RE: Notices of invoice dated November 30, 2016, for Lafayette and Hanover jobs

Mr. Umbaugh,

I am hoping that you can help me answer some questions concerning the invoices for the Lafayette and Hanover jobs totaling \$970,489.88.

I understand that Duke Energy typically does not provide additional detailed information concerning the make-ready work that it performs, but I think that you would agree that given the large variance between the costs listed in the make-ready estimates we received and the costs finally invoiced to us, whatever information Duke Energy could share with us to support its statements that the work was requested to be performed on an expedited basis would help us immensely in getting these invoices paid. Without some written evidence (emails, signed requests, etc.) that this work was requested to be expedited, it will be difficult for us to approve the payment of the additional amounts.

If you, or anyone else from Duke Energy, would like to speak with me about this matter directly, please feel free to email me at Daniel.King@windstream.com or call me at (812) 759-7973. Otherwise, I look forward to receiving the additional information that we have requested.

Sincerely

A handwritten signature in black ink, appearing to read "Daniel King". The signature is written in a cursive style with a large initial 'D' and 'K'.

RE: Two notices of invoice dated November 30, 2016 Lafayette job totaling \$911,452.36 and Hanover job totaling \$59,037.52

Mr. Umbaugh,

This letter is to notify you that Windstream will not be paying the invoices involved in final charges described in Lafayette and Hanover jobs totaling \$970,489.88 until Metronet Inc. pays Windstream. Metronet, Inc. will not pay said invoices until documentation is provided supporting the additional charges. Additionally, proof that expediting these jobs had been requested and additional costs approved.

Sincerely

Daniel King

Re: True Up Invoices

Dear Scott:

MetroNet appreciates the advances Duke has made during the last few month in processing pole applications. We are appreciative of the reduction in the pending backlog and Duke's commitment to eliminate it. As you are aware, there are other issues that need resolved. An issue of extreme importance to MetroNet is the matter of some true up invoices.

Almost a year ago, MetroNet expressed its concern over invoices to true up estimated make ready charges paid in prior years. Support for the amounts was requested, but we have not received any additional information. In addition, MetroNet asked for an explanation as to why so many of the make ready estimates were so wrong. Some of the true up amounts vastly exceed the original estimated make ready charges paid by Metronet. MetroNet also asked for an explanation of the delay in invoicing the true up charges. The true up invoices are dated the end of 2016. The original Duke invoices that are being "trued up" date back as far as 2013.

MetroNet rightfully disputed the charges, but MetroNet understands that Duke continues to press Windstream to pay them. MetroNet asks Duke to take Windstream out of the middle. We ask that Duke withdraw the invoice issued to Windstream. There is no need to have Windstream in the middle of these discussions. It would be beneficial to remove Windstream as an intermediary during these discussions so that MetroNet and Duke can work together directly to resolve this issue.

We believe that it would be advantageous not only to MetroNet, but also to Duke if all communications between the parties with respect to MetroNet attachments were direct between the parties. Communicating indirectly through personnel at Windstream is inefficient for both parties and unnecessarily complicates and delays the parties' resolution of issues. MetroNet asks that Duke directly communicate with MetroNet on all MetroNet issues, including invoicing for make ready and other costs.

I look forward to hearing from you on this matter.

Sincerely,

John Greenbank
Executive Vice President

Re: Letter dated March 16, 2017

Dear Dan:

This letter is to provide a written update regarding the invoices referenced in your letter of March 16 pertaining to MetroNet's Lafayette and Hanover attachments.

As you are aware, MetroNet contacted Duke directly to request supporting documentation for the charges. Representatives of Duke have stated that they would attempt to locate additional information. They anticipate this will take a couple of weeks. In the meantime, Duke has confirmed that nonpayment of these invoices will not slow down or stop attachments to Duke's poles.

We will keep you apprised of developments in this regard. Of course, if Windstream receives communication from Duke indicating a slow down or stoppage may occur as a result of the unpaid invoices, we ask that you please let us know as quickly as possible.

If you have any questions regarding this matter, please do not hesitate to contact me. We appreciate your time and consideration.

Sincerely,

Anita Larson

Metronet Inc.
Attn: Robert Thurman
8837 Bond Street
Overland Park, KS 66214

RE: Past due pass through billing on Lafayette and Hanover jobs

Mr. Thurman,

Currently Metronet Inc. is past due \$1,136,274.06 in connection with the invoices dated January 26, 2017 and March 14, 2017 (a correction invoice). These invoices represent the final charges for the Lafayette and Hanover jobs less a credit for the cancelled Connersville job. These invoices were provided to ap@qservicesco.com and Sandra Gill on January 27, 2017 (and March 14, 2017) and remain unpaid.

Please make payment no later than April 14, 2017. If payment is not made, Windstream's ability to process pole applications with Duke Energy will be jeopardized and will likely result in Windstream being unable to process further Metronet pole applications until the outstanding balance is paid in full.

Please note that we have requested that Duke Energy provide us with whatever written evidence it has that the work for these jobs was requested to be provided on an expedited basis. As soon as we receive any information from them, we will pass it along to Metronet.

Thank you in advance for your prompt attention to this matter.

Sincerely

Good morning, Anita-

Lexington is in the Windstream Kentucky East territory. I also prepared a Windstream Kentucky West agreement in case you wanted all of Kentucky covered. Also attached is our application in excel format for easier use. Please contact me after your review. I look forward to working with you as well.

Anita:

Good to hear from you. The person that you want to speak with is Michelle Mclaughlin. I have copied her on this response. She negotiates and manages our pole agreements and can provide you with our template for Kentucky.

I assume that you are asking so that MetroNet can begin the process of negotiating a pole attachment agreement with us in connection with its expansion into Lexington. Congratulations on the announcement.

Hope you have a great Thanksgiving!

Dan

Records Management Policy

I. Overview

This Records Management Policy (the “Policy”) establishes Windstream’s general standards for record management and retention. It applies to all records, regardless of whether the records are electronic or in paper format. Because records are vital company assets and essential to Windstream’s business, and in some instances must be retained to meet legal and regulatory requirements, *it is mandatory that all employees review and strictly comply with this Policy.*

This Policy is available on Stream on the Legal page under “Content,” “Documents,” and on the Intranet under “On the Job,” “Records Management.”

Questions regarding this Policy may be sent to corp.records.management@windstream.com, an email address maintained by the Legal Department.

II. Objective and Correlation to Other Company Policies

Employees should prepare and maintain complete and accurate business records to meet day-to-day business requirements and comply with known legal obligations. Without proper record handling, Windstream can be exposed to serious legal risks. Also, without proper record disposal, Windstream incurs unnecessary costs for electronic and physical storage. This Policy is intended to ensure that records are retained long enough to meet our business and legal requirements and that records no longer needed are routinely and non-selectively disposed of in the normal course of business.

This Policy only addresses the retention and destruction of records. It does not replace or override other Windstream policies that address the *contents* and handling of records, such as Windstream’s Information Security Policy, Bring Your Own Device to Work (BYOD) Policy, Data Security Policy for Sensitive Personally Identifiable Information (PII), Working with Integrity Guidelines, People Practices, Social Media Policy, etc. Those separate policies govern what should and should not be contained in records and how employees should handle sensitive customer and employee information to protect against unauthorized disclosure. This Policy only governs the length of time records should be retained and provides information on the proper destruction of records.

III. Enforcement

A. Departmental Record Coordinators.

Each department should appoint a Departmental Records Coordinator responsible for monitoring department compliance with this Policy. Departmental Records Coordinators will conduct yearly reviews with the department to assess records being retained and determine if there are records

that can be destroyed. Departmental Records Coordinator should distribute a copy of this Policy each year to the department as part of the review. Departmental Records Coordinators will report to the Legal Department, *no later than January 31th of each year*, the results of the department records review. The report should include a brief summary of record disposition and a description of any new records categories to be added to the Records Management Schedule (Exhibit C). A form report is attached as Exhibit A.

Additional responsibilities of Departmental Records Coordinators include:

- (1) Answering questions from department employees about retention time and proper storage of records;
- (2) Maintaining an off-site storage log that includes the name of the off-site facility, the date the records were sent, the contents of the box and the destruction date;
- (3) Assisting with electronic records storage/archiving;
- (4) Acting as a liaison with the Legal Department; and
- (5) Coordinating record retention with managers of department employees who change positions or leave Windstream.

B. Employees' Responsibilities.

Every employee must periodically review his/her records to determine if there are records that should be disposed of pursuant to this Policy. Each employee must, at least once per year in conjunction with the department records review described above, review records and comply with the retention period in the Records Management Schedule (Exhibit C). Additionally, employees must:

- (1) Review this Policy upon commencing employment and yearly thereafter;
- (2) Consult this Policy, his/her Departmental Records Coordinator and/or the Legal Department with questions regarding record retention; and
- (3) Maintain records for the proper amount of time pursuant to the Records Management Schedule (Exhibit C) and routinely and non-selectively dispose of records that no longer must be retained.

It is unnecessary for an employee to report to the Departmental Records Coordinator each time records are disposed of routinely and non-selectively (i.e. at times other than during the department record review); however, employees may have to provide this information to Departmental Records Coordinators during the annual department record review.

IV. Definition of a Record and Retention

A. Definition of a Record.

A record is *any* information/data set down in reproducible form, whether electronically or on paper, regardless of its characteristics, that is made or received while conducting Windstream's business. In simple terms, records are all forms of communication/information relating to Windstream's

business that have been reduced to paper or electronic form, except Instant Messages. Records include information on computers, zip or other portable drives, mobile devices, and include, but are not limited to, e-mail, word processing documents, spreadsheets, .pdf and .tiff files, graphs, communications on disk, tapes or other media and voicemails converted to emails, texts or wavefiles. Records may include data compilations, drafts, notes, calendars and all similar Outlook related items. Instant Messages are not considered records under this Policy unless they are converted to a word document or email message.

The types of records to be retained are listed in the Records Management Schedule (Exhibit C). All other documents created may be routinely and non-selectively disposed of, as there is no need to retain. Additionally, once time periods in the Records Management Schedule expire, employees should dispose of records routinely and non-selectively, unless they are subject to a Litigation Hold (Section XIII).

B. Length of Time Records must be Retained.

Records must be kept for the periods specified in the Records Management Schedule (Exhibit C). The Schedule identifies the different categories of records and sets out how long each record should be retained. If a record does not fit into a category in the Schedule, contact the Departmental Records Coordinator or the Legal Department for advice. If a record falls under two or more categories, it should be kept for the longest retention period. Records to be retained permanently must be clearly marked. Electronic documents must have some designation at the beginning or in the subject line indicating that they must be retained permanently.

Once the time periods in the Records Management Schedule (Exhibit C) expire, employees should dispose of the records routinely and non-selectively.

C. Location of Retained Records.

Occasionally, employees may create and examine records on personally-owned equipment. These records constitute Windstream records and are Windstream property. Employees shall not retain copies of records on personal/home computers, personal back-up drives (ZIP, thumb, etc.), or personal Blackberry, iPhones, iPads or other mobile devices. All Windstream records must be properly retained on the Windstream system, and no copies, whether electronic or hard copy, may be retained by an employee on personally-owned equipment or in a non-Windstream physical location for more than thirty (30) days after the creation or receipt of the record. See the Bring Your Own Device to Work Policy for more information.

V. E-mail

Although e-mails are electronic, they are records and must be kept for the length of time in the Records Management Schedule (Exhibit C).

A. E-mail Guidelines.

Employees should follow these e-mail guidelines for *records management purposes*:

- (1) Subject lines should be meaningful and searchable. Do not include matter in an e-mail not relevant to the subject line; instead, prepare a separate e-mail.
- (2) Placing privileged and confidential information in an e-mail should be avoided. When privileged or confidential information must be sent via e-mail, the author should identify it as proprietary, privileged or confidential information, include a Windstream attorney as an e-mail recipient and place “Subject to Attorney-Client Privilege” - Do Not Forward” in subject line. It is important not to copy inappropriate individuals or third parties on privileged e-mails as that may waive privileges benefiting Windstream. For more information, see the “Attorney Client Work Privilege Memorandum” on the Legal Stream page.
- (3) If e-mails are used in lieu of signed paper documents, as approvals of or acknowledgements of Windstream’s transactions, additional safeguards must be used to ensure proper handling. Consult the Legal Department under such circumstances.
- (4) Because of the ability to forward e-mail, the author loses control after a message is sent, and countless unintended recipients could receive the e-mail. Every e-mail and every reply creates copies of a record on servers, local e-mail archives and hard drives. Thus, e-mail copies can exist long after Windstream, and the original author, have discarded the e-mail. Thus, each author should assess the:
 - a. accuracy and appropriateness of e-mail contents;
 - b. chosen recipients (do not send to unnecessary persons); and
 - c. likelihood of the e-mail being copied or forwarded without knowledge or consent.

Employees should consider if verbal communication is an equally effective way to communicate and should pursue verbal communication in appropriate circumstances.

