Fees shall apply to each one foot of space occupied.

“Right-of-Way” - right-of-way owned or controlled by Licensor.

“Unauthorized Attachment” – shall have the meaning set forth in Section 17(A) and 17(E) of the Agreement.

AGREEMENT

COVERING THE JOINT USE OF POLES

THIS AGREEMENT, effective December 1, 2004, is made by and between Kentucky Power Company, a Kentucky Corporation (hereinafter called the "Electric Company") and Kentucky ALLTEL, Inc., a Kentucky Corporation (hereinafter called the "Telephone Company").

WITNESSETH

WHEREAS, the Electric Company and the Telephone Company desire to promote the joint use of their respective poles when and where such joint use shall be mutually advantageous,

NOW, THEREFORE, in consideration of the premises and the mutual covenants herein contained, the parties hereto, for themselves, their successors and assigns, do hereby covenant and agree as follows:

ARTICLE 1

1 SCOPE OF AGREEMENT

1.01 This agreement shall be in effect in such portions of the Commonwealth of Kentucky in which the Electric Company and the Telephone Company now or hereafter operate and shall cover all poles of each of the parties now existing or hereafter erected or acquired in the above territory when said poles are brought hereunder in accordance with this Agreement.

1.02 Each party reserves the right to exclude from joint use:

- a. Poles which in Owner's judgment are necessary for its own sole use; or
- b. Poles which carry, or are intended by Owner to carry, facilities of such a character that in Owner's judgment the proper rendering of its service now or in the future makes joint use of such poles undesirable.

ARTICLE 2

2 EXPLANATION OF TERMS

For the purpose of this Agreement, certain terms shall have the meanings given in this article.

2.01 JOINT USE - The simultaneous use of any pole for the attachment of both parties.

2.02 NORMAL SPACE ALLOCATION - On a joint pole the following described basic space for the exclusive use of each party, respectively, with the associated mutual

vertical clearance space for maintenance of separations, in accordance with the specifications referred to in Article 3:

- a. For the Electric Company, the uppermost nine (9) feet, measured from top of pole.
- b. For the Telephone Company, the lowest three (3) feet, measured upward from a point of attachment on the pole which will obtain basic clearances to ground as required by the specifications referred to in Article 3 and permit practical horizontal grading of facilities.
- c. Mutual vertical clearance space on the pole between each company's attachments shall never be less than that which will obtain minimum separations as required by the specifications referred to in Article 3.
- d. Except by mutual agreement of the parties, attachments shall not be permitted in the neutral space required by the specifications referred to in Article 3. This limitation does not apply to attachments of street lighting or traffic control systems owned or used by governmental entities.

These specifications referred to in Article 3 do not preclude certain attachments of one party being located in and extending vertically through space reserved for the other party.

- 2.03 OWNER - The party owning the pole.
- 2.04 LICENSEE - The party having the right under this Agreement to make attachments to Owner's poles.
- 2.05 APPLICANT - The party making application to the Owner for permission to become a Licensee on Owner's poles.
- 2.06 SUBTRANSMISSION - Voltage below 138KV not otherwise designated as distribution. This Agreement does not permit the Telephone Company to make attachments to additional subtransmission poles without the prior written consent of Electric Company, which consent can be withheld in Electric Company's discretion.
- 2.07 TOTAL COST - Total Cost shall include all material, labor and overheads. When replacing a pole and for additional poles due solely to the Licensee's requirements, Total Cost shall include the cost of transferring facilities and removal of the old pole, with book value credit for any reusable/salvageable material.
- 2.08 THIRD PARTY - Any additional licensees other than the Electric Company and Telephone Company.
- 2.09 BARE POLE - A pole exclusive of any type of attachments.

- 2.10 PROPOSALS - A standardized form used by the parties to communicate either their needs, requirements or intentions regarding attachments.
- 2.11 TRANSFER NOTICE - A standardized form used by the parties to communicate that new pole placement has been completed.
- 2.12 ATTACHMENT - Any device now or hereafter fastened to a joint use pole by the parties hereto; excludes existing pedestals and bonds to pole ground where no other overhead attachment or device exists. A riser up the pole to attach to the neutral is considered a contact establishing the pole as a joint use pole herein.
- 2.13 POLE GROUND - A ground rod or wire connected thereto to which Telephone Company may connect at the base of Electric Company pole without causing pole to be considered joint use as herein defined.
- 2.14 JOINT FIELD CHECK - The physical review of joint use facilities subject to this agreement by a representative from each party to determine the ownership of each pole and licensee of said pole. This does not exclude any additional activities during the field check as long as they are mutually agreeable to both parties.

ARTICLE 3

3 SPECIFICATIONS

- 3.01 The joint use of poles covered by this Agreement shall at all times be in conformity with good industry practice and with the terms and provisions of the latest applicable edition of The National Electrical Safety Code, and the rules of the Public Service Commissions of the States applicable to this agreement and any other applicable binding orders, statutes, ordinances, rules and regulations of any other governmental body. Where differences in standards exist, the most stringent shall apply.
- 3.02 If either party places or maintains its facilities not in conformance with Article 3, then the other party may give written notice to the nonconforming party to bring its facilities into compliance with this Agreement subject to the limitations contained in Article 3.04. The nonconforming party must bring its facilities into compliance within ninety (90) days of notification. If facilities are not brought into compliance, the nonconforming party is considered in default in accordance with Article 15 of this Agreement.
- 3.03 Wood poles shall comply with American Standards Association specifications and have a preservative treatment, full length, in accordance with good modern practice at the time of installation.
- 3.04 It is the intent of this Agreement that poles having attachments prior to this Agreement, providing that their installation conformed to the specifications referred

to in Article 3 herein at the time the original attachment was made, will not be replaced or attachments rearranged solely to meet the requirements of Articles 2.02 a. and 2.02 b., under NORMAL SPACE ALLOCATION or the current specifications referred to in Article 3.01.

The foregoing does not prohibit the replacement of a pole if Licensee compensates Owner in accordance with Article 8.01.

ARTICLE 4

4 ESTABLISHING JOINT USE OF EXISTING POLES

- 4.01 (a) All existing poles of either party hereto may be contacted by the other party without notification, but only for the purpose of end user service drops, subject to all applicable laws and regulations and the other terms and conditions of this agreement. A summary Proposal of such service drop poles contacted shall be submitted monthly to the owner with as much accuracy as practical and with sufficient detail as the owner may require and which is readily determined at the pole locations.
- 4.01 (b) Except as provided for by Article 4.01 (a), whenever either party desires to reserve space on any pole owned by the other party, either as initial space or additional space on said pole, it shall submit a proposal therefor, specifying the location of the pole in question, the amount of space desired and the number and character of circuits to be placed thereon. Within fifteen (15) days after the receipt of such application, Owner shall notify the Applicant whether or not said pole is among those excluded from joint use under the provisions of Article 1.02. If for any reason the Owner cannot respond within fifteen (15) days, notification (telephone, fax, verbal, etc.) for an extension shall be made. Failure of response within such fifteen (15) day period shall create a presumption that permission has been granted and Applicant may proceed accordingly; however, notification (telephone, fax, verbal, etc.) to the Owner shall be made before the Applicant proceeds. Upon receipt of Owner's notice that the said pole is not among those excluded from joint use or notification (telephone, fax, verbal, etc.) as stated above, and after the completion by Owner of any transferring or rearranging which in the Owner's judgment is then required with respect to attachments on said poles, including any necessary pole replacements, the Applicant shall have the right as Licensee hereunder to use said space for attachments and circuits of the character specified in said notice in accordance with the terms of the notice and of this Agreement.

- 4.02 Whenever any jointly used pole or any existing pole about to be so used under the provisions of this Agreement is insufficient in height or strength for the existing attachments and for the proposed immediate additional attachments thereon, Owner shall replace such pole with a new pole of the necessary height and strength and shall make such other changes in the existing pole line in which such pole is included as the conditions may then require, and bill Licensee in accordance with Article 8. Whenever Licensee requests any existing jointly used pole be replaced and Owner cannot complete replacement and/or rearrangements within the time required by Licensee, Licensee may place the new pole at the written request of the Owner (except in cases of emergency, when oral notice may be given and subsequently confirmed in writing) and bill the Owner the Total Cost of installing the new pole plus 25%. The Owner will retain ownership of the new pole and remove the old pole.
- 4.03 Except as herein otherwise expressly provided, on jointly used poles each party shall, at its own expense, place, maintain, transfer, rearrange and remove its own attachments, including any tree trimming or cutting incidental thereto, place guys to sustain unbalanced loads due to its attachments, and shall perform such work promptly and in such manner as not to interfere with the service of the other party.

ARTICLE 5

5 ESTABLISHING JOINT USE OF ADDITIONAL POLES

- 5.01 Whenever either party hereto requires new poles within the territory covered by this Agreement, either as an additional pole line, as an extension of an existing pole line, or in connection with the reconstruction of an existing pole line, and such pole facilities are not to be excluded from joint use under the provisions of Article 1, it shall promptly notify the other party by submitting a proposal (oral notice subsequently confirmed in writing may be given in cases of emergency) stating the location and size of the new poles and the character of circuits it proposes to use thereon. Within fifteen (15) days after the receipt of such notice, the other party shall reply in writing, stating whether it does or does not desire space on the said poles, and, if it does, the character of the circuits it desires to use and the amount of space it wishes to reserve. Failure of response within fifteen (15) days shall create a presumption that no joint use is desired and the proposing party may proceed accordingly; however, a telephone call shall be made to the other party to confirm before the proposing party proceeds. Should the party to whom the proposal was made express interest in joint use after the fifteen (15) day period referred to above, any and all additional expenses, including, but not limited to, engineering and other labor costs plus other expenses associated with replacement and/or rearrangement of facilities, shall be borne by the party to whom notice was originally given.

- 5.02 In any case where the parties hereto shall conclude arrangements for the joint use of any new pole to be erected, and the party proposing to construct the new pole facilities already owns more than its Ownership Objective of joint poles as stated in Article 12.03., the parties shall take into consideration the desirability of having the new pole facilities owned by the party owning less than its Ownership Objective of joint poles so as to work toward such a division of ownership of the joint poles that both parties shall equitably share in the benefits and burdens of joint use.
- 5.03 Each party shall, at its own expense, place and maintain its own attachments on the new joint poles, including any tree trimming or cutting incidental thereto, place guys to sustain unbalanced loads due to its attachments, and shall perform such work promptly and in such manner as not to interfere with the service of the other party.

ARTICLE 6

6 RIGHTS-OF-WAY FOR LICENSEE'S ATTACHMENTS

- 6.01 Owner shall not be required to secure any right, license or permit from any governmental body, authority or other person or persons which may be required for the construction or maintenance of attachments of Licensee, and Owner does not grant, guarantee nor convey any easements, rights-of-way or franchises for the construction and maintenance of said attachments, and if objection is made thereto and Licensee is unable to satisfactorily adjust the matter within a reasonable time, Owner may at any time, upon notice in writing to Licensee, require Licensee to remove its attachments from the poles involved, and Licensee shall, within sixty (60) days after receipt of said notice, remove its attachments from such poles at its sole expense.

ARTICLE 7

7 MAINTENANCE OF POLES AND ATTACHMENTS

- 7.01 Owner shall maintain its jointly used poles in a safe and serviceable condition in accordance with Owner's standards and in accordance with the specifications referred to in Article 3, and shall replace, reinforce or repair poles as they become defective.
- 7.02 When replacing a jointly used pole carrying terminals of aerial cable, underground connections, or other special equipment, the new pole shall be set in a manner which will minimize the transfer cost of both parties. Should special conditions warrant setting the new pole in the old pole hole, written notice on the standard Proposal form shall be provided to the Owner prior to construction.
- 7.03 Whenever it is necessary to replace or relocate a jointly used pole, Owner shall,

before making the change, give notice thereof in a Proposal (except in cases of emergency, when oral notice may be given and subsequently confirmed in writing) to Licensee, specifying in such notice the time of such proposed replacement or relocation. After Owner has completed its work it shall notify Licensee by Proposal or Transfer Notice, if available, and Licensee shall transfer its attachments to the new or relocated pole. Unless otherwise mutually agreed upon by the parties, the party to this Agreement last transferring its attachments shall remove and retain or dispose of the old pole within ninety (90) days of the Transfer Notice and shall be responsible for any liability, injury, damage, expense, or claim to persons, including disease or death, which is in any way attributable to the removal and disposal of the old pole. If Licensee is the party so removing the existing pole it will be reimbursed for the cost of removing the existing pole, including its disposition, by the original Owner of the pole. If Owner must return to pull the old pole because of failure of Licensee to remove the old pole in a timely manner, Licensee shall compensate Owner for pulling the pole. However, if Licensee is unable to transfer their facilities and remove the old pole due to a third party not transferring its facilities within 10 days of the Transfer Notice, the Licensee will not be liable for the additional costs associated with removal of the old pole. In this instance the Licensee will be responsible for removing the old pole and authorized to bill the Owner for the cost of removing the old pole and any return trips. The Owner will then bill the third party accordingly.

- 7.04 Each party shall maintain all of its attachments on jointly used poles in accordance with the specifications referred to in Article 3 and the terms of this Agreement and shall keep them clear of trees, in safe condition and in thorough repair in accordance with each party's standards.
- 7.05 The Telephone Company, when operating either as Owner or Licensee, without any charge other than normal joint use rental, may install electrical bonding from communication cables or equipment to Electric Company's pole grounds on jointly used poles in accordance with Article 3.
- 7.06 The Licensee may replace Owner's pole during emergency conditions when Owner is not able to replace such pole in a timely manner. In this event, the Owner shall pay the Licensee's costs in accordance with Article 8.04.

ARTICLE 8

8 DIVISION OF COSTS

- 8.01 The Total Cost of new jointly used poles under this Agreement, either in new pole lines, in extension of existing pole lines, to replace existing poles, or to add an additional pole in an existing line, shall be borne by the parties as follows:

a. General

The Total Cost of a pole sufficient to provide the NORMAL SPACE ALLOCATION for Owner's requirements shall be borne by Owner except as provided in b., c. and d. herein.

b. Existing Pole

- (1) Where a pole must be replaced due to Owner's requirements, the Total Cost of the pole shall be borne by Owner. Each party shall transfer its facilities at its own expense.
- (2) Where a pole is replaced by Owner at the request of Licensee solely to accommodate attachments of Licensee, Licensee shall pay to Owner a sum equal to the Total Cost of the new pole.
- (3) Where a pole must be replaced due to Owner's requirements and the extra height and/or strength is required to accommodate Licensee's attachments, Licensee shall pay to Owner a sum equal to the difference between the Total Cost of a new pole required to accommodate Licensee's attachments and the Total Cost of a pole adequate to accommodate the attachments of Owner and its other licensees.
- (4) Where a new pole is installed to replace an existing damaged or deteriorated jointly used pole hereunder, and the extra height and/or strength of the new pole is required or requested by Licensee, Licensee shall pay Owner a sum equal to the difference between the Total Cost of a new pole adequate to accommodate Licensee's attachments and the Total Cost of a pole adequate to accommodate attachments of Owner and its other licensees.
- (5) Where a pole must be replaced as a result of an additional attachment of a third party or the modification of a third party's existing attachment, absent any other arrangements, the Owner shall replace the pole but may be entitled to full reimbursement from the third party for costs associated with pole replacement and costs related to transfer of its facilities. Licensee shall transfer its facilities to the new pole but may also be entitled to full reimbursement from the third party for costs related to transfer of its facilities. Owner shall provide Licensee with the name, address and other relevant contact information of the third party causing such pole replacement and shall cooperate with Licensee to facilitate Licensee to bill the third party for Licensee's transfer expenses.

c. New (Additional Pole)

Nothing herein contained shall be construed to preclude the use of poles less than the basic pole (40 foot, Class 5 wood pole) provided that such poles provide the necessary space for the attachments of both parties and comply with the specifications referred to. A basic pole, or a pole shorter and/or weaker than the basic pole, shall be installed at the sole expense of the Owner only when a new (additional pole) is required.

- (1) Where Owner requires a new pole and neither party requires any extra height and/or strength above the basic pole to accommodate its facilities, the Owner will install a basic pole and the cost of installing the pole shall be borne by Owner.
- (2) Where Owner requires a new pole and Licensee requires extra height and/or strength above the basic pole to accommodate its attachments, Licensee shall pay a sum equal to the difference between the Total Cost of a new pole adequate to accommodate Licensee's attachments and the Total Cost of a basic pole, and the balance of the cost of installing such pole shall be borne by the Owner.
- (3) Where one party requires a pole, but desires to have the other party set the pole and the other party agrees, the party that requires the pole shall pay a sum equal to the Total Cost of the new pole less any cost for extra height and/or strength above a basic pole (required by the other party) to the party setting the pole, and shall become the Owner.

- d. In the case of a pole taller or stronger than a pole suitable for joint use, the extra height and/or strength of which is due to the requirements of public authorities (other than requirements with regard to keeping the wires of either party clear of trees), Licensee shall pay to Owner a sum equal to one-half the difference between the Total Cost of such pole and the Total Cost of a pole considered by Owner to be adequate to accommodate the attachments of Owner and its other licensees, unless the Owner is reimbursed by the public authority requesting replacement.
- e. The cost of excess height and/or strength provided for the attachments of third parties, except as provided in Article 8.01 d., shall be billed to and reimbursed by the third party according to the agreement between the Owner and the third party, provided that in no event shall Licensee be responsible for said cost.
- f. Any such new pole shall be the property of Owner regardless of any payments by Licensee toward the cost of such new pole, and Licensee shall acquire no right, title or interest in and to such pole.

- g. Each party shall place, maintain, rearrange, transfer and remove its own attachments at its own expense, except as otherwise expressly provided elsewhere in this Agreement.
- 8.02 Cost of Pole Replacement and Transfer of Attachments. Except as otherwise herein expressly provided, in situations requiring either (a) the replacement of a joint pole in kind, i.e., the same height and class, or (b) where replacement pole must be taller or stronger due to Owner's requirements, the costs of replacement of the pole shall be borne by the Owner, and the costs of transferring shall be borne by each party for its own facilities.
- 8.03 Assistance Required. If Owner cannot physically install a new pole or replace a pole for Joint Use as required in Article 4.02 without the assistance of the Licensee, then Owner shall reimburse Licensee the Total Cost incurred in rendering the required assistance.
- 8.04 Emergency Conditions. Where Licensee must replace Owner's pole under emergency conditions, Owner shall pay Licensee a sum equal to the Total Cost, plus 25%, incurred in replacing the pole, and, if Licensee removes the old pole, the cost of removal plus 25%. Title to the new pole will remain with the Owner. Licensee will transfer its own facilities at no cost to Owner.
- 8.05 Cost of Rearrangements on Existing Poles. Whenever joint use is requested by the Licensee on an existing pole, and space can be provided by rearrangement of the Owner's attachments, the Total Cost of such rearrangements shall be borne by the Licensee.
- 8.06 Sharing of Space. Each party may, upon request of the other party, share with such other party any assigned or reserved space not presently being used, so long as the requirements of Article 3 are satisfied. Upon written notice from the sharing party that any such shared space is required for such party's operations, the party to whom the space was originally loaned shall, within sixty (60) days, relocate or rearrange its facilities. The Total Cost of any work necessary to provide the sharing party with its normal space allocation shall be the responsibility of the party to whom the space was originally loaned.
- 8.07 Anchors. All anchors and guys, with the exception of jointly used anchors as provided in Article 8.08 below, shall be placed by and at the expense of the party whose attachments make such work necessary. Such anchors and guys shall remain the sole property of the party placing them and shall not be considered a part of the supporting structure.

8.08 Jointly Used Anchors. Normally each company will place separate anchors; however, when it is advantageous to both companies, an anchor rod suitable for joint attachment shall be placed by the Owner of the pole with the Total Cost of the anchor to be shared equally by the parties. If the anchor is inadequate for the combined requirements of both parties, then the Licensee shall place the additional anchorage required.

ARTICLE 9

9 PROCEDURE WHEN CHARACTER OF CIRCUITS IS CHANGED

9.01 When either party desires to change the character of its circuits on jointly used poles, such party shall give ninety (90) days' written notice to the other party of such contemplated change.

The parties shall then cooperate in determining (1) the conditions under which joint use may be continued on a mutually satisfactory basis, or (2) if in the judgment of both parties continued joint use is not feasible, the most practical and economical method of providing for separate lines. In the latter event, the party whose circuits are to be removed from the jointly used poles shall promptly carry out the necessary work.

The cost of establishing such circuits in the new location shall be borne by each party under the provisions of this paragraph. In the event one party owns all the poles, the Licensee shall relocate its facilities at no expense to the Owner. If the parties agree that it is more practical for the Licensee to remain on the existing centerline (pole line) and Owner's facilities should be relocated, Licensee shall reimburse Owner for the cost of relocation based upon the reestablishment of similar facilities. In the event neither party is the Owner of all the poles involved, the cost of reestablishing equivalent facilities in a new location shall be divided between the parties in proportion to the percent ownership of the existing poles. Where ownership is divided, the party owning a majority of the poles shall have the right to remain on an existing centerline unless it is mutually agreed otherwise. The cost of relocation shall be divided according to ownership with the party who retains the centerline paying a portion of the relocating party's cost equal to the percent of poles involved which are owned by the relocating party. For example, if one party owns 60% of the poles and the second party owns 40%, the second party would relocate and receive payment equal to 40% of its cost from the first party. Where the ownership of the poles involved is equal, the parties shall decide which facilities are more practical to relocate, and the relocating party will be reimbursed 50% of its relocation costs. If the party owning less than 50% of the poles prefers to remain on the existing centerline and the other party is agreeable, the entire cost of the relocating party's expense shall be paid by the party retaining its facilities on the existing centerline.

9.02 Attachments may be permitted on subtransmission and transmission poles of the Electric Company only after obtaining written authorization with the understanding that, should the characteristics of the Electric Company facilities (circuits) change resulting in either the Electric Company or the Telephone Company deciding joint use is no longer feasible, the Telephone Company shall remove its facilities with no cost or obligation to the Electric Company.

ARTICLE 10

10 TERMINATION OF JOINT USE

10.01 If Owner desires at any time to abandon any jointly used pole, it shall give Licensee notice in writing to that effect at least sixty (60) days prior to the date on which it intends to remove its attachments from such pole. If, at the expiration of said period, Owner shall have no attachments on such pole but Licensee shall not have removed all of its attachments therefrom, such pole shall thereupon become the property of Licensee, and Owner shall transfer title to said pole and Licensee shall accept title to said pole in the manner provided for under Article 11. Licensee shall indemnify, protect and hold harmless the Owner from all obligations, liabilities, damages, costs, expenses or charges incurred after the expiration of the sixty (60) day period, and not arising out of anything theretofore occurring, because of or arising out of, the presence or condition of such pole or of any attachment thereon; and shall pay Owner a sum as described in Article 11.02.

10.02 Licensee may at any time abandon the use of a jointly used pole by giving due notice thereof in writing to Owner, and by removing therefrom any and all attachments it may have thereon.

ARTICLE 11

11 TRANSFERS OF OWNERSHIP

11.01 Any time it is determined that either party owns more than its appropriate percentage of jointly used poles as stated in Article 12.03, the party whose ownership is deficient shall have the option to purchase poles, the location and number of which shall be arrived at by mutual agreement. If one party purchases poles from the other party, the price to be paid shall be determined as described in Article 11.02. Each party shall obtain, at its expense, the approval of any governmental agency having jurisdiction over such party's part of the transaction, including the approval of the Securities and Exchange Commission under the Public Utility Holding Company Act. The parties shall share equally in the cost of any regulatory filing fees excluding any legal fees.

- 11.02 When ownership of poles is to be transferred, a mutually approved Proposal in accordance with the Owner's standard selling policy shall be prepared to cover such transfer. Payments for such poles by the Licensee will be made at the time of purchase. The price of such poles shall be the original Owner's current Total Cost to place a like pole at the time of sale depreciated at the rate of 3% per year, but not less than 25% of the current Total Cost to place a like pole.
- 11.03 Unless otherwise specified in this Agreement, a formal Bill of Sale will be required for the transfer of ownership of all poles. The transferring party shall also obtain any necessary mortgage releases if the poles to be transferred are subject to any mortgages, and shall submit such releases to the other party.

ARTICLE 12

12 RENTALS

- 12.01 For purposes of this Agreement, a Rental Year shall be a calendar year from January 1 to the succeeding December 31. Any space occupied or reserved by Licensee during any portion of any such Rental Year shall be deemed to have been so occupied or reserved during the entire year.
- 12.02 Licensee shall pay rent annually to Owner for those poles on which space is occupied or reserved by Licensee and for which rent is payable, in an amount per pole as provided in this Article 12.

12.03 Each party's Objective Ownership shall be:

| | |
|-------------------|-------|
| Electric Company | = 60% |
| Telephone Company | = 40% |

- 12.04 a. Each party shall submit to the other, on or before each March 31, a determination of the number of poles subject to this Agreement on which space was occupied or reserved by such other party as of the preceding December 31. Each such determination shall be deemed correct unless written exception is taken within thirty (30) days of receipt. If any such exception cannot be otherwise resolved, a joint inspection of the poles in dispute and records pertaining thereto shall be made. If the parties are not able to resolve any such exceptions by the next billing date, the number originally proposed shall be used until such resolution is accomplished, at which time a retroactive adjustment shall be made if necessary.
- b. Annual rental payment for each pole occupied shall be set for the first three (3) rental years of this Agreement as follows:

January 1, 2004 – December 31, 2004 \$ [REDACTED] per pole

January 1, 2005 – December 31, 2005 \$ [REDACTED] per pole

January 1, 2006 – December 31, 2006 \$ [REDACTED] per pole

Following the initial three (3) year schedule, as detailed above, the annual rental shall be adjusted for each subsequent rental year in proportion to the change in the CPI-U during the previous calendar year (as of December 31), rounding the rental rate to the nearest cent.

- 12.05 The bills for the annual rental shall be rendered each year on or about June 1 and shall contain the total rental due for the current Rental Year. All such bills shall be paid within sixty (60) days of receipt.
- 12.06 In order to make the transition between this Agreement and any prior agreement, it is agreed that an inventory will be necessary to determine a new base line total of contacts. Until an inventory is completed and concurred to, the latest agreed inventory totals will be used.

ARTICLE 13

13 UNAUTHORIZED USE: JOINT FIELD CHECKS

- 13.01 If unauthorized occupancy of poles is found, a Proposal shall be prepared to establish a record of this occupancy on the next annual billing. The party responsible for unauthorized occupancy shall owe the Owner the rental for the entire period dating back to the last joint field check including interest of 8% compounded annually. The back rentals shall be based on the rate specified in Article 12.04(b).

If the only attachment on a pole is unused hardware it shall not be considered a rental attachment; however, provisions will be made to have such hardware promptly removed. If not removed within thirty (30) days after formal notification, the current annual rental will apply, including interest of 8% compounded annually.

- 13.02 The parties shall participate in a joint field check at their own expense no less often than every five (5) years, unless an extension is mutually agreed by the parties. Should one party elect not to participate, that party shall pay one-half (1/2) the cost of the field check performed by the other party. The non-participating party has sixty (60) days in which to verify the findings, after which the results of the inventory will become final.

ARTICLE 14

14 LIABILITY AND DAMAGES

14.01 Whenever any liabilities, losses, costs, expenses, suits, actions, claims and all other obligations and proceedings whatsoever, including all judgments rendered against, fines or penalties are incurred by either or both of the parties hereto, or their respective employees, agents, contractors or subcontractors, including without limitation, injuries to persons, including disease or death, or damage to property, arising out of the joint use of poles under this Agreement, including the location of said poles, the liability for such damages, as between the parties hereto, shall be as follows:

- a. Each party shall be liable for all damages for such injuries to persons or property caused by its sole negligence or by the sole negligence of its contractors or subcontractors or by its sole failure to comply at any time with the specifications referred to in Article 3 or solely by its contractor's or subcontractor's sole failure to comply at any time with the specifications referred to in Article 3, and will indemnify, protect and hold harmless the other party in any such instance.
- b. Each party shall be liable for one-half (1/2) of all damages for such injuries to persons and for one-half (1/2) of all damages for such injuries to property that are caused by the concurrent negligence of both parties hereto, the concurrent negligence of both parties respective contractors/subcontractors, the concurrent negligence of a party and the other party's contractor/subcontractor, or that are due to causes which cannot be traced to the sole negligence of either party, and each party will indemnify, protect and hold harmless the other party for such liability in any such instance.
- c. All claims for damages arising hereunder that are asserted against or affect both parties hereto shall be dealt with by the parties hereto jointly; provided, however, that in any case under the provisions of paragraph b. of this Article and where the claimant desires to settle such claim upon terms acceptable to one of the parties hereto but not to the other, the party to which said terms are acceptable may, at its election, pay to the other party one-half (1/2) of the amount which such settlement would involve as a one-time non-refundable payment, and thereupon said other party shall be bound to protect the party making such payment from all further liability and expense on account of such claim, regardless of the final disposition of such claim.
- d. In the adjustment between the parties hereto of any claim for damages arising hereunder, the liability assumed hereunder by the parties shall include, in addition to the amounts paid to the claimant, all expenses incurred by the parties in connection therewith, which shall include costs, attorneys' fees, disbursements and other proper charges and expenditures.

- e. It is further understood and agreed between the parties hereto that at all times during the term of this Agreement and particularly during the time of any construction, repair or new attachments to poles covered by this Agreement, the parties shall consider the electric wires of the Electric Company to be energized, that working in the vicinity of the wires poses potential dangers and that the Telephone Company shall warn all of its employees, agents, contractors and subcontractors, or any other parties who may be working on behalf of the undersigned, of the potential dangers.
- f. The parties hereto agree to require their contractors and subcontractors to provide a release and indemnification of all claims for the benefit of the other joint user in the form attached hereto as Exhibit A. If one of the parties hereto fails to obtain the appropriate release and indemnification from its contractor/subcontractor, such party agrees to provide the same release and indemnification to the other party to this Agreement.
- g. In the event that one of the parties hereto is providing storm, emergency, or safety-related services for the benefit of the other party hereto and the party providing the service incurs any liability as referenced in this Article 14, the party receiving the service shall be responsible for any and all such liability.
- h. It is further agreed between the parties hereto, that to the extent any of the provisions of this Article 14 should be determined to be contrary to law or held to be invalid by any court of competent jurisdiction, this Article shall be construed and applied as if such invalid provisions were not contained herein, attempting at all times to conform, to the extent possible, to the intent of the parties as herein stated, and provide the maximum indemnity allowed by law. With respect to claims against one party by the other party's employees, the latter party agrees to expressly waive its immunity, if any, as a complying employer under the workers' compensation law but only to the extent that such immunity would bar or affect recovery under or enforcement of the indemnification obligations set forth in this Article. With respect to the State of Ohio, this waiver applies to Section 35, Article II of the Ohio Constitution and Ohio Revised Code Section 4123.74.

ARTICLE 15

15 INSURANCE

15.01 Each party performing work for the other party under this Agreement, shall take out and maintain throughout the term of this Agreement the following minimum Insurance:

- a. Worker's compensation insurance as statutorily required.

- b. Public liability and property damage liability insurance covering all operations under this Agreement for bodily injury or death not less than \$2,000,000 combined single limit covering bodily injury, death or property damage.
- c. Automobile liability insurance on all self-propelled vehicles used in connection with this Agreement whether owned, non-owned, or hired with public liability limits of not less than \$2,000,000 combined single limit covering bodily injury, death or property damage.

15.02 The policies of insurance shall be in such form and issued by such insurance carriers as are rated "A" or better. Each party shall furnish to the other party, within thirty (30) days of the execution of this Agreement, a certificate of insurance evidencing the party's compliance with the foregoing insurance requirements and stating the following:

- a. The coverage required whether claims made or occurrence and the limits on each, including the amount of deductibles or self-insured retentions.
- b. A statement that naming the other party as an insured or an additional insured (except for worker's compensation) on all policies.
- c. Specific cancellation language, as follows: "in the event of cancellation or modification of any said policies, the insuring company shall give the party to whom this certificate is issued thirty (30) days prior notice of such cancellation or modifications of any of the policies which may affect the other party's interests."

15.03 Each party may elect to self-insure in lieu of obtaining any of the insurance coverages required by this section if that party's net worth exceeds \$250,000,000. If either party self-insures, that party shall furnish to the other party, and keep current, evidence of such net worth. If either party self-insures, that party shall save and hold harmless and shall indemnify and defend the other party against all losses, costs (including reasonable attorney's fees), damages, and liabilities resulting from claims that would have otherwise been covered by the foregoing insurance requirements (including without limitation claims alleging negligence or breach of contract).

ARTICLE 16

16 DEFAULTS

- 16.01 If either party shall be in substantial default in any of its obligations under this Agreement and such default continues thirty (30) days after notice thereof in writing by the other party, the party not in default may suspend the granting of any further joint use. If such default shall continue for a period of ninety (90) days after such suspension, the party not in default may forthwith terminate this Agreement as far as it concerns the further granting of joint use, and shall be under no further obligation to permit additions to, changes in, or upgrades to attachments of the defaulting party upon poles in joint use on the date of such termination.
- 16.02 If either party shall default in the performance of any work which it is obligated to do under this Agreement, the other party may, with a thirty (30) day advance written notice to the defaulting party, elect to do such work (for example, rearranging the defaulting party's attachments, including pole replacement, to result in attachments conforming to Article 3.01. Where pole replacement is required, the new pole shall be the property of the party performing the work unless the defaulting party wishes to retain ownership by paying the Total Cost of the new pole.), and the party in default shall reimburse the other party for the Total Cost thereof. Failure on the part of the defaulting party to make such payment within sixty (60) days after presentation of bills therefor shall, at the election of the other party, constitute a default under Article 16.01.
- 16.03 The defaulting party shall repay to the non-defaulting party, upon demand, any actual costs and expenses incurred by the non-defaulting party in successfully enforcing this Agreement.
- 16.04 All rights and remedies of the non-defaulting party set forth in this Agreement shall be cumulative and none shall exclude any other right or remedy, now or hereafter allowed by or available under any statute, ordinance, rule or court, or the common law, either at law or in equity, or both.

ARTICLE 17

17 ATTACHMENTS OF OTHER PARTIES

- 17.01 Nothing herein contained shall be construed as prohibiting the granting by Owner to others, not parties to this Agreement, by contract or otherwise, rights or privileges to use any poles covered by this Agreement. The attachments of any such outside party shall be treated as attachments belonging to the Owner, who shall have the entire right to any payments from such party.
- 17.02 Attachments of other parties shall at all times be in conformity with Article 3.

17.03 If space is shared by the Owner or Licensee with a third party in order to minimize such third party's costs, the sharing party retains its right to use the shared portion of its space. If Owner or Licensee thereafter requires the full use of its space, it is the duty of the Owner to provide that all costs of making that space available shall be borne by the third party.

17.04 If there is insufficient space on a joint use pole to accommodate a third party, the third party shall be required to reimburse Owner and Licensee for all costs incurred by them in making such space available.

ARTICLE 18

18 WAIVER OF TERMS OR CONDITIONS

18.01 The failure of either party to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, and the same shall be and remain at all times in full force and effect.

ARTICLE 19

19 PAYMENT OF TAXES

19.01 Each party shall pay all taxes and assessments levied on its own property upon said jointly used poles, and the taxes and the assessments which are levied on said jointly used poles shall be paid by the Owner.

ARTICLE 20

20 BILLS AND PAYMENT FOR WORK

20.01 Upon the completion of work performed hereunder by either party, the expense of which is to be borne wholly or in part by the other party, the party performing the work shall include the expense on the next quarterly billing summary if used or present to the other party within sixty (60) days after the completion of such work a statement of the costs in accordance with the provisions of this Agreement and such other party shall within sixty (60) days after such statement is presented, pay to the party doing the work such other party's portion of the cost of said work or submit in writing a reasonable dispute.

ARTICLE 21

21 EXISTING AGREEMENTS

21.01 All existing agreements, written or oral, between the parties hereto for the joint use of poles within the territory covered by this Agreement are by mutual consent hereby terminated, and poles covered by such agreements are brought under this Agreement as of the effective date hereof, but such termination shall not extinguish any obligation arising prior to the effective date of this Agreement.

ARTICLE 22

22 TERM OF AGREEMENT

22.01 Subject to the provisions of Article 16 Defaults, herein, this Agreement may be terminated by either party after the first day of January upon one (1) year's notice in writing to the other party. If not so terminated, it shall continue in force until terminated by either party at any time upon one (1) year's notice in writing to the other party as aforesaid. Despite any termination under this Article, this Agreement shall remain in full force and effect with respect to all poles jointly used by the parties at the time of such termination until a new Agreement is entered into by the parties. Following such termination until a new Agreement is entered into between the parties, neither party shall be under an obligation to permit additions to or changes in attachments of the other on poles in joint use on the date of such termination. This Agreement and the rates, terms and conditions hereunder shall not be modified except upon the parties' mutual agreement in writing executed by a duly authorized representative of both parties.

ARTICLE 23

23 OPERATING ROUTINE

23.01 An Operating Routine shall be jointly prepared by the parties hereto, and shall be approved respectively by the one designated person responsible to administer joint use for the Telephone Company and the Electric Company. This routine shall be based on this Joint Use Agreement and shall give the detailed methods and procedures which will be followed in establishing, maintaining and discontinuing the joint use of poles. In case of any ambiguity or conflict between the provisions of this Agreement and those of the Operating Routine, the provisions of this Agreement shall be controlling. This Operating Routine may be changed at any time upon the mutual approval of the designated persons responsible to administer joint use for the Telephone Company and the Electric Company, provided such changes do not conflict with the terms of this Joint Use Agreement.

ARTICLE 24

24 MISCELLANEOUS

- 24.01 Force Majeure. Neither party shall be considered in default in the performance of its obligations herein, or any of them, to the extent that performance is delayed or prevented due to the following causes which are beyond the control of said party: Acts of God or the public enemy, war, revolution, terrorism, civil commotion, blockade or embargo, fires, explosions, cyclones, floods, unavoidable casualties, quarantine, and restrictions.
- 24.02 Modifications of Agreement. No amendments or modifications to this Agreement and no waiver of any of its provisions or conditions shall be valid unless in writing and signed by duly authorized representatives of the parties.
- 24.03 Invalidity. If any provision of this Agreement shall for any reason be held to be invalid, illegal or unenforceable under any laws, rules or regulations of any governmental body or agency having jurisdiction thereof, any such invalidity, illegality or unenforceability shall not affect any other provisions of this Agreement, and this Agreement shall be construed as if such invalid, illegal or unenforceable provision had never been incorporated herein.
- 24.04 Execution. The Agreement may be executed in two (2) counterparts, each of which so executed shall be deemed to be an original.
- 24.05 Headings. Headings used in this Agreement are inserted only for the convenience of the parties and shall not affect the interpretation or construction of this Agreement.
- 24.06 Electronic Communications. For the purpose of this Agreement, when notification or notice is specified to be given in writing to the other party in this Agreement, electronic communications may be used in place of paper forms if it is mutually agreed to by the parties and reflected as such in the Operating Routine.
- 24.07 Applicable Law. This contract shall be governed by and interpreted under the laws of the Commonwealth of Kentucky.

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be executed as of the day and year first above written.

RELEASE AND INDEMNIFICATION OF ALL CLAIMS

In consideration of Kentucky ALLTEL, Inc. ("Telephone Co.") granting and providing Kentucky Power Company ("Electric Co.") and its contractors and subcontractors with access and/or permission to work on or in the vicinity of Telephone Co.'s facilities under the terms of that certain Joint Use Agreement between Telephone Co. and Electric Co. effective December 1, 2004, the undersigned, its employees, subcontractors or agents, agrees to release, indemnify, save harmless, and defend Telephone Co., or any of their affiliated or subsidiary companies, directors, officers, employees and agents (collectively Indemnities) from and against any losses, liabilities, costs, expenses, suits, actions, claims and all other obligations and proceedings whatsoever, including without limitation, all judgments rendered against and all fines and penalties imposed upon Indemnities, and any reasonable attorney fees and any other costs of litigation (hereafter referred to as liabilities) arising out of injuries to persons including, disease or death or damage to property, caused by the undersigned, its employees, agents, subcontractors or any other parties whether connected to the undersigned or not, which are in any way attributable to the performance and prosecution of any work under the Joint Use Agreement. This release and indemnification shall specifically cover, but not be limited to, any liabilities arising out of any injury or damage due to working in the vicinity of or contacting Telephone Co.'s telephone lines and facilities.

The undersigned agrees to expressly waive the undersigned's immunity as a complying employer under the workers' compensation law of the jurisdictional state from indemnification. With respect to the contractors based in the State of Ohio, this waiver applies to Section 35, Article II of the Ohio Constitution and Ohio Revised Code 4123.74. The undersigned shall also hold Indemnities harmless from any workers' compensation claims by the undersigned's employees, agents, and contractors in accordance with the indemnity set forth in the first paragraph.

The undersigned hereby acknowledges that he has been warned that working in the vicinity of Telephone Co.'s facilities poses potential dangers and that the undersigned is aware of said dangers and will furthermore warn all employees, agents, subcontractors, or any other parties who may be working on behalf of the undersigned, of the potential dangers.

I have fully read this release and understand and consent to it in its entirety.

A G R E E M E N T

This agreement, entered into this _____ day of _____, 19____, by and between the Berea College, a corporation organized under the laws of the State of Kentucky with its principal office at the City of Berea, State of Kentucky (hereinafter referred to as Berea College), and the General Telephone Company of Kentucky, a corporation organized under the laws of the State of Delaware, with its principal office at the City of Lexington, State of Kentucky (hereinafter called the Telephone Company).

PREAMBLE

Whereas, the Berea College and the Telephone Company have heretofore cooperated in the joint use of their respective poles and said parties now desire to continue said cooperation as to poles erected or to be erected within the areas in which both parties render services in and near Berea, Kentucky, whenever and wherever such use shall, in the estimation of both parties, be compatible with their respective needs, and

Whereas, it is now the desire of both the Berea College and the Telephone Company to enter into a contract between themselves and their respective successors and assigns as follows:

ARTICLE I

SCOPE OF AGREEMENT

- (a) This agreement shall be in effect in the areas in which both of the parties render service in and near Berea, Kentucky and shall cover all wood poles of the parties now existing or hereafter erected when said poles are brought under this agreement in accordance with the procedure hereinafter provided.

- (b) Each party reserves the right to exclude any of its facilities from joint use.

ARTICLE II
EXPLANATION OF TERMS

For the purpose of this agreement, the following terms, when used herein, shall have the following meaning:

- (a) Joint Use Pole - means a pole which is just tall enough to provide normal space, as normal space is hereinafter defined, for the respective parties, and just strong enough to meet the requirements of the National Electrical Safety Code, fifth edition and subsequent revisions thereof, hereinafter called the NESC.
- (b) Standard Space - means the following described space for the exclusive use of each party, respectively, except that certain attachments of one party may, in accordance with the specifications referred to in Article VI, be located in space reserved for the other party:
1. For Berea College the uppermost five (5) feet, eight feet when transformer required, and for the Telephone Company a space of two feet, at such distance below the space of the Berea College as to provide at all times the minimum clearances required by the specifications referred to in Article VI; and to provide space reserved for Berea College as indicated in Exhibits 1 through 10.

By mutual agreement either party may occupy a portion of the space provided for the use of the other party on an existing or newly erected pole but which is not fully needed for the purpose of such

other party at the time, provided that the specifications referred to in Article VI are fully complied with. In case, however, the party for whom such space is provided desires at any time to make full use of its space, and it becomes necessary thereby to replace the pole, the replacement shall be deemed to be necessary because of the requirements of the party whose attachments encroach upon the space provided for the other party. If it is practicable to eliminate the encroachment without replacing the pole but by rearranging the attachments of the encroaching party, such party shall do so.

ARTICLE III

PLACING, TRANSFERRING, OR REARRANGING ATTACHMENTS

- (a) Whenever either party desires to reserve space on any pole of the other party for any attachments requiring space thereon not then specifically reserved hereunder for its use, it shall make written application to the Owner therefor, specifying in such notice the location of the pole in question, the kind of attachments which it desires to place thereon, the amount of space desired, the character of such circuits to be used (Exhibit 11). Within ten (10) days after the receipt of such notice, Owner shall notify the Applicant, in writing, whether or not it is willing to permit the joint use of its pole and if so under what conditions. Upon receipt of notice from Owner the permission for joint use is granted, and after the completion of any transferring or rearranging which is then required with respect to attachments on said poles, including any necessary pole replacements as provided in Article IV (a) hereof, the

Applicant shall have the right as licensee hereunder to use said space for attachments and under the conditions specified in said permit in accordance with the terms of this agreement.

- (b) Except as herein otherwise expressly provided, each party shall place, maintain, transfer, and remove its own attachments and do any tree trimming or cutting incidental thereto, and shall place such guys as are necessary to sustain the unbalanced strain of its own attachments at its own expense, and at all times perform such work promptly and in such a manner as not to interfere with the service of the other party.

ARTICLE IV

ERECTING, REPLACING, OR RELOCATING POLES

- (a) Whenever any jointly used pole, or any pole about to be used under the provisions of the agreement, is insufficient in size or strength for the existing attachments and for the proposed immediate additional attachments thereon, the Owner shall promptly replace such pole with a new pole of the necessary size and strength, and make such other changes in the existing pole line, in which such pole is included, as may be made necessary by the replacement of such pole and/or the placing of the Licensee's circuits as proposed.
- (b) Whenever it is necessary to change the location of a jointly used pole by reason of any state, municipal, or other governmental requirement, or the requirement of the property owner, the Owner shall, before making such change in location, give notice thereof in writing (except in cases of emergency when verbal notice will be given, and subsequently confirmed in writing) to the Licensee, specifying in such notice the time

of such proposed relocation, and the Licensee shall at the time so specified, transfer its attachments to the pole at the new location.

- (c) Whenever, either party hereto is about to erect new poles within the territory covered by this agreement, either as an additional pole line, as an extension of an existing pole line, or as the reconstruction of an existing pole line, it shall notify the other in writing, at least ten (10) days before beginning the work (shorter notice, including verbal notice subsequently confirmed in writing, may be given in case of emergency). The other party shall, within five (5) days after receipt of such notice, reply in writing, to the party erecting the poles, stating whether such other party does, or does not, desire space on said poles, and if it does desire space thereon, the character of the circuits it desires to use and the amount of space it wishes to reserve. This notice of desire to establish joint use should include detail plans of any changes in the plans of the other party which are desired in order to permit the establishment of joint use. If such party requests space on the new poles, and if the character and number of circuits and attachments are such that the Owner does not wish to exclude the poles from joint use under the provisions of Article II, the poles suitable for the said joint use shall be erected in accordance with the provisions of this Article.
- (d) In any case where a pole is erected hereunder to replace another pole solely because such other pole is not tall enough, or of the required

strength to provide adequately for the licensee's requirements, or where such pole, whether it carry space reserved for the licensee's use or not, had at the time of its erection, been pronounced by the licensee as satisfactory and adequate for its requirements, the licensee shall, upon erection of the new pole, pay to the Owner, a sum equal to the sacrificed life of the pole which is replaced and the entire cost of change over of lines and equipment (the value in place of the pole replaced plus cost of removal less salvage), and the pole removed shall remain the property of the Owner.

- (e) When replacing a jointly used pole carrying aerial cable terminals, underground connections or transformer equipment, the new pole shall be set in the same hole which the replaced pole occupied or as mutually agreed upon, unless special conditions or municipal requirements make it necessary or mutually desirable to set it in a different location. The new pole shall be set vertical and true.
- (f) Any payments made by the licensee under the foregoing provisions of this Article for poles taller than normal shall not in any way affect the ownership of said poles.

ARTICLE V

MAINTENANCE OF POLES AND ATTACHMENTS

- (a) The Owner shall, at its own expense, maintain its joint poles in a safe and serviceable condition, and in accordance with Article VI of this agreement and the requirements of the NESC.
- (b) Each party, at its own expense, at all times shall maintain all of its attachments in accordance with Article VI of this agreement and the NESC and keep them in safe condition and in thorough repair.

- (c) Each party shall be responsible for any damage to facilities of the other party caused by negligence of his own employees or agents, and shall bear the full cost of necessary remedies for such damage.
- (d) Any existing joint use construction of the parties hereto which does not conform to the specifications referred to in Article VI, shall be brought into conformity therewith and the plan for an order of carrying on the work shall be as mutually agreed upon by the parties hereto. In case of reconstruction of the attachments on any joint use pole or in case of replacement of any joint use pole, the pole and any attachments thereon shall be made to conform to such specifications.

When such existing joint use construction shall have been brought into conformity with the specifications referred to in Article VI, it shall at all times thereafter be maintained as provided in Section (a) of this Article.

ARTICLE VI SPECIFICATIONS

- (a) Except as otherwise provided in Section (d) of Article V, the joint use of the poles covered by this agreement shall at all times be in conformity with the terms and provisions of the National Electric Safety Code, Fifth Edition and subsequent revisions thereof, except that such requirements of statutes, ordinances, and rulings of state or local authorities of the territory covered by this agreement, as are in excess of the requirements referred to above, shall govern the joint use under this agreement and are hereby made a part hereof.

In any case where pole steps are to be placed on a jointly used pole after the date of this agreement, no permanent step on such pole shall be located less than seven (7) feet above the ground or other readily accessible place. In the case of any poles previously stepped, not in accordance with these specifications and so located that either of the parties hereto deems it advisable to modify the method of stepping, such party may notify the other party to that effect and if mutually agreed to the stepping shall be changed so that no permanent step on such pole shall be located less than seven (7) feet above the ground or other readily accessible place.

- (b) These specifications may be amended from time to time as made necessary by developments and improvements in the art and as may be mutually agreed upon and approved in writing by representatives designated by the parties hereto.

ARTICLE VII

RIGHT OF WAY FOR LICENSEE'S ATTACHMENTS

Owner shall not be required to secure any right, license, or permit from any governmental body, authority or other person, for the attachments of the licensee, and owner does not guarantee any easements, rights of way, or franchise for the construction and maintenance of said attachments, and if objection is made thereto and licensee is unable to satisfactorily adjust the matter within a reasonable time, owner may at any time, upon notice in writing to the licensee, require licensee to remove its attachments from the poles involved, and licensee shall, within ninety (90) days after receipt of such notice, remove its attachments from such poles at its sole expense. Should licensee fail to remove its attachments as herein provided, owner may remove

them at licensee's expense without any liability whatever for such removal or the manner of making it, for which expense licensee shall reimburse owner on demand.

ARTICLE VIII

ABANDONMENT OF JOINTLY USED POLES

- (a) Licensee may at any time abandon the use of a jointly used pole by removing therefrom any and all attachments it may have thereon and by giving due notice of the completion of such removal in writing to owner.
- (b) When a request or order for the removal of overhead construction on jointly used poles is received by either or both of the parties hereto, they shall immediately notify the other party and the two parties agree to confer on plans for carrying out the request or order in a mutually satisfactory manner.
- (c) Whenever a jointly used pole (poles) will be replaced by underground cable in accordance with revised municipal regulations, Owner and Licensee shall relocate their own poles, cables, transformers, and appurtenances at their own expense.

ARTICLE IX

RENTAL PAYMENTS

- (a) On or about December 1st of each year, each party, acting in cooperation with the other, shall have ascertained and tabulated the total number of poles in use by each party as licensee for which rental payment shall be made to the other party as owner.
- (b) Each party shall pay to the other party an annual rental of [REDACTED] per rental unit per year. The payment of any such rental shall be for the calendar year in which the tabulation is made under paragraph (a) of this Article, and any payment of rental, as a result of the tabulation in December shall be for the full calendar year.

ARTICLE X

PERIODICAL REVISION OF RENTALS

- (a) At any time after January 1, 1972 and no longer than every five years, this agreement shall be subject to joint review and revision, as provided for under Section (b) of this Article, upon written request of either party.
- (b) Revisions of the rental payments shall be based on experience resulting from previous administration of this agreement. Any revisions shall take into account the original cost factors pertinent to the establishing of the pole line facilities involved in all joint use existing under this agreement at the time of the said review.

ARTICLE XI

DEFAULTS AND ARBITRATION

- (a) If either party shall default in any of its obligations under this agreement and such default continues thirty (30) days after receipt of notice thereof in writing from the other party, the party not in default may suspend the rights of the party in default insofar as concerns the granting of future joint use, and if such default shall continue for a period of ninety (90) days after such suspension, the party not in default may forthwith terminate this agreement as far as concerns future granting of joint use.
- (b) In the event of a disagreement upon the interpretation of the terms or conditions of the agreement, or the rights and obligations of the parties hereunder which the parties cannot or will not resolve through negotiations, the parties agree to submit the controversy to arbitration and to accept the decision of the arbitrators. For such purposes, each party hereto will appoint one arbitrator and the two arbitrators so named will choose a third arbitrator. In the event of the refusal or failure of either party to name an arbitrator within thirty (30) days after being requested in writing to do so or the inability of the two appointed arbitrators to agree on selection of a third arbitrator, any court of general jurisdiction in the common territory of the parties hereto may be requested to appoint an arbitrator or arbitrators and may so appoint one or more. Until such arbitration is concluded, the rights and obligations of the parties hereunder shall continue unabated. Both parties hereto agree to abide by the findings of said arbitrators except upon the grounds that the final decision of the arbitrators was capricious and arbitrary.

ARTICLE XII

LIABILITY AND DAMAGES

The Telephone Company has liability insurance with the American Motorist Insurance Company under policy number 5ZM552400. A certificate of insurance listing coverages was transmitted to the Berea College's Business Vice President on March 6, 1968. Berea College has liability insurance with the Insurance Company of North America under policy number LB25030.

Whenever any liability is incurred by either or both of the parties hereto for damages for injuries to the employees or for injury to the property of either party, or for injuries to other persons, or their property, arising out of the joint use of poles under this agreement, which joint use is understood to include the wire and fixtures of the parties hereto, installed between and attached to the jointly used poles covered by this agreement, the liability for such damages, as between the parties hereto, shall be as follows:

1. Each party shall satisfy any liability it may have for all damages for such injuries to persons other than employees of either party or property not belonging to either party caused solely by its negligence or solely by its failure to comply at any time with the specifications referred to in Article VI.
2. Each party shall indemnify and save harmless the other party for all damages for such injuries to its own employees or its own property whether the same shall have been caused by the negligence of the other party, or of its officers, agents, or employees, or otherwise.

3. (a) Each party shall be liable for one-half of all damages for such injuries to persons other than employees of either party that are caused by the concurrent negligence of both parties hereto or that are due to causes which cannot be traced to the sole negligence of the other party.
- (b) Each party shall be liable for one-half of all damages for such injuries to property not belonging to either party that are caused by the concurrent negligence of both parties hereto or that are due to causes which cannot be traced to the sole negligence of the other party.
4. All claims for damages arising under the preceding paragraphs numbered 1 and 3 that are asserted against or affect both parties hereto shall be dealt with by the parties hereto jointly; provided, however, that in case of any such claim which the parties hereto mutually agree comes under the provisions of paragraph 3 of this Article and where the claimant desires to settle such claim upon terms acceptable to one of the parties hereto but not to the other, the party to which said terms are acceptable may, at its election, pay to the other party one-half of the expense which such settlement would involve, and thereupon said other party shall be bound to protect the party making such payment from all further liability and expense on account of such claim.
5. In the adjustment between the parties hereto of any claim for damages arising hereunder, the liability assumed hereunder by the parties shall include, in addition to the amounts paid the claimant, all expenses incurred by the parties in connection therewith, which shall comprise costs, disbursements and other proper charges and expenditures but shall not include attorneys' fees.

ARTICLE XIII

ATTACHMENTS OF OTHER PARTIES

If either of the parties hereto has, prior to the execution of this agreement, conferred upon others not parties to this agreement, rights or privileges to use any poles covered by this agreement, nothing herein contained shall be construed as affecting said rights or privileges, and either party hereto shall have the right to continue and extend such existing rights and privileges. Owner of any joint poles covered by this agreement shall have the right to confer upon others, not parties to this agreement, rights or privileges to use such poles as may be owned by such grantor. Licensee may, with written permission of owner, confer upon another party, not a party to this agreement, rights or privileges to use a portion of its space on any of the joint poles covered by this agreement for the purpose of attaching circuits or other attachments of the same general character as those of licensee. It is expressly understood, however, for the purpose of this agreement, the attachments of any such outside party, except attachments of a municipal signal system as hereinafter provided, shall be treated as attachments belonging to the grantor, and the rights, obligations, and liabilities hereunder of the grantor in respect to such attachments shall be the same as if it were the actual owner thereof. Provided, however, that where municipal regulations or franchises require either party to allow the use of its poles for fire alarm, street lights, police, or other like signal system such use shall be permitted, but attachments of a municipal signal system made under such regulations or franchises shall not be treated as belonging to either party hereto.

ARTICLE XIV

SERVICE OF NOTICES

Whenever, in this agreement, notice is provided to be given by either party hereto to the other, such notice shall be given to the Berea College at its office in Berea, Kentucky or to the Telephone Company at its office in Lexington, Kentucky as the case may be or to such other address as either party may, from time to time, designate in writing for that purpose.

ARTICLE XV

TERM OF AGREEMENT

Subject to the provisions of Article XI herein, this agreement may be terminated, so far as it concerns further granting of joint use by either party, after the first day of January, 1972 upon one year's notice in writing to the other party, provided that if not so terminated it shall continue in force thereafter until terminated by either party at any time upon one year's notice in writing to the other party as aforesaid, and provided further that notwithstanding such termination, this agreement shall remain in full force and effect with respect to all poles jointly used by the parties at the time of such termination.

ARTICLE XVI

ASSIGNMENT OF RIGHTS

Except as otherwise provided in this agreement, either party hereto may assign or otherwise transfer this agreement or any of its rights or interests hereunder, or in any of the jointly used poles, or the attachments or rights of way covered by this agreement, to any firm, corporation, or individual, with the written notification to the other party, provided however, that

nothing herein contained shall prevent or limit the right of either party to mortgage any or all of its property, rights, privileges, and franchises, or lease or transfer any of them to another corporation organized for the purpose of conducting a business of the same general character as that of such party, or to enter into any merger or consolidation; and, in case of the foreclosure of such mortgage; or in case of such lease, transfer, merger, or consolidation, its rights and obligations hereunder shall pass to, and be required and assumed by purchaser on foreclosure, the transferee, lessee, assignee, or a company resulting from a merger or consolidation, as the case may be. Provided, however, that no transfer, lease or assignment of a portion only of the space of either party hereto on any jointly used pole or poles shall be made except as provided in Article XIII. Berea College reserves the right to refuse to do business with the Company assignee for good cause shown.

ARTICLE XVII

WAIVER OF TERMS OR CONDITIONS

The failure of either party to enforce or insist upon compliance with any of the terms or conditions of this agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

ARTICLE XVIII

EXISTING AGREEMENTS

All existing agreements, written or oral, between the parties hereto for the joint use of poles within the territory where both parties hereto now, or in the future, have the right to operate are by mutual consent hereby terminated.

Nothing in the foregoing shall preclude the parties to this agreement from preparing such supplemental operating routines or working practices as they mutually agree to be necessary or desirable to effectively administer the provisions of this agreement.

ARTICLE XIX

PAYMENT FOR ACCOMMODATION WORK

In case one party hereto is obligated hereunder to perform certain work at its own expense and it is mutually agreed between the parties hereto that it is desirable for the other party to do the said work, then the said other party shall promptly do the work at the sole expense of the party originally obligated to perform the same. Bills for the expense incurred shall be due and payable within sixty (60) days after presentation.

IN WITNESS WHEREOF, the parties hereto have caused these presents to be duly executed by their respective officers or agents thereunto duly authorized, as of the day and year first above written. Done in quadruplicate, each part being an original.

GENERAL AGREEMENT

FOR

JOINT USE OF WOOD POLES

Preamble

The City of Olive Hill, a Municipal Corporation organized under the laws of the State of Kentucky, (hereinafter called the "Power Company"), and the ^{General Tel. Co. of Ky.} Kentucky-Telephone-Corporation, a corporation organized under the Laws of the State of Delaware, (hereinafter called the "Telephone Company"), desiring to cooperate in the joint use of their respective poles, erected or to be erected within the areas in which both parties render service in the State of Kentucky, whenever and wherever such use shall, in the estimation of both parties, be compatible with their respective needs, do hereby in consideration of the premises and the mutual covenants herein contained, covenant and agree for themselves and their respective successors and assigns as follows:

Article I

Scope of Agreement

(a) This Agreement shall be in effect in the areas in which both of the parties render service, and shall cover all wood poles of the parties now existing or hereafter erected in the above territory when said poles are brought under this Agreement in accordance with the procedure hereinafter provided.

(b) Whenever either party hereto is about to erect new poles within the territory covered by this agreement it shall notify the other party, in writing, at least thirty (30) days before the beginning of such work. The other party shall within ten (10) days, reply in writing stating whether such other party does or does not desire space on the new poles and if space is desired, the amount of space to be reserved and the character of the circuits which it proposes to place.

(c) No use of the poles covered by this Agreement however extended, shall be taken as creating or vesting in the licensee any ownership or property in the poles of the licensor.

Article II

Specifications

(a) Attachments shall at all times be in conformity with accepted modern methods such as those suggested in Edison Electric Institute Publication No. M12 and shall at all times conform to the requirements of the National Electrical Safety Code, Fifth Edition, and subsequent revisions thereof, except where the lawful requirements of public authorities may be more stringent, in which case the latter will govern.

(b) A NORMAL JOINT POLE is a pole which is a Class Six or better pole and which is tall enough to provide at all times the minimum clearance required by the specifications of each party including a sufficient height above ground to provide the proper vertical clearance above ground or track rails for the lowest horizontally run line wires or cables attached in such space.

Article III

Cost and Maintenance of Poles and Attachments

(a) The owner shall maintain its joint poles in a safe and serviceable condition and in accordance with the Specifications mentioned in Article II and shall replace, reinforce and repair such of these poles as become defective.

(b) When replacing a jointly used pole carrying terminals of aerial cable, underground connection, or transformer equipment, the new pole shall be set in the same hole which the replaced pole occupied unless special conditions make it necessary or mutually desirable to set it in a different location.

(c) Whenever it is necessary to replace or relocate a jointly used pole, the owner shall, before making such replacement or relocation, give notice thereof in writing (except in case of

emergency, when verbal notice will be given and subsequently confirmed in writing) to the licensee, specifying in such notice the time of such proposed replacement or relocation and the licensee shall at the time so specified transfer its attachments to the new or relocated joint pole.

(d) Except as otherwise provided in this Article, each party shall at all times at its own expense attach, transfer, or remove where required, and maintain all of its own attachments, and perform any necessary tree trimming or cutting incidental thereto, in accordance with the specifications mentioned in Article II and shall keep them in safe condition and in thorough repair. Nothing in the foregoing shall preclude the parties hereto from making any mutually agreeable arrangement for jointly contracting for or otherwise providing for maintenance trimming.

(e) Joint poles of sufficient size and quality to meet the requirements contained in Article II hereof shall be erected by licensor. Licensee shall reimburse licensor for the plant loss (which shall mean depreciated value plus cost of removal less salvage value) on all poles replaced by licensor to meet such requirements together with any extra construction charges for erecting joint poles in excess of the cost of erecting normal joint poles if and to the extent that said extra construction charges are due to the requirements of licensee.

(f) Each party shall place, transfer and rearrange its own attachments, place guys to sustain any unbalanced loads caused by its attachments, and perform any tree trimming or cutting incidental thereto. Each party shall at all times execute such work promptly and in such manner as not to interfere with the service of the other party.

Article IV

Right-of-Way for Licensee's Attachments

While the owner and licensee will cooperate as far as may be practicable in obtaining rights-of-way for both parties on

joint poles, the owner does not warrant or assure to the Licensee any right-of-way privileges or easements on, over or across privately owned property, and if the licensee shall at any time be prevented from placing or maintaining its attachments on the owner's poles, no liability on account thereof shall attach to the owner of the poles. The parties will agree on a form for joint right-of-ways.

Article V

Licenses's Right to Abandon

The Licensee may at any time abandon the use of a joint pole by giving due notice thereof in writing to the owner and by removing therefrom any and all attachments it may have thereon. The licensee shall in such case pay to the owner the full rental for said pole for the then current year.

Article VI

Licenser's Right to Abandon

The licenser may abandon or remove any jointly used pole at any time upon written notice to the licensee. The licensee shall, within sixty days after such notice, either purchase the pole from the licenser or remove its attachments therefrom, and the failure of the licensee to remove its attachments within said sixty days shall be deemed an election to purchase the pole at a price not to exceed the then value of a pole necessary to meet the licensee's requirements.

Article VII

Default

If the licensee shall make default in any of its obligations under this contract, and such default continues for thirty days after written notice thereof from the licenser, all rights of the licensee hereunder, including its right to occupy said poles, shall be suspended until such default has been remedied.

Article VIII

Rentals

In consideration of the right to attach and maintain at its sole expense attachments on the poles of the licensor, the licensee promises and agrees to pay the licensor annually on the 1st day of November the yearly rental(s) for the use of poles under the terms of this Agreement.

These rentals shall be based upon the licensee's occupation of the licensor's poles as of November 1, of such year, at the following rates:

- A. For attachments of facilities owned by the Telephone Company to poles owned by the Power Company, \$ [REDACTED] per pole.
- B. For attachments of facilities owned by the Power Company to poles owned by the Telephone Company, \$ [REDACTED] per pole.
- C. There will be no charge for clearance attachments for the use of any pole of the Owner where such use consists only in attaching guys thereto, or in attaching thereto wires or cables of the Licensee for the purpose of providing clearance between the pole and such wires or cables, and not for the purpose of supporting the said wires or cables.

Article IX

Assignment

Licensee shall not sub-let any of the privileges described in this Agreement without the written consent of the licensor.

Article X

Existing Contracts

All existing Agreements between the parties hereto for the joint use of poles are by mutual consent hereby revoked and superseded by this Agreement.

Nothing in the foregoing shall preclude the parties to this Agreement from preparing such supplemental operating routines desirable to effectively administer the provisions of this Agreement; and each party will, from time to time, notify the other

in writing which of its employees or representatives is authorized to administer this Contract in routine operations.

In witness whereof, the parties hereto, have caused these presents to be executed in triplicate, and their corporate seals to be affixed hereto by their respective officers thereunto duly authorized on the 13 day of April, 1957.

TELEPHONE SYSTEMS

AMENDMENT TO ARTICLE VIII OF GENERAL AGREEMENT

FOR JOINT USE OF WOOD POLES IN RURAL AREAS

The Electrical Distributor and the Telephone Company agree that the following amendment shall be a part of the Agreement between the parties dated April 3, 1952.

Replace Paragraph A and B in Article VIII with the following:

"Adjust payments per pole due from one party as licensee to the other party or owner shall, subject to the provisions of Article VIII, be \$10.30 per annum by the Electrical Distributor for each jointly used pole owned by the Telephone Company and \$10.30 per annum by the Telephone Company for each jointly used pole owned by the Electrical Distributor."

Executed on the 14th day of Jan. 1997.

**POLE ATTACHMENT AGREEMENT
MARCH 2007**

**CLARK ENERGY COOPERATIVE, INC.
WINCHESTER, KY**

AND

**WINDSTREAM KENTUCKY-EAST, INC.
HUDSON, OH**

INTRODUCTION

An Agreement for pole attachments dated March 1, 2007 is established between Clark Energy Cooperative, Inc., P.O. 748, 2640 Iron Works Road, Winchester, KY 43092-0748, hereinafter referred to as the "Cooperative", and Windstream Kentucky-East, Inc., 50 Executive Parkway, Hudson, OH 44236, hereinafter referred to as the "Telephone Company".

APPLICABILITY

This Agreement is applicable to all Cooperative and Telephone Company pole attachments on all plant owned by the other party, i.e. the Cooperative or the Telephone Company.

TERM OF AGREEMENT

- A. This Agreement shall become effective as of the aforementioned date herein stated and shall remain as such for a period of five (5) years.
- B. At the expiration of the five (5) year term, this Agreement shall continue in force until the Cooperative and/or the Telephone Company provides the other party one (1) year written notice of their intent to terminate this Agreement.
- C. This Agreement supersedes and voids all previous agreements, supplemental operating routines, and contracts between the Cooperative and the Telephone Company.

RIGHTS OF OTHER PARTIES

- A. The Cooperative and the Telephone Company shall possess the right to confer upon others not a party to this Agreement, rights or privileges to attach to any of their respective plant. Nothing contained herein shall be construed as affecting enforceable rights or privileges with respect to existing or future attachments of such outside parties.
- B. Any pole attachment rights or privileges conferred to others not a party to this Agreement prescribed in item (A) above of the Rights of Other Parties provisions shall not be located in the space allocation of the Cooperative or the Telephone Company unless the Cooperative and the Telephone Company concur with the space allocation encroachment of said party. Concurrence with the space encroachment of said party shall in no way waive the Cooperative's or the Telephone Company's right to occupy its allocated space in the future.
- C. The Cooperative and the Telephone Company shall derive all revenue accruing from the attachments of outside parties on their respective plant.

ANNUAL ATTACHMENT FEES

- A. Annual attachment fees or rental charges for all Telephone Company attachments on the Cooperative's plant shall be [REDACTED] per attachment beginning January 1, 2007.
- B. Annual attachment fees or rental charges for all Cooperative attachments on the Telephone Company's plant shall be [REDACTED] per attachment beginning January 1, 2007.

- C. Annual attachment fees or rental charges prescribed in items (A) and (B) above of the Annual Attachment Fees provisions shall escalate by a percentage amount compounded per annum beginning January 1, 2008. The percentage amount herein shall be based on the Consumer Price Index, hereinafter referred to as the "CPI" for the preceding calendar year or by a percentage amount mutually agreed to by the Cooperative and the Telephone Company. The CPI shall be obtained from the U.S. Department of Labor, Bureau of Labor Statistics web page.
- D. The Cooperative shall invoice the Telephone Company each January, beginning in January 2008, annual attachment fees for the total number of Telephone Company attachments existing at the end of the preceding calendar year. Annual attachment fees for Telephone Company attachments shall be the total number of Telephone Company attachments on the Cooperative's plant multiplied by the appropriate rate as prescribed in items (A) and (C) above of the Annual Attachment Fees provisions minus the total number of Cooperative attachments on the Telephone Company's plant multiplied by the appropriate rate as prescribed in items (B) and (C) above of the Annual Attachment Fees provisions.
- E. The Cooperative and the Telephone Company shall reconcile the invoice for annual attachment fees prescribed in items (A) through (D) above of the Annual Attachment Fees provisions by reconciling the number of attachments within each party's records.
- F. Annual attachment fees, rental charges, and methodology for annual escalation as prescribed in items (A) through (C) above of the Annual Attachment Fees provisions is subject to review and revision at any time as may be mutually agreed to by the Cooperative and the Telephone Company.

DESIGN SPECIFICATIONS

- A. The Cooperative and the Telephone Company reserves the right to maintain, operate, upgrade, replace, relocate, retire and/or abandon any part of their respective plant at their discretion and expense at any time without compensation to the other party.
- B. All attachments of the Cooperative and the Telephone Company on the plant of the other party shall at all times conform to requirements of the National Electric Safety Code (NESC), 2002 Edition, and subsequent revisions thereof, except where the requirements of the Rural Utilities Service (RUS), public authorities, the Cooperative, or the Telephone Company may be more stringent, in which case the latter will govern.
- C. Existing Cooperative and Telephone Company attachments on the plant of the other party constructed and/or erected under an earlier version of the NESC than that specified in item (B) above of the Design Specifications provisions shall be deemed satisfactory and adequate. Any modifications and/or changes in Cooperative or Telephone Company attachments on the plant of the other party prescribed in the Establishing Attachments, Operations and Maintenance of Attachments, and/or the Required Plant Changes of this Agreement shall conform to item (B) above of the Design Specifications provisions.
- D. The Cooperative and the Telephone Company may review the adequacy of their respective plant to withstand additional vertical and transverse loads imposed by the other party's attachments using NESC design criteria.

E. Standard space allocations for attachments of the Cooperative and the Telephone Company on poles jointly used by both parties is defined in the table below:

| Pole Size | Cooperative | Telephone Company |
|-----------------|-------------|-------------------|
| 35 Foot Poles | 4 Feet | 2 Feet |
| 40 Foot Poles | 8 Feet | 2 Feet |
| 45 Foot Poles | 8 Feet | 2 Feet |
| > 45 Foot Poles | 17 Feet | 2 Feet |

All Cooperative spacing is measured from the top of the pole. All Telephone Company spacing begins forty (40) inches below the Cooperative's attachments, equipment, and/or appurtenances or twelve (12) inches below cable television (CATV) attachments, whichever is more stringent.

The Cooperative and the Telephone Company shall correct and/or relocate at their expense any encroachment of their attachments, appurtenances, and/or facilities into the space allocation of the other party as prescribed within the above table.

- F. The Cooperative and the Telephone Company may require additional standard space allocations without incurring additional annual attachment fees for vertical or pole riser attachments such as, but not limited to, ground wires, gang operated switch control rods, and underground cable risers provided that use of said additional space is permitted by item (B) above of the Design Specifications provisions, and said additional space does not unreasonably interfere with the operations and maintenance activities of the other party.
- G. Additional standard space allocations prescribed in item (F) above of the Design Specifications provisions that do not conform with item (B) above of the Design Specifications provisions shall be governed or administered per the Required Plant Changes provisions of this Agreement.
- H. The Cooperative and the Telephone Company reserves the right to prohibit the use of their respective poles and/or anchors by the other party where the strength and/or condition of poles and/or anchors cannot be verified.
- I. Service life estimates may be a factor when the Cooperative or the Telephone Company performs any work on their respective plant prescribed in items (A) through (H) above of the Design Specifications provisions or other pertinent provisions of this Agreement. Service life estimates may similarly affect any portion of the cost to perform any work by the Cooperative or the Telephone Company at the request and obligation of the other party as prescribed in the Design Specifications, Establishing Attachments, Required Plant Changes, or other pertinent provisions of this Agreement. The Cooperative and the Telephone Company, in such cases, may mutually agree for either party to proceed with any work prescribed herein at the request of the other party and waive any or all costs normally payable by the other party because of service life estimates of their respective plant.

EASEMENTS AND RIGHT-OF-WAYS

- A. The Cooperative and the Telephone Company shall be responsible for obtaining all easements or right-of-ways for their respective plant and facilities. The Cooperative and the Telephone Company do not warrant and/or assign any easements or right-of-ways to the other party.
- B. The Cooperative and the Telephone Company shall promptly remove any of their respective attachments when any public authority or landowner forbids the use of the other party's plant.
- C. The Cooperative and the Telephone Company shall not refund to the other party any annual attachment fees or other charges resulting from any forbidden use prescribed in item (B) above of the Easement and Right-of-Way provisions.

ESTABLISHING ATTACHMENTS

- A. The Cooperative and the Telephone Company shall comply with all mutually agreeable attachment application procedures consistent with all provisions of this Agreement prior to installation of all new or proposed attachments on the plant of the other party.
- B. The Cooperative and the Telephone Company shall provide the other party with detailed construction plans, prints and/or drawings in a mutually agreeable format of all new or proposed pole attachments prior to their construction or installation on plant of the other party. Said plans, prints and/or drawings shall include any maps necessary to illustrate the location of Cooperative and/or Telephone Company poles plus the number and character of the proposed attachments. Any anticipated adjustments, additions, relocations and/or replacements of the Cooperative's and/or Telephone Company's facilities will be noted within said plans, prints, maps and/or drawings.
- C. The Cooperative and the Telephone Company may perform any make-ready or walk-through inspections necessary to review the other party's plans, prints, maps and/or drawings and provide a cost estimate of all anticipated plant changes required for the other party's proposed attachments. Cost estimates for all anticipated plant changes prepared by the Cooperative and the Telephone Company shall include overhead and material salvage costs. Alternately, the Cooperative and Telephone Company may mutually agree to perform any anticipated plant changes on their respective plant and waive any costs as prescribed in item (I) of the Design Specifications provisions of this Agreement.
- D. The Cooperative or the Telephone Company shall approve or disapprove the attachment application, in whole or in part, and notify the other party submitting the application within a reasonable amount of time. Notification provided by the Cooperative or the Telephone Company to the other party shall be in writing by U.S. mail, facsimile, e-mail, and/or voice-mail or phone.
- E. The Cooperative or the Telephone Company shall proceed with all necessary plant changes prescribed by items (A) through (D) above of the Establishing Attachments provisions upon receipt of a written acceptance from the other party. Alternately, the Cooperative or the Telephone Company may proceed with necessary plant changes without cost estimates and invoice the other party all actual as-built costs provided such arrangements are mutually agreeable.

- F. The Cooperative or the Telephone Company may install its attachments on the other party's plant after items (A) through (E) above of the Establishing Attachments provisions and all other pertinent provisions of this Agreement are satisfied. All Cooperative and Telephone Company attachments shall be installed at the expense of said party and not interfere with the activities or service of the other party.
- G. The Cooperative and the Telephone Company shall not adjust, modify, replace, remove, and/or relocate any plant of the other party during the construction or installation of said party's attachments.
- H. The Cooperative and the Telephone Company shall provide any clearing of existing right-of-ways and/or trimming necessary to install that party's own attachments at their own expense. All right-of-way clearing debris shall be disposed of by the Cooperative and the Telephone Company in a manner agreeable to landowners and in no case create inconvenient access to each party's plant.
- I. The Cooperative and the Telephone Company shall consider working towards a division of attachments such that no annual attachment fees are paid as prescribed within this Agreement. The parties shall mutually agree on a variety of considerations before the Telephone Company may install, operate and maintain poles needed by both parties and progress towards equitable annual attachment costs. Considerations may include, but not be limited to time or work constraints, costs, design or maintenance issues, avoiding mixed ownership areas, or pertinent provisions of this Agreement.
- J. Any remedial changes required of the Cooperative's or the Telephone Company's plant resulting from the installation and/or modification of attachments as prescribed herein shall be governed and administered per the Required Plant Changes provisions of this Agreement.

OPERATIONS AND MAINTENANCE OF ATTACHMENTS

- A. The Cooperative and the Telephone Company shall have the right to operate and maintain their attachments on the other party's plant after satisfying the Establishing Attachments provisions and all other pertinent provisions of this Agreement.
- B. The Cooperative and the Telephone Company shall provide any clearing of existing right-of-ways and/or trimming incidental to the operations and maintenance of their attachments on the other party's plant. The Cooperative and the Telephone Company shall dispose of all clearing debris in a manner agreeable to land-owners and in no case create inconvenient access to each party's plant.
- C. The Cooperative and the Telephone Company shall not adjust, modify, relocate and/or remove any plant of the other party except as prescribed within the provisions of this Agreement.
- D. Any Cooperative or Telephone Company attachments determined by the other party not to be operated and/or maintained as prescribed by the Design Specifications provisions and all other pertinent provisions of this Agreement shall be brought into conformity by said party at its expense.
- E. Any Cooperative or Telephone Company attachments on the other party's plant requiring remedial changes or corrections as prescribed by item (D) above of the Operations and Maintenance of Attachments provisions shall be governed or administered per the Required Plant Changes provisions of this Agreement.

REQUIRED PLANT CHANGES

- A. The Cooperative or the Telephone Company shall notify the other party of plant changes involving the other party's attachments as prescribed within the Design Specifications, Operations and Maintenance of Attachments, or any other pertinent provisions of this Agreement. The Cooperative or the Telephone Company shall adjust, replace, relocate and/or remove existing attachments on the other party's plant after being notified by said party within sixty (60) days or other mutually agreeable time. Notification provided by the Cooperative or Telephone Company to the other party shall be in writing, by traditional mail, electronic mail, facsimile, and/or voice-mail or telephone.
- B. The Cooperative and the Telephone Company shall incur the cost to adjust, replace, relocate and/or remove any of their attachments on the plant of the other party as prescribed within item (A) above of the Required Plant Changes provisions.
- C. The Cooperative and the Telephone Company agree that the Cooperative may forego prior notification and replace poles of the Telephone Company because of accidents, storm damage, service restoration work, and/or other unforeseen conditions or circumstances. The Cooperative shall perform all said work so as to make feasible the transfer of the Telephone Company's facilities to the new pole. In such cases, only pole replacement work order costs of the Cooperative shall be invoiced the Telephone Company. The Cooperative and the Telephone Company shall be responsible for transferring their respective attachments and/or appurtenances to the new pole at their expense.
- D. The Cooperative and the Telephone Company shall not be required to reimburse the costs of any required plant changes of the other party if said changes are required to correct known deficiencies and/or to conform with the Design Specifications provisions or other pertinent provisions of this Agreement.
- E. The Cooperative and the Telephone Company reserves the right to retire and/or remove any part of their respective plant at its discretion and expense at any time without compensation to the other party. Attachments of the other party shall similarly be retired and/or removed unless the Cooperative and the Telephone Company mutually agree that said plant may be abandoned solely for the continued use of the other party to operate and maintain its pole attachments. In such cases, the Cooperative or the Telephone Company shall invoice the estimated depreciated cost and transfer ownership of said plant to the other party.
- F. The Cooperative and the Telephone Company agree that the Cooperative shall avoid transferring attachments of the Telephone Company except in cases of emergency, securing and/or remedying a potential or known safety hazard to the public or other circumstances where immediate action by the Cooperative may be required. The Telephone Company shall otherwise transfer all its pole attachments and/or appurtenances to any new pole provided by the Cooperative as prescribed in the Required Plant Changes or other pertinent provisions of this Agreement.

ATTACHMENT INVENTORY

- A. A joint field inventory of the Cooperative's and the Telephone Company's attachments on the plant of the other party shall be conducted by each party's employees, duly authorized agents, contractors, or representatives beginning the first year of this Agreement and continuing thereafter at intervals not exceeding five (5) years from the date of this Agreement.
- B. The Cooperative and the Telephone Company shall mutually agree on any difference in the number of attachments identified by the field inventory and the number of attachments on record preceding the field inventory. The Cooperative and the Telephone Company shall reconcile the most recent annual attachment fee or rental charge payment by billing or refunding the Telephone Company for the difference in the number of attachments identified by the field inventory. Invoices or refunds prepared to reconcile the most recent annual attachment fee payment shall be consistent with the Annual Attachment Fees and Attachment Inventory provisions of this Agreement.
- C. All unauthorized and/or unreported attachments of the Cooperative or the Telephone Company on the other party's plant will be invoiced the Cooperative and/or the Telephone Company at the average of the annual attachment rates prescribed in the Annual Attachment Fees provisions of this Agreement in effect each year since the previous field inventory. Installation of all unauthorized and/or unreported attachments of the Cooperative or the Telephone Company will be averaged over the period since the previous field inventory, assuming that installation of said attachments occurred uniformly on an annual basis. The subtotal amount invoiced the Cooperative and/or the Telephone Company for unauthorized and/or unreported attachments for each year since the previous field inventory shall be the average annual attachment rate as prescribed herein multiplied by the number of said attachments assumed to have been installed the same year. The total amount invoiced the Cooperative and/or the Telephone Company for all unauthorized and/or unreported attachments since the previous field inventory shall be sum of each annual subtotal as prescribed herein.
- D. All uncompleted Telephone Company transfers of its attachments and/or appurtenances to poles of the Cooperative as prescribed in the Required Plant Changes or other pertinent provisions of this Agreement will be invoiced the Telephone Company using the same methodology prescribed in item (C) above of the Attachment Inventory provisions. An exception to said methodology is that two (2) times the attachment rates prescribed in item (C) above of the Attachment Inventory provisions shall be used to invoice the Telephone Company.
- E. The Cooperative and the Telephone Company acknowledge that a small number of transfers the Telephone Company is obligated to perform as prescribed within any provisions of this Agreement may be part of its uncompleted work-in-progress when any field inventory is conducted. The Cooperative and the Telephone Company agree that only uncompleted transfers numbering in excess of one (1) percent of the number of Telephone Company attachments on the Cooperative's plant shall be applicable for invoicing as prescribed in the Attachment Inventory provisions of this Agreement.

- F. The Cooperative and the Telephone Company acknowledge the initial field inventory conducted during the first year of this Agreement shall identify where plant changes are required of the other party's attachments as prescribed within the Design Specifications, Operations and Maintenance of Attachments or other pertinent provisions of this Agreement. The parties agree that said plant changes shall be administered as prescribed within the Required Plant Changes provisions of this Agreement except for the sixty (60) day time period normally required for said changes to be completed. The Cooperative and the Telephone Company agree to waive this sixty (60) day time period only to complete required plant changes identified during the initial field inventory, but agree to complete all required plant changes before the next scheduled field inventory as prescribed in item (A) above of the Attachment Inventory provisions. The parties shall otherwise complete required plant changes identified during each subsequent field inventory within sixty (60) days or other mutually agreeable time as prescribed within the Required Plant Changes and Attachment Inventory provisions of this Agreement.
- G. All over-reported attachments of the Cooperative and/or the Telephone Company on the other party's plant shall be refunded the Cooperative and/or the Telephone Company using the same methodology prescribed in item (C) above of the Attachment Inventory provisions.
- H. The Cooperative and the Telephone Company shall incur all costs associated with their respective employees, duly authorized agents, contractors, and/or representatives to conduct a field inventory. The Cooperative and the Telephone Company shall not incur any expenses or costs associated with the other party's obligation to participate in a field inventory as prescribed herein.
- I. The Cooperative or the Telephone Company may submit a written notification to the other party of its decision not to participate in a joint field inventory as prescribed in item (A) above of the Attachment Inventory provisions. The Cooperative or the Telephone Company may accept the other party's notification not to participate in a joint field inventory provided the other party's written notification includes its acceptance of all field inventory results obtained by the Cooperative or the Telephone Company.

LIABILITY

- A. The Cooperative and the Telephone Company, to the fullest extent permitted by law, agree to indemnify and hold harmless the other party from any claims, damages, losses, expenses, and legal fees arising out of or resulting from the establishment, operation, or maintenance of attachments on the other party's plant, or any negligent acts or omissions under this Agreement. The laws of the Commonwealth of Kentucky shall govern any interpretations regarding this Agreement or any activities arising hereunder.
- B. The Cooperative or the Telephone Company shall not incur any liability for any damages or costs should the other party be prevented at any time from establishing or maintaining its attachments as prescribed in the Easements and Right-of-Ways provisions of this Agreement.
- C. Inspections by the Cooperative or the Telephone Company of the other party's attachments as prescribed in the Establishing Attachments provisions and other pertinent provisions of this Agreement, made or not, shall not operate to relieve the other party of any responsibility,

obligation and/or liability assumed under this Agreement.

- D. Failure by the Cooperative or the Telephone Company to fulfill their respective requirements to the other party as prescribed within the Establishing Attachments, Required Plant Changes, Attachment Inventory or other pertinent provisions of this Agreement shall not operate to relieve the other party of any responsibility, obligation and/or liability assumed under this Agreement.
- E. The Cooperative or the Telephone Company shall hold harmless the former owner of any plant conveyed to the other party as prescribed in item (E) of the Required Plant Changes provisions of this Agreement. Specifically, the Cooperative or the Telephone Company shall hold harmless the former owner of said plant from all obligations, liabilities, damages, costs, expenses, charges, and/or legal fees incurred thereafter because of or arising out of the presence, location, and/or condition of any such plant or attachments thereon, whether or not it is alleged that the former owner of said plant was negligent or otherwise.

FRANCHISE RIGHTS

Nothing contained in this Agreement shall abrogate, limit, and/or affect any obligation of any franchise issued by the appropriate governmental authority and/or regulatory body to the Cooperative and/or the Telephone Company.

PAYMENT OF TAXES

The Cooperative and the Telephone Company shall pay all taxes, fees and other assessments lawfully levied on their respective plant. Any taxes, fees or assessments levied on the Cooperative's or the Telephone Company's plant solely because of the other party's use of said plant for attachments shall be reimbursed by the other party to the Cooperative or the Telephone Company.

PAYMENT OF FEES AND CHARGES

- A. Payments by the Cooperative or the Telephone Company to the other party for any invoice of expenses, costs or fees as prescribed in any provisions of this Agreement shall not entitle the Cooperative or the Telephone Company to ownership of any of the other party's plant to which the Cooperative or the Telephone Company has contributed in whole or in part.
- B. All fees and charges invoiced by the Cooperative or the Telephone Company to the other party are net and payable within thirty (30) days from the date of the bill or invoice. An amount equal to five percent (5%) of the past-due amount shall be added to all invoices, bills and/or accounts, exclusive of any special charges, taxes, or other assessments, in a past-due condition.
- C. The Cooperative or the Telephone Company may agree to extend the time for the other party to remit all fees and charges as prescribed in item (B) above of the Payment of Fees and Charges provisions. Extensions of time shall only be granted in circumstances where the amount of the fees and charges are in dispute among the parties. The Cooperative or the Telephone Company shall not unreasonably withhold permission for an extension of time to resolve any billing dispute when requested by the other party.

CONDITIONS OF DEFAULT

- A. The Cooperative and/or the Telephone Company shall be in default of this Agreement should either party fail to fulfill any of their obligations and responsibilities with respect to any of the provisions of this Agreement.

- B. The Cooperative or the Telephone Company may suspend and terminate the rights of the other party with respect to any of the provisions of this Agreement should the other party continue to remain in default thirty (30) days after due notice thereof in writing by the Cooperative or the Telephone Company.

- C. Suspension and termination of the rights of either party by the Cooperative or the Telephone Company as prescribed within item (B) above of the Conditions of Default provisions shall only prohibit said party from establishing new or proposed attachments on the plant of the Cooperative or the Telephone Company.

- D. Suspension and termination of the rights of either party by the Cooperative or the Telephone Company as prescribed within item (B) above of the Conditions of Default provisions shall not abrogate or terminate the right of either party to maintain existing attachments on the Cooperative's or the Telephone Company's plant. Said party may continue to operate and maintain existing attachments on the Cooperative's or the Telephone Company's plant except as prescribed within this Agreement. All provisions of this Agreement shall remain in full force and effect so long as existing Cooperative and Telephone Company attachments on the other party's plant are continued, solely for the purpose of governing the rights and obligations of either party with respect to said attachments.

- E. Any failure of the Cooperative or the Telephone Company to enforce or insist on compliance with all provisions of this Agreement shall not constitute a relinquishment or waiver of any Agreement terms and/or conditions. All provisions of this Agreement shall be and remain in full force and effect.

ASSIGNMENT OF RIGHTS

The Cooperative or the Telephone Company shall not assign or otherwise dispose of this Agreement or any of its rights or interests herein, with the exception of any affiliated entity, to any corporation, firm, or individual without the written consent of the other party. Said consent shall not be unreasonably withheld. In the case of a disposition to an affiliated entity, the party making the disposition shall notify the other party.

SUPPLEMENTAL ROUTINES AND PRACTICES

Nothing in the foregoing shall preclude the Cooperative and the Telephone Company from preparing supplemental operating routines, working practices or amendments to this Agreement as mutually agreed to be necessary or desirable to effectively administer the provisions of this Agreement.

In witness whereof, the parties hereto have caused this Agreement to be executed by their respective officers thereunto duly authorized, on the day and year first above stated.

THIS AGREEMENT, MADE THIS 1st day of March, 1967 by and between the VANCEBURG ELECTRIC, LIGHT, HEAT AND POWER SYSTEM, hereinafter called the "Electric Company", party of the first part, and the GENERAL TELEPHONE COMPANY OF KENTUCKY, a Delaware Corporation, hereinafter called the "Telephone Company", party of the second part.

WITNESSETH:

WHEREAS, the Electric Company and the Telephone Company desire to cooperate in accordance with the "Principles and Practices for the Joint Use of Wood Poles by Supply and Communication Companies" as contained in the report of the Joint General Committee of the Edison Electric Institute and the Bell Telephone System dated October 1945, and amendments thereto, and to establish joint use of their respective poles when and where joint use shall be of mutual advantage, and

WHEREAS, the conditions determining necessity or desirability of joint use depend upon service requirements to be met by each of the parties, including considerations of safety and economy, and each of them should be the judge of what the character of its circuits should be to meet its service requirements and as to whether or not these service requirements can be properly met by joint use of poles;

NOW, THEREFORE, in consideration of the premises and the mutual covenants herein contained, the parties, hereto, for themselves, their successors and assigns, do hereby covenant and agree as follows:

ARTICLE I
DEFINITIONS

For the purpose of this agreement, the following terms when used herein, shall have the following meanings:

A. NORMAL SPACE - means exclusive space on a joint use pole for the use of each party, taking into consideration requirements of the National Electrical Safety Code issued November 1, 1961, hereinafter called the NESC, except only as to the portion of its said space which, by the terms of the NESC, may be occupied by certain attachments therein described of the other party, this space is specifically defined as follows:

- (1) for the Electric Company, the uppermost six (6) feet; not including the uppermost one (1) foot;
- (2) for the Telephone Company, a space of three (3) feet at sufficient distance below the space of the Electric Company to provide at all times the minimum clearance required by the Specifications referred to in Article IV, and at sufficient height above the ground to provide proper vertical clearance as defined in NESC for the lowest horizontally run line wires or cables attached in such space.
- (3) Occupancy Rights:
 - a. Each party shall be entitled to the exclusive use of excess space made available by excess height for which such party has paid.

- b. Each party shall be entitled to occupy portions of the space hereby allocated to the other party, or of the space not hereby allocated to either party, for certain attachments permitted to occupy such space by the terms of the Specifications referred to herein, provided that such use does not make necessary an increase in height of the pole, and further provided that in all cases, the use of such space for vertical conductors or other attachments are so located that they do not obstruct climbing spaces, or interfere with the safe use of pole steps. Except as herein provided, each party shall be entitled to exclusive use of its space hereby allocated.
- c. By mutual agreement either party may occupy space on an existing or a newly erected pole in such manner as to encroach upon the space which the other party is entitled to occupy, but which is not fully needed for the purpose of such other party at the time, provided that the Specifications referred to in Article IV herein are fully complied with. In case, however, the other party desires at any time to make full use of the space to which it is entitled and it therefore, becomes necessary to replace the pole, the replacement shall be deemed to be necessary by reason of the requirements of the encroaching party.

B. NORMAL JOINT USE POLE - means a pole which meets the requirements of the NESC for support and clearance of supply and communication conductors under conditions existing at the time joint use is established, or is to be created under known plans of either party. Specifically, a normal joint pole under this agreement shall be a 35-foot, class 5 wood pole.

The foregoing definition of a "Normal Joint Pole" is not intended to preclude the use of joint poles longer or shorter or of greater or less strength than the normal joint pole in locations where such poles will meet the known or anticipated requirements of the parties hereto.

C. ATTACHMENTS - mean materials or apparatus now or hereafter used by either party in the construction, operation or maintenance of its plant carried on poles.

D. CLEARANCE ATTACHMENTS - mean any attachments made to a pole of the owner for the purpose of obtaining clearance as defined in the NESC between plant of the Licensee and that of the Owner, where, in general, a pole for the purpose of supporting the Licensee's attachments would not be required if it were not for the presence of the other (Owner's) route. Guy poles are considered as part of the anchor and guy structure, and, as such, guy attachments are not considered as units to be counted, but are given the same treatment as clearance attachments.

E. SUPPORTING ATTACHMENTS - mean attachments made on poles which, in general, relieve the Licensee of the necessity of providing

a pole at or near the same location for the purpose of supporting its wires or cables.

- F. OWNER - means the party owning the pole to which attachments are made.
- G. LICENSEE - means the party having the right under this agreement to make attachments to a pole of which the other party is the Owner.

ARTICLE II

TERRITORY AND SCOPE OF AGREEMENT

This agreement shall be in effect and shall cover all wooden poles of each of the parties now existing, hereinafter erected or acquired, within the common operating areas served by the parties hereto, when said poles are brought hereunder, excepting:

- A. Poles which, in the Owner's judgment, are necessary for its own sole use, and
- B. Poles which carry, or are intended to carry, circuits of a character that in the Owner's judgment proper rendering of its service now or in the future makes joint use of such poles undersirable.

ARTICLE III

PERMISSION FOR JOINT USE

Each party hereto hereby permits joint use by the other party of any of its poles when brought under this agreement as herein provided, subject to the terms and conditions herein stated.

ARTICLE IV
SPECIFICATIONS

Joint use of poles covered by this agreement shall at all times be in conformity with terms and conditions of the current issue of the NESC as to minimum requirements, and such revisions and amendments thereto from time to time as may be necessary by reason of developments and improvements in the art as may be mutually agreed upon and approved in writing by the Manager of the Electric Company and the Chief Engineer of the Telephone Company.

Edison Electric Institute Publication M-12, a report of the Joint Committee on Plant Coordination of the Edison Electric Institute and the Bell Telephone System, based on the NESC and such revisions and amendments thereto as may be made from time to time is to be used as a guide in the administration of this agreement.

ARTICLE V
RIGHT OF WAY FOR LICENSEE'S ATTACHMENTS

A. The Owner and Licensee will cooperate as far as may be practicable in obtaining right of way for both parties. When a written easement is secured it shall be sufficient detail for identification and recording, where required, and shall be subject to inspection by the other party upon request. However, no guarantee is given by the Owner of permission from property owners, municipalities or others for the use of poles by the Licensee, and if objection is made thereto and

the Licensee is unable to satisfactorily adjust the matter within a reasonable time, the Owner may at any time, upon thirty (30) days notice in writing to the Licensee, require the Licensee to remove its attachments from the pole involved, and the Licensee shall within thirty (30) days after receipt of said notice, remove its attachments from such poles at its sole expense. Should the Licensee fail to remove its attachments as herein provided, the Owner may remove them at the Licensee's expense, without any liability whatever for such removal or the manner of making it, for which expense the Licensee shall reimburse the Owner on demand.

- B. Where the parties mutually agree that right of way maintenance on existing joint use lines is necessary for the protection of their service, the cost of the removal of trees shall be shared equally.
- C. Each party shall be responsible for trimming its own circuits at its own expense where right of way is maintained by trimming (side growth, undergrowth or overhead growth).
- D. As between the parties to this contract, the company performing the work shall assume all responsibility of claims and suits which may arise from this work.

ARTICLE VI

PLACING, TRANSFERRING OR REARRANGING ATTACHMENTS

- A. Whenever either party desires to reserve space on any pole of the other, for any attachments requiring space thereon, not then specifically reserved hereunder for its use, it shall make written

application therefor, specifying in such notice the location of the pole in question, the number and kind of attachments which it desires to place thereon, and the character of the circuits to be used. Within ten (10) days after the receipt of such notice, the Owner shall notify the Applicant in writing whether or not said pole is one of those excluded from joint use under the provisions of Article II. Upon receipt of notice from the Owner that said pole is not of those excluded, and after completion of any transferring or rearranging which is then required in respect to attachments on said poles, including any necessary pole replacements as provided in Article VII "A", the Applicant shall have the right as Licensee hereunder to use said space for attachments and circuits of the character specified in said application in accordance with the terms of this agreement. Service wire attachments or emergency construction can be placed in accordance with the specifications, upon verbal approval, subsequently approved in writing.

- B. Except as herein otherwise expressly provided, each party shall place, maintain, rearrange, transfer and remove its own attachments, and shall at all times perform such work promptly and in such a manner as not to interfere with work being done by the other party.
- C. On all lines, each party shall install suitable anchors for its own load requirements.

ARTICLE VII

ERECTING, REPLACING OR RELOCATING POLES

- A. Whenever any jointly used pole, or any pole about to be so used under the provisions of the agreement, is insufficient in size or strength for the existing attachments and for the proposed immediate additional attachments thereon, the Owner shall promptly replace such pole with a new pole of the necessary size and strength, and make such other changes in the existing pole line, in which such pole is included, as may be made necessary by the replacement of such pole and, or the placing of the Licensee's circuits as proposed.
- B. Whenever it is necessary to change the location of a jointly used pole, by reason of any state, municipal or other governmental requirement, or the requirements of a property owner, the Owner shall, before making such change in location, give notice thereof in writing (except in cases of emergency when verbal notice will be given, and subsequently confirmed in writing) to the Licensee, specifying in such notice the time of such proposed relocation, and the Licensee shall at the time so specified, transfer its attachments to the pole at the new location.
- C. Whenever, either party hereto is about to erect new poles within the territory covered by this agreement, either as an additional pole line, as an extension of an existing pole line, or as the reconstruction of an existing pole line, it shall notify the other in writing, at least ten (10) days before beginning the work (shorter notice, including verbal notice subsequently confirmed in writing, may be given in case of emergency),

and shall submit with such notice its plans showing the proposed location and size of the new poles and the character of circuits it will use thereon. The other party shall, within five (5) days after the receipt of such notice, reply in writing to the party erecting the new poles, stating whether such other party does, or does not, desire space on the said poles, and if it does desire space thereon, the character of the circuits it desires to use and the amount of space it wishes to reserve. This notice of desire to establish joint use should include detail plans of any changes in the plans of the other party which are desired in order to permit the establishment of joint use. If such party requests space on the new poles, and if the character and number of circuits and attachments are such that the Owner does not wish to exclude the poles from joint use under the provisions of Article II, then poles suitable for the said joint use shall be erected in accordance with the provisions and the payment of costs as provided in paragraphs "D", "E" and "F" of this Article.

- D. In any case where the parties hereto shall conclude arrangements for the joint use of any new poles to be erected, and the party proposing to construct the new pole facilities already owns more than its proportionate share of joint poles, the parties shall take into consideration the desirability of having the new pole facilities owned by the party owning less than its proportionate share of the joint poles so as to work towards such a division of ownership of the joint poles. For the purpose of this agreement the proportionate share of ownership for the Electric

Company shall be 63 to 60 percent of the total joint poles and for the Telephone Company 37 to 40 percent of the total joint poles.

E. The cost of erecting joint poles coming under this agreement, either as new pole lines, as extensions of existing pole lines, or to replace existing poles, either existing jointly used poles or poles not previously involved in joint use, shall be borne by the parties as follows:

1. A normal joint pole, or a joint pole shorter or smaller than the normal pole, shall be erected at the sole expense of the Owner, except as provided in Section "F" of this Article.
2. A pole taller or stronger than the normal pole, the extra height and strength of which is due wholly to the Owner's requirements, shall be erected at the sole expense of the Owner.
3. In the case of a pole taller or stronger than the normal pole, the extra height and strength of which is due wholly to the Licensee's requirements, the Licensee shall pay to the Owner a sum equal to the difference between the cost in place of such pole and the cost in place of a normal joint pole, the rest of the cost of erecting such pole to be borne by the Owner, except as provided in Section F of this Article.
4. In the case of a pole taller or stronger than the normal pole, the extra height and strength of which is due to the requirements of both parties, the Licensee shall pay to the Owner a sum equal to one-half the difference between the cost in place of

such pole and the cost in place of a normal joint pole, the rest of the cost of erecting such pole to be borne by the Owner.

5. In the case of a pole taller or stronger than the normal pole, where height and strength in addition to that needed for the purpose of either or both of the parties hereto is necessary in order to meet the requirements of public authority or of property owners, one-half of the excess cost of such pole due to such requirements shall be borne by the Licensee; the rest of the cost of such pole to be borne as provided in that one of the preceding paragraphs 1, 2, 3, or 4, within which it would otherwise properly fall.

F. In any case where a pole is erected hereunder to replace another pole solely because such other pole is not tall enough, or of the required strength, to provide adequately for the Licensee's requirements, or where such pole, whether it carry space reserved for the Licensee's use or not, had at the time of its erection, been pronounced by the Licensee as satisfactory and adequate for its requirements, the Licensee shall, upon erection of the new pole, pay to the Owner, in addition to any amounts payable by the Licensee under paragraphs 3, 4 or 5, or Section E of this Article, a sum equal to the sacrificed life of the pole which is replaced (Then value in place of the pole replaced plus cost of removal less salvage), and the pole removed shall remain the property of the Owner. In any case where the other party by mutual consent erects and owns a joint pole to replace an existing pole of the

Owner (instead of the Owner doing so as it is contemplated by Section A of this Article that the Owner will do), such other party shall pay to the Owner of the replaced pole a sum equal to the then value in place of the pole which is replaced, and the pole removed shall thereupon become the property of such other party which has erected the replacing pole.

- G. When replacing a jointly used pole carrying aerial cable terminals, underground connections or transformer equipment, the new pole shall be set in the same hole which the replaced pole occupied, unless special conditions make it necessary or mutually desirable to set it in a different location. The new pole shall be set vertical and true.
- H. Any payments made by the Licensee under the foregoing provisions of this Article for poles taller than normal shall not in any way affect the ownership of said poles.
- I. Any payment as provided in the foregoing provisions of this Article may be based on mutually agreeable predetermined amounts. The amounts agreed to shall be subject to revision at the request of either party at the end of each three year period, or at other times as may be mutually agreed to, and may be cancelled at any time by either party by a written notice. The amounts agreed to shall be evidenced by an exchange of letters, as provided under Article XXII.

ARTICLE VIII

MAINTENANCE OF POLES AND ATTACHMENTS

- A. The Owner shall, at its own expense, maintain its joint poles in a safe and serviceable condition, and in accordance with Article IV of this agreement and the requirements of the NESC, and shall replace subject to the provisions of Article VII, such of said poles as become defective.
- B. Each party shall, at its own expense, at all times maintain all of its attachments in accordance with Article IV of this agreement and the NESC and keep them in safe condition and in thorough repair.
- C. Each party shall be responsible for any damage to facilities of the other party caused by negligence of his own employees or agents, and shall bear the full cost of necessary remedies for such damage.

ARTICLE IX

EXEMPTIONS FROM RENTALS

No rental shall be paid by Licensee for the use of any pole of Owner where such use consists only in attaching guys thereto, or in attaching thereto wires or cables of Licensee for the purpose of providing clearance between the pole or attachments thereon and such wires or cables, and not for the purpose of supporting such wires or cables. Such attachments shall not be made except after application and permit.

In the case of a messenger used to support an aerial cable, an extension of the messenger for one or more spans without the aerial cable, but in a

position such that it would be practicable to support aerial cable thereon, shall not be considered to be a guy under the terms of the first paragraph of this Article.

A service drop of one party crossing a line of the other party and attached to a pole of the other party shall be considered as being attached thereto for the purpose of providing clearance from such other party's equipment under the terms of the first paragraph of this Article.

Licensee agrees to notify Owner, in the manner prescribed by this agreement, in any case of proposed joint use of the poles of Owner under the circumstances stated in this Article, including the proposed attachment to such pole of additional circuits or facilities.

ARTICLE X

BILLS AND PAYMENTS FOR WORK

Upon completion of work performed hereunder by either party, the expense of which is borne wholly or in part by the other, the party performing the work shall present to the other party, within thirty (30) days after completion of such work, a statement showing the amount due, and such other party shall, within thirty (30) days after such statement is presented, pay to the party doing the work the amount due.

ARTICLE XI

ABANDONMENT OF JOINTLY USED POLES

A. If the Owner desires at any time to abandon any jointly used pole, it shall give the Licensee notice in writing to the effect at least thirty

(30) days prior to the date on which it intends to abandon such pole.

If, at the expiration of such period, the Owner shall have no attachments on such pole, but the Licensee shall not have removed all of its attachments therefrom, such pole shall thereupon become the property of the Licensee, and the Licensee shall save harmless the former Owner of such pole from all obligation, liability, damages, cost, expenses or charges incurred thereafter, because of, or arising out of, the presence or condition of such pole or any attachments thereon; and shall pay the Owner a sum equal to the then value in place of such abandoned pole, or poles, or such other equitable sum as may be agreed upon between the parties. Credit shall be allowed for any payments which the Licensee may have made under the provisions of Article VII, Sections E and F, when the pole was originally set, provided the Licensee furnishes proof of such payment.

- B. The Licensee may at any time abandon the use of a joint pole by giving due notice thereof in writing to the Owner and by removing therefrom any and all attachments it may have thereon.

ARTICLE XII

RENTAL PAYMENTS

- A. On or about December 1st of each year, each party, acting in cooperation with the other, subject to the provisions of the following paragraph of this Article, shall have ascertained and tabulated the total number of poles in use by each party as Licensee for which rental payment shall be made to the other party as Owner.

- B. Each party shall pay to the other party an annual rental of \$ [REDACTED] (three dollars) per rental unit per year. The payment of any such rental shall be for the calendar year in which the tabulation is made under paragraph A of this Article, and any payment of rental, as a result of the tabulation in December shall be for the full calendar year.
- C. If one party owns less than its proportionate share of joint use poles as specified in Article VII, paragraph D, it may purchase enough poles from the other party to bring its ownership within the specified range. Payment for such purchase shall be an amount equal to the then value in place of the poles so purchased. However, such payment shall not affect the rental payments specified in paragraph B of this Article for the calendar year under consideration.

ARTICLE XIII

PERIODICAL REVISION OF RENTALS

- A. At any time after January 1, 1971, and at intervals of not less than five (5) years thereafter, the ownership ranges and rentals applicable under this agreement shall be subject to joint review and revision, as provided for under Section B of this Article, upon written request of either party. In case of revision the new ownership ranges and rental agreed upon shall apply, starting with the annual bill next rendered and continuing until again adjusted.
- B. Revisions of the rental payments shall be based on experience resulting from previous administration of this agreement. Any changes shall

take into account the original cost factors pertinent to the establishing of the pole facilities involved in all joint use existing under this agreement at the time of the said review.

ARTICLE XIV

DEFAULTS

- A. If either party shall make default in any of its obligations under this agreement, and such default shall continue thirty (30) days after notice in writing from the other party, all rights of the party in default hereunder pertaining to the establishment of future joint use shall be suspended, and if such default shall continue for a period of ninety (90) days after such suspension, the other party may forthwith terminate the right of both parties to make additional attachments. Any such termination of the right to make additional attachments by reason of any such default shall not, however, abrogate or terminate the right of either party to maintain the attachments theretofore made on the poles of the other, and all such prior attachments shall continue thereafter to be maintained pursuant to and in accordance with the terms of this agreement, which agreement shall, so long as said attachments are continued, remain in full force and effect solely and only for the purpose of governing and controlling the rights and obligations of the parties with respect to said attachments.
- B. If either party shall make default in the performance of any work which it is obligated to do under this contract, at its sole expense, the other party may elect to do such work, and the party in default

shall reimburse the other party for the cost thereof. Failure on the part of the defaulting party to make such payment within thirty (30) days upon presentation of bills therefor shall, at the election of the other party, constitute a default under Section A of this Article.

ARTICLE XV

LIABILITY AND DAMAGES

Whenever any liability for damages is incurred by either or both of the parties for injuries to the employee, or for injury to the property of either party, or for injuries to other persons or their property, arising out of the joint use of poles under this agreement, or due to the proximity of the wires and fixtures of the parties hereto attached to the jointly used poles covered by this agreement, the liability for such damages, as between the parties hereto, shall be as follows:

- A. Each party shall be liable for all damages for such injuries to persons or property caused solely by its negligence or solely by its failure to comply at any time with the specifications as provided herein.
- B. Each party shall be liable for all damages for such injuries to its own employees or its own property that are caused by the concurrent negligence of both parties hereto, or that are due to causes which cannot be traced to the sole negligence of the other party.
- C. Each party shall be liable for one-half of all damages for such injuries to persons other than employees of either party, and for one-half of all damages for such injuries to property not belonging to either party,

that are caused by the concurrent negligence of both parties hereto, or that are due to causes which cannot be traced to the sole negligence of the other party.

- D. Where, on account of injuries of the character described in the preceding paragraphs of this Article, either party hereto shall make any payments to injured employees or to their relatives or representatives in conformity with: (1) the provisions of any workmen's compensation act or any act creating a liability on the employer to pay compensation for personal injury to an employee by accident arising out of and in the course of the employment, whether based on negligence on the part of the employer or not, or (2) any plan for employee's disability benefits or death benefits now established or hereafter adopted by the parties hereto, or either of them, such payments shall be construed to be damages within the terms of preceding paragraphs numbered A and B and shall be paid by the parties hereto accordingly.
- E. All claims for damages arising hereunder that are asserted against or affect both parties hereto shall be dealt with by the parties hereto jointly; provided, however, that in any case where the Claimant desires to settle any such claim upon terms acceptable to one of the parties hereto, but not to the other, the party to which said terms are acceptable may, at its election, pay to the other party one-half of the expenses which such settlement would involve, and thereupon said other party shall be bound to protect the party making such payment from all further liability and expense on account of such claim.

F. In the adjustment between the parties hereto of any claim for damages arising hereunder, the liability assumed hereunder, by the parties, shall include, in addition to the amounts paid to the Claimant, all expenses incurred by the parties in connection therewith, which shall comprise costs, attorney's fees, disbursements and other proper charges and expenditures.

ARTICLE XVI

EXISTING RIGHTS OF OTHER PARTIES

If either of the parties hereto has, prior to the execution of this agreement, conferred upon others, not parties to this agreement, by contract or otherwise, rights or privileges to use any poles covered by this agreement, nothing herein contained shall be construed as affecting said rights or privileges, and either party hereto shall have the right, by contract or otherwise, to continue and extend such existing rights or privileges; it being expressly understood, however, that for the purpose of this agreement, the attachments of any such outside party shall be treated as attachments belonging to the Grantor, and the rights, obligations, and liabilities hereunder of the Grantor in respect to such attachments shall be the same as if it were the actual Owner thereof. Where municipal regulations require either party to allow the use of its poles for fire alarm, police or other like signal systems, such use shall be permitted under the terms of this Article at joint expense.

ARTICLE XVII

SERVICE OF NOTICES

Wherever in this agreement notice is provided to be given by either party hereto to the other, such notice shall be in writing and given by letter mailed, or personal delivery, to the Electric Company at its official office at Vanceburg, Kentucky or to the Telephone Company, at its office at Lexington, Kentucky as the case may be, or to such other address as either party may, from time to time, designate in writing for that purpose.

ARTICLE XVIII

TERMINATION OF AGREEMENT

This agreement shall continue in full force and effect until the 31st day of December, 1971, and shall continue thereafter until terminated, insofar as the making of additional attachments is concerned, by either party, giving to the other one (1) year's notice in writing of intention to terminate the right of making additional attachments. Any such termination of the right to make additional attachments shall not, however, abrogate or terminate the right of either party to maintain the attachments theretofore made on the poles of the other, and all such prior attachments shall continue thereafter to be maintained, pursuant to and in accordance with the terms of this agreement, which agreement shall, so long as said attachments are continued, remain in full force and effect solely and only for the purpose of governing and controlling the rights and obligations of the parties with respect to said attachments.

ARTICLE XIX

ASSIGNMENT OF RIGHTS

Except as otherwise provided in this agreement, neither party hereto shall assign or otherwise dispose of this agreement, in whole or in part, without the written consent of the other party; except that either party shall have the right to mortgage any or all of its property, rights, privileges and franchises, or lease or transfer any of them to another corporation organized for the purpose of conducting a business of the same general character as that of such party, or to enter into any merger or consolidation; and, in case of the foreclosure of such mortgage, or in case of such lease, transfer, merger, or consolidation, its rights and obligations hereunder shall pass to such successors and assigns; and provided, further, that subject to all of the terms and conditions of this agreement, either party may permit any corporation conducting a business of the same general character as that of such party, with which it is affiliated, or connecting with it, the rights and privileges of this agreement, in the conduct of its said business; and for the purpose of this agreement, all such attachments maintained on any such pole by the permission as aforesaid of either party hereto shall be considered as the attachments of the party granting such permission, and the rights obligations and liabilities of such party under this agreement, in respect to such attachments, shall be the same as if it were the actual owner thereof.

ARTICLE XX

WAIVER OF TERMS OR CONDITIONS

The failure of either party to enforce or insist upon compliance with any of the terms or conditions of this agreement shall not constitute a general waiver

WIN2262

or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

ARTICLE XXI

EXISTING CONTRACTS

All existing contracts between the parties hereto for the joint use of wood poles upon a rental basis within the territory covered by this agreement, are, by mutual consent, hereby abrogated and annulled.

ARTICLE XXII

SUPPLEMENTAL ROUTINES AND PRACTICES

Nothing in the foregoing shall preclude the parties to this agreement from preparing such supplemental operating routines or working practices as they mutually agree to be necessary or desirable to effectively administer the provisions of this agreement.

IN WITNESS WHEREOF, the parties hereto have caused these present to be executed in duplicate, and their corporate seals to be affixed thereto by their respective officers thereunder duly authorized, on the day and year first above written.

JOINT USE OF FACILITIES

ELECTRIC POWER SYSTEMS

TELEPHONE SYSTEMS

AMENDMENT TO ARTICLE XI, OF GENERAL AGREEMENT

FOR JOINT USE OF WOOD POLES IN RURAL AREAS

The Electrical Distributor and the Telephone Company agree that the following amendment shall be a part of the Agreement between the parties dated MARCH 1, 1967.

Amend Section E, Article XI by deleting the first sentence thereof and substituting in its place the following:

"Adjustment payments per pole due from one party as licensee to the other party or owner shall, subject to the provisions of Article XII, be \$5.15 per annum by the Electrical Distributor for each jointly used pole owned by the Telephone Company and \$4.10 per annum by the Telephone Company for each jointly used pole owned by the Electrical Distributor."

Executed on the 19th. day of December, 1978.

Re: Joint Pole Line Agreement between General Telephone Company of Kentucky and Vanceburg Electric Light, Heat & Power System, dated 3/1/67 (the "Agreement")

Dear Sir or Madam:

On October 31, 2001, Verizon South Inc. ("Verizon") entered into a definitive agreement (the "Purchase Agreement") with Kentucky ALLTEL, Inc., a subsidiary of ALLTEL Corporation ("ALLTEL"). Under the terms of the Purchase Agreement Verizon will transfer to ALLTEL certain telephone operations and related assets located in Kentucky (the "Transaction"). The above referenced Agreement is one of the assets to be transferred as a part of the Transaction.

Until the closing of the Transaction, Verizon will continue to operate in the current manner and will continue to be responsible to perform those obligations under the Agreement that arise prior to the transfer to ALLTEL. Upon Closing of the Transaction, ALLTEL will be assigned all of Verizon's rights and obligations under the Agreement, to the extent such obligations arise after the closing date.

By this letter, Verizon is requesting your consent to the assignment of the Agreement to ALLTEL as a part of the Transaction. Please indicate your consent by executing the letter where indicated in the space provided below and returning it in the enclosed pre-paid envelope at your earliest convenience, but by no later than **February 21, 2002**. The enclosed copy should be retained for your records. By consenting to the assignment of the Agreement you also agree that, after the closing of the Transaction, Verizon will have no further obligations to you under the Agreement, and that ALLTEL shall be responsible for all obligations thereunder after the closing.

Your consent will remain effective through the closing of the Transaction. You will be contacted by ALLTEL who will advise you of the closing date and the new contact information.

GENERAL AGREEMENT

JOINT USE OF WOOD POLES IN RURAL AREAS

Contract Revised January, 1971

PREAMBLE

_____ Farmers Rural Electric Cooperative Corporation _____, a corporation organized under the laws of the State of _____ Kentucky _____, (hereinafter called the "Electrical Distributor"), and _____ General Telephone Company of Kentucky _____, a corporation organized under the laws of the State of _____ Delaware _____ (hereinafter called the "Telephone Company"), desiring to cooperate in the joint use of their respective poles, erected or to be erected within the rural areas in which both parties render service in the State(s) of

_____ Kentucky _____, whenever and wherever such use shall, in the estimation of both parties, be compatible with their respective needs, do hereby, in consideration of the premises and the mutual covenants herein contained, covenant and agree for themselves and their respective successors and assigns as follows:

ARTICLE I

SCOPE OF AGREEMENT

(a) This Agreement shall be in effect in the areas in which both of the parties render service in the State(s) of _____ Kentucky _____, and shall cover all wood poles now existing or hereafter erected in the above territories, except where said poles are covered by or later brought under an urban contract of the parties, when said poles are brought under this Agreement in accordance with the procedure hereinafter provided.

(b) Each party reserves the right to exclude any of its facilities from joint use.

(c) It is the intention of the parties that adequate electric and telephone service shall be made available to the widest practicable number of rural users in the above territory.

ARTICLE II

EXPLANATION OF TERMS

For the purpose of this Agreement, the following terms shall have the following meanings:

1. A **JOINT POLE** is a pole jointly used by both parties.

2. A **NORMAL JOINT POLE** is a pole which is just tall enough to provide normal spaces, as normal space is hereinafter defined, for the respective parties and just strong enough to meet the requirements of the specifications mentioned in Article III for the attachments ordinarily placed by the parties in their respective normal spaces. Such pole for the purpose of this Agreement shall be a 35 foot class 5 wood pole as classified by the pole classification tables of the American Standards Association.

3. **SPACE** is the linear portion of a joint pole parallel to its axis reserved for the exclusive use of one of the parties (subject only to the exceptions provided for in this Article and the specifications mentioned in Article III which in certain instances permit the making of certain attachments by one party in the space reserved for the other party).

4. **NORMAL SPACE** is the following described space:

a. For the Electrical Distributor the uppermost 61½ feet, measured from top of pole.

b. For the Telephone Company a space of 2 feet, at a sufficient distance below the space of the Electrical Distributor to provide at all times the minimum clearance required by the specifications mentioned in Article III

and at a sufficient height above ground to provide the proper vertical clearance above ground or track rails for the lowest horizontally run line wires or cables attached in such space.

The foregoing definition of "a normal joint pole" is not intended to preclude the use of joint poles shorter or of less strength than the normal joint pole in locations where such poles will meet the requirements of the parties hereto.

The above assignment of space is not intended to preclude the use of vertical runs or the mounting of such equipment as terminals or meters on the lower portions of the pole when mutually agreeable.

ARTICLE III SPECIFICATIONS

Except as otherwise provided in Section (f) of Article VII, referring to construction temporarily exempt from the application of the specifications mentioned herein, the joint use of the poles covered by this Agreement shall at all times be in conformity with accepted modern methods such as those suggested in Edison Electric Institute Publication No. M12 and shall at all times conform to the requirements of the National Electrical Safety Code, Sixth Edition, and subsequent revisions thereof, except where the lawful requirements of public authorities may be more stringent, in which case the latter will govern.

In establishing joint use of wood poles whether installed new for joint use or installed initially for circuits of either party, the total transverse and vertical loads for all conductors attached to a pole covered by this Agreement shall not, under the assumed storm loadings of the National Electrical Safety Code for the area in which the pole is located, exceed fifty (50) percent of the ultimate fiber stress of the supporting pole. In the case of existing pole lines, the strength of the pole shall be assumed to be the same as when new.

Modifications of, additions to, or construction practices supplementing wholly or in part the requirements of the National Electrical Safety Code, shall, when accepted in writing by both parties hereto through their agents authorized to approve such changes, likewise govern the joint use of poles.

ARTICLE IV ESTABLISHING JOINT USE OF EXISTING POLES

(a) Before either party shall make use of the poles of the other party under this Agreement, it shall request permission therefor in writing on the form attached hereto and identified as Appendix A or such other form as may be mutually agreed upon and shall comply with the procedure set forth in said approved form.

(b) Whenever either party desires to reserve space for its attachments on any pole owned by the other party, either as initial space or additional space on such pole, it shall make written application therefor, specifying the location of the poles in question, the amount of space desired on each pole, and the number and character of the circuits to be placed thereon. If, in the judgment of the owner, the poles are necessary for its own sole use or joint use under the circumstances is undesirable, the owner shall have the right to reject the application. In any event, within a reasonable period after the receipt of such application the owner shall notify the applicant in writing whether the application is approved or rejected. Upon receipt of notice from the owner that the application has been approved, and after the completion of any transferring or rearranging which is required to permit the attaching of the applicant's circuits on such poles, including any necessary pole replacements, the applicant shall have the right as licensee hereunder to use such space in accordance with the terms of the application and of this Agreement.

(c) Whenever any jointly used pole or any pole about to be so used under the provisions of this Agreement is insufficient in height or strength for the existing attachments and for the proposed additional attachments thereon, the owner shall promptly replace such pole with a new pole of the necessary height and strength and shall make such other changes in the existing pole line in which such pole is included as the conditions may then require.

(d) Each party shall place, transfer and rearrange its own attachments, place guys and anchors to sustain any unbalanced loads caused by its attachments, and perform any tree trimming or cutting incidental thereto. Each party shall, with due diligence, attempt at all times to execute such work promptly and in such manner as not to interfere with the service of the other party.

(e) Wherever practicable, double thimble anchor rods with anchors of sufficient holding power to sustain any unbalanced loads of the two parties shall be installed and used jointly. The ownership of the double thimble anchor rods and anchors will be vested in the owner of the pole. In any case, where one party provides at the request of the other party double thimble anchor rods and anchors for the use of both parties the party requesting the double thimble anchor rods and anchors shall pay to the party placing the double thimble anchor rods and anchors a sum equal to half of the cost of the anchors and anchor rods in place. In cases where the existing anchors are adequate for the needs of both parties the party desiring additional guys may where necessary install an adapter at its own expense. In cases where existing anchor rods and anchors are adequate for the needs of only one party the party desiring additional guys and anchors may where necessary install anchors and anchor rods at no expense to the other party or in the case of right-of-way restrictions may provide a double thimble anchor rod and anchor in place of the existing anchor rod and anchor to which the other party can attach its existing guy at its own expense.

(f) The cost of establishing the joint use of existing poles including the making of any necessary pole replacements, shall be borne by the parties hereto in the manner provided in Article VIII - Division of Costs.

ARTICLE V ESTABLISHING JOINT USE OF NEW POLES

(a) Whenever either party hereto requires new pole facilities for an additional pole line, an extension of an existing pole line, or in connection with the reconstruction of an existing pole line, it shall promptly notify the other party to that effect in writing (verbal notice subsequently confirmed in writing may be given in cases of emergency) stating the proposed location and character of the new poles and the character of circuits it intends to use thereon and indicating whether or not such pole facilities will be, in the estimation of the party proposing to construct the new pole facilities, susceptible of joint use. Within a reasonable period after the receipt of such notice, the other party shall reply in writing, stating whether it does, or does not, desire space on the said poles and, if it does desire space thereon, the character of the circuits it desires to use and the amount of space it wishes to reserve. If such other party requests space on the proposed new poles and if the character and number of its circuits and attachments are such that the party proposing to construct the new pole facilities does not consider joint use undesirable, then it shall erect poles suitable for such joint use, subject, however, to the provisions of Section (b) of this Article, and subject further to the condition that request by either party for space on proposed new poles of the other party under this Agreement shall be made in writing on the form attached hereto and identified as Appendix A or such other form as may be mutually agreed upon and shall comply with the procedure set forth in said approved form. The applicant for space on the poles shall be promptly notified in writing of the action taken on the application.

(b) In any case where the parties hereto shall conclude arrangements for the joint use of any new poles to be erected, and the party proposing to construct the new pole facilities already owns more than its proportionate share of joint poles, the parties shall take into consideration the desirability of having the new pole facilities owned by the party owning less than its proportionate share of joint poles so as to work towards such a division of ownership of the joint poles that neither party shall be obligated to pay to the other any adjustment payments because of their respective use of joint poles owned by the other, due regard being given to the desirability of avoiding mixed ownership of poles in a section of line.

(c) Each party shall place its own attachments on the new joint poles and place guys and anchors to sustain any unbalanced loads caused by its attachments except as otherwise provided under Article IV, Section (e). The party owning the pole line shall provide initial right-of-way clearance 15 feet on each side of the center line to the extent practicable, all right-of-way in excess of this 30 foot swath to be borne by the party requiring the additional width. Each party shall, with due diligence, attempt to execute its work promptly and in such manner as not to interfere with the service of the other party.

ARTICLE VI RIGHT OF WAY FOR LICENSEE'S ATTACHMENTS

While the owner and licensee will cooperate as far as may be practicable in obtaining rights-of-way for both parties on joint poles, the owner does not warrant or assure to the licensee any right-of-way privileges or easements on, over or across streets, alleys and public thoroughfares, and private or publicly owned property, and if the licensee shall at any time be prevented from placing or maintaining its attachments on the owner's poles, no liability on account thereof shall attach to the owner of the poles.

ARTICLE VII
MAINTENANCE OF POLES AND ATTACHMENTS

(a) The owner shall maintain its joint poles in a safe and servicable condition and in accordance with the specifications mentioned in Article III and shall replace, reinforce or repair such of these poles as become defective. In case of emergency, with the giving of verbal notice, licensee may replace joint poles, anchors and guys as may be considered necessary for public safety or the restoration of licensee's service, in which case the licensee shall be reimbursed by the owner in the full amount of the cost of labor and materials plus any applicable overhead expenses.

(b) When replacing a jointly used pole carrying terminals of aerial cable, underground connection, or transformer equipment, the new pole shall be set in the same hole which the replaced pole occupied unless special conditions make it necessary or mutually desirable to set it in a different location.

(c) Whenever it is necessary to replace or relocate a jointly used pole, the owner shall, before making such replacement or relocation, give reasonable notice thereof in writing (except in case of emergency, when verbal notice will be given and subsequently confirmed in writing) to the licensee, specifying in such notice the time of such proposed replacement or relocation and the licensee shall at the time so specified transfer its attachments to the new or relocated joint pole. Should the licensee fail to transfer its attachments to the new joint pole on the date specified for such transfer of attachments, the owner may elect to relinquish the ownership of the old pole from which it has removed its attachments, with the giving of verbal notice to be subsequently followed in writing. Such old pole shall thereupon, at no cost to the licensee, become the property of the licensee, and the licensee shall save harmless the former owner of such pole from all obligation, liability, damages, cost, expenses or charges incurred thereafter, and not arising out of anything theretofore occurring, because of, or arising out of, the presence or condition of such pole or of any attachments thereon. In instances where the Electrical Distributor is the owner of such pole the unused portion of the pole above the licensee's attachments shall be cut off and removed by the owner before relinquishing ownership, if the pole remains in structural conflict with the power route.

(d) Each party shall at all times maintain all of its attachments in accordance with the specifications mentioned in Article III and shall keep them in safe condition and in thorough repair. Where the parties mutually agree that right-of-way maintenance on existing joint use lines is necessary for the protection of their service, the cost of the following work shall be shared as follows:

1. The removal of dead or dangerous trees shall be shared equally.
2. Chemical control or removal of undergrowth by cutting at the ground line in a swath measured fifteen feet on each side of the center line as follows:
 - a. 50% of the cost on routes supporting bare aerial wire telephone circuits shall be borne by each party.
 - b. 10% of the costs shall be borne by the Telephone Company, 90% by the Electrical Distributor on routes supporting telephone multiple pair insulated wire.
 - c. Costs will not be shared on routes supporting cable or abrasive resistant wire. Each party will provide for its own requirements.

(e) Each party shall be responsible for trimming its own circuits at its own expense where right-of-way is maintained by trimming (side growth, undergrowth or overhead growth).

(f) Any existing joint use construction of the parties hereto which does not conform to the specifications mentioned in Article III shall be brought into conformity therewith as soon as practicable.

When such existing construction shall have been brought into conformity with said specification, it shall at all times thereafter be maintained as provided in Sections (a) and (d) of this Article.

(g) The cost of maintaining poles and attachments and of bringing existing joint use construction into conformity with said specifications shall be borne by the parties hereto in the manner provided in Article VIII - Division of Costs.

ARTICLE VIII
DIVISION OF COSTS

(a) The cost of erecting new joint poles coming under this Agreement, to construct new pole lines, to make extensions to existing pole lines, or to replace existing poles, except as covered in (c) below, shall be borne by the parties as follows:

1. A normal joint pole, or joint pole smaller than normal, shall be erected at the sole expense of the owner.
2. A pole larger than the normal, the extra height or strength of which is due wholly to the owner's requirements including requirements as to keeping the owner's wires clear of trees shall be erected at the sole expense of the owner.
3. In the case of a pole larger than the normal, the extra height or strength of which is due wholly to the licensee's requirements including requirements as to keeping the licensee's wires clear of trees, the licensee shall pay to the owner a sum equal to the difference between the cost in place of such pole and the cost in place of a normal joint pole, the rest of the cost of erecting such pole to be borne by the owner, except insofar as otherwise provided in Section (c) of this Article.
4. In the case of a pole larger than the normal, the extra height or strength which is due to the requirements of both parties or the requirements for proper ground clearance or of public authorities or of property owners, (other than requirements with regard to keeping the wires of one party only clear of trees), the difference between the cost in place of such pole and the cost in place of a normal joint pole shall be shared equally by the licensee and the owner, the rest of the cost of erecting such pole to be borne by the owner.
5. A pole, including all appurtenances or fixtures, erected between existing poles to provide sufficient clearance and furnish adequate strength to support the circuits of both the owner and the licensee, which it would have been unnecessary to erect if joint use had not been undertaken, shall be erected at the sole expense of the licensee.

(b) Any payments for poles made by the licensee under any foregoing provisions of this Article shall not entitle the licensee to the ownership of any part of said poles for which it has contributed in whole or in part.

(c) Where an existing jointly used pole or a non-joint pole is prematurely replaced by a new one solely for the benefit of the licensee, the cost of the new pole shall be divided as specified in Section (a) of this Article and the licensee shall pay the owner the labor cost of removal of the existing pole and the labor cost of replacing or transferring of all appurtenances on the existing pole. The replaced pole shall be removed and retained by its owner.

(d) Each party shall place, maintain, rearrange, transfer and remove its own attachments at its own expense except as otherwise expressly provided herein.

(e) The expense of maintaining joint poles shall be borne by the owner thereof except that the cost of replacing poles shall be borne by the parties hereto in the manner provided in Sections (a) and (c) of this Article.

(f) Where service drops of one party crossing over or under lines of the other party are attached to the other party's poles, either directly or by means of a pole top extension fixture, the cost shall be borne as follows:

1. Pole top extension fixtures shall be provided and installed at the sole expense of the party using them.
2. Where an existing pole is replaced by a taller one to provide the necessary clearance the party owning the service drop shall pay to the party owning the pole the cost of the new pole plus the labor costs of replacing or transferring of the appurtenances on the existing pole, the owner of the existing pole to remove and retain such pole at his own expense.

(g) Payments made by either party to the other under the provisions of this Article may be based on the estimated or actual cost as mutually agreed upon (including overhead) of making such changes but in no event, however, shall either party be required to pay for such changes more than 120% of the estimated cost supplied by the other if such cost estimate shall have been requested and furnished before the changes were made.

ARTICLE IX
PROCEDURE WHEN CHARACTER OF CIRCUITS IS CHANGED

When either party desires to change the character of its circuits on jointly used poles, such party shall give immediate notice to the other party of such contemplated change and in the event that the party agrees in writing to joint use with such changed circuits, then the joint use of such poles shall be continued with such changes in construction as may be required to meet the terms of the specifications mentioned in Article III for the character of circuits involved and such other changes as may be agreed upon. The parties shall cooperate to determine the equitable apportionment of the net expense of such changes. In the event, however, that the other party fails within 30 days from receipt of such notice to agree in writing to such change in character of circuits, then both parties shall cooperate in accordance with the following plan:

1. The parties hereto shall determine the most practical and economical method of effectively providing for separate lines, either overhead or underground, and the party whose circuits are to be moved shall carry out the necessary work as promptly as practicable.
2. The net costs of re-establishing such circuits in the new location as are necessary to furnish the same business facilities that existed in the joint use section at the time such change was decided upon, shall be borne by the licensee; provided, however, that the owner shall bear the cost whenever the change was occasioned by the necessities of the owner. When the net costs are borne by the owner they shall not include the cost of the new pole line constructed by the licensee.

Unless otherwise agreed by the parties, ownership of any new line or underground facilities constructed under the foregoing provisions in a new location shall vest in the party for whose use it is constructed.

ARTICLE X
ABANDONMENT OF JOINT USED POLES

(a) If the owner desires at any time to abandon any jointly used pole, it shall, except as provided in Article VII, Section (c), give the licensee notice in writing to that effect at least 60 days prior to the date on which it intends to abandon such pole. If at the expiration of said period the owner shall have no attachments thereon, such pole shall thereupon become the property of the licensee, and the licensee shall save harmless the former owner of such pole from all obligation, liability, damages, cost, expenses or charges incurred thereafter, and not arising out of anything theretofore occurring, because of, or arising out of, the presence or condition of such pole or of any attachments thereon; and shall pay the owner the then value in place of the pole to the owner. The former owner shall further evidence transfer of title to the pole by appropriate means. Credit shall be allowed for any payments which the licensee may have made under the provisions of Article VII - Division of Costs, when the pole was originally set, provided the licensee furnishes proof of such payment.

(b) The licensee may at any time abandon the use of a joint pole by removing therefrom any and all attachments it may have thereon and by giving such notice as may be mutually agreed upon.

ARTICLE XI
ADJUSTMENT PAYMENTS

(a) The parties contemplate that the use or reservation of space on poles by each party, as licensee of the other under this Agreement shall be based on the equitable sharing of the economies of joint use.

(b) On or about December 1st of each year, each party, acting in cooperation with the other, and subject to the provisions of Section (c) of this Article, shall ascertain and tabulate the total number of poles in use by each party as licensee, which tabulation shall indicate the number of poles in use by each party as licensee for which an adjustment payment by one of the parties to the other is to be determined as hereinafter provided.

(c) For the purpose of such tabulation, any pole used by the licensee for the sole purpose of attaching wires or cables thereto, either directly or by means of a pole top extension fixture, in order to provide clearance between the facilities of the two parties as distinguished from providing support for such wires or cables, shall not be considered as a joint pole.

(d) If there is provision under a separate agreement between the Telephone Company and the Electrical Distributor for facilities associated with power line carrier systems, the adjustment payment provisions of the

agreement of which this Article forms a part shall apply for poles on which both types of facilities are present and no other adjustment payments shall apply. The adjustment payment provisions of this Agreement shall not apply, however, where only those facilities directly associated with the power line carrier systems are involved.

(e) Adjustment payments per pole due from one party as licensee to the other party or owner shall, subject to the provisions of Article XII, be \$ [REDACTED] per annum by the Electrical Distributor for each jointly used pole owned by the Telephone Company and \$ [REDACTED] per annum by the Telephone Company for each jointly used pole owned by the Electrical Distributor. The smaller total sum shall be deducted from the larger and the Electrical Distributor or the Telephone Company, as the case may be, shall pay to the other the difference between such amounts. The adjustment payment herein provided shall be paid within ten days after the bill has been submitted.

(f) At intervals not exceeding five (5) years an actual inventory of attachments shall be made by representatives of the parties. If there is any difference in the number of attachments found by the inventory and the number arrived at by tabulating those reported, correction will be made by retroactive billing for any attachments identified as being responsible for the difference, and any remaining difference will be spread evenly over the years since the last inventory, and billing adjusted accordingly except as otherwise provided under Article XII, Section (c).

ARTICLE XII PERIODICAL ADJUSTMENT OF PAYMENTS

(a) At any time after 3 years from the date of this Agreement and at intervals of not less than 3 years thereafter, the payments applicable under this Agreement shall be subject to joint review and adjustment as provided for under Section (b) of this Article upon the written request of either party. In case of adjustment of payments as herein provided, the new payments agreed upon shall apply starting with the annual bill next rendered and continuing until again adjusted.

(b) All adjustments of rental shall be in accord with the provisions of Appendix B, and any changes shall take into account the cost factors originally involved in all joint use existing at that time under this Agreement.

(c) An actual inventory of attachments shall be made by representatives of the parties coincident with the effective date of any adjustment rentals.

ARTICLE XIII DEFAULTS

(a) If either party shall default in any of its obligations under this Agreement and such default continues thirty (30) days after due notice thereof in writing by the other party, the party not in default may suspend the rights of the party in default insofar as concerns the granting of future joint use and if such default shall continue for a period of 90 days after such suspension, the party not in default may forthwith terminate this Agreement as far as concerns the future granting of joint use.

(b) If after reasonable notice either party shall make default in the performance of any work it is obligated to do under this Agreement at its sole expense, the other party may elect to do such work, and the party in default shall reimburse the other party for the cost thereof. Failure on the part of the defaulting party to make such payment within 30 days upon presentation of bills therefor shall, at the election of the other party, constitute a default under Section (a) of this Article.

ARTICLE XIV EXISTING RIGHTS OF OTHER PARTIES

(a) If either of the parties hereto has, prior to the execution of this Agreement, conferred upon others, not parties to this Agreement, by contract or otherwise, rights or privileges to use any poles covered by this Agreement, nothing herein contained shall be construed as affecting such rights or privileges, and either party hereto shall have the right, by contract or otherwise, to continue and extend such existing rights or privileges, it being expressly understood, however, that for the purpose of this Agreement, the attachments of any such outside party, except those of a municipality or other public authority, shall be treated as attachments belonging to the grantor, and the rights, obligations, and liabilities hereunder of the grantor in respect to such attachments shall be the same as if it were the actual owner thereof.

(b) Where municipal regulations require either party to allow the use of its poles for fire alarm, police, or other like signal systems, such use shall be permitted under the terms of this Article, provided attachments of such parties are placed and maintained in accordance with the specifications mentioned in Article III.

**ARTICLE XV
ASSIGNMENT OF RIGHTS**

Except as otherwise provided in this Agreement, neither party hereto shall assign or otherwise dispose of this Agreement or any of its rights or interests hereunder, or in any of the jointly used poles, or the attachments or rights-of-way covered by this Agreement, to any firm, corporation or individual, without the written consent of the other party, except to the United States of America or any agency thereof; provided, however, that nothing herein contained shall prevent or limit the right of either party to mortgage any or all of its property, rights, privileges, and franchises, or lease or transfer any of them to another corporation organized for the purpose of conducting a business of the same general character as that of such party, or to enter into any merger or consolidation; and, in case of the foreclosure of such mortgage; or in case of lease, transfer, merger, or consolidation, its rights and obligations hereunder shall pass to, and be acquired and assumed by, the purchaser on foreclosure, the transferee, leasee, assignee, merging or consolidating company, as the case may be; and provided further that subject to all of the terms and conditions of this Agreement, either party may permit any corporation conducting a business of the same general character as that of such party, and owned, operated, leased and controlled by it, or associated or affiliated with it, the use of all or any part of the space reserved hereunder on any pole covered by this Agreement for the attachments used by such party in the conduct of its said business; and for the purpose of this Agreement, all such attachments maintained on any such pole by the permission as aforesaid of either party hereto shall be considered as the attachments of the party granting such permission, and the rights, obligations and liabilities of such party under this Agreement, with respect to such attachments, shall be the same as if it were the actual owner thereof.

**ARTICLE XVI
WAIVER OF TERMS OR CONDITIONS**

The failure of either party to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

**ARTICLE XVII
PAYMENT OF TAXES**

Each party shall pay all taxes and assessments lawfully levied on its own property upon said jointly used poles, and the taxes and the assessments which are levied on said joint poles shall be paid by the owner thereof, but any tax, fee, or charge levied on owner's poles solely because of their use by the licensee shall be paid by the licensee.

**ARTICLE XVIII
BILLS AND PAYMENT FOR WORK**

Upon the completion of work performed hereunder by either party, the expense of which is to be borne wholly or in part by the other party, the party performing the work shall present to the other party within 90 days after the completion of such work an itemized statement of the costs and such other party shall within 30 days after such statement is presented pay to the party doing the work such other party's proportion of the cost of said work.

**ARTICLE XIX
SERVICE OF NOTICES**

Whenever in this Agreement notice is provided to be given by either party hereto to the other, such notice shall be in writing and given by letter mailed, or by personal delivery, to the Electrical Distributor at its office

504 South Broadway, Glasgow, Kentucky

or to the Telephone Company at its office at 2001 Harrodsburg Road, Lexington, Kentucky

_____ as the case may be,
or to such other address as either party may from time to time designate in writing for that purpose.

**ARTICLE XX
TERM OF AGREEMENT**

This Agreement shall continue in full force and effect until the 1st day of January, 1982, and shall continue thereafter until terminated, insofar as the making of attachments to additional poles is concerned, by either party giving to the other one (1) years notice in writing of intention to terminate the right of making attachments to additional poles. Any such termination of the right to make attachments to additional poles shall not, however, abrogate or terminate the right of either party to maintain the attachments theretofore made on the poles of the other or additional attachments to such poles, and all such attachments shall continue thereafter to be maintained, pursuant to and in accordance with the terms of this Agreement, which Agreement shall, so long as said attachments are continued, remain in full force and effect solely and only for the purpose of governing and controlling the rights and obligations of the parties with respect to said attachments.

**ARTICLE XXI
EXISTING CONTRACTS**

All existing agreements between the parties hereto for the joint use of poles in rural areas are by mutual consent hereby abrogated and superseded by this Agreement.

Nothing in the foregoing shall preclude the parties to this agreement from preparing such supplemental operating routines or working practices as they mutually agree to be necessary or desirable to effectively administer the provisions of this Agreement.

**ARTICLE XXII
APPROVAL OF THE ADMINISTRATOR**

This Agreement, and any amendment thereof, shall be effective subject to the condition that, during any period in which the Electrical Distributor is a borrower from the Rural Electrification Administration, the Agreement and any amendment thereof shall have the approval in writing of the Administrator of the Rural Electrification Administration.

In witness whereof the parties hereto, have caused these presents to be executed in triplicate, and their corporate seals to be affixed thereto by their respective officers thereunto duly authorized, on the 1st day of January, 19 72.

APPENDIX A

TO _____
Name of Electrical Distributor _____ Date _____

Address _____ Request Number _____

This is to request permission for this company to use jointly certain of your poles under the terms and conditions of our General Agreement for Joint Use of Wood Poles in Rural Areas, dated _____.

The poles, including the number and character of circuits to be placed thereon, for which this permission is requested are those included in the pole lines indicated on the attached map, which also bears the above date and Request Number.

Our present plan is to start this work about _____, 19____,
and complete the work about _____, 19_____.

If permission to use these poles is given by you, this Company will prepare and furnish to you, after engineering is complete, detailed construction plans and drawings, together with necessary maps, to indicate specifically your poles that we wish to use jointly, the number and character of the circuits to be placed on such poles, and any rearrangements of fixtures and equipment necessary, as well as any relocations or replacements of existing poles, and any additional poles that may be required, in accordance with the procedure provided in Articles IV and V of this Agreement.

If the joint use proposed is agreeable, please signify your approval of this request in the space provided and return the second copy to us.

Name of Telephone Company _____ Signature of Telephone Company Representative _____

Address _____ Title _____

To _____
Name of Telephone Company _____ Date _____

Address _____

This is to advise you that the above request to use jointly certain poles of this system is approved. You may proceed with such joint use of poles on the terms and conditions of the Agreement referred to above, and under the conditions outlined in your request.

Title of Electrical Distributor _____ Signature of Electrical Distributor
Representative _____ Representative _____

APPENDIX B

This Appendix describes the basic principles and guides which have been used under this Agreement in setting the adjustment payments specified in Article XI and which are to be used in making periodical adjustment of payments as provided for in Article XII.

Under these principles the adjustment payments are intended, insofar as it is practicable, to result in a sharing of the economies realized by the joint use of pole plant in proportion to the relative costs of separate pole line construction.

The procedures outlined herein take into account the following objectives:

1. An equitable division of savings regardless of the number of jointly used poles owned by each party.
2. Adjustment payments applicable universally in the area covered by the Agreement regardless of whether the pole lines involved are initially constructed with joint use in view or are existing lines modified for joint use.
3. Appropriate allowance in the adjustment payments for additional costs incurred by each party in supplying 'normal joint poles', as defined in the Agreement, and the costs of other items required in the joint use of poles which would not be incurred in separate line construction.
4. Adjustment payments based on the costs of "typical miles" of separate lines, of newly constructed joint lines and of existing lines modified to make them suitable for joint use. The 'per mile' values of adjustment payments are then reduced to 'per pole' values for purposes of simplifying tabulations and to provide for the joint use of scattered poles.

The adjustment payments are the dollar values resulting from the licensee paying to the owner, as annual adjustment payments, an amount representing the annual charge on a separate line for the licensee less the sum of (a) the annual charges on the additional costs incurred by the licensee in establishing joint use and (b) the licensee's share of the total annual savings. This share is the ratio of the licensee's typical separate line costs to the sum of the typical separate line costs of each of the parties.

