Master Contractor Agreement for Network Services

151026N1

Windstream Contract Number

This Master Contractor Agreement for Network Services (“Agreement”), effective January 1, 2016 (the “Effective Date”) made and entered into by and between Windstream Supply, LLC, 13560 Morris Road, Milton, GA, 30004, on behalf of itself and its Affiliates (collectively, “Windstream”), and Triple D Communicaitons, LLC, having an address of 950 48th Avenue North, Suite 100, Myrtle Beach, SC 29577 (“Contractor”), is entered into as of the Effective Date and provides terms and conditions for the provision of Services (as defined below) by Contractor to Windstream. The scope of the Services and related requirements and specifications with respect to all Projects (as defined below) performed by Contractor for Windstream hereunder shall be described in writing in a statement of work, purchase order, work order, change order, plant maintenance request, emergency service request, JobTrac report, buried drop tool or a quote system report generated through Windstream’s web-based procurement of infrastructure network contractor services (“PINCS”) system or a similar successor system (each, a “Project Scope Agreement” or “PSA”). Each PSA shall become a part of this Agreement. Terms and conditions in a PSA shall supersede and replace any conflicting terms and conditions in this Agreement for only the specific project assignment defined in the PSA. All PSAs, exhibits and amendments to the Agreement, together with the terms and conditions of this Agreement, shall constitute and be construed as the Agreement.

Entire Agreement.

The terms of this Agreement shall constitute the entire Agreement between the parties hereto and no previous communications, representations or agreements either oral or written, between the Parties hereto with respect to the subject matter thereof shall vary the terms of this Agreement. This Agreement supersedes and replaces all prior agreements.

Definitions.

Except as otherwise specified herein or as the context may otherwise require, the following terms have the meanings set forth below for all purposes of this Agreement, including each PSA (as defined herein), and the definitions of such terms are equally applicable to both the singular and plural forms of such terms.

“Affiliates” shall mean, with respect to any person, entity, or enterprise, any other person, entity, or enterprise that, directly or indirectly through one or more intermediaries, Controls, is Controlled by, or is under common Control with such person, entity, or enterprise. “Control” (including the correlative terms “Controls”, “Controlled by”, and “under common Control with”) shall mean, with respect to any person, entity, or enterprise, the power, directly or indirectly, either to (i) vote a majority of the voting shares or other voting interests in such person, entity, or enterprise for the election of directors or other governing body of such person, entity, or enterprise or (ii) direct or cause the direction of the management and policies of such person, entity, or enterprise, whether through the ownership of voting securities, by contract, or otherwise.

“Confidential Information” shall have the same meaning as set forth in the Mutual Non-Disclosure Agreement.

“Final Acceptance Certificate” shall mean the form attached hereto as **Exhibit A**, which may be executed and delivered by Windstream to Contractor upon final completion of a Project.

“Loss” or “Losses” shall mean all losses, liabilities, damages, and claims, and all related costs and expenses (including reasonable legal fees and disbursements and costs of investigation, litigation, settlement, judgment, interest, and penalties).

“Milestone Date” shall mean the date agreed to by Windstream and Contractor as the deadline for the completion of a particular phase of each Project.

“Mutual Non-Disclosure Agreement” shall mean that agreement, pertaining to the duties and obligations of the Parties with respect to Confidential Information, entered into by and between the Parties prior to or contemporaneously with the Agreement.

“Partial Acceptance Certificate” shall mean the form attached hereto as **Exhibit B**, which may be executed and delivered by Windstream to Contractor upon completion of phases of a Project or successful completion of work identified by Milestone Dates.

“Party” or “Parties” shall mean Windstream, Contractor, or both.

“Project” shall mean each undertaking designated by and agreed to by Windstream and Contractor under which Contractor shall perform all of the work in substantial compliance with the agreed upon specifications set forth in a PSA.

“Project Completion Notification” shall mean the written notification from Windstream upon completion of a Project.

“Project Site” shall mean the geographical location where the work for each Project shall be performed.

“Services” shall mean the work, services, Projects, assignments, and tasks Contractor shall perform pursuant to this Agreement.

“Subcontractor” shall mean a person or entity that has a contract with Contractor to perform a portion of the work required to complete a Project.

“Term” shall have the meaning set forth in Section 2 (Term).

“Unit” shall mean one of the nomenclature codes (e.g., “BD3”) listed on the Schedule (defined below) that identifies a specific construction task and the construction methods, materials and quantities to be used for installation.

1. **Services.**

This Agreement contains the prices and terms and conditions pursuant to which Windstream may order and Contractor shall render Services. Contractor shall perform the Services in accordance with the agreed upon PSA details, drawings and specifications and deliver the materials, if any, that are to be provided by Contractor, as described in the PSA. Unless otherwise agreed in a PSA, Contractor shall provide and pay for all expenses in connection with labor, materials, equipment, tools, construction equipment and machinery, water, heat, utilities, transportation, and other facilities and services necessary for proper execution and completion of the PSA, whether or not such expenses are incorporated in the PSA. Any Services performed on behalf of Windstream by Contractor will be covered under the terms of this Agreement. The Parties may enter into additional PSAs, in which case each PSA shall be governed by and become part of this Agreement.

2. **Term.**

Effective Date:

The initial term of this Agreement shall begin on the Effective Date of the Agreement as stated above and shall continue for a period of two (2) years from the Effective Date (the “Initial Term”). At the conclusion of the Initial Term, this Agreement will automatically renew for successive one (1) year terms, unless either Party provides the other Party with written notice of its intent not to renew this Agreement at least one hundred eighty (180) days prior to the expiration of the Initial Term or any renewal term. The Initial Term and any renewal terms may be collectively referred to herein as the “Term”. Notwithstanding the foregoing, the Initial Term and any renewal term shall be deemed automatically extended as reasonably necessary to allow for the completion of performance hereunder, including under any exhibits, PSAs, attachments and amendments hereto, and, in such case, the term shall expire upon Windstream’s delivery of the applicable Project Completion Notification or a Party’s exercise of a termination right afforded to such Party hereunder in accordance with the terms hereof.

3. Responsibilities of Windstream.

- a) Payment Terms. Pursuant to the terms of each PSA, Windstream shall issue payment of any undisputed amount, less any retention provided for herein, within sixty (60) days after receipt of the applicable invoice by Windstream Accounts Payable. Windstream reserves the right to pay any amounts owed to Subcontractors directly to such Subcontractors, in which case such amounts shall be deducted from any amounts owed to Contractor. Nothing contained in the preceding sentence shall be construed as:
- i) limiting the responsibilities of Contractor as to its Subcontractors,
 - ii) creating any responsibilities of Windstream as to any Subcontractor, or
 - iii) evidencing any control of any Subcontractor by Windstream.

Approval and payment of invoices is solely for the purposes of payment and shall not be viewed as approval or acceptance of the workmanship or materials. Upon Project completion and Windstream's final inspection and acceptance (which may occur some time after Project completion), Windstream shall pay Contractor all amounts to which Contractor is entitled. Final payment shall be invoiced by Contractor within sixty (60) days after the date of completion of the Project. No payment shall be due to Contractor while Contractor is in default of any provision of this Agreement or any provision of a PSA covering a specific Project. Billing disputes shall not be cause for Contractor's non-performance under this Agreement.

- b) Windstream's obligation to make payment is subject to Contractor having delivered to Windstream either i) a release, in a form satisfactory to Windstream, of all liens arising out of this Agreement for Services performed and material supplied, or ii) receipts reflecting payment in full of all labor, materials, and equipment for which a lien could be filed for Services performed and material supplied, or iii) a bond, satisfactory to Windstream, indemnifying Windstream against such liens (each, a "Waiver"). Contractor shall also secure lien waivers ("Release of Liens") from each Subcontractor who has performed work on the particular phase of the Project and shall deliver a Release of Liens executed by each such Subcontractor which releases any and all claims against Windstream, including any claims against the real property at the location of the Project.
- c) Windstream may hold in reserve from all payments until final payment, an amount equal to 10% of the total due, or such greater amount as may be indicated on the PSA as retainage. Windstream may withhold such amounts as it deems appropriate to secure performance hereunder, or Windstream may, by notice to Contractor, or by listing on the PSA, require posting of bond, letters of credit, or other such security, at Windstream's discretion. Where a bond or letter of credit is indicated on the PSA, Contractor shall furnish the required bond or letter of credit to Windstream prior to commencement of any Service.

4. Work On Time and Expense Basis.

Contractor and Windstream may agree that services will be performed on a time and expense basis, at rates set forth in the PSA and as further described herein.

- a) When work by Contractor is to be performed on a time and expense basis, payment shall be made by Windstream to Contractor pursuant to Section 4 hereof for time actually expended and any reimbursable expenses actually incurred for Services at the rates set forth in the PSA. Reimbursable expenses are defined to be any expense Windstream has agreed to pay as provided in the PSA.
- b) Prior to performance of work on an hourly basis, Windstream shall specify and Contractor shall agree in writing to the number of employees and amount of work equipment that Contractor will provide. When such quantity has been agreed upon by Windstream and Contractor, Contractor shall not increase the quantity without written authorization from Windstream.

All work performed on a time and expense rate basis will be administered in strict accordance with Contractor's statement of working conditions included in the PSA.

5. Work On Unit Basis.

When work by Contractor is to be performed on a Unit basis, payment shall be made by Windstream to Contractor i) for materials at the rates set forth in the PSA and ii) for labor at the rates set forth in the **PSA and its Exhibits** (the "Schedule"). Each individual Schedule is to be separately executed and when so executed shall become a part of this Agreement. Terms and conditions in the Schedule shall supersede any conflicting terms and conditions in this Agreement for only the specific project assignment associated with that Schedule. If the Schedule does not contain a Unit price, payment shall be made at the rate(s) defined in the PSA. Windstream may specify any number of combination of Units deemed necessary for work to be performed, and Contractor shall be paid on the basis of Units completed, pursuant to this section. If work is requested of Contractor for which no Unit description and price is established in the Schedule or PSA, the prices of such work shall either be on an hourly basis or through the establishment of additional Units which will be made a part of this Agreement. Windstream reserves the right to source these additional Units outside of this Agreement. Windstream reserves the right to modify the work description and the material(s) breakdown for Unit(s) listed on the Schedule and also to delete Units therefrom. If a modification leads to a substantial increase or decrease in work requirements (as determined in Windstream's sole discretion), the Parties may renegotiate the labor rate for that specific Unit.

6. Work On Lump Sum Basis.

Contractor and Windstream may agree that Services will be performed on a lump sum basis, at rates set forth in the PSA. If Contractor will be submitting more than one invoice for work performed on a lump sum basis, Contractor will submit to Windstream:

- a) a schedule of costs of the various phases of the Services, including quantities, divided to assist Windstream in determining the accuracy of the invoices. The schedule will be provided to Windstream prior to the first invoice being submitted by Contractor. The sum of the schedule of costs will be the total PSA price.
- b) a schedule of Milestone Dates for the Project, along with a fixed fee, or a percentage of the total PSA price that becomes due upon successful completion of work identified to be complete at each Milestone Date.

7. Inspection and Acceptance of Project(s).

- a) Upon completion of each Project phase or on each Milestone Date set forth in the PSA(s), Windstream shall have the right to inspect and examine Services required to be completed on each Project as of the phase or Milestone Date. In the event Windstream reasonably finds Services to be in compliance with the specifications of the PSA, Windstream may sign and deliver a **Partial Acceptance Certificate**, in substantially the form attached hereto as **Exhibit B**, relating to work completed as of the phase or Milestone Date; provided that the requisite Waiver and Release of Lien(s) have been fully executed and presented to Windstream. In the event Services do not meet the requisite specifications designated in the PSA, or in the event Contractor fails to deliver the Waiver and Release of Lien(s) required pursuant to this Agreement, Windstream shall notify Contractor that such requirements of the PSA or this Agreement have not been met.
- b) In the event Windstream notifies Contractor that the requirements of the PSA have not been met, or that the requisite Waiver and Release of Lien(s) have not been delivered, Windstream will withhold the Partial Acceptance Certificate, and Contractor shall have ten (10) days in which to meet such requirements and/or deliver such Waiver and Release of Lien(s).
- c) Upon the final completion of a Project, Windstream shall have the right to inspect and examine Services, and if Services have been completed substantially in accordance with the terms of a PSA, all Subcontractors have been paid, there are no outstanding unsettled liens, and all applicable Waiver and Release of Lien(s) have been delivered to Windstream, Windstream may issue a signed **Final Acceptance Certificate**, in substantially the form attached hereto as **Exhibit A**, or a Project Completion Notification. The Final Acceptance Certificate or Project Completion Notification shall constitute final acceptance of the Project and a waiver of all claims associated with defective work under the PSA, except those arising from:
 - i) faulty or defective work discovered after the completion date;
 - ii) terms of the warranties provided herein and in the PSA(s); or

- iii) unsettled liens of Subcontractors.

8. Withholding of Payments.

Upon written notice by Windstream:

- a) Windstream may withhold money due for portions of any defective work which have not been corrected by Contractor within a reasonable amount of time to the satisfaction of Windstream.
- b) Windstream may withhold the costs of correcting any defective work.
- c) Windstream may withhold money due for claims that might be the subject of reimbursement to Windstream by Contractor under this Agreement.
- d) If Windstream is advised that Contractor is not promptly paying Subcontractors or if Windstream is advised that employees of Contractor are not being promptly paid, Windstream may withhold such money as Windstream deems sufficient to ensure that obligations incurred by Contractor in connection with Services covered by this Agreement will be paid in full. Contractor shall pay each Subcontractor within five (5) days of any payment from Windstream to Contractor for and on account of materials furnished or work performed by each Subcontractor.

Windstream may withhold from or offset against money owed to Contractor under this Agreement any amounts Contractor owes to Windstream or a Windstream Affiliate for materials purchased from Windstream or a Windstream Affiliate.

9. Right to Audit.

Windstream may, upon notice to Contractor, audit any and all work or expense records of Contractor relating to this Agreement, including compliance with the Windstream Supplier Code of Ethics, as described in Section 41 herein. Contractor shall have the right to exclude from such inspection any of its confidential or proprietary information which was not otherwise provided to Windstream in performance of this Agreement. Contractor further agrees to maintain its books and records relating to material and/or services provided for a period of three (3) years from the date such work was completed, and to make such books and records available to Windstream, during normal business hours, at any time or times within the three year period.

10. Changes in Work.

Windstream may make changes to Services by altering, adding to, or deducting from Services. No change in the PSA price shall be made for minor changes not involving extra cost. All adjustments in the maximum PSA price shall be agreed to in writing by the Parties; provided, however, such agreement shall be made prior to Contractor performing any such change. If, after notification by Windstream of a need for additional manpower and equipment, Contractor is not able to meet the increased demand within the time required by Windstream, Contractor will not object to the securing of another Contractor(s) by Windstream to perform similar Services in the area for which Contractor has been awarded the PSA.

11. Materials.

- a) Contractor agrees all materials furnished by Contractor as a part of the Services, as identified in the PSA, will be purchased through Windstream, unless Windstream approves, in advance in writing, the purchase of products from other suppliers. Materials purchased through Windstream will be purchased at a rate equal to the purchase price paid for such materials by an Affiliate of Windstream and reimbursement therefor shall be subject to the prompt pay discount under Section 3(a) above. Contractor also understands and agrees that it is not authorized to purchase any materials through Windstream at Windstream's Affiliate's original purchase price, except for those materials required to complete Services specified in the PSA. Contractor shall identify any orders for materials to Windstream that are not required to complete Services specified in the PSA, and such materials shall be priced at the then current rates charged by Windstream.
- b) Contractor shall be responsible for the transportation, care and storage of all materials purchased from Windstream in order to comply with Contractor's obligations pursuant to the terms of this Agreement and PSA. Contractor may have the option, at Windstream's discretion, and depending on location and

availability, to enter into a lease agreement with Windstream for purposes of storing materials, vehicles and supplies necessary to complete Services under the PSA. If Windstream so offers and Contractor chooses to enter into such a lease, Contractor shall execute the written lease agreement as provided by Windstream or one of its Affiliates.

- c) If Contractor chooses not to enter into a lease agreement with Windstream or one of its Affiliates or if Contractor is not given the option to enter into such a lease, Contractor shall be responsible for the storage of materials, utility vehicles, and supplies necessary to perform Services under the PSA. Contractor shall pick up and transport such material and equipment from its place of storage to the Project Site as needed. Contractor is responsible for ordering materials as necessary to fulfill its obligations under this Agreement and the PSA.
- d) Upon termination of this Agreement, Windstream may request Contractor to pick up, transport and return to a place of storage designated by Windstream any unused materials Contractor purchased from Windstream at Windstream's Affiliate cost. Contractor may invoice Windstream for such materials as if utilized under this Agreement. In the event Contractor does not return such materials in accordance with this Section 11, Contractor may not invoice Windstream for reimbursement.
- e) It shall be Contractor's duty to inspect all material used in the performance of Services, and Contractor shall not use defective material in any work to be performed hereunder. Any potentially defective materials should be returned to Windstream for inspection and warranty in accordance with Windstream policy.

12. Contractor Employees.

- a) Contractor shall employ capable, experienced, reliable, and skilled people as required for the classes of work to be performed. Windstream reserves the right to require the removal of any Contractor employee, Subcontractor or Subcontractor employee from the Project if, in the judgment of Windstream, such removal is necessary to protect the interest of Windstream.
- b) Except as expressly stated otherwise herein, Contractor shall have the sole responsibility for the conduct of its employees and agents, including Subcontractors, and for payment of their entire compensation, including salary, withholding of income and social security taxes, worker's compensation, employee and disability benefits and the like. Contractor shall be responsible for all employer obligations towards all of its employees and agents, including Subcontractors, under all applicable laws.
- d) Hiring. Each Party agrees not to hire any employee of the other with whom such Party has contact without the prior written permission of the other Party, both during such time as the performance of Services under a PSA is pending and thereafter continuing for a period of six (6) months. This provision shall not apply to (i) Contractor's employees who have been continuously assigned to full-time Windstream servicing activities in excess of twelve (12) consecutive months, (ii) employees of either Party responding to advertisements made at job fairs, through Windstream internal communications, or in media circulated to the general public at large, or (iii) former employees, agents, or Subcontractors of Contractor.
- e) In the event a dispute regarding payment arises between Contractor and a Subcontractor (which term shall include for these purposes any lower-tier subcontractors), and the Subcontractor threatens to file a lien against the Project, Contractor is responsible for taking all steps, including immediate payment of the disputed amount, to insure that a lien is not filed against the Project. Contractor's remedy shall be against the Subcontractor and not Windstream or the Project.

13. Independent Contractor.

It is expressly understood and agreed that Contractor is an independent contractor and that Windstream shall not be liable for any of the Contractor's acts or omissions in the performance of Services. Contractor represents and warrants that all persons it employs to do work for Windstream shall be employees of Contractor exclusively and at no time shall be authorized to act as agents, servants, or employees of Windstream.

14. Supervision of Project(s).

Contractor shall supervise and direct each Project using Contractor's best skills and attention, and Contractor shall be solely responsible for all construction means, methods, technique, sequences and procedures relating to each Project, and Contractor shall coordinate all portions of each Project under each PSA.

15. Cooperation with other Contractors.

Contractor agrees that Windstream may award separate contracts to other contractors to perform certain Services at a particular Project Site, and Contractor agrees to cooperate with such other contractors. Contractor also agrees to afford separate contractors a reasonable opportunity for the introduction and storage of materials and equipment at the Project Site.

16. Time Frame for Work; Time is of the Essence.

Contractor has the responsibility to meet the start and completion dates of the Project shown in the PSA, unless amended thereafter by Windstream. All times stated in the PSA are of the essence in the performance of this Agreement. Windstream reserves the right to secure additional Contractor(s) to perform Services in the area for which Contractor has been awarded the PSA in order to meet dates.

17. Time Extensions.

The time for completion of the Project set forth in the PSA, shall be extended for a reasonable period of time for a delay due exclusively to causes beyond the control and without the fault of Contractor, including acts of God, and acts or omissions of Windstream with respect to matters for which Windstream is solely responsible. Contractor is responsible for requesting any extension in the time for completion of the Project and for fully documenting the justification for said extension. The exact amount of time granted for any extension shall be mutually agreed upon in writing between Windstream and Contractor.

18. Liquidated Damages.

Should Contractor fail to complete the Project within the time agreed upon, including any Windstream approved time extensions, then Windstream shall have the right to deduct from and retain liquidated damages out of such moneys which may be due or which may become due and payable to Contractor. Contractor acknowledges that Windstream's damages in the event of a delay in Project completion are difficult or impossible to determine. Therefore, the liquidated damages amount shall be the sum of (i) the amount necessary to allow Windstream to engage another contractor to timely complete the Project (as reasonably estimated by Windstream), and (ii) the amount of Windstream's other actual damages resulting from Contractor's failure to complete the Project by the agreed time, and such sum is not intended as a penalty. If the amount due and to become due from Windstream to Contractor is insufficient to pay in full any such liquidated damages, Contractor shall pay to Windstream the amount necessary to pay such damages in full. Windstream shall promptly notify Contractor in writing of the manner in which the amounts retained, deducted, or claimed as liquidated damages were computed.

19. Time Sheets.

Contractor shall furnish time sheets acceptable to Windstream of all work done, unless notified by Windstream that time sheets are not required. The time sheets shall be signed by the authorized representatives of Windstream and Contractor, and one copy of the time sheet shall be submitted by Contractor to Windstream. The time sheets shall be itemized in billing Windstream for work done.

20. Protection of Persons and Property.

- a) Precautions. Contractor shall at all times take reasonable precautions to protect the persons and property of others which may be on or adjacent to the Project Site from damage, loss, or injury resulting from performance under this Agreement by Contractor or any other party with whom Contractor may have subcontracted. Contractor shall not disturb or displace any protection installed by others. Any property moved or damaged by Contractor during the course of performance of Services hereunder shall be returned or repaired by Contractor, at Contractor's expense, to Windstream's satisfaction.
- b) Clean Up. Contractor shall keep the Project Site and surrounding area free from accumulation of waste materials or rubbish. Upon completion of the Project, and prior to final payment, Contractor

shall remove from and about the Project Site, all waste materials, rubbish, Contractor's tools, construction equipment, machinery, and surplus materials. Contractor shall dispose of all waste materials and rubbish in accordance with all applicable local, state, and federal laws, regulations and ordinances.

- c) Interruption of Utility Services. Except as otherwise may be provided in the PSA, all work shall be performed by Contractor without interruption to or interference with any utility services. Contractor shall identify the type and location of all utility services on, under, or near the Project Site. Contractor is responsible for all notifications to utility services prior to the commencement of work on the Project Site. Contractor shall indemnify and hold harmless Windstream for any interruption of, or damage to, utility services in breach of this Section 20(c).

21. Use of Explosives.

Contractor shall use no explosives in the performance of work under this Agreement without prior written approval of Windstream.

22. Notification of Injury or Damage.

Contractor shall promptly notify Windstream of any injury, death, loss, or damage to persons, animals, or property which is in any way related to Services performed under this Agreement, even though such occurrence may not have been caused or contributed to by Contractor, its employees, or agents.

23. Inspection of Work.

Windstream may maintain inspectors at the Project Site. After reasonable notice to Contractor, to further assure compliance with the plans and specifications and maintain quality of work, Windstream may periodically perform operational tests on the Project or a portion or portions thereof selected by Windstream. Any work rejected by Windstream shall be promptly repaired or replaced by Contractor.

24. Defects in Work.

Contractor hereby represents and warrants to Windstream that all work shall be provided in a professional, workmanlike and timely manner, free of material defect and using only the highest professional standards while maintaining full compliance with Windstream's practices, technical and security standards and procedures (collectively, "Windstream Practices"). In addition to the foregoing, all of the required work shall be performed in accordance with the PSA. Windstream Practices may be modified from time to time at Windstream's discretion, and a copy of such modifications will be provided to Contractor at Contractor's request. It is Contractor's responsibility to understand and abide by all current Windstream Practices. Contractor shall correct at its expense all defects or deficiencies in Services which result from Contractor-furnished material, workmanship, or failure to follow the plans, drawings, or other specifications that are part of the PSA, which are discovered within one year from the date Services are accepted. Acceptance of Services by Windstream shall not constitute a waiver of any such defects or deficiencies. Windstream, at its option, may remedy such defects and deficiencies and Contractor shall pay Windstream's costs and expenses of making such corrections.

25. Laws and Regulations.

Contractor shall in addition to all other applicable laws and regulations, comply with the following regulations during the course of all Services done for Windstream:

- a) CFR TITLE 23 Highways (Manual on Uniform Traffic Control Devices)
- b) CFR TITLE 29 Labor (OSHA)
- c) CFR TITLE 40 EPA
- d) CFR TITLE 49 Transportation (Federal Motor Carrier Safety Regulations)
- e) CFR, TITLE 49, Parts 100-180 (Hazardous Materials)
- f) CFR, TITLE 49, Parts 382 & 390-399 USDOT (Federal Highway Administration Safety Regulations)

- g) Federal Communications Commission OET Bulletin 65 (Edition 97-01) (Evaluating Compliance with FCC Guidelines for Human Exposure to Radiofrequency Electromagnetic Fields)
- h) Other (Identify)

Contractor shall also comply with all federal, state, local, and municipal laws, ordinances and regulations applicable to vehicle and drivers, the performance of Services, the transportation, storage, handling, and disposal of all material used in the performance of Services, and give all notices that may be required. Contractor shall obtain a copy of regulations or permit requirements from the proper authority and make all employees aware of these regulations. Contractor shall supply all traffic control devices as required by federal and state regulations. Contractor agrees to abide by all federal and state laws and regulations relating to privacy, secrecy, confidentiality, and non-disclosure of communications.

26. Taxes and Licenses.

Contractor shall at its expense:

- a) pay all taxes required by law in connection with this Agreement or any PSA awarded to Contractor, including sales, use, storage, and similar taxes,
- b) secure all licenses and permits, pay all charges and fees, and give all notices necessary for the due and lawful prosecution of Services and/or furnishing of materials, except those itemized in any specifications or other addenda to this Agreement or exhibits as being provided by Windstream, and
- c) provide evidence of such at Windstream's request.

27. OSHA Compliance.

- a) Contractor shall have full responsibility for following all the requirements of the Occupational Safety and Health Act of 1970 ("the Act") and all regulations issued under the Act, any other applicable safety procedures, and other such laws, regulations, customs, and practices as may be applicable for proper completion of work under this Agreement, without any recourse to Windstream for additional costs or time because of these requirements. Contractor agrees that it is familiar with the Act and regulations issued under the Act and all of the other laws, regulations, customs, and practices referred to above. Contractor further agrees that Windstream is not in a position to create, control, or abate any hazards associated with Services of Contractor and that Windstream is not in a position to identify any hazards associated with Services. Contractor further agrees that Windstream is relying upon Contractor to take all reasonable steps necessary to avoid or abate any hazards associated with Services. In connection therewith, Contractor will complete and sign the attached **Exhibit C - Contractor Safety Checklist**.
- b) Contractor shall designate at least one responsible member of Contractor's organization whose duty shall be to ensure that the Act and the regulations issued under the Act and all other laws, regulations, customs, and practices referred to above are followed and that all reasonable steps necessary to avoid or abate any hazards associated with Services are taken.
- c) Contractor agrees and represents that it has developed and implemented a written safety program that complies with the Act and all regulations issued under the Act and which covers Services to be performed under this Agreement. Contractor further agrees and represents that its written safety program is enforced.
- d) Contractor agrees that no unauthorized persons, including representatives of government agencies, shall be allowed to enter a Project Site without prior approval of Windstream.
- e) Contractor agrees to indemnify Windstream for all citations and complaints arising under or connected with the Act and the regulations issued under the Act or any of the other laws, regulations, customs, and practices referred to above. Contractor agrees to defend Windstream against such citations and complaints at Windstream's election and to reimburse Windstream for all penalties, fines, costs, and attorneys' fees incurred by Windstream as a result of such citations and complaints.

- f) Contractor agrees to indemnify Windstream for all damages, including workers' compensation costs, sustained by Windstream as a result of any injury to any of Windstream's employees resulting from the negligence, recklessness, or willfulness of Contractor.
- g) Contractor further agrees to indemnify and hold Windstream harmless from any claims, damages, and complaints made by any employee of Contractor against Windstream based upon or arising out of any injury or illness allegedly suffered by such employee or out of any condition or hazard associated with such employee's work for Contractor and/or contact with Windstream. Such indemnification includes the duty to pay Windstream's attorneys' fees, expert fees, and costs of defense.
- h) If there is a conflict between this Section 27 and any other provision of this Agreement, this Section 27 shall govern.

28. Performance and Payment Bond.

Contractor may be required to provide Windstream a Performance and Payment bond with a surety listed by the United States Treasury Department as an Acceptable Surety.

29. Insurance.

- a) Contractor shall obtain and maintain, in full force and effect until the completion of Services and operations covered by this Agreement, such minimum insurance as will cover the obligations and liabilities of Contractor, its agents, and its employees which may arise from the operations under this Agreement. Insurance shall have limits of:

- i) Commercial General Liability policy of minimum limits of:

| | |
|-------------------|-----------------------------|
| General Aggregate | \$ 3,000,000 per occurrence |
| Each Occurrence | \$ 2,000,000 per occurrence |

The policy will be endorsed to show above aggregate limits applying to "each" Project site and will specifically state coverage applies to all operations conducted by Contractor, its employees, or agents on behalf of Windstream or subsidiary.

Where the performance of Services involves structural property, underground property, or blasting, Contractor's Commercial General Liability insurance policy shall provide coverage to the insured for legal liability arising from operations under this Agreement for property damage to include environmental liability (1) arising out of blasting, (2) arising out of collapse of, or structural injury to, any building or structure or (3) to underground facilities and utilities.

Other general liability forms are acceptable in lieu of the Commercial General Liability Form; however they are not to be used without written approval from Windstream's Risk Management Department.

- ii) Business Automobile Liability policy with minimum limits of:

| | |
|-----------------------|---------------------------|
| Bodily Injury | \$ 2,000,000 per accident |
| Property Damage | \$ 2,000,000 per accident |
| OR | |
| Combined Single Limit | \$ 2,000,000 per accident |

The policy will be issued using symbol "1 - any auto" coverage.

- iii) Workers Compensation:

| | |
|-------------------------------|-------------|
| Part A - Medical Benefits | Statutory |
| Part B - Employer's Liability | \$1,000,000 |

The policy will show the state in which operation on behalf of Windstream and/or subsidiary is being conducted. For operations conducted within monopolistic (state fund) states, Contractor will furnish a certificate of compliance from the appropriate state fund administrator.

iv) Errors & Omissions (for professional services):

| | |
|-------------------|-------------------------------|
| General Aggregate | \$2,000,000 per policy period |
| Per Claim OR | \$2,000,000 |
| General Aggregate | \$2,000,000 per policy period |
| Per Occurrence | \$2,000,000 |

- b) In each and every policy in (i) and (ii) of Section 29(a) above, Windstream Corporation and its subsidiaries shall be named an "additional insured" with respect to activities performed on behalf of Windstream and its subsidiaries.
- c) Coverage provided by the policies listed in this Section 29 will be issued by an insurance company, acceptable to Windstream, licensed in the state in which operations on behalf of Windstream are to be conducted. It is acceptable to use both primary and excess/umbrella policies to obtain necessary limits.
- d) Contractor will furnish to Windstream a certificate evidencing insurance coverage under sub-sections (i), (ii), (iii) and (iv) of this Section 29(a) above. Such certificate shall provide for a thirty (30) day prior notice to Windstream of any cancellation or material changes in coverage and shall be signed by a legal representative of the issuing insurance company.
- e) The provisions of sub-sections (i), (ii), (iii) and (iv) of Section 29(a) shall also apply to all Subcontractors, and Contractor shall be responsible for their compliance herewith.

30. Indemnification.

- a) Contractor shall indemnify, defend and hold harmless Windstream and its Affiliates and each of their respective officers, directors, agents and employees (collectively referred to herein as the "Windstream Indemnitees") from and against any and all Losses which may in any manner whatsoever arise out of (i) the negligence or intentional misconduct of Contractor, its Affiliates or any of their respective Subcontractors, officers, directors, agents, and employees, (ii) Contractor's use of Subcontractors' services, (iii) Contractor's misrepresentation of any facts to Windstream, (iv) Contractor's warranties, covenants, and agreements set forth in this Agreement and (v) the performance or non-performance of Services herein contracted, whether such claims, actions or causes of action are alleged to be the results of any act, omission, neglect or misconduct by Contractor, its Affiliates or any of their respective Subcontractors, officers, directors, agents, and employees or any or all of them, regardless of the fact that Services may have been completed and accepted by Windstream and Contractor may have received payment for Services.
- b) Without limiting Section 30(a), Contractor shall indemnify, defend and hold harmless Windstream Indemnitees from and against any and all Losses arising out of, resulting from or relating to any claim, action or cause of action for death or bodily injury or damage to property suffered by any person, entity or enterprise as a result of any act, omission, neglect or misconduct by Contractor, its Affiliates or any of their respective Subcontractors, officers, directors, agents, and employees or any or all of them, or any third party, regardless of the fact that Services may have been completed and accepted by Windstream and Contractor may have received payment for Services.
- c) Without limiting Section 30(a), Contractor shall indemnify, defend and hold harmless Windstream Indemnitees from and against any and all Losses arising out of, resulting from or relating to any claim, action or cause of action for infringement or violation of any patent, trademark, service mark, trade secret, know-how or other intellectual property right by any person, entity or enterprise as a result of any act, omission, neglect or misconduct by Contractor, its Affiliates or any of their respective Subcontractors, officers, directors, agents, and employees or any or all of them, regardless of the fact

that Services may have been completed and accepted by Windstream and Contractor may have received payment for Services.

31. Nondiscrimination.

Unless exempt under the rules and regulations of the Secretary of Labor or other proper authority, this Agreement is subject to applicable laws and executive orders relating to equal opportunity and nondiscrimination in employment. The Parties hereto shall not discriminate in their employment practices against any person by reason of race, creed, color, sex or national origin and agree to comply with the provisions of said laws and orders to the extent applicable in the performance of work or furnishing of services, materials, or supplies hereunder.

32. Assignment.

Contractor shall not assign, transfer or subcontract this Agreement or any part thereof, or enter into any agreement with any person, firm or corporation for performance of Contractor's obligation hereunder, or any part of such obligations, without the prior written approval of Windstream.

33. Termination or Suspension.

a) Termination for Cause. Windstream may interrupt, discontinue or halt work on a Project being performed under this Agreement and, without prejudice to any other right or remedy it may have, terminate this Agreement and any or all PSA(s), immediately upon verbal notice followed by a written notice to Contractor within seven (7) business days, if:

- i) Contractor fails to diligently perform Services;
- ii) A delay in Services occurs by reason of strike, lockout or operation of law, whether or not Contractor is excused by reasons of such delay;
- iii) Contractor is brought into bankruptcy proceedings, whether voluntary or involuntary, or makes an assignment for the benefit of its creditors, or is no longer financially responsible;
- iv) Contractor breaches any of the terms of the Agreement or PSA; or
- v) Contractor exposes Windstream to liability for damages for personal injury or property damage.

If Windstream terminates the Agreement under this Section 33(a), Windstream may take over the materials, tools and appliances purchased from Windstream at Windstream's Affiliate cost for use in Services, and Windstream may complete Services under the Agreement. Where Windstream completes Services under the Agreement, Contractor shall not be entitled to further payments or compensation under the Agreement (the "Unpaid Balance") until Services are completed by Windstream. If the Unpaid Balance exceeds Windstream's cost and expense of completing the Services, the excess shall be paid to Contractor. If Windstream's cost and expense exceeds the Unpaid Balance, Contractor shall pay the difference to Windstream. The completion of Services by Windstream shall not terminate any other obligation of Contractor under the Agreement. If Windstream terminates this Agreement under this Section 33(a), Windstream may exercise any rights, claims, or demands, to the extent of its interest in materials furnished, which Contractor has against any third party in connection with the Agreement, and Contractor does hereby assign, transfer, and set over unto Windstream all such rights, claims, and demands.

Contractor understands and agrees that Windstream's Affiliate costs and any terms of purchase and sale from Windstream that are disclosed to Contractor are confidential. All terms of this Agreement shall apply to assure protection. Given the nature of the information and the competitive damage that would result to Windstream, [Windstream, and their Affiliates if information contained therein is disclosed to any third party, money damages would not be a sufficient remedy for any such breach of the Agreement by Contractor, its agents or employees. In addition to all other remedies, Windstream shall be entitled to specific performance and injunctive or other equitable relief as a remedy for any such breach. Contractor, its agents and employees further agree to waive any requirement for the securing or posting of any bond in connection with such remedy.

- b) Termination for Convenience. Windstream may terminate this Agreement and all PSAs, or any individual PSA, at any time without cause by first giving verbal notice of the effective date of termination, followed by written confirmation of said termination date to Contractor within seven (7) business days.
- c) If this Agreement and all PSAs or any individual PSA is terminated by Windstream, Contractor shall be entitled to receive payment for any satisfactory work completed on such Project prior to the effective date of such termination.
- d) Suspension. If any Project is delayed for any reason, Windstream may suspend the term of the PSA for such Project upon ten (10) days prior written notice to Contractor, for a period up to a maximum of three (3) months. If a PSA is suspended by Windstream as provided in this Section 33, Contractor shall be entitled to receive just and equitable compensation for any satisfactory work completed on such Project prior to the effective date of such suspension.

34. Effect upon Termination or Suspension.

Upon any termination or suspension of this Agreement as herein provided, Contractor shall:

- a) discontinue all services hereunder as of the effective date of such termination or suspension;
- b) transfer and deliver to Windstream, in the manner and at the time directed by Windstream, all of its right, title, and interest in and to completed and uncompleted work, supplies, materials and all contracts, subcontracts, guaranties, books, papers, records, plans, specifications, drawings, surveys, schedules, reports and all other property produced as a part of or acquired in connection with the performance of Contractor's obligations under this Agreement and the PSAs; and
- c) in the event of early termination of this Agreement, or any PSA, take all action necessary to assure an orderly transition between Contractor and such other party as may be retained by Windstream to complete the development of the Projects on behalf of Windstream, including, without limitation, timely and complete departure from the Project Sites.

35. Facilities and Security.

To the extent that Contractor may require access to Windstream premises, Contractor will comply with Windstream security procedures and rules with respect to access to Windstream premises and use of facilities.

36. Proprietary Rights.

- a) Contractor and its employees and agents hereby assign, cede, and grant to Windstream all rights to possession of, and all right, title, and interest in the work products created under this Agreement, in whatever form or medium captured, and in and to all physical and electronic materials, reports, papers, documents (including drawings), manuals, programs, listings, software, and ideas, hereinafter referred to as "Products", and copies, abstracts, and summaries thereof, which may come into their possession in any manner by reason of Project assignment under this Agreement. Contractor shall promptly disclose to Windstream any Products known to it or its employees by reason of Project assignment under this Agreement, and all such Products that are not modifications or enhancements to Contractor-owned software shall be deemed to be works made for hire exclusively for Windstream, with Windstream having sole ownership of such Products and the sole right to obtain and to hold in its own name patents, copyrights, or such other protection as Windstream may deem appropriate to the subject matter, and any extensions or renewals thereof. Contractor agrees to give Windstream or any person designated by Windstream, at Windstream's expense, all assistance reasonably required to perfect the rights hereinabove defined, including the procurement, at Windstream's request, of written assignments and title commitments in a form acceptable to Windstream from all employees and agents assigned hereunder. The provisions of this Section do not apply to any material previously belonging to Contractor or lawfully acquired by Contractor in a manner independent of this Agreement which are used by Contractor in the performance of Services hereunder. All Products will be considered works made for hire and are and will constitute valuable trade secrets of Windstream.

- b) Contractor further acknowledges that Windstream would neither enter into Contractor Agreement nor permit the involvement of Contractor in the Project unless Windstream were assured that all such proprietary information would be held in confidence by Contractor. Contractor will hold the proprietary information in strictest confidence. Contractor will take reasonable security precautions to safeguard the proprietary information from theft or access by unauthorized persons and will not, directly or indirectly, for any reason, disclose or divulge any proprietary information to any person other than to Windstream and its employees.
- c) If Contractor becomes aware of any unauthorized possession or use of proprietary information, he or she will promptly notify Windstream, in writing, of the nature of such unauthorized possession or use. Contractor will not utilize or cause or permit to be utilized the proprietary information, for his or her own benefit or for the benefit of any person or entity other than Windstream.

Notwithstanding the foregoing, proprietary information will not include any information that is: (i) in the public domain at the time of disclosure or (ii) lawfully obtained by a third party.

37. Taxes.

Contractor further acknowledges that it is responsible for the payment of any and all local, state, and federal taxes that may become due as a result of compensation received for services rendered and products purchased under this Agreement.

38. Miscellaneous.

- a) Applicable Law. THIS AGREEMENT SHALL BE CONSTRUED AND THE LEGAL RELATIONS BETWEEN THE PARTIES DETERMINED IN ACCORDANCE WITH THE LAWS OF THE STATE OF ARKANSAS, USA, WITHOUT GIVING EFFECT TO ANY CHOICE OF LAW RULES WHICH MAY DIRECT THE APPLICATION OF THE LAWS OF ANY OTHER JURISDICTION. ANY DISPUTE HEREUNDER REQUIRING JUDICIAL RESOLUTION SHALL ONLY BE MADE THE SUBJECT OF AN ACTION BROUGHT IN A COURT OF COMPETENT JURISDICTION IN PULASKI COUNTY, ARKANSAS, AND THE PARTIES EACH ACCEPT THE EXCLUSIVE JURISDICTION OF SUCH COURTS. The Parties hereto expressly exclude the application of any non-United States laws and the United Nations Convention on Contracts for the International Sale of Goods from this Agreement and any transaction that may be entered into between the Parties in connection with this Agreement.
- b) Effects of Headings. Headings to articles and sections of this Agreement are to facilitate reference only, and do not form a part of this Agreement, and shall not in any way affect the interpretation hereof.
- c) Non-waiver. No waiver of any provisions of this Agreement and no consent to any default under this Agreement by Windstream shall be effective unless the same shall be in writing and signed by or on behalf of Windstream. No course of dealing or failure of Windstream to strictly enforce any term, right or condition of this Agreement shall be construed as a waiver of such term, right or condition. Waiver by Windstream of any default by Contractor shall not be deemed a waiver of any other default.
- d) Counterparts. This Agreement may be executed in multiple counterparts, each of which shall be deemed to be an original, but all of which together shall constitute only one document. Signatures on this Agreement which are exchanged by facsimile or other electronic means are true and valid signatures for all purposes hereunder and shall bind the Parties to the same extent as original signatures.
- e) Notices. All notices, requests, demands, or other formal communications hereunder, including notices of change of address, shall be in writing, and either personally delivered, sent by certified mail or overnight mail by a nationally recognized courier, if to Windstream, to the Windstream Procurement Department with a copy to the Windstream Legal Department at the addresses and facsimile numbers following this paragraph, and if to Vendor, then to the applicable physical address first set forth above to the attention of the department, group, or section with which Windstream is then currently dealing. Notices will be deemed effective upon personal delivery three (3) business days after mailing if sent by certified mail, or the next business day if sent overnight mail by a nationally recognized courier.

950 48th Ave. North, Suit 100
Myrtle Beach, SC 29577

Either Party may change its address by notice given to the other Party in the manner set forth above. All notices shall be effective upon receipt, or upon attempted delivery where proper delivery was refused or rejected.

- f) Construction; Severability. This Agreement has been negotiated by the Parties and their respective legal counsel and will be fairly interpreted in accordance with its terms and provisions and without any strict construction in favor of or against either Party. If any term or provision of this Agreement is found by a court of competent jurisdiction or by order of any regulatory agency to be invalid, illegal or otherwise unenforceable, the same shall not affect any of the other terms or provisions of this Agreement, but such term or provision shall be deemed modified to the extent necessary to render such term or provision enforceable, and the rights and obligations of the Parties shall be construed and enforced accordingly, preserving to the fullest permissible extent the intent and undertakings of the Parties set forth in the remainder of this Agreement.
- g) Counterparts. This Agreement may be executed in counterparts including facsimile, each of which shall constitute an original agreement, but all of which together shall constitute one and the same instrument. If signed by facsimile, the Parties agree to follow with a signed original document.
- h) Entire Agreement. This Agreement, along with all PSAs, exhibits and addenda accepted by Contractor during the Term of this Agreement or any renewal thereof, constitutes the entire and only agreement between the Parties and supersedes all previous agreements, oral or written, between the Parties concerning the Services. The terms of this Agreement shall supersede any printed terms and conditions that may be printed on the reverse side of a purchase order. No modification or amendment of the terms of this Agreement other than as specifically provided herein, shall be effective except through writing executed by both Parties.
- i) Survival. Any term of this Agreement which by its nature extends beyond expiration or termination of the Agreement, shall remain in effect until fulfilled and shall apply to respective successors and assigns.
- j) No Third Party Beneficiary. This Agreement is entered into by and between, and may be enforced only by, the Parties, and this Agreement shall not be deemed to create any rights in third parties (other than the Parties' permitted successors and assigns and any persons, entities and enterprises entitled to indemnity hereunder), including suppliers and customers of a Party, or to create any obligations of a Party to any such third parties.

39. Waiver of Consequential Damages.

IN NO EVENT SHALL WINDSTREAM, WHETHER AS A RESULT OF BREACH OF CONTRACT, WARRANTY, TORT (INCLUDING, BUT NOT LIMITED TO, NEGLIGENCE), PATENT INFRINGEMENT, COPYRIGHT INFRINGEMENT OR OTHERWISE, BE LIABLE TO CONTRACTOR FOR PUNITIVE, INCIDENTAL, SPECIAL OR CONSEQUENTIAL DAMAGES, INCLUDING, BUT NOT LIMITED TO, FRUSTRATION OF ECONOMIC OR BUSINESS EXPECTATIONS, LOSS OF PROFITS, LOSS OF REVENUE, OR COST OF CAPITAL, OR DOWNTIME COSTS, OR LOSS OF ANY OTHER ECONOMIC

BENEFIT, EVEN IF WINDSTREAM HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. THE PARTIES EXPRESSLY AGREE THAT THE LIMITATIONS ON DAMAGES SET FORTH IN THIS AGREEMENT ARE AGREED ALLOCATIONS OF RISK.

40. Compliance with Laws; Federal Government Contracting.

- (a) Compliance Clauses. Each Party shall, at its own cost and expense, perform its obligations under this Agreement in compliance with all applicable laws to which a Party is subject. As a supplier to the U.S. Government, Windstream is required by U.S. Government Regulations to require that all Windstream vendors, suppliers, contractors, and licensors comply with the following additional clauses: 48 CFR 52.225-13 Restrictions on Certain Foreign Purchases (Feb. 2006); and 48 CFR 52.247-64 Preference for Privately Owned U.S. Flag Commercial Vessels (Feb. 2006). For all vendor, supplier, contractor, and licensor contracts over \$10,000, the following general terms additionally apply: 48 CFR 52.222-21 Prohibition of Segregated Facilities (Feb. 1999) and 48 CFR 52.222-26 Equal Opportunity (Mar. 2007). For all vendor, supplier, contractor, and licensor contracts over \$15,000, 48 CFR 52.222-36 Affirmative-Action for Workers with Disabilities (Oct. 2010) shall apply. For all vendor, supplier, contractor, and licensor contracts over \$100,000, the following general terms additionally apply: 48 CFR 52.219-8 Utilization of Small Business Concerns (May 2004) (in all subcontracts allowing further subcontracting with third parties by the vendor, supplier, contractor or licensor); 48 CFR 52.222-35 Equal Opportunity for Special Disabled Veterans, Veterans of the Vietnam Era, and Other Eligible Veterans (Sept. 2010); 48 CFR 52.222-37 Employment Reports on Special Disabled Veterans, Veterans of the Vietnam Era, and Other Eligible Veterans (July 2011); and 48 CFR 52.203-6 Restrictions on Subcontractor Sales to the Government (Sept. 2006). For contracts over \$650,000 (\$1,500,000 for construction) that allow the vendor, supplier, contractor, or licensor to further subcontract with third parties, 48 CFR 52.219-9 Small Business Subcontracting Plan (Oct. 2010) shall also apply.
- (b) Small Business Subcontracting Plan. Pursuant to 48 CFR 52.219-9 Small Business Subcontracting Plan (Oct. 2010), if applicable, upon request by Windstream, a vendor, supplier, contractor or licensor whose contracts with Windstream (i) will total at least \$650,000 (\$1,500,000 for construction) and (ii) allow the vendor, supplier, contractor, or licensor to further subcontract with third parties, shall submit to Windstream a written Small Business Subcontracting Plan ("Subcontracting Plan") that complies with the requirements of 48 CFR 52.219-9 and addresses subcontracting with small business concerns, including small businesses, veteran-owned small businesses, service-disabled veteran-owned small businesses, HUBZone small businesses, small disadvantaged businesses, and women-owned small businesses. The Subcontracting Plan shall become an exhibit attached to this Agreement and incorporated herein by this reference. If a Subcontracting Plan is required under this Section, Windstream shall have the right, in its sole discretion, to terminate this Agreement, on written notice, if Contractor fails to properly submit or follow a Subcontracting Plan. Additionally, Contractor agrees to indemnify Windstream for any damages, of whatever nature, Windstream is required to pay under 48 CFR Part 52 if those damages result from Contractor's failure to properly submit or follow a Subcontracting Plan.
- (c) **To the extent not exempt, Contractor (as well as any subcontractors) shall abide by the requirements of 41 CFR §§ 60-1.4(a), 60-300.5(a) and 60-741.5(a). These regulations prohibit discrimination against qualified individuals based on their status as protected veterans or individuals with disabilities, and prohibit discrimination against all individuals based on their race, color, religion, sex, sexual orientation, gender identity or national origin. Moreover, these regulations require that covered prime contractors and subcontractors take affirmative action to employ and advance in employment individuals without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, protected veteran status or disability. To the extent not exempt, Contractor (as well as any subcontractors) shall also abide by the requirements of Executive Order 13496 and the Employee Notice clause, 29 CFR § 471.2(b) and Appendix A to Subpart A of Part 471, regarding notification of employee rights under federal labor law.**

41. Windstream Supplier Code of Ethics.

Windstream is committed to conducting business in a manner that is ethical, and Windstream requires all suppliers to be ethical and honest, comply with all applicable laws and regulations, and avoid any appearance of impropriety or conflict of interest. Accordingly, Contractor warrants that it shall at all times

comply with the Windstream Supplier Code of Ethics, which can be accessed here:
<http://windstream.com/About-Us/Suppliers/>.

CONTRACTOR SAFETY CHECKLIST

This checklist may be completed and signed by the Contractor and reviewed by Windstream prior to Windstream executing the Agreement.

| | | |
|--------------------------|---|--|
| 1. | Name and telephone number of the Contractor's executive officer | Victor R. Lundy, III |
| 2. | Contractor's compliance identification numbers (e.g. federal, state DOT number, state fuel tax, and/or state registration numbers) | 435342 |
| 3. | Contractor's DOT compliance safety rating - This is only applicable for firms who drive or own vehicles that would be regulated by the Federal or State Departments of Transportation. Indicate whether federal or state rating. | Satisfactory |
| 4. | Has the Contractor been inspected or received any citations from a Governmental agency in the last 3 years? Yes or No | No |
| 5. | Has your firm been investigated, reviewed or inspected by the EPA, IRS, OSHA, etc.? Yes or No | No |
| | If yes, attach a separate sheet explaining and itemizing each issue. | |
| 6. | Where are the Contractor's OSHA 300/101 forms maintained? Certain firms are required by law to maintain OSHA 300/101 forms. (Accident logs, Incident reports) If your firm is required, please enter the location of these forms. | On Site |
| 7. | Is the Contractor familiar and in compliance with federal, state and local codes, laws, and other regulations, which affect services that may be performed for Windstream? Yes or No | Yes |
| 8. | Is the Contractor familiar and in compliance with the Federal Motor Carrier Safety Regulations? Yes or No | Yes |
| | (If no, explain in the Comments section below) | No |
| 9. | Is the Contractor familiar and equipped to comply with the manual on Uniform Traffic Control Devices? Yes or No | Yes |
| | (If no, explain in the Comments section below) | No |
| 10. | Has the Contractor conducted all required safety training and does the Contractor have in place all required safety programs, records, and training applicable to services that may be performed for Windstream? Yes or No | Yes |
| 11. | By signing below, I certify that I have received a copy of the Windstream Pocket Safety Guide, and that Contractor is in compliance with the rules and regulations therein. | |

Project Scope Agreement
OSP Construction Standards
For
Wireline OSP Construction

INFORMATION PROVIDED IN THIS PSA DOES NOT RELIEVE CONTRACTOR OF ITS OBLIGATION TO OBSERVE THE HIGHEST STANDARDS OF SAFETY AND PROFESSIONALISM IN COMPLETING THE PROJECT.

This PSA describes location and construction unit requirements for the selected Contractor, or which will be delegated by the Contractor to Subcontractors under the supervision of the Contractor, during the term of this Agreement. The attached chart (the "Units Master Spreadsheet") defines the construction units, associated labor costs and other pricing details and is incorporated herein by this reference.

This PSA is part of the Master Contractor Agreement for Network Services between the Parties. Any capitalized terms not defined herein shall have the meaning set forth in the Master Contractor Agreement for Network Services.

General Details

Location

Wireline OSP Construction work will be performed at the location(s) listed on the attached Exhibit A.

Invoicing

CONTRACTOR to submit invoices electronically through the JobTrac contractor portal (or any successor system) for payment after completion, reconciliation, acceptance by Windstream and submission of all as-built documentation to Windstream per established practices.

Unit Price

Labor costs are shown on the Units Master Spreadsheet. See Units Master Spreadsheet for price details. Windstream reserves the right to add or delete units, or change units as necessary. Contractors will be notified of changes via email to the contact designated below. Changes to units will become a part of this PSA. Pricing questions related to unit changes must be addressed within 30 days from email notification.

Contractor Contact email:

Term

Effective Date: 01/01/2016

Expiration Date: 12/31/2018

Freight and Handling

CONTRACTOR agrees that Windstream has set a recovery rate for freight ("Recovery Rate") for all material that is required to perform the work identified in the Statement of Work ("SOW") and that is purchased by CONTRACTOR from Windstream. The current Recovery Rate is equal to the freight percentage (%) which is charged by Windstream and which has been paid by CONTRACTOR. In addition, CONTRACTOR will receive a handling fee equal to ten percent (10%) of the cost of materials detailed on each specific work order or PSA and purchased from Windstream.

Service Commitments

Required Contractor Service Commitments

The CONTRACTOR is required to meet the following service date commitments:

- Held order jobs will be completed within ten (10) business days of receipt of work order with approved permits.

- Buried drops will be completed within five (5) business days plus the legal waiting period for locates of the CONTRACTOR'S receipt of the order.
- All routine work will be completed within thirty (30) business days, including capital and expense unless otherwise specified.

Damages for Not Meeting Service Commitments

Damages will be assessed to the CONTRACTOR for jobs not meeting defined service commitment dates. Damages will be imposed at the discretion of Windstream management on a case-by-case basis. The following damage structure will be utilized for each job not meeting its service commitment.

- Buried Drop Work Orders \$100
- Held Orders (PSR) \$200 per work order
- Plant Maintenance Requests \$200 per work order
- Routine Work Orders \$200 per work order
- Line Item Work Orders \$200 per work order
- Quality Inspections less than 95% \$200 per work order
- Quality discrepancies not corrected in 10 business days \$200 per work order

Held Orders

The CONTRACTOR will notify the Held Order Group immediately if customer commitment dates cannot be met on held orders. This notification must include a new commitment date and explanation of the cause of the delay. Held Order Contact: (800) 865-4255 or windstream.held.order@windstream.com.

Upon completion of the held order facilities installation, the CONTRACTOR will:

1. Complete the service initiation if all station work is complete, including termination of the drop in the network interface device ("NID") and verifying service (dial tone) at the NID.
2. Notify Held Order Group immediately (from the site of the work) and leave the following information:
 - a. Work order number completed.
 - b. Held order customer's name.
 - c. Held order customer's telephone number
 - d. Customer **is/is not** in service.
 - e. Customer service technician ("CST") **does/does not** need to be redispached.

Contractor Administrative Requirements

CONTRACTOR is required to maintain a permanent office and local staff within the district. Staff managing the local district office will require empowerment authority to make entire decisions on district staffing resources, unit pricing enhancements/changes and provide for overall contract management within the district.

Standard Rules of OSP Construction

0.0 PURPOSE

0.01 This document provides technical construction specifications for use by CONTRACTOR in performance of outside plant ("OSP") construction.

0.02 The purpose of this document is to publish standard specifications required of construction contractors to follow prior to work performance. In doing so, contractors will be more prepared to determine manpower and equipment needs and in result provide more timely completion of projects. Windstream, in turn, will be more able to evaluate construction quality and compliance.

1.0 GENERAL

1.01 All work shall be done in a thorough and workmanlike manner in accordance with current Windstream practices, specifications, Rural Utility Services ("RUS") standards, National Electric Code (NEC), National Electric Safety Code (NESC), and shall be subject to acceptance by Windstream. Windstream practices will be made available to the CONTRACTOR, upon request, for each work operation when required. When working on governmental right of way, all work will be performed to meet the most stringent specifications.

1.02 The CONTRACTOR shall maintain conductor polarity (tip and ring) identification at the main distributing frame, cable terminals, wire terminals, terminal blocks, and in the buried service, drop and station wiring, all in accordance with the specifications and construction drawings. CONTRACTOR is required to perform shield conductor continuity testing on all cables and cable sheath fault tests and end-to-end testing of one pair in each binder group to ensure end-to-end binder group integrity. Additional testing may be required by Windstream. All tests will conform to Windstream and RUS specifications. Fiber testing will be in accordance with established Windstream standards and local test equipment. Specific printouts of the test results will be provided to Windstream as a portion of the closing work order documents.

1.03 The CONTRACTOR may receive complete sets of construction drawings containing sufficient measurements to identify the location of all materials to be installed. In some situations, projects will not be physically staked by Windstream. These drawings may be delivered electronically.

1.04 No changes or deviations in the construction proposed on the construction drawings, plans or specifications shall be made by the CONTRACTOR without prior approval from Windstream.

1.05 Windstream will perform quality inspections for a random number of jobs completed by the CONTRACTOR. The OSP Construction Scorecard provided by Windstream will be completed and inspection results will be forwarded directly to the CONTRACTOR'S representative. An inspection score of less than 95% will be subject to a penalty. CONTRACTOR will be given 10 workdays to correct job discrepancies. If not corrected in 10 days Contractor will be subject to an additional penalty. Note: Safety related or service-affecting issues may require immediate attention and the 10 workdays referenced above will not apply.

1.06 The CONTRACTOR shall notify the state one-call center (811) as prescribed by law prior to construction of all segments. The CONTRACTOR is required to enter the locate confirmation number on the as-built prints at job completion. Windstream's contract locating firm will provide the initial locates for the construction site. When the CONTRACTOR arrives at the construction site to begin work they will verify the locate marks laid down by Windstream's contract locating firm and relocate all Windstream Facilities prior to construction to avoid damage to such facilities. At that time if the CONTRACTORS locates and the contract locating firms marks do not match up or there is any discrepancy with the locates the CONTRACTOR will call the State one call center (811) and request remarks and meet with the locating firm on site. Both the CONTRACTOR and Windstream locating firm must be in agreement that the facilities are located correctly prior to the start of any work. Also prior to construction the CONTRACTOR will notify Windstream 's contract locator to provide standby services when excavating or placing facilities near or crossing all Windstream fiber, multiple conduit runs, and copper cables 1200 pair or larger.

Windstream is excluded from any liability for utility/facilities damages.

1.07 The CONTRACTOR, at its expense, will repair any damages to Windstream cable or facilities due to the negligence of the CONTRACTOR as determined by Windstream management. The CONTRACTOR must notify the state one-call center (811), and the local Windstream manager or construction supervisor / inspector immediately upon facilities damage. Continued incidents of damages to Windstream facilities by the CONTRACTOR could result in termination of the contract.

1.08 CONTRACTOR is responsible for maintaining the appropriate inventory levels of all materials required to meet customer service commitments. This includes copper cables of 300 pair and 96 fibers or less as required, and any other frequently used larger cable sizes. Depending on the specific market area, CONTRACTOR may be required to keep 1200-1500' lengths of larger pair count cables, such as 600, 900 and 1200 pair for emergency restorations. In addition larger sized fiber cable depending on the area will be required. This will be determined by the local Windstream OSP Engineering Manager in conjunction with the CONTRACTOR.

1.09 The CONTRACTOR will deliver completed job documentation within ten (10) business days of job completion due date. A penalty of \$ 200 will be assessed for non-compliance for each work order. Legibly marked work prints including Cutsheets and LRoute documents will follow these criteria:

- All placement additions shown in red.
- All removals shown in blue.
- Cable placement will be noted, including beginning and ending sequential cable numbers on all cable appearances, such as pedestals, risers, etc. When working on an aerial project, the sequentials will be shown at the beginning and end of the project and at each pole location.
- The CONTRACTOR will follow the Windstream Work Order Change Process. All job variations will be noted on the completed print, to include the name of the Windstream representative authorizing changes and the date of approval.
- CONTRACTOR will provide GPS readings for all manholes, hand holes, Fiber to the Tower pedestal, and DLC/DSLAM sites with a degree of accuracy of 24 inches.
- Reference Section 13.01 d) for additional information related to Job Completion.

1.10 CONTRACTOR is required to conduct business with Windstream utilizing electronic medium. During the job life cycle, the CONTRACTOR will be notified electronically of new jobs available to work. Utilizing appropriate security, CONTRACTOR will access Windstream's Outside Plant web site to receive all job-related information. CONTRACTOR will print all job specifications and job prints from Windstream's web site. CONTRACTOR is required to supply computing hardware/software and print facilities of up to 11" by 17".

1.12 CONTRACTOR will reconcile all completed jobs electronically through Windstream's Outside Plant web site. All job units will be reconciled through this process, with job prints routed to local Windstream representatives for manual review. The web site will maintain an audit history of all job as-built activity. Upon reconciliation, Windstream representatives will review and approve all jobs that contain no discrepancies. CONTRACTOR and Windstream representatives will jointly resolve jobs not approved. All jobs approved by Windstream will become a CONTRACTOR invoice, submitted to Accounts Payable for payment. CONTRACTOR will have ongoing access to review reconciled jobs and all invoices submitted for payment.

1.13 The CONTRACTOR shall pay particular attention to maintaining good public relations in the performance of all work hereunder, particularly in contacts with property owners and public officials. When talking with subscribers or the public, CONTRACTOR employees will be polite and well mannered.

1.14 The CONTRACTOR shall cause construction crews to receive constant supervision by a competent person who shall be present at all times during working hours where construction is being performed. Directions and instructions given to the competent person by Windstream, including authorized agents of Windstream, shall be binding upon the CONTRACTOR. The designated competent person of each crew shall speak, read and write in English.

- Windstream will, whenever and where ever possible, maintain authorized representatives at or in the immediate vicinity of the construction site or provide to the CONTRACTOR cell phone numbers to contact Windstream personnel to assist the CONTRACTOR in any way deemed necessary by either party for the orderly execution of the work and administration of Windstream-required work documents, to further assure compliance with work plans and specifications and to maintain quality of construction. The decision of Windstream shall be final as to compliance and any work rejected shall be corrected by the CONTRACTOR.
- At the request of Windstream, the CONTRACTOR shall provide a competent representative to work with Windstream's representative on the final inspection and clean up

2.0 MATERIALS, LABOR UNITS, COMPENSATION RATES

2.01 The CONTRACTOR will purchase and store all necessary materials required to perform the work.

2.02 The CONTRACTOR will purchase, receive and store material at the CONTRACTOR'S location or any other specified location. The CONTRACTOR shall be responsible for receiving and/or unloading of all materials delivered to CONTRACTOR location. The material shall include, but not be limited to, reels of cable and strand, closures, splice cases, anchors, rods, and hardware. The CONTRACTOR shall be responsible for providing a safe and secure storage area of adequate size for the receipt and storage of material. All material is subject to inspection by Windstream and any defective material will be the responsibility of the CONTRACTOR. The CONTRACTOR is fully responsible for the management of any inventory ordered for a specific Windstream job or for the anticipation of future Windstream jobs. Windstream will not pay for reel end splices.

2.03 All material to be used in construction of the Project shall be stored so as to protect from deteriorating effects of the elements. The CONTRACTOR shall bear in mind the weather conditions that may prevail prior to the time the material is incorporated into the plant. If metallic items of material are not to be stored longer than 30 days and outdoor storage cannot be avoided, they shall be stacked on boards or timbers well above the ground line and effectively protected from the elements by a roof or tarpaulin. For brief periods only (not to exceed 30 days)

these metallic materials may be stored in the open, exposed to the elements, provided they do not come into contact with the ground.

2.04 All guy strand, suspension strand, drop wire, and aerial cables used in the construction of the Project must be handled with care in the transportation, unloading, and use. These wire and cable facilities must not be trampled upon, run over by vehicles, pulled along the ground, over fences, metal fittings or crossarms. Each coil or reel shall be inspected for cuts, kinks, or other damage. All damage shall be repaired to the satisfaction of Windstream. All fiber cable reels should be tested by the CONTRACTOR upon receipt at the Contractor's expense. Fiber cable reels accepted by the CONTRACTOR are their responsibility if defects are discovered during installation.

2.04 "Unit" means one of the nomenclature codes (e.g., "BD3") listed on the Units Master Spreadsheet that identifies a specific construction task and the construction methods, materials and quantities to be used for installation. "Unit Rate(s)" (excluding hourly rates) means the cost of all labor, vehicles, proper tools, supplies, transportation, implements, appliances, equipment, supervision, inspection and testing required to perform the Unit according to Windstream's specifications. "Labor Units" are defined as the actual labor-only cost to perform a task or job and are to be billed to Windstream as a separate line item. All Labor Units include in the price for the individual, the individual's tools, equipment, mobile phones where required, and proper apparel (including personal safety equipment) necessary to perform the individual's job functions. All necessary work that is not covered by a specific Unit code but is associated with a Unit being performed shall be considered as incidental, with the cost to be all-inclusive in the Unit Rate. The standard working hours for unit placing, splicing and other unit crewmembers will be as dictated by local management. It is expected and normal that unit crews will work in excess of 40 hours during weeks of good weather where construction operations continue for five full days. Windstream will NOT compensate these unit crewmembers on an overtime rate. Compensation will be Unit Rates only.

2.05 Payment for work at an hourly rate will be made ONLY when written or verbal explanation is provided as to the reason for the use of "hourly rate" instead of "Unit Rate". Hourly work must be pre-approved by Windstream and will require a daily time sheet signed by an appropriate Windstream employee. The standard working hours for all hourly placing, splicing, CSTs and other hourly crewmembers is 8:00 AM to 5:00 PM, with one hour for lunch, five days per week, Monday through Friday. These are more specifically defined as crewmembers that, as a general rule, are utilized on an hourly basis, week in and week out and are not regular unit work crewmembers. Overtime will be paid for these CONTRACTOR(S) in the event Windstream requires that the work be extended past 40 hours. The CONTRACTOR shall record start time and stop time on all hourly time sheets for each job performed during a workday. Time sheets are to be recorded daily.

2.06 Vehicles or equipment that may require a mode of transport are priced to include the transport truck and/or trailer. Major tools, test equipment, safety and work area protection equipment, etc. are included in the Unit Rate for the vehicle with tools.

2.07 When awarded work is performed on an hourly basis, Windstream will pay a single hourly rate of compensation for the total approved hours worked. Windstream will not pay a premium for overtime, shift differentials, holidays, etc., except as otherwise expressly provided in this PSA.

2.08 No hourly compensation will be made to CONTRACTOR for personnel, vehicles, tools or equipment during lunch or other breaks, or for any work delays caused by the actions of CONTRACTOR, its employees, or its agents. Windstream will pay the applicable Unit Rates to CONTRACTOR for delays caused by Windstream's own actions when CONTRACTOR is required to remain on-site or on-call and is unable to perform other work during the delay.

2.09 **Special Compensation Consideration** When Windstream requests CONTRACTOR to leave an existing worksite and change work schedules without prior day advance notice, CONTRACTOR will be paid the hourly rate for travel to the new job site and for travel back to the originating travel point. Work performed while at the jobsite will be paid at the Unit Rates set forth in this Schedule and not at the hourly rate. Labor and equipment needed in these situations will be determined by Windstream and CONTRACTOR.

2.10 Payment of overtime for emergency call outs (as set forth in Section 11) begins when CONTRACTOR's employees leave their origination location to travel to the emergency work location, continues through performance of the work and stops when CONTRACTOR's employees have completed the emergency work and returned to their origination location.

3.0 PERMITS AND REGULATIONS

3.01 The CONTRACTOR shall comply with all laws, ordinances, and regulations of all legally constituted authorities. If the CONTRACTOR observes that the plans are at variance therewith, the CONTRACTOR shall promptly notify Windstream in writing. If the CONTRACTOR performs any work knowing it to be contrary to such laws, ordinances, and regulations, and without giving such written notice to Windstream, the CONTRACTOR shall bear all costs arising therefrom.

3.02 Windstream or, as directed, the CONTRACTOR, shall obtain the necessary legal authority to occupy and open public highways in which the said work is to be performed, together with rights-of-way for work on private property, and copies of such permits and rights-of-way shall be made available to the CONTRACTOR for guidance. CONTRACTOR may be required to open and close all Department of Transportation ("D.O.T.") approved permits. Wherever practical the CONTRACTOR may be required to pickup approved D.O.T. Permits from D.O.T. locations.

3.03 Specifications, restrictions, and requirements of all property owners, state, counties, cities, villages, and townships involved must be followed at all times and in all respects.

3.04 The CONTRACTOR shall not store materials, supplies, or equipment on private property unless written permission has been obtained from the property owner.

3.05 No explosives are to be used in the performance of work under this contract without prior written approval of the company.

4.0 SAFETY

4.01 The CONTRACTOR shall be responsible for initiating, maintaining, and supervising all safety precautions and programs in connection with the work for the protection of the following: (1) all employees on the worksite and all other persons who may be affected thereby; (2) all of the work and all materials and equipment thereon; and (3) all other property at the site or adjacent thereto.

4.02 The CONTRACTOR shall comply with all applicable laws, ordinances, rules, regulations, and orders of any public authority having jurisdiction for the safety of persons or property or to protect them from damage, injury, or loss. The CONTRACTOR shall erect and maintain, as required by existing conditions and progress of the work, all reasonable safeguards for safety and protection, including posting danger signs and other warnings against hazards, promulgating safety regulations, and notifying owners of adjacent utilities. The CONTRACTOR shall be responsible for the safety of the work and shall maintain all lights, guards, intelligent sign boards, temporary passages, and other necessary protection and precautions for that purpose. All cones, signage, and flags will conform to Windstream practices and D.O.T. regulations. Contractors will also comply with all permit requirements for the work location.

4.03 The CONTRACTOR shall furnish competent flagmen or policemen when required to assist the flow of traffic or for the safe maneuvering of equipment and trucks and for construction work under this CONTRACT. Signs and flagman should be provided in accordance with the State Department of Transportation's regulations. Crewmembers designated as a flagman are required to carry a state approved DOT Certified Flagman Card. CONTRACTOR understands and agrees that any Unit which would require the use of flagmen or other traffic control equipment has included the cost for these services in their contracted Unit Rate. Windstream will not pay additional costs for the use of flagmen or other traffic control equipment. Windstream will reimburse the CONTRACTOR for railroad and/or police flagmen, if mandated by the permit.

4.04 Hard hats and state approved reflective vests will be worn at all job sites. The Occupational Safety and Health Administration ("OSHA") requires the wearing of safety vests by personnel when working within the highway right of way. (Federal OSHA Standards For General Industry, 1926.650 subpart P, paragraph F).

4.05 OSHA rules and regulations regarding confined space ventilation and manhole protection shall be followed at all times. Tests for oxygen deficiency and harmful gases shall be conducted in all manholes prior to entry in accordance with Windstream system practices. Testing will continue throughout all operations in manholes.

4.06 Each member of CONTRACTOR'S crew is expected to read the Windstream Pocket Safety Guide, acknowledge they understand the information and that accident prevention depends upon their cooperation. It is the CONTRACTOR'S responsibility to insure all employees have read, and understand the Windstream Pocket Safety Guide and will maintain appropriate documentation.

4.07 The latest revision of the National Electrical Safety Code and the National Electrical Code shall be followed in every case except where local regulations are more stringent, in which case local regulations shall govern.

4.08 The CONTRACTOR agrees that no unauthorized persons shall be allowed to enter the work site without prior approval of Windstream. CONTRACTOR will immediately notify Windstream when any governmental agency comes on the job site. The CONTRACTOR and its Subcontractors will give access to the representatives of the Secretary of Labor or any state or local official for the purpose of inspecting or investigating or carrying out any of the duties under the Occupational Safety and Health Act of 1970 or under any state or local act affecting safety and health. The CONTRACTOR shall be responsible for any violation of any safety or health standards issued thereunder, shall immediately remedy any condition giving rise to such violations, and shall indemnify, defend and hold Windstream harmless from any penalty, fine, or liability in connection therewith. Violations will be disclosed to Windstream in an expeditious manner.

4.09 All parties associated with excavations for the conduit and manhole system shall follow safety rules and regulations to safeguard the public and workmen.

- a) Gas and oil mains shall be given special attention and precaution shall be taken to guard against the fire hazards they present. Excavations in public streets should always be checked for gas leakage, even though gas mains or sewers are not directly encountered. No flame of any sort shall be permitted around excavations when the odor of gas is detected. Workmen shall not be allowed to smoke; and precautions shall be taken to prevent pedestrians from throwing lighted cigars, cigarettes, or burning matches into such excavations.
- b) The CONTRACTOR shall provide required shoring, warning signs, lights, no parking signs, barricades, and removal of excess water and excavating material. Flagmen and

guards shall be provided where required to maintain safe conditions for the workmen and the public.

- c) Blasting will only be permitted with approval from state or local authorities and with the warning to and protection of workmen and the public.
- d) Excavations shall be closed and/or barricaded for public protection prior to leaving the job site at night with warning lights and/or guards.
- e) Accessibility to fire hydrants, fire alarm boxes, and private driveways shall be maintained using temporary bridges over trench as required.
- f) The necessary means to carry storm water away from the work shall be provided and kept free from obstructions. The CONTRACTOR shall comply with all laws, ordinances and regulations of all legally constituted authorities.

5.0 DELAYS

5.01 Windstream shall exercise due diligence to secure materials. However, work may be suspended in whole or in part for want of materials, and such delay may continue until such materials are secured. The CONTRACTOR shall be allowed a reasonable extension of time for completion of the work in view of such delay but shall not be entitled to any damages or compensation on account of it.

5.02 If the CONTRACTOR is delayed, through no fault of the CONTRACTOR, in the completion of the work, or any part of it, by any act or neglect of Windstream or by strikes, lockouts, fire, or unavoidable casualty, by the action of the public authorities or by property owners or others, or by injunction or by refusal to grant right-of-way permits, the time of completion shall be reasonably extended as directed by Windstream in view of such delay, but such delay shall not give rise to any claim on the part of the CONTRACTOR against Windstream for damages or compensation.

6.0 REPAIRS AND DAMAGES

6.01 The CONTRACTOR hereby guarantees the backfilling of all excavations and the replacement of all sidewalks, driveways, pavement bases, and surface pavements under this contract for a period of one year after the making of the final payment hereunder, and the CONTRACTOR hereby agrees to reimburse Windstream promptly upon the presentation of bills for any expense to Windstream resulting from repairs made necessary by reason of faulty backfilling or faulty work in replacing such sidewalks, driveways, pavement bases, and surface pavements. The CONTRACTOR is also responsible for any repeat compaction tests that show initial work not to specifications.

6.02 The CONTRACTOR shall be responsible for all damages, detention of material charges or storage charges which may be incurred by failure or delay in removing from any car, freight yard, or freight house any material furnished by Windstream as herein provided, and the CONTRACTOR after delivery of all material, shall be responsible for its safety and care, shall handle it at its own expense, and shall replace at its own expense any such material which may be lost or so damaged as to be unfit for use on the work.

6.03 In the event of continued damages, or repeated offenses, due to Contractor neglect or error, Windstream, at its sole discretion, may assess a Negligence Charge against the Contractor. Repeated offenses are classified as 2 damages occurring within any 6 month period. The Negligence Charge will be calculated as 15% of the total value of the Work Orders for all affected jobs.

6.03 When underground facilities are exposed, they must be protected from vandalism or damage when left unattended. The method of protection is the CONTRACTOR'S responsibility. If police protection becomes necessary through the CONTRACTOR'S selected mode of operation, this cost is the CONTRACTOR'S responsibility. In all cases the method of protection must meet Windstream's approval, and Windstream's decision will be final.

6.04 To the satisfaction of Windstream and other persons or authorities having jurisdiction, the CONTRACTOR is responsible for the permanent restoration to good condition of all private or public property including pavements, fences, gardens, shrubbery, sidewalks, pipes, driveways, dirt, or sod disturbed or damaged in the performance of work. The CONTRACTOR shall be responsible for addressing all customer complaints within 24 hours of notification. All work required associated with the customer complaint shall be completed within three (3) working days of the CONTRACTOR being notified. Any final repair of concrete and /or asphalt shall be completed within a maximum of ten (10) working days

6.05 Any property damage should be noted on the work order closing copy.

6.06 In such cases where removal of existing shrubs is necessary to gain access to the work area or to place poles and down guys, the CONTRACTOR shall, at its own expense, remove, store, and replace such shrubs.

7.0 REMOVAL OF PLANT

7.01 The CONTRACTOR shall provide all hardware and miscellaneous apparatus necessary to remove the designated Windstream Plant. Transportation, installation, removal and disposal of all construction materials shall be in accordance with all applicable local, state and federal laws and properly manifested when appropriate. The CONTRACTOR shall provide manifest, a certificate of disposal, or the method and location of disposal for all items. Empty cable reels must be removed from the Project Site each day.

7.02 All Plant removed by the CONTRACTOR, which may have salvage value due to recycling processes, shall be delivered to the location designated by Windstream. All salvage materials will be placed in an appropriate storage bin provided by the designated recycling company on the CONTRACTOR'S yards. The CONTRACTOR cannot accept payment for the salvageable materials that are the property of Windstream. Provisions for disposal of contractor-owned material will be made by the CONTRACTOR.

7.03 CONTRACTOR will store Windstream-owned poles and stub poles, which have been removed, at CONTRACTOR'S location. CONTRACTOR is required to contact Windstream's designated pole disposal contractor for removal and disposal of poles. CONTRACTOR is required to forward the pole disposal contractor's invoice for pick-up to Windstream. Windstream will be responsible for payment to the pole disposal contractor. This is the only acceptable manner in which poles shall be disposed.

7.04 Any Windstream plant, removed by the CONTRACTOR, which does not have a salvage value, shall be disposed of by the CONTRACTOR to a licensed dumpsite.

7.05 The CONTRACTOR shall pay any dumping fees associated with disposing of scrap materials.

8.0 TREE TRIMMING, CUTTING, AND DISPOSAL

8.01 TRIMMING AND CUTTING: The CONTRACTOR shall not proceed with the cutting of trees or clearing of right-of-way without notification from Windstream that proper authorization has

been received from the owner of the property, and the CONTRACTOR shall promptly notify Windstream whenever any landowner objects to the trimming or felling of any trees or the performance of any other work on the owner's land in connection with the Project and shall obtain the consent of Windstream before proceeding in any such case.

8.02 DISPOSAL OF TREES, LIMBS, AND BRUSH:

- a) Property owners shall have first right to any wood cut from trees or any felled trees resulting from this Agreement.
- b) All removed limbs, brush, and cuttings, except that requested by property owners, shall be removed from the trimming areas.
- c) No cuttings or brush shall be left overnight on or about the trimming area without the consent of the public authority and/or the property owner.
- d) The CONTRACTOR is completely and solely responsible for the complete disposition of any wood, brush, or wood chips produced in the course of the work.

9.0 CONDUIT AND MANHOLES

9.01 The engineer will determine the location of all conduit and manholes and shall specify size, type, position, and depth at which they are to be constructed. The preferred choice for manholes is the precast form. The size, type, and location of all main conduit and subsidiary ducts, location of foreign structures where known, and applicable right-of-way restrictions are shown on the construction drawings. The size, type, and location of all conduit entrances and size and location of the manhole frame opening are shown on the construction drawings. (Any items not covered specifically by local engineering on construction drawings shall conform to ASTM standards in ACI 301 and 318). "ASTM" means American Standard of Testing and Materials. "ACI" means the American Concrete Institute. All work in existing manholes will be coordinated with the construction supervisor and local assignment personnel.

9.02 Backfilling next to the conduit shall be free from stones or other material which might injure the conduit or conduit joints. Stones of 3 inches in size or larger shall not be included in any part of the backfill. In tamping the backfill at the sides of the conduit, use extreme care not to damage the joints or shift the conduit structure. Backfilling and tamping alongside of the conduit shall be done in layers only an inch or two in thickness until the level of the top of the conduit is reached. Above the conduit, mechanically tamp all backfill thoroughly in 6-inch layers. Backfilling around conduit joined with mortar bandages can proceed as soon as the joints are completed. Troweled joints shall be allowed to set at least 24 hours before backfilling. Conduit that has been encased in concrete shall not be backfilled on top of for at least 15 hrs.

9.03 Upon completion of conduit sections, a test mandrel 1/4 inch smaller in diameter than the inside diameter of the conduit shall be pulled through all single duct conduit and through two diagonally opposite ducts in multiduct conduit formations to ensure proper alignment. In addition, all conduits shall be cleaned of loose materials such as concrete, mud, dirt, stones, etc. Pull wire (type as specified by the engineer) shall be placed in conduit if so indicated by the engineer on the construction drawings. The ends of the conduit shall be sealed to prevent the entrance of foreign matter and to protect against water or gas from entering manholes or buildings. All conduit entering central offices or other buildings shall be kept plugged at all times with expandable type plugs that have been approved by the engineer. If the work extends over several days, the conduits shall be plugged at night temporarily and permanently upon completion of the work.

9.04 All concrete mix designs using specifications regarding concrete, cement, aggregate, concrete-reinforcement bars and water will follow local engineering specification or RUS specification or ASTM standards of the ACI concrete, cement, aggregate, concrete-reinforcing bars and water specifications.

9.05 Manhole walls, top and floor forms and forming work shall be accomplished in a thorough and workmanlike manner in accordance with Windstream practices.

9.06 Reinforcement shall consist of round deformed bars arranged as indicated on the construction drawings and will follow all the specifications noted above.

9.07 Concrete must be placed continuously except at construction joints, as indicated on the detail plan.

9.08 When encasing conduit, concrete must be poured toward the free end of the ducts and away from the trench sides to avoid dislodging soil and stones.

9.09 After removing the forms, all concrete surfaces should be inspected for poor joints, voids, stone pockets, tie holes, rod holes, etc. To repair these defects, the type of product to be used must be approved by the engineer prior to repair. However in the event of extreme voids (honey combing, etc.), where the structural steel is exposed upon removal of the forms and inspection, the manhole shall be demolished and a new manhole constructed per the construction drawings.

9.10 When manholes are constructed in fluid soil, the CONTRACTOR will contact Windstream Engineering regarding possible changes in design of structure(s) as well as providing adequate drainage shall be provided to prevent static water pressure on concrete until the concrete has properly hardened.

9.11 The frame shall be supported on a precast or brick collar as shown in the construction drawings. The collar shall be of sufficient height to bring the cover flush with the grade of the street or surrounding earth. Mortar shall be proportioned by volume and shall consist of one part mortar cement and three parts fine aggregate with sufficient water to make the mixture workable.

9.12 The sump or drain shall be provided as shown on the construction drawings and located as shown on the construction drawings or as directed by the inspector or the engineer. The floor shall be graded toward the sump or drain (if cement floor is used). The sump or drain shall be at least 8 inches in diameter or 8 inches square.

9.13 Pulling-in irons shall be placed so as to extend into the manhole far enough to permit a clear opening of 3.5 inches in the eye. With a 6-inch concrete wall, the vertical legs of the irons shall be 1 inch in from the outside face of the wall. For heavier walls, the legs will be embedded deeper in the concrete of the wall.

10.0 SERVICE DROPS

10.01 Buried drop wire on customer's premises shall be installed at the depths listed in Cable Depth Requirements Section 11 unless otherwise specified by the engineer, due to local, county or state requirements.

10.02 It will be Windstream's responsibility to obtain permission to place the service drop on the customer premises. The CONTRACTOR is responsible for notifying the landowner 24 hours prior to beginning work and obtaining permission to begin work. If the CONTRACTOR is delayed they are responsible for notifying the customer of the delay. The CONTRACTOR will then place the service drop, check for buried utilities and other underground structures, and perform all required restoration to the satisfaction of the property owner the same day.

10.03 When specified by the engineer, the CONTRACTOR shall designate the house number or phone number in areas without house numbers on all newly installed buried service drops, within the pedestal.

10.04 Network Interface Device (“NID”) station protectors shall be specified on all new service installation. Each shall be assembled and grounded to a suitable electrical ground source.

10.05 The NID shall be located on the building such as to facilitate common grounding by obtaining the best compromise between the length of drop wire run to the building and the length of ground wire run, not to exceed 35 feet.

10.06 The CONTRACTOR will notify the appropriate operations supervisor or construction supervisor / inspector immediately if customer commitment dates cannot be met on buried service drops. This notification must include a new commitment date and an explanation of the cause of the delay. All notifications as to delays from either the contractor or our customer must be thoroughly documented in the LOG portion of the associated JobTrac Buried Drop Job. This must include any revised commitment dates made to customer. Other operations personnel or the construction supervisor / inspector will be notified of this change in commitment date.

10.07 Upon completion of the buried drop facilities installation, the CONTRACTOR will on a daily basis:

- a) Complete the service initiation if all station work is complete, including termination of the drop in the NID and verifying service (dial tone) at the NID.
- b) Inform the customer that the service installation has been completed by direct communication with the customer or the use of a ‘Door Knocker’ (ATS-957). If the doorknocker is used, the time and date fields must be filled out and the “To install or change your service.” boxes marked.
- c) Call, email, or use a voice mail box for the designated operations personnel or the construction coordinator for the applicable Windstream exchange as soon as possible and leave the following information:
 - Buried service work order customer’s name.
 - Buried service work order customer’s telephone number.
 - Customer is or is not in service.
 - CST does or does not need to be re-dispatched.
 - The CONTRACTOR will forward the completed buried service work order to the appropriate operations supervisor or construction coordinator within two (2) days.

10.08 Upon completion of each new service installation and/or rearrangement, the CONTRACTOR shall perform one ring back test to validate service continuity.

11.0 CABLE DEPTH REQUIREMENTS (IN INCHES)

Contractor is required to comply with buried cable depths in accordance with State, County or Local requirements, without additional depth compensation. Unless otherwise specified by State, County or Local mandates, Windstream minimum Cable depth requirements are as listed below:

11.01 County Right of Ways (ROW)

| | |
|---|-----------|
| Buried Fiber Optic Cable (BFO) minimum | 36 Inches |
| Buried Copper Cable (BFCR) minimum | 30 Inches |
| Buried Drops (SEB) on ROW minimum | 36 Inches |
| Buried Drops (SEB) on customer property minimum | 12 Inches |
| Buried Drops (SEB) ditch crossing minimum | 36 Inches |
| Road Bores minimum | 36 Inches |

11.02 State Right of Ways (ROW)

| | |
|---|-----------|
| Buried Fiber Optic Cable (BFO) minimum | 36 Inches |
| Buried Copper Cable (BFCR) minimum | 30 Inches |
| Buried Drops (SEB) on ROW minimum | 36 Inches |
| Buried Drops (SEB) on customer property minimum | 12 Inches |
| Buried Drops (SEB) ditch crossing minimum | 36 Inches |
| Road Bores minimum | 36 Inches |

2.0 EMERGENCY CALL OUT

12.01 CONTRACTOR will have staff accessible via mobile phone to provide response to emergency outages. Coverage for emergency service is required 24 hours daily, 7 days per week. Additionally, CONTRACTOR is required to provide an initial and ongoing updates to a CONTRACTOR calling tree that provides alternative and escalation calling to support Windstream's on call needs.

12.02 Within two hours, CONTRACTOR will have on-site an emergency response team. Staff required to begin repairs will be on-site within two hours of initial emergency notification. Failure to respond in two hours will result in the standard hourly rate being paid instead of the overtime rate. Equipment is paid at standard rate at all times.

12.03 For suspected fiber damages CONTRACTOR maybe asked to assemble at their work location to stand by until the damage location has been identified and the required material and equipment is determined. In addition Contractor upon notification will dispatch fiber splicers to the nearest POP location for further instructions or to assist in identifying the location of the damage with OTDR measurements. The overtime rate will apply for this situation.

12.04 In the event that Windstream releases placing crewmembers prior to 7:00 PM during the normal workweek, it is still the CONTRACTOR'S responsibility to provide proper coverage as is normally needed to support Windstream. No overtime will be paid in this case unless call out is made more than 3 hours after the crew has been released or call out is made after 5:00 PM.

13.00 CHECKLIST FOR CONSTRUCTION AND SPLICERS

TO BE PROVIDED BY CONTRACT FIRM:

- | | |
|--|---|
| <input type="checkbox"/> Mobile Phone | <input type="checkbox"/> Picture ID badge |
| <input type="checkbox"/> Contractor Worker Information Sheet | <input type="checkbox"/> Vehicle signs |

• **DRESS CODE:**

1. Hair neat, clean, and well groomed, to include facial hair;
2. Shoes appropriate to job, and provides adequate protection from safety hazards;
3. Clothing clean, not in need of repair, free of profane, obscene, or suggestive wording, patches or designs that are deemed inappropriate in the judgment of management.

• **VEHICLE INFORMATION:**

CONTRACTOR work vehicles of the standard cab and chassis body type must be equipped with sufficient locking bins to protect Windstream's material and allow efficient access to the material. Work vehicles will be in good running condition, present a good appearance, and any vehicle and equipment used in conjunction with any activity within the right of way must be clearly marked or labeled, identifying the utility for which the work is being performed, as well as the CONTRACTOR(S) performing the work for the utility. Vehicles must bear the CONTRACTOR's

name on each side in sufficient size to be easily identified. This requirement includes all Subcontractors.

14.0 OUTSIDE PLANT JOB MANAGEMENT PROCESS

This contract will be supported by a Windstream electronically based information system to: price, approve, distribute, maintain job status, store, and invoice OSP jobs. Although all jobs will be processed through this system, some selected jobs due to their size will route their supporting job documentation through traditional means to be determined locally. As a result, all CONTRACTOR(S) selected to partner with Windstream will be required to conduct business electronically.

14.01 Job Management Process

- a) **Job Notification:** An email alert will be sent to the CONTRACTOR when a new job is available to work.
- b) **Job Distribution:** After notification, CONTRACTOR will be required to inquire and pull related job information from the Windstream OSP Job Repository. The CONTRACTOR will make copies of jobs as necessary.
- c) **Job Status Update:** During the OSP job life cycle, the CONTRACTOR will be required to post various job status milestones on the Windstream Job Repository for each job managed by the CONTRACTOR.
- d) **Job Completion:** Upon job completion, the CONTRACTOR will update the Job Repository with accurate 'as-built' information, complete and finalize job cost, and release the job to Windstream for review, approval and invoice creation. This may include the transmitting of as-built documentation via electronic means to be determined by Windstream.
- e) **Job Discrepancy Resolution:** Upon reviewing the 'as-built' vs. 'planned' job information, Windstream staff will confer with CONTRACTOR staff to resolve billing discrepancies.
- f) **Invoicing:** At an interval predetermined between Windstream and the CONTRACTOR, Windstream staff will create an invoice and submit to Windstream Accounts Payable for payment.
- g) **Payment:** Payments will be made to CONTRACTOR via EFT (Electronic Funds Transfer) facilities.

14.02 System Reference

- a) **Security:** CONTRACTOR will have access only to jobs assigned under their control. Security will be managed by Windstream corporate OSP.
- b) **Units:** Standardization, creation and management of work units is a shared responsibility between local Windstream operating companies and corporate.
- c) **Reporting:** Various reporting formats from the OSP Job Repository will be available to the CONTRACTOR as needed. This includes invoices submitted, jobs completed, job schedules, unit lists, reconciliation etc.

- d) **Online Job Retention:** Jobs will be retained on the OSP Job Repository for a minimum of 60 (sixty) days after job closing and then systematically purged.

14.03 System Requirements

- a) CONTRACTOR will be required to receive email correspondence and be capable of accessing the web pages of the Windstream OSP Job Repository. CONTRACTOR will print job specifications and other related job documentation, including job diagrams of up to 11 X 17 inches. CONTRACTOR will require access to a color scanner for submission of electronic redlines back to Windstream.
- b) CONTRACTOR(S) are required to produce and provide electronic as built construction drawings to Windstream for each completed work order in a format compatible with Windstream's current GIS technology and are responsible for acquiring the editing / red-lining software needed to fulfill this requirement.
- c) CONTRACTOR will be required to maintain current versions of the following software:
 - Microsoft Windows 2000 or later
 - Microsoft Office Professional 2000 or later (includes):
 - Word
 - Excel
 - PowerPoint
 - Access
 - Outlook E-mail
 - Microstation V8i (for electronic submission of redlines)
 - Adobe Acrobat Reader
 - Microsoft Internet Explorer 8.0 or greater
 - WinZip

14.04 Ongoing Windstream Coordination

This system is intended to enhance communication related to the performance of OSP jobs. It is in no way intended to replace the personal communication that is necessary to manage day-to-day job coordination.

15.0 WINDSTREAM SPECIFICATIONS

15.01 The CONTRACTOR will complete work according to Windstream specifications. The CONTRACTOR is responsible for doing quality, safe work with the appropriate tools and in accordance with local, state, federal, and OSHA regulations. It is the responsibility of the CONTRACTOR to understand and abide by all current Windstream practices.

IN WITNESS WHEREOF, the parties hereto have caused this PSA to be executed by their respective authorized representatives effective as of the date last written below.

**AMENDMENT TO THE
Master Contractor Agreement # 151026N1**
Between
Windstream Supply, LLC
and
Triple-D Communications, LLC

THIS AMENDMENT TO THE MASTER CONTRACTOR AGREEMENT (this "Amendment"), is entered into to be effective as of 8/17/2016 ("Effective Date"), by and between Windstream Supply, LLC, Inc. ("Windstream"), and Triple-D Communications, LLC ("Contractor").

WHEREAS, Windstream and Contractor desire to amend, modify and change the Agreement as set forth herein.

NOW THEREFORE, in consideration of these premises and the mutual undertakings herein contained, and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Windstream and Contractor, intending to be legally bound, hereby agree as follows:

- 1. Insurance. Section 29(e) is deleted and replaced with: "Contractor's subcontractors must maintain insurance policies with the minimum policy limits set forth below and Contractor shall be responsible for their compliance herewith.

Commercial General Liability policy of minimum limits of:

| | |
|---------------------------|-----------------------------|
| General Aggregate | \$2,000,000 per occurrence |
| Each Occurrence | \$ 1,000,000 per occurrence |
| Damage to Rented Premises | \$ 50,000 |
| Medical Expense | \$ 10,000 |
| Personal & Adv Injury | \$ 1,000,000 |

Business Automobile Liability policy with minimum limits of:

| | |
|-----------------------|---------------------------|
| Combined Single Limit | \$ 1,000,000 per accident |
|-----------------------|---------------------------|

Workers Compensation:

| | |
|------------------------------------|-------------|
| Employer's Liability-Each Accident | \$1,000,000 |
| Employer's Liability-Each Employee | \$1,000,000 |
| Employer's Liability-Policy Limit | \$1,000,000 |

- 2. No Other Amendment. Except as expressly set forth herein all of the terms and conditions of the Agreement shall remain in full force and effect, without any change whatsoever.
- 3. Counterparts. This Amendment may be executed in one or more counterparts, each of which when executed and delivered shall be deemed to be an original, and all of which when taken together shall constitute one and the same instrument. Signatures on this Amendment which are exchanged by facsimile or other electronic means are true and valid signatures for all purposes hereunder and shall bind the Parties to the same extent as original signatures.
- 4. Capitalized Terms. Capitalized terms used herein, but not otherwise defined, shall have the meaning ascribed to them in the Agreement.
- 5. Conflict. In the event there is any conflict between the terms and conditions of this Amendment and the terms and conditions of the Agreement, the terms and conditions of this Amendment will prevail. The Agreement, as amended hereby, shall remain in full force and effect.

IN WITNESS WHEREOF, the parties have entered into this Amendment as of the Effective Date.

Re: Changes to Windstream Cable Locate Process

Windstream has reviewed process and practices related to cable locates. As a result of this review, the following change is being made. Effective immediately, the Contractor shall notify the state one-call center (811) as prescribed by law prior to construction of all segments. The Contractor is required to enter the locate confirmation number on the as-built prints at job completion. While the Contractor must call the one-call system to have other utilities located, the Contractor is responsible for locating Windstream facilities and cannot have the Windstream paid locate company do the locations for them. Windstream is excluded from any liability for utility/facilities damages.

If you have questions regarding this change in process, please notify me immediately.

Best Regards,
Brad Hahn

Re: Changes to Windstream Plant Damage Reporting

Windstream has partnered with CMR (Claims Management Resources) to handle our damage claims and recovery. CMR will handle the entire claims process from First Notice of Loss (FNOL) to finish.

If you are a first responder on Windstream's behalf to a damaged facility we are requesting that you contact CMR 24/7 upon arrival to the damage scene at 844-4-CMRWIN (844-426-7946). A CMR specialist will help you identify the required information and complete the Windstream PDF (Plant Damage Form). A phone app will also be provided and utilized for photos. The CMR employee will request specific pictures based upon the type of damage. These pictures will be coded with the GPS coordinates.

The expected launch date is March, 1st 2016. A complete process and procedures document including the Phone app and instructions be sent out to all prior to that.

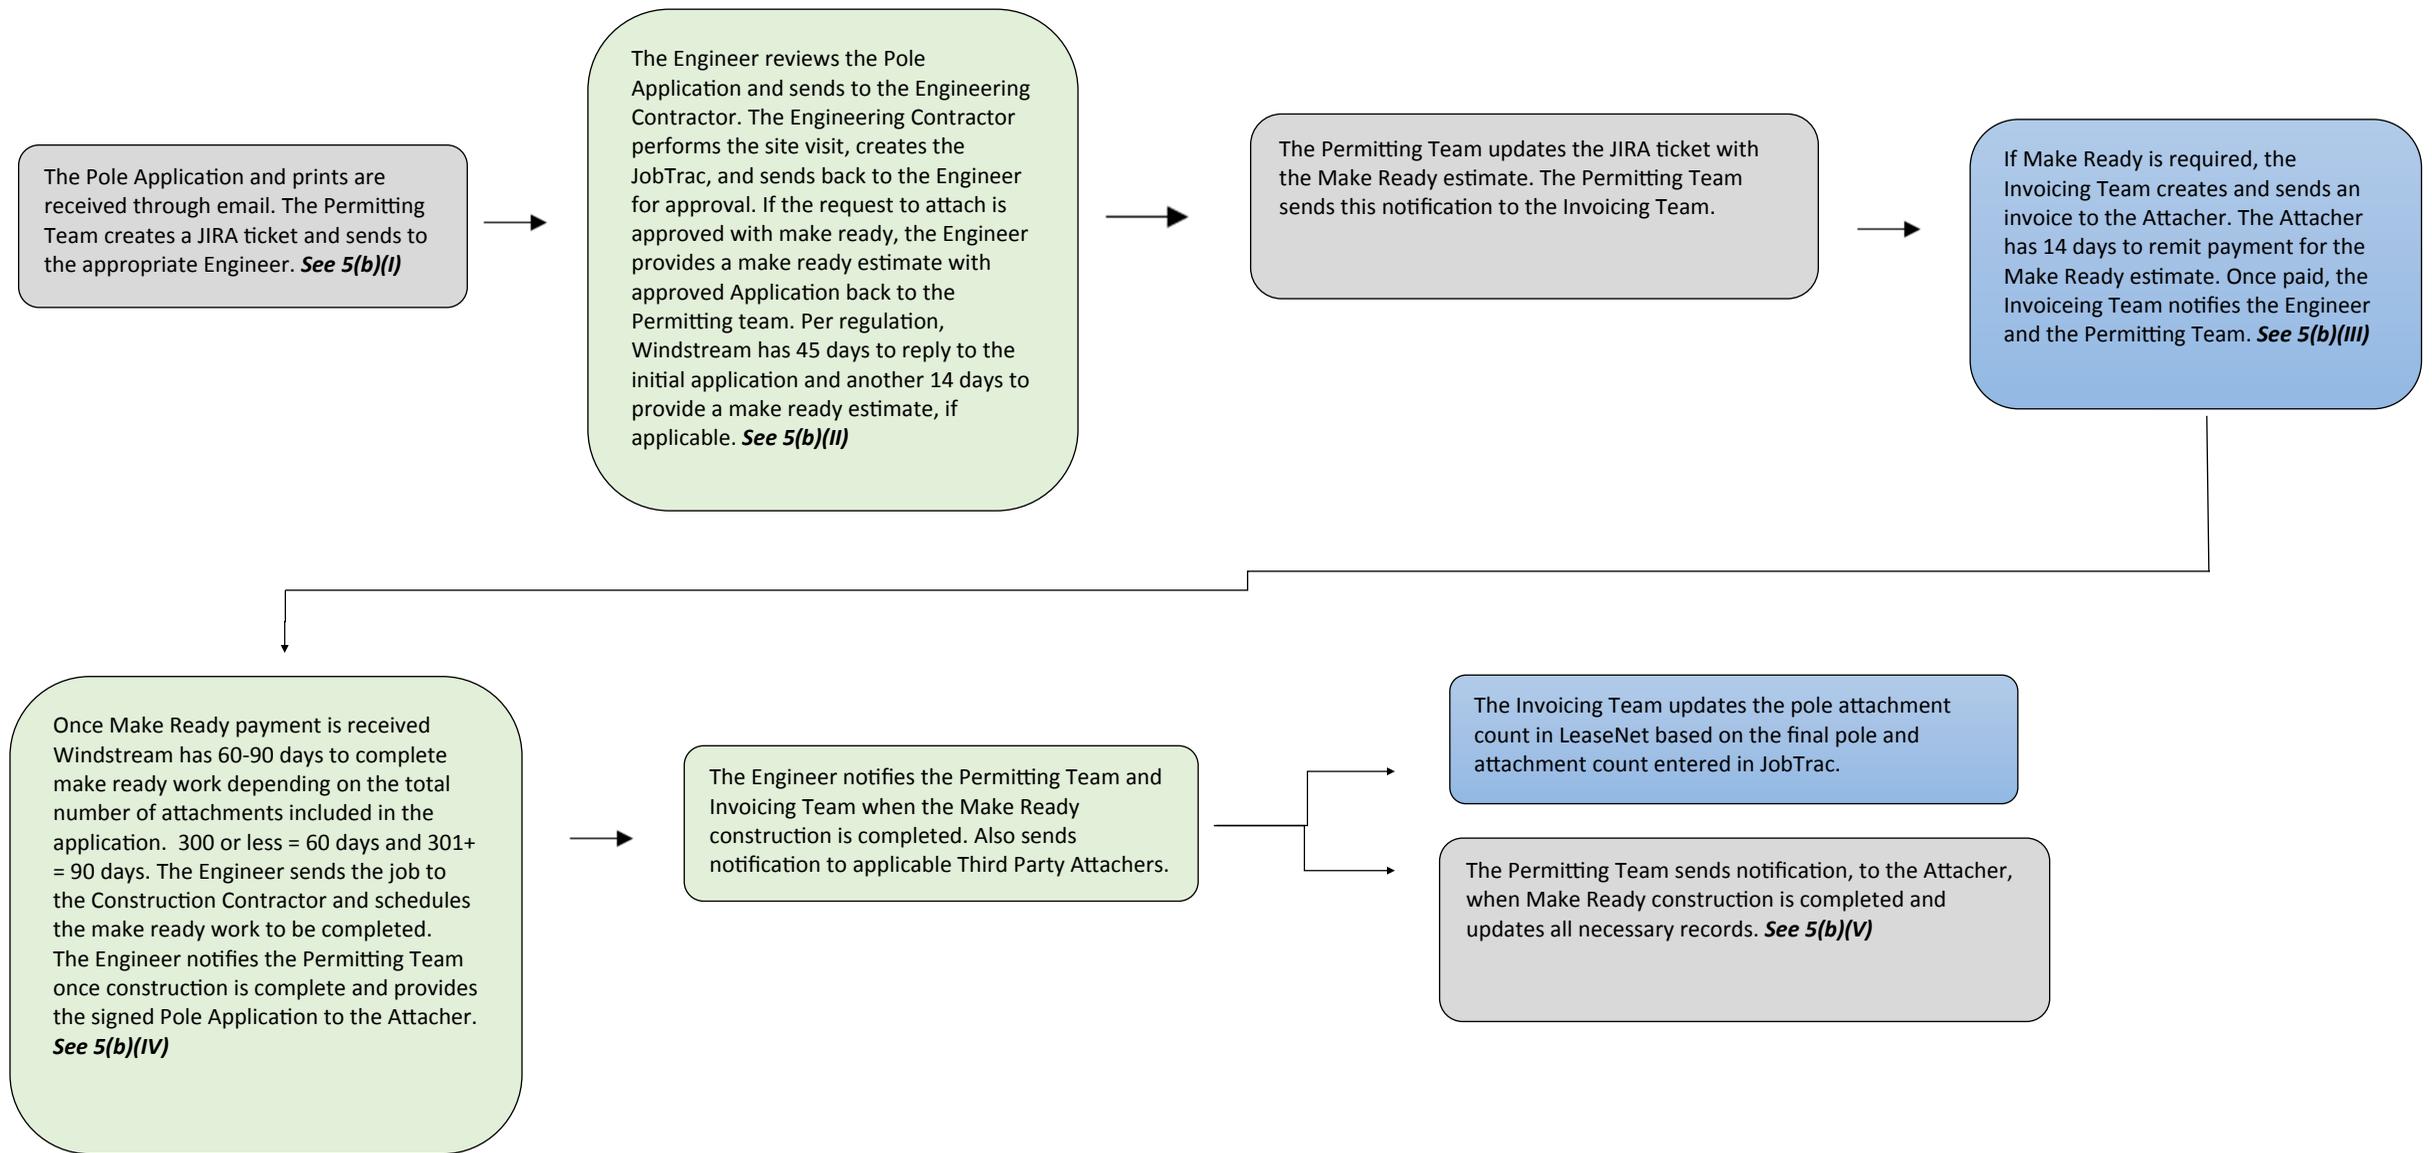

Best Regards,
Brad Hahn

Please acknowledge receipt of this notification.

POLE ATTACHMENT APPLICATION and PROPOSAL PROCESS

This procedure explains how to process and administer Pole Attachment Application request for Windstream and Attachers.

A) Pole is WINDSTREAM owned and an Attacher requests to add or remove attachments

The poles applications and proposals are received through the Permitting Team's email box:

windstream.jointuse@windstream.com.

The Permitting Team receives the application and any supporting documents included, such as job prints and/or maps, for processing. The application/proposal processing steps are as follows:

- The Permitting Analyst creates a JIRA ticket utilizing the application/proposal received. JIRA auto assigns a Joint Use Permit Request (JUPR) number to that record, example: JUPR-1234. This ticket number is used as the Windstream JU permit number, if the application/proposal is approved by the Engineer.
- The Permitting Analyst records the number of attachments or removals requested in the original application/proposal in the JIRA record created to track the request. This data is used for updates to the pole record counts in LeaseNet. LeaseNet is used to maintain accurate pole attachment counts for audits and for verification of pole rental invoices processed by the Windstream Poles Team. A report of all pole attachment counts is pulled monthly by the Poles Team for LeaseNet count updates.
- The Permitting Analyst, using Adobe Acrobat, adds the JUPR number, from the JIRA ticket created, to the application/proposal form originally received, as this reference number will be used for tracking the application/proposal through processing.
- The Permitting Analyst uses the OSP Engineering contact list on Stream or other resources based on city/exchange to identify the appropriate Engineer for the pole location(s) included in the application/proposal.
- The Permitting Analyst emails the application and other documentation received to the identified OSP Engineer for review and approval or denial of the attachment application/proposal. The email includes the following standard subject line and verbiage:

Subject Line: Joint use application/proposal – JUPR-1234 - ABC Company

Please review the attached joint use application/proposal. Please make any required notes and complete the Exhibit B form(s).

Please respond with an approval or denial of the joint use application/proposal within 45 days.

If there are make ready costs involved with the project, please create a job in JobTrac and advise the Windstream Permitting team of the JobTrac number. Email the completed Exhibit B's and the Make Ready estimate to Windstream.Poles@windstream.com for invoicing and Windstream.Jointuse@windstream.com.

The Windstream Poles team will compile all costs and send a Make Ready invoice to the applying company. Once the requestor remits payment for the make ready costs, you will receive notification, via email, to release the job to construction.

If there are **no** make ready costs involved with the project, please email the completed Exhibit B forms to both Windstream.Jointuse@Windstream.com and Windstream.Poles@windstream.com and include the engineering time for billing purposes.

To comply with Federal/State joint use regulations response is due by **4/14/2017**. Failure to meet this response date may result in penalties to Windstream or other legal actions.

Please let me know of any questions or concerns.

Thank you,
First and Last Name
Windstream Permitting Team –Engineering Support
(501) 748-9999 - office
Windstream email address

Upon receipt of the application/proposal the Engineer will review, complete the pole survey, and complete the Exhibit B form.

Per current FCC regulations Windstream has 45 days to respond to an application to attach. The Permitting Team uses an FCC calculator to determine the FCC due date and this date is included on the email notification sent to the Engineer.

Application/Proposal Denied

If the application/proposal to attach is denied the Engineer sends email notification to both windstream.jointuse@windstream.com and windstream.poles@windstream.com and includes the specific reasons the application/proposal is being denied by Windstream.

Upon receipt of the email from the Engineer, the Permitting Analyst completes the following steps:

- ✓ Notifies the requesting organization of the application/proposal denial via email
- ✓ Updates the JIRA ticket with notes on the results of the review and pole survey completed by the field
- ✓ Changes the status of the JIRA ticket record to “Closed - Complete”
- ✓ Saves any correspondence or documentation to the JIRA ticket

Upon receipt of the email from the Engineer, the Poles Team Analyst invoices the Attacher/organization for a \$75.00 survey fee.

Note: Windstream charges a fee of \$75.00 for each joint use application pole survey. This fee is charged if the application is approved, denied, or cancelled.

Application/Proposal Approved - no make ready work

If the Engineer approves the joint use application/proposal and there is no make ready work to be done for the project, the Engineer sends notification to windstream.jointuse@windstream.com or and windstream.poles@windstream.com of no make ready work required and provides the final pole/attachment counts. The ENGINEER should include the following:

- Who to bill
- The billing address
- Email address if available (for speedy turnaround on billing)

- JIRA ticket number (obtained via Permitting Team)
- Original application/proposal received from Permitting Team
- Amount to bill (\$75 survey fee per application plus engineering costs)

The Engineer notifies all other existing attachers on the pole(s) if their facilities must be adjusted or altered to accommodate the new attacher.

Upon receipt of the email from the Engineer, the Permitting Analyst completes the following steps:

- ✓ Sends the requesting organization the approved application/proposal, via email, providing the JIRA ticket number as the Windstream permit number
- ✓ Updates the JIRA ticket with notes on the results of the review and pole survey by the field
- ✓ Changes the status of the JIRA ticket to “Closed-completed”
- ✓ Saves a copy of the approval and any other documentation from the Engineer to the JIRA ticket.

Upon receipt of the email from the Engineer, the Pole Analyst completes the following steps:

- ✓ Invoices the Attacher/organization for the \$75.00 survey fee and engineering costs (labor)
- ✓ Updates the pole count or attachment count in LeaseNet for future pole invoicing purposes.

Application/Proposal Approved – with make ready work

If the Engineer approves the joint use application/proposal with make ready work to be done for the project, then the Engineer sends notification to windstream.jointuse@windstream.com and windstream.poles@windstream.com to notify of the make ready estimate approval. The Engineer should include the following:

- Who to bill
- The billing address
- Email address if available (for speedy turnaround on billing)
- JobTrac number
- Amount to bill (Make Ready estimate and \$75 survey fee)

Upon receipt of the email from the Engineer, the Permitting Analyst completes the following steps:

- ✓ Updates the JIRA ticket with notes on the results of the review and pole survey by the field
- ✓ Saves a copy of the completed Exhibit B form and the make ready estimate from the Engineer to the JIRA ticket.

Upon receipt of the email from the Engineer, the Pole Analyst completes the following steps:

- ✓ The Windstream Poles team prepares and sends the Make Ready invoice, including the \$75.00 survey fee per application, to the Attacher requesting approval to attach. Windstream.jointuse@windstream.com and the Engineer are included on this email notification
- ✓ Updates the pole count or attachment count in LeaseNet for future pole invoicing purposes.

Note: Make Ready construction will not begin until payment of the Make Ready invoice is received.

The Attacher has 14 calendar days to respond to the Make Ready estimate.

If the Attacher elects not to pay the make ready invoice the Poles Team sends notification to windstream.jointuse@windstream.com. The Permitting Analyst updates the JIRA ticket with notes regarding non-payment of the make ready invoice and changes the status to “Closed-Completed”.

If the Attacher pays the Make Ready invoice, the Windstream Poles Team sends email notification to windstream.jointuse@windstream.com and to the ENGINEER/Engineer in the field.

The Engineer schedules the make ready work to be completed and notifies the Permitting Team.

The Engineer notifies all other existing attachers on the pole(s) if their facilities must be adjusted or altered to accommodate the new attacher.

The Engineer updates the final pole/attachment counts in the miscellaneous tab and adds the JIRA ticket number to the Pole Attachment Proposal/Permit Number field in JobTrac.

The Engineer notifies, via email, windstream.poles@windstream.com and windstream.jointuse@windstream.com when the make ready work has been completed.

Upon receipt of notification the make ready work has been completed, the Permitting Analyst completes the following steps:

- ✓ Notifies the requesting utility/organization and provides an approved application/proposal, via email, providing the JIRA ticket number as the Windstream permit number
- ✓ Updates the JIRA ticket with notes on the results of the review and pole survey by the field
- ✓ Changes the status of the JIRA ticket to "Closed-Completed"
- ✓ Saves a copy of the approval and any other documentation from the Engineer to the JIRA ticket.

Windstream Permitting Team works off a three day service-level agreement.

| Rules | Days Utility has to Respond to Initial Request | Days to provide Make Ready Estimate | Days Requestor has to pay the Make Ready Estimate | Days to preform Make Ready Work | If Exceptions Apply, days to preform Make Ready Work |
|----------|--|-------------------------------------|---|---------------------------------|--|

CATV POLE ATTACHMENT TARIFF

WINDSTREAM KENTUCKY EAST, LLC

**P.S.C. KY. No. 11
Original Page 1**

S1. CATV POLE ATTACHMENT AND CABLE DUCT ARRANGEMENT

S1.1 Application of Tariff

This tariff contains regulations and charges applicable to the provision of attachment space for cable television facilities on poles of the Telephone Company, and the provision of cable duct space for such facilities in underground conduits of the Company.

The terms and conditions contained herein apply where the CATV operator, as a customer of the Company, proposes to install coaxial or other types of television distribution cables, amplifiers and drop wires, wires and appliances together with associated cable messengers, anchors and other appurtenances (hereinafter sometimes collectively called the "equipment") and desires to attach such equipment to poles of the Company, and/or install such equipment in cable ducts of the Company.

S1.2 Definitions

Poles - All references to "poles" of the Company shall mean poles which are either solely owned by the Company, are jointly owned by the Company and another, or are owned by another who has granted the Company exclusive use and control of space upon its poles.

Pole Attachment - This term means any attachment by a CATV firm to a pole owned or controlled by the Company.

Cable Duct Space - This term shall mean individual cable ducts within a multiple-duct conduit system owned by the Company.

Equipment - The "equipment" referred to herein consist of coaxial or other types of television cables, amplifiers and drop wires, wires and appliances together with associated cable messengers, anchors and other appurtenances used in the provision of CATV service.

Joint User - All references herein to "joint user" shall mean a utility company or municipality which, together with the Company, jointly provides poles for common use in the provision of service of the respective entities, and shall also include a utility company or municipality which, together with the Company, owns a percentage of a pole, or which owns a pole upon which the Company has obtained exclusive use and control of specified space.

CATV POLE ATTACHMENT TARIFF

WINDSTREAM KENTUCKY EAST, LLC

**P.S.C. KY. No. 11
Original Page 2**

S1. CATV POLE ATTACHMENT AND CABLE DUCT ARRANGEMENT

S1.2 Definitions (Continued)

Cable Television Company or Operator (CATV) - All references herein to "CATV Company and/or Operator" shall mean a company which provides CATV service.

CATV Service - All references herein to "CATV service" shall mean the transmission, by means of coaxial or other types of distribution cables, of television audio and video signals from a central point within an exchange of the Company to subscribers of a CATV company within such exchange.

S1.3 Scope

Subject to the terms and conditions contained in this tariff, the Company will provide CATV pole attachment and cable duct space and permit a CATV operator, for the purpose of furnishing CATV service, to install its equipment upon or within such of the Company's poles and conduits as are available or can be made available, except for safety reasons.

References herein to CATV equipment placed in the Company's cable ducts shall mean only cables and wires. No right to place amplifiers, power supplies or other related equipment in manholes or cable ducts of the Company is conferred by this tariff.

The CATV company shall secure from the proper franchising authority, a franchise to erect and maintain its equipment within public streets, highways and other thoroughfare, provided such franchising authority exists, and shall secure any and all consents, permits, licenses, easements or rights-of-way that may be legally required for its operation hereunder. The CATV company shall provide to the Company documentation evidencing that all such franchises, consents, permits, licenses, easements and rights-of-way have been obtained. The CATV company shall additionally provide the Company a map depicting the franchised area in which pole attachments and cable duct arrangements may be applied for by the CATV company.

The CATV company shall assist in, and bear the expense of securing any additional consents, permits, or licenses that may be required by the Company because of CATV pole attachments or cable duct usage.