B. E-mails are Windstream property.

All incoming and outgoing e-mail on Windstream’s system, or in personal archive folders/files on the Windstream system, is the property of Windstream. No employee should expect privacy when using company e-mail, and Windstream may access and disclose e-mail without the user’s knowledge. All users of Windstream’s e-mail system expressly consent to having e-mail (including attachments) and other electronic files reviewed and monitored.

When changing jobs, employees must consult with his or her manager and Departmental Records Coordinator to review e-mail to ensure that all messages subject to retention under this Policy are retained. All messages to be retained should be preserved in a personal archive folder or file on the Windstream system. All other messages should be discarded.

If an employee is terminated, it is the responsibility of the terminated employee's manager to promptly coordinate with the Departmental Records Coordinator and Windstream's IT department to review the employee's e-mail to insure compliance with this Policy.

C. E-mail Retention.

Emails that must be retained should be stored on the personal drives assigned to employees by Windstream or department drives, as applicable. Metadata and other electronic properties of e-mails, if applicable, are not retained due to Windstream system limitations.

Subject to the requirement of "Litigation Hold Memorandums", as described in Section XIII, **Windstream's e-mail system will operate to support this Policy by *automatically* managing e-mail as follows:**

- (1) E-mail in "Inbox," "Drafts," and other message folders, **BUT NOT personal archive folders or files**, will be deleted 100 days after they are created, sent, received or modified. If a message or file must be retained longer than 100 days, move it to a personal archive folder/file on the Windstream system or department drive before automatic deletion.
- (2) E-mail in "Sent Items" will be deleted 100 days after the date the e-mail was sent. To retain a "Sent" message or file longer than 100 days, move it from "Sent Items" to an appropriate personal archive folder or file on the Windstream system or department drive before automatic deletion.
- (3) E-mail in "Deleted Items" will be regularly and routinely discarded by the system.
- (4) Entries in "Calendar" will be automatically deleted two (2) years after they are created or accepted.
- (5) Entries in "Contacts," "Notes," "Tasks" and "Journal" will not be automatically deleted and must be manually deleted by employees.
- (6) E-mails having an activity date (i.e. date of creation, receipt, modification, etc.) earlier than the Effective Date of this Policy reflected on the first page, will be deemed to have an activity date of the Effective Date. This provides for a transition period for employees and Windstream's IT department.

Employees must take prompt and appropriate steps to move e-mail that must be retained pursuant to the Records Management Schedule (Exhibit C) to proper drives or folders to avoid automatic deletion. E-mail with no business significance and not otherwise subject to retention requirements should promptly be deleted. There is no requirement that any Windstream e-mail be retained unless it falls within the record types in the Records Management Schedule (Exhibit C).

E-mails subject to a Litigation Hold do not fall under this Section and cannot be destroyed. Employees notified of a Litigation Hold should follow Section XIII of this Policy.

D. E-mail Personal Archive Folders and Files.

Windstream's e-mail system does not automatically delete personal archive folders/files on the Windstream system. Thus, it is imperative that employees periodically review these folders/files and comply with the provisions of this Policy regarding retention of documents contained in the folders/files, as these records must be manually deleted by employees. The review should be no less than once per year. The Departmental Records Coordinator will include a discussion about personal archive folders in the annual department record review (Section III).

VI. Instant Messaging (IM)

Windstream does not automatically save or reduce IM to a record format to be retained. Thus, employees should refrain from creating records subject to this Policy over IM due to the informal nature of the communications. If a record is created via IM, the IM should be converted to an e-mail or other format and saved to the employee's personal drive assigned by Windstream or department drive for proper retention under Records Management Schedule (Exhibit C).

VII. Text Messages

Creating records related to Windstream's business via text messages should be done only when absolutely necessary. If a record is created via text message, Windstream employees are required to forward the text message to their work email address for proper retention pursuant to the Records Management Schedule. No records are to be retained as text messages by employees due to the risk of inadvertently losing the record.

VIII. Voice Mail

If the content of a voicemail would be a record subject to this Policy if it were in written form, it should be recorded, transcribed and treated as a record or maintained in electronic format, via a wave file, for the applicable period under the Records Management Schedule (Exhibit C).

IX. Internal Software Applications/Websites and Social Media Websites

Internal software programs (i.e., LeaseNet, etc.) and websites (i.e., SharePoint, Salesforce, etc.) may be used to archive executed documents, share drafts and communicate regarding business

decisions. All records retained in these internal programs and websites are subject to this Policy and must be retained pursuant to the timeframes in the Records Management Schedule (Exhibit C), including internal and external “chats.” Internal programs and websites should not be used for permanent storage and should be included in the annual department record review conducted by the Departmental Records Coordinators (Section III).

Windstream employees should avoid creating and sharing records on social media pages, as retention of these records is problematic. If records are inadvertently created on social media pages, the Legal Department should be notified immediately.

X. Internal Platforms

Internal platforms, wikis, or websites (i.e., Stream, Confluence, etc.) may be used to archive executed documents, share drafts and communicate regarding business decisions. All records retained in these internal platforms are subject to this Policy and must be retained pursuant to the timeframes in the Records Management Schedule (Exhibit C). Internal platforms are used for permanent storage and should be included in the annual department record review conducted by the Departmental Records Coordinators (Section III).

Internal Platforms may be used on personal devices (i.e., Stream Mobile App, etc.). All records retained in these internal platforms are subject to this Policy and must be retained pursuant to the timeframes in the Records Management Schedule (Exhibit C). Users of the Stream Mobile App or any platform that is used on a personal device should consult the BYOD Policy to ensure compliance with both this policy and the BYOD policy.

XI. Drafts

Generally, drafts of records (i.e. contracts, e-mails, word documents, etc.) should not be retained and only the final version of the record should be maintained pursuant to this Policy. Drafts have very limited, if any, business value to Windstream. If an employee has a business reason to retain drafts, he/she should coordinate with the Legal Department and submit the “Request for Deviation from Management Schedule” (Exhibit D).

XII. Record Disposal

When the record retention period in the Records Management Schedule (Exhibit C) expires, a record should be disposed of in the ordinary course of business and non-selectively. Paper documents should be placed in shred bins and employees should delete electronic records from their folders/files. The Departmental Records Coordinator must ensure this process is followed.

Records containing confidential information (for example, customer information) must be disposed of in a manner that, consistent with applicable law, ensures the information cannot be reconstructed into a useable format. Please consult the Departmental Records Coordinator regarding disposal of such records.

XIII. Offsite Records Storage

Employees should be selective in using offsite storage. Employees should first adopt an electronic archival processing, scanning documents and saving to specified server locations, and dispose of these records pursuant to the Records Management Schedule (Exhibit C). Questions on electronic archiving should be directed to the Departmental Records Coordinator. If records cannot be maintained electronically, employees should follow the Records Management Schedule (Exhibit C) and define for the offsite vendor the destruction date.

XIV. Government Investigations/Enforcement Proceedings/ Litigation (Litigation Hold Memorandums)

When a claim, lawsuit, proceeding or investigation of any type (an “action”) is initiated or it is reasonably foreseeable that it will be initiated, the disposal provisions of this Policy are suspended and employees will be required to retain all relevant records in the format in which the records were created. This includes situations where Windstream will institute a matter. If an employee becomes aware of an action from a source other than the Legal Department or from public records, the employee must notify the Legal Department immediately and preserve all relevant records until receiving further instructions.

When suspension of Policy compliance is necessary, a Litigation Hold Memorandum will be issued by the Legal Department to all employees who may be in possession of relevant records. A sample is attached as Exhibit B. The Litigation Hold Memorandum will contain instructions on the records to be retained and the proper retention methods. Disposal of relevant records is strictly forbidden after issuance of a Litigation Hold Memorandum or after learning of an action. Criminal and civil sanctions could be imposed on Windstream **and individual employees** if relevant records are destroyed.

The Legal Department will periodically issue a reminder to relevant employees to continue to maintain their records. Employees will also receive notice when the litigation hold is released and the records no longer must be maintained.

XV. Changes and Exceptions

Windstream reserves the right to change this Policy and any retention period at any time without prior notice. The Legal Department will communicate changes to employees and/or place an updated version of the Policy on the Intranet.

Should an employee seek to retain records for longer than provided in the Retention Schedule, the employee may complete a “Request for Deviation from Retention Schedule”, attached as Exhibit D. The form must be submitted to the Legal Department for approval and, if approved, the Legal Department will retain the form.

XVI. Mandatory Compliance and Confidentiality

Employees must comply with this Policy, and no employee may dispose of records except in accordance with this Policy. Appropriate disciplinary action will be taken against persons who violate this Policy. Such action can include termination of employment and, if warranted, legal action. This Policy is for internal use only and should not be provided to anyone outside Windstream without the prior written approval of the Legal Department.

Exhibit A -- Sample

Annual Report -- Departmental Records Coordinators

Date: _____
To: Windstream Legal Department (corp.records.management@windstream.com)
From: _____ **[Name of Department]**
Subject: Department Records Review

On _____ [date] [or during the month of _____ 20__], I conducted the annual department records review as required by Windstream's Records Management Policy. I confirm that our department employees have:

1. reviewed the Records Management Policy;
2. reviewed all of their records, both paper and electronic;
3. maintained records in accordance with the Records Management Policy;
4. disposed of records that no longer must be retained; and
5. disposed of information that does not constitute a record and has no significance to Windstream's business operations.

Our department employees have included in their records review all email personal archive folders, records or information on department drives, internal software programs and websites.

The following types of records were properly and securely disposed of:

The following records should be added to the Records Management Schedule for our department. Proposed retention periods are also provided:

Departmental Records Coordinator

Exhibit B -- Sample Litigation Hold Memorandum

This Memorandum may be updated as necessary or on a case-by-case basis, but this Exhibit may not be updated.

Litigation Hold Notice Attorney/Client Notice Regarding Lawsuit against Windstream

Date
 To:
 From: ATTORNEY
 Subject: Preservation of Documents

Windstream is involved in the following legal proceeding: [Case name, number, jurisdiction] concerning [BRIEF recitation of underlying facts] (the Litigation)

Windstream is taking steps to identify all paper documents, physical items and electronic documents and data that may be relevant to the Litigation. As part of the process, you must preserve and safeguard, and must not alter, delete destroy or discard, any paper documents, physical items or electronic documents and data you have related to the Litigation. Such information includes but is not limited to the following:

Paper Documents	Contracts	Social Media
Emails	Invoices	Work Media (i.e. Stream, Wintranet, Wiki's)
Spreadsheets	Backup Tapes	Metadata
Photographs	Computer Hard Drives	Recordings
ALL Electronic Data	Voicemails	Databases
Text Messages	Internal Instant Messages	External Instant Messages

If you are unsure about whether certain documents or data are relevant to the Litigation, YOU MUST PRESERVE THEM. Your duty to preserve all relevant information is ongoing and will not end until a Windstream Legal Representative notifies you of such.

You must take affirmative steps to preserve, and suspend any deletion, overwriting, modification or other destruction of, all relevant electronic documents and data under your control. You must preserve this information in its current form—as it is stored on Windstream’s systems or other devices without modification of format or alteration of content.

Do not use Windstream resources (email, IM, Stream or other) to engage in speculation or communications about this lawsuit. If, for any reason, you need to discuss or write something about this lawsuit, please contact me. If you communicate something about the lawsuit to Legal staff, please label any written communication: “Privileged and Confidential Attorney/Client

Communication”. Activities done at the request of a member of the Windstream Legal Department, such as searching for documents or developing written materials, should also be labeled.

The contents of this memorandum are protected by attorney client privilege and constitute attorney work product; the information is to remain confidential and not to be disclosed to anyone outside the company. Failure to take proper steps to preserve information will result in disciplinary action.

If you have questions, please call me at _____.

VERIFICATION

I, _____, affirm I have received a copy of this Notice and I understand that I have an affirmative responsibility to obey the directions it sets out.

Signature

Printed Name

Date

_____ I do have documents.

_____ I do not have any documents pertaining to this matter.

Schedule Updated: December 30, 2014

Exhibit C

Records Management Schedule

Retention periods are determined based on the following definitions. Examples are: 1) a retention period of “UL+1Y” means the record should be retained for its useful life plus one more year; 2) a retention period of “CY+4Y” means the year the record was created/received plus four more years; 3) a retention period of “3Y” means the record should be retained for three years from the date the record was created/received; and 4) a retention period of CT+5Y means the record should be retained for the entire contract term (regardless of length) plus five more years. All periods are in years unless otherwise indicated.