The annual adjustment payments can also be stated as follows:

| | | | | | | |
|--------------------------------------|----------|--|--------|-----------------------------------|------|---|
| Licensee's annual adjustment payment | (equals) | Annual charges saved by Licensee through not having to build a separate line | (less) | Licensee's appropriate percentage | (of) | Total savings in annual charges realized through joint use. |
|--------------------------------------|----------|--|--------|-----------------------------------|------|---|

The cost in place of a line of poles is made up of a number of factors including such items as right-of-way solicitation, clearing, staking, direct labor and material costs of bare poles in place and pro rata shares of construction supervision and overhead. These costs, for a specific area, may differ considerably from corresponding costs in other parts of the country. These variations in pole line costs will, however, affect both power and telephone lines to about the same degree.

The calculation for Telephone Company adjustment payments to Power Distributor and Power Distributor adjustment payments to the Telephone Company based on the preceding principles for this contract is as follows:

B. E. AREA - ELECTRIC

WIN2282

A M E N D M E N T

This Amendment, effective as of the date signed by the last party hereto as set forth by the signature of such party below, is made between Farmers Rural Electric Cooperative Corporation, 504 South Broadway, Glasgow, Kentucky 42141, hereinafter called "Farmers", and Kentucky ALLTEL, Inc., 1 Allied Drive, Little Rock, Arkansas 72202, hereinafter called "ALLTEL";

W I T N E S S E T H:

WHEREAS, Farmers and General Telephone Company of Kentucky entered into an agreement entitled "General Agreement Joint Use of Wood Poles In Rural Areas" on January 1, 1972, hereinafter called the "Agreement"; and

WHEREAS, Farmers has agreed to the assignment of said Agreement to ALLTEL; and

WHEREAS, the parties have for many years jointly used certain utility poles located within their common service area in the Commonwealth of Kentucky; and

WHEREAS, the party using a pole owned by the other party has paid a certain fee per pole on an annual basis to the owner of the pole; and

WHEREAS, the parties desire to amend said Agreement with regard to the adjustment payments per pole due from one party as licensee to the other party;

NOW, THEREFORE, said parties agree that the annual adjustment payment per pole for attachments for the years 2002, 2003, 2004 and each year thereafter, until changed, shall be \$17.02 by Farmers for each jointly used pole owned by ALLTEL and \$12.67 by ALLTEL for each jointly used pole owned by Farmers.

IN WITNESS WHEREOF, the parties hereto have executed this Amendment in duplicate originals, one of which is retained by each of the parties, on the date set forth below, with the Amendment to be effective of the latest date set forth below.

GENERAL AGREEMENT
JOINT USE OF WOOD POLES IN RURAL AREAS

PREAMBLE

Fleming-Mason R.E.C.C., a corporation
organized under the laws of the State of Kentucky, (hereinafter called the "Electrical
Distributor"), and Kentucky Telephone Company, a corporation
organized under the laws of the State of Kentucky (hereinafter called the "Telephone
Company"), desiring to cooperate in the joint use of their respective poles, erected or to be erected within the
rural areas in which both parties render service in the State(s) of

Kentucky

, whenever
and wherever such use shall, in the estimation of both parties, be compatible with their respective needs, do here-
by, in consideration of the premises and the mutual covenants herein contained, covenant and agree for them-
selves and their respective successors and assigns as follows:

ARTICLE I

SCOPE OF AGREEMENT

(a) This Agreement shall be in effect in the areas in which both of the parties render service in the State(s)
of Kentucky, and shall cover
wood poles now existing or hereafter erected in the above territories, except where said poles are covered by
or later brought under an urban contract of the parties, when said poles are brought under this Agreement in
accordance with the procedure hereinafter provided.

(b) Each party reserves the right to exclude any of its facilities from joint use.

(c) It is the intention of the parties that adequate electric and telephone service shall be made available to
the widest practicable number of rural users in the above territory.

ARTICLE II

EXPLANATION OF TERMS

For the purpose of this Agreement, the following terms shall have the following meanings:

1. A **JOINT POLE** is a pole jointly used by both parties.

2. A **NORMAL JOINT POLE** is a pole which is just tall enough to provide normal spaces, as normal space
is hereinafter defined, for the respective parties and just strong enough to meet the requirements of the specifica-
tions mentioned in Article III for the attachments ordinarily placed by the parties in their respective normal
spaces. Such pole for the purpose of this Agreement shall be a 35 foot class 5 wood pole as classified by the pole
classification tables of the American Standards Association.

3. **SPACE** is the linear portion of a joint pole parallel to its axis reserved for the exclusive use of one of the
parties (subject only to the exceptions provided for in this Article and the specifications mentioned in Article III
which in certain instances permit the making of certain attachments by one party in the space reserved for the
other party).

4. **NORMAL SPACE** is the following described space:

a. For the Electrical Distributor the uppermost 6½ feet, measured from top of pole.

b. For the Telephone Company a space of 2 feet, at a sufficient distance below the space of the Electrical
Distributor to provide at all times the minimum clearance required by the specifications mentioned in Article III

WIN2284

and at a sufficient height above ground to provide the proper vertical clearance above ground of such runs for the lowest horizontally run line wires or cables attached in such space.

The foregoing definition of "a normal joint pole" is not intended to preclude the use of joint poles shorter of less strength than the normal joint pole in locations where such poles will meet the requirements of the parties hereto.

The above assignment of space is not intended to preclude the use of vertical runs or the mounting of such equipment as terminals or meters on the lower portions of the pole when mutually agreeable.

ARTICLE III SPECIFICATIONS

Except as otherwise provided in Section (f) of Article VII, referring to construction temporarily exempt from the application of the specifications mentioned herein, the joint use of the poles covered by this Agreement shall at all times be in conformity with accepted modern methods such as those suggested in Edison Electric Institute Publication No. E112 and shall at all times conform to the requirements of the National Electrical Safety Code, Sixth Edition, and subsequent revisions thereof, except where the lawful requirements of public authorities may be more stringent, in which case the latter will govern.

In establishing joint use of wood poles whether installed new for joint use or installed initially for circuits of either party, the total transverse and vertical loads for all conductors attached to a pole covered by this Agreement shall not, under the assumed storm loadings of the National Electrical Safety Code for the area in which the pole is located, exceed fifty (50) percent of the ultimate fiber stress of the supporting pole. In the case of existing pole lines, the strength of the pole shall be assumed to be the same as when new.

Modifications of, additions to, or construction practices supplementing wholly or in part the requirements of the National Electrical Safety Code, shall, when accepted in writing by both parties hereto through their agents authorized to approve such changes, likewise govern the joint use of poles.

ARTICLE IV ESTABLISHING JOINT USE OF EXISTING POLES

(a) Before either party shall make use of the poles of the other party under this Agreement, it shall request permission therefor in writing on the form attached hereto and identified as Appendix A or such other form as may be mutually agreed upon and shall comply with the procedure set forth in said approved form.

(b) Whenever either party desires to reserve space for its attachments on any pole owned by the other party, either as initial space or additional space on such pole, it shall make written application therefor, specifying the location of the poles in question, the amount of space desired on each pole, and the number and character of the circuits to be placed thereon. If, in the judgment of the owner, the poles are necessary for its own sole use or joint use under the circumstances is undesirable, the owner shall have the right to reject the application. In any event, within a reasonable period after the receipt of such application the owner shall notify the applicant in writing whether the application is approved or rejected. Upon receipt of notice from the owner that the application has been approved, and after the completion of any transferring or rearranging which is required to permit the attaching of the applicant's circuits on such poles, including any necessary pole replacements, the applicant shall have the right as licensee hereunder to use such space in accordance with the terms of the application and of this Agreement.

(c) Whenever any jointly used pole or any pole about to be so used under the provisions of this Agreement is insufficient in height or strength for the existing attachments and for the proposed additional attachments thereon, the owner shall promptly replace such pole with a new pole of the necessary height and strength and shall make such other changes in the existing pole line in which such pole is included as the conditions may then require.

(d) Each party shall place, transfer and rearrange its own attachments, place guys and anchors to sustain any unbalanced loads caused by its attachments, and perform any tree trimming or cutting incidental thereto. Each party shall, with due diligence, attempt at all times to execute such work promptly and in such manner as not to interfere with the service of the other party.

any unbalanced loads of the two parties shall be installed and used jointly. The ownership of the double thimble anchor rods and anchors will be vested in the owner of the pole. In any case, where one party provides at the request of the other party double thimble anchor rods and anchors for the use of both parties the party requesting double thimble anchor rods and anchors shall pay to the party placing the double thimble anchor rods and anchors a sum equal to half of the cost of the anchors and anchor rods in place. In cases where the existing anchors are adequate for the needs of both parties the party desiring additional guys may where necessary install an adapter at its own expense. In cases where existing anchor rods and anchors are adequate for the needs of only one party the party desiring additional guys and anchors may where necessary install anchors and anchor rods at no expense to the other party or in the case of right-of-way restrictions may provide a double thimble anchor rod and anchor in place of the existing anchor rod and anchor to which the other party can attach its existing guy at its own expense.

(f) The cost of establishing the joint use of existing poles including the making of any necessary pole replacements, shall be borne by the parties hereto in the manner provided in Article VIII - Division of Costs.

ARTICLE V

ESTABLISHING JOINT USE OF NEW POLES

(a) Whenever either party hereto requires new pole facilities for an additional pole line, an extension of an existing pole line, or in connection with the reconstruction of an existing pole line, it shall promptly notify the other party to that effect in writing (verbal notice subsequently confirmed in writing may be given in cases of emergency) stating the proposed location and character of the new poles and the character of circuits it intends to use thereon and indicating whether or not such pole facilities will be, in the estimation of the party proposing to construct the new pole facilities, susceptible of joint use. Within a reasonable period after the receipt of such notice, the other party shall reply in writing, stating whether it does, or does not, desire space on the said poles and, if it does desire space thereon, the character of the circuits it desires to use and the amount of space it wishes to reserve. If such other party requests space on the proposed new poles and if the character and number of its circuits and attachments are such that the party proposing to construct the new pole facilities does not consider joint use undesirable, then it shall erect poles suitable for such joint use, subject, however, to the provisions of Section (b) of this Article, and subject further to the condition that request by either party for space on proposed new poles of the other party under this Agreement shall be made in writing on the form attached hereto and identified as Appendix A or such other form as may be mutually agreed upon and shall comply with the procedure set forth in said approved form. The applicant for space on the poles shall be promptly notified in writing of the action taken on the application.

(b) In any case where the parties hereto shall conclude arrangements for the joint use of any new poles to be erected, and the party proposing to construct the new pole facilities already owns more than its proportionate share of joint poles, the parties shall take into consideration the desirability of having the new pole facilities owned by the party owning less than its proportionate share of joint poles so as to work towards such a division of ownership of the joint poles that neither party shall be obligated to pay to the other any adjustment payments because of their respective use of joint poles owned by the other, due regard being given to the desirability of avoiding mixed ownership of poles in a section of line.

(c) Each party shall place its own attachments on the new joint poles and place guys and anchors to sustain any unbalanced loads caused by its attachments except as otherwise provided under Article IV, Section (e). The party owning the pole line shall provide initial right-of-way clearance 15 feet on each side of the center line to the extent practicable, all right-of-way in excess of this 30 foot swath to be borne by the party requiring the additional width. Each party shall, with due diligence, attempt to execute its work promptly and in such manner as not to interfere with the service of the other party.

ARTICLE VI

RIGHT OF WAY FOR LICENSEE'S ATTACHMENTS

While the owner and licensee will cooperate as far as may be practicable in obtaining rights-of-way for both parties on joint poles, the owner does not warrant or assure to the licensee any right-of-way privileges or easements on, over or across streets, alleys and public thoroughfares, and private or publicly owned property, and if the licensee shall at any time be prevented from placing or maintaining its attachments on the owner's poles, no liability on account thereof shall attach to the owner of the poles.

ARTICLE VII
MAINTENANCE OF POLES AND ATTACHMENTS

(a) The owner shall maintain its joint poles in a safe and servicable condition and in accordance with the specifications mentioned in Article III and shall replace, reinforce or repair such of these poles as become defective. In case of emergency, with the giving of verbal notice, licensee may replace joint poles, anchors and guys as may be considered necessary for public safety or the restoration of licensee's service, in which case the licensee shall be reimbursed by the owner in the full amount of the cost of labor and materials plus any applicable overhead expenses.

(b) When replacing a jointly used pole carrying terminals of aerial cable, underground connection, or transformer equipment, the new pole shall be set in the same hole which the replaced pole occupied unless special conditions make it necessary or mutually desirable to set it in a different location.

(c) Whenever it is necessary to replace or relocate a jointly used pole, the owner shall, before making such replacement or relocation, give reasonable notice thereof in writing (except in case of emergency, when verbal notice will be given and subsequently confirmed in writing) to the licensee, specifying in such notice the time of such proposed replacement or relocation and the licensee shall at the time so specified transfer its attachments to the new or relocated joint pole. Should the licensee fail to transfer its attachments to the new joint pole on the date specified for such transfer of attachments, the owner may elect to relinquish the ownership of the old pole from which it has removed its attachments, with the giving of verbal notice to be subsequently followed in writing. Such old pole shall thereupon, at no cost to the licensee, become the property of the licensee, and the licensee shall save harmless the former owner of such pole from all obligation, liability, damages, cost, expenses or charges incurred thereafter, and not arising out of anything theretofore occurring, because of, or arising out of, the presence or condition of such pole or of any attachments thereon. In instances where the Electrical Distributor is the owner of such pole the unused portion of the pole above the licensee's attachments shall be cut off and removed by the owner before relinquishing ownership, if the pole remains in structural conflict with the power line.

(d) Each party shall at all times maintain all of its attachments in accordance with the specifications mentioned in Article III and shall keep them in safe condition and in thorough repair. Where the parties mutually agree that right-of-way maintenance on existing joint use lines is necessary for the protection of their service, the cost of the following work shall be shared as follows:

1. The removal of dead or dangerous trees shall be shared equally.
2. Chemical control or removal of undergrowth by cutting at the ground line in a swath measured fifteen feet on each side of the center line as follows:
 - a. 50% of the cost on routes supporting bare aerial wire telephone circuits shall be borne by each party.
 - b. 10% of the costs shall be borne by the Telephone Company, 90% by the Electrical Distributor on routes supporting telephone multiple pair insulated wire.
 - c. Costs will not be shared on routes supporting cable or abrasive resistant wire. Each party will provide for its own requirements.

(e) Each party shall be responsible for trimming its own circuits at its own expense where right-of-way is maintained by trimming (side growth, undergrowth or overhead growth).

(f) Any existing joint use construction of the parties hereto which does not conform to the specifications mentioned in Article III shall be brought into conformity therewith as soon as practicable.

When such existing construction shall have been brought into conformity with said specification, it shall at all times thereafter be maintained as provided in Sections (a) and (d) of this Article.

(g) The cost of maintaining poles and attachments and of bringing existing joint use construction into conformity with said specifications shall be borne by the parties hereto in the manner provided in Article VIII - Division of Costs.

DIVISION OF COSTS

(a) The cost of erecting new joint poles coming under this Agreement, to construct new pole lines, to make additions to existing pole lines, or to replace existing poles, except as covered in (c) below, shall be borne by the parties as follows:

1. A normal joint pole, or joint pole smaller than normal, shall be erected at the sole expense of the owner.
2. A pole larger than the normal, the extra height or strength of which is due wholly to the owner's requirements including requirements as to keeping the owner's wires clear of trees shall be erected at the sole expense of the owner.
3. In the case of a pole larger than the normal, the extra height or strength of which is due wholly to the licensee's requirements including requirements as to keeping the licensee's wires clear of trees, the licensee shall pay to the owner a sum equal to the difference between the cost in place of such pole and the cost in place of a normal joint pole, the rest of the cost of erecting such pole to be borne by the owner, except insofar as otherwise provided in Section (c) of this Article.
4. In the case of a pole larger than the normal, the extra height or strength which is due to the requirements of both parties or the requirements for proper ground clearance or of public authorities or of property owners, (other than requirements with regard to keeping the wires of one party only clear of trees), the difference between the cost in place of such pole and the cost in place of a normal joint pole shall be shared equally by the licensee and the owner, the rest of the cost of erecting such pole to be borne by the owner.
5. A pole, including all appurtenances or fixtures, erected between existing poles to provide sufficient clearance and furnish adequate strength to support the circuits of both the owner and the licensee, which it would have been unnecessary to erect if joint use had not been undertaken, shall be erected at the sole expense of the licensee.

(b) Any payments for poles made by the licensee under any foregoing provisions of this Article shall not entitle the licensee to the ownership of any part of said poles for which it has contributed in whole or in part.

(c) Where an existing jointly used pole or a non-joint pole is prematurely replaced by a new one solely for the benefit of the licensee, the cost of the new pole shall be divided as specified in Section (a) of this Article and the licensee shall pay the owner the labor cost of removal of the existing pole and the labor cost of replacing or transferring of all appurtenances on the existing pole. The replaced pole shall be removed and retained by its owner.

(d) Each party shall place, maintain, rearrange, transfer and remove its own attachments at its own expense except as otherwise expressly provided herein.

(e) The expense of maintaining joint poles shall be borne by the owner thereof except that the cost of replacing poles shall be borne by the parties hereto in the manner provided in Sections (a) and (c) of this Article.

(f) Where service drops of one party crossing over or under lines of the other party are attached to the other party's poles, either directly or by means of a pole top extension fixture, the cost shall be borne as follows:

1. Pole top extension fixtures shall be provided and installed at the sole expense of the party using them.
2. Where an existing pole is replaced by a taller one to provide the necessary clearance the party owning the service drop shall pay to the party owning the pole the cost of the new pole plus the labor costs of replacing or transferring of the appurtenances on the existing pole, the owner of the existing pole to remove and retain such pole at his own expense.

(g) Payments made by either party to the other under the provisions of this Article may be based on the estimated or actual cost as mutually agreed upon (including overhead) of making such changes but in no event, however, shall either party be required to pay for such changes more than 120% of the estimated cost supplied by the other if such cost estimate shall have been requested and furnished before the changes were made.

PROCEDURE WHEN CHARACTER OF CIRCUITS IS CHANGED

When either party desires to change the character of its circuits on jointly used poles, such party shall give immediate notice to the other party of such contemplated change and in the event that the party agrees in writing to joint use with such changed circuits, then the joint use of such poles shall be continued with such changes in construction as may be required to meet the terms of the specifications mentioned in Article III for the character of circuits involved and such other changes as may be agreed upon. The parties shall cooperate to determine the equitable apportionment of the net expense of such changes. In the event, however, that the other party fails within 30 days from receipt of such notice to agree in writing to such change in character of circuits, then both parties shall cooperate in accordance with the following plan:

1. The parties hereto shall determine the most practical and economical method of effectively providing for separate lines, either overhead or underground, and the party whose circuits are to be moved shall carry out the necessary work as promptly as practicable.
2. The net costs of re-establishing such circuits in the new location as are necessary to furnish the same business facilities that existed in the joint use section at the time such change was decided upon, shall be borne by the licensee; provided, however, that the owner shall bear the cost whenever the change was occasioned by the necessities of the owner. When the net costs are borne by the owner they shall not include the cost of the new pole line constructed by the licensee.

Unless otherwise agreed by the parties, ownership of any new line or underground facilities constructed under the foregoing provisions in a new location shall vest in the party for whose use it is constructed.

ARTICLE X ABANDONMENT OF JOINT USED POLES

(a) If the owner desires at any time to abandon any jointly used pole, it shall, except as provided in Article II, Section (c), give the licensee notice in writing to that effect at least 60 days prior to the date on which it intends to abandon such pole. If at the expiration of said period the owner shall have no attachments thereon, such pole shall thereupon become the property of the licensee, and the licensee shall save harmless the former owner of such pole from all obligation, liability, damages, cost, expenses or charges incurred thereafter, and not arising out of anything theretofore occurring, because of, or arising out of, the presence or condition of such pole or of any attachments thereon; and shall pay the owner the then value in place of the pole to the owner. The former owner shall further evidence transfer of title to the pole by appropriate means. Credit shall be allowed for any payments which the licensee may have made under the provisions of Article VII - Division of Costs, when the pole was originally set, provided the licensee furnishes proof of such payment.

(b) The licensee may at any time abandon the use of a joint pole by removing therefrom any and all attachments it may have thereon and by giving such notice as may be mutually agreed upon.

ARTICLE XI ADJUSTMENT PAYMENTS

(a) The parties contemplate that the use or reservation of space on poles by each party, as licensee of the other under this Agreement shall be based on the equitable sharing of the economies of joint use.

(b) On or about December 1st of each year, each party, acting in cooperation with the other, and subject to the provisions of Section (c) of this Article, shall ascertain and tabulate the total number of poles in use by each party as licensee, which tabulation shall indicate the number of poles in use by each party as licensee for which an adjustment payment by one of the parties to the other is to be determined as hereinafter provided.

(c) For the purpose of such tabulation, any pole used by the licensee for the sole purpose of attaching wires or cables thereto, either directly or by means of a pole top extension fixture, in order to provide clearance between the facilities of the two parties as distinguished from providing support for such wires or cables, shall not be considered as a joint pole.

(d) If there is provision under a separate agreement between the Telephone Company and the Electrical Distributor for facilities associated with power line carrier systems, the adjustment payment provisions of the

agreement of which this Article forms a part shall apply for poles on which and no other adjustment payments shall apply. The adjustment payment provisions of this Agreement shall not apply, however, where only those facilities directly associated with the power line carrier systems are involved.

(e) Adjustment payments per pole due from one party as licensee to the other party or owner shall, subject to the provisions of Article XII, be [redacted] per annum by the Electrical Distributor for each jointly used pole owned by the Telephone Company and [redacted] per annum by the Telephone Company for each jointly used pole owned by the Electrical Distributor. The smaller total sum shall be deducted from the larger and the Electrical Distributor or the Telephone Company, as the case may be, shall pay to the other the difference between such amounts. The adjustment payment herein provided shall be paid within ten days after the bill has been submitted.

(f) At intervals not exceeding five (5) years an actual inventory of attachments shall be made by representatives of the parties. If there is any difference in the number of attachments found by the inventory and the number arrived at by tabulating those reported, correction will be made by retroactive billing for any attachments identified as being responsible for the difference, and any remaining difference will be spread evenly over the years since the last inventory, and billing adjusted accordingly except as otherwise provided under Article XII, Section (c).

ARTICLE XII

PERIODICAL ADJUSTMENT OF PAYMENTS

(a) At any time after 3 years from the date of this Agreement and at intervals of not less than 3 years thereafter, the payments applicable under this Agreement shall be subject to joint review and adjustment as provided for under Section (b) of this Article upon the written request of either party. In case of adjustment of payments as herein provided, the new payments agreed upon shall apply starting with the annual bill next rendered and continuing until again adjusted.

(b) All adjustments of rental shall be in accord with the provisions of Appendix B, and any changes shall take into account the cost factors originally involved in all joint use existing at that time under this Agreement.

(c) An actual inventory of attachments shall be made by representatives of the parties coincident with the effective date of any adjustment rentals.

ARTICLE XIII

DEFAULTS

(a) If either party shall default in any of its obligations under this Agreement and such default continues thirty (30) days after due notice thereof in writing by the other party, the party not in default may suspend the rights of the party in default insofar as concerns the granting of future joint use and if such default shall continue for a period of 90 days after such suspension, the party not in default may forthwith terminate this Agreement as far as concerns the future granting of joint use.

(b) If after reasonable notice either party shall make default in the performance of any work it is obligated to do under this Agreement at its sole expense, the other party may elect to do such work, and the party in default shall reimburse the other party for the cost thereof. Failure on the part of the defaulting party to make such payment within 30 days upon presentation of bills therefor shall, at the election of the other party, constitute a default under Section (a) of this Article.

ARTICLE XIV

EXISTING RIGHTS OF OTHER PARTIES

(a) If either of the parties hereto has, prior to the execution of this Agreement, conferred upon others, not parties to this Agreement, by contract or otherwise, rights or privileges to use any poles covered by this Agreement, nothing herein contained shall be construed as affecting such rights or privileges, and either party hereto shall have the right, by contract or otherwise, to continue and extend such existing rights or privileges, it being expressly understood, however, that for the purpose of this Agreement, the attachments of any such outside party, except those of a municipality or other public authority, shall be treated as attachments belonging to the grantor, and the rights, obligations, and liabilities hereunder of the grantor in respect to such attachments shall be the same as if it were the actual owner thereof.

(b) Where municipal regulations require either party to allow the use of its poles for fire alarm, police, or other like signal systems, such use shall be permitted under the terms of this Article, provided attachments of such parties are placed and maintained in accordance with the specifications mentioned in Article III.

ARTICLE XX
TERM OF AGREEMENT

This Agreement shall continue in full force and effect until the 1st day of January, 1978, I shall continue thereafter until terminated, insofar as the making of attachments to additional poles is concerned, by either party giving to the other one (1) years notice in writing of intention to terminate the right of making attachments to additional poles. Any such termination of the right to make attachments to additional poles shall not, however, abrogate or terminate the right of either party to maintain the attachments theretofore made on the poles of the other or additional attachments to such poles, and all such attachments shall continue thereafter to be maintained, pursuant to and in accordance with the terms of this Agreement, which Agreement shall, so long as said attachments are continued, remain in full force and effect solely and only for the purpose of governing and controlling the rights and obligations of the parties with respect to said attachments.

ARTICLE XXI
EXISTING CONTRACTS

All existing agreements between the parties hereto for the joint use of poles in rural areas are by mutual consent hereby abrogated and superseded by this Agreement.

Nothing in the foregoing shall preclude the parties to this agreement from preparing such supplemental operating routines or working practices as they mutually agree to be necessary or desirable to effectively administer the provisions of this Agreement.

ARTICLE XXII
APPROVAL OF THE ADMINISTRATOR

This Agreement, and any amendment thereof, shall be effective subject to the condition that, during any period in which the Electrical Distributor is a borrower from the Rural Electrification Administration, the Agreement and any amendment thereof shall have the approval in writing of the Administrator of the Rural Electrification Administration.

In witness whereof the parties hereto, have caused these presents to be executed in triplicate, and their corporate seals to be affixed thereto by their respective officers thereunto duly authorized, on the 1st day of January, 19 73.

Name of Electrical Distributor Date

Address Request Number

This is to request permission for this company to use jointly certain of your poles under the terms and conditions of our General Agreement for Joint Use of Wood Poles in Rural Areas, dated _____.

The poles, including the number and character of circuits to be placed thereon, for which this permission is requested are those included in the pole lines indicated on the attached map, which also bears the above date and Request Number.

Our present plan is to start this work about _____, 19____,
and complete the work about _____, 19____.

If permission to use these poles is given by you, this Company will prepare and furnish to you, after engineering is complete, detailed construction plans and drawings, together with necessary maps, to indicate specifically your poles that we wish to use jointly, the number and character of the circuits to be placed on such poles, and any rearrangements of fixtures and equipment necessary, as well as any relocations or replacements of existing poles, and any additional poles that may be required, in accordance with the procedure provided in Articles IV and V of this Agreement.

If the joint use proposed is agreeable, please signify your approval of this request in the space provided and turn the second copy to us.

APPENDIX B

This Appendix describes the basic principles and guides which have been used under this Agreement in setting the adjustment payments specified in Article XI and which are to be used in making periodical adjustment payments as provided for in Article XII.

Under these principles the adjustment payments are intended, insofar as it is practicable, to result in a sharing of the economies realized by the joint use of pole plant in proportion to the relative costs of separate pole line construction.

The procedures outlined herein take into account the following objectives:

1. An equitable division of savings regardless of the number of jointly used poles owned by each party.
2. Adjustment payments applicable universally in the area covered by the Agreement regardless of whether the pole lines involved are initially constructed with joint use in view or are existing lines modified for joint use.
3. Appropriate allowance in the adjustment payments for additional costs incurred by each party in supplying 'normal joint poles', as defined in the Agreement, and the costs of other items required in the joint use of poles which would not be incurred in separate line construction.
4. Adjustment payments based on the costs of "typical miles" of separate lines, of newly constructed joint lines and of existing lines modified to make them suitable for joint use. The 'per mile' values of adjustment payments are then reduced to 'per pole' values for purposes of simplifying tabulations and to provide for the joint use of scattered poles.

The adjustment payments are the dollar values resulting from the licensee paying to the owner, as annual adjustment payments, an amount representing the annual charge on a separate line for the licensee less the sum of the annual charges on the additional costs incurred by the licensee in establishing joint use and (b) the licensee's share of the total annual savings. This share is the ratio of the licensee's typical separate line costs to the sum of the typical separate line costs of each of the parties.

The annual adjustment payments can also be stated as follows:

| | | | | | | |
|---|----------|---|--------|---|------|--|
| Licensee's annual adjustment payment | (equals) | Annual charges saved by Licensee through not having to build a separate line | (less) | Licensee's appropriate percentage | (of) | Total savings in annual charges realized through joint use. |
|---|----------|---|--------|---|------|--|

The cost in place of a line of poles is made up of a number of factors including such items as right-of-way solicitation, clearing, staking, direct labor and material costs of bare poles in place and pro rata shares of construction supervision and overhead. These costs, for a specific area, may differ considerably from corresponding costs in other parts of the country. These variations in pole line costs will, however, affect both power and telephone lines to about the same degree.

AMENDMENT TO ARTICLE XI, OF GENERAL AGREEMENT
FOR JOINT USE OF WOOD POLES IN RURAL AREAS

The Electrical Distributor and the Telephone Company agree that the following amendment shall be a part of the Agreement between the parties dated January 1, 1973, and amended on September 18, 1981.

Amend Section E, Article XI by deleting the first sentence thereof and substituting in its place the following:

"Adjust payments per pole due from one party as licensee to the other party or owner shall, subject to the provisions of Article XII, be \$13.95 per annum by the Electrical Distributor for each jointly used pole owned by the Telephone Company and \$11.25 per annum by the Telephone Company for each jointly used pole owned by the Electrical Distributor."

Gentlemen:

Subject: Joint Use Agreement Between

Kentucky 528 Kentucky
and

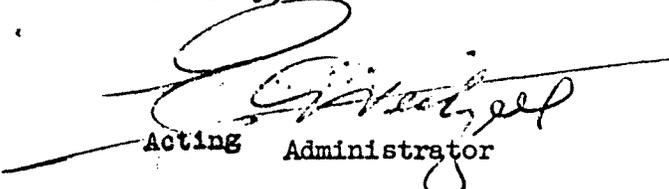

Kentucky 52 Fleming

We are enclosing one copy of the above joint use agreement which has been approved. This agreement sets forth the basis for practicing joint use of facilities. Before entering into specific joint use, the procedures outlined in the agreement must be followed by both parties.

The construction and engineering of facilities for joint use require the full coordination of the activities of both parties. Engineering determinations acceptable to both must be made as to the lines to be used, pole changeouts and additions, and any rearrangement of facilities which may be needed. Such alterations as are necessary should be scheduled promptly to avoid costly delay. Cooperation of both parties will ensure an orderly program permitting maximum benefits of joint use consistent with sound engineering standards. Continued close cooperation will be essential to provide adequate and reliable service to both electric consumers and telephone subscribers.

The services of REA field personnel are always available to you should questions arise regarding this agreement.

Sincerely,

Acting Administrator

Re: General Agreement Joint Use of Wood Poles between GTE South
Incorporated and Fleming-Mason RECC Electric Company, dated 1/1/73
(the "Agreement")

Dear Sir or Madam:

On October 31, 2001, Verizon South Inc. ("Verizon") entered into a definitive agreement (the "Purchase Agreement") with Kentucky ALLTEL, Inc., a subsidiary of ALLTEL Corporation ("ALLTEL"). Under the terms of the Purchase Agreement Verizon will transfer to ALLTEL certain telephone operations and related assets located in Kentucky (the "Transaction"). The above referenced Agreement is one of the assets to be transferred as a part of the Transaction.

Until the closing of the Transaction, Verizon will continue to operate in the current manner and will continue to be responsible to perform those obligations under the Agreement that arise prior to the transfer to ALLTEL. Upon Closing of the Transaction, ALLTEL will be assigned all of Verizon's rights and obligations under the Agreement, to the extent such obligations arise after the closing date.

By this letter, Verizon is requesting your consent to the assignment of the Agreement to ALLTEL as a part of the Transaction. Please indicate your consent by executing the letter where indicated in the space provided below and returning it in the enclosed pre-paid envelope at your earliest convenience, but by no later than **February 21, 2002**. The enclosed copy should be retained for your records. By consenting to the assignment of the Agreement you also agree that, after the closing of the Transaction, Verizon will have no further obligations to you under the Agreement, and that ALLTEL shall be responsible for all obligations thereunder after the closing.

KY-714.014

WIN2301

Your consent will remain effective through the closing of the Transaction. You will be contacted by ALLTEL who will advise you of the closing date and the new contact information.

We appreciate your prompt attention to this matter. Should you have any questions, please contact the undersigned at (972)718-3289 or Paula Valdez at (972)718-4902.

Sincerely,

Erin M. Welton

JOINT USE AGREEMENT

THIS AGREEMENT, MADE THIS 8th day of April, 1992,
by and between the ELECTRIC PLANT BOARD OF THE CITY OF GLASGOW,
incorporated under the laws of the State of Kentucky, hereinafter
called the "Electric Company", party of the first part, and GTE
SOUTH, INC., a Virginia Corporation, hereinafter called the
"Telephone Company", party of the second part.

WITNESSETH:

WHEREAS, the Electric Company and the Telephone Company desire to
establish joint use of their respective poles when and where
joint use shall be of mutual advantage; and

WHEREAS, because of changed conditions and experience gained, and
to facilitate administration of joint use, the parties desire to
terminate the present contract dated July 1, 1966, between the
Electric Company and the Telephone Company and to enter into a
new joint use agreement giving due recognition to such change of
conditions, experience and the effective administration of joint
use;

NOW, THEREFORE, in consideration of the premises and the mutual
covenants herein contained, the parties hereto, for themselves,
their successors and assigns, do hereby covenant and agree as
follows:

ARTICLE I
DEFINITIONS

For the purpose of this Agreement, the following terms when used herein, shall have the following meanings:

A. NORMAL SPACE - means sufficient space on a joint use pole for the use of each party, taking into consideration requirements of the National Electric Safety Code.

Except only as to the portion of its said space which, by the terms of the National Electrical Safety Code, may be occupied by certain attachments therein described of the other party, this space is specifically defined as follows:

- (1) for the Electric Company, the uppermost six (6) feet;
- (2) for the Telephone Company, a space of three (3) feet at sufficient distance below the space of the Electric Company to provide at all times the minimum clearance required by the specifications referred to in Article IV, and at sufficient height above the ground to provide proper vertical clearance for the lowest horizontally run line wires or cables attached in such space.

B. NORMAL JOINT USE POLE - means a poles which meets the

requirements of the National Electrical Safety Code for support and clearance of supply and communication conductors under conditions existing at the time joint use is established, or is to be created under known plans of either party. Specifically, a normal joint pole under this agreement shall be a 40 foot class 4 wood pole.

The foregoing definition of a "normal joint pole" is not intended to preclude the use of joint poles longer or shorter or of greater or less strength than the normal joint pole in locations where such poles will meet the known or anticipated requirements of the parties hereto.

- C. ATTACHMENTS - mean materials or apparatus now or hereafter used by either party in the construction, operation or maintenance of its plant carried on poles.
- D. CLEARANCE ATTACHMENTS - mean any attachment made to a pole of the owner for the purpose of obtaining clearance between plant of the Licensee and that of the Owner, where, in general, a pole for the purpose of supporting the Licensee's attachments would not be required if it were not for the presence of the other (Owner's) route. Guy poles are considered as part of the anchor and guy structure, and, as such, guy attachments are not considered as units to be counted

but are given the same treatment as clearance attachments.

- E. SUPPORTING ATTACHMENTS - mean attachments made on poles which, in general, relieve the Licensee of the necessity of providing a pole at or near the same location for the purpose of supporting its wires or cables.
- F. OWNER - means the party owning the pole to which attachments are made.
- G. LICENSEE - means the party having the right under this agreement to make attachments to a pole of which the other party is the Owner.

ARTICLE II

TERRITORY AND SCOPE OF AGREEMENT

This Agreement shall be in effect and shall cover all wooden poles of each of the parties now existing, hereinafter erected or acquired, within the common operating areas served by the parties hereto, when said poles are brought hereunder, excepting:

- A. Poles which, in the Owner's judgment, are necessary for its own sole use, and
- B. Poles which carry, or are intended to carry, circuits of a character that in the Owners's judgment proper rendering of its service now or in the future makes joint use of such poles undesirable.

ARTICLE III

PERMISSION FOR JOINT USE

Each party hereto hereby permits joint use by the other party of any of its poles when brought under this Agreement as herein provided, subject to the terms and conditions herein stated.

ARTICLE IV

SPECIFICATIONS

Joint use of poles covered by this Agreement shall at all times be in conformity with terms and conditions of the current issue of the National Electrical Safety Code as to minimum requirements, and such revisions and amendments thereto from time to time as may be necessary by reason of developments and improvements in the art as may be mutually agreed upon and approved in writing by the Superintendent or Engineering Manager of the Electric Company and the Section Manager - OSP Engineering of the Telephone Company.

ARTICLE V

RIGHT OF WAY FOR LICENSEE'S ATTACHMENTS

- A. The Owner and Licensee will cooperate as far as may be practicable in obtaining right of way for both parties. When a written easement is secured it shall be sufficient detail for identification and recording, where required, and shall be subject to inspection by the other party upon request. However, no guarantee is given by the Owner of

permission from property owners, municipalities or others for the use of poles by the Licensee, and if objection is made thereto and the Licensee is unable to satisfactorily adjust the matter within a reasonable time, the Owner may at any time, upon thirty (30) days notice in writing to the Licensee, require the Licensee to remove its attachments from the pole involved, and the Licensee shall within thirty (30) days after receipt of said notice, remove its attachments from such poles at its sole expense. Should the Licensee fail to remove its attachments as herein provided, the Owner may remove them at the Licensee's expense, without any liability whatever for such removal or the manner of making it, for which expense the Licensee shall reimburse the Owner on demand.

- B. Where the parties mutually agree that right of way maintenance on existing joint use lines is necessary for the protection of their service, the cost of removal of dead or dangerous trees shall be shared equally.
- C. Each party shall be responsible for trimming its own circuits at its own expense where right of way is maintained by trimming (side growth, undergrowth or overhead growth).
- D. As between the parties to this contract, the company performing the work shall assume all responsibility of claims and suits which may arise from this work.

ARTICLE VI

PLACING, TRANSFERRING OR REARRANGING ATTACHMENTS

- A. Whenever either party desires to reserve space on any pole of the other, for any attachments requiring space thereon, not then specifically reserved hereunder for its use, it shall make written application therefor, specifying in such notice the location of the pole in question, the number and kind of attachments which it desires to place thereon, and the character of the circuits to be used. Within five (5) days after the receipt of such notice, the Owner shall notify the Applicant in writing whether or not said pole is one of those excluded from joint use under the provisions of Article II. Upon receipt of notice from the Owner that said pole is not of those excluded, and after completion of any transferring or rearranging which is then required in respect to attachments on said poles, including any necessary pole replacements as provided in Article VII "A", the Applicant shall have the right as Licensee hereunder to use said space for attachments and circuits of the character specified in said application in accordance with the terms of this agreement. Service wire attachments or emergency construction can be placed in accordance with the specifications, upon verbal approval, subsequently approved in writing.

- B. Except as herein otherwise expressly provided, each party shall place, maintain, rearrange, transfer and remove its own attachments, and shall at all times perform such work promptly and in such a manner as not to interfere with work being done by the other party.
- C. On all lines, each party shall install suitable anchors for its own load requirements.

ARTICLE VII

ERECTING, REPLACING OR RELOCATING POLES

- A. Whenever any jointly used pole, or any pole about to be so used under the provisions of this Agreement, is insufficient in size or strength for the existing attachments and for the proposed immediate additional attachments thereon, the Owner shall promptly replace such pole with a new pole of the necessary size and strength, and make such other changes in the existing pole line, in which such pole is included, as may be made necessary by the replacement of such pole and the placing of the Licensee's circuits as proposed.
- B. Whenever it is necessary to change the location of a jointly used pole, by reason of any state, municipal or other governmental requirement, or the requirements of a property owner, the Owner shall, before making such change in location, give notice thereof in writing (except in cases of emergency when verbal notice will be given, and subsequently

confirmed in writing) to the Licensee, specifying in such notice the time of such proposed relocation, and the Licensee shall at the time so specified, transfer its attachments to the pole at the new location.

- C. Whenever, either party hereto is about to erect new poles within the territory covered by this Agreement, either as an additional pole line, as an extension of an existing pole line, or as the reconstruction of an existing pole line, it shall notify the other in writing, at least ten (10) days before beginning the work (shorter notice, including verbal notice subsequently confirmed in writing, may be given in case of emergency), and shall submit with such notice its plans showing the proposed location and size of the new poles and the character of circuits it will use thereon. The other party shall, within five (5) days after the receipt of such notice, reply in writing to the party erecting the new poles, stating whether such other party does, or does not, desire space on the said poles, and if it does desire space thereon, the character of the circuits it desires to use and the amount of space it wishes to reserve. This notice of desire to establish joint use should include detail plans of any changes in the plans of the other party which are desired in order to permit the establishment of joint use. If such party requests space on the new poles,

and if the character and number of circuits and attachments are such that the Owner does not wish to exclude the poles from joint use under the provisions of Article II, then poles suitable for the said joint use shall be erected in accordance with the provisions and the payment of costs as provided in paragraphs "D", "E" and "F" of this Article.

- D. In any case where the parties hereto shall conclude arrangements for the joint use of any new poles to be erected, and the party proposing to construct the new pole facilities already owns more than its proportionate share of joint poles, the parties shall take into consideration the desirability of having the new pole facilities owned by the party owning less than its proportionate share of the joint poles so as to work towards such a division of ownership of the joint poles. For the purpose of this Agreement, the proportionate share of ownership for the Electric Company shall be 50 percent of the total joint poles and for the Telephone Company 50 percent of the total joint poles.
- E. The cost of erecting joint poles coming under this Agreement, either as new pole lines, as extensions of existing pole lines, or to replace existing poles, either existing jointly used poles or poles not previously involved in joint use, shall be borne by the parties as follows:
1. A normal joint pole, or a joint pole shorter or smaller

than the normal pole, shall be erected at the sole expense of the Owner, except as provided in Section "F" of this Article.

2. A pole taller or stronger than the normal pole, the extra height and strength of which is due wholly to the Owner's requirements, shall be erected at the sole expense of the Owner.
3. In the case of a pole taller or stronger than the normal pole, the extra height and strength of which is due wholly to the Licensee's requirements, the Licensee shall pay to the Owner a sum equal to the difference between the cost in place of such pole and the cost in place of a normal joint pole, the rest of the cost of erecting such pole to be borne by the Owner.
4. In the case of a pole taller or stronger than the normal pole, the extra height and strength of which is due to the requirements of both parties, the Licensee shall pay to the Owner a sum equal to one-half the difference between the cost in place of such pole and the cost in place of a normal joint pole, the rest of the cost of erecting such pole to be borne by the Owner.
5. In the case of a pole taller or stronger than the normal pole, where height and strength in addition to

that needed for the purpose of either or both of the parties hereto is necessary in order to meet the requirements of public authority or of property owners, one-half of the excess cost of such pole due to such requirements shall be borne by the Licensee; the rest of the cost of such pole to be borne as provided in that one of the preceding paragraphs 1, 2, 3, or 4, within which it would otherwise properly fall.

- F. In any case where a pole is erected hereunder to replace another pole solely because such other pole is not tall enough, or of the required strength to provide adequately for the Licensee's requirements, or where such poles, whether it carry space reserved for the Licensee's use or not, had at the time of its erection, been pronounced by the Licensee as satisfactory and adequate for its requirements, the Licensee shall, upon erection of the new pole, pay to the Owner, in addition to any amounts payable by the Licensee under paragraphs 3, 4 or 5, of Section "E" of this Article, a sum equal to the sacrificed life of the pole which is replaced (Then value in place of the pole replaced plus cost of removal less salvage), and the pole removed shall remain the property of the Owner. In any case where the other party by mutual consent erects and owns a joint pole to replace an existing pole of the Owner (instead of

the Owner doing so as it is contemplated by Section "A" of this Article that the Owner will do), such other party shall pay to the Owner of the replace pole a sum equal to the then value in place of the pole which is replaced, and the pole removed shall thereupon become the property of such other party which has erected the replacing pole.

- G. When replacing a jointly used pole carrying aerial cable terminals, underground connections or transformer equipment, the new pole shall be set in the same hole which the replaced pole occupied, unless special conditions make it necessary or mutually desirable to set it in a different location.
- H. Any payments made by the Licensee under the foregoing provisions of this Article for poles taller than normal shall not in any way affect the ownership of said poles.
- I. Any payment as provided in the foregoing provisions of this Article may be based on mutually agreeable predetermined amounts. The amounts agreed to shall be subject to revision at the request of either party at the end of each three year period, or at other times as may be mutually agreed to. The amounts agreed to shall be evidenced by an exchange of letters, as provided under Article XXII.

ARTICLE VIII

MAINTENANCE OF POLES AND ATTACHMENTS

- A. The Owner shall, at its own expense, maintain its joint poles in a safe and serviceable condition, and in accordance with Article IV of this Agreement and the requirements of the National Electrical Safety Code, and shall replace subject to the provisions of Article VII, such of said poles as become defective.
- B. Each party shall, at its own expense, at all times maintain all of its attachments in accordance with Article IV of this agreement and the National Electrical Safety Code and keep them in safe condition and in thorough repair. In all cases, the broadband and fiber optic communications plant owned by the Electric Company shall be considered "communications conductors used in the operation of supply lines" with respect to the National Electrical Safety Code and thus may be placed within 16 inches of supply cables meeting Rule 230C1; 2, or 3; or neutral conductors meeting Rule 230E1 of the 1990 Edition of the National Electrical Safety Code.

ARTICLE IX

PROCEDURE WHEN CHARACTER OF CIRCUITS IS CHANGED

When either party desires to change the character of its circuits on jointly used poles, such party shall give thirty (30) days

notice to the other party of such contemplated change, and in the event that the party agrees to joint use with such changed circuits, then the joint use of such poles shall be continued with such changes in construction as may be necessary to meet the requirements of the National Electrical Safety Code, and the provision noted in Article VIII, Paragraph B, being made at the expense of the party desiring to make the change. In the event, however, that the other party fails within thirty (30) days from receipt of such notice to agree in writing to such change, then both parties shall cooperate in accordance with the following plan:

- A. The parties hereto shall determine the most practical and economical method of effectively providing for separate lines, and the party whose circuits are to be moved shall promptly carry out the necessary work.
- B. The ownership of any new line constructed under the foregoing provision in a new location shall vest in the party for whose use it is constructed. The net cost of establishing service in the new location shall be exclusive of any increased cost due to the substitution for existing facilities of a substantially new or improved type or of increased capacity but shall include, among other items, the cost of the new pole line, including rights of way, the cost of removing

attachments from the old poles to the new location, and the cost of placing the attachments on the poles in the new location.

ARTICLE X

BILLS AND PAYMENTS FOR WORK

Upon completion of work performed hereunder by either party, the expense of which is borne wholly or in part by the other, the party performing the work shall present to the other party, within thirty (30) days after completion of such work, a statement showing the amount due, and such other party shall, within thirty (30) days after such statement is presented, pay to the party doing the work the amount due.

ARTICLE XI

ABANDONMENT OF JOINTLY USED POLES

- A. If the Owner desires at any time to abandon any jointly used pole, it shall give the Licensee notice in writing to that effect at least thirty (30) days prior to the date on which it intends to abandon such pole. If, at the expiration of such period, the Owner shall have no attachments on such pole, but the Licensee shall not have removed all of its attachments therefrom, such pole shall thereupon become the property of the Licensee, and the Licensee shall save harmless the former Owner of such pole from all obligation, liability, damages, cost, expenses or charges incurred

thereafter, because of, or arising out of, the presence or condition of such pole or any attachments thereon; and shall pay the Owner a sum equal to the then value in place of such abandoned pole, or poles, or such other equitable sum as may be agreed upon between the parties. Credit shall be allowed for any payments which the Licensee may have made under the provisions of Article VII, Sections "E" and "F", when the pole was originally set, provided the Licensee furnishes proof of such payment.

- B. The Licensee may at any time abandon the use of a joint pole by giving due notice thereof in writing to the Owner and by removing therefrom any and all attachments it may have thereon.

ARTICLE XII

RENTAL PAYMENTS

- A. On or about December 1st of each year, each party, acting in cooperation with the other, subject to the provisions of the following paragraph of this Article, shall have ascertained and tabulated the total number of poles in use by each party as Licensee for which rental payment shall be made to the other party as Owner.
- B. No rental will be paid if the ownership is within the ranges specified in Article VII, paragraph D, as the proportionate share of ownership of the parties.

- C. If one party owns less than its proportionate share of joint use poles it will do one of the following:
1. Purchase enough poles from the other party to bring its ownership within the specified range. Payment for such purchase shall be an amount equal to the then value in place of the poles so purchased.
 2. Pay to the other an annual rental of [REDACTED] [REDACTED] per pole for the difference between the number of poles it should own at its minimum percent and the number of poles actually owned. The payment of any such rental shall be for the calendar year in which the tabulation is made under paragraph A of this Article.

ARTICLE XIII

PERIODICAL REVISION OF RENTALS

- A. At any time after January 1, 1995, and at intervals of not less than five (5) years thereafter, the ownership ranges and rentals applicable under this Agreement shall be subject to joint review and revision, as provided for under Section "B" of this Article, upon written request of either party. In case of revision the new ownership ranges and rental agreed upon shall apply, starting with the annual bill next rendered and continuing until again adjusted.
- B. Revisions of the rental payment shall be based on experience

resulting from previous administration of this Agreement. Any changes shall take into account the original cost factors pertinent to the establishing of the pole facilities involved in all joint use existing under this Agreement at the time of the said review.

ARTICLE XIV

DEFAULTS

- A. If either party shall make default in any of its obligations under this Agreement, and such default shall continue thirty (30) days after notice in writing from the other party, all rights of the party in default hereunder pertaining to the establishment of future joint use shall be suspended, and if such default shall continue for a period of ninety (90) days after such suspension, the other party may forthwith terminate the right of both parties to make additional attachments. Any such termination of the right to make additional attachments by reason of any such default shall not, however, abrogate or terminate the right of either party to maintain the attachments theretofore made on the poles of the other, and all such prior attachments shall continue thereafter to be maintained pursuant to an in accordance with the terms of this Agreement, which Agreement shall, so long as said attachments are continued, remain in full force and effect solely and only for the purpose of

governing and controlling the rights and obligations of the parties with respect to said attachments.

- B. If either party shall make default in the performance of any work which it is obligated to do under this contract, at its sole expense, the other party may elect to do such work, and the party in default shall reimburse the other party for the cost thereof. Failure on the part of the defaulting party to make such payment within thirty (30) days upon presentation of bills therefor shall, at the election of the other party, constitute a default under Section "A" of this Article.

ARTICLE XV

LIABILITY AND DAMAGES

Each party shall fully and completely indemnify the other with respect to all liability, claims, actions and demands to the extent same arise from or are attributable to:

- A. The condition of the pole owned by such party, to the extent that such condition was attributable to the acts and/or omissions of such party;
- B. The condition of attachments of such party to such pole;
- C. "Condition" as used herein shall include clearances.

ARTICLE XVI

EXISTING RIGHTS OF OTHER PARTIES

If either of the parties hereto has, prior to the execution of

this Agreement, conferred upon others, not parties to this Agreement, by contract or otherwise, rights or privileges to use any poles covered by this Agreement, nothing herein contained shall be construed as affecting said right or privileges, and either party hereto shall have the right, by contract or otherwise, to continue and extend such existing rights or privileges; it being expressly understood, however, that for the purpose of this Agreement, the attachments of any such outside party shall be treated as attachments belonging to the Grantor, and the rights obligations, and liabilities hereunder of the Grantor in respect to such attachments shall be the same as if it were the actual Owner thereof. Where municipal regulations require either party to allow the use of its poles for fire alarm, police or like signal systems, such use shall be permitted under the terms of this Article.

ARTICLE XVII

SERVICE OF NOTICES

Wherever in this Agreement notice is provided to be given by either party hereto to the other, such notice shall be in writing and given by letter mailed, or personal delivery, to the Electric Company at its official office at Glasgow, Kentucky, or to the Telephone Company, at its office at Lexington, Kentucky, as the case may be, or to such other address as either party may, from time to time, designate in writing for that purpose.

ARTICLE XVIII

TERMINATION OF AGREEMENT

This Agreement shall continue in full force and effect until the 31st day of December, 1997, and shall continue thereafter until terminated, insofar as the making of additional attachments is concerned, by either party, giving to the other one (1) year's notice in writing of intention to terminate the right of making additional attachments. Any such termination of the right to make additional attachments shall not, however, abrogate or terminate the right of either party to maintain the attachments theretofore made on the poles of the other, and all such prior attachments shall continue thereafter to be maintained, pursuant to and in accordance with the terms of this Agreement, which Agreement shall, so long as said attachments are continued, remain in full force and effect solely and only for the purpose of governing and controlling the rights and obligations of the parties with respect to said attachments.

ARTICLE XIX

ASSIGNMENT OF RIGHTS

Except as otherwise provided in this Agreement, neither party hereto shall assign or otherwise dispose of this Agreement, in whole or in part, without the written consent of the other party; except that either party shall have the right to mortgage any or all of its property, rights, privileges and franchises, or lease

or transfer any of them to another corporation organized for the purpose of conducting a business of the same general character as that of such party, or to enter into any merger or consolidation; and, in case of the foreclosure of such mortgage, or in case of such lease, transfer, merger, or consolidation, its right and obligations hereunder shall pass to such successors and assigns; and provided, further, that subject to all of the terms and conditions of this Agreement, either party may permit any corporation conducting a business of the same general character as that of such party, with which it is affiliated, or connecting with it, the rights and privileges of this Agreement, in the conduct of its said business; and for the purpose of this Agreement, all such attachments maintained on any such pole by the permission as aforesaid of either party hereto shall be considered as the attachments of the party granting such permission and the rights, obligations and liabilities of such party under this Agreement, in respect to such attachments, shall be the same as if it were the actual owner thereof.

ARTICLE XX

WAIVER OF TERMS OR CONDITIONS

The failure of either party to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in

APPROVED

FD

LAW DEPT.

full force and effect.

ARTICLE XXI

EXISTING CONTRACTS

All existing contracts between the parties hereto for the joint use of wood poles upon a rental basis within the territory covered by this Agreement, are, by mutual consent, hereby abrogated and annulled.

ARTICLE XXII

SUPPLEMENTAL ROUTINES AND PRACTICES

Nothing in the foregoing shall preclude the parties to this Agreement from preparing such supplemental operating routines or working practices as they mutually agree to be necessary or desirable to effectively administer the provisions of this Agreement.

IN WITNESS WHEREOF, the parties hereto have caused these present to be executed in duplicate, and their corporate seals to be affixed thereto by their respective officers thereunder duly authorized, on the day and year first above written.

COMMUNICATION COMPANY TRANSFER AGREEMENT BETWEEN
VERIZON SOUTH INC.

AND

GLASGOW ELECTRIC PLANT BOARD

THIS TRANSFER AGREEMENT is entered into this 1ST day of FEBRUARY, 2002 by VERIZON SOUTH INC., a corporation of the State of Virginia (hereinafter referred to as the "Telephone Company") and by Glasgow Electric Plant Board located in Glasgow, KY (hereinafter referred to as the "Power Company").

WITNESSETH:

WHEREAS, the Power Company and the Telephone Company in cooperative effort do presently participate in the joint use of poles under separate agreement for the purpose of providing electric and telephone service to their respective customers; and

WHEREAS, the Telephone Company owns cables, drops, and other facilities for the provision of telephone service which are installed upon or attached to poles owned by the Power Company; and

WHEREAS, the Power Company, from time to time, must replace existing poles with new poles, thereby requiring the cables, drops or other facilities of the Telephone Company to be transferred from the existing poles to the replacement poles; and

WHEREAS, both the Power Company and the Telephone Company desire that the telephone cables, drops, and other facilities be transferred by the Power Company at the time of pole replacement by the Power Company;

NOW, THEREFORE, in consideration of the mutual covenants, terms, and conditions set forth herein, the parties do hereby agree as follows:

1. Whenever, for any reason, the Power Company replaces existing poles which are owned by the Power Company to which are attached facilities of the Telephone Company, the Power Company may, at its discretion, transfer the cables, drops, or other facilities of the Telephone Company from the existing poles to the replacement poles.
2. The Power Company may, under the conditions described above, transfer cables and drops which are attached to the poles with tangent or dead-end type construction and where restringing, resagging, or repair of such cables or drops is not required. The Power Company may also transfer down guys to pre-existing Telephone Company anchors. Transferring of telephone attachments requiring the addition of

special hardware, splicing or replacement, and transferring of risers, pole mounted switchgear, splicing cabinets, terminal boxes, and amplifiers are specifically excluded from this Agreement.

3. The Power Company will not undertake the partial transfer of the attachments of the Telephone Company on any pole, except in the event of emergency repair situations where the Telephone Company's cables or drops are broken or require other repair work as described in 2 above. The Power Company's responsibility under this Agreement is limited to Power Company poles changed out after the effective date of this Agreement.

4. Transfers will be made in accordance with the specifications of the Telephone Company and shall be in conformity with the terms and provisions of the National Electrical Safety Code and any other applicable binding orders, statutes, ordinances, rules and regulations of any other governmental body.

5. When the Power Company intends to replace a pole (or poles) to which the Telephone Company cables, drops, or facilities are attached, and when the Power Company determines that it will not transfer such cables, drops, or facilities, it will so notify the Telephone Company as provided in the Joint Use Agreement so as to enable the Telephone Company to perform the transfer.

6. Each Party agrees not to assign its interests under this Agreement without prior written approval of the other Party. However, if the assignment is made to a subsidiary, parent or other affiliated corporation, such consent is not required.

7. Each Party shall and hereby does indemnify and hold the other Party and its officers, employees and agents free and harmless from any and all legal and other expenses, suits, claims, damages, costs, fines, penalties, liabilities or other obligations of whatsoever kind, for damage or destruction of property and injury and/or death of persons, resulting from or connected with the indemnifying Party's negligent acts or omissions under this Agreement, including but not limited to the operation, maintenance or defective condition of such Party's equipment, provided however, that nothing in this Section or elsewhere in this Agreement shall make any Party hereto liable for consequential damages or loss of profits.

8. The engineering or construction field forces of the Power Company and the Telephone Company will meet/communicate from time to time with a view toward reaching an agreement on miscellaneous hardware to be provided by the Telephone Company to the Power Company to facilitate the performance of this Agreement. In so doing, the Parties anticipate that the Telephone Company shall, at its own expense, provide the Power Company a minimal stocking level for vehicles expected to be used in transfers by the Power Company. Additionally, when called upon by the Power Company, the Telephone Company will deliver such additional hardware as is required by the Power Company to meet its obligations under the Agreement at such reasonable times and locations as agreed upon by the Parties.

9. In consideration for the services provided by the Power Company pursuant to this Agreement, the Telephone Company shall pay to the Power Company the sum of \$40.00 (forty dollars) per pole where the Telephone Company cables, drops, and facilities are transferred by the Power Company, without regard to the number of cables or drops transferred. Billing and payments shall be in accordance with the procedures already established by the Joint Use Agreement.

10. This Agreement shall remain in full force and effect until terminated by either Party upon providing the other with thirty (30) days written notification as follows:

To: Glasgow Electric Plant Board
P.O. Box 1809
Glasgow, KY 42142-1809
Attn: Superintendent

To: Verizon South Inc.
4100 N. Roxboro Road
Durham, NC 27704
Attn: Lee C. Berkley NC999058
(Local Contact:

11. The term of this Agreement shall be one year from the date it is executed. This Agreement will be automatically renewed for successive one-year terms unless either Party notifies the other of its intent to terminate the Agreement. Such notice must be provided at least 90 days in advance of the end of the one-year term.

12. The Agreement together with its exhibits constitutes the entire Agreement between the Parties and cancels all contemporaneous or prior Agreements, whether written or oral, with respect to the subject matter of this Agreement. No modifications shall be made to this Agreement unless in writing and signed by appropriate representatives of the Parties.

IN WITNESS WHEREOF, the parties hereto have caused these presents to be duly executed on this 1st, day of February, 2002.

GENERAL AGREEMENT

JOINT USE OF WOOD POLES IN RURAL AREAS

Contract Revised January, 1971

PREAMBLE

Grayson Rural Electric Cooperative Corporation, a corporation organized under the laws of the State of Kentucky, (hereinafter called the "Electrical Distributor"), and General Telephone Company of Kentucky, a corporation organized under the laws of the State of Delaware (hereinafter called the "Telephone Company"), desiring to cooperate in the joint use of their respective poles, erected or to be erected within the rural areas in which both parties render service in the State(s) of

Kentucky, whenever and wherever such use shall, in the estimation of both parties, be compatible with their respective needs, do hereby, in consideration of the premises and the mutual covenants herein contained, covenant and agree for themselves and their respective successors and assigns as follows:

ARTICLE I

SCOPE OF AGREEMENT

(a) This Agreement shall be in effect in the areas in which both of the parties render service in the State(s) of Kentucky, and shall cover all wood poles now existing or hereafter erected in the above territories, except where said poles are covered by meter brought under an urban contract of the parties, when said poles are brought under this Agreement in accordance with the procedure hereinafter provided.

(b) Each party reserves the right to exclude any of its facilities from joint use.

(c) It is the intention of the parties that adequate electric and telephone service shall be made available to the widest practicable number of rural users in the above territory.

ARTICLE II

EXPLANATION OF TERMS

For the purpose of this Agreement, the following terms shall have the following meanings:

1. A JOINT POLE is a pole jointly used by both parties.
2. A NORMAL JOINT POLE is a pole which is just tall enough to provide normal spaces, as normal space is hereinafter defined, for the respective parties and just strong enough to meet the requirements of the specifications mentioned in Article III for the attachments ordinarily placed by the parties in their respective normal spaces. Such pole for the purpose of this Agreement shall be a 35 foot class 5 wood pole as classified by the pole classification tables of the American Standards Association. *amended 10/16/79*

3. SPACE is the linear portion of a joint pole parallel to its axis reserved for the exclusive use of one of the parties (subject only to the exceptions provided for in this Article and the specifications mentioned in Article III which in certain instances permit the making of certain attachments by one party in the space reserved for the other party).

4. NORMAL SPACE is the following described space:

- a. For the Electrical Distributor the uppermost 6 1/2 feet, measured from top of pole.
- b. For the Telephone Company a space of 2 feet, at a sufficient distance below the space of the Electrical Distributor to provide at all times the minimum clearance required by the specifications mentioned in Article III

What is this?

(e) Wherever practicable, double thimble anchor rods with anchors of sufficient holding power to sustain any unbalanced loads of the two parties shall be installed and used jointly. The ownership of the double thimble anchor rods and anchors will be vested in the owner of the pole. In any case, where one party provides at the request of the other party double thimble anchor rods and anchors for the use of both parties the party requesting the double thimble anchor rods and anchors shall pay to the party placing the double thimble anchor rods and anchors a sum equal to half of the cost of the anchors and anchor rods in place. In cases where the existing anchors are adequate for the needs of both parties the party desiring additional guys may where necessary install an adapter at its own expense. In cases where existing anchor rods and anchors are adequate for the needs of only one party the party desiring additional guys and anchors may where necessary install anchors and anchor rods at no expense to the other party or in the case of right-of-way restrictions may provide a double thimble anchor rod and anchor in place of the existing anchor rod and anchor to which the other party can attach its existing guy at its own expense.

(f) The cost of establishing the joint use of existing poles including the making of any necessary pole replacements, shall be borne by the parties hereto in the manner provided in Article VIII - Division of Costs.

ARTICLE V ESTABLISHING JOINT USE OF NEW POLES

(a) Whenever either party hereto requires new pole facilities for an additional pole line, an extension of an existing pole line, or in connection with the reconstruction of an existing pole line, it shall promptly notify the other party to that effect in writing (verbal notice subsequently confirmed in writing may be given in cases of emergency) stating the proposed location and character of the new poles and the character of circuits it intends to use thereon and indicating whether or not such pole facilities will be, in the estimation of the party proposing to construct the new pole facilities, susceptible of joint use. Within a reasonable period after the receipt of such notice, the other party shall reply in writing, stating whether it does, or does not, desire space on the said poles and, if it does desire space thereon, the character of the circuits it desires to use and the amount of space it wishes to reserve. If such other party requests space on the proposed new poles and if the character and number of its circuits and attachments are such that the party proposing to construct the new pole facilities does not consider joint use undesirable, then it shall erect poles suitable for such joint use, subject, however, to the provisions of Section (b) of this Article, and subject further to the condition that request by either party for space on proposed new poles of the other party under this Agreement shall be made in writing on the form attached hereto and identified as Appendix A or such other form as may be mutually agreed upon and shall comply with the procedure set forth in said approved form. The applicant for space on the poles shall be promptly notified in writing of the action taken on the application.

(b) In any case where the parties hereto shall conclude arrangements for the joint use of any new poles to be erected, and the party proposing to construct the new pole facilities already owns more than its proportionate share of joint poles, the parties shall take into consideration the desirability of having the new pole facilities owned by the party owning less than its proportionate share of joint poles so as to work towards such a division of ownership of the joint poles that neither party shall be obligated to pay to the other any adjustment payments because of their respective use of joint poles owned by the other, due regard being given to the desirability of avoiding mixed ownership of poles in a section of line.

Do we want them to make attachments for guys & anchors?

(c) Each party shall place its own attachments on the new joint poles and place guys and anchors to sustain any unbalanced loads caused by its attachments except as otherwise provided under Article IV, Section (e). The party owning the pole line shall provide initial right-of-way clearance 15 feet on each side of the center line to the extent practicable, all right-of-way in excess of this 30 foot swath to be borne by the party requiring the additional width. Each party shall, with due diligence, attempt to execute its work promptly and in such manner as not to interfere with the service of the other party.

Should this be amended to 40'?

ARTICLE VI RIGHT OF WAY FOR LICENSEE'S ATTACHMENTS

While the owner and licensee will cooperate as far as may be practicable in obtaining rights-of-way for both parties on joint poles, the owner does not warrant or assure to the licensee any right-of-way privileges or easements on, over or across streets, alleys and public thoroughfares, and private or publicly owned property, and if the licensee shall at any time be prevented from placing or maintaining its attachments on the owner's poles, no liability on account thereof shall attach to the owner of the poles.

**ARTICLE VII
MAINTENANCE OF POLES AND ATTACHMENTS**

(a) The owner shall maintain its joint poles in a safe and servicable condition and in accordance with the specifications mentioned in Article III and shall replace, reinforce or repair such of these poles as become defective. In case of emergency, with the giving of verbal notice, licensee may replace joint poles, anchors and guys as may be considered necessary for public safety or the restoration of licensee's service, in which case the licensee shall be reimbursed by the owner in the full amount of the cost of labor and materials plus any applicable overhead expenses.

(b) When replacing a jointly used pole carrying terminals of aerial cable, underground connection, or transformer equipment, the new pole shall be set in the same hole which the replaced pole occupied unless special conditions make it necessary or mutually desirable to set it in a different location.

(c) Whenever it is necessary to replace or relocate a jointly used pole, the owner shall, before making such replacement or relocation, give reasonable notice thereof in writing (except in case of emergency, when verbal notice will be given and subsequently confirmed in writing) to the licensee, specifying in such notice the time of such proposed replacement or relocation and the licensee shall at the time so specified transfer its attachments to the new or relocated joint pole. Should the licensee fail to transfer its attachments to the new joint pole on the date specified for such transfer of attachments, the owner may elect to relinquish the ownership of the old pole from which it has removed its attachments, with the giving of verbal notice to be subsequently followed in writing. Such old pole shall thereupon, at no cost to the licensee, become the property of the licensee, and the licensee shall save harmless the former owner of such pole from all obligation, liability, damages, cost, expenses or charges incurred thereafter, and not arising out of anything theretofore occurring, because of, or arising out of, the presence or condition of such pole or of any attachments thereon. In instances where the Electrical Distributor is the owner of such pole the unused portion of the pole above the licensee's attachments shall be cut off and removed by the owner before relinquishing ownership, if the pole remains in structural conflict with the power route.

(d) Each party shall at all times maintain all of its attachments in accordance with the specifications mentioned in Article III and shall keep them in safe condition and in thorough repair. Where the parties mutually agree that right-of-way maintenance on existing joint use lines is necessary for the protection of their service, the cost of the following work shall be shared as follows:

① 1. The removal of dead or dangerous trees shall be shared equally.

Do we do this?
② 2. Chemical control or removal of undergrowth by cutting at the ground line in a swath measured fifteen feet on each side of the center line as follows:

a. 50% of the cost on routes supporting bare aerial wire telephone circuits shall be borne by each party.

③ b. 10% of the costs shall be borne by the Telephone Company, 90% by the Electrical Distributor on routes supporting telephone multiple pair insulated wire.

c. Costs will not be shared on routes supporting cable or abrasive resistant wire. Each party will provide for its own requirements.

④ (e) Each party shall be responsible for trimming its own circuits at its own expense where right-of-way is maintained by trimming (side growth, undergrowth or overhead growth).

(f) Any existing joint use construction of the parties hereto which does not conform to the specifications mentioned in Article III shall be brought into conformity therewith as soon as practicable.

When such existing construction shall have been brought into conformity with said specification, it shall at all times thereafter be maintained as provided in Sections (a) and (d) of this Article.

(g) The cost of maintaining poles and attachments and of bringing existing joint use construction into conformity with said specifications shall be borne by the parties hereto in the manner provided in Article VIII - Division of Costs.

**ARTICLE VIII
DIVISION OF COSTS**

(a) The cost of erecting new joint poles coming under this Agreement, to construct new pole lines, to make extensions to existing pole lines, or to replace existing poles, except as covered in (c) below, shall be borne by the parties as follows:

1. A normal joint pole, or joint pole smaller than normal, shall be erected at the sole expense of the owner.
2. A pole larger than the normal, the extra height or strength of which is due wholly to the owner's requirements including requirements as to keeping the owner's wires clear of trees shall be erected at the sole expense of the owner.
3. In the case of a pole larger than the normal, the extra height or strength of which is due wholly to the licensee's requirements including requirements as to keeping the licensee's wires clear of trees, the licensee shall pay to the owner a sum equal to the difference between the cost in place of such pole and the cost in place of a normal joint pole, the rest of the cost of erecting such pole to be borne by the owner, except insofar as otherwise provided in Section (c) of this Article.
- * 4. In the case of a pole larger than the normal, the extra height or strength which is due to the requirements of both parties or the requirements for proper ground clearance or of public authorities or of property owners, (other than requirements with regard to keeping the wires of one party only clear of trees), the difference between the cost in place of such pole and the cost in place of a normal joint pole shall be shared equally by the licensee and the owner, the rest of the cost of erecting such pole to be borne by the owner.
5. A pole, including all appurtenances or fixtures, erected between existing poles to provide sufficient clearance and furnish adequate strength to support the circuits of both the owner and the licensee, which it would have been unnecessary to erect if joint use had not been undertaken, shall be erected at the sole expense of the licensee.

(b) Any payments for poles made by the licensee under any foregoing provisions of this Article shall not entitle the licensee to the ownership of any part of said poles for which it has contributed in whole or in part.

(c) Where an existing jointly used pole or a non-joint pole is prematurely replaced by a new one solely for the benefit of the licensee, the cost of the new pole shall be divided as specified in Section (a) of this Article and the licensee shall pay the owner the labor cost of removal of the existing pole and the labor cost of replacing or transferring of all appurtenances on the existing pole. The replaced pole shall be removed and retained by its owner.

(d) Each party shall place, maintain, rearrange, transfer and remove its own attachments at its own expense except as otherwise expressly provided herein.

(e) The expense of maintaining joint poles shall be borne by the owner thereof except that the cost of replacing poles shall be borne by the parties hereto in the manner provided in Sections (a) and (c) of this Article.

(f) Where service drops of one party crossing over or under lines of the other party are attached to the other party's poles, either directly or by means of a pole top extension fixture, the cost shall be borne as follows:

1. Pole top extension fixtures shall be provided and installed at the sole expense of the party using them.
- * 2. Where an existing pole is replaced by a taller one to provide the necessary clearance the party owning the service drop shall pay to the party owning the pole the cost of the new pole plus the labor costs of replacing or transferring of the appurtenances on the existing pole, the owner of the existing pole to remove and retain such pole at his own expense.

(g) Payments made by either party to the other under the provisions of this Article may be based on the estimated or actual cost as mutually agreed upon (including overhead) of making such changes but in no event, however, shall either party be required to pay for such changes more than 120% of the estimated cost supplied by the other if such cost estimate shall have been requested and furnished before the changes were made.

**ARTICLE IX
PROCEDURE WHEN CHARACTER OF CIRCUITS IS CHANGED**

When either party desires to change the character of its circuits on jointly used poles, such party shall give immediate notice to the other party of such contemplated change and in the event that the party agrees in writing to joint use with such changed circuits, then the joint use of such poles shall be continued with such changes in construction as may be required to meet the terms of the specifications mentioned in Article III for the character of circuits involved and such other changes as may be agreed upon. The parties shall cooperate to determine the equitable apportionment of the net expense of such changes. In the event, however, that the other party fails within 90 days from receipt of such notice to agree in writing to such change in character of circuits, then both parties shall cooperate in accordance with the following plan:

1. The parties hereto shall determine the most practical and economical method of effectively providing for separate lines, either overhead or underground, and the party whose circuits are to be moved shall carry out the necessary work as promptly as practicable.
2. The net costs of re-establishing such circuits in the new location as are necessary to furnish the same business facilities that existed in the joint use section at the time such change was decided upon, shall be borne by the licensee; provided, however, that the owner shall bear the cost whenever the change was occasioned by the necessities of the owner. When the net costs are borne by the owner they shall not include the cost of the new pole line constructed by the licensee.

Unless otherwise agreed by the parties, ownership of any new line or underground facilities constructed under the foregoing provisions in a new location shall vest in the party for whose use it is constructed.

**ARTICLE X
ABANDONMENT OF JOINT USED POLES**

(a) If the owner desires at any time to abandon any jointly used pole, it shall, except as provided in Article VII, Section (c), give the licensee notice in writing to that effect at least 60 days prior to the date on which it intends to abandon such pole. If at the expiration of said period the owner shall have no attachments thereon, such pole shall thereupon become the property of the licensee, and the licensee shall save harmless the former owner of such pole from all obligation, liability, damages, cost, expenses or charges incurred thereafter, and not arising out of anything theretofore occurring, because of, or arising out of, the presence or condition of such pole or of any attachments thereon; and shall pay the owner the then value in place of the pole to the owner. The former owner shall further evidence transfer of title to the pole by appropriate means. Credit shall be allowed for any payments which the licensee may have made under the provisions of Article VII - Division of Costs, when the pole was originally set, provided the licensee furnishes proof of such payment.

(b) The licensee may at any time abandon the use of a joint pole by removing therefrom any and all attachments it may have thereon and by giving such notice as may be mutually agreed upon.

**ARTICLE XI
ADJUSTMENT PAYMENTS**

(a) The parties contemplate that the use or reservation of space on poles by each party, as licensee of the other under this Agreement shall be based on the equitable sharing of the economies of joint use.

(b) On or about December 1st of each year, each party, acting in cooperation with the other, and subject to the provisions of Section (c) of this Article, shall ascertain and tabulate the total number of poles in use by each party as licensee, which tabulation shall indicate the number of poles in use by each party as licensee for which an adjustment payment by one of the parties to the other is to be determined as hereinafter provided.

(c) For the purpose of such tabulation, any pole used by the licensee for the sole purpose of attaching wires or cables thereto, either directly or by means of a pole top extension fixture, in order to provide clearance between the facilities of the two parties as distinguished from providing support for such wires or cables, shall not be considered as a joint pole.

(d) If there is provision under a separate agreement between the Telephone Company and the Electrical Distributor for facilities associated with power line carrier systems, the adjustment payment provisions of the

agreement of which this Article forms a part shall apply for poles on which both types of facilities are present and other adjustment payments shall apply. The adjustment payment provisions of this Agreement shall not apply, however, where only those facilities directly associated with the power line carrier systems are involved.

(e) Adjustment payments per pole due from one party as licensee to the other party or owner shall, subject to the provisions of Article XII, be [redacted] per annum by the Electrical Distributor for each jointly used pole owned by the Telephone Company and [redacted] per annum by the Telephone Company for each jointly used pole owned by the Electrical Distributor. The smaller total sum shall be deducted from the larger and the Electrical Distributor or the Telephone Company, as the case may be, shall pay to the other the difference between such amounts. The adjustment payment herein provided shall be paid within ten days after the bill has been submitted.

(f) At intervals not exceeding five (5) years an actual inventory of attachments shall be made by representatives of the parties. If there is any difference in the number of attachments found by the inventory and the number arrived at by tabulating those reported, correction will be made by retroactive billing for any attachments identified as being responsible for the difference, and any remaining difference will be spread evenly over the years since the last inventory, and billing adjusted accordingly except as otherwise provided under Article XII, Section (c).

ARTICLE XII
PERIODICAL ADJUSTMENT OF PAYMENTS

*when was the last
count?*

(a) At any time after 3 years from the date of this Agreement and at intervals of not less than 3 years thereafter, the payments applicable under this Agreement shall be subject to joint review and adjustment as provided for under Section (b) of this Article upon the written request of either party. In case of adjustment of payments as herein provided, the new payments agreed upon shall apply starting with the annual bill next rendered and continuing until again adjusted.

when was the last adjustment?

(b) All adjustments of rental shall be in accord with the provisions of Appendix B, and any changes shall take into account the cost factors originally involved in all joint use existing at that time under this Agreement.

(c) An actual inventory of attachments shall be made by representatives of the parties coincident with the effective date of any adjustment rentals.

ARTICLE XIII
DEFAULTS

(a) If either party shall default in any of its obligations under this Agreement and such default continues thirty (30) days after due notice thereof in writing by the other party, the party not in default may suspend the rights of the party in default insofar as concerns the granting of future joint use and if such default shall continue for a period of 90 days after such suspension, the party not in default may forthwith terminate this Agreement as far as concerns the future granting of joint use.

(b) If after reasonable notice either party shall make default in the performance of any work it is obligated to do under this Agreement at its sole expense, the other party may elect to do such work, and the party in default shall reimburse the other party for the cost thereof. Failure on the part of the defaulting party to make such payment within 30 days upon presentation of bills therefor shall, at the election of the other party, constitute a default under Section (a) of this Article.

ARTICLE XIV
EXISTING RIGHTS OF OTHER PARTIES

(a) If either of the parties hereto has, prior to the execution of this Agreement, conferred upon others, not parties to this Agreement, by contract or otherwise, rights or privileges to use any poles covered by this Agreement, nothing herein contained shall be construed as affecting such rights or privileges, and either party hereto shall have the right, by contract or otherwise, to continue and extend such existing rights or privileges, it being expressly understood, however, that for the purpose of this Agreement, the attachments of any such outside party, except those of a municipality or other public authority, shall be treated as attachments belonging to the grantor, and the rights, obligations, and liabilities hereunder of the grantor in respect to such attachments shall be the same as if it were the actual owner thereof.

(b) Where municipal regulations require either party to allow the use of its poles for fire alarm, police, or other like signal systems, such use shall be permitted under the terms of this Article, provided attachments of such parties are placed and maintained in accordance with the specifications mentioned in Article III.

ARTICLE XX
TERM OF AGREEMENT

This Agreement shall continue in full force and effect until the 31st day of December, 1976, and shall continue thereafter until terminated, insofar as the making of attachments to additional poles is concerned, by either party giving to the other one (1) years notice in writing of intention to terminate the right of making attachments to additional poles. Any such termination of the right to make attachments to additional poles shall not, however, abrogate or terminate the right of either party to maintain the attachments theretofore made on the poles of the other or additional attachments to such poles, and all such attachments shall continue thereafter to be maintained, pursuant to and in accordance with the terms of this Agreement, which Agreement shall, so long as said attachments are continued, remain in full force and effect solely and only for the purpose of governing and controlling the rights and obligations of the parties with respect to said attachments.

ARTICLE XXI
EXISTING CONTRACTS

All existing agreements between the parties hereto for the joint use of poles in rural areas are by mutual consent hereby abrogated and superseded by this Agreement.

Nothing in the foregoing shall preclude the parties to this agreement from preparing such supplemental operating routines or working practices as they mutually agree to be necessary or desirable to effectively administer the provisions of this Agreement.

ARTICLE XXII
APPROVAL OF THE ADMINISTRATOR

This Agreement, and any amendment thereof, shall be effective subject to the condition that, during any period in which the Electrical Distributor is a borrower from the Rural Electrification Administration, the Agreement and any amendment thereof shall have the approval in writing of the Administrator of the Rural Electrification Administration.

... witness whereof the parties hereto, have caused these presents to be executed in triplicate, and their corporate seals to be affixed thereto by their respective officers thereunto duly authorized, on the 1st day of January, 1972.

APPENDIX A

TO _____
Name of Electrical Distributor Date

Address Request Number

This is to request permission for this company to use jointly certain of your poles under the terms and conditions of our General Agreement for Joint Use of Wood Poles in Rural Areas, dated _____

The poles, including the number and character of circuits to be placed thereon, for which this permission is requested are those included in the pole lines indicated on the attached map, which also bears the above date and Request Number.

Our present plan is to start this work about _____, 19____
and complete the work about _____, 19____

If permission to use these poles is given by you, this Company will prepare and furnish to you, after engineering is complete, detailed construction plans and drawings, together with necessary maps, to indicate specifically your poles that we wish to use jointly, the number and character of the circuits to be placed on such poles, and any rearrangements of fixtures and equipment necessary, as well as any relocations or replacements of existing poles, and any additional poles that may be required, in accordance with the procedure provided in Articles IV and V of this Agreement.

If the joint use proposed is agreeable, please signify your approval of this request in the space provided and return the second copy to us.

APPENDIX B

This Appendix describes the basic principles and guides which have been used under this Agreement in setting the adjustment payments specified in Article XI and which are to be used in making periodical adjustment of payments as provided for in Article XII.

Under these principles the adjustment payments are intended, insofar as it is practicable, to result in a sharing of the economies realized by the joint use of pole plant in proportion to the relative costs of separate pole line construction.

The procedures outlined herein take into account the following objectives:

1. An equitable division of savings regardless of the number of jointly used poles owned by each party.
2. Adjustment payments applicable universally in the area covered by the Agreement regardless of whether the pole lines involved are initially constructed with joint use in view or are existing lines modified for joint use.
3. Appropriate allowance in the adjustment payments for additional costs incurred by each party in supplying 'normal joint poles', as defined in the Agreement, and the costs of other items required in the joint use of poles which would not be incurred in separate line construction.
4. Adjustment payments based on the costs of "typical miles" of separate lines, of newly constructed joint lines and of existing lines modified to make them suitable for joint use. The 'per mile' values of adjustment payments are then reduced to 'per pole' values for purposes of simplifying tabulations and to provide for the joint use of scattered poles.

The adjustment payments are the dollar values resulting from the licensee paying to the owner, as annual adjustment payments, an amount representing the annual charge on a separate line for the licensee less the sum of (a) the annual charges on the additional costs incurred by the licensee in establishing joint use and (b) the licensee's share of the total annual savings. This share is the ratio of the licensee's typical separate line costs to the sum of the typical separate line costs of each of the parties.

The annual adjustment payments can also be stated as follows:

| | | | | | | |
|---|----------|---|--------|---|------|--|
| Licensee's annual adjustment payment | (equals) | Annual charges saved by Licensee through not having to build a separate line | (less) | Licensee's appropriate percentage | (of) | Total savings in annual charges realized through joint use. |
|---|----------|---|--------|---|------|--|

The cost in place of a line of poles is made up of a number of factors including such items as right-of-way solicitation, clearing, staking, direct labor and material costs of bare poles in place and pro rata shares of construction supervision and overhead. These costs, for a specific area, may differ considerably from corresponding costs in other parts of the country. These variations in pole line costs will, however, affect both power and telephone lines to about the same degree.

The calculation for Telephone Company adjustment payments to Power Distributor and Power Distributor adjustment payments to the Telephone Company based on the preceding principles for this contract is as follows:

GENERAL AGREEMENT

Joint Use of Wood Poles in Rural Areas

Electric Power and Telephone Systems

Amendment to Article II, Part 2 - by deleting the second sentence thereof, and substituting in it's place the following:

Has this changed?

- 2. "Effective January 1, 1980, such pole for the purpose of this agreement shall be a 40' class 4 wood pole as classified by the pole classification tables of the American Standards Association". This change applies to new lines and/or originally established lines. Lines with existing attachments are not affected.

Re: General Agreement Joint Use of Wood Poles in Rural Areas between GTE South Incorporated and Grayson Rural Electric Cooperative Corporation, dated 1/1/72 (the "Agreement")

Dear Sir or Madam:

On October 31, 2001, Verizon South Inc. ("Verizon") entered into a definitive agreement (the "Purchase Agreement") with Kentucky ALLTEL, Inc., a subsidiary of ALLTEL Corporation ("ALLTEL"). Under the terms of the Purchase Agreement Verizon will transfer to ALLTEL certain telephone operations and related assets located in Kentucky (the "Transaction"). The above referenced Agreement is one of the assets to be transferred as a part of the Transaction.

Until the closing of the Transaction, Verizon will continue to operate in the current manner and will continue to be responsible to perform those obligations under the Agreement that arise prior to the transfer to ALLTEL. Upon Closing of the Transaction, ALLTEL will be assigned all of Verizon's rights and obligations under the Agreement, to the extent such obligations arise after the closing date.

By this letter, Verizon is requesting your consent to the assignment of the Agreement to ALLTEL as a part of the Transaction. Please indicate your consent by executing the letter where indicated in the space provided below and returning it in the enclosed pre-paid envelope at your earliest convenience, but by no later than **February 21, 2002**. The enclosed copy should be retained for your records. By consenting to the assignment of the Agreement you also agree that, after the closing of the Transaction, Verizon will have no further obligations to you under the Agreement, and that ALLTEL shall be responsible for all obligations thereunder after the closing.

KY-714.016

WIN2346

Grayson Rural Electric Cooperative Corporation
January 31, 2002
Page 2

Your consent will remain effective through the closing of the Transaction. You will be contacted by ALLTEL who will advise you of the closing date and the new contact information.

We appreciate your prompt attention to this matter. Should you have any questions, please contact the undersigned at (972)718-3289 or Paula Valdez at (972)718-4902.

Sincerely,

Erin M. Welton

Title: President & CEO

Date: 2/08/02

THIS AGREEMENT, made as of the first day of January, 1997 by and between Inter-County Rural Electric Cooperative, a Kentucky corporation, hereinafter referred to as the "Power Distributor," and GTE South Incorporated, a Kentucky Corporation hereinafter referred to as the "Telephone Company."

WITNESSETH:

WHEREAS, in the areas in the State of Kentucky served by both parties certain utility poles are presently used jointly by the Power Distributor and the Telephone Company, such joint use being maintained under the terms of a Rural Joint Use Agreement dated January 1, 1972, between Inter-County Rural Electric Cooperative and the Telephone Company.

WHEREAS, the parties desire to continue such joint use and to use other pole jointly in the future, when and where such joint use will be of mutual advantage in meeting their respective service requirements; and

WHEREAS, when the parties are making arrangements for the joint use of new poles and the party proposing to erect the new poles already owns a majority of the poles, the parties shall take into consideration the desirability of having the new poles owned by the party owning the lesser number of joint use poles so as to progress toward a division of ownership of poles so that neither party shall be required to pay annual rental payments, giving due regard to the avoidance of mixed ownership in lines; and

WHEREAS, because of changed conditions and experience gained, and to facilitate administration of joint use, the parties desire to terminate the aforementioned Joint Use Agreements dated January 1, 1972, and enter into a new Joint Use Agreement of giving due recognition to the fact that the comparative numbers of joint use poles owned by the parties, the respective space allocated to or used by the parties, the concern for the ability to provide reliable service, the relative positions of the parties on the poles all have a bearing on the contribution to be made by the parties both as to ownership and maintenance of joint use poles.

NOW, THEREFORE, in consideration of the premises and the mutual covenants herein contained the parties hereto for themselves, their successors and assigns do hereby terminate the existing Urban Joint Use Agreement dated N/A, and the existing Rural Joint Use Agreement dated January 1, 1972, and do hereby covenant and agree as follows:

**ARTICLE I
DEFINITIONS**

For the purpose of this agreement, the following terms when used herein shall have the following meanings:

- A. ATTACHMENTS is any wires, cables, strands, materials or apparatus affixed to a joint use pole now or hereafter used by either party in the construction, operations or maintenance of its plant.
- B. CHANGE IN CHARACTER OF CIRCUITS shall mean any change in either party's facilities, which affects either loading on the pole or clearance between the facilities of the parties hereto.
- C. CODE means the National Electrical Safety Code, as it may be amended from time to time.
- D. DAYS as used herein shall mean calendar days.
- E. INJURIES include death, personal injury and property damage or destruction.
- F. JOINT USE is maintaining or specifically reserving space for the attachments of both parties on the same pole at the same time.
- G. JOINT USE POLE is a pole upon which space is provided under this agreement for the attachments of both parties, whether such space is actually occupied by attachments or reserved therefore upon specific request.

- H. LICENSEE is the party having the right under this agreement to make attachments to a joint use pole that the other party owns.
- I. OWNER is the party owning the joint use pole.
- J. POLE OR POLES includes the singular and plural.
- K. REARRANGING OF ATTACHMENTS is the moving of attachments from one position to another on a joint use pole.
- L. RESERVED, as applied to space on a pole, means unoccupied space provided and maintained by Owner, either for its own use or expressly for Licensee's exclusive use at Licensee's request.
- M. RIGHT OF WAY is the legal right to use the property of another.
- N. STANDARD JOINT USE POLE means a 40-foot, Class 5 treated wood pole which meets the requirements of the Code. The parties may agree to use a smaller than Class 5 pole; but under no condition shall the standard joint use pole be less than the minimum requirements of the Code.
- O. STANDARD SPACE ALLOCATION means an allocation of sufficient space on a joint use pole for the use of each party taking into consideration requirements of the Code, and is more particularly defined as follows.
 - 1. For Power Distributor, the use of 8 feet of space on 40-foot poles, and 6 ½ feet on 35-foot poles, measured downward from the top of the pole; and
 - 2. For Telephone Company, the use of 2 feet of space on joint use poles, below the space of the Power Distributor starting at the point that gives adequate Code separation on the pole. If under the terms of this Agreement the Telephone Company uses a portion of the Power Distributor's allocated space as measured from the top of the pole, the Telephone Company agrees that its use is permissive and that the Power Distributor shall have the undisputed use of its allocated space measured from the top. Telephone Company agrees to move any such attachments within this allocated space at its own cost upon demand of the Power Distributor. Similarly, if the Power Distributor uses a portion of the Telephone Company's 2-foot space, the Power Distributor agrees that such use shall be permissive. Power Distributor agrees to move any such attachment within the 2-foot space.
 - 3. The foregoing definition of a "normal joint use pole" is not intended to preclude the use of joint poles shorter or taller or of different strength than the normal joint use pole in locations where it is mutually agreed such poles will meet the requirements of the parties hereto.
- P. TRANSFERRING OF ATTACHMENTS is the removing of attachments from one pole and placing the attachments upon another pole.

ARTICLE II
TERRITORY AND SCOPE OF AGREEMENT

- A. This agreement shall cover all poles of each of the parties now existing in joint use and those hereafter erected or acquired within the common operating areas served by the parties excepting poles which in the Owner's judgment are necessary for its own sole use.
- B. The Rural boundaries in existence at the time of the execution of this agreement shall remain in effect until removed in accordance with Article X (B) of this agreement, or otherwise modified by mutual agreement of the parties.

ARTICLE III
PERMISSION FOR JOINT USE

Subject to the terms and conditions of this agreement, each party hereby permits joint use by the other party of any of its poles in accordance with the standard space allocation defined in Article I and the following:

- 1. Allocated pole space may, without additional charge, be used by the party of which it is not allocated for the purpose of installing and maintaining street lighting, traffic signal systems, and vertical attachments (such as but not limited to ground wires, gang operated switch control rods

and underground risers) if by the terms of the Code the proposed use is authorized and such use does not unreasonably interfere with the use being made by the party to which such space is allocated (such determination will be made solely by the party to which the space is allocated). If Code provisions cannot subsequently be met then billing for the required modifications will be as set forth in Appendix A.

2. As long as the provisions of the Code are met, unallocated space may be used without additional charge by the Power Distributor and/or Telephone Company.
3. As long as the provisions of the Code in effect at the time the attachments were installed have been met, any joint use pole now in place shall be deemed satisfactory to both parties and adequate for its requirements whether or not the space allocations made herein have been observed.
4. As long as the provisions of the Code are met, any pole hereafter made joint use shall thereupon be deemed satisfactory to Licensee and adequate for its requirements whether or not the space allocations made herein have been observed.

ARTICLE IV SPECIFICATIONS

The joint use of poles covered by this Agreement shall at all times be in conformity with all applicable provisions of law and with the minimum requirement of the Code in effect at the time the respective attachments are made, and with such additional requirements as may be mutually approved in writing by the Vice President of Operations of the Power Distributor and General Manager-Network Provisioning of the Telephone Company.

ARTICLE V RIGHT-OF-WAY AND LINE CLEARING

- A. The Owner and Licensee will cooperate as far as may be practicable in obtaining right-of-way for both parties. When a written easement is secured it shall be in sufficient detail for identification and recording, and shall be subject to inspection by the other party upon request. However, no guarantee is given by the Owner of permission from property owners, municipalities or others for the use of poles by the Licensee, and if objection is made thereto and the Licensee is unable to satisfactorily adjust the matter within a reasonable time, the Owner may at any time, upon notice in writing to the Licensee, require the Licensee to remove its attachments from the poles involved, and the Licensee shall, within ninety (90) days after receipt of said notice, remove its attachments from such poles at its sole expense. Should the Licensee fail to remove its attachments as herein provided, the Owner may remove them at the Licensee's expense, without any liability whatever for such removal or the manner of making it, for which expense the Licensee shall reimburse the Owner on demand. Owner shall provide a 20' right-of-way whenever possible. Nothing stated herein shall preclude the parties from mutually sharing the cost of right-of-way acquisition.
- B. Line clearing and trimming will be performed as follows:
 1. When constructing a new joint use pole line the Owner shall cut, clear and trim a 20' right-of-way, if possible.
 2. In all other instances each party shall be responsible for its own initial and recurring trimming, clearing and cutting.

ARTICLE VI PLACING, TRANSFERRING OR REARRANGING ATTACHMENTS

- A. Either party desiring to reserve space on any pole of the other not then designated as a joint use pole shall make written application therefore, specifying the pole involved, the number and kind of its attachments to be placed thereon and the character of the circuits to be used. Within ten (10) days after the receipt of such application, Owner shall notify the applicant in writing whether it is excluding said pole from joint use under the provisions of Article II. Upon receipt of notice from

Owner that said pole is not excluded, and after completion of any required transferring or rearranging of attachments on said pole or any pole replacement as provided in Article VII the applicant shall have the right to use said pole as Licensee in accordance with the terms and conditions of this Agreement. Notwithstanding the foregoing, attachments placed by either party on the other's pole without such application and approval shall subject said pole to the terms of this Agreement. In such case, Owner shall have the right to require Licensee to remove within ninety (90) days at its sole expense any such attachments on poles coming within the exceptions described in Article V. Should Licensee fail to remove such attachments, such failure shall constitute default according to Article XIV.

- B. Except as herein otherwise expressly provided, each party at its own expense shall place, maintain, rearrange, transfer and remove its own attachments, and shall at all times perform such work promptly and in such a manner as not to interfere with work or service being performed by the other party. Upon completion of work by the Owner which will necessitate transfer of the Licensee that such transfer must be completed within sixty (60) days. If such transfer of attachments is not completed within sixty (60) days the old pole shall become the property of the Licensee, and the Licensee shall save harmless the former Owner of such pole from all obligations, liabilities, damage costs, expenses, or charges incurred thereafter because of or arising out of the presence, location or condition of such pole or any attachment thereon, whether or not it is alleged that the former Owner was negligent or otherwise. Licensee shall pay the former Owner the present in-place value, as set forth in Appendix A. for said pole
- C. When the Power Distributor desires to change the primary voltage system to an amount above 34.5 kV phase to phase on joint use lines, it shall give the Telephone Company sixty (60) days written notice of such contemplated change. If the Telephone Company agrees to joint use with such change, joint use of such poles shall be continued with such changes in construction as may be required to meet the terms of the Code at the expense of the Power Distributor. If the Telephone Company does not agree within thirty (30) days from receipt of said notice to such change, then:
 - 1. The parties hereto shall determine what circuits shall be removed from existing points on the joint use poles involved, and the net cost of establishing a new position on said poles or in a locating elsewhere, those circuits or lines as may be necessary to allow the other party to continue to furnish the same service that existed at the time the change was decided upon; and
 - 2. The responsibility of the cost of establishing such circuits in the new position or new location shall be mutually agreed upon between the parties hereto.

ARTICLE VII ERECTING, REPLACING OR RELOCATING POLES

- A. Whenever any jointly used pole, or any pole about to be so used under the provisions of this agreement, is insufficient in size or strength for the existing attachments and for the proposed immediate additional attachments thereon, the Owner shall within sixty (60) days replace such pole with a new pole of the necessary size and strength, and make such other changes in the existing pole line in which such pole is included, as may be made necessary by the replacement of such pole and the placing of the Licensee's circuits as proposed. By mutual agreement, the time period may be shortened or extended.
- B. The parties recognize and agree that there are inherent dangers involved in the transmission and distribution of electricity. The parties agree that unforeseeable emergency conditions will exist from time to time. When due to accidents, storm damage, etc., it is necessary for the Licensee to replace the Owner's pole immediately to restore service to its customers or to eliminate a hazardous condition and the Owner cannot perform the work in time to meet the Licensee's requirements. Licensee may replace the Owner's pole. Licensee will make all of its required facility changes or transfers and will secure the old pole to the new pole so the Owner may make its transfers when feasible. Licensee shall bill the Owner the total cost of the new pole. Owner shall continue to own the old pole and shall be responsible for its removal, and the new pole will become the property of the original owner.
- C. Whenever it is necessary to change the location of a jointly used pole, by reason of any state, municipal or other governmental requirement, or the requirements of a property owner, the Owner

- shall, before making such change in location, give notice thereof in writing (except in cases of emergency) to the Licensee, specifying in such notice the time of such proposed relocation, and the Licensee shall, within sixty (60) days, transfer its attachment to the pole at the new location.
- D. In any case where the parties hereto shall conclude arrangements for the joint use of any new poles to be erected, the ownership of such poles shall be determined by mutual agreement. In the event of disagreement as to Ownership, the party owning the lesser number of joint poles under this Agreement shall promptly erect the new joint poles and be the owner thereof or the party owning the lesser number of poles cannot install the poles in time to meet the service requirements of the party owning the greater number of poles, the party owning the greater number of poles may set the poles and bill the other party the total cost of setting said poles in accordance with Appendix A. The party owning the lesser number of poles shall be the owner thereof.
- E. Whenever either party hereto is about to erect new poles, either as an additional pole line, as an extension of an existing pole line, or as the reconstruction of an existing pole line, it shall notify the other in writing at least thirty (30) days before beginning the work (short notice, including verbal notice subsequently confirmed in writing, may be given in cases of emergency) and shall submit with such notice its plan showing the proposed location and size of the new poles, and circuits it will use thereon. The other party shall, within fifteen (15) days after the receipt of such notice, reply in writing to the party erecting the new poles, stating whether such other party does, or does not, desire space on the said poles, and if it does desire space thereon, the character of the circuits it desires to use and the amount of space it wished to reserve. This notice of desire to establish joint use should include detail plans of any changes in the plans of the other party, which are desired in order to permit the establishment of joint use. If such other party requests space on the new poles and if the character and number of circuits and attachments are such that the Owner does not wish to exclude the poles from joint use under the provision of Article II, then poles suitable for the said joint use shall be erected in accordance with the provisions and the payment of costs as provided in this agreement.
- F. The costs of erecting joint poles coming under this agreement, either as new pole lines, as extensions of existing poles lines, or to replace existing poles, either existing jointly used poles or poles not previously involved in joint use, shall be borne by the parties as follows:
1. Whenever operating and safety conditions prohibit Owner from replacing an existing pole which needs to be replaced, Licensee shall replace the pole and bill Owner in accordance with Appendix A times 1.25.
 2. A normal joint pole, or a joint pole shorter and/or smaller than the normal pole, shall be erected at the sole expense of the Owner, except as provided in Section G of this Article.
 3. In the case of a pole taller and/or stronger than the normal pole, the extra height and/or strength of which is due wholly to the Owner's requirements, shall be erected at the sole expense of the Owner.
 4. In the case of a new pole taller and/or stronger than the normal pole, the extra height and/or strength of which is due wholly to the Licensee's requirements, the Licensee shall pay to the Owner the extra costs for the additional height and/or strength as set forth in Appendix A.
 5. Where an existing jointly used pole is prematurely replaced by a new one solely for the benefit of the Licensee, the Licensee shall pay the Owner the present in-place value of the existing pole and costs of replacing or transferring all attachments in accordance with Appendix A and Appendix C, and the replace pole shall be removed and retained by the Owner.
 6. In the case of a new pole taller and/or stronger than the normal pole, the extra height and/or strength of which is due, to the requirements of both parties, the Licensee shall pay to the Owner a sum equal to one-half the excess height and/or strength as set forth in Appendix A, the rest of the cost of erecting such pole to be borne by the Owner.
 7. In the case of a new pole taller and/or stronger than the normal pole, where height and/or strength in addition to that needed for the purpose of either or both of the parties hereto is necessary in order to meet the requirements of the code, public authority or of property owners, the excess cost of such pole due to such requirements shall be borne by the Owner.

8. If Licensee only requires the addition of a pole in an existing line because of span length or terrain, the Owner will furnish and erect said pole at the sole expense of the Licensee, and pole shall remain property of Owner. The charges shall be as set forth in Appendix A.
 9. Where the Power Distributor has a line that crosses a Telephone Company line and the provisions of the code are met and the Telephone Company desires to set a pole in the Telephone Company line and requests the Power Distributor to attach said pole, the Telephone Company shall bear all initial and recurring costs of placing and maintaining said pole, except the cost of making and transferring the Power Distributor attachments.
- G. In any case where a pole is erected hereunder to replace another pole solely because such other pole is not tall enough, or of the required strength, to provide adequately for the Licensee's requirements, or where such pole, whether it has space reserved for the Licensee's use or not, had at the time of its erection been pronounced by the Licensee as satisfactory and adequate for its requirements, the Licensee shall, upon erection of the new pole, pay to the Owner, in addition to any amounts payable by the Licensee under paragraphs 3,4, or 5 of Section F of the Article, a sum equal to the present in-place value set forth in Appendix A, for the pole which is replaced and the pole removed shall remain the property of the Owner.
- H. In any case where by mutual consent it is desirable to change the ownership of a pole and Licensee erects and owns a joint pole to replace an existing pole of the Owner (instead of the Owner doing so as it is contemplated by Section A of this Article) such sum equal to the present in-place value, as set forth in Appendix A, for the pole which is replaced and the pole removed shall remain the property of the Owner and shall be removed by the Owner.

ARTICLE VIII MAINTENANCE OF FACILITIES

- A. Owner shall, at its own expense, maintain its joint use poles in a safe and serviceable condition and shall undertake any appropriate safety measures, including without limitation reasonable pole inspections. The Owner's responsibility for maintaining a safe and serviceable condition of its poles shall be in accordance with the requirements of the Code, and shall replace poles that become defective, in accordance with the provisions of Article VII.
- B. The parties recognize and agree that there are inherent dangers involved in the transmission and distribution of electricity. The parties agree that unforeseeable emergency conditions will exist from time to time. When due to accidents, storm damage, etc., it is necessary for the Licensee to replace the Owner's pole immediately to restore service to its customers or to eliminate a hazardous condition and the Owner cannot perform the work in time to meet the Licensee's requirements, Licensee may replace the Owner's pole. Licensee will make all of its required facility changes or transfers and will secure the old pole to the new pole so the Owner may make its transfers when feasible. Licensee shall bill the Owner the total cost of the new pole. Owner shall continue to own the old pole and shall be responsible for its removal.
- C. Each party shall, at its own expense, at all times maintain all of its attachments in safe condition, thorough repair, and in accordance with the requirements of the Code.
- D. The parties hereby agree that a cooperative approach will be taken in solving noise or inductance problems that may occur.

ARTICLE IX ABANDONMENT OF JOINT USE POLES

- A. Anytime Owner desires to abandon any joint use pole, it shall give Licensee at least sixty (60) days written notice. If, at the expiration of such period, Owner shall have no attachments on such pole but Licensee shall not have removed all of its attachments therefrom, such pole shall thereupon become the property of Licensee, Licensee shall save harmless the former Owner from all obligations, liabilities, damages, costs, expenses, or charges incurred thereafter because of or arising out of the presence, location or condition of such pole or any attachment thereon, whether or not it is alleged that the former Owner was negligent or otherwise.

- B. Licensee may at any time abandon a joint use pole by removing therefrom all of its attachments, and giving due notice thereof in writing to Owner.

ARTICLE X
ADJUSTMENT PAYMENTS

- A. It is understood and agreed that all existing urban agreements are reciprocal and mutual and shall remain the same under the terms of this Agreement. For those agreements which shall remain reciprocal and mutual, the payments per pole due from the Licensee to the Owner shall be \$ N/A as of the inception date of the Agreement. For that pole in the "Rural" areas, the Telephone Company shall pay [REDACTED] to the Power Distributor and the Power Distributor as Licensee shall pay [REDACTED] to the Telephone Company.
- B. Any time within five years from the execution date of this agreement Power Distributor shall have a one time option, but not the requirement, to count all poles on its system and classify those pole by height. After a written request from the Power Distributor for a pole count, the parties to this Agreement agree to undertake a joint pole count, which shall be completed within six months. The Power Distributor shall have the option, at any time within six months after completion of the pole count, to set the rates that each party pays at \$ N/A for poles 40 feet and over and, to pay the Telephone Company [REDACTED] to attach to poles 35 feet and under and have the Telephone Company pay [REDACTED] to attach to Power Distributor poles 35 feet and under.
- C. Adjustment payments hereunder shall cover rentals accruing during the calendar year and shall be based on the number of poles on which space is occupied or reserved on the first day of December of the year in which the rentals accrue. Within thirty (30) days following such date, or as soon as practical thereafter, each party shall submit a written statement to the other party giving the number of poles on which space was occupied by or reserved for the other party as of such date.
- D. The total adjustment payment due each party shall be determined by multiplying the poles owned and licensed by each party, by the adjustment payment.
1. The smaller total amount covered above shall be deducted from the larger amount and the Power Distributor or the Telephone Company, which ever shall owe the larger amount, shall pay to the other the difference between said two amounts as the net adjustment payment due for the year involved. Within thirty (30) days after the first day of January next, or as soon as practical thereafter, ensuing after the date of this Agreement, and within (30) days after the first day of each January, or as soon as practical thereafter, during the time this Agreement shall be in affect, the party to which said adjustment payment is owed as of said first day of January, shall submit a written statement (the "Schedule of Pole Rentals") to the other party giving the correct amount owed by the other party.
 2. The adjustment payment herein provided for shall be paid within thirty (30) days after the bill has been submitted, unless said party disputes the amount of such bill within ten (10) days from receipt thereof. In case of such dispute, payment shall be made within thirty (30) days after the bill has been submitted of the amount that is admitted to be due; an agreement concerning the disputed amount shall be attempted with all reasonable dispatch by negotiation. Failing to reach any such agreement be negotiation, either party may make formal written demand on the other for the amount claimed to be due; and if payment thereof is not made within thirty (30) days, suit may be brought for the amount claimed.
- E. The rates set forth in paragraph A above shall be effective as of January 1, 1997, and shall remain in effect through December 31, 1997 (the "Base Rate"). The Base Rate shall be escalated, effective January 1, 1998, and annually thereafter, by [REDACTED]

ARTICLE XI
INVENTORY OF ATTACHMENTS

- A. An interval not exceeding five (5) years an actual inventory of attachments shall be made by representatives of the parties. If there is any difference in the number of attachments found by the

inventory and the number arrived at by tabulating those reported, correction will be made by retroactive billing for any attachments identified as being responsible for the difference, and any remaining difference will be spread evenly over the years since the last inventory and billing adjusted accordingly.

- B. Each party shall share equally the cost of making such inventory of attachments.

ARTICLE XII JOINT ANCHORS

The owner where practicable shall, upon request from Licensee, place anchors suitable for joint use upon consideration of the joint load and guy lead requirements. The cost of the anchor shall be shared, and will be billed, as set forth in Appendix A. Each party shall install its own guy wires.

ARTICLE XIII GROUNDING AND BONDING

Ground and bonding will meet the requirements of the Code.

ARTICLE XIV DEFAULTS

- A. If either party shall fail to discharge any of its obligations under this Agreement and such failure shall continue for thirty (30) days after notice thereof in writing from the other party, all right of the party in default hereunder, pertaining to making attachments to additional poles of the other shall be suspended. If such default shall continue for a period of ninety (90) days after such suspension, the other party may forthwith terminate the right of the defaulting party to attach to additional poles of the other party. Any such termination of the right to attach to such additional poles of the other by reason of any such default shall not abrogate or terminate the right of either party to attach to existing joint use poles or to maintain existing attachments, and all such attachments shall continue thereafter to be maintained pursuant to and in accordance with the terms of this Agreement, which Agreement shall, so as such attachments are continue, remain in full force and effect solely and only for the purpose of governing and controlling the rights and obligations of the parties with respect to such attachments.
- B. In the event either party should fail to perform its obligations either during the term of the Agreement or after termination made in accordance with the terms of this Article XIX or fail to properly maintain or promptly replace joint use poles thereto after sixty (60) days written notice from the other, the other party shall have the right, but not the obligation, to maintain such poles or to replace the same at the expense of the party so failing, and shall be fully indemnified for all expenses, costs and damages whatever in taking such action or the manner of taking it.

ARTICLE XV LIABILITY AND DAMAGES

Either party hereto, to the fullest extent permitted by law, agrees to and shall indemnify and hold harmless the other Party from and against any and all claims, damages, losses and expenses, including but not limited to attorney's fees, arising out or resulting from the joint use of the poles, and or any acts or omissions under this agreement. Any interpretations regarding this Agreement or any activities arising hereunder shall be governed by the laws of the state of Kentucky.

ARTICLE XVI
RIGHTS OF OTHER PARTIES

- A. If either party has, prior to the execution of this Agreement, conferred upon others not parties to this Agreement (outside parties), by contract or otherwise, rights or privileges to attach to any of its poles covered by this Agreement, nothing herein contained shall be construed as affecting said rights or privileges with respect to existing attachments of such outside parties, which attachments shall continue in accordance with the present practice; all future attachments of such outside parties shall be in accordance with the requirements of Paragraph B below, except where such outside parties have by agreements entered into prior to the execution of this Agreement acquired enforceable rights or privileges to make attachments which do not meet such space allocations. Owner shall derive all of the revenue accruing from such outside parties. Any contractual rights or privileges of outside parties recognized in this paragraph shall include renewals of or extensions of the term (period) of such contracts.
- B. If either party hereto desires to confer upon others not parties to this Agreement (outside parties), by contract or otherwise, rights or privileges to attach to any of its poles covered by this Agreement, it shall have the right to do so, provided all such attachments of such outside parties are made in accordance with the following: (a) such attachments shall be maintained in conformity with the requirements of the code, and (b) such attachments shall not be located within the space allocation of Licensee, unless Licensee concurs in such occupancy. Such concurrence shall in no way waive Licensee's right to occupy its allocated space in the future. Owner shall derive all of the revenue accruing from such outside parties.

ARTICLE XVII
NOTIFICATION PROCEDURES

Wherever in this Agreement notice is required to be given by either party hereto to the other, such notice shall be in writing mailed or delivered to the Operations Manager of the Power Distributor at its office at Danville, Kentucky or to the General Manager-Network Provisioning of the Telephone Company at its office at 4100 Roxboro Road, Durham, NC, as the case may be, or to designate in writing for that purpose.

ARTICLE XVIII
TERM OF AGREEMENT

- A. This Agreement shall continue in full force and effect until the December 31, 2000. This Agreement shall continue from year to year thereafter until terminated by either party, giving to the other six months notice in writing of intention to terminate this Agreement. At any time thereafter, the adjustment payment rates applicable under this Agreement shall be subject to joint review and revision upon the written request of either party. In case of revision of the adjustment payment rates as herein provided, the new adjustment payment rates agreed upon shall apply, starting with the annual bill next rendered and continue until again adjusted.
- B. Revisions of the adjustment payments shall be based on experience resulting from previous administration of this Agreement. Any changes shall take into account the original cost factors pertinent to the establishment of the pole facilities involved in all joint use existing under this Agreement at the time of the review. If, within 90 days after the receipt of the request set forth in Article XVIII A above, by either party from the other, the parties hereto fail to agree upon a revision of such rate, then the adjustment payment per pole shall be established at the then existing Base Rate, as escalated by Article X for a period of two years. The adjustment payment per pole shall be an amount equal to 56 percent (for the power distributor) of the then average annual total cost per pole based on the average in-plant cost factors of providing and maintaining the joint poles covered by this Agreement, and the adjustment payment per pole shall be an amount equal to 44 percent (for the telephone company) of the then average annual total cost per pole based on the average in-plant cost factors of providing and maintaining the joint poles covered by this Agreement.

ARTICLE XIX
ASSIGNMENT OF RIGHTS

- A. Except as otherwise provided in this Agreement, neither party hereto shall assign or otherwise transfer this Agreement, in whole or in part, without the written consent of the other party, provided that either party shall have the right without such consent to mortgage any or all of its property, rights, privileges and franchises, or to lease or transfer any of them to another corporation organized for the purpose of conducting a business of the same general character as that of such party, or to enter into any merger or consolidation; and, in case of the foreclosure of such mortgage, or in case of such lease, transfer, merger or consolidate its rights and obligations hereunder shall pass to such successors and assigns; and provided, further, that subject, to all of the terms and conditions of this Agreement, either party may without such consent permit any corporation conducting a business of the same general character as that of such party, with which it is affiliated by corporate structure, to exercise the rights and privileges of this agreement in the conduct of its said business.
- B. For the purposes of this Agreement, all attachments maintained on any joint use pole by the permission of either party hereto, as provided in Paragraph A above, shall be considered that attachments of the party granting such permission, and the rights, obligations and liabilities of such party under this Agreement, in respect to such attachments, shall be the same as if it were the actual owner thereof.
- C. The attachments of each party hereto or of others permitted by this Agreement shall at all times be and remain its or their property, with the full right of removal, and shall not become subject to any liens against the other party.

ARTICLE XX
WAIVER OF TERMS OF CONDITIONS

The failure of either party to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

ARTICLE XXI
EXISTING AGREEMENTS

Any existing agreement between the parties hereto for the joint use of wood poles upon a rental basis within the territory covered by this agreement is, by mutual consent, hereby abrogated and annulled. The rural boundaries established under the Agreements shall remain in effect and shall be mutually agreed upon by the parties upon execution of this Agreement.

ARTICLE XXII
NO EFFECT ON FRANCHISE RIGHTS

Notwithstanding anything elsewhere herein provided, nothing contained to this agreement shall abrogate, limit or affect any obligation of either party under any franchise granted to either party by the city(ies) within the service area.

ARTICLE XXIII
SOURCE OF PAYMENTS

The obligations of the Power Distributor hereunder shall be payable solely from the funds of Inter County Rural Electric Cooperative Corporation

ARTICLE XXIV
SUPPLEMENTAL ROUTINES AND PRACTICES

Nothing in the foregoing shall preclude the parties to this agreement from preparing such supplemental operating routines or working practices as they mutually agree to be necessary or desirable to effectively administer the provisions of this Agreement. Any such supplemental operating routines or working practice must be authorized and approved by the management level officer or employee executing or authorized to execute this contract.

ARTICLE XXV
NO JOINT OWNERSHIP

The Licensee of a joint use pole shall acquire no ownership of or interest in such a pole, the Licensee's rights therein being limited to the right to compliance with the terms and conditions contained in this Agreement.

ARTICLE XXVI
AGREEMENT AFFECTS ONLY PARTIES HERETO

Except only insofar as the express terms of this agreement make the rights hereunder available to the successors or assigns of the parties hereto, the provisions of this agreement shall not be interpreted to confer any right of action at law or in equity upon any parties except the parties hereto.

IN WITNESS WHEREOF, the parties here to have caused these presents to be executed in duplicate, and their corporate seals to be affixed thereto by the respective officers thereunto duly authorized, on the day and year first above written.

APPENDIX A PRESENT IN-PLACE VALUES OF POLES

Age of Pole in Years

| In-Place Value of Poles Based on Age(Dollars) | | | | | | | | | | | |
|---|-----|-----|-----|-----|-------|-------|-------|-------|-------|-------|-------|
| Height | New | 1-3 | 4-6 | 7-9 | 10-12 | 13-15 | 16-18 | 19-21 | 22-24 | 25-27 | 28-30 |
| 35' & Under | 403 | 380 | 348 | 319 | 293 | 268 | 246 | 226 | 207 | 190 | 174 |
| 40' & 45' | 483 | 456 | 418 | 383 | 351 | 322 | 295 | 271 | 248 | 227 | 208 |
| 50' & Over | 491 | 464 | 425 | 390 | 357 | 328 | 300 | 275 | 252 | 231 | 212 |

Payment for one half cost of anchor and rod shall be as follows:

3/4" ROD - \$38.00 Double Eye, 8" Single Helix Anchor

1" or larger ROD - \$54.00 Triple Eye, 8" Double Helix Anchor or Larger

Payment under Article VII, Section F, Paragraph 8, shall be the present in-place value
 is an attachment cost of \$25.00 for each cable, conductor, or neutral wire.

JOINT USE AMENDMENT

This Agreement, made as of the 14th day of October, 1998, by and between The Electric Plant Board of the City of Monticello, hereinafter called the "Utility Company" and GTE South Incorporated, hereinafter called the "Telephone Company,"

WITNESSETH:

WHEREAS the Utility Company and General Telephone Company of Kentucky entered into a General Agreement for the Joint Use of Wood Poles as of November 2, 1981; and

WHEREAS GTE South Incorporated is the successor in interest to said General Telephone Company of Kentucky; and

WHEREAS the parties desire to amend said Agreement in certain respects;

NOW THEREFORE, the parties hereto, for themselves, their successors and assigns, do hereby covenant and agree that the said Agreement shall be amended as follows:

- 1. The first sentence of Article XI, Paragraph (b) shall be amended to read as follows:
 - (b) The rentals per pole due from either party as licensee to the other party as owner shall be [REDACTED] per annum, subject to any subsequent revision as provided in Article XII.

The rental herein provided for shall be paid within 30 days after the bill has been submitted.

- 2. Article XII shall be amended to read as follows:

At the expiration of two (2) years from the effective date of this agreement and at intervals of not less than two (2) years thereafter, the rental rate applicable under this agreement shall be subject to joint review and adjustment. Either party may make a

written request for a joint review of the rental rate addressed to the other party not later than 90 days before the end of such two (2) year period. If, within ninety days after receipt of such request by either party from the other, the parties hereto fail to agree upon a revision of the rental rate, then the revised rate per pole so to be paid shall be an amount equal to one-half of the then average annual total cost per pole of providing and maintaining the standard joint poles covered by this agreement. In case of a revision of the rental, as herein provided, the new rate shall be applicable until again revised.

It is agreed between these parties that the attachment costs set forth herein shall increase annually in a proportional amount to the annual changes in consumer prices for all urban customers {Consumer Price Indexing - Addendum: ALL ITEMS (NSA)}, as is presented annually by the Department of Labor - Bureau of Labor Statistics, with a minimum increase of 3% being added to the attachment cost each year thereafter. It is further agreed that the methodology is also subject to joint review and adjustment at the end of the two (2) year agreement.

3. In all other respect, the existing agreement between the parties is hereby ratified and confirmed.

IN WITNESS WHEREOF, the parties have caused these presents to be executed in duplicate and their corporate seals to be affirmed thereto by their respective officers thereunto duly authorized on this 14th day of JAN, 1998.

Attorney, GTE

Date: 1-7-98

JOINT USE AMENDMENT

This Agreement, made as of the 1st day of December, 1994, by and between The Electric Plant Board of the City of Monticello, hereinafter called the "Utility Company" and GTE South Incorporated, hereinafter called the "Telephone Company,"

WITNESSETH:

WHEREAS the Utility Company and General Telephone Company of Kentucky entered into a General Agreement for the Joint Use of Wood Poles as of November 2, 1981; and

WHEREAS GTE South Incorporated is the successor in interest to said General Telephone Company of Kentucky; and

WHEREAS the parties desire to amend said Agreement in certain respects;

NOW THEREFORE, the parties hereto, for themselves, their successors and assigns, do hereby covenant and agree that the said Agreement shall be amended as follows:

1. All references to General Telephone Company of Kentucky shall be changed to GTE South Incorporated.

2. The first sentence of Article XI, Paragraph (b) shall be amended to read as follows:

(b) The rentals per pole due from either party as licensee to the other party as owner shall be [REDACTED] per annum, subject to any subsequent revision as provided in Article XII. The rental herein provided for shall be paid within 30 days after the bill has been submitted.

3. The periodicall ajustment of rentals as set forth in Article XII is hereby amended from five (5) years to one (1) year

and Article XII shall be amended to read as follows:

(a) At the expiration of one (1) year from the effective date of this agreement and at intervals of not less than one (1) year thereafter, the rental rate applicable under this agreement shall be subject to joint review and adjustment. Either party may make a written request for a joint review of the rental rate addressed to the other party not later than 90 days before the end of such five---year period. If, within ninety days after receipt of such request by either party from the other, the parties hereto fail to agree upon a revision of the rental rate, then the revised rate per pole so to be paid shall be an amount equal to one-half of the then average annual total cost per pole of providing and maintaining the standard joint poles covered by this agreement. In case of a revision of the rental, as herein provided, the new rate shall be applicable until again revised.

4. In all other respect, the existing agreement between the parties is hereby ratified and confirmed.

IN WITNESS WHEREOF, the parties have caused these presents to be executed in duplicate and their corporate seals to be affirmed thereto by their respective officers thereunto duly authorized on this the 21ST day of NOV, 1994.

GENERAL AGREEMENT FOR
JOINT USE OF WOOD POLES

THIS AGREEMENT, made this 2nd day of November, 1981, by and between the Electric Plant Board of The City of Monticello, hereinafter called the "Utility Company", and the GENERAL TELEPHONE COMPANY OF KENTUCKY, a corporation organized under the laws of the State of Delaware, hereinafter called the "Telephone Company".

PREAMBLE

WHEREAS, the Utility Company and the Telephone Company have heretofore cooperated in the joint use of their respective poles and said parties now desire to continue said cooperation as to poles erected or to be erected within the areas in which both parties render services in the State of Kentucky, whenever and wherever such use shall, in the estimation of both parties, be compatible with their respective needs, and

WHEREAS, it is now the desire of both the Utility Company and the Telephone Company to enter into a contract between themselves and their respective successors and assigns as follows:

ARTICLE I

Scope of Agreement

(a) This agreement shall be in effect in the areas in which both of the parties render service in the State of Kentucky and, upon specific concurrence of both parties, duly evidenced in writing signed by the parties, in areas adjacent to said communities, and shall cover all wood poles of the parties now existing or hereafter erected in the above defined territory when said poles are brought under this agreement in accordance with the procedure hereinafter provided.

(b) Each party reserves the right to exclude any of its facilities from joint use.

ARTICLE II

Explanation of Terms

For the purpose of this agreement, the following terms shall have the following meanings:

1. A JOINT POLE is a pole jointly used by both parties.
2. A NORMAL JOINT POLE is a pole which is just tall enough to provide normal space, as normal space is hereinafter defined, for the respective parties and just strong enough to meet the requirements of the specifications mentioned in ARTICLE III for the attachments ordinarily placed by the parties in their respective normal spaces. Such pole for the purpose of this agreement shall be a 40 foot class 5 wood pole as classified by the pole classification tables of the American Standards Association.
3. SPACE is the linear portion of a joint pole parallel to its axis reserved for the exclusive use of one of the parties (subject only to the exceptions provided for by the specifications mentioned in Article III which in certain instances permit the making of certain attachments by one party in the space reserved for the other party).
4. NORMAL SPACE is the following described space:
 - a. For the Utility Company, the uppermost 6 feet, measured from top of pole.
 - b. For the Telephone Company a space of 2 feet, at a sufficient distance below the space of the Utility Company to provide at all times the minimum clearance required by the specifications mentioned in Article III and at a sufficient height above ground to provide the proper vertical clearance above ground or track rails for the lowest horizontally run line wires or cable attached in such space.

The foregoing definition of "a normal joint pole" is not intended to preclude the use of joint poles shorter or of less strength than the normal joint pole in locations where such poles will meet the requirements of the parties hereto.

The above assignment of space is not intended to preclude the use of vertical runs or the mounting of such equipment as terminals or meters on the lower portions of the pole when mutually agreeable.

ARTICLE III

Specifications

Except as otherwise provided in Section (e) of Article VII, referring to construction temporarily exempt from the application of the specifications mentioned herein, the joint use of the poles covered by this agreement shall at all times be in conformity with accepted modern methods such as those suggested in Edison Electric Institute Publication No. 12, a copy of which is attached hereto and marked Exhibit "A", and shall at all times conform to the requirements of the National Electrical Safety Code, Fifth Edition, and subsequent revisions thereof, except where the lawful requirements of public authorities may be more stringent, in which case the latter will govern.

Modifications of, additions to, or construction practices supplementing wholly or in part the requirements of the National Electrical Safety Code, shall, when accepted in writing by both parties hereto through their agents authorized to approve such changes, likewise govern the joint use of poles.

ARTICLE IV

Establishing Joint Use of Existing Poles

(a) Whenever either party desires to reserve space for its attachments on any pole owned by the other party, either as initial space or additional space on such pole, it shall make application therefor, specifying the location of the poles in question, the amount of space desired on each pole, and the number and character of the circuits to be placed thereon. Said application shall be in the form attached hereto as Exhibit "B", or a mutually agreeable revision thereof. If in the judgment of the owner, the poles are necessary for its own sole use, or if in the opinion of the owner additional attachments are not economically feasible, or joint use under the circumstances is undesirable, the owner shall have the right to reject the application. In any event, within 10 days after the receipt of such application the owner shall notify the applicant in writing whether the application is approved or rejected. Upon receipt of notice from the owner that the application has been approved, and after the completion of any transferring or rearranging which is required to permit the attaching of the applicant's circuits on such poles, including any necessary pole replacements, the applicant shall have the right as licensee hereunder to use such space in accordance with the terms of the application and of this agreement.

(b) Whenever any jointly used pole or any pole about to be so used under the provision of this agreement is insufficient in height or strength for the existing attachments and for the proposed additional attachments thereon, the owner shall promptly replace such pole with a new pole of the necessary height and strength and shall make such other changes in the existing pole line in which such pole is included as the conditions may then require.

(c) Each party shall place, transfer and rearrange its own attachments, place guys to sustain any unbalanced loads, caused by its attachments, and perform any tree trimming or cutting incidental thereto. Each party shall at all times execute such work promptly and in such manner as not to interfere with the service of the other party.

(d) The cost of establishing the joint use of existing poles, including the making of any necessary pole replacements, shall be borne by the parties hereto in the manner provided in Article VIII-Division of Costs.

ARTICLE V

Establishing Joint Use of New Poles

(a) Whenever either party hereto requires new pole facilities for an additional pole line, and extension of an existing pole line, or in connection with the reconstruction of an existing pole line, it should notify the other party to that effect in writing (verbal notice subsequently confirmed in writing may be given in cases of emergency), stating the proposed location and character of the new poles and the character of circuits it intends to use thereon and indicating whether or not such pole facilities will be, in the estimation of the party proposing to construct the new pole facilities, susceptible of joint use. Within 10 days after the receipt of such notice, the other party shall reply in writing, stating whether it does, or does not, desire space on the said poles and, if it does desire space thereon, submit application form Exhibit "B" showing the character of the circuits it desires to use and the amount of space it wishes to reserve. If such other party requests space of the proposed new poles and if the character and number of its circuits and attachments are such that the party proposing to construct the new pole facilities does not consider joint use undesirable, then it shall erect poles suitable for such joint use, subject, however, to the provisions of Section (b) of this Article. The applicant for space on the poles shall be promptly notified in writing of the action taken on the application.

(b) In any case where the parties hereto shall conclude arrangements for the joint use of any new poles to be erected, and the party proposing to construct the new pole facilities already owns more than its proportionate share of joint poles, the parties shall take into consideration the desirability of having the new pole facilities owned by the party owning less than its proportionate share of joint poles so as to work towards such a division of ownership of the joint poles. For the purpose of this agreement the proportionate share of ownership for the Utility Company shall be 50 percent of the total joint poles and for the Telephone Company 50 percent of the total joint poles.

(c) Each party shall place its own attachments on the new joint poles and place guys to sustain any unbalanced loads caused by its attachments. Each party shall provide necessary tree trimming according to its own requirements. Each party shall execute its work promptly and in such manner as not to interfere with the service of the other party.

(d) The cost of establishing the joint use of new poles including costs incurred in the retirement of existing poles shall be borne by the parties hereto in the manner provided in Article VIII - Division of Costs.

ARTICLE VI

Right of Way for Licensee's Attachments

While the owner and licensee will cooperate as far as may be practicable in obtaining rights of way for both parties on joint poles, the owner does not warrant or assure to the licensee any right of way privileges or easements on, over or across streets, alleys and public thoroughfares, and private or publicly owned property, and if the licensee shall at any time be prevented from placing or maintaining its attachments on the owner's poles, no liability on account thereof shall attach to the owner of the poles.

When and where it becomes necessary for either party to purchase through condemnation or agreement an easement or right of way for a new service line to be used by both parties, then the parties shall share equally the cost of obtaining same.

ARTICLE VII

Maintenance of Poles and Attachments

(a) The owner shall maintain its joint poles in a safe and serviceable condition and in accordance with the specifications mentioned in Article III and shall replace, reinforce or repair such of these poles as become defective.

(b) When replacing a jointly used pole carrying terminals of aerial cable, underground connection, or transformer equipment, the new pole shall be set in the same location which the replaced pole occupied unless special conditions make it necessary or mutually desirable to set it in a different location.

(c) Whenever it is necessary to replace or relocate a jointly used pole, the owner may, before making such replacement or relocation, give notice thereof in writing (except in case of emergency, when verbal notice will be given and subsequently confirmed in writing) to the licensee, specifying in such notice the time of such proposed replacement or relocation and the licensee shall at the time so specified transfer its attachments to the new or relocated joint pole.

(d) Except as otherwise provided in Section (e) of this Article, each party shall at all times maintain all of its attachments, and perform any necessary tree trimming or cutting incidental thereto, in accordance with the specifications mentioned in Article III and shall keep them in safe condition and in thorough repair. Nothing in the foregoing shall preclude the parties hereto from making any mutually agreeable arrangement for jointly contracting for or otherwise providing for maintenance trimming.

(e) Any existing joint use construction of the parties hereto which does not conform to the specifications mentioned in Article III shall be brought into conformity therewith as soon as practicable.

(f) The cost of maintaining poles and attachments and of bringing existing joint use construction into conformity with said specifications shall be borne by the parties hereto in the manner provided in Article VIII - Division of Costs.

ARTICLE VIII

Division of Costs

(a) The cost of erecting new joint poles coming under this

agreement, to construct new pole lines, to make extensions to existing pole lines, or to replace existing pole, shall be borne by the parties as follows:

1. A normal joint pole, or joint pole smaller than the normal, shall be erected at the sole expense of the owner.

2. A pole larger than the normal, the extra height or strength of which is due wholly to the owner's requirements, including requirements as to keeping the owner's wires clear of trees, shall be erected at the sole expense of the owner, who shall thereafter be entitled to use the resulting additional space.

3. In the case of a pole larger than the normal, the extra height or strength of which is due wholly to the licensee's requirements, including requirements as to keeping the licensee's wires clear of trees, the licensee shall pay to the owner a sum equal to the difference between the cost in place of such pole and the cost in place of a normal joint pole and shall thereafter be entitled to use the resulting additional space, the rest of the cost of erecting such poles to be borne by the owner, except insofar as otherwise provided in Section (c) of this Article.

4. A pole erected between existing poles to provide sufficient clearance and furnish adequate strength to support the circuits of both the owner and licensee, which it would have been unnecessary to erect if joint use had not been undertaken, shall be erected at the sole expense of the licensee.

(b) Any payments for poles made by the licensee under any foregoing provisions of this Article shall not entitle the licensee to the ownership of any part of said poles for which it has contributed in whole or in part.

(c) Where an existing jointly used pole or a non-joint pole is prematurely replaced by a new one solely for the benefit of the licensee, the cost of the new pole shall be divided as specified in Section (a) of this Article and the licensee shall also pay its owner the value in place of the replaced pole, plus the cost of removal less the salvage value of such pole. The replaced pole shall be removed and retained by its owner.

(d) Each party shall place, maintain, rearrange, transfer and remove its own attachments at its own expense except as otherwise expressly agreed upon.

(e) The expense of maintaining joint poles shall be borne by the owner thereof except that the cost of replacing poles shall be borne by the parties hereto in the manner provided in Sections (2) and (c) of this Article.

(f) Where service drops of one party crossing over or under lines of the other party are attached to the other party's poles, either directly or by means of a pole top extension fixture, the cost shall be borne as follows:

1. Pole top extension fixtures shall be provided and installed at the sole expense of the party using them

2. Where an existing pole is replaced with a taller one to provide the necessary clearance the party owning the service drop shall pay to the party owning the pole a sum equal to the difference in cost in place between the new pole and a new pole of the same size as the replaced pole, together with a sum representing the value in place of the replaced pole, plus the cost of removal less the salvage value of such pole, the owner of the pole to remove and retain such pole.

(g) When, in order to improve an existing condition considered undesirable by both parties, existing poles of one of the parties are abandoned in favor of combining lines on poles of the other party, the value in place of the abandoned poles plus the cost of the removal less the salvage value of such poles shall be shared by both parties to the agreement.

(h) Payments made by either party to the other under the provisions of this Article shall be based on the current cost of construction of the parties hereto. These costs shall conform to accepted and well established utility construction costs indices as well as the actual construction costs experienced by the parties hereto.

ARTICLE IX

Procedure When Character of Circuits is Changed

When either party desires to change the character of its circuits

on jointly used poles, such party shall give 60 days notice to the other party of such contemplated change and in the event that the party agrees in writing to joint use with such changed circuits, then the joint use of such poles shall be continued with such changes in construction as may be required to meet the terms of the specifications mentioned in Article III for the character of circuits involved and such other changes as may be agreed upon. The parties shall cooperate to determine the equitable apportionment of the net expense of such changes. In the event, however, that the other party fails within 60 days from receipt of such notice to agree in writing to such change character of circuits, then both parties shall cooperate in accordance with the following plan:

1. The parties hereto shall determine the most practical and economical method of effectively providing for separate lines, either overhead or underground, and the party whose circuits are to be moved shall promptly carry out the necessary work.

2. The net cost of re-establishing such circuits in the new location as are necessary to furnish the same business facilities that existed in the joint use section at the time such change was decided upon, shall be borne by the licensee; provided, however, that the owner shall bear an equitable share of such cost wherever the change was occasioned by the necessity of the owner and the licensee would suffer a hardship in having to assume the entire burden of the cost of re-establishing the circuits.

Unless otherwise agreed by the parties, ownership of any new lines or underground facilities constructed under the foregoing provisions in a new location shall vest in the party for whose use it is constructed.

ARTICLE X

(a) If the owner desires at any time to abandon any jointly used pole, it shall give the licensee notice in writing to that effect at least 60 days prior to the date on which it intends to abandon such pole. If at the expiration of said period the owner shall have no attachments on such pole but the licensee shall not have removed all of the attachments therefrom, such pole shall thereupon become the property of the licensee, and the licensee shall save harmless the former owner of such pole from all obligation, liability, damages, cost, expense or charges incurred thereafter, and not arising out of anything theretofore occurring, because of, or arising out of, the presence or condition of such pole or of any attachments thereon; and shall pay the owner the then value in place

of a standard joint use pole to the licensee but in no case an amount less than the net salvage value of the pole to the owner as provided in Appendix A attached hereto. The former owner shall further evidence transfer of title to the pole by means of a bill of sale.

(b) The licensee may at any time abandon the use of a joint pole by giving due notice thereof in writing, in the form of Exhibit "B" attached hereto to the owner and by removing therefrom any and all attachments it may have thereon. The licensee shall in such case pay to the owner the full rental for said pole for the then current year.

ARTICLE XI

Rentals

(a) On or about the first day of January, 1983 , and the first day of January thereafter each year, each party, as owner, shall render to the other party as licensee a billing covering the attachments occupied by the licensee during the preceding twelve months or space reserved by licensee subsequent to the previous inventory. The billing so rendered shall be based on an actual field inventory and an inventory of the attachments shall be made by parties hereto acting in cooperation at intervals of not more than five years throughout the term of this agreement. The number of attachments to be billed during the intervening annual periods between inventories shall be the number adjusted as evidenced by the ownership indicated by attachments permits existing, however, the billing so rendered for the intervening years shall be adjusted on a straight line basis at the time of the next inventory, to reflect the results of such inventory.

(b) The rentals per pole due from either party as licensee to the other party as owner shall be \$ 6.00 per annum, subject to any subsequent revision as provided in Article XII. The rental herein provided for shall be paid within 30 days after the bill has been submitted.

ARTICLE XII

Periodical Adjustment of Rentals

At the expiration of five years from the effective date of this

agreement and at intervals of not less than five years thereafter, the rental rate applicable under this agreement shall be subject to joint review and adjustment. Either party may make a written request for a joint review of the rental rate addressed to the other party not later than 90 days before the end of such five-year period. If, within ninety days after receipt of such request by either party from the other, the parties hereto fail to agree upon a revision of the rental rate, then the revised rate per pole so to be paid shall be an amount equal to one-half of the then average annual total cost per pole of providing and maintaining the standard joint poles covered by this agreement. In case of a revision of the rental, as herein provided, the new rate shall be applicable until again revised.

ARTICLE XIII

Defaults

(a) If either party shall default in any of its obligations under this agreement and such default continue thirty (30) days after due notice thereto in writing by the other party, the party not in default may suspend the right of the party in default insofar as concerns the granting of future joint use and if such default shall continue for a period of 30 days after such suspension, the party not in default may forthwith terminate this agreement as far as concerns the future granting of joint use.

(b) If either party shall make default in the performance of any work it is obligated to do under this agreement at its sole expense, the other party may elect to do such work, and the party in default shall reimburse the other party for the cost thereof. Failure on the part of the defaulting party to make such payment within 30 days upon presentation of bills therefor shall, at the election of the other party, constitute a default under Section (a) of this Article.

ARTICLE XIV

Existing Right of Other Parties

(a) If either of the parties hereto has, prior to the execution of this agreement, conferred upon others, not parties to this agreement, by contract or otherwise, rights or privileges to use any poles covered by this agreement, nothing herein contained shall be construed as affecting such rights or privileges, and either party

hereto shall have the right, by contract or otherwise, to continue and extend such existing rights or privileges, it being expressly understood, however, that for the purpose of this agreement, the attachments of any such outside party, except those of a municipality or other public authority, shall be treated as attachments belonging to the grantor, and the rights, obligations, and liabilities hereunder of the grantor in respect to such attachments shall be the same as if it were the actual owner thereof.

(b) Where municipal regulations require either party to allow the use of its poles for fire alarm, police, or other like signal systems, such use shall be permitted under the terms of this Article, provided attachments of such parties are placed and maintained in accordance with the specifications mentioned in Article III.

ARTICLE XV

Liability and Damages

Whenever any liability is incurred by either or both of the parties hereto, for damages for injuries to the employees or for injury to the property of either party, or for injuries to other persons or their property, arising out of the joint use of poles under this agreement, or due to the proximity of the wires and fixtures of the parties hereto attached to the jointly used poles covered by this agreement, the liability for such damages, as between the parties hereto, shall be as follows:

1. Each party shall be liable for all damages for such injuries to persons or property caused solely by its negligence or solely by its failure to comply at any time with the specifications herein provided for; provided, that construction temporarily exempted from the application of said specifications under the provisions of Section (a) of Article VII shall not be deemed to be in violation of said specifications during the period of such exemption.

2. Each party shall be liable for all damages for such injuries to its own employees or its own property that are caused by the concurrent negligence of both parties hereto or that are due to causes which cannot be traced to the sole negligence of the other party.

3. Each party shall be liable for one-half (1/2) of all damages for such injuries to persons other than employees of either party, and for one-half (1/2) of all damages for such injuries to property not belonging to either party that are caused by the concurrent negligence of both parties hereto or that are due to causes which cannot be traced to the sole negligence of the other party.

4. Where, on account of injuries of the character described in the preceding paragraphs of this Article, either party hereto shall make any payments to injured employees or to their relatives or representatives in conformity with (1) the provision of any Workmen's Compensation Act or any act creating a liability in the employer to pay compensation for personal injury to an employee by accident arising out of and in the course of the employment, whether based on negligence on the part of the employer or not, or (2) any plan for employees' disability benefits or death benefits now established or hereafter adopted by the parties hereto or either of them, such payments shall be construed to be damages within the terms of the preceding paragraphs numbered 1 and 2 and shall be paid by the parties hereto accordingly.

5. All claims for damages arising hereunder that are asserted against or affect both parties hereto shall be dealt with by the parties hereto jointly; provided however, that in any case where the claimant desires to settle any such claim upon terms acceptable to one of the parties hereto but not to the other, the party to which said terms are acceptable may, at its election, pay to the other party one-half (1/2) of the expense which such settlement would involve, and thereupon said other party shall be bound to protect the party making such payment from all further liability and expense on account of such claim.

6. In the adjustment between the parties hereto of any claim for damages arising hereunder, the liability assumed hereunder, by the parties shall include, in addition to the amounts paid to the claimant, all expenses incurred by the parties in connection therewith, which shall comprise costs, attorneys' fees, disbursements and other proper charges and expenditures.

7. The provisions of Article XV are intended solely to determine the liability for damages hereinabove set out, as between the parties hereto; and nothing contained in an agreement shall be construed to create any liability for any injuries to any other persons or their property if such liability would not have been renewed by either of the parties hereto in the absence of the agreement.

ARTICLE XVI

Assignments of Rights

Except as otherwise provided in this Agreement, neither party shall hereto assign or otherwise dispose of this agreement or any of its rights or interests hereunder, or in any of the jointly used poles, or the attachments or rights of way covered by this agreement,

to any firm, corporation or individual, without the written consent of the other party; provided, however, that nothing herein contained shall prevent or limit the right of either party to mortgage any or all its property, rights, privileges, and franchises, or lease or transfer any of them to another corporation organized for the purpose of conducting a business of the same general character as that of such party, or to enter into any merger or consolidation; and, in case of the foreclosure, of such mortgage; or in case of such lease, transfer, merger, or consolidation, its rights and obligations hereunder shall pass to, and be acquired and assumed by, the purchaser or foreclosure, the transferee, lessee, assignee, merging or consolidating company, as the case may be; and provided, further that subject to all of the terms and conditions of this agreement, either party may permit any corporation conducting a business of the same general character as that of such party, and owned, operated, leased and controlled by it, or associated or affiliated with it, in interest, or connected with it, the use of all or any part of the space reserved hereunder on any pole covered by this agreement for the attachments used by such party in the conduct of its said business; and for the purpose of this agreement all such attachments maintained on any such pole by the permission as aforesaid of either party hereto shall be considered as the attachments of the party granting such permission, and the rights, obligations and liabilities of the party granting such permission, and the rights, obligations and liabilities of such party under this agreement, with respect to such attachments, shall be the same as if it were the actual owner thereof.

ARTICLE XVII

Waiver of Terms or Conditions

The failure of either party to enforce or insist upon compliance with any of the terms or conditions of this agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

ARTICLE XVIII

Payment of Taxes

Each party shall pay all taxes and assessments lawfully levied on its own property upon said jointly used poles, and the taxes and the assessments which are levied on said joint poles shall be paid by the owner, thereof, but any tax, fee or charge levied on owner's poles solely because of their use by the licensee shall be paid by the licensee.

ARTICLE XIX

Bills and Payment for Work

Upon the completion of work performed hereunder by either party, the expense of which is to be borne wholly or in part by the other party, the party performing the work shall present to the other party within 60 days after the completion of such work an itemized statement of the costs and such other party shall within 60 days after such statement is presented pay to the party doing the work such other party's proportion of the cost of said work.

ARTICLE XX

Service of Notices

Whenever in this agreement notice is provided to be given by either party hereto to the other, such notice shall be in writing and given by letter mailed, or by personal delivery, to the Utility Company at its office at Monticello, Kentucky, or to the Telephone Company at its office at Lexington, Kentucky, as the case may be, or to such other address as either party may from time to time designate in writing for that purpose.

ARTICLE XXI

Term of Agreement

Subject to the provision of Article XIII, Defaults, herein, this agreement shall remain in effect until terminated at the end of 10 years from the date hereof or thereafter upon the giving of written notice to the other party not less than two years prior to the date of termination.

ARTICLE XXII

Existing Contracts

All existing agreements between the parties hereto for the joint use of poles are by mutual consent hereby abrogated and superseded by this agreement, provided, however, that the parties hereto shall make payment and settlement under said existing contracts up to the effective date of this agreement.

Nothing in the foregoing shall preclude the parties to this agreement from preparing such supplemental operating routines or working practices as they mutually agree to be necessary or desirable to effectively administer the provisions of this agreement.

The effective date of this agreement shall be January 1, 1982.

IN WITNESS WHEREOF, the parties hereto have caused this agreement to be executed as of the day and year first above written.

GENERAL AGREEMENT

JOINT USE OF WOOD POLES IN RURAL AREAS

PREAMBLE

Nolin Rural Electric Cooperative Corporation, a corporation organized under the laws of the State of Kentucky, (hereinafter called the "Electrical Distributor"), and General Telephone Company, a corporation organized under the laws of the State of Delaware (hereinafter called the "Telephone Company"), desiring to cooperate in the joint use of their respective poles, erected or to be erected within the rural areas in which both parties render service in the State of Kentucky, whenever and wherever such use shall, in the estimation of both parties, be compatible with their respective needs, do hereby, in consideration of the premises and the mutual covenants herein contained, covenant and agree for themselves and their respective successors and assigns as follows:

ARTICLE I

SCOPE OF AGREEMENT

- (a) This Agreement shall be in effect in the areas in which both of the parties render service in the State of Kentucky, and shall cover all wood poles now existing or hereafter erected in the above territories, except where said poles are covered by or later brought under an urban contract of the parties, when said poles are brought under this Agreement in accordance with the procedure hereinafter provided.
- (b) Each party reserves the right to exclude any of its facilities from joint use.
- (c) It is the intention of the parties that adequate electric and telephone service shall be made available to the widest practicable number of rural users in the above territory.