Date of Issue: July 7, 2016

Date Effective: July 17, 2016

WINDSTREAM KENTUCKY EAST, LLC

**P.S.C. KY. No. 11
Original Page 3**

S1. CATV POLE ATTACHMENT AND CABLE DUCT ARRANGEMENT

S1.3 Scope (Continued)

The franchises, consents, permits, licenses, easements and rights-of-way of the Company are for its own facilities and the provision of its other services. No rights in such franchises, consents, permits, licenses, easements or rights-of-way are conferred upon any CATV company hereunder.

S1.4 Application for Permission to Install

At least forty-five (45) days prior to the time the CATV company desires to attach its equipment to any of the Company's poles, or to install any such equipment within a cable duct of the Company, the CATV operator shall make written application on the form prescribed to the Company. The Company shall in turn, notify the CATV company in writing of its permission to allow the installation.

Where the application for attachment involves joint-use poles, the CATV operator shall so indicate in its application, and provide a copy thereof to the joint user. Permission to attach to joint-use poles shall be subject to the Company obtaining approval from such joint user when necessary.

Upon notification by the Company of its permission for pole or cable duct space to be used by the CATV company, the CATV company shall have the right, subject to the SPECIFICATIONS contained herein, to install, maintain and use its equipment described in its application, upon the poles or in the cable ducts identified in its application. The CATV company shall complete each installation within a reasonable and mutually agreeable time frame; provided, however, that before commencing any such installation, the CATV company shall notify the Company of the time when it proposes to do such work sufficiently in advance so that the Company may arrange to have any necessary representative present when such work is performed. In the event the presence of a Company representative is required, the CATV company shall reimburse the Company for the cost and expense of such.

WINDSTREAM KENTUCKY EAST, LLC

**P.S.C. KY. No. 11
Original Page 4**

S1. CATV POLE ATTACHMENT AND CABLE DUCT ARRANGEMENT

S1.4 Application for Permission to Install (Continued)

Where costs are involved in the rearrangement of the Company's facilities to accommodate the CATV company's equipment, the Company shall notify the CATV company, in writing, of the changes and rearrangements required and the cost for performing such. Approval of the application by the Company is subject to receiving authorization from the CATV company to make changes and rearrangements detailed by the Company, at the CATV company's expense.

The CATV company shall not have the right to place, nor shall it place, any additional equipment upon any pole or in any cable duct without first making application to do so, as provided for in this tariff; nor shall the CATV company change the position of any equipment attached to any such pole or installed in any cable duct without the Company's prior written approval. The Company will not refuse a CATV company permission to install or rearrange CATV equipment if pole attachment or conduit space is available or can be made available, except for safety reasons. The provisions of this paragraph shall not restrict the attachment of television drops to television crossarms or television cable messenger. Unauthorized attachments or installation in cable duct shall be subject to penalty and/or special "make-ready" charges set forth in this tariff.

S1.5 Attachment Specifications

The CATV company, at its own cost and expense, shall construct, maintain and replace its attachments on the Company's poles in accordance with (1) such requirements and specifications as the Company shall prescribe and have on file with the Commission, (2) EEI Publication M12 entitled "Specifications for the Construction and Maintenance of Jointly-Used Wood Pole Lines Carrying Supply and Communication Circuits", (3) the requirements and specifications of the National Electrical Safety Code, 1981 Edition, and any amendments or revisions of said specifications or code, and (4) in compliance with any rules or orders now in effect or that hereafter may be issued by the Public Service Commission of Kentucky or other authority having jurisdiction. The CATV company shall comply, at its sole risk and expense, with changes and revisions in the above specifications and requirements.

Date of Issue: July 7, 2016

WINDSTREAM KENTUCKY EAST, LLC

**P.S.C. KY. No. 11
Original Page 5**

S1. CATV POLE ATTACHMENT AND CABLE DUCT ARRANGEMENT

S1.6 Installation and Maintenance of CATV Equipment

The exact location of the CATV company's attachments on poles and installation in cable ducts shall be determined by the Company in its sole discretion after a joint survey to be made, at such times as shall be mutually agreed upon, by representatives of the telephone company and the CATV company. The Company may make periodic inspections as conditions may warrant. Such inspections shall not operate to relieve the CATV company of any responsibility, obligation, or liability assumed under this tariff. When substandard installations are found which are created by the CATV operator, the Company shall give notice of such to the CATV company, and the CATV company shall remedy such conditions within a reasonable time. In the event the CATV company fails to remedy the condition within the agreed upon time, the Company may act to remedy it with the cost of such to be paid by the CATV company.

Whenever CATV equipment is to be installed, rearranged or removed on or from Company poles, such work will normally be performed by the CATV company at its expense. In such cases a Company representative may be required to observe the work, at the expense of the CATV company. Where consented to by the Company, the CATV company may elect to have such installation, rearrangement or removal performed by the Company; however, the CATV company will furnish all materials and equipment and will reimburse the Company for its costs in performing the work activity.

Whenever CATV equipment is to be installed, rearranged or removed in cable ducts, such work will usually be performed by the Company, at the CATV company's expense. If the CATV elects to perform the work activity, a Company representative may be required to observe the work at the expense of the CATV company. Work performed by the Company or the CATV firm, shall be performed in accordance with the Company's established practices, and all materials and equipment shall be supplied by the CATV company.

WINDSTREAM KENTUCKY EAST, LLC

**P.S.C. KY. No. 11
Original Page 6**

S1. CATV POLE ATTACHMENT AND CABLE DUCT ARRANGEMENT

S1.6 Installation and Maintenance of CATV Equipment (Continued)

Where the CATV company's equipment can be accommodated on Company poles or in Company cable ducts by rearranging or changing the Company's facilities, the CATV company shall pay the Company in advance the cost of making such rearrangements or changes. Strengthening of poles (guying) required to accommodate the attachments of the CATV company and the bonding of the CATV's strand to that of the Company shall be performed by the CATV company at its sole risk and expense. Such work may be performed by the Company when reasonable cause therefore exists, and the CATV company shall pay the Company in advance the cost of all such work.

After initial attachment, when the Company subsequently requires a change in its poles, attachments thereto or its conduit system for reasons unrelated to CATV operations, the CATV company shall be given reasonable notice of the changes required and sufficient time to accomplish the CATV related change. If the CATV operator is unable or unwilling to meet the Company's time schedule for changes in attachments, the Company may do the work and charge the CATV company its reasonable costs for performing the change of CATV equipment. In cases of emergency, the Company may, at the CATV company's expense, arrange to relocate or replace the facilities attached to Company poles by the CATV operator, transfer them to substituted poles or perform any other work in connection with said facilities that may be required in the maintenance, replacement, removal, or relocation of said poles, the facilities thereon or the equipment which may be placed thereon.

All required maintenance of CATV equipment shall be performed by the CATV operator. No entry shall be made into any facility housing or cable ducts without the prior written permission of the Company. The Company reserves the right to require the presence of its representative at the time of any such entry, with the cost thereof to be reimbursed by the CATV company. An estimate of such cost shall be furnished at the time the Company gives its written permission for entry.

S1. CATV POLE ATTACHMENT AND CABLE DUCT ARRANGEMENT

S1.6 Installation and Maintenance of CATV Equipment (Continued)

All tree trimming required on account of CATV company equipment shall be done by the CATV operator at its sole risk and expense and in a manner satisfactory to the Company.

The CATV company shall, at its sole risk and expense, maintain all of its equipment on Company poles or in Company cable ducts in safe condition and in thorough repair.

Nothing herein contained shall give to the CATV company the right to place a crossarm on any Company pole. If a crossarm is required to accommodate the facilities of the CATV company, the CATV company shall state the reasons in its application for attachment.

Written consent of the Company must be obtained by the CATV company prior to any additions to, or changes in the location of its attachments on poles or equipment in cable ducts, except in cases of emergency when oral permission has been obtained from the Company and subsequently confirmed in writing.

If the CATV company should require the location of its equipment upon any public thoroughfare or other public or private property in the conduct of its business and the Company does not have pole facilities so located to fulfill CATV requirements and has no immediate need for such for the Company's own use, the Company will notify the CATV operator whether the Company is willing to place such pole facilities. Special rates shall be agreed to by the CATV company prior to the Company's placement of such pole facilities, and the rates specified herein shall not apply. The special rates shall be based upon the total use of the pole facilities by the CATV company. In the event such pole facilities are subsequently used by the Company for the provision of its other services, the special rates shall no longer apply, and the rates specified in this tariff shall apply.

CATV POLE ATTACHMENT TARIFF

WINDSTREAM KENTUCKY EAST, LLC

**P.S.C.KY. No. 11
Original Page 8**

S1. CATV POLE ATTACHMENT AND CABLE DUCT ARRANGEMENT

S1.6 Installation and Maintenance of CATV Equipment (Continued)

Whenever, pursuant to this tariff, the CATV company shall be required to remove its equipment from any pole, such removal shall be made within a reasonable time unless safety considerations require immediate action. Upon failure of the CATV company to remove such equipment, the Company may make the removal and charge the CATV company all associated costs.

Whenever, pursuant to the tariff, CATV equipment in cable ducts shall be required to be removed, relocated or replaced, such work will usually be performed by the Company, after written notice to the CATV company, at the CATV company's expense. If the CATV company elects to perform the work, a Company representative may be required to observe the work at the expense of the CATV company. Any CATV equipment required for such work performed by the Company or the CATV firm, shall be supplied by the CATV company.

The CATV company shall not interset poles or locate guys or other facilities in pole lines of the Company, except where the CATV company has appropriate right-of-way and such will not inhibit access to poles and facilities of the Company or cause a safety hazard.

S1.7 Cost of Pole Replacements

Whenever the CATV company applies for permission to attach to a pole that is considered by the telephone company to be insufficient in height or strength for accommodation of CATV attachments, the Company shall notify the CATV operator of such fact and of the estimated cost to the CATV company of replacing such pole with a pole which will accommodate the attachments of the CATV company and the telephone company. Within thirty (30) days of such notification, the CATV company shall either notify the Company (1) of its approval of such replacement or (2) of its cancellation of the application with respect to such pole.

In the event of CATV's approval of such replacement, the Company shall replace the pole and the CATV operator shall pay to the Company in advance the charges computed as follows:

S1. CATV POLE ATTACHMENT AND CABLE DUCT ARRANGEMENT

S1.7 Cost of Pole Replacements (Continued)

- (1) The total cost of the new pole, the removal of the old pole, the transferring of the Company's attachments from the old to the new pole and such other costs, if any, necessitated by CATV requirements, less the total of the following: accrued depreciation on the old pole, salvage, if any, and the cost of such portion of the new pole, if any, which represents space reserved for the use of the Company greater than that provided for them on the old pole and appropriate contribution by any other company attached thereto.

S1.8 Rights of Way and Legal Authority

Upon application for attachment or use of cable ducts, the CATV company shall submit evidence satisfactory to the Company of its authority to erect and maintain its equipment within public streets, highways, and other thoroughfares and shall secure any necessary franchise, license, permit, consent, easement or rights-of-way from Federal, State or municipal authorities or owners of property now or hereafter required to construct and maintain such equipment at the location of facilities of the Company which it desires to use. In the event any such franchise, license, permit, consent, easement or rights-of-way is revoked or is thereafter denied to the CATV company for any reason, permission to attach to Company poles or to use Company cable ducts so affected shall immediately terminate, the CATV company shall forthwith remove its equipment from Company facilities.

Upon notice from the telephone company to the CATV company that the removal or cessation of the use of any pole or cable duct has been requested or directed by Federal, State or municipal authorities, or property owners, permission to attach to such pole or to use such cable duct shall immediately terminate and the CATV company shall forthwith remove its equipment therefrom.

S1. CATV POLE ATTACHMENT AND CABLE DUCT ARRANGEMENT

S1.9 Protection Against Claims for Libel and Slander, Copyright, and Patent Infringement

The CATV company shall indemnify, protect, and hold harmless the Company from and against any and all claims for libel and slander, copyright and/or patent infringement arising by reason of attachment of CATV equipment to Company poles or installation of CATV equipment in Company cable ducts, pursuant to this tariff.

S1.10 Limitations

No use, however extended, of the Company's poles or cable ducts under this tariff shall create or vest in the CATV company any ownership or property right in said poles or ducts. Nothing herein contained shall be construed to compel the Company to maintain any of its facilities for a period longer than that demanded by its other service requirements.

The Company reserves to itself, its successors and assigns the right to maintain its poles and conduit and to locate and operate its facilities in such manner as will best enable it to fulfill its other public service requirements. Except where caused by its own negligence the Company shall not be liable for any interruption to the service of the CATV company or for any interference with the operation of the equipment of the CATV company.

The Company reserves the right to provide pole attachment and cable duct space to more than one CATV company and to make such space available to other entities. This tariff shall not limit the rights and privileges previously granted to others to use any poles or cable ducts covered by this tariff, and the privileges provided by this tariff shall at all times be subject to such previously granted rights.

Failure to enforce or insist upon compliance with any of the terms or conditions of this tariff shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in effect.

S1. CATV POLE ATTACHMENT AND CABLE DUCT ARRANGEMENT

S1.10 Limitations (Continued)

The CATV company shall not assign, transfer or sublet any rights to make pole attachments or utilize cable ducts hereunder without the prior written consent of the Company; except that nothing contained herein shall be construed as depriving a CATV company of its property or the ability to dispose of its property in any manner it deems reasonable.

S1.11 Indemnity and Insurance

The CATV company shall indemnify, protect, and hold harmless the Company and other joint-users of said poles and conduit system from and against any and all loss, costs, claims, demands, damage and/or expense arising out of any demand, claim, suit or judgment for damages to property and injury to or death of persons, including the officers, agents, and employees of the CATV company, the Company and any joint user, including payment made under any Workmen's Compensation Law or under any plan for employees' disability and death benefits, which may arise out of or be caused by the installation, maintenance, presence, use or removal of said equipment or by the proximity of CATV equipment to the cables, wires, apparatus and appliances of the Company or any joint user, or arising out of any act, omission or negligence or alleged act, omission or negligence of the CATV operator or the joint negligence of the CATV operator and the Company and/or any joint users; provided, that the obligation of the CATV company under this paragraph does not include the indemnification of the Company or any joint user from or against the sole or joint negligence of the Company or any joint user.

The CATV company shall maintain in full force and effect the following insurance policies or bond in lieu thereof providing an equivalent protection: (1) Workers' Compensation and Occupational Disease covering the CATV company's full liability under the Workers' Compensation Laws of the Commonwealth of Kentucky. This shall include Employer's Liability insurance in the amount of \$100,000. (2) Comprehensive General Liability insurance, in the amounts of \$1,000,000 Combined Single Limits or \$1,000,000 each occurrence, and \$1,000,000 aggregate for any accident resulting in

bodily injuries to or the death of one or more persons and the consequential damages arising therefrom together with Property Damage Liability in the amount of \$500,000 each occurrence, with an aggregate total limit of \$500,000.

All policies of insurance shall contain written endorsements to the effect that the amount of coverage of the insurance provided thereby will not be reduced or terminated without thirty (30) days written notice first being given to the Company. Certificates of insurance, incorporating the above described endorsement, shall be delivered to a designated officer of the Company and shall be approved by the Company before the CATV firm is permitted to perform any work authorized pursuant to this tariff. Failure of the CATV company to provide notice of renewals, changes in carrier, or a reduction in or termination of insurance coverage will be just cause for the Company to terminate the CATV company's right to continue its pole attachments and/or use of cable ducts. If renewal premiums are not paid by the CATV company prior to said 30-day notice, the Company shall have the right to pay said premiums and be reimbursed by the CATV company upon demand.

The CATV operator shall promptly notify the Company of all claims and potential claims relating to damage to property or injury to or death of persons arising or alleged to have arisen in any manner by or associated with, directly or indirectly, the presence or use of the CATV company's equipment upon or within any facility of the Company.

The CATV company shall exercise special precautions to avoid damage to facilities of the Company on said poles and conduit and hereby assumes all responsibility for any and all loss for such damage. The CATV company shall make an immediate report to the telephone company of the occurrence of any such damage and shall reimburse the Company for the expense incurred in making repairs necessitated thereby.

WINDSTREAM KENTUCKY EAST, LLC

**P.S.C.KY. No. 11
Original Page 13**

S1. CATV POLE ATTACHMENT AND CABLE DUCT ARRANGEMENT

S1.12 Surety

The CATV company shall furnish a bond for each individual CATV system utilizing pole attachments or cable ducts under this tariff to guarantee the payment of any sum which may become due to the Company for rental, penalty, and make-ready charges and work performed by the Company, pursuant to this tariff, for the benefit of the CATV company or as a result of default or forfeiture by the CATV company. The amount of such bond shall be based upon the following:

- (1) For attachments to 500 poles or less, a bond of \$5,000 shall be furnished, except as provided in (4) below.
- (2) For attachments to poles in excess of 500, further surety in the amount of \$5,000 for each additional 500 poles, or any increment thereof, shall be furnished except as provided in (4) below.
- (3) Where cable ducts are provided, further surety in the amount of \$10,000 shall be furnished, except as provided in (4) below.
- (4) After one year following the completion of construction of an individual CATV system and its placement into operation, the CATV operator may request that the required amount of bond be reduced. Upon the Company's receipt of satisfactory evidence that all mechanics, workmen and material men who furnished services, labor or materials in the construction of such CATV system, and all taxing authorities, have been paid all amounts due them, the Company will reduce the amount of bond required to the following:
 - (a) For attachments to 500 poles or less, a bond of \$2,000 shall be furnished.
 - (b) For attachments to poles in excess of 500, further surety in the amount of \$2,000 for each 500 poles, or any increment thereof, shall be furnished.
 - (c) Where cable ducts are provided, further surety in the amount of \$5,000 shall be furnished.

S1. CATV POLE ATTACHMENT AND CABLE DUCT ARRANGEMENT

S1.13 Payment of Bills

All amounts payable by the CATV company to the Company under the provision of this tariff shall, unless otherwise specified, be payable within thirty (30) days after presentation of bills. Non-payment of any such amounts when due shall constitute grounds for termination of the pole attachment and cable duct usage rights under this tariff.

S1.14 Termination of Attachments and Cable Duct Usage

If the CATV company shall fail to comply with any of the provisions of this tariff, including compliance with the specifications previously referred to, the maintenance of required insurance coverage and surety bond requirements, and the timely payment of any amounts due, and shall fail for thirty (30) days after written notice from the Company to correct such non-compliance, the Company, at its option, may terminate the CATV company's right to continue any or all use of poles or cable ducts provided under this tariff and may act to remove the CATV equipment at the CATV company's expense.

Upon valid objection being made by or on behalf of any governmental authority properly asserting jurisdiction, the Company may without notice, or where circumstances permit, upon five (5) days written notice to the CATV company, terminate the provision of pole attachment and/or cable duct space as provided in this tariff.

The CATV company may at any time remove its equipment attached to any pole or poles of the Company and shall immediately give the Company written notice of such removal. The CATV company may at any time request the removal of its equipment in the cable duct of the Company. Removal of CATV equipment in cable ducts will usually be performed by the Company, at the CATV company's expense. If the CATV company elects to perform the work, a Company representative may be required to observe the removal at the expense of the CATV company. Removal work performed by the CATV company is to be made within a reasonable time, unless safety conditions require immediate action.

S1.15 Notices

Any notice required or authorized by this tariff to be given by the Company or the CATV company to the other party shall be deemed to have been fully given when made in writing and deposited in the United States mail, postage prepaid, and addressed to such other party's principal business address last furnished by such party.

S1.16 Rates

The CATV Company shall pay to the Company in advance the rates specified below. The Company shall render billing to the CATV Company on at least a quarterly basis. The Company will bill for CATV pole attachments or conduit usage from the date of CATV installation or from the date that space is reserved for CATV installation at an unspecified future time.

| | <u>Monthly Rate</u> |
|---|-------------------------|
| Per 2-User Pole | \$ 1.01 |
| Per 3-User Pole | .47 |
| Per linear foot of cable duct space occupied | .07 |

S1.17 Penalty Charges

Where pole attachments have been made without respect of authorization from the Company, a penalty charge of twice the amount of the annual rate shall apply, in lieu of the annual rate, from the date of the last previous physical inventory of pole attachments or inspection required pursuant to the rules of the Kentucky Public Service Commission, whichever is most recent. Additionally, a special "make-ready" charge, equal to twice the amounts which would have been due and applicable if the attachment had been properly authorized, shall apply.

AGREEMENT TERMS AND CONDITIONS

1.0 SCOPE OF AGREEMENT

- 1.01 The purpose of this Agreement is to set forth the rates, terms, conditions, and procedures under which the Licensor will provide Licensee access to Licensor's poles, ducts, innerducts, conduits, and rights-of-way. **This agreement does NOT allow access to Windstream Central Offices. A separate agreement is required for interconnection access.**
- 1.02 Subject to the provisions of this Agreement, Licensor will issue to Licensee for any lawful communications purpose, revocable, nonexclusive licenses authorizing the attachment of Licensee's cables, equipment, and facilities to Licensor's poles or the placing of Licensee's cables, equipment, and facilities in Licensor's conduit system or within right-of-way owned or controlled by Licensor.
- 1.03 No use, however extended, of Licensor's poles, conduit system or right-of-way nor payment of any fees or charges required under this Agreement shall create or vest in Licensee any ownership or property rights in said poles, conduit system or right-of-way, but Licensee's rights therein shall be and remain a mere license. Nothing herein contained shall be construed to compel Licensor to construct, retain, extend, place, or maintain any facilities not needed for its own service requirements, unless otherwise required by law.
- 1.04 Licensee recognizes that Licensor has heretofore entered into, or may in the future enter into, agreements and arrangements with others which are not party to this Agreement regarding the poles, conduit system and right-of-way covered by this Agreement. Nothing herein contained shall be construed as a limitation, restriction or prohibition against Licensor with respect to such other agreements or arrangements. The rights of Licensee shall at all times be subject to any present or future joint use arrangement between Licensor and any other public utility or government agency.
- 1.05 The parties acknowledge that Licensor is entering into this Agreement because Licensee is a "telecommunications carrier" or "cable television system," as such terms are defined in the Communications Act of 1934, as amended (hereinafter the "Communications Act") and desires to provide telecommunications service or cable service ("services"), as defined in the Communications Act and that Licensee is authorized to provide these services under its franchise or other lawful authority within the service area. In the event Licensee no longer has the status as a "telecommunications carrier" or "cable television system" as stated in this Section 1.05 or the authority to offer these services in the service area, Licensor shall have the right to immediately terminate this Agreement and require Licensee to remove all of its facilities from Licensor's poles, ducts, innerducts, conduits and rights-of-way.

2.0 DEFINITIONS

- 2.01 "Attachments" - Any attachment to a pole, use of a duct or innerduct, use of a conduit, or using right-of-way owned or controlled by Licensor.
- 2.02 "Attachment Fee" - Fee paid annually per attachment on a pole, or in a duct, innerduct, conduit, or right-of-way.
- 2.03 "Buried Cable" - Cable located below the surface of the ground but not in Licensor's conduit system.

- 2.04 "Conduit System" - Any combination of ducts, innerducts, conduits, manholes, and handholes owned or controlled by Licensor that is a reusable passage or opening in, on, under or through the ground, or a structure such as a building or bridge. The term includes "inner ducts" created by subdividing a duct into smaller channels.
- 2.05 "Hazardous Materials" -
- (A) Any substance, material or waste now or hereafter defined or characterized as hazardous, toxic or dangerous as defined by the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA") of 1980, as amended, and other federal, state, and local health, safety, and environmental laws, ordinances, statutes, and rules, including but not limited to the Occupational Safety and Health Act ("OSHA").
 - (B) Any substance, material or waste now or hereafter classified as a contaminant or pollutant under any law, rules, ordinance, or authority.
 - (C) Any other substance, material or waste, the manufacture, processing, distribution, use, treatment, storage, placement, disposal, removal or transportation of which is now or hereafter subject to regulation under any law, ordinance, statute, rule or regulation of any governmental body or authority.
- 2.06 "Make Ready Work" - All work to prepare Licensor's poles, ducts, innerducts, conduits, rights-of-way, and related facilities for the requested occupancy or attachment of Licensee's facilities but not the actual placement of attachments or administrative activities related to inquiries, verifications, requests or applications.
- 2.07 "Poles"- Licensor owned and poles owned by others to the extent that and for so long as Licensor has the right to permit others to be attached in the communications space.
- 2.08 "Pole Attachment Request" or "PAR" - A written request from Licensee to attach its facilities to Poles, submitted in accordance with this Agreement. With respect to pole attachment agreements in effect prior to the date the Parties executed this Agreement, the term PAR shall be deemed to include Pole attachment requests made by letter or similar document.
- 2.09 "Right-of-Way" - Right-of-way owned or controlled by Licensor. It does not include attachment or use of cables, poles, equipment or facilities located on a particular right-of-way. It may include private easement, or in certain instances public right-of-way granted by a governmental authority or a utility easement such as in a subdivision or development.

3.0 TERM OF AGREEMENT

- 3.01 This Agreement shall become effective upon its execution and if not terminated in accordance with the provisions of other Articles hereof, shall continue in effect for a term of not less than three (3) years, provided, however, that at any time after the first year of said term the rates, fees and charges set forth may be increased or decreased by written notice from Licensor to Licensee on a nondiscriminatory basis with respect to similar rates, fees and charges of other similar licensees.
- 3.02 Either Party may terminate this Agreement with at least a (6) six month written notice to the other Party.

- 3.03 Upon termination of the Agreement in accordance with any of its terms, all outstanding licenses in connection therewith shall terminate and shall be surrendered and Licensee shall within 60 days of date of termination remove all cables, equipment and facilities at the cost and expense of Licensee. If Licensor in its sole discretion, deems it is impractical to remove Licensee's cable, equipment and facilities from Licensor's rights-of-way, they may be abandoned in place.

4.0 LEGAL AUTHORITY

- 4.01 Licensee will obtain from public authorities and private owners of property any and all permits, franchises, licenses and grants necessary for the lawful exercise of any license granted hereunder

5.0 APPLICABLE LAW

- 5.01 This Agreement, and the rights and obligations contained in it, shall be governed and construed under the laws of the state in which the attachments hereunder are to be located.

6.0 SUBSEQUENT LAW

- 6.01 The terms and conditions of this Agreement shall be subject to any and all applicable laws, rules, regulations or guidelines now in effect and that subsequently may be prescribed by any federal, state or local governmental authority. To the extent required by any such subsequently prescribed law, rule, regulation or guideline, the Parties agree to modify, in writing, the affected term(s) and conditions(s) of this Agreement to bring them into compliance with such law, rule, regulation or guideline. Should any term of this Agreement be determined by a court or agency with competent jurisdiction to be unenforceable, all other terms of this Agreement shall remain in full force and effect.

7.0 DISCLAIMER OF WARRANTIES

- 7.01 Except as specifically set forth in this Agreement, Licensor makes no warranties, express or implied, including, but not limited to, any implied warranties of merchantability or fitness for a particular purpose.

8.0 LICENSE NOT EXCLUSIVE

- 8.01 Nothing herein contained shall be construed as a grant of any exclusive license, right or privilege to Licensee. Licensor shall have the right to grant, renew and extend rights and privileges to others not parties to this Agreement, by contract or otherwise, to use any poles, conduit system or right-of-way covered by this Agreement, under such terms and conditions, as Licensor shall prescribe.

9.0 ASSIGNMENT OF RIGHTS

- 9.01 Licensee shall not assign; transfer or sublet the privileges hereby granted, or sell, lease or otherwise permit the use of its facilities on or any part thereof (all of the foregoing being "Transfers"), without prior consent in writing of Licensor which consent shall not be unreasonably withheld, delayed or conditioned; provided, however, that either Party may so Transfer its rights and obligations under this Agreement without such consent to (i) any entity said Party, directly or indirectly, controls, is controlled by or is under common control with or (ii) any entity acquiring all or substantially all of said Party's assets or

equity, by providing written notice to the other Party of such Transfer. Any attempted Transfer that is not permitted under this Section 9.01 is void *ab initio*.

- 9.02 Subject to the provisions of this Agreement, this Agreement shall extend to and bind the successors and authorized assigns of the Parties hereto.

10.0 LIABILITY AND DAMAGES

- 10.01 Licensor reserves to itself, its successors and assigns, the right to maintain its poles, conduit system and right-of-way and to operate its facilities thereon in such manner as will best enable it to fulfill its own service requirements. Licensor shall not be liable to Licensee for any interruption to service of Licensee or for interference with the operation of the cables, equipment or facilities of Licensee arising in any manner out of the use of Licensor's poles, conduit system and right-of-way except caused by Licensor's sole negligence, willful misconduct or material breach of this Agreement, in which case Licensor's liability shall be limited to the reasonable cost of repair of Licensee's damaged cable, equipment or facilities, if any.
- 10.02 Licensee shall exercise special precautions to avoid damaging the cables, poles, conduits, right-of-way equipment and facilities of Licensor and of other licenses and hereby assumes all responsibility for any and all loss, damages, costs and expenses. Licensee shall make an immediate report to Licensor of the occurrence of any such damage and hereby agrees to reimburse the respective owners for the expense incurred in making repairs.
- 10.03 Licensee shall indemnify and hold harmless Licensor against any and all claims, demands, causes of action, damages, costs or liabilities of every kind and nature whatsoever, except to the extent caused by Licensor's negligence or willful misconduct, which may arise out of or be caused by:
- (A) The erection, maintenance, presence, use or removal of Licensee's cable, equipment, and facilities on Licensor's poles, and within Licensor's conduit system and right-of-way
 - (B) Any act of Licensee on or in the vicinity of Licensor's poles, conduit system and right-of-way, or
 - (C) Any interruption, discontinuance, or interference with Licensor's service to any of its subscribers occasioned or claimed to have been occasioned by any action of Licensee pursuant to or consistent with this Agreement. Licensee shall, upon demand and at its own sole risk and expense, defend any and all suits, actions or other legal proceeding brought or instituted against Licensor on any such claim, demand or cause of action, and shall pay and satisfy any judgment or decree rendered against Licensor therein, and Licensee shall reimburse Licensor for any and all legal expense incurred by Licensor in connection therewith. Licensee shall also indemnify, protect and hold harmless Licensor from any and all claims and demands of whatever kind which arise directly or indirectly from the operation of Licensee's facilities including taxes, special charges by others, claims and demands for damages or loss for infringement of copyright, for libel and slander for unauthorized use of television broadcast programs, and for unauthorized use of other program material, and from and/or against all claims and demands for infringement of patents with respect to the manufacturer, use and operation of Licensee's equipment whether arising from the use of Licensee's equipment in combination with Licensor's poles, conduit system, right-of-way or otherwise.

- 10.04 Licensee agrees to comply under the Workmen's Compensation Laws of the state in which attachments are to be located hereunder, and also agrees to cause every subcontractor of Licensee to comply with and qualify under said laws, and shall furnish copies of Certificates demonstrating such compliance to Licensor prior to commencement of the work.

11.0 DEFAULT AND REMEDIES

- 11.01 In addition to Material Defaults defined anywhere else in this Agreement, any one of the following shall be deemed the occurrence of a Material Default under this Agreement:
- (A) Failure by Licensee to pay any fee or other sum required to be paid under the terms of this Agreement and such default continues for a period of thirty (30) calendar days after written notice thereof to Licensee.
 - (B) Failure by either Party to perform or observe any other term, condition, covenant, obligation, or provision of this Agreement and such default continues for a period of thirty (30) business days after written notice thereof from the other Party (provided that if such default is not curable within a thirty (30) business day period, the period will be extended if the Party substantially commences to cure such default and proceeds diligently thereafter to effect such cure).
 - (C) The filing of any tax or mechanic's lien against Poles because of any act or omission by Licensee which is not bonded or discharged within thirty (30) calendar days of the date Licensee receives notice that such lien has been filed;
 - (D) Licensor or Licensee's voluntary or involuntary bankruptcy;
 - (E) Licensee's knowing use or maintenance of its Attachments in violation of any law or regulation, or in aid of any unlawful act or undertaking;
 - (F) If any authorization which may be required of Licensee by any governmental or private authority for the placement, operation, or maintenance of Licensee's Attachments is denied or revoked.
- 11.02 In the event of a Material Default and subject to any other applicable provision of this Agreement, the Non-defaulting Party, without any further notice to the Defaulting Party (except where expressly provided for below or required by applicable law), may do any one or more of the following:
- (A) Perform on behalf and at the expense of the Defaulting Party, any obligation of the Defaulting Party under this Agreement which the Defaulting Party has failed to perform and of which the Non-defaulting Party shall have given the Defaulting Party notice, the cost of which performance shall be paid by the Defaulting Party to the Non-defaulting Party upon demand;
 - (B) Terminate this Agreement by giving sixty (60) business days written notice of such termination to Licensee and remove Licensee's Attachments and store Licensee's facilities in a public warehouse or elsewhere at the expense of and for the account of Licensee without Licensor being deemed guilty of trespass or conversion, and without Licensor becoming liable for any loss or damages to Licensee occasioned thereby; or

- (C) Exercise any other legal or equitable right or remedy that the Non-defaulting Party may have.
- 11.03 The Defaulting Party shall repay to the Non-defaulting Party upon demand any costs and expenses incurred by the Non-defaulting Party (including, without limitation, reasonable attorneys' fees) in successfully enforcing this Agreement.
- 11.04 Upon termination of this Agreement by the Non-defaulting Party, the Defaulting Party shall remain liable to the Non-defaulting Party for any and all fees, other payments and damages which may be due or sustained in accord with this Agreement prior to such termination, all reasonable costs, fees and expenses, including, without limitation, reasonable attorney' fees incurred by the Non-defaulting Party in pursuit of its remedies hereunder.
- 11.05 All rights and remedies of the Non-defaulting Party set forth in this Agreement shall be cumulative and none shall exclude any other right or remedy, now or hereafter allowed by or available under any statute, ordinance, rule of court, or the common law, either at law or in equity, or both.

12.0 INDEMNIFICATION

- 12.01 Licensee shall compensate Licensor for the full actual loss, damage or destruction of Licensor's property that in any way arises from or is related to this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation, or maintenance of Licensee's Attachments).
- 12.02 Each party agrees to defend, indemnify, protect and hold harmless the other and the other's officers, directors, employees, shareholders, successors, assigns, agents, affiliates, representatives, partners, and contractors from and against any and all third party claims, actions, administrative proceedings (including, without limitation, informal proceedings), judgments, damages, penalties, fines, cost, liabilities, interests, or loss, including, without limitation, reasonable attorneys' fees and expenses, consultant fees, and expert fees, together with all other costs and expenses of any kind or nature suffered by or asserted against the indemnified party in any way arising out of or connected with this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation or maintenance of Licensee's facilities, unless caused by the sole negligence or willful misconduct on the part of Licensor or Licensor's affiliates, agents, officers, employees and assigns). Each party expressly assumes all liability for actions by its affiliates, agents, officers, employees, or its contractors and expressly waives any immunity from the enforcement of this indemnification provision that might otherwise be provided by workers' compensation law or by other state or federal laws.
- 12.03 Without limiting any of the foregoing, Licensee assumes all risk of, and agrees to relieve Licensor of any and all liability for, loss or damage (and the consequences of loss or damage) to any facilities placed on Licensor's property and any other financial loss sustained by Licensee, except to the extent caused by the negligence or willful misconduct on the part of Licensor or Licensor's agents, officers, employees, and assigns.
- 12.04 Without limiting the foregoing, Licensee expressly agrees to indemnify, defend, and hold harmless Licensor and Licensor's agents, officers, employees and assigns from any and all claims asserted by end users/customers of Licensee in any way arising out of or in connection with this Agreement or Licensee's

facilities, except to the extent caused by the negligence or willful misconduct on the part of Licensor or Licensor's agents, officers, employees, and assigns. or its contractors.

- 12.05 Notwithstanding anything to the contrary in this Agreement, Licensee further shall indemnify and hold harmless Licensor, its agents, officers, employees, and assigns from and against any claims, liabilities, losses, damages, fines, penalties, and costs (including, without limitation, reasonable attorneys' fees) whether foreseen or unforeseen, which the indemnified parties suffer or incur because of:
- (A) Any discharge of hazardous waste resulting from acts or omissions of Licensee or Licensee's predecessor in interest;
 - (B) Acts or omissions of Licensee, its agents, employees, Licensees, or representatives in connection with any cleanup required by law, or
 - (C) Failure of Licensee to comply with Environmental, Safety and Health Laws.
- 12.06 In no event shall either Party be liable to the other for any special, consequential or indirect damages (including, without limitation, lost revenues and lost profits) arising out of this Agreement or any obligation arising hereunder, whether in an action for or arising out of breach of contract, or otherwise.
- 12.07 Licensee shall indemnify, protect, and hold harmless Licensor from and against any and all claims for libel and slander, copyright and/or patent infringement arising directly or indirectly by reason of installation of Licensee's equipment on Licensor Poles, Conduit Systems or Right-of Way pursuant to this Agreement.

13.0 COMPLIANCE WITH LAW

- 13.01 Notwithstanding anything to the contrary in this Agreement, each Party shall ensure that any and all activities it undertakes pursuant to this Agreement shall comply with all applicable laws, including, without limitation, all applicable provisions of:
- (A) Workers' compensation laws
 - (B) Unemployment compensation laws
 - (C) The Federal Social Security Law
 - (D) The Fair Labor Standards Act, and
 - (E) All laws, regulations, rules, guidelines, policies, orders, permits and approvals or any governmental authority relating to environmental matters and/or Occupational Safety and Health Act ("OSHA").

14.0 INSURANCE

- 14.01 Licensee shall obtain and maintain, in full force and effect at all times, during operations covered by this Agreement, such minimum insurance as will cover the obligations and liabilities of said Party, its agents,

- 14.05 The policy will show the state in which operation on behalf of the Party and/or subsidiary is being conducted. For operations conducted within monopolistic (state fund) states, the Party will furnish a certificate of compliance from the appropriate state fund administrator.
- 14.06 In each and every policy in 14.04A and 14.04B, the other Party's Corporation and its subsidiaries shall be named an "additional insured" with respect to activities performed on behalf of the Party's Corporation and its subsidiaries.
- 14.07 Coverage provided by the policies listed in this paragraph will be issued by an insurance company, licensed in the state in which operations on behalf of the Party are to be conducted. It is acceptable to use both primary and excess/umbrella policies to obtain necessary limits.
- 14.08 Licensee will furnish to the other Party, a certificate evidencing insurance coverage under sub-paragraphs 14.04-A, and 14.04-B. Such certificate shall provide for a thirty-day prior notice to the other Party of any cancellation or material changes in coverage and shall be signed by a legal representative of the issuing insurance company. The certificate of insurance shall be sent to the person identified at paragraph 25.03.
- 14.09 The provisions of sub-paragraphs 14.04-A and 14.04-B shall also apply to all sub-Licensees, and Licensee shall be responsible for their compliance herewith.

15.0 NON-WAIVER OF TERMS AND CONDITIONS

- 15.01 Failure to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

16.0 LICENSOR'S LIEN

- 16.01 Should Licensor under any Article of this Agreement remove Licensee's cable, equipment or facilities from Licensor's poles, conduit system or right-of-way, Licensor will deliver to Licensee the cable, equipment or facilities so removed upon payment by Licensee of the cost of removal, storage and delivery, and all other amounts due Licensor hereunder. Licensor is hereby given a lien on Licensee's cable, equipment or facilities within Licensor's conduit system or right-of-way or attached to Licensor's poles or removed therefrom, with power of public or private sale, to cover any amounts due Licensor under the provisions of this Agreement. Such liens shall not operate to prevent Licensor from pursuing, at its option, any other remedy in law, equity or otherwise, including any other remedy provided for in this Agreement.

17.0 SCHEDULE OF FEES AND CHARGES

- 17.01 Licensee may be required to furnish bond or other security satisfactory to Licensor, in a reasonable initial amount to be determined by Licensor and provided by Licensee at the time Licensee submits Exhibit B to Licensor's Attachment Application Procedures to guarantee the payment of any such sums which may become due to Licensor arising out of this Agreement including, but not limited to fees due hereunder or charges for work performed for the benefit of Licensee under this Agreement, including the removal of Licensee's facilities upon termination of this Agreement by any of its provisions or upon termination of any License issued hereunder. Bond to be sent to person identified at paragraph 25.03. Bond is to be equal to one (1) year's annual rental fees.

17.02 The fees, rates and charges set forth in APPENDIX I or elsewhere in this Agreement are effective during the term of this Agreement subject to Section 3.01 and shall be due and payable by Licensee as set forth herein.

17.03 FEES:

All rates, charges and fees set forth in this Agreement and as shown in APPENDIX I (Schedule of Rates, Fees, and Charges) shall be subject to all applicable federal, state, and local laws, rules, regulations and commission orders.

(A) Computation:

(1) Pole and Anchor Attachment Fees:

(a) For the purpose of computing the annual pole attachment fee hereunder, for calendar years subsequent to a first partial calendar year, said fee shall be based upon the number of poles and anchors, to which attachments are actually made, as of December 31 of the preceding year, multiplied by the per attachment pole attachment fee rate set forth on APPENDIX I. For a first partial calendar year, the pole attachment fee shall be prorated as necessary, on a daily basis from the date payment is due in accordance with Exhibit B of Licensor's Attachment Application Procedures.

(b) For billing purposes, a single pole attachment includes the point of attachment and all facilities located in the usable space on the pole in the space assigned to Licensee (typically six inches above and six inches below the point of attachment). If Licensee occupies more than one usable space on a pole, separate attachment fees shall apply to each space occupied.

(2) Conduit Occupancy Fees :

(a) For the purpose of computing the total conduit occupancy fee due hereunder, the duct feet of conduit shall be measured from the center to the center of manholes; or from the center of a manhole to the end of the duct; from the center of a manhole to the property line if the duct is connected at the property line to a duct owned and controlled by a third-party property owner; or the length of a conduit from pole to pole; or isolated lengths of conduit not attached to any structure (such as involved with buried cable) which will be occupied by Licensee's cable.

(b) For billing purposes each inner duct will be billed the half duct fee. If two or more facilities occupy a duct that has not been subdivided, the half duct fee will be charged for each facility. The half duct fee will apply when others place the Licensee facility in a duct that has not been subdivided only if the facility does not render the duct unusable.

(3) Right-of-Way Occupancy Fees:

(a) This fee will be negotiated on a case by case basis. There is no established per foot rate.

(B) Payment Date:

- (1) If this Attachment License Agreement becomes effective on or prior to June 30, all attachment and occupancy fees for the remainder of that first partial calendar year shall be due and payable at the time required under Appendix I of Licensor's Attachment Application Procedures .
 - (2) If an Attachment License Agreement becomes effective on or after July 1, all attachment and occupancy fees for the remainder of that current partial calendar year as well as the full upcoming calendar year shall be payable at the time required under Appendix I of Licensor's Attachment Application Procedures.
 - (3) On an annual basis, all attachment and occupancy fees not previously paid are to be paid in advance, on the 31st day of January of each year or within 30 days of receipt of invoice. Failure to pay such fees within 30 days of the annual due date shall constitute a Material Default of this Agreement.
- (C) Termination of License:
- (1) Upon termination or surrender of a license granted hereunder, no refund of any attachment or occupancy fee shall be made.

17.04 OTHER CHARGES:

- (A) Computation:
- (1) All charges for inspections, engineering, or rearrangements of Licensee's facilities from Licensor's poles or conduit and, without limitation, any other work performed for Licensee shall be based upon the full cost and expense, including reasonable overhead, to Licensor for performing such work for Licensee. The cost to Licensee shall be determined in accordance with the regular and customary methods used by Licensor in determining such costs.
 - (2) The charge for replacement of poles shall include the entire non-betterment cost to Licensor including the increased cost of larger poles, sacrificed life value of the poles removed, cost of removal, less any salvage recovery and the cost of transferring Licensor's facilities from the old to the new poles.
 - (3) All other attachment or occupancy related inquiry, verification, application, administrative and miscellaneous rates, fees and charges shall be calculated and paid in accordance with APPENDIX I and/or Licensor's Attachment Application Procedures and Attachments thereto.
- (B) Payment Date:
- (1) All bills for such other charges for work performed by Licensor shall be payable upon presentment to Licensee, and shall be deemed delinquent if not paid within 30 days after presentment to Licensee.

18.0 DISPUTE RESOLUTION

18.01 Except in the case of:

- (A) A suit, action, or proceeding by one Party to compel the other Party to comply with its obligation to indemnify the other Party pursuant to this Agreement, or

- (B) A suit, action or proceeding to compel either Party to comply with the dispute resolution procedures set forth in this section, the Parties agree to use the following procedure to resolve any dispute, controversy, or claim arising out of or relating to this Agreement or its breach.
- 18.02 At the written request of a Party, each Party shall designate a knowledgeable, responsible representative to meet and negotiate in good faith to resolve any dispute, controversy, or claim arising under this Agreement. The Parties intend that these negotiations be conducted by non-lawyer, business representatives. The substance of the negotiations shall be left to the discretion of the representatives. Upon mutual agreement, the representatives may utilize other alternative nonbinding dispute resolution procedures such as mediation to assist in the negotiations. Discussions and correspondence between the representatives for the purposes of these negotiations shall be treated as confidential, undertaken for purposes of settlement, shall be exempt from discovery and production, and shall not be admissible in any subsequent proceeding without the concurrence of all Parties. Documents identified in or provided during such negotiations, which are not prepared for purposes of the negotiations, shall not be so exempt and may, if otherwise admissible, be admitted as evidence in any subsequent proceeding.
- 18.03 If a resolution of the dispute, controversy or claim is not reached within ninety days of the initial written request referred to in 18.02, the dispute, controversy, or claim may be filed with the State Public Service Commission for review and determination, provided the party invoking the Commission's intervention process has in good faith negotiated, or attempted to negotiate, with the other Party pursuant to 18.02.
- 18.04 Each Party shall bear its own costs, including attorneys' fee, incurred in connection with any of the foregoing procedures. A Party-seeking discovery shall reimburse the responding Party the cost of reproducing documents (to include search time and reproduction time costs).

19.0 ENTIRE AGREEMENT

- 19.01 This Agreement and Licensor's related Attachment Application Procedures cancels and supersedes all previous agreements whether written or oral, except for any sums due thereunder, between Licensor and Licensee with respect to the attachment of Licensee's cable, equipment, and facilities to Licensor's poles or the placing Licensee's cable, equipment or facilities in Licensor's conduit system or right-of-way; and there are no other provisions, terms or conditions to this Agreement except as expressed herein. All currently effective licenses heretofore granted pursuant to such previous agreements shall continue in effect subject to the terms and conditions of this Agreement.
- 19.02 The terms and conditions of this Agreement supersede all prior oral or written understandings between the Parties and constitute the entire Agreement between them concerning the subject matter of this Agreement. There are no understandings or representations, express or implied, not expressly set forth in this Agreement or in Licensor's related Attachment Application Procedures. This Agreement shall not be modified or amended except by writing signed by the Party to be charged. **This Agreement is only for pole /occupancy applications submitted for the properties owned and operated by Windstream Kentucky East, LLC, in the State of Kentucky. This agreement does NOT apply to any other Windstream owned properties. Separate agreements must be requested for each Windstream Operating Company and for Interconnection Access to Central Offices.**

GENERAL OPERATING ROUTINE

20.0 ATTACHMENT, USE AND/OR OCCUPANCY REQUEST PROCESS

20.01 There is a multi-step pole attachment or duct, innerduct, conduit or right-of-way use and/or occupancy application process and fee determination process that the Licensee may begin upon the execution of this Agreement. It is set forth below and in Licensor's related Attachment Application Procedures.

21.0 POLE ATTACHMENT REQUESTS (PAR)

21.01 **The steps for normal size jobs pursuant to the FCC guidelines are:**

- A. Pole Attachment Quote Preparation: Licensee shall submit a Pole Attachment Request Application (Exhibit B to Licensor's Attachment Application Procedures) (which may be reasonably revised from time to time by Licensor at its sole discretion) to Licensor which will include a drawing of the proposed route and contact information (name, telephone, facsimile, and email information), and all required fees, as listed in and computed in accordance with APPENDIX I. (Fees may be changed from time to time by Licensor to remain consistent with prevailing costs.) When Licensor receives the aforementioned specific attachment information and fee, if required, from Licensee, the following schedule will commence pursuant to the FCC requirements set forth in the April 7, 2011 Report and Order and Order on Reconsideration. If during this process, Licensor determines any lawful reason for denying Licensee's application, Licensor will so inform Licensee.
 - A1. Stage 1: Survey. During the 45-day survey phase, Licensor will conduct an engineering study to determine whether and where attachment is feasible, and what make-ready is required.
 - A2. Stage 2: Estimate. Licensor will provide an estimate of the make-ready charges within 14 days of receiving the results of the engineering survey.
 - A3. Stage 3: Licensee Acceptance. Licensee has up to 14 days to approve the estimate and provide payment. If project is declined by the licensee, Licensee will be billed any costs incurred to date.
 - A4. Stage 4: Make-Ready. Licensor will notify any attachers with facilities already on the pole that make-ready for the licensee needs to be performed within 60 days. Wireless attachments above the communications space will have a longer make-ready period of 90 days. Upon notice to Licensee, Licensor may take 15 additional days after the make-ready period runs to complete make-ready itself.

21.02 Upon completion of the make-ready work, the receipt of all payments and fees, and the signing of this Agreement, an "Approved" Exhibit B or such other Windstream Permit form currently used shall be returned to the Licensee. At that time Licensee will be considered to have been granted a License with respect to the poles approved in the PARON and may attach to Licensor's facilities.

21.03 **The steps for larger order jobs pursuant to the FCC guidelines are:**

- A. Pole Attachment Quote Preparation: Licensee shall submit a Pole Attachment Request Application (Exhibit B to Licensor's Attachment Application Procedures), (which may be reasonably revised from time to time by Licensor at its sole discretion) to Licensor which will include a drawing of the

proposed route and contact information (name, telephone, facsimile, and email information), and all required fees, as listed in and computed in accordance with APPENDIX I, (Fees may be changed from time to time by Licensor to remain consistent with prevailing costs.) When Licensor receives the aforementioned specific attachment information and fee, if required, from Licensee, the following schedule will commence pursuant to the FCC requirements set forth in the April 7, 2011 Report and Order and Order on Reconsideration. If during this process, Licensor determines any lawful reason for denying Licensee's application, Licensor will so inform Licensee.

- A1. Stage 1: Survey. During the 60-day survey phase, the Licensor conducts an engineering study to determine whether and where attachment is feasible, and what make-ready is required.
- A2. Stage 2: Estimate. Licensor provides an estimate of the make-ready charges within 14 days of receiving the results of the engineering survey.
- A3. Stage 3: Licensee Acceptance. The Licensee has up to 14 days to approve the estimate and provide payment. If project is declined, Licensee will be billed any costs incurred to date.
- A4. Stage 4: Make-Ready. Licensor will notify any attachers with facilities already on the pole that make-ready for the licensee needs to be performed within 105 days. Wireless attachments above the communications space will have a longer make-ready period of 135 days. Upon notice to the Licensee, Licensor may take 15 additional days after the make-ready period runs to complete make-ready itself.

21.04 Upon completion of the make-ready work, the receipt of all payments and fees, and the signing of this Agreement, an "Approved" Exhibit B or such other Windstream Permit form currently used shall be returned to the Licensee. At that time Licensee will be considered to have been granted a License with respect to the poles approved in the PARON and may attach to Licensor's facilities.

21.05 **Timeframes** for orders greater than 3,000 poles shall be negotiated by the parties.

22.0 SURVEYS AND INSPECTIONS OF LICENSEE'S FACILITIES

22.01 Licensor reserves the right to inspect each new installation or work operation of Licensee on or within Licensor's facilities. The making of inspections or the failure to make inspections shall not relieve Licensee of any responsibility, obligation or liability imposed by this Agreement.

23.0 ISSUANCE OF LICENSES

23.01 Before Licensee shall have a right to attach to any pole of Licensor, Licensee shall make application for and receive a revocable, nonexclusive license therefore in the form of an approved Application for Pole License (APPENDIX VI and Exhibit B to Licensor's related Attachment Application Procedures).

23.02 Before Licensee shall have the right to place any cable, equipment or facilities within any conduit system or right-of-way of Licensor, Licensee shall make application for an receive a revocable, nonexclusive license therefore in the form of an approved Application for Conduit or Right-of-Way License (APPENDIX IV and Exhibit B to Licensor's related Attachment Application Procedures), hereto attached and made a part hereof.

23.03 Any license granted hereunder for attachment to Licensor's poles shall terminate without further notice to Licensee as to individual poles covered by the license to which Licensee has not attached within ninety (90) days from the date that Licensor has notified Licensee that such poles are available for attachment of the operating facilities of Licensee, unless Licensor, in the exercise of its sole discretion, agrees to extend said period at the request of Licensee.

23.05 Any license granted hereunder for placement of Licensee's facilities in Licensor's conduit system shall terminate without further notice to Licensee as to individual sections of Licensor's conduit system covered by the license in which Licensee has not placed its facilities within ninety (90) days from the date that Licensor has notified Licensee that such sections of the conduit system are available for the placement of operating facilities of Licensee, unless Licensor, in the exercise of its sole discretion, agrees to extend said period at the request of Licensee.

24.0 AUTHORITY TO PLACE ATTACHMENTS

24.01 Before any attachments or placement of facilities Licensee shall submit evidence that Licensee has the authority to maintain Attachments within public rights-of-way or on private right-of-way or on private property. Licensee shall be solely responsible for obtaining all licenses, authorizations, permits and consents from federal, state and local authorities or private land owners that may be required to place and maintain facilities on Licensor's poles or within Licensor's conduit, duct or right-of-way.

25.0 NOTICES (OF MODIFICATION OR ALTERATION OF POLES)

25.01 In the event Licensor plans to modify or alter any Licensor Poles upon which Licensee has placed Attachments, Licensor, except in emergency situations, shall provide Licensee written notice of the proposed modification or alteration at least ninety (90) business days prior to the time the proposed modification or alteration is scheduled to take place. Should Licensee decide to modify or alter Licensee's Facilities on Poles, Licensee shall so notify Licensor in writing at least ninety (90) business days prior to the day the work is to begin. In such event, Licensee shall bear a proportionate share of the total costs incurred by Licensor to make Licensor Poles accessible. Licensee's proportionate share of the total cost shall be based on the ratio of the amount of new space occupied by Licensee to the total amount of new space occupied by all of the parties joining in the modification. Licensee is not responsible for any costs of Licensor's modifications or alterations of its Poles.

25.02 In the event Licensor is required to move the location of, or replace, any Licensor Pole(s) for reasons beyond its control, Licensee concurrently shall relocate Licensee's Attachments. Licensee shall be solely responsible for the costs of the relocation of Licensee's Attachments. When it is mutually agreed that it is in the best interest of Licensor and Licensee, Licensor will, after proper notification has been provided, transfer Licensee's Attachments at the same time that Licensor transfers its Attachments. The rate charged for these transfers is listed in this Agreement (APPENDIX I). The rate for transfers may be adjusted by Licensor from time to time to remain consistent with prevailing costs.

25.03 Notices under this Agreement may be given and shall be deemed to have been given, by posting the same in first class mail to Licensee as follows:

26.0 REQUIREMENTS AND SPECIFICATIONS FOR ATTACHMENT TO POLES

26.01 Licensee's cables, equipment, and facilities shall be placed and maintained in accordance with the requirements and specifications attached hereto and as set forth in Licensor's related Attachment Application Procedures and made a part hereof, and in accordance with the requirements and specifications of the National Electric Safety Code (most recent edition) and the National Electric Code (most recent edition), and in compliance with any other rules or orders now in effect or that may hereafter be issued by any state utility commission or other authority having jurisdiction.

27.0 PLACEMENT OF ATTACHMENTS

- 27.01 Licensee shall, at its own expense, place and maintain and replace its Attachments on Licensor's Poles in accordance with:
- (A) Such reasonable requirements and specifications as Licensor shall from time to time prescribe in writing in Licensor's Attachment Application Procedures or otherwise,
 - (B) In compliance with any rules or orders now in effect or that hereafter may be issued by any regulatory agency or other authority having jurisdiction, and
 - (C) All currently applicable requirements and specifications of the National Electrical Safety Code, National Electric Code, most current edition or any amendment or revision of said Code. Licensee agrees to comply, at its sole risk and expense, with all specifications hereto, as may be revised from time to time by Licensor. Licensor will provide supervision at Licensee's expense if Licensor believes it is required.
- 27.02 Licensee's Facilities shall be tagged at maximum intervals of 300 feet so as to identify Licensee as the owner of the Facility. The tags shall be of sufficient size and lettering so as to be easily read from ground level.

28.0 MODIFICATIONS, ADDITIONS OR POLE REPLACEMENTS AND REARRANGEMENTS

- 28.01 Licensee shall not modify, add to, or replace facilities on any pre-existing Attachment on an Licensor Pole without first notifying Licensor in writing of the intended modification, addition or replacement at least thirty (30) business days prior to the date the activity is scheduled to begin. The required notification shall include:
- (A) The date the activity is scheduled to begin,
 - (B) A description of the planned modification, addition, or replacement,
 - (C) A representation that the modification, addition, or replacement will not require any space other than the space previously designated for Licensee's Attachments, and

- (D) A representation that the modification, addition, or replacement will not impair the structural integrity of the Poles involved.
- 28.02 Should Licensor determine that the modification, addition, or replacement specified by Licensee in its notice will require more space than that allocated to Licensee or will require the rearrangements of, reinforcement of, replacement of, or an addition of support equipment to the Poles involved in order to accommodate Licensee's modification, addition, or replacement, Licensor will so notify Licensee, whereupon Licensee will be required to submit a PAR in compliance with this Agreement in order to obtain authorization for the modification, addition, or replacement of its Attachments.
- 28.03 Should Licensee request Licensor to expand capacity or purchase additional plant, Licensee agrees to pay all reasonable costs. If Licensor or another party that has been granted a license joins in the request and will benefit from the expansion or purchase, Licensee agrees to pay a percentage of all costs proportionate to Licensee's share of the benefit received from the expansion or purchase.
- 28.04 When multiple applications, including application of Licensee, are received by Licensor with respect to any pole which must be replaced or rearranged to provide additional space prior to commencement of the work on that pole a Transfer Attachment Fee may be charged. Licensor will equitably prorate to the extent that it is practical between Licensee and other applicants for the pole space, the common expenses of engineering, rearrangement, and replacement, if any, which result from the processing of multiple applications. Licensee shall be bound by Licensor's determination as to any such pro-ration of Transfer Attachment Fee to Licensee.

29.0 UNAUTHORIZED ATTACHMENTS

- 29.01 If any cable, equipment or facilities of Licensee shall be found on a pole or within a conduit or right-of-way for which no license is outstanding, Licensor, without prejudice to its other rights or remedies under this Agreement or otherwise, may:
 - (A) Impose a charge, and
 - (B) Require Licensee to remove such cable, equipment or facilities forthwith or Licensor may remove them without liability and the expense of removal shall be borne by Licensee. For the purpose of determining the charge, Licensee shall pay liquidated damages that will not exceed an amount equal to the annual pole attachment fee for the number of years the unauthorized attachments have existed (or, if that cannot be determined, the number of years since the most recent inventory or five years, whichever is less), plus interest at a rate set for that period by the IRS for individual underpayments pursuant to Section 6621 of the IRS Code. Any such charge imposed by Licensor shall be in addition to its rights to any other sums due and payable, including without limitation the actual costs of any audit or survey which established the existence of the unauthorized attachments and to any claims to said fees or said unlicensed use shall be deemed as a ratification or the licensing of the unlicensed use, and if any license should subsequently be issued, after application and payment of the application fee therefore, said license shall not operate retroactively or constitute a waiver by Licensor of any of its rights or privileges under this Agreement or otherwise.
- 29.02 For purposes of this section, an unauthorized Attachment shall include, but not limited to:

- (A) An Attachment to a Pole which is not identified in any PARON (APPENDIX VI) issued in accordance with this Agreement;
 - (B) An Attachment that occupies more space than that allocated to Licensee By Licensor;
 - (C) An attachment that is not placed in accordance with the provisions of this Agreement or the appropriate PARON (APPENDIX VI) issued pursuant to this Agreement, unless Licensee can demonstrate to Licensor's reasonable satisfaction that said misplacement is not due to any act or omission of Licensee or Licensee's agents;
 - (D) An addition or modification by Licensee to its pre-existing Attachment(s) that impairs the structural integrity of the involved Licensor Pole(s).
 - (E) An Attachment that consists of facilities owned or controlled by, and for the use of a Party other than Licensee.
- 29.03 Once Licensor has notified Licensee of an unauthorized attachment. Licensee can submit a PAR to request an authorized attachment. A PAR submitted per this provision will be treated like any other PAR subject to this Agreement. Licensee will be responsible for all fees associated with a PAR (as identified in this Agreement). If a PAR is not received by Licensor within ten (10) business days of Licensee's receipt of an unauthorized attachment notification, Licensee has sixty (60) business days from the date of its receipt of the initial unauthorized attachment notification to vacate the Pole.

30.0 FAILURE TO PLACE ATTACHMENTS

- 30.01 Once Licensee has been issued a PARON (APPENDIX VI), Licensee shall have ninety (90) calendar days from the date of the PARON (APPENDIX VI) to begin the placement of its Attachments on the Licensor Poles covered by the PARON (APPENDIX VI). If Licensee has not begun placing its Attachments within that ninety-(90) calendar day period, Licensee shall so advise Licensor with a written explanation for the delay. If Licensee fails to advise Licensor of its delay, with a written explanation therefore, or if Licensee fails to act in good faith by not making a bona fide effort to begin placing its Attachments within the ninety (90) calendar days prescribed by this section, the previously issued PARON (APPENDIX VI) shall be deemed rescinded by Licensor and Licensee shall have no further right to place Attachments pursuant to that PARON (APPENDIX VI).

31.0 OCCUPANCY OF CONDUIT SYSTEM

- 31.01 When Licensee submits an application for a license to place its cables, equipment, and facilities in the conduit system of Licensor, Licensor will advise Licensee of the availability of conduit space in accordance with Licensor's Attachment Application Procedures. In determining the availability of space in Licensor's conduit system, Licensor reserves the right to deny the granting of a license for any non-discriminatory lawful reason, including without limitation, insufficient capacity or reasons of safety, reliability and generally applicable engineering purposes. If conduit space is available, a license to occupy a portion of conduit system will be granted to Licensee, provided, however, that Licensor does not warrant the condition of such conduit system.
- 31.02 Licensor reserves the right to exclude cable, equipment, and facilities of Licensee from Licensor's conduit system, or to limit the type, number and size of Licensee's cable, equipment, and facilities which may be placed in any of Licensor's manholes.

32.0 OCCUPANCY OF RIGHT-OF-WAY

- 32.01 Licensor and Licensee agree that neither party has the right to restrict or interfere with the other party's lawful access to and use of public right-of-way, including public right-of-way, which pass over property owned by either party. Except as otherwise specifically provided in this Agreement, Licensor and Licensee shall each be responsible for obtaining their own right-of-way and permission to use real or personal property owned or controlled by any governmental body.
- 32.02 In the event that Licensee desires to occupy right-of-way owned or controlled by Licensor, Licensor may require Licensee to make an application to do so by the terms of this Agreement. Licensor reserves the right to determine whether granting a license would adversely affect its common carrier communication services and its ability to meet its duties and obligation with respect thereto, including questions of economy, safety, and future need of Licensor.
- 32.03 Licensor may, without incurring any liability, remove the cables, equipment, and facilities of Licensee from Licensor's right-of-way, at Licensee's expense where in Licensor's judgement (such judgement to be conclusive) such removal is required in connection with the performance of Licensor's service obligation or the safety of Licensor's employees. Whenever such removal has been made, Licensee will be promptly notified.

33.0 CONSTRUCTION AND MAINTENANCE OF FACILITIES

- 33.01 Licensee shall, at its own expense, make and maintain its pole attachments in a safe condition and in thorough repair, and in a manner reasonably acceptable to Licensor, and so as not to conflict with the use of said poles by Licensor or by other authorized users of said poles, or interfere with other facilities thereon or which may from time to time be placed thereon. Licensee shall, at its own expense, upon written notice from Licensor, relocate or replace its facilities placed on said poles, or transfer them to substituted poles, or perform any other work in connection with said facilities that may be required. Licensor shall give such written notice as is reasonable in the circumstances, provided, however, that in cases of emergency, (Licensor's judgment as to what constitutes an emergency to be conclusive) Licensor may arrange to relocate, remove or replace the attachments placed on said poles by Licensee, transfer them to substituted poles or perform any other work in connection with said facilities that may be required in the maintenance, replacement, removal or relocation of said poles or of the facilities thereon or which may be placed thereon, or for the service needs of Licensor, and Licensee shall reimburse Licensor for the expense thereby incurred. Attachments of Licensee to poles of Licensor, as mentioned herein shall be understood to include attachments of Licensee in space reserved for Licensor, or space which Licensor has the right to use, on poles of other companies with which Licensor now has or may hereafter have agreements for joint use and occupancy; and the use of such space by Licensee shall be subject to the terms and conditions of the agreements between Licensor and said other companies. Such authorization will not be unreasonably withheld.
- 33.02 Licensee's cable, equipment, and facilities shall be placed in, removed from, relocated in or maintained in Licensor's conduit system only when specific authorization for the work to be performed and approval of the person, firm or corporation selected by Licensee to perform the work, has been obtained in writing in advance from Licensor. Licensor retains the right to specify what, if any work shall be performed by Licensee. Such authorization will not be unreasonably withheld

- 33.03 In each instance where Licensee's cable, equipment, and facilities are to be placed in Licensor's conduit system, Licensor shall specify, among other things, the cable configuration and location of Licensee's cable, equipment, and facilities, the particular duct of the conduit system such cable will occupy, and the location where and manner in which Licensee's cable will enter and exit Licensor's conduit system.
- 33.04 Licensor's manholes shall be opened as reasonably permitted by Licensor's authorized employees or agents. Licensee shall be responsible for obtaining any necessary permits from appropriate governmental authorities to open manholes and to conduct the work operations. Licensee's employees or agents will be permitted to enter or work in Licensor's manholes only when an authorized agent or employee of Licensor is present except as provided in the next paragraph. Licensor's said agent or employee shall have the authority to terminate Licensee's work operations in and around Licensor's manholes if, in the sole discretion of said agent or employee, any hazardous conditions arise or any unsafe practices are being followed by Licensee's employees or agents. Licensee agrees to pay, in accordance with the terms and conditions of APPENDIX I, the full cost of having Licensor's agent or employee present when Licensee's work is being done in Licensor's manholes. The presence of Licensor's authorized agent or employee shall not relieve Licensee of its responsibility to conduct all of its work operations in and around Licensor's manholes in a safe and workmanlike manner. Licensee is responsible for all signage, traffic control, equipment, and personnel necessary to work in Licensor's manholes. All work shall meet Occupational Safety and Health Act (OSHA), and any local or state standards and requirements.
- 33.05 Licensee's employees will be permitted to enter or work in Licensor's manholes and conduit system without an authorized agent or employee of Licensor being present, provided that Licensee's work consists only of routine operations of testing, adjusting, regulating or inspecting Licensee's existing facilities and does not involve any placing, removing, changing or rearranging of Licensee's or Licensor's facilities. In such cases, Licensee shall notify Licensor's designated representative in advance of Licensee's operations as to the type of work to be performed, the time at which it is to be performed and where it is to take place. Licensee shall conduct all such work operation in a safe and workmanlike manner, and in accordance with the terms of this Agreement.
- 33.06 Licensee shall, at its own expense, maintain its buried communication facilities so as not to conflict with the use of the right-of-way by Licensor or other authorized users of the right-of-way. Licensee shall, at its own expense, relocate, change, or replace its facilities or perform any other work in connection with said facilities that may be reasonably required by Licensor or other authorities.

34.0 TERMINATION OF LICENSES

- 34.01 Upon notice from Licensor to Licensee that Licensor has been advised by governmental authority or private property owners that the use of any pole, conduit system, or right-of-way is not authorized and is objected to by such governmental authority or private property owner, as the case may be or that any pole, any conduit system or any right-of-way is to be removed, sold or otherwise disposed of, Licensee shall, if reasonably requested by Licensor, remove its cables, equipment, and facilities at once from the affected pole or poles or shall make arrangements for the removal of its cable, equipment, and facilities from the affected portion of Licensor's conduit system or right-of-way at Licensor's expense. If not so removed, Licensor shall have the right to remove Licensee's cable, equipment, and facilities from Licensor's right-of-way at the cost and expense of Licensee and without any liability thereto. If Licensor deems it is impractical to remove Licensee's cables, equipment or facilities from any right-of-way, they may be abandoned in place.
- 34.02 Licensee may at any time remove its facilities from any pole of Licensor, but shall immediately give Licensor written notice of such removal and surrender of license in the form of a Notification of

Surrender (APPENDIX VII) hereto attached and made a part hereof. If Licensee surrenders its license but fails to remove its facilities from Licensor's poles, Licensor shall have the right to remove Licensee's facilities at Licensee's expense without any liability on the part of Licensor for damage or injury to Licensee's facilities. In the event that Licensee's cables, equipment, and facilities shall be removed from any pole as provided by this Agreement, no attachment shall again be made to such pole unless Licensee shall have first complied with all of the provisions of this Agreement as though no attachment had previously been made.

34.03 If Licensee desires to terminate its license for the right to occupy any part of Licensor's conduit system, Licensee shall give Licensor written notice of such surrender in the form of a Notification of Surrender (APPENDIX VII) hereto attached and made a part hereof. In such event, Licensee shall make arrangements with Licensor for the removal of Licensee's cables, equipment, and facilities from that part of Licensor's conduit system at Licensee's expense. In the event that Licensee's cables, equipment, and facilities shall be removed from Licensor's conduit system as provided by this Article, no cable, facilities or equipment shall again be placed in that part of such conduit system unless Licensee shall have first complied with all of the provisions of this Agreement as though no cables, equipment, and facilities of Licensee had previously been placed in that part of Licensor's conduit system.

34.04 If Licensee desires to terminate its license for the right to occupy any part of the right-of-way, Licensee shall give Licensor written notice of such surrender in the form of a Notification of Surrender (APPENDIX VII) attached hereto and made a part hereof. In such event, Licensee shall make arrangements with Licensor for the removal of Licensee's cables, equipment, and facilities from that part of the right-of-way at Licensee's expense. However, in the event it is impractical to remove Licensee's cable, equipment, and facilities from any right-of-way, they may be abandoned in place.

35.0 EMERGENCY RESTORATION PROCEDURES

35.01 In the event of an emergency, restoration procedures may be affected by the presence of Licensee's Attachments. While Licensor shall not be responsible for the repair of damaged Attachments of Licensee (except by mutual written agreement), Licensor shall nonetheless control access to its poles, conduit systems or right-of-way if the restoration is to be achieved in an orderly fashion.

35.02 Where Licensor and Licensee are involved in emergency restorations, access to Licensor's poles, conduit systems or right-of-way will be controlled by Licensor's Network Construction Managers or their on-site representative according to the following guidelines.

(A) Service Disruptions/Outages

- (1) While exercising its right to first access, Licensor shall make all reasonable efforts to grant access to as many other entities with Attachments as is reasonably safe.
- (2) Where simultaneous access is not possible, Licensor will grant access on first come, first served basis.

(B) Service Affecting Emergencies

- (1) While exercising its right to first access, Licensor shall make all reasonable efforts to grant access to as many other entities with Attachments as is reasonably safe.

- (2) Where Licensor is unable to grant simultaneous access to all other entities with Attachments, access will be granted according to the level of damage to the Attachments of each entity and the likelihood that a given level of damage will result in service disruption. Where the likelihood that a service disruption will result is not clearly discernible, access will be on a first come, first served basis.
- 35.03 Without limiting any other indemnification or hold harmless provisions of this Agreement, Licensee agrees that any decision by Licensor regarding access to Attachments, or any action or failure to act by Licensor, under this section shall not be the basis for any claim by Licensee against Licensor for any damage to Licensee's Attachments or disruption of Licensee's services, or any other direct or indirect damages of any kind whatsoever incurred by Licensee.

36.0 ABANDONMENT

- 36.01 Nothing in this Agreement shall prevent or be construed to prevent Licensor from abandoning, selling, assigning, or otherwise disposing of any poles, conduit systems or other Licensor property used for Licensee's Attachments; provided, however, that Licensor shall condition any such sale, assignment, or other disposition subject to the rights granted to Licensee pursuant to this Agreement. Licensor shall promptly notify Licensee of any proposed sale, assignment, or other disposition of any poles, conduit systems or other Licensor property used for Licensee's Attachments.

INTENTIONALLY LEFT BLANK

37.0 SIGNATURE

IN WITNESS WHEREOF, the parties hereto have executed this Agreement in duplicate.

LICENSOR PROPRIETARY INFORMATION – NOT FOR PUBLIC DISCLOSURE

AGREEMENT TERMS AND CONDITIONS

1.0 SCOPE OF AGREEMENT

- 1.01 The purpose of this Agreement is to set forth the rates, terms, conditions, and procedures under which the Licensor will provide Licensee access to Licensor's poles, ducts, innerducts, conduits, and rights-of-way.
- 1.02 Subject to the provisions of this Agreement, Licensor will issue to Licensee for any lawful communications purpose, revocable, nonexclusive licenses authorizing the attachment of Licensee's cables, equipment, and facilities to Licensor's poles or the placing of Licensee's cables, equipment, and facilities in Licensor's conduit system or within right-of-way owned or controlled by Licensor.
- 1.03 No use, however extended, of Licensor's poles, conduit system or right-of-way nor payment of any fees or charges required under this Agreement shall create or vest in Licensee any ownership or property rights in said poles, conduit system or right-of-way, but Licensee's rights therein shall be and remain a mere license. Nothing herein contained shall be construed to compel Licensor to construct, retain, extend, place, or maintain any facilities not needed for its own service requirements, unless otherwise required by law.
- 1.04 Licensee recognizes that Licensor has heretofore entered into, or may in the future enter into, agreements and arrangements with others which are not party to this Agreement regarding the poles, conduit system and right-of-way covered by this Agreement. Nothing herein contained shall be construed as a limitation, restriction or prohibition against Licensor with respect to such other agreements or arrangements. The rights of Licensee shall at all times be subject to any present or future joint use arrangement between Licensor and any other public utility or government agency.

2.0 DEFINITIONS

- 2.01 "Attachments" - Any attachment to a pole, use of a duct or innerduct, use of a conduit, or using right-of-way owned or controlled by Licensor.
- 2.02 "Attachment Fee" - Fee paid annually per attachment on a pole, or in a duct, innerduct, conduit, or right-of-way.
- 2.03 "Buried Cable" - Cable located below the surface of the ground but not in Licensor's conduit system.
- 2.04 "Conduit System" - Any combination of ducts, innerducts, conduits, manholes, and handholes owned or controlled by Licensor that is a reusable passage or opening in, on, under or through the ground, or a structure such as a building or bridge. The term includes "inner ducts" created by subdividing a duct into smaller channels.

2.05 "Hazardous Materials" -

- (A) Any substance, material or waste now or hereafter defined or characterized as hazardous, toxic or dangerous as defined by the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA") of 1980, as amended, and other federal, state, and local health, safety, and environmental laws, ordinances, statutes, and rules, including but not limited to the Occupational Safety and Health Act ("OSHA").
- (B) Any substance, material or waste now or hereafter classified as a contaminant or pollutant under any law, rules, ordinance, or authority.
- (C) Any other substance, material or waste, the manufacture, processing, distribution, use, treatment, storage, placement, disposal, removal or transportation of which is now or hereafter subject to regulation under any law, ordinance, statute, rule or regulation of any governmental body or authority.

2.06 "Make Ready Work" - All work to prepare Licensor's poles, ducts, innerducts, conduits, rights-of-way, and related facilities for the requested occupancy or attachment of Licensee's facilities but not the actual placement of attachments or administrative activities related to inquiries, verifications, requests or applications.

2.07 "Poles"- Licensor owned and poles owned by others to the extent that and for so long as Licensor has the right to permit others to be attached in the communications space.

2.08 "Pole Attachment Request" or "PAR" - A written request from Licensee to attach its facilities to Poles, submitted in accordance with this Agreement. With respect to pole attachment agreements in effect prior to the date the Parties executed this Agreement, the term PAR shall be deemed to include Pole attachment requests made by letter or similar document.

2.09 "Right-of-Way" - Right-of-way owned or controlled by Licensor. It does not include attachment or use of cables, poles, equipment or facilities located on a particular right-of-way. It may include private easement, or in certain instances public right-of-way granted by a governmental authority or a utility easement such as in a subdivision or development.

3.0 TERM OF AGREEMENT

3.01 This Agreement shall become effective upon its execution and if not terminated in accordance with the provisions of other Articles hereof, shall continue in effect for a term of not less than three (3) years, provided, however, that at any time after the first year of said term the rates, fees and charges set forth may be increased or decreased by written notice from Licensor to Licensee on a nondiscriminatory basis with respect to similar rates, fees and charges of other similar licensees.

3.02 Either Party may terminate this Agreement with at least a (6) six month written notice to the other Party.

3.03 Upon termination of the Agreement in accordance with any of its terms, all outstanding licenses in connection therewith shall terminate and shall be surrendered and Licensee shall within 60 days of date of termination remove all cables, equipment and facilities at the cost and expense of Licensee. If Licensor in its sole discretion, deems it is impractical to remove Licensee's cable, equipment and facilities from Licensor's rights-of-way, they may be abandoned in place.

LICENSOR PROPRIETARY INFORMATION – NOT FOR PUBLIC DISCLOSURE

4.0 LEGAL AUTHORITY

- 4.01 Licensee will obtain from public authorities and private owners of property any and all permits, franchises, licenses and grants necessary for the lawful exercise of any license granted hereunder

5.0 APPLICABLE LAW

- 5.01 This Agreement, and the rights and obligations contained in it, shall be governed and construed under the laws of the state in which the attachments hereunder are to be located.

6.0 SUBSEQUENT LAW

- 6.01 The terms and conditions of this Agreement shall be subject to any and all applicable laws, rules, regulations or guidelines now in effect and that subsequently may be prescribed by any federal, state or local governmental authority. To the extent required by any such subsequently prescribed law, rule, regulation or guideline, the Parties agree to modify, in writing, the affected term(s) and conditions(s) of this Agreement to bring them into compliance with such law, rule, regulation or guideline. Should any term of this Agreement be determined by a court or agency with competent jurisdiction to be unenforceable, all other terms of this Agreement shall remain in full force and effect.

7.0 DISCLAIMER OF WARRANTIES

- 7.01 Except as specifically set forth in this Agreement, Licensor makes no warranties, express or implied, including, but not limited to, any implied warranties of merchantability or fitness for a particular purpose.

8.0 LICENSE NOT EXCLUSIVE

- 8.01 Nothing herein contained shall be construed as a grant of any exclusive license, right or privilege to Licensee. Licensor shall have the right to grant, renew and extend rights and privileges to others not parties to this Agreement, by contract or otherwise, to use any poles, conduit system or right-of-way covered by this Agreement, under such terms and conditions, as Licensor shall prescribe.

9.0 ASSIGNMENT OF RIGHTS

- 9.01 Licensee shall not assign; transfer or sublet the privileges hereby granted, or sell, lease or otherwise permit the use of its facilities on or any part thereof (all of the foregoing being "Transfers"), without prior consent in writing of Licensor which consent shall not be unreasonably withheld, delayed or conditioned; provided, however, that either Party may so Transfer its rights and obligations under this Agreement without such consent to (i) any entity said Party, directly or indirectly, controls, is controlled by or is under common control with or (ii) any entity acquiring all or substantially all of said Party's assets or equity, by providing written notice to the other Party of such Transfer. Any attempted Transfer that is not permitted under this Section 9.01 is void *ab initio*.
- 9.02 Subject to the provisions of this Agreement, this Agreement shall extend to and bind the successors and authorized assigns of the Parties hereto.

LICENSOR PROPRIETARY INFORMATION – NOT FOR PUBLIC DISCLOSURE

10.0 LIABILITY AND DAMAGES

- 10.01 Licensor reserves to itself, its successors and assigns, the right to maintain its poles, conduit system and right-of-way and to operate its facilities thereon in such manner as will best enable it to fulfill its own service requirements. Licensor shall not be liable to Licensee for any interruption to service of Licensee or for interference with the operation of the cables, equipment or facilities of Licensee arising in any manner out of the use of Licensor's poles, conduit system and right-of-way except caused by Licensor's sole negligence, willful misconduct or material breach of this Agreement, in which case Licensor's liability shall be limited to the reasonable cost of repair of Licensee's damaged cable, equipment or facilities, if any.
- 10.02 Licensee shall exercise special precautions to avoid damaging the cables, poles, conduits, right-of-way equipment and facilities of Licensor and of other licenses and hereby assumes all responsibility for any and all loss, damages, costs and expenses. Licensee shall make an immediate report to Licensor of the occurrence of any such damage and hereby agrees to reimburse the respective owners for the expense incurred in making repairs.
- 10.03 Licensee shall indemnify and hold harmless Licensor against any and all claims, demands, causes of action, damages, costs or liabilities of every kind and nature whatsoever, except to the extent caused by Licensor's negligence or willful misconduct, which may arise out of or be caused by:
- (A) The erection, maintenance, presence, use or removal of Licensee's cable, equipment, and facilities on Licensor's poles, and within Licensor's conduit system and right-of-way
 - (B) Any act of Licensee on or in the vicinity of Licensor's poles, conduit system and right-of-way, or
 - (C) Any interruption, discontinuance, or interference with Licensee's service to any of its subscribers occasioned or claimed to have been occasioned by any action of Licensor pursuant to or consistent with this Agreement. Licensee shall, upon demand and at its own sole risk and expense, defend any and all suits, actions or other legal proceeding brought or instituted against Licensor on any such claim, demand or cause of action, and shall pay and satisfy any judgment or decree rendered against Licensor therein, and Licensee shall reimburse Licensor for any and all legal expense incurred by Licensor in connection therewith. Licensee shall also indemnify, protect and hold harmless Licensor from any and all claims and demands of whatever kind which arise directly or indirectly from the operation of Licensee's facilities including taxes, special charges by others, claims and demands for damages or loss for infringement of copyright, for libel and slander for unauthorized use of television broadcast programs, and for unauthorized use of other program material, and from and/or against all claims and demands for infringement of patents with respect to the manufacturer, use and operation of Licensee's equipment whether arising from the use of Licensee's equipment in combination with Licensor's poles, conduit system, right-of-way or otherwise.
- 10.04 Licensee agrees to comply under the Workmen's Compensation Laws of the state in which attachments are to be located hereunder, and also agrees to cause every subcontractor of Licensee to comply with and qualify under said laws, and shall furnish copies of Certificates demonstrating such compliance to Licensor prior to commencement of the work.

11.0 DEFAULT AND REMEDIES

11.01 In addition to Material Defaults defined anywhere else in this Agreement, any one of the following shall be deemed the occurrence of a Material Default under this Agreement:

- (A) Failure by Licensee to pay any fee or other sum required to be paid under the terms of this Agreement and such default continues for a period of thirty (30) calendar days after written notice thereof to Licensee.
- (B) Failure by either Party to perform or observe any other term, condition, covenant, obligation, or provision of this Agreement and such default continues for a period of thirty (30) business days after written notice thereof from the other Party (provided that if such default is not curable within a thirty (30) business day period, the period will be extended if the Party substantially commences to cure such default and proceeds diligently thereafter to effect such cure).
- (C) The filing of any tax or mechanic's lien against Poles because of any act or omission by Licensee which is not bonded or discharged within thirty (30) calendar days of the date Licensee receives notice that such lien has been filed;
- (D) Licensor or Licensee's voluntary or involuntary bankruptcy;
- (E) Licensee's knowing use or maintenance of its Attachments in violation of any law or regulation, or in aid of any unlawful act or undertaking;
- (F) If any authorization which may be required of Licensee by any governmental or private authority for the placement, operation, or maintenance of Licensee's Attachments is denied or revoked.

11.02 In the event of a Material Default and subject to any other applicable provision of this Agreement, the Non-defaulting Party, without any further notice to the Defaulting Party (except where expressly provided for below or required by applicable law), may do any one or more of the following:

- (A) Perform on behalf and at the expense of the Defaulting Party, any obligation of the Defaulting Party under this Agreement which the Defaulting Party has failed to perform and of which the Non-defaulting Party shall have given the Defaulting Party notice, the cost of which performance shall be paid by the Defaulting Party to the Non-defaulting Party upon demand;
- (B) Terminate this Agreement by giving sixty (60) business days written notice of such termination to Licensee and remove Licensee's Attachments and store Licensee's facilities in a public warehouse or elsewhere at the expense of and for the account of Licensee without Licensor being deemed guilty of trespass or conversion, and without Licensor becoming liable for any loss or damages to Licensee occasioned thereby; or
- (C) Exercise any other legal or equitable right or remedy that the Non-defaulting Party may have.

LICENSOR PROPRIETARY INFORMATION - NOT FOR PUBLIC DISCLOSURE

- 11.03 The Defaulting Party shall repay to the Non-defaulting Party upon demand any costs and expenses incurred by the Non-defaulting Party (including, without limitation, reasonable attorneys' fees) in successfully enforcing this Agreement.
- 11.04 Upon termination of this Agreement by the Non-defaulting Party, the Defaulting Party shall remain liable to the Non-defaulting Party for any and all fees, other payments and damages which may be due or sustained in accord with this Agreement prior to such termination, all reasonable costs, fees and expenses, including, without limitation, reasonable attorney' fees incurred by the Non-defaulting Party in pursuit of its remedies hereunder.
- 11.05 All rights and remedies of the Non-defaulting Party set forth in this Agreement shall be cumulative and none shall exclude any other right or remedy, now or hereafter allowed by or available under any statute, ordinance, rule of court, or the common law, either at law or in equity, or both.

12.0 INDEMNIFICATION

- 12.01 Licensee shall compensate Licensor for the full actual loss, damage or destruction of Licensor's property that in any way arises from or is related to this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation, or maintenance of Licensee's Attachments).
- 12.02 Licensee will further indemnify, defend, and hold harmless Licensor and Licensor's agents, officers, employees, and assigns, from any and all losses, damages, costs, expenses (including, without limitation, reasonable attorneys' fees), statutory fines or penalties, actions or claims for personal injury including death, damage to property, or other damage for financial loss of whatever nature in any way arising out of or connected with this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation or maintenance of Licensee's Attachments, except to the extent caused by the negligence or willful misconduct on the part of Licensor or Licensor's agents, officers, employees and assigns). Licensee expressly assumes all liability for actions by Licensee's agents, officers, or employees, and Licensee expressly waives any immunity from the enforcement of this indemnification provision that might otherwise be proved by workers' compensation law or by other state or federal laws.
- 12.03 Without limiting any of the foregoing, Licensee assumes all risk of, and agrees to relieve Licensor of any and all liability for, loss or damage (and the consequences of loss or damage) to any Attachments placed on Licensor's Poles and any other financial loss sustained by Licensee, except to the extent caused by the negligence or willful misconduct on the part of Licensor or Licensor's agents, officers, employees, and assigns.
- 12.04 Without limiting the foregoing, Licensee expressly agrees to indemnify, defend, and hold harmless Licensor and Licensor's agents, officers, employees and assigns from any and all claims asserted by end users/customers of Licensee in any way arising out of or in connection with this Agreement or Licensee's Attachments, except to the extent caused by the negligence or willful misconduct on the part of Licensor or Licensor's agents, officers, employees, and assigns.

- 12.05 Notwithstanding anything to the contrary in this Agreement, Licensee further shall indemnify and hold harmless Licensor, its agents, officers, employees, and assigns from and against any claims, liabilities, losses, damages, fines, penalties, and costs (including, without limitation, reasonable attorneys' fees) whether foreseen or unforeseen, which the indemnified parties suffer or incur because of:
- (A) Any discharge of hazardous waste resulting from acts or omissions of Licensee or Licensee's predecessor in interest;
 - (B) Acts or omissions of Licensee, its agents, employees, Licensees, or representatives in connection with any cleanup required by law, or
 - (C) Failure of Licensee to comply with Environmental, Safety and Health Laws.
- 12.06 In no event shall either Party be liable to the other for any special, consequential or indirect damages (including, without limitation, lost revenues and lost profits) arising out of this Agreement or any obligation arising hereunder, whether in an action for or arising out of breach of contract, or otherwise.
- 12.07 Licensee shall indemnify, protect, and hold harmless Licensor from and against any and all claims for libel and slander, copyright and/or patent infringement arising directly or indirectly by reason of installation of Licensee's equipment on Licensor Poles, Conduit Systems or Right-of Way pursuant to this Agreement.

13.0 COMPLIANCE WITH LAW

- 13.01 Notwithstanding anything to the contrary in this Agreement, each Party shall ensure that any and all activities it undertakes pursuant to this Agreement shall comply with all applicable laws, including, without limitation, all applicable provisions of:
- (A) Workers' compensation laws
 - (B) Unemployment compensation laws
 - (C) The Federal Social Security Law
 - (D) The Fair Labor Standards Act, and
 - (E) All laws, regulations, rules, guidelines, policies, orders, permits and approvals or any governmental authority relating to environmental matters and/or Occupational Safety and Health Act ("OSHA").

14.0 INSURANCE

- 14.01 The each Party shall obtain and maintain, in full force and effect at all times, during operations covered by this Agreement; such minimum insurance as will cover the obligations and liabilities of said Party, its agents, and its employees which may arise from the operations under this Agreement. Insurance shall have limits of not less than:

(A) Commercial General Liability policy of minimum limits of:

| | |
|---|--------------------------------|
| General Aggregate | \$ 1,000,000 per policy period |
| Products/Completed Operations Aggregate | \$ 1,000,000 per policy period |
| Personal Injury/Advertising | \$ 1,000,000 per occurrence |
| Each Occurrence | \$ 1,000,000 per occurrence |
| Fire Legal Liability | \$ 50,000 any one fire |

14.02 The policy will be endorsed to show the above aggregate limits applying to "each" job site or, as an alternative, the General Aggregate will be increased to \$2,000,000 per policy period. Policy will also specifically state the coverage applies to all operations conducted by the respective Party, its employees, or agents on behalf of that Party's Corporation or subsidiary.

14.03 Where the performance of the work involves structural property, underground property, or blasting, each Party's Commercial General Liability insurance policy shall provide coverage to the insured for legal liability arising from operations under this Agreement for property damage:

(A) arising out of blasting,

(B) arising out of collapse of, or structural injury to, any building or structure or

(C) To underground facilities and utilities.

14.04 Other general liability forms are acceptable in lieu of the Commercial General Liability Form, however, they are not to be used without written approval from the Company's Risk Management Department, 1 Allied Drive Little Rock, AR 72202. However, such written approval shall not be unreasonably withheld.

(A) Business Automobile Liability policy with minimum limits of:

| | |
|-----------------------|---------------------------|
| Bodily Injury | \$ 1,000,000 per accident |
| Property Damage | \$ 1,000,000 per accident |
| OR | |
| Combined Single Limit | \$ 1,000,000 per accident |

The policy will be issued using symbol "1 - any auto" coverage.

(B) Workers Compensation:

Part 1 - Medical Benefits Statutory

Part 2 - Employer's Liability as indicated:

| | |
|---------------------------|--------------------------|
| Bodily Injury by Accident | \$ 100,000 each accident |
| Bodily Injury by Disease | \$ 100,000 each employee |
| Bodily Injury by Disease | \$ 500,000 policy limit |

14.05 The policy will show the state in which operation on behalf of the Party and/or subsidiary is being conducted. For operations conducted within monopolistic (state fund) states, the Party will furnish a certificate of compliance from the appropriate state fund administrator.

- 14.06 In each and every policy in 14.04A and 14.04B, the other Party's Corporation and its subsidiaries shall be named an "additional insured" with respect to activities performed on behalf of the Party's Corporation and its subsidiaries.
- 14.07 Coverage provided by the policies listed in this paragraph will be issued by an insurance company, licensed in the state in which operations on behalf of the Party are to be conducted. It is acceptable to use both primary and excess/umbrella policies to obtain necessary limits.
- 14.08 Each Party will furnish to the other Party, a certificate evidencing insurance coverage under sub-paragraphs 14.04-A, and 14.04-B. Such certificate shall provide for a thirty-day prior notice to the other Party of any cancellation or material changes in coverage and shall be signed by a legal representative of the issuing insurance company. The certificate of insurance shall be sent to the person identified at paragraph 25.03.
- 14.09 The provisions of sub-paragraphs 14.04-A and 14.04-B shall also apply to all sub-Licensees, and Licensee shall be responsible for their compliance herewith.

15.0 NON-WAIVER OF TERMS AND CONDITIONS

- 15.01 Failure to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

16.0 LICENSOR'S LIEN

- 16.01 Should Licensor under any Article of this Agreement remove Licensee's cable, equipment or facilities from Licensor's poles, conduit system or right-of-way, Licensor will deliver to Licensee the cable, equipment or facilities so removed upon payment by Licensee of the cost of removal, storage and delivery, and all other amounts due Licensor hereunder. Licensor is hereby given a lien on Licensee's cable, equipment or facilities within Licensor's conduit system or right-of-way or attached to Licensor's poles or removed therefrom, with power of public or private sale, to cover any amounts due Licensor under the provisions of this Agreement. Such liens shall not operate to prevent Licensor from pursuing, at its option, any other remedy in law, equity or otherwise, including any other remedy provided for in this Agreement.

17.0 SCHEDULE OF FEES AND CHARGES

- 17.01 Licensee may be required to furnish bond or other security satisfactory to Licensor, in a reasonable initial amount to be determined by Licensor and provided by Licensee at the time Licensee submits Exhibit B to Licensor's Attachment Application Procedures to guarantee the payment of any such sums which may become due to Licensor arising out of this Agreement including, but not limited to fees due hereunder or charges for work performed for the benefit of Licensee under this Agreement, including the removal of Licensee's facilities upon termination of this Agreement by any of its provisions or upon termination of any License issued hereunder. Bond to be sent to person identified at paragraph 25.03. Bond is to be equal to one (1) year's annual rental fees.
- 17.02 The fees, rates and charges set forth in APPENDIX I or elsewhere in this Agreement are effective during the term of this Agreement subject to Section 3.01 and shall be due and payable by Licensee as set forth herein.

17.03 FEES:

All rates, charges and fees set forth in this Agreement and as shown in APPENDIX I (Schedule of Rates, Fees, and Charges) shall be subject to all applicable federal, state, and local laws, rules, regulations and commission orders.

(A) Computation:

(1) Pole and Anchor Attachment Fees:

- (a) For the purpose of computing the annual pole attachment fee hereunder, for calendar years subsequent to a first partial calendar year, said fee shall be based upon the number of poles and anchors, to which attachments are actually made, as of December 31 of the preceding year, multiplied by the per attachment pole attachment fee rate set forth on APPENDIX I. For a first partial calendar year, the pole attachment fee shall be prorated as necessary, on a daily basis from the date payment is due in accordance with Exhibit B of Licensor's Attachment Application Procedures.
- (b) For billing purposes, a single pole attachment includes the point of attachment and all facilities located in the usable space on the pole in the space assigned to Licensee (typically six inches above and six inches below the point of attachment). If Licensee occupies more than one usable space on a pole, separate attachment fees shall apply to each space occupied.

(2) Conduit Occupancy Fees :

- (a) For the purpose of computing the total conduit occupancy fee due hereunder, the duct feet of conduit shall be measured from the center to the center of manholes; or from the center of a manhole to the end of the duct; from the center of a manhole to the property line if the duct is connected at the property line to a duct owned and controlled by a third-party property owner; or the length of a conduit from pole to pole; or isolated lengths of conduit not attached to any structure (such as involved with buried cable) which will be occupied by Licensee's cable.
- (b) For billing purposes each inner duct will be billed the half duct fee. If two or more facilities occupy a duct that has not been subdivided, the half duct fee will be charged for each facility. The half duct fee will apply when others place the Licensee facility in a duct that has not been subdivided only if the facility does not render the duct unusable.

(3) Right-of-Way Occupancy Fees:

- (a) This fee will be negotiated on a case by case basis. There is no established per foot rate.

(B) Payment Date:

- (1) If this Attachment License Agreement becomes effective on or prior to June 30, all attachment and occupancy fees for the remainder of that first

LICENSOR PROPRIETARY INFORMATION – NOT FOR PUBLIC DISCLOSURE

partial calendar year shall be due and payable at the time required under Appendix I of Licensor's Attachment Application Procedures .

- (2) If an Attachment License Agreement becomes effective on or after July 1, all attachment and occupancy fees for the remainder of that current partial calendar year as well as the full upcoming calendar year shall be payable at the time required under Appendix I of Licensor's Attachment Application Procedures.
 - (3) On an annual basis, all attachment and occupancy fees not previously paid are to be paid in advance, on the 31st day of January of each year or within 30 days of receipt of invoice. Failure to pay such fees within 30 days of the annual due date shall constitute a Material Default of this Agreement.
- (C) Termination of License:
- (1) Upon termination or surrender of a license granted hereunder, no refund of any attachment or occupancy fee shall be made.

17.04 OTHER CHARGES:

- (A) Computation:
- (1) All charges for inspections, engineering, or rearrangements of Licensee's facilities from Licensor's poles or conduit and, without limitation, any other work performed for Licensee shall be based upon the full cost and expense, including reasonable overhead, to Licensor for performing such work for Licensee. The cost to Licensee shall be determined in accordance with the regular and customary methods used by Licensor in determining such costs.
 - (2) The charge for replacement of poles shall include the entire non-betterment cost to Licensor including the increased cost of larger poles, sacrificed life value of the poles removed, cost of removal, less any salvage recovery and the cost of transferring Licensor's facilities from the old to the new poles.
 - (3) All other attachment or occupancy related inquiry, verification, application, administrative and miscellaneous rates, fees and charges shall be calculated and paid in accordance with APPENDIX I and/or Licensor's Attachment Application Procedures and Attachments thereto.
- (B) Payment Date:
- (1) All bills for such other charges for work performed by Licensor shall be payable upon presentment to Licensee, and shall be deemed delinquent if not paid within 30 days after presentment to Licensee.

18.0 DISPUTE RESOLUTION

18.01 Except in the case of:

- (A) A suit, action, or proceeding by one Party to compel the other Party to comply with its obligation to indemnify the other Party pursuant to this Agreement, or
- (B) A suit, action or proceeding to compel either Party to comply with the dispute resolution procedures set forth in this section, the Parties agree to use the following procedure to resolve any dispute, controversy, or claim arising out of or relating to this Agreement or its breach.

18.02 At the written request of a Party, each Party shall designate a knowledgeable, responsible representative to meet and negotiate in good faith to resolve any dispute, controversy, or claim arising under this Agreement. The Parties intend that these negotiations be conducted by non-lawyer, business representatives. The substance of the negotiations shall be left to the discretion of the representatives. Upon mutual agreement, the representatives may utilize other alternative dispute resolution procedures such as mediation to assist in the negotiations. Discussions and correspondence between the representatives for the purposes of these negotiations shall be treated as confidential, undertaken for purposes of settlement, shall be exempt from discovery and production, and shall not be admissible in the arbitration described below or in any subsequent lawsuit without the concurrence of all Parties. Documents identified in or provided during such negotiations, which are not prepared for purposes of the negotiations, shall not be so exempt and may, if otherwise admissible, be admitted as evidence in any subsequent proceeding.

18.03 If a resolution of the dispute, controversy or claim is not reached within one hundred eighty (180) calendar days of the initial written request, the dispute, controversy, or claim shall be submitted to binding arbitration by a single arbitrator pursuant to the rules of the American Arbitration Association (AAA), except as hereinafter provided. Discovery in any proceeding before the AAA shall be Party controlled by the arbitrator and shall be permitted to the extent set forth in this section. Parties may exchange, in any combination, up to thirty-five (35) (none of which may contain subparts) written interrogatories, demands to produce documents and requests for admission. Each Party may also take the oral deposition of one (1) witness. Additional discovery may be permitted upon mutual agreement of the Parties. The arbitration hearing shall be commenced within sixty (60) calendar days of the demand for arbitration and shall be held in an agreed upon location. The arbitrator shall rule on the dispute, controversy or claim by issuing a written opinion within thirty (30) business days after the close of hearings. The times specified in this section may be extended upon mutual agreement of the Parties or by the arbitrator upon a showing of good cause. Judgement upon the award rendered by the arbitrator may be entered in any court having jurisdiction.

18.04 Each Party shall bear its own costs, including attorneys' fee, incurred in connection with any of the foregoing procedures. A Party-seeking discovery shall reimburse the responding Party the cost of reproducing documents (to include search time and reproduction time costs). The fees associated with any arbitration, including the fees of the arbitrator, shall be divided equally between the parties.

19.0 ENTIRE AGREEMENT

19.01 This Agreement and Licensor's related Attachment Application Procedures cancels and supersedes all previous agreements whether written or oral, except for any sums due thereunder, between Licensor and Licensee with respect to the attachment of Licensee's cable, equipment, and facilities to Licensor's poles or the placing Licensee's cable, equipment or facilities in Licensor's conduit system or right-of-way; and there are no other provisions, terms or conditions to this Agreement except as expressed herein. All currently effective licenses heretofore granted pursuant to such previous agreements shall continue in effect subject to the terms and conditions of this Agreement.

19.02 The terms and conditions of this Agreement supersede all prior oral or written understandings between the Parties and constitute the entire Agreement between them concerning the subject matter of this Agreement. There are no understandings or representations, express or implied, not expressly set forth in this Agreement or in Licensor's related Attachment Application Procedures. This Agreement shall not be modified or amended except by writing signed by the Party to be charged.

GENERAL OPERATING ROUTINE

20.0 ATTACHMENT, USE AND/OR OCCUPANCY REQUEST PROCESS

20.01 There is a multi-step pole attachment or duct, innerduct, conduit or right-of-way use and/or occupancy application process and fee determination process that the Licensee may begin upon the execution of this Agreement. It is set forth below and in Licensor's related Attachment Application Procedures.

21.0 POLE ATTACHMENT REQUESTS (PAR)

21.01 The following process can begin upon the execution of this agreement. The steps are:

- (A) Pole Attachment Quote Preparation: Licensee shall submit a Pole Attachment Request Form (Exhibit B to Licensor's related Attachment Application Procedures), which may be reasonably revised from time to time by Licensor at its sole discretion, to Licensor which will include a drawing of the proposed route and contact information (name, telephone, facsimile, and email information), and all required fees, as listed in and computed in accordance with APPENDIX I, which may be changed from time to time by Licensor to remain consistent with prevailing costs, of this Agreement. These fees consist of administrative as well as other actual costs reasonably incurred in researching the requested route. Once Licensor receives the aforementioned specific attachment information and the fee from Licensee, Licensor will report on the Poles along the route, any required make-ready work, the costs and schedule for such make-ready work, and any other requirements Licensee must satisfy prior to installing its facilities. If during this process, Licensor determines any lawful reason for denying Licensee's application, Licensor will so inform Licensee. Pole attachment quotes will be provided within thirty (30) business days for standard requests. Non-standard quantities of pole attachments and distances will be addressed on an individual case basis, and in a commercially reasonable period.
- (B) Pole Attachment Order: Upon completion of the work identified above, Licensor will inform Licensee if Licensor will provide Licensee a Pole Order Form (Appendix VI to the Licensor's related Attachment Application Procedures) which may be revised from time to time by Licensor at its sole discretion, containing estimated make-ready cost (if any), annual recurring charges and any additional information necessary for Licensee to proceed with attaching its facilities to Licensor's Poles. If Licensee desires to attach to Licensor's poles, and pole make-ready work is required, Licensee shall pay the estimated make-ready cost prior to Licensor beginning any work. Actual costs incurred by Licensor in performing the make-ready work will be applied to the estimated make-ready costs. Any reasonable costs in excess of the estimated cost will be billed to Licensee. Any payment of the estimated costs in excess of actual pole attachment make-ready costs will be returned to Licensee. If Licensee declines to proceed, all fees incurred to date will be billable to Licensee by Licensor.

21.02 Licensee has thirty (30) days to pay the estimated make-ready work or cancel the PAR.

21.03 Upon completion of the make-ready work, the receipt of all payments and fees, and the signing of this Agreement, an "Approved" Attachment I shall be returned to the Licensee. At that time Licensee will be considered to have been granted a License with respect to the poles approved in the PARON and may attach to Licensor's facilities.

22.0 SURVEYS AND INSPECTIONS OF LICENSEE'S FACILITIES

21.01 Licensor reserves the right to inspect each new installation or work operation of Licensee on or within Licensor's facilities. The making of inspections or the failure to make inspections shall not relieve Licensee of any responsibility, obligation or liability imposed by this Agreement.

23.0 ISSUANCE OF LICENSES

23.01 Before Licensee shall have a right to attach to any pole of Licensor, Licensee shall make application for and receive a revocable, nonexclusive license therefore in the form of an approved Application for Pole License (APPENDIX VI and Exhibit B to Licensor's related Attachment Application Procedures).

23.02 Before Licensee shall have the right to place any cable, equipment or facilities within any conduit system or right-of-way of Licensor, Licensee shall make application for and receive a revocable, nonexclusive license therefore in the form of an approved Application for Conduit or Right-of-Way License (APPENDIX IV and Exhibit B to Licensor's related Attachment Application Procedures), hereto attached and made a part hereof.

23.03 Any license granted hereunder for attachment to Licensor's poles shall terminate without further notice to Licensee as to individual poles covered by the license to which Licensee has not attached within ninety (90) days from the date that Licensor has notified Licensee that such poles are available for attachment of the operating facilities of Licensee, unless Licensor, in the exercise of its sole discretion, agrees to extend said period at the request of Licensee.

23.05 Any license granted hereunder for placement of Licensee's facilities in Licensor's conduit system shall terminate without further notice to Licensee as to individual sections of Licensor's conduit system covered by the license in which Licensee has not placed its facilities within ninety (90) days from the date that Licensor has notified Licensee that such sections of the conduit system are available for the placement of operating facilities of Licensee, unless Licensor, in the exercise of its sole discretion, agrees to extend said period at the request of Licensee.

24.0 AUTHORITY TO PLACE ATTACHMENTS

24.01 Before any attachments or placement of facilities Licensee shall submit evidence that Licensee has the authority to maintain Attachments within public rights-of-way or on private right-of-way or on private property. Licensee shall be solely responsible for obtaining all licenses, authorizations, permits and consents from federal, state and local authorities or private land owners that may be required to place and maintain facilities on Licensor's poles or within Licensor's conduit, duct or right-of-way.

25.0 NOTICES (OF MODIFICATION OR ALTERATION OF POLES)

25.01 In the event Licensor plans to modify or alter any Licensor Poles upon which Licensee has placed Attachments, Licensor, except in emergency situations, shall provide Licensee written notice of the proposed modification or alteration at least ninety (90) business days prior to the time the proposed modification or alteration is scheduled to take place. Should Licensee decide to modify or alter Licensee's Facilities on Poles, Licensee shall so notify Licensor in writing at least ninety (90) business days prior to the day the work is to begin. In such event, Licensee shall bear a proportionate share of the total costs incurred by Licensor to make Licensor Poles accessible. Licensee's proportionate share of the total cost shall be based on the ratio of the amount of new space occupied by Licensee to the total amount of new space

occupied by all of the parties joining in the modification. Licensee is not responsible for any costs of Licensor's modifications or alterations of its Poles.

25.02 In the event Licensor is required to move the location of, or replace, any Licensor Pole(s) for reasons beyond its control, Licensee concurrently shall relocate Licensee's Attachments. Licensee shall be solely responsible for the costs of the relocation of Licensee's Attachments. When it is mutually agreed that it is in the best interest of Licensor and Licensee, Licensor will, after proper notification has been provided, transfer Licensee's Attachments at the same time that Licensor transfers its Attachments. The rate charged for these transfers is listed in this Agreement (APPENDIX I). The rate for transfers may be adjusted by Licensor from time to time to remain consistent with prevailing costs.

25.03 Notices under this Agreement may be given and shall be deemed to have been given, by posting the same in first class mail to Licensee as follows:

LICENSOR PROPRIETARY INFORMATION - NOT FOR PUBLIC DISCLOSURE

26.0 REQUIREMENTS AND SPECIFICATIONS FOR ATTACHMENT TO POLES

26.01 Licensee's cables, equipment, and facilities shall be placed and maintained in accordance with the requirements and specifications attached hereto and as set forth in Licensor's related Attachment Application Procedures and made a part hereof, and in accordance with the requirements and specifications of the National Electric Safety Code (most recent edition) and the National Electric Code (most recent edition), and in compliance with any other rules or orders now in effect or that may hereafter be issued by any state utility commission or other authority having jurisdiction.

27.0 PLACEMENT OF ATTACHMENTS

27.01 Licensee shall, at its own expense, place and maintain and replace its Attachments on Licensor's Poles in accordance with:

- (A) Such reasonable requirements and specifications as Licensor shall from time to time prescribe in writing in Licensor's Attachment Application Procedures or otherwise,
- (B) In compliance with any rules or orders now in effect or that hereafter may be issued by any regulatory agency or other authority having jurisdiction, and
- (C) All currently applicable requirements and specifications of the National Electrical Safety Code, National Electric Code, most current edition or any amendment or revision of said Code. Licensee agrees to comply, at its sole risk and expense, with all specifications hereto, as may be revised from time to time by Licensor. Licensor will provide supervision at Licensee's expense if Licensor believes it is required.

27.02 Licensee's Facilities shall be tagged at maximum intervals of 300 feet so as to identify Licensee as the owner of the Facility. The tags shall be of sufficient size and lettering so as to be easily read from ground level.

28.0 MODIFICATIONS, ADDITIONS OR POLE REPLACEMENTS AND REARRANGEMENTS

28.01 Licensee shall not modify, add to, or replace facilities on any pre-existing Attachment on an Licensor Pole without first notifying Licensor in writing of the intended modification, addition or replacement at least thirty (30) business days prior to the date the activity is scheduled to begin. The required notification shall include:

- (A) The date the activity is scheduled to begin,
- (B) A description of the planned modification, addition, or replacement,
- (C) A representation that the modification, addition, or replacement will not require any space other than the space previously designated for Licensee's Attachments, and
- (D) A representation that the modification, addition, or replacement will not impair the structural integrity of the Poles involved.

LICENSOR PROPRIETARY INFORMATION – NOT FOR PUBLIC DISCLOSURE

- 28.02 Should Licensor determine that the modification, addition, or replacement specified by Licensee in its notice will require more space than that allocated to Licensee or will require the rearrangements of, reinforcement of, replacement of, or an addition of support equipment to the Poles involved in order to accommodate Licensee's modification, addition, or replacement, Licensor will so notify Licensee, whereupon Licensee will be required to submit a PAR in compliance with this Agreement in order to obtain authorization for the modification, addition, or replacement of its Attachments.
- 28.03 Should Licensee request Licensor to expand capacity or purchase additional plant, Licensee agrees to pay all reasonable costs. If Licensor or another party that has been granted a license joins in the request and will benefit from the expansion or purchase, Licensee agrees to pay a percentage of all costs proportionate to Licensee's share of the benefit received from the expansion or purchase.
- 28.04 When multiple applications, including application of Licensee, are received by Licensor with respect to any pole which must be replaced or rearranged to provide additional space prior to commencement of the work on that pole a Transfer Attachment Fee may be charged. Licensor will equitably prorate to the extent that it is practical between Licensee and other applicants for the pole space, the common expenses of engineering, rearrangement, and replacement, if any, which result from the processing of multiple applications. Licensee shall be bound by Licensor's determination as to any such pro-ration of Transfer Attachment Fee to Licensee.

29.0 UNAUTHORIZED ATTACHMENTS

- 29.01 If any cable, equipment or facilities of Licensee shall be found on a pole or within a conduit or right-of-way for which no license is outstanding, Licensor, without prejudice to its other rights or remedies under this Agreement or otherwise, may:
- (A) Impose a charge, and
 - (B) Require Licensee to remove such cable, equipment or facilities forthwith or Licensor may remove them without liability and the expense of removal shall be borne by Licensee. For the purpose of determining the charge, Licensee shall pay liquidated damages that will not exceed an amount equal to the annual pole attachment fee for the number of years the unauthorized attachments have existed (or, if that cannot be determined, the number of years since the most recent inventory or five years, whichever is less), plus interest at a rate set for that period by the IRS for individual underpayments pursuant to Section 6621 of the IRS Code. Any such charge imposed by Licensor shall be in addition to its rights to any other sums due and payable, including without limitation the actual costs of any audit or survey which established the existence of the unauthorized attachments and to any claims to said fees or said unlicensed use shall be deemed as a ratification or the licensing of the unlicensed use, and if any license should subsequently be issued, after application and payment of the application fee therefore, said license shall not operate retroactively or constitute a waiver by Licensor of any of its rights or privileges under this Agreement or otherwise.
- 29.02 For purposes of this section, an unauthorized Attachment shall include, but not limited to:

- (A) An Attachment to a Pole which is not identified in any PARON (APPENDIX VI) issued in accordance with this Agreement;
- (B) An Attachment that occupies more space than that allocated to Licensee By Licensor;
- (C) An attachment that is not placed in accordance with the provisions of this Agreement or the appropriate PARON (APPENDIX VI) issued pursuant to this Agreement, unless Licensee can demonstrate to Licensor's reasonable satisfaction that said misplacement is not due to any act or omission of Licensee or Licensee's agents;
- (D) An addition or modification by Licensee to its pre-existing Attachment(s) that impairs the structural integrity of the involved Licensor Pole(s).
- (E) An Attachment that consists of facilities owned or controlled by, and for the use of a Party other than Licensee.

29.03 Once Licensor has notified Licensee of an unauthorized attachment. Licensee can submit a PAR to request an authorized attachment. A PAR submitted per this provision will be treated like any other PAR subject to this Agreement. Licensee will be responsible for all fees associated with a PAR (as identified in this Agreement). If a PAR is not received by Licensor within ten (10) business days of Licensee's receipt of an unauthorized attachment notification, Licensee has sixty (60) business days from the date of its receipt of the initial unauthorized attachment notification to vacate the Pole.

30.0 FAILURE TO PLACE ATTACHMENTS

30.01 Once Licensee has been issued a PARON (APPENDIX VI), Licensee shall have ninety (90) calendar days from the date of the PARON (APPENDIX VI) to begin the placement of its Attachments on the Licensor Poles covered by the PARON (APPENDIX VI). If Licensee has not begun placing its Attachments within that ninety-(90) calendar day period, Licensee shall so advise Licensor with a written explanation for the delay. If Licensee fails to advise Licensor of its delay, with a written explanation therefore, or if Licensee fails to act in good faith by not making a bona fide effort to begin placing its Attachments within the ninety (90) calendar days prescribed by this section, the previously issued PARON (APPENDIX VI) shall be deemed rescinded by Licensor and Licensee shall have no further right to place Attachments pursuant to that PARON (APPENDIX VI).

31.0 OCCUPANCY OF CONDUIT SYSTEM

31.01 When Licensee submits an application for a license to place its cables, equipment, and facilities in the conduit system of Licensor, Licensor will advise Licensee of the availability of conduit space in accordance with Licensor's Attachment Application Procedures. In determining the availability of space in Licensor's conduit system, Licensor reserves the right to deny the granting of a license for any non-discriminatory lawful reason, including without limitation, insufficient capacity or reasons of safety, reliability and generally applicable engineering purposes. If conduit space is available, a license to occupy a portion of conduit system will be

granted to Licensee, provided, however, that Licensor does not warrant the condition of such conduit system.

- 31.02 Licensor reserves the right to exclude cable, equipment, and facilities of Licensee from Licensor's conduit system, or to limit the type, number and size of Licensee's cable, equipment, and facilities which may be placed in any of Licensor's manholes.

32.0 OCCUPANCY OF RIGHT-OF-WAY

- 32.01 Licensor and Licensee agree that neither party has the right to restrict or interfere with the other party's lawful access to and use of public right-of-way, including public right-of-way, which pass over property owned by either party. Except as otherwise specifically provided in this Agreement, Licensor and Licensee shall each be responsible for obtaining their own right-of-way and permission to use real or personal property owned or controlled by any governmental body.

- 32.02 In the event that Licensee desires to occupy right-of-way owned or controlled by Licensor, Licensor may require Licensee to make an application to do so by the terms of this Agreement. Licensor reserves the right to determine whether granting a license would adversely affect its common carrier communication services and its ability to meet its duties and obligation with respect thereto, including questions of economy, safety, and future need of Licensor.

- 32.03 Licensor may, without incurring any liability, remove the cables, equipment, and facilities of Licensee from Licensor's right-of-way, at Licensee's expense where in Licensor's judgement (such judgement to be conclusive) such removal is required in connection with the performance of Licensor's service obligation or the safety of Licensor's employees. Whenever such removal has been made, Licensee will be promptly notified.

33.0 CONSTRUCTION AND MAINTENANCE OF FACILITIES

- 33.01 Licensee shall, at its own expense, make and maintain its pole attachments in a safe condition and in thorough repair, and in a manner reasonably acceptable to Licensor, and so as not to conflict with the use of said poles by Licensor or by other authorized users of said poles, or interfere with other facilities thereon or which may from time to time be placed thereon. Licensee shall, at its own expense, upon written notice from Licensor, relocate or replace its facilities placed on said poles, or transfer them to substituted poles, or perform any other work in connection with said facilities that may be required. Licensor shall give such written notice as is reasonable in the circumstances, provided, however, that in cases of emergency, (Licensor's judgment as to what constitutes an emergency to be conclusive) Licensor may arrange to relocate, remove or replace the attachments placed on said poles by Licensee, transfer them to substituted poles or perform any other work in connection with said facilities that may be required in the maintenance, replacement, removal or relocation of said poles or of the facilities thereon or which may be placed thereon, or for the service needs of Licensor, and Licensee shall reimburse Licensor for the expense thereby incurred. Attachments of Licensee to poles of Licensor, as mentioned herein shall be understood to include attachments of Licensee in space reserved for Licensor, or space which Licensor has the right to use, on poles of other companies with which Licensor now has or may hereafter have agreements for joint use and occupancy; and the use of such space by Licensee shall be subject to the terms and conditions

of the agreements between Licensor and said other companies. Such authorization will not be unreasonably withheld.