- UL** Useful life of the record
- CY** Year the record was created
- CT** Contract term
- Y** Years
- +** Plus
- PERM** Permanent

Submit in Duplicate

Name of Firm Applying: CMN-RUS, INC Contact Name, Phone # lauren sandefur 812.213.1328
 EMAIL ADDRESS lauren.sandefur@metronetinc.com
 Street Address, City, ST, ZIP of Firm Applying 3701 Communications Way, Evansville, IN 47715 Authorized Signature & Date: LaSandefur 7.16.18

By this application & signature, my firm is agreeing to pay all engineering fees associated with this application if my firm chooses NOT to proceed with the project.
 If we choose to proceed all ESTIMATED fees, including engineering & makeready MUST BE PAID IN FULL UP FRONT.
NON PAYMENT OF FEES WILL RESULT IN ALL FUTURE APPLICATIONS BEING PLACED ON HOLD
NOTE: Final costs will be determined by actual time & material required to do the make-ready work. Any difference in charges will be billed accordingly.

Windstream OSP Construction Manager/Engineer Authorized Signature & Date: _____

1. ALL UNDERGROUND WILL BE STANDARD (2) 1-1/4" I.D. SDR-13.5 ROLLED DUCT UNLESS OTHERWISE SPECIFIED WITHIN DESIGN DRAWINGS OR APPROVED BY METRONET (MNT) CONSTRUCTION MANAGER. IF THERE IS NO DUCT / CONDUIT SYMBOL ALONG TRENCH LINE IN DESIGN, THE TRENCH FOOTAGE IS ONLY FOR REFERENCE FOR FUTURE GROWTH AND SHOULD NOT BE BUILT UNTIL A REVISION IS RELEASED.
2. ALL AERIAL STRAND WILL BE SHOWN IN DESIGN AS IN THE LEGEND (SOLID LINE WITH FOOTAGE). NON STRAND, OR BETWEEN DROP POLES WILL BE SHOWN IN DESIGN AS A SOLID LINE ONLY, WITHOUT FOOTAGE, AND SHALL NOT BE STRANDED UNLESS NOTED ON DRAWING FOR ANCHOR PLACEMENT.
3. THE CONTRACTOR SHALL BE RESPONSIBLE FOR LOCATING ALL UTILITIES 72-HOURS PRIOR TO CONSTRUCTION. IN CASES OF WILLFUL OR CARELESS DESTRUCTION, THE CONTRACTOR SHALL BE RESPONSIBLE FOR RESTORATION WITH FINAL APPROVAL FROM METRONET CONSTRUCTION MANAGER.
4. THE CONTRACTOR SHALL BE RESPONSIBLE FOR LOCATING ALL RAILROAD COMMUNICATION AND SIGNAL CABLES A MINIMUM OF 48-HOURS PRIOR TO CONSTRUCTION.
5. ALL HANDHOLES SHALL BE BURIED WITH THE COVER FLUSH TO THE GROUND ELEVATION.
6. SHORING MAY BE REQUIRED AND SHALL COMPLY WITH O.S.H.A. STANDARDS.
7. THE CONTRACTOR SHALL IMMEDIATELY NOTIFY THE METRONET CONSTRUCTION MANAGER OF ANY ACCIDENTS. THE CONTRACTOR SHALL BE SOLELY RESPONSIBLE FOR COMPLYING WITH ALL FEDERAL, STATE AND LOCAL SAFETY REQUIREMENTS INCLUDING THE OCCUPATIONAL SAFETY AND HEALTH ACT OF 1970. THE CONTRACTOR SHALL ALWAYS EXERCISE CAUTION FOR THE PROTECTION OF PERSONS (INCLUDING EMPLOYEES) AND PROPERTY. IT SHALL BE THE SOLE RESPONSIBILITY OF THE CONTRACTOR TO INITIATE, MAINTAIN AND SUPERVISE ALL SAFETY REQUIREMENTS, PRECAUTIONS AND PROGRAMS IN CONNECTION WITH THE WORK, INCLUDING THE REQUIREMENTS FOR CONFINED SPACES.
8. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ALL PROPERTY DAMAGE OR DISTURBED AREAS, BOTH RESIDENTIAL AND/OR COMMERCIAL DURING CONSTRUCTION. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ALL RESTORATIONS TO EQUAL OR BETTER CONDITION THAN EXISTED BEFORE CONSTRUCTION. ADDITIONALLY, NON-RUBBER TIERED VEHICLES SHALL NOT BE MOVED ON OR ACROSS PUBLIC STREETS OR HIGHWAYS WITHOUT WRITTEN PERMISSION OF METRONET.
9. THE CONTRACTOR WILL BE RESPONSIBLE FOR DAILY WORK SITE CLEANUP. TRACKING OR SPILLING MUD, DIRT OR DEBRIS UPON STREETS, RESIDENTIAL OR COMMERCIAL DRIVES, SIDEWALKS OR BIKE PATHS IS PROHIBITED. ANY SUCH OCCURRENCE SHALL BE CLEANED UP IMMEDIATELY BY THE CONTRACTOR AT NO COST TO METRONET. IF THE CONTRACTOR FAILS TO REMOVE SUCH MUD, DIRT, DEBRIS, OR SPILLAGE, METRONET RESERVES THE RIGHT TO REMOVE THESE MATERIALS AND CLEAN AFFECTED AREAS, THE COST OF WHICH SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR.
10. CONTRACTOR SHALL FOLLOW ALL D.O.T. SAFETY REQUIREMENTS. IN ADDITION, THE FOLLOWING SUPPLEMENTAL REFERENCED SPECIFICATIONS SHALL BE OBSERVED:
 - 10.1 Occupational Safety and Health Code (OSHA) - (latest edition).
 - 10.2 Applicable power and telephone pole attachment agreements.
 - 10.3 Applicable city, county and state ordinances.
 - 10.4 National Electric Safety Code (latest edition).
 - 10.5 National Electric Code (latest edition).
 - 10.6 Applicable government agencies for safety and health for the work force.
 - 10.7 Manufacturers specifications.
11. THE CONTRACTOR SHALL TRIM ONLY THE LIMBS THAT INHIBIT FIBER OPTIC CABLE PLACEMENT AND IN ACCORDANCE WITH LOCAL GOVERNING AGENCY. ALL SIGNS, LANDSCAPING, STRUCTURES OR OTHER APPURTENANCES WITHIN THE RIGHT-OF-WAY WHICH IS DISTURBED OR DAMAGED DURING CONSTRUCTION SHALL BE REPLACED OR REPAIRED TO THE SATISFACTION OF METRONET. THE COST OF THIS WORK SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR.
12. THE CONTRACTOR SHALL PLACE BARRICADES AROUND OPEN TRENCHES AND EQUIPMENT.
13. NO ADDITIONAL CABLE CUTS WILL BE ADDED WITHOUT PRIOR APPROVAL OF THE METRONET CONSTRUCTION MANAGER. SHOULD THE FIBER WORK NEED TO BE CONTINUED TO THE NEXT DAY AND THE FIBER LEFT OVERNIGHT, THE SECURITY OF THE FIBER SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR.
14. ALL WORK TO BE PERFORMED IN STRICT ACCORDANCE WITH ALL REQUIREMENTS OF ANY REGULATING GOVERNMENT AGENCY OR THE RIGHT OF WAY GRANTOR. MUNICIPAL, COUNTY, STATE OR FEDERAL REGULATIONS MAY ALTER CONSTRUCTION SPECIFICATIONS IN SOME AREAS. IF CONSTRUCTION SPECIFICATIONS ARE ALTERED FROM THESE STANDARDS, CONTRACTOR MUST REQUEST IN WRITING AND ALTERATIONS SHALL BE APPROVED BY METRONET IN ADVANCE.
15. THE OWNER RESERVES THE RIGHT TO CHANGE OR REVISE THE CONSTRUCTION SPECIFICATIONS TO ADAPT TO LOCAL CONDITIONS OR DATA NECESSARY TO SECURE COMPLETION OF THE WORK. IN SUCH CASE, THE CONTRACTOR SHALL BE NOTIFIED IN WRITING.
16. IN CASE OF DISCREPANCY OR OMISSIONS, METRONET SHALL BE CONSULTED FOR ADJUSTMENTS OF ANY COMPLICATIONS RESULTING FROM THE DISCREPANCY OR OMISSION.
17. THE CONTRACTOR'S WORK SHALL INCLUDE BUT IS NOT LIMITED TO, UNLOADING, HAULING, STORING, AND PROTECTING ALL METRONET FURNISHED MATERIAL FROM THE DELIVERY POINT THROUGH FINAL ACCEPTANCE OF THE WORK.
18. THE CONTRACTOR SHALL PROVIDE, CONSTRUCT AND MAINTAIN ALL ACCESS ROADS, ACCESS ROAD IMPROVEMENTS, FENCES AND GATES REQUIRED BY THE CONTRACTOR IN THE EXECUTION OF THE WORK.
19. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ALL LOADING AND UNLOADING REQUIRED TO RETURN ANY MATERIALS TO METRONET. METRONET SHALL ISSUE SPECIFIC INSTRUCTIONS FOR THE RETURN OF THE MATERIAL BY THE CONTRACTOR.
20. THE CONTRACTOR SHALL BE RESPONSIBLE FOR HAVING A SUPERVISOR ON-SITE AT ALL TIMES. METRONET RESERVES THE RIGHT TO INSPECT THE WORK FOR COMPLIANCE AND DEFECTS.

Subject: RE: LCP-LX173-01W Pole Application

Lauren,

Windstream is in receipt of your request. The request has been assigned the number JUPR6219 and submitted to the Windstream Engineer, Ashley Sanders as of 8/9/18 to be processed. Let me know if you have any questions or concerns.

Thank you

Felicia(Nicole)Hodges

Subject: LCP-LX173-01W Pole Application

Good Afternoon,
Please see attached for proposal titled LX173-01w. This is a proposal for Windstream poles.
Let me know if you have any questions or need anything else.
Thank you

Lauren Sandefur

Subject: Exhibit B - MetroNet JU1639 LX13503W

Windstream JointUse & Windstream Poles,

See attached for Exhibit B for:
JU #: 1639
MetroNet package: LX13503W
JobTrac #: 21900069181050
Cost for MRC to bill MetroNet: \$3636.11

Let me know if you have questions and please advise when payment has been received so my engineer can distribute the jobtrac. I tried to fill out column 11 more specific and also I have some notes on how many poles we are doing make ready on since they have asked about getting more info. i.e., for this one of the 25 poles there is make ready needed on 11 poles and we have 23 strand attachments and 40 drops to lower. I will not summarize everyone moving forward b/c that info is on the exhibit B.

Thanks,

Ashley L. Sanders

By this application & signature, my firm is agreeing to pay all engineering fees associated with this application if my firm chooses NOT to proceed with the project.

If we choose to proceed all ESTIMATED fees, including engineering & makeready MUST BE PAID IN FULL UP FRONT.

NON PAYMENT OF FEES WILL RESULT IN ALL FUTURE APPLICATIONS BEING PLACED ON HOLD

NOTE: Final costs will be determined by actual time & material required to do the make-ready work. Any difference in charges will be billed accordingly.

FOR MAKE READY

Name of Firm Applying: CMN-RUS, INC Contact Name, Phone #: Lauren Sandefur 812.213.1328
EMAIL ADDRESS: lauren.sandefur@metronetinc.com

Street Address, City, ST, ZIP of Firm Applying: 3701 Communications Way, Evansville, IN 47715 Authorized Signature & Date: Lauren Sandefur 6.7.18

By this application & signature, my firm is agreeing to pay all engineering fees associated with this application if my firm chooses NOT to proceed with the project.
If we choose to proceed all ESTIMATED fees, including engineering & makeready MUST BE PAID IN FULL UP FRONT.
NON PAYMENT OF FEES WILL RESULT IN ALL FUTURE APPLICATIONS BEING PLACED ON HOLD
NOTE: Final costs will be determined by actual time & material required to do the make-ready work. Any difference in charges will be billed accordingly.

Subject: FW: LX049-03W - rejecting for maps

Felicia, rejected this package back- there is no map (they have been naming it the "pole app map") to show the cable route like all of the other packages have had. Need that before I can assign this out to begin field work. Please re-send entire package when that has been provided. Thanks in advance!

Thanks,

NOTE TO ALL FIRMS: IF YOU CHOOSE NOT TO PROCEED WITH THE APPLICATION - YOU WILL BE BILLED FOR WINDSTREAM'S ENGINEERING TIME. THERE ARE NO EXCEPTIONS TO THIS POLICY!!!!

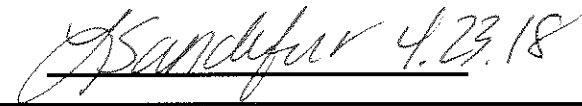

**EXHIBIT B
Windstream CORPORATION
APPLICATION FOR POLE LICENSE**

PROPOSAL #: LX049-03W

Submit in Duplicate

Name of Firm Applying: CMN-RUS, INC Contact Name, Phone #: Lauren Sandefur 812.213.1328
 EMAIL ADDRESS: lauren.sandefur@metronetinc.com

Street Address, City, ST, ZIP of Firm Applying: 3701 Communications Way, Evansville, IN 47715 Authorized Signature & Date: _____

By this application & signature, my firm is agreeing to pay all engineering fees associated with this application if my firm chooses NOT to proceed with the project.
 If we choose to proceed all **ESTIMATED** fees, including engineering & makeready **MUST BE PAID IN FULL UP FRONT.**
NON PAYMENT OF FEES WILL RESULT IN ALL FUTURE APPLICATIONS BEING PLACED ON HOLD
NOTE: Final costs will be determined by actual time & material required to do the make-ready work. Any difference in charges will be billed accordingly.