ARTICLE II

EXPLANATION OF TERMS

For the purpose of this Agreement, the following terms shall have the following meanings:

1. A JOINT POLE is a pole jointly used by both parties.
2. A NORMAL JOINT POLE is a pole which is just tall enough to provide normal spaces, as normal space is hereinafter defined, for the respective parties and just strong enough to meet the requirements of the specifications mentioned in Article III for the attachments ordinarily placed by the parties in their respective normal spaces. Such pole for the purpose of this Agreement shall be a ~~30~~ 40 foot class ~~4~~ wood pole as classified by the pole classification tables of the American Standards Association.
3. SPACE is the linear portion of a joint pole parallel to its axis reserved for the exclusive use of one of the parties (subject only to the exceptions provided for in this Article and the specifications mentioned in Article III which in certain instances permit the making of certain attachments by one party in the space reserved for the other party).
4. NORMAL SPACE is the following described space:
 - a. For the Electrical Distributor the uppermost 6½ feet, measured from top of pole.
 - b. For the Telephone Company a space of 2 feet, at a sufficient distance below the space of the Electrical Distributor to provide at all times the minimum clearance required by the specifications mentioned in Article III.

and at a sufficient height above ground to provide the proper vertical clearance above ground or track rails for the lowest horizontally run line wires or cables attached in such space.

The foregoing definition of "a normal joint pole" is not intended to preclude the use of joint poles shorter or of less strength than the normal joint pole in locations where such poles will meet the requirements of the parties hereto.

The above assignment of space is not intended to preclude the use of vertical runs or the mounting of such equipment as terminals or meters on the lower portions of the pole when mutually agreeable.

ARTICLE III SPECIFICATIONS

Except as otherwise provided in Section (f) of Article VII, referring to construction temporarily exempt from the application of the specifications mentioned herein, the joint use of the poles covered by this Agreement shall at all times be in conformity with accepted modern methods such as those suggested in Edison Electric Institute Publication No. 3112 and shall at all times conform to the requirements of the National Electrical Safety Code, Sixth Edition, and subsequent revisions thereof, except where the lawful requirements of public authorities may be more stringent, in which case the latter will govern.

In establishing joint use of wood poles whether installed new for joint use or installed initially for circuits of either party, the total transverse and vertical loads for all conductors attached to a pole covered by this Agreement shall not, under the assumed storm loadings of the National Electrical Safety Code for the area in which the pole is located, exceed fifty (50) percent of the ultimate fiber stress of the supporting pole. In the case of existing pole lines, the strength of the pole shall be assumed to be the same as when new.

Modifications of, additions to, or construction practices supplementing wholly or in part the requirements of the National Electrical Safety Code, shall, when accepted in writing by both parties hereto through their agents authorized to approve such changes, likewise govern the joint use of poles.

ARTICLE IV ESTABLISHING JOINT USE OF EXISTING POLES

(a) Before either party shall make use of the poles of the other party under this Agreement, it shall request permission therefor in writing on the form attached hereto and identified as Appendix A or such other form as may be mutually agreed upon and shall comply with the procedure set forth in said approved form.

(b) Whenever either party desires to reserve space for its attachments on any pole owned by the other party, either as initial space or additional space on such pole, it shall make written application therefor, specifying the location of the poles in question, the amount of space desired on each pole, and the number and character of the circuits to be placed thereon. If, in the judgment of the owner, the poles are necessary for its own sole use or joint use under the circumstances is undesirable, the owner shall have the right to reject the application. In any event, within a reasonable period after the receipt of such application the owner shall notify the applicant in writing whether the application is approved or rejected. Upon receipt of notice from the owner that the application has been approved, and after the completion of any transferring or rearranging which is required to permit the attaching of the applicant's circuits on such poles, including any necessary pole replacements, the applicant shall have the right as licensee hereunder to use such space in accordance with the terms of the application and of this Agreement.

(c) Whenever any jointly used pole or any pole about to be so used under the provisions of this Agreement, is insufficient in height or strength for the existing attachments and for the proposed additional attachments thereon, the owner shall promptly replace such pole with a new pole of the necessary height and strength and shall make such other changes in the existing pole line in which such pole is included as the conditions may then require.

(d) Each party shall place, transfer and rearrange its own attachments, place guys and anchors to sustain any unbalanced loads caused by its attachments, and perform any tree trimming or cutting incidental thereto. Each party shall, with due diligence, attempt at all times to execute such work promptly and in such manner as not to interfere with the service of the other party.

(e) Wherever practicable, double thimble anchor rods with anchors of sufficient holding power to sustain any unbalanced loads of the two parties shall be installed and used jointly. The ownership of the double thimble anchor rods and anchors will be vested in the owner of the pole. In any case, where one party provides at the request of the other party double thimble anchor rods and anchors for the use of both parties the party requesting the double thimble anchor rods and anchors shall pay to the party placing the double thimble anchor rods and anchors a sum equal to half of the cost of the anchors and anchor rods in place. In cases where the existing anchors are adequate for the needs of both parties the party desiring additional guys may where necessary install an adapter at its own expense. In cases where existing anchor rods and anchors are adequate for the needs of only one party the party desiring additional guys and anchors may where necessary install anchors and anchor rods at no expense to the other party or in the case of right-of-way restrictions may provide a double thimble anchor rod and anchor in place of the existing anchor rod and anchor to which the other party can attach its existing guy at its own expense.

(f) The cost of establishing the joint use of existing poles including the making of any necessary pole replacements, shall be borne by the parties hereto in the manner provided in Article VIII - Division of Costs.

ARTICLE V ESTABLISHING JOINT USE OF NEW POLES

(a) Whenever either party hereto requires new pole facilities for an additional pole line, an extension of an existing pole line, or in connection with the reconstruction of an existing pole line, it shall promptly notify the other party to that effect in writing (verbal notice subsequently confirmed in writing may be given in cases of emergency) stating the proposed location and character of the new poles and the character of circuits it intends to use thereon and indicating whether or not such pole facilities will be, in the estimation of the party proposing to construct the new pole facilities, susceptible of joint use. Within a reasonable period after the receipt of such notice, the other party shall reply in writing, stating whether it does, or does not, desire space on the said poles and, if it does desire space thereon, the character of the circuits it desires to use and the amount of space it wishes to reserve. If such other party requests space on the proposed new poles and if the character and number of its circuits and attachments are such that the party proposing to construct the new pole facilities does not consider joint use undesirable, then it shall erect poles suitable for such joint use, subject, however, to the provisions of Section (b) of this Article, and subject further to the condition that request by either party for space on proposed new poles of the other party under this Agreement shall be made in writing on the form attached hereto and identified as Appendix A or such other form as may be mutually agreed upon and shall comply with the procedure set forth in said approved form. The applicant for space on the poles shall be promptly notified in writing of the action taken on the application.

(b) In any case where the parties hereto shall conclude arrangements for the joint use of any new poles to be erected, and the party proposing to construct the new pole facilities already owns more than its proportionate share of joint poles, the parties shall take into consideration the desirability of having the new pole facilities owned by the party owning less than its proportionate share of joint poles so as to work towards such a division of ownership of the joint poles that neither party shall be obligated to pay to the other any adjustment payments because of their respective use of joint poles owned by the other, due regard being given to the desirability of avoiding mixed ownership of poles in a section of line.

(c) Each party shall place its own attachments on the new joint poles and place guys and anchors to sustain any unbalanced loads caused by its attachments except as otherwise provided under Article IV, Section (e). The party owning the pole line shall provide initial right-of-way clearance 15 feet on each side of the center line to the extent practicable, all right-of-way in excess of this 30 foot swath to be borne by the party requiring the additional width. Each party shall, with due diligence, attempt to execute its work promptly and in such manner as not to interfere with the service of the other party.

ARTICLE VI RIGHT OF WAY FOR LICENSEE'S ATTACHMENTS

While the owner and licensee will cooperate as far as may be practicable in obtaining rights-of-way for both parties on joint poles, the owner does not warrant or assure to the licensee any right-of-way privileges or easements on, over or across streets, alleys and public thoroughfares, and private or publicly owned property, and if the licensee shall at any time be prevented from placing or maintaining its attachments on the owner's poles, no liability on account thereof shall attach to the owner of the poles.

ARTICLE VII
MAINTENANCE OF POLES AND ATTACHMENTS

(a) The owner shall maintain its joint poles in a safe and servicable condition and in accordance with the specifications mentioned in Article III and shall replace, reinforce or repair such of these poles as become defective. In case of emergency, with the giving of verbal notice, licensee may replace joint poles, anchors and guys as may be considered necessary for public safety or the restoration of licensee's service, in which case the licensee shall be reimbursed by the owner in the full amount of the cost of labor and materials plus any applicable overhead expenses.

(b) When replacing a jointly used pole carrying terminals of aerial cable, underground connection, or transformer equipment, the new pole shall be set in the same hole which the replaced pole occupied unless special conditions make it necessary or mutually desirable to set it in a different location.

(c) Whenever it is necessary to replace or relocate a jointly used pole, the owner shall, before making such replacement or relocation, give reasonable notice thereof in writing (except in case of emergency, when verbal notice will be given and subsequently confirmed in writing) to the licensee, specifying in such notice the time of such proposed replacement or relocation and the licensee shall at the time so specified transfer its attachments to the new or relocated joint pole. Should the licensee fail to transfer its attachments to the new joint pole on the date specified for such transfer of attachments, the owner may elect to relinquish the ownership of the old pole from which it has removed its attachments, with the giving of verbal notice to be subsequently followed in writing. Such old pole shall thereupon, at no cost to the licensee, become the property of the licensee, and the licensee shall save harmless the former owner of such pole from all obligation, liability, damages, cost, expenses or charges incurred thereafter, and not arising out of anything theretofore occurring, because of, or arising out of, the presence or condition of such pole or of any attachments thereon. In instances where the Electrical Distributor is the owner of such pole the unused portion of the pole above the licensee's attachments shall be cut off and removed by the owner before relinquishing ownership, if the pole remains in structural conflict with the power route.

(d) Each party shall at all times maintain all of its attachments in accordance with the specifications mentioned in Article III and shall keep them in safe condition and in thorough repair. Where the parties mutually agree that right-of-way maintenance on existing joint use lines is necessary for the protection of their service, the cost of the following work shall be shared as follows:

1. The removal of dead or dangerous trees shall be shared equally.
2. Chemical control or removal of undergrowth by cutting at the ground line in a swath measured fifteen feet on each side of the center line as follows:
 - a. 50% of the cost on routes supporting bare aerial wire telephone circuits shall be borne by each party.
 - b. 10% of the costs shall be borne by the Telephone Company, 90% by the Electrical Distributor on routes supporting telephone multiple pair insulated wire.
 - c. Costs will not be shared on routes supporting cable or abrasive resistant wire. Each party will provide for its own requirements.

(e) Each party shall be responsible for trimming its own circuits at its own expense where right-of-way is maintained by trimming (side growth, undergrowth or overhead growth).

(f) Any existing joint use construction of the parties hereto which does not conform to the specifications mentioned in Article III shall be brought into conformity therewith as soon as practicable.

When such existing construction shall have been brought into conformity with said specification, it shall at all times thereafter be maintained as provided in Sections (a) and (d) of this Article.

(g) The cost of maintaining poles and attachments and of bringing existing joint use construction into conformity with said specifications shall be borne by the parties hereto in the manner provided in Article VIII - Division of Costs.

**ARTICLE VIII
DIVISION OF COSTS**

(a) The cost of erecting new joint poles coming under this Agreement, to construct new pole lines, to make extensions to existing pole lines, or to replace existing poles, except as covered in (c) below, shall be borne by the parties as follows:

1. A normal joint pole, or joint pole smaller than normal, shall be erected at the sole expense of the owner.
2. A pole larger than the normal, the extra height or strength of which is due wholly to the owner's requirements including requirements as to keeping the owner's wires clear of trees shall be erected at the sole expense of the owner.
3. In the case of a pole larger than the normal, the extra height or strength of which is due wholly to the licensee's requirements including requirements as to keeping the licensee's wires clear of trees, the licensee shall pay to the owner a sum equal to the difference between the cost in place of such pole and the cost in place of a normal joint pole, the rest of the cost of erecting such pole to be borne by the owner, except insofar as otherwise provided in Section (c) of this Article.
4. In the case of a pole larger than the normal, the extra height or strength which is due to the requirements of both parties or the requirements for proper ground clearance or of public authorities or of property owners, (other than requirements with regard to keeping the wires of one party only clear of trees), the difference between the cost in place of such pole and the cost in place of a normal joint pole shall be shared equally by the licensee and the owner, the rest of the cost of erecting such pole to be borne by the owner.
5. A pole, including all appurtenances or fixtures, erected between existing poles to provide sufficient clearance and furnish adequate strength to support the circuits of both the owner and the licensee, which it would have been unnecessary to erect if joint use had not been undertaken, shall be erected at the sole expense of the licensee.

(b) Any payment for poles made by the licensee under any foregoing provisions of this Article shall not entitle the licensee to the ownership of any part of said poles for which it has contributed in whole or in part.

(c) Where an existing jointly used pole or a non-joint pole is prematurely replaced by a new one solely for the benefit of the licensee, the cost of the new pole shall be divided as specified in Section (a) of this Article and the licensee shall pay the owner the labor cost of removal of the existing pole and the labor cost of replacing or transferring of all appurtenances on the existing pole. The replaced pole shall be removed and retained by its owner.

(d) Each party shall place, maintain, rearrange, transfer and remove its own attachments at its own expense except as otherwise expressly provided herein.

(e) The expense of maintaining joint poles shall be borne by the owner thereof except that the cost of replacing poles shall be borne by the parties hereto in the manner provided in Sections (a) and (c) of this Article.

(f) Where service drops of one party crossing over or under lines of the other party are attached to the other party's poles, either directly or by means of a pole top extension fixture, the cost shall be borne as follows:

1. Pole top extension fixtures shall be provided and installed at the sole expense of the party using them.
2. Where an existing pole is replaced by a taller one to provide the necessary clearance the party owning the service drop shall pay to the party owning the pole the cost of the new pole plus the labor costs of replacing or transferring of the appurtenances on the existing pole, the owner of the existing pole to remove and retain such pole at his own expense.

(g) Payments made by either party to the other under the provisions of this Article may be based on the estimated or actual cost as mutually agreed upon (including overhead) of making such changes but in no event, however, shall either party be required to pay for such changes more than 120% of the estimated cost supplied by the other if such cost estimate shall have been requested and furnished before the changes were made.

ARTICLE IX
PROCEDURE WHEN CHARACTER OF CIRCUITS IS CHANGED

When either party desires to change the character of its circuits on jointly used poles, such party shall give immediate notice to the other party of such contemplated change and in the event that the party agrees in writing to joint use with such changed circuits, then the joint use of such poles shall be continued with such changes in construction as may be required to meet the terms of the specifications mentioned in Article III for the character of circuits involved and such other changes as may be agreed upon. The parties shall cooperate to determine the equitable apportionment of the net expense of such changes. In the event, however, that the other party fails within 30 days from receipt of such notice to agree in writing to such change in character of circuits, then both parties shall cooperate in accordance with the following plan:

1. The parties hereto shall determine the most practical and economical method of effectively providing for separate lines, either overhead or underground, and the party whose circuits are to be moved shall carry out the necessary work as promptly as practicable.
2. The net costs of re-establishing such circuits in the new location as are necessary to furnish the same business facilities that existed in the joint use section at the time such change was decided upon, shall be borne by the licensee; provided, however, that the owner shall bear the cost whenever the change was occasioned by the necessities of the owner. When the net costs are borne by the owner they shall not include the cost of the new pole line constructed by the licensee.

Unless otherwise agreed by the parties, ownership of any new line or underground facilities constructed under the foregoing provisions in a new location shall vest in the party for whose use it is constructed.

ARTICLE X
ABANDONMENT OF JOINT USED POLES

(a) If the owner desires at any time to abandon any jointly used pole, it shall, except as provided in Article VII, Section (c), give the licensee notice in writing to that effect at least 60 days prior to the date on which it intends to abandon such pole. If at the expiration of said period the owner shall have no attachments thereon, such pole shall thereupon become the property of the licensee, and the licensee shall save harmless the former owner of such pole from all obligation, liability, damages, cost, expenses or charges incurred thereafter, and not arising out of anything theretofore occurring, because of, or arising out of, the presence or condition of such pole or of any attachments thereon; and shall pay the owner the then value in place of the pole to the owner. The former owner shall further evidence transfer of title to the pole by appropriate means. Credit shall be allowed for any payments which the licensee may have made under the provisions of Article VII - Division of Costs, when the pole was originally set, provided the licensee furnishes proof of such payment.

(b) The licensee may at any time abandon the use of a joint pole by removing therefrom any and all attachments it may have thereon and by giving such notice as may be mutually agreed upon.

ARTICLE XI
ADJUSTMENT PAYMENTS

(a) The parties contemplate that the use or reservation of space on poles by each party, as licensee of the other under this Agreement shall be based on the equitable sharing of the economies of joint use.

(b) On or about December 1st of each year, each party, acting in cooperation with the other, and subject to the provisions of Section (c) of this Article, shall ascertain and tabulate the total number of poles in use by each party as licensee, which tabulation shall indicate the number of poles in use by each party as licensee for which an adjustment payment by one of the parties to the other is to be determined as hereinafter provided.

(c) For the purpose of such tabulation, any pole used by the licensee for the sole purpose of attaching wires or cables thereto, either directly or by means of a pole top extension fixture, in order to provide clearance between the facilities of the two parties as distinguished from providing support for such wires or cables, shall be considered as a joint pole.

(d) If there is provision under a separate agreement between the Telephone Company and the Electric Distributor for facilities associated with power line carrier systems, the adjustment payment provisions of the

agreement of which this Article forms a part shall apply for poles on which both types of facilities are present and no other adjustment payments shall apply. The adjustment payment provisions of this Agreement shall not apply, however, where only those facilities directly associated with the power line carrier systems are involved.

(e) Adjustment payments per pole due from one party as licensee to the other party or owner shall, subject to the provisions of Article XII, be \$ [redacted] per annum by the Electrical Distributor for each jointly used pole owned by the Telephone Company and \$ [redacted] per annum by the Telephone Company for each jointly used pole owned by the Electrical Distributor. The smaller total sum shall be deducted from the larger and the Electrical Distributor or the Telephone Company, as the case may be, shall pay to the other the difference between such amounts. The adjustment payment herein provided shall be paid within ten days after the bill has been submitted.

(f) At intervals not exceeding five (5) years an actual inventory of attachments shall be made by representatives of the parties. If there is any difference in the number of attachments found by the inventory and the number arrived at by tabulating those reported, correction will be made by retroactive billing for any attachments identified as being responsible for the difference, and any remaining difference will be spread evenly over the years since the last inventory, and billing adjusted accordingly except as otherwise provided under Article XII, Section (c).

ARTICLE XII

PERIODICAL ADJUSTMENT OF PAYMENTS

(a) At any time after 3 years from the date of this Agreement and at intervals of not less than 3 years thereafter, the payments applicable under this Agreement shall be subject to joint review and adjustment as provided for under Section (b) of this Article upon the written request of either party. In case of adjustment of payments as herein provided, the new payments agreed upon shall apply starting with the annual bill next rendered and continuing until again adjusted.

(b) All adjustments of rental shall be in accord with the provisions of Appendix B, and any changes shall take into account the cost factors originally involved in all joint use existing at that time under this Agreement.

(c) An actual inventory of attachments shall be made by representatives of the parties coincident with the effective date of any adjustment rentals.

ARTICLE XIII

DEFAULTS

(a) If either party shall default in any of its obligations under this Agreement and such default continues thirty (30) days after due notice thereof in writing by the other party, the party not in default may suspend the rights of the party in default insofar as concerns the granting of future joint use and if such default shall continue for a period of 90 days after such suspension, the party not in default may forthwith terminate this Agreement as far as concerns the future granting of joint use.

(b) If after reasonable notice either party shall make default in the performance of any work it is obligated to do under this Agreement at its sole expense, the other party may elect to do such work, and the party in default shall reimburse the other party for the cost thereof. Failure on the part of the defaulting party to make such payment within 30 days upon presentation of bills therefor shall, at the election of the other party, constitute a default under Section (a) of this Article.

ARTICLE XIV

EXISTING RIGHTS OF OTHER PARTIES

(a) If either of the parties hereto has, prior to the execution of this Agreement, conferred upon others, not parties to this Agreement, by contract or otherwise, rights or privileges to use any poles covered by this Agreement, nothing herein contained shall be construed as affecting such rights or privileges, and either party hereto shall have the right, by contract or otherwise, to continue and extend such existing rights or privileges, it being expressly understood, however, that for the purpose of this Agreement, the attachments of any such outside party, except those of a municipality or other public authority, shall be treated as attachments belonging to the grantor, and the rights, obligations, and liabilities hereunder of the grantor in respect to such attachments shall be the same as if it were the actual owner thereof.

(b) Where municipal regulations require either party to allow the use of its poles for fire alarm, police, or other like signal systems, such use shall be permitted under the terms of this Article, provided attachments of such parties are placed and maintained in accordance with the specifications mentioned in Article III.

**ARTICLE XV
ASSIGNMENT OF RIGHTS**

Except as otherwise provided in this Agreement, neither party hereto shall assign or otherwise dispose of this Agreement or any of its rights or interests hereunder, or in any of the jointly used poles, or the attachments or rights-of-way covered by this Agreement, to any firm, corporation or individual, without the written consent of the other party, except to the United States of America or any agency thereof; provided, however, that nothing herein contained shall prevent or limit the right of either party to mortgage any or all of its property, rights, privileges, and franchises, or lease or transfer any of them to another corporation organized for the purpose of conducting a business of the same general character as that of such party, or to enter into any merger or consolidation; and, in case of the foreclosure of such mortgage; or in case of lease, transfer, merger, or consolidation, its rights and obligations hereunder shall pass to, and be acquired and assumed by, the purchaser on foreclosure, the transferee, lessee, assignee, merging or consolidating company, as the case may be; and provided further that subject to all of the terms and conditions of this Agreement, either party may permit any corporation conducting a business of the same general character as that of such party, and owned, operated, leased and controlled by it, or associated or affiliated with it, the use of all or any part of the space reserved hereunder on any pole covered by this Agreement for the attachments used by such party in the conduct of its said business; and for the purpose of this Agreement, all such attachments maintained on any such pole by the permission as aforesaid of either party hereto shall be considered as the attachments of the party granting such permission, and the rights, obligations and liabilities of such party under this Agreement, with respect to such attachments, shall be the same as if it were the actual owner thereof.

**ARTICLE XVI
WAIVER OF TERMS OR CONDITIONS**

The failure of either party to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

**ARTICLE XVII
PAYMENT OF TAXES**

Each party shall pay all taxes and assessments lawfully levied on its own property upon said jointly used poles, and the taxes and the assessments which are levied on said joint poles shall be paid by the owner thereof, but any tax, fee, or charge levied on owner's poles solely because of their use by the licensee shall be paid by the licensee.

**ARTICLE XVIII
BILLS AND PAYMENT FOR WORK**

Upon the completion of work performed hereunder by either party, the expense of which is to be borne wholly or in part by the other party, the party performing the work shall present to the other party within 90 days after the completion of such work an itemized statement of the costs and such other party shall within 30 days after such statement is presented pay to the party doing the work such other party's proportion of the cost of said work.

**ARTICLE XIX
SERVICE OF NOTICES**

Whenever in this Agreement notice is provided to be given by either party hereto to the other, such notice shall be in writing and given by letter mailed, or by personal delivery, to the Electrical Distributor at its office

P. O. Box 668, Elizabethtown, Kentucky 42701

or to the Telephone Company at its office at 111 South Main Street

Elizabethtown, Kentucky 42701

as the case may be
or to such other address as either party may from time to time designate in writing for that purpose.

WIN2389

ARTICLE XX

TERM OF AGREEMENT

be effective on and after January 1, 1971 and shall

This Agreement shall continue in full force and effect until the 1st day of January, 1976, and shall continue thereafter until terminated, insofar as the making of attachments to additional poles is concerned, by either party giving to the other one (1) years notice in writing of intention to terminate the right of making attachments to additional poles. Any such termination of the right to make attachments to additional poles shall not, however, abrogate or terminate the right of either party to maintain the attachments theretofore made on the poles of the other or additional attachments to such poles, and all such attachments shall continue thereafter to be maintained, pursuant to and in accordance with the terms of this Agreement, which Agreement shall, so long as said attachments are continued, remain in full force and effect solely and only for the purpose of governing and controlling the rights and obligations of the parties with respect to said attachments.

ARTICLE XXI

EXISTING CONTRACTS

All existing agreements between the parties hereto for the joint use of poles in rural areas are by mutual consent hereby abrogated and superseded by this Agreement.

Nothing in the foregoing shall preclude the parties to this agreement from preparing such supplemental operating routines or working practices as they mutually agree to be necessary or desirable to effectively administer the provisions of this Agreement.

ARTICLE XXII

APPROVAL OF THE ADMINISTRATOR

This Agreement, and any amendment thereof, shall be effective subject to the condition that, during any period in which the Electrical Distributor is a borrower from the Rural Electrification Administration, the Agreement and any amendment thereof shall have the approval in writing of the Administrator of the Rural Electrification Administration.

In witness whereof the parties hereto, have caused these presents to be executed in triplicate, and their corporate seals to be affixed thereto by their respective officers thereunto duly authorized, on the 22nd day of December, 1971.

APPENDIX A

0 _____
Name of Electrical Distributor Date

Address Request Number

This is to request permission for this company to use jointly certain of your poles under the terms and conditions of our General Agreement for Joint Use of Wood Poles in Rural Areas, dated _____

The poles, including the number and character of circuits to be placed thereon, for which this permission is requested are those included in the pole lines indicated on the attached map, which also bears the above date and Request Number.

Our present plan is to start this work about _____, 19____,
and complete the work about _____, 19____

If permission to use these poles is given by you, this Company will prepare and furnish to you, after engineering is complete, detailed construction plans and drawings, together with necessary maps, to indicate specifically your poles that we wish to use jointly, the number and character of the circuits to be placed on such poles, and any rearrangements of fixtures and equipment necessary, as well as any relocations or replacements of existing poles, and any additional poles that may be required, in accordance with the procedure provided in Articles IV and V of this Agreement.

If the joint use proposed is agreeable, please signify your approval of this request in the space provided and return the second copy to us.

APPENDIX B

This Appendix describes the basic principles and guides which have been used under this Agreement in setting the adjustment payments specified in Article XI and which are to be used in making periodical adjustment of payments as provided for in Article XII.

Under these principles the adjustment payments are intended, insofar as it is practicable, to result in a sharing of the economies realized by the joint use of pole plant in proportion to the relative costs of separate pole line construction.

The procedures outlined herein take into account the following objectives:

1. An equitable division of savings regardless of the number of jointly used poles owned by each party.
2. Adjustment payments applicable universally in the area covered by the Agreement regardless of whether the pole lines involved are initially constructed with joint use in view or are existing lines modified for joint use.
3. Appropriate allowance in the adjustment payments for additional costs incurred by each party in supplying 'normal joint poles', as defined in the Agreement, and the costs of other items required in the joint use of poles which would not be incurred in separate line construction.
4. Adjustment payments based on the costs of "typical miles" of separate lines, of newly constructed joint lines and of existing lines modified to make them suitable for joint use. The 'per mile' values of adjustment payments are then reduced to 'per pole' values for purposes of simplifying tabulations and to provide for the joint use of scattered poles.

The adjustment payments are the dollar values resulting from the licensee paying to the owner, as annual adjustment payments, an amount representing the annual charge on a separate line for the licensee less the sum of (a) the annual charges on the additional costs incurred by the licensee in establishing joint use and (b) the licensee's share of the total annual savings. This share is the ratio of the licensee's typical separate line costs to the sum of the typical separate line costs of each of the parties.

The annual adjustment payments can also be stated as follows:

| | | | | | | |
|---|----------|---|--------|---|------|--|
| Licensee's annual adjustment payment | (equals) | Annual charges saved by Licensee through not having to build a separate line | (less) | Licensee's appropriate percentage | (of) | Total savings in annual charges realized through joint use. |
|---|----------|---|--------|---|------|--|

The cost in place of a line of poles is made up of a number of factors including such items as right-of-way solicitation, clearing, staking, direct labor and material costs of bare poles in place and pro rata shares of construction supervision and overhead. These costs, for a specific area, may differ considerably from corresponding costs in other parts of the country. These variations in pole line costs will, however, affect both power and telephone lines to about the same degree.

JOINT USE OF FACILITIES
ELECTRIC POWER SYSTEMS
TELEPHONE SYSTEMS
AMENDMENT TO ARTICLE XI OF GENERAL AGREEMENT
FOR JOINT USE OF WOOD POLES IN RURAL AREAS

The Electrical Distributor and the Telephone Company agree that the following amendment shall be a part of the Agreement between the parties dated January 1, 1972.

Amend Section E, Article XI by deleting the first sentence thereof and substituting in it's place the following:

"Adjustment payments per pole due from one party as licensee to the other party or owner shall, subject to the provisions of Article XII, be \$12.50 per annum by the Electrical Distributor for each jointly used pole owned by the Telephone Company and \$10.00 per annum by the Telephone Company for each jointly used pole owned by the Electrical Distributor."

Executed on the 4th day of May, 1994.

TELEPHONE SYSTEMS

AMENDMENT TO ARTICLE II, OF GENERAL AGREEMENT

FOR JOINT USE OF WOOD POLES IN RURAL AREAS

The Electrical Distributor and the Telephone Company agree that the following amendment shall be a part of the Agreement between the parties dated January 1, 1972.

Amend Section 2, Article II by deleting the 35 foot class 5 wood pole and substituting in its place 40 foot class 4 wood pole.

→ Section 2, Article II shall now read as follows:

2. A NORMAL JOINT POLE is a pole which is just tall enough to provide normal spaces, as normal space is hereinafter defined, for the respective parties and just strong enough to meet the requirements of the specifications mentioned in Article III for the attachments ordinarily placed by the parties in their respective normal spaces. Such pole for the purpose of this Agreement shall be a 40 foot class 4 wood pole as classified by the pole classification tables of the American Standards Association.

Executed on the 3rd day of November 1982.

JOINT USE OF FACILITIES

ELECTRIC POWER SYSTEMS

TELEPHONE SYSTEMS

AMENDMENT TO ARTICLE XI, OF GENERAL AGREEMENT

FOR JOINT USE OF WOOD POLES IN RURAL AREAS

The Electrical Distributor and the Telephone Company agree that the following amendment shall be a part of the Agreement between the parties dated January 1, 1972.

Amend Section E, Article XI by deleting the first sentence thereof and substituting in its place the following:

"Adjustment payments per pole due from one party as licensee to the other party or owner shall, subject to the provisions of Article XII, be \$9.00 per annum by the Electrical Distributor for each jointly used pole owned by the Telephone Company and \$7.25 per annum by the Telephone Company for each jointly used pole owned by the Electrical Distributor."

Executed on the 3rd day of November 1972.

Dear Cliff

I have enclosed one copy of the executed amendment to the existing Joint Use Agreement between GTE South and Nolin RECC.

If you should have any questions, please let me know.

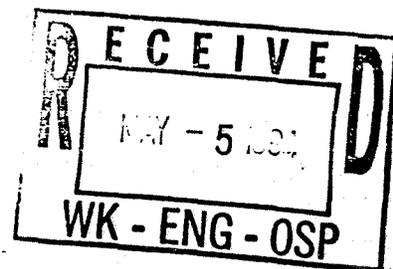

Sincerely

Mickey Miller
General Manager

Enclosure

NY-0-007

THIS AGREEMENT, made as of the first day of January 1, 1994 by and between Salt River Electric Cooperative Corporation, a Kentucky corporation, hereinafter referred to as the "Power Distributor," and ALLTEL KENTUCKY, INC., a Kentucky Corporation, hereinafter referred to as the "Telephone Company."

WITNESSETH:

WHEREAS, in the areas in the State of Kentucky served by both parties certain utility poles are presently used jointly by the Power Distributor and the Telephone Company, such joint use being maintained under the terms of an USDA, REA, and Joint Use Agreement dated, April 5, 1965 between the Power Distributor and Echo Telephone Company and Telegraph Company, predecessor of the Telephone Company, and a Joint Use Agreement dated April 5, 1965, between Salt River Electric Cooperative Corporation and the hereinafter Telephone Company.

WHEREAS, the parties desire to continue such joint use and to use other poles jointly in the future, when and where such joint use will be of mutual advantage in meeting their respective service requirements; and

WHEREAS, when the parties are making arrangements for the joint use of new poles and the party proposing to erect the new poles already owns a majority of the poles, the parties shall take into consideration the desirability of having the new poles owned by the party owning the lesser number of joint use poles so as to progress toward a division of ownership of poles so that neither party shall be required to pay annual rental payments, giving due regard to the avoidance of mixed ownership in lines; and

WHEREAS, because of changed conditions and experience gained, and to facilitate administration of joint use, the parties desire to terminate the aforementioned Joint Use Agreements dated April 5, 1965, and enter into a new Joint Use Agreement giving due recognition to the fact that the comparative numbers of joint use poles owned by the parties, the respective space allocated to or used by the parties, the concern for the ability to provide reliable service, the relative positions of the parties on the poles all have a bearing on the contribution to be made by the parties both as to ownership and maintenance of joint use poles.

NOW, THEREFORE, in consideration of the premises and the mutual covenants herein contained, the parties hereto for themselves, their successors and assigns do hereby terminate the existing Urban Joint Use Agreement dated April 5, 1965, and the existing Rural Joint Use Agreement dated April 5, 1965, and do hereby covenant and agree as follows:

ARTICLE I
DEFINITIONS

For the purpose of this Agreement, the following terms when used herein shall have the following meanings:

- A. ATTACHMENTS means any wires, cables, strands, materials or apparatus affixed to a joint use pole now or hereafter used by either party in the construction, operation or maintenance of its plant.
- B. CHANGE IN CHARACTER OF CIRCUITS shall mean any change in either party's facilities which affects either loading on the pole or clearance between the facilities of the parties hereto.
- C. CODE means the National Electrical Safety Code, as it may be amended from time to time.
- D. DAYS as used herein shall mean calendar days.
- E. INJURIES include death, personal injury and property damage or destruction.
- F. JOINT USE is maintaining or specifically reserving space for the attachments of both parties on the same pole at the same time.
- G. JOINT USE POLE is a pole upon which space is provided under this Agreement for the attachments of both parties, whether such space is actually occupied by attachments or reserved therefore upon specific request.
- H. LICENSEE is the party having the right under this Agreement to make attachments to a joint use pole that the other party owns.
- I. OWNER is the party owning the joint use pole.
- J. POLE OR POLES includes the singular and plural.
- K. REARRANGING OF ATTACHMENTS is the moving of attachments from one position to another on a joint use pole.
- L. RESERVED, as applied to space on a pole, means unoccupied space provided and maintained by Owner, either for its own use or expressly for Licensee's exclusive use at Licensee's request.
- M. RIGHT OF WAY is the legal right to use the property of another.

- N. STANDARD JOINT USE POLE means a 40-foot, Class 4 treated wood pole which meets the requirements of the Code. The parties may agree to use a smaller than Class four pole; but under no condition shall the standard joint use pole be less than the minimum requirements of the Code.
- O. STANDARD SPACE ALLOCATION means an allocation of sufficient space on a joint use pole for the use of each party taking into consideration requirements of the Code, and is more particularly defined as follows:
- (1) For Power Distributor, the use of 10 feet of space on 40-foot poles, and 6 1/2 feet on 35-foot poles, measured downward from the top of the pole; and
 - (2) For Telephone Company, the use of 2 feet of space on joint use poles, below the space of the Power Distributor starting at the point that gives adequate Code separation on the pole. If under the terms of this Agreement the Telephone Company uses a portion of the Power Distributor's allocated space as measured from the top of the pole, the Telephone Company agrees that its use is permissive and that the Power Distributor shall have the undisputed use of its allocated space measured from the top. Telephone Company agrees to move any such attachments within this allocated space at its own cost upon demand of the Power Distributor. Similarly, if the Power Distributor uses a portion of the Telephone Company's 2-foot space, the Power Distributor agrees that such use shall be permissive. Power Distributor agrees to move any such attachment within the 2 foot space.
 - (3) The foregoing definition of a "normal joint use pole" is not intended to preclude the use of joint poles shorter or taller or of different strength than the normal joint use pole in locations where it is mutually agreed such poles will meet the requirements of the code and of the parties hereto.
- P. TRANSFERRING OF ATTACHMENTS is the removing of attachments from one pole and placing the attachments upon another pole.

ARTICLE II
TERRITORY AND SCOPE OF AGREEMENT

- A. This Agreement shall cover all poles of each of the parties now existing in joint use and those hereafter erected or acquired within the common operating areas served by the parties excepting poles which in the Owner's judgment are necessary or only feasible for its own sole use.

- B. The boundaries in existence at the time of the execution of this Agreement shall remain in effect until removed in accordance with Article X (B) of this Agreement, or otherwise modified by mutual agreement of the parties.

ARTICLE III
PERMISSION FOR JOINT USE

Subject to the terms and conditions of this Agreement, each party hereby permits joint use by the other party of any of its poles in accordance with the standard space allocation defined in Article I and the following:

- (1) Allocated pole space may, without additional charge, be used by the party to which it is not allocated for the purpose of installing and maintaining street lighting, traffic signal systems, and vertical attachments (such as but not limited to ground wires, gang operated switch control rods and underground risers) if by the terms of the code the proposed use is authorized and such use does not unreasonably interfere with the use being made by the party to which such space is allocated (such determination will be made solely by the party to which the space is allocated).

If code provisions cannot subsequently be met then billing for the required modifications will be as set forth in Appendix A.

- (2) As long as the provisions of the code are met, unallocated space may be used without additional charge by the Power Distributor and/or Telephone Company. If code provisions cannot subsequently be met then billing for required modifications will be as set forth in Appendix A.
- (3) As long as the provisions of the code in effect at the time the attachments were installed, have been met, any joint use pole now in place shall be deemed satisfactory to both parties and adequate for its requirements whether or not the space allocations made herein have been observed.
- (4) As long as the provisions of the Code are met, any pole hereafter made joint use shall thereupon be deemed satisfactory to Licensee and adequate for its requirements whether or not the space allocations made herein have been observed.

ARTICLE IV
SPECIFICATIONS

The joint use of poles covered by this Agreement shall at all times be in conformity with all applicable provisions of law and with the minimum requirements of the Code in effect at the time the respective attachments are made, and with such additional requirements as may be mutually approved in writing by the Chief Operations Officer or Manager of Engineering, of the Power Distributor and Engineering Supervisor of the Telephone Company.

ARTICLE V
RIGHT-OF-WAY AND LINE CLEARING

- A. The Owner and Licensee will cooperate as far as may be practicable in obtaining sufficient right-of-way for both parties. When a written easement is secured it shall be in sufficient detail for identification and recording, and shall be subject to inspection by the other party upon request. However, no guarantee is given by the Owner of permission from property owners, municipalities or others for the use of poles by the Licensee, and if objection is made thereto and the Licensee is unable to satisfactorily resolve the matter within a reasonable time, the Owner may at any time, upon notice in writing to the Licensee, require the Licensee to remove its attachments from the poles involved, and the Licensee shall, within ninety (90) days after receipt of said notice, remove its attachments from such poles at its sole expense. Should the Licensee fail to remove its attachments as herein provided, the Owner may remove them at the Licensee's expense, without any liability whatever for such removal or the manner of making it, for which expense the Licensee shall reimburse the Owner on demand. Owner shall provide a 20' right-of-way whenever possible. Nothing stated herein shall preclude the parties from mutually sharing the cost of right-of-way acquisition.
- B. Line clearing and trimming will be performed as follows:
- (1) When constructing a new joint use pole line the Owner shall cut, clear and trim a 15' right-of-way, if possible. Additional right-of-way will be the responsibility of the Licensee.
 - (2) In all other instances each party shall be responsible for its own initial and recurring trimming, clearing and cutting.

ARTICLE VI
PLACING, TRANSFERRING OR REARRANGING ATTACHMENTS

- A. Either party desiring to reserve space on any pole of the other not then designated as a joint use pole shall make written application therefore, specifying the pole involved, the number and kind of its attachments to be placed thereon and the character of the circuits to be used. Within ten (10) days after the receipt of such application, owner shall notify the applicant in writing whether it is excluding said pole from joint use under the provisions of Article II. Upon receipt of notice from Owner that said pole is not excluded, and after completion of any required transferring or rearranging of attachments on said pole or any pole replacement as provided in Article VII the applicant shall have the right to use said pole as Licensee in accordance with the terms and conditions of this Agreement. Notwithstanding the foregoing, attachments placed by either party on the other's pole without such application and approval shall subject said pole to the terms of this Agreement. In such case, Owner shall have the right to require Licensee to remove within ninety (90) days at its sole expense any such attachments on poles coming within the exceptions described in Article V. Should Licensee fail to remove such attachments, such failure shall constitute default according to Article XIV.
- B. Except as herein otherwise expressly provided, each party at its own expense shall place, maintain, rearrange, transfer and remove its own attachments, and shall at all times perform such work promptly and in such a manner as not to interfere with work or service being performed by the other party. Upon completion of work by the Owner which will necessitate transfer of the Licensee's attachments, the Owner shall provide written notice to the Licensee that such transfer must be completed within sixty (60) days. If such transfer of attachments is not completed within sixty (60) days the old pole shall become the property of the Licensee, and the Licensee shall save harmless the former Owner of such pole from all obligations, liabilities, damages costs, expenses, or charges incurred thereafter arising out of the presence, location or condition of such pole or attachment thereon, whether or not it is alleged that the former Owner was negligent or otherwise except that the Licensee shall not be liable hereunder for the prior negligence or wrongful acts or omissions of the Owner which were not known or readily discoverable by the Licensee in a reasonable time after the written notice hereunder. Licensee shall pay the former Owner the present in-place value, as set forth in Appendix A, for said pole.

- C. When the Power Distributor desires to change the primary voltage system to an amount above 34.5 KV phase to phase on joint use lines, it shall give the Telephone Company sixty (60) days written notice of such contemplated change. If the Telephone Company agrees to joint use with such change, joint use of such poles shall be continued with such changes in construction as may be required to meet the terms of the Code at the expense of the Power Distributor. If the Telephone Company does not agree within thirty (30) days from receipt of said notice to such change, then:
- (1) the parties hereto shall determine what circuits shall be removed from existing points on the joint use poles involved, and the net cost of establishing a new position on said poles or in a location elsewhere, those circuits or lines as may be necessary to allow the other party to continue to furnish the same service that existed at the time the change was decided upon; and
 - (2) the responsibility of the cost of establishing such circuits in the new position or new location shall be mutually agreed upon between the parties hereto.

ARTICLE VII
ERECTING, REPLACING OR RELOCATING POLES

- A. Whenever any jointly used pole, or any pole about to be so used under the provisions of this agreement, is insufficient in size or strength for the existing attachments and for the proposed immediate additional attachments thereon, the Owner shall within sixty (60) days replace such pole with a new pole of the necessary size and strength, and make such other changes in the existing pole line in which such pole is included, as may be made necessary by the replacement of such pole and the placing of the Licensee's circuits as proposed. By mutual agreement, the time period may be shortened or extended.
- B. The parties recognize and agree that there are inherent dangers involved in the transmission and distribution of electricity. The parties agree that unforeseeable emergency conditions will exist from time to time. When due to accidents, storm damage, etc., it is necessary for the Licensee to replace the Owner's pole immediately to restore service to its customers or to eliminate a hazardous condition and the Owner cannot perform the work in time to meet the Licensee's requirements, Licensee may replace the Owner's pole. Licensee will make all of its required facility changes or transfers and will secure the old pole to the new pole so the Owner may make its transfers when feasible. Licensee shall bill the Owner the total cost of the new pole in

accordance with appendix B. Owner shall continue to own the old pole and shall be responsible for its removal, and the new pole will become the property of the original owner. Licensee may at any time abandon a joint use pole by removing therefrom all of its attachments, and giving due notice thereof in writing to Owner.

- C. Whenever it is necessary to change the location of a jointly used pole, by reason of any state, municipal or other governmental requirement, or the requirements of a property owner, the Owner shall, before making such change in location, give notice thereof in writing (except in cases of emergency) to the Licensee, specifying in such notice the time of such proposed relocation, and the Licensee shall, within sixty (60) days, transfer its attachment to the pole at the new location.
- D. In any case where the parties hereto shall conclude arrangements for the joint use of any new poles to be erected, the ownership of such poles shall be determined by mutual agreement. In the event of disagreement as to ownership, the party then owning the lesser number of poles under this Agreement shall promptly erect the new joint poles and be the owner thereof or if the party owning the lesser number of poles can not install the poles in time to meet the service requirements of the party owning the greater number of poles, the party owning the greater number of poles may set the poles and bill the other party the total cost of setting said poles in accordance with Appendix A. The party owning the lesser number of poles shall be the owner thereof.
- E. Whenever either party thereto is about to erect new poles, either as an additional pole line, as an extension of an existing pole line, or as the reconstruction of an existing pole line, it shall notify the other in writing at least thirty (30) days before beginning the work (short notice, including verbal notice subsequently confirmed in writing, may be given in cases of emergency) and shall submit with such notice its plan showing the proposed location and size of the new poles, and circuits it will use thereon. The other party shall, within fifteen (15) days after the receipt of such notice, reply in writing to the party erecting the new poles, stating whether such other party does, or does not, desire space on the said poles, and if it does desire space thereon, the character of the circuits it desires to use and the amount of space it wishes to reserve. This notice of desire to establish joint use should include detailed plans of any changes in the plans of the other party which are desired in order to permit the establishment of joint use. If such other party requests space on the new poles and if the character and number of circuits and attachments are such that the Owner does not wish to exclude the poles from joint use under the

provision of Article II, then poles suitable for the said joint use shall be erected in accordance with the provisions and the payment of costs as provided in this Agreement.

F. The costs of erecting joint poles coming under this agreement, either as new pole lines, as extensions of existing pole lines, or to replace existing poles, either existing jointly used poles or poles not previously involved in joint use, shall be borne by the parties as follows:

- (1) Whenever operating and safety conditions prohibit Owner from replacing an existing pole which needs to be replaced, Licensee shall replace the pole and bill Owner in accordance with Appendix A times 1.25.
- (2) A normal joint pole, or a joint pole shorter and/or smaller than the normal pole, shall be erected at the sole expense of the Owner, except as provided in Section G of this Article.
- (3) In the case of a pole taller and/or stronger than the normal pole, the extra height and/or strength of which is due wholly to the Owner's requirements, shall be erected at the sole expense of the Owner.
- (4) In the case of a new pole taller and/or stronger than the normal pole, the extra height and/or strength of which is due wholly to the Licensee's requirements, and Licensee shall pay to the Owner the extra costs for the additional height and/or strength as set forth in Appendix A.
- (5) Where an existing jointly used pole is prematurely replaced by a new one solely for the benefit of the Licensee, the Licensee shall pay the Owner the present in-place value of the existent pole and costs of replacing or transferring all attachments in accordance with Appendix A and Appendix C, and the replaced pole shall be removed and retained by the Owner.
- (6) In the case of a new pole taller and/or stronger than the normal pole, the extra height and/or strength of which is due, to the requirements of both parties, the Licensee shall pay to the Owner a sum equal to one-half the excess height and/or strength as set forth in Appendix A, the rest of the cost of erecting such pole to be borne by the Owner.

- (7) In the case of a new pole taller and/or stronger than the normal pole, where height and/or strength in addition to that needed for the purpose of either or both of the parties hereto is necessary in order to meet the requirements of the code, public authority or of property owners, the excess cost of such pole due to such requirements shall be borne by the Owner.
 - (8) If Licensee only requires the addition of a pole in an existing line because of span length or terrain, the Owner will furnish and erect said pole at the sole expense of the Licensee, and pole shall remain property of Owner. The charges shall be as set forth in Appendix A.
 - (9) Where the Power Distributor has a line that crosses a Telephone Company line and the provisions of the code are met and the Telephone Company desires to set a pole in the Telephone Company line and requests the Power Distributor to attach to said pole, the Telephone Company shall bear all initial and recurring costs of placing and maintaining said pole, except the cost of making and transferring the Power Distributor attachments.
- G. In any case where a pole is erected hereunder to replace another pole solely because such other pole is not tall enough, or of the required strength, to provide adequately for the Licensee's requirements, or where such pole, whether it has space reserved for the Licensee's use or not, had at the time of its erection been pronounced by the Licensee as satisfactory and adequate for its requirements, the Licensee shall, upon erection of the new pole, pay to the Owner, in addition to any amounts payable by the Licensee under paragraphs 3, 4, or 5 of Section F of this Article, a sum equal to the present in-place value as set forth in Appendix A, for the pole which is replaced and the pole removed shall remain the property of the Owner.
- H. In any case where by mutual consent it is desirable to change the ownership of a pole and Licensee erects and owns a joint pole to replace an existing pole of the Owner (instead of the Owner doing so as it is contemplated by Section A of this Article) such Licensee shall pay to the Owner of the replaced pole a sum equal to the present in-place value, as set forth in Appendix A, for the pole which is replaced and the pole removed shall remain the property of the Owner and shall be removed by the Owner.

ARTICLE VIII
MAINTENANCE OF FACILITIES

- A. Owner shall, at its own expense, maintain its joint use poles in a safe and serviceable condition and shall undertake any appropriate safety measures, including without limitation reasonable pole inspections. The Owner's responsibility for maintaining a safe and serviceable condition of its poles shall be in accordance with the requirements of the Code, and shall replace poles that become defective, in accordance with the provisions of Article VII.
- B. The parties recognize and agree that there are inherent dangers involved in the transmission and distribution of electricity. The parties agree that unforeseeable emergency conditions will exist from time to time. When due to accidents, storm damage, etc., it is necessary for the Licensee to replace the Owner's pole immediately to restore service to its customers or to eliminate a hazardous condition and the Owner cannot perform the work in time to meet the Licensee's requirements, Licensee may replace the Owner's pole. Licensee will make all of its required facility changes or transfers and will secure the old pole to the new pole so the Owner may make its transfers when feasible. Licensee shall bill the Owner the total cost of the new pole in accordance with Appendix B. Owner shall continue to own the old pole and shall be responsible for its removal.
- C. Each party shall, at its own expense, at all times maintain all of its attachments in safe condition, thorough repair, and in accordance with the requirements of the Code.
- D. The parties hereby agree that a cooperative approach will be taken in solving noise or inductance problems that may occur.

ARTICLE IX
ABANDONMENT OF JOINT USE POLES

- A. Anytime Owner desires to abandon any joint use pole, it shall give Licensee at least sixty (60) days written notice. If, at the expiration of such period, Owner shall have no attachments on such pole but Licensee shall not have removed all of its attachments therefrom, such pole shall thereupon become the property of Licensee, Licensee shall save harmless the former Owner from all obligations, liabilities, damages, costs expenses, or charges incurred thereafter because of or arising out of the presence, location or condition of such pole or any attachment thereon, whether or not it is alleged that the former Owner was negligent or otherwise.

- B. Licensee may at any time abandon a joint use pole by removing therefrom all of its attachments, and giving due notice thereof in writing to Owner.

ARTICLE X
ADJUSTMENT PAYMENTS

- A. For those agreements which shall remain reciprocal and mutual, the payment per pole due from the licensee to the owner (where the owner is Salt River Electric Cooperative Corporation) shall be [REDACTED] as of the inception date of the agreement. Beginning on January 1, 1995 this rate will escalate to [REDACTED]. Beginning on January 1, 1996 this rate will escalate to [REDACTED] plus an adjustment for the previous annual Telephone Plant Index (TPI) for ALLTEL Kentucky, Inc.

The payment per pole due from the licensee to the owner (where the owner is ALLTEL Kentucky, Inc.) shall be [REDACTED] as of the inception date of the agreement. Beginning on January 1, 1995 this rate will escalate to [REDACTED]. Beginning on January 1, 1996 this rate will escalate to [REDACTED] plus an adjustment for the previous annual Telephone Plant Index (TPI) for Salt River Electric Cooperative Corporation.

- B. Adjustment payments hereunder shall cover rentals accruing during the calendar year and shall be based on the number of poles on which space is occupied or reserved on the first day of December of the year in which the rentals accrue. Within thirty (30) days following such date, or as soon as practical thereafter, each party shall submit a written statement to the other party giving the number of poles on which space was occupied by or reserved for the other party as of such date.
- C. The total adjustment payment due each party shall be determined by multiplying the poles owned and licensed by each party, by the adjustment payment.
- (1) The smaller total amount covered above shall be deducted from the larger amount and the Power Distributor or the Telephone Company, which ever shall owe the larger amount, shall pay the other the difference between said two amounts as the net adjustment payment due for the year involved. Within thirty (30) days after the first day of January next, or as soon as practical thereafter, ensuing after the date of this Agreement, and within thirty (30) days after the first day of each January, or as soon as practical thereafter, during this time this Agreement shall be in effect, the party to which said adjustment payment is owed as of said first day of January, shall submit a written statement (the "Schedule of Pole Rentals") to the other party giving the correct amount owed by the other party.

(2) The adjustment payment herein provided for shall be paid within thirty (30) days after the bill has been submitted, unless said party disputes the amount of such bill within ten (10) days from receipt thereof. In case of such dispute, payment shall be made within thirty (30) days after the bill has been submitted of the amount that is admitted to be due; an agreement concerning the disputed amount shall be attempted with all reasonable dispatch by negotiation. Failing to reach any such agreement by negotiation, either party may make formal written demand on the other for the amount claimed to be due; and if payment thereof is not made within thirty (30) days, suit may be brought for the amount claimed.

D. The rates set forth in paragraph A above shall be effective as of January 1, 1994, and shall remain in effect through December 31, 1996 (the "Base Rate"). The Base Rate shall be escalated, effective January 1, 1996, and annually thereafter, based upon the previous annual Telephone Plant Index ("TPI") for poles for the Alltel of Kentucky, Inc. The Telephone Company shall provide the Power Distributor with the documentation supporting the index at the time of submitting the Schedule of Pole Rentals referred to in Paragraph C (1) above.

ARTICLE XI INVENTORY OF ATTACHMENTS

- A. At intervals not exceeding five (5) years an actual inventory of attachments shall be made by representatives of the parties. If there is any difference in the number of attachments found by the inventory and the number arrived at by tabulating those reported, correction will be made by retroactive billing for any attachments identified as being responsible for the difference, and any remaining difference will be spread evenly over the years since the last inventory and billing adjusted accordingly.
- B. Each party shall share equally the cost of making such inventory attachments.

ARTICLE XII JOINT ANCHORS

The Owner, where practical shall, upon request from Licensee, place anchors suitable for joint use upon consideration of the joint load and guy lead requirements. The cost of the anchor shall be shared, and will be billed, as set forth in Appendix A. Each party shall install its own guy wires.

ARTICLE XIII
GROUNDING AND BONDING

Grounding and bonding will meet the requirements of the Code.

ARTICLE XIV
DEFAULTS

- A. If either party shall fail to discharge any of its obligations under this Agreement and such failure shall continue for thirty (30) days after notice thereof in writing from the other party, all right of the party in default hereunder, pertaining to making attachments to additional poles of the other shall be suspended. If such default shall continue for a period of ninety (90) days after such suspension, the other party may forthwith terminate the right of the defaulting party to attach to additional poles of the other party. Any such termination of the right to attach to such additional poles of the other by reason of any such default shall not abrogate or terminate the right of either party to attach to existing joint use poles or to maintain existing attachments, regardless of the extent of default, and all such attachments shall continue thereafter to be maintained pursuant to and in accordance with the terms of this Agreement, which Agreement shall, so long as such attachments are continued, remain in full force and effect solely and only for the purpose of governing and controlling the rights and obligations of the parties with respect to such attachments.
- B. In the event either party should fail to perform its obligations either during the term of this Agreement or after termination made in accordance with the terms of this Article or Article XIX or fail to properly maintain or promptly replace joint use poles thereto after sixty (60) days written notice from the other, the other party shall have the right, but not the obligation, to maintain such poles or to replace the same at the expense of the party so failing and shall be fully indemnified for all expenses, costs and damages whatever in taking such action or the manner of taking it.

ARTICLE XV
LIABILITY AND DAMAGES

Either party hereto, as the indemnifying party, shall indemnify and hold harmless the other Party, as the indemnified party, from and against any and all claims, damages, losses and expenses, including but not limited to attorneys' fees incurred by the indemnified party due to the negligence or wrongful acts or omission of the indemnified party, arising out of or resulting from the joint use of the poles, and or any acts or omissions under this Agreement. In no event, however, shall either party be liable for the other for consequential, special, or incidental damages. Any interpretations regarding this Agreement or any activities arising hereunder shall be governed by the laws of the state of Kentucky.

ARTICLE XVI
RIGHTS OF OTHER PARTIES

- A. If either party has, prior to the execution of this Agreement, conferred upon others not parties to this Agreement (outside parties), by contract or otherwise, rights or privileges to attach to any of its poles covered by this Agreement, nothing herein contained shall be construed as affecting said rights or privileges with respect to existing attachments of such outside parties, which attachments shall continue in accordance with the present practice; all future attachments of such outside parties shall be in accordance with the requirements of Paragraph B below, except where such outside parties have by agreements entered into prior to the execution of this Agreement acquired enforceable rights or privileges to make attachments which do not meet such space allocations. Owner shall derive all of the revenue accruing from such outside parties. Any contractual rights or privileges of outside parties recognized in this paragraph shall include renewals of or extensions of the term (period) of such contracts.
- B. If either party hereto desires to confer upon others not parties to this Agreement (outside parties), by contract or otherwise, rights or privileges to attach to any of its poles covered by this Agreement, it shall have the right to do so, provided all such attachments of such outside parties are made in accordance with the following: (a) such attachments shall be maintained in the conformity with the requirements of the Code, and (b) such attachments shall not be located within the space allocation of Licensee, unless Licensee concurs in such occupancy. Such concurrence shall in no way waive Licensee's right to occupy its allocated space in the future. Owner shall derive all of the revenue accruing from such outside parties.

ARTICLE XVII
NOTIFICATION PROCEDURES

Wherever in this Agreement notice is required to be given by either party hereto to the other, such notice shall be in writing mailed or delivered to the Chief Operations Officer of the Power Distributor at its office at 111 West Brashear Avenue, Bardstown, Kentucky or to the General Manager-Network Provisioning of the Telephone Company at its office at 229 Lees Valley Road, Shepherdsville, Kentucky, as the case may be, or to such other addressee as either party may from time to time designate in writing for that purpose.

ARTICLE XVIII
TERM OF AGREEMENT

- A. The Agreement shall continue in full force and effect until the 31st day of December, 2006. This Agreement shall continue from year to year thereafter until terminated by either party, giving to the other one (1) year notice in writing of intention to terminate this Agreement. At any time thereafter, the adjustment payment rates applicable under this Agreement shall be subject to joint review and revision upon the written request of either party. In case of revision of the adjustment payment rates as herein provided, the new adjustment payment rates agreed upon shall apply, starting with the annual bill next rendered and continue until again adjusted.
- B. Revisions of the adjustment payments shall be based on experience resulting from previous administration of this Agreement. Any changes shall take into account the original cost factors pertinent to the establishment of the pole facilities involved in all joint use existing under this Agreement at the time of the review. If, within 90 days after the receipt of the request set forth in Article XVIII A above, by either party from the other, the parties hereto fail to agree upon a revision of such rate, then the adjustment payment per pole shall be established at the then existing Base Rate, as escalated by the TPI for a period of two years. The adjustment payment per pole for those systems on the reciprocal rate shall be an amount equal to one-half of the then average annual total cost per pole of the party owning the greater number of poles, based on average in-plant cost factors of providing and maintaining the joint poles covered by this Agreement. For those systems not on the reciprocal rate, the adjustment payment per pole shall be an amount equal to 56% percent (for the power distributor) of the then average annual total cost per pole based on the average in-plant cost factors of providing and maintaining the joint poles covered by this Agreement, and the adjustment payment per pole shall

be an amount equal to 44 percent (for the telephone company) of the then average annual total cost per pole based on the average in-plant cost factors of providing and maintaining the joint poles covered by this Agreement.

ARTICLE XIX
ASSIGNMENT OF RIGHTS

- A. Except as otherwise provided in this Agreement, neither party hereto shall assign or otherwise transfer this Agreement, in whole or in part, without the written consent of the other party; provided that either party shall have the right without such consent to mortgage any or all of its property, rights, privileges and franchises, or to lease or transfer any of them to another corporation organized for the purpose of conducting a business of the same general character as that of such party, or to enter into any merger or consolidation; and, in case of the foreclosure of such mortgage, or in case of such lease, transfer, merger or consolidate its rights and obligations hereunder shall pass to such successors and assigns; and provided, further, that subject to all of the terms and conditions of this Agreement, either party may without such consent permit any corporation conducting a business of the same general character as that of such party, with which it is affiliated by corporate structure, to exercise the rights and privileges of this Agreement in the conduct of its said business.
- B. For the purposes of this Agreement, all attachments maintained on any joint use pole by the permission of either party hereto, as provided in Paragraph A above, shall be considered the attachments of the party granting such permission, and the rights, obligations and liabilities of such party under this Agreement, in respect to such attachments, shall be the same as if it were the actual owner thereof.
- C. The attachments of each party hereto or of others permitted by this Agreement shall at all times be and remain its or their property, with the full right of removal, and shall not become subject to any liens against the other party.

ARTICLE XX
WAIVER OF TERMS OF CONDITIONS

The failure of either party to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

ARTICLE XXI
EXISTING AGREEMENTS

Any existing agreement between the parties hereto for the joint use of wood poles upon a rental basis within the territory covered by this agreement is, by mutual consent, hereby abrogated and annulled. The boundaries established under the Agreements shall remain in effect and shall be mutually agreed upon by the parties upon execution of this Agreement.

ARTICLE XXII
NO EFFECT ON FRANCHISE RIGHTS

Notwithstanding anything elsewhere herein provided, nothing contained in this Agreement shall abrogate, limit or affect any obligations of either party under any franchise granted to either party by the City(ies) within the service area.

ARTICLE XXIII
SOURCE OF PAYMENTS

The obligations of the Power Distributor hereunder shall be payable solely from the funds of Salt River Electric Cooperative Corporation.

ARTICLE XXIV
SUPPLEMENTAL ROUTINES AND PRACTICES

Nothing in the foregoing shall preclude the parties to this Agreement from preparing such supplemental operating routines or working practices as they mutually agree to be necessary or desirable to effectively administer the provisions of this Agreement. Any such supplemental operating routines or working practice must be authorized and approved by the management level officer or employee executing or authorized to execute this contract.

ARTICLE XXV
NO JOINT OWNERSHIP

The Licensee of a joint use pole shall acquire no ownership of or interest in such a pole, the Licensee's rights therein being limited to the right to compliance with the terms and conditions contained in this Agreement.

ARTICLE XXVI
AGREEMENT AFFECTS ONLY PARTIES HERETO

Except only insofar as the express terms of this Agreement make the rights hereunder available to the successors or assigns of the parties hereto, the provisions of this Agreement shall not be interpreted to confer any right of action at law or in equity upon any parties except the parties hereto.

IN WITNESS WHEREOF, the parties here to have caused these presents to be executed in duplicate, and their corporate seals to be affixed thereto by the respective officers thereunto duly authorized, on the day and year first above written.

APPENDICES A, B & C

These Appendices, effective as of January 1, 1994 consisting of four pages, will be used to determine the cost responsibility and amounts to be billed for modifications in accordance with this joint use agreement. Notification forms required to carry out the provisions of this Agreement will be furnished as needed. Annually after the execution of this Agreement, all Appendices may be escalated in accordance with Article X, Subparagraph E set forth above.

APPENDIX A
PRESENT IN-PLACE VALUES OF POLES

Payment for one half cost of anchor and rod shall be as follows

3/4" ROD = \$39.00 Double Eye, 8" Single Helix Anchor

1" or larger ROD - \$55.00 Tripe Eye, 8" Double Helix Anchor or Larger

Payment under Article VII, Section F, Paragraph 8, shall be the current cost in plant plus an attachment cost of \$25.00 for each cable, conductor, or neutral wire.

If Licensee is not present at any time that Dwner removes an old pole and installs a new pole, and the Dwner is required to make a second trip to the site, Licensee hereby agrees to pay \$30.00 to Owner.

Based on 1991 TPI (2.01%)
Revised 21-Oct-92

APPENDIX B

The current cost of treated poles for emergency conditions as discussed in Article VII, paragraph B is as follows:

| Height of Poles | Class 1 | Class 2 | Class 3 | Class 4 | Class 5 | Class 6 | Class 7 | Class 9 |
|-----------------|---------|---------|---------|---------|---------|---------|---------|---------|
| 25' | 349 | 332 | 316 | 304 | 294 | 281 | 270 | 253 |
| 30' | 448 | 422 | 397 | 375 | 355 | 334 | 314 | 290 |
| 35' | 491 | 458 | 430 | 404 | 384 | 362 | 334 | 315 |
| 40' | 568 | 547 | 516 | 486 | 441 | 399 | | |
| 45' | 680 | 635 | 580 | 545 | 512 | | | |
| 50' | 725 | 679 | 652 | 596 | 553 | | | |
| 55' | 898 | 826 | 779 | 713 | | | | |
| 60' | 1213 | 1141 | 1032 | 955 | | | | |
| 65' | 1353 | 1257 | 1145 | | | | | |
| 70' | 1645 | 1447 | | | | | | |

U. S. DEPARTMENT OF AGRICULTURE
RURAL ELECTRIFICATION ADMINISTRATION

REA BORROWER DESIGNATION Kentucky 54 Wayne

THE WITHIN General Agreement for Joint Use of Wood Poles in
Rural Areas, dated January 1, 1972, between the borrower and
General Telephone Company of Kentucky

SUBMITTED BY THE ABOVE DESIGNATED BORROWER PURSUANT TO THE
TERMS OF THE LOAN CONTRACT, IS HEREBY APPROVED SOLELY FOR THE
PURPOSES OF SUCH CONTRACT.

DATED

Sept 4, 1972

FOR THE ADMINISTRATOR

GENERAL AGREEMENT

JOINT USE OF WOOD POLES IN RURAL AREAS

Contract Revised January, 1971

PREAMBLE

South Kentucky Rural Electric Cooperative Corporation, a corporation organized under the laws of the State of Kentucky, (hereinafter called the "Electrical Distributor"), and General Telephone Company of Kentucky, a corporation organized under the laws of the State of Delaware (hereinafter called the "Telephone Company"), desiring to cooperate in the joint use of their respective poles, erected or to be erected within the rural areas in which both parties render service in the State(s) of

Kentucky, whenever and wherever such use shall, in the estimation of both parties, be compatible with their respective needs, do hereby, in consideration of the premises and the mutual covenants herein contained, covenant and agree for themselves and their respective successors and assigns as follows:

ARTICLE I

SCOPE OF AGREEMENT

(a) This Agreement shall be in effect in the areas in which both of the parties render service in the State(s) of Kentucky, and shall cover all wood poles now existing or hereafter erected in the above territories, except where said poles are covered by or later brought under an urban contract of the parties, when said poles are brought under this Agreement in accordance with the procedure hereinafter provided.

(b) Each party reserves the right to exclude any of its facilities from joint use.

(c) It is the intention of the parties that adequate electric and telephone service shall be made available to the widest practicable number of rural users in the above territory.

ARTICLE II

EXPLANATION OF TERMS

For the purpose of this Agreement, the following terms shall have the following meanings:

1. A **JOINT POLE** is a pole jointly used by both parties.

2. A **NORMAL JOINT POLE** is a pole which is just tall enough to provide normal spaces, as normal space is hereinafter defined, for the respective parties and just strong enough to meet the requirements of the specifications mentioned in Article III for the attachments ordinarily placed by the parties in their respective normal spaces. Such pole for the purpose of this Agreement shall be a 35 foot class 5 wood pole as classified by the pole classification tables of the American Standards Association.

3. **SPACE** is the linear portion of a joint pole parallel to its axis reserved for the exclusive use of one of the parties (subject only to the exceptions provided for in this Article and the specifications mentioned in Article III which in certain instances permit the making of certain attachments by one party in the space reserved for the other party).

4. **NORMAL SPACE** is the following described space:

a. For the Electrical Distributor the uppermost 6½ feet, measured from top of pole.

b. For the Telephone Company a space of 2 feet, at a sufficient distance below the space of the Electrical Distributor to provide at all times the minimum clearance required by the specifications mentioned in Article III

GENERAL AGREEMENT

JOINT USE OF WOOD POLES IN RURAL AREAS

Contract Revised January, 1971

PREAMBLE

South Kentucky Rural Electric Cooperative Corporation _____, a corporation organized under the laws of the State of _____ Kentucky _____, (hereinafter called the "Electrical Distributor"), and _____ Kentucky Telephone Company _____, a corporation organized under the laws of the State of _____ Kentucky _____ (hereinafter called the "Telephone Company"), desiring to cooperate in the joint use of their respective poles, erected or to be erected within the rural areas in which both parties render service in the State(s) of _____,

whenever and wherever such use shall, in the estimation of both parties, be compatible with their respective needs, do hereby, in consideration of the premises and the mutual covenants herein contained, covenant and agree for themselves and their respective successors and assigns as follows:

ARTICLE I

SCOPE OF AGREEMENT

(a) This Agreement shall be in effect in the areas in which both of the parties render service in the State(s) of _____ Kentucky _____, and shall cover all wood poles now existing or hereafter erected in the above territories, except where said poles are covered by later brought under an urban contract of the parties, when said poles are brought under this Agreement in accordance with the procedure hereinafter provided.

(b) Each party reserves the right to exclude any of its facilities from joint use.

(c) It is the intention of the parties that adequate electric and telephone service shall be made available to the widest practicable number of rural users in the above territory.

ARTICLE II

EXPLANATION OF TERMS

For the purpose of this Agreement, the following terms shall have the following meanings:

1. A **JOINT POLE** is a pole jointly used by both parties.

2. A **NORMAL JOINT POLE** is a pole which is just tall enough to provide normal space, as normal space is hereinafter defined, for the respective parties and just strong enough to meet the requirements of the specifications mentioned in Article III for the attachments ordinarily placed by the parties in their respective normal spaces. Such pole for the purpose of this Agreement shall be a 35 foot class 5 wood pole as classified by the pole classification tables of the American Standards Association.

3. **SPACE** is the linear portion of a joint pole parallel to its axis reserved for the exclusive use of one of the parties (subject only to the exceptions provided for in this Article and the specifications mentioned in Article III which in certain instances permit the making of certain attachments by one party in the space reserved for the other party).

4. **NORMAL SPACE** is the following described space:

a. For the Electrical Distributor the uppermost 6½ feet, measured from top of pole.

b. For the Telephone Company a space of 2 feet, at a sufficient distance below the space of the Electrical Distributor to provide at all times the minimum clearance required by the specifications mentioned in Article III

and at a sufficient height above ground to provide the proper vertical clearance above ground or track rails for the lowest horizontally run line wires or cables attached in such space.

The foregoing definition of "a normal joint pole" is not intended to preclude the use of joint poles shorter or of less strength than the normal joint pole in locations where such poles will meet the requirements of the parties hereto.

The above assignment of space is not intended to preclude the use of vertical runs or the mounting of such equipment as terminals or meters on the lower portions of the pole when mutually agreeable.

ARTICLE III SPECIFICATIONS

Except as otherwise provided in Section (f) of Article VII, referring to construction temporarily exempt from the application of the specifications mentioned herein, the joint use of the poles covered by this Agreement shall at all times be in conformity with accepted modern methods such as those suggested in Edison Electric Institute Publication No. M12 and shall at all times conform to the requirements of the National Electrical Safety Code, Sixth Edition, and subsequent revisions thereof, except where the lawful requirements of public authorities may be more stringent, in which case the latter will govern.

In establishing joint use of wood poles whether installed new for joint use or installed initially for circuits of either party, the total transverse and vertical loads for all conductors attached to a pole covered by this Agreement shall not, under the assumed storm loadings of the National Electrical Safety Code for the area in which the pole is located, exceed fifty (50) percent of the ultimate fiber stress of the supporting pole. In the case of existing pole lines, the strength of the pole shall be assumed to be the same as when new.

Modifications of, additions to, or construction practices supplementing wholly or in part the requirements of the National Electrical Safety Code, shall, when accepted in writing by both parties hereto through their agents authorized to approve such changes, likewise govern the joint use of poles.

ARTICLE IV ESTABLISHING JOINT USE OF EXISTING POLES

(a) Before either party shall make use of the poles of the other party under this Agreement, it shall request permission therefor in writing on the form attached hereto and identified as Appendix A or such other form as may be mutually agreed upon and shall comply with the procedure set forth in said approved form.

(b) Whenever either party desires to reserve space for its attachments on any pole owned by the other party, either as initial space or additional space on such pole, it shall make written application therefor, specifying the location of the poles in question, the amount of space desired on each pole, and the number and character of the circuits to be placed thereon. If, in the judgment of the owner, the poles are necessary for its own sole use or joint use under the circumstances is undesirable, the owner shall have the right to reject the application. In any event, within a reasonable period after the receipt of such application the owner shall notify the applicant in writing whether the application is approved or rejected. Upon receipt of notice from the owner that the application has been approved, and after the completion of any transferring or rearranging which is required to permit the attaching of the applicant's circuits on such poles, including any necessary pole replacements, the applicant shall have the right as licensee hereunder to use such space in accordance with the terms of the application and of this Agreement.

(c) Whenever any jointly used pole or any pole about to be so used under the provisions of this Agreement is insufficient in height or strength for the existing attachments and for the proposed additional attachments thereon, the owner shall promptly replace such pole with a new pole of the necessary height and strength and shall make such other changes in the existing pole line in which such pole is included as the conditions may then require.

(d) Each party shall place, transfer and rearrange its own attachments, place guys and anchors to maintain any unbalanced loads caused by its attachments, and perform any tree trimming or cutting incidental thereto. Each party shall, with due diligence, attempt at all times to execute such work promptly and in such manner as not to interfere with the service of the other party.

(e) Wherever practicable, double thimble anchor rods with anchors of sufficient holding power to sustain any unbalanced loads of the two parties shall be installed and used jointly. The ownership of the double thimble anchor rods and anchors will be vested in the owner of the pole. In any case, where one party provides at the request of the other party double thimble anchor rods and anchors for the use of both parties the party requesting the double thimble anchor rods and anchors shall pay to the party placing the double thimble anchor rods and anchors a sum equal to half of the cost of the anchors and anchor rods in place. In cases where the existing anchors are adequate for the needs of both parties the party desiring additional guys may where necessary install an adapter at its own expense. In cases where existing anchor rods and anchors are adequate for the needs of only one party the party desiring additional guys and anchors may where necessary install anchors and anchor rods at no expense to the other party or in the case of right-of-way restrictions may provide a double thimble anchor rod and anchor in place of the existing anchor rod and anchor to which the other party can attach its existing guy at its own expense.

(f) The cost of establishing the joint use of existing poles including the making of any necessary pole re-placements, shall be borne by the parties hereto in the manner provided in Article VIII - Division of Costs.

ARTICLE V ESTABLISHING JOINT USE OF NEW POLES

(a) Whenever either party hereto requires new pole facilities for an additional pole line, an extension of an existing pole line, or in connection with the reconstruction of an existing pole line, it shall promptly notify the other party to that effect in writing (verbal notice subsequently confirmed in writing may be given in cases of emergency) stating the proposed location and character of the new poles and the character of circuits it intends to use thereon and indicating whether or not such pole facilities will be, in the estimation of the party proposing to construct the new pole facilities, susceptible of joint use. Within a reasonable period after the receipt of such notice, the other party shall reply in writing, stating whether it does, or does not, desire space on the said poles and, if it does desire space thereon, the character of the circuits it desires to use and the amount of space it wishes to reserve. If such other party requests space on the proposed new poles and if the character and number of its circuits and attachments are such that the party proposing to construct the new pole facilities does not consider joint use undesirable, then it shall erect poles suitable for such joint use, subject, however, to the provisions of Section (b) of this Article, and subject further to the condition that request by either party for space on proposed new poles of the other party under this Agreement shall be made in writing on the form attached hereto and identified as Appendix A or such other form as may be mutually agreed upon and shall comply with the procedure set forth in said approved form. The applicant for space on the poles shall be promptly notified in writing of the action taken on the application.

(b) In any case where the parties hereto shall conclude arrangements for the joint use of any new poles to be erected, and the party proposing to construct the new pole facilities already owns more than its proportionate share of joint poles, the parties shall take into consideration the desirability of having the new pole facilities owned by the party owning less than its proportionate share of joint poles so as to work towards such a division of ownership of the joint poles that neither party shall be obligated to pay to the other any adjustment payments because of their respective use of joint poles owned by the other, due regard being given to the desirability of avoiding mixed ownership of poles in a section of line.

(c) Each party shall place its own attachments on the new joint poles and place guys and anchors to sustain any unbalanced loads caused by its attachments except as otherwise provided under Article IV, Section (e). The party owning the pole line shall provide initial right-of-way clearance 15 feet on each side of the center line to the extent practicable, all right-of-way in excess of this 30 foot swath to be borne by the party requiring the additional width. Each party shall, with due diligence, attempt to execute its work promptly and in such manner as not to interfere with the service of the other party.

ARTICLE VI RIGHT OF WAY FOR LICENSEE'S ATTACHMENTS

While the owner and licensee will cooperate as far as may be practicable in obtaining rights-of-way for both poles on joint poles, the owner does not warrant or assume to the licensee any right of way privileges or easements on, over or across streets, alleys and public thoroughfares, and private or publicly owned property, and if the licensee shall at any time be prevented from placing or maintaining its attachments on the owner's poles, no liability on account thereof shall attach to the owner of the poles.

ARTICLE VII
MAINTENANCE OF POLES AND ATTACHMENTS

(a) The owner shall maintain its joint poles in a safe and servicable condition and in accordance with the specifications mentioned in Article III and shall replace, reinforce or repair such of these poles as become defective. In case of emergency, with the giving of verbal notice, licensee may replace joint poles, anchors and guys as may be considered necessary for public safety or the restoration of licensee's service, in which case the licensee shall be reimbursed by the owner in the full amount of the cost of labor and materials plus any applicable overhead expenses.

(b) When replacing a jointly used pole carrying terminals of aerial cable, underground connection, or transformer equipment, the new pole shall be set in the same hole which the replaced pole occupied unless special conditions make it necessary or mutually desirable to set it in a different location.

(c) Whenever it is necessary to replace or relocate a jointly used pole, the owner shall, before making such replacement or relocation, give reasonable notice thereof in writing (except in case of emergency, when verbal notice will be given and subsequently confirmed in writing) to the licensee, specifying in such notice the time of such proposed replacement or relocation and the licensee shall at the time so specified transfer its attachments to the new or relocated joint pole. Should the licensee fail to transfer its attachments to the new joint pole on the date specified for such transfer of attachments, the owner may elect to relinquish the ownership of the old pole from which it has removed its attachments, with the giving of verbal notice to be subsequently followed in writing. Such old pole shall thereupon, at no cost to the licensee, become the property of the licensee, and the licensee shall save harmless the former owner of such pole from all obligation, liability, damages, cost, expenses or charges incurred thereafter, and not arising out of anything theretofore occurring, because of, or arising out of, the presence or condition of such pole or of any attachments thereon. In instances where the Electrical Distributor is the owner of such pole the unused portion of the pole above the licensee's attachments shall be cut off and removed by the owner before relinquishing ownership, if the pole remains in structural conflict with the power route.

(d) Each party shall at all times maintain all of its attachments in accordance with the specifications mentioned in Article III and shall keep them in safe condition and in thorough repair. Where the parties mutually agree that right-of-way maintenance on existing joint use lines is necessary for the protection of their service, the cost of the following work shall be shared as follows:

1. The removal of dead or dangerous trees shall be shared equally.
2. Chemical control or removal of undergrowth by cutting at the ground line in a swath measured fifteen feet on each side of the center line as follows:
 - a. 50% of the cost on routes supporting bare aerial wire telephone circuits shall be borne by each party.
 - b. 10% of the costs shall be borne by the Telephone Company, 90% by the Electrical Distributor on routes supporting telephone multiple pair insulated wire.
 - c. Costs will not be shared on routes supporting cable or abrasive resistant wire. Each party will provide for its own requirements.

(e) Each party shall be responsible for trimming its own circuits at its own expense where right-of-way is maintained by trimming (side growth, undergrowth or overhead growth).

(f) Any existing joint use construction of the parties hereto which does not conform to the specifications mentioned in Article III shall be brought into conformity therewith as soon as practicable.

When such existing construction shall have been brought into conformity with said specification, it shall at all times thereafter be maintained as provided in Sections (a) and (d) of this Article.

(g) The cost of maintaining poles and attachments and of bringing existing joint use construction into conformity with said specifications shall be borne by the parties hereto in the manner provided in Article VIII - Division of Costs.

**ARTICLE VIII
DIVISION OF COSTS**

(a) The cost of erecting new joint poles coming under this Agreement, to construct new pole lines, to make extensions to existing pole lines, or to replace existing poles, except as covered in (c) below, shall be borne by the parties as follows:

1. A normal joint pole, or joint pole smaller than normal, shall be erected at the sole expense of the owner.
2. A pole larger than the normal, the extra height or strength of which is due wholly to the owner's requirements including requirements as to keeping the owner's wires clear of trees shall be erected at the sole expense of the owner.
3. In the case of a pole larger than the normal, the extra height or strength of which is due wholly to the licensee's requirements including requirements as to keeping the licensee's wires clear of trees, the licensee shall pay to the owner a sum equal to the difference between the cost in place of such pole and the cost in place of a normal joint pole, the rest of the cost of erecting such pole to be borne by the owner, except insofar as otherwise provided in Section (c) of this Article.
4. In the case of a pole larger than the normal, the extra height or strength which is due to the requirements of both parties or the requirements for proper ground clearance or of public authorities or of property owners, (other than requirements with regard to keeping the wires of one party only clear of trees), the difference between the cost in place of such pole and the cost in place of a normal joint pole shall be shared equally by the licensee and the owner, the rest of the cost of erecting such pole to be borne by the owner.
5. A pole, including all appurtenances or fixtures, erected between existing poles to provide sufficient clearance and furnish adequate strength to support the circuits of both the owner and the licensee, which it would have been unnecessary to erect if joint use had not been undertaken, shall be erected at the sole expense of the licensee.

(b) Any payments for poles made by the licensee under any foregoing provisions of this Article shall not entitle the licensee to the ownership of any part of said poles for which it has contributed in whole or in part.

(c) Where an existing jointly used pole or a non-joint pole is prematurely replaced by a new one solely for the benefit of the licensee, the cost of the new pole shall be divided as specified in Section (a) of this Article and the licensee shall pay the owner the labor cost of removal of the existing pole and the labor cost of replacing or transferring of all appurtenances on the existing pole. The replaced pole shall be removed and retained by its owner.

(d) Each party shall place, maintain, rearrange, transfer and remove its own attachments at its own expense except as otherwise expressly provided herein.

(e) The expense of maintaining joint poles shall be borne by the owner thereof except that the cost of replacing poles shall be borne by the parties hereto in the manner provided in Sections (a) and (c) of this Article.

(f) Where service drops of one party crossing over or under lines of the other party are attached to the other party's poles, either directly or by means of a pole top extension fixture, the cost shall be borne as follows:

1. Pole top extension fixtures shall be provided and installed at the sole expense of the party using them.
2. Where an existing pole is replaced by a taller one to provide the necessary clearance the party owning the service drop shall pay to the party owning the pole the cost of the new pole plus the labor costs of replacing or transferring of the appurtenances on the existing pole, the owner of the existing pole to remove and retain such pole at his own expense.

(g) Payments made by either party to the other under the provisions of this Article may be based on the estimated or actual cost as mutually agreed upon (including overhead) of making such changes but in no event, however, shall either party be required to pay for such changes more than 120% of the estimated cost supplied by the other if such cost estimate shall have been requested and furnished before the changes were made.

**ARTICLE IX
PROCEDURE WHEN CHARACTER OF CIRCUITS IS CHANGED**

When either party desires to change the character of its circuits on jointly used poles, such party shall give immediate notice to the other party of such contemplated change and in the event that the party agrees in writing to joint use with such changed circuits, then the joint use of such poles shall be continued with such changes in construction as may be required to meet the terms of the specifications mentioned in Article III for the character of circuits involved and such other changes as may be agreed upon. The parties shall cooperate to determine the equitable apportionment of the net expense of such changes. In the event, however, that the other party fails within 30 days from receipt of such notice to agree in writing to such change in character of circuits, then both parties shall cooperate in accordance with the following plan:

1. The parties hereto shall determine the most practical and economical method of effectively providing for separate lines, either overhead or underground, and the party whose circuits are to be moved shall carry out the necessary work as promptly as practicable.
2. The net costs of re-establishing such circuits in the new location as are necessary to furnish the same business facilities that existed in the joint use section at the time such change was decided upon, shall be borne by the licensee; provided, however, that the owner shall bear the cost whenever the change was occasioned by the necessities of the owner. When the net costs are borne by the owner they shall not include the cost of the new pole line constructed by the licensee.

Unless otherwise agreed by the parties, ownership of any new line or underground facilities constructed under the foregoing provisions in a new location shall vest in the party for whose use it is constructed.

**ARTICLE X
ABANDONMENT OF JOINT USED POLES**

(a) If the owner desires at any time to abandon any jointly used pole, it shall, except as provided in Article VII, Section (c), give the licensee notice in writing to that effect at least 60 days prior to the date on which it intends to abandon such pole. If at the expiration of said period the owner shall have no attachments thereon, such pole shall thereupon become the property of the licensee, and the licensee shall save harmless the former owner of such pole from all obligation, liability, damages, cost, expenses or charges incurred thereafter, and not arising out of anything theretofore occurring, because of, or arising out of, the presence or condition of such pole or of any attachments thereon; and shall pay the owner the then value in place of the pole to the owner. The former owner shall further evidence transfer of title to the pole by appropriate means. Credit shall be allowed for any payments which the licensee may have made under the provisions of Article VII - Division of Costs, when the pole was originally set, provided the licensee furnishes proof of such payment.

(b) The licensee may at any time abandon the use of a joint pole by removing therefrom any and all attachments it may have thereon and by giving such notice as may be mutually agreed upon.

**ARTICLE XI
ADJUSTMENT PAYMENTS**

(a) The parties contemplate that the use or reservation of space on poles by each party, as licensee of the other under this Agreement shall be based on the equitable sharing of the economies of joint use.

(b) On or about December 1st of each year, each party, acting in cooperation with the other, and subject to the provisions of Section (c) of this Article, shall ascertain and tabulate the total number of poles in use by each party as licensee, which tabulation shall indicate the number of poles in use by each party as licensee for which an adjustment payment by one of the parties to the other is to be determined as hereinafter provided.

(c) For the purpose of such tabulation, any pole used by the licensee for the sole purpose of attaching wires or cables thereto, either directly or by means of a pole top extension fixture, in order to provide clearance between the facilities of the two parties as distinguished from providing support for such wires or cables, shall not be considered as a joint pole.

(d) If there is provision under a separate agreement between the Telephone Company and the Electrical Distributor for facilities associated with power line carrier systems, the adjustment payment provisions of the

agreement of which this Article forms a part shall apply for poles on which both types of facilities are present and no other adjustment payments shall apply. The adjustment payment provisions of this Agreement shall not apply, however, where only those facilities directly associated with the power line carrier systems are involved.

(e) Adjustment payments per pole due from one party as licensee to the other party or owner shall, subject to the provisions of Article XII, be ██████ per annum by the Electrical Distributor for each jointly used pole owned by the Telephone Company and ██████ per annum by the Telephone Company for each jointly used pole owned by the Electrical Distributor. The smaller total sum shall be deducted from the larger and the Electrical Distributor or the Telephone Company, as the case may be, shall pay to the other the difference between such amounts. The adjustment payment herein provided shall be paid within ten days after the bill has been submitted.

(f) At intervals not exceeding five (5) years an actual inventory of attachments shall be made by representatives of the parties. If there is any difference in the number of attachments found by the inventory and the number arrived at by tabulating those reported, correction will be made by retroactive billing for any attachments identified as being responsible for the difference, and any remaining difference will be spread evenly over the years since the last inventory, and billing adjusted accordingly except as otherwise provided under Article XII, Section (c).

ARTICLE XII

PERIODICAL ADJUSTMENT OF PAYMENTS

(a) At any time after 3 years from the date of this Agreement and at intervals of not less than 3 years thereafter, the payments applicable under this Agreement shall be subject to joint review and adjustment as provided for under Section (b) of this Article upon the written request of either party. In case of adjustment of payments as herein provided, the new payments agreed upon shall apply starting with the annual bill next rendered and continuing until again adjusted.

(b) All adjustments of rental shall be in accord with the provisions of Appendix B, and any changes shall take into account the cost factors originally involved in all joint use existing at that time under this Agreement.

(c) An actual inventory of attachments shall be made by representatives of the parties coincident with the effective date of any adjustment rentals.

ARTICLE XIII

DEFAULTS

(a) If either party shall default in any of its obligations under this Agreement and such default continues thirty (30) days after due notice thereof in writing by the other party, the party not in default may suspend the rights of the party in default insofar as concerns the granting of future joint use and if such default shall continue for a period of 90 days after such suspension, the party not in default may forthwith terminate this Agreement as far as concerns the future granting of joint use.

(b) If after reasonable notice either party shall make default in the performance of any work it is obligated to do under this Agreement at its sole expense, the other party may elect to do such work, and the party in default shall reimburse the other party for the cost thereof. Failure on the part of the defaulting party to make such payment within 30 days upon presentation of bills therefor shall, at the election of the other party, constitute a default under Section (a) of this Article.

ARTICLE XIV

EXISTING RIGHTS OF OTHER PARTIES

(a) If either of the parties hereto has, prior to the execution of this Agreement, conferred upon others, not parties to this Agreement, by contract or otherwise, rights or privileges to use any poles covered by this Agreement, nothing herein contained shall be construed as affecting such rights or privileges, and either party hereto shall have the right, by contract or otherwise, to continue and extend such existing rights or privileges, it being expressly understood, however, that for the purpose of this Agreement, the attachments of any such outside party, except those of a municipality or other public authority, shall be treated as attachments belonging to the grantor, and the rights, obligations, and liabilities hereunder of the grantor in respect to such attachments shall be the same as if it were the actual owner thereof.

(b) Where municipal regulations require either party to allow the use of its poles for fire alarm, police, or other like signal systems, such use shall be permitted under the terms of this Article, provided attachments of such parties are placed and maintained in accordance with the specifications mentioned in Article III.

**ARTICLE XV
ASSIGNMENT OF RIGHTS**

Except as otherwise provided in this Agreement, neither party hereto shall assign or otherwise dispose of this Agreement or any of its rights or interests hereunder, or in any of the jointly used poles, or the attachments or rights-of-way covered by this Agreement, to any firm, corporation or individual, without the written consent of the other party, except to the United States of America or any agency thereof; provided, however, that nothing herein contained shall prevent or limit the right of either party to mortgage any or all of its property, rights, privileges, and franchises, or lease or transfer any of them to another corporation organized for the purpose of conducting a business of the same general character as that of such party, or to enter into any merger or consolidation; and, in case of the foreclosure of such mortgage; or in case of lease, transfer, merger, or consolidation, its rights and obligations hereunder shall pass to, and be acquired and assumed by, the purchaser on foreclosure, the transferee, leasee, assignee, merging or consolidating company, as the case may be; and provided further that subject to all of the terms and conditions of this Agreement, either party may permit any corporation conducting a business of the same general character as that of such party, and owned, operated, leased and controlled by it, or associated or affiliated with it, the use of all or any part of the space reserved hereunder on any pole covered by this Agreement for the attachments used by such party in the conduct of its said business; and for the purpose of this Agreement, all such attachments maintained on any such pole by the permission as aforesaid of either party hereto shall be considered as the attachments of the party granting such permission, and the rights, obligations and liabilities of such party under this Agreement, with respect to such attachments, shall be the same as if it were the actual owner thereof.

**ARTICLE XVI
WAIVER OF TERMS OR CONDITIONS**

The failure of either party to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

**ARTICLE XVII
PAYMENT OF TAXES**

Each party shall pay all taxes and assessments lawfully levied on its own property upon said jointly used poles, and the taxes and the assessments which are levied on said joint poles shall be paid by the owner thereof, but any tax, fee, or charge levied on owner's poles solely because of their use by the licensee shall be paid by the licensee.

**ARTICLE XVIII
BILLS AND PAYMENT FOR WORK**

Upon the completion of work performed hereunder by either party, the expense of which is to be borne wholly or in part by the other party, the party performing the work shall present to the other party within 90 days after the completion of such work an itemized statement of the costs and such other party shall within 30 days after such statement is presented pay to the party doing the work such other party's proportion of the cost of said work.

**ARTICLE XIX
SERVICE OF NOTICES**

Whenever in this Agreement notice is provided to be given by either party hereto to the other, such notice shall be in writing and given by letter mailed, or by personal delivery, to the Electrical Distributor at its office

Post Office Box 910, Somerset, Kentucky

to the Telephone Company at its office at _____

_____ as the case may be,
or to such other address as either party may from time to time designate in writing for that purpose.

ARTICLE XX
TERM OF AGREEMENT

This Agreement shall continue in full force and effect until the 1st day of January, 1982, and shall continue thereafter until terminated, insofar as the making of attachments to additional poles is concerned, by either party giving to the other one (1) years notice in writing of intention to terminate the right of making attachments to additional poles. Any such termination of the right to make attachments to additional poles shall not, however, abrogate or terminate the right of either party to maintain the attachments theretofore made on the poles of the other or additional attachments to such poles, and all such attachments shall continue thereafter to be maintained, pursuant to and in accordance with the terms of this Agreement, which Agreement shall, so long as said attachments are continued, remain in full force and effect solely and only for the purpose of governing and controlling the rights and obligations of the parties with respect to said attachments.

ARTICLE XXI
EXISTING CONTRACTS

All existing agreements between the parties hereto for the joint use of poles in rural areas are by mutual consent hereby abrogated and superseded by this Agreement.

Nothing in the foregoing shall preclude the parties to this agreement from preparing such supplemental operating routines or working practices as they mutually agree to be necessary or desirable to effectively administer the provisions of this Agreement.

ARTICLE XXII
APPROVAL OF THE ADMINISTRATOR

This Agreement, and any amendment thereof, shall be effective subject to the condition that, during any period in which the Electrical Distributor is a borrower from the Rural Electrification Administration, the Agreement and any amendment thereof shall have the approval in writing of the Administrator of the Rural Electrification Administration.

In witness whereof the parties hereto, have caused these presents to be executed in triplicate, and their corporate seals to be affixed thereto by their respective officers thereunto duly authorized, on the 1st day of January, 1972.

APPENDIX A

TO _____
 Name of Electrical Distributor _____ Date _____

Address _____ Request Number _____

This is to request permission for this company to use jointly certain of your poles under the terms and conditions of our General Agreement for Joint Use of Wood Poles in Rural Areas, dated _____

The poles, including the number and character of circuits to be placed thereon, for which this permission is requested are those included in the pole lines indicated on the attached map, which also bears the above date and Request Number.

Our present plan is to start this work about _____, 19____,
 and complete the work about _____, 19____.

If permission to use these poles is given by you, this Company will prepare and furnish to you, after engineering is complete, detailed construction plans and drawings, together with necessary maps, to indicate specifically your poles that we wish to use jointly, the number and character of the circuits to be placed on such poles, and any rearrangements of fixtures and equipment necessary, as well as any relocations or replacements of existing poles, and any additional poles that may be required, in accordance with the procedure provided in Articles IV and V of this Agreement.

If the joint use proposed is agreeable, please signify your approval of this request in the space provided and return the second copy to us.

This Appendix describes the basic principles and guides which have been used under this Agreement in setting the adjustment payments specified in Article XI and which are to be used in making periodical adjustment payments as provided for in Article XII.

Under these principles the adjustment payments are intended, insofar as it is practicable, to result in a sharing of the economies realized by the joint use of pole plant in proportion to the relative costs of separate pole line construction.

The procedures outlined herein take into account the following objectives:

1. An equitable division of savings regardless of the number of jointly used poles owned by each party.
2. Adjustment payments applicable universally in the area covered by the Agreement regardless of whether the pole lines involved are initially constructed with joint use in view or are existing lines modified for joint use.
3. Appropriate allowance in the adjustment payments for additional costs incurred by each party in supplying 'normal joint poles', as defined in the Agreement, and the costs of other items required in the joint use of poles which would not be incurred in separate line construction.
4. Adjustment payments based on the costs of "typical miles" of separate lines, of newly constructed joint lines and of existing lines modified to make them suitable for joint use. The 'per mile' values of adjustment payments are then reduced to 'per pole' values for purposes of simplifying tabulations and to provide for the joint use of scattered poles.

The adjustment payments are the dollar values resulting from the licensee paying to the owner, as annual adjustment payments, an amount representing the annual charge on a separate line for the licensee less the sum of (a) the annual charges on the additional costs incurred by the licensee in establishing joint use and (b) the licensee's share of the total annual savings. This share is the ratio of the licensee's typical separate line costs to the sum of the typical separate line costs of each of the parties.

The annual adjustment payments can also be stated as follows:

| | | | | | | |
|---|----------|---|--------|---|------|--|
| Licensee's annual adjustment payment | (equals) | Annual charges saved by Licensee through not having to build a separate line | (less) | Licensee's appropriate percentage | (of) | Total savings in annual charges realized through joint use. |
|---|----------|---|--------|---|------|--|

The cost in place of a line of poles is made up of a number of factors including such items as right-of-way solicitation, clearing, staking, direct labor and material costs of bare poles in place and pro rata shares of construction supervision and overhead. These costs, for a specific area, may differ considerably from corresponding costs in other parts of the country. These variations in pole line costs will, however, affect both power and telephone lines to about the same degree.

The calculation for Telephone Company adjustment payments to Power Distributor and Power Distributor adjustment payments to the Telephone Company based on the preceding principles for this contract is as follows:

ELECTRIC POWER SYSTEMS
TELEPHONE SYSTEMS

Amendment 1

AMENDMENT TO ARTICLE XI, OF GENERAL AGREEMENT
BETWEEN THE PARTIES, DATED JANUARY 1, 1972,
FOR JOINT USE OF WOOD POLES IN SYSTEM AREAS

The Electrical Distributor and the Telephone Company agree that the following amendment shall be a part of the Agreement between the parties.

Amend Section E, Article XI by deleting the first sentence thereof and substituting in it's place the following:

Effective January 1, 1998, adjustment payments per pole due from one party as licensee to the other party or owner shall, subject to the provisions of Article XII, be per annum by the Electrical Distributor for each jointly used pole owned by the Telephone Company:

| <u>YEAR</u> | <u>RATE</u> |
|-------------|-------------|
| 1998 | \$15.29 |
| 1999 | \$15.90 |
| 2000 | \$16.54 |
| 2001 | \$17.20 |
| 2002 | \$17.89 |

And per annum by the Telephone Company for each jointly used pole owned by the Electrical Distributor:

| <u>YEAR</u> | <u>RATE</u> |
|-------------|-------------|
| 1998 | \$10.76 |
| 1999 | \$11.19 |
| 2000 | \$11.64 |
| 2001 | \$12.11 |
| 2002 | \$12.59 |

Executed on the 5TH day of May 1998.

Amendment 3

AMENDMENT TO ARTICLE II, OF GENERAL AGREEMENT
BETWEEN THE PARTIES, DATED JANUARY 1, 1972,
FOR JOINT USE OF WOOD POLES IN SYSTEM AREAS

The Electrical Distributor and the Telephone Company agree that the following amendment shall be a part of the Agreement between the parties.

Amend 2 of Article II by deleting "35 Foot Class 5" and substituting:

"40 Foot Class 5"

Further Amend 2 of Article II by adding the following sentence:

"This normal Joint Pole (40 Foot Class 5) is applicable for only poles installed after the executed date of this amendment."

Executed on the 23rd day of February 19 94.

Amendment 2

AMENDMENT TO ADD TO THE GENERAL AGREEMENT
BETWEEN THE PARTIES, DATED JANUARY 1, 1972,
FOR JOINT USE OF WOOD POLES IN SYSTEM AREAS

The Electrical Distributor and the Telephone Company agree that the following amendment shall be a part of the Agreement between the parties as follows:

Either party hereto, to the fullest extent permitted by law, agrees to and shall indemnify and hold harmless the other Party from and against any and all claims, damages, losses, and expense including but not limited to attorneys' fees arising out of or resulting from the joint use of the poles, and or any acts or omissions under this Agreement. Any interpretations regarding this Agreement or any activities arising hereunder shall be governed by the laws of the Commonwealth of Kentucky.

Executed on the 23rd day of February 19 94.

Amendment 1

**AMENDMENT TO ARTICLE XI, OF GENERAL AGREEMENT
BETWEEN THE PARTIES, DATED JANUARY 1, 1972,
FOR JOINT USE OF WOOD POLES IN SYSTEM AREAS**

The Electrical Distributor and the Telephone Company agree that the following amendment shall be a part of the Agreement between the parties.

Amend Section E, Article XI by deleting the first sentence thereof and substituting in it's place the following:

Effective January 1, 1993, adjustment payments per pole due from one party as licensee to the other party or owner shall, subject to the provisions of Article XII, be per annum by the Electrical Distributor for each jointly used pole owned by the Telephone Company:

| <u>YEAR</u> | <u>2-PARTY RATE</u> | <u>3-PARTY RATE</u> |
|-------------|---------------------|---------------------|
| 1993 | \$11.84 | \$ 6.20 |
| 1994 | \$14.68 | \$ 9.04 |
| 1995 | \$17.52 | \$11.88 |
| 1996 | \$17.52 | \$11.88 |
| 1997 | \$17.52 | \$11.88 |

And per annum by the Telephone Company for each jointly used pole owned by the Electrical Distributor:

| <u>YEAR</u> | <u>2-PARTY RATE</u> | <u>3-PARTY RATE</u> |
|-------------|---------------------|---------------------|
| 1993 | \$ 8.73 | \$ 6.05 |

AMENDMENT TO ARTICLE XI, OF GENERAL AGREEMENT

FOR JOINT USE OF WOOD POLES IN RURAL AREAS

The Electrical Distributor and the Telephone Company agree that the following amendment shall be a part of the Agreement between the parties.

Amend Section E, Article XI by deleting the first sentence thereof and substituting in its place the following:

"Effective January 1, 1982, adjustment payments per pole due from one party as licensee to the other party or owner shall, subject to the provisions of Article XII, by \$9.00 per annum by the Electrical Distributor for each jointly used pole owned by the Telephone Company and \$7.25 per annum by the Telephone Company for each jointly used pole owned by the Electrical Distributor."

Executed on the 19th day of August 19 82.

GENERAL AGREEMENT

JOINT USE OF WOOD POLES IN RURAL AREAS

Contract Revised January, 1971

PREAMBLE

Taylor County Rural Electric Cooperative Corporation, a corporation organized under the laws of the State of Kentucky, (hereinafter called the "Electrical Distributor"), and General Telephone Company of Kentucky, a corporation organized under the laws of the State of Delaware (hereinafter called the "Telephone Company"), desiring to cooperate in the joint use of their respective poles, erected or to be erected within the rural areas in which both parties render service in the State(s) of Kentucky, whenever and wherever such use shall, in the estimation of both parties, be compatible with their respective needs, do hereby, in consideration of the premises and the mutual covenants herein contained, covenant and agree for themselves and their respective successors and assigns as follows:

ARTICLE I

SCOPE OF AGREEMENT

- (a) This Agreement shall be in effect in the areas in which both of the parties render service in the State(s) of Kentucky, and shall cover all wood poles now existing or hereafter erected in the above territories, except where said poles are covered by or later brought under an urban contract of the parties, when said poles are brought under this Agreement in accordance with the procedure hereinafter provided.
- (b) Each party reserves the right to exclude any of its facilities from joint use.
- (c) It is the intention of the parties that adequate electric and telephone service shall be made available to the widest practicable number of rural users in the above territory.

ARTICLE II

EXPLANATION OF TERMS

For the purpose of this Agreement, the following terms shall have the following meanings:

1. A **JOINT POLE** is a pole jointly used by both parties.
2. A **NORMAL JOINT POLE** is a pole which is just tall enough to provide normal spaces, as normal space is hereinafter defined, for the respective parties and just strong enough to meet the requirements of the specifications mentioned in Article III for the attachments ordinarily placed by the parties in their respective normal spaces. Such pole for the purpose of this Agreement shall be a 35 foot class 5 wood pole as classified by the pole classification tables of the American Standards Association.
3. **SPACE** is the linear portion of a joint pole parallel to its axis reserved for the exclusive use of one of the parties (subject only to the exceptions provided for in this Article and the specifications mentioned in Article II] which in certain instances permit the making of certain attachments by one party in the space reserved for the other party).
4. **NORMAL SPACE** is the following described space:
 - a. For the Electrical Distributor the uppermost 6½ feet, measured from top of pole.
 - b. For the Telephone Company a space of 2 feet, at a sufficient distance below the space of the Electrical Distributor to provide at all times the minimum clearance required by the specifications mentioned in Article II.

WIN2439

and at a sufficient height above ground to provide the proper vertical clearance above ground or track rails for the lowest horizontally run line wires or cables attached in such space.

The foregoing definition of "a normal joint pole" is not intended to preclude the use of joint poles shorter or of less strength than the normal joint pole in locations where such poles will meet the requirements of the parties hereto.

The above assignment of space is not intended to preclude the use of vertical runs or the mounting of such equipment as terminals or meters on the lower portions of the pole when mutually agreeable.

ARTICLE III SPECIFICATIONS

Except as otherwise provided in Section (f) of Article VII, referring to construction temporarily exempt from the application of the specifications mentioned herein, the joint use of the poles covered by this Agreement shall at all times be in conformity with accepted modern methods such as those suggested in Edison Electric Institute Publication No. M12 and shall at all times conform to the requirements of the National Electrical Safety Code, Sixth Edition, and subsequent revisions thereof, except where the lawful requirements of public authorities may be more stringent, in which case the latter will govern.

In establishing joint use of wood poles whether installed new for joint use or installed initially for circuits of either party, the total transverse and vertical loads for all conductors attached to a pole covered by this Agreement shall not, under the assumed storm loadings of the National Electrical Safety Code for the area in which the pole is located, exceed fifty (50) percent of the ultimate fiber stress of the supporting pole. In the case of existing pole lines, the strength of the pole shall be assumed to be the same as when new.

Modifications of, additions to, or construction practices supplementing wholly or in part the requirements of the National Electrical Safety Code, shall, when accepted in writing by both parties hereto through their agents authorized to approve such changes, likewise govern the joint use of poles.

ARTICLE IV ESTABLISHING JOINT USE OF EXISTING POLES

(a) Before either party shall make use of the poles of the other party under this Agreement, it shall request permission therefor in writing on the form attached hereto and identified as Appendix A or such other form as may be mutually agreed upon and shall comply with the procedure set forth in said approved form.

(b) Whenever either party desires to reserve space for its attachments on any pole owned by the other party, either as initial space or additional space on such pole, it shall make written application therefor, specifying the location of the poles in question, the amount of space desired on each pole, and the number and character of the circuits to be placed thereon. If, in the judgment of the owner, the poles are necessary for its own sole use or joint use under the circumstances is undesirable, the owner shall have the right to reject the application. In any event, within a reasonable period after the receipt of such application the owner shall notify the applicant in writing whether the application is approved or rejected. Upon receipt of notice from the owner that the application has been approved, and after the completion of any transferring or rearranging which is required to permit the attaching of the applicant's circuits on such poles, including any necessary pole replacements, the applicant shall have the right as licensee hereunder to use such space in accordance with the terms of the application and of this Agreement.

(c) Whenever any jointly used pole or any pole about to be so used under the provisions of this Agreement is insufficient in height or strength for the existing attachments and for the proposed additional attachments thereon, the owner shall promptly replace such pole with a new pole of the necessary height and strength and shall make such other changes in the existing pole line in which such pole is included as the conditions may then require.

(d) Each party shall place, transfer and rearrange its own attachments, place guys and anchors to sustain any unbalanced loads caused by its attachments, and perform any tree trimming or cutting incidental thereto. Each party shall, with due diligence, attempt at all times to execute such work promptly and in such manner not to interfere with the service of the other party.

(e) Wherever practicable, double thimble anchor rods with anchors of sufficient holding power to sustain any unbalanced loads of the two parties shall be installed and used jointly. The ownership of the double thimble anchor rods and anchors will be vested in the owner of the pole. In any case, where one party provides at the request of the other party double thimble anchor rods and anchors for the use of both parties the party requesting the double thimble anchor rods and anchors shall pay to the party placing the double thimble anchor rods and anchors a sum equal to half of the cost of the anchors and anchor rods in place. In cases where the existing anchors are adequate for the needs of both parties the party desiring additional guys may where necessary install an adapter at its own expense. In cases where existing anchor rods and anchors are adequate for the needs of only one party the party desiring additional guys and anchors may where necessary install anchors and anchor rods at no expense to the other party or in the case of right-of-way restrictions may provide a double thimble anchor rod and anchor in place of the existing anchor rod and anchor to which the other party can attach its existing guy at its own expense.

(f) The cost of establishing the joint use of existing poles including the making of any necessary pole relocations, shall be borne by the parties hereto in the manner provided in Article VIII - Division of Costs.

ARTICLE V ESTABLISHING JOINT USE OF NEW POLES

(a) Whenever either party hereto requires new pole facilities for an additional pole line, an extension of an existing pole line, or in connection with the reconstruction of an existing pole line, it shall promptly notify the other party to that effect in writing (verbal notice subsequently confirmed in writing may be given in cases of emergency) stating the proposed location and character of the new poles and the character of circuits it intends to use thereon and indicating whether or not such pole facilities will be, in the estimation of the party proposing to construct the new pole facilities, susceptible of joint use. Within a reasonable period after the receipt of such notice, the other party shall reply in writing, stating whether it does, or does not, desire space on the said pole and, if it does desire space thereon, the character of the circuits it desires to use and the amount of space it wishes to reserve. If such other party requests space on the proposed new poles and if the character and number of its circuits and attachments are such that the party proposing to construct the new pole facilities does not consider joint use undesirable, then it shall erect poles suitable for such joint use, subject, however, to the provisions of Section (b) of this Article, and subject further to the condition that request by either party for space on proposed new poles of the other party under this Agreement shall be made in writing on the form attached hereto and identified as Appendix A or such other form as may be mutually agreed upon and shall comply with the procedure set forth in said approved form. The applicant for space on the poles shall be promptly notified in writing of the action taken on the application.

(b) In any case where the parties hereto shall conclude arrangements for the joint use of any new poles to be erected, and the party proposing to construct the new pole facilities already owns more than its proportionate share of joint poles, the parties shall take into consideration the desirability of having the new pole facilities owned by the party owning less than its proportionate share of joint poles so as to work towards such a division of ownership of the joint poles that neither party shall be obligated to pay to the other any adjustment payments because of their respective use of joint poles owned by the other, due regard being given to the desirability of avoiding mixed ownership of poles in a section of line.

(c) Each party shall place its own attachments on the new joint poles and place guys and anchors to sustain any unbalanced loads caused by its attachments except as otherwise provided under Article IV, Section (c). The party owning the pole line shall provide initial right-of-way clearance 15 feet on each side of the center line to the extent practicable, all right-of-way in excess of this 30 foot swath to be borne by the party requiring the additional width. Each party shall, with due diligence, attempt to execute its work promptly and in such manner as not to interfere with the service of the other party.

ARTICLE VI RIGHT OF WAY FOR LICENSEE'S ATTACHMENTS

While the owner and licensee will cooperate as far as may be practicable in obtaining rights-of-way for both parties on joint poles, the owner does not warrant or assure to the licensee any right-of-way privileges or easements on, over or across streets, alleys and public thoroughfares, and private or publicly owned property, and the licensee shall at any time be prevented from placing or maintaining its attachments on the owner's poles and its liability on account thereof shall attach to the owner of the poles.

ARTICLE VII
MAINTENANCE OF POLES AND ATTACHMENTS

(a) The owner shall maintain its joint poles in a safe and servicable condition and in accordance with the specifications mentioned in Article III and shall replace, reinforce or repair such of these poles as become defective. In case of emergency, with the giving of verbal notice, licensee may replace joint poles, anchors and guys as may be considered necessary for public safety or the restoration of licensee's service, in which case the licensee shall be reimbursed by the owner in the full amount of the cost of labor and materials plus any applicable overhead expenses.

(b) When replacing a jointly used pole carrying terminals of aerial cable, underground connection, or transformer equipment, the new pole shall be set in the same hole which the replaced pole occupied unless special conditions make it necessary or mutually desirable to set it in a different location.

(c) Whenever it is necessary to replace or relocate a jointly used pole, the owner shall, before making such replacement or relocation, give reasonable notice thereof in writing (except in case of emergency, when verbal notice will be given and subsequently confirmed in writing) to the licensee, specifying in such notice the time of such proposed replacement or relocation and the licensee shall at the time so specified transfer its attachments to the new or relocated joint pole. Should the licensee fail to transfer its attachments to the new joint pole on the date specified for such transfer of attachments, the owner may elect to relinquish the ownership of the old pole from which it has removed its attachments, with the giving of verbal notice to be subsequently followed in writing. Such old pole shall thereupon, at no cost to the licensee, become the property of the licensee, and the licensee shall save harmless the former owner of such pole from all obligation, liability, damages, cost, expenses or charges incurred thereafter, and not arising out of anything theretofore occurring, because of, or arising out of, the presence or condition of such pole or of any attachments thereon. In instances where the Electrical Distributor is the owner of such pole the unused portion of the pole above the licensee's attachments shall be cut off and removed by the owner before relinquishing ownership, if the pole remains in structural conflict with the power route.

(d) Each party shall at all times maintain all of its attachments in accordance with the specifications mentioned in Article III and shall keep them in safe condition and in thorough repair. Where the parties mutually agree that right-of-way maintenance on existing joint use lines is necessary for the protection of their service the cost of the following work shall be shared as follows:

1. The removal of dead or dangerous trees shall be shared equally.
2. Chemical control or removal of undergrowth by cutting at the ground line in a swath measuring fifteen feet on each side of the center line as follows:
 - a. 50% of the cost on routes supporting bare aerial wire telephone circuits shall be borne by each party.
 - b. 10% of the costs shall be borne by the Telephone Company, 90% by the Electrical Distributor on routes supporting telephone multiple pair insulated wire.
 - c. Costs will not be shared on routes supporting cable or abrasive resistant wire. Each party shall provide for its own requirements.

(e) Each party shall be responsible for trimming its own circuits at its own expense where right-of-way is maintained by trimming (side growth, undergrowth or overhead growth).

(f) Any existing joint use construction of the parties hereto which does not conform to the specifications mentioned in Article III shall be brought into conformity therewith as soon as practicable.

When such existing construction shall have been brought into conformity with said specification, it shall at all times thereafter be maintained as provided in Sections (a) and (d) of this Article.

(g) The cost of maintaining poles and attachments and of bringing existing joint use construction into conformity with said specifications shall be borne by the parties hereto in the manner provided in Article VII Division of Costs.

**ARTICLE VIII
DIVISION OF COSTS**

(a) The cost of erecting new joint poles coming under this Agreement, to construct new pole lines, to make extensions to existing pole lines, or to replace existing poles, except as covered in (c) below, shall be borne by the parties as follows:

1. A normal joint pole, or joint pole smaller than normal, shall be erected at the sole expense of the owner.
2. A pole larger than the normal, the extra height or strength of which is due wholly to the owner's requirements including requirements as to keeping the owner's wires clear of trees shall be erected at the sole expense of the owner.
3. In the case of a pole larger than the normal, the extra height or strength of which is due wholly to the licensee's requirements including requirements as to keeping the licensee's wires clear of trees, the licensee shall pay to the owner a sum equal to the difference between the cost in place of such pole and the cost in place of a normal joint pole, the rest of the cost of erecting such pole to be borne by the owner, except insofar as otherwise provided in Section (c) of this Article.
4. In the case of a pole larger than the normal, the extra height or strength which is due to the requirements of both parties or the requirements for proper ground clearance or of public authorities or property owners, (other than requirements with regard to keeping the wires of one party only clear of trees), the difference between the cost in place of such pole and the cost in place of a normal joint pole shall be shared equally by the licensee and the owner, the rest of the cost of erecting such pole to be borne by the owner.
5. A pole, including all appurtenances or fixtures, erected between existing poles to provide sufficient clearance and furnish adequate strength to support the circuits of both the owner and the licensee which it would have been unnecessary to erect if joint use had not been undertaken, shall be erected at the sole expense of the licensee.

(b) Any payments for poles made by the licensee under any foregoing provisions of this Article shall not entitle the licensee to the ownership of any part of said poles for which it has contributed in whole or in part.

(c) Where an existing jointly used pole or a non-joint pole is prematurely replaced by a new one solely for the benefit of the licensee, the cost of the new pole shall be divided as specified in Section (a) of this Article and the licensee shall pay the owner the labor cost of removal of the existing pole and the labor cost of replacing and transferring of all appurtenances on the existing pole. The replaced pole shall be removed and retained by the owner.

(d) Each party shall place, maintain, rearrange, transfer and remove its own attachments at its own expense except as otherwise expressly provided herein.

(e) The expense of maintaining joint poles shall be borne by the owner thereof except that the cost of replacing poles shall be borne by the parties hereto in the manner provided in Sections (a) and (c) of this Article.

(f) Where service drops of one party crossing over or under lines of the other party are attached to the other party's poles, either directly or by means of a pole top extension fixture, the cost shall be borne as follows:

1. Pole top extension fixtures shall be provided and installed at the sole expense of the party using them.
2. Where an existing pole is replaced by a taller one to provide the necessary clearance the party owning the service drop shall pay to the party owning the pole the cost of the new pole plus the labor cost of replacing or transferring of the appurtenances on the existing pole, the owner of the existing pole to remove and retain such pole at his own expense.

(g) Payments made by either party to the other under the provisions of this Article may be based on the estimated or actual cost as mutually agreed upon (including overhead) of making such changes but in no event, however, shall either party be required to pay for such changes more than 120% of the estimated cost supplied by the other if such cost estimate shall have been requested and furnished before the changes were made.

**ARTICLE IX
PROCEDURE WHEN CHARACTER OF CIRCUITS IS CHANGED**

When either party desires to change the character of its circuits on jointly used poles, such party shall immediate notice to the other party of such contemplated change and in the event that the party agrees in writing to joint use with such changed circuits, then the joint use of such poles shall be continued with such change in construction as may be required to meet the terms of the specifications mentioned in Article III for the character of circuits involved and such other changes as may be agreed upon. The parties shall cooperate to determine equitable apportionment of the net expense of such changes. In the event, however, that the other party within 30 days from receipt of such notice to agree in writing to such change in character of circuits, then the parties shall cooperate in accordance with the following plan:

1. The parties hereto shall determine the most practical and economical method of effectively providing for separate lines, either overhead or underground, and the party whose circuits are to be so changed shall carry out the necessary work as promptly as practicable.
2. The net costs of re-establishing such circuits in the new location as are necessary to furnish the business facilities that existed in the joint use section at the time such change was decided upon, shall be borne by the licensee; provided, however, that the owner shall bear the cost whenever the change was occasioned by the necessities of the owner. When the net costs are borne by the owner they shall not include the cost of the new pole line constructed by the licensee.

Unless otherwise agreed by the parties, ownership of any new line or underground facilities constructed under the foregoing provisions in a new location shall vest in the party for whose use it is constructed.

**ARTICLE X
ABANDONMENT OF JOINT USED POLES**

(a) If the owner desires at any time to abandon any jointly used pole, it shall, except as provided in Article VII, Section (c), give the licensee notice in writing to that effect at least 60 days prior to the date on which it intends to abandon such pole. If at the expiration of said period the owner shall have no attachments thereon, the pole shall thereupon become the property of the licensee, and the licensee shall save harmless the former owner of such pole from all obligation, liability, damages, cost, expenses or charges incurred thereafter, and not be liable out of anything theretofore occurring, because of, or arising out of, the presence or condition of such pole or any attachments thereon; and shall pay the owner the then value in place of the pole to the owner. The licensee shall further evidence transfer of title to the pole by appropriate means. Credit shall be allowed for payments which the licensee may have made under the provisions of Article VII - Division of Costs, when the cost was originally set, provided the licensee furnishes proof of such payment.

(b) The licensee may at any time abandon the use of a joint pole by removing therefrom any and all attachments it may have thereon and by giving such notice as may be mutually agreed upon.

**ARTICLE XI
ADJUSTMENT PAYMENTS**

(a) The parties contemplate that the use or reservation of space on poles by each party, as licensee or owner, under this Agreement shall be based on the equitable sharing of the economies of joint use.

(b) On or about December 1st of each year, each party, acting in cooperation with the other, and subject to the provisions of Section (c) of this Article, shall ascertain and tabulate the total number of poles in use by each party as licensee, which tabulation shall indicate the number of poles in use by each party as licensee for which an adjustment payment by one of the parties to the other is to be determined as hereinafter provided.

(c) For the purpose of such tabulation, any pole used by the licensee for the sole purpose of attaching wires or cables thereto, either directly or by means of a pole top extension fixture, in order to provide clearance between the facilities of the two parties as distinguished from providing support for such wires or cables, shall be considered as a joint pole.

(d) If there is provision under a separate agreement between the Telephone Company and the Electric Power Distributor for facilities associated with power line carrier systems, the adjustment payment provisions shall be as provided in such agreement.

APPENDIX B

This Appendix describes the basic principles and guides which have been used under this Agreement in setting the adjustment payments specified in Article XI and which are to be used in making periodical adjustment of payments as provided for in Article XII.

Under these principles the adjustment payments are intended, insofar as it is practicable, to result in a sharing of the economies realized by the joint use of pole plant in proportion to the relative costs of separate pole line construction.

The procedures outlined herein take into account the following objectives:

1. An equitable division of savings regardless of the number of jointly used poles owned by each party.
2. Adjustment payments applicable universally in the area covered by the Agreement regardless of whether the pole lines involved are initially constructed with joint use in view or are existing lines modified for joint use.
3. Appropriate allowance in the adjustment payments for additional costs incurred by each party in supplying 'normal joint poles', as defined in the Agreement, and the costs of other items required in the joint use of poles which would not be incurred in separate line construction.
4. Adjustment payments based on the costs of "typical miles" of separate lines, of newly constructed joint lines and of existing lines modified to make them suitable for joint use. The 'per mile' values of adjustment payments are then reduced to 'per pole' values for purposes of simplifying tabulations and to provide for the joint use of scattered poles.

The adjustment payments are the dollar values resulting from the licensee paying to the owner, as annual adjustment payments, an amount representing the annual charge on a separate line for the licensee less the sum (a) the annual charges on the additional costs incurred by the licensee in establishing joint use and (b) the licensee's share of the total annual savings. This share is the ratio of the licensee's typical separate line costs to the sum of the typical separate line costs of each of the parties.

The annual adjustment payments can also be stated as follows:

| | | | | | | |
|---|----------|---|--------|---|------|--|
| Licensee's annual adjustment payment | (equals) | Annual charges saved by Licensee through not having to build a separate line | (less) | Licensee's appropriate percentage | (of) | Total savings in annual charges realized through joint use. |
|---|----------|---|--------|---|------|--|

The cost in place of a line of poles is made up of a number of factors including such items as right-of-way solicitation, clearing, staking, direct labor and material costs of bare poles in place and pro rata shares of construction supervision and overhead. These costs, for a specific area, may differ considerably from corresponding costs in other parts of the country. These variations in pole line costs will, however, affect both power and telephone lines to about the same degree.

The calculation for Telephone Company adjustment payments to Power Distributor and Power Distributor adjustment payments to the Telephone Company based on the preceding principles for this contract is as follows:

agreement of which this Article forms a part shall apply for poles on which both types of facilities are present and no other adjustment payments shall apply. The adjustment payment provisions of this Agreement shall apply, however, where only those facilities directly associated with the power line carrier systems are involved.

(e) Adjustment payments per pole due from one party as licensee to the other party or owner shall, subject to the provisions of Article XII, be [REDACTED] per annum by the Electrical Distributor for each jointly used pole owned by the Telephone Company and [REDACTED] per annum by the Telephone Company for each jointly used pole owned by the Electrical Distributor. The smaller total sum shall be deducted from the larger and the Electrical Distributor or the Telephone Company, as the case may be, shall pay to the other the difference between such amounts. The adjustment payment herein provided shall be paid within ten days after the bill has been submitted.

(f) At intervals not exceeding five (5) years an actual inventory of attachments shall be made by representatives of the parties. If there is any difference in the number of attachments found by the inventory and the number arrived at by tabulating those reported, correction will be made by retroactive billing for any attachments identified as being responsible for the difference, and any remaining difference will be spread evenly over the years since the last inventory, and billing adjusted accordingly except as otherwise provided under Article XII, Section (c).

ARTICLE XII PERIODICAL ADJUSTMENT OF PAYMENTS

(a) At any time after 3 years from the date of this Agreement and at intervals of not less than 3 years thereafter, the payments applicable under this Agreement shall be subject to joint review and adjustment provided for under Section (b) of this Article upon the written request of either party. In case of adjustment of payments as herein provided, the new payments agreed upon shall apply starting with the annual bill next rendered and continuing until again adjusted.

(b) All adjustments of rental shall be in accord with the provisions of Appendix B, and any changes shall take into account the cost factors originally involved in all joint use existing at that time under this Agreement.

(c) An actual inventory of attachments shall be made by representatives of the parties coincident with the effective date of any adjustment rentals.

ARTICLE XIII DEFAULTS

(a) If either party shall default in any of its obligations under this Agreement and such default continues for thirty (30) days after due notice thereof in writing by the other party, the party not in default may suspend its rights of the party in default insofar as concerns the granting of future joint use and if such default shall continue for a period of 90 days after such suspension, the party not in default may forthwith terminate this Agreement as far as concerns the future granting of joint use.

(b) If after reasonable notice either party shall make default in the performance of any work it is obligated to do under this Agreement at its sole expense, the other party may elect to do such work, and the party in default shall reimburse the other party for the cost thereof. Failure on the part of the defaulting party to make payment within 30 days upon presentation of bills therefor shall, at the election of the other party, constitute default under Section (a) of this Article.

ARTICLE XIV EXISTING RIGHTS OF OTHER PARTIES

(a) If either of the parties hereto has, prior to the execution of this Agreement, conferred upon other parties to this Agreement, by contract or otherwise, rights or privileges to use any poles covered by this Agreement, nothing herein contained shall be construed as affecting such rights or privileges, and either party shall have the right, by contract or otherwise, to continue and extend such existing rights or privileges, it being expressly understood, however, that for the purpose of this Agreement, the attachments of any such outside parties, except those of a municipality or other public authority, shall be treated as attachments belonging to the grantor and the rights, obligations, and liabilities hereunder of the grantor in respect to such attachments shall be the same as if it were the actual owner thereof.

(b) Where municipal regulations require either party to allow the use of its poles for fire alarm, police or other like signal systems, such use shall be permitted under the terms of this Article, provided attachments of such parties are placed and maintained in accordance with the specifications mentioned in Article III.

**ARTICLE XX
TERM OF AGREEMENT**

This Agreement shall continue in full force and effect until the 1st day of JANUARY, 1972 and shall continue thereafter until terminated, insofar as the making of attachments to additional poles is concerned, by either party giving to the other one (1) years notice in writing of intention to terminate the right of making attachments to additional poles. Any such termination of the right to make attachments to additional poles shall not, however, abrogate or terminate the right of either party to maintain the attachments theretofore made on the poles of the other or additional attachments to such poles, and all such attachments shall continue thereafter to be maintained, pursuant to and in accordance with the terms of this Agreement, which Agreement shall, so long as said attachments are continued, remain in full force and effect solely and only for the purpose of governing and controlling the rights and obligations of the parties with respect to said attachments.

**ARTICLE XXI
EXISTING CONTRACTS**

All existing agreements between the parties hereto for the joint use of poles in rural areas are by mutual consent hereby abrogated and superseded by this Agreement.

Nothing in the foregoing shall preclude the parties to this agreement from preparing such supplemental operating routines or working practices as they mutually agree to be necessary or desirable to effectively administer the provisions of this Agreement.

**ARTICLE XXII
APPROVAL OF THE ADMINISTRATOR**

This Agreement, and any amendment thereof, shall be effective subject to the condition that, during any period in which the Electrical Distributor is a borrower from the Rural Electrification Administration, this Agreement and any amendment thereof shall have the approval in writing of the Administrator of the Rural Electrification Administration.

In witness whereof the parties hereto, have caused these presents to be executed in triplicate, and their corporate seals to be affixed thereto by their respective officers thereunto duly authorized, on the 1st day of January, 19 72.

ENGR. & CONST.

Amendment to Article XI of General Agreement For
Joint Use of Wood Poles in Rural Areas

The Electrical Distributor and the Telephone Company agree that the following
Amendment shall be a part of the agreement between the

parties dated January 1, 1972

Amend Section E, Article XI, by deleting the first sentence thereof, and sub-
stituting in its place the following:

"Adjustment payments per pole due from one party as licensee
to the other party or owner shall be, subject to the provisions
of Article XII, \$6.75 per annum by the Electrical Distributor
for each jointly-used pole owned by the Telephone Company, and
\$5.80 per annum by the Telephone Company for each jointly-used
pole owned by the Electrical Distributor".

Amendment of Article XI of General Agreement
For Joint Use of Wood Poles in Rural Areas

The Electrical Distributor and the Telephone Company agree that the following Amendment shall be a part of the agreement between the

parties dated January 1, 1972.

Amend Section E, Article XI, by deleting the first sentence thereof, and substituting in its place the following:

"Adjustment payments per pole due from one party as licensee to the other party or owner shall be, subject to the provisions of Article XII, \$13.67 per annum by the Electrical Distributor for each jointly-used pole owned by the Telephone Company, and \$11.75 per annum by the Telephone Company for each jointly-used pole owned by the Electrical Distributor".

THIS AGREEMENT, made as of January 1, 1992 by and between TRI-COUNTY ELECTRIC MEMBERSHIP CORPORATION, a(n) corporation, hereinafter referred to as the "Power Distributor," and GTE SOUTH INCORPORATED, a Virginia corporation, hereinafter referred to as the "Telephone Company."

WITNESSETH:

WHEREAS, in the areas in the State(s) of Kentucky served by both parties, certain utility poles are presently used jointly by the Power Distributor and the Telephone Company, such joint use being maintained under the terms of a Rural Joint Use Agreement dated January 1, 1972, between the Power Distributor and Telephone Company; and

WHEREAS, the parties desire to continue such joint use and to use other poles jointly in the future, when and where such joint use will be of mutual advantage in meeting their respective service requirements; and

WHEREAS, when the parties are making arrangements for the joint use of new poles and the party proposing to erect the new poles already owns a majority of the poles, the parties shall take into consideration the desirability of having the new poles owned by the party owning the lesser number of joint use poles so as to progress toward a division of ownership of poles so that neither party shall be required to pay annual rental payments, giving due regard to the avoidance of mixed ownership in lines; and

WHEREAS, because of changed conditions and experience gained, and to facilitate administration of joint use, the parties desire to terminate the aforementioned Joint Use Agreements dated January 1, 1972, and enter into a new Joint Use Agreement giving due recognition to the fact that the comparative numbers of joint use poles owned by the parties, the respective space allocated to or used by the parties, the concern for the ability to provide reliable service, the relative positions of the parties on the poles all have a bearing on the contribution to be made by the parties both as to ownership and maintenance of joint use poles.

NOW, THEREFORE, in consideration of the premises and the mutual covenants herein contained, the parties hereto for themselves, their successors and assigns do hereby terminate the existing Joint Use Agreement dated January 1, 1972, and do hereby covenant and agree as follows:

ARTICLE I
DEFINITIONS

For the purpose of this agreement, the following terms when used herein shall have the following meanings:

- A. ATTACHMENTS is any wires, cables, strands, materials or apparatus affixed to a joint use pole now or hereafter used by either party in the construction, operation or maintenance of its plant.
- B. CHANGE IN CHARACTER OF CIRCUITS shall mean any change in either party's facilities which affects either loading on the pole or clearance between the facilities of the parties hereto.
- C. CODE means the National Electrical Safety Code, as it may be amended from time to time.
- D. DAYS as used herein shall mean calendar days.
- E. INJURIES include death, personal injury and property damage or destruction.
- F. JOINT USE is maintaining or specifically reserving space for the attachments of both parties on the same pole at the same time.
- G. JOINT USE POLE is a pole upon which space is provided under this agreement for attachments of both parties, whether such space is actually occupied by attachments or reserved therefore upon specific request.
- H. LICENSEE is the party having the right under this agreement to make attachments to a joint use pole that the other party owns.

- I. OWNER is the party owning the joint use pole.
- J. POLE OR POLES includes the singular and plural.
- K. REARRANGING OF ATTACHMENTS is the moving of attachments from one position to another on a joint use pole.
- L. RESERVED, as applied to space on a pole, means unoccupied space provided and maintained by Owner, either for its own use or expressly for Licensee's exclusive use at Licensee's request.
- M. RIGHT OF WAY is the legal right to use the property of another.
- N. STANDARD JOINT USE POLE means a 40-foot, Class 4 treated wood pole which meets the requirements of the Code. The parties may agree to use a smaller than Class Four pole; but under no condition shall the standard joint use pole be less than the minimum requirements of the Code.
- O. STANDARD SPACE ALLOCATION means an allocation of sufficient space on a standard joint use pole for the use of each party taking into consideration requirements of the Code, and is more particularly defined as follows.
 - (1) For Power Distributor, the use of 8 feet of space on 40-foot poles, and 6 1/2 feet on 35-foot poles, measured downward from the top of the pole; and
 - (2) For Telephone Company, the use of 2.5 feet of space on joint use poles, below the space of the Power Distributor starting at the point that gives adequate Code separation on the pole. If under the terms of this Agreement the Telephone Company uses a portion of the Power Distributor's allocated space as measured from the top of the pole, the Telephone Company agrees that its use is permissive and that the Power Distributor shall have the undisputed use of its allocated space measured from the top. Telephone Company agrees

to move any such attachments within this allocated space at its own cost upon demand of Power Distributor. Similarly, if the Power Distributor uses a portion of the Telephone Company's 2.5 foot space, the Power Distributor agrees that such use shall be permissive. Power Distributor agrees to move any such attachment within the 2.5 foot space.

- (3) The foregoing definition of a "normal joint use pole" is not intended to preclude the use of joint poles shorter or taller or of different strength than the normal joint use pole in locations where it is mutually agreed by written request such poles will meet the requirements of the parties hereto.
- P. TRANSFERRING OF ATTACHMENTS is the removing of attachments from one pole and placing the attachments upon another pole.
- Q. ACTUAL COST, as applied herein to billing, shall be determined from each party's work order accounting procedures prescribed by the Federal Power Commission "Uniform Systems of Accounts" in effect April 1, 1973, with all current revisions except in those instances where REA specifically prescribes other accounting.
- R. IN-PLACE VALUE, as applied herein to billing, shall be the original cost of the plant unit less accumulated depreciation, as determined from each party's plant accounting procedures prescribed by the Federal Power Commission "Uniform Systems of Accounts" in effect April 1, 1973, with all current revisions except in those instances where REA specifically prescribes other accounting.

ARTICLE II TERRITORY AND SCOPE OF AGREEMENT

This agreement shall cover all poles of each of the parties now existing in joint use and those hereafter erected or acquired within the common operating areas served by the parties excepting poles which in the Owner's judgement are necessary for its sole use.

ARTICLE III
PERMISSION FOR JOINT USE

Subject to the terms and conditions of this agreement, each party hereby permits joint use by the other party of any of its poles in accordance with the standard space allocation defined in Article I and the following:

- (1) Allocated pole space may, without additional charge, be used by the party to which it is not allocated for the purpose of installing and maintaining street lighting, traffic signal systems, and vertical attachments (such as but not limited to ground wires, gang operated switch control rods and underground risers) if by the terms of the Code the proposed use is authorized and such use does not unreasonably interfere with the use being made by the party to which such space is allocated (such determination will be made solely by the party to which the space is allocated).

If Code provisions cannot subsequently be met, then billing for the required modifications will be actual cost. That is, if a party uses space allocated to the other party and, because of such use, the other party has to make modifications to comply with the code, the party making such modifications shall be entitled to payment from the party using space which is allocated to the party making such modifications.

- (2) As long as the provisions of the Code are met, unallocated space may be used without additional charge by the Power Distributor and/or Telephone Company. If Code provisions cannot subsequently be met then billing for required modifications will be actual cost. That is, if the Licensee uses unallocated space and because of such use the Owner of the pole has to make modifications to comply with the code, the Owner shall be entitled to payment from the Licensee for such modifications.

- (3) As long as the provisions of the Code in effect at the time the attachments were installed, have been met, any joint use pole now in place shall be deemed satisfactory to both parties and adequate for its requirements whether or not the space allocations made herein have been observed. That is, existing attachments shall be maintained at the current level of pole usage of both parties.
- (4) As long as the provisions of the Code are met, any pole hereafter made joint use shall thereupon be deemed satisfactory to Licensee and adequate for its requirements whether or not the space allocations made herein have been observed.

ARTICLE IV SPECIFICATIONS

The joint use of poles covered by this Agreement shall at all times be in conformity with all applicable provisions of law and with the minimum requirements of the Code in effect at the time the respective attachments are made, and with such additional requirements as may be mutually approved in writing by the General Manager of the Power Distributor and by the Operation Manager-OSP Engineering of the Telephone Company.

ARTICLE V RIGHT-OF-WAY-AND LINE CLEARING

- A. The Owner and Licensee will cooperate as far as may be practicable in obtaining right-of-way for both parties. When a written easement is secured it shall be in sufficient detail for identification and recording, and shall be subject to inspection by the other party upon request. However, no guarantee is given by the Owner of permission from property owners, municipalities or others for the use of poles by the Licensee, and if objection is made thereto and the Licensee is unable to satisfactorily adjust the matter within a reasonable time, the Owner may at any time, upon notice in writing to the Licensee, require the Licensee to remove its attachments from the poles

involved, and the Licensee shall, within ninety (90) days after receipt of said notice, remove its attachments from such poles at its sole expense. Should the Licensee fail to remove its attachments as herein provided, the Owner may remove them at the Licensee's expense, without any liability whatever for such removal or the manner of making it, for which expense the Licensee shall reimburse the Owner on demand. Owner shall provide a 20' right-of-way whenever possible. Nothing stated herein shall preclude the parties from mutually sharing the cost of right-of-way acquisition.

- B. Line clearing and trimming will be performed as follows:
- (1) When constructing a new joint use pole line the Owner shall cut, clear and trim a 20' right-of-way if possible.
 - (2) In all other instances each party shall be responsible for its own initial and recurring trimming, clearing and cutting.

ARTICLE VI
PLACING, TRANSFERRING OR REARRANGING ATTACHMENTS

- A. Either party desiring to reserve space on any pole of the other not then designated as a joint use pole shall make written application therefore, specifying the pole involved, the number and kind of its attachments to be placed thereon and the character of the circuits to be used. Within ten (10) days after the receipt of such application, Owner shall notify the applicant in writing whether it is excluding said pole from joint use under the provisions of Article II. Upon receipt of notice from Owner that said pole is not excluded, and after completion of any required transferring or rearranging of attachments on said pole or any pole replacement as provided in Article VII the applicant shall have the right to use said pole as Licensee in accordance with the terms and conditions of this Agreement. Notwithstanding the foregoing, attachments

placed by either party on the other's pole without such application and approval shall subject said pole to the terms of this Agreement. In such case Owner shall have the right to require Licensee to remove within ninety (90) days at its sole expense any such attachments on poles coming within the exceptions described in Article V. Should Licensee fail to remove such attachments, such failure shall constitute default according to Article XIV.

- B. Except as herein otherwise expressly provided, each party at its own expense shall place, maintain, rearrange, transfer and remove its own attachments, and shall at all times perform such work promptly and in such a manner as not to interfere with work or service being performed by the other party. Upon completion of work by the Owner which will necessitate transfer of the Licensee's attachments, the Owner shall provide written notice to the Licensee that such transfer must be completed within sixty (60) days. If such transfer of attachments is not completed within sixty (60) days the old pole shall become the property of the Licensee, and the Licensee shall save harmless the former Owner of such pole from all obligations, liabilities, damages costs, expenses, or charges incurred thereafter because of or arising out of the presence, location or condition of such pole or any attachment thereon, whether or not it is alleged that the former Owner was negligent or otherwise. Licensee shall pay the former Owner the in-place value, for said pole.

ARTICLE VII
ERECTING, REPLACING OR RELOCATING POLES

- A. Whenever any jointly used pole, or any pole about to be so used under the provisions of this agreement, is insufficient in size or strength for the existing attachments and for the proposed immediate additional attachments thereon, the Owner shall within sixty (60) days replace such pole with a new pole of the necessary size and strength, and make such other changes in the existing pole line in which such pole is included, as may be made necessary by the replacement of such pole

and the placing of the Licensee's circuits as proposed. By mutual agreement, the time period may be shortened or extended.

- B. The parties recognize and agree that there are inherent dangers involved in the transmission and distribution of electricity. The parties agree that unforeseeable emergency conditions will exist from time to time. When due to accidents, storm damage, etc., it is necessary for the Licensee to replace the Owner's pole immediately to restore service to its customers or to eliminate a hazardous condition and the Owner cannot perform the work in time to meet the Licensee's requirements, Licensee may replace the Owner's pole. Licensee will make all of its required facility changes or transfers and will secure the old pole to the new pole so the Owner may make its transfers when feasible. Licensee shall bill the Owner the total cost of the new pole. Owner shall continue to own the old pole and shall be responsible for its removal, and the new pole will become the property of the original owner.
- C. Whenever it is necessary to change the location of a jointly used pole, by reason of any state, municipal or other governmental requirement, or the requirements of a property owner, the Owner shall, before making such change in location, give notice thereof in writing (except in cases of emergency) to the Licensee, specifying in such notice the time of such proposed relocation, and Licensee shall, within sixty (60) days, transfer its attachment to the pole at the new location.
- D. In any case where the parties hereto shall conclude arrangements for the joint use of any new poles to be erected, and the party proposing to construct the new pole facilities already owns more than its proportionate share of joint poles, the parties shall take into consideration the desirability of having the new pole facilities owned by the party owning less than its proportionate share of joint poles so as to work towards such a division of ownership of the joint poles that neither party shall be obligated to pay to the

other any adjustment payments because of their respective use of joint poles owned by the other, due regard being given to the desirability of avoiding mixed ownership of poles in a section of line.

- E. Whenever either party hereto is about to erect new poles, either as an additional pole line, as an extension of an existing pole line, or as the reconstruction of an existing pole line, it shall notify the other in writing at least thirty (30) days before beginning the work (short notice, including verbal notice subsequently confirmed in writing, may be given in cases of emergency) and shall submit with such notice its plan showing the proposed location and size of the new poles, and circuits it will use thereon. The other party shall, within fifteen (15) days after the receipt of such notice, reply in writing to the party erecting the new poles, stating whether such other party does, or does not, desire space on the said poles, and if it does desire space thereon, the character of the circuits it desires to use and the amount of space it wishes to reserve. This notice of desire to establish joint use should include detail plans of any changes in the plans of the other party which are desired in order to permit the establishment of joint use. If such other party requests space on the new poles and if the character and number of circuits and attachments are such that the Owner does not wish to exclude the poles from joint use under the provision of Article II, then poles suitable for the said joint use shall be erected in accordance with the provisions and the payment of costs as provided in this agreement.
- F. The costs of erecting joint poles coming under this agreement, either as new pole lines, as extensions of existing pole lines, or to replace existing poles, either existing jointly used poles or poles not previously involved in joint use, shall be borne by the parties as follows:
- (1) Whenever operating and safety conditions prohibit Owner from replacing an existing pole which needs to be replaced, Licensee shall replace the pole and bill Owner the actual cost.

- (2) A normal joint pole, or a joint pole shorter and/or smaller than the normal pole, shall be erected at the sole expense of the Owner, except as provided in Section G of this Article.
- (3) In the case of a pole taller and/or stronger than the normal pole, the extra height and/or strength of which is due wholly to the Owner's requirements shall be erected at the sole expense of the Owner.
- (4) In the case of a new pole taller and/or stronger than the normal pole, the extra height and/or strength of which is due wholly to the Licensee's requirements, the Licensee shall pay to the Owner the extra costs for the additional height and/or strength.
- (5) Where an existing jointly used pole is prematurely replaced by a new one solely for the benefit of Licensee, the Licensee shall pay the Owner the in-place value of the existing pole and costs of replacing or transferring all attachments and the replaced pole shall be removed and retained by the Owner.
- (6) In the case of a new pole taller and/or stronger than the normal pole, the extra height and/or strength of which is due, to the requirements of both parties, the Licensee shall pay to the Owner a sum equal to one-half the excess height and/or strength, the rest of cost of erecting such pole to be borne to the Owner.
- (7) In the case of a new pole taller and/or stronger than the normal pole, where height and/or strength in addition to that needed for the purpose of either or both of the parties hereto is necessary in order to meet the requirements of the code, public authority or of property owners, the excess cost of such pole due to such requirements shall be borne by the Owner.

- (8) If Licensee only requires the addition of a pole in an existing line because of span length or terrain, the Owner will furnish and erect said pole at the sole expense of the Licensee, and pole shall remain property of Owner. The charges shall be actual cost.
- (9) Where the Power Distributor has a line that crosses a Telephone Company line and the provisions of the code are met and the Telephone Company desires to set a pole in the Telephone Company line and requests the Power Distributor to attach to said pole, the Telephone Company shall bear all initial and recurring costs of placing and maintaining said pole, except the cost of making and transferring the Power Distributor attachments.
- G. In any case where a pole is erected hereunder to replace another pole solely because such other pole is not tall enough, or of the required strength, to provide adequately for the Licensee's requirements, or where such pole, whether is has space reserved for the Licensee's use or not, had at the time of its erection been pronounced by the Licensee as satisfactory and adequate for its requirements, the Licensee shall, upon erection of the new pole, pay to the Owner, in addition to any amounts payable by the Licensee under paragraphs 3, 4, or 5 of Section F of this Article, a sum equal to the in-place value for the pole which is replaced and the pole removed shall remain the property of the Owner.
- H. In any case where by mutual consent it is desirable to change the ownership of a pole and Licensee erects and owns a joint pole to replace an existing pole of the Owner (instead of the Owner doing so as it is contemplated by Section A of this Article) such Licensee shall pay to the Owner of the replaced pole a sum equal to the in-place value for the pole which is replaced and the pole removed shall remain the property of the Owner and shall be removed by the Owner.

ARTICLE VIII
MAINTENANCE OF FACILITIES

- A. Owner shall, at its own expense, maintain its joint use poles in a safe and serviceable condition and shall undertake any appropriate safety measures, including without limitation reasonable pole inspections. The Owner's responsibility for maintaining a safe and serviceable condition of its poles shall be in accordance with the requirements of the Code, and shall replace poles that become defective, in accordance with the provisions of Article VII.

- B. The parties recognize and agree that there are inherent dangers involved in the transmission and distribution of electricity. The parties agree that unforeseeable emergency conditions will exist from time to time. When due to accidents, storm damage, etc., it is necessary for the Licensee to replace the Owner's pole immediately to restore service to its customers or to eliminate a hazardous condition and the Owner cannot perform the work in time to meet the Licensee's requirements, Licensee may replace the Owner's pole. Licensee will make all of its required facility or transfers and will secure the old pole to the new pole so the Owner may make its transfers when feasible. Licensee shall bill the Owner the total cost of the new pole. Owner shall continue to own the old pole and shall be responsible for its removal.

- C. Each party shall, at its own expense, at all times maintain all of its attachments in safe condition, thorough repair and in accordance with the requirements of the Code.

- D. The parties hereby agree that a cooperative approach will be taken in solving noise or inductance problems that may occur.

ARTICLE IX
ABANDONMENT OF JOINT USE POLES

- A. Anytime Owner desires to abandon any joint use pole, it shall give Licensee at least sixty (60) days written notice. If, at the expiration of such period, Owner shall have no attachments on such pole but Licensee shall not have removed all of its attachments therefrom, such pole shall thereupon become the property of Licensee, Licensee shall save harmless the former Owner from all obligations, liabilities, damages, costs, expenses, or charges incurred thereafter because of or arising out of the presence, location or condition of such pole or any attachment thereon, whether or not it is alleged that the former Owner was negligent or otherwise.
- B. Licensee may at any time abandon a joint use pole by removing therefrom all of its attachments, and giving due notice thereof in writing to Owner.