- 33.02 Licensee's cable, equipment, and facilities shall be placed in, removed from, relocated in or maintained in Licensor's conduit system only when specific authorization for the work to be performed and approval of the person, firm or corporation selected by Licensee to perform the work, has been obtained in writing in advance from Licensor. Licensor retains the right to specify what, if any work shall be performed by Licensee. Such authorization will not be unreasonably withheld
- 33.03 In each instance where Licensee's cable, equipment, and facilities are to be placed in Licensor's conduit system, Licensor shall specify, among other things, the cable configuration and location of Licensee's cable, equipment, and facilities, the particular duct of the conduit system such cable will occupy, and the location where and manner in which Licensee's cable will enter and exit Licensor's conduit system.
- 33.04 Licensor's manholes shall be opened as reasonably permitted by Licensor's authorized employees or agents. Licensee shall be responsible for obtaining any necessary permits from appropriate governmental authorities to open manholes and to conduct the work operations. Licensee's employees or agents will be permitted to enter or work in Licensor's manholes only when an authorized agent or employee of Licensor is present except as provided in the next paragraph. Licensor's said agent or employee shall have the authority to terminate Licensee's work operations in and around Licensor's manholes if, in the sole discretion of said agent or employee, any hazardous conditions arise or any unsafe practices are being followed by Licensee's employees or agents. Licensee agrees to pay, in accordance with the terms and conditions of APPENDIX I, the full cost of having Licensor's agent or employee present when Licensee's work is being done in Licensor's manholes. The presence of Licensor's authorized agent or employee shall not relieve Licensee of its responsibility to conduct all of its work operations in and around Licensor's manholes in a safe and workmanlike manner. Licensee is responsible for all signage, traffic control, equipment, and personnel necessary to work in Licensor's manholes. All work shall meet Occupational Safety and Health Act (OSHA), and any local or state standards and requirements.
- 33.05 Licensee's employees will be permitted to enter or work in Licensor's manholes and conduit system without an authorized agent or employee of Licensor being present, provided that Licensee's work consists only of routine operations of testing, adjusting, regulating or inspecting Licensee's existing facilities and does not involve any placing, removing, changing or rearranging of Licensee's or Licensor's facilities. In such cases, Licensee shall notify Licensor's designated representative in advance of Licensee's operations as to the type of work to be performed, the time at which it is to be performed and where it is to take place. Licensee shall conduct all such work operation in a safe and workmanlike manner, and in accordance with the terms of this Agreement.
- 33.06 Licensee shall, at its own expense, maintain its buried communication facilities so as not to conflict with the use of the right-of-way by Licensor or other authorized users of the right-of-way. Licensee shall, at its own expense, relocate, change, or replace its facilities or perform any other work in connection with said facilities that may be reasonably required by Licensor or other authorities.

34.0 TERMINATION OF LICENSES

- 34.01 Upon notice from Licensor to Licensee that Licensor has been advised by governmental authority or private property owners that the use of any pole, conduit system, or right-of-way is not authorized and is objected to by such governmental authority or private property owner, as the case may be or that any pole, any conduit system or any right-of-way is to be removed, sold or otherwise disposed of, Licensee shall, if reasonably requested by Licensor, remove its cables, equipment, and facilities at once from the affected pole or poles or shall make arrangements for the removal of its cable, equipment, and facilities from the affected portion of Licensor's conduit system or right-of-way at Licensor's expense. If not so removed, Licensor shall have the right to remove Licensee's cable, equipment, and facilities from Licensor's right-of-way at the cost and expense of Licensee and without any liability thereto. If Licensor deems it is impractical to remove Licensee's cables, equipment or facilities from any right-of-way, they may be abandoned in place.
- 34.02 Licensee may at any time remove its facilities from any pole of Licensor, but shall immediately give Licensor written notice of such removal and surrender of license in the form of a Notification of Surrender (APPENDIX VII) hereto attached and made a part hereof. If Licensee surrenders its license but fails to remove its facilities from Licensor's poles, Licensor shall have the right to remove Licensee's facilities at Licensee's expense without any liability on the part of Licensor for damage or injury to Licensee's facilities. In the event that Licensee's cables, equipment, and facilities shall be removed from any pole as provided by this Agreement, no attachment shall again be made to such pole unless Licensee shall have first complied with all of the provisions of this Agreement as though no attachment had previously been made.
- 34.03 If Licensee desires to terminate its license for the right to occupy any part of Licensor's conduit system, Licensee shall give Licensor written notice of such surrender in the form of a Notification of Surrender (APPENDIX VII) hereto attached and made a part hereof. In such event, Licensee shall make arrangements with Licensor for the removal of Licensee's cables, equipment, and facilities from that part of Licensor's conduit system at Licensee's expense. In the event that Licensee's cables, equipment, and facilities shall be removed from Licensor's conduit system as provided by this Article, no cable, facilities or equipment shall again be placed in that part of such conduit system unless Licensee shall have first complied with all of the provisions of this Agreement as though no cables, equipment, and facilities of Licensee had previously been placed in that part of Licensor's conduit system.
- 34.04 If Licensee desires to terminate its license for the right to occupy any part of the right-of-way, Licensee shall give Licensor written notice of such surrender in the form of a Notification of Surrender (APPENDIX VII) attached hereto and made a part hereof. In such event, Licensee shall make arrangements with Licensor for the removal of Licensee's cables, equipment, and facilities from that part of the right-of-way at Licensee's expense. However, in the event it is impractical to remove Licensee's cable, equipment, and facilities from any right-of-way, they may be abandoned in place.

35.0 EMERGENCY RESTORATION PROCEDURES

- 35.01 In the event of an emergency, restoration procedures may be affected by the presence of Licensee's Attachments. While Licensor shall not be responsible for the repair of damaged Attachments of Licensee (except by mutual written agreement), Licensor shall nonetheless

control access to its poles, conduit systems or right-of-way if the restoration is to be achieved in an orderly fashion.

35.02 Where Licensor and Licensee are involved in emergency restorations, access to Licensor's poles, conduit systems or right-of-way will be controlled by Licensor's Network Construction Managers or their on-site representative according to the following guidelines.

(A) Service Disruptions/Outages

- (1) While exercising its right to first access, Licensor shall make all reasonable efforts to grant access to as many other entities with Attachments as is reasonably safe.
- (2) Where simultaneous access is not possible, Licensor will grant access on first come, first served basis.

(B) Service Affecting Emergencies

- (1) While exercising its right to first access, Licensor shall make all reasonable efforts to grant access to as many other entities with Attachments as is reasonably safe.
- (2) Where Licensor is unable to grant simultaneous access to all other entities with Attachments, access will be granted according to the level of damage to the Attachments of each entity and the likelihood that a given level of damage will result in service disruption. Where the likelihood that a service disruption will result is not clearly discernible, access will be on a first come, first served basis.

35.03 Without limiting any other indemnification or hold harmless provisions of this Agreement, Licensee agrees that any decision by Licensor regarding access to Attachments, or any action or failure to act by Licensor, under this section shall not be the basis for any claim by Licensee against Licensor for any damage to Licensee's Attachments or disruption of Licensee's services, or any other direct or indirect damages of any kind whatsoever incurred by Licensee.

36.0 ABANDONMENT

36.01 Nothing in this Agreement shall prevent or be construed to prevent Licensor from abandoning, selling, assigning, or otherwise disposing of any poles, conduit systems or other Licensor property used for Licensee's Attachments; provided, however, that Licensor shall condition any such sale, assignment, or other disposition subject to the rights granted to Licensee pursuant to this Agreement. Licensor shall promptly notify Licensee of any proposed sale, assignment, or other disposition of any poles, conduit systems or other Licensor property used for Licensee's Attachments.

37.0 SIGNATURE

IN WITNESS WHEREOF, the parties hereto have executed this Agreement in duplicate.

LICENSOR PROPRIETARY INFORMATION – NOT FOR PUBLIC DISCLOSURE

ALLTEL Communications, Inc.
Northeast Region
50 Executive Parkway
Hudson, Ohio 44236

August 14, 2002

Dear Sir or Madam:

This letter is to outline the procedure to be used when applying for attachment to poles ALLTEL Corporation owns or has the authority to issue permits for. These procedures provide a standard method of handling the requests for attachments which allows ALLTEL to handle your requests in timely manner.

- Applications must be prioritized in a continuous geographical sequence in which the strand is expected to be placed. An application will consist of:
 1. Area maps showing location of area to be constructed.
 2. Legible strand maps.
 3. Individual pole application sheets with the following information:
 - a. Both Alltel and power company pole numbers.
 - b. Height and class of pole and date the pole was set.
 - c. Ownership of pole.
 - d. Height of highest telephone cable attachment on pole.
 - e. Height of highest telephone drop attachment on pole.
 - f. Height of lowest power attachment on pole.
 - g. Height of any street light attachment on pole.
 - h. Existence and height of any other attachments such as traffic signals, fire signals, or other third parties.

Applications that are not complete will not be processed and will be returned to the company submitting them.

- Since many of the poles are jointly owned with the power company, application processing will not be undertaken where any necessary coordination with, or application to, the power company has not been accomplished by your firm.
- Your firm will be responsible for scheduling a field inspection to be done simultaneously with ALLTEL, CATV, and the company personnel of any other entity with an interest in the pole(s).
- Jobs will be drawn and estimated costs will be prepared and submitted to your firm. The costs will include, but not be limited to, costs incurred for the field inspection, engineering time needed to prepare the job, and make-ready construction costs.
- An application shall not be considered granted and the work released for construction until your firm signs ALLTEL's cost estimate application, known as the billing summary, and returns it, along with its payment, to ALLTEL. Releases by ALLTEL are for fully owned

WIN0965

ALLTEL poles and to the space which ALLTEL controls on jointly-owned poles. No construction by your firm is permitted in any area until a written release form is issued by ALLTEL to your firm for that area. There will be NO verbal releases. Proper releases must also be obtained from the power company for attachments in power controlled space.

- Insurance certificates and worker's compensation must be submitted and must be kept up-to-date.

Sincerely,

Brenda A. Wilfong

Brenda A. Wilfong
Contracts - Northeast Region

NOTE TO ALL FIRMS: IF YOU CHOOSE NOT TO PROCEED WITH THE APPLICATION - YOU WILL BE BILLED FOR ALLTEL'S ENGINEERING TIME. THERE ARE NO EXCEPTIONS TO THIS POLICY!!!!

CATV POLE LEASE AGREEMENT

THIS AGREEMENT made as of the 16 day of May, 1980, between
 GENERAL TELEPHONE COMPANY OF KENTUCKY, a corporation of the
 State of Delaware, having its principal office at
Lexington, Kentucky, hereinafter called Licensor,
 and O.V.C. Telecommunications, Inc., a corporation of the
 State of _____, having its principal office at
 _____, hereinafter called Licensee,

W I T N E S S E T H:

WHEREAS, Licensee (proposes to furnish) (is furnishing) a CATV service, as
 Morehead, Lebanon, Nicholasville, Midway,
 hereinafter defined, to residents of Wilmore, Olive Hill, Berea, Versailles and
 (intends to erect and maintain) (has erected and is maintaining) an antenna
 tower (s) located at _____
 and (proposes to install) (has installed) coaxial television cables, amplifiers
 and drop wires, wires and appliances together with associated cable messengers,
 anchors and other appurtenances, hereinafter sometimes collectively called the
 "equipment," throughout the area to be served and desires (to attach) (to
 continue to attach) such equipment to poles of Licensor and/or to poles used
 jointly by Licensor and other companies; and

WHEREAS, Licensor is willing (to permit) (to continue to permit), to the
 extent it may lawfully do so, the attachment of said equipment to its poles where,
 in its judgment, such use will not interfere with its own service requirements or,
 it may be advised, the service requirements of other joint users, including
 considerations of economy and safety.

NOW, THEREFORE, in consideration of the mutual covenants, terms and conditions herein contained, the parties hereto do mutually covenant and agree as follows:

ARTICLE I

DEFINITIONS

1. All references herein to "Licensor's poles" or "its poles" shall mean poles solely owned by the Licensor, jointly owned by Licensor or the pole space rented or obtained by other arrangements by Licensor from another owner.

2. All references herein to "joint user" shall mean (1) a company or municipality which together with Licensor has a percentage ownership in a pole, (2) a public utility company or municipality which has attachment privileges on Licensor's poles, or (3) a public utility company which owns poles on which Licensor has attachment privileges.

3. All references herein to "CATV service" shall mean the transmission to subscribers of off-the-air pick up of broadcast signals or the transmission without separate charge of locally originated closed circuit television to the subscribers of off-the-air service.

ARTICLE II

SCOPE OF AGREEMENT

4. Licensor hereby agrees to license and permit Licensee (to attach) (to continue to attach) its equipment, for the primary purpose of furnishing CATV service within the area outlined in red on the map attached hereto as Exhibit A; to such of its poles as are, in the judgment of the Licensor, suitable and available for such attachments, subject to the conditions and limitations contained herein.

5. Licensee agrees that its equipment (to be attached) (attached) to Licensor's poles shall be installed for the purpose of providing CATV service and shall be used primarily for furnishing CATV service. Any residual channel capacity, however, may be used by Licensee for any lawful purpose.

6. Licensee agrees to secure from the proper franchising authority, a franchise to erect and maintain its equipment within public streets, highways and other thoroughfare, provided such franchising authority exists, and shall secure any and all consents, permits or licenses that may be legally required for its operations hereunder. Prior to the execution of the Agreement, Licensee shall deliver to Licensor documentation satisfactory to Licensor evidencing that all such franchises, consents, permits or licenses have been obtained.

7. Licensee agrees to assist in, and bear the expense of, securing any consents, permits or licenses that may be required by Licensor by reason of this Agreement.

ARTICLE III

APPLICATION FOR PERMISSION TO ATTACH

8. At least ninety (90) days prior to the time Licensee desires to attach its equipment to any of Licensor's poles, it shall make written application on the form marked Exhibit B attached hereto and made a part hereof, in the number of copies from time to time prescribed by Licensor. Upon approval of said application, Licensor shall return one copy of Exhibit B to the Licensee bearing the endorsement of its permission.

9. Upon receiving such endorsed copy of said application, but not sooner, Licensee shall have the right, subject to Section 13 herein, to install, maintain and use its equipment described in said application upon the poles identified therein, provided that Licensee shall complete each installation within such time limit as may be specified on said approved application; provided, however, that before commencing any such installation, Licensee shall notify Licensor of the time when it proposes to do such work sufficiently in advance thereof so that Licensor may arrange to have its representative present when such work is performed and, in the event Licensor elects to have its representative present, Licensee shall reimburse Licensor for the cost and expense thereof.

10. Where costs are involved in the rearrangement of Licensor's or other facilities to accommodate Licensee's equipment, two signed copies of said application shall be returned to Licensee detailing the costs in the space provided thereon for that purpose. Approval of said application by Licensor is subject to receiving authorization from Licensee, on said application in the space provided thereon for that purpose, to make changes and rearrangements, at Licensee's sole risk and expense, detailed by Licensor with said copies of said application.

11. Licensee shall not have the right to place, nor shall it place, any additional equipment upon any pole used by it hereunder without first making application therefor and receiving Licensor's permission to do so, all as prescribed in Section 8 herein; nor shall Licensee change the position of any equipment attached to any such pole without Licensor's prior written approval. The provisions of this Section shall not restrict the attachment of television drops to television crossarms or television cable messenger. It is agreed that a charge of five dollars (\$5.00) per attachment shall be levied against and paid by Licensee to Licensor for any unauthorized attachment made by Licensee to Licensor's poles or facilities. This charge will be in addition to rental charges from the time of said unauthorized attachment, rearrangement costs, or other appropriate charges.

In the event that the time of the unauthorized attachment cannot be determined, it shall be deemed to have occurred on the date succeeding the day on which last joint survey was made in accordance with paragraph 14 hereof.

12. It is agreed and understood that in the case of jointly-used poles, permission to attach thereto shall be subject to Licensor's obtaining approval from such joint users and/or owners whenever necessary.

ARTICLE IV

SPECIFICATIONS

13. Licensee, at its own cost and expense, shall construct, maintain and replace its attachments on Licensor's poles in accordance with (i) such requirements and specifications as Licensor shall from time to time prescribe, (ii) EEI Publication M12 entitled "Specifications for the Construction and Maintenance of Jointly Used Wood Pole Lines Carrying Supply and Communication Circuits", (iii) the requirements and specifications of the National Electrical Safety Code, Sixth Edition, and any amendments or revisions of said specifications or code, (iv) in compliance with any rules or orders now in effect or that hereafter may be issued by any regulatory Commission or other authority having jurisdiction, and (v) the requirements and specifications of the National Electrical Code 1965 Edition and any amendments or revisions of said specifications or code. In addition, all attachments shall be made by Licensee in accordance with this Agreement and Exhibits 1-10 attached hereto and made a part hereof. Licensee agrees to comply, at its sole risk and expense, with the specifications of all Exhibits attached hereto, as revised from time to time by Licensor in accordance with the provisions of this Article IV.

ARTICLE V

INSTALLATION AND MAINTENANCE OF ATTACHMENTS AND POLES

14. The exact location of Licensee's attachments on poles shall be determined from a joint survey to be made, at such times as shall be mutually

agreed upon, by representatives of Licensor, Licensee and, if desired by a joint user, its representative. Licensor may inspect each new installation of Licensee on its poles and in the vicinity of its lines or appliances and may make periodic inspections of the entire plant of Licensee as plant conditions may warrant; and Licensee shall, on demand, reimburse Licensor for the cost of such surveys and inspections. Such inspections shall not operate to relieve Licensee of any responsibility, obligation or liability assumed under this Agreement.

15. Licensor at its option and at the sole risk and expense of Licensee, may make the attachment of Licensee's equipment to poles solely owned by Licensor and joint users' poles whenever, in its judgment, Licensor deems such procedure to be appropriate. Licensee agrees to furnish all such materials and equipment and further agrees, on demand, to reimburse Licensor for the entire installation costs thereby incurred. Licensee shall deposit with Licensor, prior to such installation, sufficient sums estimated by Licensor to be adequate to reimburse it for such work. In individual cases where, in Licensor's judgment, such procedure is desirable, Licensor may install such equipment upon poles owned by others at the request of Licensee and upon prior written approval of the owners of such poles, and Licensee will reimburse Licensor for the entire expense thereby incurred.

16. Where Licensee's attachments can be accommodated on poles of Licensor by rearranging or changing the facilities of Licensor or other joint users, Licensee agrees to pay Licensor in advance the cost of making such rearrangements or changes. Strengthening of poles (guying) required to accommodate the attachments of Licensee and the bonding of Licensee's strand to that of Licensor shall be performed by Licensee at his sole risk and expense. Such work, however, may be performed by Licensor at its option, and in such event Licensee shall pay to Licensor in advance the cost of all such work.

17. Upon written notice from Licensor, Licensee shall relocate or replace its equipment attached to Licensor's poles, or transfer the same to substituted poles, or perform any other work in connection with said equipment that may be requested by Licensor, at Licensee's sole risk and expense; provided, however, that in cases of emergency Licensor may, at Licensee's sole risk and expense, arrange to relocate or replace the facilities attached to said poles by Licensee, transfer them to substituted poles or perform any other work in connection with said facilities that may be required in the maintenance, replacement, removal or relocation of said poles, the facilities thereon or the equipment which may be placed thereon, or for the service needs of Licensor.

18. Licensee shall notify Licensor of the time when it proposes to replace any of its equipment attached to Licensor's poles sufficiently in advance thereof so that Licensor may decide whether it should perform such work pursuant to paragraph 15 hereof and, in such event, Licensee shall reimburse Licensor for the entire expense thereby incurred.

19. All tree trimming required on account of Licensee's equipment shall be done by Licensee at its sole risk and expense and in a manner satisfactory to Licensor and any other joint users.

20. Licensee shall, at its sole risk and expense, maintain all of its attachments on Licensor's poles in safe condition and in thorough repair.

21. Licensor reserves to itself, its successors and assigns the right to maintain its poles and to operate its facilities thereon in such manner as will best enable it to fulfill its public service requirements. Licensor or other joint users shall not be liable to Licensee for any interruption to the service of Licensee or for interference with the operation of the equipment of Licensee arising in any manner whatsoever.

22. Nothing herein contained shall give to the Licensee the right to place a crossarm on any pole. If a crossarm is required to accommodate the facilities of the Licensee, then Licensee shall so state the reasons therefore in its application for attachment.

23. Licensee shall not at any time make any additions to, or changes in, the location of its attachments on the poles covered by this Agreement without the prior written consent of Licensor except, in cases of emergency, when oral permission shall have been obtained from Licensor's authorized representative at See letter of May 16, 1980 and subsequently confirmed in writing.

24. If Licensee should require the location of its equipment upon any public thoroughfare or other public or private property in the conduct of its business in the territory covered by this Agreement and Licensor shall not have pole facilities so located to fulfill Licensee's requirements, Licensee shall notify Licensor of its need for such pole facilities in order that Licensor may determine whether it wishes to place pole facilities in such locations for Licensor's requirements. If Licensor so elects, it shall erect pole facilities in such locations adequate to meet the service requirements of both Licensee and Licensor, and Licensee shall thereupon make application for permission to place its equipment thereon as provided in this Agreement.

25. Nothing in this Agreement shall be construed to obligate Licensor to grant Licensee permission to use any particular pole and Licensor at its discretion may revoke permission theretofore granted to Licensee with respect to any particular pole.

26. Whenever, pursuant to the provisions of this Agreement, Licensee shall be required to remove its attachments from any pole, such removal shall be made, except as otherwise specifically provided, within thirty (30) days following the giving of notice to Licensee by Licensor to so remove. Upon failure of Licensee to remove such attachments within such thirty (30) days or as otherwise required, Licensor may remove them and charge all costs associated with such removal to Licensee.

27. Licensee agrees that it shall not interset poles where Licensor's facilities are located nor shall it locate poles, guys, or other facilities where they will interfere with access to Licensor's poles or to poles to be constructed by Licensor.

ARTICLE VI

COST OF POLE REPLACEMENTS

28. Whenever Licensee applies for permission to attach to a pole that is considered by Licensor to be insufficient in height or strength for accommodation of Licensee's attachments, or in the event that Licensor or a joint user of the pole shall require the space occupied by Licensee's existing attachments, Licensor shall notify Licensee of such fact and of the estimated cost to Licensee of replacing such pole with a pole which will accommodate the attachments of Licensee, Licensor and any such joint user. Within thirty (30) days of such notification, Licensee shall either notify Licensor (i) of its approval of such replacement or (ii) of its cancellation of the application with respect to such pole or (iii) in the case of existing attachments, of its election to remove its attachments from the pole.

29. In the event of Licensee's approval of such replacement, Licensor shall replace the pole and Licensee shall pay to Licensor in advance the charges therefor, computed as follows:

The total cost of the new pole, the removal of the old pole, the transferring of Licensor's and any such joint user's attachments from the old to the new pole and such other costs, if any, necessitated by Licensee's requirements, less the total of the following: accrued depreciation on the old pole, salvage, if any, and the cost of such portion of the new pole, if any, which represents space reserved for the use of Licensor or any such joint user greater than that provided for them on the old pole less appropriate contribution by any other licensee.

ARTICLE VII

RIGHTS OF WAY, LEGAL AUTHORITY AND DEFAULT

30. Upon execution of this Agreement, Licensee shall submit evidence satisfactory to Licensor of its authority to erect and maintain its equipment within public streets, highways and other thoroughfares and shall secure any necessary license, permit or consent from Federal, state or municipal authorities and from the owners of property now or hereafter required to construct and maintain such equipment at the locations of poles of Licensor to which it desires to attach. In the event any such franchise, license, permit or consent is revoked or is thereafter denied to Licensee for any reason, permission to attach to Licensor's

poles shall immediately terminate, Licensee shall forthwith remove its equipment from Licensor's poles and Licensor at its option may forthwith terminate this Agreement.

31. Upon notice from Licensor to Licensee that the cessation of the use of any pole or poles has been requested or directed by Federal, state or municipal authorities, or property owners, permission to attach to such pole or poles shall immediately terminate and Licensee shall forthwith remove its equipment therefrom.

32. If Licensee shall fail to comply with any of the provisions of this Agreement, including the specifications hereinbefore referred to, or defaults in any of its obligations under this Agreement, and shall fail within thirty (30) days after written notice from Licensor to correct such default or non-compliance, Licensor may, at its option forthwith terminate this Agreement in its entirety or, at its election, revoke the permit covering the pole or poles involved in such default or non-compliance.

ARTICLE VIII

33. For the privilege of placing and maintaining attachments on Licensor's poles, Licensee shall pay annually to Licensor the sum of 4.50 dollars for each such pole times the total number of poles used by Licensee on the date of computation. Rentals shall be payable annually in advance to Licensor on the first day of January of each year during which this agreement remains in effect.

From the effective date of the permit for such attachments, which shall be the date when Licensor's poles are available for the attachment of Licensee's equipment, to the date from which the annual rentals provided in the paragraph above shall accrue, the rental per month or fraction thereof shall be payable on a prorated basis.

34. In the event that Licensor files a tariff during the term of this Agreement covering attachments made to its poles, Licensor reserves the right to substitute the rates and charges covered by such tariff in place of the rentals set forth in Section 33 above.

ARTICLE IX

TERM AND TERMINATION OF AGREEMENT

35. This Agreement, if not previously terminated in accordance with the provisions hereof, shall continue in effect for a term of one
(1) years and thereafter until terminated as provided herein. The Agreement may be terminated at the end of said time or at any time thereafter by either party giving to the other party at least ninety (90) days' written notice. Upon termination of the Agreement in accordance with any of its terms, Licensee shall remove its said equipment from all poles of Licensor within thirty (30) days thereafter.

36. Licensee may at any time remove its equipment attached to any pole or poles of Licensor, but shall immediately give Licensor written notice of such removal in the form of Exhibit C attached hereto and made a part hereof. No credit or refund of any rental shall be allowed Licensee on account of such removal.

37. This Agreement shall be subject to termination by Licensor without notice, or, where circumstances permit, upon five (5) days written notice to Licensee, upon objection being made by or on behalf of any governmental authority asserting proper jurisdiction thereon.

ARTICLE X

INDEMNITY AND INSURANCE

38. Licensee shall indemnify, protect and hold harmless Licensor and other joint users of said poles from and against any and all loss, costs, claims, demands, damage and/or expense arising out of any demand, claim, suit or judgment for damages to property and injury to or death of persons, including the officers, agents and employees of either party hereto and other joint users of said poles, including payment made under any Workmen's Compensation Law or under any plan for employees' disability and death benefits, which may arise out of or be caused by the erection, maintenance, presence, use or removal of said equipment or by the proximity of the respective cables, wires, apparatus and appliances of the parties hereto or other joint users of said poles, or arising out of any act or omission or alleged act or omission of Licensee, including any claims and demands of customers of Licensee or others, and irrespective of any fault, failure, negligence or alleged negligence on the part of Licensor or of any other joint user of said poles.

39. Licensee shall carry insurance, at its sole cost and expense, to protect the parties hereto and other joint users of said poles from and against any and all such claims and demands and from and against any and all actions, judgments, costs, expenses and liabilities of every name and nature which may arise or result, directly or indirectly, from or by reason of the acts or omissions of Licensee hereunder and irrespective of any fault, failure, negligence or alleged negligence on the part of Licensor or of any other joint user of said poles. The amounts of such insurance against liability due to personal injury to or death of persons shall be \$250,000 as to any one person and \$500,000 as to any one accident.

The amounts of such insurance against liability due to property damage shall be \$100,000 as to each accident and \$300,000 aggregate. Licensee shall also carry such insurance as will fully protect both it and Licensor from all claims under any Workmen's Compensation Laws that may be applicable.

40. All insurance required shall remain in force for the entire life of this Agreement. The Company or Companies issuing such insurance shall be approved by Licensor, and Licensor and other joint user shall be named as an additional insured in each of such policies. Licensee shall submit to Licensor certificates by each such Company to the effect that it has insured Licensee, Licensor and other joint users for all liabilities of Licensee, Licensor and other joint users under this Agreement and that it will not cancel or change any policy of insurance issued to Licensee except after thirty (30) days notice to Licensor, and on request, shall submit to Licensor any such policies of insurance for its approval. If renewal insurance premiums are not paid by Licensee prior to said 30 days notice, Licensor shall have the right to pay said premiums and be reimbursed by Licensee upon demand. Licensee shall promptly advise an authorized representative of Licensor of all claims relating to damage to property or injury to or death of persons, arising or alleged to have arisen in any manner by, or directly or indirectly associated with, the erection, maintenance, presence, use or removal of Licensee's equipment.

41. Licensee shall furnish bond or satisfactory evidence of contractual insurance coverage in the amount of fifteen thousand dollars (\$15,000) to guarantee the payment of any sums which may become due to Licensor for rentals, inspections or for work performed by Licensor for the benefit of Licensee under this Agreement, including the removal of Licensee's equipment pursuant to any of the provisions hereof. Such amount shall apply so long as Licensee attaches its equipment to no

more than one thousand (1,000) poles of Licensor. In the event that Licensee attaches its said equipment to more than one thousand (1,000) poles of Licensor, Licensee shall furnish further surety in the amount of seven thousand five hundred dollars (\$7,500) for each additional five hundred (500) poles of Licensor so used.

42. Licensee shall exercise special precautions to avoid damage to facilities of Licensor and of other joint users on said poles and hereby assumes all responsibility for any and all loss for such damage. Licensee shall make an immediate report to Licensor of the occurrence of any such damage and hereby agrees to reimburse Licensor for the expense incurred in making repairs necessitated thereby.

ARTICLE XI

PROTECTION AGAINST CLAIMS FOR LIBEL AND SLANDER, COPYRIGHT AND PATENT INFRINGEMENT

43. Licensee shall indemnify, protect and hold harmless Licensor from and against any and all claims for libel and slander, copyright and/or patent infringement arising by reason of attachment by Licensee of its equipment to Licensor's poles pursuant to this Agreement.

ARTICLE XII

GENERAL

44. - Licensee shall not assign, transfer or sublet this Agreement, or any of the privileges hereby granted to it, without the prior written consent of Licensor.

45. No use, however extended, of Licensor's poles under this Agreement shall create or vest in Licensee any ownership or property right in said poles, but Licensee's rights therein shall be and remain a mere license. Nothing herein contained shall be construed to compel Licensor to maintain any of its poles for a period longer than that demanded by its own service requirements.

46. Nothing herein contained shall be construed as affecting the rights or privileges previously conferred by Licensor to others, by contract or otherwise, to use any poles covered by this Agreement, and Licensor shall have the right to continue to extend such rights or privileges; the attachment privileges granted hereunder shall at all times be subject to such contracts and arrangements and nothing contained herein shall be construed as affecting the right of Licensor to grant attachment privileges to such other parties as it may desire to do so.

47. Failure to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

48. Subject to the provisions of Section 44 above, this Agreement shall extend to and bind the successors and assigns of the parties hereto.

ARTICLE XIII

PAYMENT OF BILLS

49. All amounts payable by Licensee to Licensor under the provisions of this Agreement shall, unless otherwise specified, be payable within thirty (30) days after presentation of bills therefor. Non-payment of any such amounts when due shall constitute a default under this Agreement.

ARTICLE XIV

NOTICE

50. Any notice provided in this Agreement to be given by either party hereto to the other shall be deemed to have been duly given when made in writing and deposited in the United States mail, postage prepaid, addressed as follows:

To Licensee:

O.V.C. Telecommunications, Inc.
1617 Fox Haven Road
Richmond, Kentucky 40475

To Licensor:

GENERAL TELEPHONE COMPANY OF KENTUCKY

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be duly executed as of the day and year first above written.

Mr. Terry Vogt
Staff Assistant
OVC Telecommunications, Inc.
P. O. Box 727
Richmond, Kentucky 40475

Dear Mr. Vogt:

Per your letter of May 29, 1981, we have included Owingsville in our CATV Pole Lease Agreement with your Company as an area which you will be attaching to our poles in the near future. Attached are two copies of the face sheet of the agreement previously signed by both Companies.

This page has been adjusted to include Owingsville. Please initial the inclusion and return one copy to us for our files.

Respectfully yours,

William E. Ashbrook
Connecting Company Relations Manager

CC: Mr. Del Biddle

CATV POLE LEASE AGREEMENT

THIS AGREEMENT made as of the 1 day of June, 1981 between
 GENERAL TELEPHONE COMPANY OF KENTUCKY, a corporation of the
 State of Delaware, having its principal office at
Lexington, Kentucky, hereinafter called Licensor,
 and O.V.C. Telecommunications, Inc., a corporation of the
 State of _____, having its principal office at
 _____, hereinafter called Licensee,

W I T N E S S E T H:

WHEREAS, Licensee (proposes to furnish) (is furnishing) a CATV service, as
 Morehead, Lebanon, Nicholasville, Midway, Owingsville,
 hereinafter defined, to residents of Wilmore, Olive Hill, Berea, Versailles and *WEA*
 (intends to erect and maintain) (has erected and is maintaining) an antenna
 tower (s) located at _____
 and (proposes to install) (has installed) coaxial television cables, amplifiers
 and drop wires, wires and appliances together with associated cable messengers,
 anchors and other appurtenances, hereinafter sometimes collectively called the
 "equipment," throughout the area to be served and desires (to attach) (to
 continue to attach) such equipment to poles of Licensor and/or to poles used
 jointly by Licensor and other companies; and *Jan*

WHEREAS, Licensor is willing (to permit) (to continue to permit), to the
 extent it may lawfully do so, the attachment of said equipment to its poles where,
 in its judgment, such use will not interfere with its own service requirements or,
 it may be advised, the service requirements of other joint users, including
 considerations of economy and safety.

THIS AGREEMENT made as of the 19th day of September, 1975, between
 GENERAL TELEPHONE COMPANY OF Kentucky, a corporation of the
 State of Kentucky, having its principal office at
Lexington, Kentucky, hereinafter called Licensor,
 and C-K Video, Inc., a corporation of the
 State of West Virginia, having its principal office at
Kenova, West Virginia, hereinafter called Licensee,

W I T N E S S E T H:

WHEREAS, Licensee (proposes to furnish) (~~is furnishing~~) a CATV service, as hereinafter defined, to residents of Catlettsburg, Kentucky and (~~intends to establish~~) (has erected and is maintaining) an antenna tower (s) located at Kenova, West Virginia and (proposes to install) (~~has installed~~) coaxial television cables, amplifiers and drop wires, wires and appliances together with associated cable messengers, anchors and other appurtenances, hereinafter sometimes collectively called the "equipment," throughout the area to be served and desires (to attach) (~~to connect~~) such equipment to poles of Licensor and/or to poles used jointly by Licensor and other companies; and

WHEREAS, Licensor is willing (to permit) (~~to allow~~), to the extent it may lawfully do so, the attachment of said equipment to its poles where, in its judgment, such use will not interfere with its own service requirements or, it may be advised, the service requirements of other joint users, including considerations of economy and safety.

NOW, THEREFORE, in consideration of the mutual covenants, terms and conditions herein contained, the parties hereto do mutually covenant and agree as follows:

ARTICLE I

DEFINITIONS

1. All references herein to "Licensor's poles" or "its poles" shall mean poles solely owned by the Licensor, jointly owned by Licensor or the pole space rented or obtained by other arrangements by Licensor from another owner.

2. All references herein to "joint user" shall mean (1) a company or municipality which together with Licensor has a percentage ownership in a pole, (2) a public utility company or municipality which has attachment privileges on Licensor's poles, or (3) a public utility company which owns poles on which Licensor has attachment privileges.

3. All references herein to "CATV service" shall mean the transmission to subscribers of off-the-air pick up of broadcast signals or the transmission without separate charge of locally originated closed circuit television to the subscribers of off-the-air service.

ARTICLE II

SCOPE OF AGREEMENT

4. Licensor hereby agrees to license and permit Licensee (to attach) ~~(XXXXXX XXXXXXXXXX XXXXXXX)~~ its equipment, for the primary purpose of furnishing CATV service within the area outlined in red on the map attached hereto as Exhibit A, to such of its poles as are, in the judgment of the Licensor, suitable and available for such attachments, subject to the conditions and limitations contained herein.

5. Licensee agrees that its equipment (to be attached) (~~attached~~) to Licensor's poles shall be installed for the purpose of providing CATV service and shall be used primarily for furnishing CATV service. Any residual channel capacity, however, may be used by Licensee for any lawful purpose.

6. Licensee agrees to secure from the proper franchising authority, a franchise to erect and maintain its equipment within public streets, highways and other thoroughfare, provided such franchising authority exists, and shall secure any and all consents, permits or licenses that may be legally required for its operations hereunder. Prior to the execution of the Agreement, Licensee shall deliver to Licensor documentation satisfactory to Licensor evidencing that all such franchises, consents, permits or licenses have been obtained.

7. Licensee agrees to assist in, and bear the expense of, securing any consents, permits or licenses that may be required by Licensor by reason of this Agreement.

ARTICLE III

APPLICATION FOR PERMISSION TO ATTACH

8. At least ninety (90) days prior to the time Licensee desires to attach its equipment to any of Licensor's poles, it shall make written application on the form marked Exhibit B attached hereto and made a part hereof, in the number of copies from time to time prescribed by Licensor. Upon approval of said application, Licensor shall return one copy of Exhibit B to the Licensee bearing the endorsement of its permission.

9. Upon receiving such endorsed copy of said application, but not sooner, Licensee shall have the right, subject to Section 13 herein, to install, maintain and use its equipment described in said application upon the poles identified therein, provided that Licensee shall complete each installation within such time limit as may be specified on said approved application; provided, however, that before commencing any such installation, Licensee shall notify Licensor of the time when it proposes to do such work sufficiently in advance thereof so that Licensor may arrange to have its representative present when such work is performed and, in the event Licensor elects to have its representative present, Licensee shall reimburse Licensor for the cost and expense thereof.

10. Where costs are involved in the rearrangement of Licensor's or other facilities to accommodate Licensee's equipment, two signed copies of said application shall be returned to Licensee detailing the costs in the space provided thereon for that purpose. Approval of said application by Licensor is subject to receiving authorization from Licensee, on said application in the space provided thereon for that purpose, to make changes and rearrangements, at Licensee's sole risk and expense, detailed by Licensor with said copies of said application.

11. Licensee shall not have the right to place, nor shall it place, any additional equipment upon any pole used by it hereunder without first making application therefor and receiving Licensor's permission to do so, all as prescribed in Section 8 herein; nor shall Licensee change the position of any equipment attached to any such pole without Licensor's prior written approval. The provisions of this Section shall not restrict the attachment of television drops to television crossarms or television cable messenger. It is agreed that a charge of five dollars (\$5.00) per attachment shall be levied against and paid by Licensee to Licensor for any unauthorized attachment made by Licensee to Licensor's poles or facilities. This charge will be in addition to rental charges from the time of said unauthorized attachment, rearrangement costs, or other appropriate charges.

In the event that the time of the unauthorized attachment cannot be determined it shall be deemed to have occurred on the date succeeding the day on which the last joint survey was made in accordance with paragraph 14 hereof.

12. It is agreed and understood that in the case of jointly-used poles, permission to attach thereto shall be subject to Licensor's obtaining approval from such joint users and/or owners whenever necessary.

ARTICLE IV

SPECIFICATIONS

13. Licensee, at its own cost and expense, shall construct, maintain and replace its attachments on Licensor's poles in accordance with (i) such requirements and specifications as Licensor shall from time to time prescribe, (ii) EEI Publication M12 entitled "Specifications for the Construction and Maintenance of Jointly Used Wood Pole Lines Carrying Supply and Communication Circuits", (iii) the requirements and specifications of the National Electrical Safety Code, Sixth Edition, and any amendments or revisions of said specifications or code, (iv) in compliance with any rules or orders now in effect or that hereafter may be issued by any regulatory Commission or other authority having jurisdiction, and (v) the requirements and specifications of the National Electrical Code 1965 Edition and any amendments or revisions of said specifications or code. In addition, all attachments shall be made by Licensee in accordance with this Agreement and Exhibits 1-10 attached hereto and made a part hereof. Licensee agrees to comply, at its sole risk and expense, with the specifications of all Exhibits attached hereto, as revised from time to time by Licensor in accordance with the provisions of this Article IV..

ARTICLE V

INSTALLATION AND MAINTENANCE OF ATTACHMENTS AND POLES

14. The exact location of Licensee's attachments on poles shall be determined from a joint survey to be made, at such times as shall be mutually

WIN1004

agreed upon, by representatives of Licensor, Licensee and, if desired by a joint user, its representative. Licensor may inspect each new installation of Licensee on its poles and in the vicinity of its lines or appliances and may make periodic inspections of the entire plant of Licensee as plant conditions may warrant; and Licensee shall, on demand, reimburse Licensor for the cost of such surveys and inspections. Such inspections shall not operate to relieve Licensee of any responsibility, obligation or liability assumed under this Agreement.

15. Licensor at its option and at the sole risk and expense of Licensee, may make the attachment of Licensee's equipment to poles solely owned by Licensor and joint users' poles whenever, in its judgment, Licensor deems such procedure to be appropriate. Licensee agrees to furnish all such materials and equipment and further agrees, on demand, to reimburse Licensor for the entire installation costs thereby incurred. Licensee shall deposit with Licensor, prior to such installation, sufficient sums estimated by Licensor to be adequate to reimburse it for such work. In individual cases where, in Licensor's judgment, such procedure is desirable, Licensor may install such equipment upon poles owned by others at the request of Licensee and upon prior written approval of the owners of such poles, and Licensee will reimburse Licensor for the entire expense thereby incurred.

16. Where Licensee's attachments can be accommodated on poles of Licensor by rearranging or changing the facilities of Licensor or other joint users, Licensee agrees to pay Licensor in advance the cost of making such rearrangements or changes. Strengthening of poles (guying) required to accommodate the attachments of Licensee and the bonding of Licensee's strand to that of Licensor shall be performed by Licensee at his sole risk and expense. Such work, however, may be performed by Licensor at its option, and in such event Licensee shall pay to Licensor in advance the cost of all such work.

17. Upon written notice from Licensor, Licensee shall relocate or replace its equipment attached to Licensor's poles, or transfer the same to substituted poles, or perform any other work in connection with said equipment that may be requested by Licensor, at Licensee's sole risk and expense; provided, however, that in cases of emergency Licensor may, at Licensee's sole risk and expense, arrange to relocate or replace the facilities attached to said poles by Licensee, transfer them to substituted poles or perform any other work in connection with said facilities that may be required in the maintenance, replacement, removal or relocation of said poles, the facilities thereon or the equipment which may be placed thereon, or for the service needs of Licensor.

18. Licensee shall notify Licensor of the time when it proposes to replace any of its equipment attached to Licensor's poles sufficiently in advance thereof so that Licensor may decide whether it should perform such work pursuant to paragraph 15 hereof and, in such event, Licensee shall reimburse Licensor for the entire expense thereby incurred.

19. All tree trimming required on account of Licensee's equipment shall be done by Licensee at its sole risk and expense and in a manner satisfactory to Licensor and any other joint users.

20. Licensee shall, at its sole risk and expense, maintain all of its attachments on Licensor's poles in safe condition and in thorough repair.

21. Licensor reserves to itself, its successors and assigns the right to maintain its poles and to operate its facilities thereon in such manner as will best enable it to fulfill its public service requirements. Licensor or other joint users shall not be liable to Licensee for any interruption to the service of Licensee or for interference with the operation of the equipment of Licensee arising in any manner whatsoever.

22. Nothing herein contained shall give to the Licensee the right to place a crossarm on any pole. If a crossarm is required to accommodate the facilities of the Licensee, then Licensee shall so state the reasons therefore in its application for attachment.

23. Licensee shall not at any time make any additions to, or changes in, the location of its attachments on the poles covered by this Agreement without the prior written consent of Licensor except, in cases of emergency, when oral permission shall have been obtained from Licensor's authorized representative at ASHLAND, KENTUCKY and subsequently confirmed in writing.

24. If Licensee should require the location of its equipment upon any public thoroughfare or other public or private property in the conduct of its business in the territory covered by this Agreement and Licensor shall not have pole facilities so located to fulfill Licensee's requirements, Licensee shall notify Licensor of its need for such pole facilities in order that Licensor may determine whether it wishes to place pole facilities in such locations for Licensor's requirements. If Licensor so elects, it shall erect pole facilities in such locations adequate to meet the service requirements of both Licensee and Licensor, and Licensee shall thereupon make application for permission to place its equipment thereon as provided in this Agreement.

25. Nothing in this Agreement shall be construed to obligate Licensor to grant Licensee permission to use any particular pole and Licensor at its discretion may revoke permission theretofore granted to Licensee with respect to any particular pole.

26. Whenever, pursuant to the provisions of this Agreement, Licensee shall be required to remove its attachments from any pole, such removal shall be made, except as otherwise specifically provided, within thirty (30) days following the giving of notice to Licensee by Licensor to so remove. Upon failure of Licensee to remove such attachments within such thirty (30) days or as otherwise required, Licensor may remove them and charge all costs associated with such removal to Licensee.

27. Licensee agrees that it shall not interse~~t~~ poles where Licensor's facilities are located nor shall it locate poles, guys, or other facilities where they will interfere with access to Licensor's poles or to poles to be constructed by Licensor.

ARTICLE VI

COST OF POLE REPLACEMENTS

28. Whenever Licensee applies for permission to attach to a pole that is considered by Licensor to be insufficient in height or strength for accommodation of Licensee's attachments, or in the event that Licensor or a joint user of the pole shall require the space occupied by Licensee's existing attachments, Licensor shall notify Licensee of such fact and of the estimated cost to Licensee of replacing such pole with a pole which will accommodate the attachments of Licensee, Licensor and any such joint user. Within thirty (30) days of such notification, Licensee shall either notify Licensor (i) of its approval of such replacement or (ii) of its cancellation of the application with respect to such pole or (iii) in the case of existing attachments, of its election to remove its attachments from the pole.

29. In the event of Licensee's approval of such replacement, Licensor shall replace the pole and Licensee shall pay to Licensor in advance the charges therefor, computed as follows:

The total cost of the new pole, the removal of the old pole, the transferring of Licensor's and any such joint user's attachments from the old to the new pole and such other costs, if any, necessitated by Licensee's requirements, less the total of the following: accrued depreciation on the old pole, salvage, if any, and the cost of such portion of the new pole, if any, which represents space reserved for the use of Licensor or any such joint user greater than that provided for them on the old pole less appropriate contribution by any other licensee.

ARTICLE VII

RIGHTS OF WAY, LEGAL AUTHORITY AND DEFAULT

30. Upon execution of this Agreement, Licensee shall submit evidence satisfactory to Licensor of its authority to erect and maintain its equipment within public streets, highways and other thoroughfares and shall secure any necessary license, permit or consent from Federal, state or municipal authorities and from the owners of property now or hereafter required to construct and maintain such equipment at the locations of poles of Licensor to which it desires to attach. In the event any such franchise, license, permit or consent is revoked or is thereafter denied to Licensee for any reason, permission to attach to Licensor's

poles shall immediately terminate, Licensee shall forthwith remove its equipment from Licensor's poles and Licensor at its option may forthwith terminate this Agreement.

31. Upon notice from Licensor to Licensee that the cessation of the use of any pole or poles has been requested or directed by Federal, state or municipal authorities, or property owners, permission to attach to such pole or poles shall immediately terminate and Licensee shall forthwith remove its equipment therefrom

32. If Licensee shall fail to comply with any of the provisions of this Agreement, including the specifications hereinbefore referred to, or defaults in any of its obligations under this Agreement, and shall fail within thirty (30) days after written notice from Licensor to correct such default or non-compliance, Licensor may, at its option forthwith terminate this Agreement in its entirety or, at its election, revoke the permit covering the pole or poles involved in such default or non-compliance.

ARTICLE VIII

33. For the privilege of placing and maintaining attachments on Licensor's poles, Licensee shall pay annually to Licensor the sum of _____ dollars for each such pole times the total number of poles used by Licensee on the date of computation. Rentals shall be payable annually in advance to Licensor on the first day of January of each year during which this agreement remains in effect.

From the effective date of the permit for such attachments, which shall be the date when Licensor's poles are available for the attachment of Licensee's equipment, to the date from which the annual rentals provided in the paragraph above shall accrue, the rental per month or fraction thereof shall be payable on a prorated basis.

34. In the event that Licensor files a tariff during the term of the Agreement covering attachments made to its poles, Licensor reserves the right to substitute the rates and charges covered by such tariff in place of the rentals set forth in Section 33 above.

ARTICLE IX

TERM AND TERMINATION OF AGREEMENT

35. This Agreement, if not previously terminated in accordance with the provisions hereof, shall continue in effect for a term of one year ~~years~~ and thereafter until terminated as provided herein. The Agreement may be terminated at the end of said time or at any time thereafter by either party giving to the other party at least ninety (90) days' written notice. Upon termination of the Agreement in accordance with any of its terms, Licensee shall remove its said equipment from all poles of Licensor within thirty (30) days thereafter.

36. Licensee may at any time remove its equipment attached to any pole or poles of Licensor, but shall immediately give Licensor written notice of such removal in the form of Exhibit C attached hereto and made a part hereof. No credit or refund of any rental shall be allowed Licensee on account of such removal.

37. This Agreement shall be subject to termination by Licensor without notice, or, where circumstances permit, upon five (5) days written notice to Licensee, upon objection being made by or on behalf of any governmental authority asserting proper jurisdiction thereon.

ARTICLE X

INDEMNITY AND INSURANCE

38. Licensee shall indemnify, protect and hold harmless Licensor and other joint users of said poles from and against any and all loss, costs, claims, demands, damage and/or expense arising out of any demand, claim, suit or judgment for damages to property and injury to or death of persons, including the officers, agents and employees of either party hereto and other joint users of said poles, including payment made under any Workmen's Compensation Law or under any plan for employees' disability and death benefits, which may arise out of or be caused by the erection, maintenance, presence, use or removal of said equipment or by the proximity of the respective cables, wires, apparatus and appliances of the parties hereto or other joint users of said poles, or arising out of any act or omission or alleged act or omission of Licensee, including any claims and demands of customers of Licensee or others, and irrespective of any fault, failure, negligence or alleged negligence on the part of Licensor or of any other joint user of said poles.

39. Licensee shall carry insurance, at its sole cost and expense, to protect the parties hereto and other joint users of said poles from and against any and all such claims and demands and from and against any and all actions, judgments, costs, expenses and liabilities of every name and nature which may arise or result, directly or indirectly, from or by reason of the acts or omissions of Licensee hereunder and irrespective of any fault, failure, negligence or alleged negligence on the part of Licensor or of any other joint user of said poles. The amounts of such insurance against liability due to personal injury to or death of persons shall be \$250,000 as to any one person and \$500,000 as to any one accident.

The amounts of insurance against liability due to property damage shall be \$100,000 as to each accident and \$300,000 aggregate. Licensee shall also carry such insurance as will fully protect both it and Licensor from all claims under any Workmen's Compensation Laws that may be applicable.

40. All insurance required shall remain in force for the entire life of this Agreement. The company or companies issuing such insurance shall be approved by Licensor, and Licensor and other joint user shall be named as an additional insured in each of such policies. Licensee shall submit to Licensor certificates by each such company to the effect that it has insured Licensee, Licensor and other joint users for all liabilities of Licensee, Licensor and other joint users under this Agreement and that it will not cancel or change any policy of insurance issued to Licensee except after thirty (30) days notice to Licensor and, on renewal shall submit to Licensor any such policies of insurance for its approval. If renewal insurance premiums are not paid by Licensee prior to said 30 days notice, Licensor shall have the right to pay said premiums and be reimbursed by Licensee upon demand. Licensee shall promptly advise an authorized representative of Licensor of all claims relating to damage to property or injury to or death of persons, arising or alleged to have arisen in any manner by, or directly or indirectly associated with, the erection, maintenance, presence, use or removal of Licensee's equipment.

41. Licensee shall furnish bond or satisfactory evidence of contractual insurance coverage in the amount of ten thousand dollars (\$10,000) to guarantee the payment of any sums which may become due to Licensor for rentals, inspection or for work performed by Licensor for the benefit of Licensee under this Agreement including the removal of Licensee's equipment pursuant to any of the provisions hereof. Such amount shall apply so long as Licensee attaches its equipment to

more than one hundred (100) poles of Licensor. In the event that Licensee attaches its said equipment to more than one hundred (100) poles of Licensor, Licensee shall furnish further surety in the amount of five thousand dollars (\$5,000) for each additional fifty (50) poles, of Licensor so used.

42. Licensee shall exercise special precautions to avoid damage to facilities of Licensor and of other joint users on said poles and hereby assumes all responsibility for any and all loss for such damage. Licensee shall make an immediate report to Licensor of the occurrence of any such damage and hereby agrees to reimburse Licensor for the expense incurred in making repairs necessitated thereby.

ARTICLE XI

PROTECTION AGAINST CLAIMS FOR LIBEL AND SLANDER, COPYRIGHT AND PATENT INFRINGEMENT

43. Licensee shall indemnify, protect and hold harmless Licensor from and against any and all claims for libel and slander, copyright and/or patent infringement arising by reason of attachment by Licensee of its equipment to Licensor's poles pursuant to this Agreement.

ARTICLE XII

GENERAL

44. Licensee shall not assign, transfer or sublet this Agreement, or any of the privileges hereby granted to it, without the prior written consent of Licensor.

45. The use, however extended, of Licensor's poles under this Agreement shall create or vest in Licensee any ownership or property right in said poles, but Licensee's rights therein shall be and remain a mere license. Nothing herein contained shall be construed to compel Licensor to maintain any of its poles for a period longer than that demanded by its own service requirements.

46. Nothing herein contained shall be construed as affecting the rights or privileges previously conferred by Licensor to others, by contract or otherwise, to use any poles covered by this Agreement, and Licensor shall have the right to continue to extend such rights or privileges; the attachment privileges granted hereunder shall at all times be subject to such contracts and arrangements and nothing contained herein shall be construed as affecting the right of Licensor to grant attachment privileges to such other parties as it may desire to do so.

47. Failure to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

48. Subject to the provisions of Section 44 above, this Agreement shall extend to and bind the successors and assigns of the parties hereto.

ARTICLE XIII

PAYMENT OF BILLS

49. All amounts payable by Licensee to Licensor under the provisions of this Agreement shall, unless otherwise specified, be payable within thirty (30) days after presentation of bills therefor. Non-payment of any such amounts when due shall constitute a default under this Agreement.

ARTICLE XIV

NOTICE

50. Any notice provided in this Agreement to be given by either party hereto to the other shall be deemed to have been duly given when made in writing and deposited in the United States mail, postage prepaid, addressed as follows:

| APPENDIX IX - RULES OF ATTACHMENTS | 33 |

AGREEMENT TERMS AND CONDITIONS

1.0 SCOPE OF AGREEMENT

- 1.01 The purpose of this Agreement is to set forth the rates, terms, conditions, and procedures under which the Licensor will provide Licensee access to Licensor's poles, ducts, innerducts, conduits, and rights-of-way. **This agreement does NOT allow access to Windstream Central Offices. A separate agreement is required for interconnection access.**
- 1.02 Subject to the provisions of this Agreement, Licensor will issue to Licensee for any lawful communications purpose, revocable, nonexclusive licenses authorizing the attachment of Licensee's cables, equipment, and facilities to Licensor's poles or the placing of Licensee's cables, equipment, and facilities in Licensor's conduit system or within right-of-way owned or controlled by Licensor.
- 1.03 No use, however extended, of Licensor's poles, conduit system or right-of-way nor payment of any fees or charges required under this Agreement shall create or vest in Licensee any ownership or property rights in said poles, conduit system or right-of-way, but Licensee's rights therein shall be and remain a mere license. Nothing herein contained shall be construed to compel Licensor to construct, retain, extend, place, or maintain any facilities not needed for its own service requirements, unless otherwise required by law.
- 1.04 Licensee recognizes that Licensor has heretofore entered into, or may in the future enter into, agreements and arrangements with others which are not party to this Agreement regarding the poles, conduit system and right-of-way covered by this Agreement. Nothing herein contained shall be construed as a limitation, restriction or prohibition against Licensor with respect to such other agreements or arrangements. The rights of Licensee shall at all times be subject to any present or future joint use arrangement between Licensor and any other public utility or government agency.

2.0 DEFINITIONS

- 2.01 "Attachments" - Any attachment to a pole, use of a duct or innerduct, use of a conduit, or using right-of-way owned or controlled by Licensor.
- 2.02 "Attachment Fee" - Fee paid annually per attachment on a pole, or in a duct, innerduct, conduit, or right-of-way.
- 2.03 "Buried Cable" - Cable located below the surface of the ground but not in Licensor's conduit system.
- 2.04 "Conduit System" - Any combination of ducts, innerducts, conduits, manholes, and handholes owned or controlled by Licensor that is a reusable passage or opening in, on, under or through the ground, or a structure such as a building or bridge. The term includes "inner ducts" created by subdividing a duct into smaller channels.
- 2.05 "Hazardous Materials" -
- (A) Any substance, material or waste now or hereafter defined or characterized as hazardous, toxic or dangerous as defined by the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA") of 1980, as amended, and other federal, state, and local health, safety,

and environmental laws, ordinances, statutes, and rules, including but not limited to the Occupational Safety and Health Act ("OSHA").

- (B) Any substance, material or waste now or hereafter classified as a contaminant or pollutant under any law, rules, ordinance, or authority.
 - (C) Any other substance, material or waste, the manufacture, processing, distribution, use, treatment, storage, placement, disposal, removal or transportation of which is now or hereafter subject to regulation under any law, ordinance, statute, rule or regulation of any governmental body or authority.
- 2.06 "Make Ready Work" - All work to prepare Licensor's poles, ducts, innerducts, conduits, rights-of-way, and related facilities for the requested occupancy or attachment of Licensee's facilities but not the actual placement of attachments or administrative activities related to inquiries, verifications, requests or applications.
- 2.07 "Poles"- Licensor owned and poles owned by others to the extent that and for so long as Licensor has the right to permit others to be attached in the communications space.
- 2.08 "Pole Attachment Request" or "PAR" - A written request from Licensee to attach its facilities to Poles, submitted in accordance with this Agreement. With respect to pole attachment agreements in effect prior to the date the Parties executed this Agreement, the term PAR shall be deemed to include Pole attachment requests made by letter or similar document.
- 2.09 "Right-of-Way" - Right-of-way owned or controlled by Licensor. It does not include attachment or use of cables, poles, equipment or facilities located on a particular right-of-way. It may include private easement, or in certain instances public right-of-way granted by a governmental authority or a utility easement such as in a subdivision or development.

3.0 TERM OF AGREEMENT

- 3.01 This Agreement shall become effective upon its execution and if not terminated in accordance with the provisions of other Articles hereof, shall continue in effect for a term of not less than three (3) years, provided, however, that at any time after the first year of said term the rates, fees and charges set forth may be increased or decreased by written notice from Licensor to Licensee on a nondiscriminatory basis with respect to similar rates, fees and charges of other similar licensees.
- 3.02 Either Party may terminate this Agreement with at least a (6) six month written notice to the other Party.
- 3.03 Upon termination of the Agreement in accordance with any of its terms, all outstanding licenses in connection therewith shall terminate and shall be surrendered and Licensee shall within 60 days of date of termination remove all cables, equipment and facilities at the cost and expense of Licensee. If Licensor in its sole discretion, deems it is impractical to remove Licensee's cable, equipment and facilities from Licensor's rights-of-way, they may be abandoned in place.

4.0 LEGAL AUTHORITY

4.01 Licensee will obtain from public authorities and private owners of property any and all permits, franchises, licenses and grants necessary for the lawful exercise of any license granted hereunder

5.0 APPLICABLE LAW

5.01 This Agreement, and the rights and obligations contained in it, shall be governed and construed under the laws of the state in which the attachments hereunder are to be located.

6.0 SUBSEQUENT LAW

6.01 The terms and conditions of this Agreement shall be subject to any and all applicable laws, rules, regulations or guidelines now in effect and that subsequently may be prescribed by any federal, state or local governmental authority. To the extent required by any such subsequently prescribed law, rule, regulation or guideline, the Parties agree to modify, in writing, the affected term(s) and conditions(s) of this Agreement to bring them into compliance with such law, rule, regulation or guideline. Should any term of this Agreement be determined by a court or agency with competent jurisdiction to be unenforceable, all other terms of this Agreement shall remain in full force and effect.

7.0 DISCLAIMER OF WARRANTIES

7.01 Except as specifically set forth in this Agreement, Licensor makes no warranties, express or implied, including, but not limited to, any implied warranties of merchantability or fitness for a particular purpose.

8.0 LICENSE NOT EXCLUSIVE

8.01 Nothing herein contained shall be construed as a grant of any exclusive license, right or privilege to Licensee. Licensor shall have the right to grant, renew and extend rights and privileges to others not parties to this Agreement, by contract or otherwise, to use any poles, conduit system or right-of-way covered by this Agreement, under such terms and conditions, as Licensor shall prescribe.

9.0 ASSIGNMENT OF RIGHTS

9.01 Licensee shall not assign; transfer or sublet the privileges hereby granted, or sell, lease or otherwise permit the use of its facilities on or any part thereof (all of the foregoing being "Transfers"), without prior consent in writing of Licensor which consent shall not be unreasonably withheld, delayed or conditioned; provided, however, that either Party may so Transfer its rights and obligations under this Agreement without such consent to (i) any entity said Party, directly or indirectly, controls, is controlled by or is under common control with or (ii) any entity acquiring all or substantially all of said Party's assets or equity, by providing written notice to the other Party of such Transfer. Any attempted Transfer that is not permitted under this Section 9.01 is void *ab initio*.

9.02 Subject to the provisions of this Agreement, this Agreement shall extend to and bind the successors and authorized assigns of the Parties hereto.

10.0 LIABILITY AND DAMAGES

- 10.01 Licensor reserves to itself, its successors and assigns, the right to maintain its poles, conduit system and right-of-way and to operate its facilities thereon in such manner as will best enable it to fulfill its own service requirements. Licensor shall not be liable to Licensee for any interruption to service of Licensee or for interference with the operation of the cables, equipment or facilities of Licensee arising in any manner out of the use of Licensor's poles, conduit system and right-of-way except caused by Licensor's sole negligence, willful misconduct or material breach of this Agreement, in which case Licensor's liability shall be limited to the reasonable cost of repair of Licensee's damaged cable, equipment or facilities, if any.
- 10.02 Licensee shall exercise special precautions to avoid damaging the cables, poles, conduits, right-of-way equipment and facilities of Licensor and of other licenses and hereby assumes all responsibility for any and all loss, damages, costs and expenses. Licensee shall make an immediate report to Licensor of the occurrence of any such damage and hereby agrees to reimburse the respective owners for the expense incurred in making repairs.
- 10.03 Licensee shall indemnify and hold harmless Licensor against any and all claims, demands, causes of action, damages, costs or liabilities of every kind and nature whatsoever, except to the extent caused by Licensor's negligence or willful misconduct, which may arise out of or be caused by:
- (A) The erection, maintenance, presence, use or removal of Licensee's cable, equipment, and facilities on Licensor's poles, and within Licensor's conduit system and right-of-way
 - (B) Any act of Licensee on or in the vicinity of Licensor's poles, conduit system and right-of-way, or
 - (C) Any interruption, discontinuance, or interference with Licensor's service to any of its subscribers occasioned or claimed to have been occasioned by any action of Licensee pursuant to or consistent with this Agreement. Licensee shall, upon demand and at its own sole risk and expense, defend any and all suits, actions or other legal proceeding brought or instituted against Licensor on any such claim, demand or cause of action, and shall pay and satisfy any judgment or decree rendered against Licensor therein, and Licensee shall reimburse Licensor for any and all legal expense incurred by Licensor in connection therewith. Licensee shall also indemnify, protect and hold harmless Licensor from any and all claims and demands of whatever kind which arise directly or indirectly from the operation of Licensee's facilities including taxes, special charges by others, claims and demands for damages or loss for infringement of copyright, for libel and slander for unauthorized use of television broadcast programs, and for unauthorized use of other program material, and from and/or against all claims and demands for infringement of patents with respect to the manufacturer, use and operation of Licensee's equipment whether arising from the use of Licensee's equipment in combination with Licensor's poles, conduit system, right-of-way or otherwise.
- 10.04 Licensee agrees to comply under the Workmen's Compensation Laws of the state in which attachments are to be located hereunder, and also agrees to cause every subcontractor of Licensee to comply with and qualify under said laws, and shall furnish copies of Certificates demonstrating such compliance to Licensor prior to commencement of the work.

11.0 DEFAULT AND REMEDIES

- 11.01 In addition to Material Defaults defined anywhere else in this Agreement, any one of the following shall be deemed the occurrence of a Material Default under this Agreement:
- (A) Failure by Licensee to pay any fee or other sum required to be paid under the terms of this Agreement and such default continues for a period of thirty (30) calendar days after written notice thereof to Licensee.
 - (B) Failure by either Party to perform or observe any other term, condition, covenant, obligation, or provision of this Agreement and such default continues for a period of thirty (30) business days after written notice thereof from the other Party (provided that if such default is not curable within a thirty (30) business day period, the period will be extended if the Party substantially commences to cure such default and proceeds diligently thereafter to effect such cure).
 - (C) The filing of any tax or mechanic's lien against Poles because of any act or omission by Licensee which is not bonded or discharged within thirty (30) calendar days of the date Licensee receives notice that such lien has been filed;
 - (D) Licensor or Licensee's voluntary or involuntary bankruptcy;
 - (E) Licensee's knowing use or maintenance of its Attachments in violation of any law or regulation, or in aid of any unlawful act or undertaking;
 - (F) If any authorization which may be required of Licensee by any governmental or private authority for the placement, operation, or maintenance of Licensee's Attachments is denied or revoked.
- 11.02 In the event of a Material Default and subject to any other applicable provision of this Agreement, the Non-defaulting Party, without any further notice to the Defaulting Party (except where expressly provided for below or required by applicable law), may do any one or more of the following:
- (A) Perform on behalf and at the expense of the Defaulting Party, any obligation of the Defaulting Party under this Agreement which the Defaulting Party has failed to perform and of which the Non-defaulting Party shall have given the Defaulting Party notice, the cost of which performance shall be paid by the Defaulting Party to the Non-defaulting Party upon demand;
 - (B) Terminate this Agreement by giving sixty (60) business days written notice of such termination to Licensee and remove Licensee's Attachments and store Licensee's facilities in a public warehouse or elsewhere at the expense of and for the account of Licensee without Licensor being deemed guilty of trespass or conversion, and without Licensor becoming liable for any loss or damages to Licensee occasioned thereby; or
 - (C) Exercise any other legal or equitable right or remedy that the Non-defaulting Party may have.
- 11.03 The Defaulting Party shall repay to the Non-defaulting Party upon demand any costs and expenses incurred by the Non-defaulting Party (including, without limitation, reasonable attorneys' fees) in successfully enforcing this Agreement.
- 11.04 Upon termination of this Agreement by the Non-defaulting Party, the Defaulting Party shall remain liable to the Non-defaulting Party for any and all fees, other payments and damages which may be due or sustained in accord with this Agreement prior to such termination, all reasonable costs, fees and expenses,

including, without limitation, reasonable attorney' fees incurred by the Non-defaulting Party in pursuit of its remedies hereunder.

- 11.05 All rights and remedies of the Non-defaulting Party set forth in this Agreement shall be cumulative and none shall exclude any other right or remedy, now or hereafter allowed by or available under any statute, ordinance, rule of court, or the common law, either at law or in equity, or both.

12.0 INDEMNIFICATION

- 12.01 Licensee shall compensate Licensor for the full actual loss, damage or destruction of Licensor's property that in any way arises from or is related to this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation, or maintenance of Licensee's Attachments).
- 12.02 Each party agrees to defend, indemnify, protect and hold harmless the other and the other's officers, directors, employees, shareholders, successors, assigns, agents, affiliates, representatives, partners, and contractors from and against any and all third party claims, actions, administrative proceedings (including, without limitation, informal proceedings), judgments, damages, penalties, fines, cost, liabilities, interests, or loss, including, without limitation, reasonable attorneys' fees and expenses, consultant fees, and expert fees, together with all other costs and expenses of any kind or nature suffered by or asserted against the indemnified party in any way arising out of or connected with this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation or maintenance of Licensee's facilities, unless caused by the sole negligence or willful misconduct on the part of Licensor or Licensor's affiliates, agents, officers, employees and assigns). Each party expressly assumes all liability for actions by its affiliates, agents, officers, employees, or its contractors and expressly waives any immunity from the enforcement of this indemnification provision that might otherwise be provided by workers' compensation law or by other state or federal laws.
- 12.03 Without limiting any of the foregoing, Licensee assumes all risk of, and agrees to relieve Licensor of any and all liability for, loss or damage (and the consequences of loss or damage) to any facilities placed on Licensor's property and any other financial loss sustained by Licensee, except to the extent caused by the negligence or willful misconduct on the part of Licensor or Licensor's agents, officers, employees, and assigns.
- 12.04 Without limiting the foregoing, Licensee expressly agrees to indemnify, defend, and hold harmless Licensor and Licensor's agents, officers, employees and assigns from any and all claims asserted by end users/customers of Licensee in any way arising out of or in connection with this Agreement or Licensee's facilities, except to the extent caused by the negligence or willful misconduct on the part of Licensor or Licensor's agents, officers, employees, and assigns. or its contractors.
- 12.05 Notwithstanding anything to the contrary in this Agreement, Licensee further shall indemnify and hold harmless Licensor, its agents, officers, employees, and assigns from and against any claims, liabilities, losses, damages, fines, penalties, and costs (including, without limitation, reasonable attorneys' fees) whether foreseen or unforeseen, which the indemnified parties suffer or incur because of:
- (A) Any discharge of hazardous waste resulting from acts or omissions of Licensee or Licensee's predecessor in interest;

- (B) Acts or omissions of Licensee, its agents, employees, Licensees, or representatives in connection with any cleanup required by law, or
 - (C) Failure of Licensee to comply with Environmental, Safety and Health Laws.
- 12.06 In no event shall either Party be liable to the other for any special, consequential or indirect damages (including, without limitation, lost revenues and lost profits) arising out of this Agreement or any obligation arising hereunder, whether in an action for or arising out of breach of contract, or otherwise.
- 12.07 Licensee shall indemnify, protect, and hold harmless Licensor from and against any and all claims for libel and slander, copyright and/or patent infringement arising directly or indirectly by reason of installation of Licensee's equipment on Licensor Poles, Conduit Systems or Right-of Way pursuant to this Agreement.

13.0 COMPLIANCE WITH LAW

- 13.01 Notwithstanding anything to the contrary in this Agreement, each Party shall ensure that any and all activities it undertakes pursuant to this Agreement shall comply with all applicable laws, including, without limitation, all applicable provisions of:
- (A) Workers' compensation laws
 - (B) Unemployment compensation laws
 - (C) The Federal Social Security Law
 - (D) The Fair Labor Standards Act, and
 - (E) All laws, regulations, rules, guidelines, policies, orders, permits and approvals or any governmental authority relating to environmental matters and/or Occupational Safety and Health Act ("OSHA").

14.0 INSURANCE

- 14.01 Licensee shall obtain and maintain, in full force and effect at all times, during operations covered by this Agreement, such minimum insurance as will cover the obligations and liabilities of said Party, its agents, and its employees which may arise from the operations under this Agreement. Insurance shall have limits of not less than:

(A) **Commercial General Liability policy of minimum limits of:**

| | |
|---|--------------------------------|
| General Aggregate | \$ 2,000,000 per policy period |
| Products/Completed Operations Aggregate | \$ 2,000,000 per policy period |
| Personal Injury/Advertising | \$ 2,000,000 per occurrence |
| Each Occurrence | \$ 2,000,000 per occurrence |
| Fire Legal Liability | \$ 50,000 any one fire |

- 14.02 The policy will be endorsed to show the above aggregate limits applying to "each" job site or, as an alternative, the General Aggregate will be increased to \$4,000,000 per policy period. Policy will also specifically state the coverage applies to all operations conducted by the respective Party, its employees, or agents on behalf of that Party's Corporation or subsidiary.
- 14.03 Where the performance of the work involves structural property, underground property, or blasting, each Party's Commercial General Liability insurance policy shall provide coverage to the insured for legal liability arising from operations under this Agreement for property damage:
- (A) arising out of blasting,
 - (B) arising out of collapse of, or structural injury to, any building or structure or
 - (C) To underground facilities and utilities.
- 14.04 Other general liability forms are acceptable in lieu of the Commercial General Liability Form, however, they are not to be used without written approval from the Company's Risk Management Department, 4001 Rodney Parham Road, AR 72212. However, such written approval shall not be unreasonably withheld.
- (A) Business Automobile Liability policy with minimum limits of:

| | |
|-----------------------|---------------------------|
| Bodily Injury | \$2,000,000 per accident |
| Property Damage | \$ 2,000,000 per accident |
| OR | |
| Combined Single Limit | \$ 2,000,000 per accident |

The policy will be issued using symbol "1 - any auto" coverage.
 - (B) Workers Compensation:

| | |
|---|--------------------------|
| Part 1 - Medical Benefits | Statutory |
| Part 2 - Employer's Liability as indicated: | |
| Bodily Injury by Accident | \$ 100,000 each accident |
| Bodily Injury by Disease | \$ 100,000 each employee |
| Bodily Injury by Disease | \$ 500,000 policy limit |
- 14.05 The policy will show the state in which operation on behalf of the Party and/or subsidiary is being conducted. For operations conducted within monopolistic (state fund) states, the Party will furnish a certificate of compliance from the appropriate state fund administrator.
- 14.06 In each and every policy in 14.04A and 14.04B, the other Party's Corporation and its subsidiaries shall be named an "additional insured" with respect to activities performed on behalf of the Party's Corporation and its subsidiaries.
- 14.07 Coverage provided by the policies listed in this paragraph will be issued by an insurance company, licensed in the state in which operations on behalf of the Party are to be conducted. It is acceptable to use both primary and excess/umbrella policies to obtain necessary limits.

- 14.08 Licensee will furnish to the other Party, a certificate evidencing insurance coverage under sub-paragraphs 14.04-A, and 14.04-B. Such certificate shall provide for a thirty-day prior notice to the other Party of any cancellation or material changes in coverage and shall be signed by a legal representative of the issuing insurance company. The certificate of insurance shall be sent to the person identified at paragraph 25.03.
- 14.09 The provisions of sub-paragraphs 14.04-A and 14.04-B shall also apply to all sub-Licensees, and Licensee shall be responsible for their compliance herewith.

15.0 NON-WAIVER OF TERMS AND CONDITIONS

- 15.01 Failure to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

16.0 LICENSOR'S LIEN

- 16.01 Should Licensor under any Article of this Agreement remove Licensee's cable, equipment or facilities from Licensor's poles, conduit system or right-of-way, Licensor will deliver to Licensee the cable, equipment or facilities so removed upon payment by Licensee of the cost of removal, storage and delivery, and all other amounts due Licensor hereunder. Licensor is hereby given a lien on Licensee's cable, equipment or facilities within Licensor's conduit system or right-of-way or attached to Licensor's poles or removed therefrom, with power of public or private sale, to cover any amounts due Licensor under the provisions of this Agreement. Such liens shall not operate to prevent Licensor from pursuing, at its option, any other remedy in law, equity or otherwise, including any other remedy provided for in this Agreement.

17.0 SCHEDULE OF FEES AND CHARGES

- 17.01 Licensee may be required to furnish bond or other security satisfactory to Licensor, in a reasonable initial amount to be determined by Licensor and provided by Licensee at the time Licensee submits Exhibit B to Licensor's Attachment Application Procedures to guarantee the payment of any such sums which may become due to Licensor arising out of this Agreement including, but not limited to fees due hereunder or charges for work performed for the benefit of Licensee under this Agreement, including the removal of Licensee's facilities upon termination of this Agreement by any of its provisions or upon termination of any License issued hereunder. Bond to be sent to person identified at paragraph 25.03. Bond is to be equal to one (1) year's annual rental fees.
- 17.02 The fees, rates and charges set forth in APPENDIX I or elsewhere in this Agreement are effective during the term of this Agreement subject to Section 3.01 and shall be due and payable by Licensee as set forth herein.
- 17.03 FEES:
All rates, charges and fees set forth in this Agreement and as shown in APPENDIX I (Schedule of Rates, Fees, and Charges) shall be subject to all applicable federal, state, and local laws, rules, regulations and commission orders.

(A) Computation:

(1) Pole and Anchor Attachment Fees:

- (a) For the purpose of computing the annual pole attachment fee hereunder, for calendar years subsequent to a first partial calendar year, said fee shall be based upon the number of poles and anchors, to which

attachments are actually made, as of December 31 of the preceding year, multiplied by the per attachment pole attachment fee rate set forth on APPENDIX I. For a first partial calendar year, the pole attachment fee shall be prorated as necessary, on a daily basis from the date payment is due in accordance with Exhibit B of Licensor's Attachment Application Procedures.

- (b) For billing purposes, a single pole attachment includes the point of attachment and all facilities located in the usable space on the pole in the space assigned to Licensee (typically six inches above and six inches below the point of attachment). If Licensee occupies more than one usable space on a pole, separate attachment fees shall apply to each space occupied.

(2) Conduit Occupancy Fees :

- (a) For the purpose of computing the total conduit occupancy fee due hereunder, the duct feet of conduit shall be measured from the center to the center of manholes; or from the center of a manhole to the end of the duct; from the center of a manhole to the property line if the duct is connected at the property line to a duct owned and controlled by a third-party property owner; or the length of a conduit from pole to pole; or isolated lengths of conduit not attached to any structure (such as involved with buried cable) which will be occupied by Licensee's cable.

- (b) For billing purposes each inner duct will be billed the half duct fee. If two or more facilities occupy a duct that has not been subdivided, the half duct fee will be charged for each facility. The half duct fee will apply when others place the Licensee facility in a duct that has not been subdivided only if the facility does not render the duct unusable.

(3) Right-of-Way Occupancy Fees:

- (a) This fee will be negotiated on a case by case basis. There is no established per foot rate.

(B) Payment Date:

- (1) If this Attachment License Agreement becomes effective on or prior to June 30, all attachment and occupancy fees for the remainder of that first partial calendar year shall be due and payable at the time required under Appendix I of Licensor's Attachment Application Procedures .
- (2) If an Attachment License Agreement becomes effective on or after July 1, all attachment and occupancy fees for the remainder of that current partial calendar year as well as the full upcoming calendar year shall be payable at the time required under Appendix I of Licensor's Attachment Application Procedures.
- (3) On an annual basis, all attachment and occupancy fees not previously paid are to be paid in advance, on the 31st day of January of each year or within 30 days of receipt of invoice. Failure to pay such fees within 30 days of the annual due date shall constitute a Material Default of this Agreement.

(C) Termination of License:

- (1) Upon termination or surrender of a license granted hereunder, no refund of any attachment or occupancy fee shall be made.

17.04 OTHER CHARGES:

(A) Computation:

- (1) All charges for inspections, engineering, or rearrangements of Licensee's facilities from Licensor's poles or conduit and, without limitation, any other work performed for Licensee shall be based upon the full cost and expense, including reasonable overhead, to Licensor for performing such work for Licensee. The cost to Licensee shall be determined in accordance with the regular and customary methods used by Licensor in determining such costs.
- (2) The charge for replacement of poles shall include the entire non-betterment cost to Licensor including the increased cost of larger poles, sacrificed life value of the poles removed, cost of removal, less any salvage recovery and the cost of transferring Licensor's facilities from the old to the new poles.
- (3) All other attachment or occupancy related inquiry, verification, application, administrative and miscellaneous rates, fees and charges shall be calculated and paid in accordance with APPENDIX I and/or Licensor's Attachment Application Procedures and Attachments thereto.

(B) Payment Date:

- (1) All bills for such other charges for work performed by Licensor shall be payable upon presentment to Licensee, and shall be deemed delinquent if not paid within 30 days after presentment to Licensee.

18.0 DISPUTE RESOLUTION

18.01 Except in the case of:

- (A) A suit, action, or proceeding by one Party to compel the other Party to comply with its obligation to indemnify the other Party pursuant to this Agreement, or
- (B) A suit, action or proceeding to compel either Party to comply with the dispute resolution procedures set forth in this section, the Parties agree to use the following procedure to resolve any dispute, controversy, or claim arising out of or relating to this Agreement or its breach.

18.02 At the written request of a Party, each Party shall designate a knowledgeable, responsible representative to meet and negotiate in good faith to resolve any dispute, controversy, or claim arising under this Agreement. The Parties intend that these negotiations be conducted by non-lawyer, business representatives. The substance of the negotiations shall be left to the discretion of the representatives. Upon mutual agreement, the representatives may utilize other alternative nonbinding dispute resolution procedures such as mediation to assist in the negotiations. Discussions and correspondence between the representatives for the purposes of these negotiations shall be treated as confidential, undertaken for purposes of settlement, shall be exempt from discovery and production, and shall not be admissible in any subsequent proceeding without the concurrence of all Parties. Documents identified in or provided during such

negotiations, which are not prepared for purposes of the negotiations, shall not be so exempt and may, if otherwise admissible, be admitted as evidence in any subsequent proceeding.

- 18.03 If a resolution of the dispute, controversy or claim is not reached within ninety days of the initial written request referred to in 18.02, the dispute, controversy, or claim may be filed with the State Public Service Commission for review and determination, provided the party invoking the Commission's intervention process has in good faith negotiated, or attempted to negotiate, with the other Party pursuant to 18.02.
- 18.04 Each Party shall bear its own costs, including attorneys' fee, incurred in connection with any of the foregoing procedures. A Party-seeking discovery shall reimburse the responding Party the cost of reproducing documents (to include search time and reproduction time costs).

19.0 ENTIRE AGREEMENT

- 19.01 This Agreement and Licensor's related Attachment Application Procedures cancels and supersedes all previous agreements whether written or oral, except for any sums due thereunder, between Licensor and Licensee with respect to the attachment of Licensee's cable, equipment, and facilities to Licensor's poles or the placing Licensee's cable, equipment or facilities in Licensor's conduit system or right-of-way; and there are no other provisions, terms or conditions to this Agreement except as expressed herein. All currently effective licenses heretofore granted pursuant to such previous agreements shall continue in effect subject to the terms and conditions of this Agreement.
- 19.02 The terms and conditions of this Agreement supersede all prior oral or written understandings between the Parties and constitute the entire Agreement between them concerning the subject matter of this Agreement. There are no understandings or representations, express or implied, not expressly set forth in this Agreement or in Licensor's related Attachment Application Procedures. This Agreement shall not be modified or amended except by writing signed by the Party to be charged. **This Agreement is only for pole/occupancy applications submitted for the properties owned and operated by Windstream Kentucky East, LLC in the State of Kentucky. This agreement does NOT apply to any other Windstream owned properties. Separate agreements must be requested for each Windstream Operating Company and for Interconnection Access to Central Offices.**

GENERAL OPERATING ROUTINE

20.0 ATTACHMENT, USE AND/OR OCCUPANCY REQUEST PROCESS

20.01 There is a multi-step pole attachment or duct, innerduct, conduit or right-of-way use and/or occupancy application process and fee determination process that the Licensee may begin upon the execution of this Agreement. It is set forth below and in Licensor's related Attachment Application Procedures.

21.0 POLE ATTACHMENT REQUESTS (PAR)

21.01 **The steps for normal size jobs pursuant to the FCC guidelines are:**

A. Pole Attachment Quote Preparation: Licensee shall submit a Pole Attachment Request Application (Exhibit B to Licensor's Attachment Application Procedures) (which may be reasonably revised from time to time by Licensor at its sole discretion) to Licensor which will include a drawing of the proposed route and contact information (name, telephone, facsimile, and email information), and all required fees, as listed in and computed in accordance with APPENDIX I. (Fees may be changed from time to time by Licensor to remain consistent with prevailing costs.) When Licensor receives the aforementioned specific attachment information and fee, if required, from Licensee, the following schedule will commence pursuant to the FCC requirements set forth in the April 7, 2011 Report and Order and Order on Reconsideration. If during this process, Licensor determines any lawful reason for denying Licensee's application, Licensor will so inform Licensee.

A1. Stage 1: Survey. During the 45-day survey phase, Licensor will conduct an engineering study to determine whether and where attachment is feasible, and what make-ready is required.

A2. Stage 2: Estimate. Licensor will provide an estimate of the make-ready charges within 14 days of receiving the results of the engineering survey.

A3. Stage 3: Licensee Acceptance. Licensee has up to 14 days to approve the estimate and provide payment. If project is declined by the licensee, Licensee will be billed any costs incurred to date.

A4. Stage 4: Make-Ready. Licensor will notify any attachers with facilities already on the pole that make-ready for the licensee needs to be performed within 60 days. Wireless attachments above the communications space will have a longer make-ready period of 90 days. Upon notice to Licensee, Licensor may take 15 additional days after the make-ready period runs to complete make-ready itself.

21.02 Upon completion of the make-ready work, the receipt of all payments and fees, and the signing of this Agreement, an "Approved" Exhibit B or such other Windstream Permit form currently used shall be returned to the Licensee. At that time Licensee will be considered to have been granted a License with respect to the poles approved in the PARON and may attach to Licensor's facilities.

21.03 **The steps for larger order jobs pursuant to the FCC guidelines are:**

A. Pole Attachment Quote Preparation: Licensee shall submit a Pole Attachment Request Application (Exhibit B to Licensor's Attachment Application Procedures), (which may be reasonably revised from time to time by Licensor at its sole discretion) to Licensor which will include a drawing of the proposed route and contact information (name, telephone, facsimile, and email information), and all

required fees, as listed in and computed in accordance with APPENDIX I, (Fees may be changed from time to time by Licensor to remain consistent with prevailing costs.) When Licensor receives the aforementioned specific attachment information and fee, if required, from Licensee, the following schedule will commence pursuant to the FCC requirements set forth in the April 7, 2011 Report and Order and Order on Reconsideration. If during this process, Licensor determines any lawful reason for denying Licensee's application, Licensor will so inform Licensee.

- A1. Stage 1: Survey. During the **60-day** survey phase, the Licensor conducts an engineering study to determine whether and where attachment is feasible, and what make-ready is required.
- A2. Stage 2: Estimate. Licensor provides an estimate of the make-ready charges within **14** days of receiving the results of the engineering survey.
- A3. Stage 3: Licensee Acceptance. The Licensee has up to **14** days to approve the estimate and provide payment. If project is declined, Licensee will be billed any costs incurred to date.
- A4. Stage 4: Make-Ready. Licensor will notify any attachers with facilities already on the pole that make-ready for the licensee needs to be performed within **105** days. Wireless attachments above the communications space will have a longer make-ready period of **135** days. Upon notice to the Licensee, Licensor may take **15** additional days after the make-ready period runs to complete make-ready itself.

21.04 Upon completion of the make-ready work, the receipt of all payments and fees, and the signing of this Agreement, an "Approved" Exhibit B or such other Windstream Permit form currently used shall be returned to the Licensee. At that time Licensee will be considered to have been granted a License with respect to the poles approved in the PARON and may attach to Licensor's facilities.

21.05 **Timeframes** for orders greater than 3,000 poles shall be negotiated by the parties.

22.0 SURVEYS AND INSPECTIONS OF LICENSEE'S FACILITIES

22.01 Licensor reserves the right to inspect each new installation or work operation of Licensee on or within Licensor's facilities. The making of inspections or the failure to make inspections shall not relieve Licensee of any responsibility, obligation or liability imposed by this Agreement.

23.0 ISSUANCE OF LICENSES

23.01 Before Licensee shall have a right to attach to any pole of Licensor, Licensee shall make application for and receive a revocable, nonexclusive license therefore in the form of an approved Application for Pole License (APPENDIX VI and Exhibit B to Licensor's related Attachment Application Procedures).

23.02 Before Licensee shall have the right to place any cable, equipment or facilities within any conduit system or right-of-way of Licensor, Licensee shall make application for an receive a revocable, nonexclusive license therefore in the form of an approved Application for Conduit or Right-of-Way License (APPENDIX IV and Exhibit B to Licensor's related Attachment Application Procedures), hereto attached and made a part hereof.

23.03 Any license granted hereunder for attachment to Licensor's poles shall terminate without further notice to Licensee as to individual poles covered by the license to which Licensee has not attached within ninety (90) days from the date that Licensor has notified Licensee that such poles are available for attachment of the operating facilities of Licensee, unless Licensor, in the exercise of its sole discretion, agrees to extend said period at the request of Licensee.

23.05 Any license granted hereunder for placement of Licensee's facilities in Licensor's conduit system shall terminate without further notice to Licensee as to individual sections of Licensor's conduit system covered by the license in which Licensee has not placed its facilities within ninety (90) days from the date that Licensor has notified Licensee that such sections of the conduit system are available for the placement of operating facilities of Licensee, unless Licensor, in the exercise of its sole discretion, agrees to extend said period at the request of Licensee.

24.0 AUTHORITY TO PLACE ATTACHMENTS

24.01 Before any attachments or placement of facilities Licensee shall submit evidence that Licensee has the authority to maintain Attachments within public rights-of-way or on private right-of-way or on private property. Licensee shall be solely responsible for obtaining all licenses, authorizations, permits and consents from federal, state and local authorities or private land owners that may be required to place and maintain facilities on Licensor's poles or within Licensor's conduit, duct or right-of-way.

25.0 NOTICES (OF MODIFICATION OR ALTERATION OF POLES)

25.01 In the event Licensor plans to modify or alter any Licensor Poles upon which Licensee has placed Attachments, Licensor, except in emergency situations, shall provide Licensee written notice of the proposed modification or alteration at least ninety (90) business days prior to the time the proposed modification or alteration is scheduled to take place. Should Licensee decide to modify or alter Licensee's Facilities on Poles, Licensee shall so notify Licensor in writing at least ninety (90) business days prior to the day the work is to begin. In such event, Licensee shall bear a proportionate share of the total costs incurred by Licensor to make Licensor Poles accessible. Licensee's proportionate share of the total cost shall be based on the ratio of the amount of new space occupied by Licensee to the total amount of new space occupied by all of the parties joining in the modification. Licensee is not responsible for any costs of Licensor's modifications or alterations of its Poles.

25.02 In the event Licensor is required to move the location of, or replace, any Licensor Pole(s) for reasons beyond its control, Licensee concurrently shall relocate Licensee's Attachments. Licensee shall be solely responsible for the costs of the relocation of Licensee's Attachments. When it is mutually agreed that it is in the best interest of Licensor and Licensee, Licensor will, after proper notification has been provided, transfer Licensee's Attachments at the same time that Licensor transfers its Attachments. The rate charged for these transfers is listed in this Agreement (APPENDIX I). The rate for transfers may be adjusted by Licensor from time to time to remain consistent with prevailing costs.

25.03 Notices under this Agreement may be given and shall be deemed to have been given, by posting the same in first class mail to Licensee as follows:

26.0 REQUIREMENTS AND SPECIFICATIONS FOR ATTACHMENT TO POLES

26.01 Licensee's cables, equipment, and facilities shall be placed and maintained in accordance with the requirements and specifications attached hereto and as set forth in Licensor's related Attachment Application Procedures and made a part hereof, and in accordance with the requirements and specifications of the National Electric Safety Code (most recent edition) and the National Electric Code (most recent edition), and in compliance with any other rules or orders now in effect or that may hereafter be issued by any state utility commission or other authority having jurisdiction.

27.0 PLACEMENT OF ATTACHMENTS

- 27.01 Licensee shall, at its own expense, place and maintain and replace its Attachments on Licensor's Poles in accordance with:
- (A) Such reasonable requirements and specifications as Licensor shall from time to time prescribe in writing in Licensor's Attachment Application Procedures or otherwise,
 - (B) In compliance with any rules or orders now in effect or that hereafter may be issued by any regulatory agency or other authority having jurisdiction, and
 - (C) All currently applicable requirements and specifications of the National Electrical Safety Code, National Electric Code, most current edition or any amendment or revision of said Code. Licensee agrees to comply, at its sole risk and expense, with all specifications hereto, as may be revised from time to time by Licensor. Licensor will provide supervision at Licensee's expense if Licensor believes it is required.
- 27.02 Licensee's Facilities shall be tagged at maximum intervals of 300 feet so as to identify Licensee as the owner of the Facility. The tags shall be of sufficient size and lettering so as to be easily read from ground level.

28.0 MODIFICATIONS, ADDITIONS OR POLE REPLACEMENTS AND REARRANGEMENTS

- 28.01 Licensee shall not modify, add to, or replace facilities on any pre-existing Attachment on an Licensor Pole without first notifying Licensor in writing of the intended modification, addition or replacement at least thirty (30) business days prior to the date the activity is scheduled to begin. The required notification shall include:
- (A) The date the activity is scheduled to begin,
 - (B) A description of the planned modification, addition, or replacement,
 - (C) A representation that the modification, addition, or replacement will not require any space other than the space previously designated for Licensee's Attachments, and

- (D) A representation that the modification, addition, or replacement will not impair the structural integrity of the Poles involved.
- 28.02 Should Licensor determine that the modification, addition, or replacement specified by Licensee in its notice will require more space than that allocated to Licensee or will require the rearrangements of, reinforcement of, replacement of, or an addition of support equipment to the Poles involved in order to accommodate Licensee's modification, addition, or replacement, Licensor will so notify Licensee, whereupon Licensee will be required to submit a PAR in compliance with this Agreement in order to obtain authorization for the modification, addition, or replacement of its Attachments.
- 28.03 Should Licensee request Licensor to expand capacity or purchase additional plant, Licensee agrees to pay all reasonable costs. If Licensor or another party that has been granted a license joins in the request and will benefit from the expansion or purchase, Licensee agrees to pay a percentage of all costs proportionate to Licensee's share of the benefit received from the expansion or purchase.
- 28.04 When multiple applications, including application of Licensee, are received by Licensor with respect to any pole which must be replaced or rearranged to provide additional space prior to commencement of the work on that pole a Transfer Attachment Fee may be charged. Licensor will equitably prorate to the extent that it is practical between Licensee and other applicants for the pole space, the common expenses of engineering, rearrangement, and replacement, if any, which result from the processing of multiple applications. . Licensee shall be bound by Licensor's determination as to any such pro-ration of Transfer Attachment Fee to Licensee.

29.0 UNAUTHORIZED ATTACHMENTS

- 29.01 If any cable, equipment or facilities of Licensee shall be found on a pole or within a conduit or right-of-way for which no license is outstanding, Licensor, without prejudice to its other rights or remedies under this Agreement or otherwise, may:
- (A) Impose a charge, and
- (B) Require Licensee to remove such cable, equipment or facilities forthwith or Licensor may remove them without liability and the expense of removal shall be borne by Licensee. For the purpose of determining the charge, Licensee shall pay liquidated damages that will not exceed an amount equal to the annual pole attachment fee for the number of years the unauthorized attachments have existed (or, if that cannot be determined, the number of years since the most recent inventory or five years, whichever is less), plus interest at a rate set for that period by the IRS for individual underpayments pursuant to Section 6621 of the IRS Code. Any such charge imposed by Licensor shall be in addition to its rights to any other sums due and payable, including without limitation the actual costs of any audit or survey which established the existence of the unauthorized attachments and to any claims to said fees or said unlicensed use shall be deemed as a ratification or the licensing of the unlicensed use, and if any license should subsequently be issued, after application and payment of the application fee therefore, said license shall not operate retroactively or constitute a waiver by Licensor of any of its rights or privileges under this Agreement or otherwise.
- 29.02 For purposes of this section, an unauthorized Attachment shall include, but not limited to:
- (A) An Attachment to a Pole which is not identified in any PARON (APPENDIX VI) issued in accordance with this Agreement;

- (B) An Attachment that occupies more space than that allocated to Licensee By Licensor;
- (C) An attachment that is not placed in accordance with the provisions of this Agreement or the appropriate PARON (APPENDIX VI) issued pursuant to this Agreement, unless Licensee can demonstrate to Licensor's reasonable satisfaction that said misplacement is not due to any act or omission of Licensee or Licensee's agents;
- (D) An addition or modification by Licensee to its pre-existing Attachment(s) that impairs the structural integrity of the involved Licensor Pole(s).
- (E) An Attachment that consists of facilities owned or controlled by, and for the use of a Party other than Licensee.

29.03 Once Licensor has notified Licensee of an unauthorized attachment. Licensee can submit a PAR to request an authorized attachment. A PAR submitted per this provision will be treated like any other PAR subject to this Agreement. Licensee will be responsible for all fees associated with a PAR (as identified in this Agreement). If a PAR is not received by Licensor within ten (10) business days of Licensee's receipt of an unauthorized attachment notification, Licensee has sixty (60) business days from the date of its receipt of the initial unauthorized attachment notification to vacate the Pole.

30.0 FAILURE TO PLACE ATTACHMENTS

30.01 Once Licensee has been issued a PARON (APPENDIX VI), Licensee shall have ninety (90) calendar days from the date of the PARON (APPENDIX VI) to begin the placement of its Attachments on the Licensor Poles covered by the PARON (APPENDIX VI). If Licensee has not begun placing its Attachments within that ninety-(90) calendar day period, Licensee shall so advise Licensor with a written explanation for the delay. If Licensee fails to advise Licensor of its delay, with a written explanation therefore, or if Licensee fails to act in good faith by not making a bona fide effort to begin placing its Attachments within the ninety (90) calendar days prescribed by this section, the previously issued PARON (APPENDIX VI) shall be deemed rescinded by Licensor and Licensee shall have no further right to place Attachments pursuant to that PARON (APPENDIX VI).

31.0 OCCUPANCY OF CONDUIT SYSTEM

31.01 When Licensee submits an application for a license to place its cables, equipment, and facilities in the conduit system of Licensor, Licensor will advise Licensee of the availability of conduit space in accordance with Licensor's Attachment Application Procedures. In determining the availability of space in Licensor's conduit system, Licensor reserves the right to deny the granting of a license for any non-discriminatory lawful reason, including without limitation, insufficient capacity or reasons of safety, reliability and generally applicable engineering purposes. If conduit space is available, a license to occupy a portion of conduit system will be granted to Licensee, provided, however, that Licensor does not warrant the condition of such conduit system.

31.02 Licensor reserves the right to exclude cable, equipment, and facilities of Licensee from Licensor's conduit system, or to limit the type, number and size of Licensee's cable, equipment, and facilities which may be placed in any of Licensor's manholes.

32.0 OCCUPANCY OF RIGHT-OF-WAY

- 32.01 Licensor and Licensee agree that neither party has the right to restrict or interfere with the other party's lawful access to and use of public right-of-way, including public right-of-way, which pass over property owned by either party. Except as otherwise specifically provided in this Agreement, Licensor and Licensee shall each be responsible for obtaining their own right-of-way and permission to use real or personal property owned or controlled by any governmental body.
- 32.02 In the event that Licensee desires to occupy right-of-way owned or controlled by Licensor, Licensor may require Licensee to make an application to do so by the terms of this Agreement. Licensor reserves the right to determine whether granting a license would adversely affect its common carrier communication services and its ability to meet its duties and obligation with respect thereto, including questions of economy, safety, and future need of Licensor.
- 32.03 Licensor may, without incurring any liability, remove the cables, equipment, and facilities of Licensee from Licensor's right-of-way, at Licensee's expense where in Licensor's judgement (such judgement to be conclusive) such removal is required in connection with the performance of Licensor's service obligation or the safety of Licensor's employees. Whenever such removal has been made, Licensee will be promptly notified.

33.0 CONSTRUCTION AND MAINTENANCE OF FACILITIES

- 33.01 Licensee shall, at its own expense, make and maintain its pole attachments in a safe condition and in thorough repair, and in a manner reasonably acceptable to Licensor, and so as not to conflict with the use of said poles by Licensor or by other authorized users of said poles, or interfere with other facilities thereon or which may from time to time be placed thereon. Licensee shall, at its own expense, upon written notice from Licensor, relocate or replace its facilities placed on said poles, or transfer them to substituted poles, or perform any other work in connection with said facilities that may be required. Licensor shall give such written notice as is reasonable in the circumstances, provided, however, that in cases of emergency, (Licensor's judgment as to what constitutes an emergency to be conclusive) Licensor may arrange to relocate, remove or replace the attachments placed on said poles by Licensee, transfer them to substituted poles or perform any other work in connection with said facilities that may be required in the maintenance, replacement, removal or relocation of said poles or of the facilities thereon or which may be placed thereon, or for the service needs of Licensor, and Licensee shall reimburse Licensor for the expense thereby incurred. Attachments of Licensee to poles of Licensor, as mentioned herein shall be understood to include attachments of Licensee in space reserved for Licensor, or space which Licensor has the right to use, on poles of other companies with which Licensor now has or may hereafter have agreements for joint use and occupancy; and the use of such space by Licensee shall be subject to the terms and conditions of the agreements between Licensor and said other companies. Such authorization will not be unreasonably withheld.
- 33.02 Licensee's cable, equipment, and facilities shall be placed in, removed from, relocated in or maintained in Licensor's conduit system only when specific authorization for the work to be performed and approval of the person, firm or corporation selected by Licensee to perform the work, has been obtained in writing in advance from Licensor. Licensor retains the right to specify what, if any work shall be performed by Licensee. Such authorization will not be unreasonably withheld
- 33.03 In each instance where Licensee's cable, equipment, and facilities are to be placed in Licensor's conduit system, Licensor shall specify, among other things, the cable configuration and location of Licensee's

cable, equipment, and facilities, the particular duct of the conduit system such cable will occupy, and the location where and manner in which Licensee's cable will enter and exit Licensor's conduit system.

- 33.04 Licensor's manholes shall be opened as reasonably permitted by Licensor's authorized employees or agents. Licensee shall be responsible for obtaining any necessary permits from appropriate governmental authorities to open manholes and to conduct the work operations. Licensee's employees or agents will be permitted to enter or work in Licensor's manholes only when an authorized agent or employee of Licensor is present except as provided in the next paragraph. Licensor's said agent or employee shall have the authority to terminate Licensee's work operations in and around Licensor's manholes if, in the sole discretion of said agent or employee, any hazardous conditions arise or any unsafe practices are being followed by Licensee's employees or agents. Licensee agrees to pay, in accordance with the terms and conditions of APPENDIX I, the full cost of having Licensor's agent or employee present when Licensee's work is being done in Licensor's manholes. The presence of Licensor's authorized agent or employee shall not relieve Licensee of its responsibility to conduct all of its work operations in and around Licensor's manholes in a safe and workmanlike manner. Licensee is responsible for all signage, traffic control, equipment, and personnel necessary to work in Licensor's manholes. All work shall meet Occupational Safety and Health Act (OSHA), and any local or state standards and requirements.
- 33.05 Licensee's employees will be permitted to enter or work in Licensor's manholes and conduit system without an authorized agent or employee of Licensor being present, provided that Licensee's work consists only of routine operations of testing, adjusting, regulating or inspecting Licensee's existing facilities and does not involve any placing, removing, changing or rearranging of Licensee's or Licensor's facilities. In such cases, Licensee shall notify Licensor's designated representative in advance of Licensee's operations as to the type of work to be performed, the time at which it is to be performed and where it is to take place. Licensee shall conduct all such work operation in a safe and workmanlike manner, and in accordance with the terms of this Agreement.
- 33.06 Licensee shall, at its own expense, maintain its buried communication facilities so as not to conflict with the use of the right-of-way by Licensor or other authorized users of the right-of-way. Licensee shall, at its own expense, relocate, change, or replace its facilities or perform any other work in connection with said facilities that may be reasonably required by Licensor or other authorities.

34.0 TERMINATION OF LICENSES

- 34.01 Upon notice from Licensor to Licensee that Licensor has been advised by governmental authority or private property owners that the use of any pole, conduit system, or right-of-way is not authorized and is objected to by such governmental authority or private property owner, as the case may be or that any pole, any conduit system or any right-of-way is to be removed, sold or otherwise disposed of, Licensee shall, if reasonably requested by Licensor, remove its cables, equipment, and facilities at once from the affected pole or poles or shall make arrangements for the removal of its cable, equipment, and facilities from the affected portion of Licensor's conduit system or right-of-way at Licensor's expense. If not so removed, Licensor shall have the right to remove Licensee's cable, equipment, and facilities from Licensor's right-of-way at the cost and expense of Licensee and without any liability thereto. If Licensor deems it is impractical to remove Licensee's cables, equipment or facilities from any right-of-way, they may be abandoned in place.
- 34.02 Licensee may at any time remove its facilities from any pole of Licensor, but shall immediately give Licensor written notice of such removal and surrender of license in the form of a Notification of Surrender (APPENDIX VII) hereto attached and made a part hereof. If Licensee surrenders its license but fails to remove its facilities from Licensor's poles, Licensor shall have the right to remove Licensee's facilities at Licensee's expense without any liability on the part of Licensor for damage or injury to

Licensee's facilities. In the event that Licensee's cables, equipment, and facilities shall be removed from any pole as provided by this Agreement, no attachment shall again be made to such pole unless Licensee shall have first complied with all of the provisions of this Agreement as though no attachment had previously been made.

- 34.03 If Licensee desires to terminate its license for the right to occupy any part of Licensor's conduit system, Licensee shall give Licensor written notice of such surrender in the form of a Notification of Surrender (APPENDIX VII) hereto attached and made a part hereof. In such event, Licensee shall make arrangements with Licensor for the removal of Licensee's cables, equipment, and facilities from that part of Licensor's conduit system at Licensee's expense. In the event that Licensee's cables, equipment, and facilities shall be removed from Licensor's conduit system as provided by this Article, no cable, facilities or equipment shall again be placed in that part of such conduit system unless Licensee shall have first complied with all of the provisions of this Agreement as though no cables, equipment, and facilities of Licensee had previously been placed in that part of Licensor's conduit system.
- 34.04 If Licensee desires to terminate its license for the right to occupy any part of the right-of-way, Licensee shall give Licensor written notice of such surrender in the form of a Notification of Surrender (APPENDIX VII) attached hereto and made a part hereof. In such event, Licensee shall make arrangements with Licensor for the removal of Licensee's cables, equipment, and facilities from that part of the right-of-way at Licensee's expense. However, in the event it is impractical to remove Licensee's cable, equipment, and facilities from any right-of-way, they may be abandoned in place.

35.0 EMERGENCY RESTORATION PROCEDURES

- 35.01 In the event of an emergency, restoration procedures may be affected by the presence of Licensee's Attachments. While Licensor shall not be responsible for the repair of damaged Attachments of Licensee (except by mutual written agreement), Licensor shall nonetheless control access to its poles, conduit systems or right-of-way if the restoration is to be achieved in an orderly fashion.
- 35.02 Where Licensor and Licensee are involved in emergency restorations, access to Licensor's poles, conduit systems or right-of-way will be controlled by Licensor's Network Construction Managers or their on-site representative according to the following guidelines.
- (A) Service Disruptions/Outages
- (1) While exercising its right to first access, Licensor shall make all reasonable efforts to grant access to as many other entities with Attachments as is reasonably safe.
 - (2) Where simultaneous access is not possible, Licensor will grant access on first come, first served basis.
- (B) Service Affecting Emergencies
- (1) While exercising its right to first access, Licensor shall make all reasonable efforts to grant access to as many other entities with Attachments as is reasonably safe.
 - (2) Where Licensor is unable to grant simultaneous access to all other entities with Attachments, access will be granted according to the level of damage to the Attachments of each entity and the likelihood that a given level of damage will result in service

disruption. Where the likelihood that a service disruption will result is not clearly discernible, access will be on a first come, first served basis.

35.03 Without limiting any other indemnification or hold harmless provisions of this Agreement, Licensee agrees that any decision by Licensor regarding access to Attachments, or any action or failure to act by Licensor, under this section shall not be the basis for any claim by Licensee against Licensor for any damage to Licensee's Attachments or disruption of Licensee's services, or any other direct or indirect damages of any kind whatsoever incurred by Licensee.

36.0 ABANDONMENT

36.01 Nothing in this Agreement shall prevent or be construed to prevent Licensor from abandoning, selling, assigning, or otherwise disposing of any poles, conduit systems or other Licensor property used for Licensee's Attachments; provided, however, that Licensor shall condition any such sale, assignment, or other disposition subject to the rights granted to Licensee pursuant to this Agreement. Licensor shall promptly notify Licensee of any proposed sale, assignment, or other disposition of any poles, conduit systems or other Licensor property used for Licensee's Attachments.

APPENDIX I

SCHEDULE OF RATES, FEES AND CHARGES

| | Annual |
|---|----------------------|
| Pole Attachment Fee (Per Attachment) ** | ██████████ |
| Conduit Occupancy Fee: | |
| A. Full duct/foot | ██████████ |
| B. Half duct/foot | <u>\$N/A</u> |
| Right-of-way Occupancy Fee (No set fee, to be determined on a case by case basis). | <u>\$N/A</u> |
| Request Documentation Fee (non-refundable): | ██████████ |
| Per Request (in addition to "per pole/per mile fee") | <u>\$N/A</u> |
| 1 to 25 Poles (for requests less than 1 mile) | <u>\$N/A</u> |
| Per Mile | <u>\$N/A</u> |
| Pole Attachment Quote Preparation Fee | <u>\$N/A</u> |
| Unauthorized Attachment Fee | <u>\$Per Sec. 29</u> |
| Transfer of Attachment Fee | <u>\$N/A</u> |
| Make Ready Work No set fee, to be determined on a case by case basis | <u>\$TBD</u> |
| Hourly Rates (This is each employee's loaded hourly rate, except where any law, rule, regulation, or commission order applies) | <u>\$N/A</u> |

**** If attachments are in a non-tariffed state, the rental rate is subject to annual adjustment based on FCC Calculation.**

**** If attaching to 20 or less poles, Windstream will issue a lifetime license. This is calculated by # of poles attaching to x ██████████ x 20 years.**

Three poles X ██████████ = ██████████ x 20 years = ██████████

Kentucky is a tariffed state for Windstream Corporation

**APPENDIX IX
RULES OF ATTACHMENTS**

TERMS FOR PLACEMENT OF CUSTOMER OWNED FIBER ON WINDSTREAM POLES

Windstream has reviewed your request to attach a customer owned fiber cable to Windstream owned poles. Windstream is amenable to allowing the attachments providing your firm adheres to the following guidelines.

1. This fiber cable is for Cole Automotive Group use only.
2. Cole Automotive Group will not sell or lease capacity or any portion of this facility in to other persons or entities in anyway whatsoever.
3. Cole Automotive Group will not offer services via this cable to other persons or entities in anyway whatsoever.
4. This authorization to attach a fiber and copper cable only applies to this project. Project herein is described as placement of strand fiber optic cable starting at pole ²¹⁰⁴⁵~~2576~~ and ending at pole ²¹⁰⁴⁵~~2576~~ 2701, Ashland (City), KY (State). These facilities will be attached to 3 Windstream poles along the route. The purpose of attachments is to provide service to new Honda facility.
5. Please note that new attachments to Windstream owned poles authorized by this letter are governed by the Pole Attachment Tariff issued to Windstream Kentucky East, LLC. All terms and conditions stated in said tariff, including, but not limited to, limitations of liability and indemnification, apply to this project and shall be complied with by Cole Automotive Group.

WINDSTREAM ATTACHMENT APPLICATION PROCEDURES

for ROW / Ducts / Conduit / Poles

1. Product/Process Background

• Product Definition Basic product features

- Under the requirements of the Telecommunications Act of 1996, WINDSTREAM grants to Licensees the right to attach facilities to poles owned or controlled by WINDSTREAM or to place facilities within WINDSTREAM owned or controlled conduits, ducts and rights-of-way. Authority and license to attach will be granted on an individual request basis subject to the terms of the Attachment License Agreement.
- When an authorized telecommunications service provider first inquires about a pole attachment or innerduct lease and they do not have an Attachment License Agreement, they should be provided with a copy of the Attachment License Agreement form and the WINDSTREAM Attachment Application Attachment Application Procedures for ROW, Ducts, Conduit and Poles. The Attachment License Agreement document can be used as a contract by the applying Licensee signing it on the signature page and returning an original to WINDSTREAM. To begin the process for a specific attachment, an Account Number must be assigned by WINDSTREAM. The applying Licensee completes Attachment 1, hereto, and returns it with two copies of maps of the proposed pole line or conduit route and a general description of the facility to be placed. The application process also requires an "Inquiry" fee check to be sent if identified on Appendix I, Schedule of Rates, Fees and Charges. The original Attachment 1 along with the check and maps are sent to WINDSTREAM.
- **Product Availability**
 - **Standard Inquiry / Verification** pursuant to the FCC requirements set forth in the April 7, 2011 Report and Order and Order on Reconsideration.

2. Product Policies

• Product-Specific Policies

- Basic product capabilities and access to WINDSTREAM's poles, ducts and rights-of-way will be granted on first come, first served basis.
- The Licensee must provide a single route for inquiry and verification for ducts. It must include an entrance point and an exit point. WINDSTREAM will not locate the route between two points nor will WINDSTREAM investigate backup routes.
- Unless otherwise determined by a negotiated Attachment License Agreement, WINDSTREAM will license available duct/conduit space in increments of innerduct only.
- WINDSTREAM reserves 1 full duct and 1 innerduct for emergency restoration.
- WINDSTREAM will respond to a written request for access to innerduct within a total of 45 business days (15-inquiry and 30-verification) for standard inquiries. A standard inquiry may include any of the following:
 - Not more than 30 utility hole sections
 - Not more that 2 miles of linear private rights-of-way.
- All inquiries for innerduct/pole attachments that exceed the above standards must be negotiated between WINDSTREAM and the Licensee.

WINDSTREAM ATTACHMENT APPLICATION PROCEDURES

for ROW / Ducts / Conduit / Poles

- The Licensee is responsible to notify the WINDSTREAM representative identified on the Attachment License Agreement whenever working on any WINDSTREAM owned infrastructure.
 - Locations for splice points or loops must be determined at Licensee request. The Licensee must ask whether loops and / or splices can be provided in certain chosen utility holes and WINDSTREAM will respond. This process should occur during or after the verification. Splice or slack loops will be allowed in no more than every third manhole.
 - A Licensee will be permitted to connect their conduit / duct or establish conduit access only at the point of an WINDSTREAM utility hole and according to WINDSTREAM standards. Attachment made by entering or breaking into conduit between utility holes is not permitted.
 - A Licensee will be provided access to WINDSTREAM utility holes through a core drilling of the utility hole and the placing of a conduit stub or by bringing their own 4-inch duct into a utility hole via a core drill or knock-out. WINDSTREAM or an authorized party will perform this work and all costs associated with this work will be the responsibility of the Licensee.
 - WINDSTREAM may not require a Licensee to utilize WINDSTREAM employees or WINDSTREAM contractors to work on poles, innerduct or rights-of-way that WINDSTREAM owns or controls. However WINDSTREAM will require authorized contractors only.
 - It is WINDSTREAM's requirement that all work performed by the Licensee follow established company and industry standards regarding access to and placement of facilities in or on poles, conduit, ducts and rights-of-way. Facilities shall be placed, constructed, maintained, repaired and removed in accordance with the following rules and regulations:
 - The National Electric Code (NEC)
 - The National Electric Safety Code (NESC)
 - All Federal, State and Local requirements
 - All WINDSTREAM requirements
- **Special Construction Work**
- Occasionally WINDSTREAM may identify an obstacle in meeting the Licensee's space request. However if modifications of the WINDSTREAM structure would avoid a denial of space, WINDSTREAM will provide the Licensee, at Licensees request, an estimate of modification costs and estimated construction time frames. If the Licensee accepts the estimate, the Licensee will issue payment to WINDSTREAM in advance of any construction.
 - After the completion of modification work, WINDSTREAM may true up the actual project costs to the estimates and collect the short fall from the Licensee or rebate any over pricing.
3. **Process Description**
- The WINDSTREAM process is designed to provide the Licensee the information so as to assist Licensee and WINDSTREAM to make Poles, Innerduct and ROW decisions in a cost-efficient manner. The Process is defined and applied pursuant to the FCC requirements set forth in the April 7, 2011 Report and Order and Order on Reconsideration.

COMMON POLICY CONDITIONS

ALL COVERAGE PARTS INCLUDED IN THIS POLICY ARE SUBJECT TO THE FOLLOWING CONDITIONS.

A. CANCELLATION

1. THE FIRST NAMED INSURED SHOWN IN THE DECLARATIONS MAY CANCEL THIS POLICY BY MAILING OR DELIVERING TO US ADVANCE WRITTEN NOTICE OF CANCELLATION.
2. WE MAY CANCEL THIS POLICY BY MAILING OR DELIVERING TO THE FIRST NAMED INSURED WRITTEN NOTICE OF CANCELLATION AT LEAST:
 - A. 10 DAYS BEFORE THE EFFECTIVE DATE OF CANCELLATION IF WE CANCEL FOR NONPAYMENT OF PREMIUM; OR
 - B. 30 DAYS BEFORE THE EFFECTIVE DATE OF CANCELLATION IF WE CANCEL FOR ANY OTHER REASON.
3. WE WILL MAIL OR DELIVER OUR NOTICE TO THE FIRST NAMED INSURED'S LAST MAILING ADDRESS KNOWN TO US.
4. NOTICE OF CANCELLATION WILL STATE THE EFFECTIVE DATE OF CANCELLATION. THE POLICY PERIOD WILL END ON THAT DATE.
5. IF THIS POLICY IS CANCELLED, WE WILL SEND THE FIRST NAMED INSURED ANY PREMIUM REFUND DUE. IF WE CANCEL, THE REFUND WILL BE PRO RATA. IF THE FIRST NAMED INSURED CANCELS, THE REFUND MAY BE LESS THAN PRO RATA. THE CANCELLATION WILL BE EFFECTIVE EVEN IF WE HAVE NOT MADE OR OFFERED A REFUND.
6. IF NOTICE IS MAILED, PROOF OF MAILING WILL BE SUFFICIENT PROOF OF NOTICE.

B. CHANGES

THIS POLICY CONTAINS ALL THE AGREEMENTS BETWEEN YOU AND US CONCERNING THE INSURANCE AFFORDED. THE FIRST NAMED INSURED SHOWN IN THE DECLARATIONS IS AUTHORIZED TO MAKE CHANGES IN THE TERMS OF THIS POLICY WITH OUR CONSENT. THIS POLICY'S TERMS CAN BE AMENDED OR WAIVED ONLY BY ENDORSEMENT ISSUED BY US AND MADE A PART OF THIS POLICY.

C. EXAMINATION OF YOUR BOOKS AND RECORDS

WE MAY EXAMINE AND AUDIT YOUR BOOKS AND RECORDS AS THEY RELATE TO THIS POLICY AT ANY TIME DURING THE POLICY PERIOD AND UP TO THREE YEARS AFTERWARD.