WIN3450

1. ALL UNDERGROUND WILL BE STANDARD (2) 1-1/4" I.D. SDR-13.5 ROLLED DUCT UNLESS OTHERWISE SPECIFIED WITHIN DESIGN DRAWINGS OR APPROVED BY METRONET (MNT) CONSTRUCTION MANAGER. IF THERE IS NO DUCT / CONDUIT SYMBOL ALONG TRENCH LINE IN DESIGN, THE TRENCH FOOTAGE IS ONLY FOR REFERENCE FOR FUTURE GROWTH AND SHOULD NOT BE BUILT UNTIL A REVISION IS RELEASED.
2. ALL AERIAL STRAND WILL BE SHOWN IN DESIGN AS IN THE LEGEND (SOLID LINE WITH FOOTAGE). NON STRAND, OR BETWEEN DROP POLES WILL BE SHOWN IN DESIGN AS A SOLID LINE ONLY, WITHOUT FOOTAGE, AND SHALL NOT BE STRANDED UNLESS NOTED ON DRAWING FOR ANCHOR PLACEMENT.
3. THE CONTRACTOR SHALL BE RESPONSIBLE FOR LOCATING ALL UTILITIES 72-HOURS PRIOR TO CONSTRUCTION. IN CASES OF WILLFUL OR CARELESS DESTRUCTION, THE CONTRACTOR SHALL BE RESPONSIBLE FOR RESTORATION WITH FINAL APPROVAL FROM METRONET CONSTRUCTION MANAGER.
4. THE CONTRACTOR SHALL BE RESPONSIBLE FOR LOCATING ALL RAILROAD COMMUNICATION AND SIGNAL CABLES A MINIMUM OF 48-HOURS PRIOR TO CONSTRUCTION.
5. ALL HANDHOLES SHALL BE BURIED WITH THE COVER FLUSH TO THE GROUND ELEVATION.
6. SHORING MAY BE REQUIRED AND SHALL COMPLY WITH O.S.H.A. STANDARDS.
7. THE CONTRACTOR SHALL IMMEDIATELY NOTIFY THE METRONET CONSTRUCTION MANAGER OF ANY ACCIDENTS. THE CONTRACTOR SHALL BE SOLELY RESPONSIBLE FOR COMPLYING WITH ALL FEDERAL, STATE AND LOCAL SAFETY REQUIREMENTS INCLUDING THE OCCUPATIONAL SAFETY AND HEALTH ACT OF 1970. THE CONTRACTOR SHALL ALWAYS EXERCISE CAUTION FOR THE PROTECTION OF PERSONS (INCLUDING EMPLOYEES) AND PROPERTY. IT SHALL BE THE SOLE RESPONSIBILITY OF THE CONTRACTOR TO INITIATE, MAINTAIN AND SUPERVISE ALL SAFETY REQUIREMENTS, PRECAUTIONS AND PROGRAMS IN CONNECTION WITH THE WORK, INCLUDING THE REQUIREMENTS FOR CONFINED SPACES.
8. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ALL PROPERTY DAMAGE OR DISTURBED AREAS, BOTH RESIDENTIAL AND/OR COMMERCIAL DURING CONSTRUCTION. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ALL RESTORATIONS TO EQUAL OR BETTER CONDITION THAN EXISTED BEFORE CONSTRUCTION. ADDITIONALLY, NON-RUBBER TIERED VEHICLES SHALL NOT BE MOVED ON OR ACROSS PUBLIC STREETS OR HIGHWAYS WITHOUT WRITTEN PERMISSION OF METRONET.
9. THE CONTRACTOR WILL BE RESPONSIBLE FOR DAILY WORK SITE CLEANUP. TRACKING OR SPILLING MUD, DIRT OR DEBRIS UPON STREETS, RESIDENTIAL OR COMMERCIAL DRIVES, SIDEWALKS OR BIKE PATHS IS PROHIBITED. ANY SUCH OCCURRENCE SHALL BE CLEANED UP IMMEDIATELY BY THE CONTRACTOR AT NO COST TO METRONET. IF THE CONTRACTOR FAILS TO REMOVE SUCH MUD, DIRT, DEBRIS, OR SPILLAGE, METRONET RESERVES THE RIGHT TO REMOVE THESE MATERIALS AND CLEAN AFFECTED AREAS, THE COST OF WHICH SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR.
10. CONTRACTOR SHALL FOLLOW ALL D.O.T. SAFETY REQUIREMENTS. IN ADDITION, THE FOLLOWING SUPPLEMENTAL REFERENCED SPECIFICATIONS SHALL BE OBSERVED:
 - 10.1 Occupational Safety and Health Code (OSHA) - (latest edition).
 - 10.2 Applicable power and telephone pole attachment agreements.
 - 10.3 Applicable city, county and state ordinances.
 - 10.4 National Electric Safety Code (latest edition).
 - 10.5 National Electric Code (latest edition).
 - 10.6 Applicable government agencies for safety and health for the work force.
 - 10.7 Manufacturers specifications.
11. THE CONTRACTOR SHALL TRIM ONLY THE LIMBS THAT INHIBIT FIBER OPTIC CABLE PLACEMENT AND IN ACCORDANCE WITH LOCAL GOVERNING AGENCY. ALL SIGNS, LANDSCAPING, STRUCTURES OR OTHER APPURTENANCES WITHIN THE RIGHT-OF-WAY WHICH IS DISTURBED OR DAMAGED DURING CONSTRUCTION SHALL BE REPLACED OR REPAIRED TO THE SATISFACTION OF METRONET. THE COST OF THIS WORK SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR.
12. THE CONTRACTOR SHALL PLACE BARRICADES AROUND OPEN TRENCHES AND EQUIPMENT.
13. NO ADDITIONAL CABLE CUTS WILL BE ADDED WITHOUT PRIOR APPROVAL OF THE METRONET CONSTRUCTION MANAGER. SHOULD THE FIBER WORK NEED TO BE CONTINUED TO THE NEXT DAY AND THE FIBER LEFT OVERNIGHT, THE SECURITY OF THE FIBER SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR.
14. ALL WORK TO BE PERFORMED IN STRICT ACCORDANCE WITH ALL REQUIREMENTS OF ANY REGULATING GOVERNMENT AGENCY OR THE RIGHT OF WAY GRANTOR. MUNICIPAL, COUNTY, STATE OR FEDERAL REGULATIONS MAY ALTER CONSTRUCTION SPECIFICATIONS IN SOME AREAS. IF CONSTRUCTION SPECIFICATIONS ARE ALTERED FROM THESE STANDARDS, CONTRACTOR MUST REQUEST IN WRITING AND ALTERATIONS SHALL BE APPROVED BY METRONET IN ADVANCE.
15. THE OWNER RESERVES THE RIGHT TO CHANGE OR REVISE THE CONSTRUCTION SPECIFICATIONS TO ADAPT TO LOCAL CONDITIONS OR DATA NECESSARY TO SECURE COMPLETION OF THE WORK. IN SUCH CASE, THE CONTRACTOR SHALL BE NOTIFIED IN WRITING.
16. IN CASE OF DISCREPANCY OR OMISSIONS, METRONET SHALL BE CONSULTED FOR ADJUSTMENTS OF ANY COMPLICATIONS RESULTING FROM THE DISCREPANCY OR OMISSION.
17. THE CONTRACTOR'S WORK SHALL INCLUDE BUT IS NOT LIMITED TO, UNLOADING, HAULING, STORING, AND PROTECTING ALL METRONET FURNISHED MATERIAL FROM THE DELIVERY POINT THROUGH FINAL ACCEPTANCE OF THE WORK.
18. THE CONTRACTOR SHALL PROVIDE, CONSTRUCT AND MAINTAIN ALL ACCESS ROADS, ACCESS ROAD IMPROVEMENTS, FENCES AND GATES REQUIRED BY THE CONTRACTOR IN THE EXECUTION OF THE WORK.
19. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ALL LOADING AND UNLOADING REQUIRED TO RETURN ANY MATERIALS TO METRONET. METRONET SHALL ISSUE SPECIFIC INSTRUCTIONS FOR THE RETURN OF THE MATERIAL BY THE CONTRACTOR.
20. THE CONTRACTOR SHALL BE RESPONSIBLE FOR HAVING A SUPERVISOR ON-SITE AT ALL TIMES. METRONET RESERVES THE RIGHT TO INSPECT THE WORK FOR COMPLIANCE AND DEFECTS.

Lauren,

Good afternoon, hope you enjoyed your 4th of July. I'm sending this email to let you know that as of today 12 applications has been sent to the engineer for a total of 254 poles. You have 46 poles left for the month of July to submit. Let me know if you have any more question or concerns.

Thank you,

Felicia(Nicole)Hodges

Windstream JointUse & Windstream Poles,

See attached for Exhibit B for:
JU #: 1640
MetroNet package: LX13504W
JobTrac #: 72198972100024
Cost for MRC to bill MetroNet: \$3643.71

Let me know if you have questions and please advise when payment has been received so my engineer can distribute the jobtrac.

Thanks,

Ashley L. Sanders

Subject: Application Carmel 67 Duke / MetroNet Construction Req.

Lauren,

Duke make ready construction has been transmitted as complete. This application now requires confirmation once MetroNet's construction is complete. We need the following information:

Proposal Revision Required: No revision required/ Revision required

MetroNet Construction Date:

Additional, we need to confirm that construction has been completed and attachments made to only the approved poles below:

088-983-CML

060-302-CML

185-834-CML

060-301-CML

057-273-CML

300-680-CML

300-679-CML

Once MetroNet construction has been completed, please advise so we may transmit to Duke.

Thank you,

Subject: FW: LX049-03W - rejecting for maps

Felicia, rejected this package back- there is no map (they have been naming it the "pole app map") to show the cable route like all of the other packages have had. Need that before I can assign this out to begin field work. Please re-send entire package when that has been provided. Thanks in advance!

Thanks,

Lauren,

I have not able to get an answer about the turnaround time yet. I just wanted to keep you in the loop. I thought Ashley was just out of the office but she is at a conference until tomorrow. So I should be able to get you an answer by Friday. Also see below I do not remember getting the one highlighted in yellow will you please send that to me immediately so I can get it sent over.

Thank you,

Lauren,

I'm going to resubmit this one again the engineer that is handling all of these is out of the office in a conference. However I don't see it in my list of application that I have submitted to her so far. So I'm going to submit again. No was there only 2 application that were submitted back then I have LX132-01W and this one that you just sent. All others I have replied back to you with a JUPR #.

I'm going to list what I have so far you let me know if I'm correct if I'm missing any just send to my personal email and I will get them out . This list is going to be anything that you have submitted up and until Monday 3/19/18. I'm just now working on the Monday submissions that you have sent over so I have those.

I really don't know what the turn around time is for these application. Ashley the lady that we are sending them to is the supervisor and she is giving these jobs out to the engineers under her. She wanted them all to come to her so that she could keep up with everything that was going on. This is what I will do let me talk to Ashley tomorrow I should be able to call her and see if she has a turnaround plan and we can go from there.

Thank you,

Lauren,

I'm going to resubmit this one again the engineer that is handling all of these is out of the office in a conference. However I don't see it in my list of application that I have submitted to her so far. So I'm going to submit again. No was there only 2 application that were submitted back then I have LX132-01W and this one that you just sent. All others I have replied back to you with a JUPR #.

I'm going to list what I have so far you let me know if I'm correct if I'm missing any just send to my personal email and I will get them out . This list is going to be anything that you have submitted up and until Monday 3/19/18. I'm just now working on the Monday submissions that you have sent over so I have those.

Good Afternoon Nicole,
Is this the last of our rejected applications?
If you can provide a list of the ones you guys are keeping that would be great.
Thank you,

Lauren Sandefur
Permit Specialist

Lauren,

The FCC regulation states that we have 45 days to review once those days are up then I will be able to provide updates to these applications. The only application that was sent back with the one in yellow. At this time we have a total of 372 under review now. Let me know if you have further questions or concerns.

Thank you,

Good Morning Nicole,

A few weeks ago you provided me a spreadsheet with our submitted applications showing the time line on when we can submit. I have several applications that I am ready to send over I just didn't want those to get rejected because we have gone over the 300 pole limit. I think we're in good standings with that date but I just want to double check.

Can you send me an updated spreadsheet with this information?

Thank you!