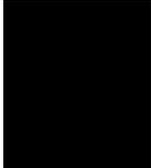

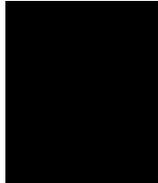

ARTICLE X
ADJUSTMENT PAYMENTS

- A. The parties agree that the annual rental fee paid by the Licensee to the Owner should take into account the respective space allocated to or used by the parties. The parties recognize that the ratio of usage is approximately [REDACTED] Telephone Company and [REDACTED] Power Distributor. The parties, therefore, agree that the annual rental fee per pole to be paid by Power Distributor, as Licensee, should be 150% of the annual rental fee per pole to be paid by Telephone Company, as Licensee.
- B. An actual inventory of attachments shall be made by representatives of the parties within twelve (12) months from the execution date of this agreement.
- C. Adjustment payments hereunder shall cover rentals accruing during the calendar year and shall be based on the number of poles on which space is occupied or

reserved on the first day of December of the year in which the rentals accrue. Within thirty (30) days following such date, or as soon as practical thereafter each party shall submit a written statement to the other party giving the number of poles on which space was occupied by or reserved for the other party as of such date.

- D. The total adjustment payment due each party shall be determined by multiplying the poles owned and licensed by each party, by the adjustment payment.
- (1) The smaller total amount covered above shall be deducted from the larger amount and the Power Distributor or the Telephone Company, which ever shall owe the larger amount, shall pay to the other the difference between said two amounts as the net adjustment payment due for the year involved. Within thirty (30) days after the first day of January next, or as soon as practical thereafter, ensuing after the date of this Agreement, and within thirty (30) days after the first day of each January, or as soon as practical thereafter, during the time this Agreement shall be in effect, the party to which said adjustment payment is owed as of said first day of January, shall submit a written statement (the "Schedule of Pole Rentals") to the other party giving the correct amount owed by the other party.
 - (2) The adjustment payment herein provided for shall be paid within thirty (30) days after the bill has been submitted, unless said party disputes the amount of such bill within ten (10) days from receipt thereof. In case of such dispute, payment shall be made within thirty (30) days after the bill has been submitted of the amount that is admitted to be due; an agreement concerning the disputed amount shall be attempted with all reasonable dispatch by negotiation. Failing to reach any such agreement by negotiation, either party may make formal written demand on the other for the amount claimed to be due; and if payment thereof is not made within thirty (30) days, suit may be brought for the amount claimed.

- E. The rates to be paid by each party, as Licensee, to the other party, as Owner, for the calendar years listed below shall be as follows:

| <u>Year</u> | <u>Telephone Company as Licensee</u> | <u>Power Distributor as Licensee</u> |
|-------------|---|---|
| 1992 |  |  |
| 1993 | | |
| 1994 | | |
| 1995 | | |
| 1996 | | |

OK ✓
OK ✓

ARTICLE XI
INVENTORY OF ATTACHMENTS

- A. At intervals not exceeding five (5) years an actual inventory of attachments shall be made by representatives of the parties. If there is any difference in the number of attachments found by the inventory and the number arrived at by tabulating those reported, correction will be made by retroactive billing for any attachments identified as being responsible for the difference, and any remaining difference will be spread evenly over the years since the last inventory and billing adjusted accordingly.
- B. Each party shall share equally the cost of making such inventory of attachments.

ARTICLE XII
JOINT ANCHORS

The Owner where practicable shall, upon request from Licensee, place anchors suitable for joint use upon consideration of the joint load and guy lead requirements. The cost of the anchor shall be shared, and will be billed, at one-half the actual cost. Each party shall install its own guy wires.

ARTICLE XIII
GROUNDING AND BONDING

Grounding and bonding will at all times meet the requirements of the Code.

ARTICLE XIV
DEFAULTS

- A. If either party shall fail to discharge any of its obligations under this Agreement and such failure shall continue for thirty (30) days after notice thereof in writing from the other party, all rights of the party in default hereunder, pertaining to making attachments to additional poles of the other, shall be suspended. If such default shall continue for a period of ninety (90) days after such suspension, the other party may forthwith terminate the right of the defaulting party to attach to additional poles of the other party. Any such termination of the right to attach to such additional poles of the other by reason of any such default shall not abrogate or terminate the right of either party to attach to existing joint use poles or to maintain existing attachments, and all such attachments shall continue thereafter to be maintained pursuant to and in accordance with the terms of this Agreement, which Agreement shall, so long as such attachments are continued, remain in full force and effect solely and only for the purpose of governing and controlling the rights and obligations of the parties with respect to such attachments.
- B. In the event either party should fail to perform its obligations either during the term of this Agreement or after termination made in accordance with the terms of this Article or Article XIX or fail to properly maintain or promptly replace joint use poles thereto after sixty (60) days written notice from the other, the other party shall have the right, but not the obligation, to maintain such poles or to replace the same at the expense of the party so failing, and shall be fully indemnified for all expenses, costs and damages whatever in taking such action or the manner of taking it.

ARTICLE XV
LIABILITY AND DAMAGES

Either party hereto, to the fullest extent permitted by law, agrees to and shall indemnify and hold harmless the other Party from and against any and all claims, damages, injuries, losses and expenses, including but not limited to attorneys' fees, arising out of or resulting from the joint use of the poles and/or any acts or omissions under this agreement, provided that any such claim, damage, injury, loss, or expense is caused in whole or in part by any negligent act or omission of the party which must indemnify and hold harmless the other party, or is caused by any subcontractor, person or organization, directly or indirectly employed by such party, or is attributable to such party. Any interpretations regarding this Agreement or any activities arising hereunder shall be governed by the laws of the state of Tennessee.

ARTICLE XVI
RIGHTS OF OTHER PARTIES

- A. If either party has, prior to the execution of this Agreement, conferred upon others not parties to this Agreement (outside parties), by contract or otherwise, rights or privileges to attach to any of its poles covered by this Agreement, nothing herein contained shall be construed as affecting said rights or privileges with respect to existing attachments of such outside parties, which attachments shall continue in accordance with the present practice; all future attachments of such outside parties shall be in accordance with the requirements of Paragraph B below, except where such outside parties have by agreements entered into prior to the execution of this Agreement acquired enforceable rights or privileges to make attachments which do not meet such space allocations. Owner shall derive all of the revenue accruing from such outside parties. Any contractual rights or privileges of outside parties recognized in this paragraph shall include renewals of or extensions of the term (period) of such contracts.

- B. If either party hereto desires to confer upon others not parties to this Agreement (outside parties), by contract or otherwise, rights or privileges to attach to any of its poles covered by this Agreement, it shall have the right to do so, provided all such attachments of such outside parties are made in accordance with the following: (a) such attachments shall be maintained in conformity with the requirements of the code, and (b) such attachments shall not be located within the space allocation of Licensee, unless Licensee concurs in such occupancy. Such concurrence shall in no way waive Licensee's right to occupy its allocated space in the future. Owner shall derive all of the revenue accruing from such outside parties.

ARTICLE XVII
NOTIFICATION PROCEDURES

Wherever in this Agreement notice is required to be given by either party hereto to the other, such notice shall be in writing mailed or delivered to the General Manager of the Power Distributor at its office at 405 College Street Lafayette, TN 37083, or to the Operation Manage-OSP Engineering of the Telephone Company at its office at P.O. Box 1650 Lexington, KY 40592, as the case may be, or to such other addressee as either party may from time to time designate in writing for that purpose.

ARTICLE XVIII
TERM OF AGREEMENT

- A. This Agreement shall continue in full force and effect until the 31st day of December, 1996. This Agreement shall continue from year to year thereafter until terminated by either party, giving to the other 12 months notice in writing of intention to terminate this Agreement. At any time thereafter, the adjustment payment rates applicable under this Agreement shall be subject to joint review and revision upon the written request of either party. In case of revision of the adjustment payment rates as herein provided, the new

adjustment payment rates agreed upon shall apply, starting with the annual bill next rendered and continue until again adjusted.

- B. Revisions of the adjustment payments shall be based on experience resulting from previous administration of this Agreement. Any changes shall take into account the original cost factors pertinent to the establishment of the pole facilities involved in all joint use existing under this Agreement at the time of the review. If, within 90 days after the receipt of the request set forth in Article XVIII A above, by either party from the other, the parties hereto fail to agree upon a revision of such rate, then the adjustment payment per pole shall be established at the then existing Rate, as escalated by the rate of inflation of the prior calendar year for a period of two years.

ARTICLE XIX
ASSIGNMENT OF RIGHTS

- A. Except as otherwise provided in this Agreement, neither party hereto shall assign or otherwise transfer this Agreement, in whole or in part, without the written consent of the other party; provided that either party shall have the right without such consent to mortgage any or all of its property, rights, privileges and franchises, or to lease or transfer any of them to another corporation organized for the purpose of conducting a business of the same general character as that of such party, or to enter into any merger or consolidation; and in case of the foreclosure of such mortgage, or in case of such lease, transfer, merger or consolidate its rights and obligations hereunder shall pass to such successors and assigns; and provided, further, that subject to all of the terms and conditions of this Agreement, either party may without such consent permit any corporation conducting a business of the same general character as that of such party, with which it is affiliated by corporate structure, to exercise the rights and privileges of this agreement in the conduct of its said business.

- B. For the purpose of this Agreement, all attachments maintained on any joint use pole by the permission of either party hereto, as provided in Paragraph A above, shall be considered the attachments of the party granting such permission, and the rights, obligations and liabilities of such party under this Agreement, in respect to such attachments, shall be the same as if it were the actual owner thereof.
- C. The attachments of each party hereto or of others permitted by this Agreement shall at all times be and remain its or their property, with the full right of removal, and shall not become subject to any liens against the other party.

ARTICLE XX
WAIVER OF TERMS OF CONDITIONS

The failure of either party to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

ARTICLE XXI
EXISTING AGREEMENTS

Any existing agreement between the parties hereto for the joint use of wood poles upon a rental basis within the territory covered by this agreement is, by mutual consent, hereby abrogated and annulled.

ARTICLE XXII
NO EFFECT ON FRANCHISE RIGHTS

Notwithstanding anything elsewhere herein provided, nothing contained in this agreement shall abrogate, limit or affect any obligation of either party under any franchise granted to either party by the City(ies) of Tri-County Electric Membership Corporation service area or by any of its predecessor municipal corporations.

ARTICLE XXIII
SOURCE OF PAYMENTS

The obligations of the Power Distributor hereunder shall be payable solely from the funds of the Power Distributor of Tri-County Electric Membership Corporation.

ARTICLE XXIV
SUPPLEMENTAL ROUTINES AND PRACTICES

Nothing in the foregoing shall preclude the parties to this agreement from preparing such supplemental operating routines or working practices as they mutually agree to be necessary or desirable to effectively administer the provisions of this Agreement. Any such supplemental operating routines or working practice must be authorized and approved by the management level officer of employee executing or authorized to execute this contract.

ARTICLE XXV
NO JOINT OWNERSHIP

The Licensee of a joint use pole shall acquire no ownership of or interest in such a pole the Licensee's rights therein being limited to the right to compliance with the terms and conditions contained in this Agreement.

ARTICLE XXVI
APPROVAL OF THE ADMINISTRATOR

This Agreement, and any amendment thereof, shall be effective subject to the condition that, during any period in which the Electrical Distributor is a borrower from the Rural Electrification Administration, the Agreement and any amendment thereof shall have the approval in writing of the Administrator of the Rural Electrification Administration.

ARTICLE XXVII
AGREEMENT AFFECTS ONLY PARTIES HERETO

Except only insofar as the express terms of this agreement make the rights hereunder available to the successors or assigns of the parties hereto, the provisions of this agreement shall not be interpreted to confer any right of action at law or in equity upon any parties except the parties hereto.

IN WITNESS WHEREOF, the parties here to have caused these presents to be executed in triplicate, and their corporate seals to be affixed thereto by the respective officers thereunto duly authorized, on the day and year first above written.

GENERAL AGREEMENT

JOINT USE OF WOOD POLES IN RURAL AREAS

Contract Date: November 1994

PREAMBLE

WARREN RURAL ELECTRIC COOPERATIVE CORPORATION (hereinafter called the "Electrical Distributor"), a corporation organized under the laws of the State of Kentucky, and GTE SOUTH, INCORPORATED, a corporation organized under the laws of the State of DELAWARE (hereinafter called the "Telephone Company"), desiring to cooperate in the joint use of their respective poles, erected or to be erected within the rural areas in which both parties render service in the State(s) of Kentucky, whenever and wherever such use shall, in the estimation of both parties, be compatible with their respective needs, do hereby, in consideration of the premises and the mutual covenants herein contained, covenant and agree for themselves and their respective successors and assigns as follows:

ARTICLE I

SCOPE OF AGREEMENT

- (a) This Agreement shall be in effect in the areas in which both of the parties render service in the State(s) of Kentucky and shall cover all wood poles now existing or hereafter erected in the above territories, except where said poles are covered by or later brought under an urban contract of the parties, when said poles are brought under this Agreement in accordance with the procedure hereinafter provided.
- (b) Each party reserves the right to exclude any of its facilities from joint use.
- (c) It is the intention of the parties that adequate electric and telephone service shall be made available to the widest practicable number of rural users in the above territory.

ARTICLE II

EXPLANATION OF TERMS

For the purpose of this Agreement, the following terms shall have these meanings:

1. A JOINT POLE is a pole jointly used by both parties.
2. A NORMAL JOINT POLE is a pole which is just tall enough to provide normal spaces, as normal space is hereinafter defined, for the respective parties and just strong enough to meet the requirements of the specifications mentioned in Article III for the attachments ordinarily placed by the parties in their respective normal spaces. Such pole for the purpose of this Agreement shall be a 40-foot class 5 wood pole as classified by the pole classification tables of the American Standards Association. This is applicable only for those poles installed after the executed date of this Agreement.
3. SPACE is the linear portion of a joint pole parallel to its axis reserved for the exclusive use of one of the parties (subject only to the exceptions provided for this Article and the specifications mentioned in Article III which in certain instances permit the making of certain attachments by one party in the space reserved for the other party).
4. NORMAL SPACE is the following described space:
 - a. For the Electrical Distributor the uppermost 6½ feet, measured from the top of the pole.

- the top of the pole.
- b. For the Telephone Company, a space of 2 feet, at a sufficient distance below the space of the Electrical Distributor to provide at all times the minimum clearance required by the specifications mentioned in Article III and at a sufficient height above ground to provide the proper vertical clearance above ground or track rails for the lowest horizontally run line wires or cables attached in such space.
5. FACILITIES are the collection of items that make up an electrical distribution or telephone line, including but not limited to poles, wires, cables, guys, anchors, etc.
6. CIRCUIT is used to identify a particular line route that connects a source (substation, switching station, etc.) to an end user (customer, residence, business, etc.)

The foregoing definition of "a normal joint pole" is not intended to preclude the use of joint poles shorter or of less strength than the normal joint pole in locations where such poles will meet the requirements of the parties hereto.

The above assignment of space is not intended to preclude the use of vertical runs or the mounting of such equipment as terminals or meters on the lower portions of the pole when mutually agreeable.

ARTICLE III SPECIFICATIONS

Except as otherwise provided in Section (f) of Article VII, referring to construction temporarily exempt from the application of the specifications mentioned herein, the joint use of the poles covered by this Agreement shall at all times be in conformity with accepted modern methods such as those suggested in Edison Electric Institute Publication No. M12 and shall at all times conform to the requirements of the National Electrical Safety Code, Sixth Edition, and subsequent revisions thereof, except where the lawful requirements of public authorities may be more stringent, in which case the latter will govern.

In establishing joint use of wood poles whether installed new for joint use or installed initially for circuits of either party, the total transverse and vertical loads for all conductors attached to a pole covered by this Agreement shall not, under the assumed storm loadings of the National Electrical Safety Code for the area in which the pole is located, exceed fifty (50) percent of the ultimate fiber stress of the supporting pole. In the case of existing pole lines, the strength of the pole shall be assumed to be the same as when new.

ARTICLE IV ESTABLISHING JOINT USE OF EXISTING POLES

- (a) Before either party shall make use of the poles of the other party under this Agreement, it shall request permission therefor in writing on the form attached hereto and identified as Appendix A or such other form as may be mutually agreed upon and shall comply with the procedure set forth in said approved form.
- (b) Whenever either party desires to reserve space for its attachments on any pole owned by the other party, either as initial space or additional space on such pole, it shall make written application therefor, specifying the location of the poles in question, the amount of space desired on each pole, and the number and character of the circuits to be placed thereon. If, in the judgment of the owner, the poles are necessary for its own sole use or joint use under the circumstances is undesirable, the owner shall have the right to reject the application. In any event, within a

reasonable period after the receipt of such application the owner shall notify the applicant in writing whether the application is approved or rejected. Upon receipt of notice from the owner that the application has been approved, and after the completion of any transferring or rearranging which is required to permit the attaching of the applicant's circuits on such poles, including any necessary pole replacements, the applicant shall have the right as licensee hereunder to use such space in accordance with the terms of the application and of this agreement.

- (c) Each party shall place, transfer and rearrange its own attachments, place guys and anchors to sustain any unbalanced loads caused by its attachments, and perform any tree trimming or cutting incidental thereto. Each party shall, with due diligence, attempt at all times to execute such work promptly and in such manner as not to interfere with the service of the other party.
- (d) Wherever practicable, double thimble anchor rods with anchors of sufficient holding power to sustain any unbalanced loads of the two parties shall be installed and used jointly. The ownership of the double thimble anchor rods and anchors will be vested in the owner of the pole. In any case, where one party provides at the request of the other party double thimble anchor rods and anchors for the use of both parties, the party requesting the double thimble anchor rods and anchors shall pay to the party placing the double thimble anchor rods and anchors a sum equal to half of the cost of the anchors and anchor rods in place. In cases where the existing anchors are adequate for the needs of both parties, the party desiring additional guys may, where necessary, install an adapter at its own expense. In cases where existing anchor rods and anchors are adequate for the needs of only one party, the party desiring additional guys and anchors may, where necessary, install anchors and anchor rods at no expense to the other party, or in the case of right-of-way restrictions, may provide a double thimble anchor rod and anchor in place of the existing anchor rod and anchor to which the other party can attach its existing guy at its own expense.
- (e) The cost of establishing the joint use of existing poles including the making of any necessary pole replacements, shall be borne by the parties hereto in the manner provided in Article VIII - Division of Costs.

**ARTICLE V
ESTABLISHING JOINT USE OF NEW POLES**

- (a) Whenever either party hereto requires new pole facilities for an additional pole line, an extension of an existing pole line, or in connection with the reconstruction of an existing pole line, it shall promptly notify the other party to that effect in writing (verbal notice subsequently confirmed in writing may be given in cases of emergency) stating the proposed location and character of the new poles and the character of circuits it intends to use thereon and indicating whether or not such pole facilities will be, in the estimation of the party proposing to construct the new pole facilities, susceptible of joint use. Within a reasonable period after the receipt of such notice, the other party shall reply in writing, stating whether it does, or does not, desire space on the said poles and, if it does desire space thereon, the character of the circuits it desires to use and the amount of space it wishes to reserve. If such other party requests space on the proposed new poles and if the character and number of its circuits and attachments are such that the party proposing to construct the new pole facilities does not consider joint use undesirable, then it shall erect poles suitable for such joint use, subject, however, to the provisions of Section (b) of this Article, and subject further to the condition that request by either party for space on proposed new poles of the other party under this Agreement shall

be made in writing on the form attached hereto and identified as Appendix A or such other form as may be mutually agreed upon and shall comply with the procedure set forth in said approved form. The applicant for space on the poles shall be promptly notified in writing of the action taken on the application.

- (b) Each party shall place its own attachments on the new joint poles and place guys and anchors to sustain any unbalanced loads caused by its attachments except as otherwise provided under Article IV, Section (e). The party owning the pole line shall provide initial right-of-way clearance 15 feet on each side of the center line to the extent practicable, all right-of-way in excess of this 30-foot swath to be borne by the party requiring the additional width. Each party shall, with due diligence, attempt to execute its work promptly and in such manner as not to interfere with the service of the other party.

**ARTICLE VI
RIGHT OF WAY FOR LICENSEE'S ATTACHMENTS**

While the owner and licensee will cooperate as far as may be practicable in obtaining rights-of-way for both parties on joint poles, the owner does not warrant or assure to the licensee any right-of-way privileges or easements on, over or across streets, alleys and public thoroughfares, and private or publicly owned property, and if the licensee shall at any time be prevented from placing or maintaining its attachments on the owner's poles, no liability on account thereof shall attach to the owner of the poles.

**ARTICLE VII
MAINTENANCE OF POLES AND ATTACHMENTS**

- (a) The owner shall maintain its joint poles in a safe and serviceable condition and in accordance with the specifications mentioned in Article III and shall replace, reinforce or repair such of these poles as become defective. In case of emergency, with the giving of verbal notice, licensee may replace joint poles, anchors and guys as may be considered necessary for public safety or the restoration of licensee's service, in which case the licensee shall be reimbursed by the owner in the full amount of the cost of labor and materials plus any applicable overhead expenses.
- (b) When replacing a jointly used pole carrying terminals of aerial cable, underground connection, or transformer equipment, the new pole shall be set in the same hole which the replaced pole occupied unless special conditions make it necessary or mutually desirable to set it in a different location.
- (c) Whenever it is necessary to replace or relocate a jointly used pole, the owner shall, before making such replacement or relocation, give reasonable notice thereof in writing (except in case of emergency, when verbal notice will be given and subsequently confirmed in writing) to the licensee, specifying in such notice the time of such proposed replacement or relocation and the licensee shall at the time so specified transfer its attachments to the new or relocated joint pole. Should the licensee fail to transfer its attachments to the new joint pole on the date specified for such transfer of attachments, the owner may elect to relinquish the ownership of the old pole from which it has removed its attachments, with the giving of verbal notice to be subsequently followed in writing. Such old pole shall thereupon, at no cost to the licensee, become the property of the licensee, and the licensee shall save harmless the former owner of such pole from all obligation, liability, damages, cost, expenses or charges incurred thereafter, and not arising out of anything theretofore

occurring, because of, or arising out of, the presence or condition of such pole or of any attachments thereon. In instances where the Electrical Distributor is the owner of such pole, the unused portion of the pole above the licensee's attachments shall be cut off and removed by the owner before relinquishing ownership, if the pole remains in structural conflict with the power route.

- (d) Each party shall at all times maintain all of its attachments in accordance with the specifications mentioned in Article III and shall keep them in safe condition and in thorough repair. Where the parties mutually agree that right-of-way maintenance on existing joint use lines is necessary for the protection of their service, the cost of the following work shall be shared as follows:
1. The removal of dead or dangerous trees shall be shared equally.
 2. Chemical control or removal of undergrowth by cutting at the ground line in a swath measured 15 feet on each side of the center line as follows:
 - a. 50% of the cost on routes supporting bare aerial wire telephone circuits shall be borne by each party.
 - b. 10% of the costs shall be borne by the Telephone Company, 90% by the Electrical Distributor on routes supporting telephone multiple pair insulated wire.
 - c. Costs will not be shared on routes supporting cable or abrasive resistant wire. Each party will provide for its own requirements.
- (e) Each party shall be responsible for trimming its own circuits at its own expense where right-of-way is maintained by trimming (side growth, undergrowth, or overhead growth).
- (f) Any existing joint use construction of the parties hereto which does not conform to the specifications mentioned in Article III shall be brought into conformity therewith as soon as practicable.

When such existing construction shall have been brought into conformity with said specification, it shall at all times thereafter be maintained as provided in Sections (a) and (d) of this Article.

- (g) The cost of maintaining poles and attachments and of bringing existing joint use construction into conformity with said specifications shall be borne by the parties hereto in the manner provided in Article VIII - Division of Costs.

ARTICLE VIII DIVISION OF COSTS

- (a) The cost of erecting new joint poles coming under this Agreement, to construct new pole lines, to make extensions to existing pole lines, or to replace existing poles, except as covered in (c) below, shall be borne by the parties as follows:
1. A normal joint pole, or joint pole smaller than normal, shall be erected at the sole expense of the owner.
 2. A pole larger than the normal, the extra height or strength of which is due wholly to the owner's requirements including requirements as to keeping the owner's wires clear of trees shall be erected at the

sole expense of the owner.

3. In the case of a pole larger than the normal, the extra height or strength of which is due wholly to the licensee's requirements including requirements as to keeping the licensee's wires clear of trees, the licensee shall pay to the owner a sum equal to the difference between the cost in place of such pole and the cost in place of a normal joint pole, the rest of the cost of erecting such pole to be borne by the owner, except insofar as otherwise provided in Section (c) of this Article.
 4. In the case of a pole larger than the normal, the extra height or strength which is due to the requirements of both parties or the requirements for proper ground clearance or of public authorities or of property owners, (other than requirements with regard to keeping the wires of one party only clear of trees), the difference between the cost in place of such pole and the cost in place of a normal joint pole shall be shared equally by the licensee and the owner, the rest of the cost of erecting such pole to be borne by the owner.
 5. A pole, including all appurtenances or fixtures, erected between poles to provide sufficient clearance and furnish adequate strength to support the circuits of both the owner and the licensee, which it would have been unnecessary to erect if joint use had not been undertaken, shall be erected at the sole expense of the licensee.
- (b) Any payments for poles made by the licensee under any foregoing provisions of this Article shall not entitle the licensee to the ownership of any part of said poles for which it has contributed in whole or in part.
- (c) Where an existing jointly used pole or a non-joint pole is prematurely replaced by a new one solely for the benefit of the licensee, the cost of the new pole shall be divided as specified in Section (a) of this Article and the licensee shall pay the owner the labor cost of removal of the existing pole and the labor cost of replacing or transferring of all appurtenances on the existing pole. The replaced pole shall be removed and retained by its owner.
- (d) Each party shall place, maintain, rearrange, transfer and remove its own attachments at its own expense except as otherwise expressly provided herein.
- (e) The expense of maintaining joint poles shall be borne by the owner thereof except that the cost of replacing poles shall be borne by the parties hereto in the manner provided in Sections (a) and (c) of this Article.
- (f) Where service drops of one party crossing over or under lines of the other party are attached to the other party's poles, either directly or by means of a pole top extension fixture, the cost shall be borne as follows:
1. Pole top extension fixtures shall be provided and installed at the sole expense of the party using them.
 2. Where an existing pole is replaced by a taller one to provide the necessary clearance, the party owning the service drop shall pay the party owning the pole the cost of the new pole plus the labor costs of replacing or transferring of the appurtenances on the existing pole, the owner of the existing pole to remove and retain such pole at his own expense.
- (g) Payments made by either party to the other under the provisions of this Article may be based on the estimated or actual cost as mutually agreed

upon (including overhead) of making such changes, but in no event shall either party be required to pay for such changes more than 120% of the estimated cost supplied by the other if such cost estimate shall have been requested and furnished before the changes were made.

**ARTICLE IX
PROCEDURE WHEN CHARACTER OF CIRCUITS IS CHANGED**

When either party desires to change the character of its circuits on jointly used poles, such party shall give immediate notice to the other party of such contemplated change and in the event that the party agrees in writing to joint use with such changed circuits, then the joint use of such poles shall be continued with such changes in construction as may be required to meet the terms of the specifications mentioned in Article III for the character of circuits involved and such other changes as may be agreed upon. The parties shall cooperate to determine the equitable apportionment of the net expense of such changes. In the event, however, that the other party fails within 30 days from receipt of such notice to agree in writing to such change in character of circuits, then both parties shall cooperate in accordance with the following plan:

1. The parties hereto shall determine the most practical and economical method of effectively providing for separate lines, either overhead or underground, and the party whose circuits are to be moved shall carry out the necessary work as promptly as practicable.
2. The net costs of re-establishing such circuits in the new location as are necessary to furnish the same business facilities that existed in the joint use section at the time such change was decided upon, shall be borne by the licensee; provided, however, that the owner shall bear the cost whenever the change was occasioned by the necessities of the owner. When the net costs are borne by the owner, they shall not include the cost of the new pole line constructed by the licensee.

Unless otherwise agreed by the parties, ownership of any new line or underground facilities constructed under the foregoing provisions in a new location shall vest in the party for whose use it is constructed.

**ARTICLE X
ABANDONMENT OF JOINT USED POLES**

- (a) If the owner desires at any time to abandon any jointly used pole, it shall, except as provided in Article VII, Section (c), give the licensee notice in writing at least 60 days prior to the date on which it intends to abandon such pole. At the expiration of said period, if the owner shall have no attachments thereon, and if the licensee shall have failed to remove its attachments thereon, such pole shall thereupon become the property of the licensee, and the licensee shall save harmless the former owner of such pole from all obligation, liability, damages, cost, expenses or charges incurred thereafter, and not arising out of anything theretofore occurring, because of, or arising out of, the presence or condition of such pole or of any attachments thereon; and shall pay the owner the then value in place of the pole to the owner. The former owner shall further evidence transfer of title to the pole by appropriate means. Credit shall be allowed for any payments which the licensee may have made under the provisions of Article VII - Division of Costs, when the pole was originally set, provided the licensee furnishes proof of such payment.
- (b) The licensee may at any time abandon the use of a joint pole by removing therefrom any and all attachments it may have thereon and by giving such notice as may be mutually agreed upon.

ARTICLE XI
ADJUSTMENT PAYMENTS

- (a) The parties contemplate that the use or reservation of space on poles by each party, as licensee of the other under this Agreement shall be based on the equitable sharing of the economies of joint use.
- (b) On or about December 1st of each year, each party, acting in cooperation with the other, and subject to the provisions of Section (c) of this Article, shall ascertain and tabulate the total number of poles in use by each party as licensee, which tabulation shall indicate the number of poles in use by each party as licensee for which an adjustment payment by one of the parties to the other is to be determined as hereinafter provided.
- (c) For the purpose of such tabulation, any pole used by the licensee for the sole purpose of attaching wires or cables thereto, either directly or by means of a pole top extension fixture, in order to provide clearance between the facilities of the two parties as distinguished from providing support for such wires or cables, shall not be considered as a joint pole.
- (d) If there is provision under a separate agreement between the Telephone Company and the Electrical Distributor for facilities associated with power line carrier systems, the adjustment payment provisions of the agreement of which this Article forms a part shall apply for poles on which both types of facilities are present and no other adjustment payments shall apply. The adjustment payment provisions of this Agreement shall not apply, however, where only those facilities directly associated with the power line carrier systems are involved.
- (e) Adjustment payments per pole due from one party as licensee to the other party or owner shall, subject to the provisions of Article XII, be [REDACTED] per annum by the Electrical Distributor for each jointly used pole owned by the Telephone Company and [REDACTED] per annum by the Telephone Company for each jointly used pole owned by the Electrical Distributor. The smaller total sum shall be deducted from the larger and the Electrical Distributor or the Telephone Company, as the case may be, shall pay to the other the difference between such amounts. The adjustment payment herein provided shall be paid within thirty (30) days after the bill has been submitted; otherwise it will be subject to a 1½% per month finance charge.

Adjustment payments for the following years are:

| | <u>By Electrical Distributor to Telephone Company</u> | <u>By Telephone Company to Electrical Distributor</u> |
|------|---|---|
| 1995 | \$ [REDACTED] | \$ [REDACTED] |
| 1996 | | |
| 1997 | | |

- (f) At intervals not exceeding five (5) years, an actual inventory of attachments shall be made by representatives of the parties. If there is any difference in the number of attachments found by the inventory and the number arrived at by tabulating those reported, correction will be made by retroactive billing for any attachments identified as being responsible for the difference, and any remaining difference will be spread evenly over the years since the last inventory, and billing adjusted accordingly except as otherwise provided under Article XII, Section (c).

ARTICLE XII

This section intentionally left blank.

ARTICLE XIII
DEFAULTS

- (a) If either party shall default in any of its obligations under this Agreement and such default continues thirty (30) days after due notice thereof in writing by the other party, the party not in default may suspend the rights of the party in default insofar as concerns the granting of future joint use and if such default shall continue for a period of 90 days after such suspension, the party not in default may forthwith terminate this Agreement as far as concerns the future granting of joint use.
- (b) If, after reasonable notice, either party shall be in default in the performance of any work it is obligated to do under this Agreement at its sole expense, the other party may elect to do such work, and the party in default shall reimburse the other party for the cost thereof. Failure on the part of the defaulting party to make such payment within 30 days upon presentation of bills therefor shall at the election of the other party, constitute a default under Section (a) of this Article.

ARTICLE XIV
EXISTING RIGHTS OF OTHER PARTIES

- (a) If either of the parties hereto has, prior to the execution of this Agreement, conferred upon others, not parties to this Agreement, by contract or otherwise, rights or privileges to use any poles covered by this Agreement, nothing herein contained shall be construed as affecting such rights or privileges, and either party hereto shall have the right, by contract or otherwise, to continue and extend such existing rights or privileges, it being expressly understood, however, that for the purpose of this Agreement, the attachments of any such outside party, except those of a municipality or other public authority, shall be treated as attachments belonging to the grantor, and the rights, obligations, and liabilities hereunder of the grantor in respect to such attachments shall be the same as if it were the actual owner thereof.
- (b) Where municipal regulations require either party to allow use of its poles for fire alarm, police, or other like signal systems, such use shall be permitted under the terms of this Article, provided attachments of such parties are placed and maintained in accordance with the specification mentioned in Article III.

ARTICLE XV
ASSIGNMENT OF RIGHTS

Except as otherwise provided in this Agreement, neither party hereto shall assign or otherwise dispose of this Agreement or any of its rights or interest hereunder, or in any of the jointly used poles, or the attachments or rights-of-

way covered by this Agreement, to any firm, corporation or individual, without the written consent of the other party, except to the United State of America or any agency thereof; provided, however, that nothing herein contained shall prevent or limit the right of either party to mortgage any or all of its property, rights, privileges, and franchises, or lease or transfer any of them to another corporation organized for the purpose of conducting a business of the same general character as that of such party, or to enter into any merger or consolidation; and, in case of the foreclosure of such mortgage; or in case of lease, transfer, merger, or consolidation, its rights and obligations hereunder shall pass to, and be acquired and assumed by, the purchaser on foreclosure, the transferee, lessee, assignee, merging or consolidating company, as the case may be; and provided further that subject to all of the terms and conditions of this Agreement, either party may permit any corporation conducting a business of the same general character as that of such party, and owned, operated, leased and controlled by it, or associated or affiliated with it, the use of all or any part of the space reserved hereunder on any pole covered by this Agreement for the attachments used by such party in the conduct of its said business; and for the purpose of this Agreement, all such attachments maintained on any such pole by the permission as aforesaid of either party hereto shall be considered as the attachments of the party granting such permission, and the rights, obligations and liabilities of such party under this Agreement, with respect to such attachments, shall be the same as if it were the actual owner thereof.

**ARTICLE XVI
WAIVER OF TERMS OR CONDITIONS**

The failure of either party to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

**ARTICLE XVII
PAYMENT OF TAXES**

Each party shall pay all taxes and assessments lawfully levied on its own property upon said jointly used poles, and the taxes and the assessments which are levied on said joint poles shall be paid by the owner thereof, but any tax, fee, or charge levied on owner's poles solely because of their use by the licensee shall be paid by the licensee.

**ARTICLE XVIII
BILLS AND PAYMENT FOR WORK**

Upon the completion of work performed hereunder by either party, the expense of which is to be borne wholly or in part by the other party, the party performing the work shall present to the other party within 90 days after the completion of such work an itemized statement of the costs and such other party shall within 30 days after such statement is presented pay to the party doing the work such other party's proportion of the cost of said work.

**ARTICLE XIX
SERVICE OF NOTICES**

Whenever in this Agreement notice is provided to be given by either party hereto to the other, such notice shall be in writing and given by letter mailed, or by personal delivery, to the Electrical Distributor at Post Office Box 1118, Bowling Green, Kentucky, 42102 or to the Telephone Company at _____ or to such other address as either party may from time to time designate in writing for this purpose.

**ARTICLE XX
TERM OF AGREEMENT**

This Agreement shall continue in full force and effect until the 31st day of December, 1997, and shall continue thereafter until terminated, insofar as the making of attachments to additional poles is concerned, by either party giving to the other one (1) year's notice in writing of intention to terminate the right of making attachments to additional poles. Any such termination of the right to make attachments to additional poles shall not, however, abrogate or terminate the right of either party to maintain the attachments theretofore made on the poles of the other or additional attachments to such poles, and all such attachments shall continue thereafter to be maintained, pursuant to and in accordance with the terms of this Agreement, which Agreement shall, so long as said attachments are continued, remain in full force and effect solely and only for the purpose of governing and controlling the rights and obligations of the parties with respect to said attachments.

**ARTICLE XXI
EXISTING CONTRACTS**

All existing agreements between the parties hereto for the joint use of poles in rural areas are by mutual consent hereby abrogated and superseded by this Agreement.

Nothing in the foregoing shall preclude the parties to this Agreement from preparing such supplemental operating routines or working practices as they mutually agree to be necessary or desirable to effectively administer the provisions of this Agreement.

**ARTICLE XXII
APPROVAL OF THE ADMINISTRATOR**

This Agreement, and any amendment thereof, shall be effective subject to the condition that, during any period in which the Electrical Distributor is a borrower from the Rural Electrification Administration, the Agreement and any amendment thereof shall have the approval in writing of the Administrator of the Rural Electrification Administration.

**ARTICLE XXIII
INDEMNIFICATION**

Each Party shall indemnify the other and hold it harmless against any loss, cost, claim, injury or liability to a third party arising out of negligence or wilful misconduct by the indemnifying Party or its agents or contractors in connection with the indemnifying Party's performance under this agreement. The indemnifying Party under this section agrees to defend any suit brought against the other Party for any such loss, cost, claim, injury or liability. The indemnified Party agrees to notify the other Party promptly, in writing, of any written claims, lawsuits or demands for which the other Party is responsible to facilitate defense or settlement of claims. The indemnifying Party shall not be liable under this section for settlement by the indemnified Party of any claim, lawsuit, or demand if the indemnifying Party has not approved the settlement in advance unless the indemnifying Party has had the defense of the claim, lawsuit or demand tendered to it in writing, and has failed to assume such defense.

Further, both parties agree to maintain public liability and property damage insurance (including automobile, public liability and property damage insurance to cover obligations set forth above. The minimum insurance limits of liability shall be \$1,000,000 bodily injury and \$1,000,000 property damage. Both parties further agree to maintain workers' compensation coverage for its employees and require coverage by subcontractors pursuant to the provisions of KRS 342.0011 et seq.

In witness whereof the parties hereto, have caused these presents to be executed in triplicate, and their corporate seals to be affixed thereto by their respective officers thereunto duly authorized, on the 22nd day of Nov., 1994.

MEMORANDUM

Tennessee Valley
Public Power Association, Inc.

PO Box 6189, Chattanooga, TN 37401-6189 • 423.756.6511 • Fax: 423.267.2280

Date: November 23, 2004

To: TVPPA Member Managers

From: Jack W. Simmons, President & CEO

Subject: 2004 Rates for Joint-Use-of-Poles Contract with BellSouth

We have just received from BellSouth the new 2004 joint-use rates for TVPPA distributor members who entered into the 1990 joint-use-of-poles contract with the Bell Telephone Companies. These rates reflect an increase of [redacted] percent and are effective retroactively to Jan. 1, 2004.

The joint-use rates that are to be effective as of Jan. 1, 2004, are: Rate [redacted]

- 1) Urban or 40' or over poles
(an increase from \$ [redacted] (2005) ← ALLTEL RATE)
 - 2) Rural or 35' or under poles
 - (a) TVPPA members pay \$ [redacted]
(an increase from \$ [redacted])
 - (b) Telephone Co. pays \$ [redacted]
(an increase from \$ [redacted])
- 2005 Rate* [redacted]
2004 Rate [redacted]
BELL SOUTH & OTHER AGENCIES RATES

If your system entered into the 1990 contract, BellSouth representatives in your state may have already sent, or will be sending you soon, an invoice for the 2004 fees due for joint-use-of-poles. The Bell invoices will reflect the new increased rental rate. Your system should immediately prepare a joint-use invoice using these new rates according to the contract and send it to the Bell Company with which you have executed your joint-use contract.

Also attached are the new Appendices A, B, and C covered under the joint-use contract with the Bell companies. These new appendices become effective on Jan. 1, 2005.

This same information was emailed to you on Nov. 23, 2004 if you need an electronic version of the appendices. If you have any questions or need further assistance on this subject, please contact Buddy Stansberry @ 423-756-6511 or cstansberry@tvppa.com.

Dear Brenda:

Attached is a copy of the 2004 TVPPA joint-use rates which Warren Rural Electric uses to charges all Agencies. Alltel's charges are based on the previous year's TVPPA rates.

If you have any questions, feel free to call me at (270) 842-6541, ext. 2208.

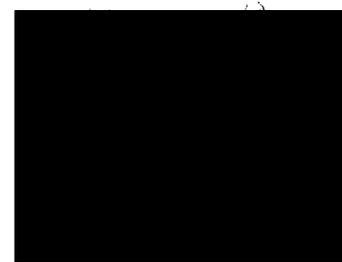

Sincerely,

Don Shanklin

JOINT POLE USE AGREEMENT

This Agreement, made this 1st day of Sept., 97, by and between **KENTUCKY UTILITIES COMPANY**, a Kentucky corporation, hereinafter called "Electric Company," party of the first part, and **GTE SOUTH INCORPORATED**, a Virginia corporation, hereinafter called "Telephone Company," party of the second part, both of said parties being duly qualified to do business in the Commonwealth of Kentucky:

W I T N E S S E T H:

WHEREAS, Electric Company is engaged in the business of constructing, maintaining and operating pole lines, in the Commonwealth of Kentucky; and

WHEREAS, Telephone Company is engaged in the business of constructing, maintaining and operating pole lines, in the same territory as Electric Company; and

WHEREAS, in many instances the same streets, roads, alleys, highways, public and private places are used by the Parties hereto for the erection and maintenance of poles and for the placing thereon of the attachments used in respective businesses, and it is often desirable that certain of such poles be used jointly by said Parties; and

WHEREAS, neither Party can legally attach to the poles of the other without consent first being obtained;

NOW, THEREFORE, in consideration of the premises and the agreements herein contained, the Parties hereto, for themselves, their successors and assigns, do hereby covenant and agree as follows:

ARTICLE I: DEFINITIONS

For the purpose of this Agreement, the following terms when used herein, shall have the following meanings:

"Attachments" means wires, cables, service drops, light fixtures, crossarms, transformers, terminal or fuse boxes, lightning arresters, switches, guy wires, and all other apparatus, fixtures or appurtenances now attached or hereafter attached to said poles by either Party.

"Joint Use" means placing or reserving space for attachments of each Party upon the same pole or poles.

"Licensee" means the Party which uses or applies to use poles of the Owner.

"Objective Percentage Ownership" means the proportional number of Joint Use poles to be owned by each Party, 60% for Electric Company and 40% for Telephone Company.

"Owner" means the Party having sole ownership of the pole.

"Party" means Electric Company or Telephone Company.

"Rearrange" means the reconstruction or relocation of attachments on the same pole.

"Standard Pole" means a Joint Use wood pole with butt ground, #6 copper minimum, which shall be no less than 45 feet tall, and shall comply with the American Standards Association Specifications, Class Four. The parties may mutually agree to use a smaller pole; but under no condition shall the standard joint use pole be less than the minimum requirements of the National Electrical Safety Code.

"Standard Space" means the following described space on a Standard Pole for the exclusive use of the Parties. For Electric Company, the uppermost eleven feet two inches (11'- 2") of usable space measured from the top of the pole. For Telephone Company, three feet zero inches (3'-0") of usable space the lower side of which is twenty one feet (21') above the ground.

"Transfer" means the moving of Attachments from one pole to another.

ARTICLE II: SCOPE OF AGREEMENT

A. This Agreement shall be in effect in those portions of the Commonwealth of Kentucky in which Electric Company and Telephone Company operate or may operate and where Joint Use of poles under the terms hereof may become mutually agreeable to the Parties, and shall cover all existing poles or any later erected poles or structures which are made a part of this Agreement in accordance with the procedure hereinafter specified.

B. Each Party reserves the right to exclude from Joint Use any poles which it owns and which, in Owner's sole judgment, are necessary or desirable for Owner's exclusive use.

C. Transmission (34.5 KV or greater) structures are not generally subject to Joint Use. However, in special cases they may be considered when a written application is made to Electric Company's Transmission Engineer.

ARTICLE III: SPECIFICATIONS

A. Minimum requirements for Joint Use pole construction shall conform to the then-current edition of the National Electrical Safety Code (NESC) in effect at the time the respective Attachments were placed, and as may be modified by appropriate governmental authority. Other written specifications as may be agreed upon from time to time by both Parties will become a part of this Agreement so long as such specifications do not conflict with the terms and provisions of said Safety Code and subsequent revisions thereof.

B. No permanent steps shall be installed on any future Joint Use pole or structure.

C. Nothing herein shall prevent the modification of these specifications from time to time by mutual agreement of the Parties hereto when the progress of the art makes such modification necessary or desirable. For special applications, such as service drops, etc. by mutual written consent of both Parties, using Exhibit A, a pole other than a Standard Pole, sufficient to meet combined needs of both Parties may be utilized. If at a future date, either Party requires a Standard Pole at this specific location, Owner will replace this Pole with a Standard Pole. Owner will be responsible for the cost of the replacement Standard Pole only, including ground. Each Party will be responsible for transferring its own facilities to this Standard Pole.

ARTICLE IV: PLACING, TRANSFERRING OR REARRANGING ATTACHMENTS ON EXISTING POLES

A. Whenever either Party desires to reserve space on any pole of the other, it shall make written application therefor using the Joint Use Pole Change Request form (Exhibit A), specifying the location of the pole in question, the amount of space which it desires to reserve, the number and kind of attachments which it desires to place thereon, and the character of the circuits to be used. Within twenty (20) working days after receiving such application, Owner shall notify the applicant in writing utilizing same said form, whether said pole is excluded from Joint Use under the provisions of Article II. Upon receipt of notice from Owner that said pole is not excluded and after any Transferring or Rearranging which is required in respect to Attachments on said pole, including any necessary pole replacements as provided in Article V, Section A, the applicant shall have the right as Licensee hereunder to use said space for Attachments and circuits of the character specified in the application in accordance with the terms of this Agreement.

B. Except as herein otherwise expressly provided, each Party shall, at its own expense, place, maintain, Rearrange, Transfer and remove its own poles and Attachments, and do any tree trimming or right-of-way clearing incidental thereto. Each Party shall place such guys and anchors as may be necessary to sustain any unbalanced strain caused by its Attachments. Each Party shall perform all work promptly and in such a manner as not to interfere with the service of the other Party.

ARTICLE V: ERECTING, REPLACING OR RELOCATING POLES

Any new or replacement pole intended for Joint Use shall be, at minimum, a Standard Pole.

A. Planned Replacement of Poles

1. Whenever any Joint Use pole is of insufficient size or strength for the existing Attachments and for any proposed Attachments thereto, Owner shall promptly replace such pole with a new pole of the necessary size and strength, and make such other changes in the existing pole line in which such pole is included, as conditions may then require. When Owner has completed its work, it shall so notify Licensee utilizing the Joint Use Pole Change Request form (Exhibit A).

2. When a Joint Use pole is replaced, each Party shall place, maintain, Rearrange, Transfer and remove its own Attachments, and shall at all times perform such work promptly and in such manner as not to interfere with work or service being performed by the other Party. Upon completion of work by Owner which necessitates Transfer of Licensee's Attachments, Owner shall provide written notice to Licensee utilizing Exhibit A, and such Transfer must be completed within sixty (60) days of the date of such notice or the date of removal or Transfer from the pole of all Attachments of either Owner or third party users of the pole, whichever date is later, provided that Licensee's failure to Transfer its Attachments is not due to acts or omissions of Owner or such third party users. If such Transfer is not completed within such sixty (60) days, the old pole will become the property of Licensee. Licensee shall save harmless the former Owner of said pole from all obligations, liabilities, damages, costs, expenses, or charges incurred thereafter because of or arising out of the presence, location, or condition of such pole or any Attachment thereon, whether or not it is alleged that the former Owner was negligent in respect of the presence, location, or condition of such pole.

B. Emergency Replacement of Poles

1. When due to accidents, storm damage, etc., it is necessary for Owner to replace a pole immediately to restore service to customers or eliminate a hazardous condition, Owner will replace the pole with ground as soon as possible. Owner shall make all of its required facility changes or Transfers and will secure the old pole to the new pole. Owner shall notify Licensee by telephone within forty-eight (48) hours of the emergency work of the need to Transfer, and will follow with written notice within five (5) working days so that Licensee may make its changes or Transfers as soon as practicable. Owner shall provide the written notice to Licensee utilizing Exhibit A. Such Transfer must be completed within sixty (60) days of receipt of said Exhibit A of the date of such notice or the date of removal or Transfer from the pole of all Attachments of either Owner or third party users of the pole, whichever date is later, provided that Licensee's failure to Transfer its Attachments is not due to acts or omissions of Owner or such third party users. If such Transfer is not completed within such sixty (60) days, the old pole will become the property of Licensee. Licensee shall save harmless the former Owner of said pole from all obligations, liabilities, damages, costs, expenses, or charges incurred thereafter because of or arising out of

the presence, location, or condition of such pole or any Attachment thereon, whether or not it is alleged that the former Owner was negligent in respect of the presence, location, or condition of such pole.

2. When due to accidents, storm damage, etc., it is necessary for Licensee to replace Owner's pole immediately to restore service to customers or to eliminate a hazardous condition and Owner cannot perform the work in time to meet Licensee's requirements, Licensee may replace Owner's pole. Licensee will make all of its required facility changes or Transfers and will secure the old pole to the new pole so Owner may make its changes or Transfers when feasible. Licensee will bill Owner the total cost of installing the new pole only, including material, labor and overheads, plus ten (10) percent, but excluding the costs of Transfers. Owner will continue to own the old pole and be responsible for its disposal, and will immediately take ownership of the new pole. Owner will as soon as possible take Licensee's name off the new pole and will place its name on the new pole.

C. Coordination of Pole Replacement

Whenever it is necessary to replace or change out a Joint Use pole, Owner shall, before making such change, give notice thereof in writing using Exhibit A (except in cases of emergency when oral notice may be given and subsequently confirmed in writing) to Licensee, specifying in such notice the time, pole height (if changed), and specifics of such proposed relocation; and Licensee shall, when mutually agreed upon, at the time so specified, Transfer its Attachments to the new pole. When replacing a Joint Use pole with critically located Attachments, such as aerial cable, underground conduit and connections, buck arm corners, splice boxes, transformers, or other equipment, the new pole shall be of the same height, unless agreed to otherwise by both Parties, and shall be set in the same location which the replaced pole occupied unless special conditions make it necessary or mutually desirable to set it in a different location. Owner shall set replacement pole in such a manner as to allow Licensee to Transfer its facilities with minimal Transfer costs.

D. Notification of Proposed Design and New Construction

1. Whenever a Party hereto intends to erect new poles within the territory covered by this Agreement, either as an additional pole line, as an extension of an existing pole line, or as the reconstruction of an existing pole line, it shall notify the other Party in writing using Exhibit A, at least ten (10) working days before beginning the work if two (2) poles or less are to be placed, and at least twenty (20) working days written notice if three (3) poles or more are to be placed. Shorter notice, including oral notice subsequently confirmed in writing using Exhibit A, may be given in cases of emergency and such notice shall include information as to the proposed location and the character of the new poles and the character of circuits to be used thereon.

2. The other Party shall, within ten (10) working days after the receipt of such notice, reply in writing using Exhibit A to the Party proposing to erect the new poles, stating whether such other Party desires to place said poles or to reserve space on the said poles, and if so, the character of the circuits it desires to use and the amount of space it wishes to reserve.

3. If such other Party makes the decision to not place said new poles and requests space on the new poles, and if the character and number of circuits and Attachments are such that Owner does not wish to exclude the poles from Joint Use under the provisions of Article II, the following shall apply. When the other Party completes arrangements for Joint Use with Owner in accordance with the time frames set out in Sections D.1. and/or D.2. above, the poles suitable for the said Joint Use shall be erected in accordance with the provisions of Sections E. and F. below.

4. Each Party shall provide its own guys and anchors, or Licensee may request in writing, using Exhibit A, permission to attach its guy(s) to Owner's anchor(s) at a specific pole. Such permission, if given, shall be for only that specific pole.

E. Determination of Owner of New Poles

1. In any case where the Parties hereto shall conclude arrangements for Joint Use hereunder of any new poles to be erected, the Party to install such poles shall be determined by mutual agreement.

2. In the event the Parties are unable to agree which Party shall install the poles, if either Party is deficient by five (5) percentage points or more in its Objective Percentage Ownership of Joint Use poles under this Agreement, it shall install the new poles and be the owner thereof, except that in unusual circumstances, if the deficient Party cannot meet the other Party's customer service requirements in a timely manner, then the non-deficient Party may install the poles for the deficient Party and bill that Party the total installed cost including overheads, of the poles only, and the poles installed will become the property of the deficient Party.

3. In the event the Parties are unable to agree which Party shall install the poles, and neither Party is deficient by five (5) percentage points or more in its Objective Percentage Ownership, the Parties shall abandon the arrangements for Joint Use in respect to the poles in question without prejudice to either Party.

F. Sale of Poles Between Parties

1. If at the conclusion of any jointly conducted inspection it is determined that either of the Parties is deficient, the deficient Party shall purchase poles to correct its deficiency. If the deficiency is five (5) percentage points or more, the Party with such deficiency shall, with the concurrence of Owner, purchase

approximately one-half (1/2) of the remaining deficiency each year until the deficiency is less than five (5) percent. All activities pertaining to such purchase of poles shall be completed within the calendar year immediately following the year in which the deficiency occurs. Following determination of an obligation to purchase and concurrence in principle by Owner to sell, the Parties shall identify and agree within six (6) months or less on the specific poles to be purchased. Once all activities pertaining to each deficiency purchase have been completed and the Transfer of ownership can take place, an invoice shall then be rendered by Owner, and payment shall be made by the deficient Party within thirty (30) days of receipt of the invoice.

2. The location, route, pole height, pole age, and number of poles to be purchased and sold shall be determined by mutual agreement. When the purchase of poles is required due to a deficiency as noted in Paragraph 1 of this Section or is proposed for any other reason, the Party selling the poles shall determine the sale price per pole using its system average in-service cost of each size of pole, depreciated at Owner's rate for actual years of service plus a mutually agreed administrative fee per pole if aggregated on the invoice, or a mutually agreed per pole fee if each pole is uniquely identified.

3. Each Party shall obtain, at its expense, the approval of any governmental agency having jurisdiction over such Party's part of the transaction, and, upon receipt of payment of its associated invoice, the selling Party shall give to the purchasing Party a bill of sale and to the extent possible shall assign any easement rights available for such poles and obtain, at selling Party's expense, release from any liens or encumbrances. Continuity of route ownership shall be considered in all such transactions.

4. New Owner shall tag said poles with appropriate ownership tagging devices pursuant to 807 KAR 5:006 Section 20. This tagging process shall commence immediately upon receipt of a bill of sales and shall be completed within six (6) months. If Licensee cannot comply with the six (6) months, Owner (Seller) shall furnish and tag all poles at a mutually agreed rate per pole payable within sixty (60) days of being invoiced.

G. Assignment of Costs

The costs of erecting new Joint Use poles or the replacement of Joint Use poles under this Agreement shall be borne by the Parties hereto as follows:

1. For new pole lines or extensions of existing lines, Owner shall pay the cost of a Standard Pole with ground on which each Party shall be guaranteed Standard Space. All additional pole costs incurred in order to provide either Party with space which exceeds its said space allocation shall be borne by the Party requiring such excess space.

2. For the replacement of an existing pole by Owner for its own benefit, Owner shall pay the entire installed cost of the pole and the costs incurred in Transferring its own facilities.

3. For the replacement of an existing pole by Owner for the benefit of and/or at the request of Licensee, Licensee shall pay the entire installed cost of the pole and the costs incurred in Transferring the facilities of both Parties. Such payment shall not affect ownership of the pole.

H. Qualifications of Labor Resources

When the Licensee or their qualified contractor erects poles in a Joint Use Route, the Licensee or their qualified contractor shall provide and install any and all required pole cover up (temporary insulating/isolating) materials, regardless of ownership of the Joint Use Route. Qualified contractors shall mean contractors knowledgeable and capable of working near, around, or adjacent to energized facilities. Licensee or their qualified contractor may upon occasion request the Owner to provide labor or material for the covering up process. The Licensee will be billed actual costs incurred including overheads.

I. New Service Extensions

1. For new service line extensions that have been determined to be Joint Use and where the Owner cannot meet the service date requirements of the Licensee, the Licensee may set all poles and upon completion sell said poles to the Owner consistent with all foregoing procedures.

2. For new service line extensions that have been determined to be Joint Use and where the total length is in excess of Owner's no charge line extension, the Licensee may set all poles and upon completion sell said poles to the Owner consistent with all foregoing procedures.

ARTICLE VI: ACQUIRING RIGHTS-OF-WAY

Owner shall not be required to secure any right, license or permit from any governmental body, authority or other entity or entities which may be required for the construction or maintenance of attachments of Licensee, and Owner does not guarantee any easements, rights-of-way or franchises for the construction and maintenance of said attachments, and if objection is made thereto and Licensee is unable to satisfactorily adjust the matter within a reasonable time, Owner may at any time upon notice in writing to Licensee, using the Joint Use Pole Change Request for (EXHIBIT A), require Licensee to remove its attachments from the poles involved, and Licensee shall, within ninety (90) days after receipt of said notice, remove its attachments from such poles at its sole expense. Should Licensee fail to remove its attachments as herein provided, Owner may remove them at

Licensee's expense without any liability whatever for such removal or the manner of making it, for which expense Licensee shall reimburse Owner on demand.

ARTICLE VII: MAINTENANCE OF RIGHTS-OF-WAY

A. Initial Trimming and Right-of-Way Clearing

Each Party shall, at its own cost and expense, do such trimming and/or clearing and disposing of residue as it deems necessary to provide clearance.

B. Maintenance Trimming and Right-of-Way Clearing

Each Party shall, at its own cost and expense, do such trimming and/or clearing as it deems necessary to protect its facilities.

C. Occasional Maintenance Tree Removals

The Parties shall cooperate in the removal of a tree which is considered by either Party to be endangering Joint Use facilities. Either Party may remove such tree and the cost shall be shared by the parties in accordance with their respective objective percentage ownership.

D. Widening Right-of-Way on Existing Joint Use Lines

When the cleared width of right-of-way for an existing Joint Use line is increased beyond its established width to satisfy the requirements of one Party to the Agreement, that Party will be responsible for performing the work and will bear all of the cost.

ARTICLE VIII: MAINTENANCE OF POLES AND ATTACHMENTS

A. Owner shall, at its own expense and in accordance with its own practices and procedures, maintain its Joint Use poles in a safe and serviceable condition, which may include periodic pole testing and treatment at ground line and inspection above ground line. This maintenance shall be in accordance with the specifications set forth in Article III and Owner shall replace, subject to the provisions of Article V, any poles which become defective. Except as otherwise provided in Section B. below, each Party shall, at its own expense and at all times, maintain all of its Attachments in accordance with the specifications in Article III and keep them in safe condition and in thorough repair; provided, however, that neither Party shall be required to Rearrange or replace poles or any facilities installed prior to the date of this Agreement solely by virtue of the adoption of this Agreement. Instead, any required Rearrangement or replacement shall occur during the ordinary course of business within a reasonable period of time.

B. Existing Joint Use facilities of the Parties which do not comply with Article III specifications, upon mutual agreement shall be brought into conformity with such specifications as rapidly as feasible.

C. When such existing Joint Use construction shall have been brought into conformity with said specifications, it shall at all times thereafter be maintained as provided in Section A. above.

D. The cost of bringing such existing Joint Use construction into conformity with said specifications shall be borne by the Parties hereto in the manner provided in Section B. of Article IV and Section G. of Article V.

ARTICLE IX: ABANDONMENT OF JOINT USE POLES

A. If Owner should desire at any time to abandon a Joint Use pole, it shall give Licensee notice in writing using the Joint Use Pole Change Request form (Exhibit A) to that effect at least sixty (60) days prior to the date on which it intends to abandon such pole. If, at the expiration of said period, Owner shall have no Attachments on such pole, but Licensee shall not have removed all of its Attachments therefrom, such pole shall thereupon become the property of Licensee, and Licensee shall save harmless the former Owner of such pole from all obligations, liability, damages, cost, expense or charges incurred thereafter, and not theretofore occurring, because of, or arising out of such pole or of any Attachments thereon, and shall pay the former Owner a sum of one dollar per pole, and the former Owner shall give to Licensee a bill of sale covering the pole or poles involved in such transactions.

B. Whenever a pole is abandoned as provided in Section A. above, new Owner shall tag said poles with appropriate Ownership tagging devices pursuant to 807 KAR 5:006 Section 20. This tagging process shall commence immediately upon receipt of a bill of sales and shall be completed within six (6) months. If Licensee cannot comply within the six (6) months, Owner (Seller) shall furnish and tag all poles at a mutually agreed rate per pole payable within sixty (60) days of being invoiced.

C. Licensee may at any time discontinue its use of a Joint Use pole by giving due notice thereof in writing, using Exhibit A, to Owner and by removing therefrom any and all Attachments it may have thereon.

ARTICLE X: ADJUSTMENT OF POLE OWNERSHIP

A. The Objective Percentage Ownership of the total number of poles jointly used by the two parties hereunder is 60% for the Electric Company and 40% for the Telephone Company.

B. In the seventh (7th) year of this Agreement, an inventory of the total area served jointly shall be performed jointly by the Parties and repeated every seven (7) years thereafter to count the Joint Use poles owned by each Party.

C. The Parties will cooperate to plan their respective construction projects so as to achieve and maintain as nearly as practicable the Objective Percentage Ownership of the Parties.

D. Each Party shall report to the other promptly upon completion of a project, using the Joint Use Pole Change Request form (Exhibit A), the change in Ownership of Joint Use poles by each Party caused by the project.

ARTICLE XI: COMPENSATION FOR DEFICIENCY IN OWNERSHIP

A. For the purpose of this Article, the actual occupancy of a pole, or the reservation of space only, for any purpose, during any portion of the calendar year shall be considered as joint use of such pole for the full year.

B. At the end of each calendar year, each party, as Licensee, shall submit to the other party, as Owner, three copies of a recapitulation of all its applications for joint use and notifications of abandonment of joint use which have been completed during the year. If such a recapitulation is found by Owner to be correct, two copies of it shall be signed by Owner and returned to Licensee. Both parties shall cooperate to correct any such recapitulations found to be incorrect.

C. At the end of each calendar year, the party having less than its objective percentage of Ownership of jointly used poles shall purchase from the party exceeding its objective percentage, the number of poles necessary to attain such objective percentage (that is 60% for the Electric Company and 40% for the Telephone Company). The price to be paid shall be calculated according to Article V, Section F.2. The location of poles to be purchased shall be arrived at by mutual agreement.

D. It is the intent of this agreement that both parties shall maintain a division of Ownership of joint use poles so that neither party shall be obligated to pay to other an equity settlement. However, if in any given year both parties mutually agree that due to extenuating circumstances it is not practical to proceed with the purchase of poles necessary to maintain both parties' objective Ownership, the deficient party shall pay an equity settlement to the other party at the end of that calendar year an amount equal to the number of poles it is deficient from its objective Ownership times \$30.00 which sum shall be ~~due and payable~~ on the first day of February following each year's determination of the number of jointly used poles owned by each party.

ARTICLE XII: BILLS IN PAYMENT FOR WORK

Upon completion of any work project performed hereunder by either Party, the expense of which is to be borne wholly or in part by the other, the Party performing the work shall present to the other Party within sixty (60) days after the completion of such work an itemized statement, showing to the extent available all labor, material, supervision, and appropriate overhead charges; and such other Party shall, within sixty (60) days after such statement is presented, pay to the Party doing the work such other Party's proportion of the cost of such work.

ARTICLE XIII: DEFAULTS

A. If either Party should default in the payment of compensation under Article XII, or in the performance of any of its obligations under this Agreement and such default continues thirty (30) days after notice thereof in writing from the other party, all further granting of Joint Use to the Party in default hereunder shall be suspended; and if such default shall continue for a period of thirty (30) days after such suspension, the other Party hereunder may forthwith terminate this Agreement as far as concerns future granting of Joint Use.

B. If either Party should default in the performance of any work which it is obligated to do under this Agreement at its sole expense, the other Party may elect to do such work, and the Party in default shall reimburse the other Party for the cost thereof. Failure on the part of the defaulting Party to make such payment within sixty (60) days upon presentation of bills therefor shall, at the election of the other Party, constitute a default under Section A. above.

C. The provisions of this Article shall not be construed to prevent either Party from exercising any other rights at law or in equity arising out of the other Party's default.

ARTICLE XIV: AUDIT RIGHTS

Each Party's books, records, correspondence, accounting procedures and practices and any other supporting evidence relating to material, labor and appropriate overhead charges involved in each Party's cost as a basis for bills submitted pursuant to this agreement shall be open to inspection and subject to audit, during normal working hours, by the other Party or its authorized representative. This provision shall survive the termination of this Agreement for a period of one year.

ARTICLE XV: ATTACHMENTS OF THIRD PARTIES

A. If either of the Parties has, prior to the execution of this Agreement, granted to others not Parties to this Agreement, by

contract or otherwise, rights or privileges to use any poles covered by this Agreement, nothing herein contained shall be construed as affecting said rights or privileges, and either Party hereto shall have the right, by contract or otherwise, to continue and extend such existing rights or privileges.

B. The Attachments of any non-Party to this Agreement shall be treated as Attachments belonging to the Owner and shall be accommodated in space allocated to the Owner. On poles occupied by such third parties, Owner's Standard Space allocation as defined in Article I shall be amended to reflect and include usage by such parties, with a corresponding reduction of space available for the use of Owner. Owner shall have the entire right to any payments from such third parties. Such Attachments shall not operate to reduce the space allocation of Licensee. The rights, obligations, and liabilities hereunder of Owner in respect to such Attachments shall be the same as if it were the actual Owner thereof.

C. Where municipal regulations require either Party to allow the use of its poles for fire alarm, police signal or other municipally owned systems, such use shall be permitted under the terms of this Article.

ARTICLE XVI: SERVICE OF NOTICES

Wherever in this Agreement notice is provided to be given by either Party to the other, such notice shall be in writing and given by letter mailed, or by person delivery, to Electric Company, at its office at One Quality Street, Lexington, Kentucky, 40507, or to Telephone Company, at its office at 4100 North Roxboro Road, Durham, North Carolina, 27702, as the case may be, or to such other address as either Party may, from time to time designate in writing for that purpose.

ARTICLE XVII: TERM AND TERMINATION OF AGREEMENT

Subject to the provisions of Article XIII herein, this Agreement shall continue in full force and effect through January 1, 2000, and shall continue thereafter until terminated insofar as the right to attach to additional Joint Use poles is concerned by either Party giving to the other Party a one (1) year notice in writing of intention to terminate the right of both Parties to attach to additional Joint Use poles. Any such termination rights shall not abrogate or terminate the right of either Party to attach to existing Joint Use poles or to maintain existing Attachments. All such Attachments shall continue thereafter to be maintained, pursuant to and in accordance with the terms of this Agreement, which shall so long as such Attachments are continued, remain in full force and effect solely and only for the purpose of governing and controlling the rights and obligations of the Parties with respect to such Attachments.

ARTICLE XVIII: MODIFICATIONS

Nothing herein contained shall be construed to prevent the modification of the terms of this Agreement by the written mutual consent of officers of the Parties.

ARTICLE XIX: ASSIGNMENT OF RIGHTS

A. Except as otherwise provided in this Agreement, neither Party shall assign or otherwise dispose of this Agreement or any of its rights or interest hereunder, or in any of the Joint Use poles, or the Attachments or rights-of-way covered by this Agreement, to any firm, corporation or individual, without the written consent of the other Party; provided, however, either Party may mortgage any or all of its property, rights, privileges and franchises, or lease or transfer any of them to another corporation organized for the purpose of conducting a business of the same general character as that of such Party, or to enter into any merger or consolidations; and, in case of the foreclosure of such mortgage, or in case of such lease, transfer, merger, or consolidation its rights and obligations hereunder shall pass to, and be acquired and assumed by the purchaser on foreclosure, the transferee, lessee, assignee, merging or consolidating company, as the case may be.

B. Subject to all of the terms and conditions of this Agreement, either Party may permit any corporation conducting a business of the same general character as that of such Party, and owned, operated, leased and controlled by it, or associated or affiliated with it in interest, or connecting with it, the use of all or any part of the space reserved hereunder on any pole covered by this Agreement for the Attachments used by such Party in the conduct of its said business; and all such Attachments maintained on any such pole by the permission as aforesaid of either Party hereto shall be considered as the Attachments of the Party granting such permission, and the rights, obligations and liabilities of such grantor Party under this Agreement, in respect to such Attachments, shall be the same as if it were the actual Owner thereof.

ARTICLE XX: WAIVER OF TERMS OR CONDITIONS

The failure of either Party to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

ARTICLE XXI: EXISTING AGREEMENTS

All existing agreements, written or oral, between the Parties hereto for the Joint Use of poles within the territory where both Parties hereto now, or in the future, have the right to operate are by mutual consent hereby terminated.

ARTICLE XXII: INDEMNIFICATION

Either Party hereto, to the comparative extent it is negligent, agrees to and shall indemnify and hold harmless the other from and against any and all claims, damages, losses and expenses, including but not limited to attorneys' fees, arising out of or resulting from the joint use of the poles, or any acts or omissions under this Agreement.

ARTICLE XXIII: KENTUCKY LAW

Any interpretations regarding this Agreement or any activities arising hereunder shall be governed by Kentucky law.

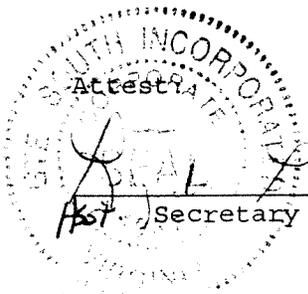

IN WITNESS WHEREOF, the Party of the first part has caused its name to be signed hereto by its Vice President and attested by its Secretary, thereunto duly authorized, and the Party of the second part has caused this instrument to be duly executed, by its General Manager-Infrastructure Provisioning and attested by its Assistant Secretary, thereunto duly authorized, as of the day and year first above written.

SUPPLEMENTAL AGREEMENT

This supplemental agreement is made to the Joint Pole Use Agreement between Kentucky
GTE SOUTH INCORPORATED September 1, 1997 *SLB*
Utilities Company and ~~Central KY Kentucky, Inc.~~ ~~dated January 1, 1990~~ *10/2/98*

This supplement is for the following:

Change to Article X Section B:

The total area served jointly shall be inspected in the initial year of this Agreement, and every seven (7) years thereafter to count the Joint Use poles owned by each party. The present agreement states that the pole count shall be done every five (5) years.

Change to Article X Section B:

As an alternative, one-seventh of the area may be inspected each year. The present agreement states that as an alternative one-fifth of the area may be inspected each year.

Telephone Company Joint Use Agreement

This agreement made the 2nd day of January, 2008, by and between Windstream Communications and the Hodgenville Housing Authority.

KENTUCKY EAST, LLC

Thereas, Windstream proposes to provide a service to the residents of the Hodgenville Housing Authority Projects Numbers KY083001 and KY083002, Hodgenville, KY 42748. In order to provide this service, it is necessary to attach to utility poles owned by said Hodgenville Housing Authority. In consideration for permission to attach to these poles, Windstream agrees to pay an annual rental of [REDACTED] per pole per year for the use of 37 poles, to be paid on or before the fifteenth (15th) of January of each year without notification.

Also, Windstream will not hold the Hodgenville Housing Authority responsible for any liability to personal injury or property damage that may occur from these attachments.

TERMS AND CONDITIONS

1. This permit is for a period of one (1) year from the date hereof, and thereafter until the expiration of thirty (30) days' written notice shall have been given by either party to the other of its desire to terminate the permission herein granted, and the Licensee agrees to pay to the Licensor the rental as shown on the face hereof, commencing on the date the permit becomes effective and thereafter, annually in advance, until the permission is terminated as herein provided.

2. In case of such termination by the Licensor, before the expiration of any year for which pole rental shall have been paid, then, and not otherwise, shall the Licensor refund to the Licensee the charge for pole rental for the unexpired portion of such year.

3. Attachments by the Licensee to the poles and fixtures of the Licensor, shall be made and maintained in accordance with the standard specifications of the Licensor for doing such work, at the sole expense of the Licensee, and in such manner as will not conflict with the use of said poles and fixtures by the Licensor, nor interfere with the working or use of its wires thereon, or which it may from time to time place thereon, and the Licensee shall at any time at its own expense, upon thirty days' written notice from the Licensor, change, alter, improve, repair or renew said attachments in such manner as the Licensor may direct.

4. The Licensee shall indemnify and save harmless the Licensor against any and all damages or loss that may result to the equipment or any property owned or used by the Licensor, from and against any and all legal and other expenses, claims, costs, losses, suits or judgments for damages or injuries arising to persons or property, or in any other manner by reason of the use, maintenance or presence of its attachments to the poles and fixtures of the Licensor, or by reason of the acts or negligence of the agents or employes of the said Licensee while engaged in the work of placing, maintaining, renewing or removing said attachments on said poles and fixtures.

Where, for or on account of injuries to or death of any of Licensor's employes caused by or in any way resulting from the use, maintenance or presence of Licensee's attachments to Licensor's poles, Licensor shall make any payments to such injured employes or their relatives or representatives in conformity with (1) the provisions of any workmen's compensation act or any act creating a liability in the employer to pay compensation for personal injury to an employe by accident arising out of and, in the course of the employment, whether based on negligence on the part of the employe or not, or (2) any plan for employes' disability benefits or death benefits now or hereafter established by Licensor, such payments shall be construed to be damages within the terms of the preceding paragraph, and shall be paid by Licensee to Licensor accordingly.

5. The Licensee shall not assign, transfer or sublet any of the privileges described in the within application without the consent in writing of the Licensor.

6. The Licensee shall not at any time make any attachments to the poles of the Licensor without a permit therefor, nor shall it make any changes in the location or in the use of its attachments without the consent in writing of the Licensor.

7. Nothing herein contained shall be construed to confer upon the Licensee any rights of property in the poles and fixtures of the Licensor, or as a guarantee of permission from municipal or other authority to place or maintain its attachments to said poles and fixtures.

8. Upon notice from the Licensor of the Licensee's failure to comply with any of the conditions hereof, or that its attachments are forbidden by municipal or other authority, the within permission shall immediately terminate, and the Licensee shall forthwith remove any or all of its attachments to the poles and fixtures of the Licensor, and upon its failure to do so the Licensor reserves the right to make such removal at the cost and risk of the Licensee.

GENERAL AGREEMENT FOR
JOINT USE OF WOOD POLES

THIS AGREEMENT, made this 4th day of June,
1974, by and between the CITY OF NICHOLASVILLE LIGHT DEPARTMENT,
hereinafter called the "Utility Company", and the GENERAL TELEPHONE
COMPANY OF KENTUCKY, a corporation organized under the laws of the
State of Delaware, hereinafter called the "Telephone Company".

PREAMBLE

WHEREAS, the Utility Company and the Telephone Company have
heretofore cooperated in the joint use of their respective poles
and said parties now desire to continue said cooperation as to
poles erected or to be erected within the areas in which both parties
render services in the State of Kentucky, whenever and wherever
such use shall, in the estimation of both parties, be compatible
with their respective needs, and

WHEREAS, it is now the desire of both the Utility Company
and the Telephone Company to enter into a contract between them-
selves and their respective successors and assigns as follows:

ARTICLE I

if

Scope of Agreement

(a) This agreement shall be in effect in the areas in which
both of the parties render service in the State of Kentucky and,
upon specific concurrence of both parties, duly evidenced in writing
signed by the parties, in areas adjacent to said communities, and
shall cover all wood poles of the parties now existing or hereafter
erected in the above defined territory when said poles are brought
under this agreement in accordance with the procedure hereinafter
provided.

(b) Each party reserves the right to exclude any of its
facilities from joint use.

ARTICLE II

Explanation of Terms

For the purpose of this agreement, the following terms shall have the following meanings:

1. A JOINT POLE is a pole jointly used by both parties.
2. A NORMAL JOINT POLE is a pole which is just tall enough to provide normal space, as normal space is hereinafter defined, for the respective parties and just strong enough to meet the requirements of the specifications mentioned in ARTICLE III for the attachments ordinarily placed by the parties in their respective normal spaces. Such pole for the purpose of this agreement shall be a 40 foot class 5 wood pole as classified by the pole classification tables of the American Standards Association.
3. SPACE is the linear portion of a joint pole parallel to its axis reserved for the exclusive use of one of the parties (subject only to the exceptions provided for by the specifications mentioned in Article III which in certain instances permit the making of certain attachments by one party in the space reserved for the other party).
4. NORMAL SPACE is the following described space:
 - a. For the Utility Company, the uppermost 5 feet, measured from top of pole.
 - b. For the Telephone Company a space of 2 feet, at a sufficient distance below the space of the Utility Company to provide at all times the minimum clearance required by the specifications mentioned in Article III and at a sufficient height above ground to provide the proper vertical clearance above ground or track rails for the lowest horizontally run line wires or cable attached in such space.

The foregoing definition of "a normal joint pole" is not intended to preclude the use of joint poles shorter or of less strength than the normal joint pole in locations where such poles will meet the requirements of the parties hereto.

The above assignment of space is not intended to preclude the use of vertical runs or the mounting of such equipment as terminals or meters on the lower portions of the pole when mutually agreeable.

ARTICLE III

Specifications

Except as otherwise provided in Section (e) of Article VII, referring to construction temporarily exempt from the application of the specifications mentioned herein, the joint use of the poles covered by this agreement shall at all times be in conformity with accepted modern methods such as those suggested in Edison Electric Institute Publication No. 12, a copy of which is attached hereto and marked Exhibit "A", and shall at all times conform to the requirements of the National Electrical Safety Code, Fifth Edition, and subsequent revisions thereof, except where the lawful requirements of public authorities may be more stringent, in which case the latter will govern.

Modifications of, additions to, or construction practices supplementing wholly or in part the requirements of the National Electrical Safety Code, shall, when accepted in writing by both parties hereto through their agents authorized to approve such changes, likewise govern the joint use of poles.

ARTICLE IV

Establishing Joint Use of Existing Poles

(a) Whenever either party desires to reserve space for its attachments on any pole owned by the other party, either as initial space or additional space on such pole, it shall make application therefor, specifying the location of the poles in question, the amount of space desired on each pole, and the number and character of the circuits to be placed thereon. Said application shall be in the form attached hereto as Exhibit "B", or a mutually agreeable revision thereof. If in the judgment of the owner, the poles are necessary for its own sole use, or if in the opinion of the owner additional attachments are not economically feasible, or joint use under the circumstances is undesirable, the owner shall have the right to reject the application. In any event, within 10 days after the receipt of such application the owner shall notify the applicant in writing whether the application is approved or rejected. Upon receipt of notice from the owner that the application has been approved, and after the completion of any transferring or rearranging which is required to permit the attaching of the applicant's circuits on such poles, including any necessary pole replacements, the applicant shall have the right as licensee hereunder to use such space in accordance with the terms of the application and of this agreement.

(b) Whenever any jointly used pole or any pole about to be so used under the provision of this agreement is insufficient in height or strength for the existing attachments and for the proposed additional attachments thereon, the owner shall promptly replace such pole with a new pole of the necessary height and strength and shall make such other changes in the existing pole line in which such pole is included as the conditions may then require.

(c) Each party shall place, transfer and rearrange its own attachments, place guys to sustain any unbalanced loads, caused by its attachments, and perform any tree trimming or cutting incidental thereto. Each party shall at all times execute such work promptly and in such manner as not to interfere with the service of the other party.

(d) The cost of establishing the joint use of existing poles, including the making of any necessary pole replacements, shall be borne by the parties hereto in the manner provided in Article VIII - Division of Costs.

ARTICLE V

Establishing Joint Use of New Poles

(a) Whenever either party hereto requires new pole facilities for an additional pole line, and extension of an existing pole line, or in connection with the reconstruction of an existing pole line, it shall promptly notify the other party to that effect in writing (verbal notice subsequently confirmed in writing may be given in cases of emergency), stating the proposed location and character of the new poles and the character of circuits it intends to use thereon and indicating whether or not such pole facilities will be, in the estimation of the party proposing to construct the new pole facilities, susceptible of joint use. Within 10 days after the receipt of such notice, the other party shall reply in writing, stating whether it does, or does not, desire space on the said poles and, if it does desire space thereon, submit application form Exhibit "B" showing the character of the circuits it desires to use and the amount of space it wishes to reserve. If such other party requests space on the proposed new poles and if the character and number of its circuits and attachments are such that the party proposing to construct the new pole facilities does not consider joint use undesirable, it shall erect poles suitable for such joint use, subject, however, to the provisions of Section (b) of this Article. The application for space on the poles shall be promptly notified in writing of the action taken on the application.

(b) In any case where the parties hereto shall conclude arrangements for the joint use of any new poles to be erected, and the party proposing to construct the new pole facilities already owns more than its proportionate share of joint poles, the parties shall take into consideration the desirability of having the new pole facilities owned by the party owning less than its proportionate share of joint poles so as to work towards such a division of ownership of the joint poles. For the purpose of this agreement the proportionate share of ownership for the Utility Company shall be 50 percent of the total joint poles and for the Telephone Company 50 percent of the total joint poles.

(c) Each party shall place its own attachments on the new joint poles and place guys to sustain any unbalanced loads caused by its attachments. Each party shall provide necessary tree trimming according to its own requirements. Each party shall execute its work promptly and in such manner as not to interfere with the service of the other party.

(d) The cost of establishing the joint use of new poles including costs incurred in the retirement of existing poles shall be borne by the parties hereto in the manner provided in Article VIII - Division of Costs.

ARTICLE VI

Right of Way for Licensee's Attachments

While the owner and licensee will cooperate as far as may be practicable in obtaining rights of way for both parties on joint poles, the owner does not warrant or assure to the licensee any right of way privileges or easements on, over or across streets, alleys and public thoroughfares, and private or publicly owned property, and if the licensee shall at any time be prevented from placing or maintaining its attachments on the owner's poles, no liability on account thereof shall attach to the owner of the poles.

When and where it becomes necessary for either party to purchase through condemnation or agreement an easement or right of way for a new service line to be used by both parties, then the parties shall share equally the cost of obtaining same.

ARTICLE VII

Maintenance of Poles and Attachments

(a) The owner shall maintain its joint poles in a safe and serviceable condition and in accordance with the specifications mentioned in Article III and shall replace, reinforce or repair such of these poles as become defective.

(b) When replacing a jointly used pole carrying terminals of aerial cable, underground connection, or transformer equipment, the new pole shall be set in the same location which the replaced pole occupied unless special conditions make it necessary or mutually desirable to set it in a different location.

(c) Whenever it is necessary to replace or relocate a jointly used pole, the owner shall, before making such replacement or relocation, give notice thereof in writing (except in case of emergency, when verbal notice will be given and subsequently confirmed in writing) to the licensee, specifying in such notice the time of such proposed replacement or relocation and the licensee shall at the time so specified transfer its attachments to the new or relocated joint pole.

(d) Except as otherwise provided in Section (e) of this Article, each party shall at all times maintain all of its attachments, and perform any necessary tree trimming or cutting incidental thereto, in accordance with the specifications mentioned in Article III and shall keep them in safe condition and in thorough repair. Nothing in the foregoing shall preclude the parties hereto from making any mutually agreeable arrangement for jointly contracting for or otherwise providing for maintenance trimming.

(e) Any existing joint use construction of the parties hereto which does not conform to the specifications mentioned in Article III shall be brought into conformity therewith as soon as practicable.

(f) The cost of maintaining poles and attachments and of bringing existing joint use construction into conformity with said specifications shall be borne by the parties hereto in the manner provided in Article VIII - Division of Costs.

ARTICLE VIII

Division of Costs

(a) The cost of erecting new joint poles coming under this

agreement, to construct new pole lines, to make extensions to existing pole lines, or to replace existing pole, shall be borne by the parties as follows:

1. A normal joint pole, or joint pole smaller than the normal, shall be erected at the sole expense of the owner.

2. A pole larger than the normal, the extra height or strength of which is due wholly to the owner's requirements, including requirements as to keeping the owner's wires clear of trees, shall be erected at the sole expense of the owner, who shall thereafter be entitled to use the resulting additional space.

3. In the case of a pole larger than the normal, the extra height or strength of which is due wholly to the licensee's requirements, including requirements as to keeping the licensee's wires clear of trees, the licensee shall pay to the owner a sum equal to the difference between the cost in place of such pole and the cost in place of a normal joint pole and shall thereafter be entitled to use the resulting additional space, the rest of the cost of erecting such poles to be borne by the owner, except insofar as otherwise provided in Section (c) of this Article.

4. A pole erected between existing poles to provide sufficient clearance and furnish adequate strength to support the circuits of both the owner and licensee, which it would have been unnecessary to erect if joint use had not been undertaken, shall be erected at the sole expense of the licensee.

(b) Any payments for poles made by the licensee under any foregoing provisions of this Article shall not entitle the licensee to the ownership of any part of said poles for which it has contributed in whole or in part.

(c) Where an existing jointly used pole or a non-joint pole is prematurely replaced by a new one solely for the benefit of the licensee, the cost of the new pole shall be divided as specified in Section (a) of this Article and the licensee shall also pay its owner the value in place of the replaced pole, plus the cost of removal less the salvage value of such pole. The replaced pole shall be removed and retained by its owner.

(d) Each party shall place, maintain, rearrange, transfer and remove its own attachments at its own expense except as otherwise expressly agreed upon.

(e) The expense of maintaining joint poles shall be borne by the owner thereof except that the cost of replacing poles shall be borne by the parties hereto in the manner provided in Sections (a) and (c) of this Article.

(f) Where service drops of one party crossing over or under lines of the other party are attached to the other party's poles, either directly or by means of a pole top extension fixture, the cost shall be borne as follows:

1. Pole top extension fixtures shall be provided and installed at the sole expense of the party using them.

2. Where an existing pole is replaced with a taller one to provide the necessary clearance the party owning the service drop shall pay to the party owning the pole a sum equal to the difference in cost in place between the new pole and a new pole of the same size as the replaced pole, together with a sum representing the value in place of the replaced pole, plus the cost of removal less the salvage value of such pole, the owner of the pole to remove and retain such pole.

(g) When, in order to improve an existing condition considered undesirable by both parties, existing poles of one of the parties are abandoned in favor of combining lines on poles of the other party, the then value in place of the abandoned poles plus the cost of the removal less the salvage value of such poles shall be shared by both parties to this agreement.

(h) Payments made by either party to the other under the provisions of this Article shall be based on the table of values listed in Appendix A. The values given in the tables of Appendix A are intended to reflect the current cost of construction of the parties hereto. These values shall be subject to joint review by the parties to this agreement periodically at intervals not greater than five years and shall be adjusted to reflect the current cost of construction at the time of such review. Generally accepted and well established utility construction costs indices as well as the actual construction costs experienced by the parties hereto shall be used as a basis for the determination of any adjustment applicable to the values stated in the tables in Appendix A.

ARTICLE IX

Procedure When Character of Circuits is Changed

When either party desires to change the character of its circuits

on jointly used poles, such party shall give 60 days notice to the other party of such contemplated change and in the event that the party agrees in writing to joint use with such changed circuits, then the joint use of such poles shall be continued with such changes in construction as may be required to meet the terms of the specifications mentioned in Article III for the character of circuits involved and such other changes as may be agreed upon. The parties shall cooperate to determine the equitable apportionment of the net expense of such changes. In the event, however, that the other party fails within 60 days from receipt of such notice to agree in writing to such change character of circuits, then both parties shall cooperate in accordance with the following plan:

1. The parties hereto shall determine the most practical and economical method of effectively providing for separate lines, either overhead or underground, and the party whose circuits are to be moved shall promptly carry out the necessary work.

2. The net cost of re-establishing such circuits in the new location as are necessary to furnish the same business facilities that existed in the joint use section at the time such change was decided upon, shall be borne by the licensee; provided, however, that the owner shall bear an equitable share of such cost wherever the change was occasioned by the necessity of the owner and the licensee would suffer a hardship in having to assume the entire burden of the cost of re-establishing the circuits.

Unless otherwise agreed by the parties, ownership of any new lines or underground facilities constructed under the foregoing provisions in a new location shall vest in the party for whose use it is constructed.

ARTICLE X

(a) If the owner desires at any time to abandon any jointly used pole, it shall give the licensee notice in writing to that effect at least 60 days prior to the date on which it intends to abandon such pole. If at the expiration of said period the licensee shall have no attachments on such pole but the licensee shall not have removed all of the attachments therefrom, such pole shall thereupon become the property of the licensee, and the licensee shall save harmless the former owner of such pole from all obligations, liability, damages, cost, expense or charges incurred thereon, and not arising out of anything theretofore occurring, but arising out of, the presence or condition of such pole or any attachments thereon; and shall pay the owner the then value of such pole

of a standard joint use pole to the licensee but in no case an amount less than the net salvage value of the pole to the owner as provided in Appendix A attached hereto. The former owner shall further evidence transfer of title to the pole by means of a bill of sale.

(b) The licensee may at any time abandon the use of a joint pole by giving due notice thereof in writing, in the form of Exhibit "B" attached hereto to the owner and by removing therefrom any and all attachments it may have thereon. The licensee shall in such case pay to the owner the full rental for said pole for the then current year.

ARTICLE XI

Rentals

(a) On or about the first day of January, 1975, and the first day of January thereafter each year, each party, as owner, shall render to the other party as licensee a billing covering the attachments occupied by the licensee during the preceding twelve months or space reserved by licensee subsequent to the previous inventory. The billing so rendered shall be based on an actual field inventory and an inventory of the attachments shall be made by parties hereto acting in cooperation at intervals of not more than five years throughout the term of this agreement. The number of attachments to be billed during the intervening annual periods between inventories shall be the number adjusted as evidenced by the ownership indicated by attachments permits existing, however, the billing so rendered for the intervening years shall be adjusted on a straight line basis at the time of the next inventory, to reflect the results of such inventory.

(b) The rentals per pole due from either party as licensee to the other party as owner shall be \$ per annum, subject to any subsequent revision as provided in Article XII. The rental herein provided for shall be paid within 10 days after the bill has been submitted.

ARTICLE XII

Periodical Adjustment of Rentals

At the expiration of five years from the effective date of this

agreement and at intervals of not less than five years thereafter, the rental rate applicable under this agreement shall be subject to joint review and adjustment. Either party may make a written request for a joint review of the rental rate addressed to the other party not later than 90 days before the end of such five-year period. If, within ninety days after receipt of such request by either party from the other, the parties hereto fail to agree upon a revision of the rental rate, then the revised rate per pole so to be paid shall be an amount equal to one-half of the then average annual total cost per pole of providing and maintaining the standard joint poles covered by this agreement. In case of a revision of the rental, as herein provided, the new rate shall be applicable until again revised.

ARTICLE XIII

Defaults

(a) If either party shall default in any of its obligations under this agreement and such default continue thirty (30) days after due notice thereto in writing by the other party, the party not in default may suspend the right of the party in default insofar as concerns the granting of future joint use and if such default shall continue for a period of 30 days after such suspension, the party not in default may forthwith terminate this agreement as far as concerns the future granting of joint use.

(b) If either party shall make default in the performance of any work it is obligated to do under this agreement at its sole expense, the other party may elect to do such work, and the party in default shall reimburse the other party for the cost thereof. Failure on the part of the defaulting party to make such payment within 30 days upon presentation of bills therefor shall, at the election of the other party, constitute a default under Section (a) of this Article.

ARTICLE XIV

Existing Right of Other Parties

(a) If either of the parties hereto has, prior to the execution of this agreement, conferred upon others, not parties to this agreement, by contract or otherwise, rights or privileges to use any poles covered by this agreement, nothing herein contained shall be construed as affecting such rights or privileges, and either party

hereto shall have the right, by contract or otherwise, to continue and extend such existing rights or privileges, it being expressly understood, however, that for the purpose of this agreement, the attachments of any such outside party, except those of a municipality or other public authority, shall be treated as attachments belonging to the grantor, and the rights, obligations, and liabilities hereunder of the grantor in respect to such attachments shall be the same as if it were the actual owner thereof.

(b) Where municipal regulations require either party to allow the use of its poles for fire alarm, police, or other like signal systems, such use shall be permitted under the terms of this Article, provided attachments of such parties are placed and maintained in accordance with the specifications mentioned in Article III.

ARTICLE XV

Liability and Damages

Whenever any liability is incurred by either or both of the parties hereto, for damages for injuries to the employees or for injury to the property of either party, or for injuries to other persons or their property, arising out of the joint use of poles under this agreement, or due to the proximity of the wires and fixtures of the parties hereto attached to the jointly used poles covered by this agreement, the liability for such damages, as between the parties hereto, shall be as follows:

1. Each party shall be liable for all damages for such injuries to persons or property caused solely by its negligence or solely by its failure to comply at any time with the specifications herein provided for; provided, that construction temporarily exempted from the application of said specifications under the provisions of Section (a) of Article VII shall not be deemed to be in violation of said specifications during the period of such exemption.

2. Each party shall be liable for all damages for such injuries to its own employees or its own property that are caused by the concurrent negligence of both parties hereto or that are due to causes which cannot be traced to the sole negligence of the other party.

3. Each party shall be liable for one-half (1/2) of all damages for such injuries to persons other than employees of either party, and for one-half (1/2) of all damages for such injuries to property not belonging to either party that are caused by the concurrent negligence of both parties hereto or that are due to causes which cannot be traced to the sole negligence of the other party.

4. Where, on account of injuries of the character described in the preceding paragraphs of this Article, either party hereto shall make any payments to injured employees or to their relatives or representatives in conformity with (1) the provision of any Workmen's Compensation Act or any act creating a liability in the employer to pay compensation for personal injury to an employee by accident arising out of and in the course of the employment, whether based on negligence on the part of the employer or not, or (2) any plan for employees' disability benefits or death benefits now established or hereafter adopted by the parties hereto or either of them, such payments shall be construed to be damages within the terms of the preceding paragraphs numbered 1 and 2 and shall be paid by the parties hereto accordingly.

5. All claims for damages arising hereunder that are asserted against or affect both parties hereto shall be dealt with by the parties hereto jointly; provided however, that in any case where the claimant desires to settle any such claim upon terms acceptable to one of the parties hereto but not to the other, the party to which said terms are acceptable may, at its election, pay to the other party one-half (1/2) of the expense which such settlement would involve, and thereupon said other party shall be bound to protect the party making such payment from all further liability and expense on account of such claim.

6. In the adjustment between the parties hereto of any claim for damages arising hereunder, the liability assumed hereunder, by the parties shall include, in addition to the amounts paid to the claimant, all expenses incurred by the parties in connection therewith, which shall comprise costs, attorneys' fees, disbursements and other proper charges and expenditures.

7. The provisions of Article XV are intended solely to determine the liability for damages hereinabove set out, as between the parties hereto; and nothing contained in an agreement shall be construed to create any liability for any injuries to any other persons or their property if such liability would not have been renewed by either of the parties hereto in the absence of the agreement.

ARTICLE XVI

Assignments of Rights

Except as otherwise provided in this Agreement, neither party shall hereto assign or otherwise dispose of this agreement or any of its rights or interests hereunder, or in any of the jointly used poles, or the attachments or rights of way covered by this agreement.

to any firm, corporation or individual, without the written consent of the other party; provided, however, that nothing herein contained shall prevent or limit the right of either party to mortgage any or all its property, rights, privileges, and franchises, or lease or transfer any of them to another corporation organized for the purpose of conducting a business of the same general character as that of such party, or to enter into any merger or consolidation; and, in case of the foreclosure, of such mortgage; or in case of such lease, transfer, merger, or consolidation, its rights and obligations hereunder shall pass to, and be acquired and assumed by, the purchaser or foreclosure, the transferee, lessee, assignee, merging or consolidating company, as the case may be; and provided, further that subject to all of the terms and conditions of this agreement, either party may permit any corporation conducting a business of the same general character as that of such party, and owned, operated, leased and controlled by it, or associated or affiliated with it, in interest, or connected with it, the use of all or any part of the space reserved hereunder on any pole covered by this agreement for the attachments used by such party in the conduct of its said business; and for the purpose of this agreement all such attachments maintained on any such pole by the permission as aforesaid of either party hereto shall be considered as the attachments of the party granting such permission, and the rights, obligations and liabilities of the party granting such permission, and the rights, obligations and liabilities of such party under this agreement, with respect to such attachments, shall be the same as if it were the actual owner thereof.

ARTICLE XVII

Waiver of Terms or Conditions

The failure of either party to enforce or insist upon compliance with any of the terms or conditions of this agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

ARTICLE XVIII

Payment of Taxes

Each party shall pay all taxes and assessments lawfully levied on its own property upon said jointly used poles, and the taxes and the assessments which are levied on said joint poles shall be paid by the owner thereof, but any tax, fee or charge levied on owned poles solely because of their use by the licensee shall be paid by the licensee.

ARTICLE XIX

Bills and Payment for Work

Upon the completion of work performed hereunder by either party, the expense of which is to be borne wholly or in part by the other party, the party performing the work shall present to the other party within 60 days after the completion of such work an itemized statement of the costs and such other party shall within 60 days after such statement is presented pay to the party doing the work such other party's proportion of the cost of said work.

ARTICLE XX

Service of Notices

Whenever in this agreement notice is provided to be given by either party hereto to the other, such notice shall be in writing and given by letter mailed, or by personal delivery, to the Utility Company at its office at Nicholasville, Kentucky, or to the Telephone Company at its office at Lexington, Kentucky, as the case may be, or to such other address as either party may from time to time designate in writing for that purpose.

ARTICLE XXI

Term of Agreement

Subject to the provision of Article XIII, Defaults, herein, this agreement shall remain in effect until terminated at the end of 10 years from the date hereof or thereafter upon the giving of written notice to the other party not less than two years prior to the date of termination.

ARTICLE XXII

Existing Contracts

All existing agreements between the parties hereto for the joint use of poles are by mutual consent hereby abrogated and superseded by this agreement, provided, however, that the parties hereto shall make payment and settlement under said existing contracts up to the effective date of this agreement.

Nothing in the foregoing shall preclude the parties to this agreement from preparing such supplemental operating routines or working practices as they mutually agree to be necessary or desirable to effectively administer the provisions of this agreement.

The effective date of this agreement shall be June 4,
1974

IN WITNESS WHEREOF, the parties hereto have caused this agreement to be executed as of the day and year first above written.

POLE LICENSE AGREEMENT

THIS AGREEMENT made as of the **fifteenth** day of **March** , 1995 between LESLIE COUNTY TELEPHONE COMPANY, a corporation of the State of Kentucky, having its principal office at Hyden, Kentucky, hereinafter called **Licensor**, and GTE SOUTH INCORPORATED, a corporation of the State of Virginia, having its principal office at Durham, North Carolina, hereinafter called Licensee,

W I T N E S S E T H :

WHEREAS, Licensee furnishes telephone service (as hereinafter defined) in certain locations in Kentucky and desires to place fiber cable from **Wooton, KY** towards Hyden, KY along KY Highway #80 to Bear Branch, KY, which will require attachments to _____ poles belonging to Leslie County Telephone Company; and

WHEREAS, **Licensor** is willing to permit, to the extent it **may** lawfully do so, the attachment of said equipment to these poles where, in its judgement, such use will not interfere with its own service requirements or, as it **may** be advised, the service requirements of other joint users, including considerations of economy and safety.

NOW, THEREFORE, in consideration of the mutual covenants, terms and conditions herein contained, the parties hereto do mutually covenant and agree as follows:

ARTICLE I
SCOPE OF AGREEMENT

1. Licensor hereby agrees to license and permit Licensee to attach its equipment, on the poles specified, subject to the conditions and limitations contained herein.

2. Licensee agrees to secure from the proper authorities permission to erect and maintain its equipment on the specified poles, provided such authorities exist, and shall secure any and all consents, permits, or licenses that may be legally required for its operation hereunder. Prior to the execution of the Agreement, Licensee shall deliver to Licensor documentation satisfactory to Licensor evidencing that all such franchises, consents, permits or licenses have been obtained. In the event any such franchise, license, permit or consent is revoked or is thereafter denied to Licensee for any reason, permission to attach to Licensor's poles so affected shall immediately terminate, Licensee shall forthwith remove its equipment from Licensor's poles and Licensor at its option may forthwith terminate this Agreement.

3. Upon notice from Licensor to Licensee that the cessation of the use of any pole or poles has been requested or directed by Federal, State or municipal authorities, or property owners, permission to attach to such pole or poles shall immediately terminate and Licensee shall forthwith remove its equipment therefrom.

14. Whenever, pursuant to the provisions of this Agreement, Licensee shall be required to remove its attachments from any pole, such removal shall be made, except as otherwise specifically provided, within sixty (60) days following the giving of notice to Licensee by **Licensor** to so remove. Upon failure of Licensee to remove such attachments within sixty (60) days or as otherwise required, **Licensor** may remove them and charge all costs associated with such removal to Licensee.

15. Licensee agrees that it shall not **intersest** poles where **Licensor's** facilities are located not shall it locate poles, guys, or other facilities where they will interfere with access to **Licensor's** poles or to poles to be constructed by **Licensor** in the specified location.

16. Nothing herein contained shall give to Licensee the right to pace a **crossarm** on any pole. If a **crossarm** is required to accommodate the facilities of Licensee, Licensee shall state the reasons **therefor** in writing to **Licensor**, and if **Licensor** agrees to permit the placing of a **crossarm**, Licensee agrees to reimburse **Licensor** any cost **Licensor** incurs to facilitate the addition of such **crossarm**.

17. Nothing in this Agreement shall be construed to obligate **Licensor** to grant Licensee permission to use any particular pole and **Licensor** at its discretion may revoke permission theretofore granted to Licensee with respect to any particular pole.

18. Licensor reserves to itself, its successors and assigns the right to maintain its poles and to operate its facilities thereon in such manner as will best enable it to fulfill its public service requirements. Licensor or other joint users shall not be liable to Licensee for any interruption to the service of Licensee or for interference with the operation of the equipment of Licensee arising in any manner whatsoever.

ARTICLE IV

RENTAL

19. Licensee shall pay to Owner annually on the first day of March of each year during the term of this Agreement, a rental in the amount of [REDACTED] per pole.

ARTICLE V

TERM AND TERMINATION OF AGREEMENT

20. This Agreement, if not previously terminated in accordance with the provisions hereof, shall continue in effect for a term of five (5) years and thereafter until terminated as provided herein. The Agreement may be terminated at the end of said time or at any time thereafter by either party giving to the other party at least ninety- (90) days written notice. Upon termination of the Agreement in accordance with any of its terms, Licensee shall remove its said equipment from the poles of Licensor within sixty (60) days thereafter.

21. Licensee may at any time remove its equipment attached to any pole or poles of Licensor, but shall immediately give

Licensors written notice of such removal.

22. The Licensors may abandon any said pole at any time upon written notice to the Licensee. The Licensee shall within sixty (60) days after such notice, either purchase the pole from the Licensors or remove its attachments therefrom, and the failure of the Licensee to remove its attachments within said sixty (60) days shall be deemed an election to purchase the pole at a price equal to its salvage value.

23. If Licensee shall fail to comply with any of the provisions of this Agreement, including the specifications herein before referred to, or defaults in any of its obligations under this Agreement, and shall fail within thirty (30) days after written notice from Licensors to correct such default or non-compliance, Licensors may, at its option forthwith terminate this Agreement in its entirety or, at its election, revoke the permit covering the pole or poles involved in such default or non-compliance.

24. This Agreement shall be subject to termination by Licensors without notice, or where circumstances permit, upon thirty (30) days written notice to Licensee, upon valid objection being made by or on behalf of any governmental authority property asserting jurisdiction thereon.

ARTICLE VI

INDEMNIFICATION

25. Each party shall and hereby does indemnify and hold the other party and its officers, employees and agents free and

harmless from any and all legal and other expenses, suits, claims, damages, costs, fines, penalties, liabilities or other obligations of whatsoever kind, including but not limited to damage or destruction of property and injury or death of persons, resulting from or connected with the indemnifying party's performance under this Agreement, including but not limited to the operation, maintenance or defective condition of such party's equipment, or any act or omission of such Party's officers, employees, and agents provided, however, that nothing in this section or elsewhere in this Agreement shall make any party hereto liable for consequential damages or loss of profits.

26. The Licensor shall not be liable to the Licensee for any interruption to, not interference with the operations of, the wires of the Licensee on said poles caused by the operations of the Licensor; nor shall the Licensor be responsible for any loss or damage caused by objection to the stringing of said wires of Licensee, by any corporation or person owning property on which, or abutting upon which, said pole line or fixtures thereon, or any part thereof is located, or because of interference with said pole line, wires or fixture thereon by any third person, or because of the objections or interference of any public authorities. It will be the responsibility of the Licensor and the Licensee to notify the other party immediately of any damages.

27. Licensee shall exercise special precautions to avoid

damage to facilities of **Licensor** and of other joint users on said poles by virtue of Licensee's operations and hereby assumes all responsibility for any and all loss for such damage. Licensee shall make an immediate report to **Licensor** of the occurrence of any such damage and hereby agrees to reimburse **Licensor** for the expense incurred in making repairs necessitated thereby.

ARTICLE VII

PROTECTION AGAINST CLAIMS FOR LIBEL AND SLANDER, COPYRIGHT AND PATENT INFRINGEMENT

28. Licensee shall indemnify, protect, and hold harmless **Licensor** from and against any and all claims for libel and/or slander, and copyright and/or patent infringement arising by reason of attachment by Licensee of its equipment to **Licensor's** poles pursuant to this Agreement.

ARTICLE VIII

GENERAL

29. Licensee shall not assign, transfer, or sublet this Agreement, or any of the privileges hereby granted to it.

30. Nothing herein contained shall be construed as affecting the rights or privileges previously conferred by **Licensor** to others, by contract or otherwise, to use the poles covered by this Agreement, and **Licensor** shall have the right to continue to extend such rights or privileges; the attachment privileges granted hereunder shall at all times be subject to such contracts and arrangements and nothing contained herein shall be construed as affecting the right of **Licensor** to grant

attachment privileges to such other parties as it may desire.

31. No use, however extended, of **Licensor's** poles under this Agreement shall create or vest in Licensee any ownership or property right in said poles, but Licensee's rights herein shall be and remain a mere license. Nothing herein contained shall be construed to compel **Licensor** to maintain any of its poles for a period longer than that demanded by its own service requirements.

32. It is expressly agreed that the **Licensor** is not obligated to secure or guarantee any right-of-way or franchise for the Licensee, and no use, however extended, of the **Licensor's** poles under this Agreement shall be taken as creating or vesting in the Licensee any right, title or interest in any franchise or easement which the **Licensor** may possess.

33. The joint occupancy herein provided for and the work to be done hereunder shall be subject to the terms and conditions hereof, which shall constitute a specific agreement in connection herewith and shall supersede, except as to matters not covered herein, any provisions in other contracts, if any, heretofore entered into between the parties hereto or their predecessor companies.

34. Failure to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

ARTICLE IX
PAYMENT OF BILLS

35. All amounts payable by Licensee to **Licensors** under the provisions of this Agreement shall, unless otherwise specified, be payable within thirty (30) days after presentation of bills therefor. Non-payment of any such amounts when due shall constitute a default under this Agreement.

ARTICLE X
NOTICE

36. Any notice provided in this Agreement to be given by either party hereto to the owner shall be deemed to have been duly given when made in writing and deposited in the United States mail, postage prepaid, addressed as follows:

To **Licensors**:

Leslie County Telephone Company
Main Street
Hyden, Kentucky 41749

To: Licensee:

GTE South Incorporated
3725 Nicholasville Rd. SRC2
Lexington, KY 40503

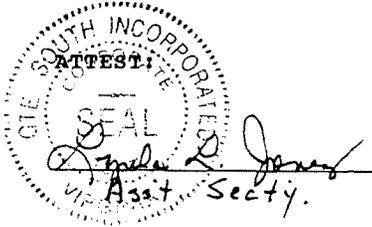

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be duly executed as of the day and year first above written.

Form 30030

CATV POLE LEASE AGREEMENT

THIS AGREEMENT made as of the 24th day of November, 1980, between
 GENERAL TELEPHONE COMPANY OF KENTUCKY, a corporation of the
 State of Delaware, having its principal office at
Lexington, Kentucky, hereinafter called Licensor,
 and Scottsville Cable T.V. Company, a corporation of the
 State of _____, having its principal office at
 _____, hereinafter called Licensee,

W I T N E S S E T H:

WHEREAS, Licensee (proposes to furnish) (~~is furnishing~~) a CATV service, as
 hereinafter defined, to residents of SCOTTSVILLE and
 (intends to erect and maintain) (~~has erected and is maintaining~~) an antenna
 tower (s) located at SCOTTSVILLE
 and (proposes to install) (~~has installed~~) coaxial television cables, amplifiers
 and drop wires, wires and appliances together with associated cable messengers,
 anchors and other appurtenances, hereinafter sometimes collectively called the
 "equipment," throughout the area to be served and desires (to attach) (~~to~~
~~continue to attach~~) such equipment to poles of Licensor and/or to poles used
 jointly by Licensor and other companies; and

WHEREAS, Licensor is willing (to permit) (~~to continue to permit~~), to the
 extent it may lawfully do so, the attachment of said equipment to its poles where,
 in its judgment, such use will not interfere with its own service requirements or,
 it may be advised, the service requirements of other joint users, including
 considerations of economy and safety.

WIN2575

NOW, THEREFORE, in consideration of the mutual covenants, terms and conditions herein contained, the parties hereto do mutually covenant and agree as follows:

ARTICLE I

DEFINITIONS

1. All references herein to "Licensor's poles" or "its poles" shall mean poles solely owned by the Licensor, jointly owned by Licensor or the pole space rented or obtained by other arrangements by Licensor from another owner.

2. All references herein to "joint user" shall mean (1) a company or municipality which together with Licensor has a percentage ownership in a pole, (2) a public utility company or municipality which has attachment privileges on Licensor's poles, or (3) a public utility company which owns poles on which Licensor has attachment privileges.

3. All references herein to "CATV service" shall mean the transmission to subscribers of off-the-air pick up of broadcast signals or the transmission without separate charge of locally originated closed circuit television to the subscribers of off-the-air service.

ARTICLE II

SCOPE OF AGREEMENT

4. Licensor hereby agrees to license and permit Licensee (to attach) (to continue to attach) its equipment, for the primary purpose of furnishing CATV service within the area outlined in red on the map attached hereto as Exhibit A; to such of its poles as are, in the judgment of the Licensor, suitable and available for such attachments, subject to the conditions and limitations contained herein.

- 3 -

5. Licensee agrees that its equipment (to be attached) (attached) to Licensor's poles shall be installed for the purpose of providing CATV service and shall be used primarily for furnishing CATV service. Any residual channel capacity, however, may be used by Licensee for any lawful purpose.

6. Licensee agrees to secure from the proper franchising authority, a franchise to erect and maintain its equipment within public streets, highways and other thoroughfare, provided such franchising authority exists, and shall secure any and all consents, permits or licenses that may be legally required for its operations hereunder. Prior to the execution of the Agreement, Licensee shall deliver to Licensor documentation satisfactory to Licensor evidencing that all such franchises, consents, permits or licenses have been obtained.

7. Licensee agrees to assist in, and bear the expense of, securing any consents, permits or licenses that may be required by Licensor by reason of this Agreement.

ARTICLE III

APPLICATION FOR PERMISSION TO ATTACH

8. At least ninety (90) days prior to the time Licensee desires to attach its equipment to any of Licensor's poles, it shall make written application on the form marked Exhibit B attached hereto and made a part hereof, in the number of copies from time to time prescribed by Licensor. Upon approval of said application, Licensor shall return one copy of Exhibit B to the Licensee bearing the endorsement of its permission.

- 4 -

9. Upon receiving such endorsed copy of said application, but not sooner, Licensee shall have the right, subject to Section 13 herein, to install, maintain and use its equipment described in said application upon the poles identified therein, provided that Licensee shall complete each installation within such time limit as may be specified on said approved application; provided, however, that before commencing any such installation, Licensee shall notify Licensor of the time when it proposes to do such work sufficiently in advance thereof so that Licensor may arrange to have its representative present when such work is performed and, in the event Licensor elects to have its representative present, Licensee shall reimburse Licensor for the cost and expense thereof.

10. Where costs are involved in the rearrangement of Licensor's or other facilities to accommodate Licensee's equipment, two signed copies of said application shall be returned to Licensee detailing the costs in the space provided thereon for that purpose. Approval of said application by Licensor is subject to receiving authorization from Licensee, on said application in the space provided thereon for that purpose, to make changes and rearrangements, at Licensee's sole risk and expense, detailed by Licensor with said copies of said application.

11. Licensee shall not have the right to place, nor shall it place, any additional equipment upon any pole used by it hereunder without first making application therefor and receiving Licensor's permission to do so, all as prescribed in Section 8 herein; nor shall Licensee change the position of any equipment attached to any such pole without Licensor's prior written approval. The provisions of this Section shall not restrict the attachment of television drops to television crossarms or television cable messenger. It is agreed that a charge of [REDACTED] dollars (\$ [REDACTED]) per attachment shall be levied against and paid by Licensee to Licensor for any unauthorized attachment made by Licensee to Licensor's poles or facilities. This charge will be in addition to rental charges from the time of said unauthorized attachment, rearrangement costs, or other appropriate charges.

- 5 -

In the event that the time of the unauthorized attachment cannot be determined it shall be deemed to have occurred on the date succeeding the day on which the last joint survey was made in accordance with paragraph 14 hereof.

12. It is agreed and understood that in the case of jointly-used poles, permission to attach thereto shall be subject to Licensor's obtaining approval from such joint users and/or owners whenever necessary.

ARTICLE IV

SPECIFICATIONS

13. Licensee, at its own cost and expense, shall construct, maintain and replace its attachments on Licensor's poles in accordance with (i) such requirements and specifications as Licensor shall from time to time prescribe, (ii) EEI Publication M12 entitled "Specifications for the Construction and Maintenance of Jointly Used Wood Pole Lines Carrying Supply and Communication Circuits", (iii) the requirements and specifications of the National Electrical Safety Code, Sixth Edition, and any amendments or revisions of said specifications or code, (iv) in compliance with any rules or orders now in effect or that hereafter may be issued by any regulatory Commission or other authority having jurisdiction, and (v) the requirements and specifications of the National Electrical Code 1965 Edition and any amendments or revisions of said specifications or code. In addition, all attachments shall be made by Licensee in accordance with this Agreement and Exhibits 1-10 attached hereto and made a part hereof. Licensee agrees to comply, at its sole risk and expense, with the specifications of all Exhibits attached hereto, as revised from time to time by Licensor in accordance with the provisions of this Article IV.

ARTICLE V

INSTALLATION AND MAINTENANCE OF ATTACHMENTS AND POLES

14. The exact location of licensee's attachments on poles shall be determined from a joint survey to be made, at such times as shall be mutually

WIN2579

- 5 -

agreed upon, by representatives of Licensor, Licensee and, if desired by a joint user, its representative. Licensor may inspect each new installation of Licensee on its poles and in the vicinity of its lines or appliances and may make periodic inspections of the entire plant of Licensee as plant conditions may warrant; and Licensee shall, on demand, reimburse Licensor for the cost of such surveys and inspections. Such inspections shall not operate to relieve Licensee of any responsibility, obligation or liability assumed under this Agreement.

15. Licensor at its option and at the sole risk and expense of Licensee, may make the attachment of Licensee's equipment to poles solely owned by Licensor and joint users' poles whenever, in its judgment, Licensor deems such procedure to be appropriate. Licensee agrees to furnish all such materials and equipment and further agrees, on demand, to reimburse Licensor for the entire installation costs thereby incurred. Licensee shall deposit with Licensor, prior to such installation, sufficient sums estimated by Licensor to be adequate to reimburse it for such work. In individual cases where, in Licensor's judgment, such procedure is desirable, Licensor may install such equipment upon poles owned by others at the request of Licensee and upon prior written approval of the owners of such poles, and Licensee will reimburse Licensor for the entire expense thereby incurred.

16. Where Licensee's attachments can be accommodated on poles of Licensor by rearranging or changing the facilities of Licensor or other joint users, Licensee agrees to pay Licensor in advance the cost of making such rearrangements or changes. Strengthening of poles (guying) required to accommodate the attachments of Licensee and the bonding of Licensee's strand to that of Licensor shall be performed by Licensee at his sole risk and expense. Such work, however, may be performed by Licensor at its option, and in such event Licensee shall pay to Licensor in advance the cost of all such work.

- 7 -

17. Upon written notice from Licensor, Licensee shall relocate or replace its equipment attached to Licensor's poles, or transfer the same to substituted poles, or perform any other work in connection with said equipment that may be requested by Licensor, at Licensee's sole risk and expense; provided, however, that in cases of emergency Licensor may, at Licensee's sole risk and expense, arrange to relocate or replace the facilities attached to said poles by Licensee, transfer them to substituted poles or perform any other work in connection with said facilities that may be required in the maintenance, replacement, removal or relocation of said poles, the facilities thereon or the equipment which may be placed thereon, or for the service needs of Licensor.

18. Licensee shall notify Licensor of the time when it proposes to replace any of its equipment attached to Licensor's poles sufficiently in advance thereof so that Licensor may decide whether it should perform such work pursuant to paragraph 15 hereof and, in such event, Licensee shall reimburse Licensor for the entire expense thereby incurred.

19. All tree trimming required on account of Licensee's equipment shall be done by Licensee at its sole risk and expense and in a manner satisfactory to Licensor and any other joint users.

20. Licensee shall, at its sole risk and expense, maintain all of its attachments on Licensor's poles in safe condition and in thorough repair.

WIN2581

- 8 -

21. Licensor reserves to itself, its successors and assigns the right to maintain its poles and to operate its facilities thereon in such manner as will best enable it to fulfill its public service requirements. Licensor or other joint users shall not be liable to Licensee for any interruption to the service of Licensee or for interference with the operation of the equipment of Licensee arising in any manner whatsoever.

22. Nothing herein contained shall give to the Licensee the right to place a crossarm on any pole. If a crossarm is required to accommodate the facilities of the Licensee, then Licensee shall so state the reasons therefore in its application for attachment.

23. Licensee shall not at any time make any additions to, or changes in, the location of its attachments on the poles covered by this Agreement without the prior written consent of Licensor except, in cases of emergency, when oral permission shall have been obtained from Licensor's authorized representative at Elizabethtown, Kentucky - Attention Engineering Dept. and subsequently confirmed in writing.

24. If Licensee should require the location of its equipment upon any public thoroughfare or other public or private property in the conduct of its business in the territory covered by this Agreement and Licensor shall not have pole facilities so located to fulfill Licensee's requirements, Licensee shall notify Licensor of its need for such pole facilities in order that Licensor may determine whether it wishes to place pole facilities in such locations for Licensor's requirements. If Licensor so elects, it shall erect pole facilities in such locations adequate to meet the service requirements of both Licensee and Licensor, and Licensee shall thereupon make application for permission to place its equipment thereon as provided in this Agreement.

- 9 -

25. Nothing in this Agreement shall be construed to obligate Licensor to grant Licensee permission to use any particular pole and Licensor at its discretion may revoke permission theretofore granted to Licensee with respect to any particular pole.

26. Whenever, pursuant to the provisions of this Agreement, Licensee shall be required to remove its attachments from any pole, such removal shall be made, except as otherwise specifically provided, within thirty (30) days following the giving of notice to Licensee by Licensor to so remove. Upon failure of Licensee to remove such attachments within such thirty (30) days or as otherwise required, Licensor may remove them and charge all costs associated with such removal to Licensee.

27. Licensee agrees that it shall not intersert poles where Licensor's facilities are located nor shall it locate poles, guys, or other facilities where they will interfere with access to Licensor's poles or to poles to be constructed by Licensor.

ARTICLE VI

COST OF POLE REPLACEMENTS

28. Whenever Licensee applies for permission to attach to a pole that is considered by Licensor to be insufficient in height or strength for accommodation of Licensee's attachments, or in the event that Licensor or a joint user of the pole shall require the space occupied by Licensee's existing attachments, Licensor shall notify Licensee of such fact and of the estimated cost to Licensee of replacing such pole with a pole which will accommodate the attachments of Licensee, Licensor and any such joint user. Within thirty (30) days of such notification, Licensee shall either notify Licensor (i) of its approval of such replacement or (ii) of its cancellation of the application with respect to such pole or (iii) in the case of existing attachments, of its election to remove its attachments from the pole.

WIN2583

- 10 -

29. In the event of licensee's approval of such replacement, Licensor shall replace the pole and Licensee shall pay to Licensor in advance the charges therefor, computed as follows:

The total cost of the new pole, the removal of the old pole, the transferring of Licensor's and any such joint user's attachments from the old to the new pole and such other costs, if any, necessitated by Licensee's requirements, less the total of the following: accrued depreciation on the old pole, salvage, if any, and the cost of such portion of the new pole, if any, which represents space reserved for the use of Licensor or any such joint user greater than that provided for them on the old pole less appropriate contribution by any other licensee.

ARTICLE VII

RIGHTS OF WAY, LEGAL AUTHORITY AND DEFAULT

30. Upon execution of this Agreement, Licensee shall submit evidence satisfactory to Licensor of its authority to erect and maintain its equipment within public streets, highways and other thoroughfares and shall secure any necessary license, permit or consent from Federal, state or municipal authorities and from the owners of property now or hereafter required to construct and maintain such equipment at the locations of poles of Licensor to which it desires to attach. In the event any such franchise, license, permit or consent is revoked or is thereafter denied to Licensee for any reason, permission to attach to Licensor's

- 11 -

poles shall immediately terminate, Licensee shall forthwith remove its equipment from Licensor's poles and Licensor at its option may forthwith terminate this Agreement.

31. Upon notice from Licensor to Licensee that the cessation of the use of any pole or poles has been requested or directed by Federal, state or municipal authorities, or property owners, permission to attach to such pole or poles shall immediately terminate and Licensee shall forthwith remove its equipment therefrom.

32. If Licensee shall fail to comply with any of the provisions of this Agreement, including the specifications hereinbefore referred to, or defaults in any of its obligations under this Agreement, and shall fail within thirty (30) days after written notice from Licensor to correct such default or non-compliance, Licensor may, at its option forthwith terminate this Agreement in its entirety or, at its election, revoke the permit covering the pole or poles involved in such default or non-compliance.

ARTICLE VIII

33. For the privilege of placing and maintaining attachments on Licensor's poles, Licensee shall pay annually to Licensor the sum of 4.50 dollars for each such pole times the total number of poles used by Licensee on the date of computation. Rentals shall be payable annually in advance to Licensor on the first day of January of each year during which this agreement remains in effect.

From the effective date of the permit for such attachments, which shall be the date when Licensor's poles are available for the attachment of Licensee's equipment, to the date from which the annual rentals provided in the paragraph above shall accrue, the rental per month or fraction thereof shall be payable on a prorated basis.

- 12 -

34. In the event that Licensor files a tariff during the term of this Agreement covering attachments made to its poles, Licensor reserves the right to substitute the rates and charges covered by such tariff in place of the rentals set forth in Section 33 above.

ARTICLE IX

TERM AND TERMINATION OF AGREEMENT

35. This Agreement, if not previously terminated in accordance with the provisions hereof, shall continue in effect for a term of one (1) years and thereafter until terminated as provided herein. The Agreement may be terminated at the end of said time or at any time thereafter by either party giving to the other party at least ninety (90) days' written notice. Upon termination of the Agreement in accordance with any of its terms, Licensee shall remove its said equipment from all poles of Licensor within thirty (30) days thereafter.

36. Licensee may at any time remove its equipment attached to any pole or poles of Licensor, but shall immediately give Licensor written notice of such removal in the form of Exhibit C attached hereto and made a part hereof. No credit or refund of any rental shall be allowed Licensee on account of such removal.

37. This Agreement shall be subject to termination by Licensor without notice, or, where circumstances permit, upon five (5) days written notice to Licensee, upon objection being made by or on behalf of any governmental authority asserting proper jurisdiction thereon.

WIN2586

- 13 -

ARTICLE XINDEMNITY AND INSURANCE

38. Licensee shall indemnify, protect and hold harmless Licensor and other joint users of said poles from and against any and all loss, costs, claims, demands, damage and/or expense arising out of any demand, claim, suit or judgment for damages to property and injury to or death of persons, including the officers, agents and employees of either party hereto and other joint users of said poles, including payment made under any Workmen's Compensation Law or under any plan for employees' disability and death benefits, which may arise out of or be caused by the erection, maintenance, presence, use or removal of said equipment or by the proximity of the respective cables, wires, apparatus and appliances of the parties hereto or other joint users of said poles, or arising out of any act or omission or alleged act or omission of Licensee, including any claims and demands of customers of Licensee or others, and irrespective of any fault, failure, negligence or alleged negligence on the part of Licensor or of any other joint user of said poles.

39. Licensee shall carry insurance, at its sole cost and expense, to protect the parties hereto and other joint users of said poles from and against any and all such claims and demands and from and against any and all actions, judgments, costs, expenses and liabilities of every name and nature which may arise or result, directly or indirectly, from or by reason of the acts or omissions of Licensee hereunder and irrespective of any fault, failure, negligence or alleged negligence on the part of Licensor or of any other joint user of said poles. The amounts of such insurance against liability due to personal injury to or death of persons shall be \$250,000 as to any one person and \$500,000 as to any one accident.

WIN2587

- 14 -

The amounts of such insurance against liability due to property damage shall be \$100,000 as to each accident and \$300,000 aggregate. Licensee shall also carry such insurance as will fully protect both it and Licensor from all claims under any Workmen's Compensation Laws that may be applicable.

40. All insurance required shall remain in force for the entire life of this Agreement. The Company or Companies issuing such insurance shall be approved by Licensor, and Licensor and other joint user shall be named as an additional insured in each of such policies. Licensee shall submit to Licensor certificates by each such Company to the effect that it has insured Licensee, Licensor and other joint users for all liabilities of Licensee, Licensor and other joint users under this Agreement and that it will not cancel or change any policy of insurance issued to Licensee except after thirty (30) days notice to Licensor, and on request, shall submit to Licensor any such policies of insurance for its approval. If renewal insurance premiums are not paid by Licensee prior to said 30 days notice, Licensor shall have the right to pay said premiums and be reimbursed by Licensee upon demand. Licensee shall promptly advise an authorized representative of Licensor of all claims relating to damage to property or injury to or death of persons, arising or alleged to have arisen in any manner by, or directly or indirectly associated with, the erection, maintenance, presence, use or removal of Licensee's equipment.

41. Licensee shall furnish bond or satisfactory evidence of contractual insurance coverage in the amount of five thousand dollars (\$5,000) to guarantee the payment of any sums which may become due to Licensor for rentals, inspections or for work performed by Licensor for the benefit of Licensee under this Agreement, including the removal of Licensee's equipment pursuant to any of the provisions hereof. Such amount shall apply so long as Licensee attaches its equipment to no

- 15 -

more than one hundred (100) poles of Licensor. In the event that Licensee attaches its said equipment to more than one hundred (100) poles of Licensor, Licensee shall furnish further surety in the amount of five thousand dollars (\$5,000) for each additional fifty (50) poles, of Licensor so used.

42. Licensee shall exercise special precautions to avoid damage to facilities of Licensor and of other joint users on said poles and hereby assumes all responsibility for any and all loss for such damage. Licensee shall make an immediate report to Licensor of the occurrence of any such damage and hereby agree to reimburse Licensor for the expense incurred in making repairs necessitated thereby.

ARTICLE XI

PROTECTION AGAINST CLAIMS FOR LIBEL AND SLANDER, COPYRIGHT AND PATENT INFRINGEMENT

43. Licensee shall indemnify, protect and hold harmless Licensor from and against any and all claims for libel and slander, copyright and/or patent infringement arising by reason of attachment by Licensee of its equipment to Licensor's poles pursuant to this Agreement.

ARTICLE XII

GENERAL

44. Licensee shall not assign, transfer or sublet this Agreement, or any of the privileges hereby granted to it, without the prior written consent of Licensor.

45. No use, however extended, of Licensor's poles under this Agreement shall create or vest in Licensee any ownership or property right in said poles, but Licensee's rights therein shall be and remain a mere license. Nothing herein contained shall be construed to compel Licensor to maintain any of its poles for a period longer than that demanded by its own service requirements.

46. Nothing herein contained shall be construed as affecting the rights or privileges previously conferred by Licensor to others, by contract or otherwise, to use any poles covered by this Agreement, and Licensor shall have the right to continue to extend such rights or privileges; the attachment privileges granted hereunder shall at all times be subject to such contracts and arrangements and nothing contained herein shall be construed as affecting the right of Licensor to grant attachment privileges to such other parties as it may desire to do so.

47. Failure to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

48. Subject to the provisions of Section 44 above, this Agreement shall extend to and bind the successors and assigns of the parties hereto.

ARTICLE XIII

PAYMENT OF BILLS

49. All amounts payable by Licensee to Licensor under the provisions of this Agreement shall, unless otherwise specified, be payable within thirty (30) days after presentation of bills therefor. Non-payment of any such amounts when due shall constitute a default under this Agreement.

To Licensor:

GENERAL TELEPHONE COMPANY OF KENTUCKY

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be duly executed as of the day and year first above written.

Re: Agreement between Continental Telephone Company of Kentucky, Inc.
and Tele-Media Cable Company, dated 2/1/82 (the "Agreement")

Dear Sir or Madam:

On October 31, 2001, Verizon South Inc. ("Verizon") entered into a definitive agreement (the "Purchase Agreement") with Kentucky ALLTEL, Inc., a subsidiary of ALLTEL Corporation ("ALLTEL"). Under the terms of the Purchase Agreement Verizon will transfer to ALLTEL certain telephone operations and related assets located in Kentucky (the "Transaction"). The above referenced Agreement is one of the assets to be transferred as a part of the Transaction.

Until the closing of the Transaction, Verizon will continue to operate in the current manner and will continue to be responsible to perform those obligations under the Agreement that arise prior to the transfer to ALLTEL. Upon Closing of the Transaction, ALLTEL will be assigned all of Verizon's rights and obligations under the Agreement, to the extent such obligations arise after the closing date.

By this letter, Verizon is requesting your consent to the assignment of the Agreement to ALLTEL as a part of the Transaction. Please indicate your consent by executing the letter where indicated in the space provided below and returning it in the enclosed pre-paid envelope at your earliest convenience, but by no later than **March 12, 2002**. The enclosed copy should be retained for your records. By consenting to the assignment of the Agreement you also agree that, after the closing of the Transaction, Verizon will have no further obligations to you under the Agreement, and that ALLTEL shall be responsible for all obligations thereunder after the closing.

Your consent will remain effective through the closing of the Transaction. You will be contacted by ALLTEL who will advise you of the closing date and the new contact information.

**Amendment to the Agreement
Between
Windstream Communications, Inc.
and
BellSouth Telecommunications, Inc.
d/b/a AT&T Alabama, AT&T Florida, AT&T Georgia,
AT&T Kentucky, AT&T Louisiana, AT&T Mississippi,
AT&T North Carolina, AT&T South Carolina and
AT&T Tennessee
dated May 13, 2007**

Pursuant to this Amendment, (the "Amendment"), Windstream Communications, Inc. (Windstream), and BellSouth Telecommunications, Inc. d/b/a AT&T Alabama, AT&T Florida, AT&T Georgia, AT&T Kentucky, AT&T Louisiana, AT&T Mississippi, AT&T North Carolina, AT&T South Carolina and AT&T Tennessee ("AT&T"), hereinafter referred to collectively as the "Parties," hereby agree to amend that certain Interconnection Agreement between the Parties dated May 13, 2007, (Agreement) to be effective thirty (30) calendar days after the date of the last signature executing the Amendment (Effective Date).

WHEREAS, AT&T and Windstream entered into the Agreement on May 13, 2007 and;

NOW THEREFORE, in consideration of the mutual provisions contained herein and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties hereby covenant and agree as follows:

1. All of the other provisions of the Agreement, dated May 13, 2007, shall remain in full force and effect.
2. Either or both of the Parties are authorized to submit this Amendment to the respective state regulatory authorities for approval subject to Section 252(e) of the Federal Telecommunications Act of 1996.
3. In entering into this Amendment, neither Party waives, and each Party expressly reserves, any rights, remedies or arguments it may have at law or under the intervening law or regulatory change provisions in the underlying Agreement (including intervening law rights asserted by either Party via written notice predating this Amendment) with respect to any orders, decisions, legislation or proceedings and any remands thereof, which the Parties have not yet fully incorporated into this Agreement or which may be the subject of further review.

RIGHTS OF WAY (ROW), CONDUITS AND POLE ATTACHMENTS

This Agreement, together with the terms and conditions of general applicability contained throughout this Agreement, sets forth the terms and conditions under which AT&T shall afford to Licensee access to AT&T's Poles, Ducts, Conduits and Rights of Way, pursuant to the Act. To the extent applicable, this Agreement also sets forth the terms and conditions applicable to request to attach to Joint Use Poles and the relevant defined terms shall be construed to include such Joint Use Poles.

1. DEFINITIONS

Definitions in General. Except as the context otherwise requires, the terms defined in this Section shall, as used herein, have the meanings set forth in this Section 1.

- 1.1 Anchor. The term Anchor refers to a device, structure, or assembly which stabilizes a Pole and holds it in place. An Anchor assembly may consist of a rod and fixed object or plate, typically embedded in the ground, which is attached to a guy strand or guy wire, which, in turn, is attached to the Pole. The term Anchor does not include the guy strand which connects the Anchor to the Pole and includes only those Anchors which are owned by AT&T, as distinguished from Anchors which are owned and controlled by other persons or entities.
- 1.2 Anchor/Guy Strand. The term Anchor/Guy Strand refers to supporting wires, typically stranded together, or other devices attached to a Pole and connecting that Pole to an Anchor or to another Pole for the purpose of increasing Pole stability. The term Anchor/Guy Strand includes, but is not limited to, strands sometimes referred to as Anchor strands, down guys, guy strands, and Pole-to-pole guys.
- 1.3 Application. The process of requesting information related to records, Pole and/or Conduit availability, or make-ready requirements for AT&T owned or controlled Facilities. Each Application is limited in size to a maximum of (1) 100 consecutive Poles or (2) 10 consecutive Manhole sections or 5000 feet, whichever is greater. The Application includes (but is not limited to) request for records, records investigation and/or a field investigation, and Make-Ready Work.
- 1.4 Communications Act of 1934. The terms Communications Act of 1934 and Communications Act refer to the Communications Act of June 19, 1934, 48 Stat. 1064, as amended, including the provisions codified as 47 U.S.C. Sections 151 et seq. The Communications Act includes the Pole Attachment Act of 1978, as defined in 1.27 following.
- 1.5 Assigned. The term Assigned, when used with respect to Conduit or Duct space or Poles, refers to any space in such Conduit or Duct or on such Pole that is occupied by a telecommunications service provider or a municipal or other governmental authority. To ensure the judicious use of Poles and Conduits, space Assigned to a telecommunications service provider must be physically occupied by the service provider, be it AT&T or a new entrant, within twelve (12) months of the space being Assigned.

- 1.6 **AT&T-9STATE.** The term AT&T-9STATE shall be defined as the states of Alabama, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina and Tennessee.
- 1.7 **Available.** The term Available, when used with respect to Conduit or Duct space or Poles, refers to any usable space in such Conduit or Duct or on such Pole not assigned to a specific provider at the applicable time.
- 1.8 **Conduit.** The term Conduit means a structure containing one or more Ducts, usually placed in the ground, in which cables or wires may be installed.
- 1.9 **Conduit Occupancy.** The terms Conduit Occupancy and Occupancy refer to the presence of wire, cable, optical conductors, or other Facilities within any portion of AT&T's Conduit System.
- 1.10 **Conduit System.** The term Conduit System refers to any combination of Ducts, Conduits, Manholes, and Handholes joined to form an integrated whole. In this Agreement, the term refers to Conduit Systems owned or controlled by AT&T.
- 1.11 **Cost.** The term Cost as used herein refers to charges made by AT&T to Licensee for specific work performed, and shall be (a) the actual charges made by subcontractors to AT&T for work and/or, (b) if the work was performed by AT&T employees, it shall be calculated on an individual case basis, based on the estimated amount of work to be performed.
- 1.12 **Duct.** The term Duct refers to a single enclosed tube, pipe, or channel for enclosing and carrying cables, wires, and other Facilities. As used in this Agreement, the term Duct includes Inner-Ducts created by subdividing a Duct into smaller channels.
- 1.13 **Facilities.** The terms Facility and Facilities refer to any property or equipment utilized in the provision of telecommunication services.
- 1.14 The acronym FCC refers to the Federal Communications Commission.
- 1.15 **Handholes.** The term Handhole refers to an enclosure, usually below ground level, used for the purpose of installing, operating, and maintaining facilities in a Conduit. A Handhole is too small to permit personnel to physically enter.
- 1.16 **Inner-Duct.** The term Inner-Duct refers to a pathway created by subdividing a Duct into smaller channels.
- 1.17 **Joint User.** The term Joint User refers to a utility which has entered into an agreement with AT&T providing reciprocal rights of attachment of Facilities owned by each party to the Poles, Ducts, Conduits and Rights of Way owned by the other party.
- 1.18 **Joint Use Pole.** A pole not owned by AT&T, but upon which AT&T maintains its Facilities.
- 1.19 **Lashing.** The term Lashing refers to the attachment of a Licensee's Sheath or Inner-Duct to a supporting strand.
- 1.20 **License.** The term License refers to any License issued pursuant to this Agreement and may, if the context requires, refer to Conduit Occupancy or Pole attachment Licenses issued by AT&T prior to the date of this Agreement.

- 1.21 Licensee. The term Licensee refers to a person or entity which has entered or may enter into an agreement or arrangement with AT&T permitting such person or entity to place its Facilities in AT&T's Conduit System or attach its Facilities to AT&T's Poles or Anchors.
- 1.22 Make-Ready Work. The term Make-Ready Work refers to all work performed or to be performed to prepare AT&T's Conduit Systems, Poles or Anchors and related Facilities for the requested occupancy or attachment of Licensee's Facilities. Make--Ready work includes, but is not limited to, clearing obstructions (e.g., by rodding Ducts to ensure clear passage), the rearrangement, transfer, replacement, and removal of existing Facilities on a Pole or in a Conduit System where such work is required solely to accommodate Licensee's Facilities and not to meet AT&T's business needs or convenience. Make-Ready work may require "dig-ups" of existing Facilities and may include the repair, enlargement or modification of AT&T's Facilities (including, but not limited to, Conduits, Ducts, Handholes and Manholes) or the performance of other work required to make a Pole, Anchor, Conduit or Duct usable for the initial placement of Licensee's Facilities.
- 1.23 Manhole. The term Manhole refers to an enclosure, usually below ground level and entered through a hole on the surface covered with a cast iron or concrete Manhole cover, which personnel may enter and use for the purpose of installing, operating, and maintaining Facilities in a Conduit.
- 1.24 Occupancy. The term Occupancy shall refer to the physical presence of telecommunication Facilities in a Duct, on a Pole, or within a Right of Way.
- 1.25 Person Acting on Licensee's Behalf. The terms Person Acting on Licensee's Behalf, personnel performing work on Licensee's behalf, and similar terms include both natural persons and firms and ventures of every type, including, but not limited to, corporations, partnerships, limited liability companies, sole proprietorships, and joint ventures. The terms Person Acting on Licensee's Behalf, personnel performing work on Licensee's behalf, and similar terms specifically include, but are not limited to, Licensee, its officers, directors, employees, agents, representatives, attorneys, contractors, subcontractors, and other persons or entities performing services at the request of or as directed by Licensee and their respective officers, directors, employees, agents, and representatives.

- 1.26 Person Acting on AT&T's Behalf. The terms Person Acting on AT&T's Behalf, personnel performing work on AT&T's behalf, and similar terms include both natural persons and firms and ventures of every type, including but not limited to corporations, partnerships, limited liability companies, sole proprietorships, and joint ventures. The terms Person Acting on AT&T's Behalf, personnel performing work on AT&T's behalf, and similar terms specifically include, but are not limited to, AT&T, its officers, directors, employees, agents, representatives, attorneys, contractors, subcontractors, and other persons or entities performing services at the request or on behalf of AT&T and their respective officers, directors, employees, agents, and representatives.
- 1.27 Pole. The term Pole refers to both utility Poles and Anchors but only to those utility Poles and Anchors owned or controlled by AT&T, and does not include utility Poles or Anchors with respect to which AT&T has no legal authority to permit attachments by other persons or entities.
- 1.28 Pole Attachment Act. The terms Pole Attachment Act and Pole Attachment Act of 1978 refer to those provisions of the Communications Act of 1934, as amended, now codified as 47 U.S.C. § 224.
- 1.29 Pre-License Survey. The term Pre-License Survey refers to all work and activities performed or to be performed to determine whether there is adequate capacity on a Pole or in a Conduit or Conduit System (including Manholes and Handholes) to accommodate Licensee's Facilities and to determine what Make-Ready Work, if any, is required to prepare the Pole, Conduit or Conduit System to accommodate Licensee's Facilities.
- 1.30 Right of Way (ROW). The term Right of Way/Rights of Way refer(s) to the right to use the land or other property of another party to place Poles, Conduits, cables, other structures and equipment, or to provide passage to access such structures and equipment. A Right of Way may run under, on, or above public or private property (including air space above public or private property) and may include the right to use discrete space in buildings, building complexes, or other locations.
- 1.31 Sheath. The term Sheath refers to a single outer covering containing communications wires, fibers, or other communications media.
- 1.32 Spare Capacity. The term Spare Capacity refers to any Poles, Conduit, Duct or Inner-Duct not currently assigned or subject to a pending Application for attachment/occupancy. Spare Capacity does not include an Inner-Duct (not to exceed one Inner-Duct per party) reserved by AT&T, Licensee, or a Third Party for maintenance, repair, or emergency restoration.
- 1.33 State. When capitalized, the term "State" (as used in terms such as "this State") refers to the State, for which this Agreement applies.

1.34 Third Party. The terms Third Party and Third Parties refer to persons and entities other than Licensee and AT&T. Use of the term Third Party does not signify that any such person or entity is a party to this Agreement or has any contractual rights hereunder.

2. SCOPE OF AGREEMENT

2.1 Undertaking of AT&T. AT&T shall provide Licensee with equal and nondiscriminatory access to Pole space, Conduits, Ducts, and Rights of Way on terms and conditions equal to those provided by AT&T to itself or to any other telecommunications service provider. Further, AT&T shall not withhold or delay assignment of such Facilities to Licensee because of the potential or forecasted needs of itself or other parties.

2.2 Attachments and Occupancies Authorized by this Agreement. AT&T shall issue one or more Licenses to Licensee authorizing Licensee to attach Facilities to AT&T's owned or controlled Poles and to place Facilities within AT&T's owned or controlled Conduits, Ducts or Rights of Way under the terms and conditions set forth in this Section and the Telecommunications Act of 1996.

2.2.1 Unless otherwise provided herein, authority to attach Facilities to AT&T's owned or controlled Poles, to place Facilities within AT&T's owned or controlled Conduits, Ducts or Rights of Way shall be granted only in individual Licenses granted under this Agreement and the placement or use of such Facilities shall be determined in accordance with such Licenses and procedures established in this Agreement.

2.2.2 Licensee agrees that its attachment of Facilities to AT&T's owned or controlled Poles, occupancy of AT&T's owned or controlled Conduits, Ducts or Rights of Way shall take place pursuant to the licensing procedures set forth herein, and AT&T agrees that it shall not unreasonably withhold or delay issuance of such Licenses.

2.2.3 Licensee may not sublease or otherwise authorize any Third Party to use any part of the AT&T Facilities licensed to Licensee under this Agreement, except that Licensee may lease its own Facilities to Third Parties, or allow affiliates to overlash cables to Licensee cables. Notwithstanding the above, upon notice to AT&T, Licensee may permit Third Parties who have an agreement with AT&T to overlash to existing Licensee attachments in accordance with the terms and conditions of such Third Party's agreement with AT&T, and Licensee may lease dark fiber to a Third Party.

- 2.3 Licenses. Subject to the terms and conditions set forth in this Agreement, AT&T shall issue to Licensee one or more Licenses authorizing Licensee to place or attach Facilities in or to specified Poles, Conduits, Ducts or Rights of Way owned or controlled by AT&T located within this state on a first come, first served basis. AT&T may deny a License Application if AT&T determines that the Pole, Conduit or Duct space specifically requested by Licensee is necessary to meet AT&T's present needs, or is Licensed by AT&T to another Licensee, or is otherwise unavailable based on engineering concerns. AT&T shall provide written notice to Licensee within a reasonable time specifying in detail the reasons for denying Licensee's request. AT&T shall have the right to designate the particular Duct(s) to be occupied; the location and manner in which Licensee's Facilities will enter and exit AT&T's Conduit System and the specific location and manner of installation for any associated equipment which is permitted by AT&T to occupy the Conduit System.
- 2.4 Access and Use of Rights-of-Way. AT&T acknowledges that it is required by the Telecommunications Act of 1996 to afford Licensee access to and use of all associated Rights of Way to any sites where AT&T's owned or controlled Poles, Manholes, Conduits, Ducts or other parts of AT&T's owned or controlled Conduit Systems are located.
- 2.4.1 AT&T shall provide Licensee with access to and use of such Rights of Way to the same extent and for the same purposes that AT&T may access or use such Rights of Way, including but not limited to access for ingress, egress or other access and to construct, utilize, maintain, modify, and remove Facilities for which Pole attachment, Conduit Occupancy, or ROW use Licenses have been issued, provided that any agreement with a Third Party under which AT&T holds such rights expressly or impliedly grants AT&T the right to provide such rights to others.
- 2.4.2 Where AT&T notifies Licensee that AT&T's agreement with a Third Party does not expressly or impliedly grant AT&T the ability to provide such access and use rights to others, upon Licensee's request, AT&T will use its best efforts to obtain the owner's consent and to otherwise secure such rights for Licensee. Licensee agrees to reimburse AT&T for the reasonable and demonstrable costs incurred by AT&T in obtaining such rights for Licensee.
- 2.4.3 In cases where a Third Party agreement does not grant AT&T the right to provide access and use rights to others as contemplated in 2.4.1 and AT&T, despite its best efforts, is unable to secure such access and use rights for Licensee in accordance with 2.4.2, or, in the case where Licensee elects not to invoke its rights under 2.4.1 or 2.4.2, Licensee shall be responsible for obtaining such permission to access and use such Rights of Way. AT&T shall cooperate with Licensee in obtaining such permission and shall not prevent or delay any Third Party assignment of ROW's to Licensee.