D. INSPECTIONS AND SURVEYS

1. WE HAVE THE RIGHT TO:
 - A. MAKE INSPECTIONS AND SURVEYS AT ANY TIME;
 - B. GIVE YOU REPORTS ON THE CONDITIONS WE FIND; AND

COMMON POLICY CONDITIONS - CONTINUED

C. RECOMMEND CHANGES.

2. WE ARE NOT OBLIGATED TO MAKE ANY INSPECTIONS, SURVEYS, REPORTS OR RECOMMENDATIONS AND ANY SUCH ACTIONS WE DO UNDERTAKE RELATE ONLY TO INSURABILITY AND THE PREMIUMS TO BE CHARGED. WE DO NOT MAKE SAFETY INSPECTIONS. WE DO NOT UNDERTAKE TO PERFORM THE DUTY OF ANY PERSON OR ORGANIZATION TO PROVIDE FOR THE HEALTH OR SAFETY OF WORKERS OR THE PUBLIC. AND WE DO NOT WARRANT THAT CONDITIONS:
 - A. ARE SAFE OR HEALTHFUL; OR
 - B. COMPLY WITH LAWS, REGULATIONS, CODES OR STANDARDS.
3. PARAGRAPHS 1. AND 2. OF THIS CONDITION APPLY NOT ONLY TO US, BUT ALSO TO ANY RATING, ADVISORY, RATE SERVICE OR SIMILAR ORGANIZATION WHICH MAKES INSURANCE INSPECTIONS, SURVEYS, REPORTS OR RECOMMENDATIONS.
4. PARAGRAPH 2. OF THIS CONDITION DOES NOT APPLY TO ANY INSPECTIONS, SURVEYS, REPORTS OR RECOMMENDATIONS WE MAY MAKE RELATIVE TO CERTIFICATION UNDER STATE OR MUNICIPAL STATUTES, ORDINANCES OR REGULATIONS OF BOILERS, PRESSURE VESSELS OR ELEVATORS.

E. PREMIUMS

THE FIRST NAMED INSURED SHOWN IN THE DECLARATIONS:

1. IS RESPONSIBLE FOR THE PAYMENT OF ALL PREMIUMS; AND
2. WILL BE THE PAYEE FOR ANY RETURN PREMIUMS WE PAY.

F. TRANSFER OF YOUR RIGHTS AND DUTIES UNDER THIS POLICY

YOUR RIGHTS AND DUTIES UNDER THIS POLICY MAY NOT BE TRANSFERRED WITHOUT OUR WRITTEN CONSENT EXCEPT IN THE CASE OF DEATH OF AN INDIVIDUAL NAMED INSURED.

IF YOU DIE, YOUR RIGHTS AND DUTIES WILL BE TRANSFERRED TO YOUR LEGAL REPRESENTATIVE BUT ONLY WHILE ACTING WITHIN THE SCOPE OF DUTIES AS YOUR LEGAL REPRESENTATIVE. UNTIL YOUR LEGAL REPRESENTATIVE IS APPOINTED, ANYONE HAVING PROPER TEMPORARY CUSTODY OF YOUR PROPERTY WILL HAVE YOUR RIGHTS AND DUTIES BUT ONLY WITH RESPECT TO THAT PROPERTY.

AGREEMENT TERMS AND CONDITIONS

1.0 SCOPE OF AGREEMENT

- 1.01 The purpose of this Agreement is to set forth the rates, terms, conditions, and procedures under which the Licensor will provide Licensee access to Licensor's poles, ducts, innerducts, conduits, and rights-of-way. **This agreement does NOT allow access to Windstream Central Offices. A separate agreement is required for interconnection access.**
- 1.02 Subject to the provisions of this Agreement, Licensor will issue to Licensee for any lawful communications purpose, revocable, nonexclusive licenses authorizing the attachment of Licensee's cables, equipment, and facilities to Licensor's poles or the placing of Licensee's cables, equipment, and facilities in Licensor's conduit system or within right-of-way owned or controlled by Licensor.
- 1.03 No use, however extended, of Licensor's poles, conduit system or right-of-way nor payment of any fees or charges required under this Agreement shall create or vest in Licensee any ownership or property rights in said poles, conduit system or right-of-way, but Licensee's rights therein shall be and remain a mere license. Nothing herein contained shall be construed to compel Licensor to construct, retain, extend, place, or maintain any facilities not needed for its own service requirements, unless otherwise required by law.
- 1.04 Licensee recognizes that Licensor has heretofore entered into, or may in the future enter into, agreements and arrangements with others which are not party to this Agreement regarding the poles, conduit system and right-of-way covered by this Agreement. Nothing herein contained shall be construed as a limitation, restriction or prohibition against Licensor with respect to such other agreements or arrangements. The rights of Licensee shall at all times be subject to any present or future joint use arrangement between Licensor and any other public utility or government agency.

2.0 DEFINITIONS

- 2.01 "Attachments" - Any attachment to a pole, use of a duct or innerduct, use of a conduit, or using right-of-way owned or controlled by Licensor.
- 2.02 "Attachment Fee" - Fee paid annually per attachment on a pole, or in a duct, innerduct, conduit, or right-of-way.
- 2.03 "Buried Cable" - Cable located below the surface of the ground but not in Licensor's conduit system.
- 2.04 "Conduit System" - Any combination of ducts, innerducts, conduits, manholes, and handholes owned or controlled by Licensor that is a reusable passage or opening in, on, under or through the ground, or a structure such as a building or bridge. The term includes "inner ducts" created by subdividing a duct into smaller channels.
- 2.05 "Hazardous Materials" -
- (A) Any substance, material or waste now or hereafter defined or characterized as hazardous, toxic or dangerous as defined by the Comprehensive Environmental Response, Compensation and

Liability Act ("CERCLA") of 1980, as amended, and other federal, state, and local health, safety, and environmental laws, ordinances, statutes, and rules, including but not limited to the Occupational Safety and Health Act ("OSHA").

- (B) Any substance, material or waste now or hereafter classified as a contaminant or pollutant under any law, rules, ordinance, or authority.
 - (C) Any other substance, material or waste, the manufacture, processing, distribution, use, treatment, storage, placement, disposal, removal or transportation of which is now or hereafter subject to regulation under any law, ordinance, statute, rule or regulation of any governmental body or authority.
- 2.06 "Make Ready Work" - All work to prepare Licensor's poles, ducts, innerducts, conduits, rights-of-way, and related facilities for the requested occupancy or attachment of Licensee's facilities but not the actual placement of attachments or administrative activities related to inquiries, verifications, requests or applications.
- 2.07 "Poles"- Licensor owned and poles owned by others to the extent that and for so long as Licensor has the right to permit others to be attached in the communications space.
- 2.08 "Pole Attachment Request" or "PAR" - A written request from Licensee to attach its facilities to Poles, submitted in accordance with this Agreement. With respect to pole attachment agreements in effect prior to the date the Parties executed this Agreement, the term PAR shall be deemed to include Pole attachment requests made by letter or similar document.
- 2.09 "Right-of-Way" - Right-of-way owned or controlled by Licensor. It does not include attachment or use of cables, poles, equipment or facilities located on a particular right-of-way. It may include private easement, or in certain instances public right-of-way granted by a governmental authority or a utility easement such as in a subdivision or development.

3.0 TERM OF AGREEMENT

- 3.01 This Agreement shall become effective upon its execution and if not terminated in accordance with the provisions of other Articles hereof, shall continue in effect for a term of not less than three (3) years, provided, however, that at any time after the first year of said term the rates, fees and charges set forth may be increased or decreased by written notice from Licensor to Licensee on a nondiscriminatory basis with respect to similar rates, fees and charges of other similar licensees.
- 3.02 Either Party may terminate this Agreement with at least a (6) six month written notice to the other Party.
- 3.03 Upon termination of the Agreement in accordance with any of its terms, all outstanding licenses in connection therewith shall terminate and shall be surrendered and Licensee shall within 60 days of date of termination remove all cables, equipment and facilities at the cost and expense of Licensee. If Licensor in its sole discretion, deems it is impractical to remove Licensee's cable, equipment and facilities from Licensor's rights-of-way, they may be abandoned in place.

4.0 LEGAL AUTHORITY

4.01 Licensee will obtain from public authorities and private owners of property any and all permits, franchises, licenses and grants necessary for the lawful exercise of any license granted hereunder

5.0 APPLICABLE LAW

5.01 This Agreement, and the rights and obligations contained in it, shall be governed and construed under the laws of the state in which the attachments hereunder are to be located.

6.0 SUBSEQUENT LAW

6.01 The terms and conditions of this Agreement shall be subject to any and all applicable laws, rules, regulations or guidelines now in effect and that subsequently may be prescribed by any federal, state or local governmental authority. To the extent required by any such subsequently prescribed law, rule, regulation or guideline, the Parties agree to modify, in writing, the affected term(s) and conditions(s) of this Agreement to bring them into compliance with such law, rule, regulation or guideline. Should any term of this Agreement be determined by a court or agency with competent jurisdiction to be unenforceable, all other terms of this Agreement shall remain in full force and effect.

7.0 DISCLAIMER OF WARRANTIES

7.01 Except as specifically set forth in this Agreement, Licensor makes no warranties, express or implied, including, but not limited to, any implied warranties of merchantability or fitness for a particular purpose.

8.0 LICENSE NOT EXCLUSIVE

8.01 Nothing herein contained shall be construed as a grant of any exclusive license, right or privilege to Licensee. Licensor shall have the right to grant, renew and extend rights and privileges to others not parties to this Agreement, by contract or otherwise, to use any poles, conduit system or right-of-way covered by this Agreement, under such terms and conditions, as Licensor shall prescribe.

9.0 ASSIGNMENT OF RIGHTS

9.01 Licensee shall not assign; transfer or sublet the privileges hereby granted, or sell, lease or otherwise permit the use of its facilities on or any part thereof (all of the foregoing being "Transfers"), without prior consent in writing of Licensor which consent shall not be unreasonably withheld, delayed or conditioned; provided, however, that either Party may so Transfer its rights and obligations under this Agreement without such consent to (i) any entity said Party, directly or indirectly, controls, is controlled by or is under common control with or (ii) any entity acquiring all or substantially all of said Party's assets or equity, by providing written notice to the other Party of such Transfer. Any attempted Transfer that is not permitted under this Section 9.01 is void *ab initio*.

9.02 Subject to the provisions of this Agreement, this Agreement shall extend to and bind the successors and authorized assigns of the Parties hereto.

10.0 LIABILITY AND DAMAGES

- 10.01 Licensor reserves to itself, its successors and assigns, the right to maintain its poles, conduit system and right-of-way and to operate its facilities thereon in such manner as will best enable it to fulfill its own service requirements. Licensor shall not be liable to Licensee for any interruption to service of Licensee or for interference with the operation of the cables, equipment or facilities of Licensee arising in any manner out of the use of Licensor's poles, conduit system and right-of-way except caused by Licensor's sole negligence, willful misconduct or material breach of this Agreement, in which case Licensor's liability shall be limited to the reasonable cost of repair of Licensee's damaged cable, equipment or facilities, if any.
- 10.02 Licensee shall exercise special precautions to avoid damaging the cables, poles, conduits, right-of-way equipment and facilities of Licensor and of other licenses and hereby assumes all responsibility for any and all loss, damages, costs and expenses. Licensee shall make an immediate report to Licensor of the occurrence of any such damage and hereby agrees to reimburse the respective owners for the expense incurred in making repairs.
- 10.03 Licensee shall indemnify and hold harmless Licensor against any and all claims, demands, causes of action, damages, costs or liabilities of every kind and nature whatsoever, except to the extent caused by Licensor's negligence or willful misconduct, which may arise out of or be caused by:
- (A) The erection, maintenance, presence, use or removal of Licensee's cable, equipment, and facilities on Licensor's poles, and within Licensor's conduit system and right-of-way
 - (B) Any act of Licensee on or in the vicinity of Licensor's poles, conduit system and right-of-way, or
 - (C) Any interruption, discontinuance, or interference with Licensor's service to any of its subscribers occasioned or claimed to have been occasioned by any action of Licensee pursuant to or consistent with this Agreement. Licensee shall, upon demand and at its own sole risk and expense, defend any and all suits, actions or other legal proceeding brought or instituted against Licensor on any such claim, demand or cause of action, and shall pay and satisfy any judgment or decree rendered against Licensor therein, and Licensee shall reimburse Licensor for any and all legal expense incurred by Licensor in connection therewith. Licensee shall also indemnify, protect and hold harmless Licensor from any and all claims and demands of whatever kind which arise directly or indirectly from the operation of Licensee's facilities including taxes, special charges by others, claims and demands for damages or loss for infringement of copyright, for libel and slander for unauthorized use of television broadcast programs, and for unauthorized use of other program material, and from and/or against all claims and demands for infringement of patents with respect to the manufacturer, use and operation of Licensee's equipment whether arising from the use of Licensee's equipment in combination with Licensor's poles, conduit system, right-of-way or otherwise.
- 10.04 Licensee agrees to comply under the Workmen's Compensation Laws of the state in which attachments are to be located hereunder, and also agrees to cause every subcontractor of Licensee to comply with and qualify under said laws, and shall furnish copies of Certificates demonstrating such compliance to Licensor prior to commencement of the work.

11.0 DEFAULT AND REMEDIES

- 11.01 In addition to Material Defaults defined anywhere else in this Agreement, any one of the following shall be deemed the occurrence of a Material Default under this Agreement:
- (A) Failure by Licensee to pay any fee or other sum required to be paid under the terms of this Agreement and such default continues for a period of thirty (30) calendar days after written notice thereof to Licensee.
 - (B) Failure by either Party to perform or observe any other term, condition, covenant, obligation, or provision of this Agreement and such default continues for a period of thirty (30) business days after written notice thereof from the other Party (provided that if such default is not curable within a thirty (30) business day period, the period will be extended if the Party substantially commences to cure such default and proceeds diligently thereafter to effect such cure).
 - (C) The filing of any tax or mechanic's lien against Poles because of any act or omission by Licensee which is not bonded or discharged within thirty (30) calendar days of the date Licensee receives notice that such lien has been filed;
 - (D) Licensor or Licensee's voluntary or involuntary bankruptcy;
 - (E) Licensee's knowing use or maintenance of its Attachments in violation of any law or regulation, or in aid of any unlawful act or undertaking;
 - (F) If any authorization which may be required of Licensee by any governmental or private authority for the placement, operation, or maintenance of Licensee's Attachments is denied or revoked.
- 11.02 In the event of a Material Default and subject to any other applicable provision of this Agreement, the Non-defaulting Party, without any further notice to the Defaulting Party (except where expressly provided for below or required by applicable law), may do any one or more of the following:
- (A) Perform on behalf and at the expense of the Defaulting Party, any obligation of the Defaulting Party under this Agreement which the Defaulting Party has failed to perform and of which the Non-defaulting Party shall have given the Defaulting Party notice, the cost of which performance shall be paid by the Defaulting Party to the Non-defaulting Party upon demand;
 - (B) Terminate this Agreement by giving sixty (60) business days written notice of such termination to Licensee and remove Licensee's Attachments and store Licensee's facilities in a public warehouse or elsewhere at the expense of and for the account of Licensee without Licensor being deemed guilty of trespass or conversion, and without Licensor becoming liable for any loss or damages to Licensee occasioned thereby; or
 - (C) Exercise any other legal or equitable right or remedy that the Non-defaulting Party may have.
- 11.03 The Defaulting Party shall repay to the Non-defaulting Party upon demand any costs and expenses incurred by the Non-defaulting Party (including, without limitation, reasonable attorneys' fees) in successfully enforcing this Agreement.
- 11.04 Upon termination of this Agreement by the Non-defaulting Party, the Defaulting Party shall remain liable to the Non-defaulting Party for any and all fees, other payments and damages which may be due or

sustained in accord with this Agreement prior to such termination, all reasonable costs, fees and expenses, including, without limitation, reasonable attorney' fees incurred by the Non-defaulting Party in pursuit of its remedies hereunder.

- 11.05 All rights and remedies of the Non-defaulting Party set forth in this Agreement shall be cumulative and none shall exclude any other right or remedy, now or hereafter allowed by or available under any statute, ordinance, rule of court, or the common law, either at law or in equity, or both.

12.0 INDEMNIFICATION

- 12.01 Licensee shall compensate Licensor for the full actual loss, damage or destruction of Licensor's property that in any way arises from or is related to this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation, or maintenance of Licensee's Attachments).
- 12.02 Each party agrees to defend, indemnify, protect and hold harmless the other and the other's officers, directors, employees, shareholders, successors, assigns, agents, affiliates, representatives, partners, and contractors from and against any and all third party claims, actions, administrative proceedings (including, without limitation, informal proceedings), judgments, damages, penalties, fines, cost, liabilities, interests, or loss, including, without limitation, reasonable attorneys' fees and expenses, consultant fees, and expert fees, together with all other costs and expenses of any kind or nature suffered by or asserted against the indemnified party in any way arising out of or connected with this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation or maintenance of Licensee's facilities, unless caused by the sole negligence or willful misconduct on the part of Licensor or Licensor's affiliates, agents, officers, employees and assigns). Each party expressly assumes all liability for actions by its affiliates, agents, officers, employees, or its contractors and expressly waives any immunity from the enforcement of this indemnification provision that might otherwise be provided by workers' compensation law or by other state or federal laws.
- 12.03 Without limiting any of the foregoing, Licensee assumes all risk of, and agrees to relieve Licensor of any and all liability for, loss or damage (and the consequences of loss or damage) to any facilities placed on Licensor's property and any other financial loss sustained by Licensee, except to the extent caused by the negligence or willful misconduct on the part of Licensor or Licensor's agents, officers, employees, and assigns.
- 12.04 Without limiting the foregoing, Licensee expressly agrees to indemnify, defend, and hold harmless Licensor and Licensor's agents, officers, employees and assigns from any and all claims asserted by end users/customers of Licensee in any way arising out of or in connection with this Agreement or Licensee's facilities, except to the extent caused by the negligence or willful misconduct on the part of Licensor or Licensor's agents, officers, employees, and assigns. or its contractors.
- 12.05 Notwithstanding anything to the contrary in this Agreement, Licensee further shall indemnify and hold harmless Licensor, its agents, officers, employees, and assigns from and against any claims, liabilities, losses, damages, fines, penalties, and costs (including, without limitation, reasonable attorneys' fees) whether foreseen or unforeseen, which the indemnified parties suffer or incur because of:

- (A) Any discharge of hazardous waste resulting from acts or omissions of Licensee or Licensee's predecessor in interest;
 - (B) Acts or omissions of Licensee, its agents, employees, Licensees, or representatives in connection with any cleanup required by law, or
 - (C) Failure of Licensee to comply with Environmental, Safety and Health Laws.
- 12.06 In no event shall either Party be liable to the other for any special, consequential or indirect damages (including, without limitation, lost revenues and lost profits) arising out of this Agreement or any obligation arising hereunder, whether in an action for or arising out of breach of contract, or otherwise.
- 12.07 Licensee shall indemnify, protect, and hold harmless Licensor from and against any and all claims for libel and slander, copyright and/or patent infringement arising directly or indirectly by reason of installation of Licensee's equipment on Licensor Poles, Conduit Systems or Right-of Way pursuant to this Agreement.

13.0 COMPLIANCE WITH LAW

- 13.01 Notwithstanding anything to the contrary in this Agreement, each Party shall ensure that any and all activities it undertakes pursuant to this Agreement shall comply with all applicable laws, including, without limitation, all applicable provisions of:
- (A) Workers' compensation laws
 - (B) Unemployment compensation laws
 - (C) The Federal Social Security Law
 - (D) The Fair Labor Standards Act, and
 - (E) All laws, regulations, rules, guidelines, policies, orders, permits and approvals or any governmental authority relating to environmental matters and/or Occupational Safety and Health Act ("OSHA").

14.0 INSURANCE

- 14.01 Licensee shall obtain and maintain, in full force and effect at all times, during operations covered by this Agreement, such minimum insurance as will cover the obligations and liabilities of said Party, its agents, and its employees which may arise from the operations under this Agreement. Insurance shall have limits of not less than:
- (A) Commercial General Liability policy of minimum limits of:

| | |
|---|--------------------------------|
| General Aggregate | \$ 2,000,000 per policy period |
| Products/Completed Operations Aggregate | \$ 2,000,000 per policy period |
| Personal Injury/Advertising | \$ 2,000,000 per occurrence |
| Each Occurrence | \$ 2,000,000 per occurrence |

Fire Legal Liability

\$ 50,000 any one fire

14.02 The policy will be endorsed to show the above aggregate limits applying to "each" job site or, as an alternative, the General Aggregate will be increased to \$4,000,000 per policy period. Policy will also specifically state the coverage applies to all operations conducted by the respective Party, its employees, or agents on behalf of that Party's Corporation or subsidiary.

14.03 Where the performance of the work involves structural property, underground property, or blasting, each Party's Commercial General Liability insurance policy shall provide coverage to the insured for legal liability arising from operations under this Agreement for property damage:

- (A) arising out of blasting,
- (B) arising out of collapse of, or structural injury to, any building or structure or
- (C) To underground facilities and utilities.

14.04 Other general liability forms are acceptable in lieu of the Commercial General Liability Form, however, they are not to be used without written approval from the Company's Risk Management Department, 4001 Rodney Parham Road, AR 72212. However, such written approval shall not be unreasonably withheld.

(A) Business Automobile Liability policy with minimum limits of:

| | |
|-----------------------|---------------------------|
| Bodily Injury | \$2,000,000 per accident |
| Property Damage | \$ 2,000,000 per accident |
| OR | |
| Combined Single Limit | \$ 2,000,000 per accident |

The policy will be issued using symbol "1 - any auto" coverage.

(B) Workers Compensation:

Part 1 - Medical Benefits Statutory

Part 2 - Employer's Liability as indicated:

| | |
|---------------------------|--------------------------|
| Bodily Injury by Accident | \$ 100,000 each accident |
| Bodily Injury by Disease | \$ 100,000 each employee |
| Bodily Injury by Disease | \$ 500,000 policy limit |

14.05 The policy will show the state in which operation on behalf of the Party and/or subsidiary is being conducted. For operations conducted within monopolistic (state fund) states, the Party will furnish a certificate of compliance from the appropriate state fund administrator.

14.06 In each and every policy in 14.04A and 14.04B, the other Party's Corporation and its subsidiaries shall be named an "additional insured" with respect to activities performed on behalf of the Party's Corporation and its subsidiaries.

14.07 Coverage provided by the policies listed in this paragraph will be issued by an insurance company, licensed in the state in which operations on behalf of the Party are to be conducted. It is acceptable to use both primary and excess/umbrella policies to obtain necessary limits.

- 14.08 Licensee will furnish to the other Party, a certificate evidencing insurance coverage under sub-paragraphs 14.04-A, and 14.04-B. Such certificate shall provide for a thirty-day prior notice to the other Party of any cancellation or material changes in coverage and shall be signed by a legal representative of the issuing insurance company. The certificate of insurance shall be sent to the person identified at paragraph 25.03.
- 14.09 The provisions of sub-paragraphs 14.04-A and 14.04-B shall also apply to all sub-Licensees, and Licensee shall be responsible for their compliance herewith.
- 14.10 Right to Self Insure or Have Large Deductible(s). Licensee shall have right to maintain such insurance policies with a self insured retention or deductible with similar terms and conditions to a commercially available insurance policy subject to the following requirements.

“Self-insurance” shall mean that Licensee is itself acting as though it were the insurance company providing the insurance required under the provisions of the contract requirements and Licensee shall pay any amounts due in lieu of insurance proceeds as required under the provisions of this contract, which amounts shall be treated as insurance proceeds for all purposes under this contract.

All amounts which Licensee pays or is required to pay and all losses or damages resulting from risks for which Licensee has elected to self-insure shall be subject to the waiver of subrogation provisions in contract and shall not limit Licensee’s indemnification obligations set forth.

In the event that Licensee elects to maintain self-insured retention as provided herein and an event or claim occurs for which a defense and/or coverage would have been available from the insurance company Licensee shall: undertake the defense of any such claim, including a defense of Licensor, at Licensee’s sole cost and expense, and use its own funds to pay any claim which would have been available from insurance proceeds but for such election by Licensee to maintain such self-insured retention.

15.0 NON-WAIVER OF TERMS AND CONDITIONS

- 15.01 Failure to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

16.0 LICENSOR'S LIEN

- 16.01 Should Licensor under any Article of this Agreement remove Licensee's cable, equipment or facilities from Licensor's poles, conduit system or right-of-way, Licensor will deliver to Licensee the cable, equipment or facilities so removed upon payment by Licensee of the cost of removal, storage and delivery, and all other amounts due Licensor hereunder. Licensor is hereby given a lien on Licensee's cable, equipment or facilities within Licensor's conduit system or right-of-way or attached to Licensor's poles or removed therefrom, with power of public or private sale, to cover any amounts due Licensor under the provisions of this Agreement. Such liens shall not operate to prevent Licensor from pursuing,

at its option, any other remedy in law, equity or otherwise, including any other remedy provided for in this Agreement.

17.0 SCHEDULE OF FEES AND CHARGES

17.01 Licensee may be required to furnish bond or other security satisfactory to Licensor, in a reasonable initial amount to be determined by Licensor and provided by Licensee at the time Licensee submits Exhibit B to Licensor's Attachment Application Procedures to guarantee the payment of any such sums which may become due to Licensor arising out of this Agreement including, but not limited to fees due hereunder or charges for work performed for the benefit of Licensee under this Agreement, including the removal of Licensee's facilities upon termination of this Agreement by any of its provisions or upon termination of any License issued hereunder. Bond to be sent to person identified at paragraph 25.03. Bond is to be equal to one (1) year's annual rental fees.

17.02 The fees, rates and charges set forth in APPENDIX I or elsewhere in this Agreement are effective during the term of this Agreement subject to Section 3.01 and shall be due and payable by Licensee as set forth herein.

17.03 FEES:

All rates, charges and fees set forth in this Agreement and as shown in APPENDIX I (Schedule of Rates, Fees, and Charges) shall be subject to all applicable federal, state, and local laws, rules, regulations and commission orders.

(A) Computation:

(1) Pole and Anchor Attachment Fees:

(a) For the purpose of computing the annual pole attachment fee hereunder, for calendar years subsequent to a first partial calendar year, said fee shall be based upon the number of poles and anchors, to which attachments are actually made, as of December 31 of the preceding year, multiplied by the per attachment pole attachment fee rate set forth on APPENDIX I. For a first partial calendar year, the pole attachment fee shall be prorated as necessary, on a daily basis from the date payment is due in accordance with Exhibit B of Licensor's Attachment Application Procedures.

(b) For billing purposes, a single pole attachment includes the point of attachment and all facilities located in the usable space on the pole in the space assigned to Licensee (typically six inches above and six inches below the point of attachment). If Licensee occupies more than one usable space on a pole, separate attachment fees shall apply to each space occupied.

(2) Conduit Occupancy Fees :

(a) For the purpose of computing the total conduit occupancy fee due hereunder, the duct feet of conduit shall be measured from the center to the center of manholes; or from the center of a manhole to the end of the duct; from the center of a manhole to the property line if the duct is connected at the property line to a duct owned and controlled by a third-party property owner; or the length of a conduit from pole to pole; or

isolated lengths of conduit not attached to any structure (such as involved with buried cable) which will be occupied by Licensee's cable.

- (b) For billing purposes each inner duct will be billed the half duct fee. If two or more facilities occupy a duct that has not been subdivided, the half duct fee will be charged for each facility. The half duct fee will apply when others place the Licensee facility in a duct that has not been subdivided only if the facility does not render the duct unusable.
- (3) Right-of-Way Occupancy Fees:
 - (a) This fee will be negotiated on a case by case basis. There is no established per foot rate.
- (B) Payment Date:
 - (1) If this Attachment License Agreement becomes effective on or prior to June 30, all attachment and occupancy fees for the remainder of that first partial calendar year shall be due and payable at the time required under Appendix I of Licensor's Attachment Application Procedures .
 - (2) If an Attachment License Agreement becomes effective on or after July 1, all attachment and occupancy fees for the remainder of that current partial calendar year as well as the full upcoming calendar year shall be payable at the time required under Appendix I of Licensor's Attachment Application Procedures.
 - (3) On an annual basis, all attachment and occupancy fees not previously paid are to be paid in advance, on the 31st day of January of each year or within 30 days of receipt of invoice. Failure to pay such fees within 30 days of the annual due date shall constitute a Material Default of this Agreement.
- (C) Termination of License:
 - (1) Upon termination or surrender of a license granted hereunder, no refund of any attachment or occupancy fee shall be made.

17.04 OTHER CHARGES:

- (A) Computation:
 - (1) All charges for inspections, engineering, or rearrangements of Licensee's facilities from Licensor's poles or conduit and, without limitation, any other work performed for Licensee shall be based upon the full cost and expense, including reasonable overhead, to Licensor for performing such work for Licensee. The cost to Licensee shall be determined in accordance with the regular and customary methods used by Licensor in determining such costs.
 - (2) The charge for replacement of poles shall include the entire non-betterment cost to Licensor including the increased cost of larger poles, sacrificed life value of the poles removed, cost of removal, less any salvage recovery and the cost of transferring Licensor's facilities from the old to the new poles.

- (3) All other attachment or occupancy related inquiry, verification, application, administrative and miscellaneous rates, fees and charges shall be calculated and paid in accordance with APPENDIX 1 and/or Licensor's Attachment Application Procedures and Attachments thereto.
- (B) Payment Date:
 - (1) All bills for such other charges for work performed by Licensor shall be payable upon presentment to Licensee, and shall be deemed delinquent if not paid within 30 days after presentment to Licensee.

18.0 DISPUTE RESOLUTION

18.01 Except in the case of:

- (A) A suit, action, or proceeding by one Party to compel the other Party to comply with its obligation to indemnify the other Party pursuant to this Agreement, or
- (B) A suit, action or proceeding to compel either Party to comply with the dispute resolution procedures set forth in this section, the Parties agree to use the following procedure to resolve any dispute, controversy, or claim arising out of or relating to this Agreement or its breach.

18.02 At the written request of a Party, each Party shall designate a knowledgeable, responsible representative to meet and negotiate in good faith to resolve any dispute, controversy, or claim arising under this Agreement. The Parties intend that these negotiations be conducted by non-lawyer, business representatives. The substance of the negotiations shall be left to the discretion of the representatives. Upon mutual agreement, the representatives may utilize other alternative nonbinding dispute resolution procedures such as mediation to assist in the negotiations. Discussions and correspondence between the representatives for the purposes of these negotiations shall be treated as confidential, undertaken for purposes of settlement, shall be exempt from discovery and production, and shall not be admissible in any subsequent proceeding without the concurrence of all Parties. Documents identified in or provided during such negotiations, which are not prepared for purposes of the negotiations, shall not be so exempt and may, if otherwise admissible, be admitted as evidence in any subsequent proceeding.

18.03 If a resolution of the dispute, controversy or claim is not reached within ninety days of the initial written request referred to in 18.02, the dispute, controversy, or claim may be filed with the State Public Service Commission for review and determination, provided the party invoking the Commission's intervention process has in good faith negotiated, or attempted to negotiate, with the other Party pursuant to 18.02.

18.04 Each Party shall bear its own costs, including attorneys' fee, incurred in connection with any of the foregoing procedures. A Party-seeking discovery shall reimburse the responding Party the cost of reproducing documents (to include search time and reproduction time costs).

19.0 ENTIRE AGREEMENT

19.01 This Agreement and Licensor's related Attachment Application Procedures cancels and supersedes all

previous agreements whether written or oral, except for any sums due thereunder, between Licensor and Licensee with respect to the attachment of Licensee's cable, equipment, and facilities to Licensor's poles or the placing Licensee's cable, equipment or facilities in Licensor's conduit system or right-of-way; and there are no other provisions, terms or conditions to this Agreement except as expressed herein. All currently effective licenses heretofore granted pursuant to such previous agreements shall continue in effect subject to the terms and conditions of this Agreement.

- 19.02 The terms and conditions of this Agreement supersede all prior oral or written understandings between the Parties and constitute the entire Agreement between them concerning the subject matter of this Agreement. There are no understandings or representations, express or implied, not expressly set forth in this Agreement or in Licensor's related Attachment Application Procedures. This Agreement shall not be modified or amended except by writing signed by the Party to be charged. **This Agreement is only for pole /occupancy applications submitted for the properties owned and operated by Windstream Kentucky East, LLC. in the State of Kentucky. This agreement does NOT apply to any other Windstream owned properties. Separate agreements must be requested for each Windstream Operating Company and for Interconnection Access to Central Offices.**

GENERAL OPERATING ROUTINE

20.0 ATTACHMENT, USE AND/OR OCCUPANCY REQUEST PROCESS

20.01 There is a multi-step pole attachment or duct, innerduct, conduit or right-of-way use and/or occupancy application process and fee determination process that the Licensee may begin upon the execution of this Agreement. It is set forth below and in Licensor's related Attachment Application Procedures.

21.0 POLE ATTACHMENT REQUESTS (PAR)

21.01 **The steps for normal size jobs pursuant to the FCC guidelines are:**

A. Pole Attachment Quote Preparation: Licensee shall submit a Pole Attachment Request Application (Exhibit B to Licensor's Attachment Application Procedures) (which may be reasonably revised from time to time by Licensor at its sole discretion) to Licensor which will include a drawing of the proposed route and contact information (name, telephone, facsimile, and email information), and all required fees, as listed in and computed in accordance with APPENDIX I. (Fees may be changed from time to time by Licensor to remain consistent with prevailing costs.) When Licensor receives the aforementioned specific attachment information and fee, if required, from Licensee, the following schedule will commence pursuant to the FCC requirements set forth in the April 7, 2011 Report and Order and Order on Reconsideration. If during this process, Licensor determines any lawful reason for denying Licensee's application, Licensor will so inform Licensee.

A1. Stage 1: Survey. During the 45-day survey phase, Licensor will conduct an engineering study to determine whether and where attachment is feasible, and what make-ready is required.

A2. Stage 2: Estimate. Licensor will provide an estimate of the make-ready charges within 14 days of receiving the results of the engineering survey.

A3. Stage 3: Licensee Acceptance. Licensee has up to 14 days to approve the estimate and provide payment. If project is declined by the licensee, Licensee will be billed any costs incurred to date.

A4. Stage 4: Make-Ready. Licensor will notify any attachers with facilities already on the pole that make-ready for the licensee needs to be performed within 60 days. Wireless attachments above the communications space will have a longer make-ready period of 90 days. Upon notice to Licensee, Licensor may take 15 additional days after the make-ready period runs to complete make-ready itself.

21.02 Upon completion of the make-ready work, the receipt of all payments and fees, and the signing of this Agreement, an "Approved" Exhibit B or such other Windstream Permit form currently used shall be returned to the Licensee. At that time Licensee will be considered to have been granted a License with respect to the poles approved in the PARON and may attach to Licensor's facilities.

21.03 The steps for larger order jobs pursuant to the FCC guidelines are:

- A. Pole Attachment Quote Preparation: Licensee shall submit a Pole Attachment Request Application (Exhibit B to Licensor's Attachment Application Procedures), (which may be reasonably revised from time to time by Licensor at its sole discretion) to Licensor which will include a drawing of the proposed route and contact information (name, telephone, facsimile, and email information), and all required fees, as listed in and computed in accordance with APPENDIX I, (Fees may be changed from time to time by Licensor to remain consistent with prevailing costs.) When Licensor receives the aforementioned specific attachment information and fee, if required, from Licensee, the following schedule will commence pursuant to the FCC requirements set forth in the April 7, 2011 Report and Order and Order on Reconsideration. If during this process, Licensor determines any lawful reason for denying Licensee's application, Licensor will so inform Licensee.
- A1. Stage 1: Survey. During the 60-day survey phase, the Licensor conducts an engineering study to determine whether and where attachment is feasible, and what make-ready is required.
 - A2. Stage 2: Estimate. Licensor provides an estimate of the make-ready charges within 14 days of receiving the results of the engineering survey.
 - A3. Stage 3: Licensee Acceptance. The Licensee has up to 14 days to approve the estimate and provide payment. If project is declined, Licensee will be billed any costs incurred to date.
 - A4. Stage 4: Make-Ready. Licensor will notify any attachers with facilities already on the pole that make-ready for the licensee needs to be performed within 105 days. Wireless attachments above the communications space will have a longer make-ready period of 135 days. Upon notice to the Licensee, Licensor may take 15 additional days after the make-ready period runs to complete make-ready itself.

21.04 Upon completion of the make-ready work, the receipt of all payments and fees, and the signing of this Agreement, an "Approved" Exhibit B or such other Windstream Permit form currently used shall be returned to the Licensee. At that time Licensee will be considered to have been granted a License with respect to the poles approved in the PARON and may attach to Licensor's facilities.

21.05 **Timeframes** for orders greater than 3,000 poles shall be negotiated by the parties.

22.0 SURVEYS AND INSPECTIONS OF LICENSEE'S FACILITIES

22.01 Licensor reserves the right to inspect each new installation or work operation of Licensee on or within Licensor's facilities. The making of inspections or the failure to make inspections shall not relieve Licensee of any responsibility, obligation or liability imposed by this Agreement.

23.0 ISSUANCE OF LICENSES

23.01 Before Licensee shall have a right to attach to any pole of Licensor, Licensee shall make application for and receive a revocable, nonexclusive license therefore in the form of an approved Application for Pole License (APPENDIX VI and Exhibit B to Licensor's related Attachment Application Procedures).

- 23.02 Before Licensee shall have the right to place any cable, equipment or facilities within any conduit system or right-of-way of Licensor, Licensee shall make application for an receive a revocable, nonexclusive license therefore in the form of an approved Application for Conduit or Right-of-Way License (APPENDIX IV and Exhibit B to Licensor's related Attachment Application Procedures), hereto attached and made a part hereof.
- 23.03 Any license granted hereunder for attachment to Licensor's poles shall terminate without further notice to Licensee as to individual poles covered by the license to which Licensee has not attached within ninety (90) days from the date that Licensor has notified Licensee that such poles are available for attachment of the operating facilities of Licensee, unless Licensor, in the exercise of its sole discretion, agrees to extend said period at the request of Licensee.
- 23.05 Any license granted hereunder for placement of Licensee's facilities in Licensor's conduit system shall terminate without further notice to Licensee as to individual sections of Licensor's conduit system covered by the license in which Licensee has not placed its facilities within ninety (90) days from the date that Licensor has notified Licensee that such sections of the conduit system are available for the placement of operating facilities of Licensee, unless Licensor, in the exercise of its sole discretion, agrees to extend said period at the request of Licensee.

24.0 AUTHORITY TO PLACE ATTACHMENTS

- 24.01 Before any attachments or placement of facilities Licensee shall submit evidence that Licensee has the authority to maintain Attachments within public rights-of-way or on private right-of-way or on private property. Licensee shall be solely responsible for obtaining all licenses, authorizations, permits and consents from federal, state and local authorities or private land owners that may be required to place and maintain facilities on Licensor's poles or within Licensor's conduit, duct or right-of-way.

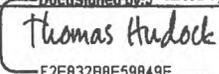

25.0 NOTICES (OF MODIFICATION OR ALTERATION OF POLES)

- 25.01 In the event Licensor plans to modify or alter any Licensor Poles upon which Licensee has placed Attachments, Licensor, except in emergency situations, shall provide Licensee written notice of the proposed modification or alteration at least ninety (90) business days prior to the time the proposed modification or alteration is scheduled to take place. Should Licensee decide to modify or alter Licensee's Facilities on Poles, Licensee shall so notify Licensor in writing at least ninety (90) business days prior to the day the work is to begin. In such event, Licensee shall bear a proportionate share of the total costs incurred by Licensor to make Licensor Poles accessible. Licensee's proportionate share of the total cost shall be based on the ratio of the amount of new space occupied by Licensee to the total amount of new space occupied by all of the parties joining in the modification. Licensee is not responsible for any costs of Licensor's modifications or alterations of its Poles.
- 25.02 In the event Licensor is required to move the location of, or replace, any Licensor Pole(s) for reasons beyond its control, Licensee concurrently shall relocate Licensee's Attachments. Licensee shall be solely responsible for the costs of the relocation of Licensee's Attachments. When it is mutually agreed that it is in the best interest of Licensor and Licensee, Licensor will, after proper notification has been provided, transfer Licensee's Attachments at the same time that Licensor transfers its Attachments. The rate charged for these transfers is listed in this Agreement (APPENDIX I). The rate for transfers may be adjusted by Licensor from time to time to remain consistent with prevailing costs.

25.03 Notices under this Agreement may be given and shall be deemed to have been given, by posting the same in first class mail to Licensee as follows:

26.0 REQUIREMENTS AND SPECIFICATIONS FOR ATTACHMENT TO POLES

26.01 Licensee's cables, equipment, and facilities shall be placed and maintained in accordance with the requirements and specifications attached hereto and as set forth in Licensor's related Attachment Application Procedures and made a part hereof, and in accordance with the requirements and specifications of the National Electric Safety Code (most recent edition) and the National Electric Code (most recent edition), and in compliance with any other rules or orders now in effect or that may hereafter be issued by any state utility commission or other authority having jurisdiction.

27.0 PLACEMENT OF ATTACHMENTS

- 27.01 Licensee shall, at its own expense, place and maintain and replace its Attachments on Licensor's Poles in accordance with:
- (A) Such reasonable requirements and specifications as Licensor shall from time to time prescribe in writing in Licensor's Attachment Application Procedures or otherwise,
 - (B) In compliance with any rules or orders now in effect or that hereafter may be issued by any regulatory agency or other authority having jurisdiction, and
 - (C) All currently applicable requirements and specifications of the National Electrical Safety Code, National Electric Code, most current edition or any amendment or revision of said Code. Licensee agrees to comply, at its sole risk and expense, with all specifications hereto, as may be revised from time to time by Licensor. Licensor will provide supervision at Licensee's expense if Licensor believes it is required.
- 27.02 Licensee's Facilities shall be tagged at maximum intervals of 300 feet so as to identify Licensee as the owner of the Facility. The tags shall be of sufficient size and lettering so as to be easily read from ground level.

28.0 MODIFICATIONS, ADDITIONS OR POLE REPLACEMENTS AND REARRANGEMENTS

- 28.01 Licensee shall not modify, add to, or replace facilities on any pre-existing Attachment on an Licensor Pole without first notifying Licensor in writing of the intended modification, addition or replacement at least thirty (30) business days prior to the date the activity is scheduled to begin. The required notification shall include:
- (A) The date the activity is scheduled to begin,
 - (B) A description of the planned modification, addition, or replacement,
 - (C) A representation that the modification, addition, or replacement will not require any space other than the space previously designated for Licensee's Attachments, and

- (D) A representation that the modification, addition, or replacement will not impair the structural integrity of the Poles involved.
- 28.02 Should Licensor determine that the modification, addition, or replacement specified by Licensee in its notice will require more space than that allocated to Licensee or will require the rearrangements of, reinforcement of, replacement of, or an addition of support equipment to the Poles involved in order to accommodate Licensee's modification, addition, or replacement, Licensor will so notify Licensee, whereupon Licensee will be required to submit a PAR in compliance with this Agreement in order to obtain authorization for the modification, addition, or replacement of its Attachments.
- 28.03 Should Licensee request Licensor to expand capacity or purchase additional plant, Licensee agrees to pay all reasonable costs. If Licensor or another party that has been granted a license joins in the request and will benefit from the expansion or purchase, Licensee agrees to pay a percentage of all costs proportionate to Licensee's share of the benefit received from the expansion or purchase.
- 28.04 When multiple applications, including application of Licensee, are received by Licensor with respect to any pole which must be replaced or rearranged to provide additional space prior to commencement of the work on that pole a Transfer Attachment Fee may be charged. Licensor will equitably prorate to the extent that it is practical between Licensee and other applicants for the pole space, the common expenses of engineering, rearrangement, and replacement, if any, which result from the processing of multiple applications. . Licensee shall be bound by Licensor's determination as to any such pro-ration of Transfer Attachment Fee to Licensee.

29.0 UNAUTHORIZED ATTACHMENTS

- 29.01 If any cable, equipment or facilities of Licensee shall be found on a pole or within a conduit or right-of-way for which no license is outstanding, Licensor, without prejudice to its other rights or remedies under this Agreement or otherwise, may:
- (A) Impose a charge, and
- (B) Require Licensee to remove such cable, equipment or facilities forthwith or Licensor may remove them without liability and the expense of removal shall be borne by Licensee. For the purpose of determining the charge, Licensee shall pay liquidated damages that will not exceed an amount equal to the annual pole attachment fee for the number of years the unauthorized attachments have existed (or, if that cannot be determined, the number or years since the most recent inventory or five years, whichever is less), plus interest at a rate set for that period by the IRS for individual underpayments pursuant to Section 6621 of the IRS Code. Any such charge imposed by Licensor shall be in addition to its rights to any other sums due and payable, including without limitation the actual costs of any audit or survey which established the existence of the unauthorized attachments and to any claims to said fees or said unlicensed use shall be deemed as a ratification or the licensing of the unlicensed use, and if any license should subsequently be issued, after application and payment of the application fee therefore, said license shall not operate retroactively or constitute a waiver by Licensor of any of its rights or privileges under this Agreement or otherwise.

29.02 For purposes of this section, an unauthorized Attachment shall include, but not limited to:

- (A) An Attachment to a Pole which is not identified in any PARON (APPENDIX VI) issued in accordance with this Agreement;
- (B) An Attachment that occupies more space than that allocated to Licensee By Licensor;
- (C) An attachment that is not placed in accordance with the provisions of this Agreement or the appropriate PARON (APPENDIX VI) issued pursuant to this Agreement, unless Licensee can demonstrate to Licensor's reasonable satisfaction that said misplacement is not due to any act or omission of Licensee or Licensee's agents;
- (D) An addition or modification by Licensee to its pre-existing Attachment(s) that impairs the structural integrity of the involved Licensor Pole(s).
- (E) An Attachment that consists of facilities owned or controlled by, and for the use of a Party other than Licensee.

29.03 Once Licensor has notified Licensee of an unauthorized attachment. Licensee can submit a PAR to request an authorized attachment. A PAR submitted per this provision will be treated like any other PAR subject to this Agreement. Licensee will be responsible for all fees associated with a PAR (as identified in this Agreement). If a PAR is not received by Licensor within ten (10) business days of Licensee's receipt of an unauthorized attachment notification, Licensee has sixty (60) business days from the date of its receipt of the initial unauthorized attachment notification to vacate the Pole.

30.0 FAILURE TO PLACE ATTACHMENTS

30.01 Once Licensee has been issued a PARON (APPENDIX VI), Licensee shall have ninety (90) calendar days from the date of the PARON (APPENDIX VI) to begin the placement of its Attachments on the Licensor Poles covered by the PARON (APPENDIX VI). If Licensee has not begun placing its Attachments within that ninety-(90) calendar day period, Licensee shall so advise Licensor with a written explanation for the delay. If Licensee fails to advise Licensor of its delay, with a written explanation therefore, or if Licensee fails to act in good faith by not making a bona fide effort to begin placing its Attachments within the ninety (90) calendar days prescribed by this section, the previously issued PARON (APPENDIX VI) shall be deemed rescinded by Licensor and Licensee shall have no further right to place Attachments pursuant to that PARON (APPENDIX VI).

31.0 OCCUPANCY OF CONDUIT SYSTEM

31.01 When Licensee submits an application for a license to place its cables, equipment, and facilities in the conduit system of Licensor, Licensor will advise Licensee of the availability of conduit space in accordance with Licensor's Attachment Application Procedures. In determining the availability of space in Licensor's conduit system, Licensor reserves the right to deny the granting of a license for any non-discriminatory lawful reason, including without limitation, insufficient capacity or reasons of safety, reliability and generally applicable engineering purposes. If conduit space is available, a license to occupy a portion of conduit system will be granted to Licensee, provided, however, that Licensor does not warrant the condition of such conduit system.

- 31.02 Licensor reserves the right to exclude cable, equipment, and facilities of Licensee from Licensor's conduit system, or to limit the type, number and size of Licensee's cable, equipment, and facilities which may be placed in any of Licensor's manholes.

32.0 OCCUPANCY OF RIGHT-OF-WAY

- 32.01 Licensor and Licensee agree that neither party has the right to restrict or interfere with the other party's lawful access to and use of public right-of-way, including public right-of-way, which pass over property owned by either party. Except as otherwise specifically provided in this Agreement, Licensor and Licensee shall each be responsible for obtaining their own right-of-way and permission to use real or personal property owned or controlled by any governmental body.
- 32.02 In the event that Licensee desires to occupy right-of-way owned or controlled by Licensor, Licensor may require Licensee to make an application to do so by the terms of this Agreement. Licensor reserves the right to determine whether granting a license would adversely affect its common carrier communication services and its ability to meet its duties and obligation with respect thereto, including questions of economy, safety, and future need of Licensor.
- 32.03 Licensor may, without incurring any liability, remove the cables, equipment, and facilities of Licensee from Licensor's right-of-way, at Licensee's expense where in Licensor's judgement (such judgement to be conclusive) such removal is required in connection with the performance of Licensor's service obligation or the safety of Licensor's employees. Whenever such removal has been made, Licensee will be promptly notified.

33.0 CONSTRUCTION AND MAINTENANCE OF FACILITIES

- 33.01 Licensee shall, at its own expense, make and maintain its pole attachments in a safe condition and in thorough repair, and in a manner reasonably acceptable to Licensor, and so as not to conflict with the use of said poles by Licensor or by other authorized users of said poles, or interfere with other facilities thereon or which may from time to time be placed thereon. Licensee shall, at its own expense, upon written notice from Licensor, relocate or replace its facilities placed on said poles, or transfer them to substituted poles, or perform any other work in connection with said facilities that may be required. Licensor shall give such written notice as is reasonable in the circumstances, provided, however, that in cases of emergency, (Licensor's judgment as to what constitutes an emergency to be conclusive) Licensor may arrange to relocate, remove or replace the attachments placed on said poles by Licensee, transfer them to substituted poles or perform any other work in connection with said facilities that may be required in the maintenance, replacement, removal or relocation of said poles or of the facilities thereon or which may be placed thereon, or for the service needs of Licensor, and Licensee shall reimburse Licensor for the expense thereby incurred. Attachments of Licensee to poles of Licensor, as mentioned herein shall be understood to include attachments of Licensee in space reserved for Licensor, or space which Licensor has the right to use, on poles of other companies with which Licensor now has or may hereafter have agreements for joint use and occupancy; and the use of such space by Licensee shall be subject to the terms and conditions of the agreements between Licensor and said other companies. Such authorization will not be unreasonably withheld.

- 33.02 Licensee's cable, equipment, and facilities shall be placed in, removed from, relocated in or maintained in Licensor's conduit system only when specific authorization for the work to be performed and approval of the person, firm or corporation selected by Licensee to perform the work, has been obtained in writing in advance from Licensor. Licensor retains the right to specify what, if any work shall be performed by Licensee. Such authorization will not be unreasonably withheld
- 33.03 In each instance where Licensee's cable, equipment, and facilities are to be placed in Licensor's conduit system, Licensor shall specify, among other things, the cable configuration and location of Licensee's cable, equipment, and facilities, the particular duct of the conduit system such cable will occupy, and the location where and manner in which Licensee's cable will enter and exit Licensor's conduit system.
- 33.04 Licensor's manholes shall be opened as reasonably permitted by Licensor's authorized employees or agents. Licensee shall be responsible for obtaining any necessary permits from appropriate governmental authorities to open manholes and to conduct the work operations. Licensee's employees or agents will be permitted to enter or work in Licensor's manholes only when an authorized agent or employee of Licensor is present except as provided in the next paragraph. Licensor's said agent or employee shall have the authority to terminate Licensee's work operations in and around Licensor's manholes if, in the sole discretion of said agent or employee, any hazardous conditions arise or any unsafe practices are being followed by Licensee's employees or agents. Licensee agrees to pay, in accordance with the terms and conditions of APPENDIX I, the full cost of having Licensor's agent or employee present when Licensee's work is being done in Licensor's manholes. The presence of Licensor's authorized agent or employee shall not relieve Licensee of its responsibility to conduct all of its work operations in and around Licensor's manholes in a safe and workmanlike manner. Licensee is responsible for all signage, traffic control, equipment, and personnel necessary to work in Licensor's manholes. All work shall meet Occupational Safety and Health Act (OSHA), and any local or state standards and requirements.
- 33.05 Licensee's employees will be permitted to enter or work in Licensor's manholes and conduit system without an authorized agent or employee of Licensor being present, provided that Licensee's work consists only of routine operations of testing, adjusting, regulating or inspecting Licensee's existing facilities and does not involve any placing, removing, changing or rearranging of Licensee's or Licensor's facilities. In such cases, Licensee shall notify Licensor's designated representative in advance of Licensee's operations as to the type of work to be performed, the time at which it is to be performed and where it is to take place. Licensee shall conduct all such work operation in a safe and workmanlike manner, and in accordance with the terms of this Agreement.
- 33.06 Licensee shall, at its own expense, maintain its buried communication facilities so as not to conflict with the use of the right-of-way by Licensor or other authorized users of the right-of-way. Licensee shall, at its own expense, relocate, change, or replace its facilities or perform any other work in connection with said facilities that may be reasonably required by Licensor or other authorities.

34.0 TERMINATION OF LICENSES

- 34.01 Upon notice from Licensor to Licensee that Licensor has been advised by governmental authority or private property owners that the use of any pole, conduit system, or right-of-way is not authorized and is objected to by such governmental authority or private property owner, as the case may be or that any pole, any conduit system or any right-of-way is to be removed, sold or otherwise disposed of, Licensee shall, if reasonably requested by Licensor, remove its cables, equipment, and facilities at once from the affected pole or poles or shall make arrangements for the removal of its cable, equipment, and facilities from the affected portion of Licensor's conduit system or right-of-way at Licensor's expense. If not so removed, Licensor shall have the right to remove Licensee's cable, equipment, and facilities from Licensor's right-of-way at the cost and expense of Licensee and without any liability thereto. If Licensor deems it is impractical to remove Licensee's cables, equipment or facilities from any right-of-way, they may be abandoned in place.
- 34.02 Licensee may at any time remove its facilities from any pole of Licensor, but shall immediately give Licensor written notice of such removal and surrender of license in the form of a Notification of Surrender (APPENDIX VII) hereto attached and made a part hereof. If Licensee surrenders its license but fails to remove its facilities from Licensor's poles, Licensor shall have the right to remove Licensee's facilities at Licensee's expense without any liability on the part of Licensor for damage or injury to Licensee's facilities. In the event that Licensee's cables, equipment, and facilities shall be removed from any pole as provided by this Agreement, no attachment shall again be made to such pole unless Licensee shall have first complied with all of the provisions of this Agreement as though no attachment had previously been made.
- 34.03 If Licensee desires to terminate its license for the right to occupy any part of Licensor's conduit system, Licensee shall give Licensor written notice of such surrender in the form of a Notification of Surrender (APPENDIX VII) hereto attached and made a part hereof. In such event, Licensee shall make arrangements with Licensor for the removal of Licensee's cables, equipment, and facilities from that part of Licensor's conduit system at Licensee's expense. In the event that Licensee's cables, equipment, and facilities shall be removed from Licensor's conduit system as provided by this Article, no cable, facilities or equipment shall again be placed in that part of such conduit system unless Licensee shall have first complied with all of the provisions of this Agreement as though no cables, equipment, and facilities of Licensee had previously been placed in that part of Licensor's conduit system.
- 34.04 If Licensee desires to terminate its license for the right to occupy any part of the right-of-way, Licensee shall give Licensor written notice of such surrender in the form of a Notification of Surrender (APPENDIX VII) attached hereto and made a part hereof. In such event, Licensee shall make arrangements with Licensor for the removal of Licensee's cables, equipment, and facilities from that part of the right-of-way at Licensee's expense. However, in the event it is impractical to remove Licensee's cable, equipment, and facilities from any right-of-way, they may be abandoned in place.

35.0 EMERGENCY RESTORATION PROCEDURES

- 35.01 In the event of an emergency, restoration procedures may be affected by the presence of Licensee's Attachments. While Licensor shall not be responsible for the repair of damaged Attachments of Licensee (except by mutual written agreement), Licensor shall nonetheless control access to its poles, conduit systems or right-of-way if the restoration is to be achieved in an orderly fashion.

35.02 Where Licensor and Licensee are involved in emergency restorations, access to Licensor's poles, conduit systems or right-of-way will be controlled by Licensor's Network Construction Managers or their on-site representative according to the following guidelines.

(A) Service Disruptions/Outages

- (1) While exercising its right to first access, Licensor shall make all reasonable efforts to grant access to as many other entities with Attachments as is reasonably safe.
- (2) Where simultaneous access is not possible, Licensor will grant access on first come, first served basis.

(B) Service Affecting Emergencies

- (1) While exercising its right to first access, Licensor shall make all reasonable efforts to grant access to as many other entities with Attachments as is reasonably safe.
- (2) Where Licensor is unable to grant simultaneous access to all other entities with Attachments, access will be granted according to the level of damage to the Attachments of each entity and the likelihood that a given level of damage will result in service disruption. Where the likelihood that a service disruption will result is not clearly discernible, access will be on a first come, first served basis.

35.03 Without limiting any other indemnification or hold harmless provisions of this Agreement, Licensee agrees that any decision by Licensor regarding access to Attachments, or any action or failure to act by Licensor, under this section shall not be the basis for any claim by Licensee against Licensor for any damage to Licensee's Attachments or disruption of Licensee's services, or any other direct or indirect damages of any kind whatsoever incurred by Licensee.

36.0 ABANDONMENT

36.01 Nothing in this Agreement shall prevent or be construed to prevent Licensor from abandoning, selling, assigning, or otherwise disposing of any poles, conduit systems or other Licensor property used for Licensee's Attachments; provided, however, that Licensor shall condition any such sale, assignment, or other disposition subject to the rights granted to Licensee pursuant to this Agreement. Licensor shall promptly notify Licensee of any proposed sale, assignment, or other disposition of any poles, conduit systems or other Licensor property used for Licensee's Attachments.

APPENDIX VIII - LICENSEE - ENGINEERING/CONSTRUCTION/BILLING CONTACT INFORMATION

AGREEMENT TERMS AND CONDITIONS

1.0 SCOPE OF AGREEMENT

- 1.01 The purpose of this Agreement is to set forth the rates, terms, conditions, and procedures under which the Licensor will provide Licensee access to Licensor's poles, ducts, innerducts, conduits, and rights-of-way.
- 1.02 Subject to the provisions of this Agreement, Licensor will issue to Licensee for any lawful communications purpose, revocable, nonexclusive licenses authorizing the attachment of Licensee's cables, equipment, and facilities to Licensor's poles or the placing of Licensee's cables, equipment, and facilities in Licensor's conduit system or within right-of-way owned or controlled by Licensor.
- 1.03 No use, however extended, of Licensor's poles, conduit system or right-of-way nor payment of any fees or charges required under this Agreement shall create or vest in Licensee any ownership or property rights in said poles, conduit system or right-of-way, but Licensee's rights therein shall be and remain a mere license. Nothing herein contained shall be construed to compel Licensor to construct, retain, extend, place, or maintain any facilities not needed for its own service requirements, unless otherwise required by law.
- 1.04 Licensee recognizes that Licensor has heretofore entered into, or may in the future enter into, agreements and arrangements with others which are not party to this Agreement regarding the poles, conduit system and right-of-way covered by this Agreement. Nothing herein contained shall be construed as a limitation, restriction or prohibition against Licensor with respect to such other agreements or arrangements. The rights of Licensee shall at all times be subject to any present or future joint use arrangement between Licensor and any other public utility or government agency.

2.0 DEFINITIONS

- 2.01 "Attachments" - Any attachment to a pole, use of a duct or innerduct, use of a conduit, or using right-of-way owned or controlled by Licensor.
- 2.02 "Attachment Fee" - Fee paid annually per attachment on a pole, or in a duct, innerduct, conduit, or right-of-way.
- 2.03 "Buried Cable" - Cable located below the surface of the ground but not in Licensor's conduit system.
- 2.04 "Conduit System" - Any combination of ducts, innerducts, conduits, manholes, and handholes owned or controlled by Licensor that is a reusable passage or opening in, on, under or through the ground, or a structure such as a building or bridge. The term includes "inner ducts" created by subdividing a duct into smaller channels.
- 2.05 "Hazardous Materials" -

- (A) Any substance, material or waste now or hereafter defined or characterized as hazardous, toxic or dangerous as defined by the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA") of 1980, as amended, and other federal, state, and local health, safety, and environmental laws, ordinances, statutes, and rules, including but not limited to the Occupational Safety and Health Act ("OSHA").
 - (B) Any substance, material or waste now or hereafter classified as a contaminant or pollutant under any law, rules, ordinance, or authority.
 - (C) Any other substance, material or waste, the manufacture, processing, distribution, use, treatment, storage, placement, disposal, removal or transportation of which is now or hereafter subject to regulation under any law, ordinance, statute, rule or regulation of any governmental body or authority.
- 2.06 "Make Ready Work" - All work to prepare Licensor's poles, ducts, innerducts, conduits, rights-of-way, and related facilities for the requested occupancy or attachment of Licensee's facilities but not the actual placement of attachments or administrative activities related to inquiries, verifications, requests or applications.
- 2.07 "Poles"- Licensor owned and poles owned by others to the extent that and for so long as Licensor has the right to permit others to be attached in the communications space.
- 2.08 "Pole Attachment Request" or "PAR" - A written request from Licensee to attach its facilities to Poles, submitted in accordance with this Agreement. With respect to pole attachment agreements in effect prior to the date the Parties executed this Agreement, the term PAR shall be deemed to include Pole Attachment Requests made by letter or similar document.
- 2.09 "Right-of-Way" - Right-of-way owned or controlled by Licensor. It does not include attachment or use of cables, poles, equipment or facilities located on a particular right-of-way. It may include private easement, or in certain instances public right-of-way granted by a governmental authority or a utility easement such as in a subdivision or development.

3.0 TERM OF AGREEMENT

- 3.01 This Agreement shall become effective upon its Effective Date and if not terminated in accordance with the provisions of other Articles hereof, shall continue in effect for a term of not less than five (5) years, provided, however, that at any time after the first year of said term the rates, fees and charges set forth may be increased or decreased by written notice from Licensor to Licensee on a nondiscriminatory basis with respect to similar rates, fees and charges of other similar licensees.
- 3.02 Either Party may terminate this Agreement with at least a (6) six month written notice to the other Party.
- 3.03 Upon termination of the Agreement in accordance with any of its terms, all outstanding licenses in connection therewith shall terminate and shall be surrendered and Licensee shall within sixty (60) days of date of termination remove all cables, equipment and facilities at the cost and expense of Licensee. If Licensor in its sole discretion, deems it is impractical to remove Licensee's cable, equipment and facilities from Licensor's rights-of-way, they may be abandoned in place.

4.0 LEGAL AUTHORITY

- 4.01 Licensee will obtain from public authorities and private owners of property any and all permits, franchises, licenses and grants necessary for the lawful exercise of any license granted hereunder

5.0 APPLICABLE LAW

- 5.01 This Agreement, and the rights and obligations contained in it, shall be governed and construed under the laws of the state in which the attachments hereunder are to be located.

6.0 SUBSEQUENT LAW

- 6.01 The terms and conditions of this Agreement shall be subject to any and all applicable laws, rules, regulations or guidelines now in effect from any federal, state or local governmental authority. In the event that any effective legislative, regulatory, judicial or other legal action by a governmental body or court of competent jurisdiction materially changes any rule, law or judicial or administrative decision that was the basis of the requirement, obligation or right upon which any provision of this Agreement was negotiated, or materially impairs the ability of the pole owner or attaching party to perform any material terms of this Agreement, the attaching party or pole owner may, on thirty (30) days' written notice request that such terms be renegotiated, and the Parties shall renegotiate in good faith such mutually acceptable new terms as may be required. In the event that such new terms are not renegotiated within ninety (90) days after such notice, the Dispute shall be referred to the Dispute Resolution procedure set forth in Section 18.0. Should any term of this Agreement be determined by a court or agency with competent jurisdiction to be unenforceable, all other terms of this Agreement shall remain in full force and effect.

7.0 DISCLAIMER OF WARRANTIES

- 7.01 Except as specifically set forth in this Agreement, Licensor makes no warranties, express or implied, including, but not limited to, any implied warranties of merchantability or fitness for a particular purpose.

8.0 LICENSE NOT EXCLUSIVE

- 8.01 Nothing herein contained shall be construed as a grant of any exclusive license, right or privilege to Licensee. Licensor shall have the right to grant, renew and extend rights and privileges to others not parties to this Agreement, by contract or otherwise, to use any poles, conduit system or right-of-way covered by this Agreement, under such terms and conditions, as Licensor shall prescribe.

9.0 ASSIGNMENT OF RIGHTS

- 9.01 Licensee shall not assign; transfer or sublet the privileges hereby granted, or sell, lease or otherwise permit the use of its facilities on or any part thereof (all of the foregoing being "Transfers"), without prior consent in writing of Licensor which consent shall not be

unreasonably withheld, delayed or conditioned; provided, however, that either Party may so assign its rights and obligations under this Agreement without such consent to (i) any entity said Party, directly or indirectly, controls, is controlled by or is under common control with or (ii) any entity acquiring all or substantially all of said Party's assets or equity, by providing written notice to the other Party of such assignment. Any attempted assignment that is not permitted under this Section 9.01 is void *ab initio*.

9.02 Subject to the provisions of this Agreement, this Agreement shall extend to and bind the successors and authorized assigns of the Parties hereto.

10.0 LIABILITY AND DAMAGES

10.01 Licensor reserves to itself, its successors and assigns, the right to maintain its poles, conduit system and right-of-way and to operate its facilities thereon in such manner as will best enable it to fulfill its own service requirements. Licensor shall not be liable to Licensee for any interruption to service of Licensee or for interference with the operation of the cables, equipment or facilities of Licensee arising in any manner out of the use of Licensor's poles, conduit system and right-of-way except caused by Licensor's sole negligence, willful misconduct or material breach of this Agreement, in which case Licensor's liability shall be limited to the reasonable cost of repair of Licensee's damaged cable, equipment or facilities, if any.

10.02 Licensee shall exercise special precautions to avoid damaging the cables, poles, conduits, right-of-way equipment and facilities of Licensor and of other licensees. Licensee will assume responsibility for any and all loss, damages, costs and expenses as a result of the Licensee's acts or omissions excluding such loss, damage, cost and expenses resulting from the negligence or willful misconduct of the Licensor. Licensee shall make an immediate report to Licensor of the occurrence of any such damage and hereby agrees to reimburse the respective owners for the expense incurred in making repairs.

10.03 Licensee shall indemnify and hold harmless Licensor against any and all claims, demands, causes of action, damages, costs or liabilities of every kind and nature whatsoever related to or arising out of this Agreement, except to the extent caused by Licensor's negligence or willful misconduct, which may arise out of or be caused by:

- (A) The erection, maintenance, presence, use or removal of Licensee's cable, equipment, and facilities on Licensor's poles, and within Licensor's conduit system and right-of-way
- (B) Any act of Licensee on or in the vicinity of Licensor's poles, conduit system and right-of-way, or
- (C) Any interruption, discontinuance, or interference with Licensee's service to any of its subscribers occasioned or claimed to have been occasioned by any action of Licensor pursuant to or consistent with this Agreement. Licensee shall, upon demand and at its own sole risk and expense, defend any and all suits, actions or other legal proceeding brought or instituted against Licensor on any such claim, demand or cause of action, and shall pay and satisfy any judgment or decree rendered against Licensor therein, and Licensee shall reimburse Licensor for any and all legal expense incurred by Licensor in connection therewith. Licensee shall also indemnify, protect and hold harmless Licensor from any and all claims and demands of whatever kind which arise directly or indirectly from the operation of Licensee's facilities including taxes, special charges by others,

claims and demands for damages or loss for infringement of copyright, for libel and slander for unauthorized use of television broadcast programs, and for unauthorized use of other program material, and from and/or against all claims and demands for infringement of patents with respect to the manufacturer, use and operation of Licensee's equipment whether arising from the use of Licensee's equipment in combination with Licensor's poles, conduit system, right-of-way or otherwise.

- 10.04 Licensee agrees to comply under the Workmen's Compensation Laws of the state in which attachments are to be located hereunder, and also agrees to cause every subcontractor of Licensee to comply with and qualify under said laws, and shall furnish copies of Certificates demonstrating such compliance to Licensor prior to commencement of the work.

11.0 DEFAULT AND REMEDIES

- 11.01 In addition to Material Defaults defined anywhere else in this Agreement, any one of the following shall be deemed the occurrence of a Material Default under this Agreement:

- (A) Failure by Licensee to pay any fee or other sum required to be paid under the terms of this Agreement and such default continues for a period of thirty (30) calendar days after written notice thereof to Licensee.
- (B) Failure by either Party to perform or observe any other term, condition, covenant, obligation, or provision of this Agreement and such default continues for a period of thirty (30) business days after written notice thereof from the other Party (provided that if such default is not curable within a thirty (30) business day period, the period will be extended if the Party substantially commences to cure such default and proceeds diligently thereafter to effect such cure).
- (C) The filing of any tax or mechanic's lien against Poles because of any act or omission by Licensee which is not bonded or discharged within thirty (30) calendar days of the date Licensee receives notice that such lien has been filed;
- (D) Licensor or Licensee's voluntary or involuntary bankruptcy;
- (E) Licensee's knowing use or maintenance of its Attachments in violation of any law or regulation, or in aid of any unlawful act or undertaking;
- (F) If any authorization which may be required of Licensee by any governmental or private authority for the placement, operation, or maintenance of Licensee's Attachments is denied or revoked.

- 11.02 In the event of a Material Default and subject to any other applicable provision of this Agreement, the Non-defaulting Party, without any further notice to the Defaulting Party (except where expressly provided for below or required by applicable law), may do any one or more of the following:

- (A) Perform on behalf and at the expense of the Defaulting Party, any obligation of the Defaulting Party under this Agreement which the Defaulting Party has failed to perform and of which the Non-defaulting Party shall have given the Defaulting Party notice, the

cost of which performance shall be paid by the Defaulting Party to the Non-defaulting Party upon demand;

- (B) Terminate this Agreement by giving sixty (60) business days written notice of such termination to the other Party. Where a Material Default is on behalf of Licensee, Licensor may remove Licensee's Attachments and store Licensee's facilities in a public warehouse or elsewhere at the expense of and for the account of Licensee without Licensor being deemed guilty of trespass or conversion, and without Licensor becoming liable for any loss or damages to Licensee occasioned thereby; or
- (C) Exercise any other legal or equitable right or remedy that the Non-defaulting Party may have.

11.03 The Defaulting Party shall repay to the Non-defaulting Party upon demand any costs and expenses incurred by the Non-defaulting Party (including, without limitation, reasonable attorneys' fees) in successfully enforcing this Agreement.

11.04 Upon termination of this Agreement by the Non-defaulting Party, the Defaulting Party shall remain liable to the Non-defaulting Party for any and all fees, other payments and damages which may be due or sustained in accord with this Agreement prior to such termination, all reasonable costs, fees and expenses, including, without limitation, reasonable attorney' fees incurred by the Non-defaulting Party in pursuit of its remedies hereunder.

11.05 All rights and remedies of the Non-defaulting Party set forth in this Agreement shall be cumulative and none shall exclude any other right or remedy, now or hereafter allowed by or available under any statute, ordinance, rule of court, or the common law, either at law or in equity, or both.

12.0 INDEMNIFICATION and INSURANCE

12.01 Whenever any liability is incurred by either or both of the parties hereto for damages for injuries to the employees or for injury to the property of either party, or for injuries to other persons or their property, arising out of the use and enjoyment of this easement, the liability for such damages, as between the parties hereto, shall be as follows:

- (A) Licensee, shall compensate Licensor for the full actual loss, damage or destruction of Licensor's property that in any way arises from or is related to this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation, or maintenance of Licensee's facilities).
- (B) Each party agrees to defend, indemnify, protect and hold harmless the other and the other's officers, directors, employees, shareholders, successors, assigns, agents, affiliates, representatives, partners, and contractors from and against any and all third party claims, actions, administrative proceedings (including, without limitation, informal proceedings), judgments, damages, penalties, fines, costs, liabilities, interests, or losses, including, without limitation, reasonable attorneys' fees and expenses, consultant fees, and expert fees, together with all other costs and expenses of any kind or nature suffered by or asserted against the indemnified party in any way arising out of or connected with this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation or maintenance of Licensee's facilities,

unless caused by the sole negligence or willful misconduct on the part of Licensor or Licensor's affiliates, agents, officers, employees and assigns). Each party expressly assumes all liability for actions by its affiliates, agents, officers, employees, or its contractors and expressly waives any immunity from the enforcement of this indemnification provision that might otherwise be provided by workers' compensation law or by other state or federal laws.

- (C) Without limiting any of the foregoing, Licensee assumes all risk of, and agrees to relieve Licensor of any and all liability for, loss or damage (and the consequences of loss or damage) to any facilities placed on Licensor's property and any other financial loss sustained by Licensee, except to the extent caused by the negligence or willful misconduct on the part of Licensor's agents, officers, employees, and assigns.
- (D) Without limiting the foregoing, Licensee expressly agrees to indemnify, defend, and hold harmless Licensor and Licensor's agents, officers, employees and assigns from any and all claims asserted by end users/customers of Licensee in any way arising out of or in connection with this Agreement or Licensee's facilities, except to the extent caused by the negligence or willful misconduct on the part of Licensor or Licensor's agents, officers, employees, and assigns, or its contractors.
- (E) In no event shall either Party be liable to the other for any special, consequential or indirect damages (including, without limitation, lost revenues and lost profits) arising out of this Agreement or any obligation arising hereunder, whether in an action for or arising out of breach of contract, or otherwise.
- (F) Licensee shall indemnify, protect, and hold harmless Licensor from and against any and all claims for libel and slander, copyright and/or patent infringement arising directly or indirectly by reason of installation of Licensee's equipment and facilities on Lessor's Property pursuant to this Agreement.

13.0 COMPLIANCE WITH LAW

13.01 Notwithstanding anything to the contrary in this Agreement, each Party shall ensure that any and all activities it undertakes pursuant to this Agreement shall comply with all applicable laws, including, without limitation, all applicable provisions of:

- (A) Workers' compensation laws
- (B) Unemployment compensation laws
- (C) The Federal Social Security Law
- (D) The Fair Labor Standards Act, and
- (E) All laws, regulations, rules, guidelines, policies, orders, permits and approvals or any governmental authority relating to environmental matters and/or Occupational Safety and Health Act ("OSHA").

14.0 INSURANCE

14.01 The each Party shall obtain and maintain, in full force and effect at all times, during operations covered by this Agreement, such minimum insurance as will cover the obligations and liabilities of said Party, its agents, and its employees which may arise from the operations under this Agreement. Insurance shall have limits of not less than:

(A) Commercial General Liability policy of minimum limits of:

| | |
|---|--------------------------------|
| General Aggregate | \$ 2,000,000 per policy period |
| Products/Completed Operations Aggregate | \$ 2,000,000 per policy period |
| Personal Injury/Advertising | \$ 2,000,000 per occurrence |
| Each Occurrence | \$ 2,000,000 per occurrence |
| Fire Legal Liability | \$ 50,000 any one fire |

14.02 The policy will be endorsed to show the above aggregate limits applying to "each" job site or, as an alternative, the General Aggregate will be increased to \$4,000,000 per policy period. Policy will also specifically state the coverage applies to all operations conducted by the respective Party, its employees, or agents on behalf of that Party's Corporation or subsidiary.

14.03 Where the performance of the work involves structural property, underground property, or blasting, each Party's Commercial General Liability insurance policy shall provide coverage to the insured for legal liability arising from operations under this Agreement for property damage:

- (A) arising out of blasting,
- (B) arising out of collapse of, or structural injury to, any building or structure or
- (C) To underground facilities and utilities.

14.04 Other general liability forms are acceptable in lieu of the Commercial General Liability Form, however, they are not to be used without written approval from the Company's Risk Management Department, 4001 Rodney Parham Road Little Rock, AR 72212. However, such written approval shall not be unreasonably withheld.

(A) Business Automobile Liability policy with minimum limits of:

| | |
|-----------------------|---------------------------|
| Bodily Injury | \$2,000,000 per accident |
| Property Damage | \$ 2,000,000 per accident |
| OR | |
| Combined Single Limit | \$ 2,000,000 per accident |

The policy will be issued using symbol "1 - any auto" coverage.

(B) Workers Compensation:

Part 1 - Medical Benefits Statutory

Part 2 - Employer's Liability as indicated:

| | |
|---------------------------|--------------------------|
| Bodily Injury by Accident | \$ 100,000 each accident |
| Bodily Injury by Disease | \$ 100,000 each employee |

Bodily Injury by Disease \$ 500,000 policy limit

- 14.05 The policy will show the state in which operation on behalf of the Party and/or subsidiary is being conducted. For operations conducted within monopolistic (state fund) states, the Party will furnish a certificate of compliance from the appropriate state fund administrator.
- 14.06 In each and every policy in 14.04A and 14.04B, the other Party's Corporation and its subsidiaries shall be named an "additional insured" with respect to activities performed on behalf of the Party's Corporation and its subsidiaries.
- 14.07 Coverage provided by the policies listed in this paragraph will be issued by an insurance company, licensed in the state in which operations on behalf of the Party are to be conducted. It is acceptable to use both primary and excess/umbrella policies to obtain necessary limits.
- 14.08 Licensee will furnish to the other Party, a certificate evidencing insurance coverage under sub-paragraphs 14.04-A, and 14.04-B. Such certificate shall provide for a thirty-day prior notice to the other Party of any cancellation or material changes in coverage except for ten (10) days notice of cancellation for non-payment of premium and shall be signed by a legal representative of the issuing insurance company or agent. The certificate of insurance shall be sent to the person identified at paragraph 25.03.
- 14.09 The provisions of sub-paragraphs 14.04-A and 14.04-B shall also apply to all sub-Licensees, and Licensee shall be responsible for their compliance herewith.

15.0 NON-WAIVER OF TERMS AND CONDITIONS

- 15.01 Failure to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

16.0 LICENSOR'S LIEN

- 16.01 Should Licensor under any Article of this Agreement remove Licensee's cable, equipment or facilities from Licensor's poles, conduit system or right-of-way, Licensor will deliver to Licensee the cable, equipment or facilities so removed upon payment by Licensee of the cost of removal, storage and delivery, and all other amounts due Licensor hereunder. Licensor is hereby given a lien on Licensee's cable, equipment or facilities within Licensor's conduit system or right-of-way or attached to Licensor's poles or removed therefrom, with power of public or private sale, to cover any amounts due Licensor under the provisions of this Agreement. Such liens shall not operate to prevent Licensor from pursuing, at its option, any other remedy in law, equity or otherwise, including any other remedy provided for in this Agreement.

17.0 SCHEDULE OF FEES AND CHARGES

- 17.01 Licensee may be required to furnish bond or other security satisfactory to Licensor, in a reasonable initial amount to be determined by Licensor and provided by Licensee at the time Licensee submits Exhibit B to Licensor's Attachment Application Procedures to guarantee the payment of any such sums which may become due to Licensor arising out of this Agreement including, but not limited to ` due hereunder or charges for work

performed for the benefit of Licensee under this Agreement, including the removal of Licensee's facilities upon termination of this Agreement by any of its provisions or upon termination of any License issued hereunder. Bond to be sent to person identified at paragraph 25.03. Bond is to be equal to one (1) year's annual rental fees.

17.02 The fees, rates and charges set forth in APPENDIX I or elsewhere in this Agreement are effective during the term of this Agreement subject to Section 3.01 and shall be due and payable by Licensee as set forth herein.

17.03 FEES:

All rates, charges and fees set forth in this Agreement and as shown in APPENDIX I (Schedule of Rates, Fees, and Charges) shall be subject to all applicable federal, state, and local laws, rules, regulations and commission orders.

(A) Computation:

(1) Pole and Anchor Attachment Fees:

- (a) For the purpose of computing the annual pole attachment fee hereunder, for calendar years subsequent to a first partial calendar year, said fee shall be based upon the number of poles and anchors, to which attachments are actually made, as of December 31 of the preceding year, multiplied by the per attachment pole attachment fee rate set forth on APPENDIX I. For a first partial calendar year, the pole attachment fee shall be prorated as necessary, on a daily basis from the date payment is due in accordance with Exhibit B of Licensor's Attachment Application Procedures.
- (b) For billing purposes, a single pole attachment includes the point of attachment and all facilities located in the usable space on the pole in the space assigned to Licensee (typically six inches above and six inches below the point of attachment). If Licensee occupies more than one usable space on a pole, separate attachment fees shall apply to each space occupied.

(2) Conduit Occupancy Fees :

- (a) For the purpose of computing the total conduit occupancy fee due hereunder, the duct feet of conduit shall be measured from the center to the center of manholes; or from the center of a manhole to the end of the duct; from the center of a manhole to the property line if the duct is connected at the property line to a duct owned and controlled by a third-party property owner; or the length of a conduit from pole to pole; or isolated lengths of conduit not attached to any structure (such as involved with buried cable) which will be occupied by Licensee's cable.
- (b) For billing purposes each inner duct will be billed the half duct fee. If two or more facilities occupy a duct that has not been subdivided, the half duct fee will be charged for each facility. The half duct fee will apply when others place the Licensee facility in a duct that has not been subdivided only if the facility does not render the duct unusable.

- (3) Right-of-Way Occupancy Fees:
 - (a) This fee will be negotiated on a case by case basis. There is no established per foot rate.

- (B) Payment Date:
 - (1) If this Attachment License Agreement becomes effective on or prior to June 30, all attachment and occupancy fees for the remainder of that first partial calendar year shall be due and payable at the time required under Appendix I of Licensor's Attachment Application Procedures .

 - (2) If an Attachment License Agreement becomes effective on or after July 1, all attachment and occupancy fees for the remainder of that current partial calendar year as well as the full upcoming calendar year shall be payable at the time required under Appendix I of Licensor's Attachment Application Procedures.

 - (3) On an annual basis, all attachment and occupancy fees not previously paid are to be paid in advance, on the 31st day of January of each year or within thirty (30) days of receipt of invoice. Failure to pay such fees within thirty (30) days of the annual due date shall constitute a Material Default of this Agreement.

- (C) Termination of License:
 - (1) Upon termination or surrender of a license granted hereunder, no refund of any attachment or occupancy fee shall be made.

17.04 OTHER CHARGES:

- (A) Computation:
 - (1) All charges for inspections, engineering, or rearrangements of Licensee's facilities from Licensor's poles or conduit and, without limitation, any other work performed for Licensee shall be based upon the full cost and expense, including reasonable overhead, to Licensor for performing such work for Licensee. The cost to Licensee shall be determined in accordance with the regular and customary methods used by Licensor in determining such costs.

 - (2) The charge for replacement of poles shall include the entire non-betterment cost to Licensor including the increased cost of larger poles, sacrificed life value of the poles removed, cost of removal, less any salvage recovery and the cost of transferring Licensor's facilities from the old to the new poles.

 - (3) All other attachment or occupancy related inquiry, verification, application, administrative and miscellaneous rates, fees and charges shall be calculated and paid in accordance with APPENDIX I and/or Licensor's Attachment Application Procedures and Attachments thereto.

- (B) Payment Date:

- (1) All bills for such other charges for work performed by Licensor shall be payable upon presentment to Licensee, and shall be deemed delinquent if not paid within thirty (30) days after presentment to Licensee.

18.0 DISPUTE RESOLUTION

18.01 Except in the case of:

- (A) A suit, action, or proceeding by one Party to compel the other Party to comply with its obligation to indemnify the other Party pursuant to this Agreement, or
- (B) A suit, action or proceeding to compel either Party to comply with the dispute resolution procedures set forth in this section, the Parties agree to use the following procedure to resolve any dispute, controversy, or claim arising out of or relating to this Agreement or its breach.

18.02 At the written request of a Party, each Party shall designate a knowledgeable, responsible representative to meet and negotiate in good faith to resolve any dispute, controversy, or claim arising under this Agreement. The Parties intend that these negotiations be conducted by industry accepted, business representatives. The substance of the negotiations shall be left to the discretion of the representatives. Upon mutual agreement, the representatives may utilize other alternative dispute resolution procedures such as mediation to assist in the negotiations. Discussions and correspondence between the representatives for the purposes of these negotiations shall be treated as confidential, undertaken for purposes of settlement, shall be exempt from discovery and production, and shall not be admissible in the arbitration described below or in any subsequent lawsuit without the concurrence of all Parties. Documents identified in or provided during such negotiations, which are not prepared for purposes of the negotiations, shall not be so exempt and may, if otherwise admissible, be admitted as evidence in any subsequent proceeding.

18.03 If a resolution of the dispute, controversy or claim is not reached within one hundred eighty (180) calendar days of the initial written request, the dispute, controversy, or claim shall be submitted to binding arbitration by a single arbitrator pursuant to the rules of the American Arbitration Association (AAA), except as hereinafter provided. Discovery in any proceeding before the AAA shall be Party controlled by the arbitrator and shall be permitted to the extent set forth in this section. Parties may exchange, in any combination, up to thirty-five (35) (none of which may contain subparts) written interrogatories, demands to produce documents and requests for admission. Each Party may also take the oral deposition of one (1) witness. Additional discovery may be permitted upon mutual agreement of the Parties. The arbitration hearing shall be commenced within sixty (60) calendar days of the demand for arbitration and shall be held in an agreed upon location. The arbitrator shall rule on the dispute, controversy or claim by issuing a written opinion within thirty (30) business days after the close of hearings. The times specified in this section may be extended upon mutual agreement of the Parties or by the arbitrator upon a showing of good cause. Judgement upon the award rendered by the arbitrator may be entered in any court having jurisdiction.

18.04 Each Party shall bear its own costs, including attorneys' fee, incurred in connection with any of the foregoing procedures. A Party-seeking discovery shall reimburse the responding Party the cost of reproducing documents (to include search time and reproduction time costs).The fees

associated with any arbitration, including the fees of the arbitrator, shall be divided equally between the parties.

19.0 ENTIRE AGREEMENT

- 19.01 This Agreement and Licensor's related Attachment Application Procedures cancels and supersedes all previous agreements whether written or oral, except for any sums due thereunder, between Licensor and Licensee with respect to the attachment of Licensee's cable, equipment, and facilities to Licensor's poles or the placing Licensee's cable, equipment or facilities in Licensor's conduit system or right of way; and there are no other provisions, terms or conditions to this Agreement except as expressed herein. All currently effective licenses heretofore granted pursuant to such previous agreements shall continue in effect subject to the terms and conditions of this Agreement.
- 19.02 The terms and conditions of this Agreement and Licensor's related Attachment Application Procedures supersede all prior oral or written understandings between the Parties and constitute the entire Agreement between them concerning the subject matter of this Agreement. There are no understandings or representations, express or implied, not expressly set forth in this Agreement. This Agreement shall not be modified or amended except by writing signed by the Party to be charged. This Agreement is only applicable to pole applications submitted for attachment to Windstream facilities in the State of Kentucky.

GENERAL OPERATING ROUTINE

20.0 ATTACHMENT, USE AND/OR OCCUPANCY REQUEST PROCESS

- 20.01 There is a multi-step pole attachment or duct, innerduct, conduit or right-of-way use and/or occupancy application process and fee determination process that the Licensee may begin upon the execution of this Agreement. It is set forth below and in Licensor's related Attachment Application Procedures.

21.0 POLE ATTACHMENT REQUESTS (PAR)

- 21.01 The following process can begin upon the execution of this agreement. The steps are:
- (A) Pole Attachment Quote Preparation: Licensee shall submit a Pole Attachment Request Form (Exhibit B to Licensor's related Attachment Application Procedures), which may be reasonably revised from time to time by Licensor at its sole discretion, to Licensor which will include a drawing of the proposed route and contact information (name, telephone, facsimile, and email information), and all required fees, as listed in and computed in accordance with APPENDIX I, which may be changed from time to time by Licensor to remain consistent with prevailing costs, of this Agreement. These fees consist of administrative as well as other actual costs reasonably incurred in researching the requested route. Once Licensor receives the aforementioned specific attachment information and the fee from Licensee, Licensor will report on the Poles along the route, any required make-ready work, the costs and schedule for such make-ready work, and any other requirements Licensee must satisfy prior to installing its facilities. If during this process, Licensor determines any lawful reason for denying Licensee's application,

Licensor will so inform Licensee. Pole attachment quotes will be provided within thirty (30) business days for standard requests. Non-standard quantities of pole attachments and distances will be addressed on an individual case basis, and in a commercially reasonable period.

- (B) Pole Attachment Order: Upon completion of the work identified above, Licensor will inform Licensee if Licensor will provide Licensee a Pole Order Form (Appendix VI to the Licensor's related Attachment Application Procedures) which may be revised from time to time by Licensor at its sole discretion, containing estimated make-ready cost (if any), annual recurring charges and any additional information necessary for Licensee to proceed with attaching its facilities to Licensor's Poles. If Licensee desires to attach to Licensor's poles, and pole make-ready work is required, Licensee shall pay the estimated make-ready cost prior to Licensor beginning any work. Actual costs incurred by Licensor in performing the make-ready work will be applied to the estimated make-ready costs. Any reasonable costs in excess of the estimated cost will be billed to Licensee. Any payment of the estimated costs in excess of actual pole attachment make-ready costs will be returned to Licensee. If Licensee declines to proceed, all fees incurred to date will be billable to Licensee by Licensor.

21.02 Licensee has thirty (30) days to pay the estimated make-ready work or cancel the PAR.

21.03 Upon completion of the make-ready work, the receipt of all payments and fees, and the signing of this Agreement, an "Approved" Attachment I shall be returned to the Licensee. At that time Licensee will be considered to have been granted a License with respect to the poles approved in the PARON and may attach to Licensor's facilities.

22.0 SURVEYS AND INSPECTIONS OF LICENSEE'S FACILITIES

21.01 Licensor reserves the right to inspect each new installation or work operation of Licensee on or within Licensor's facilities. The making of inspections or the failure to make inspections shall not relieve Licensee of any responsibility, obligation or liability imposed by this Agreement.

23.0 ISSUANCE OF LICENSES

23.01 Before Licensee shall have a right to attach to any pole of Licensor, Licensee shall make application for and receive a revocable, nonexclusive license therefore in the form of an approved Application for Pole License (APPENDIX VI and Exhibit B to Licensor's related Attachment Application Procedures).

23.02 Before Licensee shall have the right to place any cable, equipment or facilities within any conduit system or right-of-way of Licensor, Licensee shall make application for and receive a revocable, nonexclusive license therefore in the form of an approved Application for Conduit or Right-of-Way License (APPENDIX IV and Exhibit B to Licensor's related Attachment Application Procedures), hereto attached and made a part hereof.

23.03 Any license granted hereunder for attachment to Licensor's poles shall terminate without further notice to Licensee as to individual poles covered by the license to which Licensee has not attached within ninety (90) days from the date that Licensor has notified Licensee that such

poles are available for attachment of the operating facilities of Licensee, unless Licensor, in the exercise of its sole discretion, agrees to extend said period at the request of Licensee.

- 23.05 Any license granted hereunder for placement of Licensee's facilities in Licensor's conduit system shall terminate without further notice to Licensee as to individual sections of Licensor's conduit system covered by the license in which Licensee has not placed its facilities within one hundred twenty (120) days from the date that Licensor has notified Licensee that such sections of the conduit system are available for the placement of operating facilities of Licensee, unless Licensor, in the exercise of its sole discretion, agrees to extend said period at the request of Licensee.

24.0 AUTHORITY TO PLACE ATTACHMENTS

- 24.01 Before any attachments or placement of facilities Licensee shall submit evidence that Licensee has the authority to maintain Attachments within public rights-of-way or on private right-of-way or on private property. Licensee shall be solely responsible for obtaining all licenses, authorizations, permits and consents from federal, state and local authorities or private land owners that may be required to place and maintain facilities on Licensor's poles or within Licensor's conduit, duct or right-of-way.

25.0 NOTICES (OF MODIFICATION OR ALTERATION OF POLES)

- 25.01 In the event Licensor plans to modify or alter any Licensor Poles upon which Licensee has placed Attachments, Licensor, except in emergency situations, shall provide Licensee written notice of the proposed modification or alteration at least ninety (90) business days prior to the time the proposed modification or alteration is scheduled to take place. Should Licensee decide to modify or alter Licensee's Facilities on Poles, Licensee shall so notify Licensor in writing at least ninety (90) business days prior to the day the work is to begin. In such event, Licensee shall bear a proportionate share of the total costs incurred by Licensor to make Licensor Poles accessible. Licensee's proportionate share of the total cost shall be based on the ratio of the amount of new space occupied by Licensee to the total amount of new space occupied by all of the parties joining in the modification. Licensee is not responsible for any costs of Licensor's modifications or alterations of its Poles.
- 25.02 In the event Licensor is required to move the location of, or replace, any Licensor Pole(s) for reasons beyond its control, Licensee concurrently shall relocate Licensee's Attachments. Licensee shall be solely responsible for the costs of the relocation of Licensee's Attachments. When it is mutually agreed that it is in the best interest of Licensor and Licensee, Licensor will, after proper notification has been provided, transfer Licensee's Attachments at the same time that Licensor transfers its Attachments. The rate charged for these transfers is listed in this Agreement (APPENDIX I). The rate for transfers may be adjusted by Licensor from time to time to remain consistent with prevailing costs.
- 25.03 Notices under this Agreement may be given and shall be deemed to have been given, by posting the same in first class mail to Licensee as follows:

Licensee shall bear a proportionate share of the total costs incurred by Licensor to make Licensor Poles accessible. Licensee's proportionate share of the total cost shall be based on the ratio of the amount of new space occupied by Licensee to the total amount of new space occupied by all of the parties joining in the modification. Licensee is not responsible for any costs of Licensor's modifications or alterations of its Poles.

- 25.02 In the event Licensor is required to move the location of, or replace, any Licensor Pole(s) for reasons beyond its control, Licensee concurrently shall relocate Licensee's Attachments. Licensee shall be solely responsible for the costs of the relocation of Licensee's Attachments. When it is mutually agreed that it is in the best interest of Licensor and Licensee, Licensor will, after proper notification has been provided, transfer Licensee's Attachments at the same time that Licensor transfers its Attachments. The rate charged for these transfers is listed in this Agreement (APPENDIX I). The rate for transfers may be adjusted by Licensor from time to time to remain consistent with prevailing costs.
- 25.03 Notices under this Agreement may be given and shall be deemed to have been given, by posting the same in first class mail to Licensee as follows:

LICENSOR:

Company Name: Windstream Kentucky East, LLC

By: _____

Signature of Licensor's Authorized Officer/Employee
Thomas A. Hudock, Jr.

Licensee:

Company Name: Level 3 Communications, LLC

By: _____

Signature of Licensee's Authorized Officer/Employee

Steve Gordon

Name of Licensee's Authorized Officer/Employee (Printed or Typed)

Sr. Director, NIS

Position/Title of Authorized Officer/Employee

Address
1025 Eldorado Blvd

City, State, and Zip Code
Broomfield, Colorado 80021

Phone # (720) 888-3405

- 27.01 Licensee shall, at its own expense, place and maintain and replace its Attachments on Licensor's Poles in accordance with:
- (A) Such reasonable requirements and specifications as Licensor shall from time to time prescribe in writing in Licensor's Attachment Application Procedures or otherwise,
 - (B) In compliance with any rules or orders now in effect or that hereafter may be issued by any regulatory agency or other authority having jurisdiction, and
 - (C) All currently applicable requirements and specifications of the National Electrical Safety Code, National Electric Code, most current edition or any amendment or revision of said Code. Licensee agrees to comply, at its sole risk and expense, with all specifications hereto, as may be revised from time to time by Licensor. Licensor will provide supervision at Licensee's expense if Licensor believes it is required.
- 27.02 Licensee's Facilities shall be tagged at maximum intervals of 300 feet so as to identify Licensee as the owner of the Facility. The tags shall be of sufficient size and lettering so as to be easily read from ground level.

28.0 MODIFICATIONS, ADDITIONS OR POLE REPLACEMENTS AND REARRANGEMENTS

- 28.01 Licensee shall not modify, add to, or replace facilities on any pre-existing Attachment on an Licensor Pole without first notifying Licensor in writing of the intended modification, addition or replacement at least thirty (30) business days prior to the date the activity is scheduled to begin. The required notification shall include:
- (A) The date the activity is scheduled to begin,
 - (B) A description of the planned modification, addition, or replacement,
 - (C) A representation that the modification, addition, or replacement will not require any space other than the space previously designated for Licensee's Attachments, and
 - (D) A representation that the modification, addition, or replacement will not impair the structural integrity of the Poles involved.
- 28.02 Should Licensor determine that the modification, addition, or replacement specified by Licensee in its notice will require more space than that allocated to Licensee or will require the rearrangements of, reinforcement of, replacement of, or an addition of support equipment to the Poles involved in order to accommodate Licensee's modification, addition, or replacement, Licensor will so notify Licensee, whereupon Licensee will be required to submit a PAR in compliance with this Agreement in order to obtain authorization for the modification, addition, or replacement of its Attachments.
- 28.03 Should Licensee request Licensor to expand capacity or purchase additional plant, Licensee agrees to pay all reasonable costs. If Licensor or another party that has been granted a license joins in the request and will benefit from the expansion or purchase, Licensee agrees to pay a percentage of all costs proportionate to Licensee's share of the benefit received from the expansion or purchase.

- 28.04 When multiple applications, including application of Licensee, are received by Licensor with respect to any pole which must be replaced or rearranged to provide additional space prior to commencement of the work on that pole a Transfer Attachment Fee may be charged. Licensor will equitably prorate to the extent that it is practical between Licensee and other applicants for the pole space, the common expenses of engineering, rearrangement, and replacement, if any, which result from the processing of multiple applications. Licensee shall be bound by Licensor's determination as to any such pro-ration of Transfer Attachment Fee to Licensee.

29.0 UNAUTHORIZED ATTACHMENTS

- 29.01 If any cable, equipment or facilities of Licensee shall be found on a pole or within a conduit or right-of-way for which no license is outstanding, Licensor, without prejudice to its other rights or remedies under this Agreement or otherwise, may:

- (A) Impose a charge, and
- (B) Require Licensee to remove such cable, equipment or facilities forthwith or Licensor may remove them without liability and the expense of removal shall be borne by Licensee. For the purpose of determining the charge, Licensee shall pay liquidated damages that will not exceed an amount equal to the annual pole attachment fee for the number of years the unauthorized attachments have existed (or, if that cannot be determined, the number or years since the most recent inventory or five years, whichever is less), plus interest at a rate set for that period by the IRS for individual underpayments pursuant to Section 6621 of the IRS Code. Any such charge imposed by Licensor shall be in addition to its rights to any other sums due and payable, including without limitation the actual costs of any audit or survey which established the existence of the unauthorized attachments and to any claims to said fees or said unlicensed use shall be deemed as a ratification or the licensing of the unlicensed use, and if any license should subsequently be issued, after application and payment of the application fee therefore, said license shall not operate retroactively or constitute a waiver by Licensor of any of its rights or privileges under this Agreement or otherwise.

- 29.02 For purposes of this section, an unauthorized Attachment shall include, but not limited to:

- (A) An Attachment to a Pole which is not identified in any PARON (APPENDIX VI) issued in accordance with this Agreement;
- (B) An Attachment that occupies more space than that allocated to Licensee By Licensor;
- (C) An attachment that is not placed in accordance with the provisions of this Agreement or the appropriate PARON (APPENDIX VI) issued pursuant to this Agreement, unless Licensee can demonstrate to Licensor's reasonable satisfaction that said misplacement is not due to any act or omission of Licensee or Licensee's agents;
- (D) An addition or modification by Licensee to its pre-existing Attachment(s) that impairs the structural integrity of the involved Licensor Pole(s).

(E) An Attachment that consists of facilities owned or controlled by, and for the use of a Party other than Licensee.

29.03 Once Licensor has notified Licensee of an unauthorized attachment. Licensee can submit a PAR to request an authorized attachment. A PAR submitted per this provision will be treated like any other PAR subject to this Agreement. Licensee will be responsible for all fees associated with a PAR (as identified in this Agreement). If a PAR is not received by Licensor within ten (10) business days of Licensee's receipt of an unauthorized attachment notification, Licensee has sixty (60) business days from the date of its receipt of the initial unauthorized attachment notification to vacate the Pole.

30.0 FAILURE TO PLACE ATTACHMENTS

30.01 Once Licensee has been issued a PARON (APPENDIX VI), Licensee shall have ninety (90) calendar days from the date of the PARON (APPENDIX VI) to begin the placement of its Attachments on the Licensor Poles covered by the PARON (APPENDIX VI). If Licensee has not begun placing its Attachments within that ninety-(90) calendar day period, Licensee shall so advise Licensor with a written explanation for the delay. If Licensee fails to advise Licensor of its delay, with a written explanation therefore, or if Licensee fails to act in good faith by not making a bona fide effort to begin placing its Attachments within the ninety (90) calendar days prescribed by this section, the previously issued PARON shall be deemed rescinded by Licensor and Licensee shall have no further right to place Attachments pursuant to that PARON.

31.0 OCCUPANCY OF CONDUIT SYSTEM

31.01 When Licensee submits an application for a license to place its cables, equipment, and facilities in the conduit system of Licensor, Licensor will advise Licensee of the availability of conduit space in accordance with Licensor's Attachment Application Procedures. In determining the availability of space in Licensor's conduit system, Licensor reserves the right to deny the granting of a license for any non-discriminatory lawful reason, including without limitation, insufficient capacity or reasons of safety, reliability and generally applicable engineering purposes. If conduit space is available, a license to occupy a portion of conduit system will be granted to Licensee, provided, however, that Licensor does not warrant the condition of such conduit system.

31.02 Licensor reserves the right to exclude cable, equipment, and facilities of Licensee from Licensor's conduit system, or to limit the type, number and size of Licensee's cable, equipment, and facilities which may be placed in any of Licensor's manholes.

32.0 OCCUPANCY OF RIGHT-OF-WAY

32.01 Licensor and Licensee agree that neither party has the right to restrict or interfere with the other party's lawful access to and use of public right-of-way, including public right-of-way, which pass over property owned by either party. Except as otherwise specifically provided in this Agreement, Licensor and Licensee shall each be responsible for obtaining their own right-of-way and permission to use real or personal property owned or controlled by any governmental body.

- 32.02 In the event that Licensee desires to occupy right-of-way owned or controlled by Licensor, Licensor may require Licensee to make an application to do so by the terms of this Agreement. Licensor reserves the right to determine whether granting a license would adversely affect its common carrier communication services and its ability to meet its duties and obligation with respect thereto, including questions of economy, safety, and future need of Licensor.
- 32.03 Licensor may, without incurring any liability, remove the cables, equipment, and facilities of Licensee from Licensor's right-of-way, at Licensee's expense where in Licensor's judgement (such judgement to be conclusive) such removal is required in connection with the performance of Licensor's service obligation or the safety of Licensor's employees. Whenever such removal has been made, Licensee will be promptly notified.

33.0 CONSTRUCTION AND MAINTENANCE OF FACILITIES

- 33.01 Licensee shall, at its own expense, make and maintain its pole attachments in a safe condition and in thorough repair, and in a manner reasonably acceptable to Licensor, and so as not to conflict with the use of said poles by Licensor or by other authorized users of said poles, or interfere with other facilities thereon or which may from time to time be placed thereon. Licensee shall, at its own expense, upon written notice from Licensor, relocate or replace its facilities placed on said poles, or transfer them to substituted poles, or perform any other work in connection with said facilities that may be required. Licensor shall give such written notice as is reasonable in the circumstances, provided, however, that in cases of emergency, (Licensor's judgment as to what constitutes an emergency to be conclusive) Licensor may arrange to relocate, remove or replace the attachments placed on said poles by Licensee, transfer them to substituted poles or perform any other work in connection with said facilities that may be required in the maintenance, replacement, removal or relocation of said poles or of the facilities thereon or which may be placed thereon, or for the service needs of Licensor, and Licensee shall reimburse Licensor for the expense thereby incurred. Attachments of Licensee to poles of Licensor, as mentioned herein shall be understood to include attachments of Licensee in space reserved for Licensor, or space which Licensor has the right to use, on poles of other companies with which Licensor now has or may hereafter have agreements for joint use and occupancy; and the use of such space by Licensee shall be subject to the terms and conditions of the agreements between Licensor and said other companies. Such authorization will not be unreasonably withheld.
- 33.02 Licensee's cable, equipment, and facilities shall be placed in, removed from, relocated in or maintained in Licensor's conduit system only when specific authorization for the work to be performed and approval of the person, firm or corporation selected by Licensee to perform the work, has been obtained in writing in advance from Licensor. Licensor retains the right to specify what, if any work shall be performed by Licensee. Such authorization will not be unreasonably withheld
- 33.03 In each instance where Licensee's cable, equipment, and facilities are to be placed in Licensor's conduit system, Licensor shall specify, among other things, the cable configuration and location of Licensee's cable, equipment, and facilities, the particular duct of the conduit system such cable will occupy, and the location where and manner in which Licensee's cable will enter and exit Licensor's conduit system.

- 33.04 Licensor's manholes shall be opened as reasonably permitted by Licensor's authorized employees or agents. Licensee shall be responsible for obtaining any necessary permits from appropriate governmental authorities to open manholes and to conduct the work operations. Licensee's employees or agents will be permitted to enter or work in Licensor's manholes only when an authorized agent or employee of Licensor is present except as provided in the next paragraph. Licensor's said agent or employee shall have the authority to terminate Licensee's work operations in and around Licensor's manholes if, in the sole discretion of said agent or employee, any hazardous conditions arise or any unsafe practices are being followed by Licensee's employees or agents. Licensee agrees to pay, in accordance with the terms and conditions of APPENDIX I, the full cost of having Licensor's agent or employee present when Licensee's work is being done in Licensor's manholes. The presence of Licensor's authorized agent or employee shall not relieve Licensee of its responsibility to conduct all of its work operations in and around Licensor's manholes in a safe and workmanlike manner. Licensee is responsible for all signage, traffic control, equipment, and personnel necessary to work in Licensor's manholes. All work shall meet Occupational Safety and Health Act (OSHA), and any local or state standards and requirements.
- 33.05 Licensee's employees will be permitted to enter or work in Licensor's manholes and conduit system without an authorized agent or employee of Licensor being present, provided that Licensee's work consists only of routine operations of testing, adjusting, regulating or inspecting Licensee's existing facilities and does not involve any placing, removing, changing or rearranging of Licensee's or Licensor's facilities. In such cases, Licensee shall notify Licensor's designated representative in advance of Licensee's operations as to the type of work to be performed, the time at which it is to be performed and where it is to take place. Licensee shall conduct all such work operation in a safe and workmanlike manner, and in accordance with the terms of this Agreement.
- 33.06 Licensee shall, at its own expense, maintain its buried communication facilities so as not to conflict with the use of the right-of-way by Licensor or other authorized users of the right-of-way. Licensee shall, at its own expense, relocate, change, or replace its facilities or perform any other work in connection with said facilities that may be reasonably required by Licensor or other authorities.

34.0 TERMINATION OF LICENSES

- 34.01 Upon notice from Licensor to Licensee that Licensor has been advised by governmental authority or private property owners that the use of any pole, conduit system, or right-of-way is not authorized and is objected to by such governmental authority or private property owner, as the case may be or that any pole, any conduit system or any right-of-way is to be removed, sold or otherwise disposed of, Licensee shall, if reasonably requested by Licensor, remove its cables, equipment, and facilities at once from the affected pole or poles or shall make arrangements for the removal of its cable, equipment, and facilities from the affected portion of Licensor's conduit system or right-of-way at Licensor's expense. If not so removed, Licensor shall have the right to remove Licensee's cable, equipment, and facilities from Licensor's right of way at the cost and expense of Licensee and without any liability thereto. If Licensor and Licensee deem it is impractical to remove Licensee's cables, equipment or facilities from any right-of-way, they may be abandoned in place.
- 34.02 Licensee may at any time remove its facilities from any pole of Licensor, but shall immediately give Licensor written notice of such removal and surrender of license in the form of a

Notification of Surrender (APPENDIX VII) hereto attached and made a part hereof. If Licensee surrenders its license but fails to remove its facilities from Licensor's poles, Licensor shall have the right to remove Licensee's facilities at Licensee's expense without any liability on the part of Licensor for damage or injury to Licensee's facilities. In the event that Licensee's cables, equipment, and facilities shall be removed from any pole as provided by this Agreement, no attachment shall again be made to such pole unless Licensee shall have first complied with all of the provisions of this Agreement as though no attachment had previously been made.

- 34.03 If Licensee desires to terminate its license for the right to occupy any part of Licensor's conduit system, Licensee shall give Licensor written notice of such surrender in the form of a Notification of Surrender (APPENDIX VII) hereto attached and made a part hereof. In such event, Licensee shall make arrangements with Licensor for the removal of Licensee's cables, equipment, and facilities from that part of Licensor's conduit system at Licensee's expense. In the event that Licensee's cables, equipment, and facilities shall be removed from Licensor's conduit system as provided by this Article, no cable, facilities or equipment shall again be placed in that part of such conduit system unless Licensee shall have first complied with all of the provisions of this Agreement as though no cables, equipment, and facilities of Licensee had previously been placed in that part of Licensor's conduit system.
- 34.04 If Licensee desires to terminate its license for the right to occupy any part of the right-of-way, Licensee shall give Licensor written notice of such surrender in the form of a Notification of Surrender (APPENDIX VII) attached hereto and made a part hereof. In such event, Licensee shall make arrangements with Licensor for the removal of Licensee's cables, equipment, and facilities from that part of the right-of-way at Licensee's expense. However, in the event it is impractical to remove Licensee's cable, equipment, and facilities from any right-of-way, they may be abandoned in place.

35.0 EMERGENCY RESTORATION PROCEDURES

- 35.01 In the event of an emergency, restoration procedures may be affected by the presence of Licensee's Attachments. While Licensor shall not be responsible for the repair of damaged Attachments of Licensee (except by mutual written agreement), Licensor shall nonetheless control access to its poles, conduit systems or right-of-way if the restoration is to be achieved in an orderly fashion.
- 35.02 Where Licensor and Licensee are involved in emergency restorations, access to Licensor's poles, conduit systems or right-of-way will be controlled by Licensor's Network Construction Managers or their on-site representative according to the following guidelines.
- (A) Service Disruptions/Outages
 - (1) While exercising its right to first access, Licensor shall make all reasonable efforts to grant access to as many other entities with Attachments as is reasonably safe.
 - (2) Where simultaneous access is not possible, Licensor will grant access on first come, first served basis.
 - (B) Service Affecting Emergencies

- (1) While exercising its right to first access, Licensor shall make all reasonable efforts to grant access to as many other entities with Attachments as is reasonably safe.
- (2) Where Licensor is unable to grant simultaneous access to all other entities with Attachments, access will be granted according to the level of damage to the Attachments of each entity and the likelihood that a given level of damage will result in service disruption. Where the likelihood that a service disruption will result is not clearly discernible, access will be on a first come, first served basis.

35.03 Without limiting any other indemnification or hold harmless provisions of this Agreement, Licensee agrees that any decision by Licensor regarding access to Attachments, or any action or failure to act by Licensor, under this section shall not be the basis for any claim by Licensee against Licensor for any damage to Licensee's Attachments or disruption of Licensee's services, or any other direct or indirect damages of any kind whatsoever incurred by Licensee.

36.0 ABANDONMENT

36.01 Nothing in this Agreement shall prevent or be construed to prevent Licensor from abandoning, selling, assigning, or otherwise disposing of any poles, conduit systems or other Licensor property used for Licensee's Attachments; provided, however, that Licensor shall condition any such sale, assignment, or other disposition subject to the rights granted to Licensee pursuant to this Agreement. Licensor shall promptly notify Licensee of any proposed sale, assignment, or other disposition of any poles, conduit systems or other Licensor property used for Licensee's Attachments.

AGREEMENT TERMS AND CONDITIONS

1.0 SCOPE OF AGREEMENT

- 1.01 The purpose of this Agreement is to set forth the rates, terms, conditions, and procedures under which the Licensor will provide Licensee access to Licensor's poles, ducts, innerducts, conduits, and rights-of-way.
- 1.02 Subject to the provisions of this Agreement, Licensor will issue to Licensee for any lawful communications purpose, revocable, nonexclusive licenses authorizing the attachment of Licensee's cables, equipment, and facilities to Licensor's poles or the placing of Licensee's cables, equipment, and facilities in Licensor's conduit system or within right-of-way owned or controlled by Licensor.
- 1.03 No use, however extended, of Licensor's poles, conduit system or right-of-way nor payment of any fees or charges required under this Agreement shall create or vest in Licensee any ownership or property rights in said poles, conduit system or right-of-way, but Licensee's rights therein shall be and remain a mere license. Nothing herein contained shall be construed to compel Licensor to construct, retain, extend, place, or maintain any facilities not needed for its own service requirements, unless otherwise required by law.
- 1.04 Licensee recognizes that Licensor has heretofore entered into, or may in the future enter into, agreements and arrangements with others which are not party to this Agreement regarding the poles, conduit system and right-of-way covered by this Agreement. Nothing herein contained shall be construed as a limitation, restriction or prohibition against Licensor with respect to such other agreements or arrangements. The rights of Licensee shall at all times be subject to any present or future joint use arrangement between Licensor and any other public utility or government agency.

2.0 DEFINITIONS

- 2.01 "Attachments" - Any attachment to a pole, use of a duct or innerduct, use of a conduit, or using right-of-way owned or controlled by Licensor.
- 2.02 "Attachment Fee" - Fee paid annually per attachment on a pole, or in a duct, innerduct, conduit, or right-of-way.
- 2.03 "Buried Cable" - Cable located below the surface of the ground but not in Licensor's conduit system.
- 2.04 "Conduit System" - Any combination of ducts, innerducts, conduits, manholes, and handholes owned or controlled by Licensor that is a reusable passage or opening in, on, under or through the ground, or a structure such as a building or bridge. The term includes "inner ducts" created by subdividing a duct into smaller channels.
- 2.05 "Hazardous Materials" -

- (A) Any substance, material or waste now or hereafter defined or characterized as hazardous, toxic or dangerous as defined by the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA") of 1980, as amended, and other federal, state, and local health, safety, and environmental laws, ordinances, statutes, and rules, including but not limited to the Occupational Safety and Health Act ("OSHA").
 - (B) Any substance, material or waste now or hereafter classified as a contaminant or pollutant under any law, rules, ordinance, or authority.
 - (C) Any other substance, material or waste, the manufacture, processing, distribution, use, treatment, storage, placement, disposal, removal or transportation of which is now or hereafter subject to regulation under any law, ordinance, statute, rule or regulation of any governmental body or authority.
- 2.06 "Make Ready Work" - All work to prepare Licensor's poles, ducts, innerducts, conduits, rights-of-way, and related facilities for the requested occupancy or attachment of Licensee's facilities but not the actual placement of attachments or administrative activities related to inquiries, verifications, requests or applications.
- 2.07 "Poles"- Licensor owned and poles owned by others to the extent that and for so long as Licensor has the right to permit others to be attached in the communications space.
- 2.08 "Pole Attachment Request" or "PAR" - A written request from Licensee to attach its facilities to Poles, submitted in accordance with this Agreement. With respect to pole attachment agreements in effect prior to the date the Parties executed this Agreement, the term PAR shall be deemed to include Pole Attachment Requests made by letter or similar document.
- 2.09 "Right-of-Way" - Right-of-way owned or controlled by Licensor. It does not include attachment or use of cables, poles, equipment or facilities located on a particular right-of-way. It may include private easement, or in certain instances public right-of-way granted by a governmental authority or a utility easement such as in a subdivision or development.

3.0 TERM OF AGREEMENT

- 3.01 This Agreement shall become effective upon its Effective Date and if not terminated in accordance with the provisions of other Articles hereof, shall continue in effect for a term of not less than five (5) years, provided, however, that at any time after the first year of said term the rates, fees and charges set forth may be increased or decreased by written notice from Licensor to Licensee on a nondiscriminatory basis with respect to similar rates, fees and charges of other similar licensees.
- 3.02 Either Party may terminate this Agreement with at least a (6) six month written notice to the other Party.
- 3.03 Upon termination of the Agreement in accordance with any of its terms, all outstanding licenses in connection therewith shall terminate and shall be surrendered and Licensee shall within sixty (60) days of date of termination remove all cables, equipment and facilities at the cost and expense of Licensee. If Licensor in its sole discretion, deems it is impractical to remove Licensee's cable, equipment and facilities from Licensor's rights-of-way, they may be abandoned in place.

4.0 LEGAL AUTHORITY

- 4.01 Licensee will obtain from public authorities and private owners of property any and all permits, franchises, licenses and grants necessary for the lawful exercise of any license granted hereunder

5.0 APPLICABLE LAW

- 5.01 This Agreement, and the rights and obligations contained in it, shall be governed and construed under the laws of the state in which the attachments hereunder are to be located.

6.0 SUBSEQUENT LAW

- 6.01 The terms and conditions of this Agreement shall be subject to any and all applicable laws, rules, regulations or guidelines now in effect from any federal, state or local governmental authority. In the event that any effective legislative, regulatory, judicial or other legal action by a governmental body or court of competent jurisdiction materially changes any rule, law or judicial or administrative decision that was the basis of the requirement, obligation or right upon which any provision of this Agreement was negotiated, or materially impairs the ability of the pole owner or attaching party to perform any material terms of this Agreement, the attaching party or pole owner may, on thirty (30) days' written notice request that such terms be renegotiated, and the Parties shall renegotiate in good faith such mutually acceptable new terms as may be required. In the event that such new terms are not renegotiated within ninety (90) days after such notice, the Dispute shall be referred to the Dispute Resolution procedure set forth in Section 18.0. Should any term of this Agreement be determined by a court or agency with competent jurisdiction to be unenforceable, all other terms of this Agreement shall remain in full force and effect.

7.0 DISCLAIMER OF WARRANTIES

- 7.01 Except as specifically set forth in this Agreement, Licensor makes no warranties, express or implied, including, but not limited to, any implied warranties of merchantability or fitness for a particular purpose.

8.0 LICENSE NOT EXCLUSIVE

- 8.01 Nothing herein contained shall be construed as a grant of any exclusive license, right or privilege to Licensee. Licensor shall have the right to grant, renew and extend rights and privileges to others not parties to this Agreement, by contract or otherwise, to use any poles, conduit system or right-of-way covered by this Agreement, under such terms and conditions, as Licensor shall prescribe.