Subject: Conference Calls

Mike –

It was good to hear from you today. Our team is good Friday on to have a call about the collocation invoices. Let me know what time will work best for the Windstream team. Also, I talked to Dan King today. We're going to try to meet early next week to discuss the Duke make ready invoice. Thanks for your help.

Hello John,

Always good catching up with you.

Dan King will be off tomorrow it appears as will Joe McClure. As long as Shelley Starks and Nicole Winters can cover for both of them tomorrow should work. If not, we may need to postpone this one to early next week as well.

If it works for you it appears our side can all be there at 2:30 Central.

Let me know the thoughts.

Thanks, Mike

Anita:

I wanted to follow up with you on this one again. We understand and appreciate MetroNet's desire to let sleeping dogs lie with Duke, but that approach causes financial issues for Windstream because we are the entity forced to carry an aging amount in our Accounts Payable and Accounts Receivable. If MetroNet doesn't object, and Duke would be willing to withdraw the Windstream invoice and issue it directly to MetroNet, we wouldn't have a concern with MetroNet's approach. However, I am not sure that Duke is going to be willing to invoice MetroNet directly since their Agreement is with Windstream.

Please let me know at your earliest convenience whether MetroNet is willing to allow Windstream to pursue having Duke withdraw the Windstream invoice and issue it directly to MetroNet.

Anita:

I wanted to follow up with you on this one again. We understand and appreciate MetroNet's desire to let sleeping dogs lie with Duke, but that approach causes financial issues for Windstream because we are the entity forced to carry an aging amount in our Accounts Payable and Accounts Receivable. If MetroNet doesn't object, and Duke would be willing to withdraw the Windstream invoice and issue it directly to MetroNet, we wouldn't have a concern with MetroNet's approach. However, I am not sure that Duke is going to be willing to invoice MetroNet directly since their Agreement is with Windstream.

Please let me know at your earliest convenience whether MetroNet is willing to allow Windstream to pursue having Duke withdraw the Windstream invoice and issue it directly to MetroNet.

To: John Campbell <John.Campbell@metronetinc.com>; Anita Larson <Anita.Larson@metronetinc.com>
Subject: Metronet Update

John:

I spoke with Joyce Latham this morning about this week's call / meeting on Thursday. Joyce said that if we schedule a call / meeting of the decision makers from MetroNet and Windstream for sometime in August, that will give her time to prepare and confirm settlement parameters that she could work within. This will also give us time to determine if there are any other decision makers within Windstream that need to be included in the call / meeting. Joyce would not be available August 8 – 10 or August 21 – 23, but otherwise her August is open.

It is my understanding that even if we don't have the decision makers taking part in Thursday's meeting, we (MetroNet and Windstream) still plan to use the time we have set aside on Thursday morning to work on making whatever additional progress we can in getting the Duke Energy invoice and the nGenX colocation issues worked out. Also, we can still talk through the various MetroNet / Windstream agreements and see if there is anything else the parties can do to position ourselves to reach final agreement on a go forward plan in August for these agreements. Let me know if your understanding is different.

Thanks.

Subject: RE: Metronet Update

Kevin,

I've seen the email but have not got to get updates as of yet. We cannot commit to a weekly update on this as it pulls the engineers off their jobs to give updates and this take a lot of time to get on a weekly basis. This continues to delay jobs even further. Due to the amount of companies we are dealing with we have stressed this to all of the companies that are asking for updates. Please keep this in mind for future updates. Also with the proposals in question we really need Metronet to be talking to Windstream. I have both companies asking me for updates instead of talking to each other which they are supposed to be doing. Again I'll get these updates, but moving forward Metronet will have to get these from Windstream to alleviate the duplicate work Duke is doing.

If you have any other questions please let me know.

Thank you,
Jeremy

To: jeremy.gibson@duke-energy.com
Subject: FW: Metronet Update

Jeremy,

Attached is the latest which is for the most part the same as what I sent to you last week. Can you provide me with the updates that you sent to Windstream? This will allow me to ask them questions on why we have not received them yet.

Below is a snap shot of the data in the spread sheet and the average number of months we are currently at with each. Can you provide a status as to when there will be another contractor in place to help with the back log?

Total Poles Applications	78			
	Quantity	Average Days-Current	Average Months-Current	Notes
Make Ready Complete	10	201.00	6.70	
Waiting on Make Ready	5	220	7.33	
Invoices Paid	4	230	7.67	
Invoice Rec'd	1	269	8.97	
Waiting on Invoice	24	212	7.07	numbe
Make Ready Quote Rec'd	7	177	5.90	
Waiting on Make Ready Estimate	31	174	5.80	Over ha

One last item I think I asked about this a few weeks ago but if we could get the two applications below back as soon as possible this will allow us to turn up several thousand passes.

456	3 - Submitted	GN East Feeder 2	40	113485-2016	1603KDL0039DEI	2/10/2016	4/5/2016	\$3,133.75	9/1/2016	\$
457	3 - Submitted	GN East Feeder 3	37	113492-2016	1604KDL0089DEI	2/10/2016	4/5/2016		6/30/2016	\$21,35

As always Jeremy I appreciate your help.

Jeremy,

Please find attached the current spread sheet for all of our pole applications. I have also provided a summary below which provides the average length of time based on the current state an application is in. A high priority area for me is Greenwood East Feeder 2 and 3. I have a number passes and then customers that can be activated once these are complete. These are 2 of the 24 that we are waiting on an invoice.

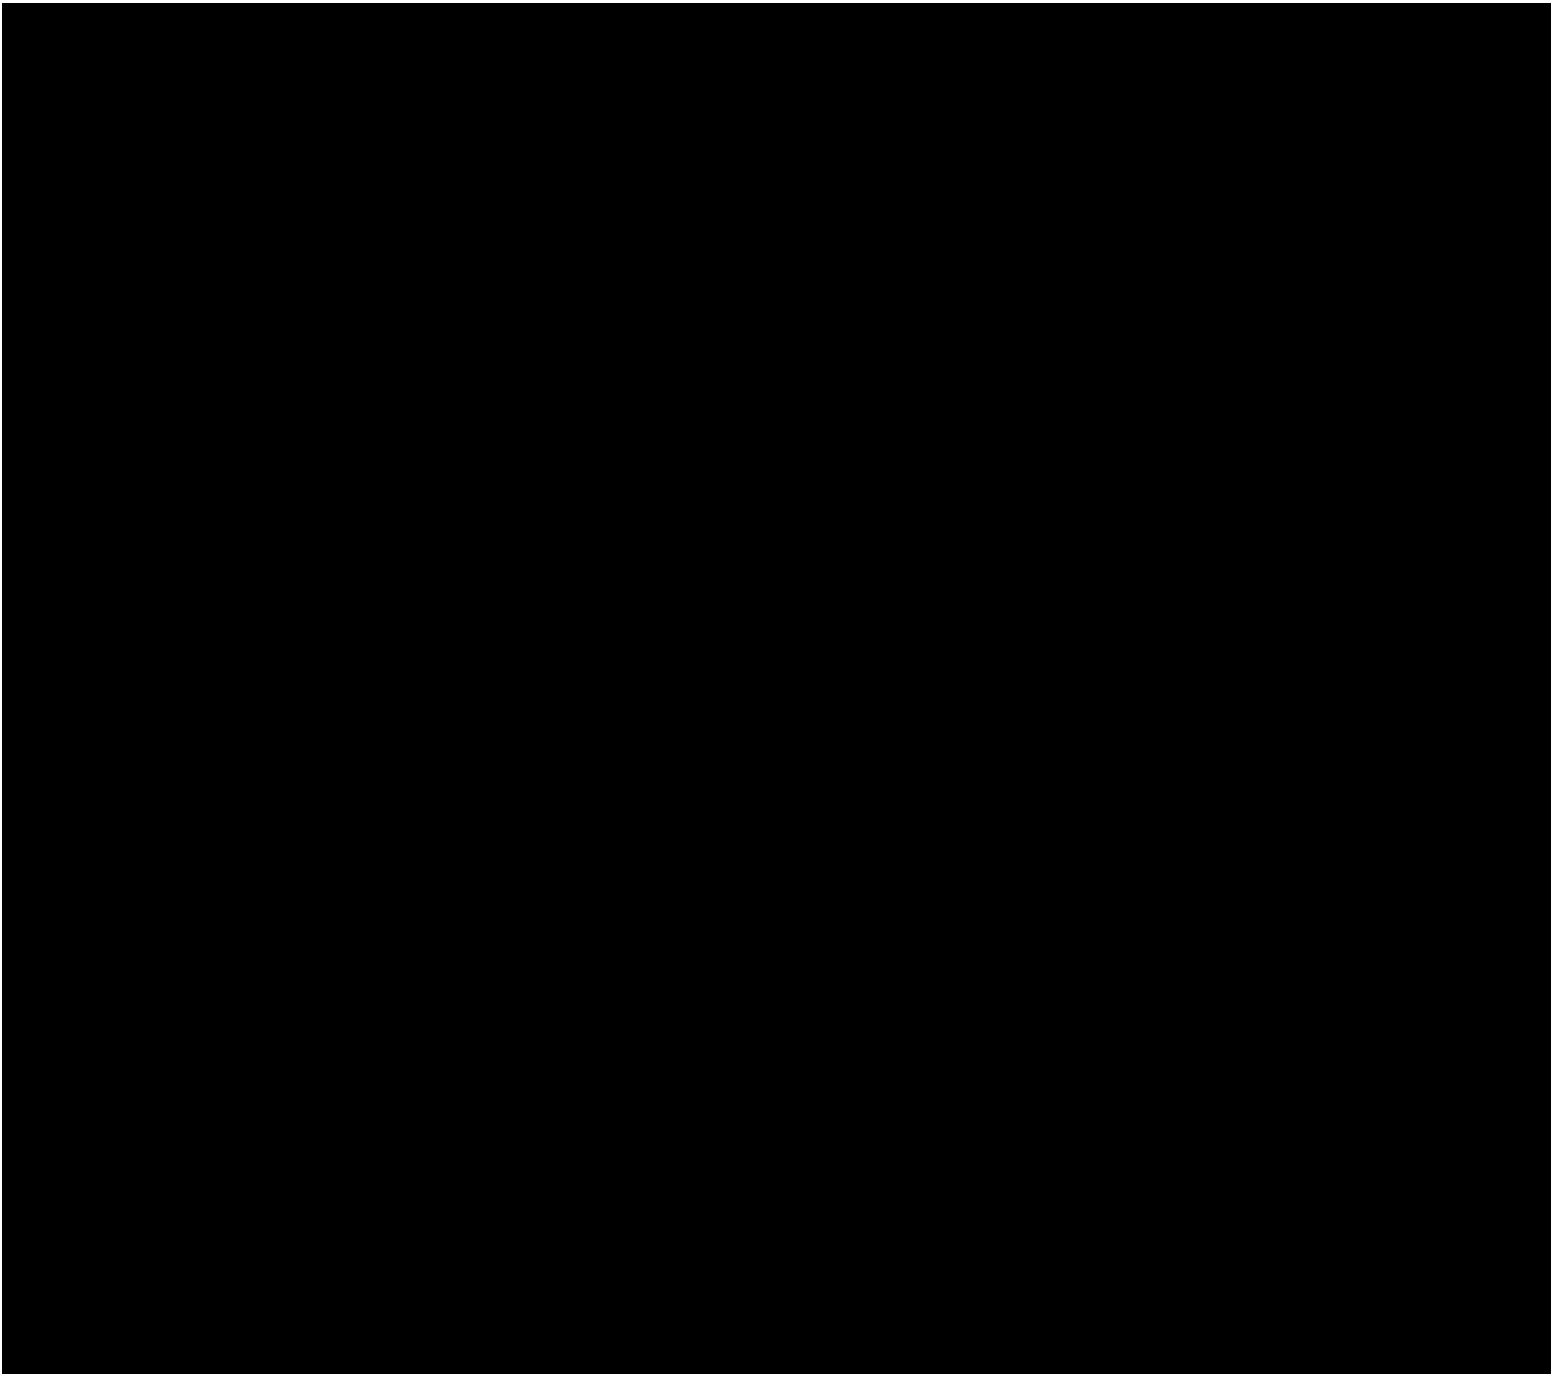

When we met a few weeks back in Cincinnati it sounded like you guys were looking to add another contractor to help with all of the back log. Is that still moving forward? I appreciate your help with these Jeremy and would be happy to jump on a call to talk through any of these.

Thanks

Total Poles Applications	78

Good morning, Anita-
Lexington is in the Windstream Kentucky East territory. I also prepared a Windstream Kentucky West agreement in case you wanted all of Kentucky covered. Also attached is our application in excel format for easier use. Please contact me after your review. I look forward to working with you as well.

Anita:

Good to hear from you. The person that you want to speak with is Michelle Mclaughlin. I have copied her on this response. She negotiates and manages our pole agreements and can provide you with our template for Kentucky.