- 2.4.4 Where AT&T has any ownership or Rights of Way to buildings or building complexes, or within buildings or building complexes, AT&T shall offer to Licensee through a License or other attachment.
- 2.4.4.1 The right to use any available space owned or controlled by AT&T in the building or building complex to install Licensee equipment and Facilities; and
- 2.4.4.2 Ingress and egress to such space.
- 2.4.5 Except to the extent necessary to meet the requirements of the Telecommunications Act of 1996, neither this Agreement nor any License granted hereunder shall constitute a conveyance or assignment of any of either party's rights to use any public or private Rights of Way, and nothing contained in this Agreement or in any License granted hereunder shall be construed as conferring on one party any right to interfere with the other party's access to any such public or private Rights of Way.
- 2.5 No Effect on AT&T's Right to Convey Property. Nothing contained in this Agreement or in any License issued hereunder shall in any way affect the right of AT&T to convey to any other person or entity any interest in real or personal property, including any Poles, Conduit or Ducts to or in which Licensee has attached or placed Facilities pursuant to Licenses issued under this Agreement provided however that AT&T shall give Licensee reasonable advance written notice of such intent to convey.
- 2.6 No Effect on AT&T's Rights to Manage its Own Facilities. This Agreement shall not be construed as limiting or interfering with AT&T's rights set forth below, except to the extent expressly provided by the provisions of this Agreement or Licenses issued hereunder or by the Telecommunications Act of 1996 or other applicable laws, rules or regulations:
- 2.6.1 To locate, relocate, move, replace, modify, maintain, and operate AT&T's own Facilities within AT&T's Conduits, Ducts or rights-of way or any of AT&T's Facilities attached to AT&T's Poles at any time and in any reasonable manner which AT&T deems appropriate to serve its customers, avail itself of new business opportunities, or otherwise meet its business needs; or
- 2.6.2 To enter into new agreements or arrangements with other persons or entities permitting them to attach or place their Facilities to or in AT&T's Poles, Conduits or Ducts; provided, however, that such relocations, moves, replacements, modifications, maintenance and operations or new agreements or arrangements shall not substantially interfere with Licensee's Pole attachment, Conduit Occupancy or ROW use, rights provided by Licenses issued pursuant to this Agreement.

- 2.7 No Effect on Licensee's Rights to Manage its Own Facilities. This Agreement shall not be construed as limiting or interfering with Licensee's rights set forth below, except to the extent expressly provided by the provisions of this Agreement or Licenses issued hereunder or by the Telecommunications Act of 1996 or other applicable laws, rules or regulations:
- 2.7.1 To locate, relocate, move, replace, modify, maintain, and operate its own Facilities within AT&T's Conduits, Ducts or Rights of Way or its Facilities attached to AT&T's Poles at any time and in any reasonable manner which Licensee deems appropriate to serve its customers, avail itself of new business opportunities, or otherwise meet its business needs; or
- 2.7.2 To enter into new agreements or arrangements with other persons or entities permitting Licensee to attach or place its Facilities to or in such other persons' or entities' Poles, Conduits or Ducts, or Rights of Way; provided, however, that such relocations, moves, replacements, modifications, maintenance and operations or new agreements or arrangements shall not conflict with Licensee's obligations under Licenses issued pursuant to this Agreement.
- 2.8 No Right to Interfere with Facilities of Others. The provisions of this Agreement or any License issued hereunder shall not be construed as authorizing either party to this Agreement to rearrange or interfere in any way with any of the other party's Facilities, with the Facilities of other persons or entities, or with the use of or access to such Facilities by such other party or such other persons or entities, except to the extent expressly provided by the provisions of this Agreement or any License issued hereunder or by the Telecommunications Act of 1996 or other applicable laws, rules or regulations.
- 2.8.1 Licensee acknowledges that the Facilities of persons or entities other than AT&T and Licensee may be attached to or occupy AT&T's Poles, Conduits, Ducts and Rights of Way.
- 2.8.2 AT&T shall not attach, or give permission to any third parties to attach Facilities to, existing Licensee Facilities without Licensee's prior written consent. If AT&T becomes aware of any such unauthorized attachment to Licensee Facilities, AT&T shall use its best efforts to rectify the situation as soon as practicable.

- 2.8.3 With respect to Facilities occupied by Licensee or the subject of an Application for attachment by Licensee, AT&T will give to Licensee 60 days' written notice for Conduit extensions or reinforcements, 60 days' written notice for Pole line extensions, 60 days' written notice for Pole replacements, and 60 days' written notice of AT&T's intention to construct, reconstruct, expand or place such Facilities or of AT&T's intention not to maintain or use any existing Facility. Where AT&T elects to abandon or remove AT&T Facilities, the Facilities will be offered to existing occupants on a first-in, first-right to maintain basis. The party first electing to exercise this option will be required to execute the appropriate agreement with AT&T to transfer (purchase agreement) ownership from AT&T to new party, subject to then-existing licenses pertaining to such Facilities. If no party elects to maintain such Facilities, all parties will be required to remove their existing Facilities within ninety (90) days of written notice from AT&T. If an emergency or provisions of an applicable joint use agreement require AT&T to construct, reconstruct, expand or replace Poles, Conduits or Ducts occupied by Licensee or the subject of an Application for attachment by Licensee, AT&T will notify Licensee as soon as reasonably practicable of such proposed construction, reconstruction, expansion or replacement to enable Licensee, if it so desires, to request that a Pole, Conduit or Duct of greater height or capacity be utilized to accommodate an anticipated Facility need of Licensee.
- 2.8.4 Upon request and at Licensee's expense, AT&T shall remove any retired cable from Conduit Systems to allow for the efficient use of Conduit space within a reasonable period of time. AT&T retains salvage rights on any cable removed. In order to safeguard its structures and Facilities, AT&T reserves the right to remove retired cables and is under no obligation to allow Licensee the right to remove such cables. Based on sound engineering judgment, there may be situations where it would neither be feasible nor practical to remove retired cables.
- 2.8.5 Assignment of Space. Assignment of space on Poles, in Conduits or Ducts and within ROW's will be made pursuant to Licenses granted by AT&T on an equal basis to AT&T, Licensee and other telecommunication service providers.

3. REQUIREMENTS AND SPECIFICATIONS

- 3.1 Published Standards Incorporated in this Section by Reference. Licensee agrees that its Facilities shall be placed, constructed, maintained, repaired, and removed in accordance with current (as of the date when such work is performed) editions of the following publications, each of which is incorporated by reference as part of this Section :

- 3.1.1 The Blue Book Manual of Construction Procedures, Special Report SR-TAP-001421, published by Telcordia Technologies, f/k/a Bell Communications Research, Inc. ("BellCore"), and sometimes referred to as the "Blue Book";
- 3.1.2 The National Electrical Code (NEC); and
- 3.1.3 The National Electrical Safety Code (NESC).
- 3.2 Changes in Published Standards. Licensee agrees to rearrange its Facilities in accordance with changes in the standards published in the publications specified in Article 3.1 of this Agreement if required by law to do so or upon the mutual agreement of the parties.
- 3.3 Additional Electrical Design Specifications. Licensee agrees that, in addition to specifications and requirements referred to in Article 3.1 above, Licensee's Facilities placed in AT&T's Conduit System shall meet all of the following electrical design specifications:
- 3.3.1 No Facility shall be placed in AT&T's Conduit System in violation of FCC regulations.
- 3.3.2 Licensee's Facilities placed in AT&T's Conduit System shall not be designed to use the earth as the sole conductor for any part of Licensee's circuits.
- 3.3.3 Licensee's Facilities carrying more than 50 volts AC (rms) to ground or 135 volts DC to ground shall be enclosed in an effectively grounded Sheath or shield.
- 3.3.4 No coaxial cable of Licensee shall occupy a Conduit System containing AT&T's cable unless such cable of Licensee meets the voltage limitations of Article 820 of the National Electrical Code.
- 3.3.5 Licensee's coaxial cable may carry continuous DC voltages up to 1800 volts to ground where the conductor current will not exceed one-half amperes and where such cable has two separate grounded metal Sheaths or shields and a suitable insulating jacket over the outer Sheath or shield. The power supply shall be so designed and maintained that the total current carried over the outer Sheath shall not exceed 200 micro amperes under normal conditions. Conditions which would increase the current over this level shall be cleared promptly.
- 3.3.6 Neither party shall circumvent the other party's corrosion mitigation measures. Each party's new Facilities shall be compatible with the other party's Facilities so as not to damage any Facilities of the other party by corrosion or other chemical reaction.

- 3.4 Additional Physical Design Specifications. Licensee's Facilities placed in AT&T's Conduit System must meet all of the following physical design specifications:
- 3.4.1 Cables bound or wrapped with cloth or having any kind of fibrous coverings or impregnated with an adhesive material shall not be placed in AT&T's Conduit or Ducts.
- 3.4.2 The integrity of AT&T's Conduit System and overall safety of AT&T's personnel and other personnel working in AT&T's Conduit System requires that "dielectric cable" be required when Licensee's cable Facility utilizes an alternative Duct or route that is shared in the same trench by any current carrying Facility of a power utility.
- 3.4.3 New construction splices in Licensee's fiber optic and twisted pair cables shall be located in Manholes, pull boxes or Handholes.
- 3.5 Additional Specifications Applicable to Connections. The following specifications apply to connections of Licensee's Conduit to AT&T's Conduit System:
- 3.5.1 Licensee will be permitted to connect its Conduit or Duct only at the point of an AT&T Manhole. No attachment will be made by entering or breaking into Conduit between Manholes. All necessary work to install Licensee Facilities will be performed by Licensee or its contractor at Licensee's expense. In no event shall Licensee or its contractor "core bore" or make any other modification to AT&T Manhole(s) without the prior written approval of AT&T, which approval will not be unreasonably delayed or withheld.
- 3.5.2 AT&T may monitor, at Licensee's expense, the entrance and exit of Licensee's Facilities into AT&T's Manholes and the placement of Licensee's Facilities in AT&T's Manholes.
- 3.5.3 If Licensee constructs or utilizes a Duct connected to AT&T's Manhole, the Duct and all connections between that Duct and AT&T's Manhole shall be sealed, to the extent practicable, to prevent the entry of gases or liquids into AT&T's Conduit System. If Licensee's Duct enters a building, it shall also be sealed where it enters the building and at all other locations necessary to prevent the entry of gases and liquids from the building into AT&T's Conduit System.

- 3.6 Requirements Relating to Personnel, Equipment, Material, and Construction Procedures Generally. Duct clearing, rodding or modifications required to grant Licensee access to AT&T's Conduit Systems may be performed by AT&T at Licensee's expense at charges which represent AT&T's actual costs. Alternatively (at Licensee's option) such work may be performed by a contractor who demonstrates compliance with AT&T certification requirements, which certification requirements shall be consistent with F.C.C. rules. The parties acknowledge that Licensee, its contractors, and other persons acting on Licensee's behalf will perform work for Licensee (e.g., splicing Licensee's Facilities) within AT&T's Conduit System. Licensee represents and warrants that neither Licensee nor any Person Acting on Licensee's Behalf shall permit any person to climb or work on or in any of AT&T's Poles or to enter AT&T's Manholes or work within AT&T's Conduit System unless such person has the training, skill, and experience required to recognize potentially dangerous conditions relating to Pole or the Conduit Systems and to perform the work safely.
- 3.6.1 Licensee's Facilities within AT&T's Conduit System shall be constructed, placed, rearranged, modified, and removed upon receipt of License specified in 5.1. However, no such License will be required for the inspection, maintenance, repair or non-physical modifications of Licensee's Facilities.
- 3.6.2 Rodding or clearing of Ducts in AT&T's Conduit System shall be done only when specific authorization for such work has been obtained in advance from AT&T, which authorization shall not be unreasonably delayed or withheld by AT&T. The parties agree that such rodding or clearing shall be performed according to existing industry standards and practices. Licensee may contract with AT&T for performance of such work or (at Licensee's option) with a contractor who demonstrates compliance with AT&T certification requirements.
- 3.6.3 Personnel performing work on AT&T's or Licensee's behalf in AT&T's Conduit System shall not climb on, step on, or otherwise disturb the other party's or any Third Party's cables, air pipes, equipment, or other Facilities located in any Manhole or other part of AT&T's Conduit System.
- 3.6.4 Personnel performing work on AT&T's or Licensee's behalf within AT&T's Conduit System (including any Manhole) shall, upon completing their work, make reasonable efforts to remove all tools, unused materials, wire clippings, cable Sheathing and other materials brought by them to the work site.
- 3.6.5 All of Licensee's Facilities shall be firmly secured and supported in accordance with BellCore and industry standards.
- 3.6.6 Identification of Facilities in Conduit/Manholes. Licensee's Facilities shall be plainly identified with Licensee's name in each Manhole with a firmly affixed permanent tag that meets standards set by AT&T for its own Facilities.

- 3.6.6.1 Identification of Pole Attachments. Licensee's Facilities attached to AT&T Poles shall be plainly identified with Licensee's name firmly affixed at each Pole by a permanent tag that meets industry standards.
- 3.6.7 Manhole pumping and purging required in order to allow Licensee's work operations to proceed shall be performed by a vendor approved by AT&T in compliance with AT&T Practice Sec. 620-145-011BT, "Manhole Contaminants, Water, Sediment or Debris Removal and Reporting Procedures," and any amendments, revisions or supplements thereto and in compliance with all regulations and standards established by the United States Environmental Protection Agency and by any applicable state or local environmental regulators.
- 3.6.8 Planks or other types of platforms shall not be installed using cables, pipes or other equipment as a means of support. Platforms shall be supported only by cable racks.
- 3.6.9 Any leak detection liquid or device used by Licensee or personnel performing work on Licensee's Facilities within AT&T's Conduit System shall be of a type approved by AT&T or BellCore.
- 3.6.10 When Licensee or personnel performing work on Licensee's behalf are working within or in the vicinity of any part of AT&T's Poles or Conduit System which is located within, under, over, or adjacent to streets, highways, alleys or other traveled Rights of Way, Licensee and all personnel performing work on Licensee's behalf shall follow procedures which Licensee deems appropriate for the protection of persons and property. Licensee shall be responsible, at all times, for determining and implementing the specific steps required to protect persons and property at the site. Licensee will provide all traffic control and warning devices required to protect pedestrian and vehicular traffic, workers and property from danger. AT&T shall have no responsibility for the safety of personnel performing work on Licensee's behalf, for the safety of bystanders, and for insuring that all operations conform to current OSHA regulations and all other governmental rules, ordinances or statutes. AT&T reserves the right to suspend Licensee's activities on, in or in the vicinity of AT&T's Poles or Conduit System if, in AT&T's reasonable judgment, any hazardous condition arises due to the activity (including both acts and omissions) of Licensee or any personnel performing work on Licensee's behalf, which suspension shall cease when the condition has been rectified.
- 3.6.11 Except for protective screens, no temporary cover shall be placed by Licensee or personnel performing work on Licensee's behalf over an open Manhole unless it is at least four feet above the surface level of the Manhole opening.
- 3.6.12 Smoking or the use of any open flame is prohibited in AT&T's Manholes, in any other portion of AT&T's Conduit System, or within 10 feet of any open Manhole entrance; provided that this provision will not prohibit the use of spark producing tools such as electric drills, fusion splicers, etc.

- 3.6.13 Artificial lighting, when required, will be provided by Licensee. Only explosion-proof lighting fixtures shall be used.
- 3.6.14 Neither Licensee nor personnel performing work on Licensee's behalf shall allow any combustible gas, vapor, liquid, or material to accumulate in AT&T's Conduit System (including any Manhole) during work operations performed within or in the vicinity of AT&T's Conduit System.
- 3.6.15 Licensee will abide by any laws, regulations or ordinances regarding the use of spark producing tools, equipment or devices in AT&T's Manholes, in any other portions of AT&T's Conduit System, or within 10 feet of any open Manhole opening. This includes, but is not limited to, such tools as electric drills and hammers, meggers, breakdown sets, induction sets, and the like.
- 3.7 Opening of Manholes. The following requirements apply to the opening of AT&T's Manholes and the authority of AT&T personnel present when work on Licensee's behalf is being performed within or in the vicinity of AT&T's Conduit System.
- 3.7.1 AT&T's Manholes shall be opened only as permitted by AT&T's authorized employees or agents, which permission shall not be unreasonably denied or delayed.
- 3.7.2 Licensee shall notify AT&T forty-eight (48) hours in advance of any routine work operation requiring entry into any of AT&T's Manholes.
- 3.7.3 Licensee shall be responsible for obtaining any necessary authorization from appropriate authorities to open Manholes for Conduit work operations therein.
- 3.7.4 AT&T's authorized employee or agent shall not direct or control the conduct of Licensee's work at the work site. The presence of AT&T's authorized employee or agent at the work site shall not relieve Licensee or personnel performing work on Licensee's behalf of their responsibility to conduct all work operations within AT&T's Conduit System in a safe and workmanlike manner.
- 3.7.5 Although AT&T's authorized employee or agent shall not direct or control the conduct of Licensee's work at the work site, AT&T's employee or agent shall have the authority to suspend Licensee's work operations within AT&T's Conduit System if, in the reasonable discretion of such AT&T employee or agent, it appears that any hazardous conditions arise or any unsafe practices are being followed by Licensee or personnel performing work on Licensee's behalf.
- 3.8 OSHA Compliance: Notice to AT&T of Unsafe Conditions. Licensee agrees that:
- 3.8.1 Its Facilities shall be constructed, placed, maintained, repaired, and removed in accordance with the Occupational Safety and Health Act (OSHA) and all rules and regulations promulgated thereunder,

- 3.8.2 All persons acting on Licensee's behalf, including but not limited to Licensee's employees, agents, contractors, and subcontractors shall, when working on or within AT&T's Poles or Conduit System, comply with OSHA and all rules and regulations thereunder;
- 3.8.3 Licensee shall establish appropriate procedures and controls to assure compliance with all requirements of this section; and
- 3.8.4 Licensee (and any Person Acting on Licensee's Behalf) may report unsafe conditions on, in or in the vicinity of AT&T's Poles or Conduit System to AT&T.
- 3.9 Compliance with Environmental Laws and Regulations. Licensee acknowledges that, from time to time, environmental contaminants may enter AT&T's Conduit System and accumulate in Manholes or other Conduit Facilities and those certain Conduits (transite) are constructed with asbestos-containing materials. If AT&T has knowledge of the presence of such contaminants in a Conduit for which Licensee has applied for or holds a License, AT&T will promptly notify Licensee of such fact.
- Notwithstanding any of AT&T's notification requirements in this Attachment, Licensee acknowledges that some of AT&T's Conduit is fabricated from asbestos-containing materials. Such Conduit is generally marked with a designation of "C Fiber Cement Conduit," "Transite," or "Johns-Manville." Until proven otherwise, Licensee will presume that all Conduit not fabricated of plastic, tile, or wood is asbestos-containing and will handle it pursuant to all applicable regulations relating to worker safety and protection of the environment. AT&T makes no representations to Licensee or personnel performing work on Licensee's behalf that AT&T's Conduit System or any specific portions thereof will be free from environmental contaminants at any particular time. The acknowledgments and representations set forth in the two preceding sentences are not intended to relieve AT&T of any liability which it would otherwise have under applicable law for the presence of environmental contaminants in its Conduit Facilities. Licensee agrees to comply with the following provisions relating to compliance with environmental laws and regulations:
- 3.9.1 Licensee's Facilities shall be constructed, placed, maintained, repaired, and removed in accordance with all applicable federal, state, and local environmental statutes, ordinances, rules, regulations, and other laws, including but not limited to the Resource Conservation and Recovery Act (42 U.S.C. §§ 9601 et. seq.), the Toxic Substance Control Act (15 U.S.C. §§ 2601-2629), the Clean Water Act (33 U.S.C. §§ 1251 et. seq.), and the Safe Drinking Water Act (42 U.S.C. §§ 300f-300j).

- 3.9.2 All persons acting on Licensee's behalf, including but not limited to Licensee's employees, agents, contractors, and subcontractors, shall, when working on, within or in the vicinity of AT&T's Poles or Conduit System, comply with all applicable federal, state, and local environmental laws, including but not limited to all environmental statutes, ordinances, rules, and regulations.
- 3.9.3 Licensee shall establish appropriate procedures and controls to assure compliance with all requirements of this section. AT&T will be afforded a reasonable opportunity to review such procedures and controls and provide comments that will be reasonably considered in advance of their implementation. Review and comment by AT&T pursuant to this section will be provided in a timely manner.
- 3.9.4 Licensee and all personnel performing work on Licensee's behalf shall comply with such standards and practices as AT&T and Licensee may from time to time mutually agree to adopt to comply with environmental laws and regulations including, without limitation, AT&T Practice Sec. 620-145-011BT, "Manhole Contaminants, Water, Sediment or Debris Removal and Reporting Procedures". Pursuant to this practice, neither Licensee nor AT&T nor personnel performing work on either party's behalf shall discharge water or any other substance from any AT&T Manhole or other Conduit Facility onto public or private property, including any storm water drainage system, without first testing such water or substance for contaminants in accordance with mutually agreed standards and practices and determining that such discharge would not violate any environmental law, create any environmental risk or hazard, or damage the property of any person. No such waste material shall be deposited on AT&T premises for storage or disposal.
- 3.10 Compliance with Other Governmental Requirements. Licensee agrees that its Facilities attached to AT&T's Facilities shall be constructed, placed, maintained, and removed in accordance with the ordinances, rules, and regulations of any governing body having jurisdiction of the subject matter. Licensee shall comply with all statutes, ordinances, rules, regulations and other laws requiring the marking and lighting of aerial wires, cables and other structures to ensure that such wires, cables and structures are not a hazard to aeronautical navigation. Licensee shall establish appropriate procedures and controls to assure such compliance by all persons acting on Licensee's behalf, including but not limited to, Licensee's employees, agents, contractors, and subcontractors.
- 3.11 Differences in Standards or Specifications. To the extent that there may be differences in any applicable standards or specifications referred to in this Article 3, the most stringent standard or specification shall apply.

- 3.12 Licensee Solely Responsible for the Condition of Its Facilities. Licensee shall be responsible at all times for the condition of its Facilities and its compliance with the requirements, specifications, rules, regulations, ordinances, and laws specified above. In this regard, AT&T shall have no duty to Licensee to inspect or monitor the condition of Licensee's Facilities (including but not limited to splices and other Facilities connections) located within AT&T's Conduit and Ducts or any attachment of Licensee's Facilities to AT&T's Poles, Anchors, Anchor/Guy Strands or other Pole Facilities. AT&T may, however, conduct such inspections and audits of its Poles and Conduit System as AT&T determines reasonable or necessary. Such inspection and audits shall be conducted at AT&T's expense with the exception of (1) follow-up inspection to confirm remedial action after an observed Licensee violation of the requirements of this Agreement; and (2) inspection of Licensee Facilities in compliance with a specific mandate of appropriate governmental authority for which inspections the Cost shall be borne by Licensee. Either party may audit the other party's compliance with the terms of this Section. Observed safety hazards or imminent Facility failure conditions of another party shall be reported to the affected party where such party can be readily identified.
- 3.13 Efficient use of Conduit. AT&T will install Inner-Ducts to increase Duct space in existing Conduit as Facilities permit. The full complement of Inner-Ducts will be installed which can be accommodated under sound engineering principles. The number of Inner-Ducts which can reasonably be installed will be determined by AT&T.
- 4** **ADDITIONAL LEGAL REQUIREMENTS**
- 4.1 Third Party Property Owners. Licenses granted under this Section authorize Licensee to place Facilities in, or attach Facilities to, Poles, Conduits and Ducts owned or controlled by AT&T but do not affect the rights of landowners to control terms and conditions of access to their property.
- 4.1.1 Licensee agrees that neither Licensee nor any persons acting on Licensee's behalf, including but not limited to Licensee's employees, agents, contractors, and subcontractors, shall engage in any conduct which damages public or private property in the vicinity of AT&T's Poles or Conduit System, interferes in any way with the use or enjoyment of public or private property except as expressly permitted by the owner of such property, or creates a hazard or nuisance on such property (including, but not limited to, a hazard or nuisance resulting from any abandonment or failure to remove Licensee's Facilities or any construction debris from the property, failure to erect warning signs or barricades as may be necessary to give notice to others of unsafe conditions on the premises while work performed on Licensee's behalf is in progress, or failure to restore the property to a safe condition after such work has been completed).

- 4.2 Required Permits, Certificates and Licenses. Licensee shall be responsible for obtaining any building permits or certificates from governmental authorities necessary to construct, operate, maintain and remove its Facilities on public or private property.
- 4.2.1 Licensee shall not attach or place its Facilities to or in AT&T's Poles, Conduit or Duct located on any property for which it or AT&T has not first obtained all required authorizations.
- 4.2.2 AT&T shall have the right to request evidence that all appropriate authorizations have been obtained. However, such request shall not delay AT&T's Pre-License Survey work.
- 4.3 Lawful Purposes. All Facilities placed by Licensee in AT&T's Conduit and Ducts or on AT&T's Poles, Anchors or Anchor/Guy Strands must serve a lawful purpose and the uses made of Licensee's Facilities must comply with all applicable federal, state, and local laws and with all federal, state, and local regulatory rules, regulations, and requirements. In this regard, Licensee shall not utilize any Facilities occupying or attached to AT&T's Conduits, Ducts or Poles for the purpose of providing any services which it is not authorized by law to provide or for the purpose of enabling any other person or entity to provide any such services.
- 5. FACILITIES AND LICENSES**
- 5.1 Licenses Required. Before placing any Facilities in AT&T's Conduits or Ducts or attaching any Facilities to AT&T's Poles, Anchors or Anchor/Guy Strands, Licensee must first apply for and receive a written License from AT&T.
- 5.2 Provision of Records and Information to Licensee. In order to obtain information regarding Facilities, Licensee shall make a written request to AT&T, identifying with reasonable specificity the geographic area for which Facilities are required, the types and quantities of the required Facilities and the required in-service date. In response to such request, AT&T shall provide Licensee with information regarding the types, quantity and location (which may be provided by provision of route maps) and availability of AT&T Poles, Conduit and right-of-way located within the geographic area specified by Licensee. Provision of information under the terms of this section shall include the right of Licensee employees or agents to obtain copies of engineering records or drawings which pertain to those Facilities within the geographic area identified in Licensee's request. Such copies of records shall be provided to Licensee via courier at the expense of Licensee or otherwise available at the records location center set forth in Exhibit II. However, all requests for copies of records shall be submitted to the Competitive Structures Provisioning Center in Birmingham, Alabama. The costs of producing and mailing copies of records, which are to be paid by Licensee, are on an individual case basis. The components which make up the total costs are actual:

- 1) AT&T employee costs based on the time spent researching, reviewing and copying records
- 2) Copying costs
- 3) Shipping costs

- 5.3 No Warranty of Record Information. Licensee acknowledges that records and information provided by AT&T pursuant to paragraph 5.2 may not reflect field conditions and that physical inspection is necessary to verify presence and condition of outside plant Facilities and Right of Way. In providing such records and information, AT&T assumes no liability to Licensee or any Third Party for errors/omissions contained therein.
- 5.4 Determination of Availability. AT&T shall provide Pole, Conduit and right-of-way availability information in response to a request from Licensee which identifies with reasonable specificity the Facilities for which such information is desired. If such request includes Joint Use Pole(s) AT&T shall respond with respect to such Joint Use Pole(s) as to what Make-Ready Work is required for AT&T's Facilities, only. Notwithstanding any other provision, AT&T shall not determine space availability upon any Joint Use Pole(s). Licensee may elect to be present at any field based survey of Facilities identified pursuant to this paragraph and AT&T shall provide Licensee at least forty-eight (48) hours notice prior to initiating such field survey. Licensee employees or agents shall be permitted to enter AT&T Manholes and inspect such structures to confirm usability and/or evaluate condition of the structure(s) with at least forty-eight (48) hours notice to AT&T, with an AT&T representative present and at Licensee's expense.
- 5.5 Assignment of Conduit, Duct and Pole Space. AT&T shall not unreasonably deny or delay issuance of any License and, in any event, AT&T shall issue such License as follows: (a) after the determination has been made that Make-Ready Work is not required, or (b) completion of Make-Ready Work.
- 5.5.1 No Make-Ready Work Required. If AT&T determines that no Make-Ready Work is required, AT&T shall approve Applications for Pole attachment and Conduit Occupancy Licenses and issue such Licenses within twenty (20) business days after the determination has been made that no Make-Ready Work is required, but in no event later than 45 days after AT&T receives Licensee's Application, which period shall exclude any time AT&T is awaiting a response from Licensee.
- 5.5.2 Make-Ready Work Required. If Make-Ready Work is to be performed by AT&T, such available space shall remain in effect until make-ready costs are presented to Licensee and approval by Licensee pursuant to the time frames herein stated in 6.2. If Licensee approves AT&T's make-ready costs, Licensee shall have twelve (12) months from the date of Application approval to install its Facilities.

If Licensee rejects AT&T's costs for Make-Ready Work, but then elects to perform the Make-Ready Work itself or through a contractor or if Licensee elects from the time of Application to perform the Make-Ready Work itself or through a contractor, Licensee shall install its Facilities within twelve (12) months from the date that Licensee informs AT&T that Licensee will perform Make-Ready Work. In the event Licensee does not install its Facilities within the time frames set out in this Section 5.5, the assignment shall be void and such space shall become available.

6. MAKE-READY WORK

- 6.1 Work Performed by AT&T. If performed by AT&T, Make-Ready Work to accommodate Licensee's Facilities on Poles, Joint Use Pole(s) or in Conduit System shall be included in the normal work load schedule of AT&T with construction responsibilities in the geographic areas where the relevant Poles or Conduit Systems are located and shall not be entitled to priority, advancement, or preference over other work to be performed by AT&T in the ordinary course of AT&T's business.
- 6.1.1 If Licensee desires Make-Ready Work to be performed on an expedited basis and AT&T agrees to perform the work on such a basis, AT&T shall recalculate the estimated make-ready charges. If Licensee accepts AT&T's offer, Licensee shall pay such additional charges.
- 6.2 All charges for Make-Ready Work, including work on Joint Use Pole(s), performed by AT&T are payable in advance, with the amount of any such advance payment to be due within sixty (60) days after receipt of an invoice from AT&T. AT&T will begin Make-Ready Work required to accommodate Licensee after receipt of Licensee's make-ready payment.
- 6.3 Work Performed by Certified Contractor. In lieu of obtaining performance of Make-Ready Work by AT&T, Licensee at its option may arrange for the performance of such work by a contractor certified by AT&T to work on or in its Facilities. Certification shall be granted based upon reasonable and customary criteria employed by AT&T in the selection of its own contract labor. Notwithstanding any other provisions of this Section, Licensee may not employ a contractor to accomplish Make-Ready Work if AT&T is likewise precluded from contractor selection under the terms of an applicable joint use agreement or collective bargaining agreement. In accordance with section 3.6.7, all Manhole pumping and purging shall be performed by a vendor approved by AT&T.
- 6.4 Completion of Make-Ready Work. AT&T will issue a License to Licensee at the time all Make-Ready Work necessary to Licensee's attachment or occupancy has been completed.

7. APPLICATION FORM AND FEES

7.1 Application Process. To apply for a License under this Attachment, Licensee shall submit the appropriate AT&T administrative form(s), per Exhibit 1, (two (2) sets of each and either a route map specifically indicating Licensee desired route or engineered drawings are to be included). Licensee has the option of (1) requesting copies of AT&T records only, (2) requesting a records and/or field survey to determine availability, and/or (3) requesting a make-ready estimate. Any Joint Use Pole(s) included in such a request shall be included in the records/field survey and make-ready estimate. Before the Application and Conduit Occupancy License or Application and Pole Attachment License form is approved for attachment, Make-Ready Work must be complete or a records or field survey has determined that Make-Ready Work is not required. Licensee shall submit with Licensee's License Application a proposed or estimated construction schedule as set forth below in Section 10.

AT&T will process License Applications in the order in which they are received; provided, however, that when Licensee has multiple Applications on file with AT&T, Licensee may designate its desired priority of completion of pre-licenses and Make-Ready Work with respect to all such Applications.

7.1.1 Each Application for a License under this Section shall specify the proposed route of Licensee's Facilities and identify the Conduits and Ducts or Poles, Joint Use Pole(s) and Pole Facilities along the proposed route in which Licensee desires to place or attach its Facilities, and describe the physical size, weight and jacket material of the cable which Licensee desires to place in each Conduit or Duct or the number and type of cables, apparatus enclosures and other Facilities which Licensee desires to attach to each Pole or Joint Use Pole.

7.1.2 Each Application for a License under this Section shall be accompanied by a proposed (or estimated) construction schedule containing the information specified below in 10.1 of this Agreement, and an indication of whether Licensee will, at its option, perform its own Make-Ready Work.

7.2

Multiple Cables, Multiple Services, Lashing or Placing Additional Cables, and Replacement of Facilities. Licensee may include multiple cables in a single License Application and multiple services (e.g., CATV and non-CATV services) may be provided by Licensee in the same cable Sheath. Licensee's Lashing additional cable to existing Facilities and placing additional cables in Conduits or Ducts already occupied by Licensee's Facilities shall be permitted, and no additional fees will be applied; provided, however, that if Licensee desires to lash additional cable to existing Facilities of a Third Party, Licensee shall provide AT&T with reasonable notice, and shall obtain written permission from the owner of the existing Facilities. If AT&T determines that the requested Lashing would violate safety or engineering requirements, AT&T shall provide written notice to Licensee within a reasonable time specifying in detail AT&T's findings. If Licensee desires to place additional cables in Conduits or Ducts which are already occupied, or to replace existing Facilities with new Facilities substantially different from those described in Licenses in effect, Licensee must apply for and acquire a new License specifically describing the physical size, weight and jacket material of the cable to be placed in AT&T's Conduits and Ducts or the physical size, weight, and jacket type of cables and the size and weight of apparatus enclosures and other Facilities to be attached to AT&T Poles.

7.3 Each party hereby designates the employees named below as their single point of contact for any and all purposes of this Section, including, but not limited to, processing Licenses and Applications and providing records and information. Each party may at any time designate a new point of contact by giving written notice of such change.

- 8. PROCESSING OF APPLICATIONS (INCLUDING PRELICENSE SURVEYS AND FIELD INSPECTIONS)**
- 8.1 Licensee's Priorities. When Licensee has multiple Applications on file with AT&T, Licensee shall designate its desired priority of completion of Pre-License Surveys and Make-Ready Work with respect to all such Applications.
- 8.2 Prelicense Survey. After Licensee has submitted its written Application for a License, a Pre-License Survey (including a field inspection) will be performed by either party, in the company of a representative of the other party as mutually agreed, to determine whether AT&T's Poles, Anchors and Anchor/Guy Strands, or Conduit System, in their present condition, can accommodate Licensee's Facilities, without substantially interfering with the ability of AT&T or any other authorized person or entity to use or access the Pole, Anchor or Anchor/Guy Strand or any portion of AT&T's Conduit System or Facilities attached to AT&T's Pole or placed within or connected to AT&T's Conduit System. If Pre-License Survey is to be conducted by AT&T, AT&T will provide Licensee a Cost, based on its review of Licensee's Application request, to perform the Pre-License Survey. AT&T will submit to Licensee costs to complete the Pre-License Survey; after receipt of Licensee's payment of Pre-License Survey costs, AT&T will schedule the survey. If Licensee gives its prior written consent in writing, the determination of Duct availability may include the rodding of Ducts at Licensee's expense.
- 8.2.1 The purpose of the Pre-License Survey is to determine whether Licensee's proposed attachments to AT&T's Poles or occupancy of AT&T's Conduit and Ducts will substantially interfere with use of AT&T's Facilities by AT&T and others with Facilities occupying, connected or attached to AT&T's Pole or Conduit System and to determine what Make-Ready Work is required to accommodate Licensee's Facilities on AT&T's Poles, Joint Use Pole(s), or Conduit, Duct, or Right-of-Way and the cost associated with AT&T performing such Make-Ready Work and to provide information to Licensee for its determination of whether the Pole, Anchor, Anchor/Guy Strand, Conduit, Duct, or Right-of-Way is suitable for its use.
- 8.2.2 Based on information provided by AT&T, Licensee shall determine whether AT&T's Pole, Anchor, Anchor/Guy Strand, Conduit and Duct Facilities are suitable to meet Licensee's needs.
- 8.2.3 AT&T may not unreasonably refuse to continue to process an Application based on AT&T's determination that Licensee's proposed use of AT&T's Facilities will not be in compliance with applicable requirements, specifications, rules, regulations, ordinances, and laws. Licensee shall be responsible for making its own, independent determination that its use of such Facilities will be in compliance with such requirements, specifications, rules, regulations, ordinances and laws. Licensee acknowledges that AT&T is not explicitly or implicitly warranting to Licensee that Licensee's proposed use of AT&T's Facilities will be in compliance with applicable requirements, specifications, rules, regulations, ordinances, and laws.

8.3 Administrative Processing. The administrative processing portion of the Pre-License Survey (which includes without limitation processing the Application, preparing Make-Ready Work orders, notifying Joint Users and other persons and entities of work requirements and schedules, coordinating the relocation/rearrangement of AT&T and/or other Licensed Facilities) will be performed by AT&T at Licensee's expense. Anything to the contrary herein notwithstanding, AT&T shall bear no responsibility for the relocation, rearrangement or removal of Facilities used for the transmission or distribution of electric power.

9. ISSUANCE OF LICENSES

9.1 Obligation to Issue Licenses. AT&T shall issue a License to Licensee pursuant to this Article 5.1. AT&T and Licensee acknowledge that each Application for a License shall be evaluated on an individual basis. Nothing contained in this section shall be construed as abridging any independent Pole attachment rights or Conduit or Duct access rights which Licensee may have under the provisions of any applicable federal or state laws or regulations governing access to AT&T's Poles, Conduits and Ducts, to the extent the same are not inconsistent with the Telecommunications Act of 1996. Each License issued hereunder shall be for an indefinite term, subject to Licensee's compliance with the provisions applicable to such License and further subject to Licensee's right to terminate such License at any time for any reason upon at least thirty (30) days' prior written notice.

9.1.1 Issuance of Licenses When No Make-Ready Work is Required Moved to 5.5.1.

9.2 Multiple Applications. Licensee acknowledges that multiple parties including AT&T may seek to place their Facilities in AT&T's Conduit and Ducts or make attachments to Poles at or about the same time, that the Make-Ready Work required to prepare AT&T's Facilities to accommodate multiple applicants may differ from the Make-Ready Work required to accommodate a single applicant, that issues relating to the proper apportionment of costs arise in multi-applicant situations that do not arise in single-applicant situations, and that cooperation and negotiations between all applicants and AT&T may be necessary to resolve disputes involving multiple Applications for permission to place Facilities in/on the same Pole, Conduit, Duct, or right-of-way.

9.2.1 All Applications will be processed on a first-come, first-served basis.

9.3 Agreement to Pay for All Make-Ready Work Completed. Licensee's submission of written authorization for Make-Ready Work shall also constitute Licensee's agreement to pay additional cost-based charges, if any, for completed Make-Ready Work.

- 9.4 Payments to Others for Expenses Incurred in Transferring or Arranging Their Facilities. Licensee shall make arrangements with the owners of other Facilities located in or connected to AT&T's Conduit System or attached to AT&T's Poles, Anchors or Anchor/Guy Strands regarding reimbursement for any expenses incurred by them in transferring or rearranging their Facilities to accommodate the placement or attachment of Licensee's Facilities in or to AT&T's structures.
- 9.5 Make-Ready Work on an Expedited Basis. If Licensee is willing to authorize AT&T to perform Make-Ready Work on an expedited basis, and if AT&T agrees to perform the work on such a basis, AT&T shall recalculate the estimated make-ready charges. If Licensee accepts AT&T's offer, Licensee shall pay such additional charges, if any. All charges for Make-Ready Work performed by AT&T are payable in advance, with the amount of any such advance payment to be due within sixty (60) days after receipt of an invoice from AT&T. After receipt of payment, AT&T will schedule the work for completion.
- 9.6 License. When Licensee's Application for a Pole attachment or Conduit Occupancy License is approved, and all required Make-Ready Work completed, AT&T will execute and return a signed authorization to Licensee, as appropriate, authorizing Licensee to attach or place the specified Facilities on AT&T's Poles or in AT&T's Conduit or Ducts.
- 9.6.1 Each License issued under this Section shall authorize Licensee to attach to AT&T's Poles or place or maintain in AT&T's Conduit or Ducts only those Facilities specifically described in the License, and no others.
- 9.6.2 Except as expressly stated to the contrary in individual Licenses issued hereunder, each License issued pursuant to this Section shall incorporate all terms and conditions of this Section whether or not such terms or conditions are expressly incorporated by reference on the face of the License itself.
- 10. CONSTRUCTION OF LICENSEE'S FACILITIES**
- 10.1 Construction Schedule. Licensee shall submit with Licensee's License Application a proposed or estimated construction schedule. Promptly after the issuance of a License permitting Licensee to attach Facilities to AT&T's Poles or place Facilities in AT&T's Conduit or Ducts, Licensee shall provide AT&T with an updated construction schedule and shall thereafter keep AT&T informed of significant anticipated changes in the construction schedule. Construction schedules required by this Section shall include, at a minimum, the following information:
- 10.1.1 The name, title, business address, and business telephone number of the manager responsible for construction of the Facilities;
- 10.1.2 The names of each contractor and subcontractor which will be involved in the construction activities;

- 10.1.3 The estimated dates when construction will begin and end; and
- 10.1.4 The approximate dates when Licensee or persons acting on Licensee's behalf will be performing construction work in connection with the placement of Licensee's Facilities in AT&T's Conduit or Ducts.
- 10.2 Additional Pre-construction Procedures for Facilities Placed in Conduit System. The following procedures shall apply before Licensee places Facilities in AT&T's Conduit System:
- 10.2.1 Licensee shall give written notice of the type of Facilities which are to be placed; and
- 10.2.2 AT&T shall designate the particular Duct or Ducts or inner ducts (if Available) to be occupied by Licensee's Facilities, the location and manner in which Licensee's Facilities will enter and exit AT&T's Conduit System, and the specific location and manner of installation of any associated equipment which is permitted by AT&T to occupy the Conduit System. Licensee may not occupy a Duct other than the specified Duct without the express written consent of AT&T. AT&T shall provide to Licensee space in Manholes for racking and storage of up to fifty (50) feet of cable, provided space is available.
- 10.3 AT&T Not Responsible for Constructing or Placing Facilities. AT&T shall have no obligation to construct any Facilities for Licensee or to attach Licensee's Facilities to, or place Licensee's Facilities in, AT&T's Poles or Conduit System, except as may be necessary to facilitate the interconnection of unbundled network elements or except to the extent expressly provided in this Section, any License issued hereunder, or by the Telecommunications Act of 1996 or any other applicable law.
- 10.4 Licensee Responsible for Constructing, Attaching and Placing Facilities. Except where otherwise mutually agreed by Licensee and AT&T, Licensee shall be responsible for constructing its own Facilities and attaching those Facilities to, or placing them in AT&T's Poles, Conduit or Ducts at Licensee's sole Cost and expense. Licensee shall be solely responsible for paying all persons and entities who provide materials, labor, access to real or personal property, or other goods or services in connection with the construction and placement of Licensee's Facilities and for directing the activities of all persons acting on Licensee's behalf while they are physically present on AT&T's Pole, in any part of AT&T's Conduit System or in the vicinity of AT&T's Poles or Conduit System.
- 10.5 Compliance with Applicable Standards, Health and Safety Requirements, and Other Legal Requirements. Licensee shall construct its Facilities in accordance with the provisions of this Section and all Licenses issued hereunder.
- 10.5.1 Licensee shall construct, attach and place its Facilities in compliance with all Requirements and Specifications set forth above in this Agreement.

- 10.5.2 Licensee shall satisfy all Legal Requirements set forth above in this Agreement.
- 10.5.3 Licensee shall not permit any Person Acting on Licensee's Behalf to perform any work on AT&T's Poles or within AT&T's Conduit System without first verifying, to the extent practicable, on each date when such work is to be performed, that the condition of the Pole or Conduit System is suitable for the work to be performed. If Licensee or any person working on Licensee's behalf determines that the condition of the Pole or Conduit System is not suitable for the work to be performed, Licensee shall notify AT&T of the condition of the Pole or Conduit System in question and shall not proceed with construction activities until Licensee is satisfied that the work can be safely performed.
- 10.6 Construction Notices. If requested to do so, Licensee shall provide AT&T with information to reasonably assure AT&T that construction has been performed in accordance with all applicable standards and requirements.
- 10.7 Points for Attachment. AT&T shall specify the point of attachment of each Pole or Anchor to be occupied by Licensee's Facilities. Licensee's facilities shall be attached above AT&T's Facilities. When the Facilities of more than one applicant are involved, AT&T will attempt, to the extent practicable, to designate the same relative position on each Pole or Anchor for each applicant's Facilities.
- Licensee power supply units shall be located in accordance with the National Electrical Safety Code and the Telcordia Blue Book, Manual of Constructions Procedures.
- AT&T will evaluate and approve in its sole discretion, on an individual case basis, the location of certain pole mounted equipment, such as cabinets, amplifiers and wireless equipment including but not limited to antennas. The approval and location of such attachments are dependent upon factors including but not limited to climbing space requirements and the types of existing attachments.
- Licensee shall hold AT&T harmless and indemnify AT&T for damages to itself or third parties in accordance with Section 23 of this agreement, that result from the operation or maintenance of Licensee's attachments, including but not limited to power supplies, antennas, cabinets and wireless equipment..
- 10.8 Manhole and Conduit Break-Outs. Licensee shall be permitted to add Conduit ports to AT&T Manholes when existing Conduits do not provide the pathway connectivity needed by Licensee; provided the structural integrity of the Manhole is maintained, and sound engineering judgment is employed.
- 10.9 Completion of Licensee Construction. For each Licensee attachment to or occupancy within AT&T Facilities, Licensee will provide to AT&T's single-point of contact (within 20 days of Licensee construction-complete date) a complete set of actual placement drawings for posting to AT&T records.
- 11. USE AND ROUTINE MAINTENANCE OF LICENSEE'S FACILITIES**
- 11.1 Use of Licensee's Facilities. Each License granted under this Section authorizes Licensee to have access to Licensee's Facilities on or in AT&T's Poles, Conduits and Ducts as needed for the purpose of serving Licensee's customers, including, but not limited to, powering electronics, monitoring Facilities, or transporting signaling.

- 11.2 Routine Maintenance of Licensee's Facilities. Each License granted under this Section authorizes Licensee to engage in routine maintenance of Licensee's Facilities located on or in AT&T's Poles, Conduits, Ducts and ROW pursuant to such License. Licensee shall give reasonable notice to the affected public authority or private landowner as appropriate before commencing the construction or installation of its attachments or making any material alterations thereto. Licensee shall give reasonable notice to AT&T before performing any work, whether or not of a routine nature, in AT&T's Conduit System.
- 11.3 Licensee Responsible for Maintenance of Licensee's Facilities. Licensee shall maintain its Facilities in accordance with the provisions of this Section (including but not limited to all requirements set forth above in this Agreement) and all Licenses issued hereunder. Licensee shall be solely responsible for paying all persons and entities who provide materials, labor, access to real or personal property, or other goods or services in connection with the maintenance of Licensee's Facilities and for directing the activities of all persons acting on Licensee's behalf while they are physically present on AT&T's Poles, within AT&T's Conduit System or in the immediate vicinity of such Poles or Conduit System.
- 11.4 AT&T Not Responsible for Maintaining Licensee's Facilities. AT&T shall have no obligation to maintain any Facilities which Licensee has attached or connected to, or placed in, AT&T's Poles, Conduits, Ducts or any portion of AT&T's Conduit System, except to the extent expressly provided by the provisions of this Section or any License issued hereunder, or by the Telecommunications Act of 1996 or other applicable laws, rules or regulations.
- 11.5 Information Concerning the Maintenance of Licensee's Facilities. Promptly after the issuance of a License permitting Licensee to attach Facilities to, or place Facilities in AT&T's Poles, Conduits or Ducts, Licensee shall provide AT&T with the name, title, business address, and business telephone number of the manager responsible for routine maintenance of Licensee's Facilities, and shall thereafter notify AT&T of changes to such information. The manager responsible for routine maintenance of Licensee's Facilities shall, on AT&T's request, identify any contractor, subcontractor, or other person performing maintenance activities on Licensee's behalf at a specified site and shall, on AT&T's request, provide such additional documentation relating to the maintenance of Licensee's Facilities as reasonably necessary to demonstrate that Licensee and all persons acting on Licensee's behalf are complying with the requirements of this Section and Licenses issued hereunder.
- 11.6 Identification of Personnel Authorized to Have Access to Licensee's Facilities. All personnel authorized to have access to Licensee's Facilities shall, while working on AT&T's Poles, in its Conduit System or Ducts or in the vicinity of such Poles, Ducts or Conduit Systems, carry with them suitable identification and shall, upon the request of any AT&T employee, produce such identification.

12. MODIFICATION AND REPLACEMENT OF LICENSEE'S FACILITIES

- 12.1 Notification of Planned Modification or Replacement of Facilities. Licensee shall, when practicable, notify AT&T in writing at least 60 days before adding to, relocating, replacing or otherwise modifying its Facilities attached to an AT&T Pole, Anchor or Anchor/Guy Strand or located in any AT&T Conduit or Duct. The notice shall contain sufficient information to enable AT&T to determine whether the proposed addition, relocation, replacement, or modification is permitted under Licensee's present License or requires a new or amended License.
- 12.2 New or Amended License Required. A new or amended License will be required if the proposed addition, relocation, replacement, or modification:
- 12.2.1 Requires that Licensee use additional space on AT&T's Poles or in its Conduits or Ducts (including but not limited to any additional Ducts, inner ducts, or substantial space in any Handhole or Manhole) on either a temporary or permanent basis; or
- 12.2.2 Results in the size or location of Licensee's Facilities on AT&T's Poles or in its Conduit or Ducts being appreciably different from those described and authorized in Licensee's present License (e.g. different Duct or size increase causing a need to re-calculate storm loadings, guying, or Pole class).

13. REARRANGEMENT OF FACILITIES AT THE REQUEST OF ANOTHER

- 13.1 Make-Ready Work at the Request of Licensee. If, prior to the issuance of a License, Licensee determines that any Pole, Anchor, Anchor/Guy Strand, Conduit or Duct is inadequate to accommodate Licensee's proposed Pole attachment or Conduit Occupancy or that it will be necessary or desirable for AT&T or any other person or entity to rearrange existing Facilities or structures to accommodate Licensee, Licensee shall promptly advise AT&T of the Make-Ready Work it believes necessary to enable the accommodation of Licensee's Facilities.
- 13.1.1 AT&T shall determine, in the exercise of sound engineering judgment, whether or not Make-Ready Work is necessary or possible. In determining whether Make-Ready Work is necessary or what Make-Ready Work is necessary, AT&T shall endeavor to minimize its costs to Licensee. If it is determined that such Make-Ready Work is required, AT&T shall provide Licensee with the estimated costs for Make-Ready Work and a Make Ready Due Date.

- 13.1.2 Licensee shall be solely responsible for negotiating with persons or entities other than AT&T for the rearrangement of such persons' or entities' Facilities or structures and, except where such rearrangement is for the benefit of AT&T and/or other Licensees as well as Licensee, shall be solely responsible for paying all charges attributable to the rearrangement of such Facilities; provided, however, that if Facilities rearrangements require new Licenses from AT&T, AT&T shall issue such Licenses in conjunction with the issuance of the applied-for License to Licensee.
- 13.2 Rearrangement of Licensee's Facilities at AT&T's Request. Licensee acknowledges that, from time to time, it may be necessary or desirable for AT&T to change out Poles, relocate, reconstruct, or modify portions of its Conduit System or rearrange Facilities contained therein or connected thereto and that such changes may be necessitated by AT&T's business needs or authorized Application of another entity seeking access to AT&T's Poles or Conduit Systems. Licensee agrees that Licensee will, upon AT&T's request, and at AT&T's expense, but at no Cost to Licensee, participate with AT&T (and other Licensees) in the relocation, reconstruction, or modification of AT&T's Conduit System or Facilities rearrangement. Licensee acknowledges that, from time to time, it may be necessary or desirable for AT&T to change out Poles, relocate, reconstruct, or modify portions of its Conduit System or rearrange Facilities contained therein or connected thereto as a result of an order by a municipality or other governmental authority. Licensee shall, upon AT&T's request, participate with AT&T (and other Licensees) in the relocation, reconstruction, or modification of AT&T's Conduit System or Facilities rearrangement and pay its proportionate share of any costs of such relocation, reconstruction, or modification that are not reimbursed by such municipality or governmental authority.
- 13.2.1 Licensee shall make all rearrangements of its Facilities within such period of time as is jointly deemed reasonable by the parties based on the amount of rearrangements necessary and a desire to minimize chances for service interruption or Facility-based service denial to a Licensee customer.
- 13.2.2 If Licensee fails to make the required rearrangements within the time prescribed or within such extended periods of time as may be granted by AT&T in writing, AT&T may perform such rearrangements with written notice to Licensee, and Licensee shall reimburse AT&T for actual costs and expenses incurred by AT&T in connection with the rearrangement of Licensee's Facilities; provided, however, that nothing contained in this Section or any License issued hereunder shall be construed as requiring Licensee to bear any expenses which, under the Telecommunications Act of 1996 or other applicable federal or state laws or regulations, are to be allocated to persons or entities other than Licensee; and provided further, however, that Licensee shall have no responsibility for rearrangement costs and expenses relating to rearrangements performed for the purpose of meeting AT&T's business needs.

14. EMERGENCY REPAIRS AND POLE REPLACEMENTS

14.1 Licensee Responsible for Emergency Repairs to its Own Facilities. In general, Licensee shall be responsible for making emergency repairs to its own Facilities and for formulating appropriate plans and practices which will enable it to make such emergency repairs. AT&T shall be under no obligation to perform any repair or service restoration work of any kind with respect to Licensee's Facilities.

15. INSPECTION BY AT&T OF LICENSEE'S FACILITIES

15.1 AT&T's Right to Make Periodic or Spot Inspections. AT&T shall have the right to make periodic or spot inspections at any time of any part of Licensee's Facilities attached to AT&T's Poles, Anchors or Anchor/Guy Strands or occupying any AT&T Conduit or Duct for the limited purpose of determining whether Licensee's Facilities are in compliance with the terms of this Section and Licenses hereunder; provided that such inspections must be non-invasive (e.g., no splice cases may be opened).

15.1.1 AT&T will give Licensee advance written notice of such inspections, and Licensee shall have the right to have a representative attend such inspections, except in those instances where safety considerations justify the need for such inspection without the delay of waiting until written notice has been forwarded to Licensee.

15.1.2 Such inspections shall be conducted at AT&T's expense; provided, however, that Licensee shall bear the Cost of inspections as delineated in 3.12.

15.2 No Duty to Licensee. Neither the act of inspection by AT&T of Licensee's Facilities nor any failure to inspect such Facilities shall operate to impose on AT&T any liability of any kind whatsoever or to relieve Licensee of any responsibility, obligations or liability under this Section or otherwise existing.

16. NOTICE OF NONCOMPLIANCE

16.1 Notice of Noncompliance. If, at any time, AT&T determines that Licensee's Facilities or any part thereof have not been placed or maintained or are not being used in accordance with the requirements of this Agreement, AT&T may send written notice to Licensee specifying the alleged noncompliance. Licensee agrees to acknowledge receipt of the notice as soon as practicable. If Licensee does not dispute AT&T's assertion that such Facilities are not in compliance, Licensee agrees to provide AT&T with a schedule for bringing such Facilities into compliance, to bring the Facilities into compliance within a reasonable time, and to notify AT&T in writing when the Facilities have been brought into compliance.

- 16.2 Disputes over Alleged Noncompliance. If Licensee disputes AT&T's assertion that Licensee's Facilities are not in compliance, Licensee shall notify AT&T in writing of the basis for Licensee's assertion that its Facilities are in compliance.
- 16.3 Failure to Bring Facilities into Compliance. If Licensee has not brought the Facilities into compliance within a reasonable time or provided AT&T with proof sufficient to persuade AT&T that AT&T erred in asserting that the Facilities were not in compliance, and if AT&T determines in good faith that the alleged noncompliance causes or is likely to cause material damage to AT&T's Facilities or those of other users, AT&T may, at its option and Licensee's expense, take such non-service affecting steps as may be required to bring Licensee's Facilities into compliance, including but not limited to correcting any conditions which do not meet the specifications of this Agreement.
- 16.4 Correction of Conditions by AT&T. If AT&T elects to bring Licensee's Facilities into compliance, the provisions of this Section shall apply.
- 16.4.1 AT&T will, whenever practicable, notify Licensee in writing before performing such work. The written notice shall describe the nature of the work to be performed and AT&T's schedule for performing the work.
- 16.4.2 If Licensee's Facilities have become detached or partially detached from supporting racks or wall supports located within an AT&T Manhole, AT&T may, at Licensee's expense, reattach them but shall not be obligated to do so. If AT&T does not reattach Licensee's Facilities, AT&T shall endeavor to arrange with Licensee for the reattachment of any Facilities affected.
- 16.4.3 AT&T shall, as soon as practicable after performing the work, advise Licensee in writing of the work performed or action taken. Upon receiving such notice, Licensee shall inspect the Facilities and take such steps as Licensee may deem necessary to insure that the Facilities meet Licensee's performance requirements.
- 16.5 Licensee to Bear Expenses. Licensee shall bear all expenses arising out of or in connection with any work performed to bring Licensee's Facilities into compliance with this Section; provided, however that nothing contained in this Section or any License issued hereunder shall be construed as requiring Licensee to bear any expenses which, under applicable federal or state laws or regulations, must be borne by persons or entities other than Licensee.

17. UNAUTHORIZED OCCUPANCY OR UTILIZATION OF AT&T'S FACILITIES

- 17.1 Licensing or Removal of Unauthorized Attachments. If any of Licensee's attachments shall be found attached to Pole(s) or occupying Conduit Systems for which no License is outstanding, AT&T, without prejudice to its other rights or remedies under this Agreement, including termination of Licenses, may impose a charge and require Licensee to submit in writing, within thirty (30) days after receipt of written notification from AT&T of the unauthorized attachment or Conduit Occupancy, a Pole attachment or Conduit Occupancy License Application. If such Application is not received by AT&T within the specified time period, Licensee may be required at AT&T's option to remove its unauthorized attachment or occupancy within sixty (60) days of the final date for submitting the required Application, or AT&T may at AT&T's option remove Licensee's Facilities without liability, and the expense of such removal shall be borne by Licensee. Charges for any such unauthorized occupancy shall be equal to the applicable License fees and charges which would have been payable from and after the date such Facilities were first placed on AT&T's Poles or in AT&T's Conduit System, if Licensee provides reasonable documentation of such placement. If Licensee is unable to provide such reasonable documentation, then Licensee will pay two years worth of the applicable charges.
- 17.1.1 Nothing contained in the Agreement or any License issued hereunder shall be construed as requiring Licensee to bear any expenses which, under applicable federal or state laws or regulations, must be borne by persons or entities other than Licensee.
- 17.2 Prompt Payment of Applicable Fees and Charges. Fees and charges for Pole attachments and Conduit System occupancies, as specified herein and as modified from time to time, shall be due and payable immediately whether or not Licensee is permitted to continue the Pole attachment or Conduit Occupancy. See Appendix I for applicable annual rental fees.
- 17.3 No Implied Waiver or Ratification of Unauthorized Use. No act or failure to act by AT&T with regard to said unlicensed use shall be deemed as a ratification of the unlicensed use; and if any License should be subsequently issued, said License shall not operate retroactively or constitute a waiver by AT&T of any of its rights or privileges under this Agreement or otherwise; provided, however, that Licensee shall be subject to all liabilities, obligations and responsibilities of this Agreement in regard to said unauthorized use from its inception.

18. REMOVAL OF LICENSEE'S FACILITIES

- 18.1 Pole Attachments. Licensee, at its expense, will remove its attachments from any of AT&T's Poles within thirty (30) days after termination of the License covering such attachments. If Licensee fails to remove its attachments within such thirty (30) day period, AT&T shall have the right to remove such attachments at Licensee's expense and without any liability on the part of AT&T for damage or injury to Licensee's attachments unless caused by the negligence or intentional misconduct of AT&T.
- 18.2 Conduit Occupancy. Licensee, at its expense, will remove its communications Facilities from a Conduit System within sixty (60) days after:
- 18.2.1 Termination of the License covering such Conduit Occupancy; or
- 18.2.2 The date Licensee replaces its existing Facilities in one Duct with substitute Facilities in another Duct.
- 18.2.3 If Licensee fails to remove its Facilities within the specified period, AT&T shall have the right to remove such Facilities at Licensee's expense and without any liability on the part of AT&T for damage or injury to such Facilities unless caused by the negligence or intentional misconduct of AT&T.
- 18.3 Continuing Responsibility for Fees and Charges. Licensee shall remain liable for and pay to AT&T all fees and charges pursuant to provisions of this Agreement until all of Licensee's Facilities are physically removed from AT&T's Poles or Conduit System.

19. FEES, CHARGES, AND BILLING

- 19.1 License Charges. Licensee agrees to pay charges in Attachment 1 of this Agreement. These rates will be recalculated during the term of this Agreement in accordance with the Telecommunications Act of 1996 and applicable FCC or State Commission rules and regulations. License charges commence on the first day of the calendar month following the date a License is issued. Such charges cease as of the final day of the calendar month proceeding the month in which the attachment or occupancy is physically removed or the utilization is discontinued. A one-month minimum charge is applicable to all Licenses. Such current-year charges are normally billed on or near July 1 of each year; annual billing is for the period January 1 through December 31 (six (6) months in arrears and six (6) months in advance) and to include true-up for actual billing for previous year's advance billing for period July 1 through December 31.

- 19.2 Notice of Rate and Computation of Charges. On or about November 1 of each year, AT&T will notify Licensee by certified mail, return receipt requested, of the rental rate and Pole transfer rate to be applied in the subsequent calendar year. The letter of notification shall be incorporated in, and governed by, the terms and conditions of this Agreement. Attachment and occupancy rates shall be applied to the number of Pole(s) and Duct feet of Conduit for which Licenses have been issued before December 1 of each calendar year. Charges for attachment(s) and occupancy which commenced during the preceding twelve (12) month period will be prorated accordingly.
- 19.3 Rate "True-Up". The parties agree that the fees reflected as interim herein shall be "true-up" (up or down) based on final fees either determined by further agreement or by an effective order, in a proceeding involving AT&T before the regulatory authority for the state, in which Licensee has either attached to or occupied AT&T structures (Rights of Way, Conduits, Ducts, and/or Poles), or any other body having jurisdiction over this Agreement (hereinafter "Commission").
- Under the "true-up" process, the interim fees for each structure shall be multiplied by the volume of that structure either attached to or occupied by Licensee to arrive at the total interim amount paid ("Total Interim Price"). The final fees for that structure shall be multiplied by the volume of that structure either attached to or occupied by Licensee to arrive at the total final amount due ("Total Final Price"). The Total Interim Price shall be compared with the Total Final Price. If the Total Final Price is more than the Total Interim Price, Licensee shall pay the difference to AT&T. If the Total Final Price is less than the Total Interim Price, AT&T shall pay the difference to Licensee.
- Each Party shall keep its own records upon which a "true-up" can be based and any final payment from one party to the other shall be in an amount agreed upon by the parties based on such records. In the event of any disagreement as between the records or the parties regarding the amount of such "true-up," the parties agree that the Commission shall be called upon to resolve such differences.
- 20. ADVANCE PAYMENT AND IMPUTATION**
- 20.1 Attachment and Occupancy Fees. Fees for Pole attachment and Conduit Occupancy shall be based on the Facilities, for which Licenses have been issued as of the date of billing by AT&T, shall be computed as set forth herein.
- 20.1.1 Charges associated with newly Licensed attachments or occupancies and other attachments or occupancies of less than the entire annual billing period shall be prorated.
- 20.1.2 Charges shall be prorated retroactively in the event of the removal of Licensee's Facilities.
- 20.1.3 The amount of any advance payment required shall be due within sixty (60) days after receipt of an invoice from AT&T.

20.2 Imputation. AT&T shall impute to its costs of providing telecommunications services (and charge any affiliate, subsidiary, or associate company engaged in the provision of such services) an equal amount to the charges set forth in this Section for all of the Conduits, Ducts, and Poles it occupies and uses.

21. **ASSURANCE OF PAYMENT**

21.1 Necessity and Level of Security. In the event Licensee fails to demonstrate credit worthiness, Licensee may be required to furnish a bond, letter of credit or other evidence of financial security having a minimum face amount of \$10,000.00 per state or \$50,000.00 per region. Such bond, letter of credit or other security shall be in a form satisfactory to AT&T and may be increased from time to time as reasonably required by AT&T to guarantee the performance of all obligations of Licensee hereunder. The amount of the bond, letter of credit or other security shall not operate as a limitation upon the obligations of Licensee hereunder.

22. **INSURANCE**

22.1 Licensee shall obtain and maintain insurance, including endorsements insuring the contractual liability and indemnification provisions of this Agreement, issued by an insurance carrier reasonably satisfactory to Licensor to protect the Licensor, other authorized Licensees, and Joint User(s) from and against all claims demands, causes of action, judgments, costs, including reasonable attorneys' fees, expenses and liabilities of every kind and nature which may arise or result, directly or indirectly from or by reason of such loss, injury or damage as covered in this Agreement.

22.2 Licensee shall maintain the following amounts of insurance in compliance with (22.1) above:

22.2.1 Commercial General Liability Insurance with limits of not less than \$1,000,000 per occurrence and \$1,000,000 annual aggregate.

22.2.2 Umbrella or Excess Liability Insurance with limits of not less than \$10,000,000 per occurrence and in the aggregate.

22.2.3 Business auto coverage for all owned, non-owned, hired and leased vehicles with limits of not less than \$1,000,000 per occurrence and in the aggregate.

22.2.4 Licensee shall name AT&T as an additional insured on the general liability policy with respects to the terms and conditions of this agreement

- 22.3 Licensee shall submit to Licensor certificates by each company insuring Licensee with respect to any insurance required hereunder, such certificate(s) to specify the coverage provided and that such company will not cancel or change any such policy of insurance issued to Licensee except after thirty (30) days written notice to Licensor.
- 22.3.1 Licensee shall also require agents and subcontractors, if any, who may perform the services to maintain the insurance coverage required herein and to furnish the Licensor certificates of insurance or adequate proof of such insurance. Licensee remains responsible for submitting these certificates in order to meet requirements of Agreement. Any non-compliance with the insurance provisions of this Agreement on the part of any agent or subcontractor shall be the sole responsibility of the Licensee who will be held liable for the performance or non-performance of the agent or subcontractor. Should insurance policy limits be exhausted or should Licensee or its agents and subcontractors fail to maintain the required insurance coverages, neither Licensee nor any of its agents and subcontractors will in any way be relieved from liability.
- 22.4 Licensee shall also carry such insurance as will protect it from all claims under any Worker's Compensation Law in effect that may be applicable to it as a result of work performed pursuant to this Agreement.
- 22.5 All insurance required in accordance with 22.2) and 22.3) preceding must be effective before Licensor will authorize attachment to a Pole and/or Anchor, or occupancy of a Conduit System and shall remain in force until such Licensee's Facilities have been removed from all such Pole(s), Anchor(s), Conduit System, or Right of Way. In the event that the Licensee shall fail to maintain the required insurance coverage, Licensor may pay any premium thereon falling due, and the Licensee shall forthwith reimburse the Licensor for any such premium paid.
- 22.6 If the Licensee's net worth exceeds five hundred million dollars (\$500,000,000), Licensee may elect to request self-insurance status in lieu of obtaining any of the insurance required in 22.2.1 and 22.2.2. Licensee shall provide audited financial statements, interim financials, business history, etc., as per Appendix III to Licensor immediately after receipt of initial agreement information. Licensor shall then review such audited financial statements and respond in writing to Licensee, no later than thirty (30) business days after receipt of the above information, in the event that self-insurance status is not granted to Licensee. If Licensor approves Licensee for self-insurance, Licensee shall annually furnish to Licensor, and keep current, evidence of such net worth that is attested to by one of Licensee's corporate officers. The ability to self-insure shall continue so long as the Licensee meets all of the requirements of 22.6. If the Licensee subsequently no longer satisfies the requirements of 22.6, Licensee is required to purchase insurance as indicated in 22.2.1 and 22.2.2. This agreement will not be finalized prior to approval for self-insuring status if self-insuring is requested by Licensee.

22.7 The net worth requirements set forth in 22.6 may be increased by Licensor from time to time during the term of this Agreement upon thirty (30) days notice to Licensee to at least such minimum limits as shall then be customary with respect to attachment to a Pole and/or Anchor, or occupancy of a Conduit System.

23. INDEMNIFICATION

23.1 Licensor shall exercise precaution to avoid damaging the communications Facilities of the Licensee and shall make an immediate report to the Licensee of the occurrence of any such damage caused by its employees, agents or contractors. Licensor agrees to reimburse the Licensee for all reasonable costs incurred by the Licensee for the physical repair of such Facilities damaged by the negligence of Licensor, its employees, agents, contractors, subcontractors or invitees. However, Licensor shall not be liable to Licensee for any interruption of Licensee's service or for interference with the operation of Licensee's Communications Facilities, or for any special, indirect, or consequential damages arising in any manner, including Licensor's negligence, out of the use of Pole(s), Anchor(s), or Conduit Systems or Licensor's actions or omissions in regard thereto and Licensee shall indemnify and save harmless Licensor from and against any and all claims, demands, causes of action, costs and reasonable attorneys' fees with respect to such special, indirect or consequential damages.

23.2 Licensee shall exercise precaution to avoid damaging the Facilities of Licensor and of others attached to Pole(s), Anchor(s), or occupying a Conduit System and shall make an immediate report to the Owner of the occurrence of any such damage caused by Licensee's employees, agents or contractors. Licensee agrees to reimburse the Licensor for all reasonable costs incurred by the Licensor for the physical repair of such Facilities damaged by the negligence of Licensee.

23.3 Licensee shall indemnify, protect and save harmless the Licensor, its directors, officers, employees and agents, Licensor's other Licensees, and Joint User(s) from and against any and all claims, demands, causes of action, damages and costs, including reasonable attorney's fees through appeals incurred by the Licensor, the Licensor's other Licensees and Joint User(s) as a result of acts by the Licensee, its employees, agents or contractors, including but not limited to the Cost of relocating Pole(s), Anchor(s), Guy(s), or Conduit System resulting from a loss of right-of-way or property owner consents and/or the Cost of defending those rights and/or consents.

- 23.4 The Licensee shall indemnify, protect and save harmless the Licensor, its directors, officers, employees and agents, Licensor's other Licensees, and Joint User(s) from and against any and all claims, demands, causes of actions and costs, including reasonable attorney's fees, through appeals for damages to property and injury or death to persons, including but not limited to payments under any Worker's Compensation Law or under any plan for employee's disability and death benefits, caused by, arising from, incident to, connected with or growing out of the erection, rearrangement, maintenance, presence, use or removal of Licensee's Facilities, or by their proximity to the Facilities of all parties attached to a Pole, Anchor and/or Guy, or placed in a Conduit System, or by any act or omission of the Licensee's employees, agents or contractors in the vicinity of the Licensor's Pole(s), Anchor(s), Guy(s), or Conduit System.
- 23.5 The Licensee shall indemnify, protect and save harmless the Licensor, its directors, officers, employees, and agents, Licensor's other Licensees, and Joint User(s) from any and all claims, demands, causes of action and costs, including attorneys' fees through appeals, which arise directly or indirectly from the construction and operation of Licensee's Facilities, including but not limited to taxes, special charges by others, claims and demands for damages or loss from infringement of copyrights, for libel and slander, for unauthorized use of television or radio broadcast programs and other program material, and from and against all claims, demands and costs, including attorney's fees through appeals for infringement of patents with respect to the construction, maintenance, use and operation of Licensee's Facilities in combination with Pole(s), Anchor(s), Conduit Systems or otherwise.
- 23.6 Licensee shall promptly advise the Licensor of all claims relating to damage of property or injury to or death of persons, arising or alleged to have arisen in any manner, directly or indirectly, by the erection, maintenance, repair, replacement, presence, use or removal of the Licensee's Facilities. Licensee shall promptly notify Licensor in writing of any suits or causes of action which may involve Licensor and, upon the request of Licensor, copies of all relevant accident reports and statements made to Licensee's insurer by Licensee or others shall be furnished promptly to Licensor.
- 24. AUTHORIZATION NOT EXCLUSIVE**
- 24.1 Nothing herein contained shall be construed as a grant of any exclusive authorization, right or privilege to Licensee. AT&T shall have the right to grant, renew and extend rights and privileges to others not parties to this Agreement, by contract or otherwise, to use any Pole, Anchor, or Conduit System covered by this Agreement and Licensee's rights hereunder.

25. ASSIGNMENT OF RIGHTS

25.1 Licensee shall not assign or transfer this Agreement or any license or any authorization granted under this Agreement, and this Agreement shall not inure to the benefit of Licensee's successors or assigns, without the prior written consent of AT&T. AT&T shall not unreasonably withhold such consent.

25.2 In the event such consent or consents are granted by AT&T, then the provisions of this Agreement shall apply to and bind the successors and assigns of the Licensee. Form NT-13 shall be used for this purpose.

26. FAILURE TO ENFORCE

26.1 Failure of AT&T to enforce or insist upon compliance with any of the terms or conditions of this Agreement or to give notice or declare this Agreement or any authorization granted hereunder terminated shall not constitute a general waiver or relinquishment of any term or condition of this Agreement, but the same shall be and remain at all times in full force and effect.

27. TERM OF AGREEMENT

27.1 Unless sooner terminated as herein provided, this Agreement shall continue in effect for a term of one (1) year from the date hereof and thereafter from year to year until either party hereto terminates this Agreement by giving the other party at least ninety (90) days prior written notice thereof. Such ninety (90) days notice of termination may be given to take effect at the end of the original one (1) year period or any time thereafter.

27.2 Termination of this Agreement or any Licenses issued hereunder shall not affect Licensee's liabilities and obligations incurred hereunder prior to the effective date of such termination.

28. AT&T'S INFORMATION

- 28.1 **Scope of AT&T's Information.** Licensee acknowledges that Licensee may acquire information and material that is AT&T's confidential, proprietary or trade secret information. As used herein, "AT&T's Information" includes, but is not limited to, all information and documents disclosed by AT&T, whether written or oral, in the course of this Agreement or in contemplation hereof including, without limitation, all specifications, drawings, sketches, schematics, models, samples, tools, algorithms, technical or business information, research and development, production and engineering processes, costs, profit and margin information, AT&T lists, marketing, production and future business plans.
- 28.2 **Use of AT&T's Information.** Licensee agrees to take all steps reasonably necessary to hold in trust and confidence AT&T's Information. Licensee hereby agrees to hold AT&T's Information in strict confidence, not to disclose it to third parties or to use it, in any way, commercially or otherwise, other than as permitted under this Agreement. Licensee will limit the disclosure of AT&T's Information to employees with a need to know who: (i) have been advised of the proprietary nature thereof; and (ii) have acknowledged the express obligation to maintain such confidentiality. Licensee's obligations set forth herein shall remain in effect for two (2) years from the receipt of AT&T's Information considered or deemed to be confidential information, but such obligation of confidentiality will not expire for AT&T's Information considered or deemed to be a trade secret under applicable law.
- 28.3 **Exceptions.** Notwithstanding the other provisions of this Agreement, nothing received by Licensee from AT&T will be considered to be AT&T's Information if: (i) it has been published or is otherwise available to the public other than by a breach of this Agreement; (ii) it has been rightfully and lawfully received by Licensee from a Third Party without confidential limitations; (iii) it has been independently developed by Licensee by personnel having no access to AT&T's Information; (iv) it was known by Licensee prior to its first receipt from AT&T; (v) it is hereafter disclosed by AT&T without restriction on further disclosure; or (vi) it is disclosed pursuant to a court order, subpoena or by operation of law, provided Licensee has given AT&T prior advance written notice in order that AT&T may attempt to obtain a protective order limiting disclosure and use of the information disclosed.
- 28.4 **Agreement.** Licensee hereby agrees that every individual person including but not limited to employees, subcontractors, agents, representatives and other third parties who perform under this Agreement shall execute the appropriate documents to undertake obligations of confidentiality consistent with the terms set forth herein. Licensee hereby agrees to provide evidence of such duly executed documents to AT&T upon request.

29. LICENSEE'S INFORMATION

- 29.1 Scope of Licensee's Information. AT&T acknowledges that Licensee may need to provide AT&T with certain information and material that is the Licensee's confidential, proprietary or trade secret information. As used herein, "Licensee's Information" may include information and documents disclosed by the Licensee in the course of this Agreement such as by way of example, drawings, sketches, schematics, models, samples, tools, algorithms, technical or business information. All Licensee's Information shall be in writing or other tangible form and clearly marked with a confidential, private or proprietary legend. Licensee's information conveyed orally shall be designated as proprietary at the time of disclosure and shall be reduced to writing within ten (10) business days.
- 29.2 Use of Licensee's Information. AT&T agrees to take all steps reasonably necessary to hold in trust and confidence Licensee's Information. AT&T hereby agrees to hold such Licensee's Information in strict confidence, not to disclose it to third parties or to use it, in any way, commercially or otherwise, other than as permitted under this Agreement. AT&T will limit the disclosure of Licensee's Information to employees, consultants, agents, contractors, affiliated companies and representatives with a need to know who will not be considered as "third parties" and who: (i) have been advised of the proprietary nature thereof; and (ii) have acknowledged the express obligation to maintain such confidentiality. AT&T's obligations set forth herein shall remain in effect for two (2) years from the receipt of Licensee's Information considered or deemed to be confidential information, but such obligation of confidentiality will not expire for Licensee's Information considered or deemed to be a trade secret under applicable law.
- 29.3 Exceptions. Notwithstanding the other provisions of this Agreement, nothing received by AT&T from Licensee will be considered to be Licensee's Information if: (i) it has been published or is otherwise available to the public other than by a breach of this Agreement; (ii) it has been rightfully and lawfully received by AT&T from a Third Party without confidential limitations; (iii) it has been independently developed by AT&T by personnel having no access to such Licensee's Information; (iv) it was known by AT&T prior to its first receipt from Licensee; (v) it is hereafter disclosed by Licensee without restriction on further disclosure; or (vi) it is disclosed to any governmental agency or court of competent jurisdiction by written order, subpoena or decree, or by operation of law, provided AT&T has given prior notice to Licensee in order that Licensee may attempt to obtain a protective order limiting disclosure and use of the information disclosed.

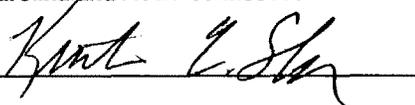

30. SUPERSEDURE OF PREVIOUS AGREEMENT(S)

30.1 This Agreement supersedes all previous agreements, whether written or oral, between AT&T and Licensee for attachment and maintenance of Licensee's Communications Facilities on Pole(s), Anchor(s), and in Conduit Systems within the geographical area covered by this Agreement; and there are no other provisions, terms or conditions to this Agreement except as expressed herein. All currently effective Licenses heretofore granted pursuant to such previous agreements shall be subject to the terms and conditions of this Agreement.

APPENDIX I

2007 FCC Formula Supported Fees
for attachments and/or occupancy effective 1/1/2006
(Re-calculated annually)

Licensee shall pay to Licensor the following fees:

| State | Poles (ea. / yr.) | | Anchors (ea. / yr.) | Conduit (\$ / ft. / yr.) | |
|----------------|----------------------|-------|------------------------|-----------------------------|----|
| | Non-Urban | Urban | | | |
| Alabama | | | Same as poles | | |
| Kentucky ① | | | | | |
| 2-user | | | | | |
| 3-user | | | | | |
| Louisiana | | | | | |
| Mississippi | | | | | \$ |
| Tennessee | | | | | |
| Florida | | | | | |
| | | | Miami River crossing | | |
| Georgia | | | | | |
| North Carolina | | | | | |
| South Carolina | | | | | |

- ① Kentucky rates are currently equal to tariff rates; to be re-calculated annually per FCC formula
- ② Tariff rate in Mississippi
- ③ Louisiana pole rates are determined by the Louisiana PSC.

Urban and non-urban are defined by the Bureau of Census as follows: Urban is a city plus the closely-settled urban fringe that together has a minimum population of 50,000. Non-urban is less than 50,000.

Conduit rates will apply to each passageway (innerduct).

- i) For the purpose of determining the Duct feet chargeable, the Duct considered occupied shall be measured from the center to center of adjacent Manhole(s), or from the center of a Manhole to the end of a Duct not terminated in a Manhole.
- ii) The above rates are not applicable for crossings of any navigable waterway. Rates for navigable waterway crossings will be calculated on an individual case basis.
- iii) The rates set forth above for attachments will apply to wireless attachments only if there are no apparatus cabinets and antennae attached to the pole. On poles where apparatus cabinets and antennae are attached, a flat annual rate of per pole will apply. The rates are \$ [REDACTED] (SC). This flat rate will be reviewed annually by AT&T and AT&T and Licensee will amend this Agreement to reflect the new rate proposed by AT&T.

Pole Attachment Transfer Rate

Per Pole (throughout AT&T Southeast region)

Appendix III
Request to Self-Insure
Information Sheet

Per 22.6, Licensee may elect to request self-insurance status in lieu of obtaining any of the insurance required in 22.2.1 and 22.2.2. Licensee shall complete the table below and provide this information to Licensor. Licensor shall then review such audited financial statements and inform Licensee (in writing), no later than thirty (30) business days after receipt of the above information, regarding Licensee's request to self-insure.

The agreement will not be finalized prior to approval for self-insuring status if self-insuring is requested by Licensee.

18. FORMS 46

1. INTRODUCTION

- 1.1 **Procedures** - This job aid outlines procedures for submitting and processing requests to access AT&T outside plant structures including poles, ducts, conduits, and right of way. It is intended for use by Competitive Local Exchange Carriers (Licensees) in making applications to attach to or occupy AT&T facilities, and by AT&T representatives who play a role in processing such requests. Licensees and their agents are responsible for being aware of and complying with the terms and conditions of their particular license agreement.
- 1.2 **License Required - *Prior to making application or using any of these forms, a CLEC MUST HAVE executed an appropriate license agreement with AT&T.*** Any party wishing to attach to AT&T structures, whether CLEC, CATV, or other entity, must first be licensed by AT&T. The license shall be granted on a form reviewed and approved by the AT&T legal department. CLEC Companies wishing to execute a structures access agreement should contact the Competitive Structures Provisioning Center at the address specified in these guidelines.
- 1.3 **Interconnection Not the Same** - An interconnection agreement is not the same as a structures access license agreement. An approved interconnection agreement, by itself, does not authorize an interconnector to access AT&T poles, ducts, conduits, and right of way.
- 1.4 **Generic Forms** - The forms illustrated herein are generic forms. Specialized forms may also be developed by the CSPC when circumstances warrant.

1.5 Agreement Controls - These are general procedures. Users should ensure that the specific agreement between the CLEC Licensee and AT&T is followed. In the event of any conflict between the instructions in this document and an approved CLEC License agreement, the terms of the license will control. In the event of any conflict with any law, the law will control.

2. PROCEDURES FOR NEW OR TRANSFERRED LICENSES

- 2.1 New License Requests** - Any party wishing to attach to AT&T structures must be licensed by AT&T. CLEC Companies wishing to attach to AT&T facilities should contact the Competitive Structures Provisioning Center.
- 2.2 Transfer of Ownership/Merging of Companies** - If a CLEC Licensee purchases, sells, or desires to take under its control another Licensee, AT&T approval must be obtained. Form NT-13, or other AT&T approved agreement, shall be used to obtain AT&T's consent to an assignment.

3. SPOC - COMPETITIVE STRUCTURES PROVISIONIN G CENTER

3.1 Competitive Structures Provisioning Center (CSPC)

- This center, located in Birmingham, serves as the single point of contact for those CLECs wishing to execute structures access license agreements with AT&T, or to submit requests under existing license agreements. Applications for occupancy and other activities associated with access to structures are coordinated through this central location. There are other groups within the Company responsible for activities other than structures access, such as collocation, network unbundling, and number portability.

The contact information is:

**Competitive Structures Provisioning Center
North W3D2
3535 Colonnade Parkway
Birmingham, Alabama 35243**

Fax: (205) 977-7997

**Arthur B. Williams
(205) 977-5068**

Jacqueline Wynn - Backup
(205) 977-7628

4. RECORDS CENTERS AND RECORDS ACCESS

- 4.1 Record Maintenance Centers (RMC)** –The RMC is the central repository of official Company plant records. The records maintained by this center must be made available to CLECs and others that have a legal right to access such records in order to determine availability and suitability of Company facilities for the CLECs intended occupancy or attachment. In Alabama, Kentucky, Louisiana, Mississippi, and Tennessee, the right of way records are also maintained in the RMC, while in other states easement records are maintained in the Regional Landbase Administration Center (RLAC). The addresses of the RMCs are as follows:

For plant records:

Records Maintenance Center
5228 Central Avenue
Charlotte, NC 28212

4.2 Regional Landbase Administration Center (RLAC) -
This center maintains land base records for the Company, and in addition is the repository for easement and other right of way records for Georgia, Florida, North Carolina, and South Carolina. The RLAC is located at:

Regional Landbase Admin. Center
Attn.: Right of Way Records
16 GG 1 AT&T
301 W. Bay Street
Jacksonville, FL 32201

5. DEFINITIONS

- 5.1 **ALEC** - Alternative Local Exchange Carrier, another term for Competitive Local Exchange Carrier.
- 5.2 **Attachment** - As used in this practice "attachment" means any attachment by a cable television system or provider of telecommunications service to a pole, duct, conduit, or right of way owned or controlled by AT&T. Section 703 of the Telecommunications Act includes all attachments under the term "pole attachment".
- 5.3 **CLEC** - Competitive Local Exchange Carrier.
- 5.4 **ILEC** - Incumbent Local Exchange Carrier, such as AT&T.
- 5.5 **Inspection** - A physical examination of Licensee's attachments or conduit occupancy by Licensor's employees, agents, or contractors to determine adherence to construction standards and safety codes, or to verify the number of attachments or conduit occupied.
- 5.6 **Interconnection Agreement** - The comprehensive master agreement between the ILEC and CLEC which governs major issues such as unbundling, collocation, resale, number portability, and access to structures. The complete details of access to structures are usually included in a license agreement, or a portion of the interconnection agreement.
- 5.7 **License Agreement** - The license agreement outlines specific procedures and obligations for access to structures owned or controlled by AT&T, including poles, ducts, conduit, and right of way. It may be incorporated into an interconnection agreement, or executed as a separate agreement. In addition, license agreements may be executed by companies other than CLECs who are authorized access to AT&T structures.

-
- 5.8 Licensee** - The party to whom a license is granted. In the case of a license agreement for a CLEC to attach to AT&T structures, the CLEC is the licensee.
- 5.9 Licensor** - The party granting a license. In the case of a license agreement for a CLEC to attach to AT&T structures, AT&T is the Licensor.
- 5.10 Make-Ready Work** - The work operations (and material) necessary to provide structure space to accommodate Licensee's facilities where existing space is inadequate.
- 5.11 Prelicense Survey** - A physical examination of outside plant structures to identify the work operations and material needed to provide the structure space requested by the Licensee in an Application and Pole Attachment License or in an Application and Conduit Occupancy License.
- 5.12 Right of Way Definition** - In its broadest sense, the term "right of way" refers to the right that one party has to use land belonging to another. Evidence of the right to use someone's property is usually a written document; however, certain rights may be acquired even in the absence of a written agreement.
- 5.13 SPOC** - Single point of contact. The AT&T SPOC for structures access management is the Competitive Structures Provisioning Center. Some of the agreements with CLECs also designate a single point of contact in their organization.

-
- 5.14 Structures** - As used in these guidelines the term "structures" includes poles, ducts, conduits, and right of way owned or controlled by AT&T. Building entrance facilities may or may not be owned or controlled by AT&T and access may be granted by AT&T to others only in those instances where the Company has the authority to do so. If the Company does not control access to the property where the facilities are located, then in some cases the CLEC may request that AT&T assist in securing access. In most situations, such access assistance is billable by the Company.
- 5.15 Telecommunications** - Telecommunications means the transmission, between or among points specified by the user, of information of the user's choosing, without change in the form or content of the information as sent and received.
- 5.16 Telecommunications Carrier** - A telecommunications carrier is any provider of telecommunications services, except that such term does not include aggregators of telecommunications services. A telecommunications carrier shall be treated as a common carrier under the Telecommunications Act only to the extent that it is engaged in providing telecommunications services.
- 5.17 Telecommunications Service** - Telecommunications service means the offering of telecommunications for a fee directly to the public, or to such classes of users as to be effectively available directly to the public, regardless of the facilities used.
- 5.18 Utility** - Any person or entity who is a local exchange carrier or an electric, gas, water, steam, or other public utility, and who owns or controls poles, ducts, conduits, or rights of way used, in whole or in part, for any wire communications. Such term does not include any railroad, any person who is cooperatively organized, or any entity owned by the Federal Government or any State.

6. SUMMARY OF PROCEDURES

Following is an overview of the procedures for making a license application. The procedures for specific applications may vary slightly. In addition, the terms and conditions of different agreements may require minor changes in the procedures outlined herein.

All applications must be on forms approved by AT&T, and must include sufficient detail for AT&T to accurately identify the site.

| STEP | REMARKS |
|------|---|
| 1 | CLEC or other telecommunications service provider applies for license agreement to obtain access to poles, ducts, conduit, and right of way owned or controlled by AT&T. After the license agreement has been executed by AT&T, the Licensee may submit applications to attach to or occupy AT&T structures and right of way. |
| 2 | Licensee submits application on approved forms specifying in sufficient detail the facilities and location desired. |
| 3 | AT&T reviews records and determines whether facilities are available (based only on the records). Licensee is advised of the results of the records review. If no facilities are available, Licensee may request an alternative be reviewed, or other attempts be made by AT&T to provide access, such as rodding ducts, removing abandoned cable, etc. |
| 4 | If facilities appear available based on a records review, then Licensee requests a pre-license survey to ensure that facilities are actually physically available, e.g., ducts have not collapsed, there are no unauthorized attachments to the facilities requested, etc. |
| 5 | Licensee requests that AT&T prepare an estimate of any make-ready work necessary to accommodate the Licensee. AT&T proposes make-ready completion schedule. |
| 6 | After make-ready is complete, Licensee submits License Application form. |
| 7 | After application is approved by AT&T, Licensee may proceed with authorized attachments. Includes submitting Form NT-1 with proposed construction start schedule. |
| 8 | After attachments are completed, Licensee submits Form NT-1 advising that construction is complete, and submits as-built drawings to AT&T. |

7. SUMMARY OF LICENSE FORMS

7.1 General License Forms

| Form Number | Form Name | Remarks |
|-------------|---|--|
| GN-1 | INQUIRY REQUEST | After a Structures Access License agreement is in place, completion of this form is the first step in making application for structures access. The request must include sufficient detail for the form to be processed. |
| GN-3 | PRE-LICENSE SURVEY REQUEST | Multi-use turn-around document designed to request records investigations, make-ready estimates, and other activities; to authorize billing, and advise Licensee of status of request. |
| GN-4 | MAKE READY ESTIMATE REQUEST | Multi-use document designed for Licensee to request an estimate of make-ready charges, authorize duct rodding, and request assistance with access to facilities not controlled by AT&T. Licensee is provided several options regarding make-ready cost estimate approval and work performance. |
| GN-5 | BUILDING SPACE LICENSE AGREEMENT FOR SHARED OWNER-PROVIDED ACCESS | Used where AT&T may not own or control facilities or access to facilities. Parties to document include the Licensee, AT&T, and owner. |

7.2 Pole Attachment Forms

| Form Number | Form Name | Remarks |
|-------------|--|--|
| PL-1 | APPLICATION AND POLE ATTACHMENT LICENSE | This is multi-use turn around document used by a CLEC Licensee to request access to poles and to certify that all make-ready issues have been resolved. In addition, the form is used to advise Licensee of AT&T application approval. Form NT-1 must also be submitted in conjunction with application. |
| PL-2 | POLE SURVEY FORM | Used in lieu of Licensee's engineering drawings to summarize make-ready and related activities that are necessary. Most commonly used on small jobs. |
| PL-3 | ITEMIZED ESTIMATE | This form is completed by AT&T to provide the Licensee with an itemized estimate of make-ready costs. It may also include mechanized costs data. |
| PL-4 | NOTIFICATION OF SURRENDER OR MODIFICATION OF POLE ATTACHMENT LICENSE | This is a multi-use turn around document used when modifying or relinquishing an attachment. The form requires AT&T approval, and Form NT-1 must be submitted with the form. |

7.3 Right of Way Occupancy Forms

| Form Number | Form(s) | Remarks |
|-------------|--|--|
| RW-1 | APPLICATION AND RIGHT OF WAY OCCUPANCY LICENSE | This is a two-part form used to request access to AT&T right of way. In addition, the form is used to advise Licensee of AT&T's approval of the application. The location description on page 2 of the form must be completed, and Form NT-1 must also be submitted in conjunction with the application. |

7.4 Conduit Occupancy Forms

| Form Number | Form Name | Remarks |
|-------------|--|--|
| CN-1 | APPLICATION AND CONDUIT OCCUPANCY LICENSE | This is multi-use turn around document used to request access to conduit. In addition, the form is used to advise Licensee of AT&T application approval. Form CN-4 and/or CN-5, and Form NT-1 must be submitted in conjunction with application. |
| CN-2 | CONDUIT SYSTEM DIAGRAM | This form is used to graphically depict a proposed conduit occupancy. |
| CN-3 | CONDUIT SYSTEM - MANHOLE DETAIL | This form is used to detail graphically the specific conduits occupied in a manhole. |
| CN-4 | CABLE TO OCCUPY CONDUIT | This form is used to provide technical specifications of facilities placed in a conduit. Submitted with CN-1 when applicable. |
| CN-5 | EQUIPMENT HOUSINGS TO BE PLACED IN MANHOLES | Used to describe the technical specifications of equipment housings to be placed in manholes. Submitted with CN-1 when applicable. |
| CN-6 | ITEMIZED ESTIMATE | Used to provide an itemized tally of make-ready work and costs to complete an occupancy request. |
| CN-7 | NOTIFICATION OF SURRENDER OR MODIFICATION OF CONDUIT OCCUPANCY LICENSE | This is a multi-use turn around document used when modifying or relinquishing an occupancy. The form requires AT&T approval, and Form NT-1 must be submitted with the form. |

Continued on next page.

Continued from previous page.

| | | |
|-------|---|---|
| CN-8 | REQUEST FOR ENTRY INTO MANHOLE(S) AND/OR VAULT(S) | This form must be submitted by Licensee and approved by AT&T before Licensee may enter manholes or vaults. Form NT-1 and location information such as a key map route schematic must also be included. |
| CN-9 | REQUEST TO ROD AND/OR CLEARING OF DUCT(S) | This form must be submitted by Licensee and approved by AT&T before Licensee may rod ducts. Form NT-1 and location information such as a key map route schematic must also be included. |
| CN-10 | REQUEST TO CORE BORE AND/OR MODIFY MANHOLE(S) | This form must be submitted by Licensee and approved by AT&T before Licensee may core bore or otherwise modify a manhole. Form NT-1 and location information such as a key map route schematic must also be included. |
| CN-11 | SPARE AND/OR EMERGENCY RESERVATION | This form is used to reserve a spare or emergency conduit where allowed, such as Georgia. The process is similar to that followed for CN-1. |

7.5 Notification Forms

| Form Number | Form(s) | Remarks |
|-------------|--|--|
| NT-1 | CONSTRUCTION PERFORMED AND/OR COMPLETED | This is a multi-use form used at various stages of the application and license process to advise AT&T of work completion. This form must accompany PL-1, PL-4, CN-1, CN-7, CN-8, CN-9, CN-10, and CN-11. |
| NT-2 | LASHING TO THIRD-PARTY FACILITIES | Turn-around form used by Licensee to request permission to lash to third party facilities. Storm loading calculations and other information must be included, along with Form NT-1. |
| NT-3 | DISPUTE TO MAKE-READY CHARGES | May be used when Licensee disagrees with make-ready estimate prepared in response to PL-1 or CN-1 applications. |
| NT-4 | CHANGE IN PRIORITY FOR PROCESSING APPLICATIONS | May be used by Licensee to request a change in the priority for processing Licensee's applications. |
| NT-5 | CHANGE OF SPOC | Used by Licensee to advise AT&T of a change in Licensee's designated single point of contact. |
| NT-6 | MAINTENANCE MANAGER | Used by Licensee to advise AT&T of a change in Licensee's designated maintenance manager. |
| NT-7 | INSPECTION AND COMPLIANCE | May be used on ride-outs and other inspections to quantify unauthorized attachments, infractions, etc. |
| NT-8 | UNSAFE CONDITIONS | Used by Licensee to advise AT&T when, in its opinion, an unsafe condition exists. |
| NT-9 | DISPUTE OF NON-COMPLIANCE | Used by Licensee to dispute AT&T's notification of noncompliance. |
| NT-10 | FACILITIES BROUGHT INTO COMPLIANCE | Used by Licensee to notify AT&T that facilities have been brought into compliance. |
| NT-11 | AT&T NOTIFICATIONS | May be used by AT&T to track various notifications. |
| NT-12 | LICENSEE NOTIFICATIONS | May be used by Licensee to track various notifications. |
| NT-13 | CONSENT OF LICENSOR | Used to indicate AT&T's consent to assignment/transfer of Licensee Agreement. |

8. INQUIRY REQUEST (Form GN-1) - EXAMPLE

After a Structures Access License agreement is in place, completion of this form is the first step in making application for structures access.

The request must include sufficient detail for the form to be processed.

Note: AT&T records provided under this Inquiry Request may not reflect field conditions. Licensee acknowledges that physical inspection is necessary to verify the presence and condition of outside plant facilities and/or right of way, and that in providing record information, AT&T assumes no liability to licensee or any third party for errors/omissions contained therein.

| FORM HEADING | INSTRUCTIONS |
|---|--|
| 1. Licensee Tracking No. | Licensee inserts tracking number assigned by the Licensee for its internal monitoring. |
| 2. AT&T Tracking (SAM) No. | AT&T SPOC inserts tracking number assigned by AT&T. This number will be used throughout the inquiry, application, and billing process to identify the request. |
| In accordance with the terms....inquiry form. | Licensee inserts full corporate name of Licensee, date of License Agreement, and agreement number assigned by AT&T. |
| Inquiry made by: | |
| 3. Authorized Licensee Representative | Licensee inserts name of person authorized to act on behalf of the Licensee. |
| 4. Telephone | Licensee inserts contact number for Licensee's authorized representative. |
| 5. Inquiry Date: | Licensee completes date of inquiry submittal. |
| 6. Response Instructions: | Licensee specifies whether it prefers to receive AT&T's response by mail or by fax, and completes full mailing address or fax number. |
| Description of Request and Location: | |
| 7. Records (only): | Licensee specifies the type of records it wishes to review. |
| 8. Structures (only): | Licensee specifies the type of attachment or occupancy its wishes to make, and also submits Form GN-3. |
| 9. Records Information: | Licensee specifies its records information option. Records may be received via email or forwarded to Licensee's address specified in item 6. |

Continued on next page.

**INQUIRY REQUEST
(Form GN-1) -
EXAMPLE - Continued**

Continued from the previous page.

| | |
|----------------------------------|--|
| 10. AT&T Wire Center: | Licensee completes Wire Center and NPA NNX (area code and prefix) for facility location, if known. |
| 11. County (Parish)- REQUIRED | Licensee inserts County where requested facilities are located. Information is required and used in AT&T Tracking Number. If more than one county, indicate "Multiple". |
| 12. State- REQUIRED: | Licensee inserts State where requested facilities are located. Information is required and used in AT&T Tracking Number. |
| 13. Section: | Applicable in Alabama, Florida, Louisiana, and sometimes Georgia. Licensee completes public land Section number(s) where requested facilities are located, if known. |
| 14. Township/ Land District: | Applicable in Alabama, Florida, Louisiana, and Georgia. Licensee completes Township or Land District number(s) where requested facilities are located, if known. |
| 15. Range/Land Lot: | Applicable in Alabama, Florida, Louisiana, and Georgia. Licensee completes Range or Land Lot number(s) where requested facilities are located, if known. |
| 16. Description and/or Remarks: | Licensee completes a description of location of requested facilities and/or attaches sketch(es) sufficient for AT&T to identify the location in its records. |

Sequence Note: After completing form through Item 16, **Licensee** submits Form GN-1 to AT&T SPOC (CSPC).

| 17. Estimated construction interval: | AT&T provides estimate of the time interval required for it to complete make-ready. |
| 18. Earliest construction start date: | AT&T provides the earliest date it may begin make-ready construction work. |
| 19. Responsibility: | AT&T completes a Responsibility Code used for internal tracking and proper application of reimbursement. |
| 20. Geographic Location: | AT&T completes a Geographic Location used for internal tracking and proper application of reimbursement. |
| 21. AT&T Representative: | AT&T inserts name of AT&T representative reviewing and responding to make-ready estimate request. |
| 22. Date: | AT&T inserts date that make-ready estimate request is completed. |
| 23. Telephone: | AT&T completes contact number for AT&T representative reviewing request. |
| 24. AT&T Contact... "Make-Ready" work: | AT&T inserts the name of AT&T representative responsible for coordinating make-ready work. |
| 25. Telephone: | AT&T inserts contact number of AT&T representative responsible for coordinating make-ready work. |

Sequence Note: AT&T returns form to Licensee. Licensee completes the Items 26 through 29 and returns form to AT&T SPOC.

Continued on next page.

**MAKE-READY
ESTIMATE REQUEST
(Form GN-4) -
EXAMPLE -
Continued**

Continued from previous page.

| Step 3 - Licensee Make-Ready Preference (to be completed after receipt of AT&T's response) | |
|--|--|
| 26. Licensee options: | Licensee selects all options that apply regarding acceptance or dispute of make-ready costs, and alternatives for expedited or contracted make-ready work. |
| 27. Authorized Licensee Representative: | Licensee inserts the name of its authorized representative selecting Licensee options. |
| 28. Date: | Licensee completes the date that the options are selected. |
| 29. Telephone: | Licensee specifies contact number for authorized representative. |
| <p>Note: If Licensee elects to perform make-ready work, Licensee must complete Form NT-1 (Part 1) to inform AT&T of make-ready start and, also, subsequent construction complete dates. Upon completion of make-ready work, appropriate form, PL-1 or CN-1, must be submitted for pole attachment and/or conduit occupancy application approval. Facility placement, with completion of Form NT-1 (Part 2) and proper notice, will be permitted upon application approval</p> | |

Sequence Note: After completing form Items 26 through 29, Licensee returns Form GN-4 to AT&T SPOC (CSPC). AT&T completes Items 30 and 31.

| Step 4 - AT&T Receipt | |
|----------------------------------|---|
| 30. Date Received: | AT&T inserts the date that the Licensee's make-ready preference is received. |
| 31. AT&T Representative: | AT&T indicates the name of the person receiving the Licensee's make-ready preference. |

12. APPLICATION AND POLE ATTACHMENT LICENSE - (Form PL-1) - EXAMPLE

This is multi-use turn around document used by CLEC Licensee to request access to poles and for the Licensee to certify that all make-ready issues have been resolved. In addition, the form is used to advise Licensee of application approval by AT&T. Form NT-1 must also be submitted in conjunction with application.

| FORM HEADING | INSTRUCTIONS |
|--|---|
| 1. Licensee Tracking No. | Licensee inserts tracking number assigned by the Licensee for its internal monitoring. |
| 2. AT&T Tracking (SAM) No. | AT&T SPOC inserts tracking number assigned by AT&T. This number will be used throughout the inquiry, application, and billing process to identify the request. |
| 3. Date Submitted: | Licensee completes date that its request is submitted. |
| 4. Licensee Agreement Number: | Licensee inserts Licensee Agreement Number assigned to the agreement by AT&T. |
| 5. Authorized Licensee Representative: | Licensee inserts name of person authorized to act on its behalf. |
| 6. Company Making Application: | Licensee completes full corporate name of Licensee making application. |
| 7. Telephone: | Licensee inserts contact number for its authorized representative. |
| 8. Fax: | Licensee inserts its fax number. |
| 9. Street Address: | Licensee inserts street address of business location of Licensee making application. |
| 10. City: | Licensee completes City of business location of Licensee making application. |
| 11. State: | Licensee completes State of business location for Licensee making application. |
| 12. Zip: | Licensee completes Zip Code for business location of Licensee making application. |

| | |
|---|---|
| For each Licensee authorization, either making attachment to or occupancy within AT&T facilities, Licensee will provide a complete set of actual placement drawings for posting to AT&T records. | |
| 30. Actual Placement Drawings Attached: | Licensee indicates if facilities placement as-built drawings are attached to the Form. |
| 31. AT&T Test Center Notified... | AT&T indicates whether its Test Center has been notified of Licensee activity in the underground. |

17. APPLICATION AND RIGHT OF WAY OCCUPANCY LICENSE (Form RW-1) - EXAMPLE

This is two-part form used to request access to AT&T right of way. In addition, the form is used to advise Licensee of AT&T's approval of the Licensee's application.

The location description on page 2 of the form must be completed, and Form NT-1 must be submitted in conjunction with the application.

| FORM HEADING | INSTRUCTIONS |
|--|---|
| 1. Licensee Tracking No. | Licensee inserts tracking number assigned by the Licensee for its internal monitoring. |
| 2. AT&T Tracking (SAM) No. | AT&T SPOC inserts tracking number assigned by AT&T. This number will be used throughout the inquiry, application, and billing process to identify the request. |
| 3. Date Submitted: | Licensee completes date that request is submitted. |
| 4. Licensee Agreement Number: | Licensee inserts Licensee Agreement Number assigned to the agreement by AT&T. |
| 5. Authorized Licensee Representative: | Licensee inserts name of person authorized to act on its behalf. |
| 6. Company Making Application: | Licensee completes full corporate name of Licensee making application. |
| 7. Telephone: | Licensee inserts contact number for Licensee's authorized representative. |
| 8. Fax: | Licensee inserts its fax number. |
| 9. Street Address: | Licensee inserts street address of business location of Licensee making application. |
| 10. City: | Licensee completes City of business location of Licensee making application. |
| 11. State: | Licensee completes State of business location for Licensee making application. |
| 12. Zip: | Licensee completes Zip Code for business location of Licensee making application. |

Continued from previous page.

| | |
|--|---|
| In accordance with the terms and conditions of the Agreement between us, application is hereby made for a license to occupy AT&T's right of way as indicated below. This request will be designated: | |
| 13. Licensee RIGHT OF WAY OCCUPANCY (R.O.) Application No. R.O.: | Licensee identifies the sequence number for its application. Individual applications are to be numbered in sequential ascending order by Licensee. AT&T will process applications in sequential ascending order according to the application numbers assigned by the Licensee. |
| 14.A. Linear Feet: | Licensee indicates the total linear feet of right of way it wishes to occupy. |
| 14.B. Area: | Licensee specifies the area in acres or square feet that it wishes to occupy. |
| 15. Approximate Location (city/district): | Licensee identifies where the proposed occupancy is located. A more detailed description is required on Page 2 of Form RW-1. |
| Step 1 - Licensee Submittal. Licensee to submit after appropriate forms regarding pre-license surveys, make-ready requests, etc., have been approved. Make-ready work must be completed and notification received prior to application approval | |
| 16. Licensee Representative: | Licensee provides the name of its representative. |
| 17. Title: | Licensee completes title of its representative. |
| 18. Telephone: | Licensee inserts contact number for Licensee authorized representatives. |
| 19. Fax: | Licensee inserts fax number. |
| Note: Upon approval of application by AT&T and prior to facility placement by Licensee, Licensee must submit Form NT-1 informing AT&T of proposed facility placement schedule. | |

Continued on next page.

**APPLICATION AND
RIGHT OF WAY
OCCUPANCY LICENSE
(Form RW-1) -
EXAMPLE - Continued**

Sequence Note: After completing form through Item 19, Licensee submits Form RW-1 to AT&T SPOC (CSPC). AT&T completes Items 20 through 28 and responds to Licensee.

| Step 2 - AT&T Approval | |
|---|--|
| 20. Date application received: | AT&T indicates the date that it receives application. |
| 21. Right of Way Occupancy Application... | AT&T either approves, approves with revisions, or denies the right of way occupancy application. |
| 22. Approved By: | AT&T inserts printed name of person approving Licensee's application. |
| 23. Signature: | AT&T inserts signature of its representative reviewing application. |
| 24. Title: | AT&T inserts the title of its representative reviewing the application. |
| 25. Date Approved: | AT&T inserts the date that the application is approved. |
| 26. Local AT&T Contact: | AT&T completes the name of its local contact person. |
| 27. Telephone: | AT&T inserts the contact number for its representative. |
| 28. Fax: | AT&T inserts the fax number for its representative. |
| 29. Linear Feet... Requested: | AT&T inserts the linear feet or area the Licensee requested to occupy. |
| 30. Linear Feet... Approved: | AT&T indicates the linear feet or area the Licensee is authorized to occupy. |
| 31. Comments: | AT&T provides comments, if any. |

18. FORMS

The following pages contain forms which may be reproduced locally and used when making requests to attach to or occupy AT&T structures.

Licensees or their representatives having questions on how to complete any of the forms contained in these guidelines should contact the Competitive Structures Provisioning Center.

| | | |
|--------------------------|------------------------|----------------------------|
| 1. Licensee Tracking No. | INQUIRY REQUEST | 2. AT&T Tracking (SAM) No. |
|--------------------------|------------------------|----------------------------|

Instructions: Please complete all information below regarding your request and forward to the office listed below. This form may be used to make general inquiries regarding the availability of poles, conduit, and right of way. License application must be made and approved, and any fees paid before attachment or occupancy work may proceed.

In accordance with the terms and conditions of the License Agreement between AT&T and _____, dated _____, and identified as AT&T License Agreement No. _____, request is hereby made for initial investigation of availability of poles, conduit, and/or right of way identified and described in this inquiry form. **Licensee must identify, with reasonable specificity, the geographic area for which facilities are required.**

EXPLANATION OF POLE SURVEY FORM - Form PL-2

| Item | Description | Explanation | Example |
|------------------------|----------------------------------|--|--|
| a | Pole information | In the process of completing a field survey, the representative should sufficiently identify the pole by pole number, pole size, pole class, and street address (or appropriate) to properly locate in records. | Pole no. = P13S Pole size/class = 45' 5 Location = 123 1st Avenue West |
| b | Attachment height (existing) | The attachment heights for all current attachments on the pole should be recorded as measured from the ground (noting any violations). Multiple attachments should be so noted. | Power = CATV = Telephone = Other = |
| c & d | Separation at pole & mid-span | From (b) above the pole separation can be determined, as well as any violations. Mid-span measurements should also be recorded to determine possible conflicts and/or pole change-out requirements for additional attachments. | Power = CATV = Telephone = Other = |
| Work Operations | | | |
| e & f | Raise or lower attachments | It may be necessary to make adjustments to accommodate additional attachees. These should be identified by recording the required movement by parties involved. Under the appropriate column, the work should be identified as raise or lower and the distance indicated for each party. | Power = raise 1 ft CATV = lower 2 ft Telephone = n/a Other = n/a |
| g | Final attachment heights | With the information provided in (b) and determinations from (e & f), the final attachment height of all parties can be calculated (i.e. Power is attached at 25' 6", requires raising 1'; therefore, final attachment height = 26' 6"). | Power = 26' 6" |
| h | Charges | The representative should determine from available loaded-labor rates or contractor rate schedules the costs associated with BST performing work operations for any attachee on an BST pole. These should be recorded and summed as total (1). | Power = 3,000 CATV = 500 Telephone = n/a Other = 1,230 Total (1) = 4,730 |
| i & j | Raise or lower other attachments | Identify if any other attachments to the pole require adjustments. If these operations would require any BST expenditures, the amount should be recorded and summed to Total (2). | Power co. to raise transformer. |
| | Total Make-Ready Charges | These are the sum of Total (1) & Total (2) representing amounts of expenditures BST would incur to accommodate the attachment by another party. | Total = \$xxxx.xx |
| | All other form fields | These should be self-explanatory. | |

EXPLANATION OF COLUMN

1 Designate pole number assigned by Company

T - Telephone E - Electric (Circle company that will be Licensor)

2 Name of Street, Road, Highway, Route, etc.

3 Work Operations Description, e.g. Lwr 2 ca 1' Rse rack 2'
Lwr top ca 1' Plc A&G
Lwr ca & term 18" Lwr fire alm 1'
Rpl pole Rse trnsf 1'

4 Indicate company to perform work operation T - Telephone T/C - Either Telephone or CATV (optional)
E - Electric P - Police
C - CATV M - Municipality
F - Fire O - Other

5 List non-exempt material (only)

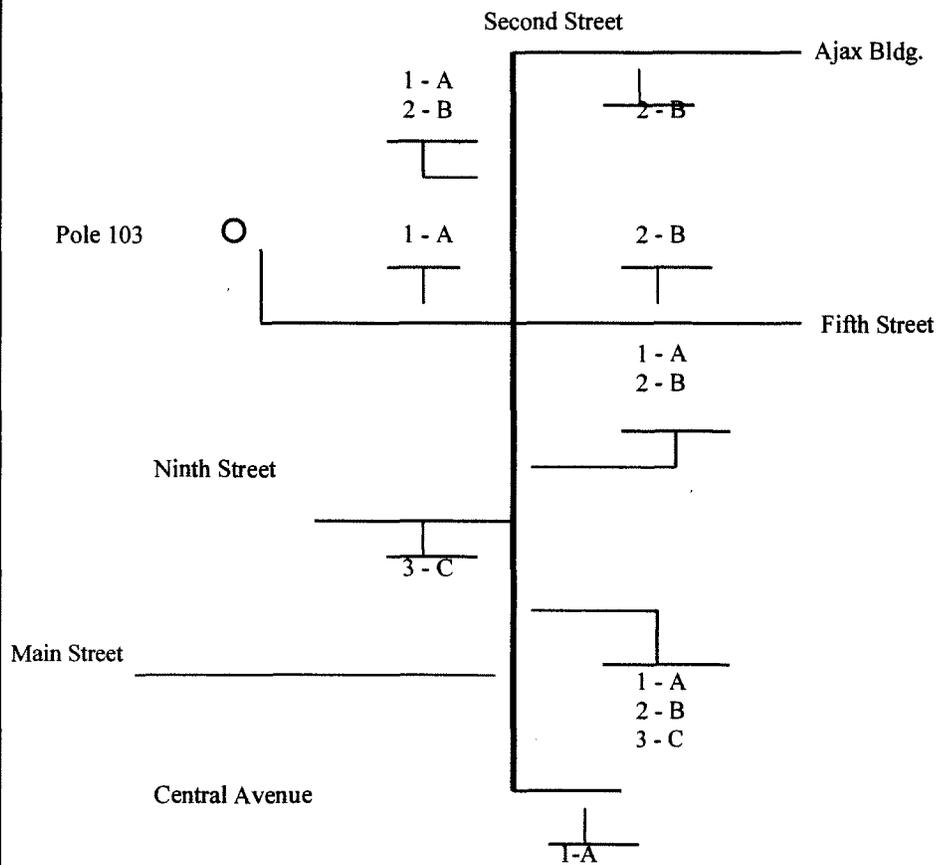

6 Indicate labor hours and costs required to perform work operations listed in (3)

CONDUIT SYSTEM DIAGRAM - SAMPLE

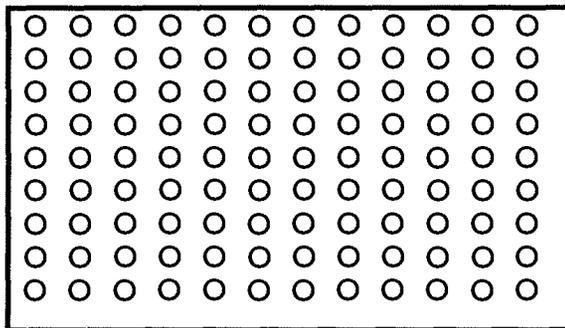

Letters (A, B, & C) = Cable designation by type from Form CN-4
 Numbers (1, 2, etc.) = Number of cable(s) by section
 _____ = Represents all cables in conduit section
 ⊕ = Pole

CONDUIT SYSTEM - MANHOLE DETAIL

Manhole Number _____

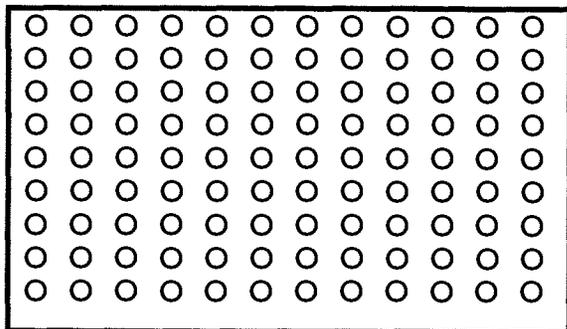

Location: _____

N

Indicate directional "North"

Indicate manhole, conduit, and cable records information on additional sheets and attach, as required.

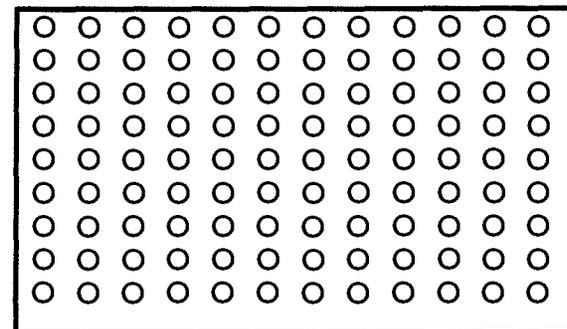

Indicate existing array by drawing a rectangle, square, etc. around appropriate number of existing conduit (e.g., 4 wide by 6 high)

Indicate the following:

○ = vacant conduit

● = conduit occupied

X = conduit containing innerduct; indicate number occupied (this to be indicated at appropriate individual conduit)

Notes

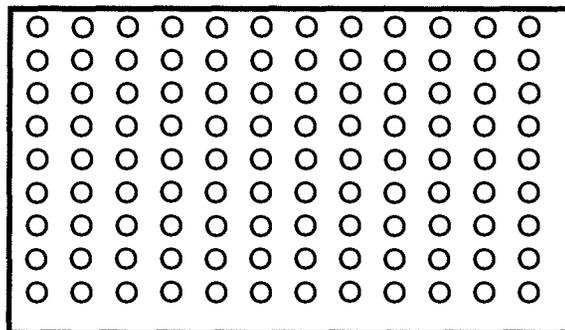

To be used when conducting field investigation

Field review completed:

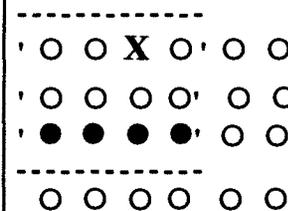

By: _____

Date: _____

Telephone: _____

Example: 4 duct x 3 duct array

○ - 7 vacant ducts

● - 4 occupied ducts

X - 3 innerducts with 2 vacancies

AT&T ("Licensor"), hereby consents to the assignment of License Agreement for Rights of Way (ROW), Conduits, and Pole Attachments, indicated in no. 4 above, from the current Licensee to the Assignee identified herein. From and after the date of assignment all rights and duties under the License Agreement will be assumed by Assignee and Licensee shall have no further obligations thereunder. Licensee will, however, continue to be responsible for obligations accruing before the date of assignment unless Licensor, Licensee and Assignee otherwise expressly provide through a separate agreement.

Assignee shall be responsible for obtaining from the appropriate governmental and/or private authority any required authorization to construct, operate and/or maintain its communications facilities on public and/or private property before it attaches its communications facilities to poles located on such public and/or private property. Such authorizations may include, but are not necessarily limited to, certificates of public convenience and necessity to provide service to the public and appropriate easements or right of way permits for location of facilities. In the absence of evidence satisfying the above, Licensor reserves the right to revoke its consent to this assignment.

[CCCS Amendment 147 of 147]

WIN2746

THIS AGREEMENT, made this 1st day of January, 1977 by and between the Barbourville Water & Electric an Agency of the City of Barbourville

under the laws of the State of Kentucky hereinafter called the "Electric Company"; party of the first part, and the Kentucky Telephone Co. a corporation of the State of Kentucky hereinafter called the "Telephone Company"; party of the second part.

WITNESSETH:

WHEREAS, the Electric Company and the Telephone Company desire to cooperate in accordance with the "Principles and Practices for the Joint Use of Wood Poles by Supply and Communication Companies" as contained in the report of the Joint General Committee of the Edison Electric Institute and the Bell Telephone System dated July 1945, and amendments thereto, and to establish joint use of their respective poles when and where joint use shall be of mutual advantage; and

WHEREAS, the conditions determining necessity or desirability of joint use depend upon service requirements to be met by both parties, including considerations of safety and economy, and each of them should be the judge of what the character of its circuits should be to meet its service requirements and as to whether or not these service requirements can be properly met by joint use of poles;

NOW, THEREFORE, in consideration of the premises and the mutual covenants herein contained, the parties hereto, for themselves, their successors and assigns, do hereby covenant and agree as follows:

ARTICLE I

DEFINITIONS

For the purpose of this agreement, the following terms when used herein, shall have the following meanings:

- A. NORMAL SPACE-means sufficient space on a joint use pole for the use of each party, taking into consideration requirements or the National Electrical Safety Code.

Except only as to the portion of its said space which, by the terms of the National Electrical Safety Code, may be occupied by certain attachments therein described of the other party, this space is specifically defined as follows:

- (1) for the Electric Company, the uppermost seven(7) feet;
- (2) for the Telephone Company, a space of four (4) feet at sufficient distance below the space of the Electric Company to provide at all times the minimum clearance required by the specifications referred to in Article IV, and at sufficient height above the ground to provide proper vertical clearance for the lowest horizontally run line wires or cables attached in such space.

- B. NORMAL JOINT USE POLE-means a pole which meets the requirements of the National Electrical Safety Code for support and clearance of supply and communication conductors under conditions existing at the time joint use is established, or is to be created under known plans of either party. Specifically, a normal joint pole under this agreement shall be a 40 foot class 4 wood pole.

The forgoing definition of a "normal joint pole" is not intended to preclude the use of joint poles shorter or of less strength than the normal joint pole in locations where such poles will meet the known or anticipated requirements or the parties hereto.

- C. ATTACHMENTS-mean materials or apparatus now or hereafter used by either party in the construction, operation or maintenance or its plant carried on poles.
Guy Poles are considered as part of the anchor and guy structure, and, as such, guy attachments are not considered as units to be counted.
- D. SUPPORTING ATTACHMENTS-mean attachments made on poles which, in general, relieve the Licensee of the necessity of providing a pole at or near the same location for the purpose of supporting its wires or cables.
- E. OWNER-means the party owning the pole to which attachments are made.
- F. LICENSEE-means the party having the right under this agreement to make attachments to a pole of which the other party is the Owner.

ARTICLE II

TERRITORY AND SCOPE OF AGREEMENT

This agreement shall be in effect and shall cover all wooden poles of each of the parties now existing, hereinafter erected or acquired, within the common operating areas served by the parties hereto, when said poles are brought hereunder, excepting:

- A. Poles which, in the Owner's judgment are necessary for its own sole use; and
- B. Poles which carry, or are intended to carry, circuits or a character that in the Owner's judgment proper rendering of its service now or in the future makes joint use of such poles undesirable.
- C. Poles located in rural areas which are covered by a separate agreement dated _____
The dividing points between the areas covered by this agreement and the above referred to separate agreement are described as follows: _____

It is understood and agreed that the division points may be changed at any time during the life of this agreement, when such changes are mutually agreed to by designated representatives of both parties, and thereupon, the division points will be changed accordingly, and will be made a part of this contract by exchange of letter or appropriate addendum.

ARTICLE III

PERMISSION FOR JOINT USE

Each party hereto hereby permits joint use by the other party of any of its poles when brought under this agreement as herein provided, subject to the terms and conditions herein stated.

ARTICLE IV

SPECIFICATIONS

Joint use of poles covered by this agreement shall at all times be in conformity with terms and provisions of the current issue of the National Electrical Safety Code as to minimum requirements, and such revisions and amendments thereto from time to time as may be necessary by reason of developments and improvements in the art as may be mutually agreed upon and approved in writing by the Manager

_____ of the
Electric Company and the District Engineer of the Telephone Company.

Edison Electric Institute Publication M-12, a report of the Joint Committee on Plant Coordination of the Edison Electric Institute and the Bell Telephone System, based on the National Electrical Safety Code, and such revisions and amendments thereto as may be made from time to time is to be used as a guide in the administration of this agreement.

ARTICLE V

RIGHT OF WAY FOR LICENSEE'S ATTACHMENTS

- A. The Owner and Licensee will cooperate as far as may be practicable in obtaining rights of way for both parties. When a written easement is secured it shall be in sufficient detail for identification and recording, where required, and shall be subject to inspection by the other party upon request. However, no guarantee is given by the Owner of permission from property owners, municipalities or others for the use of poles by the Licensee, and if objection is made thereto and the Licensee is unable to satisfactorily adjust the matter within a reasonable time, the Owner may at any time, upon thirty(30) days notice in writing to the Licensee, require the Licensee to remove its attachments from the poles involved, and the Licensee shall, within thirty (30) days after receipt of said notice, remove its attachments from such poles at its sole expense. Should the Licensee fail to remove its attachments as herein provided, the Owner may remove them at the Licensee's expense, without any liability whatever for such removal or the manner of making it, for which expense the Licensee shall reimburse the Owner on demand.
- B. Where the property owners will allow it, the owner of the line shall obtain a right of way swath extending up to $7\frac{1}{2}$ feet on each side of the center line of the line. Where property owners object to this swath each party will be responsible for obtaining permission for a swath satisfactorily for its own requirements. After permission of property owners is obtained, the owner of the line will provide the initial clearance of the swath to meet the requirements of both parties, up to a maximum of $7\frac{1}{2}$ feet on each side of the centerline of the line. However, in cases where the right of way clearance, including tree trimming, is more than indicated above, due to the requirements of the Licensee, the extra clearance costs shall be borne by the Licensee.
- C. It is agreed that the cost of maintenance of right of way and recurring trimming should be borne jointly to the extent that each of the parties will benefit by the joint endeavor. Due to varying conditions expected to be encountered, the division of cost of maintaining right of way and tree trimming shall be agreed upon after a joint inspection by representatives of both parties of the work operations required to provide necessary clearances. The division of cost as provided in this section shall be based on mutually agreeable predetermined divisions of cost and shall be subject to revision at the request of either party upon ninety (90) days written notice. The Division of Cost, as agreed to, shall then be evidenced by an exchange of letters as provided under Article XXIII.
- As between the parties to this contract, the company performing the work shall assume all responsibility of claims and suits which may arise from this work.

ARTICLE VI

PLACING, TRANSFERRING OR REARRANGING ATTACHMENTS

- A. Whenever either party desires to reserve space on any pole or the other, for any attachments requiring space thereon, not then specifically reserved hereunder for its use, it shall make written application therefor, specifying in such notice the location of the pole in question, the number and kind of attachments which it desires to place thereon, and the character of the circuits to be used. Within ten (10) days after the receipt of such notice, the Owner shall notify the applicant in writing whether or not

said pole is of thoes excluded from joint use under the provisions of Article II. Upon receipt of notice from the Owner that said pole is not of thoes excluded, and after completion of any transferring or rearranging which is then required in respect to attachments on said poles, including any necessary pole replacements as provided in Article VII "A" the Applicant shall have the right as Licensee hereunder to use said space for attachments and circuits of the character specified in said application in accordance with the terms of this agreement. Service wire attachments or emergency construction can be placed in accordance with the specifications, upon verbal approval, subsequently approved in writing.

- B. Except as herein otherwise expressly provided, each party shall place, maintain, rearrange, transfer and remove its own attachments, and shall at all times perform such work promptly and in such a manner as not to interfere with work being done by the other party.
- C. In any case where one party provides at the request of the other party double thimble guy rods for the use of both parties, the party requesting the double thimble guy rod shall pay to the party placing the guy rod a sum equal to half of the cost of the anchor and guy rod in place. In cases where existing anchors are adequate for the needs of either party, the party desiring additional guys will, where necessary, install double thimble guy rods at no expense to the other party, and the other party will, at its own expense, transfer its own expense, transfer its guys to the new rod. The ownership of the double thimble rod will be vested in the owner of the pole.

ARTICLE VII

ERECTING, REPLACING OR RELOCATING POLES

- A. Whenever any jointly used pole, or any pole about to be so used the provisions of this agreement, is insufficient in size or strength for the existing attachments and for the proposed immediate additional attachments thereon, the Owner shall promptly replace such pole with a new pole of the necessary size and strength, and make such other changes in the existing pole line, in which such pole is included, as may be made necessary by the replacement of such pole and the placing of the Licensee's circuits as proposed.
- B. Whenever it is necessary to change the location of a jointly used pole, by reason of any state, municipal or other governmental requirements of a property owner, the Owner shall, before making such change in location, give notice thereof in writing (except in cases of emergency when verbal notice will be given, and subsequently confirmed in writing) to the Licensee, specifying in such notice the time of such proposed relocation, and the Licensee shall, at the time so specified, transfer its attachment to the pole at the new location.

In the case of a pole along subdivided property which is not set opposite a lot line, the owner of such pole will, if conditions require, move same at the request of the Licensee, each party bearing the cost of moving its facilities.

- C. Whenever either party hereto is about to erect new poles within the territory covered by this agreement, either as an additional pole line, as an extension of an existing pole line, or as the reconstruction of an existing pole line, it shall notify the other in writing at least thirty(30) days before beginning the work (shorter notice, including verbal notice subsequently confirmed in writing, may be given in cases of emergency), and shall submit with such notice its plans showing the proposed location and size of the new poles and the character of circuits it will use thereon. The other party shall, within twenty(20) days after the receipt of such notice, reply in writing to the party erecting the new poles, stating whether such other party does, or does not desire to use and the amount of space it wishes to reserve. This notice of desire to establish joint use should include detail plans of any changes in

the plans of the other party which are desired in order to permit the establishment of joint use. If such other party requests space on the new poles, and if the character and number of circuits and attachments are such that the Owner does not wish to exclude the poles from joint use under the provision of Article II, then poles suitable for the said joint use shall be erected in accordance with the provisions and the payment of costs as provided in paragraphs "D", "E" and "F" of this Article.

- D. In any case where the parties hereto shall conclude arrangements for the joint use of any new poles to be erected, the ownership of such poles shall be determined by mutual agreement, to the end that each party hereto shall at all times own approximately one-half of the total number of poles jointly used under this agreement, due regard being given to the desirability of avoiding mixed ownership in any given line. In the event of disagreement as to ownership, the party then owning the smaller number of joint poles under this agreement shall promptly erect the new joint poles and be the owner thereof.
- E. The costs of erecting joint poles coming under this agreement, either as new pole lines, as extensions of existing pole lines, or to replace existing poles, either existing jointly used poles or poles not previously involved in joint use, shall be borne by the parties as follows:
1. A normal joint pole, or a joint pole shorter or smaller than the pole, shall be erected at the sole expense of the Owner, except as provided in Section "F" of this Article.
 2. A pole taller or stronger than the normal pole, the extra height and strength of which is due wholly to the Owner's requirements, shall be erected at the sole expense of the Owner.
 3. In the case of a pole taller or stronger than the normal pole, the extra height and strength of which is due wholly to the Licensee's requirements, the Licensee shall pay to the Owner a sum equal to the difference between the cost in place of such pole and the cost in place of a normal joint pole, the rest of the cost of erecting such pole to be borne by the Owner, except as provided in Section "F" of this Article.
 4. In the case of a pole taller or stronger than the normal pole, the extra height and strength of which is due to the requirements of both parties, the Licensee shall pay to the Owner a sum equal to one-half the difference between the cost in place of such pole and the cost in place of a normal joint pole, the rest of the cost of erecting such pole to be borne by the Owner.
 5. In the case of a pole taller or stronger than the normal pole, where height and strength in addition to that needed for the purpose of either or both of the parties hereto is necessary in order to meet the requirements of public authority or of property owners, one-half of the excess cost of such pole due to such requirements shall be borne by the Licensee; the rest of the cost of such pole to be borne as provided in that one of the preceding paragraphs 1, 2, 3, or 4, within which it would otherwise properly fall.
- F. In any case where a pole is erected hereunder to replace another pole solely because such other pole is not tall enough, or of the required strength, to provide adequately for the Licensee's requirements, or where such pole, whether it carry space reserved for the Licensee's use or not, had at the time of its erection, been pronounced by the Licensee as satisfactory and adequate for its requirements, the Licensee shall, upon erection of the new pole, pay to the Owner, in addition to any amounts payable by the Licensee under paragraphs 3, 4 or 5, of Section "E" of this Article, a sum equal to the sacrificed life of the pole which is replaced (then value in place of the pole replaced plus cost of removal less salvage), and the pole removed shall remain the property of the Owner. In any case where the other party by mutual consent erects and owns a joint pole to replace an existing pole of the Owner (instead of the Owner doing so as it is contemplated by Section "A" of this Article that the Owner will do),

such other party shall pay to the Owner of the replaced pole a sum equal to the then value in place of the pole which is replaced, and the pole removed shall thereupon become the property of such other party which has erected the replacing pole.

- G. When replacing a jointly used pole carrying aerial cable terminals, underground connections or transformer equipment, the new pole shall be set in the same hole which the replaced pole occupied, unless special conditions make it necessary or mutually desirable to set it in a different location.
- H. Any payments made by the Licensee under the foregoing provisions of this Article for poles taller than normal shall not in any way effect the ownership of said poles.
- I. Any payments as provided in the foregoing provisions of this Article may be based on mutually agreeable predetermined amounts. The amounts agreed to shall be subject to revision at the request of either party at the end of each three year period or at other times as may be mutually agreed to, and may be cancelled at any time by either party by a written notice. The amounts agreed to shall be evidenced by an exchange of letters, as provided under Article XXII.

ARTICLE VIII

MAINTENANCE OF POLES AND ATTACHMENTS

- A. The Owner shall, at its own expense, maintain its joint poles in a safe and serviceable condition, and in accordance with Article IV of this agreement and the requirements of the National Electrical Safety Code, and shall replace, subject to the provisions of Article VII, such of said poles that become defective.
- B. Each party shall, at its own expense, at all times maintain all of its attachments in accordance with Article IV of this agreement and the National Electrical Safety Code and keep them in safe condition and in thorough repair.

ARTICLE IX

PROCEDURE WHEN CHARACTER OF CIRCUITS IS CHANGED

When either party desires to change the character of its circuits on jointly used poles, such party shall give sixty (60) days notice to the other party of such contemplated changes, and in the event that the party agrees to joint use with such changed circuits, then the joint use of such poles shall be continued with such changes in construction as may be necessary to meet the requirements of the National Electrical Safety Code, being made at the expense of the party desiring to make the change. In the event, however, that the other party fails within thirty (30) days from receipt of such notice to agree in writing to such change, then both parties shall cooperate in accordance with the following plan:

- A. The parties hereto shall determine the most practical and economical method of effectively providing for separate lines, and the party whose circuits are to be moved shall promptly carry out the necessary work.
- B. The cost of re-establishing such circuits in the new location as are necessary to furnish the same business facilities that existed in the time such change was decided upon, shall be equitably apportioned between the parties hereto.

Unless otherwise agreed by the parties, ownership of any new line constructed under the foregoing provision in a new location shall vest in the party for whose use it is constructed. The net cost of establishing service in the new location shall be exclusive of any increased cost due to the substitution for existing facilities of other facilities of a substantially new or improved type or of increased capacity, but shall include, among other items, the cost of the new pole line, including rights of way, the cost of removing attachments from the old poles to the new location, and the cost of placing the attachments on the poles in the new location.

ARTICLE X

BILLS AND PAYMENTS FOR WORK

Upon the completion of work performed hereunder by either party, the expense of which is to be borne wholly or in part by the other, the party performing the work shall present to the other party, within thirty (30) days after the completion of such work, a statement showing the amount due, and such other party shall, within thirty (30) days after such statement is presented, pay to the party doing the work the amount due.

ARTICLE XI

ABANDONMENT OF JOINTLY USED POLES

- A. If the Owner desires at any time to abandon any jointly used pole, it shall give the Licensee notice in writing to that effect at least thirty (30) days prior to the date on which it intends to abandon such pole. If, at the expiration of said period, the Owner shall have no attachments on such pole but the Licensee shall not have removed all of its attachments therefrom, such pole shall thereupon become the property of the Licensee, and the Licensee shall save harmless the former Owner of such pole from all obligation, liability, damages, cost, expenses or charges incurred thereafter, because of, or arising out of, the presence or condition of such pole or any attachments thereon; and shall pay the Owner a sum equal to the then value in place of such abandoned pole, or poles, or such other equitable sum as may be agreed upon between the parties. Credit shall be allowed for any payments which the Licensee may have made under the provisions of Article VII, Section "E" and "F" when the pole was originally set, provided the Licensee furnishes proof of such payment.
- B. The Licensee may at any time abandon the use of joint pole by giving due notice thereof in writing to the Owner and by removing therefrom any and all attachments it may have thereon.

ARTICLE XII

ADJUSTMENT PAYMENTS

The parties contemplate that the use or reservation of space on poles by each party, as Licensee of the other under this agreement, shall be reciprocal and mutual insofar as this may be practicable.

- A. Adjustment payments per pole due from either party as Licensee to the other party as Owner shall, subject to the provision of Article XIII, be per annum.
- B. On or about December 1st of each year, each party, acting in cooperation with the other, subject to the provisions of the following paragraph of this Section, shall have ascertained and tabulated the total number of poles in use by each party as Licensee for which an adjustment payment shall be made to the other party as Owner.
For the purpose of such tabulation, poles shall not be included where the use by the other party consists only of attaching thereto guys, wires supporting street lights, messenger not supporting cables or conductors, and the attaching thereto of wires or cables of the Licensee for the purpose of clearance between the poles and said wires or cables and not for the primary purpose of supporting said wires or cables.
- C. The total adjustment payment due each party shall be determined by multiplying the poles owned by each party, tabulated as indicated in the first paragraph of Section "B" of this Article, by the adjustment payment in Section "A" of this Article.

The smaller total amount covered above shall be deducted from the larger amount and the Electric Company or the Telephone Company, whichever shall owe the larger amount, shall pay to the other the difference between said two amounts as the net adjustment payment due for the year involved. Within ten (10) days after the first day of January next ensuing after the date of this agreement, and within ten (10) days after the first day of January each year thereafter, during the time this agreement shall be in effect, the party to which said adjustment payment is owed, as of said first day of December, shall submit a written statement to the other party giving the correct amount owed by the other party. The adjustment payment herein provided for shall be paid within (10) days after the bill has been submitted, unless said party disputes the amount of such bill within five (5) days from receipt thereof.

Any recurring cost incurred by the Owner, beyond the control of the Owner, solely because of the use of the Owner's poles by the Licensee, shall be paid by the Licensee.

- D. At intervals not exceeding five (5) years an actual inventory of attachments shall be made by representatives of the parties. If there is any difference in the number of attachments found by the inventory and the number arrived at by tabulating those reported, correction will be made by retroactive billing for any attachments identified as being responsible for the difference, and any remaining difference will be spread evenly over the years since the last inventory, and billing adjusted accordingly.

ARTICLE XIII PERIODICAL REVISION OF ADJUSTMENT PAYMENT RATE

- A. At any time after January 1, 1976 and at intervals of not less than three (3) years thereafter, the adjustment payment rates applicable under this agreement shall be subject to joint review and revision, as provided for under Section "B" of this Article, upon the written request of either party. In case of revision of the adjustment payment rates as herein provided, the new adjustment payment rates agreed upon shall apply, starting with the annual bill next rendered and continuing until again adjusted.
- B. Revisions of the adjustment payments shall be based on experience resulting from previous administration of this agreement. Any changes shall take into account the original cost factors pertinent to the establishing of the poles facilities involved in all joint use existing under this agreement at the time of the said review. If, within ninety (90) days after the receipt of such request, by either party from the other, the parties hereto fail to agree upon a revision of such rate, then the adjustment payment per pole so to be paid shall be an amount equal to one-half of the then average annual total cost per pole, based on average in plant cost factors, of providing and maintaining the joint poles covered by this agreement. In case of a revision of the adjustment payment as herein provided, the new rate shall be applicable until again revised.

ARTICLE XIV DEFAULTS

- A. If either party shall make default in any of its obligations under this agreement, and such default shall continue thirty (30) days after notice thereof in writing from the other party all rights of the party in default hereunder pertaining to the establishment of future joint use shall be suspended, and if such default shall continue for a period of ninety (90) days after such suspension, the other party may forthwith terminate the right of both parties to make additional attachments. Any such termination of the right to make additional attachments by reason of any such default shall not, however, abrogate or terminate the right of either party to maintain the attachments theretofore made on the poles of the other, and all such prior attachments shall continue thereafter to be maintained

pursuant to and in accordance with the terms of this agreement, which agreement shall, so long as said attachments are continued, remain in full force and effect solely and only for the purpose of governing and controlling the rights and obligations of the parties with respect to said attachments.

- B. If either party shall make default in the performance of any work which it is obligated to do under this contract, at its sole expense, the other party may elect to do such work, and the party in default shall reimburse the other party for the cost thereof. Failure on the part of the defaulting party to make such payment within thirty (30) days upon presentation of bills therefor shall, at the election of the other party, constitute a default under Section "A" of this Article.

ARTICLE XV

LIABILITY AND DAMAGES

Whenever any liability for damages is incurred by either or both of the parties hereto for injuries to the employees, or for injury to the property of either party, or for injuries to other persons or their property, arising out of the joint use of poles under this agreement, or due to the proximity of the wires and fixtures of the parties hereto attached to the jointly used poles covered by this agreement, the liability for such damages, as between the parties hereto, shall be as follows:

- A. Each party shall be liable for all damages for such injuries to persons or property caused solely by its negligence or solely by its failure to comply at any time with the specifications as provided herein.
- B. Each party shall be liable for all damages for such injuries to its own property that are caused by the concurrent negligence of both parties hereto, or that are due to causes which cannot be traced to the sole negligence of the other party.
- C. Each party shall be liable for one-half ($\frac{1}{2}$) of all damages for such injuries to persons other than employees of either party, and for one-half ($\frac{1}{2}$) of all damages for such injuries to property not belonging to either party, that are caused by the concurrent negligence of both parties hereto, or that are due to causes which cannot be traced to the sole negligence of the other party.
- D. Where, on account of injuries of the character described in the preceding paragraphs of this Article, either party hereto shall make any payments to injured employees or to their relatives or representatives in conformity with (1) the provision of any workmen's compensation act or any act creating a liability in the employer to pay compensation for personal injury to an employee by accident arising out of and in the course of the employment, whether based on negligence on the part of the employer or not, or (2) any plan for employees' disability benefits or death benefits now established or hereafter adopted by the parties hereto, or either of them, such payments shall be construed to be damages within the terms of the preceding paragraphs numbered "A" and "B" and shall be paid by the parties hereto accordingly.
- E. All claims for damages arising hereunder that are asserted against or affect both parties hereto shall be dealt with by the parties hereto jointly; provided, however, that in any case where the Claimant desires to settle any such claim upon terms acceptable to one of the parties hereto but not to the other, the party to which said terms are acceptable may, at its election, pay to the other party one-half ($\frac{1}{2}$) of the expense which such settlement would involve, and thereupon said other party shall be bound to protect the party making such payment from all further liability and expense on account of such claim.
- F. In the adjustment between the parties hereto of any claim for damages arising hereunder, the liability assumed hereunder, by the parties, shall include, in addition to the amounts paid to the Claimant, all expenses incurred by the parties in connection therewith, which shall comprise costs, attorneys' fees, disbursements and other proper charges and expenditures.

ARTICLE XVI

EXISTING RIGHTS OR OTHER PARTIES

If either other parties hereto has, prior to the execution of this agreement, conferred upon others, not parties to this agreement, by contract or otherwise, rights or privileges to use any poles covered by this agreement, nothing herein contained shall be construed as affecting said rights or privileges, and either party hereto shall have the right, by contract or otherwise, to continue and extend such existing rights or privileges; it being expressly understood, however, that for the purpose of this agreement, the attachments or any such outside party shall be treated as attachments belonging to the Grantor, and the rights, obligations, and liabilities hereunder of the Grantor in respect to such attachments shall be the same as if it were the actual Owner thereof. Where municipal regulations require either party to allow the use of its poles for fire alarm, police or other like signal systems, such use shall be permitted under the terms of this Article.

ARTICLE XVII

SERVICE OF NOTICES

Wherever in this agreement notice is provided to be given by either party hereto to the other, such notice shall be in writing and given by letter mailed, or by personal delivery, to the Electric Company at its office at Barbourville City Hall on Daniel Boone Drive
Barbourville Water & Electric P.O. Box 651
or to the Telephone Company at its office at _____
as the case may be, or to such other address as either party may, from time to time, designate in writing for that purpose.

ARTICLE XVIII

TERMINATION OF AGREEMENT

This agreement shall continue in full force and effect until the 31st day of December, 1976 and shall continue thereafter until terminated insofar as the making of additional attachments is concerned, by either party, giving to the other one (1) years notice in writing of intention to terminate the right of making additional attachments. Any such termination of the right to make additional attachments shall not, however, abrogate or terminate the right of either party to maintain the attachments theretofore made on the poles of the other, and all such prior attachments shall continue thereafter to be maintained, pursuant to and in accordance with the terms of this agreement, which agreement shall, so long as said attachments are continued, remain in full force and effect solely and only for the purpose of governing and controlling the rights and obligations of the parties with respect to said attachments.

ARTICLE XIX

ASSIGNMENT OF RIGHTS

Except as otherwise provided in this agreement, neither party hereto shall assign or otherwise dispose of this agreement, in whole or in part, without the written consent of the other party; except that either party shall have the right to mortgage any or all of its property, rights, privileges and franchises, or lease or transfer any of them to another corporation organized for the purpose of conducting a business of the same general character as that of such party, or to enter into any merger or consolidation; and in case of the foreclosure of such mortgage, or in case of such lease, transfer, merger, or consolidation, its right and obligations hereunder shall pass to such successors and assigns; and provided, further, that subject to all of the terms and conditions of this agreement, either party may permit any corporation conducting a business

of the same general character as that of such party, with which it is affiliated, or connecting with it, the rights and privileges of this agreement, in the conduct of its said business; and for the purpose of this agreement, all such attachments maintained on any such pole by the permission as aforesaid of either party hereto shall be considered as the attachments of the party granting such permission, and the rights, obligations and liabilities of such party under this agreement, in respect to such attachments, shall be the same as if it were the actual owner thereof.

ARTICLE XX

WAIVER OF TERMS OR CONDITIONS

The failure of either party to enforce or insist upon compliance with any of the terms or conditions of this agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

ARTICLE XXI

EXISTING CONTRACTS

All existing agreements between the parties hereto for the joint use of wood poles upon a rental basis within the territory covered by this agreement, except the one dated _____ day of _____ which covers attachments in _____

_____ areas as described in Article II "C" are by mutual consent, hereby abrogated and annulled.

ARTICLE XXII

SUPPLEMENTAL ROUTINES AND PRACTICES

Nothing in the foregoing shall preclude the parties to this agreement from preparing such supplemental operating routines or working practices as they mutually agree to be necessary or desirable to effectively administer the provisions of this agreement.

IN WITNESS WHEREOF, the parties hereto have caused these presents to be executed in duplicate, and their corporate seals to be affixed thereto by their respective officers thereunto duly authorized, on the day and year first above written.

Re: Joint Use of Pole Agreement between Kentucky Telephone Company and Barbourville Water & Electric, an Agency of the City, dated 1/1/77 (the "Agreement")

Dear Sir or Madam:

On October 31, 2001, Verizon South Inc. ("Verizon") entered into a definitive agreement (the "Purchase Agreement") with Kentucky ALLTEL, Inc., a subsidiary of ALLTEL Corporation ("ALLTEL"). Under the terms of the Purchase Agreement Verizon will transfer to ALLTEL certain telephone operations and related assets located in Kentucky (the "Transaction"). The above referenced Agreement is one of the assets to be transferred as a part of the Transaction.