9.0 ASSIGNMENT OF RIGHTS

- 9.01 Licensee shall not assign; transfer or sublet the privileges hereby granted, or sell, lease or otherwise permit the use of its facilities on or any part thereof (all of the foregoing being "Transfers"), without prior consent in writing of Licensor which consent shall not be unreasonably withheld, delayed or conditioned; provided, however, that either Party may so assign its rights and obligations under this Agreement without such consent to (i) any entity

said Party, directly or indirectly, controls, is controlled by or is under common control with or (ii) any entity acquiring all or substantially all of said Party's assets or equity, by providing written notice to the other Party of such assignment. Any attempted assignment that is not permitted under this Section 9.01 is void *ab initio*.

9.02 Subject to the provisions of this Agreement, this Agreement shall extend to and bind the successors and authorized assigns of the Parties hereto.

10.0 LIABILITY AND DAMAGES

10.01 Licensor reserves to itself, its successors and assigns, the right to maintain its poles, conduit system and right-of-way and to operate its facilities thereon in such manner as will best enable it to fulfill its own service requirements. Licensor shall not be liable to Licensee for any interruption to service of Licensee or for interference with the operation of the cables, equipment or facilities of Licensee arising in any manner out of the use of Licensor's poles, conduit system and right-of-way except caused by Licensor's sole negligence, willful misconduct or material breach of this Agreement, in which case Licensor's liability shall be limited to the reasonable cost of repair of Licensee's damaged cable, equipment or facilities, if any.

10.02 Licensee shall exercise special precautions to avoid damaging the cables, poles, conduits, right-of-way equipment and facilities of Licensor and of other licensees. Licensee will assume responsibility for any and all loss, damages, costs and expenses as a result of the Licensee's acts or omissions excluding such loss, damage, cost and expenses resulting from the negligence or willful misconduct of the Licensor.. Licensee shall make an immediate report to Licensor of the occurrence of any such damage and hereby agrees to reimburse the respective owners for the expense incurred in making repairs.

10.03 Licensee shall indemnify and hold harmless Licensor against any and all claims, demands, causes of action, damages, costs or liabilities of every kind and nature whatsoever related to or arising out of this Agreement, except to the extent caused by Licensor's negligence or willful misconduct, which may arise out of or be caused by:

- (A) The erection, maintenance, presence, use or removal of Licensee's cable, equipment, and facilities on Licensor's poles, and within Licensor's conduit system and right-of-way
- (B) Any act of Licensee on or in the vicinity of Licensor's poles, conduit system and right-of-way, or
- (C) Any interruption, discontinuance, or interference with Licensee's service to any of its subscribers occasioned or claimed to have been occasioned by any action of Licensor pursuant to or consistent with this Agreement. Licensee shall, upon demand and at its own sole risk and expense, defend any and all suits, actions or other legal proceeding brought or instituted against Licensor on any such claim, demand or cause of action, and shall pay and satisfy any judgment or decree rendered against Licensor therein, and Licensee shall reimburse Licensor for any and all legal expense incurred by Licensor in connection therewith. Licensee shall also indemnify, protect and hold harmless Licensor from any and all claims and demands of whatever kind which arise directly or indirectly from the operation of Licensee's facilities including taxes, special charges by others,

claims and demands for damages or loss for infringement of copyright, for libel and slander for unauthorized use of television broadcast programs, and for unauthorized use of other program material, and from and/or against all claims and demands for infringement of patents with respect to the manufacturer, use and operation of Licensee's equipment whether arising from the use of Licensee's equipment in combination with Licensor's poles, conduit system, right-of-way or otherwise.

- 10.04 Licensee agrees to comply under the Workmen's Compensation Laws of the state in which attachments are to be located hereunder, and also agrees to cause every subcontractor of Licensee to comply with and qualify under said laws, and shall furnish copies of Certificates demonstrating such compliance to Licensor prior to commencement of the work.

11.0 DEFAULT AND REMEDIES

- 11.01 In addition to Material Defaults defined anywhere else in this Agreement, any one of the following shall be deemed the occurrence of a Material Default under this Agreement:

- (A) Failure by Licensee to pay any fee or other sum required to be paid under the terms of this Agreement and such default continues for a period of thirty (30) calendar days after written notice thereof to Licensee.
- (B) Failure by either Party to perform or observe any other term, condition, covenant, obligation, or provision of this Agreement and such default continues for a period of thirty (30) business days after written notice thereof from the other Party (provided that if such default is not curable within a thirty (30) business day period, the period will be extended if the Party substantially commences to cure such default and proceeds diligently thereafter to effect such cure).
- (C) The filing of any tax or mechanic's lien against Poles because of any act or omission by Licensee which is not bonded or discharged within thirty (30) calendar days of the date Licensee receives notice that such lien has been filed;
- (D) Licensor or Licensee's voluntary or involuntary bankruptcy;
- (E) Licensee's knowing use or maintenance of its Attachments in violation of any law or regulation, or in aid of any unlawful act or undertaking;
- (F) If any authorization which may be required of Licensee by any governmental or private authority for the placement, operation, or maintenance of Licensee's Attachments is denied or revoked.

- 11.02 In the event of a Material Default and subject to any other applicable provision of this Agreement, the Non-defaulting Party, without any further notice to the Defaulting Party (except where expressly provided for below or required by applicable law), may do any one or more of the following:

- (A) Perform on behalf and at the expense of the Defaulting Party, any obligation of the Defaulting Party under this Agreement which the Defaulting Party has failed to perform

and of which the Non-defaulting Party shall have given the Defaulting Party notice, the cost of which performance shall be paid by the Defaulting Party to the Non-defaulting Party upon demand;

- (B) Terminate this Agreement by giving sixty (60) business days written notice of such termination to the other Party. Where a Material Default is on behalf of Licensee, Licensor may remove Licensee's Attachments and store Licensee's facilities in a public warehouse or elsewhere at the expense of and for the account of Licensee without Licensor being deemed guilty of trespass or conversion, and without Licensor becoming liable for any loss or damages to Licensee occasioned thereby; or
- (C) Exercise any other legal or equitable right or remedy that the Non-defaulting Party may have.

11.03 The Defaulting Party shall repay to the Non-defaulting Party upon demand any costs and expenses incurred by the Non-defaulting Party (including, without limitation, reasonable attorneys' fees) in successfully enforcing this Agreement.

11.04 Upon termination of this Agreement by the Non-defaulting Party, the Defaulting Party shall remain liable to the Non-defaulting Party for any and all fees, other payments and damages which may be due or sustained in accord with this Agreement prior to such termination, all reasonable costs, fees and expenses, including, without limitation, reasonable attorney' fees incurred by the Non-defaulting Party in pursuit of its remedies hereunder.

11.05 All rights and remedies of the Non-defaulting Party set forth in this Agreement shall be cumulative and none shall exclude any other right or remedy, now or hereafter allowed by or available under any statute, ordinance, rule of court, or the common law, either at law or in equity, or both.

12.0 INDEMNIFICATION and INSURANCE

12.01 Whenever any liability is incurred by either or both of the parties hereto for damages for injuries to the employees or for injury to the property of either party, or for injuries to other persons or their property, arising out of the use and enjoyment of this easement, the liability for such damages, as between the parties hereto, shall be as follows:

- (A) Licensee, shall compensate Licensor for the full actual loss, damage or destruction of Licensor's property that in any way arises from or is related to this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation, or maintenance of Licensee's facilities).

- (B) Each party agrees to defend, indemnify, protect and hold harmless the other and the other's officers, directors, employees, shareholders, successors, assigns, agents, affiliates, representatives, partners, and contractors from and against any and all third party claims, actions, administrative proceedings (including, without limitation, informal proceedings), judgments, damages, penalties, fines, costs, liabilities, interests, or losses, including, without limitation, reasonable attorneys' fees and expenses, consultant fees, and expert fees, together with all other costs and expenses of any kind or nature suffered by or asserted against the indemnified party in any way arising out of or connected with

this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation or maintenance of Licensee's facilities, unless caused by the sole negligence or willful misconduct on the part of Licensor or Licensor's affiliates, agents, officers, employees and assigns). Each party expressly assumes all liability for actions by its affiliates, agents, officers, employees, or its contractors and expressly waives any immunity from the enforcement of this indemnification provision that might otherwise be provided by workers' compensation law or by other state or federal laws.

- (C) Without limiting any of the foregoing, Licensee assumes all risk of, and agrees to relieve Licensor of any and all liability for, loss or damage (and the consequences of loss or damage) to any facilities placed on Licensor's property and any other financial loss sustained by Licensee, except to the extent caused by the negligence or willful misconduct on the part of Licensor's agents, officers, employees, and assigns.
- (D) Without limiting the foregoing, Licensee expressly agrees to indemnify, defend, and hold harmless Licensor and Licensor's agents, officers, employees and assigns from any and all claims asserted by end users/customers of Licensee in any way arising out of or in connection with this Agreement or Licensee's facilities, except to the extent caused by the negligence or willful misconduct on the part of Licensor or Licensor's agents, officers, employees, and assigns, or its contractors.
- (E) In no event shall either Party be liable to the other for any special, consequential or indirect damages (including, without limitation, lost revenues and lost profits) arising out of this Agreement or any obligation arising hereunder, whether in an action for or arising out of breach of contract, or otherwise.
- (F) Licensee shall indemnify, protect, and hold harmless Licensor from and against any and all claims for libel and slander, copyright and/or patent infringement arising directly or indirectly by reason of installation of Licensee's equipment and facilities on Lessor's Property pursuant to this Agreement.

13.0 COMPLIANCE WITH LAW

- 13.01 Notwithstanding anything to the contrary in this Agreement, each Party shall ensure that any and all activities it undertakes pursuant to this Agreement shall comply with all applicable laws, including, without limitation, all applicable provisions of:
- (A) Workers' compensation laws
 - (B) Unemployment compensation laws
 - (C) The Federal Social Security Law
 - (D) The Fair Labor Standards Act, and
 - (E) All laws, regulations, rules, guidelines, policies, orders, permits and approvals or any governmental authority relating to environmental matters and/or Occupational Safety and Health Act ("OSHA").

14.0 INSURANCE

14.01 The each Party shall obtain and maintain, in full force and effect at all times, during operations covered by this Agreement, such minimum insurance as will cover the obligations and liabilities of said Party, its agents, and its employees which may arise from the operations under this Agreement. Insurance shall have limits of not less than:

(A) Commercial General Liability policy of minimum limits of:

| | |
|---|--------------------------------|
| General Aggregate | \$ 2,000,000 per policy period |
| Products/Completed Operations Aggregate | \$ 2,000,000 per policy period |
| Personal Injury/Advertising | \$ 2,000,000 per occurrence |
| Each Occurrence | \$ 2,000,000 per occurrence |
| Fire Legal Liability | \$ 50,000 any one fire |

14.02 The policy will be endorsed to show the above aggregate limits applying to "each" job site or, as an alternative, the General Aggregate will be increased to \$4,000,000 per policy period. Policy will also specifically state the coverage applies to all operations conducted by the respective Party, its employees, or agents on behalf of that Party's Corporation or subsidiary.

14.03 Where the performance of the work involves structural property, underground property, or blasting, each Party's Commercial General Liability insurance policy shall provide coverage to the insured for legal liability arising from operations under this Agreement for property damage:

- (A) arising out of blasting,
- (B) arising out of collapse of, or structural injury to, any building or structure or
- (C) To underground facilities and utilities.

14.04 Other general liability forms are acceptable in lieu of the Commercial General Liability Form, however, they are not to be used without written approval from the Company's Risk Management Department, 4001 Rodney Parham Road Little Rock, AR 72212. However, such written approval shall not be unreasonably withheld.

(A) Business Automobile Liability policy with minimum limits of:

| | |
|-----------------------|---------------------------|
| Bodily Injury | \$2,000,000 per accident |
| Property Damage | \$ 2,000,000 per accident |
| OR | |
| Combined Single Limit | \$ 2,000,000 per accident |

The policy will be issued using symbol "1 - any auto" coverage.

(B) Workers Compensation:

Part 1 - Medical Benefits Statutory

Part 2 - Employer's Liability as indicated:

| | |
|---------------------------|--------------------------|
| Bodily Injury by Accident | \$ 100,000 each accident |
| Bodily Injury by Disease | \$ 100,000 each employee |
| Bodily Injury by Disease | \$ 500,000 policy limit |

- 14.05 The policy will show the state in which operation on behalf of the Party and/or subsidiary is being conducted. For operations conducted within monopolistic (state fund) states, the Party will furnish a certificate of compliance from the appropriate state fund administrator.
- 14.06 In each and every policy in 14.04A and 14.04B, the other Party's Corporation and its subsidiaries shall be named an "additional insured" with respect to activities performed on behalf of the Party's Corporation and its subsidiaries.
- 14.07 Coverage provided by the policies listed in this paragraph will be issued by an insurance company, licensed in the state in which operations on behalf of the Party are to be conducted. It is acceptable to use both primary and excess/umbrella policies to obtain necessary limits.
- 14.08 -Licensee will furnish to the other Party, a certificate evidencing insurance coverage under sub-paragraphs 14.04-A, and 14.04-B. Such certificate shall provide for a thirty-day prior notice to the other Party of any cancellation or material changes in coverage except for ten (10) days notice of cancellation for non-payment of premium and shall be signed by a legal representative of the issuing insurance company or agent. The certificate of insurance shall be sent to the person identified at paragraph 25.03.
- 14.09 The provisions of sub-paragraphs 14.04-A and 14.04-B shall also apply to all sub-Licensees, and Licensee shall be responsible for their compliance herewith.

15.0 NON-WAIVER OF TERMS AND CONDITIONS

- 15.01 Failure to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

16.0 LICENSOR'S LIEN

- 16.01 Should Licensor under any Article of this Agreement remove Licensee's cable, equipment or facilities from Licensor's poles, conduit system or right-of-way, Licensor will deliver to Licensee the cable, equipment or facilities so removed upon payment by Licensee of the cost of removal, storage and delivery, and all other amounts due Licensor hereunder. Licensor is hereby given a lien on Licensee's cable, equipment or facilities within Licensor's conduit system or right-of-way or attached to Licensor's poles or removed therefrom, with power of public or private sale, to cover any amounts due Licensor under the provisions of this Agreement. Such liens shall not operate to prevent Licensor from pursuing, at its option, any other remedy in law, equity or otherwise, including any other remedy provided for in this Agreement.

17.0 SCHEDULE OF FEES AND CHARGES

- 17.01 Licensee may be required to furnish bond or other security satisfactory to Licensor, in a reasonable initial amount to be determined by Licensor and provided by Licensee at the time Licensee submits Exhibit B to Licensor's Attachment Application Procedures to guarantee the payment of any such sums which may become due to Licensor arising out of this Agreement including, but not limited to fees due hereunder or charges for work

performed for the benefit of Licensee under this Agreement, including the removal of Licensee's facilities upon termination of this Agreement by any of its provisions or upon termination of any License issued hereunder. Bond to be sent to person identified at paragraph 25.03. Bond is to be equal to one (1) year's annual rental fees.

17.02 The fees, rates and charges set forth in APPENDIX I or elsewhere in this Agreement are effective during the term of this Agreement subject to Section 3.01 and shall be due and payable by Licensee as set forth herein.

17.03 FEES:

All rates, charges and fees set forth in this Agreement and as shown in APPENDIX I (Schedule of Rates, Fees, and Charges) shall be subject to all applicable federal, state, and local laws, rules, regulations and commission orders.

(A) Computation:

(1) Pole and Anchor Attachment Fees:

(a) For the purpose of computing the annual pole attachment fee hereunder, for calendar years subsequent to a first partial calendar year, said fee shall be based upon the number of poles and anchors, to which attachments are actually made, as of December 31 of the preceding year, multiplied by the per attachment pole attachment fee rate set forth on APPENDIX I. For a first partial calendar year, the pole attachment fee shall be prorated as necessary, on a daily basis from the date payment is due in accordance with Exhibit B of Licensor's Attachment Application Procedures.

(b) For billing purposes, a single pole attachment includes the point of attachment and all facilities located in the usable space on the pole in the space assigned to Licensee (typically six inches above and six inches below the point of attachment). If Licensee occupies more than one usable space on a pole, separate attachment fees shall apply to each space occupied.

(2) Conduit Occupancy Fees :

(a) For the purpose of computing the total conduit occupancy fee due hereunder, the duct feet of conduit shall be measured from the center to the center of manholes; or from the center of a manhole to the end of the duct; from the center of a manhole to the property line if the duct is connected at the property line to a duct owned and controlled by a third-party property owner; or the length of a conduit from pole to pole; or isolated lengths of conduit not attached to any structure (such as involved with buried cable) which will be occupied by Licensee's cable.

(b) For billing purposes each inner duct will be billed the half duct fee. If two or more facilities occupy a duct that has not been subdivided, the half duct fee will be charged for each facility. The half duct fee will apply when others place the Licensee facility in a

duct that has not been subdivided only if the facility does not render the duct unusable.

- (3) Right-of-Way Occupancy Fees:
 - (a) This fee will be negotiated on a case by case basis. There is no established per foot rate.

- (B) Payment Date:
 - (1) If this Attachment License Agreement becomes effective on or prior to June 30, all attachment and occupancy fees for the remainder of that first partial calendar year shall be due and payable at the time required under Appendix I of Licensor's Attachment Application Procedures .

 - (2) If an Attachment License Agreement becomes effective on or after July 1, all attachment and occupancy fees for the remainder of that current partial calendar year as well as the full upcoming calendar year shall be payable at the time required under Appendix I of Licensor's Attachment Application Procedures.

 - (3) On an annual basis, all attachment and occupancy fees not previously paid are to be paid in advance, on the 31st day of January of each year or within thirty (30) days of receipt of invoice. Failure to pay such fees within thirty (30) days of the annual due date shall constitute a Material Default of this Agreement.

- (C) Termination of License:
 - (1) Upon termination or surrender of a license granted hereunder, no refund of any attachment or occupancy fee shall be made.

17.04 OTHER CHARGES:

- (A) Computation:
 - (1) All charges for inspections, engineering, or rearrangements of Licensee's facilities from Licensor's poles or conduit and, without limitation, any other work performed for Licensee shall be based upon the full cost and expense, including reasonable overhead, to Licensor for performing such work for Licensee. The cost to Licensee shall be determined in accordance with the regular and customary methods used by Licensor in determining such costs.

 - (2) The charge for replacement of poles shall include the entire non-betterment cost to Licensor including the increased cost of larger poles, sacrificed life value of the poles removed, cost of removal, less any salvage recovery and the cost of transferring Licensor's facilities from the old to the new poles.

 - (3) All other attachment or occupancy related inquiry, verification, application, administrative and miscellaneous rates, fees and charges shall be calculated and paid in accordance with APPENDIX I and/or Licensor's Attachment Application Procedures and Attachments thereto.

- (B) Payment Date:
 - (1) All bills for such other charges for work performed by Licensor shall be payable upon presentment to Licensee, and shall be deemed delinquent if not paid within thirty (30) days after presentment to Licensee.

18.0 DISPUTE RESOLUTION

18.01 Except in the case of:

- (A) A suit, action, or proceeding by one Party to compel the other Party to comply with its obligation to indemnify the other Party pursuant to this Agreement, or
- (B) A suit, action or proceeding to compel either Party to comply with the dispute resolution procedures set forth in this section, the Parties agree to use the following procedure to resolve any dispute, controversy, or claim arising out of or relating to this Agreement or its breach.

18.02 At the written request of a Party, each Party shall designate a knowledgeable, responsible representative to meet and negotiate in good faith to resolve any dispute, controversy, or claim arising under this Agreement. The Parties intend that these negotiations be conducted by industry accepted, business representatives. The substance of the negotiations shall be left to the discretion of the representatives. Upon mutual agreement, the representatives may utilize other alternative dispute resolution procedures such as mediation to assist in the negotiations. Discussions and correspondence between the representatives for the purposes of these negotiations shall be treated as confidential, undertaken for purposes of settlement, shall be exempt from discovery and production, and shall not be admissible in the arbitration described below or in any subsequent lawsuit without the concurrence of all Parties. Documents identified in or provided during such negotiations, which are not prepared for purposes of the negotiations, shall not be so exempt and may, if otherwise admissible, be admitted as evidence in any subsequent proceeding.

18.03 If a resolution of the dispute, controversy or claim is not reached within one hundred eighty (180) calendar days of the initial written request, the dispute, controversy, or claim shall be submitted to binding arbitration by a single arbitrator pursuant to the rules of the American Arbitration Association (AAA), except as hereinafter provided. Discovery in any proceeding before the AAA shall be Party controlled by the arbitrator and shall be permitted to the extent set forth in this section. Parties may exchange, in any combination, up to thirty-five (35) (none of which may contain subparts) written interrogatories, demands to produce documents and requests for admission. Each Party may also take the oral deposition of one (1) witness. Additional discovery may be permitted upon mutual agreement of the Parties. The arbitration hearing shall be commenced within sixty (60) calendar days of the demand for arbitration and shall be held in an agreed upon location. The arbitrator shall rule on the dispute, controversy or claim by issuing a written opinion within thirty (30) business days after the close of hearings. The times specified in this section may be extended upon mutual agreement of the Parties or by the arbitrator upon a showing of good cause. Judgement upon the award rendered by the arbitrator may be entered in any court having jurisdiction.

18.04 Each Party shall bear its own costs, including attorneys' fee, incurred in connection with any of the foregoing procedures. A Party-seeking discovery shall reimburse the responding Party the cost of reproducing documents (to include search time and reproduction time costs). The fees associated with any arbitration, including the fees of the arbitrator, shall be divided equally between the parties.

19.0 ENTIRE AGREEMENT

This Agreement and Licensor's related Attachment Application Procedures cancels and supersedes all previous agreements whether written or oral, except for any sums due thereunder, between Licensor and Licensee with respect to the attachment of Licensee's cable, equipment, and facilities to Licensor's poles or the placing Licensee's cable, equipment or facilities in Licensor's conduit system or right of way; and there are no other provisions, terms or conditions to this Agreement except as expressed herein. All currently effective licenses heretofore granted pursuant to such previous agreements shall continue in effect subject to the terms and conditions of this Agreement.

19.01 The terms and conditions of this Agreement and Licensor's related Attachment Application Procedures supersede all prior oral or written understandings between the Parties and constitute the entire Agreement between them concerning the subject matter of this Agreement. There are no understandings or representations, express or implied, not expressly set forth in this Agreement. This Agreement shall not be modified or amended except by writing signed by the Party to be charged. This Agreement is only applicable to pole applications submitted for attachment to Windstream facilities in the State of Kentucky.

GENERAL OPERATING ROUTINE

20.0 ATTACHMENT, USE AND/OR OCCUPANCY REQUEST PROCESS

20.01 There is a multi-step pole attachment or duct, innerduct, conduit or right-of-way use and/or occupancy application process and fee determination process that the Licensee may begin upon the execution of this Agreement. It is set forth below and in Licensor's related Attachment Application Procedures.

21.0 POLE ATTACHMENT REQUESTS (PAR)

21.01 The following process can begin upon the execution of this agreement. The steps are:

- (A) Pole Attachment Quote Preparation: Licensee shall submit a Pole Attachment Request Form (Exhibit B to Licensor's related Attachment Application Procedures), which may be reasonably revised from time to time by Licensor at its sole discretion, to Licensor which will include a drawing of the proposed route and contact information (name, telephone, facsimile, and email information), and all required fees, as listed in and computed in accordance with APPENDIX I, which may be changed from time to time by Licensor to remain consistent with prevailing costs, of this Agreement. These fees consist of administrative as well as other actual costs reasonably incurred in researching the requested route. Once Licensor receives the aforementioned specific attachment information and the fee from Licensee, Licensor will report on the Poles along the route, any required make-ready work, the costs and schedule for such make-ready work, and any other requirements Licensee must satisfy prior to installing its facilities. If during this process, Licensor determines any lawful reason for denying Licensee's application, Licensor will so inform Licensee. Pole attachment quotes will be provided within thirty (30) business days for standard requests. Non-standard quantities of pole attachments and distances will be addressed on an individual case basis, and in a commercially reasonable period.
- (B) Pole Attachment Order: Upon completion of the work identified above, Licensor will inform Licensee if Licensor will provide Licensee a Pole Order Form (Appendix VI to the Licensor's related Attachment Application Procedures) which may be revised from time to time by Licensor at its sole discretion, containing estimated make-ready cost (if any), annual recurring charges and any additional information necessary for Licensee to proceed with attaching its facilities to Licensor's Poles. If Licensee desires to attach to Licensor's poles, and pole make-ready work is required, Licensee shall pay the estimated make-ready cost prior to Licensor beginning any work. Actual costs incurred by Licensor in performing the make-ready work will be applied to the estimated make-ready costs. Any reasonable costs in excess of the estimated cost will be billed to Licensee. Any payment of the estimated costs in excess of actual pole attachment make-ready costs will be returned to Licensee. If Licensee declines to proceed, all fees incurred to date will be billable to Licensee by Licensor.

21.02 Licensee has thirty (30) days to pay the estimated make-ready work or cancel the PAR.

21.03 Upon completion of the make-ready work, the receipt of all payments and fees, and the signing of this Agreement, an "Approved" Attachment I shall be returned to the Licensee. At that time

Licensee will be considered to have been granted a License with respect to the poles approved in the PARON and may attach to Licensor's facilities.

22.0 SURVEYS AND INSPECTIONS OF LICENSEE'S FACILITIES

21.01 Licensor reserves the right to inspect each new installation or work operation of Licensee on or within Licensor's facilities. The making of inspections or the failure to make inspections shall not relieve Licensee of any responsibility, obligation or liability imposed by this Agreement.

23.0 ISSUANCE OF LICENSES

23.01 Before Licensee shall have a right to attach to any pole of Licensor, Licensee shall make application for and receive a revocable, nonexclusive license therefore in the form of an approved Application for Pole License (APPENDIX VI and Exhibit B to Licensor's related Attachment Application Procedures).

23.02 Before Licensee shall have the right to place any cable, equipment or facilities within any conduit system or right-of-way of Licensor, Licensee shall make application for an receive a revocable, nonexclusive license therefore in the form of an approved Application for Conduit or Right-of-Way License (APPENDIX IV and Exhibit B to Licensor's related Attachment Application Procedures), hereto attached and made a part hereof.

23.03 Any license granted hereunder for attachment to Licensor's poles shall terminate without further notice to Licensee as to individual poles covered by the license to which Licensee has not attached within ninety (90) days from the date that Licensor has notified Licensee that such poles are available for attachment of the operating facilities of Licensee, unless Licensor, in the exercise of its sole discretion, agrees to extend said period at the request of Licensee.

23.05 Any license granted hereunder for placement of Licensee's facilities in Licensor's conduit system shall terminate without further notice to Licensee as to individual sections of Licensor's conduit system covered by the license in which Licensee has not placed its facilities within one hundred twenty (120) days from the date that Licensor has notified Licensee that such sections of the conduit system are available for the placement of operating facilities of Licensee, unless Licensor, in the exercise of its sole discretion, agrees to extend said period at the request of Licensee.

24.0 AUTHORITY TO PLACE ATTACHMENTS

24.01 Before any attachments or placement of facilities Licensee shall submit evidence that Licensee has the authority to maintain Attachments within public rights-of-way or on private right-of-way or on private property. Licensee shall be solely responsible for obtaining all licenses, authorizations, permits and consents from federal, state and local authorities or private land owners that may be required to place and maintain facilities on Licensor's poles or within Licensor's conduit, duct or right-of-way.

25.0 NOTICES (OF MODIFICATION OR ALTERATION OF POLES)

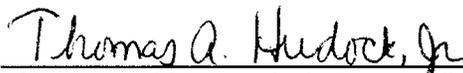

25.01 In the event Licensor plans to modify or alter any Licensor Poles upon which Licensee has placed Attachments, Licensor, except in emergency situations, shall provide Licensee written notice of the proposed modification or alteration at least ninety (90) business days prior to the time the proposed modification or alteration is scheduled to take place. Should Licensee decide to modify or alter Licensee's Facilities on Poles, Licensee shall so notify Licensor in writing at least ninety (90) business days prior to the day the work is to begin. In such event,

Licensee shall bear a proportionate share of the total costs incurred by Licensor to make Licensor Poles accessible. Licensee's proportionate share of the total cost shall be based on the ratio of the amount of new space occupied by Licensee to the total amount of new space occupied by all of the parties joining in the modification. Licensee is not responsible for any costs of Licensor's modifications or alterations of its Poles.

- 25.02 In the event Licensor is required to move the location of, or replace, any Licensor Pole(s) for reasons beyond its control, Licensee concurrently shall relocate Licensee's Attachments. Licensee shall be solely responsible for the costs of the relocation of Licensee's Attachments. When it is mutually agreed that it is in the best interest of Licensor and Licensee, Licensor will, after proper notification has been provided, transfer Licensee's Attachments at the same time that Licensor transfers its Attachments. The rate charged for these transfers is listed in this Agreement (APPENDIX I). The rate for transfers may be adjusted by Licensor from time to time to remain consistent with prevailing costs.
- 25.03 Notices under this Agreement may be given and shall be deemed to have been given, by posting the same in first class mail to Licensee as follows:

26.0 REQUIREMENTS AND SPECIFICATIONS FOR ATTACHMENT TO POLES

26.01 Licensee's cables, equipment, and facilities shall be placed and maintained in accordance with the requirements and specifications attached hereto and as set forth in Licensor's related Attachment Application Procedures and made a part hereof, and in accordance with the requirements and specifications of the National Electric Safety Code (most recent edition) and the National Electric Code (most recent edition), and in compliance with any other rules or orders now in effect or that may hereafter be issued by any state utility commission or other authority having jurisdiction.

27.0 PLACEMENT OF ATTACHMENTS

27.01 Licensee shall, at its own expense, place and maintain and replace its Attachments on Licensor's Poles in accordance with:

- (A) Such reasonable requirements and specifications as Licensor shall from time to time prescribe in writing in Licensor's Attachment Application Procedures or otherwise,
- (B) In compliance with any rules or orders now in effect or that hereafter may be issued by any regulatory agency or other authority having jurisdiction, and
- (C) All currently applicable requirements and specifications of the National Electrical Safety Code, National Electric Code, most current edition or any amendment or revision of said Code. Licensee agrees to comply, at its sole risk and expense, with all specifications hereto, as may be revised from time to time by Licensor. Licensor will provide supervision at Licensee's expense if Licensor believes it is required.

27.02 Licensee's Facilities shall be tagged at maximum intervals of 300 feet so as to identify Licensee as the owner of the Facility. The tags shall be of sufficient size and lettering so as to be easily read from ground level.

28.0 MODIFICATIONS, ADDITIONS OR POLE REPLACEMENTS AND REARRANGEMENTS

28.01 Licensee shall not modify, add to, or replace facilities on any pre-existing Attachment on an Licensor Pole without first notifying Licensor in writing of the intended modification, addition or replacement at least thirty (30) business days prior to the date the activity is scheduled to begin. The required notification shall include:

- (A) The date the activity is scheduled to begin,
- (B) A description of the planned modification, addition, or replacement,

- (C) A representation that the modification, addition, or replacement will not require any space other than the space previously designated for Licensee's Attachments, and
 - (D) A representation that the modification, addition, or replacement will not impair the structural integrity of the Poles involved.
- 28.02 Should Licensor determine that the modification, addition, or replacement specified by Licensee in its notice will require more space than that allocated to Licensee or will require the rearrangements of, reinforcement of, replacement of, or an addition of support equipment to the Poles involved in order to accommodate Licensee's modification, addition, or replacement, Licensor will so notify Licensee, whereupon Licensee will be required to submit a PAR in compliance with this Agreement in order to obtain authorization for the modification, addition, or replacement of its Attachments.
- 28.03 Should Licensee request Licensor to expand capacity or purchase additional plant, Licensee agrees to pay all reasonable costs. If Licensor or another party that has been granted a license joins in the request and will benefit from the expansion or purchase, Licensee agrees to pay a percentage of all costs proportionate to Licensee's share of the benefit received from the expansion or purchase.
- 28.04 When multiple applications, including application of Licensee, are received by Licensor with respect to any pole which must be replaced or rearranged to provide additional space prior to commencement of the work on that pole a Transfer Attachment Fee may be charged. Licensor will equitably prorate to the extent that it is practical between Licensee and other applicants for the pole space, the common expenses of engineering, rearrangement, and replacement, if any, which result from the processing of multiple applications. . Licensee shall be bound by Licensor's determination as to any such pro-ration of Transfer Attachment Fee to Licensee.

29.0 UNAUTHORIZED ATTACHMENTS

- 29.01 If any cable, equipment or facilities of Licensee shall be found on a pole or within a conduit or right-of-way for which no license is outstanding, Licensor, without prejudice to its other rights or remedies under this Agreement or otherwise, may:
- (A) Impose a charge, and
 - (B) Require Licensee to remove such cable, equipment or facilities forthwith or Licensor may remove them without liability and the expense of removal shall be borne by Licensee. For the purpose of determining the charge, Licensee shall pay liquidated damages that will not exceed an amount equal to the annual pole attachment fee for the number of years the unauthorized attachments have existed (or, if that cannot be determined, the number or years since the most recent inventory or five years, whichever is less), plus interest at a rate set for that period by the IRS for individual underpayments pursuant to Section 6621 of the IRS Code. Any such charge imposed by Licensor shall be in addition to its rights to any other sums due and payable, including without limitation the actual costs of any audit or survey which established the existence of the unauthorized attachments and to any claims to said fees or said unlicensed use shall be deemed as a ratification or the licensing of the unlicensed use, and if any license should subsequently be issued, after application and payment of the application fee therefore,

said license shall not operate retroactively or constitute a waiver by Licensor of any of its rights or privileges under this Agreement or otherwise.

29.02 For purposes of this section, an unauthorized Attachment shall include, but not limited to:

- (A) An Attachment to a Pole which is not identified in any PARON (APPENDIX VI) issued in accordance with this Agreement;
- (B) An Attachment that occupies more space than that allocated to Licensee By Licensor;
- (C) An attachment that is not placed in accordance with the provisions of this Agreement or the appropriate PARON (APPENDIX VI) issued pursuant to this Agreement, unless Licensee can demonstrate to Licensor's reasonable satisfaction that said misplacement is not due to any act or omission of Licensee or Licensee's agents;
- (D) An addition or modification by Licensee to its pre-existing Attachment(s) that impairs the structural integrity of the involved Licensor Pole(s).
- (E) An Attachment that consists of facilities owned or controlled by, and for the use of a Party other than Licensee.

29.03 Once Licensor has notified Licensee of an unauthorized attachment. Licensee can submit a PAR to request an authorized attachment. A PAR submitted per this provision will be treated like any other PAR subject to this Agreement. Licensee will be responsible for all fees associated with a PAR (as identified in this Agreement). If a PAR is not received by Licensor within ten (10) business days of Licensee's receipt of an unauthorized attachment notification, Licensee has sixty (60) business days from the date of its receipt of the initial unauthorized attachment notification to vacate the Pole.

30.0 FAILURE TO PLACE ATTACHMENTS

30.01 Once Licensee has been issued a PARON (APPENDIX VI), Licensee shall have ninety (90) calendar days from the date of the PARON (APPENDIX VI) to begin the placement of its Attachments on the Licensor Poles covered by the PARON (APPENDIX VI). If Licensee has not begun placing its Attachments within that ninety-(90) calendar day period, Licensee shall so advise Licensor with a written explanation for the delay. If Licensee fails to advise Licensor of its delay, with a written explanation therefore, or if Licensee fails to act in good faith by not making a bona fide effort to begin placing its Attachments within the ninety (90) calendar days prescribed by this section, the previously issued PARON shall be deemed rescinded by Licensor and Licensee shall have no further right to place Attachments pursuant to that PARON.

31.0 OCCUPANCY OF CONDUIT SYSTEM

31.01 When Licensee submits an application for a license to place its cables, equipment, and facilities in the conduit system of Licensor, Licensor will advise Licensee of the availability of conduit space in accordance with Licensor's Attachment Application Procedures. In determining the

availability of space in Licensor's conduit system, Licensor reserves the right to deny the granting of a license for any non-discriminatory lawful reason, including without limitation, insufficient capacity or reasons of safety, reliability and generally applicable engineering purposes. If conduit space is available, a license to occupy a portion of conduit system will be granted to Licensee, provided, however, that Licensor does not warrant the condition of such conduit system.

- 31.02 Licensor reserves the right to exclude cable, equipment, and facilities of Licensee from Licensor's conduit system, or to limit the type, number and size of Licensee's cable, equipment, and facilities which may be placed in any of Licensor's manholes.

32.0 OCCUPANCY OF RIGHT-OF-WAY

- 32.01 Licensor and Licensee agree that neither party has the right to restrict or interfere with the other party's lawful access to and use of public right-of-way, including public right-of-way, which pass over property owned by either party. Except as otherwise specifically provided in this Agreement, Licensor and Licensee shall each be responsible for obtaining their own right-of-way and permission to use real or personal property owned or controlled by any governmental body.

- 32.02 In the event that Licensee desires to occupy right-of-way owned or controlled by Licensor, Licensor may require Licensee to make an application to do so by the terms of this Agreement. Licensor reserves the right to determine whether granting a license would adversely affect its common carrier communication services and its ability to meet its duties and obligation with respect thereto, including questions of economy, safety, and future need of Licensor.

- 32.03 Licensor may, without incurring any liability, remove the cables, equipment, and facilities of Licensee from Licensor's right-of-way, at Licensee's expense where in Licensor's judgement (such judgement to be conclusive) such removal is required in connection with the performance of Licensor's service obligation or the safety of Licensor's employees. Whenever such removal has been made, Licensee will be promptly notified.

33.0 CONSTRUCTION AND MAINTENANCE OF FACILITIES

- 33.01 Licensee shall, at its own expense, make and maintain its pole attachments in a safe condition and in thorough repair, and in a manner reasonably acceptable to Licensor, and so as not to conflict with the use of said poles by Licensor or by other authorized users of said poles, or interfere with other facilities thereon or which may from time to time be placed thereon. Licensee shall, at its own expense, upon written notice from Licensor, relocate or replace its facilities placed on said poles, or transfer them to substituted poles, or perform any other work in connection with said facilities that may be required. Licensor shall give such written notice as is reasonable in the circumstances, provided, however, that in cases of emergency, (Licensor's judgment as to what constitutes an emergency to be conclusive) Licensor may arrange to relocate, remove or replace the attachments placed on said poles by Licensee, transfer them to substituted poles or perform any other work in connection with said facilities that may be required in the maintenance, replacement, removal or relocation of said poles or of the facilities thereon or which may be placed thereon, or for the service needs of Licensor, and Licensee shall reimburse Licensor for the expense thereby incurred. Attachments of Licensee to poles of Licensor, as mentioned herein shall be understood to include attachments of Licensee in space

reserved for Licensor, or space which Licensor has the right to use, on poles of other companies with which Licensor now has or may hereafter have agreements for joint use and occupancy; and the use of such space by Licensee shall be subject to the terms and conditions of the agreements between Licensor and said other companies. Such authorization will not be unreasonably withheld.

- 33.02 Licensee's cable, equipment, and facilities shall be placed in, removed from, relocated in or maintained in Licensor's conduit system only when specific authorization for the work to be performed and approval of the person, firm or corporation selected by Licensee to perform the work, has been obtained in writing in advance from Licensor. Licensor retains the right to specify what, if any work shall be performed by Licensee. Such authorization will not be unreasonably withheld
- 33.03 In each instance where Licensee's cable, equipment, and facilities are to be placed in Licensor's conduit system, Licensor shall specify, among other things, the cable configuration and location of Licensee's cable, equipment, and facilities, the particular duct of the conduit system such cable will occupy, and the location where and manner in which Licensee's cable will enter and exit Licensor's conduit system.
- 33.04 Licensor's manholes shall be opened as reasonably permitted by Licensor's authorized employees or agents. Licensee shall be responsible for obtaining any necessary permits from appropriate governmental authorities to open manholes and to conduct the work operations. Licensee's employees or agents will be permitted to enter or work in Licensor's manholes only when an authorized agent or employee of Licensor is present except as provided in the next paragraph. Licensor's said agent or employee shall have the authority to terminate Licensee's work operations in and around Licensor's manholes if, in the sole discretion of said agent or employee, any hazardous conditions arise or any unsafe practices are being followed by Licensee's employees or agents. Licensee agrees to pay, in accordance with the terms and conditions of APPENDIX I, the full cost of having Licensor's agent or employee present when Licensee's work is being done in Licensor's manholes. The presence of Licensor's authorized agent or employee shall not relieve Licensee of its responsibility to conduct all of its work operations in and around Licensor's manholes in a safe and workmanlike manner. Licensee is responsible for all signage, traffic control, equipment, and personnel necessary to work in Licensor's manholes. All work shall meet Occupational Safety and Health Act (OSHA), and any local or state standards and requirements.
- 33.05 Licensee's employees will be permitted to enter or work in Licensor's manholes and conduit system without an authorized agent or employee of Licensor being present, provided that Licensee's work consists only of routine operations of testing, adjusting, regulating or inspecting Licensee's existing facilities and does not involve any placing, removing, changing or rearranging of Licensee's or Licensor's facilities. In such cases, Licensee shall notify Licensor's designated representative in advance of Licensee's operations as to the type of work to be performed, the time at which it is to be performed and where it is to take place. Licensee shall conduct all such work operation in a safe and workmanlike manner, and in accordance with the terms of this Agreement.
- 33.06 Licensee shall, at its own expense, maintain its buried communication facilities so as not to conflict with the use of the right-of-way by Licensor or other authorized users of the right-of-way. Licensee shall, at its own expense, relocate, change, or replace its facilities or perform any

other work in connection with said facilities that may be reasonably required by Licensor or other authorities.

34.0 TERMINATION OF LICENSES

- 34.01 Upon notice from Licensor to Licensee that Licensor has been advised by governmental authority or private property owners that the use of any pole, conduit system, or right-of-way is not authorized and is objected to by such governmental authority or private property owner, as the case may be or that any pole, any conduit system or any right-of-way is to be removed, sold or otherwise disposed of, Licensee shall, if reasonably requested by Licensor, remove its cables, equipment, and facilities at once from the affected pole or poles or shall make arrangements for the removal of its cable, equipment, and facilities from the affected portion of Licensor's conduit system or right-of-way at Licensor's expense. If not so removed, Licensor shall have the right to remove Licensee's cable, equipment, and facilities from Licensor's right of way at the cost and expense of Licensee and without any liability thereto. If Licensor and Licensee deem it is impractical to remove Licensee's cables, equipment or facilities from any right-of-way, they may be abandoned in place.
- 34.02 Licensee may at any time remove its facilities from any pole of Licensor, but shall immediately give Licensor written notice of such removal and surrender of license in the form of a Notification of Surrender (APPENDIX VII) hereto attached and made a part hereof. If Licensee surrenders its license but fails to remove its facilities from Licensor's poles, Licensor shall have the right to remove Licensee's facilities at Licensee's expense without any liability on the part of Licensor for damage or injury to Licensee's facilities. In the event that Licensee's cables, equipment, and facilities shall be removed from any pole as provided by this Agreement, no attachment shall again be made to such pole unless Licensee shall have first complied with all of the provisions of this Agreement as though no attachment had previously been made.
- 34.03 If Licensee desires to terminate its license for the right to occupy any part of Licensor's conduit system, Licensee shall give Licensor written notice of such surrender in the form of a Notification of Surrender (APPENDIX VII) hereto attached and made a part hereof. In such event, Licensee shall make arrangements with Licensor for the removal of Licensee's cables, equipment, and facilities from that part of Licensor's conduit system at Licensee's expense. In the event that Licensee's cables, equipment, and facilities shall be removed from Licensor's conduit system as provided by this Article, no cable, facilities or equipment shall again be placed in that part of such conduit system unless Licensee shall have first complied with all of the provisions of this Agreement as though no cables, equipment, and facilities of Licensee had previously been placed in that part of Licensor's conduit system.
- 34.04 If Licensee desires to terminate its license for the right to occupy any part of the right-of-way, Licensee shall give Licensor written notice of such surrender in the form of a Notification of Surrender (APPENDIX VII) attached hereto and made a part hereof. In such event, Licensee shall make arrangements with Licensor for the removal of Licensee's cables, equipment, and facilities from that part of the right-of-way at Licensee's expense. However, in the event it is impractical to remove Licensee's cable, equipment, and facilities from any right-of-way, they may be abandoned in place.

35.0 EMERGENCY RESTORATION PROCEDURES

- 35.01 In the event of an emergency, restoration procedures may be affected by the presence of Licensee's Attachments. While Licensor shall not be responsible for the repair of damaged Attachments of Licensee (except by mutual written agreement), Licensor shall nonetheless control access to its poles, conduit systems or right-of-way if the restoration is to be achieved in an orderly fashion.
- 35.02 Where Licensor and Licensee are involved in emergency restorations, access to Licensor's poles, conduit systems or right-of-way will be controlled by Licensor's Network Construction Managers or their on-site representative according to the following guidelines.
- (A) Service Disruptions/Outages
- (1) While exercising its right to first access, Licensor shall make all reasonable efforts to grant access to as many other entities with Attachments as is reasonably safe.
 - (2) Where simultaneous access is not possible, Licensor will grant access on first come, first served basis.
- (B) Service Affecting Emergencies
- (1) While exercising its right to first access, Licensor shall make all reasonable efforts to grant access to as many other entities with Attachments as is reasonably safe.
 - (2) Where Licensor is unable to grant simultaneous access to all other entities with Attachments, access will be granted according to the level of damage to the Attachments of each entity and the likelihood that a given level of damage will result in service disruption. Where the likelihood that a service disruption will result is not clearly discernible, access will be on a first come, first served basis.
- 35.03 Without limiting any other indemnification or hold harmless provisions of this Agreement, Licensee agrees that any decision by Licensor regarding access to Attachments, or any action or failure to act by Licensor, under this section shall not be the basis for any claim by Licensee against Licensor for any damage to Licensee's Attachments or disruption of Licensee's services, or any other direct or indirect damages of any kind whatsoever incurred by Licensee -.

36.0 ABANDONMENT

- 36.01 Nothing in this Agreement shall prevent or be construed to prevent Licensor from abandoning, selling, assigning, or otherwise disposing of any poles, conduit systems or other Licensor property used for Licensee's Attachments; provided, however, that Licensor shall condition any such sale, assignment, or other disposition subject to the rights granted to Licensee pursuant to this Agreement. Licensor shall promptly notify Licensee of any proposed sale, assignment, or other disposition of any poles, conduit systems or other Licensor property used for Licensee's Attachments.

RLI Insurance Company
Performance Bond
Bond No. CMS245926

KNOW ALL MEN BY THESE PRESENTS: That FiberNet, LLC, 1200 Greenbrier Street, Charleston, WV 25311 (hereinafter called the Principal), and RLI Insurance Company (hereinafter called the Surety), a corporation duly organized under the laws of the State of Illinois, are held and firmly bound unto Windstream Kentucky, LLC, 50 Executive Parkway, Hudson, OH 44236 (hereinafter called the Obligee), in the full and just sum of Five Thousand Dollars (\$5,000), the payment of which sum, well and truly to be made, the said Principal and Surety bind themselves, and each of their heirs, administrators, executors, and assigns, jointly and severally, firmly by these presents.

WHEREAS, the Obligee has issued the Principal a special use permit (or Principal has entered a written agreement with Obligee dated _____) related to Pole Attachments & Conduit Footage and as a requirement of such permit or agreement the Principal is obligated to perform certain obligations

WHEREAS, the Obligee has agreed to accept this bond as security for performance of Principal's obligations under said permit (agreement) during the time period this bond remains in effect.

NOW, THEREFORE, THE CONDITION OF THIS OBLIGATION IS SUCH that if the Principal shall perform its obligations under said permit (agreement) as stipulated above, then this obligation shall be void, otherwise to remain in full force and effect, unless otherwise cancelled as hereinafter provided.

PROVIDED HOWEVER, that this bond is executed subject to the following express provisions and conditions:

1. In no event shall this bond guarantee the Principal's obligations under said permit (agreement) relating to lease or rent payments.
2. In the event of default by the Principal, Obligee shall deliver to Surety a written statement of the details of such default within 30 days after the Obligee shall learn of the same, such notice to be delivered by certified mail to address of said Surety as stated herein.
3. This bond may be terminated or canceled by surety by giving not less than sixty (30) days written notice to the Obligee, stating therein the effective date of such termination or cancellation. Such notice shall not limit or terminate any obligations resulting from default by the Principal that may have accrued under this bond as a result of default by Principal prior to the effective date of such termination.
4. Neither cancellation nor termination of this bond by Surety, nor inability of Principal to file a replacement bond or replacement security for its obligations, shall constitute a loss to the Obligee recoverable under this bond.

5. No claim, action, suit or proceeding shall be instituted against this bond unless same be brought or instituted and process served within one year after termination or cancellation of this bond.
6. No right of action shall accrue on this bond for the use of any person, corporation or entity other than the Obligee named herein or the heirs, executors, administrators or successors of the Obligee.
7. The aggregate liability of the surety is limited to the penal sum stated herein regardless of the number of years this bond remains in force or the amount or number of claims brought against this bond.
8. If any conflict or inconsistency exists between the Surety's obligations as described in this bond and as may be described in any underlying agreement, permit, document or contract to which this bond is related, then the terms of this bond shall prevail in all respects.
9. This bond shall not bind the Surety unless the bond is accepted by the Obligee. If the Obligee objects to any language contained herein, within 30 days of the date this bond is signed and sealed by the Surety, Obligee shall return this bond, certified mail or express carrier, to the Surety at its address at:

RLI Commercial Surety
Attention: (underwriter's name)
Branch Address

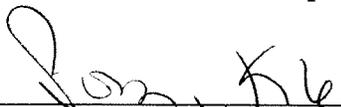

Failure to return the bond as described above shall constitute Obligee's acceptance of the terms and conditions herein.

IN WITNESS WHEREOF, the above bounded Principal and Surety have hereunto signed and sealed this bond effective this 1st day of July, 2008

POWER OF ATTORNEY

RLI Insurance Company

Know All Men by These Presents:

That this Power of Attorney is not valid or in effect unless attached to the bond which it authorizes executed, but may be detached by the approving officer if desired.

That **RLI Insurance Company**, an Illinois corporation, does hereby make, constitute and appoint:

E. Thomas Thilman, Peter Kunz, John Atkinson, Art Pedraza, Susan K. Symons, Pam J. Klasen, jointly or severally.

in the City of Chicago, State of Illinois its true and lawful Agent and Attorney in Fact, with full power and authority hereby conferred, to sign, execute, acknowledge and deliver for and on its behalf as Surety, the following described bond.

Any and all bonds provided the bond penalty does not exceed Twenty Five Million Dollars (\$25,000,000.00).

The acknowledgment and execution of such bond by the said Attorney in Fact shall be as binding upon this Company as if such bond had been executed and acknowledged by the regularly elected officers of this Company.

The **RLI Insurance Company** further certifies that the following is a true and exact copy of the Resolution adopted by the Board of Directors of **RLI Insurance Company**, and now in force to-wit:

"All bonds, policies, undertakings, Powers of Attorney or other obligations of the corporation shall be executed in the corporate name of the Company by the President, Secretary, any Assistant Secretary, Treasurer, or any Vice President, or by such other officers as the Board of Directors may authorize. The President, any Vice President, Secretary, any Assistant Secretary, or the Treasurer may appoint Attorneys in Fact or Agents who shall have authority to issue bonds, policies or undertakings in the name of the Company. The corporate seal is not necessary for the validity of any bonds, policies, undertakings, Powers of Attorney or other obligations of the corporation. The signature of any such officer and the corporate seal may be printed by facsimile."

IN WITNESS WHEREOF, the **RLI Insurance Company** has caused these presents to be executed by its Vice President with its corporate seal affixed this 13th day of December, 2007.

AGREEMENT TERMS AND CONDITIONS

1.0 SCOPE OF AGREEMENT

- 1.01 The purpose of this Agreement is to set forth the rates, terms, conditions, and procedures under which the Licensor will provide Licensee access to Licensor's poles, ducts, innerducts, conduits, and rights-of-way.
- 1.02 Subject to the provisions of this Agreement, Licensor will issue to Licensee for any lawful communications purpose, revocable, nonexclusive licenses authorizing the attachment of Licensee's cables, equipment, and facilities to Licensor's poles or the placing of Licensee's cables, equipment, and facilities in Licensor's conduit system or within right-of-way owned or controlled by Licensor.
- 1.03 No use, however extended, of Licensor's poles, conduit system or right-of-way nor payment of any fees or charges required under this Agreement shall create or vest in Licensee any ownership or property rights in said poles, conduit system or right-of-way, but Licensee's rights therein shall be and remain a mere license. Nothing herein contained shall be construed to compel Licensor to construct, retain, extend, place, or maintain any facilities not needed for its own service requirements, unless otherwise required by law.
- 1.04 Licensee recognizes that Licensor has heretofore entered into, or may in the future enter into, agreements and arrangements with others which are not party to this Agreement regarding the poles, conduit system and right-of-way covered by this Agreement. Nothing herein contained shall be construed as a limitation, restriction or prohibition against Licensor with respect to such other agreements or arrangements. The rights of Licensee shall at all times be subject to any present or future joint use arrangement between Licensor and any other public utility or government agency.

2.0 DEFINITIONS

- 2.01 "Attachments" - Any attachment to a pole, use of a duct or innerduct, use of a conduit, or using right-of-way owned or controlled by Licensor.
- 2.02 "Attachment Fee" - Fee paid annually per attachment on a pole, or in a duct, innerduct, conduit, or right-of-way.
- 2.03 "Buried Cable" - Cable located below the surface of the ground but not in Licensor's conduit system.
- 2.04 "Conduit System" - Any combination of ducts, innerducts, conduits, manholes, and handholes owned or controlled by Licensor that is a reusable passage or opening in, on, under or through the ground, or a structure such as a building or bridge. The term includes "inner ducts" created by subdividing a duct into smaller channels.
- 2.05 "Hazardous Materials" -

- (A) Any substance, material or waste now or hereafter defined or characterized as hazardous, toxic or dangerous as defined by the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA") of 1980, as amended, and other federal, state, and local health, safety, and environmental laws, ordinances, statutes, and rules, including but not limited to the Occupational Safety and Health Act ("OSHA").
 - (B) Any substance, material or waste now or hereafter classified as a contaminant or pollutant under any law, rules, ordinance, or authority.
 - (C) Any other substance, material or waste, the manufacture, processing, distribution, use, treatment, storage, placement, disposal, removal or transportation of which is now or hereafter subject to regulation under any law, ordinance, statute, rule or regulation of any governmental body or authority.
- 2.06 "Make Ready Work" - All work to prepare Licensor's poles, ducts, innerducts, conduits, rights-of-way, and related facilities for the requested occupancy or attachment of Licensee's facilities but not the actual placement of attachments or administrative activities related to inquiries, verifications, requests or applications.
- 2.07 "Poles"- Licensor owned and poles owned by others to the extent that and for so long as Licensor has the right to permit others to be attached in the communications space.
- 2.08 "Pole Attachment Request" or "PAR" - A written request from Licensee to attach its facilities to Poles, submitted in accordance with this Agreement. With respect to pole attachment agreements in effect prior to the date the Parties executed this Agreement, the term PAR shall be deemed to include Pole attachment requests made by letter or similar document.
- 2.09 "Right-of-Way" - Right-of-way owned or controlled by Licensor. It does not include attachment or use of cables, poles, equipment or facilities located on a particular right-of-way. It may include private easement, or in certain instances public right-of-way granted by a governmental authority or a utility easement such as in a subdivision or development.

3.0 TERM OF AGREEMENT

- 3.01 This Agreement shall become effective upon its execution and if not terminated in accordance with the provisions of other Articles hereof, shall continue in effect for a term of not less than three (3) years, provided, however, that at any time after the first year of said term the rates, fees and charges set forth may be increased or decreased by written notice from Licensor to Licensee on a nondiscriminatory basis with respect to similar rates, fees and charges of other similar licensees.
- 3.02 Either Party may terminate this Agreement with at least a (6) six month written notice to the other Party.
- 3.03 Upon termination of the Agreement in accordance with any of its terms, all outstanding licenses in connection therewith shall terminate and shall be surrendered and Licensee shall within 60 days of date of termination remove all cables, equipment and facilities at the cost and expense of Licensee. If Licensor in its sole discretion, deems it is impractical to remove Licensee's cable, equipment and facilities from Licensor's rights-of-way, they may be abandoned in place.

4.0 LEGAL AUTHORITY

- 4.01 Licensee will obtain from public authorities and private owners of property any and all permits, franchises, licenses and grants necessary for the lawful exercise of any license granted hereunder

5.0 APPLICABLE LAW

- 5.01 This Agreement, and the rights and obligations contained in it, shall be governed and construed under the laws of the state in which the attachments hereunder are to be located.

6.0 SUBSEQUENT LAW

- 6.01 The terms and conditions of this Agreement shall be subject to any and all applicable laws, rules, regulations or guidelines now in effect and that subsequently may be prescribed by any federal, state or local governmental authority. To the extent required by any such subsequently prescribed law, rule, regulation or guideline, the Parties agree to modify, in writing, the affected term(s) and conditions(s) of this Agreement to bring them into compliance with such law, rule, regulation or guideline. Should any term of this Agreement be determined by a court or agency with competent jurisdiction to be unenforceable, all other terms of this Agreement shall remain in full force and effect.

7.0 DISCLAIMER OF WARRANTIES

- 7.01 Except as specifically set forth in this Agreement, Licensor makes no warranties, express or implied, including, but not limited to, any implied warranties of merchantability or fitness for a particular purpose.

8.0 LICENSE NOT EXCLUSIVE

- 8.01 Nothing herein contained shall be construed as a grant of any exclusive license, right or privilege to Licensee. Licensor shall have the right to grant, renew and extend rights and privileges to others not parties to this Agreement, by contract or otherwise, to use any poles, conduit system or right-of-way covered by this Agreement, under such terms and conditions, as Licensor shall prescribe.

9.0 ASSIGNMENT OF RIGHTS

- 9.01 Licensee shall not assign; transfer or sublet the privileges hereby granted, or sell, lease or otherwise permit the use of its facilities on or any part thereof (all of the foregoing being "Transfers"), without prior consent in writing of Licensor which consent shall not be unreasonably withheld, delayed or conditioned; provided, however, that either Party may so Transfer its rights and obligations under this Agreement without such consent to (i) any entity said Party, directly or indirectly, controls, is controlled by or is under common control with or (ii) any entity acquiring all or substantially all of said Party's assets or equity, by providing written notice to the other Party of such Transfer. Any attempted Transfer that is not permitted under this Section 9.01 is void *ab initio*.

9.02 Subject to the provisions of this Agreement, this Agreement shall extend to and bind the successors and authorized assigns of the Parties hereto.

10.0 LIABILITY AND DAMAGES

10.01 Licensor reserves to itself, its successors and assigns, the right to maintain its poles, conduit system and right-of-way and to operate its facilities thereon in such manner as will best enable it to fulfill its own service requirements. Licensor shall not be liable to Licensee for any interruption to service of Licensee or for interference with the operation of the cables, equipment or facilities of Licensee arising in any manner out of the use of Licensor's poles, conduit system and right-of-way except caused by Licensor's sole negligence, willful misconduct or material breach of this Agreement, in which case Licensor's liability shall be limited to the reasonable cost of repair of Licensee's damaged cable, equipment or facilities, if any.

10.02 Licensee shall exercise special precautions to avoid damaging the cables, poles, conduits, right-of-way equipment and facilities of Licensor and of other licenses and hereby assumes all responsibility for any and all loss, damages, costs and expenses. Licensee shall make an immediate report to Licensor of the occurrence of any such damage and hereby agrees to reimburse the respective owners for the expense incurred in making repairs.

10.03 Licensee shall indemnify and hold harmless Licensor against any and all claims, demands, causes of action, damages, costs or liabilities of every kind and nature whatsoever, except to the extent caused by Licensor's negligence or willful misconduct, which may arise out of or be caused by:

(A) The erection, maintenance, presence, use or removal of Licensee's cable, equipment, and facilities on Licensor's poles, and within Licensor's conduit system and right-of-way

(B) Any act of Licensee on or in the vicinity of Licensor's poles, conduit system and right-of-way, or

(C) Any interruption, discontinuance, or interference with Licensee's service to any of its subscribers occasioned or claimed to have been occasioned by any action of Licensor pursuant to or consistent with this Agreement. Licensee shall, upon demand and at its own sole risk and expense, defend any and all suits, actions or other legal proceeding brought or instituted against Licensor on any such claim, demand or cause of action, and shall pay and satisfy any judgment or decree rendered against Licensor therein, and Licensee shall reimburse Licensor for any and all legal expense incurred by Licensor in connection therewith. Licensee shall also indemnify, protect and hold harmless Licensor from any and all claims and demands of whatever kind which arise directly or indirectly from the operation of Licensee's facilities including taxes, special charges by others, claims and demands for damages or loss for infringement of copyright, for libel and slander for unauthorized use of television broadcast programs, and for unauthorized use of other program material, and from and/or against all claims and demands for infringement of patents with respect to the manufacturer, use and operation of Licensee's equipment whether arising from the use of Licensee's equipment in combination with Licensor's poles, conduit system, right-of-way or otherwise.

10.04 Licensee agrees to comply under the Workmen's Compensation Laws of the state in which attachments are to be located hereunder, and also agrees to cause every subcontractor of

Licensee to comply with and qualify under said laws, and shall furnish copies of Certificates demonstrating such compliance to Licensor prior to commencement of the work.

11.0 DEFAULT AND REMEDIES

11.01 In addition to Material Defaults defined anywhere else in this Agreement, any one of the following shall be deemed the occurrence of a Material Default under this Agreement:

- (A) Failure by Licensee to pay any fee or other sum required to be paid under the terms of this Agreement and such default continues for a period of thirty (30) calendar days after written notice thereof to Licensee.
- (B) Failure by either Party to perform or observe any other term, condition, covenant, obligation, or provision of this Agreement and such default continues for a period of thirty (30) business days after written notice thereof from the other Party (provided that if such default is not curable within a thirty (30) business day period, the period will be extended if the Party substantially commences to cure such default and proceeds diligently thereafter to effect such cure).
- (C) The filing of any tax or mechanic's lien against Poles because of any act or omission by Licensee which is not bonded or discharged within thirty (30) calendar days of the date Licensee receives notice that such lien has been filed;
- (D) Licensor or Licensee's voluntary or involuntary bankruptcy;
- (E) Licensee's knowing use or maintenance of its Attachments in violation of any law or regulation, or in aid of any unlawful act or undertaking;
- (F) If any authorization which may be required of Licensee by any governmental or private authority for the placement, operation, or maintenance of Licensee's Attachments is denied or revoked.

11.02 In the event of a Material Default and subject to any other applicable provision of this Agreement, the Non-defaulting Party, without any further notice to the Defaulting Party (except where expressly provided for below or required by applicable law), may do any one or more of the following:

- (A) Perform on behalf and at the expense of the Defaulting Party, any obligation of the Defaulting Party under this Agreement which the Defaulting Party has failed to perform and of which the Non-defaulting Party shall have given the Defaulting Party notice, the cost of which performance shall be paid by the Defaulting Party to the Non-defaulting Party upon demand;
- (B) Terminate this Agreement by giving sixty (60) business days written notice of such termination to Licensee and remove Licensee's Attachments and store Licensee's facilities in a public warehouse or elsewhere at the expense of and for the account of Licensee without Licensor being deemed guilty of trespass or conversion, and without Licensor becoming liable for any loss or damages to Licensee occasioned thereby; or

- (C) Exercise any other legal or equitable right or remedy that the Non-defaulting Party may have.
- 11.03 The Defaulting Party shall repay to the Non-defaulting Party upon demand any costs and expenses incurred by the Non-defaulting Party (including, without limitation, reasonable attorneys' fees) in successfully enforcing this Agreement.
- 11.04 Upon termination of this Agreement by the Non-defaulting Party, the Defaulting Party shall remain liable to the Non-defaulting Party for any and all fees, other payments and damages which may be due or sustained in accord with this Agreement prior to such termination, all reasonable costs, fees and expenses, including, without limitation, reasonable attorney' fees incurred by the Non-defaulting Party in pursuit of its remedies hereunder.
- 11.05 All rights and remedies of the Non-defaulting Party set forth in this Agreement shall be cumulative and none shall exclude any other right or remedy, now or hereafter allowed by or available under any statute, ordinance, rule of court, or the common law, either at law or in equity, or both.

12.0 INDEMNIFICATION

- 12.01 Licensee shall compensate Licensor for the full actual loss, damage or destruction of Licensor's property that in any way arises from or is related to this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation, or maintenance of Licensee's Attachments).
- 12.02 Each party agrees to defend, indemnify, protect and hold harmless the other and the other's officers, directors, employees, shareholders, successors, assigns, agents, affiliates, representatives, partners, and contractors from and against any and all third party claims, actions, administrative proceedings (including, without limitation, informal proceedings), judgments, damages, penalties, fines, cost, liabilities, interests, or loss, including, without limitation, reasonable attorneys' fees and expenses, consultant fees, and expert fees, together with all other costs and expenses of any kind or nature suffered by or asserted against the indemnified party in any way arising out of or connected with this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation or maintenance of Licensee's facilities, unless caused by the sole negligence or willful misconduct on the part of Licensor or Licensor's affiliates, agents, officers, employees and assigns). Each party expressly assumes all liability for actions by its affiliates, agents, officers, employees, or its contractors and expressly waives any immunity from the enforcement of this indemnification provision that might otherwise be provided by workers' compensation law or by other state or federal laws.
- 12.03 Without limiting any of the foregoing, Licensee assumes all risk of, and agrees to relieve Licensor of any and all liability for, loss or damage (and the consequences of loss or damage) to any facilities placed on Licensor's property and any other financial loss sustained by Licensee, except to the extent caused by the negligence or willful misconduct on the part of Licensor or Licensor's agents, officers, employees, and assigns.

- 12.04 Without limiting the foregoing, Licensee expressly agrees to indemnify, defend, and hold harmless Licensor and Licensor's agents, officers, employees and assigns from any and all claims asserted by end users/customers of Licensee in any way arising out of or in connection with this Agreement or Licensee's facilities, except to the extent caused by the negligence or willful misconduct on the part of Licensor or Licensor's agents, officers, employees, and assigns. or its contractors.
- 12.05 Notwithstanding anything to the contrary in this Agreement, Licensee further shall indemnify and hold harmless Licensor, its agents, officers, employees, and assigns from and against any claims, liabilities, losses, damages, fines, penalties, and costs (including, without limitation, reasonable attorneys' fees) whether foreseen or unforeseen, which the indemnified parties suffer or incur because of:
- (A) Any discharge of hazardous waste resulting from acts or omissions of Licensee or Licensee's predecessor in interest;
 - (B) Acts or omissions of Licensee, its agents, employees, Licensees, or representatives in connection with any cleanup required by law, or
 - (C) Failure of Licensee to comply with Environmental, Safety and Health Laws.
- 12.06 In no event shall either Party be liable to the other for any special, consequential or indirect damages (including, without limitation, lost revenues and lost profits) arising out of this Agreement or any obligation arising hereunder, whether in an action for or arising out of breach of contract, or otherwise.
- 12.07 Licensee shall indemnify, protect, and hold harmless Licensor from and against any and all claims for libel and slander, copyright and/or patent infringement arising directly or indirectly by reason of installation of Licensee's equipment on Licensor Poles, Conduit Systems or Right-of Way pursuant to this Agreement.

13.0 COMPLIANCE WITH LAW

- 13.01 Notwithstanding anything to the contrary in this Agreement, each Party shall ensure that any and all activities it undertakes pursuant to this Agreement shall comply with all applicable laws, including, without limitation, all applicable provisions of:
- (A) Workers' compensation laws
 - (B) Unemployment compensation laws
 - (C) The Federal Social Security Law
 - (D) The Fair Labor Standards Act, and
 - (E) All laws, regulations, rules, guidelines, policies, orders, permits and approvals or any governmental authority relating to environmental matters and/or Occupational Safety and Health Act ("OSHA").

14.0 INSURANCE

14.01 The each Party shall obtain and maintain, in full force and effect at all times, during operations covered by this Agreement, such minimum insurance as will cover the obligations and liabilities of said Party, its agents, and its employees which may arise from the operations under this Agreement. Insurance shall have limits of not less than:

(A) Commercial General Liability policy of minimum limits of:

| | |
|---|--------------------------------|
| General Aggregate | \$ 2,000,000 per policy period |
| Products/Completed Operations Aggregate | \$ 2,000,000 per policy period |
| Personal Injury/Advertising | \$ 2,000,000 per occurrence |
| Each Occurrence | \$ 2,000,000 per occurrence |
| Fire Legal Liability | \$ 50,000 any one fire |

14.02 The policy will be endorsed to show the above aggregate limits applying to "each" job site or, as an alternative, the General Aggregate will be increased to \$4,000,000 per policy period. Policy will also specifically state the coverage applies to all operations conducted by the respective Party, its employees, or agents on behalf of that Party's Corporation or subsidiary.

14.03 Where the performance of the work involves structural property, underground property, or blasting, each Party's Commercial General Liability insurance policy shall provide coverage to the insured for legal liability arising from operations under this Agreement for property damage:

- (A) arising out of blasting,
- (B) arising out of collapse of, or structural injury to, any building or structure or
- (C) To underground facilities and utilities.

14.04 Other general liability forms are acceptable in lieu of the Commercial General Liability Form, however, they are not to be used without written approval from the Company's Risk Management Department, 4001 Rodney Parham Road, AR 72212. However, such written approval shall not be unreasonably withheld.

(A) Business Automobile Liability policy with minimum limits of:

| | |
|-----------------------|---------------------------|
| Bodily Injury | \$2,000,000 per accident |
| Property Damage | \$ 2,000,000 per accident |
| OR | |
| Combined Single Limit | \$ 2,000,000 per accident |

The policy will be issued using symbol "1 - any auto" coverage.

(B) Workers Compensation:

Part 1 - Medical Benefits Statutory

Part 2 - Employer's Liability as indicated:

Bodily Injury by Accident \$ 100,000 each accident

| | |
|--------------------------|--------------------------|
| Bodily Injury by Disease | \$ 100,000 each employee |
| Bodily Injury by Disease | \$ 500,000 policy limit |

- 14.05 The policy will show the state in which operation on behalf of the Party and/or subsidiary is being conducted. For operations conducted within monopolistic (state fund) states, the Party will furnish a certificate of compliance from the appropriate state fund administrator.
- 14.06 In each and every policy in 14.04A and 14.04B, the other Party's Corporation and its subsidiaries shall be named an "additional insured" with respect to activities performed on behalf of the Party's Corporation and its subsidiaries.
- 14.07 Coverage provided by the policies listed in this paragraph will be issued by an insurance company, licensed in the state in which operations on behalf of the Party are to be conducted. It is acceptable to use both primary and excess/umbrella policies to obtain necessary limits.
- 14.08 Each Party will furnish to the other Party, a certificate evidencing insurance coverage under sub-paragraphs 14.04-A, and 14.04-B. Such certificate shall provide for a thirty-day prior notice to the other Party of any cancellation or material changes in coverage and shall be signed by a legal representative of the issuing insurance company. The certificate of insurance shall be sent to the person identified at paragraph 25.03.
- 14.09 The provisions of sub-paragraphs 14.04-A and 14.04-B shall also apply to all sub-Licensees, and Licensee shall be responsible for their compliance herewith.

15.0 NON-WAIVER OF TERMS AND CONDITIONS

- 15.01 Failure to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

16.0 LICENSOR'S LIEN

- 16.01 Should Licensor under any Article of this Agreement remove Licensee's cable, equipment or facilities from Licensor's poles, conduit system or right-of-way, Licensor will deliver to Licensee the cable, equipment or facilities so removed upon payment by Licensee of the cost of removal, storage and delivery, and all other amounts due Licensor hereunder. Licensor is hereby given a lien on Licensee's cable, equipment or facilities within Licensor's conduit system or right-of-way or attached to Licensor's poles or removed therefrom, with power of public or private sale, to cover any amounts due Licensor under the provisions of this Agreement. Such liens shall not operate to prevent Licensor from pursuing, at its option, any other remedy in law, equity or otherwise, including any other remedy provided for in this Agreement.

17.0 SCHEDULE OF FEES AND CHARGES

- 17.01 Licensee may be required to furnish bond or other security satisfactory to Licensor, in a reasonable initial amount to be determined by Licensor and provided by Licensee at the time Licensee submits Exhibit B to Licensor's Attachment Application Procedures to guarantee the payment of any such sums which may become due to Licensor arising out of this Agreement including, but not limited to fees due hereunder or charges for work performed for the benefit of Licensee under this Agreement, including the removal of Licensee's facilities upon termination of this Agreement by any of its provisions or upon

termination of any License issued hereunder. Bond to be sent to person identified at paragraph 25.03. Bond is to be equal to one (1) year's annual rental fees.

17.02 The fees, rates and charges set forth in APPENDIX I or elsewhere in this Agreement are effective during the term of this Agreement subject to Section 3.01 and shall be due and payable by Licensee as set forth herein.

17.03 FEES:

All rates, charges and fees set forth in this Agreement and as shown in APPENDIX I (Schedule of Rates, Fees, and Charges) shall be subject to all applicable federal, state, and local laws, rules, regulations and commission orders.

(A) Computation:

(1) Pole and Anchor Attachment Fees:

(a) For the purpose of computing the annual pole attachment fee hereunder, for calendar years subsequent to a first partial calendar year, said fee shall be based upon the number of poles and anchors, to which attachments are actually made, as of December 31 of the preceding year, multiplied by the per attachment pole attachment fee rate set forth on APPENDIX I. For a first partial calendar year, the pole attachment fee shall be prorated as necessary, on a daily basis from the date payment is due in accordance with Exhibit B of Licensor's Attachment Application Procedures.

(b) For billing purposes, a single pole attachment includes the point of attachment and all facilities located in the usable space on the pole in the space assigned to Licensee (typically six inches above and six inches below the point of attachment). If Licensee occupies more than one usable space on a pole, separate attachment fees shall apply to each space occupied.

(2) Conduit Occupancy Fees :

(a) For the purpose of computing the total conduit occupancy fee due hereunder, the duct feet of conduit shall be measured from the center to the center of manholes; or from the center of a manhole to the end of the duct; from the center of a manhole to the property line if the duct is connected at the property line to a duct owned and controlled by a third-party property owner; or the length of a conduit from pole to pole; or isolated lengths of conduit not attached to any structure (such as involved with buried cable) which will be occupied by Licensee's cable.

(b) For billing purposes each inner duct will be billed the half duct fee. If two or more facilities occupy a duct that has not been subdivided, the half duct fee will be charged for each facility. The half duct fee will apply when others place the Licensee facility in a duct that has not been subdivided only if the facility does not render the duct unusable.

- (3) Right-of-Way Occupancy Fees:
 - (a) This fee will be negotiated on a case by case basis. There is no established per foot rate.

- (B) Payment Date:
 - (1) If this Attachment License Agreement becomes effective on or prior to June 30, all attachment and occupancy fees for the remainder of that first partial calendar year shall be due and payable at the time required under Appendix I of Licensor's Attachment Application Procedures .
 - (2) If an Attachment License Agreement becomes effective on or after July 1, all attachment and occupancy fees for the remainder of that current partial calendar year as well as the full upcoming calendar year shall be payable at the time required under Appendix I of Licensor's Attachment Application Procedures.
 - (3) On an annual basis, all attachment and occupancy fees not previously paid are to be paid in advance, on the 31st day of January of each year or within 30 days of receipt of invoice. Failure to pay such fees within 30 days of the annual due date shall constitute a Material Default of this Agreement.

- (C) Termination of License:
 - (1) Upon termination or surrender of a license granted hereunder, no refund of any attachment or occupancy fee shall be made.

17.04 OTHER CHARGES:

- (A) Computation:
 - (1) All charges for inspections, engineering, or rearrangements of Licensee's facilities from Licensor's poles or conduit and, without limitation, any other work performed for Licensee shall be based upon the full cost and expense, including reasonable overhead, to Licensor for performing such work for Licensee. The cost to Licensee shall be determined in accordance with the regular and customary methods used by Licensor in determining such costs.
 - (2) The charge for replacement of poles shall include the entire non-betterment cost to Licensor including the increased cost of larger poles, sacrificed life value of the poles removed, cost of removal, less any salvage recovery and the cost of transferring Licensor's facilities from the old to the new poles.
 - (3) All other attachment or occupancy related inquiry, verification, application, administrative and miscellaneous rates, fees and charges shall be calculated and paid in accordance with APPENDIX I and/or Licensor's Attachment Application Procedures and Attachments thereto.

- (B) Payment Date:

- (1) All bills for such other charges for work performed by Licensor shall be payable upon presentment to Licensee, and shall be deemed delinquent if not paid within 30 days after presentment to Licensee.

18.0 DISPUTE RESOLUTION

18.01 Except in the case of:

- (A) A suit, action, or proceeding by one Party to compel the other Party to comply with its obligation to indemnify the other Party pursuant to this Agreement, or
- (B) A suit, action or proceeding to compel either Party to comply with the dispute resolution procedures set forth in this section, the Parties agree to use the following procedure to resolve any dispute, controversy, or claim arising out of or relating to this Agreement or its breach.

18.02 At the written request of a Party, each Party shall designate a knowledgeable, responsible representative to meet and negotiate in good faith to resolve any dispute, controversy, or claim arising under this Agreement. The Parties intend that these negotiations be conducted by non-lawyer, business representatives. The substance of the negotiations shall be left to the discretion of the representatives. Upon mutual agreement, the representatives may utilize other alternative nonbinding dispute resolution procedures such as mediation to assist in the negotiations. Discussions and correspondence between the representatives for the purposes of these negotiations shall be treated as confidential, undertaken for purposes of settlement, shall be exempt from discovery and production, and shall not be admissible in any subsequent proceeding without the concurrence of all Parties. Documents identified in or provided during such negotiations, which are not prepared for purposes of the negotiations, shall not be so exempt and may, if otherwise admissible, be admitted as evidence in any subsequent proceeding.

18.03 If a resolution of the dispute, controversy or claim is not reached within ninety days of the initial written request referred to in 18.02, the dispute, controversy, or claim may be filed with the State Public Service Commission for review and determination, provided the party invoking the Commission's intervention process has in good faith negotiated, or attempted to negotiate, with the other Party pursuant to 18.02.

18.04 Each Party shall bear its own costs, including attorneys' fee, incurred in connection with any of the foregoing procedures. A Party-seeking discovery shall reimburse the responding Party the cost of reproducing documents (to include search time and reproduction time costs). The fees associated with any arbitration, including the fees of the arbitrator, shall be divided equally between the parties.

19.0 ENTIRE AGREEMENT

19.01 This Agreement and Licensor's related Attachment Application Procedures cancels and supersedes all previous agreements whether written or oral, except for any sums due thereunder, between Licensor and Licensee with respect to the attachment of Licensee's cable, equipment, and facilities to Licensor's poles or the placing Licensee's cable, equipment or facilities in Licensor's conduit system or right-of-way; and there are no other provisions, terms or conditions to this Agreement except as expressed herein. All currently effective licenses heretofore granted pursuant to such previous agreements shall continue in effect subject to the terms and conditions of this Agreement.

19.02 The terms and conditions of this Agreement supersede all prior oral or written understandings between the Parties and constitute the entire Agreement between them concerning the subject matter of this Agreement. There are no understandings or representations, express or implied, not expressly set forth in this Agreement or in Licensor's related Attachment Application Procedures. This Agreement shall not be modified or amended except by writing signed by the Party to be charged. This Agreement is only applicable to pole applications submitted for attachment to Windstream Kentucky East, LLC facilities in the State of Kentucky.

GENERAL OPERATING ROUTINE

20.0 ATTACHMENT, USE AND/OR OCCUPANCY REQUEST PROCESS

20.01 There is a multi-step pole attachment or duct, innerduct, conduit or right-of-way use and/or occupancy application process and fee determination process that the Licensee may begin upon the execution of this Agreement. It is set forth below and in Licensor's related Attachment Application Procedures.

21.0 POLE ATTACHMENT REQUESTS (PAR)

21.01 The following process can begin upon the execution of this agreement. The steps are:

- (A) Pole Attachment Quote Preparation: Licensee shall submit a Pole Attachment Request Form (Exhibit B to Licensor's related Attachment Application Procedures), which may be reasonably revised from time to time by Licensor at its sole discretion, to Licensor which will include a drawing of the proposed route and contact information (name, telephone, facsimile, and email information), and all required fees, as listed in and computed in accordance with APPENDIX I, which may be changed from time to time by Licensor to remain consistent with prevailing costs, of this Agreement. These fees consist of administrative as well as other actual costs reasonably incurred in researching the requested route. Once Licensor receives the aforementioned specific attachment information and the fee from Licensee, Licensor will report on the Poles along the route, any required make-ready work, the costs and schedule for such make-ready work, and any other requirements Licensee must satisfy prior to installing its facilities. If during this process, Licensor determines any lawful reason for denying Licensee's application, Licensor will so inform Licensee. Pole attachment quotes will be provided within thirty (30) business days for standard requests. Non-standard quantities of pole attachments and distances will be addressed on an individual case basis, and in a commercially reasonable period.
- (B) Pole Attachment Order: Upon completion of the work identified above, Licensor will inform Licensee if Licensor will provide Licensee a Pole Order Form (Appendix VI to the Licensor's related Attachment Application Procedures) which may be revised from time to time by Licensor at its sole discretion, containing estimated make-ready cost (if any), annual recurring charges and any additional information necessary for Licensee to proceed with attaching its facilities to Licensor's Poles. If Licensee desires to attach to Licensor's poles, and pole make-ready work is required, Licensee shall pay the estimated make-ready cost prior to Licensor beginning any work. Actual costs incurred by Licensor in performing the make-ready work will be applied to the estimated make-ready costs. Any reasonable costs in excess of the estimated cost will be billed to Licensee. Any payment of the estimated costs in excess of actual pole attachment make-ready costs will be returned to Licensee. If Licensee declines to proceed, all fees incurred to date will be billable to Licensee by Licensor.

21.02 Licensee has thirty (30) days to pay the estimated make-ready work or cancel the PAR.

21.03 Upon completion of the make-ready work, the receipt of all payments and fees, and the signing of this Agreement, an "Approved" Attachment I shall be returned to the Licensee. At that time Licensee will be considered to have been granted a License with respect to the poles approved in the PARON and may attach to Licensor's facilities.

22.0 SURVEYS AND INSPECTIONS OF LICENSEE'S FACILITIES

21.01 Licensor reserves the right to inspect each new installation or work operation of Licensee on or within Licensor's facilities. The making of inspections or the failure to make inspections shall not relieve Licensee of any responsibility, obligation or liability imposed by this Agreement.

23.0 ISSUANCE OF LICENSES

23.01 Before Licensee shall have a right to attach to any pole of Licensor, Licensee shall make application for and receive a revocable, nonexclusive license therefore in the form of an approved Application for Pole License (APPENDIX VI and Exhibit B to Licensor's related Attachment Application Procedures).

23.02 Before Licensee shall have the right to place any cable, equipment or facilities within any conduit system or right-of-way of Licensor, Licensee shall make application for and receive a revocable, nonexclusive license therefore in the form of an approved Application for Conduit or Right-of-Way License (APPENDIX IV and Exhibit B to Licensor's related Attachment Application Procedures), hereto attached and made a part hereof.

23.03 Any license granted hereunder for attachment to Licensor's poles shall terminate without further notice to Licensee as to individual poles covered by the license to which Licensee has not attached within ninety (90) days from the date that Licensor has notified Licensee that such poles are available for attachment of the operating facilities of Licensee, unless Licensor, in the exercise of its sole discretion, agrees to extend said period at the request of Licensee.

23.05 Any license granted hereunder for placement of Licensee's facilities in Licensor's conduit system shall terminate without further notice to Licensee as to individual sections of Licensor's conduit system covered by the license in which Licensee has not placed its facilities within ninety (90) days from the date that Licensor has notified Licensee that such sections of the conduit system are available for the placement of operating facilities of Licensee, unless Licensor, in the exercise of its sole discretion, agrees to extend said period at the request of Licensee.

24.0 AUTHORITY TO PLACE ATTACHMENTS

24.01 Before any attachments or placement of facilities Licensee shall submit evidence that Licensee has the authority to maintain Attachments within public rights-of-way or on private right-of-way or on private property. Licensee shall be solely responsible for obtaining all licenses, authorizations, permits and consents from federal, state and local authorities or private land owners that may be required to place and maintain facilities on Licensor's poles or within Licensor's conduit, duct or right-of-way.

25.0 NOTICES (OF MODIFICATION OR ALTERATION OF POLES)

25.01 In the event Licensor plans to modify or alter any Licensor Poles upon which Licensee has placed Attachments, Licensor, except in emergency situations, shall provide Licensee written notice of the proposed modification or alteration at least ninety (90) business days prior to the time the proposed modification or alteration is scheduled to take place. Should Licensee decide to modify or alter Licensee's Facilities on Poles, Licensee shall so notify Licensor in writing at least ninety (90) business days prior to the day the work is to begin. In such event, Licensee shall bear a proportionate share of the total costs incurred by Licensor to make Licensor Poles accessible. Licensee's proportionate share of the total cost shall be based on the ratio of the amount of new space occupied by Licensee to the total amount of new space

occupied by all of the parties joining in the modification. Licensee is not responsible for any costs of Licensor's modifications or alterations of its Poles.

25.02 In the event Licensor is required to move the location of, or replace, any Licensor Pole(s) for reasons beyond its control, Licensee concurrently shall relocate Licensee's Attachments. Licensee shall be solely responsible for the costs of the relocation of Licensee's Attachments. When it is mutually agreed that it is in the best interest of Licensor and Licensee, Licensor will, after proper notification has been provided, transfer Licensee's Attachments at the same time that Licensor transfers its Attachments. The rate charged for these transfers is listed in this Agreement (APPENDIX I). The rate for transfers may be adjusted by Licensor from time to time to remain consistent with prevailing costs.

25.03 Notices under this Agreement may be given and shall be deemed to have been given, by posting the same in first class mail to Licensee as follows:

LICENSOR:

Company Name: Windstream Kentucky East, LLC

26.0 REQUIREMENTS AND SPECIFICATIONS FOR ATTACHMENT TO POLES

26.01 Licensee's cables, equipment, and facilities shall be placed and maintained in accordance with the requirements and specifications attached hereto and as set forth in Licensor's related Attachment Application Procedures and made a part hereof, and in accordance with the requirements and specifications of the National Electric Safety Code (most recent edition) and the National Electric Code (most recent edition), and in compliance with any other rules or orders now in effect or that may hereafter be issued by any state utility commission or other authority having jurisdiction.

27.0 PLACEMENT OF ATTACHMENTS

27.01 Licensee shall, at its own expense, place and maintain and replace its Attachments on Licensor's Poles in accordance with:

- (A) Such reasonable requirements and specifications as Licensor shall from time to time prescribe in writing in Licensor's Attachment Application Procedures or otherwise,
- (B) In compliance with any rules or orders now in effect or that hereafter may be issued by any regulatory agency or other authority having jurisdiction, and
- (C) All currently applicable requirements and specifications of the National Electrical Safety Code, National Electric Code, most current edition or any amendment or revision of said Code. Licensee agrees to comply, at its sole risk and expense, with all specifications hereto, as may be revised from time to time by Licensor. Licensor will provide supervision at Licensee's expense if Licensor believes it is required.

27.02 Licensee's Facilities shall be tagged at maximum intervals of 300 feet so as to identify Licensee as the owner of the Facility. The tags shall be of sufficient size and lettering so as to be easily read from ground level.

28.0 MODIFICATIONS, ADDITIONS OR POLE REPLACEMENTS AND REARRANGEMENTS

28.01 Licensee shall not modify, add to, or replace facilities on any pre-existing Attachment on an Licensor Pole without first notifying Licensor in writing of the intended modification, addition or replacement at least thirty (30) business days prior to the date the activity is scheduled to begin. The required notification shall include:

- (A) The date the activity is scheduled to begin,
- (B) A description of the planned modification, addition, or replacement,
- (C) A representation that the modification, addition, or replacement will not require any space

other than the space previously designated for Licensee's Attachments, and

- (D) A representation that the modification, addition, or replacement will not impair the structural integrity of the Poles involved.
- 28.02 Should Licensor determine that the modification, addition, or replacement specified by Licensee in its notice will require more space than that allocated to Licensee or will require the rearrangements of, reinforcement of, replacement of, or an addition of support equipment to the Poles involved in order to accommodate Licensee's modification, addition, or replacement, Licensor will so notify Licensee, whereupon Licensee will be required to submit a PAR in compliance with this Agreement in order to obtain authorization for the modification, addition, or replacement of its Attachments.
- 28.03 Should Licensee request Licensor to expand capacity or purchase additional plant, Licensee agrees to pay all reasonable costs. If Licensor or another party that has been granted a license joins in the request and will benefit from the expansion or purchase, Licensee agrees to pay a percentage of all costs proportionate to Licensee's share of the benefit received from the expansion or purchase.
- 28.04 When multiple applications, including application of Licensee, are received by Licensor with respect to any pole which must be replaced or rearranged to provide additional space prior to commencement of the work on that pole a Transfer Attachment Fee may be charged. Licensor will equitably prorate to the extent that it is practical between Licensee and other applicants for the pole space, the common expenses of engineering, rearrangement, and replacement, if any, which result from the processing of multiple applications. . Licensee shall be bound by Licensor's determination as to any such pro-ration of Transfer Attachment Fee to Licensee.

29.0 UNAUTHORIZED ATTACHMENTS

- 29.01 If any cable, equipment or facilities of Licensee shall be found on a pole or within a conduit or right-of-way for which no license is outstanding, Licensor, without prejudice to its other rights or remedies under this Agreement or otherwise, may:
- (A) Impose a charge, and
 - (B) Require Licensee to remove such cable, equipment or facilities forthwith or Licensor may remove them without liability and the expense of removal shall be borne by Licensee. For the purpose of determining the charge, Licensee shall pay liquidated damages that will not exceed an amount equal to the annual pole attachment fee for the number of years the unauthorized attachments have existed (or, if that cannot be determined, the number of years since the most recent inventory or five years, whichever is less), plus interest at a rate set for that period by the IRS for individual underpayments pursuant to Section 6621 of the IRS Code. Any such charge imposed by Licensor shall be in addition to its rights to any other sums due and payable, including without limitation the actual costs of any audit or survey which established the existence of the unauthorized attachments and to any claims to said fees or said unlicensed use shall be deemed as a ratification or the licensing of the unlicensed use, and if any license should subsequently be issued, after application and payment of the application fee therefore, said license shall not operate retroactively or constitute a waiver by Licensor of any of its rights or privileges under this Agreement or otherwise.

29.02 For purposes of this section, an unauthorized Attachment shall include, but not limited to:

- (A) An Attachment to a Pole which is not identified in any PARON (APPENDIX VI) issued in accordance with this Agreement;
- (B) An Attachment that occupies more space than that allocated to Licensee By Licensor;
- (C) An attachment that is not placed in accordance with the provisions of this Agreement or the appropriate PARON (APPENDIX VI) issued pursuant to this Agreement, unless Licensee can demonstrate to Licensor's reasonable satisfaction that said misplacement is not due to any act or omission of Licensee or Licensee's agents;
- (D) An addition or modification by Licensee to its pre-existing Attachment(s) that impairs the structural integrity of the involved Licensor Pole(s).
- (E) An Attachment that consists of facilities owned or controlled by, and for the use of a Party other than Licensee.

29.03 Once Licensor has notified Licensee of an unauthorized attachment. Licensee can submit a PAR to request an authorized attachment. A PAR submitted per this provision will be treated like any other PAR subject to this Agreement. Licensee will be responsible for all fees associated with a PAR (as identified in this Agreement). If a PAR is not received by Licensor within ten (10) business days of Licensee's receipt of an unauthorized attachment notification, Licensee has sixty (60) business days from the date of its receipt of the initial unauthorized attachment notification to vacate the Pole.

30.0 FAILURE TO PLACE ATTACHMENTS

30.01 Once Licensee has been issued a PARON (APPENDIX VI), Licensee shall have ninety (90) calendar days from the date of the PARON (APPENDIX VI) to begin the placement of its Attachments on the Licensor Poles covered by the PARON (APPENDIX VI). If Licensee has not begun placing its Attachments within that ninety-(90) calendar day period, Licensee shall so advise Licensor with a written explanation for the delay. If Licensee fails to advise Licensor of its delay, with a written explanation therefore, or if Licensee fails to act in good faith by not making a bona fide effort to begin placing its Attachments within the ninety (90) calendar days prescribed by this section, the previously issued PARON (APPENDIX VI) shall be deemed rescinded by Licensor and Licensee shall have no further right to place Attachments pursuant to that PARON (APPENDIX VI).

31.0 OCCUPANCY OF CONDUIT SYSTEM

31.01 When Licensee submits an application for a license to place its cables, equipment, and facilities in the conduit system of Licensor, Licensor will advise Licensee of the availability of conduit space in accordance with Licensor's Attachment Application Procedures. In determining the availability of space in Licensor's conduit system, Licensor reserves the right to deny the granting of a license for any non-discriminatory lawful reason, including without limitation, insufficient capacity or reasons of safety, reliability and generally applicable engineering

purposes. If conduit space is available, a license to occupy a portion of conduit system will be granted to Licensee, provided, however, that Licensor does not warrant the condition of such conduit system.

- 31.02 Licensor reserves the right to exclude cable, equipment, and facilities of Licensee from Licensor's conduit system, or to limit the type, number and size of Licensee's cable, equipment, and facilities which may be placed in any of Licensor's manholes.

32.0 OCCUPANCY OF RIGHT-OF-WAY

- 32.01 Licensor and Licensee agree that neither party has the right to restrict or interfere with the other party's lawful access to and use of public right-of-way, including public right-of-way, which pass over property owned by either party. Except as otherwise specifically provided in this Agreement, Licensor and Licensee shall each be responsible for obtaining their own right-of-way and permission to use real or personal property owned or controlled by any governmental body.

- 32.02 In the event that Licensee desires to occupy right-of-way owned or controlled by Licensor, Licensor may require Licensee to make an application to do so by the terms of this Agreement. Licensor reserves the right to determine whether granting a license would adversely affect its common carrier communication services and its ability to meet its duties and obligation with respect thereto, including questions of economy, safety, and future need of Licensor.

- 32.03 Licensor may, without incurring any liability, remove the cables, equipment, and facilities of Licensee from Licensor's right-of-way, at Licensee's expense where in Licensor's judgement (such judgement to be conclusive) such removal is required in connection with the performance of Licensor's service obligation or the safety of Licensor's employees. Whenever such removal has been made, Licensee will be promptly notified.

33.0 CONSTRUCTION AND MAINTENANCE OF FACILITIES

- 33.01 Licensee shall, at its own expense, make and maintain its pole attachments in a safe condition and in thorough repair, and in a manner reasonably acceptable to Licensor, and so as not to conflict with the use of said poles by Licensor or by other authorized users of said poles, or interfere with other facilities thereon or which may from time to time be placed thereon. Licensee shall, at its own expense, upon written notice from Licensor, relocate or replace its facilities placed on said poles, or transfer them to substituted poles, or perform any other work in connection with said facilities that may be required. Licensor shall give such written notice as is reasonable in the circumstances, provided, however, that in cases of emergency, (Licensor's judgment as to what constitutes an emergency to be conclusive) Licensor may arrange to relocate, remove or replace the attachments placed on said poles by Licensee, transfer them to substituted poles or perform any other work in connection with said facilities that may be required in the maintenance, replacement, removal or relocation of said poles or of the facilities thereon or which may be placed thereon, or for the service needs of Licensor, and Licensee shall reimburse Licensor for the expense thereby incurred. Attachments of Licensee to poles of Licensor, as mentioned herein shall be understood to include attachments of Licensee in space reserved for Licensor, or space which Licensor has the right to use, on poles of other companies with which Licensor now has or may hereafter have agreements for joint use and occupancy; and the use of such space by Licensee shall be subject to the terms and conditions

of the agreements between Licensor and said other companies. Such authorization will not be unreasonably withheld.

- 33.02 Licensee's cable, equipment, and facilities shall be placed in, removed from, relocated in or maintained in Licensor's conduit system only when specific authorization for the work to be performed and approval of the person, firm or corporation selected by Licensee to perform the work, has been obtained in writing in advance from Licensor. Licensor retains the right to specify what, if any work shall be performed by Licensee. Such authorization will not be unreasonably withheld
- 33.03 In each instance where Licensee's cable, equipment, and facilities are to be placed in Licensor's conduit system, Licensor shall specify, among other things, the cable configuration and location of Licensee's cable, equipment, and facilities, the particular duct of the conduit system such cable will occupy, and the location where and manner in which Licensee's cable will enter and exit Licensor's conduit system.
- 33.04 Licensor's manholes shall be opened as reasonably permitted by Licensor's authorized employees or agents. Licensee shall be responsible for obtaining any necessary permits from appropriate governmental authorities to open manholes and to conduct the work operations. Licensee's employees or agents will be permitted to enter or work in Licensor's manholes only when an authorized agent or employee of Licensor is present except as provided in the next paragraph. Licensor's said agent or employee shall have the authority to terminate Licensee's work operations in and around Licensor's manholes if, in the sole discretion of said agent or employee, any hazardous conditions arise or any unsafe practices are being followed by Licensee's employees or agents. Licensee agrees to pay, in accordance with the terms and conditions of APPENDIX I, the full cost of having Licensor's agent or employee present when Licensee's work is being done in Licensor's manholes. The presence of Licensor's authorized agent or employee shall not relieve Licensee of its responsibility to conduct all of its work operations in and around Licensor's manholes in a safe and workmanlike manner. Licensee is responsible for all signage, traffic control, equipment, and personnel necessary to work in Licensor's manholes. All work shall meet Occupational Safety and Health Act (OSHA), and any local or state standards and requirements.
- 33.05 Licensee's employees will be permitted to enter or work in Licensor's manholes and conduit system without an authorized agent or employee of Licensor being present, provided that Licensee's work consists only of routine operations of testing, adjusting, regulating or inspecting Licensee's existing facilities and does not involve any placing, removing, changing or rearranging of Licensee's or Licensor's facilities. In such cases, Licensee shall notify Licensor's designated representative in advance of Licensee's operations as to the type of work to be performed, the time at which it is to be performed and where it is to take place. Licensee shall conduct all such work operation in a safe and workmanlike manner, and in accordance with the terms of this Agreement.
- 33.06 Licensee shall, at its own expense, maintain its buried communication facilities so as not to conflict with the use of the right-of-way by Licensor or other authorized users of the right-of-way. Licensee shall, at its own expense, relocate, change, or replace its facilities or perform any other work in connection with said facilities that may be reasonably required by Licensor or other authorities.

34.0 TERMINATION OF LICENSES

- 34.01 Upon notice from Licensor to Licensee that Licensor has been advised by governmental authority or private property owners that the use of any pole, conduit system, or right-of-way is not authorized and is objected to by such governmental authority or private property owner, as the case may be or that any pole, any conduit system or any right-of-way is to be removed, sold or otherwise disposed of, Licensee shall, if reasonably requested by Licensor, remove its cables, equipment, and facilities at once from the affected pole or poles or shall make arrangements for the removal of its cable, equipment, and facilities from the affected portion of Licensor's conduit system or right-of-way at Licensor's expense. If not so removed, Licensor shall have the right to remove Licensee's cable, equipment, and facilities from Licensor's right-of-way at the cost and expense of Licensee and without any liability thereto. If Licensor deems it is impractical to remove Licensee's cables, equipment or facilities from any right-of-way, they may be abandoned in place.
- 34.02 Licensee may at any time remove its facilities from any pole of Licensor, but shall immediately give Licensor written notice of such removal and surrender of license in the form of a Notification of Surrender (APPENDIX VII) hereto attached and made a part hereof. If Licensee surrenders its license but fails to remove its facilities from Licensor's poles, Licensor shall have the right to remove Licensee's facilities at Licensee's expense without any liability on the part of Licensor for damage or injury to Licensee's facilities. In the event that Licensee's cables, equipment, and facilities shall be removed from any pole as provided by this Agreement, no attachment shall again be made to such pole unless Licensee shall have first complied with all of the provisions of this Agreement as though no attachment had previously been made.
- 34.03 If Licensee desires to terminate its license for the right to occupy any part of Licensor's conduit system, Licensee shall give Licensor written notice of such surrender in the form of a Notification of Surrender (APPENDIX VII) hereto attached and made a part hereof. In such event, Licensee shall make arrangements with Licensor for the removal of Licensee's cables, equipment, and facilities from that part of Licensor's conduit system at Licensee's expense. In the event that Licensee's cables, equipment, and facilities shall be removed from Licensor's conduit system as provided by this Article, no cable, facilities or equipment shall again be placed in that part of such conduit system unless Licensee shall have first complied with all of the provisions of this Agreement as though no cables, equipment, and facilities of Licensee had previously been placed in that part of Licensor's conduit system.
- 34.04 If Licensee desires to terminate its license for the right to occupy any part of the right-of-way, Licensee shall give Licensor written notice of such surrender in the form of a Notification of Surrender (APPENDIX VII) attached hereto and made a part hereof. In such event, Licensee shall make arrangements with Licensor for the removal of Licensee's cables, equipment, and facilities from that part of the right-of-way at Licensee's expense. However, in the event it is impractical to remove Licensee's cable, equipment, and facilities from any right-of-way, they may be abandoned in place.

35.0 EMERGENCY RESTORATION PROCEDURES

- 35.01 In the event of an emergency, restoration procedures may be affected by the presence of Licensee's Attachments. While Licensor shall not be responsible for the repair of damaged Attachments of Licensee (except by mutual written agreement), Licensor shall nonetheless

control access to its poles, conduit systems or right-of-way if the restoration is to be achieved in an orderly fashion.

35.02 Where Licensor and Licensee are involved in emergency restorations, access to Licensor's poles, conduit systems or right-of-way will be controlled by Licensor's Network Construction Managers or their on-site representative according to the following guidelines.

(A) Service Disruptions/Outages

- (1) While exercising its right to first access, Licensor shall make all reasonable efforts to grant access to as many other entities with Attachments as is reasonably safe.
- (2) Where simultaneous access is not possible, Licensor will grant access on first come, first served basis.

(B) Service Affecting Emergencies

- (1) While exercising its right to first access, Licensor shall make all reasonable efforts to grant access to as many other entities with Attachments as is reasonably safe.
- (2) Where Licensor is unable to grant simultaneous access to all other entities with Attachments, access will be granted according to the level of damage to the Attachments of each entity and the likelihood that a given level of damage will result in service disruption. Where the likelihood that a service disruption will result is not clearly discernible, access will be on a first come, first served basis.

35.03 Without limiting any other indemnification or hold harmless provisions of this Agreement, Licensee agrees that any decision by Licensor regarding access to Attachments, or any action or failure to act by Licensor, under this section shall not be the basis for any claim by Licensee against Licensor for any damage to Licensee's Attachments or disruption of Licensee's services, or any other direct or indirect damages of any kind whatsoever incurred by Licensee.

36.0 ABANDONMENT

36.01 Nothing in this Agreement shall prevent or be construed to prevent Licensor from abandoning, selling, assigning, or otherwise disposing of any poles, conduit systems or other Licensor property used for Licensee's Attachments; provided, however, that Licensor shall condition any such sale, assignment, or other disposition subject to the rights granted to Licensee pursuant to this Agreement. Licensor shall promptly notify Licensee of any proposed sale, assignment, or other disposition of any poles, conduit systems or other Licensor property used for Licensee's Attachments.

AGREEMENT TERMS AND CONDITIONS

1.0 SCOPE OF AGREEMENT

- 1.01 The purpose of this Agreement is to set forth the rates, terms, conditions, and procedures under which the Licensor will provide Licensee access to Licensor's poles, ducts, innerducts, conduits, and rights-of-way.
- 1.02 Subject to the provisions of this Agreement, Licensor will issue to Licensee for any lawful communications purpose, revocable, nonexclusive licenses authorizing the attachment of Licensee's cables, equipment, and facilities to Licensor's poles or the placing of Licensee's cables, equipment, and facilities in Licensor's conduit system or within right-of-way owned or controlled by Licensor.
- 1.03 No use, however extended, of Licensor's poles, conduit system or right-of-way nor payment of any fees or charges required under this Agreement shall create or vest in Licensee any ownership or property rights in said poles, conduit system or right-of-way, but Licensee's rights therein shall be and remain a mere license. Nothing herein contained shall be construed to compel Licensor to construct, retain, extend, place, or maintain any facilities not needed for its own service requirements, unless otherwise required by law.
- 1.04 Licensee recognizes that Licensor has heretofore entered into, or may in the future enter into, agreements and arrangements with others which are not party to this Agreement regarding the poles, conduit system and right-of-way covered by this Agreement. Nothing herein contained shall be construed as a limitation, restriction or prohibition against Licensor with respect to such other agreements or arrangements. The rights of Licensee shall at all times be subject to any present or future joint use arrangement between Licensor and any other public utility or government agency.

2.0 DEFINITIONS

- 2.01 "Attachments" - Any attachment to a pole, use of a duct or innerduct, use of a conduit, or using right-of-way owned or controlled by Licensor.
- 2.02 "Attachment Fee" - Fee paid annually per attachment on a pole, or in a duct, innerduct, conduit, or right-of-way.
- 2.03 "Buried Cable" - Cable located below the surface of the ground but not in Licensor's conduit system.
- 2.04 "Conduit System" - Any combination of ducts, innerducts, conduits, manholes, and handholes owned or controlled by Licensor that is a reusable passage or opening in, on, under or through the ground, or a structure such as a building or bridge. The term includes "inner ducts" created by subdividing a duct into smaller channels.
- 2.05 "Hazardous Materials" -

- (A) Any substance, material or waste now or hereafter defined or characterized as hazardous, toxic or dangerous as defined by the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA") of 1980, as amended, and other federal, state, and local health, safety, and environmental laws, ordinances, statutes, and rules, including but not limited to the Occupational Safety and Health Act ("OSHA").
 - (B) Any substance, material or waste now or hereafter classified as a contaminant or pollutant under any law, rules, ordinance, or authority.
 - (C) Any other substance, material or waste, the manufacture, processing, distribution, use, treatment, storage, placement, disposal, removal or transportation of which is now or hereafter subject to regulation under any law, ordinance, statute, rule or regulation of any governmental body or authority.
- 2.06 "Make Ready Work" - All work to prepare Licensor's poles, ducts, innerducts, conduits, rights-of-way, and related facilities for the requested occupancy or attachment of Licensee's facilities but not the actual placement of attachments or administrative activities related to inquiries, verifications, requests or applications.
- 2.07 "Poles"- Licensor owned and poles owned by others to the extent that and for so long as Licensor has the right to permit others to be attached in the communications space.
- 2.08 "Pole Attachment Request" or "PAR" - A written request from Licensee to attach its facilities to Poles, submitted in accordance with this Agreement. With respect to pole attachment agreements in effect prior to the date the Parties executed this Agreement, the term PAR shall be deemed to include Pole attachment requests made by letter or similar document.
- 2.09 "Right-of-Way" - Right-of-way owned or controlled by Licensor. It does not include attachment or use of cables, poles, equipment or facilities located on a particular right-of-way. It may include private easement, or in certain instances public right-of-way granted by a governmental authority or a utility easement such as in a subdivision or development.

3.0 TERM OF AGREEMENT

- 3.01 This Agreement shall become effective upon its execution and if not terminated in accordance with the provisions of other Articles hereof, shall continue in effect for a term of not less than three (3) years, provided, however, that at any time after the first year of said term the rates, fees and charges set forth may be increased or decreased by written notice from Licensor to Licensee on a nondiscriminatory basis with respect to similar rates, fees and charges of other similar licensees.
- 3.02 Either Party may terminate this Agreement with at least a (6) six month written notice to the other Party.
- 3.03 Upon termination of the Agreement in accordance with any of its terms, all outstanding licenses in connection therewith shall terminate and shall be surrendered and Licensee shall within 60 days of date of termination remove all cables, equipment and facilities at the cost and expense of Licensee. If Licensor in its sole discretion, deems it is impractical to remove Licensee's cable, equipment and facilities from Licensor's rights-of-way, they may be abandoned in place.

4.0 LEGAL AUTHORITY

- 4.01 Licensee will obtain from public authorities and private owners of property any and all permits, franchises, licenses and grants necessary for the lawful exercise of any license granted hereunder

5.0 APPLICABLE LAW

- 5.01 This Agreement, and the rights and obligations contained in it, shall be governed and construed under the laws of the state in which the attachments hereunder are to be located.

6.0 SUBSEQUENT LAW

- 6.01 The terms and conditions of this Agreement shall be subject to any and all applicable laws, rules, regulations or guidelines now in effect and that subsequently may be prescribed by any federal, state or local governmental authority. To the extent required by any such subsequently prescribed law, rule, regulation or guideline, the Parties agree to modify, in writing, the affected term(s) and conditions(s) of this Agreement to bring them into compliance with such law, rule, regulation or guideline. Should any term of this Agreement be determined by a court or agency with competent jurisdiction to be unenforceable, all other terms of this Agreement shall remain in full force and effect.

7.0 DISCLAIMER OF WARRANTIES

- 7.01 Except as specifically set forth in this Agreement, Licensor makes no warranties, express or implied, including, but not limited to, any implied warranties of merchantability or fitness for a particular purpose.

8.0 LICENSE NOT EXCLUSIVE

- 8.01 Nothing herein contained shall be construed as a grant of any exclusive license, right or privilege to Licensee. Licensor shall have the right to grant, renew and extend rights and privileges to others not parties to this Agreement, by contract or otherwise, to use any poles, conduit system or right-of-way covered by this Agreement, under such terms and conditions, as Licensor shall prescribe.

9.0 ASSIGNMENT OF RIGHTS

- 9.01 Licensee shall not assign; transfer or sublet the privileges hereby granted, or sell, lease or otherwise permit the use of its facilities on or any part thereof (all of the foregoing being "Transfers"), without prior consent in writing of Licensor which consent shall not be unreasonably withheld, delayed or conditioned; provided, however, that either Party may so Transfer its rights and obligations under this Agreement without such consent to (i) any entity said Party, directly or indirectly, controls, is controlled by or is under common control with or (ii) any entity acquiring all or substantially all of said Party's assets or equity, by providing written notice to the other Party of such Transfer. Any attempted Transfer that is not permitted under this Section 9.01 is void *ab initio*.

9.02 Subject to the provisions of this Agreement, this Agreement shall extend to and bind the successors and authorized assigns of the Parties hereto.

10.0 LIABILITY AND DAMAGES

10.01 Licensor reserves to itself, its successors and assigns, the right to maintain its poles, conduit system and right-of-way and to operate its facilities thereon in such manner as will best enable it to fulfill its own service requirements. Licensor shall not be liable to Licensee for any interruption to service of Licensee or for interference with the operation of the cables, equipment or facilities of Licensee arising in any manner out of the use of Licensor's poles, conduit system and right-of-way except caused by Licensor's sole negligence, willful misconduct or material breach of this Agreement, in which case Licensor's liability shall be limited to the reasonable cost of repair of Licensee's damaged cable, equipment or facilities, if any.

10.02 Licensee shall exercise special precautions to avoid damaging the cables, poles, conduits, right-of-way equipment and facilities of Licensor and of other licenses and hereby assumes all responsibility for any and all loss, damages, costs and expenses. Licensee shall make an immediate report to Licensor of the occurrence of any such damage and hereby agrees to reimburse the respective owners for the expense incurred in making repairs.

10.03 Licensee shall indemnify and hold harmless Licensor against any and all claims, demands, causes of action, damages, costs or liabilities of every kind and nature whatsoever, except to the extent caused by Licensor's negligence or willful misconduct, which may arise out of or be caused by:

- (A) The erection, maintenance, presence, use or removal of Licensee's cable, equipment, and facilities on Licensor's poles, and within Licensor's conduit system and right-of-way
- (B) Any act of Licensee on or in the vicinity of Licensor's poles, conduit system and right-of-way, or
- (C) Any interruption, discontinuance, or interference with Licensee's service to any of its subscribers occasioned or claimed to have been occasioned by any action of Licensor pursuant to or consistent with this Agreement. Licensee shall, upon demand and at its own sole risk and expense, defend any and all suits, actions or other legal proceeding brought or instituted against Licensor on any such claim, demand or cause of action, and shall pay and satisfy any judgment or decree rendered against Licensor therein, and Licensee shall reimburse Licensor for any and all legal expense incurred by Licensor in connection therewith. Licensee shall also indemnify, protect and hold harmless Licensor from any and all claims and demands of whatever kind which arise directly or indirectly from the operation of Licensee's facilities including taxes, special charges by others, claims and demands for damages or loss for infringement of copyright, for libel and slander for unauthorized use of television broadcast programs, and for unauthorized use of other program material, and from and/or against all claims and demands for infringement of patents with respect to the manufacturer, use and operation of Licensee's equipment whether arising from the use of Licensee's equipment in combination with Licensor's poles, conduit system, right-of-way or otherwise.

10.04 Licensee agrees to comply under the Workmen's Compensation Laws of the state in which attachments are to be located hereunder, and also agrees to cause every subcontractor of

Licensee to comply with and qualify under said laws, and shall furnish copies of Certificates demonstrating such compliance to Licensor prior to commencement of the work.

11.0 DEFAULT AND REMEDIES

11.01 In addition to Material Defaults defined anywhere else in this Agreement, any one of the following shall be deemed the occurrence of a Material Default under this Agreement:

- (A) Failure by Licensee to pay any fee or other sum required to be paid under the terms of this Agreement and such default continues for a period of thirty (30) calendar days after written notice thereof to Licensee.
- (B) Failure by either Party to perform or observe any other term, condition, covenant, obligation, or provision of this Agreement and such default continues for a period of thirty (30) business days after written notice thereof from the other Party (provided that if such default is not curable within a thirty (30) business day period, the period will be extended if the Party substantially commences to cure such default and proceeds diligently thereafter to effect such cure).
- (C) The filing of any tax or mechanic's lien against Poles because of any act or omission by Licensee which is not bonded or discharged within thirty (30) calendar days of the date Licensee receives notice that such lien has been filed;
- (D) Licensor or Licensee's voluntary or involuntary bankruptcy;
- (E) Licensee's knowing use or maintenance of its Attachments in violation of any law or regulation, or in aid of any unlawful act or undertaking;
- (F) If any authorization which may be required of Licensee by any governmental or private authority for the placement, operation, or maintenance of Licensee's Attachments is denied or revoked.

11.02 In the event of a Material Default and subject to any other applicable provision of this Agreement, the Non-defaulting Party, without any further notice to the Defaulting Party (except where expressly provided for below or required by applicable law), may do any one or more of the following:

- (A) Perform on behalf and at the expense of the Defaulting Party, any obligation of the Defaulting Party under this Agreement which the Defaulting Party has failed to perform and of which the Non-defaulting Party shall have given the Defaulting Party notice, the cost of which performance shall be paid by the Defaulting Party to the Non-defaulting Party upon demand;
- (B) Terminate this Agreement by giving sixty (60) business days written notice of such termination to Licensee and remove Licensee's Attachments and store Licensee's facilities in a public warehouse or elsewhere at the expense of and for the account of Licensee without Licensor being deemed guilty of trespass or conversion, and without Licensor becoming liable for any loss or damages to Licensee occasioned thereby; or

- (C) Exercise any other legal or equitable right or remedy that the Non-defaulting Party may have.
- 11.03 The Defaulting Party shall repay to the Non-defaulting Party upon demand any costs and expenses incurred by the Non-defaulting Party (including, without limitation, reasonable attorneys' fees) in successfully enforcing this Agreement.
- 11.04 Upon termination of this Agreement by the Non-defaulting Party, the Defaulting Party shall remain liable to the Non-defaulting Party for any and all fees, other payments and damages which may be due or sustained in accord with this Agreement prior to such termination, all reasonable costs, fees and expenses, including, without limitation, reasonable attorney' fees incurred by the Non-defaulting Party in pursuit of its remedies hereunder.
- 11.05 All rights and remedies of the Non-defaulting Party set forth in this Agreement shall be cumulative and none shall exclude any other right or remedy, now or hereafter allowed by or available under any statute, ordinance, rule of court, or the common law, either at law or in equity, or both.

12.0 INDEMNIFICATION

- 12.01 Licensee shall compensate Licensor for the full actual loss, damage or destruction of Licensor's property that in any way arises from or is related to this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation, or maintenance of Licensee's Attachments).
- 12.02 Each party agrees to defend, indemnify, protect and hold harmless the other and the other's officers, directors, employees, shareholders, successors, assigns, agents, affiliates, representatives, partners, and contractors from and against any and all third party claims, actions, administrative proceedings (including, without limitation, informal proceedings), judgments, damages, penalties, fines, cost, liabilities, interests, or loss, including, without limitation, reasonable attorneys' fees and expenses, consultant fees, and expert fees, together with all other costs and expenses of any kind or nature suffered by or asserted against the indemnified party in any way arising out of or connected with this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation or maintenance of Licensee's facilities, unless caused by the sole negligence or willful misconduct on the part of Licensor or Licensor's affiliates, agents, officers, employees and assigns). Each party expressly assumes all liability for actions by its affiliates, agents, officers, employees, or its contractors and expressly waives any immunity from the enforcement of this indemnification provision that might otherwise be provided by workers' compensation law or by other state or federal laws.
- 12.03 Without limiting any of the foregoing, Licensee assumes all risk of, and agrees to relieve Licensor of any and all liability for, loss or damage (and the consequences of loss or damage) to any facilities placed on Licensor's property and any other financial loss sustained by Licensee, except to the extent caused by the negligence or willful misconduct on the part of Licensor or Licensor's agents, officers, employees, and assigns.