I assume that you are asking so that MetroNet can begin the process of negotiating a pole attachment agreement with us in connection with its expansion into Lexington. Congratulations on the announcement.

Hope you have a great Thanksgiving!

S1. CATV POLE ATTACHMENT AND CABLE DUCT ARRANGEMENT

S1.1 Application of Tariff

This tariff contains regulations and charges applicable to the provision of attachment space for cable television facilities on poles of the Telephone Company, and the provision of cable duct space for such facilities in underground conduits of the Company.

The terms and conditions contained herein apply where the CATV operator, as a customer of the Company, proposes to install coaxial or other types of television distribution cables, amplifiers and drop wires, wires and appliances together with associated cable messengers, anchors and other appurtenances (hereinafter sometimes collectively called the "equipment") and desires to attach such equipment to poles of the Company, and/or install such equipment in cable ducts of the Company.

S1.2 Definitions

Poles - All references to "poles" of the Company shall mean poles which are either solely owned by the Company, are jointly owned by the Company and another, or are owned by another who has granted the Company exclusive use and control of space upon its poles.

Pole Attachment - This term means any attachment by a CATV firm to a pole owned or controlled by the Company.

Cable Duct Space - This term shall mean individual cable ducts within a multiple-duct conduit system owned by the Company.

Equipment - The "equipment" referred to herein consist of coaxial or other types of television cables, amplifiers and drop wires, wires and appliances together with associated cable messengers, anchors and other appurtenances used in the provision of CATV service.

Joint User - All references herein to "joint user" shall mean a utility company or municipality which, together with the Company, jointly provides poles for common use in the provision of service of the respective entities, and shall also include a utility company or municipality which, together with the Company, owns a percentage of a pole, or which owns a pole upon which the Company has obtained exclusive use and control of specified space.

WINDSTREAM KENTUCKY EAST, LLC

**P.S.C. KY. No. 11
Original Page 2**

S1. CATV POLE ATTACHMENT AND CABLE DUCT ARRANGEMENT

S1.2 Definitions (Continued)

Cable Television Company or Operator (CATV) - All references herein to "CATV Company and/or Operator" shall mean a company which provides CATV service.

CATV Service - All references herein to "CATV service" shall mean the transmission, by means of coaxial or other types of distribution cables, of television audio and video signals from a central point within an exchange of the Company to subscribers of a CATV company within such exchange.

S1.3 Scope

Subject to the terms and conditions contained in this tariff, the Company will provide CATV pole attachment and cable duct space and permit a CATV operator, for the purpose of furnishing CATV service, to install its equipment upon or within such of the Company's poles and conduits as are available or can be made available, except for safety reasons.

References herein to CATV equipment placed in the Company's cable ducts shall mean only cables and wires. No right to place amplifiers, power supplies or other related equipment in manholes or cable ducts of the Company is conferred by this tariff.

The CATV company shall secure from the proper franchising authority, a franchise to erect and maintain its equipment within public streets, highways and other thoroughfare, provided such franchising authority exists, and shall secure any and all consents, permits, licenses, easements or rights-of-way that may be legally required for its operation hereunder. The CATV company shall provide to the Company documentation evidencing that all such franchises, consents, permits, licenses, easements and rights-of-way have been obtained. The CATV company shall additionally provide the Company a map depicting the franchised area in which pole attachments and cable duct arrangements may be applied for by the CATV company.

The CATV company shall assist in, and bear the expense of securing any additional consents, permits, or licenses that may be required by the Company because of CATV pole attachments or cable duct usage.

Original Page 3**

S1. CATV POLE ATTACHMENT AND CABLE DUCT ARRANGEMENT

S1.3 Scope (Continued)

The franchises, consents, permits, licenses, easements and rights-of-way of the Company are for its own facilities and the provision of its other services. No rights in such franchises, consents, permits, licenses, easements or rights-of-way are conferred upon any CATV company hereunder.

S1.4 Application for Permission to Install

At least forty-five (45) days prior to the time the CATV company desires to attach its equipment to any of the Company's poles, or to install any such equipment within a cable duct of the Company, the CATV operator shall make written application on the form prescribed to the Company. The Company shall in turn, notify the CATV company in writing of its permission to allow the installation.

Where the application for attachment involves joint-use poles, the CATV operator shall so indicate in its application, and provide a copy thereof to the joint user. Permission to attach to joint-use poles shall be subject to the Company obtaining approval from such joint user when necessary.

Upon notification by the Company of its permission for pole or cable duct space to be used by the CATV company, the CATV company shall have the right, subject to the SPECIFICATIONS contained herein, to install, maintain and use its equipment described in its application, upon the poles or in the cable ducts identified in its application. The CATV company shall complete each installation within a reasonable and mutually agreeable time frame; provided, however, that before commencing any such installation, the CATV company shall notify the Company of the time when it proposes to do such work sufficiently in advance so that the Company may arrange to have any necessary representative present when such work is performed. In the event the presence of a Company representative is required, the CATV company shall reimburse the Company for the cost and expense of such.

S1. CATV POLE ATTACHMENT AND CABLE DUCT ARRANGEMENT

S1.4 Application for Permission to Install (Continued)

Where costs are involved in the rearrangement of the Company's facilities to accommodate the CATV company's equipment, the Company shall notify the CATV company, in writing, of the changes and rearrangements required and the cost for performing such. Approval of the application by the Company is subject to receiving authorization from the CATV company to make changes and rearrangements detailed by the Company, at the CATV company's expense.

The CATV company shall not have the right to place, nor shall it place, any additional equipment upon any pole or in any cable duct without first making application to do so, as provided for in this tariff; nor shall the CATV company change the position of any equipment attached to any such pole or installed in any cable duct without the Company's prior written approval. The Company will not refuse a CATV company permission to install or rearrange CATV equipment if pole attachment or conduit space is available or can be made available, except for safety reasons. The provisions of this paragraph shall not restrict the attachment of television drops to television crossarms or television cable messenger. Unauthorized attachments or installation in cable duct shall be subject to penalty and/or special "make-ready" charges set forth in this tariff.

S1.5 Attachment Specifications

The CATV company, at its own cost and expense, shall construct, maintain and replace its attachments on the Company's poles in accordance with (1) such requirements and specifications as the Company shall prescribe and have on file with the Commission, (2) EEI Publication M12 entitled "Specifications for the Construction and Maintenance of Jointly-Used Wood Pole Lines Carrying Supply and Communication Circuits", (3) the requirements and specifications of the National Electrical Safety Code, 1981 Edition, and any amendments or revisions of said specifications or code, and (4) in compliance with any rules or orders now in effect or that hereafter may be issued by the Public Service Commission of Kentucky or other authority having jurisdiction. The CATV company shall comply, at its sole risk and expense, with changes and revisions in the above specifications and requirements.

Original Page 5**

S1. CATV POLE ATTACHMENT AND CABLE DUCT ARRANGEMENT

S1.6 Installation and Maintenance of CATV Equipment

The exact location of the CATV company's attachments on poles and installation in cable ducts shall be determined by the Company in its sole discretion after a joint survey to be made, at such times as shall be mutually agreed upon, by representatives of the telephone company and the CATV company. The Company may make periodic inspections as conditions may warrant. Such inspections shall not operate to relieve the CATV company of any responsibility, obligation, or liability assumed under this tariff. When substandard installations are found which are created by the CATV operator, the Company shall give notice of such to the CATV company, and the CATV company shall remedy such conditions within a reasonable time. In the event the CATV company fails to remedy the condition within the agreed upon time, the Company may act to remedy it with the cost of such to be paid by the CATV company.

Whenever CATV equipment is to be installed, rearranged or removed on or from Company poles, such work will normally be performed by the CATV company at its expense. In such cases a Company representative may be required to observe the work, at the expense of the CATV company. Where consented to by the Company, the CATV company may elect to have such installation, rearrangement or removal performed by the Company; however, the CATV company will furnish all materials and equipment and will reimburse the Company for its costs in performing the work activity.

Whenever CATV equipment is to be installed, rearranged or removed in cable ducts, such work will usually be performed by the Company, at the CATV company's expense. If the CATV elects to perform the work activity, a Company representative may be required to observe the work at the expense of the CATV company. Work performed by the Company or the CATV firm, shall be performed in accordance with the Company's established practices, and all materials and equipment shall be supplied by the CATV company.

S1. CATV POLE ATTACHMENT AND CABLE DUCT ARRANGEMENT

S1.6 Installation and Maintenance of CATV Equipment (Continued)

Where the CATV company's equipment can be accommodated on Company poles or in Company cable ducts by rearranging or changing the Company's facilities, the CATV company shall pay the Company in advance the cost of making such rearrangements or changes. Strengthening of poles (guying) required to accommodate the attachments of the CATV company and the bonding of the CATV's strand to that of the Company shall be performed by the CATV company at its sole risk and expense. Such work may be performed by the Company when reasonable cause therefore exists, and the CATV company shall pay the Company in advance the cost of all such work.

After initial attachment, when the Company subsequently requires a change in its poles, attachments thereto or its conduit system for reasons unrelated to CATV operations, the CATV company shall be given reasonable notice of the changes required and sufficient time to accomplish the CATV related change. If the CATV operator is unable or unwilling to meet the Company's time schedule for changes in attachments, the Company may do the work and charge the CATV company its reasonable costs for performing the change of CATV equipment. In cases of emergency, the Company may, at the CATV company's expense, arrange to relocate or replace the facilities attached to Company poles by the CATV operator, transfer them to substituted poles or perform any other work in connection with said facilities that may be required in the maintenance, replacement, removal, or relocation of said poles, the facilities thereon or the equipment which may be placed thereon.

All required maintenance of CATV equipment shall be performed by the CATV operator. No entry shall be made into any facility housing or cable ducts without the prior written permission of the Company. The Company reserves the right to require the presence of its representative at the time of any such entry, with the cost thereof to be reimbursed by the CATV company. An estimate of such cost shall be furnished at the time the Company gives its written permission for entry.

S1. CATV POLE ATTACHMENT AND CABLE DUCT ARRANGEMENT

S1.6 Installation and Maintenance of CATV Equipment (Continued)

All tree trimming required on account of CATV company equipment shall be done by the CATV operator at its sole risk and expense and in a manner satisfactory to the Company.

The CATV company shall, at its sole risk and expense, maintain all of its equipment on Company poles or in Company cable ducts in safe condition and in thorough repair.

Nothing herein contained shall give to the CATV company the right to place a crossarm on any Company pole. If a crossarm is required to accommodate the facilities of the CATV company, the CATV company shall state the reasons in its application for attachment.

Written consent of the Company must be obtained by the CATV company prior to any additions to, or changes in the location of its attachments on poles or equipment in cable ducts, except in cases of emergency when oral permission has been obtained from the Company and subsequently confirmed in writing.

If the CATV company should require the location of its equipment upon any public thoroughfare or other public or private property in the conduct of its business and the Company does not have pole facilities so located to fulfill CATV requirements and has no immediate need for such for the Company's own use, the Company will notify the CATV operator whether the Company is willing to place such pole facilities. Special rates shall be agreed to by the CATV company prior to the Company's placement of such pole facilities, and the rates specified herein shall not apply. The special rates shall be based upon the total use of the pole facilities by the CATV company. In the event such pole facilities are subsequently used by the Company for the provision of its other services, the special rates shall no longer apply, and the rates specified in this tariff shall apply.

S1. CATV POLE ATTACHMENT AND CABLE DUCT ARRANGEMENT

S1.6 Installation and Maintenance of CATV Equipment (Continued)

Whenever, pursuant to this tariff, the CATV company shall be required to remove its equipment from any pole, such removal shall be made within a reasonable time unless safety considerations require immediate action. Upon failure of the CATV company to remove such equipment, the Company may make the removal and charge the CATV company all associated costs.

Whenever, pursuant to the tariff, CATV equipment in cable ducts shall be required to be removed, relocated or replaced, such work will usually be performed by the Company, after written notice to the CATV company, at the CATV company's expense. If the CATV company elects to perform the work, a Company representative may be required to observe the work at the expense of the CATV company. Any CATV equipment required for such work performed by the Company or the CATV firm, shall be supplied by the CATV company.

The CATV company shall not interset poles or locate guys or other facilities in pole lines of the Company, except where the CATV company has appropriate right-of-way and such will not inhibit access to poles and facilities of the Company or cause a safety hazard.

S1.7 Cost of Pole Replacements

Whenever the CATV company applies for permission to attach to a pole that is considered by the telephone company to be insufficient in height or strength for accommodation of CATV attachments, the Company shall notify the CATV operator of such fact and of the estimated cost to the CATV company of replacing such pole with a pole which will accommodate the attachments of the CATV company and the telephone company. Within thirty (30) days of such notification, the CATV company shall either notify the Company (1) of its approval of such replacement or (2) of its cancellation of the application with respect to such pole.