Until the closing of the Transaction, Verizon will continue to operate in the current manner and will continue to be responsible to perform those obligations under the Agreement that arise prior to the transfer to ALLTEL. Upon Closing of the Transaction, ALLTEL will be assigned all of Verizon's rights and obligations under the Agreement, to the extent such obligations arise after the closing date.

By this letter, Verizon is requesting your consent to the assignment of the Agreement to ALLTEL as a part of the Transaction. Please indicate your consent by executing the letter where indicated in the space provided below and returning it in the enclosed pre-paid envelope at your earliest convenience, but by no later than **February 21, 2002**. The enclosed copy should be retained for your records. By consenting to the assignment of the Agreement you also agree that, after the closing of the Transaction, Verizon will have no further obligations to you under the Agreement, and that ALLTEL shall be responsible for all obligations thereunder after the closing.

Your consent will remain effective through the closing of the Transaction. You will be contacted by ALLTEL who will advise you of the closing date and the new contact information.

Dear Sir:

MAR 06 2002

Please advise me of any change of address as to where to send the annual bill for pole rental. I have been mailing it to the GTE/VERIZON engineering office at London, Ky. I assume that they are forwarding it on to others.

Sincerely,
Randell Young, P.E.

3. SPACE is the linear portion of a joint pole parallel to its axis reserved for the exclusive use of one of the parties (subject only to the exceptions provided for by the specifications mentioned in Article III which in certain instances permit the making of certain attachments by one party in the space reserved for the other party).

4. NORMAL SPACE is the following described space:

a. For the ~~Telephone Company~~ ^{Utilities} the uppermost ~~5-7~~ ⁵⁻⁷ feet, measured from top of pole.

b. For the Telephone Company a space of ~~2~~ ² feet, at a sufficient distance below the space of the ~~Telephone Company~~ ^{Utilities} to provide at all times the minimum clearance required by the specifications mentioned in Article III and at a sufficient height above ground to provide the proper vertical clearance above ground or track rails for the lowest horizontally run line wires or cables attached in such space.

The foregoing definition of "a normal joint pole" is not intended to preclude the use of joint poles shorter or of less strength than the normal joint pole in locations where such poles will meet the requirements of the parties hereto.

The above assignment of space is not intended to preclude the use of vertical runs or the mounting of such equipment as terminals or meters on the lower portions of the pole when mutually agreeable.

ARTICLE III SPECIFICATIONS

Except as otherwise provided in Section (e) of Article VII, referring to construction temporarily exempt from the application of the specifications mentioned herein, the joint use of the poles covered by this Agreement shall at all times be in conformity with accepted modern methods such as those suggested in Edison Electric Institute Publication No. M12 and shall at all times conform to the requirements of the National Electrical Safety Code, Fifth Edition, and subsequent revisions thereof, except where the lawful requirements of public authorities may be more stringent, in which case the latter will govern.

In establishing joint use of wood poles whether installed new for joint use or installed initially for electric circuits along, the total transverse and vertical loads for all conductors attached to a pole covered by this agreement shall not, under the assumed storm loadings of the National Electrical Safety Code for the area in which the pole is located, exceed fifty (50) percent of the ultimate fiber stress of the supporting pole. In the case of existing pole lines, the strength of the pole shall be assumed to be the same as when new.

Modifications of, additions to, or construction practices supplementing wholly or in part the requirements of the National Electrical Safety Code, shall, when accepted in writing by both parties hereto through their agents authorized to approve such changes, likewise govern the joint use of poles.

ARTICLE IV ESTABLISHING JOINT USE OF EXISTING POLES

~~Telephone Company~~ ^{Utilities} (a) Before the Telephone Company shall make use of the poles of the ~~Telephone Company~~ under this Agreement, it shall request permission therefor in writing on the form attached hereto and identified as Appendix C, and shall comply with the procedure set forth in said Appendix C.

(b) Whenever either party desires to reserve space for its attachments on any pole owned by the other party, either as initial space or additional space on such pole, it shall make written application therefor, specifying the location of the poles in question, the amount of space desired on each pole, and the number and character of the circuits to be placed thereon. If, in the judgment of the owner, the poles are necessary for its own sole use, or joint use under the circumstances is undesirable, the owner, shall have the right to reject the application. In any event, within a reasonable period after the receipt of such application the owner shall notify the applicant in writing whether the application is approved or rejected. Upon receipt of notice from the owner that the application has been approved, and after the completion of any

transferring or rearranging which is required to permit the attaching of the applicant's circuits on such poles, including any necessary pole replacements, the applicant shall have the right as licensee hereunder to use such space in accordance with the terms of the application and of this Agreement.

(c) Whenever any jointly used pole or any pole about to be so used under the provisions of this Agreement is insufficient in height or strength for the existing attachments and for the proposed additional attachments thereon, the owner shall promptly replace such pole with a new pole of the necessary height and strength and shall make such other changes in the existing pole line in which such pole is included as the conditions may then require.

(d) Each party shall place, transfer and rearrange its own attachments, place guys to sustain any unbalanced loads caused by its attachments, and perform any tree trimming or cutting incidental thereto. Each party shall at all times execute such work promptly and in such manner as not to interfere with the service of the other party.

(e) The cost of establishing the joint use of existing poles, including the making of any necessary pole replacements, shall be borne by the parties hereto in the manner provided in Article VIII -- Division of Costs.

ARTICLE V

ESTABLISHING JOINT USE OF NEW POLES

(a) Whenever either party hereto requires new pole facilities for an additional pole line, an extension of an existing pole line, or in connection with the reconstruction of an existing pole line, it shall promptly notify the other party to that effect in writing (verbal notice subsequently confirmed in writing may be given in cases of emergency), stating the proposed location and character of the new poles and the character of circuits it intends to use thereon and indicating whether or not such pole facilities will be, in the estimation of the party proposing to construct the new pole facilities, susceptible of joint use. Within a reasonable period after the receipt of such notice, the other party shall reply in writing, stating whether it does, or does not, desire space on the said poles and, if it does desire space thereon, the character of the circuits it desires to use and the amount of space it wishes to reserve. If such other party requests space on the proposed new poles and if the character and number of its circuits and attachments are such that the party proposing to construct the new pole facilities does not consider joint use undesirable, then it shall erect poles suitable for such joint use, subject, however, to the provisions of Section (b) of this Article, and subject further to the condition that requests by the Telephone Company for space on proposed new poles of the ~~same nature~~ under this Agreement shall be made in writing on the form attached hereto and identified as Appendix C, and shall comply with the procedure set forth in said Appendix C. The applicant for space on the poles shall be promptly notified in writing of the action taken on the application.

(b) In any case where the parties hereto shall conclude arrangements for the joint use of any new poles to be erected, and the party proposing to construct the new poles facilities already owns more than its proportionate share of joint poles, the parties shall take into consideration the desirability of having the new pole facilities owned by the party owning less than its proportionate share of joint poles so as to work towards such a division of ownership of the joint poles that neither party shall be obligated to pay to the other any rentals because of their respective use of joint poles owned by the other.

(c) Each party shall place its own attachments on the new joint poles and place guys to sustain any unbalanced loads caused by its attachments. ~~The owner shall,~~ ^{Telephone Co.} however, provide the initial clearing of the right-of-way, and tree trimming, which shall at least meet the requirements of the other party. Each party shall execute its work promptly and in such manner as not to interfere with the service of the other party.

(d) The cost of establishing the joint use of new poles including costs incurred in the retirement of existing poles shall be borne by the parties hereto in the manner provided in Article VIII -- Division of Costs.

ARTICLE VI
RIGHT OF WAY FOR LICENSEE'S ATTACHMENTS

While the owner and licensee will cooperate as far as may be practicable in obtaining rights-of-way for both parties on joint poles, the owner does not warrant or assure to the licensee any right-of-way privileges or easements on, over or across streets, alleys and public thoroughfares, and private or publicly owned property, and if the licensee shall at any time be prevented from placing or maintaining its attachments on the owner's poles, no liability on account thereof shall attach to the owner of the poles.

ARTICLE VII
MAINTENANCE OF POLES AND ATTACHMENTS

(a) The Owner shall maintain its joint poles in a safe and serviceable condition and in accordance with the specifications mentioned in Article III and shall replace, reinforce or repair such of these poles as become defective.

(b) When replacing a jointly used pole carrying terminals of aerial cable, underground connection, or transformer equipment, the new pole shall be set in the same hole which the replaced pole occupied unless special conditions make it necessary or mutually desirable to set it in a different location.

(c) Whenever it is necessary to replace or relocate a jointly used pole, the owner shall, before making such replacement or relocation, give notice thereof in writing (except in case of emergency, when verbal notice will be given and subsequently confirmed in writing) to the licensee, specifying in such notice the time of such proposed replacement or relocation and the licensee shall at the time so specified transfer its attachments to the new or relocated joint pole.

(d) Except as otherwise provided in Section (e) of this Article, each party shall at all times maintain all of its attachments, and perform any necessary tree trimming or cutting incidental thereto, in accordance with the specifications mentioned in Article III and shall keep them in safe condition and in thorough repair. Nothing in the foregoing shall preclude the parties hereto from making any mutually agreeable arrangement for jointly contracting for or otherwise providing for maintenance trimming.

(e) Any existing joint use construction of the parties hereto which does not conform to the specifications mentioned in Article III shall be brought into conformity therewith as soon as practicable.

When such existing construction shall have been brought into conformity with said specification, it shall at all times thereafter be maintained as provided in Sections (a) and (d) of this Article.

(f) The cost of maintaining poles and attachments and of bringing existing joint use construction into conformity with said specifications shall be borne by the parties hereto in the manner provided in Article VIII - Division of Costs.

ARTICLE VIII
DIVISION OF COSTS

(a) The cost of erecting new joint poles coming under this Agreement, to construct new pole lines, to make extensions to existing pole lines, or to replace existing poles, shall be borne by the parties as follows:

1. A normal joint pole, or joint pole smaller than normal, shall be erected at the sole expense of the owner.
2. A pole larger than the normal, the extra height or strength of which is due wholly to the owner's requirements, including requirements as to keeping the owner's wires clear of trees, shall be erected at the sole expense of the owner.
3. In the case of a pole larger than the normal, the extra height or strength of which is due wholly to the licensee's requirements, including requirements as to keeping the licensee's wires clear of trees, the licensee shall pay to the owner a sum equal to the

difference between the cost in place of such pole and the cost in place of a normal joint pole, the rest of the cost of erecting such pole to be borne by the owner, except in so far as otherwise provided in Section (c) of this Article.

4. In the case of a pole larger than the normal, the extra height or strength which is due to the requirements of both parties or the requirements of public authorities or of property owners, (other than requirements with regard to keeping the wires of one party only clear of trees), the difference between the cost in place of such pole and the cost in place of a normal joint pole shall be shared in the ratio of fifty-five percent by the ~~Telephone Company~~ ^{Utilities} and forty-five percent by the Telephone Company, the rest of the cost of erecting such pole to be borne by the owner.
5. A pole erected between existing poles to provide sufficient clearance and furnish adequate strength to support the circuits of both the owner and licensee, which it would have been unnecessary to erect if joint use had not been undertaken, shall be erected at the sole expense of the licensee.

(b) Any payments for poles made by the licensee under any foregoing provisions of this Article shall not entitle the licensee to the ownership of any part of said poles for which it has contributed in whole or in part.

(c) Where an existing jointly used pole or a non-joint pole is prematurely replaced by a new one solely for the benefit of the licensee, the cost of the new pole shall be divided as specified in Section (a) of this Article and the licensee shall also pay the owner the value in place of the replaced pole, plus the cost of removal less the salvage value of such pole. The replaced pole shall be removed and retained by its owner.

(d) Each party shall place, maintain, rearrange, transfer and remove its own attachments at its own expense except as otherwise expressly provided.

(e) The expense of maintaining joint poles shall be borne by the owner thereof except that the cost of replacing poles shall be borne by the parties hereto in the manner provided in Sections (a) and (c) of this Article.

(f) Where service drops of one party crossing over or under lines of the other party are attached to the other party's poles, either directly or by means of a pole top extension fixture, the cost shall be borne as follows:

- (1) Pole top extension fixtures shall be provided and installed at the sole expense of the party using them.
- (2) Where an existing pole is replaced with a taller one to provide the necessary clearance the party owning the service drop shall pay to the party owning the pole a sum equal to the difference in cost in place between the new pole and a new pole of the same size as the replaced pole, together with a sum representing the value in place of the replaced pole plus the cost of removal less the salvage value of such pole, the owner of the pole to remove and retain such pole.

(g) When, in order to improve an existing condition considered undesirable by both parties, existing poles of one of the parties are abandoned in favor of combining lines on poles of the other party, the then value in place of the abandoned poles plus the cost of removal less the salvage value of such poles shall be shared in the ratio of fifty-five percent by the ~~Telephone Company~~ ^{Utilities} and forty-five percent by the Telephone Company.

(h) Payments made by either party to the other under the provisions of this Article shall be based on the table of values listed in Appendix A.

ARTICLE IX

PROCEDURE WHEN CHARACTER OF CIRCUITS IS CHANGED

When either party desires to change the character of its circuits on jointly used poles, such party shall give 90 days notice to the other party of such

contemplated change. In the event that the party agree in writing to joint use with such changed circuits, then the joint use of such poles shall be continued with such changes in construction as may be required to meet the terms of the specifications mentioned in Article III for the character of circuits involved and such other changes as may be agreed upon. The parties shall cooperate to determine the equitable apportionment of the net expense of such changes. In the event, however, that the other party fails within 30 days from receipt of such notice to agree in writing to such change in character of circuits, then both parties shall cooperate in accordance with the following plan:

1. The parties hereto shall determine the most practical and economical method of effectively providing for separate lines, either overhead or underground, and the party whose circuits are to be moved shall promptly carry out the necessary work.
2. The net cost of re-establishing such circuits in the new location as are necessary to furnish the same business facilities that existed in the joint use section at the time such change was decided upon, shall be borne by the licensee; provided, however, that the owner shall bear an equitable share of such cost wherever the change was occasioned by the necessities of the owner and the licensee would suffer a hardship in having to assume the entire burden of the cost of re-establishing the circuits.

Unless otherwise agreed by the parties, ownership of any new line or underground facilities constructed under the foregoing provisions in a new location shall vest in the party for whose use it is constructed.

ARTICLE X

ABANDONMENT OF JOINTLY USED POLES

(a) If the owner desires at any time to abandon any jointly used pole, it shall give the licensee notice in writing to that effect at least 60 days prior to the date on which it intends to abandon such pole. If at the expiration of said period the owner shall have no attachments on such pole but the licensee shall not have removed all of the attachments therefrom, such pole shall thereupon become the property of the licensee, and the licensee shall save harmless the former owner of such pole from all obligation, liability, damages, cost, expenses or charges incurred thereafter, and not arising out of anything theretofore occurring, because of, or arising out of, the presence or condition of such pole or of any attachments thereon; and shall pay the owner the then value in place of the pole to the licensee but in no case an amount less than the net salvage value of the pole to the owner as provided in Appendix A attached hereto. The former owner shall further evidence transfer of title to the pole by means of a bill of sale. Credit shall be allowed for any payments which the licensee may have made under the provisions of Article VIII - - Division of Costs, when the pole was originally set.

(b) The licensee may at any time abandon the use of a joint pole by giving due notice thereof in writing to the owner and by removing therefrom any and all attachments it may have thereon. The licensee shall in such case pay to the owner the full rental for said pole for the then current year.

ARTICLE XI

RENTALS

(a) On or about January 1 of each year the parties acting in cooperation shall, subject to the provisions of Section (b) of this Article, tabulate the total number of joint poles in use as of the preceding day, and the number of poles on which either party as licensee removed all of its attachments during the twelve preceding months, which tabulation shall indicate the number of poles which each party owns on which rentals are to be paid by the other party.

(b) For the purpose of such tabulation, any pole used by the licensee for the sole purpose of attaching wires or cables thereto, either directly or by means of a pole top extension fixture, in order to provide clearance between the facilities of the two parties as distinguished from providing support for such wires or cables, shall not be considered as a joint pole.

(c) If there is provision under a separate agreement between the Telephone Company and the ~~Utilities~~ ^{Utilities} for facilities associated with power line carrier systems, the rental provisions of the Agreement of which this article forms a part shall apply for poles on which both types of facilities are present, and no other rentals shall apply. The rental provisions of this Agreement shall not apply, however, where only those facilities directly associated with the power line carrier systems are involved.

(d) The rentals per pole due from either party as licensee to the other party as owner shall be based on the equitable sharing of the economies of joint use as provided for in Appendix B. Subject to the provisions of Article XII, \$ ~~_____~~ ^{_____} per annum shall be paid by the ~~Company~~ ^{Utilities} for each jointly used pole owned by the

Telephone Company and \$ ~~_____~~ ^{_____} per annum shall be paid by the Telephone Company for each jointly used pole owned by the ~~Company~~ ^{Utilities}. The smaller total sum shall be deducted from the larger and the ~~Company~~ ^{Utilities} or the Telephone Company, as the case may be, shall pay to the other the difference between such amounts. The rental herein provided for shall be paid within 10 days after the bill has been submitted.

ARTICLE XII

PERIODICAL ADJUSTMENT OF RENTALS

(a) At any time after 5 years from the date of this Agreement and at intervals of not less than 5 years thereafter, the rentals applicable under this Agreement shall be subject to joint review and adjustment as provided for under Section (b) of this Article upon the written request of either party. In case of adjustment of rentals as herein provided, the new rentals agreed upon shall apply starting with the annual bill next rendered and continuing until again adjusted.

(b) All adjustments of rental shall be in accord with the provisions of Appendix B, and any changes shall take into account the cost factors originally involved in all joint use existing at that time under this Agreement.

ARTICLE XIII

DEFAULTS

(a) If either party shall default in any of its obligations under this Agreement and such default continues thirty (30) days after due notice thereof in writing by the other party, the party not in default may suspend the rights of the party in default in so far as concerns the granting of future joint use and if such default shall continue for a period of ~~_____~~ ⁹⁰ days after such suspension, the party not in default may forthwith terminate this Agreement as far as concerns the future granting of joint use.

(b) If either party shall make default in the performance of any work it is obligated to do under this Agreement at its sole expense, the other party may elect to do such work, and the party in default shall reimburse the other party for the cost thereof. Failure on the part of the defaulting party to make such payment within

~~_____~~ ⁶⁰ days upon presentation of bills therefor shall, at the election of the other party, constitute a default under Section (a) of this Article.

ARTICLE XIV

EXISTING RIGHTS OF OTHER PARTIES

(a) If either of the parties hereto has, prior to the execution of this Agreement, conferred upon others, not parties to this Agreement, by contract or otherwise, rights or privileges to use any poles covered by this Agreement, nothing herein contained shall be construed as affecting such rights or privileges, and either party hereto shall have the right, by contract or otherwise, to continue and extend such existing rights or privileges, it being expressly understood, however, that for the purpose of this Agreement, the attachments of any such outside party, except those of

a municipality or other public authority, shall be treated as attachments belonging to the grantor, and the rights, obligations, and liabilities hereunder of the grantor in respect to such attachments shall be the same as if it were the actual owner thereof.

(b) Where municipal regulations require either party to allow the use of its poles for fire alarm, police, or other like signal systems, such use shall be permitted under the terms of this Article, provided attachments of such parties are placed and maintained in accordance with the specifications mentioned in Article III.

ARTICLE XV ASSIGNMENT OF RIGHTS

Except as otherwise provided in this Agreement, neither party hereto shall assign or otherwise dispose of this Agreement or any of its rights or interests hereunder, or in any of the jointly used poles, or the attachments or rights of way covered by this Agreement, to any firm, corporation or individual, without the written consent of the other party, except to the United States of America or any agency thereof; provided, however, that nothing herein contained shall prevent or limit the right of either party to mortgage any or all of its property, rights, privileges, and franchises, or lease or transfer any of them to another corporation organized for the purpose of conducting a business of the same general character as that of such party, or to enter into any merger or consolidation; and, in case of the foreclosure of such mortgage; or in case of lease, transfer, merger, or consolidation, its rights and obligations hereunder shall pass to, and be acquired and assumed by, the purchaser on foreclosure, the transferee, lessee, assignee, merging or consolidating company, as the case may be; and provided further that subject to all of the terms and conditions of this Agreement, either party may permit any corporation conducting a business of the same general character as that of such party, and owned, operated, leased and controlled by it, or associated or affiliated with it, the use of all or any part of the space reserved hereunder on any pole covered by this Agreement for the attachments used by such party in the conduct of its said business; and for the purpose of this Agreement, all such attachments maintained on any such pole by the permission as aforesaid of either party hereto shall be considered as the attachments of the party granting such permission, and the rights, obligations and liabilities of such party under this Agreement, with respect to such attachments, shall be the same as if it were the actual owner thereof.

ARTICLE XVI WAIVER OF TERMS OR CONDITIONS

The failure of either party to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

ARTICLE XVII PAYMENT OF TAXES

Each party shall pay all taxes and assessments lawfully levied on its own property upon said jointly used poles, and the taxes and the assessments which are levied on said joint poles shall be paid by the owner thereof, but any tax, fee, or charge levied on owner's poles solely because of their use by the licensee shall be paid by the licensee.

ARTICLE XVIII BILLS AND PAYMENT FOR WORK

Upon the completion of work performed hereunder by either party, the expense of which is to be borne wholly or in part by the other party, the party performing the work shall present to the other party within 30 days after the completion of such work an itemized statement of the costs and such other party shall within 30 days after such statement is presented pay to the party doing the work such other party's proportion of the cost of said work.

APPENDIX A

This Appendix contains tables of pole values to be used in dividing costs as provided under Article VIII. It also outlines the steps for adjusting such values to determine any payments that the licensee must make to the owner to defray costs of premature replacement of poles to accommodate the licensee.

A. Tabulation of New Pole Costs.

The following tabulation shall list mutually agreed upon average costs in place of new poles of all kinds of timber, including only such cost items as are repetitive when poles are replaced.

TABLE 1

| HEIGHT | CLASS | | | | | | | | | |
|--------|-------|---|---|---|---|---|---|---|---|----|
| | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| 20' | | | | | | | | | | |
| 22' | | | | | | | | | | |
| 25' | | | | | | | | | | |
| 30' | | | | | | | | | | |
| 35' | | | | | | | | | | |
| 40' | | | | | | | | | | |
| 45' | | | | | | | | | | |
| 50' | | | | | | | | | | |
| 55' | | | | | | | | | | |
| 60' | | | | | | | | | | |

B. Age Factor for Modifying Values of Poles.

1. The following table of age factors shall be used in adjusting pole costs in Table 1 to arrive at current values in place of existing poles coming under the provisions of this Agreement.

TABLE 2

| AGE OF POLE | 0-3 YEARS | 4-9 YEARS | 10-15 YEARS | 16-21 YEARS | 22-27 YEARS | OVER 27 YEARS |
|-------------|-----------|-----------|-------------|-------------|-------------|---------------|
| FACTOR | 1.0 | .8 | .6 | .4 | .2 | 0 |

C. ~~REVISIONS TO TABLE 1.~~

~~The values set forth in Table 1 shall be modified further by the following factors for poles in place of existing poles in place of existing poles.~~

TABLE 3

| | | |
|-------------------------------------|------------------|------|
| FOR POLES SET PRIOR TO JAN. 1, 1937 | | .5- |
| FOR POLES SET BETWEEN JAN. 1, 1937 | AND JAN. 1, 1945 | .7- |
| FOR POLES SET BETWEEN JAN. 1, 1945- | AND- | 1.0- |
| FOR POLES SET BETWEEN | AND- | |

2. It is provided that additional factors will be added to cover future long term changes in costs.

D. Salvage Value of Poles.

1. A figure of 70% of current material costs shall be used for computing salvage values of poles which have been installed not exceeding 10 years. Average values for all kinds of timber shall be used. The following table sets forth mutually agreed upon salvage values.

TABLE 4

| HEIGHT | CLASS | | | | | | | | | |
|--------|-------|---|---|---|---|---|---|---|---|----|
| | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| 20' | | | | | | | | | | |
| 22' | | | | | | | | | | |
| 25' | | | | | | | | | | |
| 30' | | | | | | | | | | |
| 35' | | | | | | | | | | |
| 40' | | | | | | | | | | |
| 45' | | | | | | | | | | |
| 50' | | | | | | | | | | |
| 55' | | | | | | | | | | |
| 60' | | | | | | | | | | |

2. For poles installed longer than 10 years it shall be assumed that the salvage value is equal to the cost of removal.*

E. Cost of Removal.

1. The following table sets forth mutually agreed upon total costs of removing poles.

TABLE 5

| HEIGHT | COST OF REMOVAL** |
|-------------|-------------------|
| 25' OR LESS | |
| 30' | |
| 35' | |
| 40' | |
| 45' | |
| 50' | |
| 55' | |

F. Anchors

1. The cost in place of all anchors regardless of size, type or number of thimbles shall be deemed to be ... [redacted] ... for use in applying the provisions of this Agreement.

*Based on assumption that owner should bear an increasing portion of cost of removal as poles age.
 **Annual variations in costs of removal neglected.

APPENDIX B

This Appendix describes the basic principles and guides which have been used under this Agreement in setting the rents specified in Article XI and which are to be used in making periodical adjustments of rentals as provided for in Article XII.

Under these principles the rentals are intended, in so far as it is practicable, to result in a sharing of the economies realized by the joint use of pole plant in proportion to the relative costs of separate pole line construction.

The procedures outlined herein take into account the following objectives:

1. An equitable division of savings regardless of the number of jointly used poles owned by each party.
2. Rental rates applicable universally in the area covered by the Agreement regardless of whether the pole lines involved are initially constructed with joint use in view or are existing lines modified for joint use.
3. Appropriate allowance in the rental rates for additional costs incurred by each party in supplying 'normal joint poles', as defined in the Agreement, and the costs of other items required in the joint use of poles which would not be incurred in separate line construction.
4. Rentals based on the costs of "typical miles" of separate lines, of newly constructed joint lines and of existing lines modified to make them suitable for joint use. The 'per mile' values of rentals are then reduced to 'per pole' values for purposes of simplifying tabulations and to provide for the joint use of scattered poles.

The rentals are the dollar values resulting from the licensee paying to the owner, as annual rental, an amount representing the annual charge on a separate line for the licensee less the sum of (a) the annual charges on the additional costs incurred by the licensee in establishing joint use and (b) the licensee's share of the total annual savings. This share is the ratio of the Licensee's typical separate line costs to the sum of the typical separate line costs of each of the parties.

The annual rent payable can also be stated as follows:

| | | | | | |
|------------------------------------|--|--------|---|------|---|
| Licensee's annual rent (Equals) | Annual charges saved by licensee through not having to build a separate line | (Less) | Licensee's appropriate percentage | (Of) | Total savings in annual charges realized through joint use |
|------------------------------------|--|--------|---|------|---|

The cost in place of a line of poles is made up of a number of factors including such items as right-of-way solicitation, clearing, staking, direct labor and material costs of bare poles in place and pro rata shares of construction supervision and overhead. These costs, for a specific area, may differ considerably from corresponding costs in other parts of the country. These variations in pole line costs will, however, affect both power and telephone lines to about the same degree.

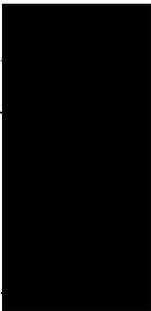

The parties to this contract will mutually agree on the average cost of a typical mile of 35 foot, class 5 poles in place in their common area. Below are tabulated appropriate rentals over a range of typical mile costs. From this tabulation the parties shall use the rental payments associated with the value nearest to the agreed upon average cost.

Utilities

This is to request your permission for this Company to use jointly certain of your poles under the terms and conditions of the General Agreement for Joint Use of Wood Poles which has been executed by your Cooperative and this Company.

The poles for which this permission is requested are located generally within the limits of the extension-of-service project in the territory indicated by the attached map, which also bears the above date and Request Number.

If permission to use these poles is given by you, this Company intends to canvass fully the territory generally within the project limits and if construction of the project by use of your poles for our attachments is begun, will furnish telephone service to all establishments therein desiring service, subject to its tariff rates and regulations.

Our present plan is to start the work involved in this project about November 1, 1957

MONTH - YEAR

and complete the work about August 1, 1958.

MONTH - YEAR

If permission to use these poles is given by you, this Company proposes to prepare and furnish to you detailed construction plans and drawings to indicate specifically your poles that we wish to use jointly, in accordance with the procedure provided in Article IV or V of the Agreement, as the case may be, together with a map showing the final project limits as determined after engineering is complete. If the final project limits vary substantially from the project limits shown on the map attached hereto, it is understood that this Company will request your further permission to use poles within the territory indicated on the final map.

Utilities

If the joint use proposed is agreeable to your Cooperative, please signify your approval on the second copy of this request in the space provided and return that copy to this Company.

**GENERAL AGREEMENT
JOINT USE OF WOOD POLES
AMENDMENT FOR RATE INCREASE**

This Agreement, made as of the 18th day of March, 1999, and effective as of January 1, 1998, by and between **Bardwell City Utilities**, hereinafter called the "Utilities" and **GTE South Incorporated**, hereinafter called the "Telephone Company."

WITNESSETH:

WHEREAS, the Utilities and Calvert Telephone Company, Inc. entered into a General Agreement for the Joint Use of Wood Poles as of October 28, 1957; and

WHEREAS, GTE South Incorporated is the successor in interest to said Calvert Telephone Company, Inc.; and

WHEREAS, the parties hereto, for themselves, their successors and assigns, desire to amend Article XI (d) of said Joint Use Agreement as follows:

"Subject to the provisions of Article XII, [REDACTED] per annum shall be paid by the Utilities for each jointly used pole owned by the Telephone Company and [REDACTED] per annum shall be paid by the Telephone Company for each jointly used pole owned by the Utilities. The smaller total sum shall be deducted from the larger and the Utilities or the Telephone company, as the case may be, shall pay to the other the difference between such amounts. The rental herein provided for shall be paid within 30 days after the bill has been submitted."

*PLSD TO MIKE HOSKINS,
BARDWELL CITY UTIL. 3/19/99.*

IN WITNESS WHEREOF, the parties have caused these presents to be executed in duplicate and their corporate seals to be affirmed thereto by their respective officers thereunto duly authorized on this the 18th day of March, 1999.

THIS AGREEMENT, made this 28th day of July 2011 ("Commencement Date") by and between CUMBERLAND VALLEY ELECTRIC INC., a corporation under the laws of the State of Kentucky, Hereinafter call the "Power Distributor" party of the first part, and WINDSTREAM KENTUCKY EAST, LLC, a corporation under the laws of the state of Delaware hereinafter called the "Telephone Company," party of the second part.

Witnesseth

WHEREAS, the Power Distributor and the Telephone Company desire to continue joint use of distribution poles and in the future to establish further joint use of their respective distribution poles when and where joint use shall be of mutual advantage; and

WHEREAS, because of changed conditions and experience gained, and to facilitate administration of joint use, the parties desire to terminate the present contract dated September 1, 1963, between the Power Distributor and the Telephone Company and to enter into a new joint use agreement; and

NOW, THEREFORE, in consideration of the premises and the mutual covenants herein contained, the parties hereto, for themselves, their successors and assigns, do hereby covenant and agree as follows:

ARTICLE I

DEFINITIONS

For the purpose of this Agreement, the following terms when used herein, shall have the following meanings.

- A. ATTACHMENTS – are any wires, cables, strands, materials or apparatus affixed to the Joint Use Pole, excluding ground wire, now or hereafter used by either party in the construction, operation or maintenance of its plant. A pedestal that is adjacent to a Joint Use Pole, but not affixed to the pole, shall not be considered an attachment.

- B. CODE – is the National Electrical Safety Code, as it may be amended from time to time.

- C. COST or COSTS – are the reasonable costs (including loading factors, associated overheads, and overtime as applicable of a party performing work under this Agreement.

- D. DAYS – as used herein shall mean calendar days.

- E. EMERGENCY – is a situation where a joint use pole is damaged, or subject to failing, and such failure is reasonably believed to create risk of personal injury or damage to property.

- F. INJURIES – include death, personal injury and property damage or destruction.
- G. JOINT USE – is the maintaining of Attachments of both parties on the same pole at the same time.
- H. JOINT USE POLE – is a pole upon which space is provided under this Agreement for the Attachments of both parties on the same pole at the same time.
- I. LICENSEE – is the party having the right under this Agreement to make Attachments to a pole that the other party owns.
- J. NJUNS – is the National Joint Utility Notification System.
- K. NON-COMPLIANT ATTACHMENT – is an Attachment that requires an increase in the ground clearance or separation on a jointly used pole as required by the National Electrical Safety Code.
- L. OWNER – is the party owning the pole to which attachments are made.
- M. REARRANGING – is the moving of attachments from one position to another on a pole.
- N. RIGHT OF WAY – is the legal right to use the property of another.
- O. SECONDARY POLE – is a pole installed for the express purpose of providing required clearances for a service drop to a customer’s location. A secondary pole is a pole that typically services only a few customers or buildings as the case may be, does not have transformers or other electrical equipment on it, is located outside the main line and supports the Power Distributor’s wires with less than 600 volts.
- P. SERVICE DROP – is a wire or wires used to connect to a customer’s location that requires no guys under applicable specifications of Article IV. A service drop may run directly from a pole used to service many Customer’s location, without the use of any other poles, or a Service Drop may itself be supported by more than one pole to carry the Service Drop to the customer’s location.

- Q. STANDARD JOINT USE POLE – means a 45 foot Class 4 wood pole which meets the requirements of the Code for support and clearance of electric supply and communications conductors now or hereafter used by either party in the conduct of its business. The parties may agree to use a pole smaller than the standard class, but under no condition shall the Standard Joint Use Pole be less than the minimum requirements of the code. The foregoing definition of a “standard joint use pole” is not intended to preclude the use of joint poles shorter or taller or of different strength than the Standard Joint Use Pole in location where it is mutually agreed such poles will meet the requirements of the parties hereto, nor is the foregoing definition of a “standard joint use pole” intended to require the replacement of poles that are currently in service.
- R. STANDARD SPACE ALLOCATIONS – means all allocation of sufficient space on a Joint Use Pole for use of each party, taking into consideration requirements of the current Code, more particularly defined as follows:
1. For Power Distributor, the use of 10 feet of space on a 45 foot pole, 8 feet of space on a 40 foot pole, and 6.5 feet on a 35 foot pole measured downward from the top of the Joint Use Pole; and
 2. For Telephone Company, the use of 2 feet of pole space measured upward from the initial point of attachment on the Joint Use Pole. The initial point of attachment shall be the lowest point on the pole required to provide at all times the Code minimum clearance above ground for the lowest horizontally run line, wire or cable attached in such space except where by mutual agreement of the field representatives of the parties sound engineering practices dictate a higher minimum clearance. This attachment shall also be at a sufficient distance below the space of the Electrical Distributor to provide at all times the minimum clearance required by the NESC.
 3. Standard Space Allocation shall in all instances, except as specifically modified elsewhere in this Agreement or if a party pays to have a taller pole placed, be as represented on Exhibit A attached hereto and made a part hereof.
- S. TEMPORARY TRANSFER or TEMPORARY PLACEMENT – is the transferring or placing of the Telephone Company’s facilities to another pole by the Power Distributor, and such a transfer or placement shall not be considered permanent by either party. Power Distributor will obtain permission either verbally or in writing prior to performing the transfer.
- T. TRANSFERRING or TRANSFER – is the removing of Attachments from one pole and placing them upon another pole.

ARTICLE II

TERRITORY AND SCOPE OF AGREEMENT

This agreement shall be in effect and shall cover all distribution poles of each of the parties now existing, hereafter erected or acquired within the common operating areas served by the parties hereto when said poles are brought hereunder, expecting;

1. Poles, not yet in Joint Use, which, in the Owners judgment, should be restricted for reason of safety.
2. Poles, not yet Joint Use, which, in the Owners judgment, should be restricted for reasons related to construction practices or clearances.

ARTICLE III

PERMISSION FOR JOINT USE

Subject to the terms and conditions of the Agreement, each party hereby permits joint use of its poles by the other party in accordance with permitting requirements of Article VI and the following:

- A. **Use of allocated space.** Either party is permitted, without additional charge, to use the other party's space on a pole for the purpose of installing and maintaining street lighting, traffic signal systems, and vertical attachments (such as but not limited to ground wires, gang operated switch control rods and underground risers) if by the terms of the Code the proposed use is authorized and such use does not unreasonably interfere with the other party's use. If the allocated space is subsequently needed and the Code provisions cannot be met, then the party to whom the space is not allocated but who is utilizing the space allocated to the other party, shall be responsible at its sole expense for the Cost of Rearrangement or pole replacements necessary in order to accommodate the party having the allocated space.
- B. **Use of Unallocated Space.** As long as the provisions of the Code are met, either party may use, without additional charge, space or Joint Use poles outside of the Standard Space Allocation that is neither in use by an authorized third party nor reserved by the Owner. If the space is subsequently needed by the Owner and if Code provisions cannot be met, then Licensee shall be responsible, at its sole expense, for

the cost of Rearrangement or pole replacement necessary to accommodate the Owner's use of such space. If the space is subsequently needed by a third party having a prior permit or similar contractual right to use the specific space on such pole that predates the Licensee's use of the pole, and if Code provisions cannot be met, then the Licensee shall be responsible, at its sole expense, for the rearrangement or pole replacement necessary to accommodate the use of such space.

- C. **Use of Space on Existing Poles.** If Attachments were properly made and are in compliance with the prior joint use agreement between the parties as of the effective date of this Agreement, such Attachments shall be deemed to be authorized Attachments under this Agreement, and shall be subject to post-attachment terms and conditions of this Agreement on a going forward basis.

- D. **Unauthorized User.** Licensee shall be subject to all the requirements and obligations under this Agreement, but shall have none of the rights of a Licensee under this Agreement, but shall have none of the rights of a Licensee under this Agreement for use of Owner's pole(s) if Licensee's use of the particular pole(s) is not properly authorized in accordance with this agreement.

ARTICLE IV

SPECIFICATIONS

- A. **Generally.** Joint Use poles covered by this agreement shall at all items be in conformity with applicable terms and provisions of law and with the requirements of the Code in effect at the time the respective attachments are made.

- B. **Existing Joint Use Poles.** As long as the provisions of Code in effect at the time the Attachments were made have been met, any Joint Use Pole in place before the Commencement Date of this Agreement shall be deemed satisfactory to both parties and adequate for their requirements, whether or not the space allocations defined herein have been observed; provided, however that all Attachments on such poles shall be subject to the requirements of the Agreement as referenced in Article III.C.

- C. **New Construction.** Except for Secondary Poles, the minimum height and strength for new poles installed by either party (including replacements of existing poles) shall be a Standard Joint Use Pole. Either party may install Secondary Poles that have less height and/or strength than the Standard Joint Use Pole, provided that the height and strength of new Secondary Poles are sufficient to permit attachments of each party's Service Drops consistent with the requirements of the Code.

Article V

RIGHT OF WAY AND LINE CLEARING

A. Easements.

1. **New easements.** The Owner and Licensee will reasonably cooperate in obtaining easements for both parties where Owner elects to obtain an easement for its poles, equipment and facilities. In instances where the Owner is obtaining a new easement, Owner will use reasonable efforts to obtain an easement for both parties of Joint Use Poles. Such easements obtained for the benefit of both parties shall be in sufficient detail for identification and recording and shall be subject to inspection by the other party upon request.

2. **Objections of Property Owners and Others.** No guarantee is given by the Owner of permission of property owners, municipalities or others for Licensee's use of Joint Use Pole. If objection is made to Licensee's right to maintain facilities on Owner's poles and Licensee is unable to satisfactorily resolve the matter within a reasonable time, including time for appeals, the Owner may at any time, upon notice in writing to the Licensee, require the Licensee to remove its Attachments from the poles involved and the Licensee shall within sixty (60) days after receipt of notice, or within a mutually agreeable time period if additional time is needed, removed its Attachments from said poles at its sole expense. Reasonable extensions of time shall not be denied under this section if the proposed extension of time does not materially prejudice the Owner. Licensee further agrees to indemnify and hold Owner harmless from any and all losses, damages, fines, penalties or costs of any kind (including reasonable attorneys' fees) which may arise from Licensee's failure to obtain all necessary easements rights and permits to use a Joint Use Pole.

3. **Cost Sharing.** Nothing stated herein shall preclude the parties from mutually sharing the cost of easement acquisition. If the parties share the cost of obtaining an easement, the easement shall name both parties and grantees.

B. **Line Clearing and Tree Trimming.** Line clearing and trimming will be performed as follows:

1. When constructing a new Joint Use Pole line the Owner shall cut, clear and trim a right-of-way sufficient to provide adequate clearance in accordance with the ordinary clearing practices of Power Distributor, if possible.

2. After the initial clearing, each party shall be responsible for its own trimming, clearing and cutting, regardless of who owns the pole.

ARTICLE VI

PROCEDURE FOR ESTABLISHING JOINT USE ATTACHMENTS

- A. **Attachment Process – No Make Ready Required.** The following rules shall apply to Attachments that may be made to the Owner’s pole without make-ready or other work to accommodate Licensee’s Attachments:
1. Licensee may make an Attachment to Owner’s pole within Licensee’s Standard Space Allocation without advance notice to Owners if the Attachment otherwise meets the requirements of the Code and if the Attachment does not interfere with the Owner’s use of the Pole or with others who are attached to Owner’s pole.
 2. Licensee may, subject to Article III, make an attachment to Owner’s Pole outside of Licensee’s Standard Space Allocation without advance notice to Owner if the Attachment otherwise meets the requirements of the Code and if the Attachment does not interfere with the Owner’s use of the pole or with others who are attached to the Owner’s pole.
 3. Licensee shall notify Owner of the number and location of all Attachments made to Owner’s poles under this Section A no less frequently than monthly on the form attached hereto as Exhibit B.
- B. **Attachment Process – Make Ready Required.** For Attachments other than Attachments that may be under Section A, the following process shall apply:
1. Licensee shall make application by submitting to Owner the Joint Use Notification/Request Form attached as Exhibit C.
 2. Within thirty (30) days after the receipt of the application, Owner shall notify Licensee whether any changes and/or modifications to Owner’s poles and related facilities are required in order to accommodate Licensee’s Attachments such changes and modifications being the “Make Ready Construction Work.” If no changes and/or modifications are required, Owner shall notify Licensee, and Licensee may proceed with making such Attachments pursuant to Section A.

3. If changes are necessary and the Licensee still desires to make Attachments to such pole, Owner, at Licensee's cost will begin the make ready engineering that includes preparing engineering plans for the Make Ready Construction Work. Licensee and Owner shall work together in good faith to resolve and design and engineering issues and Licensee shall revise its plans as necessary. After the make ready engineering plans are complete, Owner shall provide Licensee a good faith estimate of the Costs and timeframe required to complete the Make Ready Construction Work. Upon Licensee's approval of such estimate of Costs for Make Ready Construction Work, Owner shall thereafter complete the Make Ready Construction Work at Licensee's Cost within sixty (60) days or within a reasonable extended deadline for complex Make Ready Construction Work that takes additional time to complete.
 4. When the Make Ready Construction Work is complete, Owner shall notify Licensee and Licensee shall then have the right to make the authorized Attachments pursuant to Section A. Licensee shall complete such Attachments within sixty (60) days of notice from Owner. Reasonable extensions of time shall not be denied under this section if the proposed extension of time does not materially prejudice the Owner.
- C. **Service Drops.** Service Drops are expressly excluded from the requirements of this Article unless Make Ready Construction Work is required in which case Section B shall apply. Subject to Code compliance, Licensee may place Service Drops not requiring Make Ready Construction Work on Owner's pole without submitting an application or notifying Owner. Service Drops shall be considered Attachments for all other purposes under this Agreement. Licensee shall notify Owner of the number and location of Service Drops made to Owner's poles no less frequently than monthly on the form attached hereto as Exhibit B.
- D. **Unauthorized Attachment.** After the Initial Inventory (defined below), if Owner finds that Licensee placed an Attachment without complying with the notification requirements of Section A and B above, such Attachment such Attachments shall be considered an Unauthorized Attachment (the "Unauthorized Attachment"). When discovered, Owner will notify Licensee of the Unauthorized Attachment in writing sent via certified mail to the operational and legal addresses referenced in Article XVIII. The notice shall set forth the location of the Unauthorized Attachment and shall specify the amount owed on account of such Unauthorized Attachment. For Purposes of determining the amount owed, Licensee shall be responsible for paying an amount equal to the adjustment payment in effect for each of the years since the last inventory or five years whichever is shorter. (under this Agreement or any predecessor agreements between the parties). If Licensee can demonstrate to the reasonable satisfaction of Owner when such Attachment was made, then the amount owed shall be an amount equal to the adjustment payment in effect for each of the years since the Attachment was made.

ARTICLE VII

REPLACING OR RELOCATING POLES; TRANSFERS

A. **Pole Replacements; Pole Relocation.** Whenever it is necessary to replace or change the location of a jointly used pole, the Owner shall give reasonable notice to Licensee to allow for planning and scheduling thereof in writing (except in cases of Emergency, which shall be handled under Section VII.D., below), specifying in such notice the time of such relocation. The Licensee shall transfer its Attachments to the new or relocated Joint Use Pole within sixty (60) days of receipt of Owner's written notice (or notice through NJUNS or similar formal electronic notification system mutually agreed to by the parties), which notice shall not be sent until other parties have transferred their attachments, if applicable, and Licensee is "next to go" for transfer work. Licensee must complete the Transfers within a reasonable extended deadline or on a schedule mutually agreeable to the parties in the following circumstances:

1. For a complex transfer that will take more than sixty (60) days to accomplish;
2. In instances where transfers are "bulk loaded" into NJUNS upon the parties' initial participation in NJUNS or;
3. In instances where more than five (5) times the transferring, party's average monthly transfers during its most recent fiscal year is being requested (except in cases where a number of transfers requested is 50 or less in which case the sixty (60) day deadline set forth in this paragraph A shall apply).

Reasonable extensions of time shall not be denied under this section if the proposed extension of time does not materially prejudice the Owner. In situations where Transfers are required by a lawful demand of a property owner or governmental or regulatory authority, the parties shall work together in good faith to expedite the transfer work. Licensee further agrees to indemnify and hold Owner harmless from any and all losses, damages, fines, penalties or cost of any kind (including reasonable attorneys' fees) which may arise from licensee's failure to transfer its Attachments in response to such lawful demand.

B. **Transfers.**

1. Should the licensee fail to transfer its Attachments within the time period outlined in Section A above (a "Delinquent Transfer"), Owner may escalate the matter in accordance with Article XX, and Owner may also choose to refuse to permit Licensee to make additional Attachments until such time as all Delinquent Transfers are made. Alternatively, Owner may abandon the subject pole(s) to Licensee in accordance with Article XIII or declare a default pursuant to Article XVI.

2. If the Licensee indicates that it has completed a transfer and Owner finds that Licensee has not completed the transfer when Owner goes to pull the pole, Licensee shall pay Owner all Costs associated with such return trip.
- C. **Replacement of Other Party's Poles.** Except as provided for Section D1 below, a party may only replace poles for the other party with the other party's written concurrence. The actual and documented costs associated with such replacement shall be paid by the Owner of the pole being replaced. The new pole shall remain the property of the original Owner whose pole was replaced.
- D. **Emergency Situations.** Both parties recognize and agree that there are inherent dangers involved in the transmission and distribution of electricity. The parties agree that unforeseeable Emergency conditions will exist from time to time.
1. **Pole Replacement – Emergency.** When due to an accident or storm damage, the dangerous condition of a pole, or an Emergency, it is necessary for the Licensee to replace the Owner's pole immediately to restore service to its customers or to eliminate a hazardous condition and the Owner cannot perform the work in time to meet the Licensee's requirements, Licensee may replace the Owner pole, Licensee shall give the Owner written notice of the Emergency pole replacement within five (5) days of completing the pole replacement. The actual and documented Costs associated with replacing a pole during such situation shall be paid by the Owner of the pole requiring replacement. The new pole shall remain the property of the original owner.
 2. **Temporary Placement of Attachments.** During the repair and restoration of utility power as a result of a storm event, accident, or from other damage to the Joint Use Poles in an Emergency situation (including a pole replacement under paragraph 1 of this Section), or in a situation where it is necessary to eliminate a hazardous condition, the Power Distributor may make a Temporary Placement of Attachments of the Telephone Company to the Joint Use Poles. The Power Distributor will send written notice to the Telephone Company of such Temporary Placements within five (5) days of making them. The Telephone Company will take action to permanently attach such attachments within sixty (60) days of receipt of the written notice, or within a reasonable extended deadline mutually agreeable to the parties if more time is needed to complete the work. Reasonable extensions of time shall not be denied under this section if the proposed extension of time does not materially prejudice the Owner. Because of the aforementioned inherent dangers, the Telephone Company is not authorized to replace or temporarily secure the Power Distributor's facilities wires or conduit.

ARTICLE VIII

CORRECTIVE MEASURES AND THIRD PARTY COMPLAINTS

- A. **Licensee Responsibility.** If any Attachment of the Licensee is found to be in violation of the terms of this Agreement (including, without limitations, the provisions relating to compliance with the Code), then the parties will work together to minimize the Cost of correcting any such deficiencies, but the Licensee shall be responsible for the full actual and documented Cost of any necessary or appropriate corrective measures, including removal and replacement of the pole and all Transfers or other work incident thereto. Licensee shall correct such Non-Compliant Attachment within ninety (90) days of Owner's notification to Licensee (unless Owner reasonably determines that safety, emergency or service restoration effects require Licensee to take corrective action within a shorter time period.)
- B. **Owner Responsibility.** If any Attachment of the Owner is found to be in violation of the terms of this Agreement (including, without limitation, the provisions relating to compliance with the Code), then the parties will work together to minimize the Cost of correcting any such deficiencies, but the Owner shall be responsible for the full actual and documented Cost of any necessary or appropriate corrective measures, including removal and replacement of the pole and all Transfers of other work incident thereto. Owner shall correct such Non-Compliant Attachment within ninety (90) days of Owner's notice of such Attachment (unless safety, emergency or service restoration efforts exist in which case Owner shall take corrective action within a shorter time period.)
- C. **Shared Responsibility.** If there exists a violation of the terms of this Agreement (including, without limitation, the provisions relating to compliance with the Code), and it cannot be determined whose Attachment has caused such violation, then the parties will work together to minimize the cost of correcting any such deficiencies. Each Party will bear its respective Costs to Transferring its Attachments, and shall share equally in any other Costs associated with correcting the violation; provided however, that if a party can modify its Attachments so that they no longer are a course of the violation or deficiency, then such party may elect to make such modification instead of otherwise sharing in such Costs. Such a modification shall not relieve a party from sharing in such Costs if the party making the modification could still have been a cause of any deficiency that remains. The parties shall work together to correct such Non-Complaint Attachments within ninety (90) days of one party's notification to the other (unless Owner reasonably determines that safety, emergency or service restoration effort require Licensee to take corrective action within a shorter time period.)
- D. **Third Parties.** If one or more third party attachee(s) caused the violation, then the Owner will make reasonable effort, consistent with its attachment agreement(s) with such third party attachee(s), to require such third party attachee(s) to pay the actual and documented corrective Costs incurred by all who have Attachments on the pole, including the Licensee, Owner and any other attaches.

- E. **Corrective Measures – Dispute Resolution and Enforcement.** If Licensee fails to correct a Non-Compliant Attachment within the time frames specified in this Article, such Attachment shall be immediately subject to the dispute resolution and enforcement provision under Article XX.

- F. **Third Party Complaints.** Licensee shall address, in a commercially reasonable time period, any inquiries or complaints raised by persons other than Licensee or Owner or their employees contractors and agents with regard to or concerning Licensee’s facilities that are attached to Owner’s poles, or Licensee’s right and obligations under this Agreement.

Article IX

Maintenance of Poles and Attachments

- A. **Obligation to Maintain Poles.** Except as herein otherwise expressly provided, each party shall, as its own expense, maintain its poles in a serviceable condition in accordance with the Code and shall reinforce or repair its own poles as they become known to be unserviceable.

- B. **Obligation to Maintain Attachments.** Except as herein otherwise expressly provided, each party at its own cost shall place, maintain, rearrange, transfer and remove its own Attachments, and shall at all times perform such work promptly and in such a manner as not to interfere with work or service being performed by the same party. Each party shall, at its own expense, at all times maintain all of its Attachments in safe condition, thorough repair, and in accordance with the requirements of the Code. An attachment is deemed to comply with Code if it complies with the minimum requirements of the Code in effect at the time the Attachment was placed and nothing in the provision shall require either party to inspect existing Attachments and proactively bring them up to date with the current Code unless otherwise required by applicable law.

- C. **Obligation to Train and Warn.** The Licensee shall insure that its employees are properly trained in climbing on and working on Owner’s poles safely and that they are aware of the dangers inherent in making contact with the electrical conductors or electrical equipment of Power Distributor. Without limitation of the foregoing, the Telephone Company shall prohibit its employees from handling energized lines of the Power Distributor, including lines attached to Secondary Poles.

- D. **No Warranty of Condition.** Notwithstanding the maintenance obligations of Owner under Section A and B, above, both parties disclaim any warranty or representation regarding the condition and safety of their poles. To the extent permitted by law, each party expressly assumes responsibility for determining the conditions of all poles to be climbed or otherwise worked on by its employees whether for the

placement of Attachments, maintaining or Rearranging Attachments, or for other reasons. Except for performing Transfer work from unserviceable poles to replacement poles and for replacing poles pursuant to Section VII.C and Section VII.D, a Licensee shall not permit its employees to work on poles that are unserviceable until the Owner has corrected the unserviceable condition or has determined that the pole is serviceable.

Article X

Division of Costs

- A. The cost of establishing a new Joint Use Pole line shall be borne by the parties in accordance with the following:
1. A standard Joint Use Pole, or smaller, shall be erected at the sole Cost of the Owner.
 2. In the case of a pole larger than the Standard Joint Use Pole required by either party, the party requiring the extra height and/or class shall pay for the additional Cost of the pole. If Owner adds features or betterments not required by Licensee, Owner shall pay the Costs associated with such features or betterments.
 3. In the case of a pole larger than the Standard Joint Use Pole where the additional height and/or strength required is for the purpose of both parties, the Cost of the pole shall be shared by both parties, with Owner being responsible for the cost of Standard Joint Use Pole and Licensee being responsible for one half of the Cost of the additional height and strength.
 4. In the case of a pole larger than the Standard Joint Use Pole, where height or strength in addition to that needed for the purpose of either or both parties hereto is necessary in order to meet the requirements of the Code, a public authority or of property owners, the Cost of the additional height or strength shall be paid by the Owner.
- B. The cost of establishing Joint Use or existing pole lines or modifying existing Joint Use Pole lines shall be borne by the parties in accordance with the following:

1. For placement of intermediate poles for the Licensee, the Licensee shall pay the total Cost of installing the new pole. Each Party shall be responsible for attaching its own facilities.
 2. For replacement of non-defective poles for the Licensee, Costs shall be governed by Articles III, VI and VIII, as applicable.
 3. For replacement of non-defective poles for the Owner, at the mutual request of both parties, or due to the requirements of the Code, a public authority or of property owners, Section A above shall govern unless the situation is otherwise specifically governed by Articles III, VI, OR VIII.
 4. For replacement of existing defective poles, Cost shall be governed by Section A above.
- C. Except as otherwise specifically provided herein, each party shall bear the costs of placement, Transfer, and Rearrangement of its own Attachments, place guys and anchors to sustain any unbalanced loads caused by its Attachments, and perform any tree trimming or cutting incident thereto.
- D. When less costly Rearrangements can be performed by either party which would defer the cost of replacing a pole, such Rearrangements may be made and the Cost will be borne by the party requesting pole replacement; provided, however, that the final decision of whether or not to replace a pole shall remain with the Owner of the pole.
- E. Any payments made by the Licensee under the forgoing provisions of this Article shall not entitle the Licensee to ownership of any part of said pole.
- F. Each party shall bear the Cost of repairing damages to the other party's facilities occasioned by its improper construction practices or its negligence
- G. Either party may request documentation supporting any demand for payments.

Article XI

COORDINATION AND PLANNING

- A. **Generally.** At least one per quarter, at the written request of either party and mutually agreed upon, management representatives of each party with responsibility for overseeing the party's overhead plant and related facilities subject to this Agreement shall discuss the status of any operational issues that have arisen between the parties under this Agreement. The intent of these discussions is to encourage greater planning and coordination of operational issues between the parties.
- B. **Annual Planning Meeting.** On or before October 1 of each year that this Agreement is in effect, at the written request of either party, local management representatives of each party with responsibility for overseeing the party's overhead plant and related facilities subject to this Agreement shall mutually agree to meet or correspond via electronic mail, U.S. Mail or any other means mutually agreed upon and confer to exchange information concerning pole relocation and replacement work during the upcoming calendar year. The parties shall exchange estimates (to the extent they are available) of the number of poles that each party reasonably expects to relocate or replace during the next calendar year along with the time frame for such relocations or replacements (as to each party, a "work Plan"). Additional meetings, correspondence via electronic mail, U.S. Mail or any other means mutually agreed upon may be scheduled at the request of either party if necessary to facilitate pole relocation/replacement work and transfers.
- C. **Existing Delinquent Transfers or Non-Compliant Attachments.** Within one-hundred-twenty (120) days after execution of this Agreement, representatives from both parties will meet at a mutually agreeable location or correspond via electronic mail, U.S. Mail or other means mutually agreed upon to discuss Delinquent transfers and Non-Compliant Attachments in existence at the time of contract execution. The parties shall then cooperate to establish a reasonable deadline for completion of work required to remedy the Delinquent Transfers and Non-Compliant Attachments. Reasonable extensions of time should not be denied if they would not result in material prejudice to the party requesting the work, and if the other party performing the work is acting with reasonable diligence to complete the work. If a party fails to remedy a Delinquent Transfer or Non-Compliant Attachment by the agreed upon deadline, or if that party disputes that it is responsible for performing the work, the other party may initiate the upper management escalation procedure set forth in Article XX. If any delinquent transfers and/or Non Compliant Attachments are in existence at the time of contract execution but not addressed within the meeting, correspondence via electronic mail, U.S. Mail or other means mutually agreed upon between the parties described above then at the election of the Owner, each such delinquent transfer and each such Non-Compliant Attachment may be addressed utilizing the process outlined above or may be resubmitted to Licensee pursuant to the provisions of this Agreement.

- D. **Coordination of Complex Work.** When a party desires to change or upgrade its system which causes it to exceed its Standard Space Allocation and to substantially relocate a joint use route for its own operational requirements, it shall notify the other party in writing and, within sixty (60) days of receipt of such notice, the parties shall discuss and exchange the information necessary to determine if the desired changes in construction can be conducted in a cost-efficient manner for both parties.
- E. **Cost sharing for Complex Work.** For any work required pursuant to Section D, the cost of establishing such joint use route shall be mutually agreed upon by the parties hereto; provided, however that nothing in this Section E shall prevent the Owner from relocating its attachments at its own cost and expense if the parties fail to reach agreement on cost sharing pursuant to this Section E. In this situation, the Owner shall abandon the subject poles to the Licensee in accordance with Article XIII.
- F. **Ownership of New Poles.** In any case, ownership of any new poles, placed pursuant to this Article shall remain with the owner of the poles that were replaced unless otherwise agreed to by the parties in writing.
- G. **Applicability to Road Widening and Related Projects.** The provisions of Sections C and D of Article shall not apply to road move projects prompted by a governmental entity or agency.
- H. **Participation in Meetings with TVPPA Joint Use Committee.** At least once annually, at the written request of either party and mutually agreed upon, management representatives of Telephone Company responsible for overseeing the Telephone Company's overhead plant and related facilities subject to this Agreement may elect to participate in a meeting with the Joint Use Committee of the Tennessee Valley Public Power Association ("TVPPA"). The purpose of this meeting is to discuss the status of any operational issues that have arisen on a regional basis between the Telephone Company and the members of TVPPA that have adopted an agreement substantially similar to this Agreement.

Article XII

ANCHORS

Anchors required by either party shall be placed by the party requiring the anchor at its own expense. Notwithstanding the forgoing, the parties may mutually consent to install anchors to be used jointly by both parties upon Cost sharing or other arrangements agreed upon by the parties. Guy leads and anchors will possess the strength required by the Code, will be installed and used in accordance with the reasonable requirements of the Owner and will follow the specifications herein:

1. Following the Commencement Date of this Agreement, all anchors and guys shall be installed prior to the installation of Licensee's messenger wires or cables, Licensee's guy lead must be of sufficient length and strength to accommodate loads applied by the Attachments. No anchor installed following the Commencement Date shall be placed within 1 foot of any existing anchor. Guy markers meeting Licensee's specifications shall be installed on every newly placed guy attached to Owner's pole after the Commencement Date.
2. Each party shall install and maintain its own guy wires. Licensee shall not attach any down guy to Owner's anchors or to other attaching parties' anchors without prior written permission from such Owner or other party as the case may be, such permission shall not be unreasonably withheld.
3. All down guys, head guys or messenger dead ends installed by Licensee shall be attached to the pole by the use of "through" bolts. Under no circumstances shall Licensee install down guys, head guys or messenger dead end by means of encircling wooden poles with such Attachments.

ARTICLE XIII

ABANDONMENT OF JOINT USE POLES

- A. **Abandonment of Poles by Owner to Licensee.** Anytime owner desires to abandon any Joint Use Pole, it shall give Licensee at least sixty (60) days' written notice. If at the expiration of such period, Owner and any third parties shall have no Attachments on such pole but Licensee shall not have removed all of its Attachments there from, Owner may transfer ownership of such pole to Licensee by sending written notification confirming the transfer in the form attached hereto as Exhibit E. The pole shall thereupon

become the property of Licensee, and Licensee shall pay the Owner an amount equal to the original cost of the abandoned pole less depreciation (or, if the original cost of the pole is not available, the cost of the pole being removed shall be determined by the current installed Cost of an equivalent pole depreciated using a thirty (30) year straight line depreciation schedule by the number of years since the Pole was installed). Licensee shall also harmless and former Owner from all obligations liabilities, damages, costs, expenses, or charges incurred thereafter because of or arising out of the presence, location or condition of such pole or any of Licensee's Attachments thereon, unless such liabilities or damages arise from the gross negligence or intentional acts of omissions of the former Owner.

- B. **Abandonment by Licensee.** Licensee may, at any time, abandon the use of a Joint Use Pole by removing any and all Attachments it may have on said pole. . No refund of adjustment fees shall be due Licensee on account of such abandonment, and following such removal, no Attachment shall again be made to such pole without complying with the requirements of Article VI.

ARTICLE XIV

ADJUSTMENT PAYMENTS

- A. **Adjustment of Payments.** Adjustment payments shall cover rentals accruing during the calendar year and shall be based upon the number of poles that are occupied on the first day of December of the year in which rentals accrue. On or around December 1, 2011 and on each year thereafter during the time this Agreement is in effect, the parties shall cooperate in creating a schedule of pole rental showing the number of Joint Use Poles which the other party occupies as Licensee. The party owning the greater number of Joint Use Poles shall render to the other party a net rental billing. Such billing shall reflect the number of Joint Use Poles owned by each party, multiplied by the then current annual pole rental rate as set forth in Exhibit D, with the net difference being the actual billed.
- B. **HWI Adjustment.** The rates set forth in Exhibit D shall be effective as of January 1, 2010, and shall remain in effect through December 31, 2015 (the "base Rate"). The Base Rate shall be escalated, effective January 1, 2016, and annually thereafter, based upon the percentage change in the Handy-Whitman Index (South Atlantic Region, FERC Account 364, Line 44, Poles, Towers and Fixtures)("HWI") between the two preceding July 1 index numbers.
- C. **Periodic Review of Adjustment Payment.** No sooner than five years from the Commencement Date of this Agreement and in intervals no more frequent than every five years thereafter, the annual pole rental rate and calculation methodology set forth in Exhibit D Shall be subject to joint review and revision upon the written request of either party sent via certified mail to the operational and legal addresses referenced in Article XVIII. If, within ninety (90) days after the receipt of such request by either party,

the parties fail to agree to a revision of such rate and calculation methodology, then the adjustment payment per pole shall be established at the then existing Base Rate, escalated by the HWI for one year. The following year, the adjustment payment per pole shall be an amount equal to 40% of the then average in plant cost factors of providing and maintaining the Joint Use Poles covered by this Agreement for the party owning the greater number of Joint Use Poles covered by this Agreement. The new rate shall thereafter be adjusted in accordance with Section B, above, until again revised pursuant to this Section.

- D. **Other Work.** Upon completion of any work done by one party for which payment is due from the other party, the party performing the work shall present to the other party, within ninety (90) days after the completion of such work (or, in the discretion of the Owner, the completion of all related work, including third party work), a bill showing the amount due and the breakdown of the Costs. The parties will cooperate to ensure that both are provided the necessary information to certify that the bills are correct.
- E. **Payment and Disputed Charges.** The adjustment payment herein provided for, or any other bill for payment of work, shall be paid within forty-five (45) days after the bill has been received, unless said party disputes the amount billed. In case of such dispute, either party may escalate the matter in accordance with Article XX. Any undisputed amounts shall be paid within the forty-five (45) day time period.
- F. **Late Charges.** Payments not paid within the specified time period shall accrue late payment charges of one and one-half percent (1.5%) per month or the maximum amount permitted by applicable law, whichever is less.

ARTICLE XV

INVENTORY OF ATTACHMENTS

- A. **Initial Inventory.** Upon request of either party at any time after the execution of this Agreement, an actual inventory of Attachments shall be made jointly by representatives of the parties or by a third party chosen by the parties (the "initial Inventory"). If there is any difference in (a) the number of Attachments found by the inventory and (b) the number arrived at by tabulating those invoiced and reported under this Agreement and any predecessor agreements between the parties, correction will be made by retroactive billing for any Attachments identified as being responsible for the difference. The remaining difference will be billed based on the presumption that the attachment rate to poles was constant from year to year. The total unauthorized count will be divided by the number of years since the last inventory, or five years, whichever is shorter and then each year's presumed unauthorized attachment pole count will be added to the prior year's presumed unauthorized pole attachment count and backbilled at the rate in effect for that year. At the election of the party owning the greater number of poles as long as there is not a material and reasonable dispute between the parties concerning the

results of such inventory, any inventory conducted within two (2) years prior to the Commencement Date may be used as the initial inventory, and in such event, the initial inventory shall be deemed to have been completed as of the Commencement Date.

- B. **Five Year Pole Inventories.** Five (5) years after the Initial Inventory and at intervals no more frequent than every five (5) years thereafter (unless otherwise mutually agreed by the parties), an actual inventory of Attachments shall be made jointly by representatives of the parties or by a third party chosen by both parties. If there is any difference in the number of Attachments found by subsequent inventories and the number invoiced in the corresponding billing, correction will be made by retroactive billing for any Attachments identified as being responsible for the difference, and any remaining difference will be spread evenly over the years since the last inventory and billing adjusted accordingly using the rate in effect for each of the respective years. Back-billing of unauthorized attachments shall not exceed five years.
- C. **Inventory Methodologies.** In lieu of the foregoing, the parties may mutually agree to alternative inventory procedures.
- D. **Cost Sharing.** Each Party shall equally share the cost of making such inventory of attachments.

ARTICLE XVI

DEFAULTS

Notwithstanding any other provision in this Agreement to the contrary, if either party shall fail to discharge any of its obligations under this Agreement and such failure shall continue for sixty (60) days after notice thereof in writing from the other party sent via certified mail or Overnight Mail, signature required to the operational and legal addresses referenced in Article XVII, all rights of the party in default hereunder, pertaining to making Attachments to additional poles of the other, shall be suspended by sending written notification of the suspension to the defaulting party via certified mail or Overnight Mail, signature required to the Article XVIII addresses. If such default shall continue for a period of ninety (90) days after receipt of the notice of suspension, the non-defaulting party may, by sending written notification to the defaulting party via certified mail to the Article XVIII addresses, terminate the right of both parties to attach to additional poles of the other party shall not abrogate or terminate the right of either party to attach to existing Joint Use Poles or to maintain and Transfer existing Attachments to replaced or relocated poles. All such Attachments shall continue thereafter to be maintained pursuant to and in accordance with the terms of this Agreement, which Agreement shall, so long as said Attachments are continued, remain in full force and effect solely and only for the purpose of governing and controlling the rights and obligations of the parties with respect to such Attachments.

ARTICLE XVII

LIABILITY AND DAMAGES

A. **General Indemnification.** Licensee shall indemnify, protect, and save Owner harmless from and against any and all liabilities, claims, demands and costs incurred by reason of (a) damage to property, (b) injury to or death of persons, including payments made under any workers' compensation law or under any plan for employees' disability and death benefits, and (c) and slander defamation or infringement claim; provided that the foregoing liabilities, claims, demands and costs arise out of or are caused by the Licensee's use of or work on Owner's facilities including without limitation the erection, maintenance, presence, use, removal, or abandonment of Licensee's attachments, or by the proximity of the respective cables, wire, apparatus and appliances of the Licensee to any of the facilities belonging to the Owner or to the other parties jointly using the Owner's poles, or arise out of or are caused by any act of Licensee or its employees, agents, contractors and their subcontractors on or in the vicinity of Owner's poles. The obligation of indemnity shall include, without limitation, any attorneys' and/or legal fees or costs, but under no circumstances shall the licensee be liable to Licensor for any incidental, special or consequential damages (such as lost profits or lost business opportunities), punitive or exemplary damages.

B. **Survival and Interpretation.** The indemnification provisions of this Agreement (whether contained in this Article or otherwise) shall survive termination of this Agreement and shall be enforced to the fullest extent permitted by applicable law. Nothing in this Agreement shall waive or in any way limit any limitations of liability or privileges or immunities available to governmental utility companies under applicable law.

ARTICLE XVIII

SERVICE OF NOTICES

A. Unless otherwise provided in this Agreement, it is expressly agreed and understood between Owner and Licensee that any Notice required to be given by either party to the other pursuant to this Agreement shall be in writing and sent by US Mail, facsimile or by recognized national overnight delivery service and shall be deemed received upon actual delivery or refusal of delivery as evidenced by the records of the parties, the US Postal Service or delivery service as the case may be.

B. Notices shall be sent addressed as follows:

Power Distributor:

Attn: Corporate Legal

Or to such other address as either party may designate by Notice to the other party from time to time in accordance with the terms of this Article.

- C. If at any time, and from time to time, both parties are members of NJUNS and maintain the capability of receiving messages from NJUNS, either party may, upon prior written notice to the other, elect to utilize such capability to provide notices under this Agreement for any after relating to the operation and maintenance of Joint Use Poles; provided that giving notice via NJUNS does not satisfy the obligation to send a notice via certified mail if such notice is required by this Agreement. If the parties are using NJUNS, the parties may use NJUNS messaging formats in lieu of Exhibits B and C.

ARTICLE XIX

TERM AND TERMINATION OF AGREEMENT

Subject to Article XVI, this Agreement shall continue in force and effect for a period of five (5) years from and after the Commencement Date. After the initial five (5) year term, the Agreement shall automatically extend on the same terms and conditions for one successive five year year term until terminated by either party providing written notice at least one hundred eighty (180) days prior to the end of the pending five year term. Termination shall thereafter become effective at the end of the pending five year term. Termination of the Agreement shall mean termination of the right of the parties to place Attachments on additional poles owned by the other party. Termination of the Agreement shall not, however, abrogate or terminate the right of either party to attach to existing Joint Use Pole or to maintain and Transfer existing Attachments to replaced or relocated poles. All such Attachments shall continue thereafter to be maintained pursuant to and in accordance with the terms of this Agreement, which Agreement shall, so long as said Attachments are continued, remain in full force and effect solely and only for the purpose of governing and controlling the rights and obligations of the parties with respect to such Attachments.

ARTICLE XX

DISPUTE RESOLUTION

- A. **Good Faith Participation.** Prior to the initiation of any litigation (except litigation arising following default and termination of this Agreement, which litigation may proceed without regard to this Article), the parties shall in good faith attempt to settle any dispute arising out of or relating to the Agreement through the upper management escalation process set forth herein. Good faith participation in these

processes shall be a condition precedent to any litigation. All negotiations pursuant to this Article shall be confidential and shall be treated as compromise and settlement negotiations for purposes of the Federal Rules of Evidence and any state's rules of evidence.

- B. **Upper Management Escalation.** To initiate the dispute resolution process, either party shall give the other party written notice, via certified mail or overnight mail with signature required to the operational and legal addresses referenced in Article XVII.B., of any dispute not resolved in the normal course of business. The dispute shall be escalated to upper management and thereafter, representatives of both parties with authority to settle the dispute shall meet at a mutually acceptable time and place or hold a conference call within sixty (60) days after receipt of such notice, and thereafter as often as reasonably deemed necessary, to exchange relevant information and attempt to resolve the dispute. If the matter has not been resolved within ninety (90) days of receipt of the disputing party's notice or if the Parties fail to meet within sixty (60) days either party may initiate litigation. A dispute regarding Delinquent Transfers shall not be eligible for upper management escalation as set forth in this provision unless the transfer request has been processed in the ordinary course through methods as required by Article VII.
- C. **Enforcement.** The parties regard the aforesaid obligation to escalate to upper management as an essential and material provision of this Agreement and on that is legally binding upon them. In case of a violation of such obligation by either party, the other may seek specific enforcement of such obligation in the courts having jurisdiction hereunder. Notwithstanding the foregoing, in no event shall the obligations under this Article XX operate to prevent the initiation of litigation within ninety (90) days prior to the running of the applicable statute of limitation or statute of repose or the timely prosecution or defense (as applicable) of such litigation.
- D. **Renegotiation – Failure of Transfer and Code Compliance Processes.** In the event that the upper management escalation procedure (exclusive of litigation) fails to resolve, to the reasonable satisfaction of both parties, ten (10) or more disputes concerning Delinquent Transfers or Non-Complaint Attachments within a calendar year, then the "Transfer and Code Compliance Provision" under Section E, immediately below, shall become effective, and either party may request (via certified mail or overnight mail with signature required to the operation and legal addresses referenced in Article XVIII.B.) that the parties meet to discuss an amendment to the Agreement setting forth an alternative method of addressing and resolving Delinquent Transfers and/or Non-Compliant Attachments. In the event that the dispute resolution process is initiated in one calendar year but the time at which parties have failed to reach resolution falls in the next calendar year, such dispute shall be counted in the earlier calendar year.
1. For the purposes of this Section D, the parties intend that a dispute will encompass, at a minimum, all related Transfers and Non-Compliant Attachments. A party may not circumvent the spirit of the provision by initiating separate disputes for related items (e.g., initiating separate disputes for each pole in a line where a Transfer is pending, or for individual Non-Compliant Attachments place in a line). Additionally, disputes that are not resolved because an outside

party and/or other attacher is a cause, in whole or in party, of the alleged problem, shall not be included in calculating the number of unresolved disputes pursuant to this Section D.

2. If the parties are unable to agree upon the terms of an amendment within one-hundred-twenty (120) days of receipt of the written request, or within a reasonable extended time period agreed to by the parties, either party may, in addition to pursuing any legal remedies it may have, terminate this Agreement by sending written notice to the other party via certified mail to the operational and legal addresses referenced in Article XVIII.B. Termination shall become effective one-hundred-eighty (180) days from receipt of the termination notice, and the rights and obligations of the parties following termination shall be governed by Article XIX.

- E. **Transfer and Code Compliance Provision.** Upon this provision becoming effective in accordance with the requirements of Section D, immediately above, as an additional remedy to ensure timely handing of Delinquent Transfers and Non-Complaint Attachments, each party may bill the other party an additional amount equal to the then annual Base Rate per pole for each Delinquent Transfer and Non-Compliant Attachment older than ninety (90) days in existence on June 30 and December 31 of each year. Bills issued pursuant to this Section shall be separate and apart from annual rental invoices, and shall be issued within thirty (30) days of the aforementioned dates. Before a party can take advantage of the billing provision set forth in this Section, the parties must have been using NJUNS (or a similar formal electronic notification system agreed to by the parties) of one year and must have participated in quarterly meetings for one year in accordance with Article XI.A. (provided however that such meetings may be cancelled by mutual agreement of the parties and provided further that if one party fails to meet with the other party upon the other party's reasonable request, such failure to meet shall not prevent this Section from become effective). Participation in NJUNS (or similar system) and in quarterly meetings that occur prior to this provision becoming effective shall be counted in determining the effective date of the bill provision set forth in this Section.

ARTICLE XXI

RIGHTS OF OTHER PARTIES

- A. If either party hereto has, prior to the execution of this Agreement, conferred upon others not parties to this Agreement (outside parties), by contract or otherwise, rights or privileges to attach to any of its poles covered by this Agreement, nothing herein contained shall be construed as affecting said rights or privileges with respect to existing attachments of such outside parties, with Attachments shall continue in accordance with the present practice; all future Attachments of such outside parties shall be in accordance with the requirements of Section B, below except where such outside parties have by agreements entered into prior to the execution of this Agreement acquired enforceable rights or privileges to make attachments which do not conform to the requirements of this Agreement. Owner

shall derive all of the revenue accruing from such outside parties, Any contractual rights or privileges of outside parties recognized in this paragraph shall include renewals of or extensions of the term (period) of such contracts.

- B. If either party hereto desires to confer upon others not parties to this Agreement (outside parties), by contract or otherwise, rights or privileges to attach to any of its poles covered by this Agreement, it shall have the right to do so, provided all such Attachments of such outside parties are made in accordance with the following: (1) such Attachments shall be maintained in conformity with the requirements of the Code, and (2) to the extent allowed by law such Attachments shall be Located within space where Licensee holds a prior right to make or maintain its Attachments. Owner shall derive all of the revenue accruing from such parties.

- C. With respect to any rights and privileges granted under this Article to outside parties, Licensee shall not be required to transfer or rearrange its Attachments to accommodate an outside party until Licensee receives payment for the cost associated with such changes, unless Licensee is otherwise required to transfer or rearrange its facilities at its own expense pursuant to the terms of this Agreement.

ARTICLE XXII

ASSIGNMENT OF RIGHTS

Neither party hereto shall assign or otherwise transfer this Agreement, in whole or in part, without the written consent of the other party, which shall not be unreasonably withheld; provided that either party shall have the right without such consent to:

1. Mortgage any or all of its property, rights, privileges and franchises.

2. To lease or transfer any of them to another corporation organized for the purpose of conducting a business of the same general character as that of such party; or

3. To enter into any merger or consolidation or other reorganization; and, in case of the foreclosure of such mortgage, as in case of such lease, transfer, merger or consolidation its rights and obligations hereunder shall pass to such successors and assigns; and provided, further that

subject to all of the terms and conditions of this Agreement, either party may without such consent permit any corporation conducting a business of the same general character as that of such party, with which it is affiliated or physically connected, the rights and privileges of this Agreement in the conduct of its said business.

ARTICLE XXIII

SUPPLEMENTAL ROUTINES AND PRACTICES

Nothing in the foregoing shall preclude the parties to this Agreement from preparing such supplemental operating routines or working practices as they mutually agree or as necessary or desirable to effectively administer the provisions of this Agreement.

The parties expressly agree to develop such coordination agreements as they mutually agree are necessary and feasible to assist both parties in effectuating this Agreement.

ARTICLE XXIV

WAIVER OF TERMS OR CONDITIONS

The failure of either party to enforce or insist upon compliance with any of the terms or conditions, but the same shall be and remain at all times in full force and effect.

ARTICLE XXV

EXISTING AGREEMENTS

Any existing agreement between the parties hereto for the joint use of poles upon a rental basis within the territory covered by this Agreement is, by mutual consent, hereby abrogated and annulled; provided that

unfulfilled obligations of the parties arising under such agreement prior to the Commencement Date (such as claims for indemnification), unless expressly waived, shall survive termination of the prior agreement.

ARTICLE XXVI

PAYMENT OF TAXES

Each party shall pay all taxes and assessments lawfully levied on its own property upon said jointly used poles, and the taxes and the assessments which are levied on said joint use poles, shall be paid by Owner thereof, but any tax (except income taxes), fee, or charge levied on Owner's poles solely because of their use by Licensee shall be paid by Licensee.

ARTICLE XXVII

FORCE MAJEURE

Neither party shall be liable for any delay or failure in performance of any part of this Agreement resulting from acts of God, acts of civil or military authority, embargoes, epidemics, war, terrorist acts, riots, insurrections, fires, explosions, earthquakes, nuclear accidents, floods, power blackouts, or unusually severe weather. In the event of any such excused delay in the performance of a party's obligations under this Agreement, the due date for the performance of the original obligations(s) shall be extended by a term equal to the time lost by reason of the delay or by an extended time period mutually agreed to by the parties if more time is needed to complete the work.

ARTICLE XXVIII

NO WARRANTY OF RECORD INFORMATION

From time to time, one party may obtain from the other party records and other information relating to outside plant facilities. Each party acknowledges that such records and information provided may not reflect field conditions and that physical inspection is necessary to verify presence and conditions of outside plant facilities and right-of-way.

ARTICLE XXIX

NO EFFECT ON FRANCHISE RIGHTS

Notwithstanding anything elsewhere herein provided, nothing contained in this Agreement shall abrogate, limit or affect any obligation of either party under any franchise granted to either party by the city or other local governmental unit that owns operates or is in any way affiliated with Power Distributor, or by any predecessor of any such governmental unit or franchising authority.

ARTICLE XXX

SOURCE OF PAYMENTS

The obligations of the Power Distributor hereunder shall be payable solely from the funds of the electric system of the Power Distributor.

ARTICLE XXXI

MISCELLANEOUS PROVISIONS

- A. The Licensee of a Joint Use Pole shall acquire no ownership of or interest in such a pole, the Licensee's rights therein being limited to the right of compliance with terms and conditions contained in this agreement.

- B. Except on insofar as the express terms of this Agreement make the rights hereunder available to the successors or assigns of the parties hereto, the provisions of this Agreement shall not be interpreted to confer any right of action at law or in equity upon any parties except the parties hereto.

- C. Neither party shall, by mere lapse of time, be deemed to have waived any breach by the other party or any terms or provisions of the Agreement. The waiver by either party of any such breach shall not be constructed as a waiver of subsequent breaches or as a continuing waiver of such breach

- D. Nothing contained in this Agreement, or in any amendment or supplement thereto, or inferable here from shall be deemed or constructed to (i) make either party the agent, servant, employee, joint venture, associate, or partner of the other party, or (ii) create any partnership, joint venture or other affiliation or association between the parties. The parties hereto are and shall remain independent contractors. Nothing herein shall be deemed to establish a partnership joint venture or agency relationship between the parties. Neither party shall have the right to obligate or bind the other party in any manner to any third party.

- E. Each party represents that it has the full power and authority to enter into the Agreement and to convey the rights herein conveyed.

- F. This Agreement is deemed executed in and shall be construed under the laws of the State of Kentucky.

- G. Within the Agreement, words in the singular number shall be held and construed to include the plural, unless the context otherwise requires. Titles appearing at the beginning of any subdivisions hereof are for convenience only, do not constitute any part of such subdivisions, and shall be disregarded in construing the language contained in such subdivisions. The use of the words "herein", "hereof", "hereunder" and other similar compounds of the word "here" shall, unless the context dictates otherwise, refer to this entire agreement and not to any particular paragraph or provision. The term "person" and words importing persons as used in this Agreement shall include firms, associations, partnerships (including limited partnerships), limited liability companies, joint ventures, trust, corporation and other legal entities, including public or governmental bodies, agencies or instrumentalities, as well as natural persons.

IN WITNESS WHEREOF, the parties hereto have caused these presents to be executed in duplicate, and their corporate seals to be affixed thereto by the respective officers thereunto duly authorized, as of the Commencement Date.

GENERAL AGREEMENT

JOINT USE OF WOOD POLES IN RURAL AREAS

Contract Revised January, 1971

PREAMBLE

Fleming-Mason Rural Electric Cooperative Corporation, a corporation organized under the laws of the State of Kentucky, (hereinafter called the "Electrical Distributor"), and General Telephone Company of Kentucky, a corporation organized under the laws of the State of Delaware (hereinafter called the "Telephone Company"), desiring to cooperate in the joint use of their respective poles, erected or to be erected within the rural areas in which both parties render service in the State(s) of Kentucky, whenever and wherever such use shall, in the estimation of both parties, be compatible with their respective needs, do hereby, in consideration of the premises and the mutual covenants herein contained, covenant and agree for themselves and their respective successors and assigns as follows:

ARTICLE I

SCOPE OF AGREEMENT

(a) This Agreement shall be in effect in the areas in which both of the parties render service in the State(s) of Kentucky, and shall cover all wood poles now existing or hereafter erected in the above territories, except where said poles are covered by or later brought under an urban contract of the parties, when said poles are brought under this Agreement in accordance with the procedure hereinafter provided.

(b) Each party reserves the right to exclude any of its facilities from joint use.

(c) It is the intention of the parties that adequate electric and telephone service shall be made available to the widest practicable number of rural users in the above territory.

ARTICLE II

EXPLANATION OF TERMS

For the purpose of this Agreement, the following terms shall have the following meanings:

1. A **JOINT POLE** is a pole jointly used by both parties.

2. A **NORMAL JOINT POLE** is a pole which is just tall enough to provide normal spaces, as normal space is hereinafter defined, for the respective parties and just strong enough to meet the requirements of the specifications mentioned in Article III for the attachments ordinarily placed by the parties in their respective normal spaces. Such pole for the purpose of this Agreement shall be a 35 foot class 5 wood pole as classified by the pole classification tables of the American Standards Association.

3. **SPACE** is the linear portion of a joint pole parallel to its axis reserved for the exclusive use of one of the parties (subject only to the exceptions provided for in this Article and the specifications mentioned in Article III which in certain instances permit the making of certain attachments by one party in the space reserved for the other party).

4. **NORMAL SPACE** is the following described space:

a. For the Electrical Distributor the uppermost 6½ feet, measured from top of pole.

b. For the Telephone Company a space of 2 feet, at a sufficient distance below the space of the Electrical Distributor to provide at all times the minimum clearance required by the specifications mentioned in Article III

and at a sufficient height above ground to provide the proper vertical clearance above ground or track rails for the lowest horizontally run line wires or cables attached in such space.

The foregoing definition of "a normal joint pole" is not intended to preclude the use of joint poles shorter or of less strength than the normal joint pole in locations where such poles will meet the requirements of the parties hereto.

The above assignment of space is not intended to preclude the use of vertical runs or the mounting of such equipment as terminals or meters on the lower portions of the pole when mutually agreeable.

ARTICLE III SPECIFICATIONS

Except as otherwise provided in Section (f) of Article VII, referring to construction temporarily exempt from the application of the specifications mentioned herein, the joint use of the poles covered by this Agreement shall at all times be in conformity with accepted modern methods such as those suggested in Edison Electric Institute Publication No. 3112 and shall at all times conform to the requirements of the National Electrical Safety Code, Sixth Edition, and subsequent revisions thereof, except where the lawful requirements of public authorities may be more stringent, in which case the latter will govern.

In establishing joint use of wood poles whether installed new for joint use or installed initially for circuits of either party, the total transverse and vertical loads for all conductors attached to a pole covered by this Agreement shall not, under the assumed storm loadings of the National Electrical Safety Code for the area in which the pole is located, exceed fifty (50) percent of the ultimate fiber stress of the supporting pole. In the case of existing pole lines, the strength of the pole shall be assumed to be the same as when new.

Modifications of, additions to, or construction practices supplementing wholly or in part the requirements of the National Electrical Safety Code, shall, when accepted in writing by both parties hereto through their agents authorized to approve such changes, likewise govern the joint use of poles.

ARTICLE IV ESTABLISHING JOINT USE OF EXISTING POLES

(a) Before either party shall make use of the poles of the other party under this Agreement, it shall request permission therefor in writing on the form attached hereto and identified as Appendix A or such other form as may be mutually agreed upon and shall comply with the procedure set forth in said approved form.

(b) Whenever either party desires to reserve space for its attachments on any pole owned by the other party, either as initial space or additional space on such pole, it shall make written application therefor, specifying the location of the poles in question, the amount of space desired on each pole, and the number and character of the circuits to be placed thereon. If, in the judgment of the owner, the poles are necessary for its own sole use or joint use under the circumstances is undesirable, the owner shall have the right to reject the application. In any event, within a reasonable period after the receipt of such application the owner shall notify the applicant in writing whether the application is approved or rejected. Upon receipt of notice from the owner that the application has been approved, and after the completion of any transferring or rearranging which is required to permit the attaching of the applicant's circuits on such poles, including any necessary pole replacements, the applicant shall have the right as licensee hereunder to use such space in accordance with the terms of the application and of this Agreement.

(c) Whenever any jointly used pole or any pole about to be so used under the provisions of this Agreement is insufficient in height or strength for the existing attachments and for the proposed additional attachments thereon, the owner shall promptly replace such pole with a new pole of the necessary height and strength and shall make such other changes in the existing pole line in which such pole is included as the conditions may then require.

(d) Each party shall place, transfer and rearrange its own attachments, place guys and anchors to sustain any unbalanced loads caused by its attachments, and perform any tree trimming or cutting incidental thereto. Each party shall, with due diligence, attempt at all times to execute such work promptly and in such manner as not to interfere with the service of the other party.

(e) Wherever practicable, double thimble anchor rods with anchors of sufficient holding power to sustain any unbalanced loads of the two parties shall be installed and used jointly. The ownership of the double thimble anchor rods and anchors will be vested in the owner of the pole. In any case, where one party provides at the request of the other party double thimble anchor rods and anchors for the use of both parties the party requesting the double thimble anchor rods and anchors shall pay to the party placing the double thimble anchor rods and anchors a sum equal to half of the cost of the anchors and anchor rods in place. In cases where the existing anchors are adequate for the needs of both parties the party desiring additional guys may where necessary install an adapter at its own expense. In cases where existing anchor rods and anchors are adequate for the needs of only one party the party desiring additional guys and anchors may where necessary install anchors and anchor rods at no expense to the other party or in the case of right-of-way restrictions may provide a double thimble anchor rod and anchor in place of the existing anchor rod and anchor to which the other party can attach its existing guy at its own expense.

(f) The cost of establishing the joint use of existing poles including the making of any necessary pole replacements, shall be borne by the parties hereto in the manner provided in Article VIII - Division of Costs.

ARTICLE V ESTABLISHING JOINT USE OF NEW POLES

(a) Whenever either party hereto requires new pole facilities for an additional pole line, an extension of an existing pole line, or in connection with the reconstruction of an existing pole line, it shall promptly notify the other party to that effect in writing (verbal notice subsequently confirmed in writing may be given in cases of emergency) stating the proposed location and character of the new poles and the character of circuits it intends to use thereon and indicating whether or not such pole facilities will be, in the estimation of the party proposing to construct the new pole facilities, susceptible of joint use. Within a reasonable period after the receipt of such notice, the other party shall reply in writing, stating whether it does, or does not, desire space on the said poles and, if it does desire space thereon, the character of the circuits it desires to use and the amount of space it wishes to reserve. If such other party requests space on the proposed new poles and if the character and number of its circuits and attachments are such that the party proposing to construct the new pole facilities does not consider joint use undesirable, then it shall erect poles suitable for such joint use, subject, however, to the provisions of Section (b) of this Article, and subject further to the condition that request by either party for space on proposed new poles of the other party under this Agreement shall be made in writing on the form attached hereto and identified as Appendix A or such other form as may be mutually agreed upon and shall comply with the procedure set forth in said approved form. The applicant for space on the poles shall be promptly notified in writing of the action taken on the application.

(b) In any case where the parties hereto shall conclude arrangements for the joint use of any new poles to be erected, and the party proposing to construct the new pole facilities already owns more than its proportionate share of joint poles, the parties shall take into consideration the desirability of having the new pole facilities owned by the party owning less than its proportionate share of joint poles so as to work towards such a division of ownership of the joint poles that neither party shall be obligated to pay to the other any adjustment payments because of their respective use of joint poles owned by the other, due regard being given to the desirability of avoiding mixed ownership of poles in a section of line.

(c) Each party shall place its own attachments on the new joint poles and place guys and anchors to sustain any unbalanced loads caused by its attachments except as otherwise provided under Article IV, Section (e). The party owning the pole line shall provide initial right-of-way clearance 15 feet on each side of the center line to the extent practicable, all right-of-way in excess of this 30 foot swath to be borne by the party requiring the additional width. Each party shall, with due diligence, attempt to execute its work promptly and in such manner as not to interfere with the service of the other party.

ARTICLE VI RIGHT OF WAY FOR LICENSEE'S ATTACHMENTS

While the owner and licensee will cooperate as far as may be practicable in obtaining rights-of-way for both parties on joint poles, the owner does not warrant or assure to the licensee any right-of-way privileges or easements on, over or across streets, alleys and public thoroughfares, and private or publicly owned property, and if the licensee shall at any time be prevented from placing or maintaining its attachments on the owner's poles, no liability on account thereof shall attach to the owner of the poles.

ARTICLE VII
MAINTENANCE OF POLES AND ATTACHMENTS

(a) The owner shall maintain its joint poles in a safe and servicable condition and in accordance with the specifications mentioned in Article III and shall replace, reinforce or repair such of these poles as become defective. In case of emergency, with the giving of verbal notice, licensee may replace joint poles, anchors and guys as may be considered necessary for public safety or the restoration of licensee's service, in which case the licensee shall be reimbursed by the owner in the full amount of the cost of labor and materials plus any applicable overhead expenses.

(b) When replacing a jointly used pole carrying terminals of aerial cable, underground connection, or transformer equipment, the new pole shall be set in the same hole which the replaced pole occupied unless special conditions make it necessary or mutually desirable to set it in a different location.

(c) Whenever it is necessary to replace or relocate a jointly used pole, the owner shall, before making such replacement or relocation, give reasonable notice thereof in writing (except in case of emergency, when verbal notice will be given and subsequently confirmed in writing) to the licensee, specifying in such notice the time of such proposed replacement or relocation and the licensee shall at the time so specified transfer its attachments to the new or relocated joint pole. Should the licensee fail to transfer its attachments to the new joint pole on the date specified for such transfer of attachments, the owner may elect to relinquish the ownership of the old pole from which it has removed its attachments, with the giving of verbal notice to be subsequently followed in writing. Such old pole shall thereupon, at no cost to the licensee, become the property of the licensee, and the licensee shall save harmless the former owner of such pole from all obligation, liability, damages, cost, expenses or charges incurred thereafter, and not arising out of anything theretofore occurring, because of, or arising out of, the presence or condition of such pole or of any attachments thereon. In instances where the Electrical Distributor is the owner of such pole the unused portion of the pole above the licensee's attachments shall be cut off and removed by the owner before relinquishing ownership, if the pole remains in structural conflict with the power route.

(d) Each party shall at all times maintain all of its attachments in accordance with the specifications mentioned in Article III and shall keep them in safe condition and in thorough repair. Where the parties mutually agree that right-of-way maintenance on existing joint use lines is necessary for the protection of their service, the cost of the following work shall be shared as follows:

1. The removal of dead or dangerous trees shall be shared equally.
2. Chemical control or removal of undergrowth by cutting at the ground line in a swath measured fifteen feet on each side of the center line as follows:
 - a. 50% of the cost on routes supporting bare aerial wire telephone circuits shall be borne by each party.
 - b. 10% of the costs shall be borne by the Telephone Company, 90% by the Electrical Distributor on routes supporting telephone multiple pair insulated wire.
 - c. Costs will not be shared on routes supporting cable or abrasive resistant wire. Each party will provide for its own requirements.

(e) Each party shall be responsible for trimming its own circuits at its own expense where right-of-way is maintained by trimming (side growth, undergrowth or overhead growth).

(f) Any existing joint use construction of the parties hereto which does not conform to the specifications mentioned in Article III shall be brought into conformity therewith as soon as practicable.

When such existing construction shall have been brought into conformity with said specification, it shall at all times thereafter be maintained as provided in Sections (a) and (d) of this Article.

(g) The cost of maintaining poles and attachments and of bringing existing joint use construction into conformity with said specifications shall be borne by the parties hereto in the manner provided in Article VIII - Division of Costs.

ARTICLE VIII
DIVISION OF COSTS

(a) The cost of erecting new joint poles coming under this Agreement, to construct new pole lines, to make extensions to existing pole lines, or to replace existing poles, except as covered in (c) below, shall be borne by the parties as follows:

1. A normal joint pole, or joint pole smaller than normal, shall be erected at the sole expense of the owner.
2. A pole larger than the normal, the extra height or strength of which is due wholly to the owner's requirements including requirements as to keeping the owner's wires clear of trees shall be erected at the sole expense of the owner.
3. In the case of a pole larger than the normal, the extra height or strength of which is due wholly to the licensee's requirements including requirements as to keeping the licensee's wires clear of trees, the licensee shall pay to the owner a sum equal to the difference between the cost in place of such pole and the cost in place of a normal joint pole, the rest of the cost of erecting such pole to be borne by the owner, except insofar as otherwise provided in Section (c) of this Article.
4. In the case of a pole larger than the normal, the extra height or strength which is due to the requirements of both parties or the requirements for proper ground clearance or of public authorities or of property owners, (other than requirements with regard to keeping the wires of one party only clear of trees), the difference between the cost in place of such pole and the cost in place of a normal joint pole shall be shared equally by the licensee and the owner, the rest of the cost of erecting such pole to be borne by the owner.
5. A pole, including all appurtenances or fixtures, erected between existing poles to provide sufficient clearance and furnish adequate strength to support the circuits of both the owner and the licensee, which it would have been unnecessary to erect if joint use had not been undertaken, shall be erected at the sole expense of the licensee.

(b) Any payments for poles made by the licensee under any foregoing provisions of this Article shall not entitle the licensee to the ownership of any part of said poles for which it has contributed in whole or in part.

(c) Where an existing jointly used pole or a non-joint pole is prematurely replaced by a new one solely for the benefit of the licensee, the cost of the new pole shall be divided as specified in Section (a) of this Article and the licensee shall pay the owner the labor cost of removal of the existing pole and the labor cost of replacing or transferring of all appurtenances on the existing pole. The replaced pole shall be removed and retained by its owner.

(d) Each party shall place, maintain, rearrange, transfer and remove its own attachments at its own expense except as otherwise expressly provided herein.

(e) The expense of maintaining joint poles shall be borne by the owner thereof except that the cost of replacing poles shall be borne by the parties hereto in the manner provided in Sections (a) and (c) of this Article.

(f) Where service drops of one party crossing over or under lines of the other party are attached to the other party's poles, either directly or by means of a pole top extension fixture, the cost shall be borne as follows:

1. Pole top extension fixtures shall be provided and installed at the sole expense of the party using them.
2. Where an existing pole is replaced by a taller one to provide the necessary clearance the party owning the service drop shall pay to the party owning the pole the cost of the new pole plus the labor costs of replacing or transferring of the appurtenances on the existing pole, the owner of the existing pole to remove and retain such pole at his own expense.

(g) Payments made by either party to the other under the provisions of this Article may be based on the estimated or actual cost as mutually agreed upon (including overhead) of making such changes but in no event, however, shall either party be required to pay for such changes more than 120% of the estimated cost supplied by the other if such cost estimate shall have been requested and furnished before the changes were made.

**ARTICLE IX
PROCEDURE WHEN CHARACTER OF CIRCUITS IS CHANGED**

When either party desires to change the character of its circuits on jointly used poles, such party shall give immediate notice to the other party of such contemplated change and in the event that the party agrees in writing to joint use with such changed circuits, then the joint use of such poles shall be continued with such changes in construction as may be required to meet the terms of the specifications mentioned in Article III for the character of circuits involved and such other changes as may be agreed upon. The parties shall cooperate to determine the equitable apportionment of the net expense of such changes. In the event, however, that the other party fails within 30 days from receipt of such notice to agree in writing to such change in character of circuits, then both parties shall cooperate in accordance with the following plan:

1. The parties hereto shall determine the most practical and economical method of effectively providing for separate lines, either overhead or underground, and the party whose circuits are to be moved shall carry out the necessary work as promptly as practicable.
2. The net costs of re-establishing such circuits in the new location as are necessary to furnish the same business facilities that existed in the joint use section at the time such change was decided upon, shall be borne by the licensee; provided, however, that the owner shall bear the cost whenever the change was occasioned by the necessities of the owner. When the net costs are borne by the owner they shall not include the cost of the new pole line constructed by the licensee.

Unless otherwise agreed by the parties, ownership of any new line or underground facilities constructed under the foregoing provisions in a new location shall vest in the party for whose use it is constructed.

**ARTICLE X
ABANDONMENT OF JOINT USED POLES**

(a) If the owner desires at any time to abandon any jointly used pole, it shall, except as provided in Article VII, Section (c), give the licensee notice in writing to that effect at least 60 days prior to the date on which it intends to abandon such pole. If at the expiration of said period the owner shall have no attachments thereon, such pole shall thereupon become the property of the licensee, and the licensee shall save harmless the former owner of such pole from all obligation, liability, damages, cost, expenses or charges incurred thereafter, and not arising out of anything theretofore occurring, because of, or arising out of, the presence or condition of such pole or of any attachments thereon; and shall pay the owner the then value in place of the pole to the owner. The former owner shall further evidence transfer of title to the pole by appropriate means. Credit shall be allowed for any payments which the licensee may have made under the provisions of Article VII - Division of Costs, when the pole was originally set, provided the licensee furnishes proof of such payment.

(b) The licensee may at any time abandon the use of a joint pole by removing therefrom any and all attachments it may have thereon and by giving such notice as may be mutually agreed upon.

**ARTICLE XI
ADJUSTMENT PAYMENTS**

(a) The parties contemplate that the use or reservation of space on poles by each party, as licensee of the other under this Agreement shall be based on the equitable sharing of the economies of joint use.

(b) On or about December 1st of each year, each party, acting in cooperation with the other, and subject to the provisions of Section (c) of this Article, shall ascertain and tabulate the total number of poles in use by each party as licensee, which tabulation shall indicate the number of poles in use by each party as licensee for which an adjustment payment by one of the parties to the other is to be determined as hereinafter provided.

(c) For the purpose of such tabulation, any pole used by the licensee for the sole purpose of attaching wires or cables thereto, either directly or by means of a pole top extension fixture, in order to provide clearance between the facilities of the two parties as distinguished from providing support for such wires or cables, shall not be considered as a joint pole.

(d) If there is provision under a separate agreement between the Telephone Company and the Electrical Distributor for facilities associated with power line carrier systems, the adjustment payment provisions of the

agreement of which this Article forms a part shall apply for poles on which both types of facilities are present and no other adjustment payments shall apply. The adjustment payment provisions of this Agreement shall not apply, however, where only those facilities directly associated with the power line carrier systems are involved.

(e) Adjustment payments per pole due from one party as licensee to the other party or owner shall, subject to the provisions of Article XII, be [REDACTED] per annum by the Electrical Distributor for each jointly used pole owned by the Telephone Company and [REDACTED] per annum by the Telephone Company for each jointly used pole owned by the Electrical Distributor. The smaller total sum shall be deducted from the larger and the Electrical Distributor or the Telephone Company, as the case may be, shall pay to the other the difference between such amounts. The adjustment payment herein provided shall be paid within ten days after the bill has been submitted.

(f) At intervals not exceeding five (5) years an actual inventory of attachments shall be made by representatives of the parties. If there is any difference in the number of attachments found by the inventory and the number arrived at by tabulating those reported, correction will be made by retroactive billing for any attachments identified as being responsible for the difference, and any remaining difference will be spread evenly over the years since the last inventory, and billing adjusted accordingly except as otherwise provided under Article XII, Section (c).

ARTICLE XII

PERIODICAL ADJUSTMENT OF PAYMENTS

(a) At any time after 3 years from the date of this Agreement and at intervals of not less than 3 years thereafter, the payments applicable under this Agreement shall be subject to joint review and adjustment as provided for under Section (b) of this Article upon the written request of either party. In case of adjustment of payments as herein provided, the new payments agreed upon shall apply starting with the annual bill next rendered and continuing until again adjusted.

(b) All adjustments of rental shall be in accord with the provisions of Appendix B, and any changes shall take into account the cost factors originally involved in all joint use existing at that time under this Agreement.

(c) An actual inventory of attachments shall be made by representatives of the parties coincident with the effective date of any adjustment rentals.

ARTICLE XIII

DEFAULTS

(a) If either party shall default in any of its obligations under this Agreement and such default continues thirty (30) days after due notice thereof in writing by the other party, the party not in default may suspend the rights of the party in default insofar as concerns the granting of future joint use and if such default shall continue for a period of 90 days after such suspension, the party not in default may forthwith terminate this Agreement as far as concerns the future granting of joint use.

(b) If after reasonable notice either party shall make default in the performance of any work it is obligated to do under this Agreement at its sole expense, the other party may elect to do such work, and the party in default shall reimburse the other party for the cost thereof. Failure on the part of the defaulting party to make such payment within 30 days upon presentation of bills therefor shall, at the election of the other party, constitute a default under Section (a) of this Article.

ARTICLE XIV

EXISTING RIGHTS OF OTHER PARTIES

(a) If either of the parties hereto has, prior to the execution of this Agreement, conferred upon others, not parties to this Agreement, by contract or otherwise, rights or privileges to use any poles covered by this Agreement, nothing herein contained shall be construed as affecting such rights or privileges, and either party hereto shall have the right, by contract or otherwise, to continue and extend such existing rights or privileges, it being expressly understood, however, that for the purpose of this Agreement, the attachments of any such outside party, except those of a municipality or other public authority, shall be treated as attachments belonging to the grantor, and the rights, obligations, and liabilities hereunder of the grantor in respect to such attachments shall be the same as if it were the actual owner thereof.

(b) Where municipal regulations require either party to allow the use of its poles for fire alarm, police, or other like signal systems, such use shall be permitted under the terms of this Article, provided attachments of such parties are placed and maintained in accordance with the specifications mentioned in Article III.

**ARTICLE XV
ASSIGNMENT OF RIGHTS**

Except as otherwise provided in this Agreement, neither party hereto shall assign or otherwise dispose of this Agreement or any of its rights or interests hereunder, or in any of the jointly used poles, or the attachments or rights-of-way covered by this Agreement, to any firm, corporation or individual, without the written consent of the other party, except to the United States of America or any agency thereof; provided, however, that nothing herein contained shall prevent or limit the right of either party to mortgage any or all of its property, rights, privileges, and franchises, or lease or transfer any of them to another corporation organized for the purpose of conducting a business of the same general character as that of such party, or to enter into any merger or consolidation; and, in case of the foreclosure of such mortgage; or in case of lease, transfer, merger, or consolidation, its rights and obligations hereunder shall pass to, and be acquired and assumed by, the purchaser on foreclosure, the transferee, leasee, assignee, merging or consolidating company, as the case may be; and provided further that subject to all of the terms and conditions of this Agreement, either party may permit any corporation conducting a business of the same general character as that of such party, and owned, operated, leased and controlled by it, or associated or affiliated with it, the use of all or any part of the space reserved hereunder on any pole covered by this Agreement for the attachments used by such party in the conduct of its said business; and for the purpose of this Agreement, all such attachments maintained on any such pole by the permission as aforesaid of either party hereto shall be considered as the attachments of the party granting such permission, and the rights, obligations and liabilities of such party under this Agreement, with respect to such attachments, shall be the same as if it were the actual owner thereof.

**ARTICLE XVI
WAIVER OF TERMS OR CONDITIONS**

The failure of either party to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

**ARTICLE XVII
PAYMENT OF TAXES**

Each party shall pay all taxes and assessments lawfully levied on its own property upon said jointly used poles, and the taxes and the assessments which are levied on said joint poles shall be paid by the owner thereof, but any tax, fee, or charge levied on owner's poles solely because of their use by the licensee shall be paid by the licensee.

**ARTICLE XVIII
BILLS AND PAYMENT FOR WORK**

Upon the completion of work performed hereunder by either party, the expense of which is to be borne wholly or in part by the other party, the party performing the work shall present to the other party within 90 days after the completion of such work an itemized statement of the costs and such other party shall within 30 days after such statement is presented pay to the party doing the work such other party's proportion of the cost of said work.

**ARTICLE XIX
SERVICE OF NOTICES**

Whenever in this Agreement notice is provided to be given by either party hereto to the other, such notice shall be in writing and given by letter mailed, or by personal delivery, to the Electrical Distributor at its office

Drawer 328, Flemingsburg, Kentucky

to the Telephone Company at its office at 2001 Harrodsburg Road, Lexington, Kentucky

_____ as the case may be,
or to such other address as either party may from time to time designate in writing for that purpose.

ARTICLE XX
TERM OF AGREEMENT

This Agreement shall continue in full force and effect until the 1st day of January, 1982, and shall continue thereafter until terminated, insofar as the making of attachments to additional poles is concerned, by either party giving to the other one (1) years notice in writing of intention to terminate the right of making attachments to additional poles. Any such termination of the right to make attachments to additional poles shall not, however, abrogate or terminate the right of either party to maintain the attachments theretofore made on the poles of the other or additional attachments to such poles, and all such attachments shall continue thereafter to be maintained, pursuant to and in accordance with the terms of this Agreement, which Agreement shall, so long as said attachments are continued, remain in full force and effect solely and only for the purpose of governing and controlling the rights and obligations of the parties with respect to said attachments.

ARTICLE XXI
EXISTING CONTRACTS

All existing agreements between the parties hereto for the joint use of poles in rural areas are by mutual consent hereby abrogated and superseded by this Agreement.

Nothing in the foregoing shall preclude the parties to this agreement from preparing such supplemental operating routines or working practices as they mutually agree to be necessary or desirable to effectively administer the provisions of this Agreement.

ARTICLE XXII
APPROVAL OF THE ADMINISTRATOR

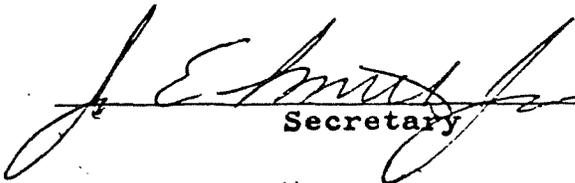

This Agreement, and any amendment thereof, shall be effective subject to the condition that, during any period in which the Electrical Distributor is a borrower from the Rural Electrification Administration, the agreement and any amendment thereof shall have the approval in writing of the Administrator of the Rural Electrification Administration.

In witness whereof the parties hereto, have caused these presents to be executed in triplicate, and their corporate seals to be affixed thereto by their respective officers thereunto duly authorized, on the 1st day of January, 1972.

AMENDMENT TO ARTICLE XI, OF GENERAL AGREEMENT
FOR JOINT USE OF WOOD POLES IN RURAL AREAS

The Electrical Distributor and the Telephone Company agree that the following amendment shall be a part of the Agreement between the parties dated January 1, 1972 and amended on October 1, 1982.

Amend Section E, Article XI by deleting the first sentence thereof and substituting in its place the following:

"Adjust payments per pole due from one party as licensee to the other party or owner shall, subject to the provisions of Article XII, be [redacted] per annum by the Electrical Distributor for each jointly used pole owned by the Telephone Company and [redacted] per annum by the Telephone Company for each jointly used pole owned by the Electrical Distributor."

Executed on the 5th day of NOV. 1996.

APPENDIX A

TO _____
Name of Electrical Distributor Date

Address Request Number

This is to request permission for this company to use jointly certain of your poles under the terms and conditions of our General Agreement for Joint Use of Wood Poles in Rural Areas, dated _____

The poles, including the number and character of circuits to be placed thereon, for which this permission is requested are those included in the pole lines indicated on the attached map, which also bears the above date and Request Number.

Our present plan is to start this work about _____, 19____,
and complete the work about _____, 19____.

If permission to use these poles is given by you, this Company will prepare and furnish to you, after engineering is complete, detailed construction plans and drawings, together with necessary maps, to indicate specifically your poles that we wish to use jointly, the number and character of the circuits to be placed on such poles, and any rearrangements of fixtures and equipment necessary, as well as any relocations or replacements of existing poles, and any additional poles that may be required, in accordance with the procedure provided in Articles IV and V of this Agreement.

If the joint use proposed is agreeable, please signify your approval of this request in the space provided and return the second copy to us.

APPENDIX B

This Appendix describes the basic principles and guides which have been used under this Agreement in setting the adjustment payments specified in Article XI and which are to be used in making periodical adjustment of payments as provided for in Article XII.

Under these principles the adjustment payments are intended, insofar as it is practicable, to result in a sharing of the economies realized by the joint use of pole plant in proportion to the relative costs of separate pole line construction.

The procedures outlined herein take into account the following objectives:

1. An equitable division of savings regardless of the number of jointly used poles owned by each party.
2. Adjustment payments applicable universally in the area covered by the Agreement regardless of whether the pole lines involved are initially constructed with joint use in view or are existing lines modified for joint use.
3. Appropriate allowance in the adjustment payments for additional costs incurred by each party in supplying 'normal joint poles', as defined in the Agreement, and the costs of other items required in the joint use of poles which would not be incurred in separate line construction.
4. Adjustment payments based on the costs of "typical miles" of separate lines, of newly constructed joint lines and of existing lines modified to make them suitable for joint use. The 'per mile' values of adjustment payments are then reduced to 'per pole' values for purposes of simplifying tabulations and to provide for the joint use of scattered poles.

The adjustment payments are the dollar values resulting from the licensee paying to the owner, as annual adjustment payments, an amount representing the annual charge on a separate line for the licensee less the sum of the annual charges on the additional costs incurred by the licensee in establishing joint use and (b) the licensee's share of the total annual savings. This share is the ratio of the licensee's typical separate line costs to the sum of the typical separate line costs of each of the parties.

The annual adjustment payments can also be stated as follows:

| | | | | | | |
|---|----------|---|--------|---|------|--|
| Licensee's annual adjustment payment | (equals) | Annual charges saved by Licensee through not having to build a separate line | (less) | Licensee's appropriate percentage | (of) | Total savings in annual charges realized through joint use. |
|---|----------|---|--------|---|------|--|

The cost in place of a line of poles is made up of a number of factors including such items as right-of-way solicitation, clearing, staking, direct labor and material costs of bare poles in place and pro rata shares of construction supervision and overhead. These costs, for a specific area, may differ considerably from corresponding costs in other parts of the country. These variations in pole line costs will, however, affect both power and telephone lines to about the same degree.

The calculation for Telephone Company adjustment payments to Power Distributor and Power Distributor adjustment payments to the Telephone Company based on the preceding principles for this contract is as follows:

Re: General Agreement Joint Use of Wood Poles between GTE South
Incorporated and Fleming-Mason RECC Electric Company, dated 1/1/72
(the "Agreement")

Dear Sir or Madam:

On October 31, 2001, Verizon South Inc. ("Verizon") entered into a definitive agreement (the "Purchase Agreement") with Kentucky ALLTEL, Inc., a subsidiary of ALLTEL Corporation ("ALLTEL"). Under the terms of the Purchase Agreement Verizon will transfer to ALLTEL certain telephone operations and related assets located in Kentucky (the "Transaction"). The above referenced Agreement is one of the assets to be transferred as a part of the Transaction.

Until the closing of the Transaction, Verizon will continue to operate in the current manner and will continue to be responsible to perform those obligations under the Agreement that arise prior to the transfer to ALLTEL. Upon Closing of the Transaction, ALLTEL will be assigned all of Verizon's rights and obligations under the Agreement, to the extent such obligations arise after the closing date.

By this letter, Verizon is requesting your consent to the assignment of the Agreement to ALLTEL as a part of the Transaction. Please indicate your consent by executing the letter where indicated in the space provided below and returning it in the enclosed pre-paid envelope at your earliest convenience, but by no later than **February 21, 2002**. The enclosed copy should be retained for your records. By consenting to the assignment of the Agreement you also agree that, after the closing of the Transaction, Verizon will have no further obligations to you under the Agreement, and that ALLTEL shall be responsible for all obligations thereunder after the closing.

January 31, 2002
Page 2

Your consent will remain effective through the closing of the Transaction. You will be contacted by ALLTEL who will advise you of the closing date and the new contact information.

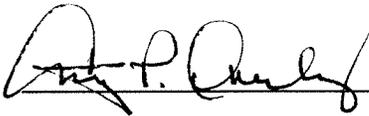

We appreciate your prompt attention to this matter. Should you have any questions, please contact the undersigned at (972)718-3289 or Paula Valdez at (972)718-4902.

Sincerely,

Erin M. Welton

THIS AGREEMENT, made this ___ day of _____, 20__ (“Commencement Date”) by and between HICKMAN-FULTON COUNTIES RURAL ELECTRIC COOPERATIVE CORPORATION, a corporation under the laws of the State of Kentucky, hereinafter called the “Power Distributor,” party of the first part, and Windstream Kentucky East, LLC a corporation under the laws of the State of Delaware, hereinafter called the “Telephone Company,” party of the second part.

WITNESSETH

WHEREAS, the Power Distributor and the Telephone Company desire to continue joint use of distribution poles and in the future to establish further joint use of their respective distribution poles when and where joint use shall be of mutual advantage; and

NOW, THEREFORE, in consideration of the premises and the mutual covenants herein contained, the parties hereto, for themselves, their successors and assigns, do hereby covenant and agree as follows:

ARTICLE I

DEFINITIONS

For the purpose of this Agreement, the following terms when used herein, shall have the following meanings.

- A. ATTACHMENTS - are any wires, cables, strands, materials or apparatus affixed to a Joint Use Pole, excluding ground wires, now or hereafter used by either party in the construction, operation or maintenance of its plant. A pedestal that is adjacent to a Joint Use Pole, but not affixed to the pole, shall not be considered an Attachment.
- B. CODE - is the National Electrical Safety Code, as it may be amended from time to time.
- C. COST or COSTS - are the reasonable costs (including loading factors, associated overheads, and overtime as applicable) of a party performing work under this Agreement.
- D. DAYS - as used herein shall mean calendar days.
- E. EMERGENCY – is a situation where a Joint Use Pole is damaged, or subject to failing, and such failure is reasonably believed to create risk of personal injury or damage to property.
- F. INJURIES - include death, personal injury and property damage or destruction.
- G. JOINT USE - is the maintaining of Attachments of both parties on the same pole at the same time.
- H. JOINT USE POLE – is a pole upon which space is provided under this Agreement for the Attachments of both parties on the same pole at the same time.

- I. LICENSEE - is the party having the right under this Agreement to make Attachments to a pole that the other party owns.
- J. NJUNS – is the National Joint Utility Notification System.
- K. NON-COMPLIANT ATTACHMENT – is an Attachment that requires an increase in the ground clearance or separation on a jointly used pole as required by the National Electrical Safety Code.
- L. OWNER - is the party owning the pole to which Attachments are made.
- M. REARRANGING - is the moving of Attachments from one position to another on a pole.
- N. RIGHT OF WAY - is the legal right to use the property of another.
- O. SECONDARY POLE – is a pole installed for the express purpose of providing required clearances for a Service Drop to a customer’s location. A Secondary Pole is a pole that typically services only a few customers or buildings as the case may be, does not have transformers or other electrical equipment on it, is located outside the main line and supports the Power Distributor’s wires with less than 600 volts.
- P. SERVICE DROP – is a wire or wires used to connect to a customer’s location that requires no guys under applicable specifications of Article IV. A Service Drop may run directly from a pole used to service many customers to a specific customer’s location, without the use of any other poles, or a Service Drop may itself be supported by more than one pole to carry the Service Drop to the customer’s location.
- Q. STANDARD JOINT USE POLE - means a 40 foot Class 4 distribution pole which meets the requirements of the Code for support and clearance of electric supply and communications conductors now or hereafter used by either party in the conduct of its business. The parties may agree to use a pole smaller than the standard class, but under no condition shall the Standard Joint Use Pole be less than the minimum requirements of the Code. The foregoing definition of a "standard joint use pole" is not intended to preclude the use of joint poles shorter or taller or of different strength than the Standard Joint Use Pole in location where it is mutually agreed such poles will meet the requirements of the parties hereto, nor is the foregoing definition of a “standard joint use pole” intended to require the replacement of poles that are currently in service.
- R. STANDARD SPACE ALLOCATION - means an allocation of sufficient space on a Joint Use Pole for use of each party, taking into consideration requirements of the current Code, more particularly defined as follows:
 - 1. For Power Distributor, the use of 10 feet of space on a 45 foot pole, 8 feet of space on a 40 foot pole, and 6.5 feet on a 35 foot pole measured downward from the top of the Joint Use Pole; and
 - 2. For Telephone Company, the use of 2 feet of pole space measured upward from the initial point of attachment on the Joint Use Pole. The initial point of

attachment shall be the lowest point on the pole required to provide at all times the Code minimum clearance above ground for the lowest horizontally run line, wire or cable attached in such space except where by mutual agreement of the field representatives of the parties sound engineering practices dictate a higher minimum clearance. This attachment shall also be at a sufficient distance below the space of the Electrical Distributor to provide at all times the minimum clearance required by the NESC.

3. Standard Space Allocation shall in all instances, except as specifically modified elsewhere in this Agreement or if a party pays to have a taller pole placed, be as represented on Exhibit A attached hereto and made a part hereof.

S. TEMPORARY TRANSFER or TEMPORARY PLACEMENT– is the transferring or placing of the Telephone Company’s facilities to another pole by the Power Distributor, and such a transfer or placement shall not be considered permanent by either party. Power Distributor will obtain permission either verbally or in writing prior to performing the transfer.

T. TRANSFERRING or TRANSFER- is the removing of Attachments from one pole and placing them upon another pole.

ARTICLE II

TERRITORY AND SCOPE OF AGREEMENT

This Agreement shall be in effect and shall cover all distribution poles of each of the parties now existing, hereafter erected or acquired within the common operating areas served by the parties hereto when said poles are brought hereunder, excepting;

1. Poles, not yet in Joint Use, which, in the Owner’s judgment, should be restricted for reasons of safety.
2. Poles, not yet in Joint Use, which, in the Owner’s judgment, should be restricted for reasons related to construction practices or clearances.

ARTICLE III

PERMISSION FOR JOINT USE

Subject to the terms and conditions of this Agreement, each party hereby permits joint use of its poles by the other party in accordance with permitting requirements of Article VI and the following:

A. **Use of Allocated Space.** Either party is permitted, without additional charge, to use the other party’s space on a pole for the purpose of installing and maintaining street lighting, traffic signal systems, and vertical attachments (such as but not limited to ground wires, gang operated switch control rods and underground risers) if by the terms of the Code the proposed use is authorized and such use does not unreasonably interfere with the other party’s use. If the allocated space is subsequently needed and the Code provisions cannot

be met, then the party to whom the space is not allocated, but who is utilizing the space allocated to the other party, shall be responsible, at its sole expense, for the Cost of Rearrangement or pole replacement necessary in order to accommodate the party having the allocated space.

- B. **Use of Unallocated Space.** As long as the provisions of the Code are met, either party may use, without additional charge, space on Joint Use Poles outside of the Standard Space Allocation that is neither in use by an authorized third party nor reserved by the Owner. If the space is subsequently needed by the Owner and if Code provisions cannot be met, then Licensee shall be responsible, at its sole expense, for the cost of Rearrangement or pole replacement necessary to accommodate the Owner's use of such space. If the space is subsequently needed by a third party having a prior permit or similar contractual right to use the specific space on such pole that predates the Licensee's use of the pole, and if Code provisions cannot be met, then the Licensee shall be responsible, at its sole expense, for the cost of Rearrangement or pole replacement necessary to accommodate the use of such space.
- C. **Use of Space on Existing Poles.** If Attachments were properly made and are in compliance with the prior joint use agreement between the parties as of the effective date of this Agreement, such Attachments shall be deemed to be authorized Attachments under this Agreement, and shall be subject to post-attachment terms and conditions of this Agreement on a going forward basis.
- D. **Unauthorized Uses.** Licensee shall be subject to all of the requirements and obligations under this Agreement, but shall have none of the rights of a Licensee under this Agreement for use of Owner's pole(s) if Licensee's use of the particular pole(s) is not properly authorized in accordance with this Agreement.

ARTICLE IV

SPECIFICATIONS

- A. **Generally.** Joint Use of poles covered by this Agreement shall at all times be in conformity with applicable terms and provisions of law and with the requirements of the Code in effect at the time the respective attachments are made.
- B. **Existing Joint Use Poles.** As long as the provisions of Code in effect at the time the Attachments were made have been met, any Joint Use Pole in place before the Commencement Date of this Agreement shall be deemed satisfactory to both parties and adequate for their requirements, whether or not the space allocations defined herein have been observed; provided, however that all Attachments on such poles shall be subject to the requirements of this Agreement as referenced in Article III.C.
- C. **New Construction.** Except for Secondary Poles, the minimum height and strength for new poles installed by either party (including replacements of existing poles) shall be a Standard Joint Use Pole. Either party may install Secondary Poles that have less height and/or strength than the Standard Joint Use Pole, provided that the height and strength of

new Secondary Poles are sufficient to permit attachments of each party's Service Drops consistent with the requirements of the Code.

ARTICLE V

RIGHT OF WAY AND LINE CLEARING

A. **Easements.**

1. **New Easements.** The Owner and Licensee will reasonably cooperate in obtaining easements for both parties where Owner elects to obtain an easement for its poles, equipment and facilities. In instances where the Owner is obtaining a new easement, Owner will use reasonable efforts to obtain an easement for both parties on Joint Use Poles. Such easements obtained for the benefit of both parties shall be in sufficient detail for identification and recording, and shall be subject to inspection by the other party upon request.
2. **Objections of Property Owners and Others.** No guarantee is given by the Owner of permission of property owners, municipalities or others for Licensee's use of a Joint Use Pole. If objection is made to Licensee's right to maintain facilities on Owner's poles and Licensee is unable to satisfactorily resolve the matter within a reasonable time, including time for appeals, the Owner may at any time, upon notice in writing to the Licensee, require the Licensee to remove its Attachments from the poles involved and the Licensee shall within sixty (60) days after receipt of notice, or within a mutually agreeable time period if additional time is needed, remove its Attachments from said poles at its sole expense. Reasonable extensions of time shall not be denied under this section if the proposed extension of time does not materially prejudice the Owner. Licensee further agrees to indemnify and hold Owner harmless from any and all losses, damages, fines, penalties or costs of any kind (including reasonable attorneys' fees) which may arise from Licensee's failure to obtain all necessary easements, rights and permits to use a Joint Use Pole.
3. **Cost Sharing.** Nothing stated herein shall preclude the parties from mutually sharing the cost of easement acquisition. If the parties mutually share the cost of obtaining an easement, the easement shall name both parties as grantees.

B. **Line Clearing and Tree Trimming.** Line clearing and trimming will be performed as follows:

1. When constructing a new Joint Use Pole line the Owner shall cut, clear and trim a right-of-way sufficient to provide adequate clearance in accordance with the ordinary clearing practices of Power Distributor, if possible.
2. After the initial clearing, each party shall be responsible for its own trimming, clearing and cutting, regardless of who owns the pole.

ARTICLE VI

PROCEDURE FOR ESTABLISHING JOINT USE ATTACHMENTS

- A. **Attachment Process – No Make Ready Required.** The following rules shall apply to Attachments that may be made to Owner's poles without make-ready or other work to accommodate Licensee's Attachments:
1. Licensee may make an Attachment to Owner's pole within Licensee's Standard Space Allocation without advance notice to Owner if the Attachment otherwise meets the requirements of the Code and if the Attachment does not interfere with the Owner's use of the Pole or with others who are attached to Owner's pole.
 2. Licensee may, subject to Article III, make an Attachment to Owner's Pole outside of Licensee's Standard Space Allocation without advance notice to Owner if the Attachment otherwise meets the requirements of the Code and if the Attachment does not interfere with the Owner's use of the pole or with others who are attached to the Owner's pole.
 3. Licensee shall notify Owner of the number and location of all Attachments made to Owner's poles under this Section A no less frequently than monthly on the form attached hereto as Exhibit B.
- B. **Attachment Process – Make Ready Required.** For Attachments other than Attachments that may be under Section A, the following process shall apply:
1. Licensee shall make application by submitting to Owner the Joint Use Notification/Request Form attached as Exhibit C.
 2. Within thirty (30) days after the receipt of the application, Owner shall notify Licensee whether any changes and/or modifications to Owner's poles and related facilities are required in order to accommodate Licensee's Attachments, such changes and modifications being the "Make Ready Construction Work." If no changes and/or modifications are required, Owner shall notify Licensee, and Licensee may proceed with making such Attachments pursuant to Section A.
 3. If changes are necessary and the Licensee still desires to make Attachments to such pole, Owner, at Licensee's cost, will begin the make ready engineering that includes preparing engineering plans for the Make Ready Construction Work. Licensee and Owner shall work together in good faith to resolve any design and engineering issues and Licensee shall revise its plans as necessary. After the make ready engineering plans are complete, Owner shall provide Licensee a good faith estimate of the Costs and timeframe required to complete the Make Ready Construction Work. Upon Licensee's approval of such estimate of Costs for Make Ready Construction Work, Owner shall thereafter complete the Make Ready Construction Work at Licensee's Cost within sixty (60) days or within a reasonable extended deadline for complex Make Ready Construction Work that takes additional time to complete.

4. When the Make Ready Construction Work is complete, Owner shall notify Licensee and Licensee shall then have the right to make the authorized Attachments pursuant to Section A. Licensee shall complete such Attachments within sixty (60) days of notice from Owner. Reasonable extensions of time shall not be denied under this section if the proposed extension of time does not materially prejudice the Owner.
- C. **Service Drops.** Service Drops are expressly excluded from the requirements of this Article unless Make Ready Construction Work is required in which case Section B shall apply. Subject to Code compliance, Licensee may place Service Drops not requiring Make Ready Construction Work on Owner's pole without submitting an application or notifying Owner. Service Drops shall be considered Attachments for all other purposes under this Agreement. Licensee shall notify Owner of the number and location of Service Drops made to Owner's poles no less frequently than monthly on the form attached hereto as Exhibit B.
- D. **Unauthorized Attachment.** After the Initial Inventory (defined below), if Owner finds that Licensee placed an Attachment without complying with the notification requirements of Sections A and B above, such Attachment shall be considered an Unauthorized Attachment (the "Unauthorized Attachment"). When discovered, Owner will notify Licensee of the Unauthorized Attachment in writing sent via certified mail to the operational and legal addresses referenced in Article XVIII. The notice shall set forth the location of the Unauthorized Attachment and shall specify the amount owed on account of such Unauthorized Attachment. For purposes of determining the amount owed, Licensee shall be responsible for paying an amount equal to the adjustment payment in effect for each of the years since the last inventory or five years whichever is shorter. (under this Agreement or any predecessor agreements between the parties). If Licensee can demonstrate to the reasonable satisfaction of Owner when such Attachment was made, then the amount owed shall be an amount equal to the adjustment payment in effect for each of the years since the Attachment was made.

ARTICLE VII

REPLACING OR RELOCATING POLES; TRANSFERS

- A. **Pole Replacements; Pole Relocation.** Whenever it is necessary to replace or change the location of a jointly used pole, the Owner shall give reasonable notice to Licensee to allow for planning and scheduling thereof in writing (except in cases of Emergency, which shall be handled under Section VII.D., below), specifying in such notice the time of such proposed replacement or relocation. The Licensee shall transfer its Attachments to the new or relocated Joint Use Pole within sixty (60) days of receipt of Owner's written notice (or notice through NJUNS or similar formal electronic notification system mutually agreed to by the parties), which notice shall not be sent until other parties have transferred their attachments, if applicable, and Licensee is "next to go" for transfer work. Licensee must complete the Transfers within a reasonable extended deadline or on a schedule mutually agreeable to the parties in the following circumstances:
1. For a complex transfer that will take more than sixty (60) days to accomplish;

2. In instances where transfers are “bulk loaded” into NJUNS upon the parties’ initial participation in NJUNS or;

3. In instances where more than five (5) times the transferring party’s average monthly transfers during its most recent fiscal year is being requested (except in cases where the number of transfers requested is 50 or less in which case the sixty (60) day deadline set forth in this paragraph A shall apply).

Reasonable extensions of time shall not be denied under this section if the proposed extension of time does not materially prejudice the Owner. In situations where Transfers are required by a lawful demand of a property owner, or governmental or regulatory authority, the parties shall work together in good faith to expedite the transfer work. Licensee further agrees to indemnify and hold Owner harmless from any and all losses, damages, fines, penalties or costs of any kind (including reasonable attorneys’ fees) which may arise from Licensee’s failure to transfer its Attachments in response to such lawful demand.

B. Transfers.

1. Should the Licensee fail to transfer its Attachments within the time period outlined in Section A above (a “Delinquent Transfer”), Owner may escalate the matter in accordance with Article XX, and Owner may also choose to refuse to permit Licensee to make additional Attachments until such time as all Delinquent Transfers are made. Alternatively, Owner may abandon the subject pole(s) to Licensee in accordance with Article XIII or declare a default pursuant to Article XVI.

2. If the Licensee indicates that it has completed a transfer and Owner finds that Licensee has not completed the transfer when Owner goes to pull the pole, Licensee shall pay Owner all actual and documented Costs associated with such return trip.

3. .

C. Replacement of Other Party’s Poles. Except as provided for in Section D.1., below, a party may only replace poles for the other party with the other party’s written concurrence. The actual and documented Costs associated with such replacement shall be paid by the Owner of the pole being replaced. The new pole shall remain the property of the original Owner whose pole was replaced.

D. Emergency Situations. Both parties recognize and agree that there are inherent dangers involved in the transmission and distribution of electricity. The parties agree that unforeseeable Emergency conditions will exist from time to time.

1. **Pole Replacement - Emergency.** When due to an accident or storm damage, the dangerous condition of a pole, or an Emergency, it is necessary for the Licensee to replace the Owner’s pole immediately to restore service to its customer or to eliminate a hazardous condition and the Owner cannot perform the work in time to meet the Licensee’s requirements, Licensee may replace the Owner’s pole.

Licensee shall give the Owner written notice of the Emergency pole replacement within five (5) days of completing the pole replacement. The actual and documented Costs associated with replacing a pole during such a situation shall be paid by the Owner of the pole requiring replacement. The new pole shall remain the property of the original Owner.

2. **Temporary Placement of Attachments.** During the repair and restoration of utility power as a result of a storm event, accident, or from other damage to the Joint Use Poles in an Emergency situation (including a pole replacement under paragraph 1 of this Section), or in a situation where it is necessary to eliminate a hazardous condition, the Power Distributor may make a Temporary Placement of Attachments of the Telephone Company to the Joint Use Poles. The Power Distributor will send written notice to the Telephone Company of such Temporary Placements within five (5) days of making them. The Telephone Company will take action to permanently attach such attachments within sixty (60) days of receipt of the written notice, or within a reasonable extended deadline mutually agreeable to the parties if more time is needed to complete the work. Reasonable extensions of time shall not be denied under this section if the proposed extension of time does not materially prejudice the Owner. Because of the aforementioned inherent dangers, the Telephone Company is not authorized to replace or temporarily secure the Power Distributor's facilities, wires or conduit.

ARTICLE VIII

CORRECTIVE MEASURES AND THIRD PARTY COMPLAINTS

- A. **Licensee Responsibility.** If any Attachment of the Licensee is found to be in violation of the terms of this Agreement (including, without limitation, the provisions relating to compliance with the Code), then the parties will work together to minimize the Cost of correcting any such deficiencies, but the Licensee shall be responsible for the full actual and documented Cost of any necessary or appropriate corrective measures, including removal and replacement of the pole and all Transfers or other work incident thereto. Licensee shall correct such Non-Compliant Attachment within ninety (90) days of Owner's notification to Licensee (unless Owner reasonably determines that safety, emergency or service restoration efforts require Licensee to take corrective action within a shorter time period.)
- B. **Owner Responsibility.** If any Attachment of the Owner is found to be in violation of the terms of this Agreement (including, without limitation, the provisions relating to compliance with the Code), then the parties will work together to minimize the Cost of correcting any such deficiencies, but the Owner shall be responsible for the full actual and documented Cost of any necessary or appropriate corrective measures, including removal and replacement of the pole and all Transfers or other work incident thereto. Owner shall correct such Non-Compliant Attachment within ninety (90) days of Owner's notice of such Attachment (unless safety, emergency or service restoration efforts exist in which case Owner shall take corrective action within a shorter time period.)

- C. **Shared Responsibility.** If there exists a violation of the terms of this Agreement (including, without limitation, the provisions relating to compliance with the Code), and it cannot be determined whose Attachment has caused such violation, then the parties will work together to minimize the cost of correcting any such deficiencies. Each party will bear its respective Costs of Transferring its Attachments, and shall share equally in any other actual and documented Costs associated with correcting the violation; provided, however, that if a party can modify its Attachments so that they no longer are a cause of the violation or deficiency, then such party may elect to make such modification instead of otherwise sharing in such Costs. Such a modification shall not relieve a party from sharing in such actual and documented Costs if the party making the modification could still have been a cause of any deficiency that remains. The parties shall work together to correct such Non-Compliant Attachments within ninety (90) days of one party's notification to the other (unless Owner reasonably determines that safety, emergency or service restoration efforts require Licensee to take corrective action within a shorter time period.)
- D. **Third Parties.** If one or more third party attachee(s) caused the violation, then the Owner will make reasonable effort, consistent with its attachment agreement(s) with such third party attachee(s), to require such third party attachee(s) to pay the actual and documented corrective Costs incurred by all who have Attachments on the pole, including the Licensee, Owner and any other attachees.
- E. **Corrective Measures – Dispute Resolution and Enforcement.** If Licensee fails to correct a Non-Compliant Attachment within the time frames specified in this Article, such Attachment shall be immediately subject to the dispute resolution and enforcement provision under Article XX.
- F. **Third Party Complaints.** Licensee shall address, in a commercially reasonable time period, any inquiries or complaints raised by persons other than Licensee or Owner or their employees, contractors, and agents with regard to or concerning Licensee's facilities that are attached to Owner's poles, or Licensee's right and obligations under this Agreement.

ARTICLE IX

MAINTENANCE OF POLES AND ATTACHMENTS

- A. **Obligation to Maintain Poles.** Except as herein otherwise expressly provided, each party shall, at its own expense, maintain its poles in a serviceable condition in accordance with the Code and shall reinforce or repair its own poles as they become known to be unserviceable.
- B. **Obligation to Maintain Attachments.** Except as herein otherwise expressly provided, each party at its own cost shall place, maintain, rearrange, transfer and remove its own Attachments, and shall at all times perform such work promptly and in such a manner as not to interfere with work or service being performed by the other party. Each party shall, at its own expense, at all times maintain all of its Attachments in safe condition,

thorough repair, and in accordance with the requirements of the Code. An Attachment is deemed to comply with Code if it complies with the minimum requirements of the Code in effect at the time the Attachment was placed, and nothing in this provision shall require either party to inspect existing Attachments and proactively bring them up to date with the current Code unless otherwise required by applicable law.

- C. **Obligation to Train and Warn.** The Licensee shall insure that its employees are properly trained in climbing on and working on Owner's poles safely and that they are aware of the dangers inherent in making contact with the electrical conductors or electrical equipment of Power Distributor. Without limitation of the foregoing, the Telephone Company shall prohibit its employees from handling energized lines of the Power Distributor, including lines attached to Secondary Poles.

- D. **No Warranty of Condition.** Notwithstanding the maintenance obligations of Owner under Sections A and B, above, both parties disclaim any warranty or representation regarding the condition and safety of their poles. To the extent permitted by law, each party expressly assumes responsibility for determining the condition of all poles to be climbed or otherwise worked on by its employees whether for the placement of Attachments, maintaining or Rearranging Attachments, or for other reasons. Except for performing Transfer work from unserviceable poles to replacement poles and for replacing poles pursuant to Section VII.C and Section VII.D, a Licensee shall not permit its employees to work on poles that are unserviceable until the Owner has corrected the unserviceable condition or has determined that the pole is serviceable.

ARTICLE X DIVISION OF COSTS

- A. The cost of establishing a new Joint Use Pole line shall be borne by the parties in accordance with the following:
 - 1. A Standard Joint Use Pole, or smaller, shall be erected at the sole Cost of the Owner.
 - 2. In the case of a pole larger than the Standard Joint Use Pole required by either party, the party requiring the extra height and/or class shall pay for the additional Cost of the pole. If Owner adds features or betterments not required by Licensee, Owner shall pay the Costs associated with such features or betterments.
 - 3. In the case of a pole larger than the Standard Joint Use Pole where the additional height and/or strength required is for the purpose of both parties, the Cost of the pole shall be shared by both parties, with Owner being responsible for the cost of a Standard Joint Use Pole and Licensee being responsible for one half of the Cost of the additional height or strength.
 - 4. In the case of a pole larger or stronger than the Standard Joint Use Pole, where height or strength in addition to that needed for the purpose of either or both parties hereto is necessary in order to meet the requirements of the Code, a public

authority or of property owners, the Cost of the additional height or strength shall be paid by the Owner.

- B. The cost of establishing Joint Use on existing pole lines or modifying existing Joint Use Pole lines shall be borne by the parties in accordance with the following:
1. For placement of intermediate poles for the Licensee, the Licensee shall pay the actual and documented total Cost of installing the new pole. Each Party shall be responsible for attaching its own facilities.
 2. For replacement of non-defective poles for the Licensee, Costs shall be governed by Articles III, VI and VIII, as applicable.
 3. For replacement of non-defective poles for the Owner, at the mutual request of both parties, or due to the requirements of the Code, a public authority or of property owners, Section A above shall govern unless the situation is otherwise specifically governed by Articles III, VI or VIII.
 4. For replacement of existing defective poles, Costs shall be governed by Section A above.
- C. Except as otherwise specifically provided herein, each party shall bear the costs of placement, transfer, and rearrangement of its own Attachments, place guys and anchors to sustain any unbalanced loads caused by its Attachments, and perform any tree trimming or cutting incident thereto.
- D. When less costly Rearrangements can be performed by either party which would defer the cost of replacing a pole, such Rearrangements may be made and the Cost will be borne by the party requesting pole replacement; provided, however, that the final decision of whether or not to replace a pole shall remain with the Owner of the pole.
- E. Any payments made by the Licensee under the foregoing provisions of this Article shall not entitle the Licensee to ownership of any part of said pole.
- F. Each party shall bear the Cost of repairing damages to the other party's facilities occasioned by its improper construction practices or its negligence.
- G. Either party may request documentation supporting any demand for payment.

ARTICLE XI

COORDINATION AND PLANNING

- A. **Generally.** At least once per quarter, at the written request of either party and mutually agreed upon, management representatives of each party with responsibility for overseeing the party's overhead plant and related facilities subject to this Agreement shall discuss the status of any operational issues that have arisen between the parties under this

Agreement. The intent of these discussions is to encourage greater planning and coordination of operational issues between the parties.

- B. **Annual Planning Meeting.** On or before October 1 of each year that this Agreement is in effect, at the written request of either party, local management representatives of each party with responsibility for overseeing the party's overhead plant and related facilities subject to this Agreement shall mutually agree to meet or correspond via electronic mail, U.S. Mail or any other means mutually agreed upon and confer to exchange information concerning pole relocation and replacement work during the upcoming calendar year. The parties shall exchange estimates (to the extent they are available) of the number of poles that each party reasonably expects to relocate or replace during the next calendar year along with the time frame for such relocations or replacements (as to each party, a "Work Plan"). Additional meetings, correspondence via electronic mail, U.S. Mail or any other means mutually agreed upon may be scheduled at the request of either party if necessary to facilitate pole relocation/replacement work and transfers.
- C. **Existing Delinquent Transfers or Non-Compliant Attachments.** Within one-hundred-twenty (120) days after execution of this Agreement, representatives from both parties will meet at a mutually agreeable location or correspond via electronic mail, U.S. Mail or other means mutually agreed upon to discuss Delinquent Transfers and Non-Compliant Attachments in existence at the time of contract execution. The parties shall then cooperate to establish a reasonable deadline for completion of work required to remedy the Delinquent Transfers and Non-Compliant Attachments. Reasonable extensions of time should not be denied if they would not result in material prejudice to the party requesting the work, and if the other party performing the work is acting with reasonable diligence to complete the work. If a party fails to remedy a Delinquent Transfer or Non-Compliant Attachment by the agreed upon deadline, or if that party disputes that it is responsible for performing the work, the other party may initiate the upper management escalation procedure set forth in Article XX. If any delinquent transfers and/or Non-Compliant Attachments are in existence at the time of contract execution but not addressed within the meeting, or through correspondence via electronic mail, U.S. Mail or other means mutually agreed upon between the parties described above, then at the election of the Owner, each such delinquent transfer and each such Non-Compliant Attachment may be addressed utilizing the process outlined above or may be resubmitted to Licensee pursuant to the provisions of this Agreement.
- D. **Coordination of Complex Work.** When a party desires to change or upgrade its system which causes it to exceed its Standard Space Allocation and to substantially relocate a joint use route for its own operational requirements, it shall notify the other party in writing and, within sixty (60) days of receipt of such notice, the parties shall discuss and exchange the information necessary to determine if the desired changes in construction can be conducted in a cost-efficient manner for both parties.
- E. **Cost Sharing for Complex Work.** For any work required pursuant to Section D, the cost of establishing such joint use route shall be mutually agreed upon by the parties hereto; provided, however that nothing in this Section E shall prevent the Owner from relocating its attachments at its own cost and expense if the parties fail to reach

agreement on cost sharing pursuant to this Section E. In this situation, the Owner shall abandon the subject poles to the Licensee in accordance with Article XIII.

- F. **Ownership of New Poles.** In any case, ownership of any new poles placed pursuant to this Article shall remain with the owner of the poles that were replaced, unless otherwise agreed to by the parties in writing.
- G. **Applicability to Road Widening and Related Projects.** The provisions of Sections C and D of Article shall not apply to road move projects prompted by a governmental entity or agency.

ARTICLE XII

ANCHORS

Anchors required by either party shall be placed by the party requiring the anchor at its own expense. Notwithstanding the forgoing, the parties may mutually consent to install anchors to be used jointly by both parties upon Cost sharing or other arrangements agreed upon by the parties. Guy leads and anchors will possess the strength required by the Code, will be installed and used in accordance with the reasonable requirements of the Owner and will follow the specifications herein:

1. Following the Commencement Date of this Agreement, all anchors and guys shall be installed prior to the installation of Licensee's messenger wires or cables. Licensee's guy lead must be of sufficient length and strength to accommodate loads applied by the Attachments. No anchor installed following the Commencement Date shall be placed within 1 foot of any existing anchor. Guy markers meeting Licensee's specifications shall be installed on every newly placed guy attached to Owner's pole after the Commencement Date.
2. Each party shall install and maintain its own guy wires. Licensee shall not attach any down guy to Owner's anchors or to other attaching parties' anchors without prior written permission from such Owner or other party as the case may be, such permission shall not be unreasonably withheld.
3. All down guys, head guys or messenger dead ends installed by Licensee shall be attached to the pole by the use of "through" bolts. Under no circumstances shall Licensee install down guys, head guys or messenger dead ends by means of encircling wooden poles with such Attachments.

ARTICLE XIII

ABANDONMENT OF JOINT USE POLES

- A. **Abandonment of Poles by Owner to Licensee.** Anytime Owner desires to abandon any Joint Use Pole, it shall give Licensee at least sixty (60) days' written notice. If, at the expiration of such period, Owner and any third parties shall have no Attachments on such pole but Licensee shall not have removed all of its Attachments therefrom, Owner may

transfer ownership of such pole to Licensee by sending written notification confirming the transfer in the form attached hereto as Exhibit E. The pole shall thereupon become the property of Licensee, and Licensee shall pay the Owner an amount equal to the original cost of the abandoned pole less depreciation (or, if the original cost of the pole is not available, the cost of the pole being removed shall be determined by the current installed Cost of an equivalent pole depreciated using a thirty (30) year straight line depreciation schedule by the number of years since the Pole was installed). Licensee shall also save harmless the former Owner from all obligations, liabilities, damages, costs, expenses, or charges incurred thereafter because of or arising out of the presence, location or condition of such pole or any of Licensee's Attachments thereon, unless such liabilities or damages arise from the gross negligence or intentional acts or omissions of the former Owner.