- 12.04 Without limiting the foregoing, Licensee expressly agrees to indemnify, defend, and hold harmless Licensor and Licensor's agents, officers, employees and assigns from any and all claims asserted by end users/customers of Licensee in any way arising out of or in connection with this Agreement or Licensee's facilities, except to the extent caused by the negligence or willful misconduct on the part of Licensor or Licensor's agents, officers, employees, and assigns. or its contractors.
- 12.05 Notwithstanding anything to the contrary in this Agreement, Licensee further shall indemnify and hold harmless Licensor, its agents, officers, employees, and assigns from and against any claims, liabilities, losses, damages, fines, penalties, and costs (including, without limitation, reasonable attorneys' fees) whether foreseen or unforeseen, which the indemnified parties suffer or incur because of:
- (A) Any discharge of hazardous waste resulting from acts or omissions of Licensee or Licensee's predecessor in interest;
 - (B) Acts or omissions of Licensee, its agents, employees, Licensees, or representatives in connection with any cleanup required by law, or
 - (C) Failure of Licensee to comply with Environmental, Safety and Health Laws.
- 12.06 In no event shall either Party be liable to the other for any special, consequential or indirect damages (including, without limitation, lost revenues and lost profits) arising out of this Agreement or any obligation arising hereunder, whether in an action for or arising out of breach of contract, or otherwise.
- 12.07 Licensee shall indemnify, protect, and hold harmless Licensor from and against any and all claims for libel and slander, copyright and/or patent infringement arising directly or indirectly by reason of installation of Licensee's equipment on Licensor Poles, Conduit Systems or Right-of Way pursuant to this Agreement.

13.0 COMPLIANCE WITH LAW

- 13.01 Notwithstanding anything to the contrary in this Agreement, each Party shall ensure that any and all activities it undertakes pursuant to this Agreement shall comply with all applicable laws, including, without limitation, all applicable provisions of:
- (A) Workers' compensation laws
 - (B) Unemployment compensation laws
 - (C) The Federal Social Security Law
 - (D) The Fair Labor Standards Act, and
 - (E) All laws, regulations, rules, guidelines, policies, orders, permits and approvals or any governmental authority relating to environmental matters and/or Occupational Safety and Health Act ("OSHA").

14.0 INSURANCE

14.01 Licensee shall obtain and maintain, in full force and effect at all times, during operations covered by this Agreement, such minimum insurance as will cover the obligations and liabilities of said Party, its agents, and its employees which may arise from the operations under this Agreement. Insurance shall have limits of not less than:

(A) Commercial General Liability policy of minimum limits of:

| | |
|---|--------------------------------|
| General Aggregate | \$ 2,000,000 per policy period |
| Products/Completed Operations Aggregate | \$ 2,000,000 per policy period |
| Personal Injury/Advertising | \$ 2,000,000 per occurrence |
| Each Occurrence | \$ 2,000,000 per occurrence |
| Fire Legal Liability | \$ 50,000 any one fire |

14.02 The policy will be endorsed to show the above aggregate limits applying to "each" job site or, as an alternative, the General Aggregate will be increased to \$4,000,000 per policy period. Policy will also specifically state the coverage applies to all operations conducted by the respective Party, its employees, or agents on behalf of that Party's Corporation or subsidiary.

14.03 Where the performance of the work involves structural property, underground property, or blasting, each Party's Commercial General Liability insurance policy shall provide coverage to the insured for legal liability arising from operations under this Agreement for property damage:

- (A) arising out of blasting,
- (B) arising out of collapse of, or structural injury to, any building or structure or
- (C) To underground facilities and utilities.

14.04 Other general liability forms are acceptable in lieu of the Commercial General Liability Form, however, they are not to be used without written approval from the Company's Risk Management Department, 4001 Rodney Parham Road, AR 72212. However, such written approval shall not be unreasonably withheld.

(A) Business Automobile Liability policy with minimum limits of:

| | |
|-----------------------|---------------------------|
| Bodily Injury | \$2,000,000 per accident |
| Property Damage | \$ 2,000,000 per accident |
| OR | |
| Combined Single Limit | \$ 2,000,000 per accident |

The policy will be issued using symbol "1 - any auto" coverage.

(B) Workers Compensation:

Part 1 - Medical Benefits Statutory

Part 2 - Employer's Liability as indicated:

| | |
|---------------------------|--------------------------|
| Bodily Injury by Accident | \$ 100,000 each accident |
|---------------------------|--------------------------|

| | |
|--------------------------|--------------------------|
| Bodily Injury by Disease | \$ 100,000 each employee |
| Bodily Injury by Disease | \$ 500,000 policy limit |

- 14.05 The policy will show the state in which operation on behalf of the Party and/or subsidiary is being conducted. For operations conducted within monopolistic (state fund) states, the Party will furnish a certificate of compliance from the appropriate state fund administrator.
- 14.06 In each and every policy in 14.04A and 14.04B, the other Party's Corporation and its subsidiaries shall be named an "additional insured" with respect to activities performed on behalf of the Party's Corporation and its subsidiaries.
- 14.07 Coverage provided by the policies listed in this paragraph will be issued by an insurance company, licensed in the state in which operations on behalf of the Party are to be conducted. It is acceptable to use both primary and excess/umbrella policies to obtain necessary limits.
- 14.08 Licensee will furnish to the other Party, a certificate evidencing insurance coverage under subparagraphs 14.04-A, and 14.04-B. Such certificate shall provide for a thirty-day prior notice to the other Party of any cancellation or material changes in coverage and shall be signed by a legal representative of the issuing insurance company. The certificate of insurance shall be sent to the person identified at paragraph 25.03.
- 14.09 The provisions of sub-paragraphs 14.04-A and 14.04-B shall also apply to all sub-Licensees, and Licensee shall be responsible for their compliance herewith.

15.0 NON-WAIVER OF TERMS AND CONDITIONS

- 15.01 Failure to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

16.0 LICENSOR'S LIEN

- 16.01 Should Licensor under any Article of this Agreement remove Licensee's cable, equipment or facilities from Licensor's poles, conduit system or right-of-way, Licensor will deliver to Licensee the cable, equipment or facilities so removed upon payment by Licensee of the cost of removal, storage and delivery, and all other amounts due Licensor hereunder. Licensor is hereby given a lien on Licensee's cable, equipment or facilities within Licensor's conduit system or right-of-way or attached to Licensor's poles or removed therefrom, with power of public or private sale, to cover any amounts due Licensor under the provisions of this Agreement. Such liens shall not operate to prevent Licensor from pursuing, at its option, any other remedy in law, equity or otherwise, including any other remedy provided for in this Agreement.

17.0 SCHEDULE OF FEES AND CHARGES

- 17.01 Licensee may be required to furnish bond or other security satisfactory to Licensor, in a reasonable initial amount to be determined by Licensor and provided by Licensee at the time Licensee submits Exhibit B to Licensor's Attachment Application Procedures to guarantee the payment of any such sums which may become due to Licensor arising out of this Agreement including, but not limited to fees due hereunder or charges for work performed for the benefit of Licensee under this Agreement, including the removal of Licensee's facilities upon termination of this Agreement by any of its provisions or upon

termination of any License issued hereunder. Bond to be sent to person identified at paragraph 25.03. Bond is to be equal to one (1) year's annual rental fees.

17.02 The fees, rates and charges set forth in APPENDIX I or elsewhere in this Agreement are effective during the term of this Agreement subject to Section 3.01 and shall be due and payable by Licensee as set forth herein.

17.03 FEES:

All rates, charges and fees set forth in this Agreement and as shown in APPENDIX I (Schedule of Rates, Fees, and Charges) shall be subject to all applicable federal, state, and local laws, rules, regulations and commission orders.

(A) Computation:

(1) Pole and Anchor Attachment Fees:

(a) For the purpose of computing the annual pole attachment fee hereunder, for calendar years subsequent to a first partial calendar year, said fee shall be based upon the number of poles and anchors, to which attachments are actually made, as of December 31 of the preceding year, multiplied by the per attachment pole attachment fee rate set forth on APPENDIX I. For a first partial calendar year, the pole attachment fee shall be prorated as necessary, on a daily basis from the date payment is due in accordance with Exhibit B of Licensor's Attachment Application Procedures.

(b) For billing purposes, a single pole attachment includes the point of attachment and all facilities located in the usable space on the pole in the space assigned to Licensee (typically six inches above and six inches below the point of attachment). If Licensee occupies more than one usable space on a pole, separate attachment fees shall apply to each space occupied.

(2) Conduit Occupancy Fees :

(a) For the purpose of computing the total conduit occupancy fee due hereunder, the duct feet of conduit shall be measured from the center to the center of manholes; or from the center of a manhole to the end of the duct; from the center of a manhole to the property line if the duct is connected at the property line to a duct owned and controlled by a third-party property owner; or the length of a conduit from pole to pole; or isolated lengths of conduit not attached to any structure (such as involved with buried cable) which will be occupied by Licensee's cable.

(b) For billing purposes each inner duct will be billed the half duct fee. If two or more facilities occupy a duct that has not been subdivided, the half duct fee will be charged for each facility. The half duct fee will apply when others place the Licensee facility in a duct that has not been subdivided only if the facility does not render the duct unusable.

- (3) Right-of-Way Occupancy Fees:
 - (a) This fee will be negotiated on a case by case basis. There is no established per foot rate.

- (B) Payment Date:
 - (1) If this Attachment License Agreement becomes effective on or prior to June 30, all attachment and occupancy fees for the remainder of that first partial calendar year shall be due and payable at the time required under Appendix I of Licensor's Attachment Application Procedures .

 - (2) If an Attachment License Agreement becomes effective on or after July 1, all attachment and occupancy fees for the remainder of that current partial calendar year as well as the full upcoming calendar year shall be payable at the time required under Appendix I of Licensor's Attachment Application Procedures.

 - (3) On an annual basis, all attachment and occupancy fees not previously paid are to be paid in advance, on the 31st day of January of each year or within 30 days of receipt of invoice. Failure to pay such fees within 30 days of the annual due date shall constitute a Material Default of this Agreement.

- (C) Termination of License:
 - (1) Upon termination or surrender of a license granted hereunder, no refund of any attachment or occupancy fee shall be made.

17.04 OTHER CHARGES:

- (A) Computation:
 - (1) All charges for inspections, engineering, or rearrangements of Licensee's facilities from Licensor's poles or conduit and, without limitation, any other work performed for Licensee shall be based upon the full cost and expense, including reasonable overhead, to Licensor for performing such work for Licensee. The cost to Licensee shall be determined in accordance with the regular and customary methods used by Licensor in determining such costs.

 - (2) The charge for replacement of poles shall include the entire non-betterment cost to Licensor including the increased cost of larger poles, sacrificed life value of the poles removed, cost of removal, less any salvage recovery and the cost of transferring Licensor's facilities from the old to the new poles.

 - (3) All other attachment or occupancy related inquiry, verification, application, administrative and miscellaneous rates, fees and charges shall be calculated and paid in accordance with APPENDIX I and/or Licensor's Attachment Application Procedures and Attachments thereto.

- (B) Payment Date:

- (1) All bills for such other charges for work performed by Licensor shall be payable upon presentment to Licensee, and shall be deemed delinquent if not paid within 30 days after presentment to Licensee.

18.0 DISPUTE RESOLUTION

18.01 Except in the case of:

- (A) A suit, action, or proceeding by one Party to compel the other Party to comply with its obligation to indemnify the other Party pursuant to this Agreement, or
- (B) A suit, action or proceeding to compel either Party to comply with the dispute resolution procedures set forth in this section, the Parties agree to use the following procedure to resolve any dispute, controversy, or claim arising out of or relating to this Agreement or its breach.

18.02 At the written request of a Party, each Party shall designate a knowledgeable, responsible representative to meet and negotiate in good faith to resolve any dispute, controversy, or claim arising under this Agreement. The Parties intend that these negotiations be conducted by non-lawyer, business representatives. The substance of the negotiations shall be left to the discretion of the representatives. Upon mutual agreement, the representatives may utilize other alternative non-binding dispute resolution procedures such as mediation to assist in the negotiations. Discussions and correspondence between the representatives for the purposes of these negotiations shall be treated as confidential, undertaken for purposes of settlement, shall be exempt from discovery and production, and shall not be admissible in any subsequent proceeding without the concurrence of all Parties. Documents identified in or provided during such negotiations, which are not prepared for purposes of the negotiations, shall not be so exempt and may, if otherwise admissible, be admitted as evidence in any subsequent proceeding.

18.03 If a resolution of the dispute, controversy or claim is not reached within ninety days of the initial written request referred to in 18.02, the dispute, controversy, or claim may be filed with the State Public Service Commission for review and determination, provided the party invoking the Commission's intervention process has in good faith negotiated, or attempted to negotiate, with the other Party pursuant to 18.02.

18.04 Each Party shall bear its own costs, including attorneys' fee, incurred in connection with any of the foregoing procedures. A Party-seeking discovery shall reimburse the responding Party the cost of reproducing documents (to include search time and reproduction time costs). The fees associated with any arbitration, including the fees of the arbitrator, shall be divided equally between the parties.

19.0 ENTIRE AGREEMENT

19.01 This Agreement and Licensor's related Attachment Application Procedures cancels and supersedes all previous agreements whether written or oral, except for any sums due thereunder, between Licensor and Licensee with respect to the attachment of Licensee's cable, equipment, and facilities to Licensor's poles or the placing Licensee's cable, equipment or facilities in Licensor's conduit system or right-of-way; and there are no other provisions, terms or conditions to this Agreement except as expressed herein. All currently effective licenses heretofore granted pursuant to such previous agreements shall continue in effect subject to the terms and conditions of this Agreement.

19.02 The terms and conditions of this Agreement supersede all prior oral or written understandings between the Parties and constitute the entire Agreement between them concerning the subject matter of this Agreement. There are no understandings or representations, express or implied, not expressly set forth in this Agreement or in Licensor's related Attachment Application Procedures. This Agreement shall not be modified or amended except by writing signed by the Party to be charged. This Agreement is only applicable to pole applications submitted for attachment to **Windstream Kentucky East, LLC** facilities in the **State of Kentucky**.

GENERAL OPERATING ROUTINE

20.0 ATTACHMENT, USE AND/OR OCCUPANCY REQUEST PROCESS

20.01 There is a multi-step pole attachment or duct, innerduct, conduit or right-of-way use and/or occupancy application process and fee determination process that the Licensee may begin upon the execution of this Agreement. It is set forth below and in Licensor's related Attachment Application Procedures.

21.0 POLE ATTACHMENT REQUESTS (PAR)

21.01 The following process can begin upon the execution of this agreement. The steps are:

- (A) Pole Attachment Quote Preparation: Licensee shall submit a Pole Attachment Request Form (Exhibit B to Licensor's related Attachment Application Procedures), which may be reasonably revised from time to time by Licensor at its sole discretion, to Licensor which will include a drawing of the proposed route and contact information (name, telephone, facsimile, and email information), and all required fees, as listed in and computed in accordance with APPENDIX I, which may be changed from time to time by Licensor to remain consistent with prevailing costs, of this Agreement. These fees consist of administrative as well as other actual costs reasonably incurred in researching the requested route. Once Licensor receives the aforementioned specific attachment information and the fee from Licensee, Licensor will report on the Poles along the route, any required make-ready work, the costs and schedule for such make-ready work, and any other requirements Licensee must satisfy prior to installing its facilities. If during this process, Licensor determines any lawful reason for denying Licensee's application, Licensor will so inform Licensee. Pole attachment quotes will be provided within thirty (30) business days for standard requests. Non-standard quantities of pole attachments and distances will be addressed on an individual case basis, and in a commercially reasonable period.
- (B) Pole Attachment Order: Upon completion of the work identified above, Licensor will inform Licensee if Licensor will provide Licensee a Pole Order Form (Appendix VI to the Licensor's related Attachment Application Procedures) which may be revised from time to time by Licensor at its sole discretion, containing estimated make-ready cost (if any), annual recurring charges and any additional information necessary for Licensee to proceed with attaching its facilities to Licensor's Poles. If Licensee desires to attach to Licensor's poles, and pole make-ready work is required, Licensee shall pay the estimated make-ready cost prior to Licensor beginning any work. Actual costs incurred by Licensor in performing the make-ready work will be applied to the estimated make-ready costs. Any reasonable costs in excess of the estimated cost will be billed to Licensee. Any payment of the estimated costs in excess of actual pole attachment make-ready costs will be returned to Licensee. If Licensee declines to proceed, all fees incurred to date will be billable to Licensee by Licensor.

21.02 Licensee has thirty (30) days to pay the estimated make-ready work or cancel the PAR.

21.03 Upon completion of the make-ready work, the receipt of all payments and fees, and the signing of this Agreement, an "Approved" Attachment I shall be returned to the Licensee. At that time Licensee will be considered to have been granted a License with respect to the poles approved in the PARON and may attach to Licensor's facilities.

22.0 SURVEYS AND INSPECTIONS OF LICENSEE'S FACILITIES

21.01 Licensor reserves the right to inspect each new installation or work operation of Licensee on or within Licensor's facilities. The making of inspections or the failure to make inspections shall not relieve Licensee of any responsibility, obligation or liability imposed by this Agreement.

23.0 ISSUANCE OF LICENSES

23.01 Before Licensee shall have a right to attach to any pole of Licensor, Licensee shall make application for and receive a revocable, nonexclusive license therefore in the form of an approved Application for Pole License (APPENDIX VI and Exhibit B to Licensor's related Attachment Application Procedures).

23.02 Before Licensee shall have the right to place any cable, equipment or facilities within any conduit system or right-of-way of Licensor, Licensee shall make application for an receive a revocable, nonexclusive license therefore in the form of an approved Application for Conduit or Right-of-Way License (APPENDIX IV and Exhibit B to Licensor's related Attachment Application Procedures), hereto attached and made a part hereof.

23.03 Any license granted hereunder for attachment to Licensor's poles shall terminate without further notice to Licensee as to individual poles covered by the license to which Licensee has not attached within ninety (90) days from the date that Licensor has notified Licensee that such poles are available for attachment of the operating facilities of Licensee, unless Licensor, in the exercise of its sole discretion, agrees to extend said period at the request of Licensee.

23.05 Any license granted hereunder for placement of Licensee's facilities in Licensor's conduit system shall terminate without further notice to Licensee as to individual sections of Licensor's conduit system covered by the license in which Licensee has not placed its facilities within ninety (90) days from the date that Licensor has notified Licensee that such sections of the conduit system are available for the placement of operating facilities of Licensee, unless Licensor, in the exercise of its sole discretion, agrees to extend said period at the request of Licensee.

24.0 AUTHORITY TO PLACE ATTACHMENTS

24.01 Before any attachments or placement of facilities Licensee shall submit evidence that Licensee has the authority to maintain Attachments within public rights-of-way or on private right-of-way or on private property. Licensee shall be solely responsible for obtaining all licenses, authorizations, permits and consents from federal, state and local authorities or private land owners that may be required to place and maintain facilities on Licensor's poles or within Licensor's conduit, duct or right-of-way.

25.0 NOTICES (OF MODIFICATION OR ALTERATION OF POLES)

25.01 In the event Licensor plans to modify or alter any Licensor Poles upon which Licensee has placed Attachments, Licensor, except in emergency situations, shall provide Licensee written notice of the proposed modification or alteration at least ninety (90) business days prior to the time the proposed modification or alteration is scheduled to take place. Should Licensee decide to modify or alter Licensee's Facilities on Poles, Licensee shall so notify Licensor in writing at least ninety (90) business days prior to the day the work is to begin. In such event, Licensee shall bear a proportionate share of the total costs incurred by Licensor to make Licensor Poles accessible. Licensee's proportionate share of the total cost shall be based on the ratio of the amount of new space occupied by Licensee to the total amount of new space

occupied by all of the parties joining in the modification. Licensee is not responsible for any costs of Licensor's modifications or alterations of its Poles.

- 25.02 In the event Licensor is required to move the location of, or replace, any Licensor Pole(s) for reasons beyond its control, Licensee concurrently shall relocate Licensee's Attachments. Licensee shall be solely responsible for the costs of the relocation of Licensee's Attachments. When it is mutually agreed that it is in the best interest of Licensor and Licensee, Licensor will, after proper notification has been provided, transfer Licensee's Attachments at the same time that Licensor transfers its Attachments. The rate charged for these transfers is listed in this Agreement (APPENDIX I). The rate for transfers may be adjusted by Licensor from time to time to remain consistent with prevailing costs.
- 25.03 Notices under this Agreement may be given and shall be deemed to have been given, by posting the same in first class mail to Licensee as follows:

LICENSOR:

26.0 REQUIREMENTS AND SPECIFICATIONS FOR ATTACHMENT TO POLES

26.01 Licensee's cables, equipment, and facilities shall be placed and maintained in accordance with the requirements and specifications attached hereto and as set forth in Licensor's related Attachment Application Procedures and made a part hereof, and in accordance with the requirements and specifications of the National Electric Safety Code (most recent edition) and the National Electric Code (most recent edition), and in compliance with any other rules or orders now in effect or that may hereafter be issued by any state utility commission or other authority having jurisdiction.

27.0 PLACEMENT OF ATTACHMENTS

27.01 Licensee shall, at its own expense, place and maintain and replace its Attachments on Licensor's Poles in accordance with:

- (A) Such reasonable requirements and specifications as Licensor shall from time to time prescribe in writing in Licensor's Attachment Application Procedures or otherwise,
- (B) In compliance with any rules or orders now in effect or that hereafter may be issued by any regulatory agency or other authority having jurisdiction, and
- (C) All currently applicable requirements and specifications of the National Electrical Safety Code, National Electric Code, most current edition or any amendment or revision of said Code. Licensee agrees to comply, at its sole risk and expense, with all specifications hereto, as may be revised from time to time by Licensor. Licensor will provide supervision at Licensee's expense if Licensor believes it is required.

27.02 Licensee's Facilities shall be tagged at maximum intervals of 300 feet so as to identify Licensee as the owner of the Facility. The tags shall be of sufficient size and lettering so as to be easily read from ground level.

28.0 MODIFICATIONS, ADDITIONS OR POLE REPLACEMENTS AND REARRANGEMENTS

28.01 Licensee shall not modify, add to, or replace facilities on any pre-existing Attachment on an Licensor Pole without first notifying Licensor in writing of the intended modification, addition or replacement at least thirty (30) business days prior to the date the activity is scheduled to begin. The required notification shall include:

- (A) The date the activity is scheduled to begin,
- (B) A description of the planned modification, addition, or replacement,
- (C) A representation that the modification, addition, or replacement will not require any space other than the space previously designated for Licensee's Attachments, and
- (D) A representation that the modification, addition, or replacement will not impair the structural integrity of the Poles involved.

- 28.02 Should Licensor determine that the modification, addition, or replacement specified by Licensee in its notice will require more space than that allocated to Licensee or will require the rearrangements of, reinforcement of, replacement of, or an addition of support equipment to the Poles involved in order to accommodate Licensee's modification, addition, or replacement, Licensor will so notify Licensee, whereupon Licensee will be required to submit a PAR in compliance with this Agreement in order to obtain authorization for the modification, addition, or replacement of its Attachments.
- 28.03 Should Licensee request Licensor to expand capacity or purchase additional plant, Licensee agrees to pay all reasonable costs. If Licensor or another party that has been granted a license joins in the request and will benefit from the expansion or purchase, Licensee agrees to pay a percentage of all costs proportionate to Licensee's share of the benefit received from the expansion or purchase.
- 28.04 When multiple applications, including application of Licensee, are received by Licensor with respect to any pole which must be replaced or rearranged to provide additional space prior to commencement of the work on that pole a Transfer Attachment Fee may be charged. Licensor will equitably prorate to the extent that it is practical between Licensee and other applicants for the pole space, the common expenses of engineering, rearrangement, and replacement, if any, which result from the processing of multiple applications. Licensee shall be bound by Licensor's determination as to any such pro-ration of Transfer Attachment Fee to Licensee.

29.0 UNAUTHORIZED ATTACHMENTS

- 29.01 If any cable, equipment or facilities of Licensee shall be found on a pole or within a conduit or right-of-way for which no license is outstanding, Licensor, without prejudice to its other rights or remedies under this Agreement or otherwise, may:
- (A) Impose a charge, and
 - (B) Require Licensee to remove such cable, equipment or facilities forthwith or Licensor may remove them without liability and the expense of removal shall be borne by Licensee. For the purpose of determining the charge, Licensee shall pay liquidated damages that will not exceed an amount equal to the annual pole attachment fee for the number of years the unauthorized attachments have existed (or, if that cannot be determined, the number of years since the most recent inventory or five years, whichever is less), plus interest at a rate set for that period by the IRS for individual underpayments pursuant to Section 6621 of the IRS Code. Any such charge imposed by Licensor shall be in addition to its rights to any other sums due and payable, including without limitation the actual costs of any audit or survey which established the existence of the unauthorized attachments and to any claims to said fees or said unlicensed use shall be deemed as a ratification or the licensing of the unlicensed use, and if any license should subsequently be issued, after application and payment of the application fee therefore, said license shall not operate retroactively or constitute a waiver by Licensor of any of its rights or privileges under this Agreement or otherwise.
- 29.02 For purposes of this section, an unauthorized Attachment shall include, but not limited to:

- (A) An Attachment to a Pole which is not identified in any PARON (APPENDIX VI) issued in accordance with this Agreement;
- (B) An Attachment that occupies more space than that allocated to Licensee By Licensor;
- (C) An attachment that is not placed in accordance with the provisions of this Agreement or the appropriate PARON (APPENDIX VI) issued pursuant to this Agreement, unless Licensee can demonstrate to Licensor's reasonable satisfaction that said misplacement is not due to any act or omission of Licensee or Licensee's agents;
- (D) An addition or modification by Licensee to its pre-existing Attachment(s) that impairs the structural integrity of the involved Licensor Pole(s).
- (E) An Attachment that consists of facilities owned or controlled by, and for the use of a Party other than Licensee.

29.03 Once Licensor has notified Licensee of an unauthorized attachment. Licensee can submit a PAR to request an authorized attachment. A PAR submitted per this provision will be treated like any other PAR subject to this Agreement. Licensee will be responsible for all fees associated with a PAR (as identified in this Agreement). If a PAR is not received by Licensor within ten (10) business days of Licensee's receipt of an unauthorized attachment notification, Licensee has sixty (60) business days from the date of its receipt of the initial unauthorized attachment notification to vacate the Pole.

30.0 FAILURE TO PLACE ATTACHMENTS

30.01 Once Licensee has been issued a PARON (APPENDIX VI), Licensee shall have ninety (90) calendar days from the date of the PARON (APPENDIX VI) to begin the placement of its Attachments on the Licensor Poles covered by the PARON (APPENDIX VI). If Licensee has not begun placing its Attachments within that ninety-(90) calendar day period, Licensee shall so advise Licensor with a written explanation for the delay. If Licensee fails to advise Licensor of its delay, with a written explanation therefore, or if Licensee fails to act in good faith by not making a bona fide effort to begin placing its Attachments within the ninety (90) calendar days prescribed by this section, the previously issued PARON (APPENDIX VI) shall be deemed rescinded by Licensor and Licensee shall have no further right to place Attachments pursuant to that PARON (APPENDIX VI).

31.0 OCCUPANCY OF CONDUIT SYSTEM

31.01 When Licensee submits an application for a license to place its cables, equipment, and facilities in the conduit system of Licensor, Licensor will advise Licensee of the availability of conduit space in accordance with Licensor's Attachment Application Procedures. In determining the availability of space in Licensor's conduit system, Licensor reserves the right to deny the granting of a license for any non-discriminatory lawful reason, including without limitation, insufficient capacity or reasons of safety, reliability and generally applicable engineering purposes. If conduit space is available, a license to occupy a portion of conduit system will be granted to Licensee, provided, however, that Licensor does not warrant the condition of such conduit system.

31.02 Licensor reserves the right to exclude cable, equipment, and facilities of Licensee from Licensor's conduit system, or to limit the type, number and size of Licensee's cable, equipment, and facilities which may be placed in any of Licensor's manholes.

32.0 OCCUPANCY OF RIGHT-OF-WAY

32.01 Licensor and Licensee agree that neither party has the right to restrict or interfere with the other party's lawful access to and use of public right-of-way, including public right-of-way, which pass over property owned by either party. Except as otherwise specifically provided in this Agreement, Licensor and Licensee shall each be responsible for obtaining their own right-of-way and permission to use real or personal property owned or controlled by any governmental body.

32.02 In the event that Licensee desires to occupy right-of-way owned or controlled by Licensor, Licensor may require Licensee to make an application to do so by the terms of this Agreement. Licensor reserves the right to determine whether granting a license would adversely affect its common carrier communication services and its ability to meet its duties and obligation with respect thereto, including questions of economy, safety, and future need of Licensor.

32.03 Licensor may, without incurring any liability, remove the cables, equipment, and facilities of Licensee from Licensor's right-of-way, at Licensee's expense where in Licensor's judgement (such judgement to be conclusive) such removal is required in connection with the performance of Licensor's service obligation or the safety of Licensor's employees. Whenever such removal has been made, Licensee will be promptly notified.

33.0 CONSTRUCTION AND MAINTENANCE OF FACILITIES

33.01 Licensee shall, at its own expense, make and maintain its pole attachments in a safe condition and in thorough repair, and in a manner reasonably acceptable to Licensor, and so as not to conflict with the use of said poles by Licensor or by other authorized users of said poles, or interfere with other facilities thereon or which may from time to time be placed thereon. Licensee shall, at its own expense, upon written notice from Licensor, relocate or replace its facilities placed on said poles, or transfer them to substituted poles, or perform any other work in connection with said facilities that may be required. Licensor shall give such written notice as is reasonable in the circumstances, provided, however, that in cases of emergency, (Licensor's judgment as to what constitutes an emergency to be conclusive) Licensor may arrange to relocate, remove or replace the attachments placed on said poles by Licensee, transfer them to substituted poles or perform any other work in connection with said facilities that may be required in the maintenance, replacement, removal or relocation of said poles or of the facilities thereon or which may be placed thereon, or for the service needs of Licensor, and Licensee shall reimburse Licensor for the expense thereby incurred. Attachments of Licensee to poles of Licensor, as mentioned herein shall be understood to include attachments of Licensee in space reserved for Licensor, or space which Licensor has the right to use, on poles of other companies with which Licensor now has or may hereafter have agreements for joint use and occupancy; and the use of such space by Licensee shall be subject to the terms and conditions of the agreements between Licensor and said other companies. Such authorization will not be unreasonably withheld.

- 33.02 Licensee's cable, equipment, and facilities shall be placed in, removed from, relocated in or maintained in Licensor's conduit system only when specific authorization for the work to be performed and approval of the person, firm or corporation selected by Licensee to perform the work, has been obtained in writing in advance from Licensor. Licensor retains the right to specify what, if any work shall be performed by Licensee. Such authorization will not be unreasonably withheld
- 33.03 In each instance where Licensee's cable, equipment, and facilities are to be placed in Licensor's conduit system, Licensor shall specify, among other things, the cable configuration and location of Licensee's cable, equipment, and facilities, the particular duct of the conduit system such cable will occupy, and the location where and manner in which Licensee's cable will enter and exit Licensor's conduit system.
- 33.04 Licensor's manholes shall be opened as reasonably permitted by Licensor's authorized employees or agents. Licensee shall be responsible for obtaining any necessary permits from appropriate governmental authorities to open manholes and to conduct the work operations. Licensee's employees or agents will be permitted to enter or work in Licensor's manholes only when an authorized agent or employee of Licensor is present except as provided in the next paragraph. Licensor's said agent or employee shall have the authority to terminate Licensee's work operations in and around Licensor's manholes if, in the sole discretion of said agent or employee, any hazardous conditions arise or any unsafe practices are being followed by Licensee's employees or agents. Licensee agrees to pay, in accordance with the terms and conditions of APPENDIX I, the full cost of having Licensor's agent or employee present when Licensee's work is being done in Licensor's manholes. The presence of Licensor's authorized agent or employee shall not relieve Licensee of its responsibility to conduct all of its work operations in and around Licensor's manholes in a safe and workmanlike manner. Licensee is responsible for all signage, traffic control, equipment, and personnel necessary to work in Licensor's manholes. All work shall meet Occupational Safety and Health Act (OSHA), and any local or state standards and requirements.
- 33.05 Licensee's employees will be permitted to enter or work in Licensor's manholes and conduit system without an authorized agent or employee of Licensor being present, provided that Licensee's work consists only of routine operations of testing, adjusting, regulating or inspecting Licensee's existing facilities and does not involve any placing, removing, changing or rearranging of Licensee's or Licensor's facilities. In such cases, Licensee shall notify Licensor's designated representative in advance of Licensee's operations as to the type of work to be performed, the time at which it is to be performed and where it is to take place. Licensee shall conduct all such work operation in a safe and workmanlike manner, and in accordance with the terms of this Agreement.
- 33.06 Licensee shall, at its own expense, maintain its buried communication facilities so as not to conflict with the use of the right-of-way by Licensor or other authorized users of the right-of-way. Licensee shall, at its own expense, relocate, change, or replace its facilities or perform any other work in connection with said facilities that may be reasonably required by Licensor or other authorities.

34.0 TERMINATION OF LICENSES

- 34.01 Upon notice from Licensor to Licensee that Licensor has been advised by governmental authority or private property owners that the use of any pole, conduit system, or right-of-way is not authorized and is objected to by such governmental authority or private property owner, as the case may be or that any pole, any conduit system or any right-of-way is to be removed, sold or otherwise disposed of, Licensee shall, if reasonably requested by Licensor, remove its cables, equipment, and facilities at once from the affected pole or poles or shall make arrangements for the removal of its cable, equipment, and facilities from the affected portion of Licensor's conduit system or right-of-way at Licensor's expense. If not so removed, Licensor shall have the right to remove Licensee's cable, equipment, and facilities from Licensor's right-of-way at the cost and expense of Licensee and without any liability thereto. If Licensor deems it is impractical to remove Licensee's cables, equipment or facilities from any right-of-way, they may be abandoned in place.
- 34.02 Licensee may at any time remove its facilities from any pole of Licensor, but shall immediately give Licensor written notice of such removal and surrender of license in the form of a Notification of Surrender (APPENDIX VII) hereto attached and made a part hereof. If Licensee surrenders its license but fails to remove its facilities from Licensor's poles, Licensor shall have the right to remove Licensee's facilities at Licensee's expense without any liability on the part of Licensor for damage or injury to Licensee's facilities. In the event that Licensee's cables, equipment, and facilities shall be removed from any pole as provided by this Agreement, no attachment shall again be made to such pole unless Licensee shall have first complied with all of the provisions of this Agreement as though no attachment had previously been made.
- 34.03 If Licensee desires to terminate its license for the right to occupy any part of Licensor's conduit system, Licensee shall give Licensor written notice of such surrender in the form of a Notification of Surrender (APPENDIX VII) hereto attached and made a part hereof. In such event, Licensee shall make arrangements with Licensor for the removal of Licensee's cables, equipment, and facilities from that part of Licensor's conduit system at Licensee's expense. In the event that Licensee's cables, equipment, and facilities shall be removed from Licensor's conduit system as provided by this Article, no cable, facilities or equipment shall again be placed in that part of such conduit system unless Licensee shall have first complied with all of the provisions of this Agreement as though no cables, equipment, and facilities of Licensee had previously been placed in that part of Licensor's conduit system.
- 34.04 If Licensee desires to terminate its license for the right to occupy any part of the right-of-way, Licensee shall give Licensor written notice of such surrender in the form of a Notification of Surrender (APPENDIX VII) attached hereto and made a part hereof. In such event, Licensee shall make arrangements with Licensor for the removal of Licensee's cables, equipment, and facilities from that part of the right-of-way at Licensee's expense. However, in the event it is impractical to remove Licensee's cable, equipment, and facilities from any right-of-way, they may be abandoned in place.

35.0 EMERGENCY RESTORATION PROCEDURES

- 35.01 In the event of an emergency, restoration procedures may be affected by the presence of Licensee's Attachments. While Licensor shall not be responsible for the repair of damaged Attachments of Licensee (except by mutual written agreement), Licensor shall nonetheless

control access to its poles, conduit systems or right-of-way if the restoration is to be achieved in an orderly fashion.

35.02 Where Licensor and Licensee are involved in emergency restorations, access to Licensor's poles, conduit systems or right-of-way will be controlled by Licensor's Network Construction Managers or their on-site representative according to the following guidelines.

(A) Service Disruptions/Outages

- (1) While exercising its right to first access, Licensor shall make all reasonable efforts to grant access to as many other entities with Attachments as is reasonably safe.
- (2) Where simultaneous access is not possible, Licensor will grant access on first come, first served basis.

(B) Service Affecting Emergencies

- (1) While exercising its right to first access, Licensor shall make all reasonable efforts to grant access to as many other entities with Attachments as is reasonably safe.
- (2) Where Licensor is unable to grant simultaneous access to all other entities with Attachments, access will be granted according to the level of damage to the Attachments of each entity and the likelihood that a given level of damage will result in service disruption. Where the likelihood that a service disruption will result is not clearly discernible, access will be on a first come, first served basis.

35.03 Without limiting any other indemnification or hold harmless provisions of this Agreement, Licensee agrees that any decision by Licensor regarding access to Attachments, or any action or failure to act by Licensor, under this section shall not be the basis for any claim by Licensee against Licensor for any damage to Licensee's Attachments or disruption of Licensee's services, or any other direct or indirect damages of any kind whatsoever incurred by Licensee.

36.0 ABANDONMENT

36.01 Nothing in this Agreement shall prevent or be construed to prevent Licensor from abandoning, selling, assigning, or otherwise disposing of any poles, conduit systems or other Licensor property used for Licensee's Attachments; provided, however, that Licensor shall condition any such sale, assignment, or other disposition subject to the rights granted to Licensee pursuant to this Agreement. Licensor shall promptly notify Licensee of any proposed sale, assignment, or other disposition of any poles, conduit systems or other Licensor property used for Licensee's Attachments.

APPENDIX VII - NOTIFICATION OF SURRENDER

APPENDIX VIII - LICENSEE - ENGINEERING/CONSTRUCTION/BILLING CONTACT INFORMATION

AGREEMENT TERMS AND CONDITIONS

1.0 SCOPE OF AGREEMENT

- 1.01 The purpose of this Agreement is to set forth the rates, terms, conditions, and procedures under which the Licensor will provide Licensee access to Licensor's poles, ducts, innerducts, conduits, and rights-of-way. **This agreement does NOT allow access to Windstream Central Offices. A separate agreement is required for interconnection access.**
- 1.02 Subject to the provisions of this Agreement, Licensor will issue to Licensee for any lawful communications purpose, revocable, nonexclusive licenses authorizing the attachment of Licensee's cables, equipment, and facilities to Licensor's poles or the placing of Licensee's cables, equipment, and facilities in Licensor's conduit system or within right-of-way owned or controlled by Licensor.
- 1.03 No use, however extended, of Licensor's poles, conduit system or right-of-way nor payment of any fees or charges required under this Agreement shall create or vest in Licensee any ownership or property rights in said poles, conduit system or right-of-way, but Licensee's rights therein shall be and remain a mere license. Nothing herein contained shall be construed to compel Licensor to construct, retain, extend, place, or maintain any facilities not needed for its own service requirements, unless otherwise required by law.
- 1.04 Licensee recognizes that Licensor has heretofore entered into, or may in the future enter into, agreements and arrangements with others which are not party to this Agreement regarding the poles, conduit system and right-of-way covered by this Agreement. Nothing herein contained shall be construed as a limitation, restriction or prohibition against Licensor with respect to such other agreements or arrangements. The rights of Licensee shall at all times be subject to any present or future joint use arrangement between Licensor and any other public utility or government agency.

2.0 DEFINITIONS

- 2.01 "Attachments" - Any attachment to a pole, use of a duct or innerduct, use of a conduit, or using right-of-way owned or controlled by Licensor.
- 2.02 "Attachment Fee" - Fee paid annually per attachment on a pole, or in a duct, innerduct, conduit, or right-of-way.
- 2.03 "Buried Cable" - Cable located below the surface of the ground but not in Licensor's conduit system.
- 2.04 "Conduit System" - Any combination of ducts, innerducts, conduits, manholes, and handholes owned or controlled by Licensor that is a reusable passage or opening in, on, under or through the ground, or a structure such as a building or bridge. The term includes "inner ducts" created by subdividing a duct into smaller channels.

- 2.05 "Hazardous Materials" -
- (A) Any substance, material or waste now or hereafter defined or characterized as hazardous, toxic or dangerous as defined by the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA") of 1980, as amended, and other federal, state, and local health, safety, and environmental laws, ordinances, statutes, and rules, including but not limited to the Occupational Safety and Health Act ("OSHA").
 - (B) Any substance, material or waste now or hereafter classified as a contaminant or pollutant under any law, rules, ordinance, or authority.
 - (C) Any other substance, material or waste, the manufacture, processing, distribution, use, treatment, storage, placement, disposal, removal or transportation of which is now or hereafter subject to regulation under any law, ordinance, statute, rule or regulation of any governmental body or authority.
- 2.06 "Make Ready Work" - All work to prepare Licensor's poles, ducts, innerducts, conduits, rights-of-way, and related facilities for the requested occupancy or attachment of Licensee's facilities but not the actual placement of attachments or administrative activities related to inquiries, verifications, requests or applications.
- 2.07 "Poles"- Licensor owned and poles owned by others to the extent that and for so long as Licensor has the right to permit others to be attached in the communications space.
- 2.08 "Pole Attachment Request" or "PAR" - A written request from Licensee to attach its facilities to Poles, submitted in accordance with this Agreement. With respect to pole attachment agreements in effect prior to the date the Parties executed this Agreement, the term PAR shall be deemed to include Pole attachment requests made by letter or similar document.
- 2.09 "Right-of-Way" - Right-of-way owned or controlled by Licensor. It does not include attachment or use of cables, poles, equipment or facilities located on a particular right-of-way. It may include private easement, or in certain instances public right-of-way granted by a governmental authority or a utility easement such as in a subdivision or development.

3.0 TERM OF AGREEMENT

- 3.01 This Agreement shall become effective upon its execution and if not terminated in accordance with the provisions of other Articles hereof, shall continue in effect for a term of not less than three (3) years, provided, however, that at any time after the first year of said term the rates, fees and charges set forth may be increased or decreased by written notice from Licensor to Licensee on a nondiscriminatory basis with respect to similar rates, fees and charges of other similar licensees.
- 3.02 Either Party may terminate this Agreement with at least a (6) six month written notice to the other Party.
- 3.03 Upon termination of the Agreement in accordance with any of its terms, all outstanding licenses in connection therewith shall terminate and shall be surrendered and Licensee shall within 60 days of date of termination remove all cables, equipment and facilities at the cost and expense

of Licensee. If Licensor in its sole discretion, deems it is impractical to remove Licensee's cable, equipment and facilities from Licensor's rights-of-way, they may be abandoned in place.

4.0 LEGAL AUTHORITY

- 4.01 Licensee will obtain from public authorities and private owners of property any and all permits, franchises, licenses and grants necessary for the lawful exercise of any license granted hereunder

5.0 APPLICABLE LAW

- 5.01 This Agreement, and the rights and obligations contained in it, shall be governed and construed under the laws of the state in which the attachments hereunder are to be located.

6.0 SUBSEQUENT LAW

- 6.01 The terms and conditions of this Agreement shall be subject to any and all applicable laws, rules, regulations or guidelines now in effect and that subsequently may be prescribed by any federal, state or local governmental authority. To the extent required by any such subsequently prescribed law, rule, regulation or guideline, the Parties agree to modify, in writing, the affected term(s) and conditions(s) of this Agreement to bring them into compliance with such law, rule, regulation or guideline. Should any term of this Agreement be determined by a court or agency with competent jurisdiction to be unenforceable, all other terms of this Agreement shall remain in full force and effect.

7.0 DISCLAIMER OF WARRANTIES

- 7.01 Except as specifically set forth in this Agreement, Licensor makes no warranties, express or implied, including, but not limited to, any implied warranties of merchantability or fitness for a particular purpose.

8.0 LICENSE NOT EXCLUSIVE

- 8.01 Nothing herein contained shall be construed as a grant of any exclusive license, right or privilege to Licensee. Licensor shall have the right to grant, renew and extend rights and privileges to others not parties to this Agreement, by contract or otherwise, to use any poles, conduit system or right-of-way covered by this Agreement, under such terms and conditions, as Licensor shall prescribe.

9.0 ASSIGNMENT OF RIGHTS

- 9.01 Licensee shall not assign; transfer or sublet the privileges hereby granted, or sell, lease or otherwise permit the use of its facilities on or any part thereof (all of the foregoing being "Transfers"), without prior consent in writing of Licensor which consent shall not be unreasonably withheld, delayed or conditioned; provided, however, that either Party may so Transfer its rights and obligations under this Agreement without such consent to (i) any entity said Party, directly or indirectly, controls, is controlled by or is under common control with or (ii) any entity acquiring all or substantially all of said Party's assets or equity, by providing written

notice to the other Party of such Transfer. Any attempted Transfer that is not permitted under this Section 9.01 is void *ab initio*.

- 9.02 Subject to the provisions of this Agreement, this Agreement shall extend to and bind the successors and authorized assigns of the Parties hereto.

10.0 LIABILITY AND DAMAGES

- 10.01 Licensor reserves to itself, its successors and assigns, the right to maintain its poles, conduit system and right-of-way and to operate its facilities thereon in such manner as will best enable it to fulfill its own service requirements. Licensor shall not be liable to Licensee for any interruption to service of Licensee or for interference with the operation of the cables, equipment or facilities of Licensee arising in any manner out of the use of Licensor's poles, conduit system and right-of-way except caused by Licensor's sole negligence, willful misconduct or material breach of this Agreement, in which case Licensor's liability shall be limited to the reasonable cost of repair of Licensee's damaged cable, equipment or facilities, if any.
- 10.02 Licensee shall exercise special precautions to avoid damaging the cables, poles, conduits, right-of-way equipment and facilities of Licensor and of other licenses and hereby assumes all responsibility for any and all loss, damages, costs and expenses. Licensee shall make an immediate report to Licensor of the occurrence of any such damage and hereby agrees to reimburse the respective owners for the expense incurred in making repairs.
- 10.03 Licensee shall indemnify and hold harmless Licensor against any and all claims, demands, causes of action, damages, costs or liabilities of every kind and nature whatsoever, except to the extent caused by Licensor's negligence or willful misconduct, which may arise out of or be caused by:
- (A) The erection, maintenance, presence, use or removal of Licensee's cable, equipment, and facilities on Licensor's poles, and within Licensor's conduit system and right-of-way
 - (B) Any act of Licensee on or in the vicinity of Licensor's poles, conduit system and right-of-way, or
 - (C) Any interruption, discontinuance, or interference with Licensee's service to any of its subscribers occasioned or claimed to have been occasioned by any action of Licensor pursuant to or consistent with this Agreement. Licensee shall, upon demand and at its own sole risk and expense, defend any and all suits, actions or other legal proceeding brought or instituted against Licensor on any such claim, demand or cause of action, and shall pay and satisfy any judgment or decree rendered against Licensor therein, and Licensee shall reimburse Licensor for any and all legal expense incurred by Licensor in connection therewith. Licensee shall also indemnify, protect and hold harmless Licensor from any and all claims and demands of whatever kind which arise directly or indirectly from the operation of Licensee's facilities including taxes, special charges by others, claims and demands for damages or loss for infringement of copyright, for libel and slander for unauthorized use of television broadcast programs, and for unauthorized use of other program material, and from and/or against all claims and demands for infringement of patents with respect to the manufacturer, use and operation of Licensee's equipment whether arising from the use of Licensee's equipment in combination with Licensor's poles, conduit system, right-of-way or otherwise.

10.04 Licensee agrees to comply under the Workmen's Compensation Laws of the state in which attachments are to be located hereunder, and also agrees to cause every subcontractor of Licensee to comply with and qualify under said laws, and shall furnish copies of Certificates demonstrating such compliance to Licensor prior to commencement of the work.

11.0 DEFAULT AND REMEDIES

11.01 In addition to Material Defaults defined anywhere else in this Agreement, any one of the following shall be deemed the occurrence of a Material Default under this Agreement:

- (A) Failure by Licensee to pay any fee or other sum required to be paid under the terms of this Agreement and such default continues for a period of thirty (30) calendar days after written notice thereof to Licensee.
- (B) Failure by either Party to perform or observe any other term, condition, covenant, obligation, or provision of this Agreement and such default continues for a period of thirty (30) business days after written notice thereof from the other Party (provided that if such default is not curable within a thirty (30) business day period, the period will be extended if the Party substantially commences to cure such default and proceeds diligently thereafter to effect such cure).
- (C) The filing of any tax or mechanic's lien against Poles because of any act or omission by Licensee which is not bonded or discharged within thirty (30) calendar days of the date Licensee receives notice that such lien has been filed;
- (D) Licensor or Licensee's voluntary or involuntary bankruptcy;
- (E) Licensee's knowing use or maintenance of its Attachments in violation of any law or regulation, or in aid of any unlawful act or undertaking;
- (F) If any authorization which may be required of Licensee by any governmental or private authority for the placement, operation, or maintenance of Licensee's Attachments is denied or revoked.

11.02 In the event of a Material Default and subject to any other applicable provision of this Agreement, the Non-defaulting Party, without any further notice to the Defaulting Party (except where expressly provided for below or required by applicable law), may do any one or more of the following:

- (A) Perform on behalf and at the expense of the Defaulting Party, any obligation of the Defaulting Party under this Agreement which the Defaulting Party has failed to perform and of which the Non-defaulting Party shall have given the Defaulting Party notice, the cost of which performance shall be paid by the Defaulting Party to the Non-defaulting Party upon demand;
- (B) Terminate this Agreement by giving sixty (60) business days written notice of such termination to Licensee and remove Licensee's Attachments and store Licensee's facilities in a public warehouse or elsewhere at the expense of and for the account of

Licensee without Licensor being deemed guilty of trespass or conversion, and without Licensor becoming liable for any loss or damages to Licensee occasioned thereby; or

(C) Exercise any other legal or equitable right or remedy that the Non-defaulting Party may have.

- 11.03 The Defaulting Party shall repay to the Non-defaulting Party upon demand any costs and expenses incurred by the Non-defaulting Party (including, without limitation, reasonable attorneys' fees) in successfully enforcing this Agreement.
- 11.04 Upon termination of this Agreement by the Non-defaulting Party, the Defaulting Party shall remain liable to the Non-defaulting Party for any and all fees, other payments and damages which may be due or sustained in accord with this Agreement prior to such termination, all reasonable costs, fees and expenses, including, without limitation, reasonable attorney' fees incurred by the Non-defaulting Party in pursuit of its remedies hereunder.
- 11.05 All rights and remedies of the Non-defaulting Party set forth in this Agreement shall be cumulative and none shall exclude any other right or remedy, now or hereafter allowed by or available under any statute, ordinance, rule of court, or the common law, either at law or in equity, or both.

12.0 INDEMNIFICATION

- 12.01 Licensee shall compensate Licensor for the full actual loss, damage or destruction of Licensor's property that in any way arises from or is related to this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation, or maintenance of Licensee's Attachments).
- 12.02 Each party agrees to defend, indemnify, protect and hold harmless the other and the other's officers, directors, employees, shareholders, successors, assigns, agents, affiliates, representatives, partners, and contractors from and against any and all third party claims, actions, administrative proceedings (including, without limitation, informal proceedings), judgments, damages, penalties, fines, cost, liabilities, interests, or loss, including, without limitation, reasonable attorneys' fees and expenses, consultant fees, and expert fees, together with all other costs and expenses of any kind or nature suffered by or asserted against the indemnified party in any way arising out of or connected with this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation or maintenance of Licensee's facilities, unless caused by the sole negligence or willful misconduct on the part of Licensor or Licensor's affiliates, agents, officers, employees and assigns). Each party expressly assumes all liability for actions by its affiliates, agents, officers, employees, or its contractors and expressly waives any immunity from the enforcement of this indemnification provision that might otherwise be provided by workers' compensation law or by other state or federal laws.
- 12.03 Without limiting any of the foregoing, Licensee assumes all risk of, and agrees to relieve Licensor of any and all liability for, loss or damage (and the consequences of loss or damage) to any facilities placed on Licensor's property and any other financial loss sustained by Licensee,

except to the extent caused by the negligence or willful misconduct on the part of Licensor or Licensor's agents, officers, employees, and assigns.

- 12.04 Without limiting the foregoing, Licensee expressly agrees to indemnify, defend, and hold harmless Licensor and Licensor's agents, officers, employees and assigns from any and all claims asserted by end users/customers of Licensee in any way arising out of or in connection with this Agreement or Licensee's facilities, except to the extent caused by the negligence or willful misconduct on the part of Licensor or Licensor's agents, officers, employees, and assigns. or its contractors.
- 12.05 Notwithstanding anything to the contrary in this Agreement, Licensee further shall indemnify and hold harmless Licensor, its agents, officers, employees, and assigns from and against any claims, liabilities, losses, damages, fines, penalties, and costs (including, without limitation, reasonable attorneys' fees) whether foreseen or unforeseen, which the indemnified parties suffer or incur because of:
- (A) Any discharge of hazardous waste resulting from acts or omissions of Licensee or Licensee's predecessor in interest;
 - (B) Acts or omissions of Licensee, its agents, employees, Licensees, or representatives in connection with any cleanup required by law, or
 - (C) Failure of Licensee to comply with Environmental, Safety and Health Laws.
- 12.06 In no event shall either Party be liable to the other for any special, consequential or indirect damages (including, without limitation, lost revenues and lost profits) arising out of this Agreement or any obligation arising hereunder, whether in an action for or arising out of breach of contract, or otherwise.
- 12.07 Licensee shall indemnify, protect, and hold harmless Licensor from and against any and all claims for libel and slander, copyright and/or patent infringement arising directly or indirectly by reason of installation of Licensee's equipment on Licensor Poles, Conduit Systems or Right-of-Way pursuant to this Agreement.

13.0 COMPLIANCE WITH LAW

- 13.01 Notwithstanding anything to the contrary in this Agreement, each Party shall ensure that any and all activities it undertakes pursuant to this Agreement shall comply with all applicable laws, including, without limitation, all applicable provisions of:
- (A) Workers' compensation laws
 - (B) Unemployment compensation laws
 - (C) The Federal Social Security Law
 - (D) The Fair Labor Standards Act, and

- (E) All laws, regulations, rules, guidelines, policies, orders, permits and approvals or any governmental authority relating to environmental matters and/or Occupational Safety and Health Act ("OSHA").

14.0 INSURANCE

14.01 Licensee shall obtain and maintain, in full force and effect at all times, during operations covered by this Agreement, such minimum insurance as will cover the obligations and liabilities of said Party, its agents, and its employees which may arise from the operations under this Agreement. Insurance shall have limits of not less than:

- (A) Commercial General Liability policy of minimum limits of:

| | |
|---|--------------------------------|
| General Aggregate | \$ 2,000,000 per policy period |
| Products/Completed Operations Aggregate | \$ 2,000,000 per policy period |
| Personal Injury/Advertising | \$ 2,000,000 per occurrence |
| Each Occurrence | \$ 2,000,000 per occurrence |
| Fire Legal Liability | \$ 50,000 any one fire |

14.02 The policy will be endorsed to show the above aggregate limits applying to "each" job site or, as an alternative, the General Aggregate will be increased to \$4,000,000 per policy period. Policy will also specifically state the coverage applies to all operations conducted by the respective Party, its employees, or agents on behalf of that Party's Corporation or subsidiary.

14.03 Where the performance of the work involves structural property, underground property, or blasting, each Party's Commercial General Liability insurance policy shall provide coverage to the insured for legal liability arising from operations under this Agreement for property damage:

- (A) arising out of blasting,
- (B) arising out of collapse of, or structural injury to, any building or structure or
- (C) To underground facilities and utilities.

14.04 Other general liability forms are acceptable in lieu of the Commercial General Liability Form, however, they are not to be used without written approval from the Company's Risk Management Department, 4001 Rodney Parham Road, AR 72212. However, such written approval shall not be unreasonably withheld.

- (A) Business Automobile Liability policy with minimum limits of:

| | |
|-----------------------|---------------------------|
| Bodily Injury | \$2,000,000 per accident |
| Property Damage | \$ 2,000,000 per accident |
| OR | |
| Combined Single Limit | \$ 2,000,000 per accident |

The policy will be issued using symbol "1 - any auto" coverage.

- (B) Workers Compensation:

Part 1 - Medical Benefits Statutory

Part 2 - Employer's Liability as indicated:

| | |
|---------------------------|--------------------------|
| Bodily Injury by Accident | \$ 100,000 each accident |
| Bodily Injury by Disease | \$ 100,000 each employee |
| Bodily Injury by Disease | \$ 500,000 policy limit |

- 14.05 The policy will show the state in which operation on behalf of the Party and/or subsidiary is being conducted. For operations conducted within monopolistic (state fund) states, the Party will furnish a certificate of compliance from the appropriate state fund administrator.
- 14.06 In each and every policy in 14.04A and 14.04B, the other Party's Corporation and its subsidiaries shall be named an "additional insured" with respect to activities performed on behalf of the Party's Corporation and its subsidiaries.
- 14.07 Coverage provided by the policies listed in this paragraph will be issued by an insurance company, licensed in the state in which operations on behalf of the Party are to be conducted. It is acceptable to use both primary and excess/umbrella policies to obtain necessary limits.
- 14.08 Licensee will furnish to the other Party, a certificate evidencing insurance coverage under sub-paragraphs 14.04-A, and 14.04-B. Such certificate shall provide for a thirty-day prior notice to the other Party of any cancellation or material changes in coverage and shall be signed by a legal representative of the issuing insurance company. The certificate of insurance shall be sent to the person identified at paragraph 25.03.
- 14.09 The provisions of sub-paragraphs 14.04-A and 14.04-B shall also apply to all sub-Licensees, and Licensee shall be responsible for their compliance herewith.

15.0 NON-WAIVER OF TERMS AND CONDITIONS

- 15.01 Failure to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

16.0 LICENSOR'S LIEN

- 16.01 Should Licensor under any Article of this Agreement remove Licensee's cable, equipment or facilities from Licensor's poles, conduit system or right-of-way, Licensor will deliver to Licensee the cable, equipment or facilities so removed upon payment by Licensee of the cost of removal, storage and delivery, and all other amounts due Licensor hereunder. Licensor is hereby given a lien on Licensee's cable, equipment or facilities within Licensor's conduit system or right-of-way or attached to Licensor's poles or removed therefrom, with power of public or private sale, to cover any amounts due Licensor under the provisions of this Agreement. Such liens shall not operate to prevent Licensor from pursuing, at its option, any other remedy in law, equity or otherwise, including any other remedy provided for in this Agreement.

17.0 SCHEDULE OF FEES AND CHARGES

- 17.01 Licensee may be required to furnish bond or other security satisfactory to Licensor, in a reasonable initial amount to be determined by Licensor and provided by Licensee at the

time Licensee submits Exhibit B to Licensor's Attachment Application Procedures to guarantee the payment of any such sums which may become due to Licensor arising out of this Agreement including, but not limited to fees due hereunder or charges for work performed for the benefit of Licensee under this Agreement, including the removal of Licensee's facilities upon termination of this Agreement by any of its provisions or upon termination of any License issued hereunder. Bond to be sent to person identified at paragraph 25.03. Bond is to be equal to one (1) year's annual rental fees.

17.02 The fees, rates and charges set forth in APPENDIX I or elsewhere in this Agreement are effective during the term of this Agreement subject to Section 3.01 and shall be due and payable by Licensee as set forth herein.

17.03 FEES:

All rates, charges and fees set forth in this Agreement and as shown in APPENDIX I (Schedule of Rates, Fees, and Charges) shall be subject to all applicable federal, state, and local laws, rules, regulations and commission orders.

(A) Computation:

(1) Pole and Anchor Attachment Fees:

- (a) For the purpose of computing the annual pole attachment fee hereunder, for calendar years subsequent to a first partial calendar year, said fee shall be based upon the number of poles and anchors, to which attachments are actually made, as of December 31 of the preceding year, multiplied by the per attachment pole attachment fee rate set forth on APPENDIX I. For a first partial calendar year, the pole attachment fee shall be prorated as necessary, on a daily basis from the date payment is due in accordance with Exhibit B of Licensor's Attachment Application Procedures.
- (b) For billing purposes, a single pole attachment includes the point of attachment and all facilities located in the usable space on the pole in the space assigned to Licensee (typically six inches above and six inches below the point of attachment). If Licensee occupies more than one usable space on a pole, separate attachment fees shall apply to each space occupied.

(2) Conduit Occupancy Fees :

- (a) For the purpose of computing the total conduit occupancy fee due hereunder, the duct feet of conduit shall be measured from the center to the center of manholes; or from the center of a manhole to the end of the duct; from the center of a manhole to the property line if the duct is connected at the property line to a duct owned and controlled by a third-party property owner; or the length of a conduit from pole to pole; or isolated lengths of conduit not attached to any structure (such as involved with buried cable) which will be occupied by Licensee's cable.
- (b) For billing purposes each inner duct will be billed the half duct fee. If two or more facilities occupy a duct that has not been

subdivided, the half duct fee will be charged for each facility. The half duct fee will apply when others place the Licensee facility in a duct that has not been subdivided only if the facility does not render the duct unusable.

- (3) Right-of-Way Occupancy Fees:
 - (a) This fee will be negotiated on a case by case basis. There is no established per foot rate.

- (B) Payment Date:
 - (1) If this Attachment License Agreement becomes effective on or prior to June 30, all attachment and occupancy fees for the remainder of that first partial calendar year shall be due and payable at the time required under Appendix I of Licensor's Attachment Application Procedures .

 - (2) If an Attachment License Agreement becomes effective on or after July 1, all attachment and occupancy fees for the remainder of that current partial calendar year as well as the full upcoming calendar year shall be payable at the time required under Appendix I of Licensor's Attachment Application Procedures.

 - (3) On an annual basis, all attachment and occupancy fees not previously paid are to be paid in advance, on the 31st day of January of each year or within 30 days of receipt of invoice. Failure to pay such fees within 30 days of the annual due date shall constitute a Material Default of this Agreement.

- (C) Termination of License:
 - (1) Upon termination or surrender of a license granted hereunder, no refund of any attachment or occupancy fee shall be made.

17.04 OTHER CHARGES:

- (A) Computation:
 - (1) All charges for inspections, engineering, or rearrangements of Licensee's facilities from Licensor's poles or conduit and, without limitation, any other work performed for Licensee shall be based upon the full cost and expense, including reasonable overhead, to Licensor for performing such work for Licensee. The cost to Licensee shall be determined in accordance with the regular and customary methods used by Licensor in determining such costs.

 - (2) The charge for replacement of poles shall include the entire non-betterment cost to Licensor including the increased cost of larger poles, sacrificed life value of the poles removed, cost of removal, less any salvage recovery and the cost of transferring Licensor's facilities from the old to the new poles.

 - (3) All other attachment or occupancy related inquiry, verification, application, administrative and miscellaneous rates, fees and charges shall be

calculated and paid in accordance with APPENDIX I and/or Licensor's Attachment Application Procedures and Attachments thereto.

- (B) Payment Date:
 - (1) All bills for such other charges for work performed by Licensor shall be payable upon presentment to Licensee, and shall be deemed delinquent if not paid within 30 days after presentment to Licensee.

18.0 DISPUTE RESOLUTION

18.01 Except in the case of:

- (A) A suit, action, or proceeding by one Party to compel the other Party to comply with its obligation to indemnify the other Party pursuant to this Agreement, or
- (B) A suit, action or proceeding to compel either Party to comply with the dispute resolution procedures set forth in this section, the Parties agree to use the following procedure to resolve any dispute, controversy, or claim arising out of or relating to this Agreement or its breach.

18.02 At the written request of a Party, each Party shall designate a knowledgeable, responsible representative to meet and negotiate in good faith to resolve any dispute, controversy, or claim arising under this Agreement. The Parties intend that these negotiations be conducted by non-lawyer, business representatives. The substance of the negotiations shall be left to the discretion of the representatives. Upon mutual agreement, the representatives may utilize other alternative nonbinding dispute resolution procedures such as mediation to assist in the negotiations. Discussions and correspondence between the representatives for the purposes of these negotiations shall be treated as confidential, undertaken for purposes of settlement, shall be exempt from discovery and production, and shall not be admissible in any subsequent proceeding without the concurrence of all Parties. Documents identified in or provided during such negotiations, which are not prepared for purposes of the negotiations, shall not be so exempt and may, if otherwise admissible, be admitted as evidence in any subsequent proceeding.

18.03 If a resolution of the dispute, controversy or claim is not reached within ninety days of the initial written request referred to in 18.02, the dispute, controversy, or claim may be filed with the State Public Service Commission for review and determination, provided the party invoking the Commission's intervention process has in good faith negotiated, or attempted to negotiate, with the other Party pursuant to 18.02.

18.04 Each Party shall bear its own costs, including attorneys' fee, incurred in connection with any of the foregoing procedures. A Party-seeking discovery shall reimburse the responding Party the cost of reproducing documents (to include search time and reproduction time costs). The fees associated with any arbitration, including the fees of the arbitrator, shall be divided equally between the parties.

19.0 ENTIRE AGREEMENT

19.01 This Agreement and Licensor's related Attachment Application Procedures cancels and supersedes all previous agreements whether written or oral, except for any sums due thereunder, between Licensor and Licensee with respect to the attachment of Licensee's cable, equipment, and facilities to Licensor's poles or the placing Licensee's cable, equipment or facilities in Licensor's conduit system or right-of-way; and there are no other provisions, terms or conditions to this Agreement except as expressed herein. All currently effective licenses heretofore granted pursuant to such previous agreements shall continue in effect subject to the terms and conditions of this Agreement.

19.02 The terms and conditions of this Agreement supersede all prior oral or written understandings between the Parties and constitute the entire Agreement between them concerning the subject matter of this Agreement. There are no understandings or representations, express or implied, not expressly set forth in this Agreement or in Licensor's related Attachment Application Procedures. This Agreement shall not be modified or amended except by writing signed by the Party to be charged. **This Agreement is only for pole /occupancy applications submitted for the properties owned and operated by Windstream Kentucky East, LLC in the State of Kentucky. This agreement does NOT apply to Windstream Kentucky West, LLC properties. Separate agreements must be requested for each Windstream Operating Company and for Interconnection Access to Central Offices.**

GENERAL OPERATING ROUTINE

20.0 ATTACHMENT, USE AND/OR OCCUPANCY REQUEST PROCESS

20.01 There is a multi-step pole attachment or duct, innerduct, conduit or right-of-way use and/or occupancy application process and fee determination process that the Licensee may begin upon the execution of this Agreement. It is set forth below and in Licensor's related Attachment Application Procedures.

21.0 POLE ATTACHMENT REQUESTS (PAR)

21.01 The following process can begin upon the execution of this agreement. The steps are:

- (A) Pole Attachment Quote Preparation: Licensee shall submit a Pole Attachment Request Form (Exhibit B to Licensor's related Attachment Application Procedures), which may be reasonably revised from time to time by Licensor at its sole discretion, to Licensor which will include a drawing of the proposed route and contact information (name, telephone, facsimile, and email information), and all required fees, as listed in and computed in accordance with APPENDIX I, which may be changed from time to time by Licensor to remain consistent with prevailing costs, of this Agreement. These fees consist of administrative as well as other actual costs reasonably incurred in researching the requested route. Once Licensor receives the aforementioned specific attachment information and the fee from Licensee, Licensor will report on the Poles along the route, any required make-ready work, the costs and schedule for such make-ready work, and any other requirements Licensee must satisfy prior to installing its facilities. If during this process, Licensor determines any lawful reason for denying Licensee's application, Licensor will so inform Licensee. Pole attachment quotes will be provided within thirty (30) business days for standard requests. Non-standard quantities of pole attachments and distances will be addressed on an individual case basis, and in a commercially reasonable period.
- (B) Pole Attachment Order: Upon completion of the work identified above, Licensor will inform Licensee if Licensor will provide Licensee a Pole Order Form (Appendix VI to the Licensor's related Attachment Application Procedures) which may be revised from time to time by Licensor at its sole discretion, containing estimated make-ready cost (if any), annual recurring charges and any additional information necessary for Licensee to proceed with attaching its facilities to Licensor's Poles. If Licensee desires to attach to Licensor's poles, and pole make-ready work is required, Licensee shall pay the estimated make-ready cost prior to Licensor beginning any work. Actual costs incurred by Licensor in performing the make-ready work will be applied to the estimated make-ready costs. Any reasonable costs in excess of the estimated cost will be billed to Licensee. Any payment of the estimated costs in excess of actual pole attachment make-ready costs will be returned to Licensee. If Licensee declines to proceed, all fees incurred to date will be billable to Licensee by Licensor.

21.02 Licensee has thirty (30) days to pay the estimated make-ready work or cancel the PAR.

21.03 Upon completion of the make-ready work, the receipt of all payments and fees, and the signing of this Agreement, an "Approved" Attachment I shall be returned to the Licensee. At that time Licensee will be considered to have been granted a License with respect to the poles approved in the PARON and may attach to Licensor's facilities.

22.0 SURVEYS AND INSPECTIONS OF LICENSEE'S FACILITIES

21.01 Licensor reserves the right to inspect each new installation or work operation of Licensee on or within Licensor's facilities. The making of inspections or the failure to make inspections shall not relieve Licensee of any responsibility, obligation or liability imposed by this Agreement.

23.0 ISSUANCE OF LICENSES

23.01 Before Licensee shall have a right to attach to any pole of Licensor, Licensee shall make application for and receive a revocable, nonexclusive license therefore in the form of an approved Application for Pole License (APPENDIX VI and Exhibit B to Licensor's related Attachment Application Procedures).

23.02 Before Licensee shall have the right to place any cable, equipment or facilities within any conduit system or right-of-way of Licensor, Licensee shall make application for an receive a revocable, nonexclusive license therefore in the form of an approved Application for Conduit or Right-of-Way License (APPENDIX IV and Exhibit B to Licensor's related Attachment Application Procedures), hereto attached and made a part hereof.

23.03 Any license granted hereunder for attachment to Licensor's poles shall terminate without further notice to Licensee as to individual poles covered by the license to which Licensee has not attached within ninety (90) days from the date that Licensor has notified Licensee that such poles are available for attachment of the operating facilities of Licensee, unless Licensor, in the exercise of its sole discretion, agrees to extend said period at the request of Licensee.

23.05 Any license granted hereunder for placement of Licensee's facilities in Licensor's conduit system shall terminate without further notice to Licensee as to individual sections of Licensor's conduit system covered by the license in which Licensee has not placed its facilities within ninety (90) days from the date that Licensor has notified Licensee that such sections of the conduit system are available for the placement of operating facilities of Licensee, unless Licensor, in the exercise of its sole discretion, agrees to extend said period at the request of Licensee.

24.0 AUTHORITY TO PLACE ATTACHMENTS

24.01 Before any attachments or placement of facilities Licensee shall submit evidence that Licensee has the authority to maintain Attachments within public rights-of-way or on private right-of-way or on private property. Licensee shall be solely responsible for obtaining all licenses, authorizations, permits and consents from federal, state and local authorities or private land owners that may be required to place and maintain facilities on Licensor's poles or within Licensor's conduit, duct or right-of-way.

25.0 NOTICES (OF MODIFICATION OR ALTERATION OF POLES)

25.01 In the event Licensor plans to modify or alter any Licensor Poles upon which Licensee has placed Attachments, Licensor, except in emergency situations, shall provide Licensee written notice of the proposed modification or alteration at least ninety (90) business days prior to the time the proposed modification or alteration is scheduled to take place. Should Licensee decide to modify or alter Licensee's Facilities on Poles, Licensee shall so notify Licensor in writing at least ninety (90) business days prior to the day the work is to begin. In such event, Licensee shall bear a proportionate share of the total costs incurred by Licensor to make Licensor Poles accessible. Licensee's proportionate share of the total cost shall be based on the ratio of the amount of new space occupied by Licensee to the total amount of new space

occupied by all of the parties joining in the modification. Licensee is not responsible for any costs of Licensor's modifications or alterations of its Poles.

- 25.02 In the event Licensor is required to move the location of, or replace, any Licensor Pole(s) for reasons beyond its control, Licensee concurrently shall relocate Licensee's Attachments. Licensee shall be solely responsible for the costs of the relocation of Licensee's Attachments. When it is mutually agreed that it is in the best interest of Licensor and Licensee, Licensor will, after proper notification has been provided, transfer Licensee's Attachments at the same time that Licensor transfers its Attachments. The rate charged for these transfers is listed in this Agreement (APPENDIX I). The rate for transfers may be adjusted by Licensor from time to time to remain consistent with prevailing costs.
- 25.03 Notices under this Agreement may be given and shall be deemed to have been given, by posting the same in first class mail to Licensee as follows:

LICENSOR:

Company Name: **Windstream Kentucky East, LLC**

26.0 REQUIREMENTS AND SPECIFICATIONS FOR ATTACHMENT TO POLES

26.01 Licensee's cables, equipment, and facilities shall be placed and maintained in accordance with the requirements and specifications attached hereto and as set forth in Licensor's related Attachment Application Procedures and made a part hereof, and in accordance with the requirements and specifications of the National Electric Safety Code (most recent edition) and the National Electric Code (most recent edition), and in compliance with any other rules or orders now in effect or that may hereafter be issued by any state utility commission or other authority having jurisdiction.

27.0 PLACEMENT OF ATTACHMENTS

27.01 Licensee shall, at its own expense, place and maintain and replace its Attachments on Licensor's Poles in accordance with:

- (A) Such reasonable requirements and specifications as Licensor shall from time to time prescribe in writing in Licensor's Attachment Application Procedures or otherwise,
- (B) In compliance with any rules or orders now in effect or that hereafter may be issued by any regulatory agency or other authority having jurisdiction, and
- (C) All currently applicable requirements and specifications of the National Electrical Safety Code, National Electric Code, most current edition or any amendment or revision of said Code. Licensee agrees to comply, at its sole risk and expense, with all specifications hereto, as may be revised from time to time by Licensor. Licensor will provide supervision at Licensee's expense if Licensor believes it is required.

27.02 Licensee's Facilities shall be tagged at maximum intervals of 300 feet so as to identify Licensee as the owner of the Facility. The tags shall be of sufficient size and lettering so as to be easily read from ground level.

28.0 MODIFICATIONS, ADDITIONS OR POLE REPLACEMENTS AND REARRANGEMENTS

28.01 Licensee shall not modify, add to, or replace facilities on any pre-existing Attachment on an Licensor Pole without first notifying Licensor in writing of the intended modification, addition or replacement at least thirty (30) business days prior to the date the activity is scheduled to begin. The required notification shall include:

- (A) The date the activity is scheduled to begin,
- (B) A description of the planned modification, addition, or replacement,
- (C) A representation that the modification, addition, or replacement will not require any space other than the space previously designated for Licensee's Attachments, and
- (D) A representation that the modification, addition, or replacement will not impair the structural integrity of the Poles involved.

- 28.02 Should Licensor determine that the modification, addition, or replacement specified by Licensee in its notice will require more space than that allocated to Licensee or will require the rearrangements of, reinforcement of, replacement of, or an addition of support equipment to the Poles involved in order to accommodate Licensee's modification, addition, or replacement, Licensor will so notify Licensee, whereupon Licensee will be required to submit a PAR in compliance with this Agreement in order to obtain authorization for the modification, addition, or replacement of its Attachments.
- 28.03 Should Licensee request Licensor to expand capacity or purchase additional plant, Licensee agrees to pay all reasonable costs. If Licensor or another party that has been granted a license joins in the request and will benefit from the expansion or purchase, Licensee agrees to pay a percentage of all costs proportionate to Licensee's share of the benefit received from the expansion or purchase.
- 28.04 When multiple applications, including application of Licensee, are received by Licensor with respect to any pole which must be replaced or rearranged to provide additional space prior to commencement of the work on that pole a Transfer Attachment Fee may be charged. Licensor will equitably prorate to the extent that it is practical between Licensee and other applicants for the pole space, the common expenses of engineering, rearrangement, and replacement, if any, which result from the processing of multiple applications. Licensee shall be bound by Licensor's determination as to any such pro-ration of Transfer Attachment Fee to Licensee.

29.0 UNAUTHORIZED ATTACHMENTS

- 29.01 If any cable, equipment or facilities of Licensee shall be found on a pole or within a conduit or right-of-way for which no license is outstanding, Licensor, without prejudice to its other rights or remedies under this Agreement or otherwise, may:
- (A) Impose a charge, and
 - (B) Require Licensee to remove such cable, equipment or facilities forthwith or Licensor may remove them without liability and the expense of removal shall be borne by Licensee. For the purpose of determining the charge, Licensee shall pay liquidated damages that will not exceed an amount equal to the annual pole attachment fee for the number of years the unauthorized attachments have existed (or, if that cannot be determined, the number of years since the most recent inventory or five years, whichever is less), plus interest at a rate set for that period by the IRS for individual underpayments pursuant to Section 6621 of the IRS Code. Any such charge imposed by Licensor shall be in addition to its rights to any other sums due and payable, including without limitation the actual costs of any audit or survey which established the existence of the unauthorized attachments and to any claims to said fees or said unlicensed use shall be deemed as a ratification or the licensing of the unlicensed use, and if any license should subsequently be issued, after application and payment of the application fee therefore, said license shall not operate retroactively or constitute a waiver by Licensor of any of its rights or privileges under this Agreement or otherwise.
- 29.02 For purposes of this section, an unauthorized Attachment shall include, but not limited to:

- (A) An Attachment to a Pole which is not identified in any PARON (APPENDIX VI) issued in accordance with this Agreement;
- (B) An Attachment that occupies more space than that allocated to Licensee By Licensor;
- (C) An attachment that is not placed in accordance with the provisions of this Agreement or the appropriate PARON (APPENDIX VI) issued pursuant to this Agreement, unless Licensee can demonstrate to Licensor's reasonable satisfaction that said misplacement is not due to any act or omission of Licensee or Licensee's agents;
- (D) An addition or modification by Licensee to its pre-existing Attachment(s) that impairs the structural integrity of the involved Licensor Pole(s).
- (E) An Attachment that consists of facilities owned or controlled by, and for the use of a Party other than Licensee.

29.03 Once Licensor has notified Licensee of an unauthorized attachment. Licensee can submit a PAR to request an authorized attachment. A PAR submitted per this provision will be treated like any other PAR subject to this Agreement. Licensee will be responsible for all fees associated with a PAR (as identified in this Agreement). If a PAR is not received by Licensor within ten (10) business days of Licensee's receipt of an unauthorized attachment notification, Licensee has sixty (60) business days from the date of its receipt of the initial unauthorized attachment notification to vacate the Pole.

30.0 FAILURE TO PLACE ATTACHMENTS

30.01 Once Licensee has been issued a PARON (APPENDIX VI), Licensee shall have ninety (90) calendar days from the date of the PARON (APPENDIX VI) to begin the placement of its Attachments on the Licensor Poles covered by the PARON (APPENDIX VI). If Licensee has not begun placing its Attachments within that ninety-(90) calendar day period, Licensee shall so advise Licensor with a written explanation for the delay. If Licensee fails to advise Licensor of its delay, with a written explanation therefore, or if Licensee fails to act in good faith by not making a bona fide effort to begin placing its Attachments within the ninety (90) calendar days prescribed by this section, the previously issued PARON (APPENDIX VI) shall be deemed rescinded by Licensor and Licensee shall have no further right to place Attachments pursuant to that PARON (APPENDIX VI).

31.0 OCCUPANCY OF CONDUIT SYSTEM

31.01 When Licensee submits an application for a license to place its cables, equipment, and facilities in the conduit system of Licensor, Licensor will advise Licensee of the availability of conduit space in accordance with Licensor's Attachment Application Procedures. In determining the availability of space in Licensor's conduit system, Licensor reserves the right to deny the granting of a license for any non-discriminatory lawful reason, including without limitation, insufficient capacity or reasons of safety, reliability and generally applicable engineering purposes. If conduit space is available, a license to occupy a portion of conduit system will be granted to Licensee, provided, however, that Licensor does not warrant the condition of such conduit system.

- 31.02 Licensor reserves the right to exclude cable, equipment, and facilities of Licensee from Licensor's conduit system, or to limit the type, number and size of Licensee's cable, equipment, and facilities which may be placed in any of Licensor's manholes.

32.0 OCCUPANCY OF RIGHT-OF-WAY

- 32.01 Licensor and Licensee agree that neither party has the right to restrict or interfere with the other party's lawful access to and use of public right-of-way, including public right-of-way, which pass over property owned by either party. Except as otherwise specifically provided in this Agreement, Licensor and Licensee shall each be responsible for obtaining their own right-of-way and permission to use real or personal property owned or controlled by any governmental body.
- 32.02 In the event that Licensee desires to occupy right-of-way owned or controlled by Licensor, Licensor may require Licensee to make an application to do so by the terms of this Agreement. Licensor reserves the right to determine whether granting a license would adversely affect its common carrier communication services and its ability to meet its duties and obligation with respect thereto, including questions of economy, safety, and future need of Licensor.
- 32.03 Licensor may, without incurring any liability, remove the cables, equipment, and facilities of Licensee from Licensor's right-of-way, at Licensee's expense where in Licensor's judgement (such judgement to be conclusive) such removal is required in connection with the performance of Licensor's service obligation or the safety of Licensor's employees. Whenever such removal has been made, Licensee will be promptly notified.

33.0 CONSTRUCTION AND MAINTENANCE OF FACILITIES

- 33.01 Licensee shall, at its own expense, make and maintain its pole attachments in a safe condition and in thorough repair, and in a manner reasonably acceptable to Licensor, and so as not to conflict with the use of said poles by Licensor or by other authorized users of said poles, or interfere with other facilities thereon or which may from time to time be placed thereon. Licensee shall, at its own expense, upon written notice from Licensor, relocate or replace its facilities placed on said poles, or transfer them to substituted poles, or perform any other work in connection with said facilities that may be required. Licensor shall give such written notice as is reasonable in the circumstances, provided, however, that in cases of emergency, (Licensor's judgment as to what constitutes an emergency to be conclusive) Licensor may arrange to relocate, remove or replace the attachments placed on said poles by Licensee, transfer them to substituted poles or perform any other work in connection with said facilities that may be required in the maintenance, replacement, removal or relocation of said poles or of the facilities thereon or which may be placed thereon, or for the service needs of Licensor, and Licensee shall reimburse Licensor for the expense thereby incurred. Attachments of Licensee to poles of Licensor, as mentioned herein shall be understood to include attachments of Licensee in space reserved for Licensor, or space which Licensor has the right to use, on poles of other companies with which Licensor now has or may hereafter have agreements for joint use and occupancy; and the use of such space by Licensee shall be subject to the terms and conditions of the agreements between Licensor and said other companies. Such authorization will not be unreasonably withheld.

- 33.02 Licensee's cable, equipment, and facilities shall be placed in, removed from, relocated in or maintained in Licensor's conduit system only when specific authorization for the work to be performed and approval of the person, firm or corporation selected by Licensee to perform the work, has been obtained in writing in advance from Licensor. Licensor retains the right to specify what, if any work shall be performed by Licensee. Such authorization will not be unreasonably withheld
- 33.03 In each instance where Licensee's cable, equipment, and facilities are to be placed in Licensor's conduit system, Licensor shall specify, among other things, the cable configuration and location of Licensee's cable, equipment, and facilities, the particular duct of the conduit system such cable will occupy, and the location where and manner in which Licensee's cable will enter and exit Licensor's conduit system.
- 33.04 Licensor's manholes shall be opened as reasonably permitted by Licensor's authorized employees or agents. Licensee shall be responsible for obtaining any necessary permits from appropriate governmental authorities to open manholes and to conduct the work operations. Licensee's employees or agents will be permitted to enter or work in Licensor's manholes only when an authorized agent or employee of Licensor is present except as provided in the next paragraph. Licensor's said agent or employee shall have the authority to terminate Licensee's work operations in and around Licensor's manholes if, in the sole discretion of said agent or employee, any hazardous conditions arise or any unsafe practices are being followed by Licensee's employees or agents. Licensee agrees to pay, in accordance with the terms and conditions of APPENDIX I, the full cost of having Licensor's agent or employee present when Licensee's work is being done in Licensor's manholes. The presence of Licensor's authorized agent or employee shall not relieve Licensee of its responsibility to conduct all of its work operations in and around Licensor's manholes in a safe and workmanlike manner. Licensee is responsible for all signage, traffic control, equipment, and personnel necessary to work in Licensor's manholes. All work shall meet Occupational Safety and Health Act (OSHA), and any local or state standards and requirements.
- 33.05 Licensee's employees will be permitted to enter or work in Licensor's manholes and conduit system without an authorized agent or employee of Licensor being present, provided that Licensee's work consists only of routine operations of testing, adjusting, regulating or inspecting Licensee's existing facilities and does not involve any placing, removing, changing or rearranging of Licensee's or Licensor's facilities. In such cases, Licensee shall notify Licensor's designated representative in advance of Licensee's operations as to the type of work to be performed, the time at which it is to be performed and where it is to take place. Licensee shall conduct all such work operation in a safe and workmanlike manner, and in accordance with the terms of this Agreement.
- 33.06 Licensee shall, at its own expense, maintain its buried communication facilities so as not to conflict with the use of the right-of-way by Licensor or other authorized users of the right-of-way. Licensee shall, at its own expense, relocate, change, or replace its facilities or perform any other work in connection with said facilities that may be reasonably required by Licensor or other authorities.

34.0 TERMINATION OF LICENSES

- 34.01 Upon notice from Licensor to Licensee that Licensor has been advised by governmental authority or private property owners that the use of any pole, conduit system, or right-of-way is not authorized and is objected to by such governmental authority or private property owner, as the case may be or that any pole, any conduit system or any right-of-way is to be removed, sold or otherwise disposed of, Licensee shall, if reasonably requested by Licensor, remove its cables, equipment, and facilities at once from the affected pole or poles or shall make arrangements for the removal of its cable, equipment, and facilities from the affected portion of Licensor's conduit system or right-of-way at Licensor's expense. If not so removed, Licensor shall have the right to remove Licensee's cable, equipment, and facilities from Licensor's right-of-way at the cost and expense of Licensee and without any liability thereto. If Licensor deems it is impractical to remove Licensee's cables, equipment or facilities from any right-of-way, they may be abandoned in place.
- 34.02 Licensee may at any time remove its facilities from any pole of Licensor, but shall immediately give Licensor written notice of such removal and surrender of license in the form of a Notification of Surrender (APPENDIX VII) hereto attached and made a part hereof. If Licensee surrenders its license but fails to remove its facilities from Licensor's poles, Licensor shall have the right to remove Licensee's facilities at Licensee's expense without any liability on the part of Licensor for damage or injury to Licensee's facilities. In the event that Licensee's cables, equipment, and facilities shall be removed from any pole as provided by this Agreement, no attachment shall again be made to such pole unless Licensee shall have first complied with all of the provisions of this Agreement as though no attachment had previously been made.
- 34.03 If Licensee desires to terminate its license for the right to occupy any part of Licensor's conduit system, Licensee shall give Licensor written notice of such surrender in the form of a Notification of Surrender (APPENDIX VII) hereto attached and made a part hereof. In such event, Licensee shall make arrangements with Licensor for the removal of Licensee's cables, equipment, and facilities from that part of Licensor's conduit system at Licensee's expense. In the event that Licensee's cables, equipment, and facilities shall be removed from Licensor's conduit system as provided by this Article, no cable, facilities or equipment shall again be placed in that part of such conduit system unless Licensee shall have first complied with all of the provisions of this Agreement as though no cables, equipment, and facilities of Licensee had previously been placed in that part of Licensor's conduit system.
- 34.04 If Licensee desires to terminate its license for the right to occupy any part of the right-of-way, Licensee shall give Licensor written notice of such surrender in the form of a Notification of Surrender (APPENDIX VII) attached hereto and made a part hereof. In such event, Licensee shall make arrangements with Licensor for the removal of Licensee's cables, equipment, and facilities from that part of the right-of-way at Licensee's expense. However, in the event it is impractical to remove Licensee's cable, equipment, and facilities from any right-of-way, they may be abandoned in place.

35.0 EMERGENCY RESTORATION PROCEDURES

- 35.01 In the event of an emergency, restoration procedures may be affected by the presence of Licensee's Attachments. While Licensor shall not be responsible for the repair of damaged Attachments of Licensee (except by mutual written agreement), Licensor shall nonetheless

control access to its poles, conduit systems or right-of- way if the restoration is to be achieved in an orderly fashion.

35.02 Where Licensor and Licensee are involved in emergency restorations, access to Licensor's poles, conduit systems or right-of-way will be controlled by Licensor's Network Construction Managers or their on-site representative according to the following guidelines.

(A) Service Disruptions/Outages

- (1) While exercising its right to first access, Licensor shall make all reasonable efforts to grant access to as many other entities with Attachments as is reasonably safe.
- (2) Where simultaneous access is not possible, Licensor will grant access on first come, first served basis.

(B) Service Affecting Emergencies

- (1) While exercising its right to first access, Licensor shall make all reasonable efforts to grant access to as many other entities with Attachments as is reasonably safe.
- (2) Where Licensor is unable to grant simultaneous access to all other entities with Attachments, access will be granted according to the level of damage to the Attachments of each entity and the likelihood that a given level of damage will result in service disruption. Where the likelihood that a service disruption will result is not clearly discernible, access will be on a first come, first served basis.

35.03 Without limiting any other indemnification or hold harmless provisions of this Agreement, Licensee agrees that any decision by Licensor regarding access to Attachments, or any action or failure to act by Licensor, under this section shall not be the basis for any claim by Licensee against Licensor for any damage to Licensee's Attachments or disruption of Licensee's services, or any other direct or indirect damages of any kind whatsoever incurred by Licensee.

36.0 ABANDONMENT

36.01 Nothing in this Agreement shall prevent or be construed to prevent Licensor from abandoning, selling, assigning, or otherwise disposing of any poles, conduit systems or other Licensor property used for Licensee's Attachments; provided, however, that Licensor shall condition any such sale, assignment, or other disposition subject to the rights granted to Licensee pursuant to this Agreement. Licensor shall promptly notify Licensee of any proposed sale, assignment, or other disposition of any poles, conduit systems or other Licensor property used for Licensee's Attachments.

AGREEMENT TERMS AND CONDITIONS

1.0 SCOPE OF AGREEMENT

- 1.01 The purpose of this Agreement is to set forth the rates, terms, conditions, and procedures under which the Licensor will provide Licensee access to Licensor's poles, ducts, innerducts, conduits, and rights-of-way.
- 1.02 Subject to the provisions of this Agreement, Licensor will issue to Licensee for any lawful communications purpose, revocable, nonexclusive licenses authorizing the attachment of Licensee's cables, equipment, and facilities to Licensor's poles or the placing of Licensee's cables, equipment, and facilities in Licensor's conduit system or within right-of-way owned or controlled by Licensor.
- 1.03 No use, however extended, of Licensor's poles, conduit system or right-of-way nor payment of any fees or charges required under this Agreement shall create or vest in Licensee any ownership or property rights in said poles, conduit system or right-of-way, but Licensee's rights therein shall be and remain a mere license. Nothing herein contained shall be construed to compel Licensor to construct, retain, extend, place, or maintain any facilities not needed for its own service requirements, unless otherwise required by law.
- 1.04 Licensee recognizes that Licensor has heretofore entered into, or may in the future enter into, agreements and arrangements with others which are not party to this Agreement regarding the poles, conduit system and right-of-way covered by this Agreement. Nothing herein contained shall be construed as a limitation, restriction or prohibition against Licensor with respect to such other agreements or arrangements. The rights of Licensee shall at all times be subject to any present or future joint use arrangement between Licensor and any other public utility or government agency.

2.0 DEFINITIONS

- 2.01 "Attachments" - Any attachment to a pole, use of a duct or innerduct, use of a conduit, or using right-of-way owned or controlled by Licensor.
- 2.02 "Attachment Fee" - Fee paid annually per attachment on a pole, or in a duct, innerduct, conduit, or right-of-way.
- 2.03 "Buried Cable" - Cable located below the surface of the ground but not in Licensor's conduit system.
- 2.04 "Conduit System" - Any combination of ducts, innerducts, conduits, manholes, and handholes owned or controlled by Licensor that is a reusable passage or opening in, on, under or through the ground, or a structure such as a building or bridge. The term includes "inner ducts" created by subdividing a duct into smaller channels.
- 2.05 "Hazardous Materials" -

- (A) Any substance, material or waste now or hereafter defined or characterized as hazardous, toxic or dangerous as defined by the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA") of 1980, as amended, and other federal, state, and local health, safety, and environmental laws, ordinances, statutes, and rules, including but not limited to the Occupational Safety and Health Act ("OSHA").
 - (B) Any substance, material or waste now or hereafter classified as a contaminant or pollutant under any law, rules, ordinance, or authority.
 - (C) Any other substance, material or waste, the manufacture, processing, distribution, use, treatment, storage, placement, disposal, removal or transportation of which is now or hereafter subject to regulation under any law, ordinance, statute, rule or regulation of any governmental body or authority.
- 2.06 "Make Ready Work" - All work to prepare Licensor's poles, ducts, innerducts, conduits, rights-of-way, and related facilities for the requested occupancy or attachment of Licensee's facilities but not the actual placement of attachments or administrative activities related to inquiries, verifications, requests or applications.
- 2.07 "Poles"- Licensor owned and poles owned by others to the extent that and for so long as Licensor has the right to permit others to be attached in the communications space.
- 2.08 "Pole Attachment Request" or "PAR" - A written request from Licensee to attach its facilities to Poles, submitted in accordance with this Agreement. With respect to pole attachment agreements in effect prior to the date the Parties executed this Agreement, the term PAR shall be deemed to include Pole Attachment Requests made by letter or similar document.
- 2.09 "Right-of-Way" - Right-of-way owned or controlled by Licensor. It does not include attachment or use of cables, poles, equipment or facilities located on a particular right-of-way. It may include private easement, or in certain instances public right-of-way granted by a governmental authority or a utility easement such as in a subdivision or development.

3.0 TERM OF AGREEMENT

- 3.01 This Agreement shall become effective upon its Effective Date and if not terminated in accordance with the provisions of other Articles hereof, shall continue in effect for a term of not less than five (5) years, provided, however, that at any time after the first year of said term the rates, fees and charges set forth may be increased or decreased by written notice from Licensor to Licensee on a nondiscriminatory basis with respect to similar rates, fees and charges of other similar licensees.
- 3.02 Either Party may terminate this Agreement with at least a (6) six month written notice to the other Party.
- 3.03 Upon termination of the Agreement in accordance with any of its terms, all outstanding licenses in connection therewith shall terminate and shall be surrendered and Licensee shall within sixty (60) days of date of termination remove all cables, equipment and facilities at the cost and expense of Licensee. If Licensor in its sole discretion, deems it is impractical to remove Licensee's cable, equipment and facilities from Licensor's rights-of-way, they may be abandoned in place.

4.0 LEGAL AUTHORITY

- 4.01 Licensee will obtain from public authorities and private owners of property any and all permits, franchises, licenses and grants necessary for the lawful exercise of any license granted hereunder

5.0 APPLICABLE LAW

- 5.01 This Agreement, and the rights and obligations contained in it, shall be governed and construed under the laws of the state in which the attachments hereunder are to be located.

6.0 SUBSEQUENT LAW

- 6.01 The terms and conditions of this Agreement shall be subject to any and all applicable laws, rules, regulations or guidelines now in effect from any federal, state or local governmental authority. In the event that any effective legislative, regulatory, judicial or other legal action by a governmental body or court of competent jurisdiction materially changes any rule, law or judicial or administrative decision that was the basis of the requirement, obligation or right upon which any provision of this Agreement was negotiated, or materially impairs the ability of the pole owner or attaching party to perform any material terms of this Agreement, the attaching party or pole owner may, on thirty (30) days' written notice request that such terms be renegotiated, and the Parties shall renegotiate in good faith such mutually acceptable new terms as may be required. In the event that such new terms are not renegotiated within ninety (90) days after such notice, the Dispute shall be referred to the Dispute Resolution procedure set forth in Section 18.0. Should any term of this Agreement be determined by a court or agency with competent jurisdiction to be unenforceable, all other terms of this Agreement shall remain in full force and effect.

7.0 DISCLAIMER OF WARRANTIES

- 7.01 Except as specifically set forth in this Agreement, Licensor makes no warranties, express or implied, including, but not limited to, any implied warranties of merchantability or fitness for a particular purpose.

8.0 LICENSE NOT EXCLUSIVE

- 8.01 Nothing herein contained shall be construed as a grant of any exclusive license, right or privilege to Licensee. Licensor shall have the right to grant, renew and extend rights and privileges to others not parties to this Agreement, by contract or otherwise, to use any poles, conduit system or right-of-way covered by this Agreement, under such terms and conditions, as Licensor shall prescribe.

9.0 ASSIGNMENT OF RIGHTS

- 9.01 Licensee shall not assign; transfer or sublet the privileges hereby granted, or sell, lease or otherwise permit the use of its facilities on or any part thereof (all of the foregoing being "Transfers"), without prior consent in writing of Licensor which consent shall not be unreasonably withheld, delayed or conditioned; provided, however, that either Party may so assign its rights and obligations under this Agreement without such consent to (i) any entity

said Party, directly or indirectly, controls, is controlled by or is under common control with or (ii) any entity acquiring all or substantially all of said Party's assets or equity, by providing written notice to the other Party of such assignment. Any attempted assignment that is not permitted under this Section 9.01 is void *ab initio*.

- 9.02 Subject to the provisions of this Agreement, this Agreement shall extend to and bind the successors and authorized assigns of the Parties hereto.

10.0 LIABILITY AND DAMAGES

- 10.01 Licensor reserves to itself, its successors and assigns, the right to maintain its poles, conduit system and right-of-way and to operate its facilities thereon in such manner as will best enable it to fulfill its own service requirements. Licensor shall not be liable to Licensee for any interruption to service of Licensee or for interference with the operation of the cables, equipment or facilities of Licensee arising in any manner out of the use of Licensor's poles, conduit system and right-of-way except caused by Licensor's sole negligence, willful misconduct or material breach of this Agreement, in which case Licensor's liability shall be limited to the reasonable cost of repair of Licensee's damaged cable, equipment or facilities, if any.
- 10.02 Licensee shall exercise special precautions to avoid damaging the cables, poles, conduits, right-of-way equipment and facilities of Licensor and of other licensees. Licensee will assume responsibility for any and all loss, damages, costs and expenses as a result of the Licensee's acts or omissions excluding such loss, damage, cost and expenses resulting from the negligence or willful misconduct of the Licensor. Licensee shall make an immediate report to Licensor of the occurrence of any such damage and hereby agrees to reimburse the respective owners for the expense incurred in making repairs.
- 10.03 Licensee shall indemnify and hold harmless Licensor against any and all claims, demands, causes of action, damages, costs or liabilities of every kind and nature whatsoever related to or arising out of this Agreement, except to the extent caused by Licensor's negligence or willful misconduct, which may arise out of or be caused by:
- (A) The erection, maintenance, presence, use or removal of Licensee's cable, equipment, and facilities on Licensor's poles, and within Licensor's conduit system and right-of-way
 - (B) Any act of Licensee on or in the vicinity of Licensor's poles, conduit system and right-of-way, or
 - (C) Any interruption, discontinuance, or interference with Licensee's service to any of its subscribers occasioned or claimed to have been occasioned by any action of Licensor pursuant to or consistent with this Agreement. Licensee shall, upon demand and at its own sole risk and expense, defend any and all suits, actions or other legal proceeding brought or instituted against Licensor on any such claim, demand or cause of action, and shall pay and satisfy any judgment or decree rendered against Licensor therein, and Licensee shall reimburse Licensor for any and all legal expense incurred by Licensor in connection therewith. Licensee shall also indemnify, protect and hold harmless Licensor from any and all claims and demands of whatever kind which arise directly or indirectly from the operation of Licensee's facilities including taxes, special charges by others,

claims and demands for damages or loss for infringement of copyright, for libel and slander for unauthorized use of television broadcast programs, and for unauthorized use of other program material, and from and/or against all claims and demands for infringement of patents with respect to the manufacturer, use and operation of Licensee's equipment whether arising from the use of Licensee's equipment in combination with Licensor's poles, conduit system, right-of-way or otherwise.

- 10.04 Licensee agrees to comply under the Workmen's Compensation Laws of the state in which attachments are to be located hereunder, and also agrees to cause every subcontractor of Licensee to comply with and qualify under said laws, and shall furnish copies of Certificates demonstrating such compliance to Licensor prior to commencement of the work.

11.0 DEFAULT AND REMEDIES

- 11.01 In addition to Material Defaults defined anywhere else in this Agreement, any one of the following shall be deemed the occurrence of a Material Default under this Agreement:

- (A) Failure by Licensee to pay any fee or other sum required to be paid under the terms of this Agreement and such default continues for a period of thirty (30) calendar days after written notice thereof to Licensee.
- (B) Failure by either Party to perform or observe any other term, condition, covenant, obligation, or provision of this Agreement and such default continues for a period of thirty (30) business days after written notice thereof from the other Party (provided that if such default is not curable within a thirty (30) business day period, the period will be extended if the Party substantially commences to cure such default and proceeds diligently thereafter to effect such cure).
- (C) The filing of any tax or mechanic's lien against Poles because of any act or omission by Licensee which is not bonded or discharged within thirty (30) calendar days of the date Licensee receives notice that such lien has been filed;
- (D) Licensor or Licensee's voluntary or involuntary bankruptcy;
- (E) Licensee's knowing use or maintenance of its Attachments in violation of any law or regulation, or in aid of any unlawful act or undertaking;
- (F) If any authorization which may be required of Licensee by any governmental or private authority for the placement, operation, or maintenance of Licensee's Attachments is denied or revoked.

- 11.02 In the event of a Material Default and subject to any other applicable provision of this Agreement, the Non-defaulting Party, without any further notice to the Defaulting Party (except where expressly provided for below or required by applicable law), may do any one or more of the following:

- (A) Perform on behalf and at the expense of the Defaulting Party, any obligation of the Defaulting Party under this Agreement which the Defaulting Party has failed to perform

and of which the Non-defaulting Party shall have given the Defaulting Party notice, the cost of which performance shall be paid by the Defaulting Party to the Non-defaulting Party upon demand;

- (B) Terminate this Agreement by giving sixty (60) business days written notice of such termination to the other Party. Where a Material Default is on behalf of Licensee, Licensor may remove Licensee's Attachments and store Licensee's facilities in a public warehouse or elsewhere at the expense of and for the account of Licensee without Licensor being deemed guilty of trespass or conversion, and without Licensor becoming liable for any loss or damages to Licensee occasioned thereby; or
- (C) Exercise any other legal or equitable right or remedy that the Non-defaulting Party may have.

11.03 The Defaulting Party shall repay to the Non-defaulting Party upon demand any costs and expenses incurred by the Non-defaulting Party (including, without limitation, reasonable attorneys' fees) in successfully enforcing this Agreement.

11.04 Upon termination of this Agreement by the Non-defaulting Party, the Defaulting Party shall remain liable to the Non-defaulting Party for any and all fees, other payments and damages which may be due or sustained in accord with this Agreement prior to such termination, all reasonable costs, fees and expenses, including, without limitation, reasonable attorney' fees incurred by the Non-defaulting Party in pursuit of its remedies hereunder.

11.05 All rights and remedies of the Non-defaulting Party set forth in this Agreement shall be cumulative and none shall exclude any other right or remedy, now or hereafter allowed by or available under any statute, ordinance, rule of court, or the common law, either at law or in equity, or both.

12.0 INDEMNIFICATION and INSURANCE

12.01 Whenever any liability is incurred by either or both of the parties hereto for damages for injuries to the employees or for injury to the property of either party, or for injuries to other persons or their property, arising out of the use and enjoyment of this easement, the liability for such damages, as between the parties hereto, shall be as follows:

- (A) Licensee, shall compensate Licensor for the full actual loss, damage or destruction of Licensor's property that in any way arises from or is related to this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation, or maintenance of Licensee's facilities).
- (B) Each party agrees to defend, indemnify, protect and hold harmless the other and the other's officers, directors, employees, shareholders, successors, assigns, agents, affiliates, representatives, partners, and contractors from and against any and all third party claims, actions, administrative proceedings (including, without limitation, informal proceedings), judgments, damages, penalties, fines, costs, liabilities, interests, or losses, including, without limitation, reasonable attorneys' fees and expenses, consultant fees, and expert fees, together with all other costs and expenses of any kind or nature suffered by or asserted against the indemnified party in any way arising out of or connected with

this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation or maintenance of Licensee's facilities, unless caused by the sole negligence or willful misconduct on the part of Licensor or Licensor's affiliates, agents, officers, employees and assigns). Each party expressly assumes all liability for actions by its affiliates, agents, officers, employees, or its contractors and expressly waives any immunity from the enforcement of this indemnification provision that might otherwise be provided by workers' compensation law or by other state or federal laws.

- (C) Without limiting any of the foregoing, Licensee assumes all risk of, and agrees to relieve Licensor of any and all liability for, loss or damage (and the consequences of loss or damage) to any facilities placed on Licensor's property and any other financial loss sustained by Licensee, except to the extent caused by the negligence or willful misconduct on the part of Licensor's agents, officers, employees, and assigns.
- (D) Without limiting the foregoing, Licensee expressly agrees to indemnify, defend, and hold harmless Licensor and Licensor's agents, officers, employees and assigns from any and all claims asserted by end users/customers of Licensee in any way arising out of or in connection with this Agreement or Licensee's facilities, except to the extent caused by the negligence or willful misconduct on the part of Licensor or Licensor's agents, officers, employees, and assigns, or its contractors.
- (E) In no event shall either Party be liable to the other for any special, consequential or indirect damages (including, without limitation, lost revenues and lost profits) arising out of this Agreement or any obligation arising hereunder, whether in an action for or arising out of breach of contract, or otherwise.
- (F) Licensee shall indemnify, protect, and hold harmless Licensor from and against any and all claims for libel and slander, copyright and/or patent infringement arising directly or indirectly by reason of installation of Licensee's equipment and facilities on Lessor's Property pursuant to this Agreement.

13.0 COMPLIANCE WITH LAW

13.01 Notwithstanding anything to the contrary in this Agreement, each Party shall ensure that any and all activities it undertakes pursuant to this Agreement shall comply with all applicable laws, including, without limitation, all applicable provisions of:

- (A) Workers' compensation laws
- (B) Unemployment compensation laws
- (C) The Federal Social Security Law
- (D) The Fair Labor Standards Act, and
- (E) All laws, regulations, rules, guidelines, policies, orders, permits and approvals or any governmental authority relating to environmental matters and/or Occupational Safety and Health Act ("OSHA").

14.0 INSURANCE

14.01 The each Party shall obtain and maintain, in full force and effect at all times, during operations covered by this Agreement, such minimum insurance as will cover the obligations and liabilities of said Party, its agents, and its employees which may arise from the operations under this Agreement. Insurance shall have limits of not less than:

(A) Commercial General Liability policy of minimum limits of:

| | |
|---|--------------------------------|
| General Aggregate | \$ 2,000,000 per policy period |
| Products/Completed Operations Aggregate | \$ 2,000,000 per policy period |
| Personal Injury/Advertising | \$ 2,000,000 per occurrence |
| Each Occurrence | \$ 2,000,000 per occurrence |
| Fire Legal Liability | \$ 50,000 any one fire |

14.02 The policy will be endorsed to show the above aggregate limits applying to "each" job site or, as an alternative, the General Aggregate will be increased to \$4,000,000 per policy period. Policy will also specifically state the coverage applies to all operations conducted by the respective Party, its employees, or agents on behalf of that Party's Corporation or subsidiary.

14.03 Where the performance of the work involves structural property, underground property, or blasting, each Party's Commercial General Liability insurance policy shall provide coverage to the insured for legal liability arising from operations under this Agreement for property damage:

- (A) arising out of blasting,
- (B) arising out of collapse of, or structural injury to, any building or structure or
- (C) To underground facilities and utilities.

14.04 Other general liability forms are acceptable in lieu of the Commercial General Liability Form, however, they are not to be used without written approval from the Company's Risk Management Department, 4001 Rodney Parham Road Little Rock, AR 72212. However, such written approval shall not be unreasonably withheld.

(A) Business Automobile Liability policy with minimum limits of:

| | |
|-----------------------|---------------------------|
| Bodily Injury | \$2,000,000 per accident |
| Property Damage | \$ 2,000,000 per accident |
| OR | |
| Combined Single Limit | \$ 2,000,000 per accident |

The policy will be issued using symbol "1 - any auto" coverage.

(B) Workers Compensation:

Part 1 - Medical Benefits Statutory

Part 2 - Employer's Liability as indicated:

| | |
|---------------------------|--------------------------|
| Bodily Injury by Accident | \$ 100,000 each accident |
| Bodily Injury by Disease | \$ 100,000 each employee |
| Bodily Injury by Disease | \$ 500,000 policy limit |

- 14.05 The policy will show the state in which operation on behalf of the Party and/or subsidiary is being conducted. For operations conducted within monopolistic (state fund) states, the Party will furnish a certificate of compliance from the appropriate state fund administrator.
- 14.06 In each and every policy in 14.04A and 14.04B, the other Party's Corporation and its subsidiaries shall be named an "additional insured" with respect to activities performed on behalf of the Party's Corporation and its subsidiaries.
- 14.07 Coverage provided by the policies listed in this paragraph will be issued by an insurance company, licensed in the state in which operations on behalf of the Party are to be conducted. It is acceptable to use both primary and excess/umbrella policies to obtain necessary limits.
- 14.08 -Licensee will furnish to the other Party, a certificate evidencing insurance coverage under sub-paragraphs 14.04-A, and 14.04-B. Such certificate shall provide for a thirty-day prior notice to the other Party of any cancellation or material changes in coverage except for ten (10) days notice of cancellation for non-payment of premium and shall be signed by a legal representative of the issuing insurance company or agent. The certificate of insurance shall be sent to the person identified at paragraph 25.03.
- 14.09 The provisions of sub-paragraphs 14.04-A and 14.04-B shall also apply to all sub-Licensees, and Licensee shall be responsible for their compliance herewith.

15.0 NON-WAIVER OF TERMS AND CONDITIONS

- 15.01 Failure to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

16.0 LICENSOR'S LIEN

- 16.01 Should Licensor under any Article of this Agreement remove Licensee's cable, equipment or facilities from Licensor's poles, conduit system or right-of-way, Licensor will deliver to Licensee the cable, equipment or facilities so removed upon payment by Licensee of the cost of removal, storage and delivery, and all other amounts due Licensor hereunder. Licensor is hereby given a lien on Licensee's cable, equipment or facilities within Licensor's conduit system or right-of-way or attached to Licensor's poles or removed therefrom, with power of public or private sale, to cover any amounts due Licensor under the provisions of this Agreement. Such liens shall not operate to prevent Licensor from pursuing, at its option, any other remedy in law, equity or otherwise, including any other remedy provided for in this Agreement.

17.0 SCHEDULE OF FEES AND CHARGES

- 17.01 Licensee may be required to furnish bond or other security satisfactory to Licensor, in a reasonable initial amount to be determined by Licensor and provided by Licensee at the time Licensee submits Exhibit B to Licensor's Attachment Application Procedures to guarantee the payment of any such sums which may become due to Licensor arising out of this Agreement including, but not limited to fees due hereunder or charges for work

performed for the benefit of Licensee under this Agreement, including the removal of Licensee's facilities upon termination of this Agreement by any of its provisions or upon termination of any License issued hereunder. Bond to be sent to person identified at paragraph 25.03. Bond is to be equal to one (1) year's annual rental fees.

17.02 The fees, rates and charges set forth in APPENDIX I or elsewhere in this Agreement are effective during the term of this Agreement subject to Section 3.01 and shall be due and payable by Licensee as set forth herein.

17.03 FEES:

All rates, charges and fees set forth in this Agreement and as shown in APPENDIX I (Schedule of Rates, Fees, and Charges) shall be subject to all applicable federal, state, and local laws, rules, regulations and commission orders.

(A) Computation:

(1) Pole and Anchor Attachment Fees:

(a) For the purpose of computing the annual pole attachment fee hereunder, for calendar years subsequent to a first partial calendar year, said fee shall be based upon the number of poles and anchors, to which attachments are actually made, as of December 31 of the preceding year, multiplied by the per attachment pole attachment fee rate set forth on APPENDIX I. For a first partial calendar year, the pole attachment fee shall be prorated as necessary, on a daily basis from the date payment is due in accordance with Exhibit B of Licensor's Attachment Application Procedures.

(b) For billing purposes, a single pole attachment includes the point of attachment and all facilities located in the usable space on the pole in the space assigned to Licensee (typically six inches above and six inches below the point of attachment). If Licensee occupies more than one usable space on a pole, separate attachment fees shall apply to each space occupied.

(2) Conduit Occupancy Fees :

(a) For the purpose of computing the total conduit occupancy fee due hereunder, the duct feet of conduit shall be measured from the center to the center of manholes; or from the center of a manhole to the end of the duct; from the center of a manhole to the property line if the duct is connected at the property line to a duct owned and controlled by a third-party property owner; or the length of a conduit from pole to pole; or isolated lengths of conduit not attached to any structure (such as involved with buried cable) which will be occupied by Licensee's cable.

(b) For billing purposes each inner duct will be billed the half duct fee. If two or more facilities occupy a duct that has not been subdivided, the half duct fee will be charged for each facility. The half duct fee will apply when others place the Licensee facility in a

duct that has not been subdivided only if the facility does not render the duct unusable.

- (3) Right-of-Way Occupancy Fees:
 - (a) This fee will be negotiated on a case by case basis. There is no established per foot rate.

(B) Payment Date:

- (1) If this Attachment License Agreement becomes effective on or prior to June 30, all attachment and occupancy fees for the remainder of that first partial calendar year shall be due and payable at the time required under Appendix I of Licensor's Attachment Application Procedures .
- (2) If an Attachment License Agreement becomes effective on or after July 1, all attachment and occupancy fees for the remainder of that current partial calendar year as well as the full upcoming calendar year shall be payable at the time required under Appendix I of Licensor's Attachment Application Procedures.
- (3) On an annual basis, all attachment and occupancy fees not previously paid are to be paid in advance, on the 31st day of January of each year or within thirty (30) days of receipt of invoice. Failure to pay such fees within thirty (30) days of the annual due date shall constitute a Material Default of this Agreement.

(C) Termination of License:

- (1) Upon termination or surrender of a license granted hereunder, no refund of any attachment or occupancy fee shall be made.

17.04 OTHER CHARGES:

(A) Computation:

- (1) All charges for inspections, engineering, or rearrangements of Licensee's facilities from Licensor's poles or conduit and, without limitation, any other work performed for Licensee shall be based upon the full cost and expense, including reasonable overhead, to Licensor for performing such work for Licensee. The cost to Licensee shall be determined in accordance with the regular and customary methods used by Licensor in determining such costs.
- (2) The charge for replacement of poles shall include the entire non-betterment cost to Licensor including the increased cost of larger poles, sacrificed life value of the poles removed, cost of removal, less any salvage recovery and the cost of transferring Licensor's facilities from the old to the new poles.
- (3) All other attachment or occupancy related inquiry, verification, application, administrative and miscellaneous rates, fees and charges shall be calculated and paid in accordance with APPENDIX I and/or Licensor's Attachment Application Procedures and Attachments thereto.

- (B) Payment Date:
 - (1) All bills for such other charges for work performed by Licensor shall be payable upon presentment to Licensee, and shall be deemed delinquent if not paid within thirty (30) days after presentment to Licensee.

18.0 DISPUTE RESOLUTION

18.01 Except in the case of:

- (A) A suit, action, or proceeding by one Party to compel the other Party to comply with its obligation to indemnify the other Party pursuant to this Agreement, or
- (B) A suit, action or proceeding to compel either Party to comply with the dispute resolution procedures set forth in this section, the Parties agree to use the following procedure to resolve any dispute, controversy, or claim arising out of or relating to this Agreement or its breach.

18.02 At the written request of a Party, each Party shall designate a knowledgeable, responsible representative to meet and negotiate in good faith to resolve any dispute, controversy, or claim arising under this Agreement. The Parties intend that these negotiations be conducted by industry accepted, business representatives. The substance of the negotiations shall be left to the discretion of the representatives. Upon mutual agreement, the representatives may utilize other alternative dispute resolution procedures such as mediation to assist in the negotiations. Discussions and correspondence between the representatives for the purposes of these negotiations shall be treated as confidential, undertaken for purposes of settlement, shall be exempt from discovery and production, and shall not be admissible in the arbitration described below or in any subsequent lawsuit without the concurrence of all Parties. Documents identified in or provided during such negotiations, which are not prepared for purposes of the negotiations, shall not be so exempt and may, if otherwise admissible, be admitted as evidence in any subsequent proceeding.

18.03 If a resolution of the dispute, controversy or claim is not reached within one hundred eighty (180) calendar days of the initial written request, the dispute, controversy, or claim shall be submitted to binding arbitration by a single arbitrator pursuant to the rules of the American Arbitration Association (AAA), except as hereinafter provided. Discovery in any proceeding before the AAA shall be Party controlled by the arbitrator and shall be permitted to the extent set forth in this section. Parties may exchange, in any combination, up to thirty-five (35) (none of which may contain subparts) written interrogatories, demands to produce documents and requests for admission. Each Party may also take the oral deposition of one (1) witness. Additional discovery may be permitted upon mutual agreement of the Parties. The arbitration hearing shall be commenced within sixty (60) calendar days of the demand for arbitration and shall be held in an agreed upon location. The arbitrator shall rule on the dispute, controversy or claim by issuing a written opinion within thirty (30) business days after the close of hearings. The times specified in this section may be extended upon mutual agreement of the Parties or by the arbitrator upon a showing of good cause. Judgement upon the award rendered by the arbitrator may be entered in any court having jurisdiction.

18.04 Each Party shall bear its own costs, including attorneys' fee, incurred in connection with any of the foregoing procedures. A Party-seeking discovery shall reimburse the responding Party the cost of reproducing documents (to include search time and reproduction time costs). The fees associated with any arbitration, including the fees of the arbitrator, shall be divided equally between the parties.

19.0 ENTIRE AGREEMENT

This Agreement and Licensor's related Attachment Application Procedures cancels and supersedes all previous agreements whether written or oral, except for any sums due thereunder, between Licensor and Licensee with respect to the attachment of Licensee's cable, equipment, and facilities to Licensor's poles or the placing Licensee's cable, equipment or facilities in Licensor's conduit system or right of way; and there are no other provisions, terms or conditions to this Agreement except as expressed herein. All currently effective licenses heretofore granted pursuant to such previous agreements shall continue in effect subject to the terms and conditions of this Agreement.

19.01 The terms and conditions of this Agreement and Licensor's related Attachment Application Procedures supersede all prior oral or written understandings between the Parties and constitute the entire Agreement between them concerning the subject matter of this Agreement. There are no understandings or representations, express or implied, not expressly set forth in this Agreement. This Agreement shall not be modified or amended except by writing signed by the Party to be charged. This Agreement is only applicable to pole applications submitted for attachment to Windstream facilities in the State of Kentucky.