In the event of CATV's approval of such replacement, the Company shall replace the pole and the CATV operator shall pay to the Company in advance the charges computed as follows:

S1. CATV POLE ATTACHMENT AND CABLE DUCT ARRANGEMENT

S1.7 Cost of Pole Replacements (Continued)

- (1) The total cost of the new pole, the removal of the old pole, the transferring of the Company's attachments from the old to the new pole and such other costs, if any, necessitated by CATV requirements, less the total of the following: accrued depreciation on the old pole, salvage, if any, and the cost of such portion of the new pole, if any, which represents space reserved for the use of the Company greater than that provided for them on the old pole and appropriate contribution by any other company attached thereto.

S1.8 Rights of Way and Legal Authority

Upon application for attachment or use of cable ducts, the CATV company shall submit evidence satisfactory to the Company of its authority to erect and maintain its equipment within public streets, highways, and other thoroughfares and shall secure any necessary franchise, license, permit, consent, easement or rights-of-way from Federal, State or municipal authorities or owners of property now or hereafter required to construct and maintain such equipment at the location of facilities of the Company which it desires to use. In the event any such franchise, license, permit, consent, easement or rights-of-way is revoked or is thereafter denied to the CATV company for any reason, permission to attach to Company poles or to use Company cable ducts so affected shall immediately terminate, the CATV company shall forthwith remove its equipment from Company facilities.

Upon notice from the telephone company to the CATV company that the removal or cessation of the use of any pole or cable duct has been requested or directed by Federal, State or municipal authorities, or property owners, permission to attach to such pole or to use such cable duct shall immediately terminate and the CATV company shall forthwith remove its equipment therefrom.

S1. CATV POLE ATTACHMENT AND CABLE DUCT ARRANGEMENT

S1.9 Protection Against Claims for Libel and Slander, Copyright, and Patent Infringement

The CATV company shall indemnify, protect, and hold harmless the Company from and against any and all claims for libel and slander, copyright and/or patent infringement arising by reason of attachment of CATV equipment to Company poles or installation of CATV equipment in Company cable ducts, pursuant to this tariff.

S1.10 Limitations

No use, however extended, of the Company's poles or cable ducts under this tariff shall create or vest in the CATV company any ownership or property right in said poles or ducts. Nothing herein contained shall be construed to compel the Company to maintain any of its facilities for a period longer than that demanded by its other service requirements.

The Company reserves to itself, its successors and assigns the right to maintain its poles and conduit and to locate and operate its facilities in such manner as will best enable it to fulfill its other public service requirements. Except where caused by its own negligence the Company shall not be liable for any interruption to the service of the CATV company or for any interference with the operation of the equipment of the CATV company.

The Company reserves the right to provide pole attachment and cable duct space to more than one CATV company and to make such space available to other entities. This tariff shall not limit the rights and privileges previously granted to others to use any poles or cable ducts covered by this tariff, and the privileges provided by this tariff shall at all times be subject to such previously granted rights.

Failure to enforce or insist upon compliance with any of the terms or conditions of this tariff shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in effect.

S1.10 Limitations (Continued)

The CATV company shall not assign, transfer or sublet any rights to make pole attachments or utilize cable ducts hereunder without the prior written consent of the Company; except that nothing contained herein shall be construed as depriving a CATV company of its property or the ability to dispose of its property in any manner it deems reasonable.

S1.11 Indemnity and Insurance

The CATV company shall indemnify, protect, and hold harmless the Company and other joint-users of said poles and conduit system from and against any and all loss, costs, claims, demands, damage and/or expense arising out of any demand, claim, suit or judgment for damages to property and injury to or death of persons, including the officers, agents, and employees of the CATV company, the Company and any joint user, including payment made under any Workmen's Compensation Law or under any plan for employees' disability and death benefits, which may arise out of or be caused by the installation, maintenance, presence, use or removal of said equipment or by the proximity of CATV equipment to the cables, wires, apparatus and appliances of the Company or any joint user, or arising out of any act, omission or negligence or alleged act, omission or negligence of the CATV operator or the joint negligence of the CATV operator and the Company and/or any joint users; provided, that the obligation of the CATV company under this paragraph does not include the indemnification of the Company or any joint user from or against the sole or joint negligence of the Company or any joint user.

The CATV company shall maintain in full force and effect the following insurance policies or bond in lieu thereof providing an equivalent protection: (1) Workers' Compensation and Occupational Disease covering the CATV company's full liability under the Workers' Compensation Laws of the Commonwealth of Kentucky. This shall include Employer's Liability insurance in the amount of \$100,000. (2) Comprehensive General Liability insurance, in the amounts of \$1,000,000 Combined Single Limits or \$1,000,000 each occurrence, and \$1,000,000 aggregate for any accident resulting in

bodily injuries to or the death of one or more persons and the consequential damages arising therefrom together with Property Damage Liability in the amount of \$500,000 each occurrence, with an aggregate total limit of \$500,000.

All policies of insurance shall contain written endorsements to the effect that the amount of coverage of the insurance provided thereby will not be reduced or terminated without thirty (30) days written notice first being given to the Company. Certificates of insurance, incorporating the above described endorsement, shall be delivered to a designated officer of the Company and shall be approved by the Company before the CATV firm is permitted to perform any work authorized pursuant to this tariff. Failure of the CATV company to provide notice of renewals, changes in carrier, or a reduction in or termination of insurance coverage will be just cause for the Company to terminate the CATV company's right to continue its pole attachments and/or use of cable ducts. If renewal premiums are not paid by the CATV company prior to said 30-day notice, the Company shall have the right to pay said premiums and be reimbursed by the CATV company upon demand.

The CATV operator shall promptly notify the Company of all claims and potential claims relating to damage to property or injury to or death of persons arising or alleged to have arisen in any manner by or associated with, directly or indirectly, the presence or use of the CATV company's equipment upon or within any facility of the Company.

The CATV company shall exercise special precautions to avoid damage to facilities of the Company on said poles and conduit and hereby assumes all responsibility for any and all loss for such damage. The CATV company shall make an immediate report to the telephone company of the occurrence of any such damage and shall reimburse the Company for the expense incurred in making repairs necessitated thereby.

S1. CATV POLE ATTACHMENT AND CABLE DUCT ARRANGEMENT

S1.12 Surety

The CATV company shall furnish a bond for each individual CATV system utilizing pole attachments or cable ducts under this tariff to guarantee the payment of any sum which may become due to the Company for rental, penalty, and make-ready charges and work performed by the Company, pursuant to this tariff, for the benefit of the CATV company or as a result of default or forfeiture by the CATV company. The amount of such bond shall be based upon the following:

- (1) For attachments to 500 poles or less, a bond of \$5,000 shall be furnished, except as provided in (4) below.
- (2) For attachments to poles in excess of 500, further surety in the amount of \$5,000 for each additional 500 poles, or any increment thereof, shall be furnished except as provided in (4) below.
- (3) Where cable ducts are provided, further surety in the amount of \$10,000 shall be furnished, except as provided in (4) below.
- (4) After one year following the completion of construction of an individual CATV system and its placement into operation, the CATV operator may request that the required amount of bond be reduced. Upon the Company's receipt of satisfactory evidence that all mechanics, workmen and material men who furnished services, labor or materials in the construction of such CATV system, and all taxing authorities, have been paid all amounts due them, the Company will reduce the amount of bond required to the following:
 - (a) For attachments to 500 poles or less, a bond of \$2,000 shall be furnished.
 - (b) For attachments to poles in excess of 500, further surety in the amount of \$2,000 for each 500 poles, or any increment thereof, shall be furnished.
 - (c) Where cable ducts are provided, further surety in the amount of \$5,000 shall be furnished.

S1. CATV POLE ATTACHMENT AND CABLE DUCT ARRANGEMENT

S1.13 Payment of Bills

All amounts payable by the CATV company to the Company under the provision of this tariff shall, unless otherwise specified, be payable within thirty (30) days after presentation of bills. Non-payment of any such amounts when due shall constitute grounds for termination of the pole attachment and cable duct usage rights under this tariff.

S1.14 Termination of Attachments and Cable Duct Usage

If the CATV company shall fail to comply with any of the provisions of this tariff, including compliance with the specifications previously referred to, the maintenance of required insurance coverage and surety bond requirements, and the timely payment of any amounts due, and shall fail for thirty (30) days after written notice from the Company to correct such non-compliance, the Company, at its option, may terminate the CATV company's right to continue any or all use of poles or cable ducts provided under this tariff and may act to remove the CATV equipment at the CATV company's expense.

Upon valid objection being made by or on behalf of any governmental authority properly asserting jurisdiction, the Company may without notice, or where circumstances permit, upon five (5) days written notice to the CATV company, terminate the provision of pole attachment and/or cable duct space as provided in this tariff.

The CATV company may at any time remove its equipment attached to any pole or poles of the Company and shall immediately give the Company written notice of such removal. The CATV company may at any time request the removal of its equipment in the cable duct of the Company. Removal of CATV equipment in cable ducts will usually be performed by the Company, at the CATV company's expense. If the CATV company elects to perform the work, a Company representative may be required to observe the removal at the expense of the CATV company. Removal work performed by the CATV company is to be made within a reasonable time, unless safety conditions require immediate action.

S1.15 Notices

Any notice required or authorized by this tariff to be given by the Company or the CATV company to the other party shall be deemed to have been fully given when made in writing and deposited in the United States mail, postage prepaid, and addressed to such other party's principal business address last furnished by such party.

S1.16 Rates

The CATV Company shall pay to the Company in advance the rates specified below. The Company shall render billing to the CATV Company on at least a quarterly basis. The Company will bill for CATV pole attachments or conduit usage from the date of CATV installation or from the date that space is reserved for CATV installation at an unspecified future time.

	<u>Monthly Rate</u>
Per 2-User Pole	\$ 1.01
Per 3-User Pole	.47
Per linear foot of cable duct space occupied	.07

S1.17 Penalty Charges

Where pole attachments have been made without respect of authorization from the Company, a penalty charge of twice the amount of the annual rate shall apply, in lieu of the annual rate, from the date of the last previous physical inventory of pole attachments or inspection required pursuant to the rules of the Kentucky Public Service Commission, whichever is most recent. Additionally, a special "make-ready" charge, equal to twice the amounts which would have been due and applicable if the attachment had been properly authorized, shall apply.

POLE AND ANCHOR ATTACHMENT TARIFF

Windstream Kentucky West, LLC

P.S.C. No. 7

Original Sheet 1

1. POLE AND ANCHOR ATTACHMENTS

1.1 Regulations

These regulations apply to attachments to poles and anchors within the operating territory of Windstream Kentucky West, LLC in the State of Kentucky.

A. Definitions of Terms

Anchor - an assembly (rod and fixed object or plate owned by the Company) designed to resist the pull of a guy strand, for which the Company is responsible for authorizing the attachment of the customer's cable television facilities.

Anchor Attachment - a guy strand attached to an anchor.

CATV - Community Antenna Television.

Company (the Company) - Windstream Kentucky, Inc.

Customer - the person, firm, corporation or other legal entity authorized by the Company to attach its CATV facilities to poles and anchors.

Customer's CATV Facilities - all facilities, including but not limited to cables, equipment and associated hardware, owned and utilized by the customer for distribution or rebroadcast of television signals to end users over a co-axial wireline distribution system attached to a pole or anchor.

Pole - a pole owned by the Company or a pole owned by others for which the Company has the right to permit others to attach in the communications space.

Pole Attachment - any item of the customer's CATV system facilities affixed to a pole.

B. Undertaking of the Company

1. Scope

Subject to the provisions of this tariff, the Company will authorize the attachment of a customer's CATV facilities to a pole or anchor for lawful CATV purposes.

Date of Issue: July 7, 2016

Date Effective: July 17, 2016

Windstream Kentucky West, LLC

P.S.C. No. 7

Original Sheet 2

1. POLE AND ANCHOR ATTACHMENTS (Continued)

1.1 Regulations (Continued)

B. Undertaking of the Company (Continued)

2) Limitations

No use, however extended, of a pole or anchor or payment of any charges required under this tariff shall create or vest in the customer any easements of any ownership or property rights of any nature in such pole or anchor.

Nothing contained in this tariff shall be construed to compel the Company to construct, reconstruct, retain, extend, repair, place, replace or maintain a pole, anchor or other facilities for use by a customer that is not needed for the Company's own service requirements, except where the customer agrees to reimburse the Company for the costs incurred in making such additions or repairs.

Nothing contained in this tariff shall be construed as a limitation, restriction or prohibition against the Company with respect to any agreement and arrangement which the Company has heretofore entered into, or may in the future enter into, with others not covered by this tariff regarding the poles or anchors covered by this tariff. The rights of the customer shall at all times be subject to any such existing and future agreement or arrangement.

3) Liability and Damages

The Company reserves to itself, its successors and assigns, the right to maintain its poles and to operate its facilities thereon in such manner as will best enable it to fulfill its own service requirements. The Company shall not be liable to a customer for any interruption to service of the customer or for interference with the operation of the cables, equipment and facilities of the customer arising in any manner, except as a result of the Company's sole negligence, out of the use of the Company's poles.