- B. **Abandonment by Licensee.** Licensee may, at any time, abandon the use of a Joint Use Pole by removing any and all Attachments it may have on said pole. No refund of adjustment fees shall be due Licensee on account of such abandonment, and following such removal, no Attachment shall again be made to such pole without complying with the requirements of Article VI.

ARTICLE XIV

ADJUSTMENT PAYMENTS

- A. **Payments.** Payments shall cover rentals for the calendar year and shall be based upon the number of poles that are occupied on the first day of December of the preceeding year. On or around December 1, 2011 and December 1st of each year thereafter during the time this Agreement is in effect, the parties shall cooperate in creating a schedule of pole rental showing the number of Joint Use Poles which the other party occupies as Licensee. The party owning the greater number of Joint Use Poles shall render to the other party a net rental billing. Such billing shall reflect the number of Joint Use Poles owned by each party, multiplied by the then current annual pole rental rate as set forth in Exhibit D, with the net difference being the actual amount billed.
- B. **HWI Adjustment.** The rates set forth in Exhibit D shall be effective as of January 1, 2011, and shall remain in effect through December 31, 2011 (the "Base Rate"). The Base Rate shall be escalated, effective January 1, 2013, and annually thereafter, based upon the percentage change in the Handy-Whitman Index (South Atlantic Region, FERC Account 364, Line 44, Poles, Towers and Fixtures)("HWI") between the two preceding July 1 index numbers.
- C. **Periodic Review of Payment Rate.** No sooner than five years from the Commencement Date of this Agreement and in intervals no more frequent than every five years thereafter, the annual pole rental rate and calculation methodology set forth in Exhibit D shall be subject to joint review and revision upon the written request of either party sent via certified mail to the operational and legal addresses referenced in Article XVIII. If, within ninety (90) days after the receipt of such request by either party, the parties fail to agree to a revision of such rate and calculation methodology, then the payment per pole shall be established at the

then existing Base Rate, escalated by the HWI for one year. The following year, the payment per pole shall be an amount equal to 40% of the then average in plant cost factors of providing and maintaining the Joint Use Poles covered by this Agreement for the party owning the greater number of Joint Use Poles covered by this Agreement. The new rate shall thereafter be adjusted in accordance with Section B, above, until again revised pursuant to this Section.

- D. **Other Work.** Upon completion of any work done by one party for which payment is due from the other party, the party performing the work shall present to the other party, within ninety (90) days after the completion of such work (or, in the discretion of the Owner, the completion of all related work, including third party work), a bill showing the amount due and a breakdown of the Costs. The parties will cooperate to ensure that both are provided the necessary information to certify that the bills are correct.
- E. **Payment and Disputed Charges.** The adjustment payment herein provided for, or any other bill for payment of work, shall be paid within forty-five (45) days after the bill has been received, unless said party disputes the amount billed. In case of such dispute, either party may escalate the matter in accordance with Article XX. Any undisputed amounts shall be paid within the forty-five (45) day time period.
- F. **Late Charges.** Payments not paid within the specified time period shall accrue late payment charges of one and one-half percent (1.5%) per month or the maximum amount permitted by applicable law, whichever is less.

ARTICLE XV

INVENTORY OF ATTACHMENTS

- A. **Initial Inventory.** Upon request of either party at any time after the execution of this Agreement, an actual inventory of Attachments shall be made jointly by representatives of the parties or by a third party chosen by the parties (the "Initial Inventory"). If there is any difference in (a) the number of Attachments found by the inventory and (b) the number arrived at by tabulating those invoiced and reported under this Agreement and any predecessor agreements between the parties, correction will be made by retroactive billing for any Attachments identified as being responsible for the difference. The remaining difference will be billed based on the presumption that the attachment rate to poles was constant from year to year. The total unauthorized count will be divided by the number of years since the last inventory, or five years, whichever is shorter and then each year's presumed unauthorized attachment pole count will be added to the prior year's presumed unauthorized pole attachment count and backbilled at the rate in effect for that year. At the election of the party owning the greater number of poles and so long as there is not a material and reasonable dispute between the parties concerning the results of such inventory, any inventory conducted within two (2) years prior to the Commencement Date may be used as the initial inventory, and in such event, the initial inventory shall be deemed to have been completed as of the Commencement Date.

- B. **Five Year Pole Inventories.** Five (5) years after the Initial Inventory and at intervals no more frequent than every five (5) years thereafter (unless otherwise mutually agreed by the parties), an actual inventory of Attachments shall be made jointly by representatives of the parties or by a third party chosen by both parties. If there is any difference in the number of Attachments found by subsequent inventories and the number invoiced in the corresponding billing, correction will be made by retroactive billing for any Attachments identified as being responsible for the difference, and any remaining difference will be spread evenly over the years since the last inventory and billing adjusted accordingly using the rate in effect for each of the respective years. Back-billing of unauthorized attachments shall not exceed five years.
- C. **Inventory Methodologies.** In lieu of the foregoing, the parties may mutually agree to alternative inventory procedures.
- D. **Cost Sharing.** Each party shall equally share the cost of making such inventory of attachments.

ARTICLE XVI

DEFAULTS

Notwithstanding any other provision in this Agreement to the contrary, if either party shall fail to discharge any of its obligations under this Agreement and such failure shall continue for sixty (60) days after notice thereof in writing from the other party sent via certified mail or Overnight Mail, signature required to the operational and legal addresses referenced in Article XVIII, all rights of the party in default hereunder, pertaining to making Attachments to additional poles of the other, shall be suspended by sending written notification of the suspension to the defaulting party via certified mail or Overnight Mail, signature required to the Article XVIII addresses. If such default shall continue for a period of ninety (90) days after receipt of the notice of suspension, the non-defaulting party may, by sending written notification to the defaulting party via certified mail to the Article XVIII addresses, terminate the right of both parties to attach to additional poles of the other party. Any termination of the right of the parties to attach to additional poles of the other party shall not abrogate or terminate the right of either party to attach to existing Joint Use Poles or to maintain and Transfer existing Attachments to replaced or relocated poles. All such Attachments shall continue thereafter to be maintained pursuant to and in accordance with the terms of this Agreement, which Agreement shall, so long as said Attachments are continued, remain in full force and effect solely and only for the purpose of governing and controlling the rights and obligations of the parties with respect to such Attachments.

ARTICLE XVII

LIABILITY AND DAMAGES

- A. **General Indemnification.** Licensee shall indemnify, protect, and save Owner harmless from and against any and all liabilities, claims, demands and costs incurred by reason of (a) damage to property, (b) injury to or death of persons, including payments made under any workers' compensation law or under any plan for employees' disability and death benefits, and

(c) any slander, defamation, or infringement claim; provided that the foregoing liabilities, claims, demands and costs arise out of or are caused by the Licensee's use of or work on Owner's facilities including, without limitation, the erection, maintenance, presence, use, removal, or abandonment of Licensee's attachments, or by the proximity of the respective cables, wires, apparatus and appliances of the Licensee to any of the facilities belonging to the Owner or to other parties jointly using the Owner's poles, or arise out of or are caused by any act of Licensee or its employees, agents, contractors and their subcontractors on or in the vicinity of Owner's poles. The obligation of indemnity shall include, without limitation, any attorneys' and/or legal fees or costs. , but under no circumstances shall the licensee be liable to Licensor for any incidental, special or consequential damages (such as lost profits or lost business opportunities), punitive or exemplary damages.

B. **Survival and Interpretation.** The indemnification provisions of this Agreement (whether contained in this Article or otherwise) shall survive termination of this Agreement and shall be enforced to the fullest extent permitted by applicable law. Nothing in this Agreement shall waive or in any way limit any limitations of liability or privileges or immunities available to governmental utility companies under applicable law.

ARTICLE XVIII

SERVICE OF NOTICES

A. Unless otherwise provided in this Agreement, it is expressly agreed and understood between Owner and Licensee that any Notice required to be given by either party to the other pursuant to this Agreement shall be in writing and sent by US Mail, facsimile or by recognized national overnight delivery service and shall be deemed received upon actual delivery or refusal of delivery as evidenced by the records of the parties, the US Postal Service or delivery service as the case may be.

B. Notices shall be sent addressed as follows:

Power Distributor:

or to such other address as either party may designate by Notice to the other party from time to time in accordance with the terms of this Article.

- C. If at any time, and from time to time, both parties are members of NJUNS and maintain the capability of receiving messages from NJUNS, either party may, upon prior written notice to the other, elect to utilize such capability to provide notices under this Agreement for any matter relating to the operation and maintenance of Joint Use Poles; provided that giving notice via NJUNS does not satisfy the obligation to send a notice via certified mail if such notice is required by this Agreement. If the parties are using NJUNS, the parties may use NJUNS messaging formats in lieu of Exhibits B and C.

ARTICLE XIX

TERM AND TERMINATION OF AGREEMENT

Subject to Article XVI, this Agreement shall continue in force and effect for a period of five (5) years from and after the Commencement Date. After the initial five (5) year term, the Agreement shall automatically extend on the same terms and conditions for successive five year terms until terminated by either party providing written notice at least one hundred eighty (180) days prior to the end of the pending term. Termination shall thereafter become effective at the end of the pending term. Termination of the Agreement shall mean termination of the right of the parties to place Attachments on additional poles owned by the other party. Termination of the Agreement shall not, however, abrogate or terminate the right of either party to attach to existing Joint Use Poles or to maintain and Transfer existing Attachments to replaced or relocated poles. All such Attachments shall continue thereafter to be maintained pursuant to and in accordance with the terms of this Agreement, which Agreement shall, so long as said Attachments are continued, remain in full force and effect solely and only for the purpose of governing and controlling the rights and obligations of the parties with respect to such Attachments.

ARTICLE XX

DISPUTE RESOLUTION

- A. **Good Faith Participation.** Prior to the initiation of any litigation (except litigation arising following default and termination of this Agreement, which litigation may proceed without regard to this Article), the parties shall in good faith attempt to settle any dispute arising out of or relating to this Agreement through the upper management escalation process set forth herein. Good faith participation in these processes shall be a condition precedent to any litigation. All negotiations pursuant to this Article shall be confidential and shall be treated as compromise and settlement negotiations for purposes of the Federal Rules of Evidence and any state's rules of evidence.
- B. **Upper Management Escalation.** To initiate the dispute resolution process, either party shall give the other party written notice, via certified mail or overnight mail with signature required to the operational and legal addresses referenced in Article XVII.B., of any dispute not resolved in the normal course of business. The dispute shall be escalated to upper management and, thereafter, representatives of both parties with authority to settle the dispute shall meet at a mutually acceptable time and place or hold a conference call within sixty (60) days after receipt of such notice, and thereafter as often as reasonably deemed necessary, to exchange relevant information and attempt to resolve the dispute. If the matter has not been resolved within ninety (90) days of receipt of the disputing party's notice, or if the Parties fail to meet within sixty (60) days, either party may initiate litigation. A dispute regarding Delinquent Transfers shall not be eligible for upper management escalation as set forth in this provision unless the transfer request has been processed in the ordinary course through methods as required by Article VII.
- C. **Enforcement.** The parties regard the aforesaid obligation to escalate to upper management as an essential and material provision of this Agreement and one that is legally binding upon them. In case of a violation of such obligation by either party, the

other may seek specific enforcement of such obligation in the courts having jurisdiction hereunder. Notwithstanding the foregoing, in no event shall the obligations under this Article XX operate to prevent the initiation of litigation within ninety (90) days prior to the running of the applicable statute of limitation or statute of repose or the timely prosecution or defense (as applicable) of such litigation.

D. **Renegotiation – Failure of Transfer and Code Compliance Processes.** In the event that the upper management escalation procedure (exclusive of litigation) fails to resolve, to the reasonable satisfaction of both parties, ten (10) or more disputes concerning Delinquent Transfers or Non-Compliant Attachments within a calendar year, then the “Transfer and Code Compliance Provision” under Section E, immediately below, shall become effective, and either party may request (via certified mail or overnight mail with signature required to the operational and legal addresses referenced in Article XVIII.B.) that the parties meet to discuss an amendment to this Agreement setting forth an alternative method for addressing and resolving Delinquent Transfers and/or Non-Compliant Attachments. In the event that the dispute resolution process is initiated in one calendar year but the time at which parties have failed to reach resolution falls in the next calendar year, such dispute shall be counted in the earlier calendar year.

1. For purposes of this Section D, the parties intend that a dispute will encompass, at a minimum, all related Transfers and Non-Compliant Attachments. A party may not circumvent the spirit of this provision by initiating separate disputes for related items (e.g., initiating separate disputes for each pole in a line where a Transfer is pending, or for individual Non-Complaint Attachments placed in a line). Additionally, disputes that are not resolved because an outside party and/or other attacher is the cause, in whole or in part, of the alleged problem, shall not be included in calculating the number of unresolved disputes pursuant to this Section D.

2. If the parties are unable to agree upon the terms of an amendment within one-hundred-twenty (120) days of receipt of the written request, or within a reasonable extended time period agreed to by the parties, either party may, in addition to pursuing any legal remedies it may have, terminate this Agreement by sending written notice to the other party via certified mail or overnight mail with signature required to the operational and legal addresses referenced in Article XVIII.B. Termination shall become effective one-hundred-eighty (180) days from receipt of the termination notice, and the rights and obligations of the parties following termination shall be governed by Article XIX.

E. **Transfer and Code Compliance Provision.** Upon this provision becoming effective in accordance with the requirements of Section D, immediately above, as an additional remedy to ensure timely handling of Delinquent Transfers and Non-Compliant Attachments, each party may bill the other party an additional amount equal to the then annual Base Rate per pole for each Delinquent Transfer and Non-Compliant Attachment older than ninety (90) days in existence on June 30 and December 31 of each year. Bills issued pursuant to this Section shall be separate and apart from annual rental invoices, and shall be issued within thirty (30) days of the aforementioned dates. Before a party

can take advantage of the billing provision set forth in this Section, the parties must have been using NJUNS (or a similar formal electronic notification system agreed to by the parties) for one year and must have participated in quarterly meetings for one year in accordance with Article XI.A. (provided, however, that such meetings may be cancelled by mutual agreement of the parties and provided further, that if one party fails to meet with the other party upon the other party's reasonable request, such failure to meet shall not prevent this Section from become effective). Participation in NJUNS (or similar system) and in quarterly meetings that occur prior to this provision becoming effective shall be counted in determining the effective date of the bill provision set forth in this Section.

ARTICLE XXI

RIGHTS OF OTHER PARTIES

- A. If either party hereto has, prior to the execution of this Agreement, conferred upon others not parties to this Agreement (outside parties), by contract or otherwise, rights or privileges to attach to any of its poles covered by this Agreement, nothing herein contained shall be construed as affecting said rights or privileges with respect to existing attachments of such outside parties, which Attachments shall continue in accordance with the present practice; all future Attachments of such outside parties shall be in accordance with the requirements of Section B, below, except where such outside parties have by agreements entered into prior to the execution of this Agreement acquired enforceable rights or privileges to make attachments which do not conform to the requirements of this Agreement. Owner shall derive all of the revenue accruing from such outside parties. Any contractual rights or privileges of outside parties recognized in this paragraph shall include renewals of or extensions of the term (period) of such contracts.

- B. If either party hereto desires to confer upon others not parties to this Agreement (outside parties), by contract or otherwise, rights or privileges to attach to any of its poles covered by this Agreement, it shall have the right to do so, provided all such Attachments of such outside parties are made in accordance with the following: (1) such Attachments shall be maintained in conformity with the requirements of the Code, and (2) to the extent allowed by law, such Attachments shall not be located within space where Licensee holds a prior right to make or maintain its Attachments. Owner shall derive all of the revenue accruing from such outside parties.

- C. With respect to any rights and privileges granted under this Article to outside parties, Licensee shall not be required to transfer or rearrange its Attachments to accommodate an outside party until Licensee receives payment for the costs associated with such changes, unless Licensee is otherwise required to transfer or rearrange its facilities at its own expense pursuant to the terms of this Agreement.

ARTICLE XXII

ASSIGNMENT OF RIGHTS

Neither party hereto shall assign or otherwise transfer this Agreement, in whole or in part, without the written consent of the other party, which shall not be unreasonably withheld; provided that either party shall have the right without such consent to:

1. Mortgage any or all of its property, rights, privileges and franchises.
2. To lease or transfer any of them to another corporation organized for the purpose of conducting a business of the same general character as that of such party; or
3. To enter into any merger or consolidation or other reorganization: and, in case of the foreclosure of such mortgage, as in case of such lease, transfer, merger or consolidation its rights and obligations hereunder shall pass to such successors and assigns; and provided, further that subject to all of the terms and conditions of this Agreement, either party may without such consent permit any corporation conducting a business of the same general character as that of such party, with which it is affiliated or physically connected, the rights and privileges of this Agreement in the conduct of its said business.

ARTICLE XXIII

SUPPLEMENTAL ROUTINES AND PRACTICES

Nothing in the foregoing shall preclude the parties to this Agreement from preparing such supplemental operating routines or working practices as they mutually agree or as necessary or desirable to effectively administer the provisions of this Agreement.

The parties expressly agree to develop such coordination agreements as they mutually agree are necessary and feasible to assist both parties in effectuating this Agreement.

ARTICLE XXIV

WAIVER OF TERMS OR CONDITIONS

The failure of either party to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

ARTICLE XXV

EXISTING AGREEMENTS

Any existing agreement between the parties hereto for the joint use of poles upon a rental basis within the territory covered by this Agreement is, by mutual consent, hereby abrogated and annulled; provided that unfulfilled obligations of the parties arising under such agreement prior to

the Commencement Date (such as claims for indemnification), unless expressly waived, shall survive termination of the prior agreement.

ARTICLE XXVI

PAYMENT OF TAXES

Each party shall pay all taxes and assessments lawfully levied on its own property upon said jointly used poles. Taxes and the assessments, which are levied on upon its jointly used poles, shall be paid by Owner thereof, but any tax (except income taxes), fee, or charge levied on Owner's jointly used poles solely because of their use by Licensee shall be paid by Licensee.

ARTICLE XXVII

FORCE MAJEURE

Neither party shall be liable for any delay or failure in performance of any part of this Agreement resulting from acts of God, acts of civil or military authority, embargoes, epidemics, war, terrorist acts, riots, insurrections, fires, explosions, earthquakes, nuclear accidents, floods, power blackouts, or unusually severe weather. In the event of any such excused delay in the performance of a party's obligations under this Agreement, the due date for the performance of the original obligation(s) shall be extended by a term equal to the time lost by reason of the delay or by an extended time period mutually agreed to by the parties if more time is needed to complete the work.

ARTICLE XXVIII

NO WARRANTY OF RECORD INFORMATION

From time to time, one party may obtain from the other party records and other information relating to outside plant facilities. Each party acknowledges that such records and information provided may not reflect field conditions and that physical inspection is necessary to verify presence and condition of outside plant facilities and right-of-way.

ARTICLE XXIX

NO EFFECT ON FRANCHISE RIGHTS

Notwithstanding anything elsewhere herein provided, nothing contained in this Agreement shall abrogate, limit or affect any obligation of either party under any franchise granted to either party by any city or other local governmental unit that owns, operates or is in any way affiliated with Power Distributor, or by any predecessor of any such governmental unit or franchising authority.

ARTICLE XXX

SOURCE OF PAYMENTS

The obligations of the Power Distributor hereunder shall be payable solely from the funds of the electric system of the Power Distributor.

ARTICLE XXXI

MISCELLANEOUS PROVISIONS

- A. The Licensee of a Joint Use Pole shall acquire no ownership of or interest in such a pole, the Licensee's rights therein being limited to the right of compliance with terms and condition contained in this Agreement.
- B. Except only insofar as the express terms of this Agreement make the rights hereunder available to the successors or assigns of the parties hereto, the provisions of this Agreement shall not be interpreted to confer any right of action at law or in equity upon any parties except the parties hereto.
- C. Neither party shall, by mere lapse of time, be deemed to have waived any breach by the other party of any terms or provisions of this Agreement. The waiver by either party of any such breach shall not be construed as a waiver of subsequent breaches or as a continuing waiver of such breach.
- D. Nothing contained in this Agreement, or in any amendment or supplement thereto, or inferable here from shall be deemed or constructed to (i) make either party the agent, servant, employee, joint venture, associate, or partner of the other party, or (ii) create any partnership, joint venture or other affiliation or association between the parties. The parties hereto are and shall remain independent contractors. Nothing herein shall be deemed to establish a partnership, joint venture, or agency relationship between the parties. Neither party shall have the right to obligate or bind the other party in any manner to any third party.
- E. Each party represents that it has the full power and authority to enter into this Agreement and to convey the rights herein conveyed.
- F. This Agreement is deemed executed in and shall be construed under the laws of the State of Kentucky.
- G. Within this Agreement, words in the singular number shall be held and construed to include the plural, unless the context otherwise requires. Titles appearing at the beginning of any subdivisions hereof are for convenience only, do not constitute any part of such subdivisions, and shall be disregarded in construing the language contained in such subdivisions. The use of the words "herein", "hereof", "hereunder" and other similar compounds of the word "here" shall, unless the context dictates otherwise, refer to this entire agreement and not to any particular paragraph or provision. The term "person" and words importing persons as used in this Agreement shall include firms,

associations, partnerships (including limited partnerships), limited liability companies, joint ventures, trusts, corporations and other legal entities, including public or governmental bodies, agencies or instrumentalities, as well as natural persons.

IN WITNESS WHEREOF, the parties hereto, have caused these presents to be executed in duplicate, and signatures notarized thereto by the respective officers thereunto duly authorized, as of the Commencement Date.

HOUSING AUTHORITY OF LONDON
100 McFadden Lane
London, Kentucky 40741

This Agreement made and entered into this 1st day of July 1989, by and between the Housing Authority of London, hereinafter called the "Authority" and Contel Telephone of Kentucky, organized and existing under the laws of the State of Kentucky, hereinafter called the "Company".

Whereas, the Company proposes to furnish telephone service, delivery via cable to customers of the Authority and will need to erect and maintain aerial cables, wires and associated appliances throughout the area to be served and desires to attach such cables, wires and appliances to the buildings of the Authority; and

Whereas, the Authority is willing to permit, to the extent it may lawfully do so, the attachment of said cables, wires and appliances to its buildings where, in its judgement, such use will not interfere with its own service requirements, including considerations of economy and safety,

NOW, THEREFORE, in consideration of the mutual covenants, terms and conditions herein contained, the parties hereby mutually covenant and agree as follows:

1. The Company at its cost will install in a good and workmanlike manner, with proper materials and equipment, and in accordance with general plans mutually agreed upon by the parties hereto, a cable telephone service system, in order to provide adequate telephone service to tenants upon the premises requesting such service, and the Company further agrees that it will install telephone lead-in lines in such manner as to avoid any unnecessary, unsightly appearance to the Complex premises.

2. The Company agrees to idemnify and save harmless the Authority from any claim for damage to property of any kind or nature, or to persons, which may arise out of the exercise by the Company, its agents, or employees, of the right hereby granted.

3. Attachments by the Company to the buildings and fixtures of the Authority shall be made and maintained in accordance with the National Electrical Safety Code as now in effect or, as hereafter amended, at the sole expense of the Company.

4. Attachment of the lines to the buildings from the poles shall be installed in such manner to prevent sagging lines, and insofar as possible only one line shall be installed to each building. The Authority reserves the right to specify how the lines shall be attached to the buildings and the entrance to each unit.

IN WITNESS WHEREOF, the parties have caused these presents to be executed and their respective seals to be affixed by their duly authorized officers on the day and date first above written.

JOINT USE AGREEMENT

THIS AGREEMENT, made as of the 25th day of August, 2005, by and between Jackson Purchase Energy Corporation, a Kentucky corporation, hereinafter referred to as JPEC and Kentucky Alltel, Inc. organized under the laws of the Commonwealth of Kentucky, hereinafter referred to as Alltel.

WITNESSETH:

WHEREAS, in the areas in the Commonwealth of Kentucky served by both parties certain utility poles are presently used jointly by JPEC and Alltel, and

WHEREAS, the parties desire to continue such joint use and to use other poles jointly in the future, when and where such joint use will be of mutual advantage in meeting their respective service requirements; and

WHEREAS, because of changed conditions and experience gained, and to facilitate administration of joint use, the parties desire enter into a Joint Use Agreement giving due recognition to the fact that the comparative numbers of joint use poles owned by the parties, the respective space allocated to or used by the parties, the concern for the ability to provide reliable service, the relative positions of the parties on the poles all have a bearing on the contribution to be made by the parties both as to ownership and maintenance of joint use poles.

NOW, THEREFORE, in consideration of the premises and the mutual covenants herein contained, the parties hereto for themselves, their successors and assigns do hereby covenant and agree as follows

ARTICLE I
DEFINITIONS

For the purpose of this Agreement, the following terms when used herein shall have the following meanings:

- A. ATTACHMENTS are wires, cables, strands, materials or apparatuses affixed to a joint use pole now or hereafter used by either party in the construction, operation or maintenance of its plant.
- B. CHANGE IN CHARACTER OF CIRCUITS shall mean any change in either party's facilities that affects either loading on the pole or clearance between the facilities of the parties hereto.
- C. CODE means the National Electrical Safety Code, as it may be amended from time to time.
- D. DAYS shall mean calendar days.
- E. INJURIES include death, personal injury and property damage or destruction.
- F. JOINT USE is maintaining or specifically reserving space for the attachments of both parties on the same pole at the same time.
- G. JOINT USE POLE is a pole upon which space is provided under this Agreement for the attachments of both parties, whether such space is actually occupied by attachments or reserved therefore upon specific request.

- H. LICENSEE is the party having the right under this Agreement to make attachments to a joint use pole that the other party owns.
- I. OWNER is the party owning the joint use pole.
- J. POLE OR POLES includes the singular and plural.
- K. REARRANGING OF ATTACHMENTS is the moving of attachments from one position to another on a joint use pole.
- L. RESERVED, as applied to space on a pole, means unoccupied space provided and maintained by Owner, either for its own use or expressly for Licensee's exclusive use at Licensee's request.
- M. RIGHT OF WAY is the legal right to use the property of another.
- N. STANDARD JOINT USE POLE means a 40-foot, Class 4 treated pole that meets the requirements of the Code. The parties may agree to use a smaller than Class Four pole, but under no condition shall the standard joint use pole be less than the minimum requirements of the Code.
- O. STANDARD SPACE ALLOCATION means an allocation of sufficient space on a joint use pole for the use of each party taking into consideration requirements of the Code, and is more particularly defined as follows:
 - 1. For JPEC, the use of 10 feet of space on 45-foot poles, 8 feet of space on 40-foot poles, and 6 1/2 feet on 35-foot poles measured downward from the top of the pole
 - 2. For Alltel, the use of 2 feet of space on joint use poles, below the space of JPEC starting at the point that gives adequate Code separation on the pole. If, under the terms of this Agreement, Alltel uses a portion of JPEC's allocated space as measured from the top of the pole, Alltel agrees that its use is permissive and that JPEC shall have the undisputed use of its allocated space. Alltel agrees to move any such attachments within this allocated space at its own cost upon demand of JPEC. Similarly, if JPEC uses a portion of the Alltel 2-foot space, JPEC agrees that such use shall be permissive and agrees to move any such attachment within the 2-foot space upon request.
 - 3. The foregoing definition of a "normal joint use pole" is not intended to preclude the use of joint poles shorter or taller or of different strength than the normal joint use pole in location where it is mutually agreed such poles will meet the requirements of the parties hereto.
- P. TRANSFERRING OF ATTACHMENTS is the removing of attachments from one pole and placing the attachments upon another pole.

ARTICLE II

TERRITORY AND SCOPE OF AGREEMENT

This Agreement shall cover all poles of each of the parties now existing in joint use and those hereafter erected or acquired within the common operating areas served by the parties excepting poles which in the owner's judgment are necessary for its own sole use.

ARTICLE III
PERMISSION FOR JOINT USE

Subject to the terms and conditions of this Agreement, each party hereby permits joint use by the other party of any of its poles in accordance with the standard space allocation defined in Article I and the following:

- A. Allocated pole space may, without additional charge, be used by the party to which it is not allocated for the purpose of installing and maintaining street lighting, traffic signal systems, and vertical attachments (such as but not limited to ground wires, gang operated switch control rods and underground risers) if by the terms of the National Electrical Safety Code the proposed use is authorized and such use does not unreasonably interfere with the use being made by the party to which such space is allocated (such determination will be made solely by the party to which the space is allocated). If National Electrical Safety Code provisions cannot subsequently be met then billing for the required modifications will be as set forth in Appendix A.
- B. As long as the provisions of the National Electrical Safety Code are met, unallocated space may be used without additional charge by either party. If National Electrical Safety Code provisions cannot subsequently be met then billing for the required modifications will be as set forth in Appendix A.
- C. As long as the provisions of the National Electrical Safety Code in effect at the time the attachments were installed have been met, any joint use pole now in place shall be deemed satisfactory to both parties and adequate for its requirements whether or not the space allocations made herein have been observed.
- D. As long as the provisions of the National Electrical Safety Code are met, any pole hereafter made joint use shall thereupon be deemed satisfactory to Licensee and space allocations made herein have been observed.

ARTICLE IV
SPECIFICATIONS

The joint use of poles covered by this Agreement shall at all times be in conformity with all applicable provisions of law and with the minimum requirements of the National Electrical Safety Code in effect at the time the respective attachments are made, and with such additional requirements as may be mutually approved in writing by the parties.

ARTICLE V
RIGHT-OF-WAY AND LINE CLEARING

- A. The Owner and Licensee will cooperate as far as may be practicable in obtaining right-of-way for both parties. When a written easement is secured it shall be in sufficient detail for identification and recording, and shall be subject to inspection by the other party upon request. However, no guarantee is given by the Owner of permission from property owners, municipalities or others for the use of poles by the Licensee, and if objection is made thereto and the Licensee is unable to satisfactorily adjust the matter within a reasonable time, the Owner may at any time, upon notice in writing to the Licensee, require the Licensee to remove its attachments from the poles involved, and the Licensee shall, within ninety (90) days after receipt of said notice, remove its attachments from such poles at its sole expense. Should the Licensee fail to remove its

attachments as herein provided, the Owner may remove them at the Licensee's expense, without any liability whatever for such removal or the manner of making it, for which expense the Licensee shall reimburse the Owner on demand. The Owner shall provide a 20' right-of-way whenever possible. Nothing stated herein shall preclude the parties from mutually sharing the cost of right-of-way acquisition.

- B. Line clearing and trimming will be performed as follows:
1. When constructing a new joint use pole line the Owner shall cut, clear and trim a 20' right-of-way, if possible.
 2. In all other instances each party shall be responsible for its own initial and recurring trimming, clearing and cutting.

ARTICLE VI

PLACING, TRANSFERRING OR REARRANGING ATTACHMENTS

- A. Either party desiring to reserve space on any pole of the other not then designated as a joint use pole shall make written application therefore, specifying the pole involved, the number and kind of its attachments to be placed thereon and the character of the circuits to be used. Within the (30) days after the receipt of such application, the Owner shall notify the applicant in writing whether or not it is excluding said pole from joint use under the provisions of Article II. Upon receipt of notice from Owner that said pole is not excluded, and after completion of any required transferring or rearranging of attachments on said pole or any pole replacement as provided in Article VII, the applicant shall have the right to use said pole as Licensee in accordance with the terms and conditions of this Agreement. Notwithstanding the foregoing, attachments placed by either party on the other's pole without such application and approval shall subject said pole to the terms of this Agreement. In such case, Owner shall have the right to require Licensee to remove within ninety (90) days at its sole expense any such attachments on poles coming within the exceptions described in Article V. Should Licensee fail to remove such attachments, such failure shall constitute default according to Article XIV.
- B. Except as herein otherwise expressly provided, each party at its own expense shall place, maintain, rearrange, transfer and remove its own attachments, and shall at all times perform such work promptly and in such a manner as not to interfere with work or service being performed by the other party. Upon completion of work by the Owner that will necessitate transfer of the Licensee's attachments, the Owner shall provide written notice to the Licensee that such transfer must be completed within sixty (60) days. If such transfer of attachments is not completed within sixty (60) days, the old pole shall become the property of the Licensee, and the Licensee shall save harmless the former Owner of such pole from all obligations, liabilities, damages, costs, expenses, or charges incurred thereafter because of or arising out of the presence, location or condition of such pole or any attachment thereon, whether or not it is alleged that the former Owner was negligent or otherwise. Licensee shall pay the former Owner the present in-place value, as set forth in Appendix A, for said pole.

ARTICLE VII

ERECTING, REPLACING OR RELOCATING POLES

- A. Whenever any jointly used pole, or any pole about to be so used under the provisions of this Agreement, is insufficient in size or strength for the existing attachments and for the proposed immediate additional attachments thereon, the Owner shall, within sixty (60) days, replace such pole with a new pole of the necessary size and strength, and make such other changes in the existing pole line in which such pole is included, as may be made necessary by the replacement of such pole and the placing of the Licensee's circuits as proposed. By mutual Agreement, the time period may be shortened or extended.
- B. The parties recognize and agree that there are inherent dangers involved in the transmission and distribution of electricity. The parties agree that unforeseeable emergency conditions will exist from time to time. When due to accidents, storm damage, etc., it is necessary for the Licensee to replace the Owner's pole immediately to restore service to its customers or to eliminate a hazardous condition and the Owner cannot perform the work in time to meet the Licensee's requirements, Licensee may replace the Owner's pole. Licensee will make all of its required facility changes or transfers and will secure the old pole to the new pole so the Owner may make its transfers when feasible. Licensee shall bill the Owner the total cost of the new pole in accordance with Appendix B. Owner shall continue to own the old pole and shall be responsible for its removal, and the new pole will become the property of the original owner.
- C. Whenever it is necessary to change the location of a jointly used pole, by reason of any state, municipal or other governmental requirement, or the requirements of a property owner, the Owner shall, before making such change in location, give notice thereof in writing (except in cases of emergency) to the Licensee, specifying in such notice the time of such proposed relocation, and the Licensee shall within sixty (60) days, transfer its attachment to the pole at the new location.
- D. In any case where the parties hereto shall conclude arrangements for the joint use of any new poles to be erected, the ownership of such poles shall be determined by mutual agreement. The party then owning the lesser number of joint poles under this Agreement should be allowed the opportunity to promptly erect the new joint poles and be the owner thereof or if the party owning the lesser number of poles cannot install the poles in time to meet the service requirements of the party owning the greater number of poles, the party owning the greater number of poles may set the poles and may bill the other party the total cost of setting said poles in accordance with Appendix A. The party owning the lesser number of poles, if billed, becomes the owner of the new joint use poles.
- E. Whenever either party hereto is about to erect new poles, either as an additional pole line, as an extension of an existing pole line, or as the reconstruction of an existing pole line, it shall notify the other in writing at least thirty (30) days before beginning the work (short notice, including verbal notice subsequently confirmed in writing, may be given in cases of emergency) and shall submit with such notice its plan showing the proposed location and size of the new poles, and circuits it will use thereon. The other party shall, within fifteen (15) days after the receipt of such notice, reply in writing to the party erecting the new poles, stating whether such other party does, or does not, desire space on the said poles, and if it does desire space thereon, the character of

the circuits it desires to use and the amount of space it wishes to reserve. This notice of desire to establish joint use shall include detail plans of any changes in the plans of the other party that are desired in order to permit the establishment of joint use. If such other party and number of circuits and attachments are such that the owner does not wish to exclude the poles from poles suitable for the said joint use shall be erected in accordance with the provisions and the payment of costs as provided in this Agreement.

F. The costs of erecting joint poles coming under this Agreement, either as new pole lines, as extensions of existing pole lines, or to replace existing poles, either existing jointly used poles or poles not previously involved in joint use, shall be borne by the parties as follows:

1. Whenever operating and safety conditions prohibit Owner from replacing an existing pole that needs to be replaced, Licensee shall replace the pole and bill Owner in accordance with Appendix A times 1.25.
2. A normal joint pole, or a joint pole shorter and/or smaller than the normal pole, shall be erected at the sole expense of the Owner, except as provided in Section G of this Article.
3. In the case of a pole taller and/or stronger than the normal pole, the extra height and/or strength of which is due wholly to the Owner's requirements, shall be erected at the sole expense of the Owner.
4. In the case of a new pole taller and/or stronger than the normal pole, the extra height and/or strength of which is due wholly to the Licensee's requirements, the Licensee shall pay to the Owner the extra costs for the additional height and/or strength as set forth in Appendix A.
5. Where an existing jointly used pole is prematurely replaced by a new one solely for the benefit of the Licensee, the Licensee shall pay the Owner the present in-place value of the existing pole and costs of replacing or transferring all attachments in accordance with Appendix A and Appendix C, and the replaced pole shall be removed and retained by the Owner.
6. In the case of a new pole taller and/or stronger than the normal pole, the extra height and/or strength of which is due, to the requirements of both parties, the Licensee shall pay to the Owner a sum equal to one-half the excess height and/or strength as set forth in Appendix A, the rest of the cost of erecting such pole to be borne by the Owner.
7. In the case of a new pole taller and/or stronger than the normal pole, where height and/or strength in addition to that needed for the purpose of either or both of the parties hereto is necessary in order to meet the requirements of the code, public authority or of property owners, the excess cost of such pole due to such requirements shall be borne by the Owner.
8. If Licensee only requires the addition of a pole in an existing line because of span length or terrain, the Owner will furnish and erect said pole at the sole expense of the Licensee, and pole shall remain property of Owner. The charges shall be as set forth in Appendix A.
9. Where JPEC has a line that crosses an Alltel line and the provisions of the National Electrical Safety Code are met and Alltel desires to set a pole in its line and requests JPEC to attach to said pole, Alltel shall bear all initial and recurring costs of placing and maintaining said pole, except the cost of making and transferring JPEC attachments.

- G. In any case where a pole is erected hereunder to replace another pole solely because such other pole is not tall enough, or of the required strength, to provide adequately for the Licensee's requirements, or where such pole, whether it has space reserved for the Licensee's use or not, had at the time of its erection been pronounced by the Licensee as satisfactory and adequate for its requirements, the Licensee shall, upon erection of the new pole, pay to the Owner, in addition to any amounts payable by the Licensee under paragraphs 3, 4, or 5 of Section F of this Article, a sum equal to the present in-place value as set forth in Appendix A, for the pole which is replaced and the pole removed shall remain the property of the Owner.
- H. In any case where by mutual consent it is desirable to change the ownership of a pole and Licensee erects and owns a joint pole to replace an existing pole of the Owner (instead of the Owner doing so as it is contemplated by Section A of this Article) such Licensee shall pay to the Owner of the replaced pole a sum equal to the present in-place value, as set forth in Appendix A, for the pole which is replaced and the pole removed shall remain the property of the Owner and shall be removed by the Owner.

ARTICLE VIII

MAINTENANCE OF FACILITIES

- A. The Owner shall, at its own expense, maintain its joint use poles in a safe and serviceable condition and shall undertake any appropriate safety measures, including without limitation reasonable pole inspections. The Owner's responsibility for maintaining a safe and serviceable condition of its poles shall be in accordance with the requirements of the National Electrical Safety Code, and shall replace poles that become defective, in accordance with the provisions of Article VII.
- B. Each party shall, at its own expense, at all times maintain all of its attachments in safe condition, thorough repair, and in accordance with the requirements of the National Electrical Safety Code.
- C. The parties hereby agree that a cooperative approach will be taken in solving noise or inductance problems that may occur.

ARTICLE IX

ABANDONMENT OF JOINT USE POLES

- A. Anytime Owner desires to abandon any joint use pole, it shall give Licensee at least sixty (60) days written notice. If, at the expiration of such period, Owner shall have no attachments on such pole but Licensee shall not have removed all of its attachments therefrom, such pole shall thereupon become the property of Licensee, Licensee shall save harmless the former Owner from all obligations, liabilities, damages, costs, expenses, or charges incurred thereafter because of or arising out of the presence, location or condition of such pole or any attachment thereon, whether or not it is alleged that the former Owner was negligent or otherwise.
- B. Licensee may at any time abandon a joint use pole by removing therefrom all of its attachments, and giving due notice thereof in writing to Owner.

ARTICLE X

ADJUSTMENT PAYMENTS

- A. The following adjustment payments are applicable for all poles jointly used under this Agreement.
- I. For Alltel owned joint poles 35' and shorter, JPEC shall pay [REDACTED] per year each

2. For JPEC owned joint poles 35' and shorter, Alltel shall pay [REDACTED] per year each.
 3. For all poles, 40' and taller, regardless of ownership, the licensee shall pay the owner [REDACTED] per year each.
- B. Adjustment payments hereunder shall cover rentals accruing during the calendar year and shall be based on the number of poles on which space is occupied or reserved on the first day of December of the year in which the rentals accrue. Within thirty (30) days following such date, or as soon as practical thereafter, each party shall submit a written statement to the other party giving the number of poles on which space was occupied by or reserved for the party as of such date.
- C. The total adjustment payment due each party shall be determined by multiplying the poles owned and licensed by each party, by the adjustment payment.
1. The smaller total amount covered above shall be deducted from the larger amount and JPEC or Alltel, which ever shall owe the larger amount, shall pay to the other the difference between said two amounts as the net adjustment payment due for the year involved. Within thirty (30) days after the first day of January next, or as soon as practical thereafter, ensuing after the date of this Agreement, and within thirty (30) days after the first day of each January, or as soon as practical thereafter, during the time this Agreement shall be in effect, the party to which said adjustment payment is owed as of said first day of January, shall submit a written statement (the "Schedule of Pole Rentals") to the other party giving the correct amount owed by the other party.
 2. The adjustment payment herein provided for shall be paid within thirty (30) days after the bill has been submitted, unless said party disputes the amount of such bill within ten (10) days from receipt thereof. In case of such dispute, payment shall be made within thirty (30) days after the bill has been submitted of the amount that is admitted to be due; an agreement concerning the disputed amount shall be attempted with all reasonable dispatch by negotiation. Failing to reach any such agreement by negotiation, either party may make formal written demand on the other for the amount claimed to be due; and if payment thereof is not made within thirty (30) days, suit may be brought for the amount claimed.
- D. The rates set forth in Paragraph A above shall be effective as of January 1, 2005 and shall remain in effect through December 31, 2005 (the "Base Rate"). The Base Rate shall be escalated, effective January 1, 2006, and annually thereafter, based upon the previous annual Telephone Plant Index ("TPI") for poles for the region. If requested, JPEC shall provide Alltel with the documentation referred to in Paragraph C (1) above.

ARTICLE XI

INVENTORY OF ATTACHMENTS

At intervals not exceeding five (5) years, the parties shall conduct a field inventory of all attachments. If there is any difference in the number of attachments found by the inventory and the number arrived at by tabulating those reported, correction will be made by retroactive billing for any attachments identified as being responsible for the

difference, and any remaining difference will be spread evenly over the years since the last inventory and billing adjusted accordingly. Each party shall share equally the cost of making such inventory of attachments.

ARTICLE XII
JOINT ANCHORS

The Owner where practicable shall, upon request from Licensee, place anchors suitable for joint use upon consideration of the joint load and guy lead requirements. The cost of the anchor shall be shared, and will be billed, as set forth in Appendix A. Each party shall install its own guy wires.

ARTICLE XIII
GROUNDING AND BONDING

Grounding and bonding will at all times meet the requirements of the National Electrical Safety Code.

ARTICLE XIV
DEFAULTS

- A. If either party shall fail to discharge any of its obligations under this Agreement and such failure shall continue for thirty (30) days after notice thereof in writing from the other party, all rights of the party in default hereunder, pertaining to making attachments to additional poles of the other, shall be suspended. If such default shall continue for a period of ninety (90) days after such suspension, the other party may forthwith terminate the right of the defaulting party to attach to additional poles of the other party. Any such termination of the right to attach to such additional poles of the other by reason of any such default shall not abrogate or terminate the right of either party to attach to existing joint use poles or to maintain existing attachments, and all such attachments shall continue thereafter to be maintained pursuant to and in accordance with the terms of this Agreement, which Agreement shall, so long as such attachments are continued, remain in full force and effect solely and only for the purpose of governing and controlling the rights and obligations of the parties with respect to such attachments.
- B. In the event either party should fail to perform its obligations either during the term of this Agreement or after termination made in accordance with the terms of this Article or Article XIX or fail to properly maintain or promptly replace joint use poles thereto after sixty (60) days written notice from the other, the other party shall have the right, but not the obligation, to maintain such poles or to replace the same at the expense of the party so failing, and shall be fully indemnified for all expenses, costs and damages whatever in taking such action or the manner of taking it.

ARTICLE XV
LIABILITY AND DAMAGES

Either party hereto, to the fullest extent permitted by law, agrees to and shall indemnify and hold harmless the other Party from and against any and all claims, damages, losses and expenses, including but not limited to attorneys' fees, arising out of or resulting from the joint use of the poles, and or any acts or omissions under this Agreement.

The laws of the Commonwealth of Kentucky shall govern any interpretations regarding this Agreement or any activities arising hereunder. Any suit or cause of action brought to enforce the terms of regarding this Agreement which may arise between the parties shall be brought in a court of competent jurisdiction in McCracken Circuit Court of the United States District Court for the Western District of Kentucky.

ARTICLE XVI

INDEMNITY

- A. Statutory Indemnification – Each Company (collectively, the “First Party”) shall indemnify the other Company, its affiliates, and their respective directors, officers, employees, agents, and contractors, (collectively, the “Second Party”) from and against any and all loss or liability, including the costs of settlements, judgments, damages and direct expenses including reasonable attorneys fees, (including reasonable attorneys fees incurred in establishing a right to indemnify hereunder), from claims, demands, suits or causes of action (collectively, “Claims”), which may arise directly or indirectly out of a Claim brought against a Second Party by employees of the First Party, or other third parties, arising from or in any manner relating to injuries to or death of First Party’s employees, including but not limited to Claims based upon allegations of negligence of any Second Party, which may arise out of or be caused by the placement, presence, use or removal of the First Party’s Attachments or by their proximity to the Attachments of all parties on a Joint Use Pole or placed in rights of way, or by any act or omission of the First Party’s or the Second Party’s employees, agents or contractors on or in the vicinity of the Second Party’s Joint Use Poles or rights of way. It is understood and agreed that the indemnity provided for in this section is applicable to claims to which the First Party has or may have immunity under any Workmen's Compensation Law. The First Party agrees and acknowledges that by undertaking to indemnify Second Party under this section, the First Party is expressly undertaking indemnification liability by written contract. The First Party shall defend at its own expense, with counsel acceptable to the applicable Second Party, any suit or action brought against any Second Party based upon such Claims.
- B. Intellectual Property Indemnification – The First Party shall indemnify any Second Party from and against any and all loss or liability, including the costs of settlements, judgments, damages and direct expenses including reasonable attorneys fees, (including reasonable attorney's fees incurred in establishing a right to indemnify hereunder), from Claims alleging the infringement of any third party’s intellectual property rights (including without limitation copyright, trademark, patent or trade secret infringement), Claims alleging libel and slander, and Claims alleging unauthorized use of television or radio broadcast programs and other program materials, to the extent that any such Claims arise, directly or indirectly, from the manufacture, use or operation of the First Party’s facilities in combination with Joint Use Poles, rights of way or otherwise. The First Party shall defend at its own expense, with counsel acceptable to the applicable Second Party, any suit or action brought against any Second Party based upon such Claims.
- C. General Indemnification - Each Company (for purposes of this Article 16.3 only, an “Indemnitor”) shall indemnify the other Company, its affiliates and their respective directors, officers, employees agents and

contractors (for the purposes of this Section 16.3 only, each an "Indemnitee" and collectively the "Indemnitees") for any and all loss or liability, including without limitation (a) the costs of relocating poles resulting from a loss of right of way or property owner consents, (b) the costs of defending those rights and/or consents, (c) the costs of settlements, judgments, damages and direct expenses including reasonable attorneys fees, (including reasonable attorney's fees incurred in establishing a right to indemnify hereunder), from Claims, at law or in equity, whether based on statute or regulation or on theories of contract, tort, strict liability, or otherwise, which are brought by or on behalf of persons other than an Indemnitee, to the extent such Claims arise or in any manner relate to acts or omissions of the Indemnitor or the Indemnitor's employees, agents or contractors. Indemnitor shall defend at its own expense, with counsel acceptable to the applicable Indemnitee, any suit or action brought against any Indemnitee based upon such Claims.

- D. Duty to Cooperate - JPEC and Alltel shall promptly advise each other in writing of all Claims subject to indemnification as described more fully in Articles 16.1, 16.2 and 16.3. Copies of all accident reports and statements made to an insurance company by either party shall be made available to the other party upon request.
- E. The foregoing obligations of this Article shall survive the termination of this Agreement.

ARTICLE XVII
INSURANCE

A. The each Party shall obtain and maintain, in full force and effect at all times, during operations covered by this Agreement, such minimum insurance as will cover the obligations and liabilities of said Party, its agents, and its employees which may arise from the operations under this Agreement. Insurance shall have limits of not less than:

1) Commercial General Liability policy of minimum limits of:

| | |
|---|--------------------------------|
| General Aggregate | \$ 2,000,000 per policy period |
| Products/Completed Operations Aggregate | \$ 2,000,000 per policy period |
| Personal Injury/Advertising | \$ 2,000,000 per occurrence |
| Each Occurrence | \$ 2,000,000 per occurrence |
| Fire Legal Liability | \$ 50,000 any one fire |

B. The policy will be endorsed to show the above aggregate limits applying to "each" job site or, as an alternative, the General Aggregate will be increased to \$4,000,000 per policy period. Policy will also specifically state the coverage applies to all operations conducted by the respective Party, its employees, or agents on behalf of that Party's Corporation or subsidiary.

C. Where the performance of the work involves structural property, underground property, or blasting, each Party's Commercial General Liability insurance policy shall provide coverage to the insured for legal liability arising from operations under this Agreement for property damage:

1. arising out of blasting,
2. arising out of collapse of, or structural injury to, any building or structure or
3. To underground facilities and utilities.

D. Other general liability forms are acceptable in lieu of the Commercial General Liability Form.

1) Business Automobile Liability policy with minimum limits of:

| | |
|-----------------------|---------------------------|
| Bodily Injury | \$ 2,000,000 per accident |
| Property Damage | \$ 2,000,000 per accident |
| OR | |
| Combined Single Limit | \$ 2,000,000 per accident |

The policy will be issued using symbol "1 - any auto" coverage.

2) Workers Compensation:

Part 1 - Medical Benefits Statutory

Part 2 - Employer's Liability as indicated:

| | |
|---------------------------|--------------------------|
| Bodily Injury by Accident | \$ 100,000 each accident |
| Bodily Injury by Disease | \$ 100,000 each employee |
| Bodily Injury by Disease | \$ 500,000 policy limit |

E. The policy will show the state in which operation on behalf of the Party and/or subsidiary is being conducted. For operations conducted within monopolistic (state fund) states, the Party will furnish a certificate of compliance from the appropriate state fund administrator.

F. In each and every policy in D 1 and D 2, the other Party's Corporation and its subsidiaries shall be named an "additional insured" with respect to activities performed on behalf of the Party's Corporation and its subsidiaries.

G. Coverage provided by the policies listed in this paragraph will be issued by an insurance company, licensed in the state in which operations on behalf of the Party are to be conducted. It is acceptable to use both primary and excess/umbrella policies to obtain necessary limits.

- H. Each Party will furnish to the other Party, a certificate evidencing insurance coverage under sub-paragraphs D 1 and D 2. Such certificate shall provide for a thirty-day prior notice to the other Party of any cancellation or material changes in coverage and shall be signed by a legal representative of the issuing insurance company.
- I. The provisions of sub-paragraphs D 1 and D 2 shall also apply to all sub-Licensees, and Licensee shall be responsible for their compliance herewith.

ARTICLE XVIII
RIGHTS OF OTHER PARTIES

- A. If either party has, prior to the execution of this Agreement, conferred upon others not parties to this Agreement (outside parties), by contract or otherwise, rights or privileges to attach to any of its poles covered by this Agreement, nothing herein contained shall be construed as affecting said rights or privileges with respect to existing attachments of such outside parties, which attachments shall continue in accordance with the present practice; all future attachments of such outside parties shall be in accordance with the requirements of Paragraph B below, except where such outside parties have by this Agreement acquired enforceable rights or privileges to make attachments which do not meet such revenue accruing from such outside parties. Any contractual rights or privileges of outside parties recognized in this paragraph shall include renewals of or extensions of the term (period) of such contracts.
- B. If either party hereto desires to confer upon others not parties to this Agreement (outside parties), by contract or otherwise, rights or privileges to attach to any of its poles covered by this Agreement, it shall have the right to do so, provided all such attachments of such outside parties are made in accordance with the following: (a) such attachments shall not be located within the space allocation of Licensee, unless Licensee concurs in such occupancy. Such concurrence shall in no way waive Licensee's right to occupy its allocated space in the future. Owner shall derive all of the revenue accruing from such outside parties.

ARTICLE XIX
NOTIFICATION PROCEDURES

Wherever in this Agreement notice is required to be given by either party hereto to the other, such notice shall be in writing mailed or delivered to the of JPEC at its office at 2900 Irvin Cobb Dr., Paducah, KY 42001 or Alltel at its office at 50 Executive Parkway, Hudson, OH 44236, Attn: Thomas Hudack as the case may be, or to such other addressee as either party may from time to time designate in writing for that purpose.

ARTICLE XX
TERM OF AGREEMENT

- A. This Agreement shall continue in full force and effect until the 31st day of December, 2010. This Agreement shall continue from year to year thereafter until terminated by either party, giving to the other one year's notice in writing of intention to terminate this Agreement. At any time thereafter, adjustment payment rates applicable under this Agreement shall be subject to joint review and revision upon the written request of either

party. In case of revision of the adjustment payment rates as herein provided, the new adjustment payment rates agreed upon shall apply, starting with the annual bill next rendered and continue until again adjusted.

- B. Revisions of the adjustment payments shall be based on experience resulting from previous administration of this Agreement. Any changes shall take into account the original cost factors pertinent to the establishment of the pole facilities involved in all joint use existing under this Agreement at the time of the review. If, within 90 days after the receipt of the request set forth in Article XVIII A above, by either party from the other, the parties hereto fail to agree upon a revision of such rate, then the adjustment payment per pole shall be established at the then existing Base Rate, as escalated by the TPI for a period of two years. The adjustment payment per pole for those systems on the reciprocal rate shall be an amount equal to one-half of the then average annual total cost per pole of the party owning the greater number of poles, based on averaging plant cost factors of providing and maintaining the joint poles covered by this Agreement. For those systems not on the reciprocal rate, the adjustment payment per pole shall be an amount equal to 56 percent (for JPEC) of the then average annual total cost per pole based on the average in-plant poles covered by this Agreement, and the adjustment payment per pole shall be an amount equal to 44 percent (for Alltel) of the then average annual total cost per pole based on the average in-plant cost factors of providing and maintaining the joint poles covered by this Agreement.

ARTICLE XXI ASSIGNMENT OF RIGHTS

- A. Except as otherwise provided in this Agreement, neither party hereto shall assign or otherwise transfer this Agreement, in whole or in part, without the written consent of the other party; provided that either party shall have the right without such consent to mortgage any or all of its property, rights, privileges and franchises, or to lease or transfer any of them to another corporation organized for the purpose of conducting a business of the same general character as that of such party, or to enter into any merger or consolidation; and, in case of the foreclosure of such mortgage, or in case of such lease, transfer, merger or consolidate its rights and obligations hereunder shall pass to such successors and assigns; and provided, further, that subject to all of the terms and conditions of this Agreement, either party may without such consent permit any corporation conducting a business of the same general character as that of such party, with which it is affiliated by corporate structure, to exercise the rights and privileges of this agreement in the conduct of its said business.
- B. For the purposes of this Agreement, all attachments maintained on any joint use pole by the permission of either party hereto, as provided in Paragraph A above, shall be considered the attachments of the party granting such permission, and the rights, obligations and liabilities of such party under this Agreement, in respect to such attachments, shall be the same as if it were the actual owner thereof.
- C. The attachments of each party hereto or of others permitted by this Agreement shall at all times be and remain its or their property, with the full right of removal, and shall not become subject to any liens against the other party.

ARTICLE XXII

WAIVER OF TERMS OF CONDITIONS

The failure of either party to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment or any such terms or conditions, but the same shall be and remain at all times in full force and effect.

ARTICLE XXIII

EXISTING AGREEMENTS

Any existing agreement between the parties hereto for the joint use of wood poles upon a rental basis within the territory covered by this Agreement is, by mutual consent, hereby abrogated and annulled.

ARTICLE XXIV

NO EFFECT ON FRANCHISE RIGHTS

Notwithstanding anything elsewhere herein provided, nothing contained in this Agreement shall abrogate, limit or affect any obligation of either party under any franchise granted to either party by any municipal corporations or its predecessors.

ARTICLE XXV

SOURCE OF PAYMENTS

The obligations of JPEC hereunder shall be payable solely from the funds of Jackson Purchase Energy Corporation.

ARTICLE XXVI

SUPPLEMENTAL ROUTINES AND PRACTICES

Nothing in the foregoing shall preclude the parties to this Agreement from preparing such supplemental operating routines or working practices as they mutually agree to be necessary or desirable to effectively administer the provisions of this Agreement. Any such supplemental operating routines or working practice must be authorized and approved by the management level officer or employee executing or authorized to execute this contract.

ARTICLE XXVII

NO JOINT OWNERSHIP

The Licensee of a joint use pole shall acquire no ownership of or interest in such a pole, the Licensee's rights therein being limited to the right to compliance with the terms and conditions contained in this Agreement.

ARTICLE XXVIII

AGREEMENT AFFECTS ONLY PARTIES HERETO

Except only insofar as the express terms of this Agreement make the rights hereunder available to the successors or assigns of the parties hereto, the provisions of this Agreement shall not be interpreted to confer any right of action at law or in equity upon any parties except the parties hereto.

IN WITNESS WHEREOF, the parties here to have caused these presents to be executed in duplicate, and their corporate seals to be affixed thereto by the respective officers thereunto duly authorized, on the day and year first above written.

APPENDICES A, B & C

These Appendices, effective as of consisting of four pages, will be used to determine the cost responsibility and amounts to be billed for modifications in accordance with this joint use agreement. Notification forms required to carry out the provisions of this Agreement will be furnished as needed. Annually after the execution of this Agreement, all Appendices shall be escalated in accordance with Article X, Subparagraph D set forth above.

Note: As of January 1, 2005, all amounts listed in the Appendices shall be escalated by 15.6% prior to use.

Additional payments to be made by either the Telephone or Power Company

Payment for one half cost of anchor and rod shall be as follows

3/4" ROD = \$47.00 Double Eye, 8" Single Helix Anchor

1" or larger ROD - \$66.00 Triple Eye, 8" Double Helix Anchor or Larger

Payment under Article VII, Section F, Paragraph 8, shall be the current cost in plant plus an attachment cost of \$25.00 for each cable, conductor, or neutral wire.

If Licensee is not present at any time that Owner removes an old pole and installs a new pole, and the Owner is required to make a second trip to the site, Licensee hereby agrees to pay \$30.00 to Owner.

The current cost of treated poles for emergency conditions as discussed in Article VII, paragraph B is as follows:

| Height of Poles | Class 1 | Class 2 | Class 3 | Class 4 | Class 5 | Class 6 | Class 7 | Class 9 |
|-----------------|---------|---------|---------|---------|---------|---------|---------|---------|
| 25' | 443 | 421 | 402 | 386 | 373 | 356 | 343 | 321 |
| 30' | 569 | 537 | 504 | 477 | 451 | 424 | 399 | 368 |
| 35' | 623 | 582 | 547 | 513 | 487 | 460 | 424 | 400 |

JOINT USE AGREEMENT

THIS AGREEMENT, made as of the 1st day of May 2008 by and between Kenergy Corp. a (n) Kentucky Corporation, whose mailing address is 6402 Old Corydon Road, Henderson, KY 42420, hereinafter referred to as the "Power Distributor", or "Owner" and Windstream Kentucky East, LLC, a Delaware Corporation, whose mailing address is 50 Executive Parkway, Hudson, Ohio 44236, with a Corporate Headquarters located at 4001 N. Rodney Parham Road, Little Rock, AR 72212, hereinafter referred to as the "Telephone Company."
 44236
 7/8/08

WITNESSETH:

WHEREAS, in all areas within the State of Kentucky served by both parties certain utility poles are presently used jointly by the Power Distributor and the Telephone Company, such joint use being maintained under the terms of the GTE South Incorporated, now known as Windstream Kentucky East, LLC and Henderson-Union Rural Electric Cooperative Corporation, now known as Kenergy Corporation Joint Use Agreement dated July 1, 1993, between the Power Distributor and Telephone Company; and

WHEREAS, the parties desire to continue such joint use and to use other poles jointly in the future, when and where such joint use will be of mutual advantage in meeting their respective service requirements; and

WHEREAS, because of changed conditions and experience gained, and to facilitate administration of joint use, the parties desire to terminate the aforementioned Joint Use Agreements and enter into a new Joint Use Agreement giving due recognition to the fact that the comparative numbers of joint use poles owned by the parties, the respective space allocated to or used by the parties, the concern for the ability to provide reliable service, the relative positions of the parties on the poles all have a bearing on the contribution to be made by the parties both as to ownership and maintenance of joint use poles.

NOW, THEREFORE, in consideration of the premises and the mutual covenants herein contained, the parties hereto for themselves, their successors and assigns do hereby terminate the existing GTE South Incorporated and Henderson-Union Rural Electric Cooperative Corporation Joint Use Agreement dated July 1, 1993, and do hereby covenant and agree as follows:

ARTICLE I DEFINITIONS

For the purpose of this agreement, the following terms when used herein shall have the following meanings:

- A. **ATTACHMENTS** shall mean any wires, cables, strands, materials or apparatus or other facilities affixed to a joint use pole now or hereafter used by either party in the construction, operation or maintenance of its plant. Pedestals, or underground bonds to the common ground, are considered attachments, but will not be counted as additional attachments on joint use poles.
- B. **CHANGE IN CHARACTER OF CIRCUITS** shall mean any change in either party's Attachments which affects either loading on the pole or clearance between the Attachments of the parties hereto.
- C. **CODE** means the National Electrical Safety Code, as it may be amended from time to time.
- D. **DAYS** as used herein shall mean calendar days.
- E. **INJURIES** include death, personal injury and property damage or destruction.
- F. **JOINT USE** is maintaining or specifically reserving space for the attachments of both parties on the same pole at the same time.
- G. **JOINT USE POLE** is a pole upon which space is provided under this Agreement for the attachments of both parties, whether such space is actually occupied by attachments or reserved therefore upon specific request.
- H. **LICENSEE** is the party having the right under this Agreement to make attachments to a joint use pole that the other party owns.
- I. **NORMAL JOINT USE POLE** means a 40-foot, Class 4 treated pole which meets the requirement of the Code. The parties may agree to use a smaller than Class 4 pole, but under no condition shall the normal use pole be less than the minimum requirements of the Code.
- J. **OWNER** is the party owning the joint use pole.
- K. **POLE OR POLES** includes the singular and plural.
- L. **REARRANGING OF ATTACHMENTS** is the moving of attachments from one position to another on a joint use pole.

- M. **RESERVED**, as applied to space on a pole, means unoccupied space provided and maintained by Owner, either for its own use or expressly for Licensee's exclusive use at Licensee's request.
- N. **RIGHT OF WAY** defined as owned or controlled by Licensor. It does not include attachment or use of cables, poles, equipment or facilities located on a particular right-of-way. It may include private easement, or in certain instances public right-of-way granted by a governmental authority or a utility easement such as in a subdivision or development.
- O. **STANDARD SPACE ALLOCATION** means an allocation of sufficient space on a joint use pole for the use of each party taking into consideration requirements of the Code, and is more particularly defined as follows:
- (1) For Power Distributor, the use of 10 feet of space on 45-foot poles, 8 feet of space on 40-foot poles, and 6 1/2 feet on 35-foot poles, measured downward from the top of the pole; and
 - (2) For Telephone Company, the use of 2 feet of space on joint use poles, below the space of the Power Distributor starting at the point that gives adequate Code separation on the pole. If under the terms of this Agreement the Telephone Company uses a portion of the Power Distributor's allocated space as measured from the top of the pole, the Telephone Company agrees that its use is permissive and that the Power Distributor shall have the undisputed use of its allocated space measured from the top. Telephone Company agrees to move any such attachments within this allocated space at its own cost upon demand of the Power Distributor. Similarly, if the Power Distributor uses a portion of the Telephone Company's 2-foot space, the Power Distributor agrees that such use shall be permissive. Power Distributor agrees to move any such attachment within the 2-foot space upon demand of Telephone Company.
 - (3) The foregoing definition of a "normal joint use pole" is not intended to preclude the use of joint poles shorter or taller or of different strength than the normal joint use pole in location where it is mutually agreed such poles will meet the requirements of the parties hereto.
- P. **TRANSFERRING OF ATTACHMENTS** is the removing of attachments from one pole and placing the attachments upon another pole.

ARTICLE II TERRITORY AND SCOPE OF AGREEMENT

This Agreement shall cover all poles of each of the parties now existing in joint use and those hereafter erected or acquired within the common operating areas served by the parties excepting poles which in the Owner's judgment are necessary for its own sole use.

ARTICLE III PERMISSION FOR JOINT USE

Subject to the terms and conditions of this Agreement, each party hereby permits joint use by the other party of any of its poles in accordance with the standard space allocation defined in Article I and the following:

- (1) Allocated pole space may, without additional charge, be used by the party to which it is not allocated for the purpose of installing and maintaining street lighting, traffic signal systems, and vertical attachments (such as but not limited to ground wires, gang operated switch control rods and underground risers) if by the terms of the Code the proposed use is authorized and such use does not unreasonably interfere with the use being made by the party to which such space is allocated (such determination will be made solely by the party to which the space is allocated).

If Code provisions cannot subsequently be met then billing for the required modifications will be as set forth in Appendix A.

- (2) As long as the provisions of the Code are met, unallocated space may be used without additional charge by the Power Distributor and/or Telephone Company. If Code provisions cannot subsequently be met then billing for required modifications will be as set forth in Appendix A.
- (3) As long as the provisions of the Code in effect at the time the attachments were installed, have been met, any joint use pole now in place shall be deemed satisfactory to both parties and adequate for its requirements whether or not the space allocations made herein have been observed.
- (4) As long as the provisions of the Code are met, any pole hereafter made joint use shall thereupon be deemed satisfactory to Licensee and space allocations made herein have been observed.

ARTICLE IV SPECIFICATIONS

The joint use of poles covered by this Agreement shall at all times be in conformity with all applicable provisions of law and with the minimum requirements of the Code in effect at the time the respective attachments are made, and with such additional requirements as may be mutually approved in writing by the Vice President Engineering of the Power Distributor and Network Vice President of the Telephone Company.

**ARTICLE V
RIGHT-OF-WAY AND LINE CLEARING**

- A. The Owner and Licensee will cooperate as far as may be practicable in obtaining right-of-way for both parties. When a written easement is secured it shall be in sufficient detail for identification and recording, and shall be subject to inspection by the other party upon request. However, no guarantee is given by the Owner of permission from property owners, municipalities or others for the use of poles by the Licensee, and if objection is made thereto and the Licensee is unable to satisfactorily adjust the matter within a reasonable time, the Owner may at any time, upon notice in writing to the Licensee, require the Licensee to remove its attachments from the poles involved, and the Licensee shall, within ninety (90) days after receipt of said notice, remove its attachments from such poles at its sole expense. Should the Licensee fail to remove its attachments as herein provided, the Owner may remove them at the Licensee's expense, without any liability whatever for such removal or the manner of making it, for which expense the Licensee shall reimburse the Owner on demand. Owner shall provide a 20' right-of-way whenever possible. Nothing stated herein shall preclude the parties from mutually sharing the cost of right-of-way acquisition.
- B. Line clearing and trimming will be performed as follows:
- (1) When constructing a new joint use pole line the Owner shall cut, clear and trim a 20' right-of-way, if possible.
 - (2) In all other instances each party shall be responsible for its own initial and recurring trimming, clearing and cutting.

**ARTICLE VI
PLACING, TRANSFERRING OR REARRANGING ATTACHMENTS**

- A. Either party desiring to reserve space on any pole of the other not then designated as a joint use pole shall make written application therefore, specifying the pole involved, the number and kind of its attachments to be placed thereon and the character of the circuits to be used. Within the (10) days after the receipt of such application, Owner shall notify the applicant in writing whether it is excluding said pole from joint use under the provisions of Article II. Upon receipt of notice from Owner that said pole is not excluded, and after completion of any required transferring or rearranging of attachments on said pole or any pole replacement as provided in Article VII the applicant shall have the right to use said pole as Licensee in accordance with the terms and conditions of this Agreement. Notwithstanding the foregoing, attachments placed by either party on the other's pole without such application and approval shall subject said pole to the terms of this Agreement. In such case, Owner

shall have the right to require Licensee to remove within ninety (90) days at its sole expense any such attachments on poles coming within the exceptions described in Article V. Should Licensee fail to remove such attachments, such failure shall constitute default according to Article XIV.

- B. Except as herein otherwise expressly provided, each party at its own expense shall place, maintain, rearrange, transfer and remove its own attachments, and shall at all times perform such work promptly and in such a manner as not to interfere with work or service being performed by the other party. Upon completion of work by the Owner which will necessitate transfer of the Licensee's attachments, the Owner shall provide written notice to the Licensee that such transfer must be completed within sixty (60) days. If such transfer of attachments is not completed within sixty (60) days the old pole shall become the property of the Licensee, and the Licensee shall save harmless the former Owner of such pole from all obligations, liabilities, damages, costs, expenses, or charges incurred thereafter because of or arising out of the presence, location or condition of such pole or any attachment thereon, whether or not it is alleged that the former Owner was negligent or otherwise. Licensee shall pay the former Owner the present in-place value, as set forth in Appendix A, for said pole. The sixty (60) day deadline set forth in this paragraph may be extended only by written mutual consent.
- C. When the Power Distributor desires to change the primary voltage system to an amount above 34.5 kv phase to phase on joint use lines, it shall give the Telephone Company sixty (60) days written notice of such contemplated change. If the Telephone Company does not agree within thirty (30) days from receipt of said notice to such change, then:
- (1) the parties hereto shall determine what circuits shall be removed from existing points on the joint use poles involved, and the net cost of establishing a new position on said poles or in a location elsewhere, those circuits or lines as may be necessary to allow the other party to continue to furnish the same service that existed at the time the change was decided upon; and
 - (2) the responsibility of the cost of establishing such circuits in the new position or new location shall be mutually agreed upon between the parties hereto.

ARTICLE VII ERECTING, REPLACING OR RELOCATING POLES

- A. Whenever any jointly used pole, or any pole about to be so used under the provisions of this Agreement, is insufficient in size or strength for the existing attachments and for the proposed immediate additional attachments thereon, the Owner shall within sixty (60) days replace such pole with a new pole of the necessary size and strength, and make such

other changes in the existing pole line in which such pole is included, as may be made necessary by the replacement of such pole and the placing of the Licensee's circuits as proposed. By mutual agreement, the time period may be shortened or extended.

- B. The parties recognize and agree that there are inherent dangers involved in the transmission and distribution of electricity. The parties agree that unforeseeable emergency conditions will exist from time to time. When due to accidents, storm damage, etc., it is necessary for the Licensee to replace the Owner's pole immediately to restore service to its customers or to eliminate a hazardous condition and the Owner cannot perform the work in time to meet the Licensee's requirements, Licensee may replace the Owner's pole. Licensee will make all of its required facility changes or transfers and will secure the old pole to the new pole so the Owner may make its transfers when feasible. Licensee shall bill the Owner the total cost of the new pole in accordance with Appendix B. Owner shall continue to own the old pole and shall be responsible for its removal, and the new pole will become the property of the original owner.
- C. Whenever it is necessary to change the location of a jointly used pole, by reason of any state, municipal or other governmental requirement, or the requirements of a property owner, the Owner shall, before making such change in location, give notice thereof in writing (except in cases of emergency) to the Licensee, specifying in such notice the time of such proposed relocation, and the Licensee shall within sixty (60) days, transfer its attachment to the pole at the new location.
- D. In any case where the parties hereto shall conclude arrangements for the joint use of any new poles to be erected, the ownership of such poles shall be determined by mutual agreement. The party then owning the lesser number of joint poles under this Agreement should be allowed the opportunity to promptly erect the new joint poles and be the owner thereof or if the party owning the lesser number of poles cannot install the poles in time to meet the service requirements of the party owning the greater number of poles, the party owning the greater number of poles may set the poles and may bill the other party the total cost of setting said poles in accordance with Appendix A. The party owning the lesser number of poles, if billed, becomes the owner of the new joint use poles.
- E. Whenever either party hereto is about to erect new poles, either as an additional pole line, as an extension of an existing pole line, or as the reconstruction of an existing pole line, it shall notify the other in writing at least thirty (30) days before beginning the work (short notice, including verbal notice subsequently confirmed in writing, may be given in cases of emergency) and shall submit with such notice its plan showing the proposed location and size of the new poles, and circuits it will use thereon. The other party shall, within fifteen (15) days after the receipt of such notice, reply in writing to the party erecting the new poles, stating whether such other party does, or does not, desire space on the said

poles, and if it does desire space thereon, the character of the circuits it desires to use and the amount of space it wishes to reserve. This notice of desire to establish joint use should include detailed plans of any changes in the plans of the other party which are desired in order to permit the establishment of joint use. If such other party and number of circuits and attachments are such that the Owner does not wish to exclude the poles from poles suitable for the said joint use, the poles shall be erected in accordance with the provisions and the payment of costs as provided in this Agreement.

- F. The costs of erecting joint poles coming under this Agreement, either as new pole lines, as extensions of existing pole lines, or to replace existing poles, either existing jointly used poles or poles not previously involved in joint use, shall be borne by the parties as follows:
- (1) In non-emergency situations, whenever operating and safety conditions prohibit Owner from replacing an existing pole which needs to be replaced, Licensee shall replace the pole and bill Owner in accordance with Appendix A times 1.25. For emergency situations see Section B of this Article.
 - (2) A normal joint use pole, or a joint use pole shorter and/or smaller than the normal joint use pole, shall be erected at the sole expense of the Owner, except as provided in Section G of this Article.
 - (3) In the case of a pole taller and/or stronger than the normal pole, the extra height and/or strength of which is due wholly to the Owner's requirements, shall be erected at the sole expense of the Owner.
 - (4) In the case of a new pole taller and/or stronger than the normal joint use pole, the extra height and/or strength of which is due wholly to the Licensee's requirements, the Licensee shall pay to the Owner the extra costs for the additional height and/or strength as set forth in Appendix A.
 - (5) Where an existing jointly use pole is prematurely replaced by a new one solely for the benefit of the Licensee, the Licensee shall pay the Owner the Present in-place value of the existing pole and the costs of replacing or transferring all attachments in accordance with Appendix A and Appendix C, and the replaced pole shall be removed and retained by the Owner.
 - (6) In the case of a new pole taller and/or stronger than the normal joint use pole, the extra height and/or strength of which is due to the requirements of both parties, the Licensee shall pay to the Owner a sum equal to one-half the excess height and/or strength as set forth in Appendix A, the rest of the cost of erecting such pole to be borne by the Owner.

- (7) In the case of a new pole taller and/or stronger than the normal joint use pole, where height and/or strength in addition to that needed for the purpose of either or both of the parties hereto is necessary in order to meet the requirements of the Code, public authority or of property owners, the excess cost of such pole due to such requirements shall be borne by the Owner.
 - (8) If Licensee only requires the addition of a pole in an existing line because of span length or terrain, the Owner will furnish and erect said pole at the sole expense of the Licensee, and pole shall remain property of Owner. The charges shall be as set forth in Appendix A.
 - (9) Where the Power Distributor has a line that crosses a Telephone Company line and the provisions of the Code are met and the Telephone Company desires to set a pole in the Telephone Company line and requests the Power Distributor to attach to said pole, the Telephone Company shall bear all initial and recurring costs of placing and maintaining said pole, except the cost of making and transferring the Power Distributor attachments.
- G. In any case where a pole is erected hereunder to replace another pole solely because such other pole is not tall enough, or of the required strength, to provide adequately for the Licensee's requirements, or where such pole, whether it has space reserved for the Licensee's use or not, had at the time of its erection been pronounced by the Licensee as satisfactory and adequate for its requirements, the Licensee shall, upon erection of the new pole, pay to the Owner, in addition to any amounts payable by the Licensee under paragraphs 3, 4, or 5 of Section F of this Article, a sum equal to the present in-place value as set forth in Appendix A, for the pole which is replaced and the pole removed shall remain the property of the Owner.
- H. In any case where by mutual consent it is desirable to change the ownership of a pole and Licensee erects and owns a joint pole to replace an existing pole of the Owner (instead of the Owner doing so as it is contemplated by Section A of this Article) such Licensee shall pay to the Owner of the replaced pole a sum equal to the present in-place value, as set forth in Appendix A, for the pole which is replaced and the pole removed shall remain the property of the Owner and shall be removed by the Owner.

ARTICLE VIII MAINTENANCE OF FACILITIES

- A. Owner shall, at its own expense, maintain its joint use poles in a safe and serviceable condition and shall undertake any appropriate safety

measures, including without limitation reasonable pole inspections. The Owner's responsibility for maintaining a safe and serviceable condition of its poles shall be in accordance with the requirements of the Code, and shall replace poles that become defective, in accordance with the provisions of Article VII.

- B. Each party shall, at its own expense, at all times maintain all of its attachments in safe condition, thorough repair, and in accordance with the requirements of the Code.
- C. The parties hereby agree that a cooperative approach will be taken in solving noise or inductance problems that may occur.

ARTICLE IX ABANDONMENT OF JOINT USE POLES

- A. Anytime Owner desires to abandon any joint use pole, it shall give Licensee at least sixty (60) days written notice. If, at the expiration of such period, Owner shall have no attachments on such pole but Licensee shall not have removed all of its attachments therefrom, such pole shall thereupon become the property of Licensee, Licensee shall save harmless the former Owner from all obligations, liabilities, damages, costs, expenses, or charges incurred thereafter because of or arising out of the presence, location or condition of such pole or any attachment thereon, whether or not it is alleged that the former Owner was negligent or otherwise.
- B. Licensee may at any time abandon a joint use pole by removing therefrom all of its attachments, and giving due notice thereof in writing to Owner within sixty (60) days.

ARTICLE X ADJUSTMENT PAYMENTS

- A. For poles 40 feet and over (sometimes referred to as Urban poles) the payments per pole due from the Licensee to the Owner shall be \$ [REDACTED] and the Power Distributor as Licensee shall pay [REDACTED] to the Telephone Company as of the inception date of this Agreement. For those poles 35 feet and under (sometimes referred to as Rural poles), the Telephone Company as Licensee shall pay to the Power Distributor \$ [REDACTED] and the Power Distributor as Licensee shall pay \$ [REDACTED] to the Telephone Company.
- B. Five years after the last survey Power Distributor shall have the option, but not the requirement, to count all poles on its system in those areas served by both parties and classify those poles by height. After a written request from the Power Distributor for a pole count, the parties to this

Agreement agree to undertake a joint pole count, which shall be completed within six months.

- C. Adjustment payments hereunder shall cover rentals accruing during the calendar year and shall be based on the number of poles on which space is occupied or reserved on the first day of December of the year in which the rentals accrue. Within thirty (30) days following such date, or as soon as practical thereafter, each party shall submit a written statement to the other party giving the number of poles on which space was occupied by or reserved for the party as of such date.
- D. The total adjustment payment due each party shall be determined by multiplying the poles owned and licensed by each party, by the adjustment payment.
 - (1) The smaller total amount covered above shall be deducted from the larger amount and the Power Distributor or the Telephone Company, which ever shall owe the larger amount, shall pay to the other the difference between said two amounts as the net adjustment payment due for the year involved. Within forty five (45) days after the first day of January next, or as soon as practical thereafter, ensuing after the date of this Agreement, and within forty-five (45) days after the first day of each January, or as soon as practical thereafter, during the time this Agreement shall be in effect, the party to which said adjustment payment is owed as of said first day of January, shall submit a written statement (the "Schedule of Pole Rentals") to the other party giving the correct amount owed by the other party.
 - (2) The adjustment payment herein provided for shall be paid within forty five (45) days after the bill has been submitted, unless said party disputes the amount of such bill within ten (10) days from receipt thereof. In case of such dispute, payment shall be made within forty five (45) days after the bill has been submitted of the amount that is admitted to be due; an agreement concerning the disputed amount shall be attempted with all reasonable dispatch by negotiation. Failing to reach any such agreement by negotiation, either party may make formal written demand on the other for the amount claimed to be due; and if payment thereof is not made within forty five (45) days, suit may be brought for the amount claimed.
- E. The rates set forth in Paragraph A above shall be effective as of 1-1-2008 and shall remain in effect through 12-31-2008 (the "Base Rate"). The Base Rate shall be escalated, effective 1-1-2009 and annually thereafter, based upon the previous annual Telephone Plant Index ("TPI") for poles for the areas within the state of Kentucky served by both parties. The Telephone Company shall provide the Power Distributor with the

documentation supporting the index at the time of submitting the Schedule of Pole Rentals referred to in Paragraph D (1) above.

ARTICLE XI INVENTORY OF ATTACHMENTS

- A. At intervals not exceeding five (5) years an actual inventory of attachments shall be made by representatives of the parties. If there is any difference in the number of attachments found by the inventory and the number arrived at by tabulating those reported, correction will be made by retroactive billing for any attachments identified as being responsible for the difference, and any remaining difference will be spread evenly over the years since the last inventory and billing adjusted accordingly.
- B. Each party shall share equally the cost of making such inventory of attachments.

ARTICLE XII JOINT ANCHORS

The Owner where practicable shall, upon request from Licensee, place anchors suitable for joint use upon consideration of the joint load and guy lead requirements. The cost of the anchor shall be shared, and will be billed, as set forth in Appendix A. Each party shall install its own guy wires.

ARTICLE XIII GROUNDING AND BONDING

Grounding and bonding will at all times meet the requirements of the Code.

ARTICLE XIV DEFAULTS

- A. If either party shall fail to discharge any of its obligations under this Agreement and such failure shall continue for thirty (30) days after notice thereof in writing from the other party, all rights of the party in default hereunder, pertaining to making attachments to additional poles of the other, shall be suspended. If such default shall continue for a period of ninety (90) days after such suspension, the other party may forthwith terminate the right of the defaulting party to attach to additional poles of the other party. Any such termination of the right to attach to such additional poles of the other by reason of any such default shall not abrogate or terminate the right of either party to attach to existing joint use poles or to maintain existing attachments, and all such attachments shall continue thereafter to be maintained pursuant to and in accordance with the terms of this Agreement, which Agreement shall, so long as such

attachments are continued, remain in full force and effect solely and only for the purpose of governing and controlling the rights and obligations of the parties with respect to such attachments.

- B. In the event either party should fail to perform its obligations either during the term of this agreement or after termination made in accordance with the terms of this Article or Article XIX or fail to properly maintain or promptly replace joint use poles thereto after sixty (60) days written notice from the other, the other party shall have the right, but not the obligation, to maintain such poles or to replace the same at the expense of the party so failing, and shall be fully indemnified for all reasonable expenses, costs and damages whatever in taking such action or the manner of taking it.

ARTICLE XV LIABILITY AND DAMAGES

Either party hereto, to the fullest extent permitted by law, agrees to and shall indemnify and hold harmless the other party from and against any and all claims, damages, losses and expenses, including but not limited to attorneys' fees, arising out of or resulting from said party's joint use of the poles, and/or any acts or omissions under this Agreement. Any interpretations regarding this Agreement or any activities arising hereunder shall be governed by the laws of the state of Kentucky.

ARTICLE XVI RIGHTS OF OTHER PARTIES

- A. If either party has, prior to the execution of this Agreement, conferred upon others not parties to this Agreement (outside parties), by contract or otherwise, rights or privileges to attach to any of its poles covered by this Agreement, nothing herein contained shall be construed as affecting said rights or privileges with respect to existing attachments of such outside parties, which attachments shall continue in accordance with the present practice; all future attachments of such outside parties shall be in accordance with the requirements of Paragraph B below, except where such outside parties have by this Agreement acquired enforceable rights or privileges to make attachments which do not meet such revenue accruing from such outside parties. Any contractual rights or privileges of outside parties recognized in this paragraph shall include renewals of or extensions of the term (period) of such contracts. Outside parties shall continue to have all rights and privileges under filed tariffs, as amended, if applicable.
- B. If either party hereto desires to confer upon others not parties to this Agreement (outside parties), by contract or otherwise, rights or privileges to attach to any of its poles covered by this Agreement, it shall have the right to do so, provided all such attachments of such outside parties are made in accordance with the following: Such attachments shall not be

located within the space allocation of Licensee, unless Licensee concurs in such occupancy. Such concurrence shall in no way waive Licensee's right to occupy its allocated space in the future. Owner shall derive all of the revenue accruing from such outside parties.

ARTICLE XVII NOTIFICATION PROCEDURES

Wherever in this Agreement notice is required to be given by either party hereto to the other, such notice shall be in writing mailed or delivered to the Vice President of Engineering of the Power Distributor at its office at Post Office Box 18 (42419), 6402 Old Corydon Road, Henderson, KY 42420; or to the Manager Contracts of the Telephone Company at its office at 50 Executive Parkway, Hudson, OH 44236 with a copy to: Corporate Legal Department, Windstream Communications, Inc., 4001 N. Rodney Parham Road, Little Rock, AR, 72212 as the case may be, or to such other addressee as either party may from time to time designate in writing for that purpose. Additionally, notices shall be faxed or e-mailed as follows: To Power Distributor, fax (270) 826-2999, e-mail vpengineering@kenergycorp.com; to Telephone Company, fax (330) 650-7307; e-mail thomas.hudock@windstream.com.

ARTICLE XVIII TERM OF AGREEMENT

- A. This Agreement shall continue in full force and effect until the 1st day of January, 2013. This Agreement shall continue from year to year thereafter until terminated by either party, giving to the other one year advance notice in writing of intention to terminate this Agreement. At any time thereafter, adjustment payment rates applicable under this Agreement shall be subject to joint review and revision upon the written request of either party. In case of revision of the adjustment payment rates as herein provided, the new adjustment payment rates agreed upon shall apply, starting with the annual bill next rendered and continue until again adjusted. Upon termination of this Agreement the parties shall make good faith efforts to agree in writing to the terms and conditions under which existing attachments may remain on joint use poles; however, there will be no new attachments unless mutually agreed upon.

- B. Revisions of the adjustment payments shall be based on experience resulting from previous administration of this Agreement. Any changes shall take into account the original cost factors pertinent to the establishment of the pole facilities involved in all joint use existing under this Agreement at the time of the review. If, within 90 days after the receipt of the request set forth in Article XVIII A above, by either party from the other, the parties hereto fail to agree upon a revision of such rate, then the adjustment payment per pole shall be established at the then existing Base Rate, as escalated by the TPI for a period of two years. The adjustment payment per pole for those systems on the reciprocal rate shall be an amount equal to one-half of the then average annual total cost

per pole of the party owning the greater number of poles, based on average in-plant cost factors of providing and maintaining the joint poles covered by this Agreement. For those systems not on the reciprocal rate, the adjustment payment per pole shall be an amount equal to 56 percent (for the Power Distributor) of the then average annual total cost per pole based on the average in-plant poles covered by this Agreement, and the adjustment payment per pole shall be an amount equal to 44 percent (for the Telephone Company) of the then average annual total cost per pole based on the average in-plant cost factors of providing and maintaining the joint poles covered by this Agreement.

ARTICLE XIX ASSIGNMENT OF RIGHTS

- A. Except as otherwise provided in this Agreement, neither party hereto shall assign or otherwise transfer this Agreement, in whole or in part, without the written consent of the other party; provided that either party shall have the right without such consent to mortgage any or all of its property, rights, privileges and franchises, or to lease or transfer any of them to another corporation organized for the purpose of conducting a business of the same general character as that of such party, or to enter into any merger or consolidation; and, in case of the foreclosure of such mortgage, or in case of such lease, transfer, merger or consolidate its rights and obligations hereunder shall pass to such successors and assigns; and provided, further, that subject to all of the terms and conditions of this Agreement, either party may without such consent permit any corporation conducting a business of the same general character as that of such party, with which it is affiliated by corporate structure, to exercise the rights and privileges of his Agreement in the conduct of its said business. If an affiliate corporation is permitted to exercise rights and privileges under this Agreement without consent of the other party, such other party shall be promptly notified in writing of same.

- B. For the purposes of this Agreement, all attachments maintained on any joint use pole by the permission of either party hereto, as provided in Paragraph A above, shall be considered the attachments of the party granting such permission, and the rights, obligations and liabilities of such party under this Agreement, in respect to such attachments, shall be the same as if it were the actual owner thereof.

- C. The attachments of each party hereto or of others permitted by this Agreement shall at all times be and remain its or their property, with the full right of removal, and shall not become subject to any liens against the other party.

ARTICLE XX WAIVER OF TERMS OF CONDITIONS

The failure of either party to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment or any such terms or conditions, but the same shall be and remain at all times in full force and effect.

ARTICLE XXI EXISTING AGREEMENTS

Any existing agreement between the parties hereto (including predecessors) for the joint use of wood poles upon a rental basis within the territory covered by this Agreement is, by mutual consent, hereby abrogated and annulled.

ARTICLE XXII NO EFFECT ON FRANCHISE RIGHTS

Notwithstanding anything elsewhere herein provided, nothing contained in this Agreement shall abrogate, limit or affect any obligation of either party under any franchise granted to either party by the State of Kentucky or by any of its city or municipal corporations.

ARTICLE XXIII SOURCE OF PAYMENTS

The obligations hereunder shall be payable solely from the funds of the obligated party.

ARTICLE XXIV SUPPLEMENTAL ROUTINES AND PRACTICES

Nothing in the foregoing shall preclude the parties to this Agreement from preparing such supplemental operating routines or working practices as they mutually agree to be necessary or desirable to effectively administer the provisions of this Agreement. Any such supplemental operating routines or working practice must be authorized and approved by the management level officer or employee executing or authorized to execute this contract.

ARTICLE XXV NO JOINT OWNERSHIP

The Licensee of a joint use pole shall acquire no ownership of or interest in such a pole, the Licensee's rights therein being limited to the right to compliance with the terms and conditions contained in this Agreement.

ARTICLE XXVI SUBSEQUENT LAW

The terms and conditions of this Agreement shall be subject to any and all applicable laws,

rules, regulations or guidelines now in effect from any federal, state or local governmental authority. In the event that any effective legislative, regulatory, judicial or other legal action by a governmental body or court of competent jurisdiction materially changes any rule, law or judicial or administrative decision that was the basis of the requirement, obligation or right upon which any provision of this Agreement was negotiated, or materially impairs the ability of the pole owner or attaching party to perform any material terms of this Agreement, the attaching party or pole owner may, on thirty (30) days' written notice request that such terms be renegotiated, and the Parties shall renegotiate in good faith such mutually acceptable new terms as may be required. In the event that such new terms are not renegotiated within ninety (90) days after such notice, the Dispute shall be referred to the Dispute Resolution procedure set forth in Section 18.0. Should any term of this Agreement be determined by a court or agency with competent jurisdiction to be unenforceable, all other terms of this Agreement shall remain in full force and effect.

**ARTICLE XXVII
AGREEMENT AFFECTS ONLY PARTIES HERETO**

Except only insofar as the express terms of this Agreement make the rights hereunder available to the successors or assigns of the parties hereto, the provisions of this Agreement shall not be interpreted to confer any right of action at law or in equity upon any parties except the parties hereto.

IN WITNESS WHEREOF, the parties here to have caused these presents to be executed in duplicate, and their corporate seals to be affixed thereto by the respective officers thereunto duly authorized, on the day and year first above written.

rules, regulations or guidelines now in effect from any federal, state or local governmental authority. In the event that any effective legislative, regulatory, judicial or other legal action by a governmental body or court of competent jurisdiction materially changes any rule, law or judicial or administrative decision that was the basis of the requirement, obligation or right upon which any provision of this Agreement was negotiated, or materially impairs the ability of the pole owner or attaching party to perform any material terms of this Agreement, the attaching party or pole owner may, on thirty (30) days' written notice request that such terms be renegotiated, and the Parties shall renegotiate in good faith such mutually acceptable new terms as may be required. In the event that such new terms are not renegotiated within ninety (90) days after such notice, the Dispute shall be referred to the Dispute Resolution procedure set forth in Section 18.0. Should any term of this Agreement be determined by a court or agency with competent jurisdiction to be unenforceable, all other terms of this Agreement shall remain in full force and effect.

APPENDICES A, B

These Appendices, effective as of consisting of 2 pages, will be used to determine the cost responsibility and amounts to be billed for modifications in accordance with this joint use agreement. Notification forms required to carry out the provisions of this Agreement will be furnished as needed. Annually after the execution of this Agreement, all Appendices shall be escalated in accordance with Article X, Subparagraph E set forth above.

APPENDIX A
PRESENT IN-PLACE VALUES OF POLES

Effective 5/22/08

| Pole Height and Class | Age of Poles in Years | | | | | | | | | | |
|------------------------------------|-----------------------|---------|---------|---------|-------|-------|-------|-------|-------|-------|-------|
| | New | 1-3 | 4-6 | 7-9 | 10-12 | 13-15 | 16-18 | 19-21 | 22-24 | 25-27 | 28-30 |
| In-Place Values of Poles (Dollars) | | | | | | | | | | | |
| 25-6 | \$274 | \$238 | \$203 | \$167 | \$131 | \$101 | \$71 | \$40 | \$30 | \$19 | \$9 |
| 30-6 | \$298 | \$259 | \$221 | \$181 | \$142 | \$110 | \$77 | \$43 | \$32 | \$20 | \$10 |
| 30-4 | \$298 | \$259 | \$221 | \$181 | \$142 | \$110 | \$77 | \$43 | \$32 | \$20 | \$10 |
| 35-5 | \$360 | \$312 | \$267 | \$219 | \$172 | \$132 | \$93 | \$52 | \$39 | \$24 | \$12 |
| 35-3 | \$389 | \$338 | \$288 | \$237 | \$186 | \$143 | \$101 | \$56 | \$42 | \$26 | \$12 |
| 40-2 | \$491 | \$426 | \$364 | \$299 | \$234 | \$181 | \$127 | \$71 | \$54 | \$33 | \$16 |
| 40-4 | \$443 | \$385 | \$328 | \$270 | \$211 | \$163 | \$115 | \$64 | \$48 | \$30 | \$14 |
| 45-2 | \$571 | \$496 | \$423 | \$348 | \$272 | \$210 | \$148 | \$83 | \$62 | \$39 | \$18 |
| 45-4 | \$510 | \$443 | \$378 | \$311 | \$243 | \$188 | \$132 | \$74 | \$56 | \$35 | \$16 |
| 50-3 | \$585 | \$508 | \$433 | \$356 | \$279 | \$215 | \$152 | \$85 | \$64 | \$40 | \$19 |
| 55-3 | \$779 | \$676 | \$577 | \$474 | \$372 | \$287 | \$202 | \$113 | \$85 | \$53 | \$25 |
| 60-3 | \$951 | \$825 | \$705 | \$579 | \$454 | \$350 | \$246 | \$138 | \$104 | \$65 | \$30 |
| 65-2 | \$1,185 | \$1,029 | \$878 | \$722 | \$565 | \$436 | \$307 | \$172 | \$129 | \$81 | \$38 |
| 70-2 | \$1,856 | \$1,611 | \$1,375 | \$1,130 | \$885 | \$683 | \$481 | \$269 | \$202 | \$126 | \$59 |

Terms for Additional Payments

Additional payments to be made by either the Telephone or Power Distributor.

Payment for one half cost of anchor and rod shall be as follows:

3/4" ROD = \$75 Double Eye, 8" Single Helix Anchor;

1" or larger ROD = \$93 Triple Eye, 8" Double Helix Anchor or Larger.

Payment under Article VII, Section F, Paragraph 8, shall be the current cost in plant plus an attachment cost of \$25 for each cable, conductor, or neutral wire.

If Licensee has been properly notified and is not present at any time that Owner removes an old pole and installs a new pole, and the Owner is required to make a second trip to the site, Licensee hereby agrees to pay \$50.00 to Owner.

APPENDIX B

Effective 5/22/08

The current cost of treated poles for emergency conditions as discussed in Article VII, paragraph B is as follows:

| Height of Poles | Class 1 | Class 2 | Class 3 | Class 4 | Class 5 | Class 6 | Class 7 | Class 8 | Class 9 |
|-----------------|---------|---------|---------|---------|---------|---------|---------|---------|---------|
| 25 | \$274 | | | | | \$411 | | | |
| 30-6 | \$298 | | | | | \$447 | | | |
| 30-4 | \$298 | | | \$447 | | | | | |
| 35-5 | \$360 | | | | \$540 | | | | |
| 35-3 | \$389 | | \$584 | | | | | | |
| 40-2 | \$491 | \$737 | | | | | | | |
| 40-4 | \$443 | | | \$665 | | | | | |
| 45-2 | \$571 | \$857 | | | | | | | |
| 45-4 | \$510 | | | \$765 | | | | | |
| 50-3 | \$585 | | \$878 | | | | | | |
| 55-3 | \$779 | | \$1,169 | | | | | | |
| 60-3 | \$951 | | \$1,427 | | | | | | |
| 65-2 | \$1,185 | \$1,778 | | | | | | | |
| 70-2 | \$1,856 | \$2,784 | | | | | | | |

U. S. DEPARTMENT OF AGRICULTURE
RURAL ELECTRIFICATION ADMINISTRATION

REA PROJECT KENTUCKY 504 MAMMOTH CAVE
Mammoth Cave Telephone Co., Park City, Ky.

THE WITHIN GENERAL AGREEMENT FOR JOINT USE OF WOOD
POLES (REA Form 263) dated 2-24-58, with KENTUCKY 18
MEADE (Meade County Rural Elec. Coop. Corp., Branden-
burg, Ky.)

SUBMITTED BY THE BORROWER PURSUANT TO THE TERMS OF THE
LOAN CONTRACT FOR THE ABOVE-DESIGNATED PROJECT, IS HEREBY
APPROVED SOLELY FOR THE PURPOSES OF SUCH LOAN CONTRACT.

Thomas H. McFarlane
FOR THE ADMINISTRATOR

ASS'T. ADMIN.

DATED

OCT 5 1959

3. SPACE is the linear portion of a joint pole parallel to its axis reserved for the exclusive use of one of the parties (subject only to the exceptions provided for by the specifications mentioned in Article III which in certain instances permit the making of certain attachments by one party in the space reserved for the other party).

4. NORMAL SPACE is the following described space:

a. For the Cooperative the uppermost 6 feet, measured from top of pole.

b. For the Telephone Company a space of 3 feet, at a sufficient distance below the space of the Cooperative to provide at all times the minimum clearance required by the specifications mentioned in Article III and at a sufficient height above ground to provide the proper vertical clearance above ground or track rails for the lowest horizontally run line wires or cables attached in such space.

The foregoing definition of "a normal joint pole" is not intended to preclude the use of joint poles shorter or of less strength than the normal joint pole in locations where such poles will meet the requirements of the parties hereto.

The above assignment of space is not intended to preclude the use of vertical runs or the mounting of such equipment as terminals or meters on the lower portions of the pole when mutually agreeable.

ARTICLE III SPECIFICATIONS

Except as otherwise provided in Section (e) of Article VII, referring to construction temporarily exempt from the application of the specifications mentioned herein, the joint use of the poles covered by this Agreement shall at all times be in conformity with accepted modern methods such as those suggested in Edison Electric Institute Publication No. M12 and shall at all times conform to the requirements of the National Electrical Safety Code, Fifth Edition, and subsequent revisions thereof, except where the lawful requirements of public authorities may be more stringent, in which case the latter will govern.

In establishing joint use of wood poles whether installed new for joint use or installed initially for electric circuits along, the total transverse and vertical loads for all conductors attached to a pole covered by this agreement shall not, under the assumed storm loadings of the National Electrical Safety Code for the area in which the pole is located, exceed fifty (50) percent of the ultimate fiber stress of the supporting pole. In the case of existing pole lines, the strength of the pole shall be assumed to be the same as when new.

Modifications of, additions to, or construction practices supplementing wholly or in part the requirements of the National Electrical Safety Code, shall, when accepted in writing by both parties hereto through their agents authorized to approve such changes, likewise govern the joint use of poles.

ARTICLE IV ESTABLISHING JOINT USE OF EXISTING POLES

(a) Before the Telephone Company shall make use of the poles of the Cooperative under this Agreement, it shall request permission therefor in writing on the form attached hereto and identified as Appendix C, and shall comply with the procedure set forth in said Appendix C.

(b) Whenever either party desires to reserve space for its attachments on any pole owned by the other party, either as initial space or additional space on such pole, it shall make written application therefor, specifying the location of the poles in question, the amount of space desired on each pole, and the number and character of the circuits to be placed thereon. If, in the judgment of the owner, the poles are necessary for its own sole use, or joint use under the circumstances is undesirable, the owner, shall have the right to reject the application. In any event, within a reasonable period after the receipt of such application the owner shall notify the applicant in writing whether the application is approved or rejected. Upon receipt of notice from the owner that the application has been approved, and after the completion of any

transferring or rearranging which is required to permit the making of the applicant's circuits on such poles, including any necessary pole replacements, the applicant shall have the right as licensee hereunder to use such space in accordance with the terms of the application and of this Agreement.

(c) Whenever any jointly used pole or any pole about to be so used under the provisions of this Agreement is insufficient in height or strength for the existing attachments and for the proposed additional attachments thereon, the owner shall promptly replace such pole with a new pole of the necessary height and strength and shall make such other changes in the existing pole line in which such pole is included as the conditions may then require.

(d) Each party shall place, transfer and rearrange its own attachments, place guys to sustain any unbalanced loads caused by its attachments, and perform any tree trimming or cutting incidental thereto. Each party shall at all times execute such work promptly and in such manner as not to interfere with the service of the other party.

(e) The cost of establishing the joint use of existing poles, including the making of any necessary pole replacements, shall be borne by the parties hereto in the manner provided in Article VIII -- Division of Costs.

ARTICLE V ESTABLISHING JOINT USE OF NEW POLES

(a) Whenever either party hereto requires new pole facilities for an additional pole line, an extension of an existing pole line, or in connection with the reconstruction of an existing pole line, it shall promptly notify the other party to that effect in writing (verbal notice subsequently confirmed in writing may be given in cases of emergency), stating the proposed location and character of the new poles and the character of circuits it intends to use thereon and indicating whether or not such pole facilities will be, in the estimation of the party proposing to construct the new pole facilities, susceptible of joint use. Within a reasonable period after the receipt of such notice, the other party shall reply in writing, stating whether it does, or does not, desire space on the said poles and, if it does desire space thereon, the character of the circuits it desires to use and the amount of space it wishes to reserve. If such other party requests space on the proposed new poles and if the character and number of its circuits and attachments are such that the party proposing to construct the new pole facilities does not consider joint use undesirable, then it shall erect poles suitable for such joint use, subject, however, to the provisions of Section (b) of this Article, and subject further to the condition that requests by the Telephone Company for space on proposed new poles of the Cooperative under this Agreement shall be made in writing on the form attached hereto and identified as Appendix C, and shall comply with the procedure set forth in said Appendix C. The applicant for space on the poles shall be promptly notified in writing of the action taken on the application.

(b) In any case where the parties hereto shall conclude arrangements for the joint use of any new poles to be erected, and the party proposing to construct the new poles facilities already owns more than its proportionate share of joint poles, the parties shall take into consideration the desirability of having the new pole facilities owned by the party owning less than its proportionate share of joint poles so as to work towards such a division of ownership of the joint poles that neither party shall be obligated to pay to the other any rentals because of their respective use of joint poles owned by the other.

(c) Each party shall place its own attachments on the new joint poles and place guys to sustain any unbalanced loads caused by its attachments. The owner shall, however, provide the initial clearing of the right-of-way, and tree trimming, which shall at least meet the requirements of the other party. Each party shall execute its work promptly and in such manner as not to interfere with the service of the other party.

(d) The cost of establishing the joint use of new poles including costs incurred in the retirement of existing poles shall be borne by the parties hereto in the manner provided in Article VIII -- Division of Costs.

ARTICLE VI
RIGHT OF WAY FOR LICENSEE'S ATTACHMENTS

While the owner and licensee will cooperate as far as may be practicable in obtaining rights-of-way for both parties on joint poles, the owner does not warrant or assure to the licensee any right-of-way privileges or easements on, over or across streets, alleys and public thoroughfares, and private or publicly owner property, and if the licensee shall at any time be prevented from placing or maintaining its attachments on the owner's poles, no liability on account thereof shall attach to the owner of the poles

ARTICLE VII
MAINTENANCE OF POLES AND ATTACHMENTS

(a) The Owner shall maintain its joint poles in a safe and serviceable condition and in accordance with the specifications mentioned in Article III and shall replace, reinforce or repair such of these poles as become defective.

(b) When replacing a jointly used pole carrying terminals of aerial cable, underground connection, or transformer equipment, the new pole shall be set in the same hole which the replaced pole occupied unless special conditions make it necessary or mutually desirable to set it in a different location.

(c) Whenever it is necessary to replace or relocate a jointly used pole, the owner shall, before making such replacement or relocation, give notice thereof in writing (except in case of emergency, when verbal notice will be given and subsequently confirmed in writing) to the licensee, specifying in such notice the time of such proposed replacement or relocation and the licensee shall at the time so specified transfer its attachments to the new or relocated joint pole.

(d) Except as otherwise provided in Section (e) of this Article, each party shall, at all times maintain all of its attachments, and perform any necessary tree trimming or cutting incidental thereto, in accordance with the specifications mentioned in Article III and shall keep them in safe condition and in thorough repair. Nothing in the foregoing shall preclude the parties hereto from making any mutually agreeable arrangement for jointly contracting for or otherwise providing for maintenance trimming.

(e) Any existing joint use construction of the parties hereto which does not conform to the specifications mentioned in Article III shall be brought into conformity therewith as soon as practicable.

When such existing construction shall have been brought into conformity with said specification, it shall at all times thereafter be maintained as provided in Sections (a) and (d) of this Article.

(f) The cost of maintaining poles and attachments and of bringing existing joint use construction into conformity with said specifications shall be borne by the parties hereto in the manner provided in Article VIII - Division of Costs.

ARTICLE VIII
DIVISION OF COSTS

(a) The cost of erecting new joint poles coming under this Agreement, to construct new pole lines, to make extensions to existing pole lines, or to replace existing poles, shall be borne by the parties as follows:

1. A normal joint pole, or joint pole smaller than normal, shall be erected at the sole expense of the owner.
2. A pole larger than the normal, the extra height or strength of which is due wholly to the owner's requirements, including requirements as to keeping the owner's wires clear of trees, shall be erected at the sole expense of the owner.
3. In the case of a pole larger than the normal, the extra height or strength of which is due wholly to the licensee's requirements, including requirements as to keeping the licensee's wires clear of trees, the licensee shall pay to the owner a sum equal to the

difference between the cost in place of such pole and the cost in place of a normal joint pole, the rest of the cost of erecting such pole to be borne by the owner, except in so far as otherwise provided in Section (c) of this Article.

4. In the case of a pole larger than the normal, the extra height or strength which is due to the requirements of both parties or the requirements of public authorities or of property owners, (other than requirements with regard to keeping the wires of one party only clear of trees), the difference between the cost in place of such pole and the cost in place of a normal joint pole shall be shared in the ratio of fifty-five percent by the Cooperative and forty-five percent by the Telephone Company, the rest of the cost of erecting such pole to be borne by the owner.
5. A pole erected between existing poles to provide sufficient clearance and furnish adequate strength to support the circuits of both the owner and licensee, which it would have been unnecessary to erect if joint use had not been undertaken, shall be erected at the sole expense of the licensee.

(b) Any payments for poles made by the licensee under any foregoing provisions of this Article shall not entitle the licensee to the ownership of any part of said poles for which it has contributed in whole or in part.

(c) Where an existing jointly used pole or a non-joint pole is prematurely replaced by a new one solely for the benefit of the licensee, the cost of the new pole shall be divided as specified in Section (a) of this Article and the licensee shall also pay the owner the value in place of the replaced pole, plus the cost of removal less the salvage value of such pole. The replaced pole shall be removed and retained by its owner.

(d) Each party shall place, maintain, rearrange, transfer and remove its own attachments at its own expense except as otherwise expressly provided.

(e) The expense of maintaining joint poles shall be borne by the owner thereof except that the cost of replacing poles shall be borne by the parties hereto in the manner provided in Sections (a) and (c) of this Article.

(f) Where service drops of one party crossing over or under lines of the other party are attached to the other party's poles, either directly or by means of a pole top extension fixture, the cost shall be borne as follows:

- (1) Pole top extension fixtures shall be provided and installed at the sole expense of the party using them.
- (2) Where an existing pole is replaced with a taller one to provide the necessary clearance the party owning the service drop shall pay to the party owning the pole a sum equal to the difference in cost in place between the new pole and a new pole of the same size as the replaced pole, together with a sum representing the value in place of the replaced pole plus the cost of removal less the salvage value of such pole, the owner of the pole to remove and retain such pole.

(g) When, in order to improve an existing condition considered undesirable by both parties, existing poles of one of the parties are abandoned in favor of combining lines on poles of the other party, the then value in place of the abandoned poles plus the cost of removal less the salvage value of such poles shall be shared in the ratio of fifty-five percent by the Cooperative and forty-five percent by the Telephone Company.

(h) Payments made by either party to the other under the provisions of this Article shall be based on the table of values listed in Appendix A.

ARTICLE IX

PROCEDURE WHEN CHARACTER OF CIRCUITS IS CHANGED

When either party desires to change the character of its circuits on jointly used poles, such party shall give ~~...~~ 60 ... days notice to the other party of such

contemplated change and in the event that the party agrees in writing to joint use with such changed circuits, then the joint use of such poles shall be continued with such changes in construction as may be required to meet the terms of the specifications mentioned in Article III for the character of circuits involved and such other changes as may be agreed upon. The parties shall cooperate to determine the equitable apportionment of the net expense of such changes. In the event, however, that the other party fails

within 30 days from receipt of such notice to agree in writing to such change in character of circuits, then both parties shall cooperate in accordance with the following plan:

1. The parties hereto shall determine the most practical and economical method of effectively providing for separate lines, either overhead or underground, and the party whose circuits are to be moved shall promptly carry out the necessary work.
2. The net cost of re-establishing such circuits in the new location as are necessary to furnish the same business facilities that existed in the joint use section at the time such change was decided upon, shall be borne by the licensee; provided, however, that the owner shall bear an equitable share of such cost wherever the change was occasioned by the necessities of the owner and the licensee would suffer a hardship in having to assume the entire burden of the cost of re-establishing the circuits.

Unless otherwise agreed by the parties, ownership of any new line or underground facilities constructed under the foregoing provisions in a new location shall vest in the party for whose use it is constructed.

ARTICLE X

ABANDONMENT OF JOINTLY USED POLES

(a) If the owner desires at any time to abandon any jointly used pole, it shall give the licensee notice in writing to that effect at least 60 days prior to the date on which it intends to abandon such pole. If at the expiration of said period the owner shall have no attachments on such pole but the licensee shall not have removed all of the attachments therefrom, such pole shall thereupon become the property of the licensee, and the licensee shall save harmless the former owner of such pole from all obligation, liability, damages, cost, expenses or charges incurred thereafter, and not arising out of anything theretofore occurring, because of, or arising out of, the presence or condition of such pole or of any attachments thereon; and shall pay the owner the then value in place of the pole to the licensee but in no case an amount less than the net salvage value of the pole to the owner as provided in Appendix A attached hereto. The former owner shall further evidence transfer of title to the pole by means of a bill of sale. Credit shall be allowed for any payments which the licensee may have made under the provisions of Article VIII - Division of Costs, when the pole was originally set.

(b) The licensee may at any time abandon the use of a joint pole by giving due notice thereof in writing to the owner and by removing therefrom any and all attachments it may have thereon. The licensee shall in such case pay to the owner the full rental for said pole for the then current year.

ARTICLE XI

RENTALS

(a) On or about January 1st of each year the parties acting in cooperation shall, subject to the provisions of Section (b) of this Article, tabulate the total number of joint poles in use as of the preceding day, and the number of poles on which either party as licensee removed all of its attachments during the twelve preceding months, which tabulation shall indicate the number of poles which each party owns on which rentals are to be paid by the other party.

(b) For the purpose of such tabulation, any pole used by the licensee for the sole purpose of attaching wires or cables thereto, either directly or by means of a pole top extension fixture, in order to provide clearance between the facilities of the two parties as distinguished from providing support for such wires or cables, shall not be considered as a joint pole.

(c) If there is provision under a separate agreement between the Telephone Company and the Cooperative for facilities associated with power line carrier systems, the rental provisions of the Agreement of which this article forms a part shall apply for poles on which both types of facilities are present, and no other rentals shall apply. The rental provisions of this Agreement shall not apply, however, where only those facilities directly associated with the power line carrier systems are involved.

(d) The rentals per pole due from either party as licensee to the other party as owner shall be based on the equitable sharing of the economies of joint use as provided for in Appendix B. Subject to the provisions of Article XII, \$ [REDACTED] per annum shall be paid by the Cooperative for each jointly used pole owned by the Telephone Company and \$ [REDACTED] per annum shall be paid by the Telephone Company for each jointly used pole owned by the Cooperative. The smaller total sum shall be deducted from the larger and the Cooperative or the Telephone Company, as the case may be, shall pay to the other the difference between such amounts. The rental herein provided for shall be paid within 10 days after the bill has been submitted.

ARTICLE XII

PERIODICAL ADJUSTMENT OF RENTALS

(a) At any time after 5 years from the date of this Agreement and at intervals of not less than 5 years thereafter, the rentals applicable under this Agreement shall be subject to joint review and adjustment as provided for under Section (b) of this Article upon the written request of either party. In case of adjustment of rentals as herein provided, the new rentals agreed upon shall apply starting with the annual bill next rendered and continuing until again adjusted.

(b) All adjustments of rental shall be in accord with the provisions of Appendix B, and any changes shall take into account the cost factors originally involved in all joint use existing at that time under this Agreement.

ARTICLE XIII

DEFAULTS

(a) If either party shall default in any of its obligations under this Agreement and such default continues thirty (30) days after due notice thereof in writing by the other party, the party not in default may suspend the rights of the party in default in so far as concerns the granting of future joint use and if such default shall continue for a period of 30 days after such suspension, the party not in default may forthwith terminate this Agreement as far as concerns the future granting of joint use.

(b) If either party shall make default in the performance of any work it is obligated to do under this Agreement at its sole expense, the other party may elect to do such work, and the party in default shall reimburse the other party for the cost thereof. Failure on the part of the defaulting party to make such payment within 30 days upon presentation of bills therefor shall, at the election of the other party, constitute a default under Section (a) of this Article.

ARTICLE XIV

EXISTING RIGHTS OF OTHER PARTIES

(a) If either of the parties hereto has, prior to the execution of this Agreement, conferred upon others, not parties to this Agreement, by contract or otherwise, rights or privileges to use any poles covered by this Agreement, nothing herein contained shall be construed as affecting such rights or privileges, and either party hereto shall have the right, by contract or otherwise, to continue and extend such existing rights or privileges, it being expressly understood, however, that for the purpose of this Agreement, the attachments of any such outside party, except those of

a municipality or other public authority, shall be treated as attachments belonging to the grantor, and the rights, obligations, and liabilities hereunder of the grantor in respect to such attachments shall be the same as if it were the actual owner thereof.

(b) Where municipal regulations require either party to allow the use of its poles for fire alarm, police, or other like signal systems, such use shall be permitted under the terms of this Article, provided attachments of such parties are placed and maintained in accordance with the specifications mentioned in Article III.

ARTICLE XV ASSIGNMENT OF RIGHTS

Except as otherwise provided in this Agreement, neither party hereto shall assign or otherwise dispose of this Agreement or any of its rights or interests hereunder, or in any of the jointly used poles, or the attachments or rights of way covered by this Agreement, to any firm, corporation or individual, without the written consent of the other party, except to the United States of America or any agency thereof; provided, however, that nothing herein contained shall prevent or limit the right of either party to mortgage any or all of its property, rights, privileges, and franchises, or lease or transfer any of them to another corporation organized for the purpose of conducting a business of the same general character as that of such party, or to enter into any merger or consolidation; and, in case of the foreclosure of such mortgage; or in case of lease, transfer, merger, or consolidation, its rights and obligations hereunder shall pass to, and be acquired and assumed by, the purchaser on foreclosure, the transferee, lessee, assignee, merging or consolidating company, as the case may be; and provided further that subject to all of the terms and conditions of this Agreement, either party may permit any corporation conducting a business of the same general character as that of such party, and owned, operated, leased and controlled by it, or associated or affiliated with it, the use of all or any part of the space reserved hereunder on any pole covered by this Agreement for the attachments used by such party in the conduct of its said business; and for the purpose of this Agreement, all such attachments maintained on any such pole by the permission as aforesaid of either party hereto shall be considered as the attachments of the party granting such permission, and the rights, obligations and liabilities of such party under this Agreement, with respect to such attachments, shall be the same as if it were the actual owner thereof.

ARTICLE XVI WAIVER OF TERMS OR CONDITIONS

The failure of either party to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

ARTICLE XVII PAYMENT OF TAXES

Each party shall pay all taxes and assessments lawfully levied on its own property upon said jointly used poles, and the taxes and the assessments which are levied on said joint poles shall be paid by the owner thereof, but any tax, fee, or charge levied on owner's poles solely because of their use by the licensee shall be paid by the licensee.

ARTICLE XVIII BILLS AND PAYMENT FOR WORK

Upon the completion of work performed hereunder by either party, the expense of which is to be borne wholly or in part by the other party, the party performing the work shall present to the other party within 60 days after the completion of such work an itemized statement of the costs and such other party shall within 30 days after such statement is presented pay to the party doing the work such other party's proportion of the cost of said work.

ARTICLE XIX
SERVICE OF NOTICES

Whenever in this Agreement notice is provided to be given by either party hereto to the other, such notice shall be in writing and given by letter mailed, or by personal delivery, to the Cooperative at its office at Brandenburg, Kentucky or to the Telephone Company at its office at Brownsville, Kentucky as the case may be, or to such other address as either party may from time to time designate in writing for that purpose.

ARTICLE XX
TERM OF AGREEMENT

Subject to the provisions of Article XIII, Defaults, herein, this Agreement shall remain in effect until terminated at the end of 25 years from the date hereof or thereafter upon the giving of written notice to the other party not less than three years prior to the date of termination.

ARTICLE XXI
EXISTING CONTRACTS

All existing agreements between the parties hereto for the joint use of poles are by mutual consent hereby abrogated and superseded by this Agreement.

Nothing in the foregoing shall preclude the parties to this Agreement from preparing such supplemental operating routines or working practices as they mutually agree to be necessary or desirable to effectively administer the provisions of this Agreement.

ARTICLE XXII
APPROVAL OF ADMINISTRATOR

This Agreement, and any amendment thereof, shall be effective subject to the condition that, during any period in which the Cooperative is a borrower from the Rural Electrification Administration, the Agreement and any amendment thereof shall have the approval in writing of the Administrator of the Rural Electrification Administration.

In witness whereof, the parties hereto, have caused these presents to be executed in triplicate, and their corporate seals to be affixed thereto by their respective officers thereunto duly authorized, on the 21 day of February 1958

AMENDMENT TO GENERAL AGREEMENT FOR JOINT USE OF WOOD POLES

REA FORM 263

Joint Use of Wood Poles

Between

WEDGE COUNTY RURAL ELECTRIC COOPERATIVE CORPORATION
SPRINGFIELD, KENTUCKY

and

MANMOUTH CAVE TELEPHONE COMPANY, BROOKVILLE, KENTUCKY

Amendment to Article VIII of General Agreement for
Joint Use of Wood Poles

The Wedge County Rural Electric Cooperative Corporation and the
Manmouth Cave Telephone Company hereby agreed that the following Amendment

shall be a part of the Agreement between the parties and shall supersede
provisions set forth in Article VIII for the purpose of specifying payments
to be made for work performed as requested.

(a) When the Electric Cooperative is requested to change out and/or
add additional poles in the Cooperative's line for the purpose of joint use
by the Telephone Company, the Telephone Company agrees to assume and pay an
amount equal to the actual cost including engineering and overhead for all
changeouts and additions less the depreciated value of the poles or poles
involved. All requests shall be made in writing. When a request has been
received and approved by the Electric Cooperative, a staking sheet shall be
properly prepared and numbered showing the location and the amount of work
to be done. When the work has been completed, a tabulation of the job shall
be made and the Telephone Company billed for the actual cost involved.

(b) When the Telephone Company is requested to change out or add
additional poles in the Telephone line for the purpose of joint use by the
Electric Cooperative, the Electric Cooperative agrees to assume and pay an
amount equal to the actual cost including engineering and overhead for all
changeouts and additions less the depreciated value of the poles involved.
All requests shall be made in writing. When a written request has been
received and approved by the Telephone Company, a staking sheet shall be
properly prepared and numbered showing the location and the amount of work
to be done. When the work has been completed, a tabulation of the job shall
be made and the Electric Cooperative billed for the actual cost involved.

(c) All requests for joint use attachments shall be made in writing and attached drawing shall accompany all requests submitted showing location, type of construction, and conductor to be served. All requests shall be approved by the Cooperative prior to construction and shall be subject to the rules, regulations and specifications of the Cooperative.

(d) All poles placed in the Electric Cooperative's line shall be of sufficient height to support all conductors and shall be installed by the Electric Cooperative.

(e) The Electric Cooperative and the Telephone Company agree that each party will perform the necessary right-of-way clearing and tree trimming to provide adequate clearance for its own lines in all joint use of poles. It is further agreed that the Electric Cooperative and the Telephone Company will share equally fifty percent each of the cost of controlling the right-of-way by chemical spraying or stump treatment on the basis of 20 foot wide right-of-way. The cost of treating right-of-way in excess of 20 feet will be borne by the Electric Cooperative. It is understood that item (e) covers the treatment of right-of-way after initial construction has been completed unless otherwise mutually agreed by both parties.

It is understood that failure to comply with the Agreement or Amendment thereof shall be cause for cancellation of Agreement.

Executed on the 21st day of February, 1958.

This Appendix contains tables of pole values to be used in dividing costs as provided under Article VIII. It also outlines the steps for adjusting such values to determine any payments that the licensee must make to the owner to defray costs of premature replacement of poles to accommodate the licensee.

A. Tabulation of New Pole Costs.

The following tabulation shall list mutually agreed upon average costs in place of new poles of all kinds of timber, including only such cost items as are repetitive when poles are replaced.

TABLE 1

| HEIGHT | CLASS | | | | | | | | | |
|--------|-------|---|---|--------|--------|-------|-------|---|-------|-------|
| | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| 20' | | | | 15.72 | 17.66 | 16.91 | 16.02 | | 15.40 | 14.76 |
| 22' | | | | 22.43 | 21.43 | 20.45 | 19.49 | | 18.75 | 17.97 |
| 25' | | | | 27.40 | 26.03 | 22.85 | 23.60 | | 22.20 | 21.31 |
| 30' | | | | 32.99 | 32.53 | 28.87 | 29.23 | | 27.28 | |
| 35' | | | | 45.58 | 43.10 | 40.74 | 39.15 | | | |
| 40' | | | | 52.27 | 49.33 | 46.97 | 44.92 | | | |
| 45' | | | | 61.48 | 58.76 | 56.11 | 54.77 | | | |
| 50' | | | | 73.85 | 69.39 | 66.78 | 63.74 | | | |
| 55' | | | | 90.18 | 85.49 | | | | | |
| 60' | | | | 108.08 | 103.15 | | | | | |

B. Age Factor for Modifying Values of Poles.

1. The following table of age factors shall be used in adjusting pole costs in Table 1 to arrive at current values in place of existing poles coming under the provisions of this Agreement.

TABLE 2

| AGE OF POLE | 0.3 YEARS | 4-9 YEARS | 10-15 YEARS | 16-21 YEARS | 22-27 YEARS | OVER 27 YEARS |
|-------------|-----------|-----------|-------------|-------------|-------------|---------------|
| FACTOR | 1.0 | .8 | .6 | .4 | .2 | 0 |

C. Cost Level Factor.

1. The values obtained from B are to be modified further by the following factors to allow for periodic variation in pole cost levels.

TABLE 3

| | | |
|-------------------------------------|------------------|-----|
| FOR POLES SET PRIOR TO JAN. 1, 1937 | | .5 |
| FOR POLES SET BETWEEN JAN. 1, 1937 | AND JAN. 1, 1945 | .7 |
| FOR POLES SET BETWEEN JAN. 1, 1945 | AND | 1.0 |
| FOR POLES SET BETWEEN | AND | |

2. It is intended that additional factors will be added to cover future long term changes in costs.

D. Salvage Value of Poles.

1. A figure of 70% of current material costs shall be used for computing salvage values of poles which have been installed not exceeding 10 years. Average values for all kinds of timber shall be used. The following table sets forth mutually agreed upon salvage values.

TABLE 4

| HEIGHT | CLASS | | | | | | | | | |
|--------|-------|---|---|-------|-------|-------|-------|---|------|------|
| | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| 20' | | | | 5.15 | 4.41 | 3.88 | 3.26 | | 2.83 | 2.38 |
| 22' | | | | 6.02 | 5.52 | 4.63 | 3.96 | | 3.44 | 2.90 |
| 25' | | | | 7.67 | 6.71 | 5.89 | 5.01 | | 4.03 | 3.41 |
| 30' | | | | 10.46 | 8.74 | 7.58 | 6.43 | | 5.07 | |
| 35' | | | | 13.16 | 11.42 | 9.77 | 8.66 | | | |
| 40' | | | | 15.17 | 13.71 | 12.06 | 10.63 | | | |
| 45' | | | | 18.32 | 16.48 | 14.58 | 12.92 | | | |
| 50' | | | | 22.96 | 19.84 | 18.01 | 15.88 | | | |
| 55' | | | | 29.69 | 26.40 | | | | | |
| 60' | | | | 35.69 | 32.23 | | | | | |

2. For poles installed longer than 10 years it shall be assumed that the salvage value is equal to the cost of removal.*

E. Cost of Removal.

1. The following table sets forth mutually agreed upon total costs of removing poles.

TABLE 5

| HEIGHT | COST OF REMOVAL** |
|-------------|-------------------|
| 25' OR LESS | 4.81 |
| 30' | 6.73 |
| 35' | 10.20 |
| 40' | 11.56 |
| 45' | 14.57 |
| 50' | 18.66 |
| 55' | 22.50 |

F. Anchors

1. The cost in place of all anchors regardless of size, type or number of thimbles shall be deemed to be \$15.50 per anchor for use in applying the provisions of this Agreement.

*Based on assumption that owner should bear an increasing portion of cost of removal as poles age.
 **Annual variations in costs of removal neglected.

This Appendix describes the basic principles and guides which have been used under this Agreement in setting the rents specified in Article XI and which are to be used in making periodical adjustments of rentals as provided for in Article XII.

Under these principles the rentals are intended, in so far as it is practicable, to result in a sharing of the economies realized by the joint use of pole plant in proportion to the relative costs of separate pole line construction.

The procedures outlined herein take into account the following objectives:

1. An equitable division of savings regardless of the number of jointly used poles owned by each party.
2. Rental rates applicable universally in the area covered by the Agreement regardless of whether the pole lines involved are initially constructed with joint use in view or are existing lines modified for joint use.
3. Appropriate allowance in the rental rates for additional costs incurred by each party in supplying 'normal joint poles', as defined in the Agreement, and the costs of other items required in the joint use of poles which would not be incurred in separate line construction.
4. Rentals based on the costs of "typical miles" of separate lines, of newly constructed joint lines and of existing lines modified to make them suitable for joint use. The 'per mile' values of rentals are then reduced to 'per pole' values for purposes of simplifying tabulations and to provide for the joint use of scattered poles.

The rentals are the dollar values resulting from the licensee paying to the owner, as annual rental, an amount representing the annual charge on a separate line for the licensee less the sum of (a) the annual charges on the additional costs incurred by the licensee in establishing joint use and (b) the licensee's share of the total annual savings. This share is the ratio of the Licensee's typical separate line costs to the sum of the typical separate line costs of each of the parties.

The annual rent payable can also be stated as follows:

| | | | | |
|------------------------------------|--|--------|---|--|
| Licensee's annual rent (Equals) | Annual charges saved by licensee through not having to build a separate line | (Less) | Licensee's appropriate percentage | Total savings in annual charges (Of) realized through joint use |
|------------------------------------|--|--------|---|--|

The cost in place of a line of poles is made up of a number of factors including such items as right-of-way solicitation, clearing, staking, direct labor and material costs of bare poles in place and pro rata shares of construction supervision and overhead. These costs, for a specific area, may differ considerably from corresponding costs in other parts of the country. These variations in pole line costs will, however, affect both power and telephone lines to about the same degree.

The parties to this contract will mutually agree on the average cost of a typical mile of 35 foot, class 6 poles in place in their common area. Below are tabulated appropriate rentals over a range of typical mile costs. From this tabulation the parties shall use the rental payments associated with the value nearest to the agreed upon average cost.

| _____ NAME OF TELEPHONE COMPANY | _____ LOCATION |
| _____ REQUEST NUMBER | _____ DATE |
| To _____ NAME OF COOPERATIVE | _____ LOCATION |

This is to request your permission for this Company to use jointly certain of your poles under the terms and conditions of the General Agreement for Joint Use of Wood Poles which has been executed by your Cooperative and this Company.

The poles for which this permission is requested are located generally within the limits of the extension-of-service project in the territory indicated by the attached map, which also bears the above date and Request Number.

If permission to use these poles is given by you, this Company intends to canvass fully the territory generally within the project limits and if construction of the project by use of your poles for our attachments is begun, will furnish telephone service to all establishments therein desiring service, subject to its tariff rates and regulations.

Our present plan is to start the work involved in this project about _____ MONTH - YEAR
and complete the work about _____ MONTH - YEAR

If permission to use these poles is given by you, this Company proposes to prepare and furnish to you detailed construction plans and drawings to indicate specifically your poles that we wish to use jointly, in accordance with the procedure provided in Article IV or V of the Agreement, as the case may be, together with a map showing the final project limits as determined after engineering is complete. If the final project limits vary substantially from the project limits shown on the map attached hereto, it is understood that this Company will request your further permission to use poles within the territory indicated on the final map.

If the joint use proposed is agreeable to your Cooperative please signify your approval on the second copy of this request in the space provided and return that copy to this Company.

Gentlemen:

Subject: Joint Use Agreement Between

Kentucky 528 Kentucky
and

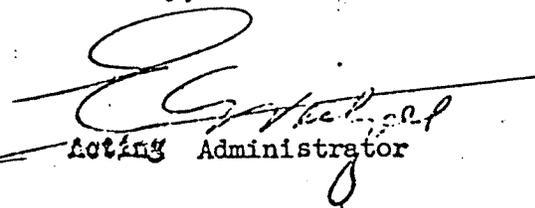

Kentucky 51 Hardin

We are enclosing one copy of the above joint use agreement which has been approved. This agreement sets forth the basis for practicing joint use of facilities. Before entering into specific joint use, the procedures outlined in the agreement must be followed by both parties.

The construction and engineering of facilities for joint use require the full coordination of the activities of both parties. Engineering determinations acceptable to both must be made as to the lines to be used, pole changeouts and additions, and any rearrangement of facilities which may be needed. Such alterations as are necessary should be scheduled promptly to avoid costly delay. Cooperation of both parties will ensure an orderly program permitting maximum benefits of joint use consistent with sound engineering standards. Continued close cooperation will be essential to provide adequate and reliable service to both electric consumers and telephone subscribers.

The services of REA field personnel are always available to you should questions arise regarding this agreement.

Sincerely,

Acting Administrator

THE WITHIN General Agreement - Joint Use of Wood Poles in
Rural Areas, dated February 1, 1972, between Kentucky Telephone
Company and Nolin Rural Electric Cooperative Corporation

SUBMITTED BY THE ABOVE DESIGNATED BORROWER PURSUANT TO THE
TERMS OF THE LOAN CONTRACT, IS HEREBY APPROVED SOLELY FOR THE
PURPOSES OF SUCH CONTRACT.

FOR THE ADMINISTRATOR
E. C. WEITZELL
Acting Administrator

DATED
JUN 19 1973

BORROWER'S COPY

GENERAL AGREEMENT

JOINT USE OF WOOD POLES IN RURAL AREAS

PREAMBLE

Nolin Rural Electric Cooperative Corporation, a corporation organized under the laws of the State of Kentucky, (hereinafter called the "Electrical Distributor"), and Kentucky Telephone Company, a corporation organized under the laws of the State of _____ (hereinafter called the "Telephone Company"), desiring to cooperate in the joint use of their respective poles, erected or to be erected within the rural areas in which both parties render service in the State(s) of

Kentucky, whenever and wherever such use shall, in the estimation of both parties, be compatible with their respective needs, do hereby, in consideration of the premises and the mutual covenants herein contained, covenant and agree for themselves and their respective successors and assigns as follows:

ARTICLE I

SCOPE OF AGREEMENT

(a) This Agreement shall be in effect in the areas in which both of the parties render service in the State(s) of Kentucky, and shall cover all wood poles now existing or hereafter erected in the above territories, except where said poles are covered by later brought under an urban contract of the parties, when said poles are brought under this Agreement in accordance with the procedure hereinafter provided.

(b) Each party reserves the right to exclude any of its facilities from joint use.

(c) It is the intention of the parties that adequate electric and telephone service shall be made available to the widest practicable number of rural users in the above territory.

ARTICLE II

EXPLANATION OF TERMS

For the purpose of this Agreement, the following terms shall have the following meanings:

1. A JOINT POLE is a pole jointly used by both parties.

2. A NORMAL JOINT POLE is a pole which is just tall enough to provide normal spaces, as normal space is hereinafter defined, for the respective parties and just strong enough to meet the requirements of the specifications mentioned in Article III for the attachments ordinarily placed by the parties in their respective normal spaces. Such pole for the purpose of this Agreement shall be a 35 foot class 5 wood pole as classified by the pole classification tables of the American Standards Association.

3. SPACE is the linear portion of a joint pole parallel to its axis reserved for the exclusive use of one of the parties (subject only to the exceptions provided for in this Article and the specifications mentioned in Article III which in certain instances permit the making of certain attachments by one party in the space reserved for the other party).

4. NORMAL SPACE is the following described space:

a. For the Electrical Distributor the uppermost 6½ feet, measured from top of pole.

b. For the Telephone Company a space of 2 feet, at a sufficient distance below the space of the Electrical Distributor to provide at all times the minimum clearance required by the specifications mentioned in Article III

and at a sufficient height above ground to provide the proper vertical clearance above ground or track rails for the lowest horizontally run line wires or cables attached in such space.

The foregoing definition of "a normal joint pole" is not intended to preclude the use of joint poles shorter or less strength than the normal joint pole in locations where such poles will meet the requirements of the parties hereto.

The above assignment of space is not intended to preclude the use of vertical runs or the mounting of such equipment as terminals or meters on the lower portions of the pole when mutually agreeable.

ARTICLE III SPECIFICATIONS

Except as otherwise provided in Section (f) of Article VII, referring to construction temporarily exempt from the application of the specifications mentioned herein, the joint use of the poles covered by this Agreement shall at all times be in conformity with accepted modern methods such as those suggested in Edison Electric Institute Publication No. 3112 and shall at all times conform to the requirements of the National Electrical Safety Code, Sixth Edition, and subsequent revisions thereof, except where the lawful requirements of public authorities may be more stringent, in which case the latter will govern.

In establishing joint use of wood poles whether installed new for joint use or installed initially for circuits of either party, the total transverse and vertical loads for all conductors attached to a pole covered by this Agreement shall not, under the assumed storm loadings of the National Electrical Safety Code for the area in which the pole is located, exceed fifty (50) percent of the ultimate fiber stress of the supporting pole. In the case of existing pole lines, the strength of the pole shall be assumed to be the same as when new.

Modifications of, additions to, or construction practices supplementing wholly or in part the requirements of the National Electrical Safety Code, shall, when accepted in writing by both parties hereto through their agents authorized to approve such changes, likewise govern the joint use of poles.

ARTICLE IV ESTABLISHING JOINT USE OF EXISTING POLES

(a) Before either party shall make use of the poles of the other party under this Agreement, it shall request permission therefor in writing on the form attached hereto and identified as Appendix A or such other form as may be mutually agreed upon and shall comply with the procedure set forth in said approved form.

(b) Whenever either party desires to reserve space for its attachments on any pole owned by the other party, either as initial space or additional space on such pole, it shall make written application therefor, specifying the location of the poles in question, the amount of space desired on each pole, and the number and character of the circuits to be placed thereon. If, in the judgment of the owner, the poles are necessary for its own sole use or joint use under the circumstances is undesirable, the owner shall have the right to reject the application. In any event, within a reasonable period after the receipt of such application the owner shall notify the applicant in writing whether the application is approved or rejected. Upon receipt of notice from the owner that the application has been approved, and after the completion of any transferring or rearranging which is required to permit the attaching of the applicant's circuits on such poles, including any necessary pole replacements, the applicant shall have the right as licensee hereunder to use such space in accordance with the terms of the application and of this Agreement.

(c) Whenever any jointly used pole or any pole about to be so used under the provisions of this Agreement is insufficient in height or strength for the existing attachments and for the proposed additional attachments thereon, the owner shall promptly replace such pole with a new pole of the necessary height and strength and shall make such other changes in the existing pole line in which such pole is included as the conditions may then require.

(d) Each party shall place, transfer and rearrange its own attachments, place guys and anchors to sustain any unbalanced loads caused by its attachments, and perform any tree trimming or cutting incidental thereto. Each party shall, with due diligence, attempt at all times to execute such work promptly and in such manner as not to interfere with the service of the other party.

(c) Wherever practicable, double thimble anchor rods with anchors of sufficient holding power to sustain any unbalanced loads of the two parties shall be installed and used jointly. The ownership of the double thimble anchor rods and anchors will be vested in the owner of the pole. In any case, where one party provides at the request of the other party double thimble anchor rods and anchors for the use of both parties the party requesting the double thimble anchor rods and anchors shall pay to the party placing the double thimble anchor rods and anchors a sum equal to half of the cost of the anchors and anchor rods in place. In cases where the existing anchors are adequate for the needs of both parties the party desiring additional guys may where necessary install an adapter at its own expense. In cases where existing anchor rods and anchors are adequate for the needs of only one party the party desiring additional guys and anchors may where necessary install anchors and anchor rods at no expense to the other party or in the case of right-of-way restrictions may provide a double thimble anchor rod and anchor in place of the existing anchor rod and anchor to which the other party can attach its existing guy at its own expense.

(f) The cost of establishing the joint use of existing poles including the making of any necessary pole replacements, shall be borne by the parties hereto in the manner provided in Article VIII - Division of Costs.

ARTICLE V

ESTABLISHING JOINT USE OF NEW POLES

(a) Whenever either party hereto requires new pole facilities for an additional pole line, an extension of an existing pole line, or in connection with the reconstruction of an existing pole line, it shall promptly notify the other party to that effect in writing (verbal notice subsequently confirmed in writing may be given in cases of emergency) stating the proposed location and character of the new poles and the character of circuits it intends to use thereon and indicating whether or not such pole facilities will be, in the estimation of the party proposing to construct the new pole facilities, susceptible of joint use. Within a reasonable period after the receipt of such notice, the other party shall reply in writing, stating whether it does, or does not, desire space on the said poles and, if it does desire space thereon, the character of the circuits it desires to use and the amount of space it wishes to reserve. If such other party requests space on the proposed new poles and if the character and number of its circuits and attachments are such that the party proposing to construct the new pole facilities does not consider joint use undesirable, then it shall erect poles suitable for such joint use, subject, however, to the provisions of Section (b) of this Article, and subject further to the condition that request by either party for space on proposed new poles of the other party under this Agreement shall be made in writing on the form attached hereto and identified as Appendix A or such other form as may be mutually agreed upon and shall comply with the procedure set forth in said approved form. The applicant for space on the poles shall be promptly notified in writing of the action taken on the application.

(b) In any case where the parties hereto shall conclude arrangements for the joint use of any new poles to be erected, and the party proposing to construct the new pole facilities already owns more than its proportionate share of joint poles, the parties shall take into consideration the desirability of having the new pole facilities owned by the party owning less than its proportionate share of joint poles so as to work towards such a division of ownership of the joint poles that neither party shall be obligated to pay to the other any adjustment payments because of their respective use of joint poles owned by the other, due regard being given to the desirability of avoiding mixed ownership of poles in a section of line.

(c) Each party shall place its own attachments on the new joint poles and place guys and anchors to sustain any unbalanced loads caused by its attachments except as otherwise provided under Article IV, Section (e). The party owning the pole line shall provide initial right-of-way clearance 15 feet on each side of the center line to the extent practicable, all right-of-way in excess of this 30 foot swath to be borne by the party requiring the additional width. Each party shall, with due diligence, attempt to execute its work promptly and in such manner as not to interfere with the service of the other party.

ARTICLE VI

RIGHT OF WAY FOR LICENSEE'S ATTACHMENTS

While the owner and licensee will cooperate as far as may be practicable in obtaining rights-of-way for both parties on joint poles, the owner does not warrant or assure to the licensee any right-of-way privileges or easements on, over or across streets, alleys and public thoroughfares, and private or publicly owned property, and if the licensee shall at any time be prevented from placing or maintaining its attachments on the owner's poles, no liability on account thereof shall attach to the owner of the poles.

ARTICLE VII
MAINTENANCE OF POLES AND ATTACHMENTS

(a) The owner shall maintain its joint poles in a safe and servicable condition and in accordance with the specifications mentioned in Article III and shall replace, reinforce or repair such of these poles as become defective. In case of emergency, with the giving of verbal notice, licensee may replace joint poles, anchors and guys as may be considered necessary for public safety or the restoration of licensee's service, in which case the licensee shall be reimbursed by the owner in the full amount of the cost of labor and materials plus any applicable overhead expenses.

(b) When replacing a jointly used pole carrying terminals of aerial cable, underground connection, or transformer equipment, the new pole shall be set in the same hole which the replaced pole occupied unless special conditions make it necessary or mutually desirable to set it in a different location.

(c) Whenever it is necessary to replace or relocate a jointly used pole, the owner shall, before making such replacement or relocation, give reasonable notice thereof in writing (except in case of emergency, when verbal notice will be given and subsequently confirmed in writing) to the licensee, specifying in such notice the time of such proposed replacement or relocation and the licensee shall at the time so specified transfer its attachments to the new or relocated joint pole. Should the licensee fail to transfer its attachments to the new joint pole on the date specified for such transfer of attachments, the owner may elect to relinquish the ownership of the old pole from which it has removed its attachments, with the giving of verbal notice to be subsequently followed in writing. Such old pole shall thereupon, at no cost to the licensee, become the property of the licensee, and the licensee shall save harmless the former owner of such pole from all obligation, liability, damages, cost, expenses or charges incurred thereafter, and not arising out of anything theretofore occurring, because of, or arising out of, the presence or condition of such pole or of any attachments thereon. In instances where the Electrical Distributor is the owner of such pole the unused portion of the pole above the licensee's attachments shall be cut off and removed by the owner before relinquishing ownership, if the pole remains in structural conflict with the power route.

(d) Each party shall at all times maintain all of its attachments in accordance with the specifications mentioned in Article III and shall keep them in safe condition and in thorough repair. Where the parties mutually agree that right-of-way maintenance on existing joint use lines is necessary for the protection of their service, the cost of the following work shall be shared as follows:

1. The removal of dead or dangerous trees shall be shared equally.
2. Chemical control or removal of undergrowth by cutting at the ground line in a swath measured fifteen feet on each side of the center line as follows:
 - a. 50% of the cost on routes supporting bare aerial wire telephone circuits shall be borne by each party.
 - b. 10% of the costs shall be borne by the Telephone Company, 90% by the Electrical Distributor on routes supporting telephone multiple pair insulated wire.
 - c. Costs will not be shared on routes supporting cable or abrasive resistant wire. Each party will provide for its own requirements.

(e) Each party shall be responsible for trimming its own circuits at its own expense where right-of-way is maintained by trimming (side growth, undergrowth or overhead growth).

(f) Any existing joint use construction of the parties hereto which does not conform to the specifications mentioned in Article III shall be brought into conformity therewith as soon as practicable.

When such existing construction shall have been brought into conformity with said specification, it shall at all times thereafter be maintained as provided in Sections (a) and (d) of this Article.

(g) The cost of maintaining poles and attachments and of bringing existing joint use construction into conformity with said specifications shall be borne by the parties hereto in the manner provided in Article VIII - Division of Costs.

ARTICLE VIII
DIVISION OF COSTS

(a) The cost of erecting new joint poles coming under this Agreement, to construct new pole lines, to make tensions to existing pole lines, or to replace existing poles, except as covered in (c) below, shall be borne by the parties as follows:

1. A normal joint pole, or joint pole smaller than normal, shall be erected at the sole expense of the owner.
2. A pole larger than the normal, the extra height or strength of which is due wholly to the owner's requirements including requirements as to keeping the owner's wires clear of trees shall be erected at the sole expense of the owner.
3. In the case of a pole larger than the normal, the extra height or strength of which is due wholly to the licensee's requirements including requirements as to keeping the licensee's wires clear of trees, the licensee shall pay to the owner a sum equal to the difference between the cost in place of such pole and the cost in place of a normal joint pole, the rest of the cost of erecting such pole to be borne by the owner, except insofar as otherwise provided in Section (c) of this Article.
4. In the case of a pole larger than the normal, the extra height or strength which is due to the requirements of both parties or the requirements for proper ground clearance or of public authorities or of property owners, (other than requirements with regard to keeping the wires of one party only clear of trees), the difference between the cost in place of such pole and the cost in place of a normal joint pole shall be shared equally by the licensee and the owner, the rest of the cost of erecting such pole to be borne by the owner.
5. A pole, including all appurtenances or fixtures, erected between existing poles to provide sufficient clearance and furnish adequate strength to support the circuits of both the owner and the licensee, which it would have been unnecessary to erect if joint use had not been undertaken, shall be erected at the sole expense of the licensee.

(b) Any payments for poles made by the licensee under any foregoing provisions of this Article shall not entitle the licensee to the ownership of any part of said poles for which it has contributed in whole or in part.

(c) Where an existing jointly used pole or a non-joint pole is prematurely replaced by a new one solely for the benefit of the licensee, the cost of the new pole shall be divided as specified in Section (a) of this Article and the licensee shall pay the owner the labor cost of removal of the existing pole and the labor cost of replacing or transferring of all appurtenances on the existing pole. The replaced pole shall be removed and retained by its owner.

(d) Each party shall place, maintain, rearrange, transfer and remove its own attachments at its own expense except as otherwise expressly provided herein.

(e) The expense of maintaining joint poles shall be borne by the owner thereof except that the cost of replacing poles shall be borne by the parties hereto in the manner provided in Sections (a) and (c) of this Article.

(f) Where service drops of one party crossing over or under lines of the other party are attached to the other party's poles, either directly or by means of a pole top extension fixture, the cost shall be borne as follows:

1. Pole top extension fixtures shall be provided and installed at the sole expense of the party using them.
2. Where an existing pole is replaced by a taller one to provide the necessary clearance the party owning the service drop shall pay to the party owning the pole the cost of the new pole plus the labor costs of replacing or transferring of the appurtenances on the existing pole, the owner of the existing pole to remove and retain such pole at his own expense.

(g) Payments made by either party to the other under the provisions of this Article may be based on the estimated or actual cost as mutually agreed upon (including overhead) of making such changes but in no event, however, shall either party be required to pay for such changes more than 120% of the estimated cost supplied by the other if such cost estimate shall have been requested and furnished before the changes were made.