GENERAL OPERATING ROUTINE

20.0 ATTACHMENT, USE AND/OR OCCUPANCY REQUEST PROCESS

20.01 There is a multi-step pole attachment or duct, innerduct, conduit or right-of-way use and/or occupancy application process and fee determination process that the Licensee may begin upon the execution of this Agreement. It is set forth below and in Licensor's related Attachment Application Procedures.

21.0 POLE ATTACHMENT REQUESTS (PAR)

21.01 The following process can begin upon the execution of this agreement. The steps are:

- (A) Pole Attachment Quote Preparation: Licensee shall submit a Pole Attachment Request Form (Exhibit B to Licensor's related Attachment Application Procedures), which may be reasonably revised from time to time by Licensor at its sole discretion, to Licensor which will include a drawing of the proposed route and contact information (name, telephone, facsimile, and email information), and all required fees, as listed in and computed in accordance with APPENDIX I, which may be changed from time to time by Licensor to remain consistent with prevailing costs, of this Agreement. These fees consist of administrative as well as other actual costs reasonably incurred in researching the requested route. Once Licensor receives the aforementioned specific attachment information and the fee from Licensee, Licensor will report on the Poles along the route, any required make-ready work, the costs and schedule for such make-ready work, and any other requirements Licensee must satisfy prior to installing its facilities. If during this process, Licensor determines any lawful reason for denying Licensee's application, Licensor will so inform Licensee. Pole attachment quotes will be provided within thirty (30) business days for standard requests. Non-standard quantities of pole attachments and distances will be addressed on an individual case basis, and in a commercially reasonable period.
- (B) Pole Attachment Order: Upon completion of the work identified above, Licensor will inform Licensee if Licensor will provide Licensee a Pole Order Form (Appendix VI to the Licensor's related Attachment Application Procedures) which may be revised from time to time by Licensor at its sole discretion, containing estimated make-ready cost (if any), annual recurring charges and any additional information necessary for Licensee to proceed with attaching its facilities to Licensor's Poles. If Licensee desires to attach to Licensor's poles, and pole make-ready work is required, Licensee shall pay the estimated make-ready cost prior to Licensor beginning any work. Actual costs incurred by Licensor in performing the make-ready work will be applied to the estimated make-ready costs. Any reasonable costs in excess of the estimated cost will be billed to Licensee. Any payment of the estimated costs in excess of actual pole attachment make-ready costs will be returned to Licensee. If Licensee declines to proceed, all fees incurred to date will be billable to Licensee by Licensor.

21.02 Licensee has thirty (30) days to pay the estimated make-ready work or cancel the PAR.

21.03 Upon completion of the make-ready work, the receipt of all payments and fees, and the signing of this Agreement, an "Approved" Attachment I shall be returned to the Licensee. At that time

Licensee will be considered to have been granted a License with respect to the poles approved in the PARON and may attach to Licensor's facilities.

22.0 SURVEYS AND INSPECTIONS OF LICENSEE'S FACILITIES

21.01 Licensor reserves the right to inspect each new installation or work operation of Licensee on or within Licensor's facilities. The making of inspections or the failure to make inspections shall not relieve Licensee of any responsibility, obligation or liability imposed by this Agreement.

23.0 ISSUANCE OF LICENSES

23.01 Before Licensee shall have a right to attach to any pole of Licensor, Licensee shall make application for and receive a revocable, nonexclusive license therefore in the form of an approved Application for Pole License (APPENDIX VI and Exhibit B to Licensor's related Attachment Application Procedures).

23.02 Before Licensee shall have the right to place any cable, equipment or facilities within any conduit system or right-of-way of Licensor, Licensee shall make application for and receive a revocable, nonexclusive license therefore in the form of an approved Application for Conduit or Right-of-Way License (APPENDIX IV and Exhibit B to Licensor's related Attachment Application Procedures), hereto attached and made a part hereof.

23.03 Any license granted hereunder for attachment to Licensor's poles shall terminate without further notice to Licensee as to individual poles covered by the license to which Licensee has not attached within ninety (90) days from the date that Licensor has notified Licensee that such poles are available for attachment of the operating facilities of Licensee, unless Licensor, in the exercise of its sole discretion, agrees to extend said period at the request of Licensee.

23.05 Any license granted hereunder for placement of Licensee's facilities in Licensor's conduit system shall terminate without further notice to Licensee as to individual sections of Licensor's conduit system covered by the license in which Licensee has not placed its facilities within one hundred twenty (120) days from the date that Licensor has notified Licensee that such sections of the conduit system are available for the placement of operating facilities of Licensee, unless Licensor, in the exercise of its sole discretion, agrees to extend said period at the request of Licensee.

24.0 AUTHORITY TO PLACE ATTACHMENTS

24.01 Before any attachments or placement of facilities Licensee shall submit evidence that Licensee has the authority to maintain Attachments within public rights-of-way or on private right-of-way or on private property. Licensee shall be solely responsible for obtaining all licenses, authorizations, permits and consents from federal, state and local authorities or private land owners that may be required to place and maintain facilities on Licensor's poles or within Licensor's conduit, duct or right-of-way.

25.0 NOTICES (OF MODIFICATION OR ALTERATION OF POLES)

25.01 In the event Licensor plans to modify or alter any Licensor Poles upon which Licensee has placed Attachments, Licensor, except in emergency situations, shall provide Licensee written notice of the proposed modification or alteration at least ninety (90) business days prior to the time the proposed modification or alteration is scheduled to take place. Should Licensee decide to modify or alter Licensee's Facilities on Poles, Licensee shall so notify Licensor in writing at least ninety (90) business days prior to the day the work is to begin. In such event,

Licensee shall bear a proportionate share of the total costs incurred by Licensor to make Licensor Poles accessible. Licensee's proportionate share of the total cost shall be based on the ratio of the amount of new space occupied by Licensee to the total amount of new space occupied by all of the parties joining in the modification. Licensee is not responsible for any costs of Licensor's modifications or alterations of its Poles.

- 25.02 In the event Licensor is required to move the location of, or replace, any Licensor Pole(s) for reasons beyond its control, Licensee concurrently shall relocate Licensee's Attachments. Licensee shall be solely responsible for the costs of the relocation of Licensee's Attachments. When it is mutually agreed that it is in the best interest of Licensor and Licensee, Licensor will, after proper notification has been provided, transfer Licensee's Attachments at the same time that Licensor transfers its Attachments. The rate charged for these transfers is listed in this Agreement (APPENDIX I). The rate for transfers may be adjusted by Licensor from time to time to remain consistent with prevailing costs.
- 25.03 Notices under this Agreement may be given and shall be deemed to have been given, by posting the same in first class mail to Licensee as follows:

LICENSOR:

Company Name: **Windstream Kentucky East, LLC**

By: Thomas A. Hudock, Jr.

26.0 REQUIREMENTS AND SPECIFICATIONS FOR ATTACHMENT TO POLES

26.01 Licensee's cables, equipment, and facilities shall be placed and maintained in accordance with the requirements and specifications attached hereto and as set forth in Licensor's related Attachment Application Procedures and made a part hereof, and in accordance with the requirements and specifications of the National Electric Safety Code (most recent edition) and the National Electric Code (most recent edition), and in compliance with any other rules or orders now in effect or that may hereafter be issued by any state utility commission or other authority having jurisdiction.

27.0 PLACEMENT OF ATTACHMENTS

27.01 Licensee shall, at its own expense, place and maintain and replace its Attachments on Licensor's Poles in accordance with:

- (A) Such reasonable requirements and specifications as Licensor shall from time to time prescribe in writing in Licensor's Attachment Application Procedures or otherwise,
- (B) In compliance with any rules or orders now in effect or that hereafter may be issued by any regulatory agency or other authority having jurisdiction, and
- (C) All currently applicable requirements and specifications of the National Electrical Safety Code, National Electric Code, most current edition or any amendment or revision of said Code. Licensee agrees to comply, at its sole risk and expense, with all specifications hereto, as may be revised from time to time by Licensor. Licensor will provide supervision at Licensee's expense if Licensor believes it is required.

27.02 Licensee's Facilities shall be tagged at maximum intervals of 300 feet so as to identify Licensee as the owner of the Facility. The tags shall be of sufficient size and lettering so as to be easily read from ground level.

28.0 MODIFICATIONS, ADDITIONS OR POLE REPLACEMENTS AND REARRANGEMENTS

28.01 Licensee shall not modify, add to, or replace facilities on any pre-existing Attachment on an Licensor Pole without first notifying Licensor in writing of the intended modification, addition or replacement at least thirty (30) business days prior to the date the activity is scheduled to begin. The required notification shall include:

- (A) The date the activity is scheduled to begin,
- (B) A description of the planned modification, addition, or replacement,

- (C) A representation that the modification, addition, or replacement will not require any space other than the space previously designated for Licensee's Attachments, and
 - (D) A representation that the modification, addition, or replacement will not impair the structural integrity of the Poles involved.
- 28.02 Should Licensor determine that the modification, addition, or replacement specified by Licensee in its notice will require more space than that allocated to Licensee or will require the rearrangements of, reinforcement of, replacement of, or an addition of support equipment to the Poles involved in order to accommodate Licensee's modification, addition, or replacement, Licensor will so notify Licensee, whereupon Licensee will be required to submit a PAR in compliance with this Agreement in order to obtain authorization for the modification, addition, or replacement of its Attachments.
- 28.03 Should Licensee request Licensor to expand capacity or purchase additional plant, Licensee agrees to pay all reasonable costs. If Licensor or another party that has been granted a license joins in the request and will benefit from the expansion or purchase, Licensee agrees to pay a percentage of all costs proportionate to Licensee's share of the benefit received from the expansion or purchase.
- 28.04 When multiple applications, including application of Licensee, are received by Licensor with respect to any pole which must be replaced or rearranged to provide additional space prior to commencement of the work on that pole a Transfer Attachment Fee may be charged. Licensor will equitably prorate to the extent that it is practical between Licensee and other applicants for the pole space, the common expenses of engineering, rearrangement, and replacement, if any, which result from the processing of multiple applications. . Licensee shall be bound by Licensor's determination as to any such pro-ration of Transfer Attachment Fee to Licensee.

29.0 UNAUTHORIZED ATTACHMENTS

- 29.01 If any cable, equipment or facilities of Licensee shall be found on a pole or within a conduit or right-of-way for which no license is outstanding, Licensor, without prejudice to its other rights or remedies under this Agreement or otherwise, may:
- (A) Impose a charge, and
 - (B) Require Licensee to remove such cable, equipment or facilities forthwith or Licensor may remove them without liability and the expense of removal shall be borne by Licensee. For the purpose of determining the charge, Licensee shall pay liquidated damages that will not exceed an amount equal to the annual pole attachment fee for the number of years the unauthorized attachments have existed (or, if that cannot be determined, the number or years since the most recent inventory or five years, whichever is less), plus interest at a rate set for that period by the IRS for individual underpayments pursuant to Section 6621 of the IRS Code. Any such charge imposed by Licensor shall be in addition to its rights to any other sums due and payable, including without limitation the actual costs of any audit or survey which established the existence of the unauthorized attachments and to any claims to said fees or said unlicensed use shall be deemed as a ratification or the licensing of the unlicensed use, and if any license should subsequently be issued, after application and payment of the application fee therefore,

said license shall not operate retroactively or constitute a waiver by Licensor of any of its rights or privileges under this Agreement or otherwise.

29.02 For purposes of this section, an unauthorized Attachment shall include, but not limited to:

- (A) An Attachment to a Pole which is not identified in any PARON (APPENDIX VI) issued in accordance with this Agreement;
- (B) An Attachment that occupies more space than that allocated to Licensee By Licensor;
- (C) An attachment that is not placed in accordance with the provisions of this Agreement or the appropriate PARON (APPENDIX VI) issued pursuant to this Agreement, unless Licensee can demonstrate to Licensor's reasonable satisfaction that said misplacement is not due to any act or omission of Licensee or Licensee's agents;
- (D) An addition or modification by Licensee to its pre-existing Attachment(s) that impairs the structural integrity of the involved Licensor Pole(s).
- (E) An Attachment that consists of facilities owned or controlled by, and for the use of a Party other than Licensee.

29.03 Once Licensor has notified Licensee of an unauthorized attachment. Licensee can submit a PAR to request an authorized attachment. A PAR submitted per this provision will be treated like any other PAR subject to this Agreement. Licensee will be responsible for all fees associated with a PAR (as identified in this Agreement). If a PAR is not received by Licensor within ten (10) business days of Licensee's receipt of an unauthorized attachment notification, Licensee has sixty (60) business days from the date of its receipt of the initial unauthorized attachment notification to vacate the Pole.

30.0 FAILURE TO PLACE ATTACHMENTS

30.01 Once Licensee has been issued a PARON (APPENDIX VI), Licensee shall have ninety (90) calendar days from the date of the PARON (APPENDIX VI) to begin the placement of its Attachments on the Licensor Poles covered by the PARON (APPENDIX VI). If Licensee has not begun placing its Attachments within that ninety-(90) calendar day period, Licensee shall so advise Licensor with a written explanation for the delay. If Licensee fails to advise Licensor of its delay, with a written explanation therefore, or if Licensee fails to act in good faith by not making a bona fide effort to begin placing its Attachments within the ninety (90) calendar days prescribed by this section, the previously issued PARON shall be deemed rescinded by Licensor and Licensee shall have no further right to place Attachments pursuant to that PARON.

31.0 OCCUPANCY OF CONDUIT SYSTEM

31.01 When Licensee submits an application for a license to place its cables, equipment, and facilities in the conduit system of Licensor, Licensor will advise Licensee of the availability of conduit space in accordance with Licensor's Attachment Application Procedures. In determining the

availability of space in Licensor's conduit system, Licensor reserves the right to deny the granting of a license for any non-discriminatory lawful reason, including without limitation, insufficient capacity or reasons of safety, reliability and generally applicable engineering purposes. If conduit space is available, a license to occupy a portion of conduit system will be granted to Licensee, provided, however, that Licensor does not warrant the condition of such conduit system.

- 31.02 Licensor reserves the right to exclude cable, equipment, and facilities of Licensee from Licensor's conduit system, or to limit the type, number and size of Licensee's cable, equipment, and facilities which may be placed in any of Licensor's manholes.

32.0 OCCUPANCY OF RIGHT-OF-WAY

- 32.01 Licensor and Licensee agree that neither party has the right to restrict or interfere with the other party's lawful access to and use of public right-of-way, including public right-of-way, which pass over property owned by either party. Except as otherwise specifically provided in this Agreement, Licensor and Licensee shall each be responsible for obtaining their own right-of-way and permission to use real or personal property owned or controlled by any governmental body.

- 32.02 In the event that Licensee desires to occupy right-of-way owned or controlled by Licensor, Licensor may require Licensee to make an application to do so by the terms of this Agreement. Licensor reserves the right to determine whether granting a license would adversely affect its common carrier communication services and its ability to meet its duties and obligation with respect thereto, including questions of economy, safety, and future need of Licensor.

- 32.03 Licensor may, without incurring any liability, remove the cables, equipment, and facilities of Licensee from Licensor's right-of-way, at Licensee's expense where in Licensor's judgement (such judgement to be conclusive) such removal is required in connection with the performance of Licensor's service obligation or the safety of Licensor's employees. Whenever such removal has been made, Licensee will be promptly notified.

33.0 CONSTRUCTION AND MAINTENANCE OF FACILITIES

- 33.01 Licensee shall, at its own expense, make and maintain its pole attachments in a safe condition and in thorough repair, and in a manner reasonably acceptable to Licensor, and so as not to conflict with the use of said poles by Licensor or by other authorized users of said poles, or interfere with other facilities thereon or which may from time to time be placed thereon. Licensee shall, at its own expense, upon written notice from Licensor, relocate or replace its facilities placed on said poles, or transfer them to substituted poles, or perform any other work in connection with said facilities that may be required. Licensor shall give such written notice as is reasonable in the circumstances, provided, however, that in cases of emergency, (Licensor's judgment as to what constitutes an emergency to be conclusive) Licensor may arrange to relocate, remove or replace the attachments placed on said poles by Licensee, transfer them to substituted poles or perform any other work in connection with said facilities that may be required in the maintenance, replacement, removal or relocation of said poles or of the facilities thereon or which may be placed thereon, or for the service needs of Licensor, and Licensee shall reimburse Licensor for the expense thereby incurred. Attachments of Licensee to poles of Licensor, as mentioned herein shall be understood to include attachments of Licensee in space

reserved for Licensor, or space which Licensor has the right to use, on poles of other companies with which Licensor now has or may hereafter have agreements for joint use and occupancy; and the use of such space by Licensee shall be subject to the terms and conditions of the agreements between Licensor and said other companies. Such authorization will not be unreasonably withheld.

- 33.02 Licensee's cable, equipment, and facilities shall be placed in, removed from, relocated in or maintained in Licensor's conduit system only when specific authorization for the work to be performed and approval of the person, firm or corporation selected by Licensee to perform the work, has been obtained in writing in advance from Licensor. Licensor retains the right to specify what, if any work shall be performed by Licensee. Such authorization will not be unreasonably withheld
- 33.03 In each instance where Licensee's cable, equipment, and facilities are to be placed in Licensor's conduit system, Licensor shall specify, among other things, the cable configuration and location of Licensee's cable, equipment, and facilities, the particular duct of the conduit system such cable will occupy, and the location where and manner in which Licensee's cable will enter and exit Licensor's conduit system.
- 33.04 Licensor's manholes shall be opened as reasonably permitted by Licensor's authorized employees or agents. Licensee shall be responsible for obtaining any necessary permits from appropriate governmental authorities to open manholes and to conduct the work operations. Licensee's employees or agents will be permitted to enter or work in Licensor's manholes only when an authorized agent or employee of Licensor is present except as provided in the next paragraph. Licensor's said agent or employee shall have the authority to terminate Licensee's work operations in and around Licensor's manholes if, in the sole discretion of said agent or employee, any hazardous conditions arise or any unsafe practices are being followed by Licensee's employees or agents. Licensee agrees to pay, in accordance with the terms and conditions of APPENDIX I, the full cost of having Licensor's agent or employee present when Licensee's work is being done in Licensor's manholes. The presence of Licensor's authorized agent or employee shall not relieve Licensee of its responsibility to conduct all of its work operations in and around Licensor's manholes in a safe and workmanlike manner. Licensee is responsible for all signage, traffic control, equipment, and personnel necessary to work in Licensor's manholes. All work shall meet Occupational Safety and Health Act (OSHA), and any local or state standards and requirements.
- 33.05 Licensee's employees will be permitted to enter or work in Licensor's manholes and conduit system without an authorized agent or employee of Licensor being present, provided that Licensee's work consists only of routine operations of testing, adjusting, regulating or inspecting Licensee's existing facilities and does not involve any placing, removing, changing or rearranging of Licensee's or Licensor's facilities. In such cases, Licensee shall notify Licensor's designated representative in advance of Licensee's operations as to the type of work to be performed, the time at which it is to be performed and where it is to take place. Licensee shall conduct all such work operation in a safe and workmanlike manner, and in accordance with the terms of this Agreement.
- 33.06 Licensee shall, at its own expense, maintain its buried communication facilities so as not to conflict with the use of the right-of-way by Licensor or other authorized users of the right-of-way. Licensee shall, at its own expense, relocate, change, or replace its facilities or perform any

other work in connection with said facilities that may be reasonably required by Licensor or other authorities.

34.0 TERMINATION OF LICENSES

- 34.01 Upon notice from Licensor to Licensee that Licensor has been advised by governmental authority or private property owners that the use of any pole, conduit system, or right-of-way is not authorized and is objected to by such governmental authority or private property owner, as the case may be or that any pole, any conduit system or any right-of-way is to be removed, sold or otherwise disposed of, Licensee shall, if reasonably requested by Licensor, remove its cables, equipment, and facilities at once from the affected pole or poles or shall make arrangements for the removal of its cable, equipment, and facilities from the affected portion of Licensor's conduit system or right-of-way at Licensor's expense. If not so removed, Licensor shall have the right to remove Licensee's cable, equipment, and facilities from Licensor's right of way at the cost and expense of Licensee and without any liability thereto. If Licensor and Licensee deem it is impractical to remove Licensee's cables, equipment or facilities from any right-of-way, they may be abandoned in place.
- 34.02 Licensee may at any time remove its facilities from any pole of Licensor, but shall immediately give Licensor written notice of such removal and surrender of license in the form of a Notification of Surrender (APPENDIX VII) hereto attached and made a part hereof. If Licensee surrenders its license but fails to remove its facilities from Licensor's poles, Licensor shall have the right to remove Licensee's facilities at Licensee's expense without any liability on the part of Licensor for damage or injury to Licensee's facilities. In the event that Licensee's cables, equipment, and facilities shall be removed from any pole as provided by this Agreement, no attachment shall again be made to such pole unless Licensee shall have first complied with all of the provisions of this Agreement as though no attachment had previously been made.
- 34.03 If Licensee desires to terminate its license for the right to occupy any part of Licensor's conduit system, Licensee shall give Licensor written notice of such surrender in the form of a Notification of Surrender (APPENDIX VII) hereto attached and made a part hereof. In such event, Licensee shall make arrangements with Licensor for the removal of Licensee's cables, equipment, and facilities from that part of Licensor's conduit system at Licensee's expense. In the event that Licensee's cables, equipment, and facilities shall be removed from Licensor's conduit system as provided by this Article, no cable, facilities or equipment shall again be placed in that part of such conduit system unless Licensee shall have first complied with all of the provisions of this Agreement as though no cables, equipment, and facilities of Licensee had previously been placed in that part of Licensor's conduit system.
- 34.04 If Licensee desires to terminate its license for the right to occupy any part of the right-of-way, Licensee shall give Licensor written notice of such surrender in the form of a Notification of Surrender (APPENDIX VII) attached hereto and made a part hereof. In such event, Licensee shall make arrangements with Licensor for the removal of Licensee's cables, equipment, and facilities from that part of the right-of-way at Licensee's expense. However, in the event it is impractical to remove Licensee's cable, equipment, and facilities from any right-of-way, they may be abandoned in place.

35.0 EMERGENCY RESTORATION PROCEDURES

35.01 In the event of an emergency, restoration procedures may be affected by the presence of Licensee's Attachments. While Licensor shall not be responsible for the repair of damaged Attachments of Licensee (except by mutual written agreement), Licensor shall nonetheless control access to its poles, conduit systems or right-of-way if the restoration is to be achieved in an orderly fashion.

35.02 Where Licensor and Licensee are involved in emergency restorations, access to Licensor's poles, conduit systems or right-of-way will be controlled by Licensor's Network Construction Managers or their on-site representative according to the following guidelines.

(A) Service Disruptions/Outages

- (1) While exercising its right to first access, Licensor shall make all reasonable efforts to grant access to as many other entities with Attachments as is reasonably safe.
- (2) Where simultaneous access is not possible, Licensor will grant access on first come, first served basis.

(B) Service Affecting Emergencies

- (1) While exercising its right to first access, Licensor shall make all reasonable efforts to grant access to as many other entities with Attachments as is reasonably safe.
- (2) Where Licensor is unable to grant simultaneous access to all other entities with Attachments, access will be granted according to the level of damage to the Attachments of each entity and the likelihood that a given level of damage will result in service disruption. Where the likelihood that a service disruption will result is not clearly discernible, access will be on a first come, first served basis.

35.03 Without limiting any other indemnification or hold harmless provisions of this Agreement, Licensee agrees that any decision by Licensor regarding access to Attachments, or any action or failure to act by Licensor, under this section shall not be the basis for any claim by Licensee against Licensor for any damage to Licensee's Attachments or disruption of Licensee's services, or any other direct or indirect damages of any kind whatsoever incurred by Licensee -.

36.0 ABANDONMENT

36.01 Nothing in this Agreement shall prevent or be construed to prevent Licensor from abandoning, selling, assigning, or otherwise disposing of any poles, conduit systems or other Licensor property used for Licensee's Attachments; provided, however, that Licensor shall condition any such sale, assignment, or other disposition subject to the rights granted to Licensee pursuant to this Agreement. Licensor shall promptly notify Licensee of any proposed sale, assignment, or other disposition of any poles, conduit systems or other Licensor property used for Licensee's Attachments.

AGREEMENT TERMS AND CONDITIONS

1.0 SCOPE OF AGREEMENT

- 1.01 The purpose of this Agreement is to set forth the rates, terms, conditions, and procedures under which the Licensor will provide Licensee access to Licensor's poles, ducts, innerducts, conduits, and rights-of-way.
- 1.02 Subject to the provisions of this Agreement, Licensor will issue to Licensee for any lawful communications purpose, revocable, nonexclusive licenses authorizing the attachment of Licensee's cables, equipment, and facilities to Licensor's poles or the placing of Licensee's cables, equipment, and facilities in Licensor's conduit system or within right-of-way owned or controlled by Licensor.
- 1.03 No use, however extended, of Licensor's poles, conduit system or right-of-way nor payment of any fees or charges required under this Agreement shall create or vest in Licensee any ownership or property rights in said poles, conduit system or right-of-way, but Licensee's rights therein shall be and remain a mere license. Nothing herein contained shall be construed to compel Licensor to construct, retain, extend, place, or maintain any facilities not needed for its own service requirements, unless otherwise required by law.
- 1.04 Licensee recognizes that Licensor has heretofore entered into, or may in the future enter into, agreements and arrangements with others which are not party to this Agreement regarding the poles, conduit system and right-of-way covered by this Agreement. Nothing herein contained shall be construed as a limitation, restriction or prohibition against Licensor with respect to such other agreements or arrangements. The rights of Licensee shall at all times be subject to any present or future joint use arrangement between Licensor and any other public utility or government agency.

2.0 DEFINITIONS

- 2.01 "Attachments" - Any attachment to a pole, use of a duct or innerduct, use of a conduit, or using right-of-way owned or controlled by Licensor.
- 2.02 "Attachment Fee" - Fee paid annually per attachment on a pole, or in a duct, innerduct, conduit, or right-of-way.
- 2.03 "Buried Cable" - Cable located below the surface of the ground but not in Licensor's conduit system.
- 2.04 "Conduit System" - Any combination of ducts, innerducts, conduits, manholes, and handholes owned or controlled by Licensor that is a reusable passage or opening in, on, under or through the ground, or a structure such as a building or bridge. The term includes "inner ducts" created by subdividing a duct into smaller channels.
- 2.05 "Hazardous Materials" -

- (A) Any substance, material or waste now or hereafter defined or characterized as hazardous, toxic or dangerous as defined by the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA") of 1980, as amended, and other federal, state, and local health, safety, and environmental laws, ordinances, statutes, and rules, including but not limited to the Occupational Safety and Health Act ("OSHA").
 - (B) Any substance, material or waste now or hereafter classified as a contaminant or pollutant under any law, rules, ordinance, or authority.
 - (C) Any other substance, material or waste, the manufacture, processing, distribution, use, treatment, storage, placement, disposal, removal or transportation of which is now or hereafter subject to regulation under any law, ordinance, statute, rule or regulation of any governmental body or authority.
- 2.06 "Make Ready Work" - All work to prepare Licensor's poles, ducts, innerducts, conduits, rights-of-way, and related facilities for the requested occupancy or attachment of Licensee's facilities but not the actual placement of attachments or administrative activities related to inquiries, verifications, requests or applications.
- 2.07 "Poles"- Licensor owned and poles owned by others to the extent that and for so long as Licensor has the right to permit others to be attached in the communications space.
- 2.08 "Pole Attachment Request" or "PAR" - A written request from Licensee to attach its facilities to Poles, submitted in accordance with this Agreement. With respect to pole attachment agreements in effect prior to the date the Parties executed this Agreement, the term PAR shall be deemed to include Pole attachment requests made by letter or similar document.
- 2.09 "Right-of-Way" - Right-of-way owned or controlled by Licensor. It does not include attachment or use of cables, poles, equipment or facilities located on a particular right-of-way. It may include private easement, or in certain instances public right-of-way granted by a governmental authority or a utility easement such as in a subdivision or development.

3.0 TERM OF AGREEMENT

- 3.01 This Agreement shall become effective upon its execution and if not terminated in accordance with the provisions of other Articles hereof, shall continue in effect for a term of three (3) years, provided, however, that at any time after the first year of said term the rates, fees and charges set forth may be increased or decreased by written notice from Licensor to Licensee on a nondiscriminatory basis with respect to similar rates, fees and charges of other similar licensees
- 3.02 After the initial 3 year term, either Party may terminate this Agreement with at least a (6) six month written notice to the other Party.
- 3.03 Upon termination of the Agreement in accordance with any of its terms, all outstanding licenses in connection therewith shall terminate and shall be surrendered and Licensee shall within (90) ninety days of date of termination remove all cables, equipment and facilities at the cost and expense of Licensee. If Licensor in its sole discretion, deems it is impractical to remove Licensee's cable, equipment and facilities from Licensor's rights-of-way, they may be abandoned in place.

4.0 LEGAL AUTHORITY

4.01 Licensee will obtain from public authorities and private owners of property any and all permits, franchises, licenses and grants necessary for the lawful exercise of any license granted hereunder

5.0 APPLICABLE LAW

5.01 This Agreement, and the rights and obligations contained in it, shall be governed and construed under the laws of the state in which the attachments hereunder are to be located.

6.0 SUBSEQUENT LAW

6.01 The terms and conditions of this Agreement shall be subject to any and all applicable laws, rules, regulations or guidelines now in effect from any federal, state or local governmental authority. In the event that any effective legislative, regulatory, judicial or other legal action by a governmental body or court of competent jurisdiction materially changes any rule, law or judicial or administrative decision that was the basis of the requirement, obligation or right upon which any provision of this Agreement was negotiated, or materially impairs the ability of the pole owner or attaching party to perform any material terms of this Agreement, the attaching party or pole owner may, on thirty (30) days' written notice request that such terms be renegotiated, and the Parties shall renegotiate in good faith such mutually acceptable new terms as may be required. In the event that such new terms are not renegotiated within ninety (90) days after such notice, the Dispute shall be referred to the Dispute Resolution procedure set forth in Section 18.0. Should any term of this Agreement be determined by a court or agency with competent jurisdiction to be unenforceable, all other terms of this Agreement shall remain in full force and effect.

7.0 DISCLAIMER OF WARRANTIES

7.01 Except as specifically set forth in this Agreement, Licensor makes no warranties, express or implied, including, but not limited to, any implied warranties of merchantability or fitness for a particular purpose.

8.0 LICENSE NOT EXCLUSIVE

8.01 Nothing herein contained shall be construed as a grant of any exclusive license, right or privilege to Licensee. Licensor shall have the right to grant, renew and extend rights and privileges to others not parties to this Agreement, by contract or otherwise, to use any poles, conduit system or right-of-way covered by this Agreement, under such terms and conditions, as Licensor shall prescribe.

9.0 ASSIGNMENT OF RIGHTS

9.01 Licensee shall not assign; transfer or sublet the privileges hereby granted, or sell, lease or otherwise permit the use of its facilities on or any part thereof (all of the foregoing being "Transfers"), without prior consent in writing of Licensor which consent shall not be unreasonably withheld, delayed or conditioned; provided, however, that either Party may so Transfer its rights and obligations under this Agreement without such consent to (i) any entity said Party, directly or indirectly, controls, is controlled by or is under common control with or (ii) any entity acquiring all or substantially all of said Party's assets or equity, by providing written

notice to the other Party of such Transfer. Any attempted Transfer that is not permitted under this Section 9.01 is void *ab initio*.

- 9.02 Subject to the provisions of this Agreement, this Agreement shall extend to and bind the successors and authorized assigns of the Parties hereto.

10.0 LIABILITY AND DAMAGES

- 10.01 Licensor reserves to itself, its successors and assigns, the right to maintain its poles, conduit system and right-of-way and to operate its facilities thereon in such manner as will best enable it to fulfill its own service requirements. Licensor shall not be liable to Licensee for any interruption to service of Licensee or for interference with the operation of the cables, equipment or facilities of Licensee arising in any manner out of the use of Licensor's poles, conduit system and right-of-way except to the extent caused by Licensor's negligence, willful misconduct or material breach of this Agreement, in which case Licensor's liability shall be limited to the reasonable cost of repair of Licensee's damaged cable, equipment or facilities, if any.
- 10.02 Licensee shall exercise special precautions to avoid damaging the cables, poles, conduits, right-of-way equipment and facilities of Licensor and of other licenses and hereby assumes all responsibility for any and all loss, damages, costs and expenses. Licensee shall make an immediate report to Licensor of the occurrence of any such damage and hereby agrees to reimburse the respective owners for the expense incurred in making repairs.
- 10.03 Licensee shall indemnify and hold harmless Licensor against any and all claims, demands, causes of action, damages, costs or liabilities of every kind and nature whatsoever, except to the extent caused by Licensor's negligence or willful misconduct, which may arise out of or be caused by:
- (A) The erection, maintenance, presence, use or removal of Licensee's cable, equipment, and facilities on Licensor's poles, and within Licensor's conduit system and right-of-way
 - (B) Any act of Licensee on or in the vicinity of Licensor's poles, conduit system and right-of-way, or
 - (C) Any interruption, discontinuance, or interference with Licensee's service to any of its subscribers occasioned or claimed to have been occasioned by any action of Licensor pursuant to or consistent with this Agreement. Licensee shall, upon written demand and at its own sole risk and expense, defend any and all suits, actions or other legal proceeding brought or instituted against Licensor on any such claim, demand or cause of action, and shall pay and satisfy any judgment or decree rendered against Licensor therein, and Licensee shall also indemnify, protect and hold harmless Licensor from any and all claims and demands of whatever kind which arise directly or indirectly from the operation of Licensee's facilities including taxes, special charges by others, claims and demands for damages or loss for infringement of copyright, for libel and slander for unauthorized use of television broadcast programs, and for unauthorized use of other program material, and from and/or against all claims and demands for infringement of patents with respect to the manufacturer, use and operation of Licensee's equipment whether arising from the use of Licensee's equipment in combination with Licensor's poles, conduit system, right-of-way or otherwise.

- 10.04 Licensee agrees to comply under the Workmen's Compensation Laws of the state in which attachments are to be located hereunder, and also agrees to cause every subcontractor of Licensee to comply with and qualify under said laws, and shall furnish copies of Certificates demonstrating such compliance to Licensor prior to commencement of the work.

11.0 DEFAULT AND REMEDIES

- 11.01 In addition to Material Defaults defined anywhere else in this Agreement, any one of the following shall be deemed the occurrence of a Material Default under this Agreement:

- (A) Failure by Licensee to pay any fee or other sum required to be paid under the terms of this Agreement and such default continues for a period of thirty (30) calendar days after receipt of written notice thereof by Licensee.
- (B) Failure by either Party to perform or observe any other term, condition, covenant, obligation, or provision of this Agreement and such default continues for a period of thirty (30) business days after receipt of written notice thereof by such other Party (provided that if such default is not curable within a thirty (30) business day period, the period will be extended if the Party substantially commences to cure such default and proceeds diligently thereafter to effect such cure).
- (C) The filing of any tax or mechanic's lien against Poles because of any act or omission by Licensee which is not bonded or discharged within thirty (30) calendar days of the date Licensee receives notice that such lien has been filed;
- (D) Licensor or Licensee's voluntary or involuntary bankruptcy;
- (E) Licensee's knowing use or maintenance of its Attachments in violation of any law or regulation, or in aid of any unlawful act or undertaking;
- (F) If any authorization which may be required of Licensee by any governmental or private authority for the placement, operation, or maintenance of Licensee's Attachments is denied or revoked.

- 11.02 In the event of a Material Default and subject to any other applicable provision of this Agreement, the Non-defaulting Party, without any further notice to the Defaulting Party (except where expressly provided for below or required by applicable law), may do any one or more of the following:

- (A) Perform on behalf and at the expense of the Defaulting Party, any obligation of the Defaulting Party under this Agreement which the Defaulting Party has failed to perform and of which the Non-defaulting Party shall have given the Defaulting Party notice, the actual, documented cost of which performance shall be paid by the Defaulting Party to the Non-defaulting Party within thirty (30) days of an itemized invoice;
- (B) Terminate this Agreement by giving sixty (60) business days written notice of such termination to Licensee and remove Licensee's Attachments and store Licensee's facilities in a public warehouse or elsewhere at the expense of and for the account of

Licensee without Licensor being deemed guilty of trespass or conversion, and without Licensor becoming liable for any loss or damages to Licensee occasioned thereby; or

(C) Exercise any other legal or equitable right or remedy that the Non-defaulting Party may have, including termination of this Agreement.

11.03 The Defaulting Party shall repay to the Non-defaulting Party upon demand any costs and expenses incurred by the Non-defaulting Party (including, without limitation, reasonable attorneys' fees) in successfully enforcing this Agreement.

11.04 Upon termination of this Agreement by the Non-defaulting Party, the Defaulting Party shall remain liable to the Non-defaulting Party for any and all reasonable, actual and documented fees, other payments and damages which may be due or sustained in accord with this Agreement prior to such termination, all reasonable, actual and documented costs, fees and expenses, including, without limitation, reasonable attorney' fees incurred by the Non-defaulting Party in pursuit of its remedies hereunder.

11.05 All rights and remedies of the Non-defaulting Party set forth in this Agreement shall be cumulative and none shall exclude any other right or remedy, now or hereafter allowed by or available under any statute, ordinance, rule of court, or the common law, either at law or in equity, or both.

12.0 INDEMNIFICATION

12.01 Licensee shall compensate Licensor for the full actual loss, damage or destruction of Licensor's property that in any way arises from or is related to this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation, or maintenance of Licensee's Attachments).

12.02 Licensee will further indemnify, defend, and hold harmless Licensor and Licensor's agents, officers, employees, and assigns, from any and all losses, damages, costs, expenses (including, without limitation, reasonable attorneys' fees), statutory fines or penalties, actions or claims for personal injury including death, damage to property, or other damage for financial loss of whatever nature in any way caused by Licensee or its contractors and arising out of or connected with this Agreement or activities undertaken by Licensee or its contractors pursuant to this Agreement (including, without limitation, the installation, construction, operation or maintenance of Licensee's Attachments, except to the extent caused by the negligence or willful misconduct on the part of Licensor or Licensor's agents, officers, employees and assigns). Licensee expressly assumes all liability for actions by Licensee's agents, officers, or employees, and Licensee expressly waives any immunity from the enforcement of this indemnification provision that might otherwise be proved by workers' compensation law or by other state or federal laws.

12.03 Without limiting any of the foregoing, Licensee assumes all risk of, and agrees to relieve Licensor of any and all liability for, loss or damage (and the consequences of loss or damage) to any Attachments placed on Licensor's Poles and any other financial loss sustained by Licensee, except to the extent caused by the negligence or willful misconduct on the part of Licensor or Licensor's agents, officers, employees, and assigns.

12.04 Without limiting the foregoing, Licensee expressly agrees to indemnify, defend, and hold harmless Licensor and Licensor's agents, officers, employees and assigns from any and all

claims asserted by end users/customers of Licensee in any way arising out of or in connection with this Agreement or Licensee's Attachments, except to the extent caused by the negligence or willful misconduct on the part of Licensor or Licensor's agents, officers, employees, and assigns.

- 12.05 Notwithstanding anything to the contrary in this Agreement, Licensee further shall indemnify and hold harmless Licensor, its agents, officers, employees, and assigns from and against any claims, liabilities, losses, damages, fines, penalties, and costs (including, without limitation, reasonable attorneys' fees) whether foreseen or unforeseen, which the indemnified parties suffer or incur because of:
- (A) Any discharge of hazardous waste resulting from acts or omissions of Licensee or Licensee's predecessor in interest;
 - (B) Acts or omissions of Licensee, its agents, employees, Licensees, or representatives in connection with any cleanup required by law, or
 - (C) Failure of Licensee to comply with Environmental, Safety and Health Laws.
- 12.06 In no event shall either Party be liable to the other for any special, consequential or indirect damages (including, without limitation, lost revenues and lost profits) arising out of this Agreement or any obligation arising hereunder, whether in an action for or arising out of breach of contract, or otherwise.
- 12.07 Licensee shall indemnify, protect, and hold harmless Licensor from and against any and all claims for libel and slander, copyright and/or patent infringement arising directly or indirectly by reason of installation of Licensee's equipment on Licensor Poles, Conduit Systems or Right-of Way pursuant to this Agreement.

13.0 COMPLIANCE WITH LAW

- 13.01 Notwithstanding anything to the contrary in this Agreement, each Party shall ensure that any and all activities it undertakes pursuant to this Agreement shall comply with all applicable laws, including, without limitation, all applicable provisions of:
- (A) Workers' compensation laws
 - (B) Unemployment compensation laws
 - (C) The Federal Social Security Law
 - (D) The Fair Labor Standards Act, and
 - (E) All laws, regulations, rules, guidelines, policies, orders, permits and approvals or any governmental authority relating to environmental matters and/or Occupational Safety and Health Act ("OSHA").

14.0 INSURANCE

- 14.01 Licensee shall obtain and maintain, in full force and effect at all times, during operations covered by this Agreement, such minimum insurance as will cover the obligations and liabilities

of said Party, its agents, and its employees which may arise from the operations under this Agreement. Insurance shall have limits of not less than:

(A) Commercial General Liability policy of minimum limits of:

| | |
|---|--------------------------------|
| General Aggregate | \$ 2,000,000 per policy period |
| Products/Completed Operations Aggregate | \$ 2,000,000 per policy period |
| Personal Injury/Advertising | \$ 2,000,000 per occurrence |
| Each Occurrence | \$ 2,000,000 per occurrence |
| Fire Legal Liability | \$ 50,000 any one fire |

14.02 The policy will be endorsed to show the above aggregate limits applying to "each" job site or, as an alternative, the General Aggregate will be increased to \$4,000,000 per policy period. Policy will also specifically state the coverage applies to all operations conducted by the respective Party, its employees, or agents on behalf of that Party's Corporation or subsidiary.

14.03 Where the performance of the work involves structural property, underground property, or blasting, each Party's Commercial General Liability insurance policy shall provide coverage to the insured for legal liability arising from operations under this Agreement for property damage:

- (A) arising out of blasting,
- (B) arising out of collapse of, or structural injury to, any building or structure or
- (C) To underground facilities and utilities.

14.04 Other general liability forms are acceptable in lieu of the Commercial General Liability Form, however, they are not to be used without written approval from the Company's Risk Management Department, 4001 Rodney Parham Road, Little Rock, AR 72212. However, such written approval shall not be unreasonably withheld.

(A) Business Automobile Liability policy with minimum limits of:

| | |
|-----------------------|---------------------------|
| Bodily Injury | \$2,000,000 per accident |
| Property Damage | \$ 2,000,000 per accident |
| OR | |
| Combined Single Limit | \$ 2,000,000 per accident |

The policy will be issued using symbol "1 - any auto" coverage.

(B) Workers Compensation:

Part 1 - Medical Benefits Statutory

Part 2 - Employer's Liability as indicated:

| | |
|---------------------------|--------------------------|
| Bodily Injury by Accident | \$ 100,000 each accident |
| Bodily Injury by Disease | \$ 100,000 each employee |
| Bodily Injury by Disease | \$ 500,000 policy limit |

- 14.05 The policy will show the state in which operation on behalf of the Party and/or subsidiary is being conducted. For operations conducted within monopolistic (state fund) states, the Party will furnish a certificate of compliance from the appropriate state fund administrator.
- 14.06 In each liability policy in this Section 14, except for 14.04(B), the other Party's Corporation and its subsidiaries shall be named an "additional insured" with respect to activities performed on behalf of the Party's Corporation and its subsidiaries.
- 14.07 Coverage provided by the policies listed in this paragraph will be issued by an insurance company, licensed in the state in which operations on behalf of the Party are to be conducted. It is acceptable to use both primary and excess/umbrella policies to obtain necessary limits.
- 14.08 Licensee will furnish to the other Party, a certificate evidencing insurance coverage under sub-paragraphs 14.04-A, and 14.04-B. Such certificate shall provide for a thirty-day prior notice to the other Party of any cancellation or material changes in coverage and shall be signed by a legal representative of the issuing insurance company. The certificate of insurance shall be sent to the person identified at paragraph 25.03.
- 14.09 The provisions of sub-paragraphs 14.04-A and 14.04-B shall also apply to all sub-Licensees, and Licensee shall be responsible for their compliance herewith.

15.0 NON-WAIVER OF TERMS AND CONDITIONS

- 15.01 Failure to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

16.0 LICENSOR'S LIEN

- 16.01 Should Licensor under any Article of this Agreement and in accordance with such Article (including any notice requirements) remove Licensee's cable, equipment or facilities from Licensor's poles, conduit system or right-of-way, Licensor will deliver to Licensee the cable, equipment or facilities so removed upon payment by Licensee of the cost of removal, storage and delivery, and all other amounts due Licensor hereunder. Licensor is hereby given a lien on Licensee's cable, equipment or facilities within Licensor's conduit system or right-of-way or attached to Licensor's poles or removed therefrom, with power of public or private sale, to cover any amounts due Licensor under the provisions of this Agreement. Such liens shall not operate to prevent Licensor from pursuing, at its option, any other remedy in law, equity or otherwise, including any other remedy provided for in this Agreement.

17.0 SCHEDULE OF FEES AND CHARGES

- 17.01 Licensee may be required to furnish bond or other security satisfactory to Licensor, in a reasonable initial amount to be determined by Licensor and provided by Licensee at the time Licensee submits Exhibit B to Licensor's Attachment Application Procedures to guarantee the payment of any such sums which may become due to Licensor arising out of this Agreement including, but not limited to fees due hereunder or charges for work performed for the benefit of Licensee under this Agreement, including the removal of Licensee's facilities upon termination of this Agreement by any of its provisions or upon termination of any License issued hereunder. Bond to be sent to person identified at paragraph 25.03. Bond is to be equal to one (1) year's annual rental fees.

17.02 The fees, rates and charges set forth in APPENDIX I or elsewhere in this Agreement are effective during the term of this Agreement subject to Section 3.01 and shall be due and payable by Licensee as set forth herein.

17.03 FEES:

All rates, charges and fees set forth in this Agreement and as shown in APPENDIX I (Schedule of Rates, Fees, and Charges) shall be subject to all applicable federal, state, and local laws, rules, regulations and commission orders.

(A) Computation:

(1) Pole and Anchor Attachment Fees:

(a) For the purpose of computing the annual pole attachment fee hereunder, for calendar years subsequent to a first partial calendar year, said fee shall be based upon the number of poles and anchors, to which attachments are actually made, as of December 31 of the preceding year, multiplied by the per attachment pole attachment fee rate set forth on APPENDIX I. For a first partial calendar year, the pole attachment fee shall be prorated as necessary, on a daily basis from the date payment is due in accordance with Exhibit B of Licensor's Attachment Application Procedures.

(b) For billing purposes, a single pole attachment includes the point of attachment and all facilities located in the usable space on the pole in the space assigned to Licensee (typically six inches above and six inches below the point of attachment). If Licensee occupies more than one usable space on a pole, separate attachment fees shall apply to each space occupied.

(2) Conduit Occupancy Fees :

(a) For the purpose of computing the total conduit occupancy fee due hereunder, the duct feet of conduit shall be measured from the center to the center of manholes; or from the center of a manhole to the end of the duct; from the center of a manhole to the property line if the duct is connected at the property line to a duct owned and controlled by a third-party property owner; or the length of a conduit from pole to pole; or isolated lengths of conduit not attached to any structure (such as involved with buried cable) which will be occupied by Licensee's cable.

(b) For billing purposes each inner duct will be billed the half duct fee. If two or more facilities occupy a duct that has not been subdivided, the half duct fee will be charged for each facility. The half duct fee will apply when others place the Licensee facility in a duct that has not been subdivided only if the facility does not render the duct unusable.

(3) Right-of-Way Occupancy Fees:

This fee applies to the extent that there are applicable charges not covered under existing pole or conduit charges set forth herein and shall be negotiated on a case by case basis.

- (B) Payment Date:
- (1) If this Attachment License Agreement becomes effective on or prior to June 30, all attachment and occupancy fees for the remainder of that first partial calendar year shall be due and payable at the time required under Appendix I of Licensor's Attachment Application Procedures .
 - (2) If an Attachment License Agreement becomes effective on or after July 1, all attachment and occupancy fees for the remainder of that current partial calendar year as well as the full upcoming calendar year shall be payable at the time required under Appendix I of Licensor's Attachment Application Procedures.
 - (3) On an annual basis, all attachment and occupancy fees not previously paid are to be paid in advance, on the 31st day of January of each year or within 30 days of receipt of invoice. Failure to pay such fees within 30 days of the annual due date shall constitute a Material Default of this Agreement.
- (C) Termination of License:
- (1) Upon termination or surrender of a license granted hereunder, no refund of any attachment or occupancy fee shall be made.

17.04 OTHER CHARGES:

- (A) Computation:
- (1) All charges for inspections, engineering, or rearrangements of Licensee's facilities from Licensor's poles or conduit and, without limitation, any other work performed for Licensee shall be based upon the full cost and expense, including reasonable overhead, to Licensor for performing such work for Licensee. The cost to Licensee shall be determined in accordance with the regular and customary methods used by Licensor in determining such costs.
 - (2) The charge for replacement of poles shall include the entire non-betterment cost to Licensor including the increased cost of larger poles, sacrificed life value of the poles removed, cost of removal, less any salvage recovery and the cost of transferring Licensor's facilities from the old to the new poles.
 - (3) All other attachment or occupancy related inquiry, verification, application, administrative and miscellaneous rates, fees and charges shall be calculated and paid in accordance with APPENDIX I and/or Licensor's Attachment Application Procedures and Attachments thereto.
- (B) Payment Date:
- (1) All bills for such other charges for work performed by Licensor shall be payable upon presentment to Licensee, and shall be deemed delinquent if not paid within 30 days after presentment to Licensee.

18.0 DISPUTE RESOLUTION

- 18.01 The Parties agree to use the procedure established in this Section 18 to resolve any dispute, controversy, or claim arising out of or relating to this Agreement or its breach except in the case of:
- (A) A suit, action, or proceeding by one Party to compel the other Party to comply with its obligation to indemnify the other Party pursuant to this Agreement, or
 - (B) A suit, action or proceeding to compel either Party to comply with the dispute resolution procedures set forth in this section.
- 18.02 At the written request of a Party, each Party shall designate a knowledgeable, responsible representative to meet and negotiate in good faith to resolve any dispute, controversy, or claim arising under this Agreement. The Parties intend that these negotiations be conducted by non-lawyer, business representatives. The substance of the negotiations shall be left to the discretion of the representatives. Upon mutual agreement, the representatives may utilize other alternative dispute resolution procedures such as mediation to assist in the negotiations. Discussions and correspondence between the representatives for the purposes of these negotiations shall be treated as confidential, undertaken for purposes of settlement, shall be exempt from discovery and production, and shall not be admissible in the arbitration described below or in any subsequent lawsuit without the concurrence of all Parties. Documents identified in or provided during such negotiations, which are not prepared for purposes of the negotiations, shall not be so exempt and may, if otherwise admissible, be admitted as evidence in any subsequent proceeding.
- 18.03 If a resolution of the dispute, controversy or claim is not reached within one hundred eighty (180) calendar days of the initial written request, the dispute, controversy, or claim shall be submitted to binding arbitration by a single arbitrator pursuant to the rules of the American Arbitration Association (AAA), except as hereinafter provided. Discovery in any proceeding before the AAA shall be Party controlled by the arbitrator and shall be permitted to the extent set forth in this section. Parties may exchange, in any combination, up to thirty-five (35) (none of which may contain subparts) written interrogatories, demands to produce documents and requests for admission. Each Party may also take the oral deposition of three (3) witnesses. Additional discovery may be permitted upon mutual agreement of the Parties. The arbitration hearing shall be commenced within sixty (60) calendar days of the demand for arbitration and shall be held in an agreed upon location. The arbitrator shall rule on the dispute, controversy or claim by issuing a written opinion within thirty (30) business days after the close of hearings. The times specified in this section may be extended upon mutual agreement of the Parties or by the arbitrator upon a showing of good cause. In the event, however, that service to either Party's end-user customers is materially affected, this Section 18 is not intended to preclude either Party from seeking expedited alternative resolutions. Judgement upon the award rendered by the arbitrator may be entered in any court having jurisdiction.
- 18.04 Each Party shall bear its own costs, including attorneys' fee, incurred in connection with any of the foregoing procedures. A Party-seeking discovery shall reimburse the responding Party the cost of reproducing documents (to include search time and reproduction time costs). The fees associated with any arbitration, including the fees of the arbitrator, shall be divided equally between the parties.

19.0 ENTIRE AGREEMENT

- 19.01 This Agreement and Licensor's related Attachment Application Procedures cancels and supersedes all previous agreements whether written or oral, except for any sums due thereunder, between Licensor and Licensee with respect to the attachment of Licensee's cable, equipment, and facilities to Licensor's poles or the placing Licensee's cable, equipment or facilities in Licensor's conduit system or right-of-way; and there are no other provisions, terms or conditions to this Agreement except as expressed herein. All currently effective licenses heretofore granted pursuant to such previous agreements shall continue in effect subject to the terms and conditions of this Agreement.
- 19.02 The terms and conditions of this Agreement supersede all prior oral or written understandings between the Parties and constitute the entire Agreement between them concerning the subject matter of this Agreement. There are no understandings or representations, express or implied, not expressly set forth in this Agreement or in Licensor's related Attachment Application Procedures. This Agreement shall not be modified or amended except by writing signed by the Party to be charged.

GENERAL OPERATING ROUTINE

20.0 ATTACHMENT, USE AND/OR OCCUPANCY REQUEST PROCESS

20.01 There is a multi-step pole attachment or duct, innerduct, conduit or right-of-way use and/or occupancy application process and fee determination process that the Licensee may begin upon the execution of this Agreement. It is set forth below and in Licensor's related Attachment Application Procedures.

21.0 POLE ATTACHMENT REQUESTS (PAR)

21.01 The following process can begin upon the execution of this agreement. The steps are:

- (A) Pole Attachment Quote Preparation: Licensee shall submit a Pole Attachment Request Form (Exhibit B to Licensor's related Attachment Application Procedures), which may be reasonably revised from time to time by Licensor at its sole discretion, to Licensor which will include a drawing of the proposed route and contact information (name, telephone, facsimile, and email information), and all required fees, as listed in and computed in accordance with APPENDIX I, which may be changed from time to time by Licensor to remain consistent with prevailing costs, of this Agreement. These fees consist of administrative as well as other actual costs reasonably incurred in researching the requested route. Once Licensor receives the aforementioned specific attachment information and the fee from Licensee, Licensor will report on the Poles along the route, any required make-ready work, the costs and schedule for such make-ready work, and any other requirements Licensee must satisfy prior to installing its facilities. If during this process, Licensor determines any lawful reason for denying Licensee's application, Licensor will so inform Licensee. Pole attachment quotes will be provided within forty-five (45) days for standard requests. Non-standard quantities of pole attachments and distances will be addressed on an individual case basis, and in a commercially reasonable period.
- (B) Pole Attachment Order: Upon completion of the work identified above, Licensor will inform Licensee if Licensor will provide Licensee a Pole Order Form (Appendix VI to the Licensor's related Attachment Application Procedures) which may be revised from time to time by Licensor at its sole discretion, containing estimated make-ready cost (if any), annual recurring charges and any additional information necessary for Licensee to proceed with attaching its facilities to Licensor's Poles. If Licensee desires to attach to Licensor's poles, and pole make-ready work is required, Licensee shall pay the estimated make-ready cost prior to Licensor beginning any work. Actual costs incurred by Licensor in performing the make-ready work will be applied to the estimated make-ready costs. Any reasonable costs in excess of the estimated cost will be billed to Licensee. Any payment of the estimated costs in excess of actual pole attachment make-ready costs will be returned to Licensee. If Licensee declines to proceed, all fees incurred to date will be billable to Licensee by Licensor.

21.02 Licensee has thirty (30) days to pay the estimated make-ready work or cancel the PAR.

21.03 Upon completion of the make-ready work, the receipt of all payments and fees, and the signing of this Agreement, an "Approved" Attachment I shall be returned to the Licensee. At that time

Licensee will be considered to have been granted a License with respect to the poles approved in the PARON and may attach to Licensor's facilities.

22.0 SURVEYS AND INSPECTIONS OF LICENSEE'S FACILITIES

22.01 Licensor reserves the right to inspect each new installation or work operation of Licensee on or within Licensor's facilities. The making of inspections or the failure to make inspections shall not relieve Licensee of any responsibility, obligation or liability imposed by this Agreement.

23.0 ISSUANCE OF LICENSES

23.01 Before Licensee shall have a right to attach to any pole of Licensor, Licensee shall make application for and receive a revocable, nonexclusive license therefore in the form of an approved Application for Pole License (APPENDIX VI and Exhibit B to Licensor's related Attachment Application Procedures). Licensor shall grant or deny the application within forty-five (45) days. Licensor shall provide written notice to Licensee specifying in detail the reasons for denying Licensee's request if the application is not granted.

23.02 Before Licensee shall have the right to place any cable, equipment or facilities within any conduit system or right-of-way of Licensor, Licensee shall make application for and receive a revocable, nonexclusive license therefore in the form of an approved Application for Conduit or Right-of-Way License (APPENDIX IV and Exhibit B to Licensor's related Attachment Application Procedures), hereto attached and made a part hereof. Licensor shall grant or deny the application within forty-five (45) days. Licensor shall provide written notice to Licensee specifying in detail the reasons for denying Licensee's request if the application is not granted.

23.03 Any license granted hereunder for attachment to Licensor's poles shall terminate without further notice to Licensee as to individual poles covered by the license to which Licensee has not attached within ninety (90) days from the date that Licensor has notified Licensee that such poles are available for attachment of the operating facilities of Licensee, unless Licensor, in the exercise of its sole discretion, agrees to extend said period at the request of Licensee.

23.05 Any license granted hereunder for placement of Licensee's facilities in Licensor's conduit system shall terminate without further notice to Licensee as to individual sections of Licensor's conduit system covered by the license in which Licensee has not placed its facilities within ninety (90) days from the date that Licensor has notified Licensee that such sections of the conduit system are available for the placement of operating facilities of Licensee, unless Licensor, in the exercise of its sole discretion, agrees to extend said period at the request of Licensee.

24.0 AUTHORITY TO PLACE ATTACHMENTS

24.01 Before any attachments or placement of facilities Licensee shall submit evidence that Licensee has the authority to maintain Attachments within public rights-of-way or on private right-of-way or on private property. Licensee shall be solely responsible for obtaining all licenses, authorizations, permits and consents from federal, state and local authorities or private land owners that may be required to place and maintain facilities on Licensor's poles or within Licensor's conduit, duct or right-of-way.

25.0 NOTICES (OF MODIFICATION OR ALTERATION OF POLES)

- 25.01 In the event Licensor plans to modify or alter any Licensor Poles upon which Licensee has placed Attachments, Licensor, except in emergency situations, shall provide Licensee written notice of the proposed modification or alteration at least ninety (90) business days prior to the time the proposed modification or alteration is scheduled to take place. Should Licensee decide to modify or alter Licensee's Facilities on Poles, Licensee shall so notify Licensor in writing at least ninety (90) business days prior to the day the work is to begin. In such event, Licensee shall bear a proportionate share of the total costs incurred by Licensor to make Licensor Poles accessible. Licensee's proportionate share of the total cost shall be based on the ratio of the amount of new space occupied by Licensee to the total amount of new space occupied by all of the parties joining in the modification. Licensee is not responsible for any costs of Licensor's modifications or alterations of its Poles.
- 25.02 In the event Licensor is required to move the location of, or replace, any Licensor Pole(s) for reasons beyond its control, Licensee concurrently shall relocate Licensee's Attachments. Licensee shall be solely responsible for the costs of the relocation of Licensee's Attachments. When it is mutually agreed that it is in the best interest of Licensor and Licensee, Licensor will, after proper notification has been provided, transfer Licensee's Attachments at the same time that Licensor transfers its Attachments. The rate charged for these transfers is listed in this Agreement (APPENDIX I). The rate for transfers may be adjusted by Licensor from time to time to remain consistent with prevailing costs.
- 25.03 Notices under this Agreement may be given and shall be deemed to have been given, by posting the same in first class mail to Licensee as follows:

26.0 REQUIREMENTS AND SPECIFICATIONS FOR ATTACHMENT TO POLES

26.01 Licensee's cables, equipment, and facilities shall be placed and maintained in accordance with the requirements and specifications attached hereto and as set forth in Licensor's related Attachment Application Procedures and made a part hereof, and in accordance with the requirements and specifications of the National Electric Safety Code (most recent edition) and the National Electric Code (most recent edition), and in compliance with any other rules or orders now in effect or that may hereafter be issued by any state utility commission or other authority having jurisdiction.

27.0 PLACEMENT OF ATTACHMENTS

27.01 Licensee shall, at its own expense, place and maintain and replace its Attachments on Licensor's Poles in accordance with:

- (A) Such reasonable requirements and specifications as Licensor shall from time to time prescribe in writing in Licensor's Attachment Application Procedures or otherwise,
- (B) In compliance with any rules or orders now in effect or that hereafter may be issued by any regulatory agency or other authority having jurisdiction, and
- (C) All currently applicable requirements and specifications of the National Electrical Safety Code, National Electric Code, most current edition or any amendment or revision of said Code. Licensee agrees to comply, at its sole risk and expense, with all specifications hereto, as may be revised from time to time by Licensor. Licensor will provide supervision at Licensee's expense if Licensor believes it is required.

27.02 Licensee's Facilities shall be tagged at maximum intervals of 300 feet so as to identify Licensee as the owner of the Facility. The tags shall be of sufficient size and lettering so as to be easily read from ground level.

28.0 MODIFICATIONS, ADDITIONS OR POLE REPLACEMENTS AND REARRANGEMENTS

28.01 Licensee shall not modify, add to, or replace facilities on any pre-existing Attachment on an Licensor Pole without first notifying Licensor in writing of the intended modification, addition or replacement at least thirty (30) business days prior to the date the activity is scheduled to begin. The required notification shall include:

- (A) The date the activity is scheduled to begin,
 - (B) A description of the planned modification, addition, or replacement,
 - (C) A representation that the modification, addition, or replacement will not require any space other than the space previously designated for Licensee's Attachments, and
 - (D) A representation that the modification, addition, or replacement will not impair the structural integrity of the Poles involved.
- 28.02 Should Licensor determine that the modification, addition, or replacement specified by Licensee in its notice will require more space than that allocated to Licensee or will require the rearrangements of, reinforcement of, replacement of, or an addition of support equipment to the Poles involved in order to accommodate Licensee's modification, addition, or replacement, Licensor will so notify Licensee, whereupon Licensee will be required to submit a PAR in compliance with this Agreement in order to obtain authorization for the modification, addition, or replacement of its Attachments.
- 28.03 Should Licensee request Licensor to expand capacity or purchase additional plant, Licensee agrees to pay all reasonable costs. If Licensor or another party that has been granted a license joins in the request and will benefit from the expansion or purchase, Licensee agrees to pay a percentage of all costs proportionate to Licensee's share of the benefit received from the expansion or purchase.
- 28.04 When multiple applications, including application of Licensee, are received by Licensor with respect to any pole which must be replaced or rearranged to provide additional space prior to commencement of the work on that pole a Transfer Attachment Fee may be charged. Licensor will equitably prorate to the extent that it is practical between Licensee and other applicants for the pole space, the common expenses of engineering, rearrangement, and replacement, if any, which result from the processing of multiple applications. . Licensee shall be bound by Licensor's determination as to any such pro-ration of Transfer Attachment Fee to Licensee.

29.0 UNAUTHORIZED ATTACHMENTS

- 29.01 If any cable, equipment or facilities of Licensee shall be found on a pole or within a conduit or right-of-way for which no license is outstanding, Licensor, without prejudice to its other rights or remedies under this Agreement or otherwise, may:
- (A) Impose a charge, and
 - (B) Require Licensee to remove such cable, equipment or facilities forthwith or Licensor may remove them without liability and the expense of removal shall be borne by Licensee. For the purpose of determining the charge, Licensee shall pay liquidated damages that will not exceed an amount equal to the annual pole attachment fee for the number of years the unauthorized attachments have existed (or, if that cannot be determined, the number or years since the most recent inventory or five years, whichever is less), plus interest at a rate set for that period by the IRS for individual underpayments pursuant to Section 6621 of the IRS Code. Any such charge imposed by Licensor shall be in addition to its rights to any other sums due and payable, including without limitation the actual costs of any audit or survey which established the existence of the unauthorized attachments and to any claims to said fees or said unlicensed use shall be deemed as a

ratification or the licensing of the unlicensed use, and if any license should subsequently be issued, after application and payment of the application fee therefore, said license shall not operate retroactively or constitute a waiver by Licensor of any of its rights or privileges under this Agreement or otherwise.

29.02 For purposes of this section, an unauthorized Attachment shall include, but not limited to:

- (A) An Attachment to a Pole which is not identified in any PARON (APPENDIX VI) issued in accordance with this Agreement;
- (B) An Attachment that occupies more space than that allocated to Licensee By Licensor;
- (C) An attachment that is not placed in accordance with the provisions of this Agreement or the appropriate PARON (APPENDIX VI) issued pursuant to this Agreement, unless Licensee can demonstrate to Licensor's reasonable satisfaction that said misplacement is not due to any act or omission of Licensee or Licensee's agents;
- (D) An addition or modification by Licensee to its pre-existing Attachment(s) that impairs the structural integrity of the involved Licensor Pole(s).
- (E) An Attachment that consists of facilities owned or controlled by, and for the use of a Party other than Licensee.

29.03 Once Licensor has notified Licensee of an unauthorized attachment. Licensee can submit a PAR to request an authorized attachment. A PAR submitted per this provision will be treated like any other PAR subject to this Agreement. Licensee will be responsible for all fees associated with a PAR (as identified in this Agreement). If a PAR is not received by Licensor within ten (10) business days of Licensee's receipt of an unauthorized attachment notification, Licensee has sixty (60) business days from the date of its receipt of the initial unauthorized attachment notification to vacate the Pole.

30.0 FAILURE TO PLACE ATTACHMENTS

30.01 Once Licensee has been issued a PARON (APPENDIX VI), Licensee shall have ninety (90) calendar days from the date of the PARON (APPENDIX VI) to begin the placement of its Attachments on the Licensor Poles covered by the PARON (APPENDIX VI). If Licensee has not begun placing its Attachments within that ninety-(90) calendar day period, Licensee shall so advise Licensor with a written explanation for the delay. If Licensee fails to advise Licensor of its delay, with a written explanation therefore, or if Licensee fails to act in good faith by not making a bona fide effort to begin placing its Attachments within the ninety (90) calendar days prescribed by this section, the previously issued PARON (APPENDIX VI) shall be deemed rescinded by Licensor and Licensee shall have no further right to place Attachments pursuant to that PARON (APPENDIX VI).

31.0 OCCUPANCY OF CONDUIT SYSTEM

31.01 When Licensee submits an application for a license to place its cables, equipment, and facilities in the conduit system of Licensor, Licensor will advise Licensee of the availability of conduit space in accordance with Licensor's Attachment Application Procedures. In determining the

availability of space in Licensor's conduit system, Licensor reserves the right to deny the granting of a license for any non-discriminatory lawful reason, including without limitation, insufficient capacity or reasons of safety, reliability and generally applicable engineering purposes. If conduit space is available, a license to occupy a portion of conduit system will be granted to Licensee, provided, however, that Licensor does not warrant the condition of such conduit system.

- 31.02 Licensor reserves the right to exclude cable, equipment, and facilities of Licensee from Licensor's conduit system, or to limit the type, number and size of Licensee's cable, equipment, and facilities which may be placed in any of Licensor's manholes.

32.0 OCCUPANCY OF RIGHT-OF-WAY

- 32.01 Licensor and Licensee agree that neither party has the right to restrict or interfere with the other party's lawful access to and use of public right-of-way, including public right-of-way, which pass over property owned by either party. Except as otherwise specifically provided in this Agreement, Licensor and Licensee shall each be responsible for obtaining their own right-of-way and permission to use real or personal property owned or controlled by any governmental body.

- 32.02 In the event that Licensee desires to occupy right-of-way owned or controlled by Licensor, Licensor may require Licensee to make an application to do so by the terms of this Agreement. Licensor reserves the right to determine whether granting a license would adversely affect its common carrier communication services and its ability to meet its duties and obligation with respect thereto, including questions of economy, safety, and future need of Licensor.

- 32.03 Licensor may, without incurring any liability, remove the cables, equipment, and facilities of Licensee from Licensor's right-of-way, at Licensee's expense where in Licensor's judgement (such judgement to be conclusive) such removal is required in connection with the performance of Licensor's service obligation or the safety of Licensor's employees. Whenever such removal has been made, Licensee will be promptly notified.

33.0 CONSTRUCTION AND MAINTENANCE OF FACILITIES

- 33.01 Licensee shall, at its own expense, make and maintain its pole attachments in a safe condition and in thorough repair, and in a manner reasonably acceptable to Licensor, and so as not to conflict with the use of said poles by Licensor or by other authorized users of said poles, or interfere with other facilities thereon or which may from time to time be placed thereon. Licensee shall, at its own expense, upon written notice from Licensor, relocate or replace its facilities placed on said poles, or transfer them to substituted poles, or perform any other work in connection with said facilities that may be required. Licensor shall give such written notice as is reasonable in the circumstances, provided, however, that in cases of emergency, (Licensor's judgment as to what constitutes an emergency to be conclusive) Licensor may arrange to relocate, remove or replace the attachments placed on said poles by Licensee, transfer them to substituted poles or perform any other work in connection with said facilities that may be required in the maintenance, replacement, removal or relocation of said poles or of the facilities thereon or which may be placed thereon, or for the service needs of Licensor, and Licensee shall reimburse Licensor for the expense thereby incurred. Attachments of Licensee to poles of Licensor, as mentioned herein shall be understood to include attachments of Licensee in space reserved for Licensor, or space which Licensor has the right to use, on poles of other companies with which Licensor now has or may hereafter have agreements for joint use and

occupancy; and the use of such space by Licensee shall be subject to the terms and conditions of the agreements between Licensor and said other companies. Such authorization will not be unreasonably withheld.

- 33.02 Licensee's cable, equipment, and facilities shall be placed in, removed from, relocated in or maintained in Licensor's conduit system only when specific authorization for the work to be performed and approval of the person, firm or corporation selected by Licensee to perform the work, has been obtained in writing in advance from Licensor. Licensor retains the right to specify what, if any work shall be performed by Licensee. Such authorization will not be unreasonably withheld
- 33.03 In each instance where Licensee's cable, equipment, and facilities are to be placed in Licensor's conduit system, Licensor shall specify, among other things, the cable configuration and location of Licensee's cable, equipment, and facilities, the particular duct of the conduit system such cable will occupy, and the location where and manner in which Licensee's cable will enter and exit Licensor's conduit system.
- 33.04 Licensor's manholes shall be opened as reasonably permitted by Licensor's authorized employees or agents. Licensee shall be responsible for obtaining any necessary permits from appropriate governmental authorities to open manholes and to conduct the work operations. Licensee's employees or agents will be permitted to enter or work in Licensor's manholes only when an authorized agent or employee of Licensor is present except as provided in the next paragraph. Licensor's said agent or employee shall have the authority to terminate Licensee's work operations in and around Licensor's manholes if, in the sole discretion of said agent or employee, any hazardous conditions arise or any unsafe practices are being followed by Licensee's employees or agents. Licensee agrees to pay, in accordance with the terms and conditions of APPENDIX I, the full cost of having Licensor's agent or employee present when Licensee's work is being done in Licensor's manholes. The presence of Licensor's authorized agent or employee shall not relieve Licensee of its responsibility to conduct all of its work operations in and around Licensor's manholes in a safe and workmanlike manner. Licensee is responsible for all signage, traffic control, equipment, and personnel necessary to work in Licensor's manholes. All work shall meet Occupational Safety and Health Act (OSHA), and any local or state standards and requirements.
- 33.05 Licensee's employees will be permitted to enter or work in Licensor's manholes and conduit system without an authorized agent or employee of Licensor being present, provided that Licensee's work consists only of routine operations of testing, adjusting, regulating or inspecting Licensee's existing facilities and does not involve any placing, removing, changing or rearranging of Licensee's or Licensor's facilities. In such cases, Licensee shall notify Licensor's designated representative in advance of Licensee's operations as to the type of work to be performed, the time at which it is to be performed and where it is to take place. Licensee shall conduct all such work operation in a safe and workmanlike manner, and in accordance with the terms of this Agreement.
- 33.06 Licensee shall, at its own expense, maintain its buried communication facilities so as not to conflict with the use of the right-of-way by Licensor or other authorized users of the right-of-way. Licensee shall, at its own expense, relocate, change, or replace its facilities or perform any other work in connection with said facilities that may be reasonably required by Licensor or other authorities.

34.0 TERMINATION OF LICENSES

- 34.01 Upon notice from Licensor to Licensee that Licensor has been advised by governmental authority or private property owners that the use of any pole, conduit system, or right-of-way is not authorized and is objected to by such governmental authority or private property owner, as the case may be or that any pole, any conduit system or any right-of-way is to be removed, sold or otherwise disposed of, Licensee shall, if reasonably requested by Licensor, remove its cables, equipment, and facilities at once from the affected pole or poles or shall make arrangements for the removal of its cable, equipment, and facilities from the affected portion of Licensor's conduit system or right-of-way at Licensor's expense. If not so removed, Licensor shall have the right to remove Licensee's cable, equipment, and facilities from Licensor's right-of-way at the cost and expense of Licensee and without any liability thereto. If Licensor deems it is impractical to remove Licensee's cables, equipment or facilities from any right-of-way, they may be abandoned in place.
- 34.02 Licensee may at any time remove its facilities from any pole of Licensor, but shall immediately give Licensor written notice of such removal and surrender of license in the form of a Notification of Surrender (APPENDIX VII) hereto attached and made a part hereof. If Licensee surrenders its license but fails to remove its facilities from Licensor's poles, Licensor shall have the right to remove Licensee's facilities at Licensee's expense without any liability on the part of Licensor for damage or injury to Licensee's facilities. In the event that Licensee's cables, equipment, and facilities shall be removed from any pole as provided by this Agreement, no attachment shall again be made to such pole unless Licensee shall have first complied with all of the provisions of this Agreement as though no attachment had previously been made.
- 34.03 If Licensee desires to terminate its license for the right to occupy any part of Licensor's conduit system, Licensee shall give Licensor written notice of such surrender in the form of a Notification of Surrender (APPENDIX VII) hereto attached and made a part hereof. In such event, Licensee shall make arrangements with Licensor for the removal of Licensee's cables, equipment, and facilities from that part of Licensor's conduit system at Licensee's expense. In the event that Licensee's cables, equipment, and facilities shall be removed from Licensor's conduit system as provided by this Article, no cable, facilities or equipment shall again be placed in that part of such conduit system unless Licensee shall have first complied with all of the provisions of this Agreement as though no cables, equipment, and facilities of Licensee had previously been placed in that part of Licensor's conduit system.
- 34.04 If Licensee desires to terminate its license for the right to occupy any part of the right-of-way, Licensee shall give Licensor written notice of such surrender in the form of a Notification of Surrender (APPENDIX VII) attached hereto and made a part hereof. In such event, Licensee shall make arrangements with Licensor for the removal of Licensee's cables, equipment, and facilities from that part of the right-of-way at Licensee's expense. However, in the event it is impractical to remove Licensee's cable, equipment, and facilities from any right-of-way, they may be abandoned in place.

35.0 EMERGENCY RESTORATION PROCEDURES

- 35.01 In the event of an emergency, restoration procedures may be affected by the presence of Licensee's Attachments. While Licensor shall not be responsible for the repair of damaged Attachments of Licensee (except by mutual written agreement), Licensor shall nonetheless control access to its poles, conduit systems or right-of-way if the restoration is to be achieved in an orderly fashion.

35.02 Where Licensor and Licensee are involved in emergency restorations, access to Licensor's poles, conduit systems or right-of-way will be controlled by Licensor's Network Construction Managers or their on-site representative according to the following guidelines.

(A) Service Disruptions/Outages

- (1) While exercising its right to first access, Licensor shall make all reasonable efforts to grant access to as many other entities with Attachments as is reasonably safe.
- (2) Where simultaneous access is not possible, Licensor will grant access on first come, first served basis.

(B) Service Affecting Emergencies

- (1) While exercising its right to first access, Licensor shall make all reasonable efforts to grant access to as many other entities with Attachments as is reasonably safe.
- (2) Where Licensor is unable to grant simultaneous access to all other entities with Attachments, access will be granted according to the level of damage to the Attachments of each entity and the likelihood that a given level of damage will result in service disruption. Where the likelihood that a service disruption will result is not clearly discernible, access will be on a first come, first served basis.

35.03 Without limiting any other indemnification or hold harmless provisions of this Agreement, Licensee agrees that any decision by Licensor regarding access to Attachments, or any action or failure to act by Licensor, under this section shall not be the basis for any claim by Licensee against Licensor for any damage to Licensee's Attachments or disruption of Licensee's services, or any other direct or indirect damages of any kind whatsoever incurred by Licensee.

36.0 ABANDONMENT

36.01 Nothing in this Agreement shall prevent or be construed to prevent Licensor from abandoning, selling, assigning, or otherwise disposing of any poles, conduit systems or other Licensor property used for Licensee's Attachments; provided, however, that Licensor shall condition any such sale, assignment, or other disposition subject to the rights granted to Licensee pursuant to this Agreement. Licensor shall promptly notify Licensee of any proposed sale, assignment, or other disposition of any poles, conduit systems or other Licensor property used for Licensee's Attachments.

POLE ATTACHMENT BOND

KNOW ALL BY THESE PRESENTS

That we, Time Warner Telecom of Kentucky LLC, 10475 Park Meadows Drive, Littleton ,CO 80124 as Principal, and Platte River Insurance Company, a Nebraska corporation with executive offices at 1600 Aspen Commons, Middleton, WI 53562 as Surety, are held and firmly bound unto Windstream Kentucky East, LLC, 4001 Rodney Parham Road, Little Rock, AR 72212, as Obligee, in the sum of Five Thousand and 00/100 Dollars (\$5,000.00) for the payment which sum, well and truly to be made, we bind ourselves, our heirs, executors, administrators, successors and assigns, jointly and severally, firmly by these presents, the liability of the Surety being limited to said sum regardless of the number of years this bond remains in force or is renewed or of the number of premiums that shall be payable or paid.

WHEREAS, the Principal has entered into a written agreement with the owner to provide access to poles, ducts innerducts, conduits, and rights-or-way, which agreement is hereby specifically referred to and made party hereof, with like force and effect as if herein at length set forth

NOW, THEREFORE, the condition of the obligation is such, that if the above bound Principal shall perform in accordance with the aforesaid agreement, then this obligation shall be void, otherwise to remain in full force and effect unless cancelled or terminated as set forth below.

This bond may be terminated or cancelled by Surety by giving Thirty (30) days prior notice in writing from Surety to Principal and said Obligee, such notice to be given by certified mail.

Such termination or cancellation shall not affect any liability incurred or accrued under this Bond prior to the effective date of such termination or cancellation.

AND PROVIDED FURTHER that no action, suit or proceeding shall be had or maintained against the Surety on this instrument unless same be brought or instituted and process served upon the Surety within twelve months after cancellation of this bond as set forth in the preceding paragraph.

IN WITNESS WHEREOF, the said Principal and Surety have signed and sealed this instrument this 3rd day of January, 2008.

POLE ATTACHMENT AGREEMENT

1. Parties.

This agreement (Agreement) is between GTE SOUTH INCORPORATED, a State of Virginia Corporation, having its principal office at Durham, North Carolina ("GTE"), and AT&T Corp., a corporation of the State of New York, having its principal office at 1200 Peachtree St., N.E., Atlanta, GA 30309 ("Licensee").

2. Definitions.

- 2.1 "GTE's poles" or "GTE pole(s)" means a pole or poles solely owned by GTE, jointly owned by GTE and another entity, and space on poles obtained by GTE through arrangements with the owner(s) thereof.
- 2.2 "Telecommunications Services" means the offering of telecommunications for a fee directly to the public, or to such classes of users as to be effectively available directly to the public, regardless of the facilities used.
- 2.3 "Cable Television Services" means the transmission to subscribers of off-the-air pickup of broadcast signals or the transmission, without separate charge, of locally originated closed circuit television to the subscribers of off-the-air service.
- 2.4 "Attachments" mean the equipment reasonably required by Licensee to provide its (Telecommunications Service OR Cable Television Services) that is placed on GTE's poles.
- 2.5 "Make-Ready Work" means all work, including, but not limited to, rearrangement, removal, or transfer of existing attachments, placement, repair, or replacement of poles, or any other changes required to accommodate the Licensee's Attachments on a pole.
- 2.6 "Hazardous Materials" means (I) any substance, material or waste now or hereafter defined or characterized as hazardous, extremely hazardous, toxic or dangerous within the meaning of the Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended, or any similar law, ordinance, statute, rule or regulation of any governmental body or authority, (ii) any substance, material or waste now or hereafter classified as a contaminant or pollutant under any law, ordinance, statute, rule or regulation of any governmental body or authority or (iii) any other

substance, material or waste, the manufacture, processing, distribution, use, treatment, storage, placement, disposal, removal or transportation of which is now or hereafter subject to regulation under any law, ordinance, statute, rule or regulation of any governmental body or authority.

2.7 "Attachment Fee" means the fee assessed per pole and paid by Licensee to place Attachments on GTE's poles.

3. Purpose.

3.1 Licensee represents to GTE that Licensee has a need to occupy, place and maintain Attachments on GTE's poles for the purpose of providing [Telecommunications Services OR Cable Television Services only.] [NOTE: A company providing both Telecommunications Services and Cable Television Services will be deemed to be providing Telecommunications Services.]

3.2 GTE agrees to permit Licensee to occupy, place and maintain its Attachments on such GTE poles as GTE may allow pursuant to the terms of this Agreement.

4. Grant of License.

GTE grants to Licensee and Licensee accepts from GTE a non-exclusive revocable license to occupy, place and maintain in a designated space on specified GTE poles Licensee's Attachments on the terms and conditions set forth herein. Licensee shall have no further right, title, or other interest in connection with GTE's poles. GTE shall have the right to grant, renew or extend privileges to others not parties to this Agreement to occupy, place or maintain Attachments on or otherwise use any or all GTE poles. Nothing herein is intended to, nor should it be construed to require GTE to construct or modify any facilities not needed for its own service requirements. GTE grants this license in reliance on the representation of Licensee that Licensee intends to provide Cable Television Services only [OR] Telecommunications Services with the Attachments covered by this Agreement.

5. Term.

5.1 This Agreement, if not previously terminated in accordance with the provisions hereof, shall continue in effect for a term of one (1) year and thereafter until terminated as provided herein. The Agreement may be terminated at the end of one (1) year by either party giving to the other party at

least ninety (90) days prior written notice. Within thirty (30) days from the date this Agreement is terminated by either party, Licensee shall cause all of Licensee's Attachments to be removed from all of GTE's poles. In the event Licensee's Attachments are not removed as required by this section, GTE shall have the option to remove all such attachments and store them in a public warehouse or elsewhere at the expense of and for the account of Licensee without GTE being deemed guilty of trespass or conversion, and without GTE becoming liable for any loss or damages to Licensee occasioned thereby. All costs incurred by GTE to remove Licensee's Attachments shall be reimbursed to GTE by Licensee upon demand by GTE without regard to whether this Agreement has been terminated.

- 5.2 Licensee may at any time request removal of its Attachments from any GTE pole, by giving written notice to GTE at least ninety (90) days prior to the time Licensee desires such removal. If GTE advises Licensee that GTE shall remove Licensee's Attachments, Licensee shall pay to GTE the cost of said removal and no credit or refund of any rental shall be allowed Licensee on account of such removal. If GTE requires, Licensee shall pay to GTE the cost of removing Licensee's Attachments in advance. If GTE permits Licensee to remove Licensee's Attachments, Licensee shall do so at its own expense, and shall reimburse GTE for any expenses GTE may incur as a result of such removal.

6. Pole Attachment Requests (PARs).

- 6.1 Licensee shall submit a written Pole Attachment Request ("PAR") to GTE specifying the GTE poles upon which it desires to place Attachments. Each PAR shall be in a form specified by GTE and may be revised from time to time at GTE's sole discretion. GTE, in its sole judgment, will determine the availability of space on the GTE pole(s) specified in the PAR. No Attachment shall be placed on any GTE pole identified in a PAR until that PAR has been approved by GTE. Upon the approval of the PAR, GTE shall return one copy thereof to Licensee bearing an endorsement acknowledging GTE's authorization. All Attachments placed on GTE's poles pursuant to an approved PAR shall become subject to all of the terms and conditions of this Agreement. Licensee may submit subsequent PARs for approval by GTE as needed. GTE is under no obligation to provide general information respecting the location and

availability of GTE poles, except as may be necessary to process a PAR.

- 6.2 Licensee shall pay GTE a fee for processing a PAR to compensate GTE for the general administrative costs as well as the actual engineering costs reasonably incurred. The fee for engineering costs shall be computed by multiplying the fully loaded hourly rate for an engineer times the number of hours reasonably required by each engineer to inspect the GTE poles included in the PAR. GTE will charge its then current rates for administrative and engineering costs, as may be changed from time to time by GTE to remain consistent with prevailing costs. GTE shall provide Licensee with an estimate of the total administrative and engineering costs needed to process Licensee's PAR. Within fifteen (15) days after receiving such estimate from GTE, Licensee shall notify GTE either (1) that Licensee shall reimburse GTE all costs actually incurred to perform the work and shall pay the total estimated amount to GTE at least ten (10) days prior to the date the work is to begin or (2) that it desires to cancel its PAR.
- 6.3 Upon receiving an approved PAR, Licensee shall have the right, subject to the terms of this License, to place and maintain the facilities described in the PAR in the space designated on the GTE poles identified therein.
- 6.4 In the event it is necessary to rearrange any attachments (including attachments of third parties) on or to reinforce, replace or add support equipment to any one or more of the poles included in a PAR in order to accommodate Licensee's Attachments, GTE shall notify Licensee of such fact and provide Licensee with an estimate of the total cost of such Make-Ready Work needed to accommodate Licensee's Attachments. Within fifteen (15) days after receiving such notice from GTE, Licensee shall notify GTE either (1) that Licensee shall pay all of the costs actually incurred to perform the Make-Ready Work and shall pay the total estimated amount to GTE at least ten (10) days prior to the date the Make-Ready Work is to begin or (2) that it desires to cancel its PAR.
- 6.5 Licensee is not authorized and shall have no right to place facilities on any GTE pole unless that GTE pole is identified in an approved PAR.

7. Authority to Place Attachments.

- 7.1 Before Licensee places any Attachments on GTE's poles pursuant to an approved PAR, Licensee shall submit evidence satisfactory to GTE of its authority to erect and maintain the facilities to be placed on GTE's poles within the public streets, highways and other thoroughfares or on private property. Licensee shall be solely responsible for obtaining all rights of way, easements, licenses, authorizations, permits and consents from federal, state and municipal authorities or private property owners that may be required to place Attachments on GTE's poles.
- 7.2 GTE shall not unreasonably intervene in or attempt to delay the granting of any rights of way, easements, licenses, authorizations, permits and consents from federal, state or municipal authorities or private property owners that may be required for Licensee to place its Attachments on GTE's poles.
- 7.3 If any right of way, easement, license, authorization, permit or consent obtained by Licensee is subsequently revoked or denied for any reason, Licensee's permission to attach to GTE's poles shall terminate immediately and Licensee shall promptly remove its Attachments. Should Licensee fail to remove its Attachments within one hundred twenty (120) days of receiving notice to do so from GTE, GTE shall have the option to remove all such Attachments and store them in a public warehouse or elsewhere at the expense of and for the account of Licensee without GTE being deemed guilty of trespass or conversion, and without GTE becoming liable for any loss or damages to Licensee occasioned thereby. All costs incurred by GTE to remove Licensee's Attachments shall be reimbursed to GTE by Licensee upon demand by GTE.
- 7.4 Upon notice from GTE to Licensee that the cessation of the use of any one or more of GTE's poles is necessary for reasons of safety or has been requested or directed by any federal, state or municipal authority, or private property owner, permission to attach to such pole or poles shall terminate immediately and Licensee promptly shall remove its Attachments. Should Licensee fail to remove its Attachments within the timeframe provided by the requesting or directing party or one hundred twenty (120) days of receiving notice to do so from

GTE, whichever is less, GTE shall have the option to remove all such Attachments and store them in a public warehouse or elsewhere at the expense of and for the account of Licensee without GTE being deemed guilty of trespass or conversion, and without GTE becoming liable for any loss or damages to Licensee occasioned thereby. All costs incurred by GTE to remove Licensee's Attachments shall be reimbursed to GTE by Licensee upon demand by GTE.

8. Placement of Attachments.

Licensee shall, at its own expense, place and maintain and replace its Attachments on GTE's poles in accordance with (I) such requirements and specifications as GTE shall from time to time prescribe in writing, (ii) all rules or orders now in effect or that hereafter may be issued by any regulatory agency or other authority having jurisdiction, and (iii) all currently applicable requirements and specifications of the National Electrical Safety Code, and the applicable rules and regulations of the Occupational Safety And Health Act. Licensee agrees to comply, at its sole risk and expense, with all specifications included in Addendum C, Exhibits 1 through 11 hereto, as may be revised from time to time by GTE.

9. Failure of Licensee to Place Attachments.

Once Licensee has obtained an approved PAR, Licensee shall have sixty (60) days from the date the PAR is approved to begin the placement of its Attachments on the GTE poles covered by the PAR. If Licensee has not begun placing its Attachments within that sixty (60) day period, Licensee shall so advise GTE with a written explanation for the delay. If Licensee fails to advise GTE of its delay, with a written explanation therefor, or if Licensee fails to act in good faith by not making a bona fide effort to begin placing its Attachments within the sixty (60) days prescribed by this Section, the previously approved PAR shall be deemed rescinded by GTE and Licensee shall have no further right to place Attachments pursuant to that PAR.

10. Attachment Fees.

10.1 Licensee shall pay to GTE an Attachment Fee, as specified in Addendum A hereto, for each GTE pole upon which Licensee obtains authorization to place an Attachment. The Attachment Fee may be increased by GTE from time to time as permitted by law upon thirty (30) days written notice to Licensee.

10.2 Attachments Fees shall become due and payable on the date a PAR is approved by GTE for all GTE poles identified in that PAR on a pro rata basis until the end of the then current year and thereafter on an annual basis within thirty (30) days of the date of a statement from GTE specifying the fees to be paid. Any payment after thirty (30) days shall bear interest at the rate of eighteen percent (18%) per annum or the maximum rate allowed by law, whichever is less.

10.3 GTE shall maintain an inventory of the total number of GTE poles occupied by Licensee based upon the cumulative number of poles specified in all PARs approved by GTE. GTE may, at its option, conduct a physical inventory of Licensee's Attachments under this section. It shall be Licensee's sole responsibility to notify GTE of any and all removals of Attachments from GTE's poles. Except as provided in Section 5 of this Agreement in connection with the termination of this Agreement, such notice shall be provided to GTE at least thirty (30) days prior to the removal of the Attachments. Each Notice of Removal shall be in a form specified by GTE and may be revised from time to time at GTE's sole discretion. Licensee shall remain liable for Attachment Fees until Licensee's Attachments have been physically removed from GTE's poles.

11. Modifications, Additions or Replacements to Existing Attachments.

11.1 Licensee shall not modify, add to or replace facilities on any pre-existing Attachment on a GTE pole without first notifying GTE in writing of the intended modification, addition or replacement at least thirty (30) days prior to the date the activity is scheduled to begin. The required notification shall include: (1) the date the activity is scheduled to begin, (2) a description of the planned modification, addition or replacement, (3) a representation that the modification, addition or replacement will not require any space other than the space previously designated for Licensee's Attachments, and (4) a representation that the modification, addition or replacement will not impair the structural integrity of the poles involved.

11.2 Should GTE determine that the modification, addition or replacement specified by Licensee in its notice will require more space than that allocated to

Licensee or will require the reinforcement of, replacement of or an addition of support equipment to the poles involved in order to accommodate Licensee's modification, addition or replacement, GTE will so notify Licensee, whereupon Licensee will be required to submit a PAR in compliance with this Agreement in order to obtain authorization for the modification, addition or replacement of its Attachments.

11.3 At GTE's option and at Licensee's sole cost and expense, Licensee shall remove, relocate, modify, or rearrange Licensee's Attachments upon one hundred twenty (120) day notice from GTE as required by GTE as may be required by GTE for its own service needs.

11.4 Access to GTE's poles for repairs, modifications, additions, or replacements required in emergency situations shall be governed by the provisions of this Agreement.

12. Charges for Unauthorized Attachments.

12.1 It is agreed that a charge equal to five (5) times the amount of the then current Attachment Fee shall be paid by Licensee to GTE for each unauthorized Attachment to a GTE pole. Such payment shall be deemed liquidated damages and not a penalty. Licensee also shall pay GTE an Attachment Fee for each unauthorized Attachment accruing from the date the unauthorized Attachment was first placed on the GTE pole. In the event that the date the unauthorized Attachment was first placed on a GTE pole cannot be determined, such date shall be deemed the date of the last physical inventory made in accordance with this Agreement or, if no physical inventory has been conducted, the date the first PAR from Licensee was approved in accordance with this Agreement. Licensee also shall pay to GTE all costs incurred by GTE to rearrange any unauthorized Attachment(s) of Licensee if such rearrangement is required to safeguard GTE's Attachment(s) or to accommodate the Attachment(s) of another party whose Attachment(s) would not have required a rearrangement but for the presence of Licensee's unauthorized Attachment(s). Licensee shall also pay to GTE all costs incurred by GTE to reinforce, replace or modify any GTE pole, which reinforcement, replacement or modification was required as a result of the unauthorized Attachment of Licensee. The Attachment Fee referenced in this subsection 12.1 shall be determined in the same manner as such fee

would have been determined if the attachment had been authorized by GTE.

12.2 For purposes of this section, an unauthorized Attachment shall include, but not be limited to:

12.2.1 An Attachment to a GTE pole which pole is not identified in any PAR approved in accordance with this Agreement;

12.2.2 An Attachment that occupies more space than that allocated to Licensee by GTE;

12.2.3 An Attachment that is not placed in accordance with the provisions of this Agreement or the appropriate PAR issued pursuant to this Agreement;

12.2.4 An addition or modification by Licensee to its pre-existing Attachment(s) that impairs the structural integrity of the involved GTE pole(s).

12.2.5 An Attachment that consists of facilities owned or controlled by, and for the use of a party other than Licensee.

13. Surveys and Inspections of Pole Attachments.

13.1 Upon written notice to Licensee, the total number and exact location of Licensee's Attachments on GTE's poles may be determined, at GTE's discretion, through a survey to be made not more than once per calendar year by GTE. If so requested, Licensee and/or any other entity owning or jointly owning the poles with GTE may participate in the survey. The costs incurred by GTE to conduct the survey shall be reimbursed to GTE by Licensee upon demand by GTE. If the Attachments of more than one Licensee are surveyed, each such Licensee shall contribute a proportionate share of the costs reimbursed to GTE.

13.2 Apart from surveys conducted in accordance with this section, GTE shall have the right to inspect any Attachment of Licensee on GTE's poles as conditions may warrant upon written notice to Licensee. Licensee shall, upon demand by GTE, reimburse GTE all costs incurred to conduct its inspection. No joint survey or inspection, or lack thereof, by GTE shall operate to relieve Licensee of any responsibility, obligation or liability assumed under this Agreement.

14. Notice of Modification or Alteration of Poles by GTE.

14.1 In the event GTE plans to modify or alter any GTE pole(s) upon which Licensee has Attachments, GTE shall provide Licensee notice of the proposed modification or alteration at least thirty (30) days prior to the time the proposed modification or alteration is scheduled to take place. Should Licensee decide to modify or alter its Attachments on the GTE poles to be modified or altered by GTE, Licensee shall so notify GTE in writing. In such event, Licensee shall bear a proportionate share of the total costs incurred by GTE to make such poles accessible to Licensee.

14.2 In the event GTE moves the location of or replaces any GTE pole(s), Licensee concurrently shall relocate Licensee's Attachments. GTE, at its discretion and Licensee's expense, may provide on-site personnel for such relocation. Licensee shall be solely responsible for the costs of the relocation of Licensee's Attachments.

15. Disclaimer of Warranties.

EXCEPT AS SPECIFICALLY SET FORTH IN THIS AGREEMENT, GTE MAKES NO WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

16. Default and Remedies.

16.1 The occurrence of any one of the following shall be deemed a Material Default by Licensee under this Agreement:

16.1.1 Failure by Licensee to pay any fee or other sum required to be paid under the terms of this Agreement and such default continues for a period of ten (10) days after written notice thereof to Licensee;

16.1.2 Failure by Licensee to perform or observe any other term, condition, covenant, obligation or provision of this Agreement and such default continues for a period of thirty (30) days after written notice thereof from GTE (provided that if such default is not curable within such thirty (30) day period, the period will be extended if Licensee commences to cure such default within such thirty (30) day period and proceeds diligently thereafter

to effect such cure);

- 16.1.3 The filing of any tax or mechanic's lien against GTE's poles which is not bonded or discharged within thirty (30) days of the date Licensee receives notice that such lien has been filed;
 - 16.1.4 Licensee's voluntary or involuntary bankruptcy;
 - 16.1.5 Licensee's knowing use or maintenance of its Attachments in violation of any law or regulation, or in aid of any unlawful act or undertaking;
 - 16.1.6 If any authorization which may be required of the Licensee by any governmental or private authority for the placement, operation or maintenance of Licensee's Attachments is denied or revoked.
- 16.2 In the event of a Material Default, GTE, without any further notice to the Licensee (except where expressly provided for below or required by applicable law) may do any one or more of the following:
- 16.2.1 Perform, on behalf and at the expense of Licensee, any obligation of Licensee under this Agreement which Licensee has failed to perform and of which GTE shall have given Licensee notice, the cost of which performance shall be paid by Licensee to GTE upon demand;
 - 16.2.2 Terminate this Agreement by giving notice of such termination to Licensee and remove Licensee's Attachments and store them in a public warehouse or elsewhere at the expense of and for the account of Licensee without GTE being deemed guilty of trespass or conversion, and without GTE becoming liable for any loss or damages to Licensee occasioned thereby; or
 - 16.2.3 Exercise any other legal or equitable right or remedy which GTE may have.
- 16.3 Any costs and expenses incurred by GTE (including, without limitation, reasonable attorneys' fees) in enforcing this Agreement shall be repaid to GTE by

Licensee upon demand.

16.4 Upon termination of this Agreement by GTE because of a material default by Licensee, Licensee shall remain liable to GTE for any and all fees, other payments and damages which may be due or sustained prior to such termination, all reasonable costs, fees and expenses, including, without limitation, reasonable attorneys' fees incurred by GTE in pursuit of its remedies hereunder, and additional liquidated damages which shall be an amount equal to one full year of Pole Attachment fees.

16.5 All rights and remedies of GTE set forth in this Agreement shall be cumulative and none shall exclude any other right or remedy, now or hereafter allowed by or available under any statute, ordinance, rule of court, or the common law, either at law or in equity, or both.

17. Indemnification.

17.1 Licensee shall compensate GTE for the full actual loss, damage or destruction of GTE's property that in any way arises from or is related to this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation or maintenance of Licensee's Attachments).

17.2 Licensee will further indemnify, defend and hold harmless GTE and GTE's agents, officers, employees and assigns, from any and all losses, damages, costs, expenses (including, without limitation, reasonable attorneys' fees), statutory fines or penalties, actions or claims for personal injury (including death), damage to property, or other damage or financial loss of whatever nature in any way arising out of or connected with this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation or maintenance of Licensee's Attachments), except to the extent caused by the gross negligence or willful misconduct on the part of GTE or GTE's agents, officers, employees and assigns. Licensee expressly assumes all liability for actions brought against GTE and GTE's agents, officers, employees and assigns, by Licensee's agents, officers or employees and Licensee expressly waives any immunity from the enforcement of this indemnification provision that might otherwise be provided by workers' compensation law or by other

loss of whatever nature in any way arising out of or connected with this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation or maintenance of Licensee's Attachments), except to the extent caused by the negligence or willful misconduct on the part of GTE or GTE's agents, officers, employees and assigns. Licensee expressly assumes all liability for actions brought against GTE and GTE's agents, officers, employees and assigns, by Licensee's agents, officers or employees and Licensee expressly waives any immunity from the enforcement of this indemnification provision that might otherwise be provided by workers' compensation law or by other state or federal laws.

- 17.3 Without limiting any of the foregoing, Licensee assumes all risk of, and agrees to relieve GTE of any and all liability for, loss or damage (and the consequences of loss or damage) to any Attachments placed on GTE's poles and any other financial loss sustained by Licensee, whether caused by fire, extended coverage perils, or other casualty, except to the extent caused by the negligence or willful misconduct on the part of GTE or GTE's agents, officers, employees and assigns.
- 17.4 Without limiting the foregoing, Licensee expressly agrees to indemnify, defend and hold harmless GTE and GTE's agents, officers, employees and assigns from any and all claims asserted by customers of Licensee in any way arising out of or in connection with this Agreement or Licensee's Attachments, except to the extent caused by the negligence or willful misconduct on the part of GTE or GTE's agents, officers, employees and assigns.
- 17.5 Notwithstanding anything to the contrary in this Agreement, Licensee further shall indemnify and hold harmless GTE, its agents, officers, employees and assigns from and against any claims, liabilities, losses, damages, fines, penalties and costs (including, without limitation, reasonable attorneys' fees) whether foreseen or unforeseen, which the indemnified parties suffer or incur because of: (I) any discharge of Hazardous Waste resulting from acts or omissions of Licensee or the Licensee's predecessor in interest; (ii) acts or omissions of the Licensee, its agents, employees, contractors or representatives in connection with any cleanup required by law, or (iii) failure of Licensee to comply with Environmental, Safety and Health Laws.
- 17.6 In no event shall either party be liable to the other party for any special, consequential or indirect damages (including, without limitation, lost

~~12~~ 13 VJJK 8/29/96

state or federal laws.

- 17.3 Without limiting any of the foregoing, Licensee assumes all risk of, and agrees to relieve GTE of any and all liability for, loss or damage (and the consequences of loss or damage) to any Attachments placed on GTE's poles and any other financial loss sustained by Licensee, whether caused by fire, extended coverage perils, or other casualty, except to the extent caused by the gross negligence or willful misconduct on the part of GTE or GTE's agents, officers, employees and assigns.
- 17.4 Without limiting the foregoing, Licensee expressly agrees to indemnify, defend and hold harmless GTE and GTE's agents, officers, employees and assigns from any and all claims asserted by customers of Licensee in any way arising out of or in connection with this Agreement or Licensee's Attachments, except to the extent caused by the gross negligence or willful misconduct on the part of GTE or GTE's agents, officers, employees and assigns.
- 17.5 Notwithstanding anything to the contrary in this Agreement, Licensee further shall indemnify and hold harmless GTE, its agents, officers, employees and assigns from and against any claims, liabilities, losses, damages, fines, penalties and costs (including, without limitation, reasonable attorneys' fees) whether foreseen or unforeseen, which the indemnified parties suffer or incur because of: (I) any discharge of Hazardous Waste resulting from acts or omissions of Licensee or the Licensee's predecessor in interest; (ii) acts or omissions of the Licensee, its agents, employees, contractors or representatives in connection with any cleanup required by law, or (iii) failure of Licensee to comply with Environmental, Safety and Health Laws.
- 17.6 In no event shall GTE be liable to Licensee for any special, consequential or indirect damages (including, without limitation, lost revenues and lost profits) arising out of this Agreement or any obligation arising hereunder, whether in an action for or arising out of breach of contract, tort or otherwise.
- 17.7 Licensee shall indemnify, protect and hold harmless GTE from and against any and all claims for libel and slander, copyright and/or patent infringement arising directly or indirectly by reason of

installation of Licensee's equipment on GTE's poles pursuant to this Agreement.

18. Insurance.

18.1 Licensee shall carry insurance, at its sole cost and expense, sufficient to cover its indemnification obligations as set forth in Section 17 of this Agreement. Such insurance shall include, but not be limited to, coverage against liability due to personal injury or death of persons in the amount of \$500,000 as to any one person and \$1,000,000 as to any one accident; coverage against liability due to property damage in the amount of \$500,000 as to each accident and \$500,000 aggregate; and coverage necessary to fully protect both it and GTE from all claims under any worker's compensation laws that may be applicable.

18.2 All insurance required of Licensee under this Agreement shall remain in force for the entire life of this Agreement. The company or companies issuing such insurance shall be approved by GTE and GTE shall be named as an additional insured in each such policy. Licensee shall submit to GTE certificates by each insurer to the effect that the insurer has insured Licensee for all potential liabilities of Licensee under this Agreement, and that it will not cancel or change any policy of insurance issued to Licensee except upon thirty (30) days notice to GTE. In the event Licensee's insurance coverage is to be canceled by reason of non-payment of premiums due, GTE shall have the option of paying any amount due and Licensee shall forthwith reimburse GTE the full amount paid by GTE.

18.3 Licensee shall promptly advise GTE in writing of any and all claims for damages, including, but not limited to, damage to property or injury to or death of persons, allegedly arising out of or in any manner related, directly or indirectly, to the presence or use of Licensee's Attachments.

18.4 Licensee shall furnish bond or satisfactory evidence of contractual insurance coverage, the terms of which shall be subject to GTE's approval, in the amount of ten thousand dollars (\$10,000) to guarantee the payment of any sums which may become due to GTE for rentals, inspections or for work performed by GTE for the benefit of Licensee under this Agreement, including the removal of Licensee's equipment pursuant to any of the provisions hereof.

All bonds must specify that the GTE be notified thirty (30) days prior to the expiration or cancellation of the policy.

19. Emergency Restoration Procedures.

In the event of an emergency, restoration procedures may be affected by the presence of Licensee's Attachments. While GTE shall not be responsible for the repair of Licensee's Attachments that are damaged (except by mutual written agreement), GTE shall nonetheless control access to its poles if the restoration is to be achieved in an orderly fashion.

19.1 Where GTE and Licensee are involved in emergency restorations, access to GTE's poles will be controlled by GTE's Maintenance District Manager or his/her on-site representative according to the following guidelines:

19.1.1 Service Disruptions/Outages

- (a) In the event of service disruptions and/or outages, while exercising its right to first access, GTE shall make all reasonable efforts to grant access to as many other entities with Attachments as is reasonably safe.
- (b) Where simultaneous access is not possible, access will be granted by GTE on a first come, first served basis.

19.1.2 Service Affecting Emergencies

- (a) In the event of service affecting emergencies not resulting in service disruptions or outages, while exercising its right to first access, GTE shall make all reasonable efforts to grant access to as many other entities with Attachments as is reasonably safe.
- (b) Where GTE is unable to grant simultaneous access to all other entities with Attachments, access will be granted according to the level of damage to the Attachments of each entity and the likelihood that a given level of damage will result in service disruption. Where the likelihood that a service disruption will result is not

clearly discernible, access will be on a first come, first served basis.

19.2 Without limiting any other indemnification or hold harmless provisions of this Agreement, Licensee agrees that any decision by GTE regarding access to Attachments, or any action or failure to act by GTE, under this Section 19 shall not constitute a basis for any claim by Licensee against GTE for any damage to Licensee's Attachments or disruption of Licensee's services, or any other direct or indirect damages of any kind whatsoever incurred by Licensee.

20. Damage Suspected to Licensee's Facilities Only.

20.1 In the event Licensee receives information that Licensee's Attachments are damaged, Licensee shall notify GTE of said damage at [TELEPHONE NUMBER]. This is a 24-hour, 7 days per week notification number. Licensee shall provide GTE all information known to it regarding the damage to Licensee's Attachments.

20.2 In the event GTE receives notice that Licensee's Facilities are damaged, GTE will notify Licensee of said damage by telephone at the Licensee's emergency telephone number. GTE shall provide Licensee all information known to it regarding the damage to Licensee's Attachments.

20.3 After the giving of such notice by either Licensee or GTE, Licensee shall be authorized to perform emergency restoration maintenance activities in connection with Licensee's Attachments, subject to the provisions of this Agreement.

20.4 Without limiting any other indemnification or hold harmless provisions of this Agreement, Licensee agrees that any decision by GTE regarding access to Licensee's Attachments, or any action or failure to act by GTE, appropriately or inappropriately, under this Section shall not be the basis for any claim by Licensee against GTE for any damage to Licensee's Attachments or disruption of Licensee's services, or any other direct or indirect damages of any kind whatsoever incurred by Licensee and Licensee shall indemnify and hold GTE harmless from any such claim.

21. Abandonment.

Nothing in this Agreement shall prevent or be construed to prevent GTE from abandoning, selling, assigning or

otherwise disposing of any poles or other GTE property used for Licensee's Attachments; provided, however, that GTE shall condition any such sale, assignment or other disposition subject to the rights granted to Licensee pursuant to this Agreement. GTE shall promptly notify Licensee of any proposed sale, assignment or other disposition of any poles or other GTE property used for Licensee's Attachments.

22. Notices.

Any written notice to be given to a party to this Agreement shall be in writing and given or made by means of telegram, facsimile transmission, certified or registered mail, express mail or other overnight delivery service, or hand delivery, proper postage or other charges prepaid, and addressed or directed to the respective parties as follows:

To Licensee: *ATTN: SUPERVISOR OF OUTSIDE PLANTING
FOR KENTUCKY
AT ET
1200 PEACHTREE STREET
FROM ANNEX
ATLANTA, GA 30309*

To GTE:

Lee C. Berkley (NC999058)
GTE South Incorporated
4100 N. Roxboro Road
Durham, North Carolina 27704

Any notice given by personal delivery shall be deemed to have been given on the day of actual delivery and, if given by registered or certified mail, return receipt requested, on the date of receipt thereof and, if given by facsimile transmission, on the day of transmittal thereof if given during the normal business hours of the recipient and on the next business day if not given during normal business hours.

23. Non-Waiver of Terms and Conditions.

No course of dealing, course of performance or failure to enforce any of term, right, condition or other provision of this Agreement shall constitute or be construed as a waiver of any term, right or condition or other provision of this Agreement.

24. Dispute Resolution.

- 24.1 Except in the case of (I) a suit, action or proceeding by GTE to compel Licensee to comply with its obligations to indemnify GTE pursuant to this Agreement or (ii) a suit, action or proceeding to compel either party to comply with the dispute resolution procedures set forth in this section, the parties agree to use the following procedure to resolve any dispute, controversy or claim arising out of or relating to this Agreement or its breach.
- 24.2 At the written request of a party, each party shall designate a knowledgeable, responsible representative to meet and negotiate in good faith to resolve any dispute, controversy or claim arising under this Agreement. The parties intend that these negotiations be conducted by non-lawyer, business representatives. The substance of the negotiations shall be left to the discretion of the representatives. Upon mutual agreement, the representatives may utilize other alternative dispute resolution procedures such as mediation to assist in the negotiations. Discussions and correspondence between the representatives for purposes of these negotiations shall be treated as confidential, undertaken for purposes of settlement, shall be exempt from discovery and production, and shall not be admissible in the arbitration described below or in any subsequent lawsuit without the concurrence of all parties. Documents identified in or provided during such negotiations, which are not prepared for purposes of the negotiations, shall not be so exempt and may, if otherwise admissible, be admitted as evidence in any subsequent proceeding.
- 24.3 If a resolution of the dispute, controversy or claim is not reached within sixty (60) days of the initial written request, the dispute, controversy or claim shall be submitted to binding arbitration by a single arbitrator pursuant to the rules of the American Arbitration Association (AAA), except as hereinafter provided. Discovery in any proceeding before the AAA shall be controlled by the arbitrator and shall be permitted to the extent set forth in this section. Parties may exchange, in any combination, up to thirty-five (35) (none of which may contain subparts) written interrogatories, demands to produce documents and requests for admission. Each party may also to take the oral deposition of one (1) witness. Additional discovery may be permitted upon mutual agreement of the

parties. The arbitration hearing shall be commenced within sixty (60) days of the demand for arbitration and shall be held in the city where GTE's local offices are located. The arbitrator shall rule on the dispute, controversy or claim by issuing a written opinion within thirty (30) days after the close of hearings. The times specified in this section may be extended upon mutual agreement of the parties or by the arbitrator upon a showing of good cause. Judgment upon the award rendered by the arbitrator may be entered in any court having jurisdiction.

24.4 Each party shall bear its own costs, including attorneys' fees, incurred in connection with any of the foregoing procedures. A party seeking discovery shall reimburse the responding party the cost of reproducing documents (to include search time and reproduction time costs). The fees associated with any arbitration, including the fees of the arbitrator, shall be divided equally between the parties.

25. Compliance With Laws.

Notwithstanding anything to the contrary in this Agreement, Licensee shall ensure that any and all activities it undertakes pursuant to this Agreement shall comply with all applicable laws, including, without limitation, all applicable provisions of (i) workers' compensation laws, (ii) unemployment compensation laws, (iii) the Federal Social Security Law, (iv) the Fair Labor Standards Act, and (v) all laws, regulations, rules, guidelines, policies, orders, permits and approvals of any governmental authority relating to environmental matters and/or occupational safety.

26. Force Majeure.

Except for payment of the Attachment Fees and other amounts payable under this Agreement, neither party shall have any liability for its delays or its failure in performance due to fire, flood, explosion, pest damage, power failures, strikes or labor disputes, acts of God, the Elements, war, civil disturbances, acts of civil or military authorities or the public enemy, inability to secure raw materials, transportation facilities, fuel or energy shortages, or other cause beyond its control.

27. Assignment.

27.1 The rights and obligations of Licensee under this

Agreement shall not be assigned, transferred or sub-licensed, in whole or in part, without the prior written consent of GTE. An assignment, transfer or sub-license of this Agreement by Licensee shall not relieve Licensee of its obligations under this Agreement. Any assignment attempted without the prior written consent of GTE shall be void.

27.2 GTE shall have the right to assign this Agreement and to assign its rights and delegate its obligations and liabilities under this Agreement, either in whole or in part. GTE shall provide notice to Licensee of any assignment which shall state the effective date thereof. Upon the effective date and to the extent of the assignment, GTE shall be released and discharged from all obligations and liabilities under this Agreement.

27.3 Neither this Agreement nor any term or provision hereof, nor any inclusion by reference shall be construed as being for the benefit of any person or entity not a signatory hereto.

27.4 This Agreement shall be binding upon and inure to the benefit of the parties hereto and their respective successors and assigns.

28. Applicable Law.

This Agreement, and the rights and obligations contained in it, shall be governed and construed under the laws of the State of Kentucky without regard to its conflicts of laws provisions.

29. Subsequent Law.

The terms and conditions of this Agreement shall be subject to any and all applicable laws, rules, regulations or guidelines that subsequently may be prescribed by any federal, state or local governmental authority. To the extent required by any such subsequently prescribed law, rule, regulation or guideline, the parties agree to modify, in writing, the affected term(s) and condition(s) of this Agreement to bring them into compliance with such law, rule, regulation or guideline. Should any term of this Agreement be determined by a court or other entity with competent jurisdiction to be unenforceable, all other terms of this Agreement shall remain in full force and effect.

30. Headings.

All headings contained in this Agreement are for convenience only and are not intended to affect the meaning or interpretation of any part of this Agreement.

31. Notice of Change in Services Provided. (FOR CATV LICENSEES ONLY)

In the event Licensee decides to provide Telecommunications Services in addition to or in lieu of Cable Television Services, Licensee shall so notify GTE in writing at least sixty (60) days prior the date the Telecommunications Services are to be provided.

32. Entire Agreement.

The terms and conditions of this Agreement supersede all prior oral or written understandings between the parties and constitute the entire agreement between them concerning the subject matter of this Agreement. There are no understandings or representations, express or implied, not expressly set forth in this Agreement. This Agreement shall not be modified or amended except by a writing signed by the party to be charged.

IN WITNESS WHEREOF, the parties hereto have executed this Agreement through their authorized representatives.

CLEARANCE FOR TV CABLES PARALLELING OTHER WIRES

LOCATION OF VERTICAL RUNS

Dimension "A" To Be 45° Where Practicable But In No Case Shall Vertical Runs Have A Clearance Of Less Than 2 In. From The Nearest Metal Part Of The Equipment Of Another.

REGULATIONS GOVERNING CATV ATTACHMENTS

The following regulations shall apply to the making of Licensee's attachments to Licensor's poles:

1. Location of Attachments

Cable and wire attachments shall be placed above telephone cable and equipment and on the same side of the pole as the telephone cable.

All attachments of Licensee must be placed to avoid interference with telephone plant, including loop attachment space, raised terminal cover, load coils, pole steps, etc.

2. Supporting Strand for Television Cable

Supporting strand for television cable shall be sufficient to support the load to which it may be subjected and to maintain the required ground clearances. Strand supporting television cables shall meet the requirements of the National Electrical Safety Code for strand supporting communications cables (i.e., strand supporting communications cable crossing over railroads must have a minimum breaking strength of 6,000 lbs.; strand supporting communications cable crossing over electric supply lines carrying over 750V should not be stressed to more than 60% of rated breaking strength under the maximum load to which it may be subjected, including storm loading).

3. Drops

Type of drop conductors and construction methods shall be subject to the approval of Licensor. When used as drop conductor, RG 59/U cable or equivalent coaxial cable, because of low tensile strength, shall be supported by a wire or strand satisfactory to the Licensor. A Figure 8-type coaxial cable is acceptable as standard material to be employed in this construction. Flat ribbon-type line shall not be used as a drop conductor.

4. Climbing Space

On poles to which power circuits are attached, the television cable, drops and other equipment shall be so placed as to leave adequate free climbing space (see Exhibits 1 to 10 inclusive).

ADDENDUM C
EXHIBIT II

5. Clearances

Clearances for Licensee's attachments shall be the same as for telephone attachments.

On buildings, clearances between telephone and television facilities shall be a minimum of four (4) inches.

The television drop from pole to building shall have a parallel clearance of at least one (1) foot from telephone drops, and in case of a crossing with telephone drops, the separation shall be a minimum of two (2) feet.

6. Bonding

Television drop wire support strands shall be bonded by Licensee to the television cable support strand.