ARTICLE IX
PROCEDURE WHEN CHARACTER OF CIRCUITS IS CHANGED

When either party desires to change the character of its circuits on jointly used poles, such party shall give immediate notice to the other party of such contemplated change and in the event that the party agrees in writing to joint use with such changed circuits, then the joint use of such poles shall be continued with such changes of construction as may be required to meet the terms of the specifications mentioned in Article III for the character of circuits involved and such other changes as may be agreed upon. The parties shall cooperate to determine the equitable apportionment of the net expense of such changes. In the event, however, that the other party fails within 30 days from receipt of such notice to agree in writing to such change in character of circuits, then both parties shall cooperate in accordance with the following plan:

1. The parties hereto shall determine the most practical and economical method of effectively providing for separate lines, either overhead or underground, and the party whose circuits are to be moved shall carry out the necessary work as promptly as practicable.
2. The net costs of re-establishing such circuits in the new location as are necessary to furnish the same business facilities that existed in the joint use section at the time such change was decided upon, shall be borne by the licensee; provided, however, that the owner shall bear the cost whenever the change was occasioned by the necessities of the owner. When the net costs are borne by the owner they shall not include the cost of the new pole line constructed by the licensee.

Unless otherwise agreed by the parties, ownership of any new line or underground facilities constructed under the foregoing provisions in a new location shall vest in the party for whose use it is constructed.

ARTICLE X
ABANDONMENT OF JOINT USED POLES

(a) If the owner desires at any time to abandon any jointly used pole, it shall, except as provided in Article VII, Section (c), give the licensee notice in writing to that effect at least 60 days prior to the date on which it intends to abandon such pole. If at the expiration of said period the owner shall have no attachments thereon, such pole shall thereupon become the property of the licensee, and the licensee shall save harmless the former owner of such pole from all obligation, liability, damages, cost, expenses or charges incurred thereafter, and not arising out of anything theretofore occurring, because of, or arising out of, the presence or condition of such pole or of any attachments thereon; and shall pay the owner the then value in place of the pole to the owner. The former owner shall further evidence transfer of title to the pole by appropriate means. Credit shall be allowed for any payments which the licensee may have made under the provisions of Article VII - Division of Costs, when the pole was originally set, provided the licensee furnishes proof of such payment.

(b) The licensee may at any time abandon the use of a joint pole by removing therefrom any and all attachments it may have thereon and by giving such notice as may be mutually agreed upon.

ARTICLE XI
ADJUSTMENT PAYMENTS

(a) The parties contemplate that the use or reservation of space on poles by each party, as licensee of the other under this Agreement shall be based on the equitable sharing of the economies of joint use.

(b) On or about December 1st of each year, each party, acting in cooperation with the other, and subject to the provisions of Section (c) of this Article, shall ascertain and tabulate the total number of poles in use by each party as licensee, which tabulation shall indicate the number of poles in use by each party as licensee for which an adjustment payment by one of the parties to the other is to be determined as hereinafter provided.

(c) For the purpose of such tabulation, any pole used by the licensee for the sole purpose of attaching wires or cables thereto, either directly or by means of a pole top extension fixture, in order to provide clearance between the facilities of the two parties as distinguished from providing support for such wires or cables, shall not be considered as a joint pole.

(d) If there is provision under a separate agreement between the Telephone Company and the Electrical Distributor for facilities associated with power line carrier systems, the adjustment payment provisions of the

agreement of which this Article forms a part shall apply for poles on which both types of facilities are present and no other adjustment payments shall apply. The adjustment payment provisions of this Agreement shall not apply, however, where only those facilities directly associated with the power line carrier systems are involved.

(e) Adjustment payments per pole due from one party as licensee to the other party or owner shall, subject to the provisions of Article XII, be [redacted] per annum by the Electrical Distributor for each jointly used pole owned by the Telephone Company and [redacted] per annum by the Telephone Company for each jointly used pole owned by the Electrical Distributor. The smaller total sum shall be deducted from the larger and the Electrical Distributor or the Telephone Company, as the case may be, shall pay to the other the difference between such amounts. The adjustment payment herein provided shall be paid within ten days after the bill has been submitted.

(f) At intervals not exceeding five (5) years an actual inventory of attachments shall be made by representatives of the parties. If there is any difference in the number of attachments found by the inventory and the number arrived at by tabulating those reported, correction will be made by retroactive billing for any attachments identified as being responsible for the difference, and any remaining difference will be spread evenly over the years since the last inventory, and billing adjusted accordingly except as otherwise provided under Article XII, Section (c).

ARTICLE XII

PERIODICAL ADJUSTMENT OF PAYMENTS

(a) At any time after 3 years from the date of this Agreement and at intervals of not less than 3 years thereafter, the payments applicable under this Agreement shall be subject to joint review and adjustment as provided for under Section (b) of this Article upon the written request of either party. In case of adjustment of payments as herein provided, the new payments agreed upon shall apply starting with the annual bill next rendered and continuing until again adjusted.

(b) All adjustments of rental shall be in accord with the provisions of Appendix B, and any changes shall take into account the cost factors originally involved in all joint use existing at that time under this Agreement.

(c) An actual inventory of attachments shall be made by representatives of the parties coincident with the effective date of any adjustment rentals.

ARTICLE XIII

DEFAULTS

(a) If either party shall default in any of its obligations under this Agreement and such default continues thirty (30) days after due notice thereof in writing by the other party, the party not in default may suspend the rights of the party in default insofar as concerns the granting of future joint use and if such default shall continue for a period of 90 days after such suspension, the party not in default may forthwith terminate this Agreement as far as concerns the future granting of joint use.

(b) If after reasonable notice either party shall make default in the performance of any work it is obligated to do under this Agreement at its sole expense, the other party may elect to do such work, and the party in default shall reimburse the other party for the cost thereof. Failure on the part of the defaulting party to make such payment within 30 days upon presentation of bills therefor shall, at the election of the other party, constitute a default under Section (a) of this Article.

ARTICLE XIV

EXISTING RIGHTS OF OTHER PARTIES

(a) If either of the parties hereto has, prior to the execution of this Agreement, conferred upon others, not parties to this Agreement, by contract or otherwise, rights or privileges to use any poles covered by this Agreement, nothing herein contained shall be construed as affecting such rights or privileges, and either party hereto shall have the right, by contract or otherwise, to continue and extend such existing rights or privileges, it being expressly understood, however, that for the purpose of this Agreement, the attachments of any such outside party, except those of a municipality or other public authority, shall be treated as attachments belonging to the grantor, and the rights, obligations, and liabilities hereunder of the grantor in respect to such attachments shall be the same as if it were the actual owner thereof.

(b) Where municipal regulations require either party to allow the use of its poles for fire alarm, police, or other like signal systems, such use shall be permitted under the terms of this Article, provided attachments of such parties are placed and maintained in accordance with the specifications mentioned in Article III.

ARTICLE XV
ASSIGNMENT OF RIGHTS

Except as otherwise provided in this Agreement, neither party hereto shall assign or otherwise dispose of this Agreement or any of its rights or interests hereunder, or in any of the jointly used poles, or the attachments or rights-of-way covered by this Agreement, to any firm, corporation or individual, without the written consent of the other party, except to the United States of America or any agency thereof; provided, however, that nothing herein contained shall prevent or limit the right of either party to mortgage any or all of its property, rights, privileges, and franchises, or lease or transfer any of them to another corporation organized for the purpose of conducting a business of the same general character as that of such party, or to enter into any merger or consolidation; and, in case of the foreclosure of such mortgage; or in case of lease, transfer, merger, or consolidation, its rights and obligations hereunder shall pass to, and be acquired and assumed by, the purchaser on foreclosure, the transferee, lessee, assignee, merging or consolidating company, as the case may be; and provided further that subject to all of the terms and conditions of this Agreement, either party may permit any corporation conducting a business of the same general character as that of such party, and owned, operated, leased and controlled by it, or associated or affiliated with it, the use of all or any part of the space reserved hereunder on any pole covered by this Agreement for the attachments used by such party in the conduct of its said business; and for the purpose of this Agreement, all such attachments maintained on any such pole by the permission as aforesaid of either party hereto shall be considered as the attachments of the party granting such permission, and the rights, obligations and liabilities of such party under this Agreement, with respect to such attachments, shall be the same as if it were the actual owner thereof.

ARTICLE XVI
WAIVER OF TERMS OR CONDITIONS

The failure of either party to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

ARTICLE XVII
PAYMENT OF TAXES

Each party shall pay all taxes and assessments lawfully levied on its own property upon said jointly used poles, and the taxes and the assessments which are levied on said joint poles shall be paid by the owner thereof, but any tax, fee, or charge levied on owner's poles solely because of their use by the licensee shall be paid by the licensee.

ARTICLE XVIII
BILLS AND PAYMENT FOR WORK

Upon the completion of work performed hereunder by either party, the expense of which is to be borne wholly or in part by the other party, the party performing the work shall present to the other party within 90 days after the completion of such work an itemized statement of the costs and such other party shall within 30 days after such statement is presented pay to the party doing the work such other party's proportion of the cost of said work.

ARTICLE XIX
SERVICE OF NOTICES

Whenever in this Agreement notice is provided to be given by either party hereto to the other, such notice shall be in writing and given by letter mailed, or by personal delivery, to the Electrical Distributor at its office

P. O. Box 668, Elizabethtown, Kentucky 42701

or to the Telephone Company at its office at London, Kentucky

_____ as the case may be,
or to such other address as either party may from time to time designate in writing for that purpose.

ARTICLE XX

TERM OF AGREEMENT

be effective on and after January 1, 1971 and shall

This Agreement shall continue in full force and effect until the 1st day of January, 1976, and shall continue thereafter until terminated, insofar as the making of attachments to additional poles is concerned, by either party giving to the other one (1) years notice in writing of intention to terminate the right of making attachments to additional poles. Any such termination of the right to make attachments to additional poles shall not, however, abrogate or terminate the right of either party to maintain the attachments theretofore made on the poles of the other or additional attachments to such poles, and all such attachments shall continue thereafter to be maintained, pursuant to and in accordance with the terms of this Agreement, which Agreement shall, so long as said attachments are continued, remain in full force and effect solely and only for the purpose of governing and controlling the rights and obligations of the parties with respect to said attachments.

ARTICLE XXI

EXISTING CONTRACTS

All existing agreements between the parties hereto for the joint use of poles in rural areas are by mutual consent hereby abrogated and superseded by this Agreement.

Nothing in the foregoing shall preclude the parties to this agreement from preparing such supplemental operating routines or working practices as they mutually agree to be necessary or desirable to effectively administer the provisions of this Agreement.

ARTICLE XXII

APPROVAL OF THE ADMINISTRATOR

This Agreement, and any amendment thereof, shall be effective subject to the condition that, during any period in which the Electrical Distributor is a borrower from the Rural Electrification Administration, the Agreement and any amendment thereof shall have the approval in writing of the Administrator of the Rural Electrification Administration.

In witness whereof the parties hereto, have caused these presents to be executed in triplicate, and their corporate seals to be affixed thereto by their respective officers thereunto duly authorized, on the 1st day of February, 1972.

KENTUCKY TELEPHONE COMPANY

BY W. J. Johnson

West Kentucky RECC/Windstream Kentucky East, LLC Joint Use Agreement

This AGREEMENT, made this 12th day of August, 2010 by and between West Kentucky Rural Electric Cooperative Corporation, a corporation organized under the laws of the State of Kentucky, hereinafter called the "Power Distributor", and Windstream Kentucky East, LLC, a corporation organized under the laws of the State of Delaware, hereinafter called the "Telephone Company".

WHEREAS, the Power Distributor and the Telephone Company desire to continue joint use of distribution poles and in the future to establish further joint use of their respective distribution poles when and where joint use shall be of mutual advantage; and

WHEREAS, because of changed conditions and experience gained, and to facilitate administration of joint use, the Power Distributor notified the Telephone Company in a letter dated April 16, 2009, of its intent to terminate the existing joint use agreement dated January 1, 1995, and to enter into a new joint use agreement; and

NOW, THEREFORE, in consideration of the premises and the mutual covenants herein contained, the parties hereto, for themselves, their successors and assigns, do hereby covenant and agree as follows:

ARTICLE I

DEFINITIONS

For the purpose of this Agreement, the following terms when used herein, shall have the following meanings.

- A. ATTACHMENTS - are any wires, cables, strands, materials or apparatus affixed to a Joint Use Pole, excluding ground wires, now or hereafter used by either party in the construction, operation or maintenance of its plant. A pedestal that is adjacent to a Joint Use Pole, but not affixed to the pole, shall not be considered an Attachment. Service drops originating on a joint use pole are not considered an additional attachment on that pole for rental purposes.
- B. CODE – is the National Electrical Safety Code, as it may be amended from time to time.
- C. COST or COSTS – are the reasonable actual documented costs (including loading factors, associated overheads, and overtime as applicable) of a party performing work under this Agreement.
- D. DAYS – as used herein shall mean calendar days.

- E. EMERGENCY – is a situation where a Joint Use Pole is damaged, or subject to failing, and such failure is reasonably believed to create risk of personal injury or damage to property.
- F. INJURIES – include death or personal injury.
- G. JOINT USE – is the maintaining of Attachments of both parties on the same pole at the same time.
- H. JOINT USE POLE – is a pole upon which space is provided under this Agreement for the Attachments of both parties on the same pole at the same time.
- I. LICENSEE – is the party having the right under this Agreement to make Attachments to a pole that the other party owns.
- J. NJUNS – is the National Joint Utility Notification System.
- K. NON – COMPLIANT ATTACHMENT – is an Attachment that requires an increase in the ground clearance or separation on a jointly used pole as required by the National electrical Safety Code.
- L. OWNER – is the party owning the pole to which Attachments are made.
- M. REARRANGING – is the moving of Attachments from one position to another on a pole.
- N. RIGHT OF WAY – is the legal right to use the property of another.
- O. SECONDARY POLE – is a pole installed for the express purpose of providing required clearances for a Service Drop to a customer’s location. A Secondary Pole is a pole that typically services only a few customers or building as the case may be, does not have transformers or other electrical equipment on it, is located outside the main line and supports the Power Distributor’s wires with less than 600 volts.
- P. SERVICE DROP – is a wire or wires used to connect to a customer’s location that requires no guys under applicable specification of Article IV. A Service Drop may run directly from a pole used to service many customers to a specific customer’s location, without the use of any other poles, or a Service Drop may itself be supported by more than one pole to carry the Service Drop to the customer’s location.
- Q. STANDARD JOINT USE POLE – means a “40 foot Class 5” distribution pole which meets the requirements of the Code for support and clearance of electric supply and communications conductors now or hereafter used by either party in the conduct of its business. The parties may agree to use a pole smaller than the

standard class, but under no condition shall the Standard Joint Use Pole be less than the minimum requirements of the Code. The foregoing definition of a “standard joint use pole” is not intended to preclude the use of joint poles shorter or taller or of a different strength than the Standard Joint Use Pole in locations where it is mutually agreed such poles will meet the requirements of the parties hereto, nor is the foregoing definition of a “standard joint use pole” intended to require the replacement of poles that are currently in service.

- R. **STANDARD SPACE ALLOCATION** – means an allocation of sufficient space on a Joint Use Pole for use of each party, taking into consideration requirements of the current Code, more particularly defined as follows:
1. For Power Distributor, the use of 10 feet of space on a 45 foot pole, 8 feet of space on a 40 foot pole, and 6.5 feet on a 35 foot pole measured downward from the top of the Joint Use Pole; and
 2. For Telephone Company, the use of 2 feet of pole space measured upward from the initial point of attachment on the Joint Use Pole. The initial point of attachment shall be the lowest point on the pole required to provide at all times the Code minimum clearance above ground for the lowest horizontally run line, wire or cable attached in such space except where by mutual agreement of the field representatives of the parties sound engineering practices dictate a higher minimum clearance.
 3. The Standard Space Allocation in R1 & R2 above shall include a Code separation of 3 feet 4 inches (3’ 4”) or neutral space, which is between the Power Distributor Standard Space Allocation and the Telephone Company Standard Space Allocation.
- S. **TEMPORARY TRANSFER or TEMPORARY PLACEMENT** – is the transferring or placing of the Telephone Company’s facilities to another pole by the Power Distributor, and such a transfer or placement shall be considered permanent by either party.
- T. **TRANSFERRING or TRANSFER** – is the removing of Attachments from one pole and placing them upon another pole.

ARTICLE II

TERRITORY AND SCOPE OF AGREEMENT

This Agreement shall be in effect and shall cover all distribution poles of each of the parties now existing, hereafter erected or acquired within the common operating areas served by the parties hereto when said poles are brought hereunder, excepting;

1. Poles, not yet in Joint Use, which, in the Owner's judgment, should be restricted for reasons of safety.
2. Poles, not yet in Joint Use, which, in the Owner's judgment, should be restricted for reasons related to construction practices or clearances.

ARTICLE III

PERMISSION FOR JOINT USE

Subject to the terms and conditions of this Agreement, each party hereby permits joint use of its poles by the other party in accordance with permitting requirements of Article VI and the following:

- A. **Use of Allocated Space.** Either party is permitted, without additional charge, to use the other party's space on a pole for the purpose of installing and maintaining street lighting, traffic signal systems, and vertical attachments (such as but not limited to ground wires, gang operated switch control rods and underground risers) if by the terms of the Code the proposed use is authorized and such use does not unreasonably interfere with the other party's use. If the allocated space is subsequently needed and the Code provisions cannot be met, then the party to whom the space is not allocated, but who is utilizing the space allocated to the other party, shall be responsible, at its sole expense, for the Cost of Rearrangement or pole replacement necessary in order to accommodate the party having the allocated space.
- B. **Use of Unallocated Space.** As long as the provisions of the Code are met, either party may use, without additional charge, space on Joint Use Poles outside of the Standard Space Allocation that is neither in use by an authorized third party nor reserved by the Owner. If the space is subsequently needed by the Owner and if Code provisions cannot be met, then Licensee shall be responsible, at its sole expense, for the cost of Rearrangement or pole replacement necessary to accommodate the Owner's use of such space. If the space is subsequently needed by a third party having a prior permit or similar contractual right to use the specific space on such pole that predates the Licensee's use of the pole, and if Code provisions cannot be met, then the Licensee shall be responsible, at its sole expense, for the cost of Rearrangement or pole replacement necessary to accommodate the use of such space.
- C. **Use of Space on Existing Poles.** If Attachments were properly made and are in compliance with the prior joint use agreement between the parties as of the effective date of this Agreement, such Attachments shall be deemed to be authorized Attachments under this Agreement, and shall be subject to post-attachment terms and conditions of this Agreement on a going forward basis.

- D. **Unauthorized Uses.** Licensee shall be subject to all of the requirement and obligations under this Agreement, but shall have none of the rights of a Licensee under this Agreement for use of the Owner's pole(s) which have not been properly authorized in accordance with this Agreement.

ARTICLE IV

SPECIFICATIONS

- A. **Generally.** Joint Use of poles covered by this Agreement shall at all times be in conformity with applicable terms and provisions of law and with the requirements of the Code in effect at the time and respective attachments are made.
- B. **Existing Joint Use Poles.** As long as the provisions of Code in effect at the time the Attachments were made have been met, any Joint Use Pole in place before the Commencement Date of this Agreement shall be deemed satisfactory to both parties and adequate for their requirements, whether or not the space allocations defined herein have been observed; provided, however that all Attachments on such poles shall be subject to the requirements of this Agreement as referenced in Article III.C. If said pole does not meet the provisions of the Code(s) that was/were in effect at the time of the attachment, Licensee will be notified of required correction and upon completion the attachment will be deemed satisfactory.
- C. **New Construction.** Except for Secondary Poles, the minimum height and strength for new poles installed by either party (including replacements of existing poles) shall be a Standard Joint Use Pole as referenced in Article I, paragraph Q. Either party may install Secondary Poles that have less height and/or strength than the Standard Joint Use Pole, provided that the height and strength of new Secondary Poles are sufficient to permit attachments of each party's Service Drops consistent with the requirements of the Code.

ARTICLE V

RIGHT OF WAY AND LINE CLEARING

- A. **Easements.**
1. **New Easements.** The Owner and Licensee will reasonably cooperate in obtaining easements for both parties where Owner elects to obtain an easement for its poles, equipment and facilities. In instances where the Owner is obtaining a new easement, Owner will use reasonable efforts to obtain an easement for both parties on Joint Use Poles. Such easements obtained for the benefit of both parties shall be in sufficient detail for identification and recording, and shall be subject to inspection by the other party upon request.

2. **Objections of Property Owners and Others.** No guarantee is given by the Owner of permission of property owners, municipalities or others for Licensee's use of a Joint Use Pole. If objection is made to Licensee's right to maintain facilities on Owner's poles and Licensee is unable to satisfactorily resolve the matter within a reasonable time, including time for appeals, the Owner may at any time, upon notice in writing to the Licensee, require the Licensee to remove its Attachments from the poles involved and the Licensee shall within sixty (60) days after receipt of notice, or within a mutually agreeable time period if additional time is needed, remove its Attachments from said poles at its sole expense. Reasonable extensions of time shall not be denied under this section if the proposed extension of time does not materially prejudice the Owner. Licensee further agrees to indemnify and hold Owner harmless from any and all actual and documented losses, damages, fines, penalties of any kind (including reasonable attorneys' fees) which may arise from Licensee's failure to obtain all necessary easements, rights and permits to use a Joint Use Pole.
3. **Cost Sharing.** Nothing stated herein shall preclude the parties from mutually sharing the cost of easement acquisition. If the parties share the cost of obtaining an easement, the easement shall name both parties as grantees.

B. **Line Clearing and Tree Trimming.** Line clearing and trimming will be performed as follows:

1. When constructing a new Joint Use Pole line the Owner shall cut, clear and trim a right-of-way sufficient to provide adequate clearance in accordance with the ordinary clearing practices of Power Distributor, if possible.
2. After the initial clearing, each party shall be responsible for its own trimming, clearing and cutting, regardless of who owns the pole.

ARTICLE VI

PROCEDURE FOR ESTABLISHING JOINT USE ATTACHMENTS

- A. **Attachment Process – No Make Ready Required.** The following rules shall apply to Attachments that may be made to Owner's poles without make-ready or other work to accommodate Licensee's Attachments:
 1. Licensee may make an Attachment to Owner's pole within Licensee's Standard Space Allocation without advance notice to Owner if the attachment otherwise meets the requirements of the Code and if the Attachment does not interfere with the Owner's use of the Pole or with others who are attached to Owner's pole.
 2. Licensee may, subject to Article III, make an Attachment to Owner's Pole outside of Licensee's Standard Space Allocation without advance notice to Owner if the

Attachment otherwise meets the requirements of the Code and if the Attachment does not interfere with the Owner's use of the pole or with others who are attached to the Owner's pole.

3. Licensee shall notify Owner of the number and location of all Attachments made to Owner's poles under this Section A no less frequently than monthly on the form attached hereto as Exhibit A.

B. **Attachment Process – Make Ready Required.** For Attachments other than Attachments that may be under Section A, the following process shall apply:

1. Licensee shall make application by submitting to Owner the Joint Use Notification/Request Form attached as Exhibit B.
2. Within ten (10) days after the receipt of the application, Owner shall notify Licensee whether any changes and/or modifications to Owner's poles and related facilities are required in order to accommodate Licensee's Attachments, such changes and modifications being the "Make Ready Construction Work." If no changes and/or modifications are required, Owner shall notify Licensee, and Licensee may proceed with making such Attachments pursuant to Section A.
3. If changes are necessary and Licensee still desires to make Attachments to such pole, Owner, at Licensee's cost, will begin the make ready engineering that includes preparing engineering plans for the Make Ready Construction Work. Licensee and Owner shall work together in good faith to resolve any design and engineering issues and Licensee shall revise its plans as necessary. After the make ready engineering plans are complete, Owner shall provide Licensee a good faith estimate of the Costs and timeframe required to complete the Make Ready Construction Work. Upon Licensee's approval of such estimate of Costs for Make Ready Construction Work, Owner shall thereafter complete the Make Ready Construction Work at Licensee's Cost within sixty (60) days or within a reasonable extended deadline for complex Make Ready Construction Work that takes additional time to complete.
4. When the Make Ready Construction Work is complete, Owner shall notify Licensee and Licensee shall then have the right to make the authorized Attachments pursuant to Section A. Licensee shall complete such Attachments within sixty (60) days of notice from Owner. Reasonable extensions of time shall not be denied under this section if the proposed extension of time does not materially prejudice the Owner.

C. **Service Drops.** Service Drops are expressly excluded from the requirements of this Article unless Make Ready Construction Work is required in which case Section B shall apply. Subject to Code compliance, Licensee may place Service Drops not requiring make Ready Construction Work on Owner's pole without submitting an application or notifying Owner.

- D. **Unauthorized Attachment.** After the Initial Inventory (defined below), if Owner finds that the Licensee placed an Attachment without complying with the notification requirements of Sections A and B above, such Attachment shall be considered an Unauthorized Attachment (the “Unauthorized Attachment”). When discovered, Owner will notify Licensee of the Unauthorized Attachment in writing sent via certified mail to the operational and legal addresses referenced in Article XVIII. The notice shall set forth the location of the Unauthorized Attachment and shall specify the amount owed on account of such Unauthorized Attachment. For purposes of determining the amount owed, Licensee shall be responsible for paying an amount equal to the adjustment payment in effect for each of the years since the last inventory (under this Agreement or any predecessor agreements between the parties). If Licensee can demonstrate to the reasonable satisfaction of Owner when such Attachment was made, then the amount owed shall be an amount equal to the adjustment payment in effect for each of the years since the Attachment was made.

ARTICLE VII

REPLACING OR RELOCATING POLES; TRANSFERS

- A. **Pole Replacement; Pole Relocation.** Whenever it is necessary to replace or change the location of a jointly used pole, the Owner shall give reasonable notice to Licensee to allow for planning and scheduling thereof in writing (except in cases of Emergency, which shall be handled under Section VII.D., below), specifying in such notice the time of such proposed replacement or relocation. The licensee shall transfer its Attachments to the new or relocated Joint Use Pole within sixty (60) days of receipt of Owner’s written notice (or notice through NJUNS or similar formal electronic notification system mutually agreed to by the parties), which notice shall not be sent until other parties have transferred their attachments, if applicable, and Licensee is “next to go” for transfer work. Licensee must complete the Transfers within a reasonable extended deadline or on a schedule mutually agreeable to the parties in the following circumstances:
1. For a complex transfer that will take more than sixty (60) days to accomplish;
 2. In instances where transfers are “bulk loaded” into NJUNS upon the parties’ initial participation in NJUNS or;
 3. In instances where more than five (5) times the transferring party’s average monthly transfers during its most recent fiscal year is being requested (except in cases where the number of transfers requested is 50 or less in which case the sixty (60) day deadline set forth in this paragraph A shall apply).

Reasonable extensions of time shall not be denied under this section if the proposed extension of time does not materially prejudice the Owner. In situations where Transfers are required by a lawful demand of a property owner, or governmental or

regulatory authority, the parties shall work together in good faith to expedite the transfer work. Licensee further agrees to indemnify and hold Owner harmless from any and all documented and actual losses, damages, fines, penalties or costs of any kind (including reasonable attorneys' fees) which may arise from Licensee's failure to transfer its Attachments in response to such lawful demand.

B. Transfers.

1. Should the Licensee fail to transfer its Attachments within the time period outlined in Section A above (a "Delinquent Transfer"), Owner may escalate the matter in accordance with Article XX, and Owner may also choose to refuse to permit Licensee to make additional Attachments until such time as all Delinquent Transfers are made. Alternatively, Owner may abandon the subject pole(s) to Licensee in accordance with Article XIII or declare a default pursuant to Article XVI.
2. If the Licensee indicates that it has completed a transfer and Owner finds that Licensee has not completed the transfer when Owner goes to pull the pole, Licensee shall pay Owner all actual and documented costs associated with such return trip.

C. Replacement of Other Party's Poles. Except as provided for in Section D.1., below, a party may only replace poles for the other party with the other party's written concurrence. The Costs associated with such replacement shall be paid by the Owner of the pole being replaced. The new pole shall remain the property of the original Owner whose pole was replaced.

D. Emergency Situations. Both parties recognize and agree that there are inherent dangers involved in the transmission and distribution of electricity. The parties agree that unforeseeable Emergency conditions will exist from time to time.

1. **Pole Replacement – Emergency.** When due to accidents, storm damage, the dangerous condition of a pole, or an Emergency, and it is necessary for the Licensee to replace the Owner's pole immediately to restore service to its customer or to eliminate a hazardous condition and the Owner cannot perform the work in time to meet the Licensee's requirements, Licensee may replace the Owner's pole. Licensee shall give the Owner written notice of the Emergency pole replacement within five (5) days of completing the pole replacement. The actual and documented costs associated with replacing a pole during such a situation shall be paid by the Owner of the pole requiring replacement. The new pole shall remain the property of the original Owner.
2. **Temporary Placement of Attachments.** During the repair and restoration of utility power as a result of a storm event, accident, or from other damage to the Joint Use Poles in an Emergency situation (including a pole replacement under paragraph 1 of this Section), or in a situation where it is necessary to eliminate a

hazardous condition, the Power Distributor may make a Temporary Placement of Attachments of the Telephone Company to the Joint Use Poles. The Power Distributor will send written notice to the Telephone Company of such Temporary Placements within five (5) days of making them. The Telephone Company will take action to permanently attach such attachments within sixty (60) days of receipt of the written notice, or within a reasonable extended deadline mutually agreeable to the parties if more time is needed to complete the work. Reasonable extensions of time shall not be denied under this section if the proposed extension of time does not materially prejudice the Owner. Because of the aforementioned inherent dangers, the Telephone Company is not authorized to replace or temporarily secure the Power Distributor facilities, wires or conduit.

ARTICLE VIII

CORRECTIVE MEASURES AND THIRD PARTY COMPLAINTS

- A. **Licensee Responsibility.** If any Attachment of the Licensee is found to be in violation of the terms of this Agreement (including, without limitation, the provision relating to compliance with the Code), then the parties will work together to minimize the Cost of correcting any such deficiencies, but the Licensee shall be responsible for the full actual and documented cost of any necessary or appropriate corrective measures, including removal and replacement of the pole and all Transfers or other work incident thereto. Licensee shall correct such Non-Compliant Attachment within ninety (90) days of Owner's notification to Licensee (unless Owner reasonably determines that safety, emergency or service restoration efforts require Licensee to take corrective action within a shorter time period.)
- B. **Owner Responsibility.** If any Attachment of the Owner is found to be in violation of the terms of this Agreement (including, without limitation, the provisions relating to compliance with the Code), then the parties will work together to minimize the Cost of correcting any such deficiencies, but the Owner shall be responsible for the full Cost of any necessary or appropriate corrective measures, including removal and replacement of the pole and all Transfers or other work incident thereto. Owner shall correct such Non-Compliant Attachment within ninety (90) days of notice of such Attachment (unless safety, emergency or service restoration efforts exist in which case Owner shall take corrective action within a shorter time period.)
- C. **Shared Responsibility.** If there exists a violation of the terms of this Agreement (including, without limitation, the provision relating to compliance with the Code), and it cannot be determined whose Attachment has caused such violation, then the parties will work together to minimize the cost of correcting any such deficiencies. Each party will bear its respective Costs of Transferring its Attachments, and shall share equally in any other Costs associated with correcting the violation; provided, however, that if a party can modify its Attachments so that they no longer are a cause of the violation or deficiency, then such party may elect to make such modification instead of otherwise sharing in such Costs. Such a modification shall not relieve a

party from sharing in such Costs if the party making the modification could still have been a cause of any deficiency that remains. The parties shall work together to correct such Non-Compliant Attachments within ninety (90 days of one party's notification to the other (unless Owner reasonably determines that safety, emergency or service restoration efforts require Licensee to take corrective action within a shorter time period.)

- D. **Third Parties.** If one or more third party attachee(s) caused the violation, then the Owner will make reasonable effort, consistent with its attachment agreement(s) with such third party attachee(s), to require such third party attachee(s) to pay the corrective Costs incurred by all who have Attachments on the pole, including the Licensee, Owner and any other attachees. Owner will provide the name, billing address, phone and contact of the party causing the violation.
- E. **Corrective Measures - Dispute Resolution and Enforcement.** If Licensee fails to correct a Non-Compliant Attachment within the time frames specified in this Article, such Attachment shall be immediately subject to the dispute resolution and enforcement provision under Article XX.
- F. **Third Party Complaints.** Licensee shall address in a commercially reasonable time period, any inquiries or complaints raised by persons other than Licensee or Owner or their employees, contractors, and agents with regard to or concerning Licensee's facilities that are attached to Owner's poles, or Licensee's right and obligations under this Agreement.

ARTICLE IX

MAINTENANCE OF POLES AND ATTACHMENTS

- A. **Obligation to Maintain Poles.** Except as herein otherwise expressly provided, each party shall, at its own expense, maintain its poles in a serviceable condition in accordance with the Code and shall reinforce or repair its own poles as they become known to be unserviceable.
- B. **Obligation to Maintain Attachments.** Except as herein otherwise expressly provided, each party at its own cost shall place, maintain, Rearrange, Transfer and remove its own Attachments, and shall at all times perform such work promptly and in such a manner as not to interfere with work or service being performed by the other party. Each party shall, at its own expense, at all times maintain all of its Attachments in safe condition, thorough repair, and in accordance with the requirements of the Code. An Attachment is deemed to comply with Code if it complies with the minimum requirements of the Code in effect at the time the Attachment was placed, and nothing in this provision shall require either party to inspect existing Attachments and proactively bring them up to date with the current Code unless otherwise required by applicable law.

- C. **Obligation to Train and Warn.** The Licensee shall insure that its employees are properly trained in climbing on and working on Owner's poles safely and that they are aware of the dangers inherent in making contact with the electrical conductors or electrical equipment of Power Distributor. Without limitation of the foregoing, the Telephone Company shall prohibit its employees from handling energized lines of the Power Distributor, including lines attached to Secondary Poles.
- D. **No Warranty of Condition.** Notwithstanding the maintenance obligations of Owner under Sections A and B, above, both parties disclaim any warranty or representation regarding the condition and safety of their poles. To the extent permitted by law, each party expressly assumes responsibility for determining the condition of all poles to be climbed or otherwise worked on by its employees whether for the placement of Attachments, maintaining or Rearranging Attachments, or for other reasons. Except for performing Transfer work from unserviceable poles to replacement poles and for replacing poles pursuant to Section VII.C and Section VII.D, a Licensee shall not permit its employees to work on poles that are unserviceable until the Owner has corrected the unserviceable condition or has determined that the pole is serviceable.

ARTICLE X

DIVISION OF COSTS

- A. The cost of establishing a new Joint Use Pole line shall be borne by the parties in accordance with the following:
1. A Standard Joint Use Pole, or smaller, shall be erected at the sole Cost of the Owner.
 2. In the case of a pole larger than the Standard Joint Use Pole required by either party, the party requiring the extra height and/or class shall pay for the additional Cost of the pole. If Owner adds features or betterments not required by Licensee, Owner shall pay the Costs associated with such features or betterments.
 3. In the case of a pole larger than the Standard Joint Use Pole where the additional height and/or strength required is for the purpose of both parties, the Cost of the pole shall be shared by both parties, with Owner being responsible for the cost of a Standard Joint Use Pole and Licensee being responsible for one half of the Cost of the additional height or strength.
 4. In the case of a pole larger or stronger than the Standard Joint Use Pole, where height or strength in addition to that needed for the purpose of either or both parties hereto is necessary in order to meet the requirements of the Code, a public authority or of property owners, the Cost of the additional height or strength shall be paid by the Owner.

- B. The cost of establishing Joint Use on existing pole lines or modifying existing Joint Use Pole lines shall be borne by the parties in accordance with the following:
1. For placement of intermediate poles for the Licensee, the Licensee shall pay the total actual and documented cost of installing the new pole. Each Party shall be responsible for attaching its own facilities.
 2. For replacement of non-defective poles for the Licensee, Costs shall be governed by Articles III, VI, and VIII, as applicable.
 3. For replacement of non-defective poles for the Owner, at the mutual request of both parties, or due to the requirements of the Code, a public authority or of property owners, Section A above shall govern unless the situation is otherwise specifically governed by Articles III, VI, or VIII.
 4. For replacement of existing defective poles, Costs shall be governed by Section A above.
- C. Except as otherwise specifically provided herein, each party shall bear the costs of placement, Transfer, and Rearrangement of its own Attachments, place guys and anchors to sustain any unbalanced loads caused by its Attachments, and perform any tree trimming or cutting incident thereto.
- D. When less costly Rearrangements can be performed by either party which would defer the cost of replacing a pole, such Rearrangements may be made and the Cost will be borne by the party requesting pole replacement; provided, however, that the final decision of whether or not to replace a pole shall remain with the Owner of the pole.
- E. Any payments made by the Licensee under the foregoing provision of this Article shall not entitle the Licensee to ownership of any part of said pole.
- F. Each party shall bear the Cost of repairing damages to the other party's facilities occasioned by its improper construction practices or its negligence.
- G. Either party may request documentation supporting any demand for payment.

ARTICLE XI

COORDINATION AND PLANNING

- A. **Generally.** At least once per quarter, at the written request of either party, management representatives of each party with responsibility for overseeing the party's overhead plant and related facilities subject to this Agreement shall discuss the status of any operational issues that have arisen between the parties under this

Agreement. The intent of these discussions is to encourage greater planning and coordination of operational issues between the parties.

- B. **Annual Planning Meeting.** On or before October 1 of each year that this Agreement is in effect, at the written request of either party, local management representatives of each party with responsibility for overseeing the party's overhead plant and related facilities subject to this Agreement shall meet and confer to exchange information concerning pole relocation and replacement work during the upcoming calendar year. The parties shall exchange estimates (to the extent they are available) of the number of poles that each party reasonably expects to relocate or replace during the next calendar year along with the time frame for such relocations or replacements (as to each party, a "Work Plan"). Additional meetings may be scheduled at the request of either party if necessary to facilitate pole relocation/replacement work and transfers.
- C. **Existing Delinquent Transfers or Non-Compliant Attachments.** Within one-hundred-twenty (120) days after execution of this Agreement, representatives from both parties will meet at a mutually agreeable location to discuss Delinquent Transfers and Non-Compliant Attachments in existence at the time of contract execution. The parties shall then cooperate to establish a reasonable deadline for completion of work required to remedy the Delinquent Transfers and Non – Compliant Attachments. Reasonable extensions of time should not be denied if they would not result in material prejudice to the party requesting the work, and if the other party performing the work is acting with reasonable diligence to complete the work. If a party fails to remedy a Delinquent Transfer or Non-Compliant Attachment by the agreed upon deadline, or if that party disputes that it is responsible for performing the work, the other party may initiate the upper management escalation procedure set forth in Article XX.
- D. **Coordination of Complex Work.** When a party desires to change or upgrade its system which causes it to exceed its Standard Space Allocation and to substantially relocate a joint use route for its own operation requirements, it shall notify the other party in writing and, within sixty (60) days of receipt of such notice, the parties shall discuss and exchange the information necessary to determine if the desired changes in construction can be conducted in a cost-efficient manner for both parties.
- E. **Cost Sharing for Complex Work.** For any work required pursuant to Section D, the cost of establishing such joint use route shall be mutually agreed upon by the parties hereto; provided, however that nothing in this Section E shall prevent the Owner from relocating its attachments at its own cost and expense if the parties fail to reach agreement on cost sharing pursuant to this Section E. In this situation, the Owner shall abandon the subject poles to the Licensee in accordance with Article XIII.
- F. **Ownership of New Poles.** In any case, ownership of any new poles placed pursuant to this Article shall remain with the owner of the poles that were replaced, unless otherwise agreed to by the parties in writing.

- G. **Applicability to Road Widening and Related Projects.** The provision of Sections C and D of Article shall not apply to road move projects prompted by a governmental entity or agency.

ARTICLE XII

ANCHORS

Anchors required by either party shall be placed by the party requiring the anchor at its own expense. Notwithstanding the forgoing, the parties may by mutual consent install anchors to be used jointly by both parties upon Cost sharing or other arrangements agreed upon by the parties. Guy leads and anchors will possess the strength required by the Code, will be installed and used in accordance with the reasonable requirements of the Owner and will follow the specifications herein:

1. Following the Commencement Date of this Agreement, all anchors and guys shall be installed prior to the installation of Licensee's messenger wires or cables. Licensee's guy lead must be of sufficient length and strength to accommodate loads applied by the Attachments. No anchor installed following the Commencement Date shall be placed within 1 foot of any existing anchor. Guy markers meeting Licensee's specifications shall be installed on every newly placed guy attached to Owner's pole after the Commencement Date.
2. Each party shall install and maintain its own guy wires. Licensee shall not attach any down guy to Owner's anchors or to other attaching parties' anchors without prior written permission from such Owner or other party as the case may be, such permission shall not be unreasonably withheld.
3. All down guys, head guys or messenger dead ends installed by Licensee shall be attached to the pole by the use of "through" bolts. Under no circumstances shall Licensee install down guys, head guys or messenger dead ends by means of encircling wooden poles with such Attachments.

ARTICLE XIII

ABANDONMENT OF JOINT USE POLES

- A. **Abandonment of Poles by Owner to Licensee.** Anytime Owner desires to abandon any Joint Use Pole, it shall give Licensee at least sixty (60) days' written notice. If, at the expiration of such period, Owner and any third parties shall have no Attachments on such pole but Licensee shall not have removed all of its Attachments therefrom, Owner may transfer ownership of such pole to Licensee by sending written notification confirming the transfer in the form attached hereto as Exhibit D. The pole shall thereupon become the property of Licensee, and Licensee shall pay the Owner an amount equal to the original cost of the abandoned pole less depreciation (or, if the original cost of the pole is not available, the cost of the pole being removed

shall be determined by the current installed Cost of an equivalent pole depreciated using a thirty (30) year straight line depreciation schedule by the number of years since the Pole was installed. Licensee shall also save harmless the former Owner from all obligations, liabilities, damages, costs, expenses, or charges incurred thereafter because of or arising out of the presence, location or condition of such pole or any of Licensee's Attachments thereon, unless such liabilities or damages arise from the gross negligence or intentional acts or omissions of the former Owner.

- B. **Abandonment by Licensee.** Licensee may, at any time, abandon the use of a Joint Use Pole by removing therefrom any and all Attachments it may have thereon. No refund of adjustment fees shall be due Licensee on account of such abandonment, and following such removal, no attachment shall again be made to such pole without complying with the requirements of Article VI.

ARTICLE XIV

ADJUSTMENT PAYMENTS

- A. **Adjustment of Payments.** Adjustment payments shall cover rentals accruing during the calendar year and shall be based upon the number of poles that are occupied on the first day of December of the year in which rentals accrue. On or around December 1, 2010, and December 1st of each year thereafter during the time this Agreement is in effect, the parties shall cooperate in creating a schedule of pole rental showing the number of Joint Use Poles which the other party occupies as Licensee. The party owning the greater number of Joint Use Poles shall render to the other party a net rental billing. Such billing shall reflect the number of Joint Use Poles owned by each party, multiplied by the then current annual pole rental rate as set for in Exhibit C, with the net difference being the actual amount billed.
- B. **HWI Adjustment.** The rates set forth in Exhibit C shall be effective as of January 1, 2010, and shall remain in effect through December 31, 2011 (the "Base Rate"). The Base Rate shall be escalated, effective January 1, 2012, and annually thereafter, based upon the percentage change in the Handy-Whitman Index (South Atlantic Region, FERC Account 364, Line 44, Poles, Towers and Fixtures) ("HWI") between the two preceding July 1 index numbers. Power Distributor shall supply upon request to the Telephone Company a reference to the location of "HWI" index numbers.
- C. **Periodic Review of Adjustment Payment.** No sooner than five year from the Commencement Date of this Agreement and in intervals no more frequent than every five years, thereafter, the annual pole rental rate methodology set forth in Exhibit C shall be subject to joint review by the parties. If, within ninety (90) days after the receipts of such request by either party, the parties fail to agree to a revision of such rate, then the adjustment payment per pole shall be established at the then existing Base Rate, escalated by the HWI for one year. The following year, the adjustment payment per pole shall be an amount equal to 40% of the then average in plant cost factors of providing and maintaining the Joint Use Poles covered by this Agreement

for the party owning the greater number of Joint Use Poles covered by this Agreement. The new rate shall thereafter be adjusted in accordance with Section B, above, until again revised pursuant to this Section.

- D. **Other Work.** Upon completion of any work done by one party for which payment is due from the other party, the party performing the work shall present to the other party, within ninety (90) days after the completion of such work (or, in the discretion of the Owner, the completion of all related work, including third party work), a bill showing the amount due and a breakdown of the Costs. The parties will cooperate to ensure that both are provided the necessary information to certify that the bills are correct.
- E. **Payment and Disputed Charges.** The adjustment payment herein provided for, or any other bill for payment of work, shall be paid within forty-five (45) days after the bill has been received, unless said party disputes the amount billed. In case of such dispute, either party may escalate the matter in accordance with Article XX. Any undisputed amounts shall be paid within the forty-five (45) day time period.
- F. **Late Charges.** Payments not paid within the specified time period shall accrue late payment charges of one and one-half percent (1.5%) per month or the maximum amount permitted by applicable law, whichever is less.

ARTICLE XV

INVENTORY OF ATTACHMENTS

- A. **Initial Inventory.** Upon request of either party at any time after the execution of this Agreement, an actual inventory of poles each party is attached to shall be made jointly by representatives of the parties or by a third party chosen by the parties (the "Initial Inventory"). If there is any difference in (a) the number of poles found by the inventory and (b) the number arrived at by tabulating those invoiced and reported under this Agreement and any predecessor agreements between the parties, correction will be made by retroactive billing for the number of poles identified as being responsible for the difference, and any remaining difference will be spread evenly over the years since the last inventory or five years whichever is less (under this Agreement or any predecessor agreements between the parties) and billing adjusted accordingly using the rate in effect for each of the respective years. At the election of the party owning the greater number of poles and so long as there is not a material and reasonable dispute between the parties concerning the results of such inventory, any inventory conducted within two (2) years prior to the commencement Date may be used as the initial inventory, and in such event, the initial inventory shall be deemed to have been completed as of the Commencement Date.
- B. **Five Year Pole Inventories.** Five (5) years after the Initial Inventory and at intervals no more frequent than every five (5) years thereafter (unless otherwise mutually agreed by the parties), an actual inventory of poles each party is attached to shall be

made jointly by representatives of the parties or by a third party chosen by both parties. If there is any difference in the number of poles found by subsequent inventories and the number invoiced in the corresponding billing, correction will be made by retroactive billing for any poles identified as being responsible for the difference, and any remaining difference will be spread evenly over the years since the last inventory and billing adjusted accordingly using the rate in effect for each of the respective years.

- C. **Inventory Methodologies.** In lieu of the foregoing, the parties may mutually agree to alternative inventory procedures.
- D. **Cost Sharing.** Each party shall equally share the cost of making such inventory of attachments.

ARTICLE XVI

DEFAULTS

Notwithstanding any other provision in this Agreement to the contrary, if either party shall fail to discharge any of its obligations under this Agreement and such failure shall continue for sixty (60) days after notice thereof in writing from the other party sent via certified mail to the operational and legal addresses referenced in Article XVIII, all rights of the party in default hereunder, pertaining to making Attachments to additional poles of the other, shall be suspended by sending written notification of the suspension to the defaulting party via certified mail to the Article XVIII addresses. If such default shall continue for a period of ninety (90) days after receipt of the suspension, the non-defaulting party may, by sending written notification to the defaulting party via certified mail to the Article XVIII addresses, terminate the right of both parties to attach to additional poles of the other party. Any termination of the right of the parties to attach to additional poles of the other party shall not abrogate or terminate the right of either party to attach to existing Joint Use Poles or to maintain and Transfer existing Attachments to replaced or relocated poles. All such Attachments shall continue thereafter to be maintained pursuant to and in accordance with the terms of this Agreement, which Agreement shall, so long as said Attachments are continued, remain in full force and effect solely and only for the purpose of governing and controlling the rights and obligations of the parties with respect to such Attachments.

ARTICLE XVII

LIABILITY AND DAMAGES

- A. **General Indemnification.** Licensee shall indemnify, protect, and save Owner harmless from and against any and all liabilities, claims, demands and costs incurred by reason of (a) damage to property, (b) injury to or death of persons, including payments made under any workers' compensation law or under any plan for employees' disability and death benefits, and (c) any slander, defamation, or

infringement claim; provided that the foregoing liabilities, claims, demands and costs arise out of or are caused by the Licensee's use of or work on Owner's facilities including, without limitation, the erection, maintenance, presence, use, removal, or abandonment of Licensee's attachments, or by the proximity of the respective cables, wires, apparatus and appliances of the Licensee to any of the facilities belonging to the Owner or to other parties jointly using the Owner's poles, or arise out of or are caused by any act of Licensee or its employees, agents, contractors and their subcontractors on or in the vicinity of Owner's poles. The obligation of indemnity shall include, without limitation, any attorney's and/or legal fees or costs.

B. **Survival and Interpretation.** The indemnification provision of this Agreement (whether contained in this Article or otherwise) shall survive termination of this Agreement and shall be enforced to the fullest extent permitted by applicable law. Nothing in this Agreement shall waive or in any way limited any limitations of liability or privileges or immunities available to governmental utility companies under applicable law.

XVIII INSURANCE

A. Each Party shall obtain and maintain, in full force and effect at all times, during operations covered by this Agreement, such minimum insurance as will cover the obligations and liabilities of said Party, its agents, and its employees which may arise from the operations under this Agreement. Insurance shall have limits of not less than:

Commercial General Liability policy of minimum limits of:

| | |
|---|--------------------------------|
| General Aggregate | \$ 2,000,000 per policy period |
| Products/Completed Operations Aggregate | \$ 2,000,000 per policy period |
| Personal Injury/Advertising | \$ 2,000,000 per occurrence |
| Each Occurrence | \$ 2,000,000 per occurrence |
| Fire Legal Liability | \$ 50,000 any one fire |

The policy will be endorsed to show the above aggregate limits applying to "each" job site or, as an alternative, the General Aggregate will be increased to \$4,000,000 per policy period. Policy will also specifically state the coverage applies to all operations conducted by the respective Party, its employees, or agents on behalf of that Party's Corporation or subsidiary.

Where the performance of the work involves structural property, underground property, or blasting, each Party's Commercial General Liability insurance policy shall provide coverage to the insured for legal liability arising from operations under this Agreement for property damage:

arising out of blasting,

arising out of collapse of, or structural injury to, any building or structure or

To underground facilities and utilities.

B. Business Automobile Liability policy with minimum limits of:

| | |
|-----------------------|---------------------------|
| Bodily Injury | \$2,000,000 per accident |
| Property Damage | \$ 2,000,000 per accident |
| OR | |
| Combined Single Limit | \$ 2,000,000 per accident |

The policy will be issued using symbol "1 - any auto" coverage.

C. Workers Compensation:

Part 1 - Medical Benefits Statutory

Part 2 - Employer's Liability as indicated:

| | |
|---------------------------|--------------------------|
| Bodily Injury by Accident | \$ 100,000 each accident |
| Bodily Injury by Disease | \$ 100,000 each employee |
| Bodily Injury by Disease | \$ 500,000 policy limit |

The policy will show the state in which operation on behalf of the Party and/or subsidiary is being conducted. For operations conducted within monopolistic (state fund) states, the Party will furnish a certificate of compliance from the appropriate state fund administrator.

D. In each and every policy, the other Party's Corporation and its subsidiaries shall be named an "additional insured" with respect to activities performed on behalf of the Party's Corporation and its subsidiaries.

Coverage provided by the policies listed in this paragraph will be issued by an insurance company, licensed in the state in which operations on behalf of the Party are to be conducted. It is acceptable to use both primary and excess/umbrella policies to obtain necessary limits.

Each Party will furnish to the other Party, a certificate evidencing insurance coverage as stated above. Such certificate shall provide for a thirty-day prior notice to the other Party of any cancellation or material changes in coverage and shall be signed by a legal representative of the issuing insurance company. The certificate of insurance shall be sent to the person identified listed in the Contact Section.

The provisions of sub-paragraphs A, B and C shall also apply to all sub-Licensees, and Licensee shall be responsible for their compliance herewith.

ARTICLE XIX

SERVICE OF NOTICES

- A. Unless otherwise provided in this Agreement, it is expressly agreed and understood between Owner and Licensee that any Notice required to be given by either party to the other pursuant to this Agreement shall be in writing and sent by US Mail, facsimile or by recognized national overnight delivery service and shall be deemed received upon actual delivery or refusal of delivery as evidenced by the records of the parties, the US Postal service or delivery service as the case may be.
- B. Notices shall be sent addressed as follows:

Power Distributor:

Operational Notices: Tim Vied; Manager of Engineering Services

or to such other address as either party may designate by Notice to the other party from time to time in accordance with the terms of this Article.

- C. If at any time, and from time to time, both parties are members of NJUNS and maintain the capability of receiving messages from NJUNS, either party may, upon prior written notice to the other, elect to utilize such capability to provide notices under this Agreement for any matter relating to the operation and maintenance of Joint Use Poles; provided that giving notice via NJUNS does not satisfy the obligation to send a notice via certified mail if such notice is required by this Agreement. If the parties are using NJUNS, the parties may use NJUNS messaging formats in lieu of Exhibits A and B.

ARTICLE XX

TERM AND TERMINATION OF AGREEMENT

Subject to Article XVI, this Agreement shall continue in force and effect for a period of five (5) years from and after the Commencement date. After two five (5) year terms, the Agreement shall automatically extend on the same terms and conditions for successive one year terms until terminated by either party providing written notice at least one hundred eighty (180) days prior to the end of the pending one year term. Termination shall thereafter become effective at the end of the pending one year term. Termination of the agreement shall mean termination of the right of the parties to place Attachments on additional poles owned by the other party. Termination of the Agreement shall not, however, abrogate, or terminate the right of either party to attach to existing Joint Use Poles or to maintain and Transfer existing Attachments to replace or relocated poles. All such Attachments shall continue thereafter to be maintained pursuant to and in accordance with the terms of this Agreement, which Agreement shall, so long as said Attachments are continued, remain in full force and effect solely and only for the purpose of governing and controlling the right and obligations of the parties with respect to such Attachments.

ARTICLE XXI

DISPUTE RESOLUTION

Except in the case of:

- (A) A suit, action, or proceeding by one Party to compel the other Party to comply with its obligation to indemnify the other Party pursuant to this Agreement, or

- (B) A suit, action or proceeding to compel either Party to comply with the dispute resolution procedures set forth in this section, the Parties agree to use the following procedure to resolve any dispute, controversy, or claim arising out of or relating to this Agreement or its breach.

At the written request of a Party, each Party shall designate a knowledgeable, responsible representative to meet and negotiate in good faith to resolve any dispute, controversy, or claim arising under this Agreement. The Parties intend that these negotiations be conducted by non-lawyer, business representatives. The substance of the negotiations shall be left to the discretion of the representatives. Upon mutual agreement, the representatives may utilize other alternative non-binding dispute resolution procedures, such as mediation to assist in the negotiations. Discussions and correspondence between the representatives for the purposes of these negotiations shall be treated as confidential, undertaken for purposes of settlement, shall be exempt from discovery and production, and shall not be admissible in any subsequent proceeding without the concurrence of all Parties. Documents identified in or provided during such negotiations, which are not prepared for purposes of the negotiations, shall not be so exempt and may, if otherwise admissible, be admitted as evidence in any subsequent proceeding.

If a resolution of the dispute, controversy or claim is not reached within ninety days of the initial written request, either party may initiate legal action in any court of competent jurisdiction within the State of Kentucky.

Each Party shall bear its own costs, including attorneys' fee, incurred in connection with any of the foregoing procedures. A Party-seeking discovery shall reimburse the responding Party the cost of reproducing documents (to include search time and reproduction time costs). The fees associated with any arbitration, including the fees of the arbitrator, shall be divided equally between the parties.

ARTICLE XXII

RIGHT OF OTHER PARTIES

- A. If either party hereto has, prior to the execution of this Agreement, conferred upon others not parties to this Agreement (outside parties), by contract or otherwise, rights or privileges to attach to any of its poles covered by this Agreement, nothing herein contained shall be construed as affecting said rights or privileges with respect to existing attachments of such outside parties, which Attachments shall continue in accordance with the present practice; all future Attachments of such outside parties shall be in accordance with the requirements of Section B, below, except where such outside parties have by agreements entered into prior to the execution of this Agreement acquired enforceable rights or privileges to make attachments which do not conform to the requirements of this Agreement. Owner shall derive all of the revenue accruing from such outside parties. Any contractual right or privileges of

outside parties recognized in this paragraph shall include renewals of or extension of the term (period) of such contracts.

- B. If either party hereto desires to confer upon others not parties to this Agreement (outside parties), by contract or otherwise, right or privileges to attach to any of its poles covered by this Agreement, it shall have the right to do so, provided all such Attachments of such outside parties are made in accordance with the following: (1) such attachments shall be maintained in conformity with the requirements of the Code, and (2) to the extent allowed by law, such Attachments shall not be located within space where Licensee holds a prior right to make or maintain its Attachments. Owner shall derive all of the revenue accruing from such outside parties.
- C. With respect to any rights and privileges granted under this Article to outside parties, Licensee shall not be required to transfer or rearrange its Attachments to accommodate an outside party until Licensee receives payment for the costs associated with such changes, unless Licensee is otherwise required to transfer or rearrange its facilities at its own expense pursuant to the terms of this Agreement.

ARTICLE XXIII

ASSIGNMENT OF RIGHTS

Neither party hereto shall assign or otherwise transfer this Agreement, in whole or in part, without the written consent of the other party; provided that either party shall have the right without such consent to:

1. Mortgage any or all of its property, rights, privileges and franchises.
2. To lease or transfer any of them to another corporation organized for the purpose of conducting a business of the same general character as that of such party; or
3. To enter into any merger or consolidation or other reorganization; and, in case of the foreclosure of such mortgage, as in case of such lease, transfer, merger or consolidation its right and obligations hereunder shall pass to such successors and assigns; and provided, further that subject to all of the terms and conditions of this Agreement, either party may without such consent permit any corporation conducting a business of the same general character as that of such party, with which it is affiliated or physically connected, the right and privileges of this Agreement in the conduct of its said business.

ARTICLE XXIV

SUPPLEMENTAL ROUTINES AND PRACTICES

Nothing in the foregoing shall preclude the parties to this Agreement from preparing such supplemental operating routines or working practices as they mutually agree or as necessary or desirable to effectively administer the provisions of this Agreement.

The parties expressly agree to develop such coordination agreements as they mutually agree are necessary and feasible to assist both parties in effectuating this Agreement.

ARTICLE XXV

WAIVER OF TERMS OR CONDITIONS

The failure of either party to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

ARTICLE XXVI

EXISTING AGREEMENTS

Any existing agreement between the parties hereto for the joint use of poles upon a rental basis within the territory covered by this Agreement is, by mutual consent, hereby abrogated and annulled; provided that undischarged obligations of the parties arising under such agreement prior to the Commencement Date (such as claims for indemnification), unless expressly waived, shall survive termination of the prior agreement.

ARTICLE XXVII

PAYMENT OF TAXES

Each party shall pay all taxes and assessments lawfully levied on its own property attached to licensed poles. Taxes and the assessments, which are levied on its poles, shall be paid by Owner thereof, but the portion of any tax (except income taxes), fee, or charge levied on Owner's poles solely because of their use by Licensee shall be paid by Licensee.

ARTICLE XXVIII

FORCE MAJEURE

Neither party shall be liable for any delay or failure in performance of any part of this Agreement resulting from acts of God, acts of civil or military authority, embargoes, epidemics, war, terrorist acts, riots, insurrections, fires, explosions, earthquakes, nuclear accidents, floods, power blackouts, or unusually severe weather. In the event of any such excused delay in the performance of a party's obligations under this Agreement, the due

date for the performance of the original obligation(s) shall be extended by a term equal to the time lost by reason of the delay or by an extended time period mutually agreed to by the parties if more time is needed to complete the work.

ARTICLE XXIX

NO WARRANTY OF RECORD INFORMATION

From time to time, one party may obtain from the other party records and other information relating to outside plant facilities. Each party acknowledges that such records and information provided may not reflect field conditions and that physical inspection is necessary to verify presence and condition of outside plant facilities and right-of-way.

ARTICLE XXX

NO EFFECT ON FRANCHISE RIGHTS

Notwithstanding anything elsewhere herein provided, nothing contained in this Agreement shall abrogate, limit or affect any obligation of either party under any franchise granted to either party by any city or other local governmental unit that owns, operates or is in any way affiliated with Power Distributor, or by any predecessor of any such governmental unit or franchising authority.

ARTICLE XXXI

SOURCE OF PAYMENTS

The obligations of the Power Distributor hereunder shall be payable solely from the funds of the electric system of the Power Distributor.

ARTICLE XXXII

MISCELLANEOUS PROVISIONS

- A. The Licensee of a Joint Use Pole shall acquire no ownership of or interest in such a pole, the Licensee's rights therein being limited to the right of compliance with terms and condition in this Agreement.
- B. Except only insofar as the express terms of this Agreement make the rights hereunder available to the successors or assigns of the parties hereto, the provisions of this Agreement shall not be interpreted to confer any right of action at law or in equity upon any parties except the parties hereto.
- C. Neither party shall, by mere lapse of time, be deemed to have waived any breach by the other party of any terms or provisions of this Agreement. The waiver by either

party of any such breach shall not be construed as a waiver of subsequent breaches or as a continuing waiver of such breach.

- D. Nothing contained in this Agreement, or in any amendment or supplement thereto, or inferable herefrom shall be deemed or constructed to (i) make either party the agent, servant, employee, joint venture, associate, or partner of the other party, or (ii) create any partnership, joint venture or other affiliation or association between the parties. The parties hereto are and shall remain independent parties. Nothing herein shall be deemed to establish a partnership, joint venture, or agency relationship between the parties. Neither party shall have the right to obligate or bind the other party in any manner to any third party.
- E. Each party represents that it has the full power and authority to enter into this Agreement and to convey the right herein conveyed.
- F. This Agreement is deemed executed in and shall be construed under the laws of the State of Kentucky.
- G. Within this Agreement, words in the singular number shall be held and construed to include the plural, unless the context otherwise requires. Titles appearing at the beginning of any subdivisions hereof are for convenience only, do not constitute any part of such subdivisions, and shall be disregarded in construing the language contained in each subdivisions. The use of the words "herein", "hereof", "hereunder" and other similar compounds of the word "here" shall, unless the context dictates otherwise, refer to this entire agreement and not to any particular paragraph or provision. The term "person" and words importing persons as used in this Agreement shall include firms, associations, partnerships (including limited partnership), limited liability companies, joint ventures, trusts, corporations and other legal entities, including public or governmental bodies, agencies or instrumentalities, as well as natural persons.

IN WITNESS WHEREOF, the parties hereto, have caused these presents to be executed in duplicate, and their corporate seals to be affixed thereto by the respective officers thereunto duly authorized, as of the Commencement Date.

JOINT USE NOTIFICATION/REQUEST FORM

Date: _____

To: West Kentucky RECC

Attention: Tim Vied

Attached is a work order or print with the following indicated in RED:

___ 1. A request for Windstream to attach to ___ of West Kentucky RECC's pole(s) along _____ in _____ County.
(Street, Road, State Route, etc.)

The West Kentucky RECC pole numbers are as follows:

_____.

___ 2. This is to notify you that Windstream has removed all attachments from ___ of West Kentucky RECC's pole(s) along _____ in _____ County. (Street, Road, State Route, etc.)

Upon acceptance/approval of this form, please adjust your pole attachment count records accordingly.

Sincerely,

Windstream Kentucky East, LLC

EXHIBIT C
ADJUSTMENT PAYMENTS

For 2010, rental rates shall be ■■■ per pole or attachment.

For 2011, rental rates shall be ■■■ per pole or attachment.

For 2012, and thereafter, unless revisited in accordance with Article XIV. D., the rental rate shall be adjusted annually by the HWI pursuant to Article XIV. C.

EXHIBIT D
NOTIFICATION OF ABANDONMENT AND TRANSFER OF OWNERSHIP

To Licensee, _____
(Insert name of Licensee)

This confirms that Owner has previously given Licensee the requisite 60 days' written notice required by Article XIII of the West Kentucky RECC/Windstream Joint Use Agreement that Owner wishes to abandon the pole(s) described below, that such time period has expired, that Owner has removed its attachments from the pole(s) (and if Owner is the Power Distributor, any third parties on the subject pole(s) have removed their attachments as well), and that Licensee has not removed its attachments from the subject pole(s). Accordingly, Owner hereby gives written notice of its transfer of ownership of the pole(s) described below to Licensee. Upon receipt of this notice, Licensee shall become the owner of the subject pole(s) and the indemnification and payment provisions set forth in Article XIII of the Joint Use Agreement shall apply.

COPY

FIBER AGREEMENT

This Agreement is made as of this 1st day of October 2000, by and between **The Cincinnati Gas & Electric Company** ("CG&E"), an Ohio corporation, **PSI Energy, Inc.** ("PSI"), an Indiana corporation, **The Union Light Heat & Power Company** (ULH&P), a Kentucky corporation, **The Lawrenceburg Gas Company** ("LGC"), an Indiana corporation, **The West Harrison Gas And Electric Company** ("WHG&E"), an Indiana corporation, and **Kentucky Data Link, Inc.** ("KDL"), a Kentucky corporation. CG&E, PSI, ULG&P, LGC and WHG&E, are herein collectively called the "Operating Companies" and individually called an "Operating Company." The Operating Companies are subsidiaries of Cinergy Corp. ("Cinergy"), a Delaware corporation.

In consideration of the mutual covenants and terms and conditions contained in this Agreement, the parties agree as follows:

GENERAL AGREEMENTS AND UNDERSTANDINGS

1. The Operating Companies provide electricity and natural gas to customers in the states of Indiana, Ohio and Kentucky. In connection with those operations and throughout the above states, the Operating Companies own or control certain poles, towers, conduits and related facilities (collectively called "Utility Structures") and rights of way related to such Structures (the "Cinergy Service Territory"). The Operating Companies require dark fiber strands or Fiber Optic Capacity throughout the Cinergy Service Territory, for their internal intra-company communications in connection with the above described operations. KDL desires to install fiber optic routes on behalf of the Operating Companies throughout portions of the Cinergy Service Territory along Routes determined by KDL from time to time on the terms and conditions stated in this Agreement.
2. Fiber installed along a Route under this Agreement will be owned by the Operating Company(ies) that owns or controls the Utility Structures and rights of way along such Route (called the "Applicable Operating Company"); the Applicable Operating Company shall retain two (2) dark fiber strands, or Fiber Optic Capacity (as defined in the Glossary Section), along each such Route for its internal telecommunication and data transmission needs. Additionally, the Applicable Operating Company shall have the option of retaining more than two (2) dark fiber strands in accordance with Footnote 1 at the bottom of page 3 below. The Applicable Operating Company will lease unneeded dark fibers to KDL via an indefeasible right of use ("IRU") in consideration for KDL's construction, maintenance and repair of the Fiber along that Route.
3. KDL has entered into this Agreement in an effort to expand its telecommunications business throughout the states of Indiana, Ohio and Kentucky.
4. The Operating Companies have entered into this Agreement to implement their planning for their long-term telecommunications and data transmission needs for the safe, reliable, and efficient operation of their electric and gas systems.

5. By working together on the Fiber Projects covered by this Agreement, the parties believe they can effect economies in the development of their desired fiber resources and in the continued operation and maintenance thereof.
6. Each defined term shall have the meaning ascribed to such term in the attached "Glossary of Terms."

PROJECT PLANNING

7. At such time that KDL desires to add a Fiber Project to this Agreement, it shall inform the Applicable Operating Company of such decision. The parties shall then work together, in good faith and in compliance with applicable laws, to schedule the timing of the installation of the Route(s) to be covered by such Fiber Project in a manner that will allow each to meet its desired completion date for that Fiber Project. Further, the Applicable Operating Company shall diligently work to provide KDL with both (a) a reasonable estimate of the costs to perform any make ready work required for the contemplated Fiber Project and (b) the fiber count the Applicable Operating Company desires for that Fiber Project, subject to terms set forth in this Agreement. If the parties are able to agree on the timing schedule and make ready estimate, in accordance with the Operating Companies' Telecom Queuing Process, KDL shall provide the Applicable Operating Company with a Project Description for that Fiber Project. Unless otherwise agreed, the Project Description shall be in the form of Exhibit A attached hereto. Upon receipt of a signed Project Description from KDL, the Applicable Operating Company shall countersign and return a fully signed original of such Project Description to KDL unless there is a statutory, administrative or physical impediment. Each such Project Description will be added to this Agreement and shall be governed by the terms set forth herein. Prior existing Agreements may be governed by the terms and conditions of this Agreement, subject to the agreement of the parties hereto.

CONSTRUCTION

8. Engineering/Planning. The Operating Companies and KDL agree that KDL shall engineer and otherwise design each Route that is made a part of this Agreement in accordance with the Operating Companies' Guide for Installing Fiber Optic Cable. KDL shall be responsible for the costs incurred by it in connection with such efforts.
9. Make-Ready. The Applicable Operating Company shall diligently perform all make ready work along each Route that is made a part of this Agreement. KDL shall reimburse the applicable Operating Company for the cost of all such work.

10. Construction and Installation. After the Applicable Operating Company performs the necessary make ready work, KDL, at its cost¹, shall have the Fiber constructed along the Route. All such work shall comply (i) with reasonable and customary construction practices and (ii) with the minimum requirements of applicable governmental regulations and codes, including, but not limited to, the National Electrical Code (“NEC”) and National Electrical Safety Code (“NESC”).

MAINTENANCE

11. Fiber. KDL shall, at its own expense, perform all maintenance required to keep the Fiber, including that fiber retained by the Operating Companies, in good working order, condition and repair, ordinary wear and tear excepted, throughout the useful life of the Fiber (and at its discretion, KDL may replace certain of the Fiber from time to time). KDL’s maintenance shall be done in accordance with telecommunication industry standards. In the event maintenance is required on Fibers that are located in the Power Zone on Operating Company Utility Structures (distribution or transmission), unless otherwise required by law, such maintenance shall be coordinated by KDL, who will employ the Operating Company or a qualified contractor (such qualifications to be reasonably set by Operating Company) to perform such maintenance. KDL shall be responsible for the actual cost associated with such work².

- (a) KDL shall give at least two days’ notice to the Applicable Operating Company before performing any non-emergency maintenance on any of the Fiber installed on that Operating Company’s Utility Structures. For any emergency maintenance, KDL shall give the Applicable Operating Company at least one hour’s notice. Such notice shall be given to the Applicable Operating Company at 1-800-262-3000

¹ The Applicable Operating Company may increase the number of fiber strands it retains (*i.e.* the fiber strands it does not lease to KDL) along a Route from two (2) fiber strands to that number of fiber strands, which equals five percent (5%) of the total number of strands KDL installs along that Route, rounded to the nearest even number (for example, if KDL installs a 96 count along a particular Route, the Applicable Operating Company may increase the number of fiber strands it retains along that Route to 4; if KDL installs a 144 count along a particular Route, the Applicable Operating Company may increase the number of fiber strands it retains along that Route to 8.). The election to increase such count shall be made prior to construction and reflected in the Project Description for that Fiber Project; and the Applicable Operating Company shall be responsible for its pro-rata share of Fiber costs related to such increased fiber count.

² If the Applicable Operating Company increases the number of fiber strands controlled by it along a Route above two (2), it shall reimburse KDL for the pro-rata share (based on the ratio of the number of such excess strands on the Route to the number of all strands on the Route) of KDL’s reasonable out-of-pocket costs for maintenance and repair work related to such increased fiber count.

- (b) KDL shall give at least two days' notice to the Applicable Operating Company before performing any non-emergency maintenance on any of the Fiber installed on that Operating Company's Utility Structures. For any emergency maintenance, KDL shall give the Applicable Operating Company at least one hour's notice. Such notice shall be given to the Applicable Operating Company at 1-800-262-3000
- (c) In the event emergency maintenance needs to be performed on the Applicable Operating Company's Utility Structures, that Operating Company reserves the right to commence and complete any such electric maintenance or restoration work prior to allowing KDL access to repair or maintain its Fiber. If requested by that Operating Company's personnel, KDL shall cease repair work and vacate the repair site until that Operating Company's maintenance and restoration procedures are complete.

12. Relocation. This Agreement is subject to the right of the Operating Company, without liability to KDL or its customers, to relocate, modify the geographic routing of, or to remove, replace or change, the location of any of its facilities in such a manner as will best enable the Operating Company, in its sole discretion, to fulfill its electric or gas service or other business requirements. When facilities are to be moved or replaced, the Operating Company will give KDL advanced written notice, where practical, of such move or replacement and cooperate with KDL in planning such move or replacement in order to preserve the connectivity and continuity of services of KDL and that of its customers. When Operating Company facilities are to be removed, the Operating Company shall give advance written notice to KDL of such removal so that KDL may make alternative arrangements for its facilities and equipment affected by such removal. KDL shall be responsible for its pro-rata share of any costs of relocation, modification of the geographic routing of, removal, replacement or change in the location of its facilities that affects KDL's facilities and related service, insofar as such changes are caused by KDL, such as attachment to an Operating Company supporting structures that must be upgraded to accommodate KDL's attachment or an upgrade of KDL's attachment to a supporting structure.

In the event that any relocation of Operating Company Utility Structures is necessitated by the lawful requirements of governmental authorities or a need to replace Operating Company Utility Structures that are, in the Operating Company's sole reasonable judgment, deteriorated or worn out, the Parties, if required to by law, shall share the cost, on a pro-rata basis, as reasonably determined by Operating Company, of restoring the facilities that the Parties physically share. If the parties are not, by law, required to share such costs, the Applicable Operating Company shall be responsible for any such costs. Nothing in this Agreement is meant to limit the right of either Party to seek compensation from any governmental authority for the costs of such relocation or replacement.

13. Operating Company Utility Structures. The Operating Companies shall, throughout the Term of this Agreement, at their expense maintain their Utility Structures in good working order, condition and repair.

INTERESTS/RIGHTS

14. Legal Title/Lease Arrangement. The Applicable Operating Company shall own all of the Fiber installed pursuant to this Agreement; and KDL shall automatically and without further action,

have an indefeasible, fully paid-up (with no periodic lease payments), fully transferable lease on the portion of the Fiber controlled by it along the Routes (the "IRU Fibers"). This indefeasible right to use ("IRU") is an exclusive and irrevocable right, subject to termination only as provided herein, to use the IRU Fibers; provided that the grant of such IRU does not convey legal title to KDL in the IRU Fibers. On the lease commencement date, the Applicable Operating Company agrees that all of such Operating Company's rights and remedies under any manufacturer's or similar warranties that apply to the leased Fiber shall be automatically assigned to KDL. All right, title and interest in all of KDL's other facilities and associated equipment to be placed along the Route(s) (transmission hardware, etc.) shall at all times remain exclusively with KDL.

15. Rights/Restrictions.

- (a) The Fiber controlled by KDL may be used for any lawful purpose by KDL or any third party KDL allows to use such Fiber. KDL understands and agrees that such leasehold is subject to such restrictions and conditions as are, in the Operating Company's sole reasonable judgment, necessary to ensure the safety, reliability and operating efficiency of the Operating Company's electric and gas operations.
- (b) The Fiber controlled by the Applicable Operating Company is nontransferable except as specified in section 20 of this Agreement and may only be used by the Operating Companies for their own internal intra-company communications needs.

16. Liens and Encumbrances. So long as KDL is not in default under the Fiber Lease, PSI hereby agrees and covenants that it will not cause or permit an event of default to occur and continue under its Indenture dated September 1, 1939, as amended and supplemented (the "PSI Mortgage") such that the Trustee or the bondholders under the PSI Mortgage take possession of, foreclose upon, or sell the leased fibers free and clear of the rights of the Lessee under the Fiber Agreement.

So long as KDL is not in default under the Fiber Agreement, CG&E hereby agrees and covenants that it will not cause or permit a completed default to occur and continue under its First Mortgage dated as of August 1, 1936, as amended and supplemented (the "CG&E Mortgage") such that the Trustee or the bondholders under the CG&E Mortgage take possession of, foreclose upon, or sell the leased fibers free and clear of the rights of the Lessee under the Fiber Agreement.

The Operating Companies shall keep the Fiber leased to KDL, free from any and all liens and claims, except for the above referred to PSI mortgage and CG&E mortgage.

PSI represents to KDL that Section 7 of Article X of the PSI Mortgage provides that, so long as PSI is not in default thereunder, PSI may execute and deliver a lease or leases in the usual form for any of its non-utility property that the interest of the lessee or lessees under any such lease shall be free from the lien of the PSI Mortgage; and that upon the request of the Company the Trustee shall execute and deliver such documents as in the opinion of counsel may be necessary to free from the lien of the PSI Mortgage the interest of the lessee under any such lease, but the interest of PSI, as lessor under any such lease, shall be subject to the lien of the PSI Mortgage. PSI further represents that the term "opinion of counsel" is defined in the PSI Mortgage as an opinion in writing signed by counsel appointed by the Board of Directors of PSI and approved by the Trustee. As soon as

practicable after the execution and delivery of the Fiber Agreement, PSI agrees to request the Trustee under the PSI Mortgage to execute and deliver such documents as in the opinion of counsel may be necessary to free from the lien of the PSI Mortgage the interest of the Lessee under the Fiber Agreement pursuant to Section 7 of Article X of the PSI Mortgage.

In connection with the sale of the leased fibers by KDL to CG&E, KDL shall retain a vendor's lien or purchase money mortgage lien on such leased fibers to secure CG&E's obligation to pay the purchase price of such lease Fibers as set forth in the Fiber Agreement, which lien shall exist on the date of acquisition of such leased fibers by CG&E and continue for the term of the Fiber agreement. CG&E agrees to execute and deliver and file such Uniform Commercial Code financing statements and other documents as shall be reasonably requested by KDL from time to time to perfect such lien.

17. Interconnection. At each end of a Route, and at the splice points designated in the applicable Project Description, each party shall be responsible for, and pay all costs associated with, installing equipment and facilities necessary in order to utilize fiber strands under its control and each shall also be responsible for, and pay all costs associated with, interconnecting its fiber strands to such equipment. All access to the Fiber shall be arranged through, and performed by, KDL or a KDL contractor, in accordance with section 11 of this Agreement.

GENERAL TERMS & CONDITIONS

18. Term. This Agreement shall become effective upon its execution and shall continue in effect for a term of ninety-nine (99) years. Thereafter, the Agreement shall automatically renew on a year to year basis, unless and until terminated by either party on six (6) months notice.

(a) Significant Regulatory Change. If an applicable legislature, Court of competent jurisdiction, or administrative agency alters or amends a statute, rule, or order such that it is economically unreasonable for the affected party to continue under this Agreement or any Fiber Project related to this Agreement, as applicable, and the parties are not able, after negotiating in good faith, to come to a mutually agreeable equitable solution, the affected party may immediately terminate this Agreement or the affected Fiber Project, as applicable, after providing the other party with notice of such altered or amended statute, rule, or order.

(b) Regulatory Changes not Applicable to 18 (a). If neither party exercises its rights pursuant to Section 18(a) of this Agreement then to the extent that utility costs directly assignable to transactions under this Agreement may change due to municipal ordinance, statute, rule, order, contract, or settlement and such costs are unrecoverable through rates, each party will assume its pro-rata share of such costs, as reasonably determined by Operating Company.

(c) Because substantially all of the moneys paid by KDL in connection with Fiber Project under this Agreement are paid for up front by KDL, the parties agree that, if any then existing Fiber Project terminates prior to the ninety-nine (99) year term, KDL shall have the right to purchase all Fiber controlled or leased by it in connection with such Fiber Project (ie excluding strands controlled by the Applicable Operating Company) at a cost of ten dollars (\$10) from the

Operating Companies. Thereafter, KDL shall be allowed to benefit from any of the Operating Companies' pole attachment rights and rights-of-way, if any, that might extend to KDL in connection with such Fiber.

19. Taxes. Notwithstanding who has legal title to the Fiber, it is understood and agreed as between the parties that for accounting and federal and all applicable state and local tax purposes, KDL shall be treated as the owner of the fiber strands it controls; and the applicable Operating Company shall be treated as the owner of the fiber strands it controls.

20. Successors and Assigns.

(a) *Generally.* This Agreement shall be binding upon, and shall inure to the benefit of and be enforceable by, the parties hereto and their respective successors and permitted assigns. Unless otherwise set forth herein, neither of the parties may assign this Agreement to any other person or entity without the prior written consent of the other party, which consent shall not be unreasonably withheld or delayed.

(b) *Exceptions.* Notwithstanding the foregoing,

(i) the parties may assign this Agreement without the consent of the other party to any affiliate of such party, to the surviving entity into which such party may merge or consolidate, or to any entity to which the party transfers all, or substantially all, of its business and assets; and

(ii) KDL shall also have the right, without the consent of the Operating Companies, to assign or otherwise transfer this Agreement as collateral to any lender to KDL (or lender to any successor or assign of KDL); provided that the assignee or transferee in any such circumstance shall continue to be subject to all of the provisions of this Agreement, except that any lender shall not incur any obligations under this Agreement, nor shall it be restricted from exercising any right of enforcement or foreclosure with respect to any related security interest or lien, so long as the purchaser in foreclosure is subject to the provisions of this Agreement.

21. Notices. All notices, requests, demands and other communications required or permitted to be given or made under this Agreement shall be in writing, and shall be deemed to have been duly given (a) on the date of personal delivery, (b) on the date of delivery to a nationally recognized overnight delivery service, (c) on the date of deposit in the U. S. mails, postage prepaid, by certified mail, return receipt requested, or (d) on the date of transmission by telephonic facsimile transmission, in each case addressed as follows, or to such other addresses or facsimile numbers as shall be designated from time-to-time by the parties pursuant to this paragraph 21:

If to KDL to:

If to the Operating Companies to:

Plainfield, IN 46168
Attention: Legal Department
Fax: (317) 838-1842

22. Force Majeure. In the event KDL or the Operating Companies are delayed in or prevented from performing any of its respective obligations under this Agreement due to acts of God, war, riots, civil insurrection, acts of the public enemy, strikes, lockouts, acts of insurrection, acts of civil or military authority, including orders and decisions by applicable administrative agencies, fires, floods or earthquakes, fiber cuts or other causes beyond the reasonable control of the party delayed, then such delay or nonperformance shall be excused. If any such delay or nonperformance due to the foregoing causes or events occurs or is anticipated, the party affected shall promptly notify the other party in writing of such event or expected event and the cause and estimated duration of such event. The party affected by such event shall, at no cost to the other party, exercise due diligence to shorten or avoid the delay or nonperformance and shall keep the other party advised as to the continuance of the delay and steps taken to shorten or terminate the delay or nonperformance.

23. Limitation of Liability. NEITHER PARTY SHALL HAVE ANY RESPONSIBILITY, LIABILITY OR OBLIGATION TO THE OTHER OR THE OTHER'S AFFILIATES, DIRECTORS, OFFICERS, AGENTS, EMPLOYEES, REPRESENTATIVES, SUCCESSORS OR PERMITTED ASSIGNS FOR ANY SPECIAL, INCIDENTAL CONSEQUENTIAL OR PUNITIVE DAMAGES INCLUDING, BUT NOT LIMITED TO, LOSS OF PROFITS, COST OF REPLACEMENT SERVICES, LOSS OF CUSTOMERS OR AGENTS, LOSS OF USE, OR PENALTIES IMPOSED BY OTHERS, REGARDLESS OF ANY ACT OF OMISSION OR COMMISSION IN CONNECTION WITH OR UNDER THIS AGREEMENT, INCLUDING, BUT NOT LIMITED TO, ANY DEFECT IN, DELAY IN OR LOSS OF AVAILABILITY, OR FAILURE OF THE FIBER.

24. Indemnification.

- (a) Operating Company shall defend, indemnify and hold harmless KDL and each of its officers, directors, employees and agents, from and against, and shall pay the full amount of, any loss, liability, claim, damages, expense, including costs of investigation and defense and reasonable attorney's fees, whether or not involving a third-party claim (collectively, Damages), arising, directly or indirectly, from Operating Company's acts or omissions in connection with this Agreement, except to the extent caused by KDL. Such indemnity shall apply regardless of whether the Damages result from any asserted or actual negligence or willful misconduct of, or breach of warranty by, KDL or any of its officers, directors, employees or agents. Such indemnity shall not apply, however, to the extent that KDL receives insurance proceeds in respect of any such Claim.
- (b) KDL shall defend, indemnify and hold harmless the Operating Company and each of its officers, directors, employees and agents, from and against, and shall pay the full amount of, any loss, liability, claim, damages, expense, including costs of investigation and defense and reasonable attorney's fees, whether or not involving a third-party claim (collectively, Damages), arising, directly or indirectly, from KDL's acts or omissions in connection with this Agreement, except to the extent caused by Operating Company. Such indemnity shall apply regardless of whether the Damages result from any asserted or actual negligence or willful misconduct of, or breach of warranty by, the Operating Company or any of its officers, directors, employees or agents. Such indemnity shall not apply, however, to the extent that Operating Company receives insurance proceeds in respect of any such Claim.
- (c) Procedure for Indemnification. Within 10 days after receipt by Indemnitee of written notice of any claim or the commencement of any action, suit, litigation or other proceeding against it (Proceeding) with respect to which it is eligible for indemnification hereunder, Indemnitee shall notify Indemnitor thereof. Failure to so notify Indemnitor shall not relieve Indemnitor of its indemnification obligation, unless Indemnitor establishes that defense thereof has been prejudiced by such failure. Thereafter, Indemnitor shall be entitled to participate in such Proceeding and, at its election upon notice to Indemnitee to assume the defense of such Proceeding. If Indemnitee has given timely notice to Indemnitor of the commencement of such Proceeding, but Indemnitor has not, within 10 days after receipt of such notice, given notice to such Indemnitee of its election to assume the defense thereof, Indemnitor shall be bound by any determination made in such Proceeding or any compromise or settlement made by Indemnitee. A claim for indemnification for any matter not involving a third-Party claim may be asserted by notice from Indemnitee to Indemnitor.

25. Disclaimer. THERE ARE NO AGREEMENTS, WARRANTIES OR REPRESENTATIONS, EXPRESS OR IMPLIED, EITHER IN FACT OR BY OPERATION OF LAW, STATUTORY OR OTHERWISE, INCLUDING WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE, EXCEPT THOSE EXPRESSLY SET FORTH HEREIN.

26. Counterparts. This Agreement may be executed in several counterparts, each of which shall be regarded as an original and all of which together shall constitute one and the same document.

27. Expenses. Except as otherwise expressly provided herein or therein, each party shall bear the costs and expenses incurred by it in negotiating, entering into and performing any of its obligations under this Agreement.

28. Headings. The headings of this Agreement are inserted for convenience only and shall not be deemed to be a part hereof.

29. Severability. If any one or more of the provisions of this Agreement shall be held to be invalid, illegal or unenforceable, the validity, legality or enforceability of the remaining provisions hereof or thereof shall not in any way be affected or impaired thereby. If this Agreement shall be held to be unenforceable against either party, the enforceability of such agreement against the other party hereto shall not in any way be affected or impaired thereby.

30. Dispute Resolution. KDL and the Operating Companies plan to use due diligence to work together to implement this Agreement. However, the parties understand that unforeseen issues and conflicts may arise. It is the intention of the parties that this Agreement not terminate prior to the expiration of the Term. Rather, the parties acknowledge their desire to reach a working solution to such issues and conflicts by employing the following dispute resolution process:

- (a) To the extent that any issue of or relating to this Agreement cannot be reasonably resolved by KDL and the Operating Companies, a designated representative of each party shall meet promptly in an effort to resolve the dispute extrajudicially.
- (b) If the dispute is not resolved as a result of such meeting, the dispute shall be immediately referred in writing to the members of senior management of each party. The members of senior management shall meet to attempt to resolve the dispute within twenty (20) days after the meeting described in paragraph 30(a) above.
- (c) No less than ten (10) days prior to the meeting of senior managers, the parties shall exchange written statements of the issues in dispute, the facts and evidence supporting each side, and the name of the member of senior management designated and authorized to resolve the dispute.
- (d) If the good faith attempts to resolve the dispute as stated in paragraphs 30(a), (b) and (c) are unsuccessful, either party may start binding arbitration in Evansville, Indiana. The arbitration will be before a three-arbitrator panel. KDL will select one arbitrator to

represent its interest, at its sole expense; and the Operating Companies will select one arbitrator to represent their collective interests. The final arbitrator, who shall be impartial, will be selected by the two partial arbitrators. In the event the two partial arbitrators shall fail to select an impartial arbitrator, either party may apply to a court of law to have a judge select an impartial arbitrator. The three arbitrators by majority ruling may adopt such procedures as they deem efficient and appropriate for making the determinations submitted to them for adjudication. No statements by, or communications between, the parties during negotiation or mediation, or both, will be admissible for any purpose in arbitration. Each party shall bear its internal expenses and its attorney's fees and expenses, and jointly share the cost of the impartial arbitrator. The decision(s) of a majority of the arbitrators shall be final and binding on the parties.

- (e) Notwithstanding the foregoing, either party may resort to a court by applying for interim relief if such party reasonably determines that such relief is necessary to prevent irreparable injury to it or to a third party.

31. Binding Agreement. This Agreement, including the attachments, embodies the entire agreement between the parties hereto and supersedes any prior or contemporaneous oral or written agreements between the parties, and once this Agreement has been executed, any amendments hereto must be made in writing and signed by both parties.

32. Governing Law. This Agreement shall be construed and enforced under and in accordance with the laws of the State in which the affected Operating Company resides, without regard to conflicts of laws principles.

33. Customer Information Disclosure. The Operating Companies and the KDL understand and agree that KDL shall not have access to, share or have the opportunity to obtain the Operating Companies' customer information except to the extent that is otherwise permitted to any telecommunications company under applicable state and federal law, rules and regulations, and tariffs, including law affecting the privacy and disclosure of customer information, as they exist today and as changed from time to time.

34. Confidentiality. In light of the competitive circumstances, including regulatory changes, in both the energy and telecommunications markets, the Parties understand and agree that they will be exchanging information and entering into agreements for the construction and lease of facilities, the disclosure of which is likely to harm their competitive positions in their respective markets. Therefore, they agree that the business information, materials, and business plans that they provide to or discuss with each other, along with the terms and conditions thereof are deemed to be confidential unless the disclosing Party indicates otherwise.

Each Party shall, during the term of this Agreement and thereafter, take all steps reasonably necessary to hold in trust and confidence and to protect from disclosure to the public or third parties information of the other that it knows or has reason to know is the trade secret or confidential information of the other.

Confidential information does not include:

- (a) information that is now or hereafter becomes, through no act or omission of the Party receiving the information, generally known or available in the relevant industry or industries, or is now in or later enters the public domain through no act or omission of the Party receiving the information;
- (b) information that was acquired by the receiving Party prior to entering into this Agreement and without restrictions of the information's use and disclosure;
- (c) information that has been or is hereafter received by the receiving Party from a third party who has rightfully and lawfully disclosed the information to the receiving Party;
- (d) information that the receiving Party discloses pursuant to written permission of the Party whose confidential information is to be disclosed under such permission.

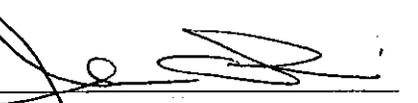

If a Party receives a request for disclosure of the confidential information of the other Party pursuant to lawful order, such as discovery requests or court or administrative agency order, that Party will give immediate notice to the other of such request and the Parties will cooperate to obtain a protective order or other lawful protection against disclosure of such confidential information in the public record or otherwise.

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be duly executed and to become effective as of the date first written above.

GLOSSARY OF TERMS

"Agreement" means this Agreement and all extensions and modifications hereof, together with all addenda, attachments, appendices, exhibits and schedules.

"Fiber" means fiber cable, up to 144 single-mode fiber strands (or copper strands, as applicable) and attachment hardware to be installed on and between the Applicable Operating Company's Utility Structures pursuant to this Agreement.

"Fiber Optic Capacity" means on-net transmission capacity (1 T1, 1 DS3 or 1 OC3) between any two (2) KDL points-of-presence ("KDL POP") located along a specific Route described in a Project Description or located at an end of a Route described in a Project Description

"Fiber Projects" means those projects described in the Project Descriptions attached as Exhibit A.

"Power Zone" is that area of a standard utility pole above the Communications Zone and Neutral Zone in the proximity of electrical conductors.

"Project Descriptions" are the forms attached as Exhibit A that describe the Fiber Projects covered by this Agreement.

"Route" means a continuous path of Utility Structures, on and between which KDL installs Fiber pursuant to this Agreement.

EXHIBIT A- PROJECT DESCRIPTIONS
PROJECT DESCRIPTION # _____

1. Project Defined.

Section 1

Fiber: KDL, at its cost, to install one (1) fiber optic cable or FOG Wire and related fiber strands, splices and terminations.

Route: _____

It is understood that the Fiber may, at KDL's discretion, be placed in the Power Zone along such Route. It is also understood that KDL will be allowed to place the Fiber in a position that will require the least amount of make ready work. (Approximately ____ miles).

Both parties will use best efforts to have Fiber described in this Section 1 installed on or before _____, 2 ____.

2. Applicable Operating Company Strands/KDL Strands Defined.

On the terms of the Agreement, the Applicable Operating Company will retain ____ of the single-mode fiber strands installed along the Route described in Section 1 above. On the terms of the Agreement, the Applicable Operating Company may elect two (2) fiber strands or that number of fiber strands, which equals five percent (5%) of the total number of strands KDL installs along that Route, rounded to the nearest even number (See Footnote 1 from Section 10 of the Agreement and Footnote 2 from Section 13 of the Agreement). Alternatively, the Applicable Operating Company may elect zero (0) fiber strands, in which case KDL would provide transmission capacity (1 T1, 1 DS3 or 1 OC3) between any two (2) of the following KDL points-of-presence ("KDL POP"): a KDL POP located along the

Route described in Section 1 above or a KDL POP located at an end of the Route described in Section 1 above.

KDL will lease the fiber strands installed along this Route that are not retained by the Operating Company,.

3. **Special Terms.**

Ground Space (Optional at KDL's Discretion). The Applicable Operating Company hereby leases to KDL for fair market value of \$_____, receipt of which is hereby acknowledged, and KDL hereby leases from such Company for fair market value of \$_____, a _____ square foot portion of ground space on property already owned by such Company at an Operating Company's substation along with ingress and egress thereto, sufficient for KDL to construct up to a _____ square foot building and to locate certain equipment associated with the operation of its fiber optic network. The parties agree to use their best efforts to identify the exact ground space and to prepare, sign and file in the appropriate court office a Memorandum of said Lease within ninety (90) days of the date KDL first intends to use such ground space.

4. **Basic Agreement.** This Project Description is hereby incorporated in its entirety into the Agreement between The Cincinnati Gas & Electric Company, PSI Energy, Inc., The Union Light Heat & Power Company, The Lawrenceburg Gas Company, The West Harrison Gas And Electric Company, and Kentucky Data Link, Inc., and is effective as of this ____ day of _____ 2_____.

Kentucky Data Link, Inc.

POLE ATTACHMENT RIGHTS/DARK FIBER RIGHTS EXCHANGE AGREEMENT

This POLE ATTACHMENT RIGHTS/DARK FIBER RIGHTS EXCHANGE AGREEMENT ("Agreement") is effective as of the 7th day of February, 2005 by and between Kentucky Data Link, Inc. ("KDL"), a Kentucky corporation, and Cinergy MetroNet, Inc. ("CMN"), an Indiana corporation. KDL and CMN are sometimes referred to herein collectively as the "Parties" or individually as a "Party".

1. Purpose. Pursuant to that certain Fiber Agreement dated October 1, 2000, by and between KDL and certain of Duke Energy Corporation's affiliate companies (collectively "Duke") which is attached hereto as Exhibit A ("Fiber Agreement"), KDL has secured the right to locate fiber optic cable on utility poles owned or controlled by Duke. CMN wishes to install and use fiber optic cable along certain Duke utility pole routes (collectively the "Duke Routes" each individually a "Duke Route"). KDL wishes to obtain rights to, and use of, dark fiber along the Duke Routes. The Parties, therefore, wish to enter into this Agreement, the terms of which will govern the exchange of dark fiber rights for pole attachment rights and maintenance services as more particularly set forth below.

2. Request for Duke Routes. At any time during the term of this Agreement, CMN may request the right to locate fiber optic cable along a Duke Route by sending KDL written notice. Upon receipt of such notice, KDL shall promptly review CMN's request and shall notify CMN in a timely manner if KDL does not have the rights under the Fiber Agreement to satisfy CMN's request. If KDL is able to accommodate CMN's request under the terms of the Fiber Agreement, the Parties shall promptly start working on a Project Description as more particularly described in Section 3 below for the requested Duke Route. Upon completion, KDL shall promptly submit the Project Description to Duke for approval and shall use commercially reasonable efforts to secure such approval in a reasonable time frame.

3. Incorporation of Duke Routes. Each Duke Route covered by this Agreement shall be identified and described in an Exhibit B Project Description that incorporates itself into this Agreement by reference and that is signed by both Parties. Each such Exhibit B shall set forth the following information for each Duke Route: (i) a description of the utility pole route; (ii) the total number of fiber strands to be located along the utility pole route; (iii) the number of fiber strands being retained for use by KDL along the utility pole route pursuant to the terms of this Agreement; and (iv) the number of fiber strands to be utilized by CMN along the utility pole route. Unless otherwise agreed to by the Parties, each Exhibit B Project Description shall be in the form of Exhibit B attached hereto.

4. Make Ready and Installation Work. KDL shall perform, or oversee the performance of, all make ready and installation work associated with the location of CMN fiber optic cable on each Duke Route set forth in an Exhibit B Project Description that is approved by Duke. All such work shall be performed by KDL in accordance with telecommunications industry standard practices. CMN shall pay all Costs of make ready and installation work. For purposes of this Agreement, the term "Costs" shall be the sum of: (a) all actual costs paid or payable by KDL including, without limitation, labor costs, pass through costs paid to third parties, and materials costs and (b) an overhead allocation equal to fifteen percent (15%) of the sum of the costs set forth in (a).

5. Cost Estimate. Prior to the commencement of any make ready and installation work, KDL shall provide CMN with a reasonable estimate of the Costs associated with such work ("Cost Estimate"). If CMN approves the Cost Estimate, KDL shall then diligently perform, or oversee the performance of, the make ready and installation work. Notwithstanding the foregoing, KDL may require CMN to pay all or any portion of the Cost Estimate in advance as a condition of commencing with the make ready and installation work. In such case, when the make ready and installation work has been completed, KDL shall provide CMN with documentation of the actual Costs associated with such work. If the actual Costs are less than the Cost Estimate, KDL shall issue CMN a credit equal to the difference. If the actual Costs are greater than the Cost Estimate, KDL shall invoice CMN for the difference.

6. Billing and Payment. KDL shall invoice CMN for all amounts due under this Agreement. All invoices shall be due and payable within thirty (30) days of receipt by CMN. KDL reserves the right to apply a late charge equal to one and half percent (1.5%) per month (or the maximum legal rate, if less) on any unpaid balance. CMN shall reimburse KDL for all fees KDL incurs collecting any past due undisputed charges from CMN including, but not limited to, attorneys fees and collection fees. Should CMN dispute any of the charges on an invoice, it shall notify KDL in writing within sixty (60) days after CMN's receipt of invoice of the disputed charges and CMN's reason for disputing the same. If CMN does not deliver a challenge or dispute to any invoice within sixty (60) days after CMN's receipt of that invoice, the invoice will be considered final and accepted without recourse or later dispute by CMN.

7. Transfer of Title. Pursuant to the terms of the Fiber Agreement, Duke is required to retain title to all fiber optic cable, including the cable sheath, installed by KDL along each Duke Route. Therefore, automatically, without further action, CMN hereby conveys to KDL title and ownership in all of the CMN fiber optic cable, including the cable sheath, installed along each Duke Route covered by this Agreement now and in the future (collectively the "Installed Fibers"). As a condition of such transfer, KDL agrees to convey to Duke, title and ownership to the Installed Fibers located on each Duke Route covered by this Agreement.

8. Grant of IRU. KDL shall retain the greater of: (i) eight (8) fibers; or (ii) ten percent (10%) of the Installed Fibers (rounded up to the nearest even number) for its use and Duke's use. In return, KDL hereby grants CMN a fully paid-up (with no periodic lease payments), fully transferable indefeasible right of use ("IRU") in the remaining ninety percent (90%) of the Installed Fibers. Such IRU shall be an exclusive and irrevocable right, for the duration of this Agreement.

9. Gaps in Duke Routes. CMN may request that KDL obtain rights to install fiber optic cable along a route that commences on Duke utility poles but has segments that are not covered by Duke utility poles (e.g. segments that go underground, across bridges or on utility poles owned by third parties) before again being connected to Duke utility poles ("Gap Segments"). It is understood by the Parties that without having rights in fiber optic cable located along the Gap Segments such routes would be incomplete and of little value to KDL. Therefore, CMN agrees to secure and maintain the underlying rights necessary to install fiber optic cable along the Gap Segments and hereby grants KDL an IRU in the greater of: (i) eight (8) fibers; or (ii) ten percent (10%) of the CMN fibers (rounded to the nearest even number) located along the Gap Segments. KDL shall be responsible for installing and maintaining the CMN fiber optic cable along the Gap

Segments in accordance with the terms set forth in Sections 4 and 11 of this Agreement. For avoidance of doubt, CMN shall own the fiber optic cable along the Gap Segments.

10. Use. Each Party shall use the fibers granted or used by such Party pursuant to this Agreement in a manner that does not cause material technical interference with the other Party's network, fiber, or any equipment or element thereof. Each Party shall be responsible for the operation and maintenance of any equipment it attaches or uses in conjunction with the fibers granted or used by such Party pursuant to this Agreement. Neither KDL, nor any affiliate of KDL, shall use any of the IRU fibers to directly provide voice, video and/or Internet services to residential or small business consumers in competition with voice, video and/or Internet services provided by CMN. Notwithstanding the foregoing, KDL or any KDL affiliate may use the IRU fibers: (i) to provide wholesale transport services to any carrier including, without limitation, carriers providing voice, video and data services to residential and business consumers; (ii) to provide services to any school or post secondary school; or (iii) for any other purpose not prohibited under this Agreement.

11. Maintenance of the Installed Fibers. As additional consideration for the rights granted to KDL under this Agreement, throughout the useful life of the Installed Fibers, KDL shall use commercially reasonable efforts to ensure that the Installed Fibers are maintained in good working order, condition and repair, ordinary wear and tear excepted. KDL shall also perform, or oversee the performance of, all relocation activities involving the Installed Fibers. CMN shall reimburse KDL for all Costs associated with the maintenance and relocation of the Installed Fibers.

12. Term. The term of this Agreement shall be coterminous with the term of the Fiber Agreement.

13. Taxes. Notwithstanding who has legal title to the Installed Fibers in any of the Duke Routes or the fibers located along the Gap Segments, it is understood and agreed as between the Parties that for accounting and federal and all applicable state and local tax purposes, each Party shall be treated as the owner of that portion of the fibers it controls.

14. Representations and Warranties. Each Party represents and warrants that this Agreement constitutes a legal, valid and binding obligation enforceable against such Party in accordance with its terms, subject to bankruptcy, insolvency, and creditors' rights. EXCEPT AS SPECIFICALLY SET FORTH IN THIS AGREEMENT, NEITHER PARTY MAKES ANY WARRANTY, EXPRESS OR IMPLIED, WITH RESPECT TO THE INSTALLED FIBERS OR ANY OF THE SERVICES TO BE PROVIDED UNDER THIS AGREEMENT, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, AND ALL SUCH WARRANTIES ARE HEREBY EXPRESSLY DISCLAIMED.

15. Limitation of Liability. NOTWITHSTANDING ANY PROVISION OF THIS AGREEMENT TO THE CONTRARY, EXCEPT TO THE EXTENT CAUSED BY ITS GROSS NEGLIGENCE OR WILLFUL MISCONDUCT, NEITHER PARTY SHALL BE LIABLE TO THE OTHER PARTY FOR ANY DIRECT, SPECIAL, INCIDENTAL, INDIRECT, PUNITIVE OR CONSEQUENTIAL COSTS, LIABILITIES OR DAMAGES, WHETHER FORESEEABLE OR NOT, ARISING OUT OF ITS OBLIGATIONS UNDER THIS AGREEMENT.

16. Specific Performance. The Parties acknowledge and agree that irreparable damage would occur in the event that any of the provisions of this Agreement were not performed in accordance with their specific terms and agree that, due to the unique subject matter covered by this Agreement, each Party shall be entitled to specific performance as its sole remedy for a breach under this Agreement.

17. Limitation of Rights. All rights, duties and obligations set forth in this Agreement are expressly subject and subordinate to the terms and conditions of the Fiber Agreement and KDL's rights and obligations thereunder. KDL shall have no liability whatsoever to CMN if KDL fails to perform any duty or obligation under this Agreement as a result of (i) losing any of its rights under the Fiber Agreement for any reason; (ii) the terms and conditions of the Fiber Agreement; or (iii) any act or omission of Duke.

18. Post Termination Obligations. If the Fiber Agreement is terminated, so long as KDL has the ability, KDL shall exercise its rights under Section 18(c) of the Fiber Agreement to purchase the Installed Fibers. In such event, with the exception of the Installed Fibers that will be retained by KDL, KDL shall immediately pass title to CMN in all of the remaining Installed Fibers including the cable sheath. CMN, in turn, shall pass title to KDL in the greater of: (i) eight (8) fibers; or (ii) ten percent (10%) of the CMN fibers (rounded to the nearest even number) located along the Gap Segments. Thereafter, unless otherwise agreed to by the Parties, CMN shall be responsible for obtaining and paying all amounts associated with any third party underlying rights required to keep in place the Installed Fibers located along the Duke Routes and the CMN fiber optic cable located along the Gap Segments. KDL shall reimburse CMN for ten percent (10%) of the amounts paid to any third parties to secure and maintain such underlying rights. This Section 18 shall survive termination of the Agreement unless the Agreement is terminated pursuant to Section 20 below in which case it shall be of no further force or effect.

19. Abandonment. Each Party reserves the right to abandon its portion of the Installed Fibers or fibers located along the Gap Segments by delivering written notice to the other Party. Upon receipt of such notice, the non terminating Party shall have the option of taking title to the terminating Party's abandoned fibers in which case the Parties shall sign any documents necessary to consummate such transfer. For avoidance of doubt, once a Party has abandoned any Fibers and/or Gap Segment fibers pursuant to this Section 19, it shall have no further liability to the other Party under this Agreement for such abandoned Fibers and/or Gap Segment fibers.

20. Loan Agreement Obligations. The Parties previously entered into a Services Agreement by and among KDL, CMN and Norlight, Inc. (f/k/a Cinergy Communications Company) dated March 1, 2004, as amended ("Services Agreement"). The Services Agreement was approved by the United States Department of Agriculture's Rural Utilities Service Division (the "RUS"). The purpose of this Agreement is to further clarify the Parties' obligations under an arrangement the Parties believe is permitted under the Services Agreement. KDL, however, acknowledges and understands that CMN's rights and obligations under this Agreement are expressly subject and subordinate to the Loan and Security Agreement dated November 14, 2005, by and between CMN and the United States of America ("Loan Agreement"). Notwithstanding anything to the contrary herein, if this Agreement is determined by the RUS to be in violation of the Loan Agreement, upon written notice to KDL from CMN, this Agreement

shall immediately terminate and neither Party shall have any further obligation to the other Party hereunder. CMN shall endeavor to provide KDL with as much advance notice of termination as possible under the circumstances.

21. Assignment. Neither Party may assign this Agreement without the written consent of the other Party, which consent shall not be unreasonably withheld. Notwithstanding the foregoing, the Parties may assign this Agreement without the consent of the other Party to any affiliate of such Party, to the surviving entity into which such Party may merge or consolidate, or to any entity to which the Party transfers all, or substantially all, of its business and assets. Each Party shall also have the right, without the consent of the other Party, to assign or otherwise transfer this Agreement as collateral to any lender of such Party (or lender to any successor or assign of such Party); provided that the assignee or transferee in any such circumstance shall continue to be subject to all of the provisions of this Agreement, except that any lender shall not incur any obligations under this Agreement, nor shall it be restricted from exercising any right of enforcement or foreclosure with respect to any related security interest or lien, so long as the purchaser in foreclosure is subject to the provisions of this Agreement. In the event any such lender assigns any rights it has under this Agreement, the non assigning Party agrees to accept performance of this Agreement by the assignee so long as the assignee is subject to the provisions of this Agreement.

22. Notices. All notices and other communications required or permitted under this Agreement shall be in writing and shall be given by United States first class mail, postage prepaid, registered or certified, return receipt requested, or by hand delivery (including by means of a professional messenger service or overnight mail) addressed as follows:

All notices and other communications given to KDL at:

Kentucky Data Link, Inc.
3701 Communications Way
Evansville, IN 47715
Attn: President

with a copy to:

Kentucky Data Link, Inc.
8829 Bond Street
Overland Park, KS 66214
Attn: Legal Dept

All notices and other communications shall be given CMN at:

Cinergy MetroNet, Inc.
3701 Communications Way
Evansville, IN 47715
Attn: President

Cinergy MetroNet, Inc.
8829 Bond Street
Overland Park, KS 66214
Attn: Legal Department

Any such notice or other communication shall be deemed to be effective when actually received or refused. Either Party may change the address to which future notices or other communications shall be sent by sending the other Party notice.

23. Force Majeure. Neither Party shall be in default under this Agreement if and to the extent that any failure or delay in such Party's performance of one or more of its obligations hereunder is caused by any of the following conditions, and such Party's performance of such obligation or obligations shall be excused and extended for and during the period of any such delay: act of God; fire; flood; government codes, ordinances, laws, rules, regulations or restrictions (collectively; "Regulations"); war or civil disorder; strikes or other labor disputes; or any cause beyond the reasonable control of such Party. The Party claiming relief under this Section 23 shall notify the other in writing of the existence of the event relied on and the cessation or termination of said event, and the Party claiming relief shall exercise reasonable commercial efforts to minimize the time of any such delay.

24. Non Exclusive. This Agreement is non exclusive and each Party reserves the right to enter into separate agreements or arrangements with Duke or any other third party regarding pole attachment rights or dark fiber rights involving the Duke Routes or Gap Segments.

25. Dispute Resolution. The Parties hereto plan to use due diligence and use their best efforts and work together to implement this Agreement and amicably resolve their differences. However, the Parties understand that issues and conflicts may arise where they reach an impasse. The Parties acknowledge their desire to reach a working solution by using good faith attempts to resolve such issues and conflicts. Any claim or controversy related to or arising out of this Agreement, whether in contract or in tort ("Dispute"), will be resolved on a confidential basis, according to the following process, which either Party may start by delivering to the other Party a written notice describing the Dispute and the amount involved ("Demand").

After receipt of a Demand, authorized representatives of the Parties will meet at a mutually agreed upon time and place to try to resolve the Dispute by negotiation. If the Dispute remains unresolved 30 days after receipt of the Demand, either Party may start binding arbitration in Evansville, Indiana. The Parties will use their best efforts to conclude the arbitration as expediently as possible but in no event later than 60 days following commencement of any proceeding, provided there is no interim relief or court action sought that would delay the Parties from resolving the Dispute within such 60 day period. If such interim relief or court action is sought, then the Parties will use their best efforts to conclude the arbitration within 60 days following the final decision of the court in such action. The arbitration will be before a three-arbitrator panel. Each Party will select one partial arbitrator, in its sole discretion, to represent its interest at its sole expense. The partial arbitrator may be an employee, director, officer or principal of the Party. The final arbitrator, who shall be impartial, will be selected by the two partial arbitrators. In the event the two partial arbitrators shall fail to select an impartial arbitrator, either Party may apply to a court of law to have a judge select an

impartial arbitrator. The three arbitrators by majority ruling may adopt such procedures as they deem efficient and appropriate for making the determinations submitted to them for adjudication, and the Parties agree that no court shall have the power to interfere with the proceedings and judgments of the arbitrators. No statements by, or communications between, the Parties during negotiation or mediation, or both, will be admissible for any purpose in arbitration. Each Party shall bear its internal expenses and its attorney's fees and expenses, and jointly share the cost of the impartial arbitrator; provided, No interest shall be applied to any arbitration award. It is the intent of the Parties to first allow the arbitrators an opportunity to meet and negotiate a decision. However, if an agreement cannot be reached through negotiation, then the decision(s) of a majority of the arbitrators shall be final and binding on the Parties.

Notwithstanding the foregoing, either Party hereto may resort to a court by applying for interim relief, without the requirement to post a bond or security, if such Party reasonably determines that such relief is necessary because claims for money are not adequate to prevent irreparable injury to it or to a third party. The venue for any such proceeding shall be in Evansville, Indiana.

26. Governing Law. This Agreement shall be governed by and construed in accordance with the domestic laws of the State of Indiana, without reference to its choice of law principles.

27. Waiver. The failure of either Party hereto to enforce any of the provisions of this Agreement, or the waiver thereof in any instance, shall not be construed as a general waiver or relinquishment of its part of any such provision, but the same shall nevertheless be and remain in full force and effect.

28. Jointly Drafted. No rule of construction requiring interpretation against the drafting Party hereof shall apply in the interpretation of this Agreement.

29. No Third Party Rights. Nothing in this Agreement is intended to provide any legal rights to anyone not an executing Party of this Agreement.

30. No Personal Liability. Each action or claim against any Party arising under or relating to this Agreement shall be made only against such Party as a corporation, and any liability relating thereto shall be enforceable only against the corporate assets of such Party. No Party shall seek to pierce the corporate veil or otherwise seek to impose any liability relating to, or arising from, this Agreement against any shareholder, employee, officer or director of the other Party. Each of such persons is an intended beneficiary of the mutual promises set forth in this Section 30 and shall be entitled to enforce the obligations of this Section 30.

31. Relationship of the Parties. The relationship between CMN and KDL shall not be that of partners, agents, or joint venture.

32. Interpretation. The captions or headings in this Agreement are for convenience or reference only, and shall in no way define, modify or restrict the meaning or interpretation of the terms or provisions of this Agreement. Where context requires, singular terms shall include references to the plural and vice versa. Unless the context otherwise requires, the words "hereof," "hereby" and "herein" and words of similar meaning when used in this Agreement refer to this Agreement in its entirety and not to any particular article, section or provision of this Agreement. The format, words and phrases used in this Agreement shall have the meaning generally understood in the broadband and communications industries.

33. Survival. The Parties' obligations under this Agreement, which by their nature are intended to continue beyond the termination or expiration of this Agreement, shall survive the termination or expiration of this Agreement.

34. Entire Agreement. This Agreement, along with Exhibit A and Exhibit B sets forth the entire understanding and supersedes all prior agreements and understanding between the Parties relating to the subject matter hereof. This Agreement may not be amended or otherwise modified except by an instrument in writing signed by an authorized representative of each Party. Neither Party shall be bound by any definition, condition, provision, representation, warranty, covenant or promise regarding the subject matter hereto other than as expressly stated in this Agreement.

IN WITNESS WHEREOF, the Parties have executed this Agreement the day and year written above.

FIBER AGREEMENT

This Agreement is made as of this 1st day of October 2000, by and between The Cincinnati Gas & Electric Company ("CG&E"), an Ohio corporation, PSI Energy, Inc. ("PSI"), an Indiana corporation, The Union Light Heat & Power Company (ULH&P), a Kentucky corporation, The Lawrenceburg Gas Company ("LGC"), an Indiana corporation, The West Harrison Gas And Electric Company ("WHG&E"), an Indiana corporation, and Kentucky Data Link, Inc. ("KDL"), a Kentucky corporation. CG&E, PSI, ULG&P, LGC and WHG&E, are herein collectively called the "Operating Companies" and individually called an "Operating Company." The Operating Companies are subsidiaries of Cinergy Corp. ("Cinergy"), a Delaware corporation.

In consideration of the mutual covenants and terms and conditions contained in this Agreement, the parties agree as follows:

GENERAL AGREEMENTS AND UNDERSTANDINGS

1. The Operating Companies provide electricity and natural gas to customers in the states of Indiana, Ohio and Kentucky. In connection with those operations and throughout the above states, the Operating Companies own or control certain poles, towers, conduits and related facilities (collectively called "Utility Structures") and rights of way related to such Structures (the "Cinergy Service Territory"). The Operating Companies require dark fiber strands or Fiber Optic Capacity throughout the Cinergy Service Territory, for their internal intra-company communications in connection with the above described operations. KDL desires to install fiber optic routes on behalf of the Operating Companies throughout portions of the Cinergy Service Territory along Routes determined by KDL from time to time on the terms and conditions stated in this Agreement.
2. Fiber installed along a Route under this Agreement will be owned by the Operating Company(ies) that owns or controls the Utility Structures and rights of way along such Route (called the "Applicable Operating Company"); the Applicable Operating Company shall retain two (2) dark fiber strands, or Fiber Optic Capacity (as defined in the Glossary Section), along each such Route for its internal telecommunication and data transmission needs. Additionally, the Applicable Operating Company shall have the option of retaining more than two (2) dark fiber strands in accordance with Footnote 1 at the bottom of page 3 below. The Applicable Operating Company will lease unneeded dark fibers to KDL via an indefeasible right of use ("IRU") in consideration for KDL's construction, maintenance and repair of the Fiber along that Route.
3. KDL has entered into this Agreement in an effort to expand its telecommunications business throughout the states of Indiana, Ohio and Kentucky.
4. The Operating Companies have entered into this Agreement to implement their planning for their long-term telecommunications and data transmission needs for the safe, reliable, and efficient operation of their electric and gas systems.

5. By working together on the Fiber Projects covered by this Agreement, the parties believe they can effect economies in the development of their desired fiber resources and in the continued operation and maintenance thereof.
6. Each defined term shall have the meaning ascribed to such term in the attached "Glossary of Terms."

PROJECT PLANNING

7. At such time that KDL desires to add a Fiber Project to this Agreement, it shall inform the Applicable Operating Company of such decision. The parties shall then work together, in good faith and in compliance with applicable laws, to schedule the timing of the installation of the Route(s) to be covered by such Fiber Project in a manner that will allow each to meet its desired completion date for that Fiber Project. Further, the Applicable Operating Company shall diligently work to provide KDL with both (a) a reasonable estimate of the costs to perform any make ready work required for the contemplated Fiber Project and (b) the fiber count the Applicable Operating Company desires for that Fiber Project, subject to terms set forth in this Agreement. If the parties are able to agree on the timing schedule and make ready estimate, in accordance with the Operating Companies' Telecom Queuing Process, KDL shall provide the Applicable Operating Company with a Project Description for that Fiber Project. Unless otherwise agreed, the Project Description shall be in the form of Exhibit A attached hereto. Upon receipt of a signed Project Description from KDL, the Applicable Operating Company shall countersign and return a fully signed original of such Project Description to KDL unless there is a statutory, administrative or physical impediment. Each such Project Description will be added to this Agreement and shall be governed by the terms set forth herein. Prior existing Agreements may be governed by the terms and conditions of this Agreement, subject to the agreement of the parties hereto.

CONSTRUCTION

8. Engineering/Planning. The Operating Companies and KDL agree that KDL shall engineer and otherwise design each Route that is made a part of this Agreement in accordance with the Operating Companies' Guide for Installing Fiber Optic Cable. KDL shall be responsible for the costs incurred by it in connection with such efforts.
9. Make-Ready. The Applicable Operating Company shall diligently perform all make ready work along each Route that is made a part of this Agreement. KDL shall reimburse the applicable Operating Company for the cost of all such work.

10. Construction and Installation. After the Applicable Operating Company performs the necessary make ready work, KDL, at its cost¹, shall have the Fiber constructed along the Route. All such work shall comply (i) with reasonable and customary construction practices and (ii) with the minimum requirements of applicable governmental regulations and codes, including, but not limited to, the National Electrical Code ("NEC") and National Electrical Safety Code ("NESC").

MAINTENANCE

11. Fiber. KDL shall, at its own expense, perform all maintenance required to keep the Fiber, including that fiber retained by the Operating Companies, in good working order, condition and repair, ordinary wear and tear excepted, throughout the useful life of the Fiber (and at its discretion, KDL may replace certain of the Fiber from time to time). KDL's maintenance shall be done in accordance with telecommunication industry standards. In the event maintenance is required on Fibers that are located in the Power Zone on Operating Company Utility Structures (distribution or transmission), unless otherwise required by law, such maintenance shall be coordinated by KDL, who will employ the Operating Company or a qualified contractor (such qualifications to be reasonably set by Operating Company) to perform such maintenance. KDL shall be responsible for the actual cost associated with such work².
- (a) KDL shall give at least two days' notice to the Applicable Operating Company before performing any non-emergency maintenance on any of the Fiber installed on that Operating Company's Utility Structures. For any emergency maintenance, KDL shall give the Applicable Operating Company at least one hour's notice. Such notice shall be given to the Applicable Operating Company at 1-800-262-3000

¹ The Applicable Operating Company may increase the number of fiber strands it retains (*i.e.* the fiber strands it does not lease to KDL) along a Route from two (2) fiber strands to that number of fiber strands, which equals five percent (5%) of the total number of strands KDL installs along that Route, rounded to the nearest even number (for example, if KDL installs a 96 count along a particular Route, the Applicable Operating Company may increase the number of fiber strands it retains along that Route to 4; if KDL installs a 144 count along a particular Route, the Applicable Operating Company may increase the number of fiber strands it retains along that Route to 8.). The election to increase such count shall be made prior to construction and reflected in the Project Description for that Fiber Project; and the Applicable Operating Company shall be responsible for its pro-rata share of Fiber costs related to such increased fiber count.

² If the Applicable Operating Company increases the number of fiber strands controlled by it along a Route above two (2), it shall reimburse KDL for the pro-rata share (based on the ratio of the number of such excess strands on the Route to the number of all strands on the Route) of KDL's reasonable out-of-pocket costs for maintenance and repair work related to such increased fiber count.

(b) KDL shall give at least two days' notice to the Applicable Operating Company before performing any non-emergency maintenance on any of the Fiber installed on that Operating Company's Utility Structures. For any emergency maintenance, KDL shall give the Applicable Operating Company at least one hour's notice. Such notice shall be given to the Applicable Operating Company at 1-800-262-3000

(c) In the event emergency maintenance needs to be performed on the Applicable Operating Company's Utility Structures, that Operating Company reserves the right to commence and complete any such electric maintenance or restoration work prior to allowing KDL access to repair or maintain its Fiber. If requested by that Operating Company's personnel, KDL shall cease repair work and vacate the repair site until that Operating Company's maintenance and restoration procedures are complete.

12. Relocation. This Agreement is subject to the right of the Operating Company, without liability to KDL or its customers, to relocate, modify the geographic routing of, or to remove, replace or change, the location of any of its facilities in such a manner as will best enable the Operating Company, in its sole discretion, to fulfill its electric or gas service or other business requirements. When facilities are to be moved or replaced, the Operating Company will give KDL advanced written notice, where practical, of such move or replacement and cooperate with KDL in planning such move or replacement in order to preserve the connectivity and continuity of services of KDL and that of its customers. When Operating Company facilities are to be removed, the Operating Company shall give advance written notice to KDL of such removal so that KDL may make alternative arrangements for its facilities and equipment affected by such removal. KDL shall be responsible for its pro-rata share of any costs of relocation, modification of the geographic routing of, removal, replacement or change in the location of its facilities that affects KDL's facilities and related service, insofar as such changes are caused by KDL, such as attachment to an Operating Company supporting structures that must be upgraded to accommodate KDL's attachment or an upgrade of KDL's attachment to a supporting structure.

In the event that any relocation of Operating Company Utility Structures is necessitated by the lawful requirements of governmental authorities or a need to replace Operating Company Utility Structures that are, in the Operating Company's sole reasonable judgment, deteriorated or worn out, the Parties, if required to by law, shall share the cost, on a pro-rata basis, as reasonably determined by Operating Company, of restoring the facilities that the Parties physically share. If the parties are not, by law, required to share such costs, the Applicable Operating Company shall be responsible for any such costs. Nothing in this Agreement is meant to limit the right of either Party to seek compensation from any governmental authority for the costs of such relocation or replacement.

13. Operating Company Utility Structures. The Operating Companies shall, throughout the Term of this Agreement, at their expense maintain their Utility Structures in good working order, condition and repair.

INTERESTS/RIGHTS

14. Legal Title/Lease Arrangement. The Applicable Operating Company shall own all of the Fiber installed pursuant to this Agreement; and KDL shall automatically and without further action,

have an indefeasible, fully paid-up (with no periodic lease payments), fully transferable lease on the portion of the Fiber controlled by it along the Routes (the "IRU Fibers"). This indefeasible right to use ("IRU") is an exclusive and irrevocable right, subject to termination only as provided herein, to use the IRU Fibers; provided that the grant of such IRU does not convey legal title to KDL in the IRU Fibers. On the lease commencement date, the Applicable Operating Company agrees that all of such Operating Company's rights and remedies under any manufacturer's or similar warranties that apply to the leased Fiber shall be automatically assigned to KDL. All right, title and interest in all of KDL's other facilities and associated equipment to be placed along the Route(s) (transmission hardware, etc.) shall at all times remain exclusively with KDL.

15. Rights/Restrictions.

- (a) The Fiber controlled by KDL may be used for any lawful purpose by KDL or any third party KDL allows to use such Fiber. KDL understands and agrees that such leasehold is subject to such restrictions and conditions as are, in the Operating Company's sole reasonable judgment, necessary to ensure the safety, reliability and operating efficiency of the Operating Company's electric and gas operations.
- (b) The Fiber controlled by the Applicable Operating Company is nontransferable except as specified in section 20 of this Agreement and may only be used by the Operating Companies for their own internal intra-company communications needs.

16. Liens and Encumbrances. So long as KDL is not in default under the Fiber Lease, PSI hereby agrees and covenants that it will not cause or permit an event of default to occur and continue under its Indenture dated September 1, 1939, as amended and supplemented (the "PSI Mortgage") such that the Trustee or the bondholders under the PSI Mortgage take possession of, foreclose upon, or sell the leased fibers free and clear of the rights of the Lessee under the Fiber Agreement.

So long as KDL is not in default under the Fiber Agreement, CG&E hereby agrees and covenants that it will not cause or permit a completed default to occur and continue under its First Mortgage dated as of August 1, 1936, as amended and supplemented (the "CG&E Mortgage") such that the Trustee or the bondholders under the CG&E Mortgage take possession of, foreclose upon, or sell the leased fibers free and clear of the rights of the Lessee under the Fiber Agreement.

The Operating Companies shall keep the Fiber leased to KDL, free from any and all liens and claims, except for the above referred to PSI mortgage and CG&E mortgage.

PSI represents to KDL that Section 7 of Article X of the PSI Mortgage provides that, so long as PSI is not in default thereunder, PSI may execute and deliver a lease or leases in the usual form for any of its non-utility property that the interest of the lessee or lessees under any such lease shall be free from the lien of the PSI Mortgage; and that upon the request of the Company the Trustee shall execute and deliver such documents as in the opinion of counsel may be necessary to free from the lien of the PSI Mortgage the interest of the lessee under any such lease, but the interest of PSI, as lessor under any such lease, shall be subject to the lien of the PSI Mortgage. PSI further represents that the term "opinion of counsel" is defined in the PSI Mortgage as an opinion in writing signed by counsel appointed by the Board of Directors of PSI and approved by the Trustee. As soon as

practicable after the execution and delivery of the Fiber Agreement, PSI agrees to request the Trustee under the PSI Mortgage to execute and deliver such documents as in the opinion of counsel may be necessary to free from the lien of the PSI Mortgage the interest of the Lessee under the Fiber Agreement pursuant to Section 7 of Article X of the PSI Mortgage.

In connection with the sale of the leased fibers by KDL to CG&E, KDL shall retain a vendor's lien or purchase money mortgage lien on such leased fibers to secure CG&E's obligation to pay the purchase price of such lease Fibers as set forth in the Fiber Agreement, which lien shall exist on the date of acquisition of such leased fibers by CG&E and continue for the term of the Fiber agreement. CG&E agrees to execute and deliver and file such Uniform Commercial Code financing statements and other documents as shall be reasonably requested by KDL from time to time to perfect such lien.

17. Interconnection. At each end of a Route, and at the splice points designated in the applicable Project Description, each party shall be responsible for, and pay all costs associated with, installing equipment and facilities necessary in order to utilize fiber strands under its control and each shall also be responsible for, and pay all costs associated with, interconnecting its fiber strands to such equipment. All access to the Fiber shall be arranged through, and performed by, KDL or a KDL contractor, in accordance with section 11 of this Agreement.

GENERAL TERMS & CONDITIONS

18. Term. This Agreement shall become effective upon its execution and shall continue in effect for a term of ninety-nine (99) years. Thereafter, the Agreement shall automatically renew on a year to year basis, unless and until terminated by either party on six (6) months notice.

(a) Significant Regulatory Change. If an applicable legislature, Court of competent jurisdiction, or administrative agency alters or amends a statute, rule, or order such that it is economically unreasonable for the affected party to continue under this Agreement or any Fiber Project related to this Agreement, as applicable, and the parties are not able, after negotiating in good faith, to come to a mutually agreeable equitable solution, the affected party may immediately terminate this Agreement or the affected Fiber Project, as applicable, after providing the other party with notice of such altered or amended statute, rule, or order.

(b) Regulatory Changes not Applicable to 18 (a). If neither party exercises its rights pursuant to Section 18(a) of this Agreement then to the extent that utility costs directly assignable to transactions under this Agreement may change due to municipal ordinance, statute, rule, order, contract, or settlement and such costs are unrecoverable through rates, each party will assume its pro-rata share of such costs, as reasonably determined by Operating Company.

(c) Because substantially all of the moneys paid by KDL in connection with Fiber Project under this Agreement are paid for up front by KDL, the parties agree that, if any then existing Fiber Project terminates prior to the ninety-nine (99) year term, KDL shall have the right to purchase all Fiber controlled or leased by it in connection with such Fiber Project (ie excluding strands controlled by the Applicable Operating Company) at a cost of ten dollars (\$10) from the

Operating Companies. Thereafter, KDL shall be allowed to benefit from any of the Operating Companies' pole attachment rights and rights-of-way, if any, that might extend to KDL in connection with such Fiber.

19. Taxes. Notwithstanding who has legal title to the Fiber, it is understood and agreed as between the parties that for accounting and federal and all applicable state and local tax purposes, KDL shall be treated as the owner of the fiber strands it controls; and the applicable Operating Company shall be treated as the owner of the fiber strands it controls.

20. Successors and Assigns.

(a) *Generally.* This Agreement shall be binding upon, and shall inure to the benefit of and be enforceable by, the parties hereto and their respective successors and permitted assigns. Unless otherwise set forth herein, neither of the parties may assign this Agreement to any other person or entity without the prior written consent of the other party, which consent shall not be unreasonably withheld or delayed.

(b) *Exceptions.* Notwithstanding the foregoing,

(i) the parties may assign this Agreement without the consent of the other party to any affiliate of such party, to the surviving entity into which such party may merge or consolidate, or to any entity to which the party transfers all, or substantially all, of its business and assets; and

(ii) KDL shall also have the right, without the consent of the Operating Companies, to assign or otherwise transfer this Agreement as collateral to any lender to KDL (or lender to any successor or assign of KDL); provided that the assignee or transferee in any such circumstance shall continue to be subject to all of the provisions of this Agreement, except that any lender shall not incur any obligations under this Agreement, nor shall it be restricted from exercising any right of enforcement or foreclosure with respect to any related security interest or lien, so long as the purchaser in foreclosure is subject to the provisions of this Agreement.

21. Notices. All notices, requests, demands and other communications required or permitted to be given or made under this Agreement shall be in writing, and shall be deemed to have been duly given (a) on the date of personal delivery, (b) on the date of delivery to a nationally recognized overnight delivery service, (c) on the date of deposit in the U. S. mails, postage prepaid, by certified mail, return receipt requested, or (d) on the date of transmission by telephonic facsimile transmission, in each case addressed as follows, or to such other addresses or facsimile numbers as shall be designated from time-to-time by the parties pursuant to this paragraph 21:

If to KDL to:

If to the Operating Companies to:

Fax: (317) 838-1842

22. Force Majeure. In the event KDL or the Operating Companies are delayed in or prevented from performing any of its respective obligations under this Agreement due to acts of God, war, riots, civil insurrection, acts of the public enemy, strikes, lockouts, acts of insurrection, acts of civil or military authority, including orders and decisions by applicable administrative agencies, fires, floods or earthquakes, fiber cuts or other causes beyond the reasonable control of the party delayed, then such delay or nonperformance shall be excused. If any such delay or nonperformance due to the foregoing causes or events occurs or is anticipated, the party affected shall promptly notify the other party in writing of such event or expected event and the cause and estimated duration of such event. The party affected by such event shall, at no cost to the other party, exercise due diligence to shorten or avoid the delay or nonperformance and shall keep the other party advised as to the continuance of the delay and steps taken to shorten or terminate the delay or nonperformance.

23. Limitation of Liability. NEITHER PARTY SHALL HAVE ANY RESPONSIBILITY, LIABILITY OR OBLIGATION TO THE OTHER OR THE OTHER'S AFFILIATES, DIRECTORS, OFFICERS, AGENTS, EMPLOYEES, REPRESENTATIVES, SUCCESSORS OR PERMITTED ASSIGNS FOR ANY SPECIAL, INCIDENTAL CONSEQUENTIAL OR PUNITIVE DAMAGES INCLUDING, BUT NOT LIMITED TO, LOSS OF PROFITS, COST OF REPLACEMENT SERVICES, LOSS OF CUSTOMERS OR AGENTS, LOSS OF USE, OR PENALTIES IMPOSED BY OTHERS, REGARDLESS OF ANY ACT OF OMISSION OR COMMISSION IN CONNECTION WITH OR UNDER THIS AGREEMENT, INCLUDING, BUT NOT LIMITED TO, ANY DEFECT IN, DELAY IN OR LOSS OF AVAILABILITY, OR FAILURE OF THE FIBER.

24. Indemnification.

- (a) Operating Company shall defend, indemnify and hold harmless KDL and each of its officers, directors, employees and agents, from and against, and shall pay the full amount of, any loss, liability, claim, damages, expense, including costs of investigation and defense and reasonable attorney's fees, whether or not involving a third-party claim (collectively, Damages), arising, directly or indirectly, from Operating Company's acts or omissions in connection with this Agreement, except to the extent caused by KDL. Such indemnity shall apply regardless of whether the Damages result from any asserted or actual negligence or willful misconduct of, or breach of warranty by, KDL or any of its officers, directors, employees or agents. Such indemnity shall not apply, however, to the extent that KDL receives insurance proceeds in respect of any such Claim.
- (b) KDL shall defend, indemnify and hold harmless the Operating Company and each of its officers, directors, employees and agents, from and against, and shall pay the full amount of, any loss, liability, claim, damages, expense, including costs of investigation and defense and reasonable attorney's fees, whether or not involving a third-party claim (collectively, Damages), arising, directly or indirectly, from KDL's acts or omissions in connection with this Agreement, except to the extent caused by Operating Company. Such indemnity shall apply regardless of whether the Damages result from any asserted or actual negligence or willful misconduct of, or breach of warranty by, the Operating Company or any of its officers, directors, employees or agents. Such indemnity shall not apply, however, to the extent that Operating Company receives insurance proceeds in respect of any such Claim.
- (c) Procedure for Indemnification. Within 10 days after receipt by Indemnitee of written notice of any claim or the commencement of any action, suit, litigation or other proceeding against it (Proceeding) with respect to which it is eligible for indemnification hereunder, Indemnitee shall notify Indemnitor thereof. Failure to so notify Indemnitor shall not relieve Indemnitor of its indemnification obligation, unless Indemnitor establishes that defense thereof has been prejudiced by such failure. Thereafter, Indemnitor shall be entitled to participate in such Proceeding and, at its election upon notice to Indemnitee to assume the defense of such Proceeding. If Indemnitee has given timely notice to Indemnitor of the commencement of such Proceeding, but Indemnitor has not, within 10 days after receipt of such notice, given notice to such Indemnitee of its election to assume the defense thereof, Indemnitor shall be bound by any determination made in such Proceeding or any compromise or settlement made by Indemnitee. A claim for indemnification for any matter not involving a third-Party claim may be asserted by notice from Indemnitee to Indemnitor.

25. Disclaimer. THERE ARE NO AGREEMENTS, WARRANTIES OR REPRESENTATIONS, EXPRESS OR IMPLIED, EITHER IN FACT OR BY OPERATION OF LAW, STATUTORY OR OTHERWISE, INCLUDING WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE, EXCEPT THOSE EXPRESSLY SET FORTH HEREIN.

26. Counterparts. This Agreement may be executed in several counterparts, each of which shall be regarded as an original and all of which together shall constitute one and the same document.

27. Expenses. Except as otherwise expressly provided herein or therein, each party shall bear the costs and expenses incurred by it in negotiating, entering into and performing any of its obligations under this Agreement.

28. Headings. The headings of this Agreement are inserted for convenience only and shall not be deemed to be a part hereof.

29. Severability. If any one or more of the provisions of this Agreement shall be held to be invalid, illegal or unenforceable, the validity, legality or enforceability of the remaining provisions hereof or thereof shall not in any way be affected or impaired thereby. If this Agreement shall be held to be unenforceable against either party, the enforceability of such agreement against the other party hereto shall not in any way be affected or impaired thereby.

30. Dispute Resolution. KDL and the Operating Companies plan to use due diligence to work together to implement this Agreement. However, the parties understand that unforeseen issues and conflicts may arise. It is the intention of the parties that this Agreement not terminate prior to the expiration of the Term. Rather, the parties acknowledge their desire to reach a working solution to such issues and conflicts by employing the following dispute resolution process:

- (a) To the extent that any issue of or relating to this Agreement cannot be reasonably resolved by KDL and the Operating Companies, a designated representative of each party shall meet promptly in an effort to resolve the dispute extrajudicially.
- (b) If the dispute is not resolved as a result of such meeting, the dispute shall be immediately referred in writing to the members of senior management of each party. The members of senior management shall meet to attempt to resolve the dispute within twenty (20) days after the meeting described in paragraph 30(a) above.
- (c) No less than ten (10) days prior to the meeting of senior managers, the parties shall exchange written statements of the issues in dispute, the facts and evidence supporting each side, and the name of the member of senior management designated and authorized to resolve the dispute.
- (d) If the good faith attempts to resolve the dispute as stated in paragraphs 30(a), (b) and (c) are unsuccessful, either party may start binding arbitration in Evansville, Indiana. The arbitration will be before a three-arbitrator panel. KDL will select one arbitrator to

represent its interest, at its sole expense; and the Operating Companies will select one arbitrator to represent their collective interests. The final arbitrator, who shall be impartial, will be selected by the two partial arbitrators. In the event the two partial arbitrators shall fail to select an impartial arbitrator, either party may apply to a court of law to have a judge select an impartial arbitrator. The three arbitrators by majority ruling may adopt such procedures as they deem efficient and appropriate for making the determinations submitted to them for adjudication. No statements by, or communications between, the parties during negotiation or mediation, or both, will be admissible for any purpose in arbitration. Each party shall bear its internal expenses and its attorney's fees and expenses, and jointly share the cost of the impartial arbitrator. The decision(s) of a majority of the arbitrators shall be final and binding on the parties.

- (e) Notwithstanding the foregoing, either party may resort to a court by applying for interim relief if such party reasonably determines that such relief is necessary to prevent irreparable injury to it or to a third party.

31. Binding Agreement. This Agreement, including the attachments, embodies the entire agreement between the parties hereto and supersedes any prior or contemporaneous oral or written agreements between the parties, and once this Agreement has been executed, any amendments hereto must be made in writing and signed by both parties.

32. Governing Law. This Agreement shall be construed and enforced under and in accordance with the laws of the State in which the affected Operating Company resides, without regard to conflicts of laws principles.

33. Customer Information Disclosure. The Operating Companies and the KDL understand and agree that KDL shall not have access to, share or have the opportunity to obtain the Operating Companies' customer information except to the extent that is otherwise permitted to any telecommunications company under applicable state and federal law, rules and regulations, and tariffs, including law affecting the privacy and disclosure of customer information, as they exist today and as changed from time to time.

34. Confidentiality. In light of the competitive circumstances, including regulatory changes, in both the energy and telecommunications markets, the Parties understand and agree that they will be exchanging information and entering into agreements for the construction and lease of facilities, the disclosure of which is likely to harm their competitive positions in their respective markets. Therefore, they agree that the business information, materials, and business plans that they provide to or discuss with each other, along with the terms and conditions thereof are deemed to be confidential unless the disclosing Party indicates otherwise.

Each Party shall, during the term of this Agreement and thereafter, take all steps reasonably necessary to hold in trust and confidence and to protect from disclosure to the public or third parties information of the other that it knows or has reason to know is the trade secret or confidential information of the other.

Confidential information does not include:

- (a) information that is now or hereafter becomes, through no act or omission of the Party receiving the information, generally known or available in the relevant industry or industries, or is now in or later enters the public domain through no act or omission of the Party receiving the information;
- (b) information that was acquired by the receiving Party prior to entering into this Agreement and without restrictions of the information's use and disclosure;
- (c) information that has been or is hereafter received by the receiving Party from a third party who has rightfully and lawfully disclosed the information to the receiving Party;
- (d) information that the receiving Party discloses pursuant to written permission of the Party whose confidential information is to be disclosed under such permission.

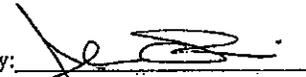

If a Party receives a request for disclosure of the confidential information of the other Party pursuant to lawful order, such as discovery requests or court or administrative agency order, that Party will give immediate notice to the other of such request and the Parties will cooperate to obtain a protective order or other lawful protection against disclosure of such confidential information in the public record or otherwise.

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be duly executed and to become effective as of the date first written above.

GLOSSARY OF TERMS

"Agreement" means this Agreement and all extensions and modifications hereof, together with all addenda, attachments, appendices, exhibits and schedules.

"Fiber" means fiber cable, up to 144 single-mode fiber strands (or copper strands, as applicable) and attachment hardware to be installed on and between the Applicable Operating Company's Utility Structures pursuant to this Agreement.

"Fiber Optic Capacity" means on-net transmission capacity (1 T1, 1 DS3 or 1 OC3) between any two (2) KDL points-of-presence ("KDL POP") located along a specific Route described in a Project Description or located at an end of a Route described in a Project Description

"Fiber Projects" means those projects described in the Project Descriptions attached as Exhibit A.

"Power Zone" is that area of a standard utility pole above the Communications Zone and Neutral Zone in the proximity of electrical conductors.

"Project Descriptions" are the forms attached as Exhibit A that describe the Fiber Projects covered by this Agreement.

"Route" means a continuous path of Utility Structures, on and between which KDL installs Fiber pursuant to this Agreement.

EXHIBIT A-- PROJECT DESCRIPTIONS
PROJECT DESCRIPTION # _____

1. **Project Defined.**

Section 1

Fiber: KDL, at its cost, to install one (1) fiber optic cable or FOG Wire and related fiber strands, splices and terminations.

Route: _____

It is understood that the Fiber may, at KDL's discretion, be placed in the Power Zone along such Route. It is also understood that KDL will be allowed to place the Fiber in a position that will require the least amount of make ready work. (Approximately ____ miles).

Both parties will use best efforts to have Fiber described in this Section 1 installed on or before _____, 2____.

2. **Applicable Operating Company Strands/KDL Strands Defined.**

On the terms of the Agreement, the Applicable Operating Company will retain ____ of the single-mode fiber strands installed along the Route described in Section 1 above. On the terms of the Agreement, the Applicable Operating Company may elect two (2) fiber strands or that number of fiber strands, which equals five percent (5%) of the total number of strands KDL installs along that Route, rounded to the nearest even number (See Footnote 1 from Section 10 of the Agreement and Footnote 2 from Section 13 of the Agreement). Alternatively, the Applicable Operating Company may elect zero (0) fiber strands, in which case KDL would provide transmission capacity (1 T1, 1 DS3 or 1 OC3) between any two (2) of the following KDL points-of-presence ("KDL POP"): a KDL POP located along the

Route described in Section 1 above or a KDL POP located at an end of the Route described in Section 1 above.

KDL will lease the fiber strands installed along this Route that are not retained by the Operating Company.

3. **Special Terms.**

Ground Space (Optional at KDL's Discretion). The Applicable Operating Company hereby leases to KDL for fair market value of \$_____, receipt of which is hereby acknowledged, and KDL hereby leases from such Company for fair market value of \$_____, a _____ square foot portion of ground space on property already owned by such Company at an Operating Company's substation along with ingress and egress thereto, sufficient for KDL to construct up to a _____ square foot building and to locate certain equipment associated with the operation of its fiber optic network. The parties agree to use their best efforts to identify the exact ground space and to prepare, sign and file in the appropriate court office a Memorandum of said Lease within ninety (90) days of the date KDL first intends to use such ground space.

4. **Basic Agreement.** This Project Description is hereby incorporated in its entirety into the Agreement between The Cincinnati Gas & Electric Company, PSI Energy, Inc., The Union Light Heat & Power Company, The Lawrenceburg Gas Company, The West Harrison Gas And Electric Company, and Kentucky Data Link, Inc., and is effective as of this ____ day of ____ 2_____.

|--------------------|------------|---|

Should Licensee request Licensor to expand capacity or purchase additional plant, Licensee agrees to pay all reasonable costs. If Licensor or another party that has been granted a license joins in the request and will benefit from the expansion or purchase, Licensee agrees to pay a percentage of all costs proportionate to Licensee's share of the benefit received from the expansion or purchase. 28.04 When multiple applications, including application of Licensee, are received by Licensor with respect to any pole which must be replaced or rearranged to provide additional space prior to commencement of the work on that pole a Transfer Attachment Fee may be charged. Licensor will equitably prorate to the extent that it is practical between Licensee and other applicants for the pole space, the common expenses of engineering, rearrangement, and replacement, if any, which result from the processing of multiple applications. Licensee shall be bound by Licensor's determination as to any such pro-ration of Transfer Attachment Fee to Licensee.

Crown Castle

All charges for inspections, engineering, replacement or rearrangements of Licensee's Attachments from Licensor's Poles and, without limitation, any other work performed for Licensee shall be based upon the full cost and expense, including reasonable overhead, incurred by Licensor or its representative for performing such work for Licensee to include without limitation costs to transfer or moving of Licensor facilities and removal of old Poles. The cost to Licensee shall be determined in accordance with the regular end customary methods used by Licensor in determining such costs. Licensee upon

review of the Make Ready Estimate desires to proceed with the process to obtain a License from Licensor, Licensee shall submit payment in the amount of the Make Ready Estimate together with the Application Fee and engineering survey costs to Licensor within fourteen (14) days of receipt of the Make Ready Estimate and invoice for such amounts. Licensee shall be solely responsible for negotiating with existing attaches for Make-Ready Work relating to such other existing attacker facilities located on, within or in Licensor's Poles and shall be responsible for paying all charges incurred in transferring or rearranging existing attacker facilities to accommodate the placement of Licensee's Attachment on, within or in Lices's Poles. In the event, Licensee declines to proceed with the project Licensee shall reimburse Licensor any costs and expenses incurred by Licensor to date including but not limited to Application Fee, engineering and administrative expenses and costs.

Commonwealth of Kentucky

Where Licensee's attachments can be accommodated on poles of Licensor by rearranging or changing the facilities of Licensor or other joint users, Licensee agrees to pay Licensor in advance the cost of making such rearrangements or changes. Strengthening of poles (guying) required to accommodate the attachments of Licensee and the bonding of Licensee'S strand to that of Licensor shall be performed by Licensee at his sole risk and expense. Such work, however, may be performed by Licensor at its option, and in such event Licensee shall pay