7. Grounding

Television cable shall be supported by strand, which shall be effectively grounded by Licensee from its antenna towers to Licensor's poles in order to minimize lightning damage to telephone plant. Effective ground are multi-grounded power neutrals or water pipe systems, or, if these are not available, a suitable counterpoise (buried wire). Permission shall be obtained in advance from the Power Company concerned for grounding to multi-grounded power neutrals. Metal amplifier cases shall be bonded to the television cable strand by Licensee.

The outer conductor of coaxial cable used as a drop conductor shall be grounded at the building, preferably to a water pipe system, as close to the point of entrance as practicable.

8. Other Poles or Structures

Where the television cable is attached to poles or other structures not occupied by telephone plant, but extends to poles occupied by telephone plant, Licensee shall adhere to all of the requirements and specifications referred to in Article IV of the Agreement with respect to such other poles or structures.

9. Customers' Premises

Protection shall be provided by Licensee for all television drops at its customers' premises, in accordance with the specifications of the National Electrical Safety Code.

Details of Attachments

Place Bardstown-Louisville fiber-optic cable along US Hwy 31-E from the Jefferson County-Bullitt County Line southward through the City of Mount Washington to the Salt River (Bullitt County-Spencer County Line). Attachments to ninety-four poles (ALLTEL Pole #'s 12-92 to 12-52 and 6-4-1 and 6-4 to 6-71) are required.

By BellSouth Telecommunications, Inc.

To ALLTEL Kentucky, Inc.

229 Lees Valley Road
P. O. Box 68
Shepherdsville, Kentucky 40165

Number 01

Superseding ----

Place Mount Washington, Ky.

Attention:

Jan Teensma

Date October 1, 1991

The undersigned BellSouth Telecommunications, Inc. herein-
after referred to as the Licensee, hereby requests permission to make as
of October 1, 1991 the following attachments to the poles
and fixtures described below of the ALLTEL Kentucky, Inc. Company,
hereinafter referred to as the Licensor, at the rentals below stated,
and under the terms and conditions printed on the back hereof.

General Nature of Attachments

| | | | | |
|----------|--------------------------|------------------|----|------------|
| State | Line | Pole numbers | to | inclusive. |
| Kentucky | Louisville to Salt River | (See Attachment) | | |

Purposes for which to be used

Pole attachments will be used for SCB's diversity route for fiber optic facilities from Louisville to Bardstown.

5. The Licensee shall not assign, transfer or sublet any of the privileges described in the within application without the consent in writing of the Licensor.

6. The Licensee shall not at any time make any attachments to the poles of the Licensor without a permit therefor, nor shall it make any changes in the location or in the use of its attachments without the consent in writing of the Licensor.

7. Nothing herein contained shall be construed to confer upon the Licensee any rights of property in the poles and fixtures of the Licensor, or as a guarantee of permission from municipal or other authority to place or maintain its attachments to said poles and fixtures.

8. Upon notice from the Licensor of the Licensee's failure to comply with any of the conditions hereof, or that its attachments are forbidden by municipal or other authority, the within permission shall immediately terminate, and the Licensee shall forthwith remove any or all of its attachments to the poles and fixtures of the Licensor, and upon its failure to do so the Licensor reserves the right to make such removal at the cost and risk of the Licensee.

AGREEMENT TERMS AND CONDITIONS

1.0 SCOPE OF AGREEMENT

- 1.1 The purpose of this Agreement is to set forth the rates, terms, conditions, and procedures under which the Licensor will provide Licensee access to Licensor's poles, ducts, innerducts, conduits, and rights-of-way. **This agreement does NOT allow access to Windstream Central Offices. A separate agreement is required for interconnection access.**
- 1.2 Subject to the provisions of this Agreement, Licensor will issue to Licensee for any lawful communications purpose, revocable, nonexclusive licenses authorizing the attachment of Licensee's cables, equipment, and facilities to Licensor's poles or the placing of Licensee's cables, antennas, equipment, and facilities in Licensor's conduit system or within right-of-way owned or controlled by Licensor.
- 1.3 No use, however extended, of Licensor's poles, conduit system or right-of-way nor payment of any fees or charges required under this Agreement shall create or vest in Licensee any ownership or property rights in said poles, conduit system or right-of-way, but Licensee's rights therein shall be and remain a mere license. Nothing herein contained shall be construed to compel Licensor to construct, retain, extend, place, or maintain any facilities not needed for its own service requirements, unless otherwise required by law.
- 1.4 Licensee recognizes that Licensor has heretofore entered into, or may in the future enter into, agreements and arrangements with others which are not party to this Agreement regarding the poles, conduit system and right-of-way covered by this Agreement. Nothing herein contained shall be construed as a limitation, restriction or prohibition against Licensor with respect to such other agreements or arrangements. The rights of Licensee shall at all times be subject to any present or future joint use arrangement between Licensor and any other public utility or government agency.

2.0 DEFINITIONS

- 2.1 "Attachments" - Any attachment to a pole, use of a duct or innerduct, use of a conduit, or using right-of-way owned or controlled by Licensor.
- 2.2 "Attachment Fee" - Fee paid annually per attachment on a pole, or in a duct, innerduct, conduit, or right-of-way.
- 2.3 "Buried Cable" - Cable located below the surface of the ground but not in Licensor's conduit system.
- 2.4 "Conduit System" - Any combination of ducts, innerducts, conduits, manholes, and handholes owned or controlled by Licensor that is a reusable passage or opening in, on, under or through the ground, or a structure such as a building or bridge. The term includes "inner ducts" created by subdividing a duct into smaller channels.
- 2.5 "Hazardous Materials" -
 - (A) Any substance, material or waste now or hereafter defined or characterized as hazardous, toxic or dangerous as defined by the Comprehensive Environmental Response, Compensation and

Liability Act ("CERCLA") of 1980, as amended, and other federal, state, and local health, safety, and environmental laws, ordinances, statutes, and rules, including but not limited to the Occupational Safety and Health Act ("OSHA").

- (B) Any substance, material or waste now or hereafter classified as a contaminant or pollutant under any law, rules, ordinance, or authority.
 - (C) Any other substance, material or waste, the manufacture, processing, distribution, use, treatment, storage, placement, disposal, removal or transportation of which is now or hereafter subject to regulation under any law, ordinance, statute, rule or regulation of any governmental body or authority.
- 2.6 "Make Ready Work" - All work to prepare Licensor's poles, ducts, innerducts, conduits, rights-of-way, and related facilities for the requested occupancy or attachment of Licensee's facilities but not the actual placement of attachments or administrative activities related to inquiries, verifications, requests or applications.
- 2.7 "Poles"- Licensor owned and poles owned by others to the extent that and for so long as Licensor has the right to permit others to be attached in the communications or other allowable designated space.
- 2.8 "Pole Attachment Request" or "PAR" - A written request from Licensee to attach its facilities to Poles, submitted in accordance with this Agreement. With respect to pole attachment agreements in effect prior to the date the Parties executed this Agreement, the term PAR shall be deemed to include Pole attachment requests made by letter or similar document.
- 2.9 "Right-of-Way" - Right-of-way owned or controlled by Licensor. It does not include attachment or use of cables, poles, equipment or facilities located on a particular right-of-way. It may include private easement, or in certain instances public right-of-way granted by a governmental authority or a utility easement such as in a subdivision or development.

3.0 TERM OF AGREEMENT

- 3.1 This Agreement shall become effective upon its execution and if not terminated in accordance with the provisions of other Articles hereof, shall continue in effect for a term of not less than three (3) years, provided, however, that at any time after the first year of said term the rates, fees and charges set forth may be increased or decreased by written notice from Licensor to Licensee on a nondiscriminatory basis with respect to similar rates, fees and charges of other similar licensees.
- 3.2 Either Party may terminate this Agreement with at least a (6) six month written notice to the other Party.
- 3.3 Upon termination of the Agreement in accordance with any of its terms, all outstanding licenses in connection therewith shall terminate and shall be surrendered and Licensee shall within 60 days of date of termination remove all cables, equipment and facilities at the cost and expense of Licensee. If Licensor in its sole discretion, deems it is impractical to remove Licensee's cable, equipment and facilities from Licensor's rights-of-way, they may be abandoned in place.

4.0 LEGAL AUTHORITY

- 4.01 Licensee will obtain from public authorities and private owners of property any and all permits, franchises, licenses and grants necessary for the lawful exercise of any license granted hereunder

5.0 APPLICABLE LAW

- 5.01 This Agreement, and the rights and obligations contained in it, shall be governed and construed under the laws of the state in which the attachments hereunder are to be located.

6.0 SUBSEQUENT LAW

- 6.01 The terms and conditions of this Agreement shall be subject to any and all applicable laws, rules, regulations or guidelines now in effect and that subsequently may be prescribed by any federal, state or local governmental authority. To the extent required by any such subsequently prescribed law, rule, regulation or guideline, the Parties agree to modify, in writing, the affected term(s) and conditions(s) of this Agreement to bring them into compliance with such law, rule, regulation or guideline. Should any term of this Agreement be determined by a court or agency with competent jurisdiction to be unenforceable, all other terms of this Agreement shall remain in full force and effect.

7.0 DISCLAIMER OF WARRANTIES

- 7.01 Except as specifically set forth in this Agreement, Licensor makes no warranties, express or implied, including, but not limited to, any implied warranties of merchantability or fitness for a particular purpose.

8.0 LICENSE NOT EXCLUSIVE

- 8.01 Nothing herein contained shall be construed as a grant of any exclusive license, right or privilege to Licensee. Licensor shall have the right to grant, renew and extend rights and privileges to others not parties to this Agreement, by contract or otherwise, to use any poles, conduit system or right-of-way covered by this Agreement, under such terms and conditions, as Licensor shall prescribe.

9.0 ASSIGNMENT OF RIGHTS

- 9.1 Licensee shall not assign; transfer or sublet the privileges hereby granted, or sell, lease or otherwise permit the use of its facilities on or any part thereof (all of the foregoing being "Transfers"), without prior consent in writing of Licensor which consent shall not be unreasonably withheld, delayed or conditioned; provided, however, that either Party may so Transfer its rights and obligations under this Agreement without such consent to (i) any entity said Party, directly or indirectly, controls, is controlled by or is under common control with or (ii) any entity acquiring all or substantially all of said Party's assets or equity, by providing written notice to the other Party of such Transfer. Any attempted Transfer that is not permitted under this Section ~~9.01~~ ^{9.1} is void *ab initio*.

- 9.2 Subject to the provisions of this Agreement, this Agreement shall extend to and bind the successors and authorized assigns of the Parties hereto.

10.0 LIABILITY AND DAMAGES

- 10.1 Licensor reserves to itself, its successors and assigns, the right to maintain its poles, conduit system and right-of-way and to operate its facilities thereon in such manner as will best enable it to fulfill its own service requirements. Licensor shall not be liable to Licensee for any interruption to service of Licensee or for interference with the operation of the cables, equipment or facilities of Licensee arising in any manner out of the use of Licensor's poles, conduit system and right-of-way except caused by Licensor's sole negligence, willful misconduct or material breach of this Agreement, in which case Licensor's liability shall be limited to the reasonable cost of repair of Licensee's damaged cable, equipment or facilities, if any.
- 10.2 Licensee shall exercise special precautions to avoid damaging the cables, poles, conduits, right-of-way equipment and facilities of Licensor and of other licenses and hereby assumes all responsibility for any and all loss, damages, costs and expenses. Licensee shall make an immediate report to Licensor of the occurrence of any such damage and hereby agrees to reimburse the respective owners for the expense incurred in making repairs.
- 10.3 Licensee shall indemnify and hold harmless Licensor against any and all claims, demands, causes of action, damages, costs or liabilities of every kind and nature whatsoever, except to the extent caused by Licensor's negligence or willful misconduct, which may arise out of or be caused by:
- (A) The erection, maintenance, presence, use or removal of Licensee's cable, equipment, and facilities on Licensor's poles, and within Licensor's conduit system and right-of-way
 - (B) Any act of Licensee on or in the vicinity of Licensor's poles, conduit system and right-of-way, or
 - (C) Any interruption, discontinuance, or interference with Licensor's service to any of its subscribers occasioned or claimed to have been occasioned by any action of Licensee pursuant to or consistent with this Agreement. Licensee shall, upon demand and at its own sole risk and expense, defend any and all suits, actions or other legal proceeding brought or instituted against Licensor on any such claim, demand or cause of action, and shall pay and satisfy any judgment or decree rendered against Licensor therein, and Licensee shall reimburse Licensor for any and all legal expense incurred by Licensor in connection therewith. Licensee shall also indemnify, protect and hold harmless Licensor from any and all claims and demands of whatever kind which arise directly or indirectly from the operation of Licensee's facilities including taxes, special charges by others, claims and demands for damages or loss for infringement of copyright, for libel and slander for unauthorized use of television broadcast programs, and for unauthorized use of other program material, and from and/or against all claims and demands for infringement of patents with respect to the manufacturer, use and operation of Licensee's equipment whether arising from the use of Licensee's equipment in combination with Licensor's poles, conduit system, right-of-way or otherwise.
- 10.4 Licensee agrees to comply under the Workmen's Compensation Laws of the state in which attachments are to be located hereunder, and also agrees to cause every subcontractor of Licensee to comply with and qualify under said laws, and shall furnish copies of Certificates demonstrating such compliance to Licensor prior to commencement of the work.

11.0 DEFAULT AND REMEDIES

11.1 In addition to Material Defaults defined anywhere else in this Agreement, any one of the following shall be deemed the occurrence of a Material Default under this Agreement:

- (A) Failure by Licensee to pay any fee or other sum required to be paid under the terms of this Agreement and such default continues for a period of thirty (30) calendar days after written notice thereof to Licensee.
- (B) Failure by either Party to perform or observe any other term, condition, covenant, obligation, or provision of this Agreement and such default continues for a period of thirty (30) business days after written notice thereof from the other Party (provided that if such default is not curable within a thirty (30) business day period, the period will be extended if the Party substantially commences to cure such default and proceeds diligently thereafter to effect such cure).
- (C) The filing of any tax or mechanic's lien against Poles because of any act or omission by Licensee which is not bonded or discharged within thirty (30) calendar days of the date Licensee receives notice that such lien has been filed;
- (D) Licensor or Licensee's voluntary or involuntary bankruptcy;
- (E) Licensee's knowing use or maintenance of its Attachments in violation of any law or regulation, or in aid of any unlawful act or undertaking;
- (F) If, after Licensee has exhausted all legal, administrative and equitable remedies in all state and federal forums, any authorization which may be required of Licensee by any governmental or private authority for the placement, operation, or maintenance of Licensee's Attachments is denied or revoked.

11.2 In the event of a Material Default and subject to any other applicable provision of this Agreement, the Non-defaulting Party, without any further notice to the Defaulting Party (except where expressly provided for below or required by applicable law), may do any one or more of the following:

- (A) Perform on behalf and at the expense of the Defaulting Party, any obligation of the Defaulting Party under this Agreement which the Defaulting Party has failed to perform and of which the Non-defaulting Party shall have given the Defaulting Party notice, the cost of which performance shall be paid by the Defaulting Party to the Non-defaulting Party upon demand;
- (B) Terminate this Agreement by giving sixty (60) business days written notice of such termination to Licensee and remove Licensee's Attachments and store Licensee's facilities in a public warehouse or elsewhere at the expense of and for the account of Licensee without Licensor being deemed guilty of trespass or conversion, and without Licensor becoming liable for any loss or damages to Licensee occasioned thereby; or
- (C) Exercise any other legal or equitable right or remedy that the Non-defaulting Party may have.

11.3 The Defaulting Party shall repay to the Non-defaulting Party upon demand any costs and expenses incurred by the Non-defaulting Party (including, without limitation, reasonable attorneys' fees) in successfully enforcing this Agreement.

- 11.4 Upon termination of this Agreement by the Non-defaulting Party, the Defaulting Party shall remain liable to the Non-defaulting Party for any and all fees, other payments and damages which may be due or sustained in accord with this Agreement prior to such termination, all reasonable costs, fees and expenses, including, without limitation, reasonable attorney' fees incurred by the Non-defaulting Party in pursuit of its remedies hereunder.
- 11.5 All rights and remedies of the Non-defaulting Party set forth in this Agreement shall be cumulative and none shall exclude any other right or remedy, now or hereafter allowed by or available under any statute, ordinance, rule of court, or the common law, either at law or in equity, or both.

12.0 INDEMNIFICATION

- 12.1 Licensee shall compensate Licensor for the full actual loss, damage or destruction of Licensor's property that in any way arises from or is related to this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation, or maintenance of Licensee's Attachments). However, reasonable wear and tear are excluded.
- 12.2 ~~Each party agrees to defend, indemnify, protect and hold harmless the other and the other's officers, directors, employees, shareholders, successors, assigns, agents, affiliates, representatives, partners, and contractors from and against any and all third party claims, actions, administrative proceedings (including, without limitation, informal proceedings), judgments, damages, penalties, fines, cost, liabilities, interests, or loss, including, without limitation, reasonable attorneys' fees and expenses, consultant fees, and expert fees, together with all other costs and expenses of any kind or nature suffered by or asserted against the indemnified party in any way arising out of or connected with this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation or maintenance of Licensee's facilities, unless caused by the negligence or misconduct on the part of Licensor or Licensor's affiliates, agents, officers, employees and assigns). Each party expressly assumes all liability for actions by its affiliates, agents, officers, employees, or its contractors and expressly waives any immunity from the enforcement of this indemnification provision that might otherwise be provided by workers' compensation law or by other state or federal laws.~~
- 12.3 Without limiting any of the foregoing, Licensee assumes all risk of, and agrees to relieve Licensor of any and all liability for, loss or damage (and the consequences of loss or damage) to any facilities placed on Licensor's property and any other financial loss sustained by Licensee, except to the extent caused by the negligence or misconduct on the part of Licensor or Licensor's agents, officers, employees, and assigns.
- 12.4 Without limiting the foregoing, Licensee expressly agrees to indemnify, defend, and hold harmless Licensor and Licensor's agents, officers, employees and assigns from any and all claims asserted by end users/customers of Licensee in any way arising out of or in connection with this Agreement or Licensee's facilities, except to the extent caused by the negligence or misconduct on the part of Licensor or Licensor's agents, officers, employees, and assigns or its contractors.
- 12.5 Notwithstanding anything to the contrary in this Agreement, Licensee further shall indemnify and hold harmless Licensor, its agents, officers, employees, and assigns from and against any claims, liabilities, losses, damages, fines, penalties, and costs (including, without limitation, reasonable attorneys' fees) whether foreseen or unforeseen, which the indemnified parties suffer or incur because of:

- (A) Any discharge of hazardous waste resulting from acts or omissions of Licensee or Licensee's predecessor in interest;
 - (B) Acts or omissions of Licensee, its agents, employees, Licensees, or representatives in connection with any cleanup required by law, or
 - (C) Failure of Licensee to comply with Environmental, Safety and Health Laws.
- 12.6 In no event shall either Party be liable to the other for any special, consequential or indirect damages (including, without limitation, lost revenues and lost profits) arising out of this Agreement or any obligation arising hereunder, whether in an action for or arising out of breach of contract, or otherwise.
- 12.7 Licensee shall indemnify, protect, and hold harmless Licensor from and against any and all claims for libel and slander, copyright and/or patent infringement arising directly or indirectly by reason of installation of Licensee's equipment on Licensor Poles, Conduit Systems or Right-of-Way pursuant to this Agreement.

13.0 COMPLIANCE WITH LAW

- 13.1 Notwithstanding anything to the contrary in this Agreement, each Party shall ensure that any and all activities it undertakes pursuant to this Agreement shall comply with all applicable laws, including, without limitation, all applicable provisions of:
- (A) Workers' compensation laws
 - (B) Unemployment compensation laws
 - (C) The Federal Social Security Law
 - (D) The Fair Labor Standards Act, and
 - (E) All laws, regulations, rules, guidelines, policies, orders, permits and approvals or any governmental authority relating to environmental matters and/or Occupational Safety and Health Act ("OSHA").

14.0 INSURANCE

14.1 Licensee shall obtain and maintain, in full force and effect at all times, during operations covered by this Agreement, such minimum insurance as will cover the obligations and liabilities of said Party, its agents, and its employees which may arise from the operations under this Agreement. Insurance shall have limits of not less than:

(A) Commercial General Liability policy of minimum limits of:

| | |
|---|--------------------------------|
| General Aggregate | \$ 2,000,000 per policy period |
| Products/Completed Operations Aggregate | \$ 2,000,000 per policy period |
| Personal Injury/Advertising | \$ 2,000,000 per occurrence |
| Each Occurrence | \$ 2,000,000 per occurrence |

14.8 Licensee will furnish to the other Party, a certificate evidencing insurance coverage under sub-paragraphs 14.04-A, and 14.04-B. Such policies shall be endorsed to provide for a thirty-day prior notice to the other Party of any cancellation, except for non-payment of premium, and shall be signed by a legal representative of the issuing insurance company. The certificate of insurance shall be sent to the person identified at paragraph 25.03.

15.0 NON-WAIVER OF TERMS AND CONDITIONS

15.01 Failure to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

16.0 LICENSOR'S LIEN AND/OR REMOVAL OF LICENSEE'S CABLE

16.01 Should Licensor under any Article of this Agreement remove Licensee's cable, equipment or facilities from Licensor's poles, conduit system or right-of-way, Licensor will deliver to Licensee the cable, equipment or facilities so removed upon payment by Licensee of the cost of removal, storage and delivery, and all other amounts due Licensor hereunder.

17.0 SCHEDULE OF FEES AND CHARGES

17.1 Licensee may be required to furnish bond or other security satisfactory to Licensor. If Lien Section 16.0 is deleted or modified, in a reasonable initial amount to be determined by Licensor and provided by Licensee at the time Licensee submits Exhibit B to Licensor's Attachment Application Procedures to guarantee the payment of any such sums which may become due to Licensor arising out of this Agreement including, but not limited to fees due hereunder or charges for work performed for the benefit of Licensee under this Agreement, including the removal of Licensee's facilities upon termination of this Agreement by any of its provisions or upon termination of any License issued hereunder. Bond to be sent to person identified at paragraph 25.03. Bond is to be equal to one (1) year's annual rental fees, or if Lien Section 16.0 is deleted or modified bond will be \$5,000.00.

17.2 The fees, rates and charges set forth in APPENDIX I or elsewhere in this Agreement are effective during the term of this Agreement subject to Section 3.01 and shall be due and payable by Licensee as set forth herein.

17.3 FEES:

All rates, charges and fees set forth in this Agreement and as shown in APPENDIX I (Schedule of Rates, Fees, and Charges) shall be subject to all applicable federal, state, and local laws, rules, regulations and commission orders.

(A) Computation:

(1) Pole and Anchor Attachment Fees:

(a) For the purpose of computing the annual pole attachment fee hereunder, for calendar years subsequent to a first partial calendar year, said fee shall be based upon the number of poles and anchors, to which attachments are actually made, as of December 31 of the preceding year, multiplied by the per attachment pole attachment fee rate set forth on APPENDIX I. For a first partial calendar year, the pole attachment fee shall be prorated as necessary, on a daily basis from the date payment is

due in accordance with Exhibit B of Licensor's Attachment Application Procedures.

- (b) For billing purposes, a single pole attachment includes the point of attachment and all facilities located in the usable space on the pole in the space assigned to Licensee (typically six inches above and six inches below the point of attachment). If Licensee occupies more than one usable space on a pole, separate attachment fees shall apply to each space occupied.

(2) **Conduit Occupancy Fees :**

- (a) For the purpose of computing the total conduit occupancy fee due hereunder, the duct feet of conduit shall be measured from the center to the center of manholes; or from the center of a manhole to the end of the duct; from the center of a manhole to the property line if the duct is connected at the property line to a duct owned and controlled by a third-party property owner; or the length of a conduit from pole to pole; or isolated lengths of conduit not attached to any structure (such as involved with buried cable) which will be occupied by Licensee's cable.

- (b) For billing purposes each inner duct will be billed the half duct fee. If two or more facilities occupy a duct that has not been subdivided, the half duct fee will be charged for each facility. The half duct fee will apply when others place the Licensee facility in a duct that has not been subdivided only if the facility does not render the duct unusable.

(3) **Right-of-Way Occupancy Fees:**

- (a) This fee will be negotiated on a case by case basis. There is no established per foot rate.

(B) Payment Date:

- (1) If this Attachment License Agreement becomes effective on or prior to June 30, all attachment and occupancy fees for the remainder of that first partial calendar year shall be due and payable at the time required under Appendix I of Licensor's Attachment Application Procedures .
- (2) If an Attachment License Agreement becomes effective on or after July 1, all attachment and occupancy fees for the remainder of that current partial calendar year as well as the full upcoming calendar year shall be payable at the time required under Appendix I of Licensor's Attachment Application Procedures.
- (3) On an annual basis, all attachment and occupancy fees not previously paid are to be paid in advance, on the 31st day of January of each year or within 30 days of receipt of invoice. Failure to pay such fees within 30 days of the annual due date shall constitute a Material Default of this Agreement.

(C) Termination of License:

- (1) Upon termination or surrender of a license granted hereunder, no refund of any attachment or occupancy fee shall be made.

17.4 OTHER CHARGES:**(A) Computation:**

- (1) All charges for inspections, engineering, or rearrangements of Licensee's facilities from Licensor's poles or conduit and, without limitation, any other work performed for Licensee shall be based upon the full cost and expense, including reasonable overhead, to Licensor for performing such work for Licensee. The cost to Licensee shall be determined in accordance with the regular and customary methods used by Licensor in determining such costs.
- (2) The charge for replacement of poles shall include the entire non-betterment cost to Licensor including the increased cost of larger poles, sacrificed life value of the poles removed, cost of removal, less any salvage recovery and the cost of transferring Licensor's facilities from the old to the new poles.
- (3) All other attachment or occupancy related inquiry, verification, application, administrative and miscellaneous rates, fees and charges shall be calculated and paid in accordance with APPENDIX I and/or Licensor's Attachment Application Procedures and Attachments thereto.

(B) Payment Date:

- (1) All bills for such other charges for work performed by Licensor shall be payable upon presentment to Licensee, and shall be deemed delinquent if not paid within 30 days after presentment to Licensee.

18.0 DISPUTE RESOLUTION**18.1 Except in the case of:**

- (A) A suit, action, or proceeding by one Party to compel the other Party to comply with its obligation to indemnify the other Party pursuant to this Agreement, or
- (B) A suit, action or proceeding to compel either Party to comply with the dispute resolution procedures set forth in this section, the Parties agree to use the following procedure to resolve any dispute, controversy, or claim arising out of or relating to this Agreement or its breach.

18.2 At the written request of a Party, each Party shall designate a knowledgeable, responsible representative to meet and negotiate in good faith to resolve any dispute, controversy, or claim arising under this Agreement. The Parties intend that these negotiations be conducted by non-lawyer, business representatives. The substance of the negotiations shall be left to the discretion of the representatives. Upon mutual agreement, the representatives may utilize other alternative nonbinding dispute resolution procedures such as mediation to assist in the negotiations. Discussions and correspondence between the representatives for the purposes of these negotiations shall be treated as confidential, undertaken for purposes of settlement, shall be exempt from discovery and production, and shall not be admissible in any subsequent proceeding without the concurrence of all Parties. Documents identified in or provided during such negotiations, which are not prepared for purposes of the negotiations, shall not be so exempt and may, if otherwise admissible, be admitted as evidence in any subsequent proceeding.

- 18.3 If a resolution of the dispute, controversy or claim is not reached within ninety days of the initial written request referred to in 18.02, the dispute, controversy, or claim may be filed with the State Public Service Commission for review and determination, if the State Commission has jurisdiction over the dispute, controversy or claim. If the State Commission does not have jurisdiction over the dispute controversy or claim, then it may be filed in the appropriate court having jurisdiction over the Parties, provided the party invoking the Commission's intervention process has in good faith negotiated, or attempted to negotiate, with the other Party pursuant to 18.02.
- 18.4 Each Party shall bear its own costs, including attorneys' fee, incurred in connection with any of the foregoing procedures. A Party-seeking discovery shall reimburse the responding Party the cost of reproducing documents (to include search time and reproduction time costs).

19.0 ENTIRE AGREEMENT

- 19.1 This Agreement and Licensor's related Attachment Application Procedures cancels and supersedes all previous agreements whether written or oral, except for any sums due thereunder, between Licensor and Licensee with respect to the attachment of Licensee's cable, equipment, and facilities to Licensor's poles or the placing Licensee's cable, equipment or facilities in Licensor's conduit system or right-of-way; and there are no other provisions, terms or conditions to this Agreement except as expressed herein. All currently effective licenses heretofore granted pursuant to such previous agreements shall continue in effect subject to the terms and conditions of this Agreement.
- 19.2 The terms and conditions of this Agreement supersede all prior oral or written understandings between the Parties and constitute the entire Agreement between them concerning the subject matter of this Agreement. There are no understandings or representations, express or implied, not expressly set forth in this Agreement or in Licensor's related Attachment Application Procedures. This Agreement shall not be modified or amended except by writing signed by the Party to be charged. **This Agreement is only for pole/occupancy applications submitted for the properties owned and operated by Windstream Kentucky East, LLC in the State of Kentucky. This agreement does NOT apply to any other Windstream owned properties. Separate agreements must be requested for each Windstream Operating Company and for Interconnection Access to Central Offices.**

GENERAL OPERATING ROUTINE**20.0 ATTACHMENT, USE AND/OR OCCUPANCY REQUEST PROCESS**

20.01 There is a multi-step pole attachment or duct, innerduct, conduit or right-of-way use and/or occupancy application process and fee determination process that the Licensee may begin upon the execution of this Agreement. It is set forth below and in Licensor's related Attachment Application Procedures.

21.0 POLE ATTACHMENT REQUESTS (PAR)

21.1 **The steps for normal size jobs pursuant to the FCC guidelines are:**

A. Pole Attachment Quote Preparation: Licensee shall submit a Pole Attachment Request Application (Exhibit B to Licensor's Attachment Application Procedures) (which may be reasonably revised from time to time by Licensor at its sole discretion) to Licensor which will include a drawing of the proposed route and contact information (name, telephone, facsimile, and email information), and all required fees, as listed in and computed in accordance with APPENDIX I. (Fees may be changed from time to time by Licensor to remain consistent with prevailing costs.) When Licensor receives the aforementioned specific attachment information and fee, if required, from Licensee, the following schedule will commence pursuant to the FCC requirements set forth in the April 7, 2011 Report and Order and Order on Reconsideration. If during this process, Licensor determines any lawful reason for denying Licensee's application, Licensor will so inform Licensee.

A1. Stage 1: Survey. During the 45-day survey phase, Licensor will conduct an engineering study to determine whether and where attachment is feasible, and what make-ready is required.

A2. Stage 2: Estimate. Licensor will provide an estimate of the make-ready charges within 14 days of receiving the results of the engineering survey.

A3. Stage 3: Licensee Acceptance. Licensee has up to 14 days to approve the estimate and provide payment. If project is declined by the licensee, Licensee will be billed any costs incurred to date.

A4. Stage 4: Make-Ready. Licensor will notify any attachers with facilities already on the pole that make-ready for the licensee needs to be performed within 60 days. Wireless attachments above the communications space will have a longer make-ready period of 90 days. Upon notice to Licensee, Licensor may take 15 additional days after the make-ready period runs to complete make-ready itself.

A.5 If Licensor cannot complete the survey or make-ready in the prescribed timeframes as noted above, Licensee shall have the option to hire utility-approved contractors, a list of which shall be furnished by Licensor upon request, to complete said survey and/or make-ready work.

21.2 Upon completion of the make-ready work, the receipt of all payments and fees, and the signing of this Agreement, an "Approved" Exhibit B or such other Windstream Permit form currently used shall be returned to the Licensee. At that time Licensee will be considered to have been granted a License with respect to the poles approved in the PARON and may attach to Licensor's facilities.

21.3 **The steps for larger order jobs pursuant to the FCC guidelines are:**

A. **Pole Attachment Quote Preparation:** Licensee shall submit a Pole Attachment Request Application (Exhibit B to Licensor's Attachment Application Procedures), (which may be reasonably revised from time to time by Licensor at its sole discretion) to Licensor which will include a drawing of the proposed route and contact information (name, telephone, facsimile, and email information), and all required fees, as listed in and computed in accordance with APPENDIX I, (Fees may be changed from time to time by Licensor to remain consistent with prevailing costs.) When Licensor receives the aforementioned specific attachment information and fee, if required, from Licensee, the following schedule will commence pursuant to the FCC requirements set forth in the April 7, 2011 Report and Order and Order on Reconsideration. If during this process, Licensor determines any lawful reason for denying Licensee's application, Licensor will so inform Licensee.

A1. **Stage 1: Survey.** During the 60-day survey phase, the Licensor conducts an engineering study to determine whether and where attachment is feasible, and what make-ready is required.

A2. **Stage 2: Estimate.** Licensor provides an estimate of the make-ready charges within 14 days of receiving the results of the engineering survey.

A3. **Stage 3: Licensee Acceptance.** The Licensee has up to 14 days to approve the estimate and provide payment. If project is declined, Licensee will be billed any costs incurred to date.

A4. **Stage 4: Make-Ready.** Licensor will notify any attachers with facilities already on the pole that make-ready for the licensee needs to be performed within 105 days. Wireless attachments above the communications space will have a longer make-ready period of 135 days. Upon notice to the Licensee, Licensor may take 15 additional days after the make-ready period runs to complete make-ready itself.

A5. If Licensor cannot complete the survey or make-ready in the prescribed timeframes as noted above, Licensee shall have the option to hire utility-approved contractors, a list of which shall be furnished by Licensor upon request, to complete said survey and/or make-ready work.

21.4 Upon completion of the make-ready work, the receipt of all payments and fees, and the signing of this Agreement, an "Approved" Exhibit B or such other Windstream Permit form currently used shall be returned to the Licensee. At that time Licensee will be considered to have been granted a License with respect to the poles approved in the PARON and may attach to Licensor's facilities.

21.05 **Timeframes** for orders greater than 3,000 poles shall be negotiated by the parties.

22.0 SURVEYS AND INSPECTIONS OF LICENSEE'S FACILITIES

22.01 Licensor reserves the right to inspect each new installation or work operation of Licensee on or within Licensor's facilities. The making of inspections or the failure to make inspections shall not relieve Licensee of any responsibility, obligation or liability imposed by this Agreement.

23.0 ISSUANCE OF LICENSES

- 23.1 Before Licensee shall have a right to attach to any pole of Licensor, Licensee shall make application for and receive a revocable, nonexclusive license therefore in the form of an approved Application for Pole License (APPENDIX VI and Exhibit B to Licensor's related Attachment Application Procedures).
- 23.2 Before Licensee shall have the right to place any cable, equipment or facilities within any conduit system or right-of-way of Licensor, Licensee shall make application for an receive a revocable, nonexclusive license therefore in the form of an approved Application for Conduit or Right-of-Way License (APPENDIX IV and Exhibit B to Licensor's related Attachment Application Procedures), hereto attached and made a part hereof.
- 23.3 Any license granted hereunder for attachment to Licensor's poles shall terminate without further notice to Licensee as to individual poles covered by the license to which Licensee has not attached within ninety (90) days from the date that Licensor has notified Licensee that such poles are available for attachment of the operating facilities of Licensee, unless Licensor, in the exercise of its sole discretion, agrees to extend said period at the request of Licensee.
- 23.05 Any license granted hereunder for placement of Licensee's facilities in Licensor's conduit system shall terminate without further notice to Licensee as to individual sections of Licensor's conduit system covered by the license in which Licensee has not placed its facilities within ninety (90) days from the date that Licensor has notified Licensee that such sections of the conduit system are available for the placement of operating facilities of Licensee, unless Licensor, in the exercise of its sole discretion, agrees to extend said period at the request of Licensee.

24.0 AUTHORITY TO PLACE ATTACHMENTS

- 24.01 Before any attachments or placement of facilities Licensee shall submit evidence that Licensee has the authority to maintain Attachments within public rights-of-way or on private right-of-way or on private property. Licensee shall be solely responsible for obtaining all licenses, authorizations, permits and consents from federal, state and local authorities or private land owners that may be required to place and maintain facilities on Licensor's poles or within Licensor's conduit, duct or right-of-way.

25.0 NOTICES (OF MODIFICATION OR ALTERATION OF POLES)

- 25.1 In the event Licensor plans to modify or alter any Licensor Poles upon which Licensee has placed Attachments, Licensor, except in emergency situations, shall provide Licensee written notice of the proposed modification or alteration shall strive to provide at least thirty (30) business days prior to the time the proposed modification or alteration is scheduled to take place. Should Licensee decide to modify or alter Licensee's Facilities on Poles, Licensee shall so notify Licensor in writing at least thirty (30) business days prior to the day the work is to begin. In such event, Licensee shall bear a proportionate share of the total costs incurred by Licensor to make Licensor Poles accessible. Licensee's proportionate share of the total cost shall be based on the ratio of the amount of new space occupied by Licensee to the total amount of new space occupied by all of the parties joining in the modification. Licensee is not responsible for any costs of Licensor's modifications or alterations of its Poles.
- 25.2 In the event Licensor is required to move the location of, or replace, any Licensor Pole(s) for reasons beyond its control, Licensee concurrently shall relocate Licensee's Attachments. Licensee shall be solely responsible for the costs of the relocation of Licensee's Attachments. When it is mutually agreed that it is in the best interest of Licensor and Licensee, Licensor will, after proper notification has been provided, transfer Licensee's Attachments at the same time that Licensor transfers its Attachments. The rate charged for these transfers is listed in this Agreement (APPENDIX I). The rate for transfers may be adjusted by Licensor from time to time to remain consistent with prevailing costs.

25.3 Notices under this Agreement may be given and shall be deemed to have been given, by posting the same in first class mail to Licensee as follows:

26.0 REQUIREMENTS AND SPECIFICATIONS FOR ATTACHMENT TO POLES

- 26.01 Licensee's cables, equipment, and facilities shall be placed and maintained in accordance with the requirements and specifications attached hereto and as set forth in Licensor's related Attachment Application Procedures and made a part hereof, and in accordance with the requirements and specifications of the National Electric Safety Code (most recent edition) and the National Electric Code (most recent edition), and in compliance with any other rules or orders now in effect or that may hereafter be issued by any state utility commission or other authority having jurisdiction.

27.0 PLACEMENT OF ATTACHMENTS

- 27.1 Licensee shall, at its own expense, place and maintain and replace its Attachments on Licensor's Poles in accordance with:
- (A) Such reasonable requirements and specifications as Licensor shall from time to time prescribe in writing in Licensor's Attachment Application Procedures or otherwise,
 - (B) In compliance with any rules or orders now in effect or that hereafter may be issued by any regulatory agency or other authority having jurisdiction, and
 - (C) All currently applicable requirements and specifications of the National Electrical Safety Code, National Electric Code, most current edition or any amendment or revision of said Code. Licensee agrees to comply, at its sole risk and expense, with all specifications hereto, as may be revised from time to time by Licensor. Licensor will provide supervision at Licensee's expense if Licensor believes it is required.
- 27.2 Licensee's Facilities shall be tagged at maximum intervals of 300 feet so as to identify Licensee as the owner of the Facility. The tags shall be of sufficient size and lettering so as to be easily read from ground level.

28.0 MODIFICATIONS, ADDITIONS OR POLE REPLACEMENTS AND REARRANGEMENTS

- 28.1 Licensee shall not modify, add to, or replace facilities on any pre-existing Attachment on an Licensor Pole without first notifying Licensor in writing of the intended modification, addition or replacement at least thirty (30) business days prior to the date the activity is scheduled to begin. The required notification shall include:
- (A) The date the activity is scheduled to begin,
 - (B) A description of the planned modification, addition, or replacement,
 - (C) A representation that the modification, addition, or replacement will not require any space other than the space previously designated for Licensee's Attachments, and
 - (D) A representation that the modification, addition, or replacement will not impair the structural integrity of the Poles involved.

- 28.2 Should Licensor determine that the modification, addition, or replacement specified by Licensee in its notice will require more space than that allocated to Licensee or will require the rearrangements of, reinforcement of, replacement of, or an addition of support equipment to the Poles involved in order to accommodate Licensee's modification, addition, or replacement, Licensor will so notify Licensee, whereupon Licensee will be required to submit a PAR in compliance with this Agreement in order to obtain authorization for the modification, addition, or replacement of its Attachments.
- 28.3 Should Licensee request Licensor to expand capacity or purchase additional plant, Licensee agrees to pay all reasonable costs. If Licensor or another party that has been granted a license joins in the request and will benefit from the expansion or purchase, Licensee agrees to pay a percentage of all costs proportionate to Licensee's share of the benefit received from the expansion or purchase.
- 28.4 When multiple applications, including application of Licensee, are received by Licensor with respect to any pole which must be replaced or rearranged to provide additional space prior to commencement of the work on that pole a Transfer Attachment Fee may be charged. Licensor will equitably prorate to the extent that it is practical between Licensee and other applicants for the pole space, the common expenses of engineering, rearrangement, and replacement, if any, which result from the processing of multiple applications. Licensee shall be bound by Licensor's determination as to any such pro-ration of Transfer Attachment Fee to Licensee.

29.0 UNAUTHORIZED ATTACHMENTS

- 29.1 If any cable, equipment or facilities of Licensee shall be found on a pole or within a conduit or right-of-way for which no license is outstanding, Licensor, without prejudice to its other rights or remedies under this Agreement or otherwise, may:
- (A) Impose a charge, and
 - (B) Require Licensee to remove such cable, equipment or facilities forthwith or Licensor may remove them without liability and the expense of removal shall be borne by Licensee. For the purpose of determining the charge, Licensee shall pay liquidated damages that will not exceed an amount equal to the annual pole attachment fee for the number of years the unauthorized attachments have existed (or, if that cannot be determined, the number of years since the most recent inventory or five years, whichever is less), plus interest at a rate set for that period by the IRS for individual underpayments pursuant to Section 6621 of the IRS Code. Any such charge imposed by Licensor shall be in addition to its rights to any other sums due and payable, including without limitation the actual costs of any audit or survey which established the existence of the unauthorized attachments and to any claims to said fees or said unlicensed use shall be deemed as a ratification or the licensing of the unlicensed use, and if any license should subsequently be issued, after application and payment of the application fee therefore, said license shall not operate retroactively or constitute a waiver by Licensor of any of its rights or privileges under this Agreement or otherwise.
- 29.2 For purposes of this section, an unauthorized Attachment shall include, but not limited to:
- (A) An Attachment to a Pole which is not identified in any PARON (APPENDIX VI) issued in accordance with this Agreement;

- (B) An Attachment that occupies more space than that allocated to Licensee By Licensor;
 - (C) An attachment that is not placed in accordance with the provisions of this Agreement or the appropriate PARON (APPENDIX VI) issued pursuant to this Agreement, unless Licensee can demonstrate to Licensor's reasonable satisfaction that said misplacement is not due to any act or omission of Licensee or Licensee's agents;
 - (D) An addition or modification by Licensee to its pre-existing Attachment(s) that impairs the structural integrity of the involved Licensor Pole(s).
 - (E) An Attachment that consists of facilities owned or controlled by, and for the use of a Party other than Licensee.
- 29.3 Once Licensor has notified Licensee of an unauthorized attachment. Licensee can submit a PAR to request an authorized attachment. A PAR submitted per this provision will be treated like any other PAR subject to this Agreement. Licensee will be responsible for all fees associated with a PAR (as identified in this Agreement). If a PAR is not received by Licensor within ten (10) business days of Licensee's receipt of an unauthorized attachment notification, Licensee has sixty (60) business days from the date of its receipt of the initial unauthorized attachment notification to vacate the Pole.

30.0 FAILURE TO PLACE ATTACHMENTS

- 30.01 Once Licensee has been issued a PARON (APPENDIX VI), Licensee shall have ninety (90) calendar days from the date of the PARON (APPENDIX VI) to begin the placement of its Attachments on the Licensor Poles covered by the PARON (APPENDIX VI). If Licensee has not begun placing its Attachments within that ninety-(90) calendar day period, Licensee shall so advise Licensor with a written explanation for the delay. If Licensee fails to advise Licensor of its delay, with a written explanation therefore, or if Licensee fails to act in good faith by not making a bona fide effort to begin placing its Attachments within the ninety (90) calendar days prescribed by this section, the previously issued PARON (APPENDIX VI) shall be deemed rescinded by Licensor and Licensee shall have no further right to place Attachments pursuant to that PARON (APPENDIX VI).

31.0 OCCUPANCY OF CONDUIT SYSTEM

- 31.1 When Licensee submits an application for a license to place its cables, equipment, and facilities in the conduit system of Licensor, Licensor will advise Licensee of the availability of conduit space in accordance with Licensor's Attachment Application Procedures. In determining the availability of space in Licensor's conduit system, Licensor reserves the right to deny the granting of a license for any non-discriminatory lawful reason, including without limitation, insufficient capacity or reasons of safety, reliability and generally applicable engineering purposes. If conduit space is available, a license to occupy a portion of conduit system will be granted to Licensee, provided, however, that Licensor does not warrant the condition of such conduit system.
- 31.2 Licensor reserves the right to exclude cable, equipment, and facilities of Licensee from Licensor's conduit system, or to limit the type, number and size of Licensee's cable, equipment, and facilities which may be placed in any of Licensor's manholes.

32.0 OCCUPANCY OF RIGHT-OF-WAY

- 32.1 Licensor and Licensee agree that neither party has the right to restrict or interfere with the other party's lawful access to and use of public right-of-way, including public right-of-way, which pass over property owned by either party. Except as otherwise specifically provided in this Agreement, Licensor and Licensee shall each be responsible for obtaining their own right-of-way and permission to use real or personal property owned or controlled by any governmental body.
- 32.2 In the event that Licensee desires to occupy right-of-way owned or controlled by Licensor, Licensor may require Licensee to make an application to do so by the terms of this Agreement. Licensor reserves the right to determine whether granting a license would adversely affect its common carrier communication services and its ability to meet its duties and obligation with respect thereto, including questions of economy, safety, and future need of Licensor.
- 32.3 Licensor may, without incurring any liability, remove the cables, equipment, and facilities of Licensee from Licensor's right-of-way, at Licensee's expense where in Licensor's judgment (such judgment to be conclusive) the situation constitutes an emergency and such removal is required in connection with the performance of Licensor's service obligation or the safety of Licensor's employees. Whenever such emergency removal has been made, Licensee will be promptly notified. If the situation does not, in Licensor's judgment, constitute an emergency, Licensor shall provide written notice to Licensee and a mutually agreeable remediation timeline will be determined.

33.0 CONSTRUCTION AND MAINTENANCE OF FACILITIES

- 33.1 Licensee shall, at its own expense, make and maintain its pole attachments in a safe condition and in thorough repair, and in a manner reasonably acceptable to Licensor, and so as not to conflict with the use of said poles by Licensor or by other authorized users of said poles, or interfere with other facilities thereon or which may from time to time be placed thereon. Licensee shall, at its own expense, upon written notice from Licensor, relocate or replace its facilities placed on said poles, or transfer them to substituted poles, or perform any other work in connection with said facilities that may be required. Licensor shall give such written notice as is reasonable in the circumstances, provided, however, that in cases of emergency, (Licensor's judgment as to what constitutes an emergency to be conclusive) Licensor may arrange to relocate, remove or replace the attachments placed on said poles by Licensee, transfer them to substituted poles or perform any other work in connection with said facilities that may be required in the maintenance, replacement, removal or relocation of said poles or of the facilities thereon or which may be placed thereon, or for the service needs of Licensor, and Licensee shall reimburse Licensor for the expense thereby incurred. Attachments of Licensee to poles of Licensor, as mentioned herein shall be understood to include attachments of Licensee in space reserved for Licensor, or space which Licensor has the right to use, on poles of other companies with which Licensor now has or may hereafter have agreements for joint use and occupancy; and the use of such space by Licensee shall be subject to the terms and conditions of the agreements between Licensor and said other companies. Such authorization will not be unreasonably withheld.
- 33.2 Licensee's cable, equipment, and facilities shall be placed in, removed from, relocated in or maintained in Licensor's conduit system only when specific authorization for the work to be performed and approval of the person, firm or corporation selected by Licensee to perform the work, has been obtained in writing in advance from Licensor. Licensor retains the right to specify what, if any work shall be performed by Licensee. Such authorization will not be unreasonably withheld

- 33.3 In each instance where Licensee's cable, equipment, and facilities are to be placed in Licensor's conduit system, Licensor shall specify, among other things, the cable configuration and location of Licensee's cable, equipment, and facilities, the particular duct of the conduit system such cable will occupy, and the location where and manner in which Licensee's cable will enter and exit Licensor's conduit system.
- 33.4 Licensor's manholes shall be opened as reasonably permitted by Licensor's authorized employees or agents. Licensee shall be responsible for obtaining any necessary permits from appropriate governmental authorities to open manholes and to conduct the work operations. Licensee's employees or agents will be permitted to enter or work in Licensor's manholes only when an authorized agent or employee of Licensor is present except as provided in the next paragraph. Licensor's said agent or employee shall have the authority to terminate Licensee's work operations in and around Licensor's manholes if, in the sole discretion of said agent or employee, any hazardous conditions arise or any unsafe practices are being followed by Licensee's employees or agents. Licensee agrees to pay, in accordance with the terms and conditions of APPENDIX I, the full cost of having Licensor's agent or employee present when Licensee's work is being done in Licensor's manholes. The presence of Licensor's authorized agent or employee shall not relieve Licensee of its responsibility to conduct all of its work operations in and around Licensor's manholes in a safe and workmanlike manner. Licensee is responsible for all signage, traffic control, equipment, and personnel necessary to work in Licensor's manholes. All work shall meet Occupational Safety and Health Act (OSHA), and any local or state standards and requirements.
- 33.5 Licensee's employees will be permitted to enter or work in Licensor's manholes and conduit system without an authorized agent or employee of Licensor being present, provided that Licensee's work consists only of routine operations of testing, adjusting, regulating or inspecting Licensee's existing facilities and does not involve any placing, removing, changing or rearranging of Licensee's or Licensor's facilities. In such cases, Licensee shall notify Licensor's designated representative in advance of Licensee's operations as to the type of work to be performed, the time at which it is to be performed and where it is to take place. Licensee shall conduct all such work operation in a safe and workmanlike manner, and in accordance with the terms of this Agreement.
- 33.6 Licensee shall, at its own expense, maintain its buried communication facilities so as not to conflict with the use of the right-of-way by Licensor or other authorized users of the right-of-way. Licensee shall, at its own expense, relocate, change, or replace its facilities or perform any other work in connection with said facilities that may be reasonably required by Licensor or other authorities.

34.0 TERMINATION OF LICENSES

- 34.1 Upon notice from Licensor to Licensee that Licensor has been advised by governmental authority or private property owners that the use of any pole, conduit system, or right-of-way is not authorized and is objected to by such governmental authority or private property owner, as the case may be or that any pole, any conduit system or any right-of-way is to be removed, sold or otherwise disposed of, Licensee shall after all reasonable appeals have been exhausted, if reasonably requested by Licensor, remove its cables, equipment, and facilities at once from the affected pole or poles or shall make arrangements for the removal of its cable, equipment, and facilities from the affected portion of Licensor's conduit system or right-of-way at Licensor's expense. If not so removed, Licensor shall have the right to remove Licensee's cable, equipment, and facilities from Licensor's right-of-way at the cost and expense of Licensee and without any liability thereto. If Licensor deems it is impractical to remove Licensee's cables, equipment or facilities from any right-of-way, they may be abandoned in place.
- 34.2 Licensee may at any time remove its facilities from any pole of Licensor, but shall immediately give Licensor written notice of such removal and surrender of license in the form of a Notification of

Surrender (APPENDIX VII) hereto attached and made a part hereof. If Licensee surrenders its license but fails to remove its facilities from Licensor's poles, Licensor shall have the right to remove Licensee's facilities at Licensee's expense without any liability on the part of Licensor for damage or injury to Licensee's facilities. In the event that Licensee's cables, equipment, and facilities shall be removed from any pole as provided by this Agreement, no attachment shall again be made to such pole unless Licensee shall have first complied with all of the provisions of this Agreement as though no attachment had previously been made.

- 34.3 If Licensee desires to terminate its license for the right to occupy any part of Licensor's conduit system, Licensee shall give Licensor written notice of such surrender in the form of a Notification of Surrender (APPENDIX VII) hereto attached and made a part hereof. In such event, Licensee shall make arrangements with Licensor for the removal of Licensee's cables, equipment, and facilities from that part of Licensor's conduit system at Licensee's expense. In the event that Licensee's cables, equipment, and facilities shall be removed from Licensor's conduit system as provided by this Article, no cable, facilities or equipment shall again be placed in that part of such conduit system unless Licensee shall have first complied with all of the provisions of this Agreement as though no cables, equipment, and facilities of Licensee had previously been placed in that part of Licensor's conduit system.
- ~~34.4 If Licensee desires to terminate its license for the right to occupy any part of the right-of-way, Licensee shall give Licensor written notice of such surrender in the form of a Notification of Surrender (APPENDIX VII) attached hereto and made a part hereof. In such event, Licensee shall make arrangements with Licensor for the removal of Licensee's cables, equipment, and facilities from that part of the right-of-way at Licensee's expense. However, in the event it is impractical to remove Licensee's cable, equipment, and facilities from any right-of-way, they may be abandoned in place.~~

35.0 EMERGENCY RESTORATION PROCEDURES

- 35.1 In the event of an emergency, restoration procedures may be affected by the presence of Licensee's Attachments. While Licensor shall not be responsible for the repair of damaged Attachments of Licensee (except by mutual written agreement), Licensor shall nonetheless control access to its poles, conduit systems or right-of-way if the restoration is to be achieved in an orderly fashion.
- 35.2 Where Licensor and Licensee are involved in emergency restorations, access to Licensor's poles, conduit systems or right-of-way will be controlled by Licensor's Network Construction Managers or their on-site representative according to the following guidelines.
- (A) Service Disruptions/Outages
- (1) While exercising its right to first access, Licensor shall make all reasonable efforts to grant access to as many other entities with Attachments as is reasonably safe.
 - (2) Where simultaneous access is not possible, Licensor will grant access on first come, first served basis.
- (B) Service Affecting Emergencies
- (1) While exercising its right to first access, Licensor shall make all reasonable efforts to grant access to as many other entities with Attachments as is reasonably safe.

- (2) Where Licensor is unable to grant simultaneous access to all other entities with Attachments, access will be granted according to the level of damage to the Attachments of each entity and the likelihood that a given level of damage will result in service disruption. Where the likelihood that a service disruption will result is not clearly discernible, access will be on a first come, first served basis.
- 35.3 Without limiting any other indemnification or hold harmless provisions of this Agreement, Licensee agrees that any decision by Licensor regarding access to Attachments, or any action or failure to act by Licensor, under this section shall not be the basis for any claim by Licensee against Licensor for any damage to Licensee's Attachments or disruption of Licensee's services, or any other direct or indirect damages of any kind whatsoever incurred by Licensee.

36.0 ABANDONMENT

- 36.01 Nothing in this Agreement shall prevent or be construed to prevent Licensor from abandoning, selling, assigning, or otherwise disposing of any poles, conduit systems or other Licensor property used for Licensee's Attachments; provided, however, that Licensor shall condition any such sale, assignment, or other disposition subject to the rights granted to Licensee pursuant to this Agreement. Licensor shall promptly notify Licensee of any proposed sale, assignment, or other disposition of any poles, conduit systems or other Licensor property used for Licensee's Attachments. Licensee shall have the option but not the obligation to purchase any assets slated for abandonment, if Licensor so offers asset to Licensee for purchase.

ATTACHED AND INCORPORATED EXHIBITS

EXHIBIT A – DEFINITIONS

EXHIBIT B – FORM APPLICATION FOR POLE LICENSE

EXHIBIT C – NOTIFICATION OF SURRENDER OF LICENSE

EXHIBIT D – SCHEDULE OF RATES, FEES AND CHARGES

EXHIBIT E – NOTICE CONTACTS AND ADDRESSES

1. PARTIES.

This Pole Attachment License Agreement (“Agreement”) is entered into as of the date last signed by all the parties (“Effective Date”) by and between Windstream Kentucky East, LLC a Windstream company organized and existing under the State of Kentucky (“Licensor”), and the Commonwealth of Kentucky, Kentucky Communications Network Authority and the Finance and Administration Cabinet, a state government entity (“Licensee”). Licensor and Licensee may sometimes be referred to in this Agreement individually as a “party” and collectively as the “parties.”

2. SCOPE.

A. The purpose of this Agreement is to set forth the rates, terms, conditions, and procedures under which the Licensor will provide Licensee access to Licensor’s Poles (as defined herein) in the State of Kentucky for the purpose of Licensee attaching wireline facilities.

B. The parties acknowledge that Licensor is entering into this Agreement because Licensee has represented it is a competitive local exchange carrier (“CLEC”) or a “telecommunications carrier” as defined in the Communications Act of 1934, as amended (hereinafter the “Communications Act”) and desires to provide telecommunications service (“Services”) as defined in the Communications Act; and that Licensee is authorized to provide these Services under its franchise or other lawful authority within its service area where Licensor owns Poles. In the event Licensee no longer has the status as a “telecommunications carrier” or “CLEC” or the authority to offer these Services in the state where the Poles are located, Licensor shall have the right to terminate this Agreement and require Licensee to remove all of its facilities from Licensor’s Poles. **As a condition precedent to entering into this Agreement, Licensee shall submit to Licensor a copy of its Notice of Intent to Operate as a Competitive Local Exchange Carrier, and until such documentation is provided to Licensor, Licensor shall not be obligated to enter into this Agreement.**

C. Subject to the provisions of this Agreement, Licensor will issue to Licensee for any lawful communications purpose, revocable, nonexclusive Licenses authorizing the placement of Licensee's Attachment to Licensor's Poles.

D. No use, however extended, of Licensor's Poles nor payment of any fees or charges required under this Agreement or License issued under this Agreement shall create or vest in Licensee any ownership or property rights in said Poles, but Licensee's rights therein shall be and remain a mere license. Nothing herein contained shall be construed to compel Licensor to construct, retain, extend, place, or maintain any facilities not needed for its own service requirements, unless otherwise required by law. Nothing contained in this Agreement or in any License issued hereunder shall in any way affect, restrict or impair the right of Licensor to convey, transfer, mortgage, or assign to any other person or entity any interest in real or personal property, including any Poles in which Licensee has attached or placed Licensee’s Attachments pursuant to Licenses issued under this or other license agreements.

E. Licensee recognizes that Licensor has entered into, or may in the future enter into, agreements and arrangements with others which are not a party to this Agreement regarding the Poles covered by this Agreement. Nothing herein contained shall be construed as a limitation, restriction or prohibition against Licensor with respect to such other agreements or arrangements. The rights of Licensee shall at all times be subject to any present or future joint use or joint ownership arrangement between Licensor and any other party.

F. This Agreement does NOT create any right for Licensee to access or place facilities in Licensor central offices, conduit or to place wireless communication equipment on Poles. A separate agreement is required for any access to Licensor facilities other than those outlined in this Agreement.

3. DEFINITIONS.

Certain capitalized terms used in this Agreement are listed in and have the meaning as set forth in Exhibit A. Exhibit A is incorporated and made a part of this Agreement by reference.

4. TERM AND TERMINATION OF AGREEMENT

A. This Agreement shall become effective upon the Effective Date and if not terminated in accordance with the provisions of this Agreement, shall continue in effect for a term of one (1) year ("Initial Term") and shall continue on a year-to-year basis. Notwithstanding the foregoing, any time after the Initial Term and anytime thereafter the rates, fees and charges set forth may be increased or decreased by written notice from Licensor to Licensee.

B. Either Party may terminate this Agreement for any reason after the Initial Term with at least thirty (30) day written notice to the other party. Additionally, either party may terminate this Agreement in the event of default as set forth under Article 20 of this Agreement.

C. Upon termination of the Agreement in accordance with any of its terms, all outstanding Licenses in connection therewith shall terminate and shall be surrendered and Licensee shall at its sole expense remove all Attachments located on Poles within sixty (60) days of date of termination.

5. TERMINATION OF LICENSES

A. In addition to other termination rights set forth in this Agreement, upon notice from Licensor to Licensee that Licensor has been advised by a governmental authority or private property owners that the use of any Poles is not authorized and is objected to by such governmental authority or private property owner, as the case may be or that any Poles is to be removed, sold or otherwise disposed of, Licensee shall, immediately remove its cables, equipment, and facilities at once from the affected Poles or shall make arrangements for the removal of its cable, equipment, and facilities from the affected portion of Licensor's Poles at Licensee's sole expense. If not so removed within sixty (60) days or such timeframe as stated on the Notice, Licensor shall have the right to remove Licensee's Attachments from Licensor's Poles at the cost and expense of Licensee and without any liability thereto.

B. Licensee may at any time remove its Attachments from any Poles of Licensor, but shall immediately give Licensor written notice of such removal and surrender of License in the form of a Notification of Surrender attached hereto as Exhibit C and incorporated by reference and made a part of this Agreement. If Licensee surrenders its License but fails to remove its Attachments from Licensor's Poles, Licensor shall have the right but not the obligation to remove Licensee's Attachments at Licensee's expense without any liability on the part of Licensor for damage or injury to Licensee's Attachments or interruption to Services. Licensee's obligations with regard to maintenance and fees continue until Attachments are removed from the Poles. In the event that Licensee's Attachments shall be removed from any Poles as provided by this Agreement, no Attachment shall again be made to such Poles unless

Licensee shall have first complied with all of the provisions of this Agreement as though no Attachment had previously been made.

6. RATES, FEES AND CHARGES.

A. All rates, charges and fees set forth in this Agreement and those shown in Exhibit D (Schedule of Rates, Fees, and Charges) shall be subject to and calculated in accordance with applicable law, and Licensor may in its sole discretion revise the rates, charges and fees as set forth in Exhibit D upon 30 day notice to Licensee. Exhibit D is incorporated and made a part of this Agreement by reference. The fees, rates and charges set forth in Exhibit D or elsewhere in this Agreement are effective during the term of this Agreement and subject to change as set forth herein.

B. Pole Attachment Fee. For the purpose of computing the annual Pole Attachment Fee due under this Agreement the Pole Attachment Fee shall be based each year upon the number of Poles where Licensor has issued a License as of the date of annual billing multiplied by the Attachment Rate set forth on Exhibit D, as may be modified by Licensor from time to time.

C. All charges for inspections, engineering, replacement or rearrangements of Licensee's Attachments from Licensor's Poles and, without limitation, any other work performed for Licensee shall be based upon the full cost and expense, including reasonable overhead, incurred by Licensor or its representative for performing such work for Licensee to include without limitation costs to transfer or moving of Licensor facilities and removal of old Poles. The cost to Licensee shall be determined in accordance with the regular and customary methods used by Licensor in determining such costs.

D. All other Attachment related inquiry, verification, application, administrative and miscellaneous rates, fees and charges shall be calculated and paid in accordance with Exhibit D and the terms of this Agreement.

E. Upon termination or surrender of a License granted hereunder, no refund of any Pole Attachment Fees shall be made and Licensee shall remain liable for all fees and charges set forth in this Agreement until Licensee has removed its Attachments.

7. PAYMENT AND LIEN.

A. All bills for such other charges for work performed by Licensor and the fees set forth in the Agreement shall be payable within thirty (30) days of presentment to Licensee, and shall be deemed delinquent if not paid within thirty (30) days after the date of the invoice.

B. Lien. Should Licensor under the terms and conditions of this Agreement remove Licensee's Attachments from Licensor's Poles, Licensor will deliver to Licensee the cable, equipment or facilities so removed upon payment by Licensee of the cost of removal, storage and delivery, and all other amounts due Licensor hereunder. Licensor is hereby given a lien on Licensee's cable, equipment or facilities attached to Licensor's Poles or removed therefrom, with power of public or private sale, to cover any amounts due Licensor under the provisions of this Agreement. Such liens shall not operate to prevent Licensor from pursuing, at its option, any other remedy in law, equity or otherwise, including any other remedy provided for in this Agreement.

8. ATTACHMENT REQUEST AND LICENSE PROCESS

A. Before Licensee shall have a right to place Attachments to any Poles of Licensor, Licensee shall make application for and receive a revocable, nonexclusive License which shall be in the form of a Licensor countersigned Application for Pole License (Exhibit B). Each Exhibit B Application for Pole License shall contain no more than twenty-five (25) Poles and Licensee may submit up to twelve (12) Exhibit B, Application for Pole License within a rolling thirty (30) day period. Licensor will process Applications for Pole Licenses in the order in which they are received; provided, however, that when Licensee has multiple Applications for Pole Licenses on file with Licensor, Licensee may designate its desired priority of completion with respect to all such Application for Pole Licenses. **Licensee shall not under any circumstances attach any equipment to any guy wires or anchors owned by Licensor.**

B. **Application For Pole License and Engineering Survey.** Licensee shall submit an Application for Pole License in the form of Exhibit B and shall include a drawing of the proposed route, the pole detail and contact information (name, telephone, facsimile, and email information). Licensee is responsible for determining, in accordance with requirements of the National Electric Safety Code, if the existing Licensor's facilities will support the additional loading imposed by the Licensee's attachments. Upon receipt of a complete Application for Pole License, Licensor will conduct an engineering survey to determine whether and where Licensee's Attachment is feasible, and what Make Ready Work is required by Licensor or other existing attachers to accommodate Licensee's Attachment. Within sixty (60) days of receipt of Licensee's application, Licensor shall inform Licensee of its estimated make-ready charges for Licensor Make Ready Work ("Make Ready Estimate"). If during this process, Licensor determines the request is denied based on insufficient capacity or for reasons of safety, reliability and generally applicable engineering purpose Licensor shall inform Licensee that the Application for Pole License is denied together with the reason. All expenses incurred by Licensor in reviewing Licensee's Application for Pole License shall be borne by Licensee even if such request is denied by Licensor.

C. **Advance Payment of Make Ready Work Estimate and Expedited Charges.** If Licensee upon review of the Make Ready Estimate desires to proceed with the process to obtain a License from Licensor, Licensee shall submit payment in the amount of the Make Ready Estimate together with the Application Fee and engineering survey costs to Licensor within fourteen (14) days of receipt of the Make Ready Estimate and invoice for such amounts. Licensee shall be solely responsible for negotiating with existing attachers for Make-Ready Work relating to such other existing attacher facilities located on, within or in Licensor's Poles and shall be responsible for paying all charges incurred in transferring or rearranging existing attacher facilities to accommodate the placement of Licensee's Attachment on, within or in Licensor's Poles. In the event, Licensee declines to proceed with the project Licensee shall reimburse Licensor any costs and expenses incurred by Licensor to date including but not limited to Application Fee, engineering and administrative expenses and costs.

D. **Completion of Make Ready Work and Issuance of License.** Licensor shall undertake to complete any Make Ready Work of its owned facilities within 105 days of upon receipt of Licensee's payment of the Make Ready Estimate. Upon completion of all Make Ready Work and receipt of all fees and charges due from Licensee to Licensor, Licensor shall issue Licensee an approved License which shall be in the form of a Licensor countersigned Application for Pole License. At that time Licensee will be considered to have been granted a License with respect to the Poles approved in the License and may attach to Licensor's Poles in accordance with the terms and conditions of this Agreement.

E. Licensee shall maintain a copy of all Application for Pole Licenses and approved Licenses. Licensor may provide upon request copies of the same to the extent available and Licensee shall reimburse Licensor for its costs in preparing and sending requested copies.

9. AUTHORITY FOR PLACEMENT OF ATTACHMENT

A. Before any placement of Attachments by Licensee, regardless of whether a License may have been issued, Licensee represents and warrants that it has the authority to maintain Attachments within public rights-of-way, or on private rights-of-way or on private property, and shall upon request provide a copy of documentation evidencing such right to Licensor. Licensee shall be solely responsible for obtaining all licenses, easements, authorizations, permits and consents from federal, state and local authorities or private land owners that may be required to place and maintain Attachments on Licensor's Poles.

B. Licensor and Licensee agree that neither party has the right to restrict or interfere with the other party's lawful access to and use of public right-of-way, including public right-of-way, which pass over property owned by either party. Except as otherwise specifically provided in this Agreement, Licensor and Licensee shall each be responsible for obtaining their own right-of-way and permission to use real or personal property owned or controlled by any governmental body or private entity or person.

C. Licensor may, without incurring any liability, remove Attachments of Licensee from Licensor's Poles, at Licensee's sole expense where in Licensor's sole judgment such removal is required in connection with the performance of Licensor's service obligation or the safety of Licensor's employees. Whenever such removal has been made, Licensee will be notified. Licensor will provide advance notice, if possible.

10. CONSTRUCTION AND MAINTENANCE

A. Licensee's Attachments shall be placed and maintained in accordance with the following:

1. the terms and conditions of this Agreement, and
2. the National Electric Safety Code (most recent edition), and
3. the National Electric Code (most recent edition), and
4. in compliance with any other rules or orders now in effect or that may hereafter be issued by any state utility commission or other authority (state, federal, local) having jurisdiction over including but not limited to Poles, rights-of-way, and Hazardous Materials.

Each of Section 10(A)(1-4) is incorporated by reference and made a part of this Agreement, and in the event of a conflict or difference between any of these specifications and requirements, the more stringent will apply. Whenever Licensee performs any work in connection with said Attachments, whether for maintenance, replacement, removal, or relocation purposes, Licensee agrees to rearrange its Attachments, in accordance with changes in the standards referenced herein in this Section 10(A) of this Agreement, or if required by law.

B. Licensee shall, at its own expense, make and maintain its Attachments and use Licensor Poles in a safe condition and in thorough repair, and in a manner acceptable to Licensor, and so as not to conflict with the use of said Poles by Licensor or by other authorized users of said Poles, or interfere with other facilities thereon or which may from time to time be placed thereon. Licensee shall, at its sole expense,

upon written notice from Licensor, relocate or replace its Attachments placed on said Poles or transfer them to substituted Poles that may be authorized by Licensor, or perform any other work in connection with said Attachments that may be required. Licensor shall give such written notice as is reasonable in the circumstances, provided, however, that in cases of emergency, as determined by Licensor in its sole discretion, Licensor may arrange to relocate, remove or replace Licensee Attachments placed on said Poles, transfer such Attachments to substituted Poles or perform any other work in connection with said Attachments that may be required in the maintenance, replacement, removal or relocation of said Poles or Licensor or existing attacher facilities thereon or which may be placed thereon, or for the service needs of Licensor, and Licensee shall reimburse Licensor for the expense thereby incurred. For the purpose of this Section, Licensee Attachments shall be understood to include Attachments of Licensee in space reserved for Licensor, or space which Licensor has the right to use, on poles of other companies with which Licensor now has or may hereafter have agreements for joint use and occupancy; and the use of such space by Licensee shall be subject to the terms and conditions of the agreements between Licensor and said other companies.

C. Licensee shall be responsible at all times for the condition of Licensee's Attachments and its compliance with the requirements, specifications, rules, regulations, ordinances and laws specified in this Agreement. Licensor shall have no duty to Licensee to inspect, monitor or maintain the condition of Licensee's Attachments (including, but not limited to, splices and other facilities connections) located on, within or in Licensor's Poles. Licensor may make periodic or spot inspections at any time of any part of Licensee's Attachments as Licensor determines reasonable or necessary in its sole judgment, pursuant to Section 16 of this Agreement.

D. Licensee shall not authorize any person or entity acting on Licensee's behalf ("Licensee Contractor") to perform any work on, within or in Licensor's Poles without first verifying, to the extent practicable, on each date when such work is to be performed and, that the condition of the Poles is suitable for the work to be performed. If Licensee or Licensee Contractor determines that the condition of the Poles is not suitable for the work to be performed, Licensee shall notify Licensor of the condition of the Poles in question and shall not proceed with construction activities until Licensee is satisfied that the work can be safely performed.

E. Licensee shall be solely responsible for paying all persons and entities that provide materials, labor, access to real or personal property, or other goods or services in connection with the construction and placement of Licensee's Attachments and for directing the activities of all Licensee Contractors while they are physically present on, within or in the vicinity of Licensor's Poles. Licensee shall not permit any mechanic's lien, material man's lien, or any other lien, claim or security interest to attach to or encumber any of Licensor's real or personal property at any time.

F. Licensee's main line Attachments shall be tagged at maximum intervals of 300 feet so as to identify Licensee as the owner of the Attachment. Licensee shall place fiber wrap/ID at the specific Licensor Poles attaching point and at any aerial span splice location and/or slack loop. The tags shall be of sufficient size and lettering so as to be easily read from ground level.

11. OVERLASHING

A. Licensee may, upon notice to Licensor, overlash its own existing authorized Attachment and this does not constitute a separate Attachment, as it relates to the billing of Pole Attachment Fees, unless multiple/separate Attachment points are physically made at the Poles itself outside of the scope of a single

Attachment. Such notice shall be in the form of an Exhibit B Application for Pole License, and any additional Attachments being installed on Poles, regardless of it being an overlash of existing Attachment or as a new Attachment, will require an engineering analysis to determine if the additional loading negatively impacts the Poles capacity. Any additional load which causes the Pole to exceed its rated capacity or no longer provides for ample ground clearance of the Attachments or other facilities will necessitate the need for the Licensee to pay any and all Make Ready Work necessary. Each overlashed strand shall not exceed a 2" maximum diameter.

B. In no event shall Licensee allow a third party to overlash to Licensee's Attachments without prior notice to and consent from Licensor. Any third party must execute a License Agreement with Licensor and obtain a license thereunder.

12. MODIFICATIONS, ADDITIONS, REPLACEMENTS OR REARRANGEMENTS

A. Licensee shall not modify, overlash, add to, or replace Attachments on any Poles without first notifying Licensor in writing of the intended modification, addition or replacement at least thirty (30) days prior to the date the activity is scheduled to begin. The required notification shall include:

1. The date the activity is scheduled to begin including the Pole location and Pole number,
2. A description of the planned modification, addition, or replacement,
3. A representation that the modification, addition, or replacement will not require any space other than the space previously designated for Licensee's Attachments, and
4. A representation that the modification, addition, or replacement will not impair the structural integrity of the Poles involved.

B. Upon Licensor's receipt of a complete Exhibit B Application for Pole License, Licensor will perform, at Licensee's sole expense, a field check and if Licensor determine that the modification, addition, or replacement specified by Licensee in its notice will require more space than that allocated to Licensee or will require the rearrangements of, reinforcement of, replacement of, or an addition of support equipment to the Poles involved in order to accommodate Licensee's modification, addition, or replacement, Licensor will so notify Licensee and the parties will follow the Make Ready Work process as set forth in Section 8 of this Agreement in order to obtain authorization for the modification, addition, or replacement of its Attachments.

C. Should Licensee request Licensor to expand capacity or purchase additional plant and should Licensor so agree, Licensee agrees to pay all cost and expenses thereby incurred by Licensor. If another party that has been granted a license joins in the request and will benefit from the expansion or purchase, Licensee agrees to pay a percentage of all costs proportionate to Licensee's share of the benefit received from the expansion or purchase, but Licensee shall be responsible for all costs and expenses not paid by the other party.

D. When multiple applications, including those of Licensee, are received by Licensor with respect to any Poles which must be replaced or rearranged to provide additional space prior to commencement of the work on such Poles, Licensor's facilities may need to be transferred in which case Licensee shall pay for all costs for such transfers.

E. In the event Licensor plans to modify or alter any Poles upon which Licensee has placed Attachments, Licensor, except in emergency situations, shall provide Licensee written notice of the proposed modification or alteration at least sixty (60) days prior to the time the proposed modification or alteration is scheduled to take place. Should Licensee decide to modify or alter Licensee's Attachments on Poles, Licensee shall so notify Licensor in writing at least thirty (30) days prior to the day the work is to begin. In such event, Licensee shall bear a proportionate share of the total costs incurred by Licensor to make Licensor Poles accessible.

F. In the event Licensor is required to move the location of, or replace, any Licensor Poles for reasons beyond its control, Licensee concurrently shall relocate Licensee's Attachments. Licensee shall be solely responsible for the costs of the relocation of Licensee's Attachments. When it is mutually agreed that it is in the best interest of Licensor and Licensee, Licensor may, after proper notification has been provided, transfer Licensee's Attachments at the same time that Licensor transfers its facilities and shall invoice Licensee for the actual costs incurred in performing the transfer of Licensee's Attachments.

13. EMERGENCY RESTORATION

A. In the event of an emergency, restoration procedures may be affected by the presence of Licensee's Attachments. While Licensor shall not be responsible for the repair of damaged Attachments, Licensor shall nonetheless control access to its Poles if the restoration is to be achieved in an orderly fashion.

B. Where Licensor and Licensee are involved in emergency restorations, access to Licensor's Poles will be controlled by Licensor according to the following guidelines.

1. Service Disruptions/Outages

- a) While exercising its right to first access, Licensor shall make all reasonable efforts to grant access to as many other entities with attachments as is reasonably safe.

Where Licensor is unable to grant simultaneous access to all other entities with attachments, access will be granted according to the level of damage to the attachments of each entity and the extent to which such entity is suffering a service disruption, with preference being given to emergency service providers, if possible.

2. Service Affecting Emergencies

- a) While exercising its right to first access, Licensor shall make all reasonable efforts to grant access to as many other entities with attachments as is reasonably safe.

- b) Where Licensor is unable to grant simultaneous access to all other entities with attachments, access will be granted according to the level of damage to the attachments of each entity and the likelihood that a given level of damage will result in service disruption.

C. Without limiting any other indemnification or hold harmless provisions of this Agreement, Licensee agrees that any decision by Licensor regarding access to its Attachments, or any action or failure to act by Licensor, under this section shall not be the basis for any claim by Licensee against Licensor for any damage to Licensee's Attachments or disruption of Licensee's Services, or any other direct or indirect damages of any kind whatsoever incurred by Licensee.

14. FAILURE TO PLACE ATTACHMENTS

Once Licensee has been issued a License, Licensee shall use commercially reasonable efforts to begin the placement of its Attachments on the Licensor Poles covered by the License within ninety (90) days from the date the License was issued. If Licensee fails to advise Licensor of its delay by notice thereof or if Licensee fails to use commercially reasonable efforts to begin placing its Attachments within the ninety (90) calendar days prescribed by this section, the License shall be automatically rescinded by Licensor and deemed null and void, and Licensee shall have no further right to place the Attachments pursuant to such voided License.

15. ABANDONMENT

Nothing in this Agreement shall prevent or be construed to prevent Licensor from abandoning, selling, assigning, or otherwise disposing of any Poles. Licensor shall notify Licensee of any sale, assignment, or other disposition of any Poles or other Licensor property used for Licensee's Attachments.

16. INSPECTIONS AND INVENTORIES

A. **Post construction and/or periodic inspection of Licensee Attachments.** Licensor shall have the right, but not the obligation, to make a post construction inspection and periodic inspections at any time of any part of Licensee's Attachments on Poles and any other associated facilities for the limited purpose of determining whether Licensee's Attachments are in compliance with the terms of this Agreement and any Licenses issued hereunder. Such inspections shall be conducted at Licensor's expense with the exception of (1) a post construction inspection, (2) follow-up inspection to confirm remedial action after an observed Licensee violation of the requirements of this Agreement; and (3) inspection of Licensee Facilities in compliance with a specific mandate of appropriate governmental authority, for which inspections the cost shall be borne solely by Licensee.

B. **Inventories.** Upon written notice to Licensee, the total number and location of Licensee's Attachments on Licensor's Poles may be determined, at Licensor's discretion, through a survey which may be made not more than once per calendar year by Licensor. If so requested, Licensee and /or any other entity owning or jointly using the Poles with Licensor may participate in the survey. The costs incurred by Licensor to conduct the survey shall be reimbursed to Licensor by Licensee upon demand by Licensor regardless of whether or not Licensee participates in the survey. If the Attachments of more than one licensee are surveyed, each such licensee shall contribute a proportionate share of the costs reimbursed to Licensor.

C. **No Duty to Licensee.** Neither the act of inspection or survey by Licensor of Licensee's Attachments nor any failure to inspect such Attachments shall operate to impose on Licensor any liability of any kind whatsoever or to relieve Licensee of any responsibility, obligations or liability under this Agreement, any License issued hereunder, or applicable law, or to any third party contractor, Licensee Contractor, or otherwise.

17. UNAUTHORIZED ATTACHMENTS

A. If any Licensee Attachment shall be found on Poles for which no License has been granted by Licensor pursuant to the terms of this Agreement (“Unauthorized Attachment”), Licensor, without prejudice to its other rights or remedies under this Agreement or otherwise, may:

1. Impose charges as set forth herein, and
2. Require Licensee to remove such Unauthorized Attachment or Licensor may remove such Unauthorized Attachment without liability and the expense of removal shall be borne by Licensee.

B. Subject to Section 17(F), for the purpose of determining the charges, Licensee shall pay an amount per Unauthorized Attachment equal to the Pole Attachment Fee that would have applied if Licensee had properly obtained a License based upon the then current Attachment Rate for the number of years the Unauthorized Attachment have existed (or, if that cannot be determined, the number or years since the most recent inventory or five (5) years, whichever is less), plus interest at a rate the greater of 1% per month. In addition, if the Unauthorized Attachment is discovered during a survey where Licensee declined to participate an additional fee of \$100 per Unauthorized Attachment shall be charged to Licensee. Licensee agrees and acknowledges in the event of an Unauthorized Attachment actual damages would be difficult to determine and the charges described herein are liquidated damages, not penalties, and represent a fair and reasonable estimate of the damages which may be incurred by Licensor for Unauthorized Attachments on Licensor’s Poles including wear and tear, lost revenue, increased maintenance and repair costs for having to work on a Pole where the owner of a facility is unknown, and the risk of liability for safety violations that may be the result of an Unauthorized Attachment.

C. Any such charge as set forth in Section 17(B) imposed by Licensor shall be in addition to its rights to any other sums due and payable, including without limitation Make Ready Work costs, the actual costs of any audit or survey which established the existence of the Unauthorized Attachment and to any claims to said fees.

D. No act by Licensor with regard to any unauthorized use shall be deemed as a ratification or the licensing of the unauthorized use, and if any License should subsequently be issued, after application and payment of all applicable fees therefore, said License shall not operate retroactively or constitute a waiver by Licensor of any of its rights or privileges under this Agreement or otherwise, and Licensee shall be subject to all liabilities, obligations and responsibilities of this Agreement in regard to said unauthorized use from its inception.

E. An Unauthorized Attachment shall include, but not limited to:

1. An Attachment to Poles which is not identified in any License issued in accordance with this Agreement;
2. An Attachment that occupies more space than that allocated to Licensee by Licensor in a License;

3. An Attachment that is not placed in accordance with the provisions of this Agreement or the appropriate License issued pursuant to this Agreement, unless Licensee can demonstrate to Licensor's reasonable satisfaction that said misplacement is not due to any act or omission of Licensee or Licensee's agents;
4. An addition or modification by Licensee to its pre-existing Attachment(s) that impairs the structural integrity of the involved Licensor Poles.
5. An Attachment that consists of facilities owned or controlled by, and for the use of a party other than Licensee that is overlashed to Licensee Attachments without approval by Licensor as required under this Agreement.

F. Once Licensor has notified Licensee of an Unauthorized Attachment, Licensee shall submit an Exhibit B Application for Pole License to request an authorization for the Attachment. An Exhibit B Application for Pole License submitted per this provision will be treated like any other Exhibit B Application for Pole License subject to this Agreement. Licensee will be responsible for all fees associated with an Exhibit B Application for Pole License (as identified in this Agreement). If an Exhibit B Application for Pole License is not received by Licensor within ten (10) days of Licensor's notice of an Unauthorized Attachment, Licensee has sixty (60) days from the date of the Unauthorized Attachment notification to vacate the Pole. If Licensee fails to remove Licensee's facilities within such sixty (60) day period, Licensor shall have the right to remove Licensee's facilities at Licensee's expense and without any liability on the part of Licensor for damage or injury to Licensee's facilities or disruption of Licensee's Services.

18. COMPLIANCE WITH LAW, ASSUMPTION OF RISK, AND DISCLAIMER OF WARRANTIES

A. Notwithstanding anything to the contrary in this Agreement, Licensee shall ensure that any and all activities it undertakes pursuant to this Agreement shall comply with all applicable laws, including, without limitation, all applicable provisions of:

1. Workers' compensation laws
2. Unemployment compensation laws
3. The Federal Social Security Law
4. The Fair Labor Standards Act, and
5. All laws, regulations, rules, guidelines, policies, orders, permits and approvals or any governmental authority relating to environmental matters including but not limited to Hazardous Materials and/or Occupational Safety and Health Act ("OSHA").

B. LICENSEE ACKNOWLEDGES AND AGREES THAT LICENSOR DOES NOT MAKE ANY REPRESENTATION OR WARRANTIES AS TO THE CONDITION OR SAFETY OF LICENSOR'S POLES, ANY ASSOCIATED FACILITIES AND EQUIPMENT ON, WITHIN OR SURROUNDING THE SAME, OR THE PREMISES SURROUNDING THE SAME, LICENSEE HEREBY ASSUMES ALL RISKS OF ANY DAMAGE, INJURY OR LOSS OF ANY NATURE

WHATSOEVER CAUSED BY OR IN CONNECTION WITH THE USE OF POLES AND ASSOCIATED FACILITIES AND EQUIPMENT ON, WITHIN OR SURROUNDING THE SAME, AND THE PREMISES SURROUNDING THE SAME AND LICENSEE IS SOLELY RESPONSIBLE FOR ALL ALLEGED DAMAGES CLAIMED BY THIRD PARTIES ACCESSING OR WORKING ON OR NEAR LICENSOR'S POLES.

C. EXCEPT AS OTHERWISE PROVIDED HEREIN, LICENSOR MAKES NO WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, ALL OF WHICH ARE HEREBY EXPRESSLY DISCLAIMED, WITH REGARD TO THIS AGREEMENT AND ANY LICENSE ISSUED HEREUNDER INCLUDING, WITHOUT LIMITATION, ACCESS TO LICENSOR'S POLES OR OTHER FACILITIES.

19. LICENSEE CONTRACTOR QUALIFICATIONS

A. The parties acknowledge that from time to time Licensee may use a Licensee Contractor to perform work for Licensee on, within or in Licensor's Poles.

B. Licensee represents and warrants that any of its employees or Licensee Contractors shall not climb or work on any of Licensor's Poles, or work within Licensor's Right-Of-Way unless such person has the training, skill, and experience required to recognize potentially dangerous conditions relating to Poles and to perform the work safely.

C. Licensee assumes all risk of Licensee Contractors and agrees, to the extent permitted by Kentucky law, including but not limited to Section 177 of the Kentucky constitution, to indemnify, defend and hold harmless Licensor from all claims, losses, damages and liabilities, costs and expenses (including, but not limited to, reasonable attorney's fees) associated thereto in accordance with the indemnification provision of this License Agreement.

D. When Licensee Contractors are working on, within or in the vicinity of any part of Licensor's Poles or Right-Of-Way, all such Licensee Contractors shall follow procedures which Licensee deems appropriate for the protection of persons and property. Licensee shall be responsible at all times for determining and implementing the specific steps required to protect persons and property at the site. Licensee will provide all traffic control and warning devices required to protect pedestrian and vehicular traffic, workers and property from danger. Licensee has sole responsibility for the safety of all its employees and Licensee Contractors, for the safety of bystanders, and for insuring that all operations conform to terms and conditions set forth in this Agreement. Licensor reserves the right to suspend Licensee's activities on, within or in the vicinity of Licensor's Poles or Right-Of-Way if, in Licensor's sole judgment, any hazardous condition arises due to the activity (including both acts and omissions) of any Licensee Contractor or Licensee employee, which suspension shall cease when the condition has been rectified.

E. Licensee represents and warrants that all Licensee Contractors shall maintain the same insurance coverage and limits as are required of Licensee under this Agreement.

F. Licensee acknowledges that all Licensee Contractors are not Licensor's employees or agents and Licensee assumes full responsibility for their actions or omissions to act. Licensee shall be solely responsible for the payment of compensation of Licensee's employees, contractors or agents assigned to

perform work hereunder and such employees, contractors and agents shall be informed that they are not entitled to the provision of any Licensor benefits. Licensor shall not be responsible for payment of workman's compensation, disability benefits, and unemployment insurance or for withholding or paying employment related taxes for any employee of Licensee, but such responsibility shall be solely that of Licensee. In the event that any federal, state or local government agency, any court or any other applicable entity determines that the personnel provided by Licensee or any permitted Licensee Contractor are employees of Licensor for any purpose, to the extent permitted by Kentucky law, including but not limited to Section 177 of the Kentucky constitution, Licensee agrees to indemnify, defend and save harmless Licensor from all liabilities, costs, and expenses (including, but not limited to, reasonable attorney fees) associated with such determination in accordance with the indemnification provision of this License Agreement.

G. Any work by Licensee Contractors on, within or in Licensor's Poles or Right-Of-Way shall be done only when specific authorization for such work has been obtained in writing in advance from Licensor pursuant to the terms and conditions of this Agreement. The parties agree that all work shall be performed according to existing industry standards and practices and the requirements and specifications set forth in this Agreement and any License issued hereunder.

20. DEFAULT

A. In addition to other events of defaults defined anywhere else in this Agreement, any one of the following shall be deemed the occurrence of a default under this Agreement:

1. Failure by Licensee to pay when due any fee or other sum required to be paid under applicable law or the terms of this Agreement.
2. Failure by either party to perform or observe any other term, condition, covenant, obligation, or provision of this Agreement and such default continues for a period of thirty (30) days after written notice thereof from the other party (provided that if such default is not curable within a thirty (30) day period, the period may be extended if the party substantially commences to cure such default and proceeds diligently thereafter to effect such cure).
3. The filing of any tax or lien against Poles because of any act or omission by Licensee which is not bonded or discharged within thirty (30) days of the date of notice to Licensee that such lien has been filed;
4. Licensee's or Licensor's voluntary or involuntary bankruptcy;
5. Licensee's use or maintenance of its Attachments in violation of any law or regulation, or in aid of any unlawful act or undertaking;
6. If any authorization which may be required of Licensee by any governmental or private authority for the placement, operation, or maintenance of Licensee's Attachments is denied or revoked.

B. In the event of a default and subject to any other applicable provision of this Agreement, the non-defaulting party, without any further notice to the defaulting party (except where expressly provided for below or required by applicable law), may do any one or more of the following:

1. Perform on behalf and at the expense of the defaulting party, any obligation of the defaulting party under this Agreement which the defaulting party has failed to perform and of which the non-defaulting party shall have given the defaulting party notice, the cost of which performance shall be paid by the defaulting party to the non-defaulting party upon demand;
2. Terminate this Agreement by giving sixty (60) days written notice of such termination to Licensee and remove Licensee's Attachments and store Licensee's facilities in a public warehouse or elsewhere at the expense of and for the account of Licensee without Licensor being deemed guilty of trespass or conversion, and without Licensor becoming liable for any loss or damages to Licensee occasioned thereby; or
3. Exercise any other legal or equitable right or remedy that the non-defaulting party may have.

C. Upon termination of this Agreement by the non-defaulting party, the defaulting party shall remain liable to the non-defaulting party for any and all payments which may be due or sustained in accord with this Agreement prior to such termination.

D. All rights and remedies of the non-defaulting party set forth in this Agreement shall be cumulative and none shall exclude any other right or remedy, now or hereafter allowed by or available under any statute, ordinance, rule of court, or the common law, either at law or in equity, or both.

E. Nothing in this section limits the Licensee's authority to terminate this Agreement pursuant to 200 KAR 5:312.

21. INDEMNIFICATION AND LIMITATION OF LIABILITY

A. To the extent permitted by Kentucky law, including but not limited to Section 177 of the Kentucky Constitution, Licensee shall compensate Licensor for the full actual loss, damage or destruction of Licensor's property that in any way arises from or is related to this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation, or maintenance of Licensee's Attachments).

B. To the extent permitted by Kentucky law, including but not limited to Section 177 of the Kentucky Constitution, Licensee agrees to defend, indemnify, protect and hold harmless Licensor and its officers, directors, employees, shareholders, successors, assigns, agents, affiliates, representatives, partners, and contractors from and against any and all claims, actions, administrative proceedings (including, without limitation, informal proceedings), judgments, damages, penalties, fines, cost, liabilities, interests, or loss, including, without limitation, reasonable attorneys' fees and expenses, consultant fees, and expert fees, together with all other costs and expenses of any kind or nature suffered

by or asserted against Licensor in any way arising out of or connected with this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation or maintenance of Licensee's Attachments, except to the extent caused by the negligence or willful misconduct or made at the direction of Licensor or Licensor's affiliates, agents, officers, employees and assigns). Licensee expressly assumes all liability for actions by its affiliates, agents, officers, employees, or Licensee Contractors and expressly waives any immunity from the enforcement of this indemnification provision that might otherwise be provided by workers' compensation law or by other state or federal laws.

C. Without limiting any of the foregoing, to the extent permitted by Kentucky law, including but not limited to Section 177 of the Kentucky Constitution, Licensee assumes all risk of, and agrees to relieve Licensor of any and all liability for, loss or damage (and the consequences of loss or damage) to any facilities placed on Licensor's property and any other financial loss sustained by Licensee, except to the extent caused by the negligence or willful misconduct on the part of Licensor or Licensor's agents, officers, employees, and assigns.

D. Without limiting the foregoing, to the extent permitted by Kentucky law, including but not limited to Section 177 of the Kentucky Constitution, Licensee expressly agrees to indemnify, defend, and hold harmless Licensor and Licensor's agents, officers, employees and assigns from any and all claims asserted by end users/customers of Licensee in any way arising out of or in connection with this Agreement or Licensee's Attachments, except to the extent caused by the negligence or willful misconduct of Licensor or Licensor's agents, officers, employees, and assigns, or its contractors.

E. Notwithstanding anything to the contrary in this Agreement, to the extent permitted by Kentucky law, including but not limited to Section 177 of the Kentucky Constitution, Licensee further shall indemnify and hold harmless Licensor, its agents, officers, employees, and assigns from and against any claims, liabilities, losses, damages, fines, penalties, and costs (including, without limitation, reasonable attorneys' fees) whether foreseen or unforeseen, which the Licensor suffers or incurs because of:

1. Any discharge of Hazardous Materials resulting from acts or omissions of Licensee, Licensee Contractors or Licensee's predecessor in interest;
2. Acts or omissions of Licensee, its agents, employees, Licensees, or representatives in connection with any cleanup required by law, or
3. Failure of Licensee or Licensee Contractors to comply with Environmental, Safety and Health Laws.

F. In the event of any claim, demand or litigation specified the indemnity provision, the party to be indemnified (the "Indemnified Party") shall give prompt notice to the other party (the "Indemnifying Party") of such claim, demand or litigation. The Indemnifying Party shall have sole control of the defense of any action or litigation on such a claim or demand (including the selection of appropriate counsel) and all negotiations for the settlement or compromise of the same, except that the Indemnifying Party may not make any non-monetary settlement or compromise without the Indemnified Party's consent, which consent shall not be unreasonably withheld. The Indemnified Party shall cooperate with the Indemnifying Party in the defense and/or settlement of any claim, demand or litigation. Nothing herein shall be deemed to prevent the Indemnified Party from participating in the defense and/or

settlement of any claim, demand or litigation by the Indemnified Party's own counsel at the Indemnified Party's own expense.

G. SUBJECT TO THE PROVISIONS OF 200 KAR 5;312, NOTWITHSTANDING ANYTHING TO THE CONTRARY CONTAINED IN THE AGREEMENT, NEITHER PARTY SHALL BE LIABLE TO THE OTHER PARTY FOR CONSEQUENTIAL, INCIDENTAL, PUNITIVE, EXEMPLARY OR INDIRECT DAMAGES SUFFERED BY SUCH PARTY OR BY ANY SUBSCRIBER, CUSTOMER OR PURCHASER OF SUCH PARTY FOR LOST PROFITS OR OTHER BUSINESS INTERRUPTION DAMAGES, WHETHER BY VIRTUE OF ANY STATUTE, IN TORT OR IN CONTRACT, UNDER ANY PROVISION OF INDEMNITY, OR OTHERWISE, REGARDLESS OF THE THEORY OF LIABILITY UPON WHICH ANY SUCH CLAIM MAY BE BASED OR WHETHER IT (a) HAS BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES OR (b) IS NEGLIGENT.

22. INSURANCE

A. Licensee or Licensee Contractors shall obtain and maintain, in full force and effect at all times, during operations covered by this Agreement, such minimum insurance as will cover the obligations and liabilities of Licensee, its agents, and its employees which may arise from the operations under this Agreement. Insurance shall have limits of not less than Commercial General Liability policy of minimum limits of:

| | |
|---|--------------------------------|
| General Aggregate | \$ 2,000,000 per policy period |
| Products/Completed Operations Aggregate | \$ 2,000,000 per policy period |
| Personal Injury/Advertising | \$ 2,000,000 per occurrence |
| Each Occurrence | \$ 2,000,000 per occurrence |
| Fire Legal Liability | \$ 50,000 any one fire |

B. The policy will be endorsed to show the above aggregate limits applying to "each" job site or, as an alternative, the General Aggregate will be increased to \$4,000,000 per policy period. Policy will also specifically state the coverage applies to all operations conducted by the Licensee, its employees, or agents on behalf of Licensee or subsidiary.

C. Where the performance of the work involves structural property, underground property, or blasting, Licensee's Commercial General Liability insurance policy shall provide coverage to the insured for legal liability arising from operations under this Agreement for property damage:

1. arising out of blasting,
2. arising out of collapse of, or structural injury to, any building or structure or
3. To underground facilities and utilities.

D. Other general liability forms are acceptable in lieu of the Commercial General Liability Form however they are not to be used without written approval from Licensor.

1. Business Automobile Liability policy with minimum limits of:

| | |
|-----------------|---------------------------|
| Bodily Injury | \$2,000,000 per accident |
| Property Damage | \$ 2,000,000 per accident |
| OR | |

24. CONFIDENTIALITY

Except as required by the Kentucky Open Records Act (KRS 61.870 to 61.884), neither party shall at any time disclose, provide, demonstrate or otherwise make available to any third party any of the terms or conditions of this Agreement or any materials provided by either party specifically marked as confidential, except upon written consent of the other party, or as may be required by applicable law or governmental authorities. Notwithstanding the foregoing, nothing in this Section shall prevent disclosure to a party's authorized legal counsel who shall be subject to this confidentiality section, nor shall it preclude the use of this Agreement by the parties to obtain financing, to make or report matters related to this Agreement in any securities statements, or to respond to any requests by governmental or judicial authorities; provided, however, that any such disclosure shall be limited to the extent necessary, and shall be made only after attempting to obtain confidentiality assurances. Notwithstanding the foregoing, prior to making any disclosure in response to a request of a governmental authority or legal process, the party called upon to make such disclosure shall provide notice to the other party of such proposed disclosure sufficient to provide the other with an opportunity to timely object to such disclosure. Notwithstanding the foregoing, Licensor may, without notice to Licensee: (i) negotiate or enter into any agreement with any other person(s) or entity(ies) that is identical or similar to this Agreement; and (ii) provide the text of all or part of this Agreement to any other party, so long as Licensor shall redact therefrom all references to Licensee and shall not associate such text with Licensee or identify Licensee as having agreed to such text or terms.

25. DISPUTE RESOLUTION

A. Except in the case of:

1. A suit, action, or proceeding by one party to compel the other party to comply with its obligation to indemnify the other party pursuant to this Agreement, or
2. A suit, action or proceeding to compel either party to comply with the dispute resolution procedures set forth in this section, the parties agree to use the following procedure to resolve any dispute, controversy, or claim arising out of or relating to this Agreement or its breach.

B. In accordance with the provisions of KRS Chapter 45A, at the written request of a party, each party shall designate a knowledgeable, responsible representative to meet and negotiate in good faith to resolve any dispute, controversy, or claim arising under this Agreement. The parties intend that these negotiations be conducted by non-lawyer, business representatives. The substance of the negotiations shall be left to the discretion of the representatives. Upon mutual agreement, the representatives may utilize other alternative nonbinding dispute resolution procedures such as mediation to assist in the negotiations. Discussions and correspondence between the representatives for the purposes of these negotiations shall be treated as confidential, undertaken for purposes of settlement, shall be exempt from discovery and production, and shall not be admissible in any subsequent proceeding without the concurrence of all parties. Documents identified in or provided during such negotiations, which are not prepared for purposes of the negotiations, shall not be so exempt and may, if otherwise admissible, be admitted as evidence in any subsequent proceeding.

C. If a resolution of the dispute, controversy or claim is not reached within ninety (90) days of the initial written request referred to in this Section 25, the dispute, controversy, or claim may be filed with

the State utility commission or the Federal Communication Commission, if applicable, for review and determination, provided the party invoking the commission's intervention process has in good faith negotiated, or attempted to negotiate, with the other party pursuant to this Section 25.

D. Except as otherwise provided in this Agreement under the Indemnification or Default provision or elsewhere, each party shall bear its own costs, including attorneys' fee, incurred in connection with any of the foregoing procedures. A party-seeking discovery shall reimburse the responding party the cost of reproducing documents (to include search time and reproduction time costs).

26. TAXES

Licensor shall pay all taxes and assessments lawfully levied on its own property and services subject to this Agreement. Licensee, a sovereign entity, is not subject to taxation.

27. WAIVER

Failure by either party to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

28. NO THIRD PARTY BENEFICIARIES

Except as otherwise provided in this Agreement, this Agreement is intended to benefit only the parties and may be enforced solely by the parties, their successors in interest or permitted assigns. It is not intended to, and shall not, create rights, remedies or benefits of any character whatsoever in favor of any persons, corporations, associations, or entities other than the parties, except as provided herein.

29. FORCE MAJEURE

Neither party shall be liable for any delay or failure in performance of any part of this License Agreement or License issued hereunder from any cause beyond its reasonable control and without its fault, omission or negligence, such as acts of God, acts of civil or military authority, embargoes, epidemics, war, terrorist acts, riots, insurrections, fires, explosions, earthquakes, nuclear accidents, floods, power blackouts, labor strikes, lockouts or work stoppages or severe weather ("Force Majeure Event"). In the event of a Force Majeure Event, upon giving prompt notice to the other party, the due date for performance by the affected party of its original obligation(s) shall be extended by a term equal to the time lost by reason of the Force Majeure Event. In the event that the affected party is able to partially perform its obligations, it shall perform its obligations at a performance level no less than that which it uses for its own operations.

30. ASSIGNMENT

Licensee shall not assign, transfer, allow a change of control to occur if, after the change in control, the Licensee is no longer a governmental entity of the Commonwealth of Kentucky, or sublet the privileges hereby granted, or sell, lease or otherwise permit the use of its facilities or any part thereof (all of the foregoing being "Transfers"), without prior consent in writing of Licensor. No such consent granted by Licensor shall be effective until Licensee's assignee, sublessee or other transferee has agreed, on an enforceable separate document signed and delivered to Licensor, to assume all obligations and

liabilities of Licensee under this Agreement. Licensor may condition such consent upon the assignee's, sublessee's or transferee's agreement to reasonable or additional or modified terms or conditions. Licensor may assign or otherwise transfer this Agreement or any of its rights and interests to any firm, corporation or individual without the prior consent of Licensee. Notwithstanding the foregoing, Licensee may assign or otherwise transfer this Agreement or any of its rights and interests herein to any other governmental entity of the Commonwealth of Kentucky without consent but upon written notice, as long as that entity is a Competitive Local Exchange Carrier or has filed an application to become a Competitive Local Exchange Carrier with the Kentucky Public Service Commission in accordance with Ky.Rev.Stats.Ch.278.

31. APPLICABLE LAW

This Agreement, and the rights and obligations contained in it, shall be governed and construed under the laws of the state in which the Attachments hereunder are to be located. The terms and conditions of this Agreement shall be subject to any and all applicable laws, rules, regulations or guidelines now in effect and that subsequently may be prescribed by any federal, state or local governmental authority. To the extent required by any such prescribed law, rule, regulation or guideline, the Parties agree to modify, in writing, the affected term(s) and conditions(s) of this Agreement to bring them into compliance with such law, rule, regulation or guideline. Should any term of this Agreement be determined by a court or agency with competent jurisdiction to be unenforceable, all other terms of this Agreement shall remain in full force and effect. Venue for any legal action arising under this Agreement shall be in the Franklin Circuit Court, Frankfort, Kentucky.

32. WAIVER OF JURY TRIAL

Licensor and Licensee each expressly waive its right to a jury trial.

33. ENTIRE AGREEMENT, MODIFICATIONS, SURVIVAL AND CONFLICTS AND TARIFFS

A. This Agreement cancels and supersedes all previous agreements whether written or oral, except for any sums due thereunder, between Licensor and Licensee with respect to the Licensee's Attachments to Licensor's Poles; and there are no other provisions, terms or conditions to this Agreement except as expressed herein. All currently effective Licenses and authorizations for Attachments granted pursuant to such previous agreements shall continue in effect subject to the terms and conditions of this Agreement.

B. This Agreement may be amended or supplemented at any time only upon written agreement by the parties hereto. Notwithstanding the foregoing, all Exhibits, fees, Licensor procedures and specifications may be modified by Licensor upon thirty (30) day notice to Licensee.

C. Notwithstanding the termination of this Agreement for any reason, Section 18 Compliance with Laws, Assumption of Risk and Disclaimer of Warranties, Section 21 Indemnification and Limitation of Liability, Section 22 Insurance, Section 24 Confidentiality and any other provision intended to survive, shall survive termination to the maximum extent permitted under applicable law. Notwithstanding any provisions to the contrary, all rights, remedies, or obligations which arose or accrued prior to the termination or expiration of the terms hereof shall survive and be fully enforceable for the applicable statute of limitations period.

D. It is the intent of the parties that the terms and conditions of this Agreement and any applicable Licensor's state tariffs be construed as being consistent where possible. However, in the event of a conflict or difference between the terms and conditions of this Agreement and Licensor's state tariff, the terms of the applicable state tariff shall control.

34. AUTHORITY AND COUNTERPARTS AND ELECTRONIC SIGNATURES

A. Each party represents and warrants that it is a corporation duly organized, validly existing and in good standing under the laws of the state in which the obligations under this License Agreement are to be performed. Each party warrants that it has full power and authority to execute and deliver this License Agreement and to perform its obligations hereunder.

B. This Agreement may be executed using facsimile or electronic signatures and such facsimile or electronic version of the Agreement shall have the same legally binding effect as an original paper version. This Agreement may be executed in counterparts, each of which shall be deemed an original.

LICENSEE

The Commonwealth of Kentucky, Kentucky Communications network authority and the Finance and Administration Cabinet

BY: William M. Landrum
NAME: WILLIAM M. LANDRUM
TITLE: Secretary, FAC
DATE: 11 July 2016

EXHIBIT A
DEFINITIONS

“Application for Pole License” - A written request submitted in the form of Exhibit B from Licensee to Licensor requesting authorization to attach Licensee owned facilities to Poles in accordance with this Agreement.

“Attachment(s)” - any facilities, cables or equipment attached to Poles or any other property owned or controlled by Licensor.

“Effective Date” - is the date this Agreement is last signed by the parties.

“Force Majeure Event” - shall have the meaning set forth in Section 28 of the Agreement.

“Hazardous Materials” -

Any substance, material or waste now or hereafter defined or characterized as hazardous, toxic or dangerous as defined by the Comprehensive Environmental Response, Compensation and Liability Act (“CERCLA”) of 1980, as amended, and other federal, state, and local health, safety, and environmental laws, ordinances, statutes, and rules, including but not limited to the Occupational Safety and Health Act (“OSHA”).

Any substance, material or waste now or hereafter classified as a contaminant or pollutant under any law, rules, ordinance, or authority.

Any other substance, material or waste, the manufacture, processing, distribution, use, treatment, storage, placement, disposal, removal or transportation of which is now or hereafter subject to regulation under any law, ordinance, statute, rule or regulation of any governmental body or authority.

“License” - is the specific nonexclusive and revocable permission from Licensor, in the form of a Licensor countersigned and returned Application for License, to Licensee authorizing Licensee to attach its facilities as applied for to Licensor Poles in accordance with this Agreement.

“Licensee Contractors” - shall have the meaning set forth in Section 10(A) of the Agreement.

“Make Ready Estimate” - is Licensor’s estimated cost to perform Make Ready Work on Licensor’s facilities on Poles to accommodate Licensee’s Attachment as requested in an Application for Pole License.

“Make Ready Work” - all Licensor, joint owner or other existing attacher work to prepare Licensor’s Poles and related facilities for the requested Attachment of Licensee’s facilities but not the actual placement of Attachments or administrative activities related to inquiries, verifications, requests or applications.

“Overlashing or overlashed” - lashing of an additional Licensee owned cable to Licensee’s own existing cable and/or strand attached to a Pole as set forth in Section 11 of this Agreement.

“Pole(s)”- a pole owned solely or jointly by Licensor or Poles owned by others to the extent that and for so long as Licensor has the right to permit others to be attached in the communications space.

“Pole Attachment Fee” - the fee paid annually per Attachment on a Pole. For billing purposes, a single Attachment includes the point of Attachment and all facilities located in the usable space on the Poles in the space assigned to Licensee (typically six inches above and six inches below the point of Attachment). If Licensee occupies more than one foot of usable space on Poles, separate Pole Attachment Fees shall apply to each one foot of space occupied.

“Right-of-Way” - right-of-way owned or controlled by Licensor.

“Unauthorized Attachment” – shall have the meaning set forth in Section 17 (A) and 17(E) of the Agreement.

**FIRST AMENDMENT
TO POLE ATTACHMENT LICENSE AGREEMENT**

THIS FIRST AMENDMENT TO POLE ATTACHMENT LICENSE AGREEMENT (the "First Amendment") is made and entered into as of July 7, 2016, to the Pole Attachment License Agreement by and between the Commonwealth of Kentucky, Kentucky Communications Network Authority and the Finance and Administration Cabinet, hereinafter referred to as "Licensee", and Windstream Kentucky East, LLC, hereinafter referred to as "Licensor", dated the 7th day of July, 2016 (the "PAA"). Licensee and Licensor may be referred to hereinafter, individually, as a "Party" or, collectively, as the "Parties".

WHEREAS, Licensee desires for Licensor to process pole attachment applications and perform make-ready work for a larger than usual number of attachments Licensee will be submitting in connection with the Kentucky Information Highway project (the "KIH Project");

WHEREAS, Licensee and Licensor would like to amend Licensor's normal pole application and make-ready process to address the larger than usual number of attachments Licensee will be submitting in connection with the KIH Project.

THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Licensee and Licensor do hereby agree to the following terms and conditions.

1. The Parties agree that for purposes of the KIH Project only, Section 8 of the PAA will be replaced with the following Section 8:

8. ATTACHMENT REQUEST AND LICENSE PROCESS

A. Before Licensee shall have a right to place Attachments to any Poles of Licensor, Licensee shall apply in writing for, and receive, a revocable, non-exclusive License, which shall be in the form of a Licensor countersigned Application for Pole License (Exhibit B), before attaching its facilities to specified Licensor Poles. To apply for a License under this Agreement, Licensee shall submit to Licensor the appropriate Licensor Application. Licensee shall provide sufficient information on the Application to enable Licensor to locate the proposed Pole and to identify the physical characteristics of Licensee's facilities to be attached to Licensor's Poles so that Licensor can perform the make-ready survey. Licensor will process Applications for Pole Licenses in the order in which they are received; provided, however, that when Licensee has multiple Applications for Pole Licenses on file with Licensor, Licensee may designate its desired priority of completion with respect to all such Application for Pole Licenses. Licensee shall not under any circumstances attach any equipment to any guy wires or anchors owned by Licensor.

B. Make-Ready Survey. Licensee shall submit an Application for Pole License in the form of Exhibit B and shall include a drawing of the proposed route, the pole detail and contact information (name, telephone, facsimile, and email information). Licensee is responsible for determining, in accordance with requirements of the National Electric Safety Code, if the existing Licensor's facilities will support the additional loading imposed by the Licensee's attachments. Upon receipt of a complete Application, Licensor shall schedule the survey to determine whether and where Licensee's Attachment is feasible, and what Make Ready Work is required by Licensor or other existing attachers to accommodate Licensee's Attachment. If during this process, Licensor determines the request is denied based on insufficient capacity or for reasons of

safety, reliability and generally applicable engineering purpose Licensor shall inform Licensee that the Application for Pole License is denied together with the reason to the extent that such issues cannot be worked out by the Parties short of denying the Application. All expenses incurred by Licensor in reviewing Licensee's Application for Pole License shall be borne by Licensee even if such request is denied by Licensor.

C. Estimate and Acceptance of Estimate. Licensor shall present to Licensee, within 60 days of receiving a complete Application, an estimate of charges associated with performing the necessary make-ready work identified during the survey. Additionally, Licensor shall provide a description of make-ready work required of third parties to accommodate Licensee's proposed attachments. Licensor may withdraw an outstanding estimate of charges to perform make-ready work beginning 14 days after the estimate is presented. Licensee may accept an estimate and make payment any time after receipt of an estimate but before the estimate is withdrawn. Within 14 days of receipt of payment of such an invoice and completion of the Make-Ready Work, Licensor shall issue the associated License. At that time Licensee will be considered to have been granted a License with respect to the Poles approved in the License and may attach to Licensor's Poles in accordance with the terms and conditions of this Agreement.

The Parties agree that the Licensor may charge \$80,800.00 (the "Engineering Administration Charge") per month for the additional personnel necessary for Licensor to process Applications for 1,500 Pole Licenses per month. The Engineering Administration Charge represents the amount Licensor requires to retain 8 additional joint use application processors and 5 additional survey engineers each month (the "Additional Personnel"). The Parties agree further that the Engineering Administration Charge is in addition to the rates, charges and fees (including but not limited to make-ready costs that Licensee may be charged in connection with its Attachments) to be paid by Licensee pursuant to this Agreement. Licensor will have the Additional Personnel in place within 60 days of the Effective Date of the First Amendment to Pole Attachment License Agreement (the "First Amendment"). The Engineering Administration Charge will be due and payable to Licensor on or before the first day of each month. Licensor shall have no obligation to process Applications for more than 300 Pole Licenses in connection with the Kentucky Information Highway project in a given month until Licensee has paid the Engineering Administration Charge for such month. If Licensee desires for Licensor to process Applications for more than 300 Poles per month but less than 1,500 Poles per month, Licensee may request that Licensor reduce the number of Poles per month that it is staffed to process in increments of 300 Poles, and the number of Additional Personnel and the Engineering Administration Charge will be reduced accordingly at the beginning of the following month. Licensee understands, though, that the reduction of the Additional Personnel and the Engineering Administration Charge may be delayed by Licensor in order to allow it to process the Applications for Pole Licenses already submitted to it in accordance with the time frames provided for in this Agreement. Licensee shall provide Licensor with written notice when it will no longer be submitting Applications for more than 300 Pole Licenses per month in connection with the Kentucky Information Highway project (the "Amendment Termination Notice"). Beginning upon the first day of the month following receipt of the Amendment Termination Notice, the First Amendment shall terminate, Licensor shall no longer retain the Additional Personnel, and Licensor shall have no obligation to process Applications for more than 300 Pole Licenses in a given month. If necessary, Licensor will refund to Licensee a pro-rated portion of the Engineering Administration Charge for the month during which Licensor receives the Amendment Termination Notice, with such pro-ration based upon the extent to which Licensor utilizes the Additional Personnel during that month.

D. Make-Ready. Upon receipt of the make-ready estimate payment specified in Section 8(C), Licensor shall notify immediately and in writing Licensee and all known other users that

may be affected by the make-ready required for Licensee's attachments. The notice shall: (i) specify the location and type of make-ready to be performed; (ii) set a date for completion of make-ready no later than 120 days after Licensor's receipt of the make-ready estimate payment; (iii) state that any entity with an existing attachment may modify the attachment consistent with the specified make-ready before the date set for completion; and (iv) state that Licensor may assert its right to 15 additional days to complete make-ready should any other users fail to complete within the prescribed timeframe; (v) state that if make-ready is not completed by the completion dates set by Licensor, Licensee may utilize an authorized contractor to complete the specified make-ready after providing Licensor with 30 days' written notice of Licensee's intent to perform such work if not completed by Licensor prior to the expiration of the 30 day notice period. Make-ready work performed by an authorized contractor selected by Licensee, shall be performed in accordance with Licensor's specifications and in accordance with the same standards and practices followed by Licensor or Licensor's contractors. Authorized contractors selected by Licensee shall not conduct such work in any manner which degrades the integrity of Licensor's structures or interferes with any existing use of Licensor's facilities or the facilities of any other user. In the event that make-ready work is completed by an authorized contractor selected by Licensee, Licensee shall notify Licensor upon completion. While Licensor is responsible for notifying other users pursuant to this section, Licensee shall make arrangements with other users regarding reimbursement for any expenses incurred by other users in transferring or rearranging other users' facilities to accommodate the attachment or placement of Licensee's facilities to or in Licensor's poles. Licensee shall be solely responsible for negotiating with existing attachers for Make-Ready Work relating to such other existing attacher facilities located on, within or in Licensor's Poles and shall be responsible for paying all charges incurred in transferring or rearranging existing attacher facilities to accommodate the placement of Licensee's Attachment on, within or in Licensor's Poles. Upon completion of make-ready, Licensor shall invoice Licensee for additional costs incurred over and above the make-ready estimate or refund Licensee any overpayment. If there are additional costs owed to Licensor by Licensee upon completion of the Make Ready Work, Licensee shall pay such costs to Licensor within 30 days of the date an invoice for such costs is sent to Licensee. If Licensee fails to pay such invoice within 30 days of the date it is sent, then Licensor may cease any Make Ready Work until payment for such invoice is received. In the event Licensee declines to proceed with the project, Licensee shall reimburse Licensor any costs and expenses incurred by Licensor to date including but not limited to Application Fee(s), engineering and administrative expenses and costs.

E. Applications for more than 1,500 Pole Licenses. Licensor shall use commercially reasonable efforts to process Applications within the time frames agreed upon in this Section 8 if the requests for pole attachments inadvertently exceed 1,500 poles in a given month. Licensor may aggregate the number of poles on multiple requests from Licensee as if all are part of a single request for the purposes of establishing the proper timeline for all active requests within a given month.

F. Licensee shall maintain a copy of all Application for Pole Licenses and approved Licenses. Licensor may provide upon request copies of the same to the extent available and Licensee shall reimburse Licensor for its costs in preparing and sending requested copies.

2. The Parties agree that for purposes of the KIH Project only, the ninety (90) day time frame provided for in Section 14 of the PAA will be extended to one hundred eighty (180) days.