4) Termination of Authorizations

a) Authorizations for pole and anchor attachments granted under the provisions of this tariff may be terminated by the Company if:

4) Termination of Authorizations ((Continued))

a) (Continued)

the customer's insurance or bonding carrier shall at any time notify the Company that the policies of insurance or bonds, as required by Section 1.1.C.2) following, will be canceled or, changed so that those requirements will no longer be satisfied; or

any authorization which may be required by any governmental or private authority for the construction, operation and maintenance of the customer's CATV facilities is denied or revoked; or

the customer's CATV facilities are used or maintained in violation of any law or in aid of any unlawful act or undertaking; or

the customer ceases to have authority to construct and operate its CATV facilities on public or private property at the location of a particular pole or anchor covered by an authorization; or

the customer fails to comply with any of the provisions of this tariff or defaults in any of its obligations hereunder; or

the customer ceases to provide its CATV services in the area covered by this tariff.

b) The Company will promptly notify the customer in writing of any condition(s) applicable in 1) preceding. The customer shall take immediate corrective action to eliminate any such condition(s) and shall confirm in writing to the Company within (30) days following receipt of such written notice that the cited condition(s) has ceased or been corrected. If the customer is to discontinue or correct such condition(s) and fails to give the required written confirmation to the Company within the time period required, the Company may immediately terminate the attachment authorization(s) affected by the condition(s).

1.1 Regulations (Continued)

B. Undertaking of the Company (Continued)

5) Notices

All written notices required under this tariff shall be given by posting the same in first class mail.

C. Obligation of the Customer

1) Legal Requirements

The customer shall submit to the Company evidence of the customer's lawful authority to place, maintain and operate its CATV facilities within public streets, highways, and other thoroughfares and shall secure any necessary permits and consents from Federal, State, County, and Municipal authorities and from the owners of property to construct, maintain and operate CATV facilities at the locations of poles of the Company which it uses.

The customer shall at all times observe and comply with the provisions of this tariff and is subject to all laws, ordinances and regulations which in any manner affect the rights and obligations of the Company or the customer, so long as such laws, ordinances or regulations remain in effect.

2) Claims, Damages and Required Insurance

The customer shall exercise special precautions to avoid damaging the Company's cables, equipment and facilities, and those of others occupying the Company's poles and the customer shall assume all responsibility for any and all loss for such damage caused by the customer's, or its agent's, negligence. The customer shall make an immediate report to the Company of the concurrence of any such damage and shall reimburse the respective owners for the expense incurred in making repairs.

The customer shall carry liability insurance, or an indemnity bond to protect the Company and the public from and against any and all claims, demands, actions, judgments, costs, expenses, and liabilities of every kind and nature which may arise or result directly or indirectly, from or by reason of such loss, injury or damage, caused by the joint negligence of the Company and the customer or by the sole negligence of the customer. amounts of such insurance or bond against liability due to damage to property shall be no less than \$100,000 as to any one accident and \$300,000 aggregate, and against liability due to injury to or death of persons no less than \$300,000 as to any one person and \$500,000 as to any one accident. The customer shall also carry such insurance as will protect it from all claims under any Workmen's Compensation laws in effect that may be applicable to it. All insurance required shall remain in force for as long as the customer's CATV facilities are attached to the Company's poles or anchors and the insurance or bonding company or companies issuing such insurance or bonds shall be approved by the Company. The customer shall submit to the Company certificates by each insurance or bonding company insuring or bonding the customer to the effect that it has insured or bonded the customer for all liabilities of the customer under this tariff and that it will not cancel or change any policy of insurance or bond issued to the customer except after thirty (30) days written notice to the Company.

D. Attachment and Occupancy Applications

Before the customer shall attach to a pole or anchor, the customer shall make written application for and have received written authorization therefore from the Company.

E. Make-Ready Requirements

When an application for attachment to a pole and/or anchor is submitted by a customer, a pre-authorization survey will be required to determine the existing adequacy of the pole and anchor to accommodate the customer's CATV facilities. Utilization of the available capacity of an existing anchor when such utilization does not result in a reduction of the holding capacity below the level normally required by the Company for safety, or other purposes, will be permitted upon agreement by the customer to pay the charges specified in Section 1.2 following. The field inspection portion of the pre-authorization survey, which requires the visual inspection of existing poles and anchors, will be performed by the Company (with optional participation by the joint user and/or the customer). The Company will advise the customer in writing of the estimated charges

E. Make-Ready Requirements (Continued)

that will apply for such pre-authorization survey and the make-ready costs to be incurred by the Company. The Company must receive written authorization from the customer before undertaking any portion of the pre-authorization survey or make-ready work.

The administrative processing portion of the pre-authorization survey, which includes the processing of the application, the preparation of the make-ready work orders, the coordination of work requirements and schedules with joint users and other customers will be performed by the Company.

In the event the Company determines that the existing pole or anchor attachments, on any pole to which the customer desires to make attachments, needs rearrangement to support or accommodate the customer's proposed attachments in accordance with the specifications set forth in Section 1.1.F., the Company will indicate on the application the changes necessary to ensure that the customer's proposed attachments are in accordance with Section 1.1.F., and the estimated cost thereof, and return it to the customer. If the customer desires that such changes be made and returns the application marked to so indicate, the Company will make such changes and bill the customer in accordance with the terms of this tariff. The customer shall also be obligated to reimburse the owner or owners of the other facilities or attachments on the Company's poles or anchors, to which the customer wishes to make its attachments, for any expense incurred by it or them in transferring, or rearranging its or their facilities or attachments to accommodate the customer's proposed attachments.

In the event the Company, through its field inspection or other means, determines that the poles or anchors to which the customer wishes to attach its CATV facilities are inadequate to permit the customer's proposed attachments, using the specifications set forth in Section 1.1.F. as a reference, and such inadequacy or lack of sufficient usable space can only be remedied by the replacement of the Company's poles or anchors, or by the addition of more poles or anchors, the Company will notify the customer of the expense of replacing or adding the needed facilities. If asked to do so by the customer, the Company will proceed to replace or add the facilities required to accommodate the customer's proposed attachments. In such case the customer shall be obligated to

reimburse the Company for the expenses it incurs in replacing or adding these facilities according to the terms of Section 1.2 of this tariff.

Made-ready work will be performed following receipt by the Company of the required advance payment. The customer shall pay the Company for all make-ready work completed in accordance with the provisions of this tariff and shall also make arrangements with the owners of other facilities attached to such poles or anchors regarding reimbursement for any expense incurred by them in transferring or rearranging their facilities to make such attachment accommodations available. The customer shall not be entitled to reimbursement of any amounts paid to the Company for pole or anchor replacements or for rearrangements of facilities on a pole or anchor by reasons of the use by the Company, joint user, governmental entity or other authorized users of any additional capacity resulting from such replacement or rearrangement.

F. Construction, Maintenance and Removal of Customer Facilities

The customer's cables, equipment and facilities shall be placed and maintained in accordance with the requirements and specifications of this section of this tariff. Unless different standards are specified herein the provisions of the National Electrical Code (1981 edition) and the National Electrical Safety Code (1981 edition), and any amendments thereto or replacements thereof, shall be applicable. Any of the customer's cables, equipment and facilities not in compliance with this section shall be brought into compliance within six months.

The customer shall at its own expense, make and maintain its pole and anchor attachments in a safe condition and in thorough repair, and in a manner acceptable to the Company, and so as not to conflict with the use of said poles by the Company or by other authorized users of said poles or anchors or interfere with other facilities thereon or which may from time to time be placed thereon. The customer shall, at its own expense, upon two (2) days advance notice from the Company, relocate and replace its facilities placed on said poles or anchors, or transfer them to substituted poles or anchors, or perform any other work in connection with said facilities that may be required by the Company; provided, however, that in cases of emergency, the Company may arrange to relocate or replace the

attachment placed on said poles or anchors by the customer, transfer them to substituted poles or anchors, or perform any other work in connection with said facilities that may be required in the maintenance, replacement, removal or relocation of said poles or anchors, or of the facilities thereon, or which may be placed thereon, or for the service needs of the Company, and the customer shall reimburse the Company for the expense thereby incurred. Attachments of the customer to poles or anchors of the Company as mentioned herein shall be understood to include attachments of the customer in space reserved for the Company, or space which the Company has the right to use, on poles of other companies, with which the Company now has or may hereafter have agreements for joint use and occupancy; and the use of such space by the customer shall be subject to the terms and conditions of the agreements between the Company and said other companies.

1) Attachment to Poles and Anchors

This section is an integral part of this tariff and contains certain minimum requirements and specifications governing the attachment of cables, equipment and facilities of the customer to poles and anchors owned by the Company.

a) General

The customer is responsible for the proper design, construction and maintenance of its attachments. Attachments generally will be limited to strand-supported cable, service drops, terminals and necessary appurtenances deemed by the Company to be suitable for pole or anchor mounting.

Any rearrangements of the Company's facilities or replacement of poles required to accommodate the customer's attachments shall be done by the Company or a contractor authorized by the Company.

The fees and charges specified in Section 1.2 shall be applicable to all attachments made by the customer, without regard to the methods of attachment used.

Original Sheet 9

1. POLE AND ANCHOR ATTACHMENTS (Continued)

1.1 Regulations (Continued)

F. Construction, Maintenance and Removal of Customer Facilities (Continued)

1) Attachment to Poles and Anchors (Continued)

a) General (Continued)

The customer's attachments shall be plainly identified by appropriate marking satisfactory to the Company.

The customer's workmen shall assure themselves that any pole to be climbed has sufficient strength or is adequately braced or guyed to support the weight of the workmen.

All requirements of the National Electrical Safety Code referred to herein shall mean the 1981 edition of such code, or any later amendment or replacement thereof, and shall include any additional requirements of any applicable Federal, State, County or Municipal code. References to simply the Safety Code, or to N.E.S.C., have the same meaning.

While many of the standards and technical requirements for the Customer's cable, equipment and facilities are set forth herein, the Company reserves the right to specify the type of construction required in situations not otherwise covered in this Tariff. In such cases, the Company will in its discretion furnish the customer written materials which may specify and explain the required construction.

b) Voltage, Power, and Electrical Interference

The customer's attachments shall not use or carry voltages or currents in excess of the limits prescribed for communications conductors by the National Electrical Safety Code. However, all parts of the customer's attachments carrying voltages in excess of 50 volts AC (rms) to ground or 135 volts DC to ground, except for momentary signaling or control voltages, shall be enclosed in an effectively grounded, sheath or shield. All energized parts of the customer's attachments shall be suitably covered to prevent accidental contact by the general public, the customer's workmen or workmen of another customer or utility having facilities on the same pole.

1.1 Regulations (Continued)

F. Construction, Maintenance and Removal of Customer Facilities (Continued)

1) Attachment to Poles and Anchors (Continued)

b) Voltage, Power, and Electrical Interference (Continued)

The Company shall determine whether the customer's attachments cause or may cause electrical interference with the Company's communications facilities. The customer shall on demand of the Company, correct immediately at the customer's expense any such interference including, if necessary, removal of the attachments causing the interference.

No attachment shall use the earth as the sole conductor for any part of the circuit.

The customer shall not circumvent the Company's corrosion mitigation measures (e.g., short circuit insulating joints).

c) Grounding and Bonding

All power supplies shall be grounded. The neutral side of the power drop shall be continuous and not fused. The neutral line shall also be bonded to the power supply cabinet. The cabinet shall be connected to an earth ground at the pole. In areas where a power utility has a ground wire running down the pole, the cabinet can be connected to it if the power utility permits. When a power utility vertical ground wire is not available, the customer must place a ground rod. All cabinets, housings and metal socket bases on a common pole shall be bonded to each other, to the Company's strand and to the customer's strand.

Where two or more aerial suspension strands are located on the same pole, the suspension strands shall be bonded together. Where the customer has been authorized to attach the bond wire to the Company's strand, the customer is responsible for completing the bond. If the customer is not authorized to attach to the Company's strand, the customer shall attach the bonding wire to its strand and leave a sufficient length of wire to allow the Company to complete the bond. Where the strands of two or more

customers are to be bonded together, the customer placing the last strand, if authorized to do so by the other customers, shall make both connections. Where such authorization is not granted by the customer owning the existing strand, the customer shall attach the bonding wire to its strand and leave enough wire to permit making a connection to the other strand. In such cases, the customer owning the existing strand shall be responsible for completing the bonding.

Suspension strands at trolley feeders and trolley contact wires located on the same street shall be bonded at the first, last and every intermediate fifth poles until the remaining section between bonds is not more than eight or less than four spans. At other locations, the strands shall be bonded at the first, last and every intermediate tenth poles until the remaining section between bonds is not more than thirteen or less than four spans. Strands shall be bonded at or near the first pole on each side of underground dips or trolley wire crossovers.

Strands attached to the same bolt do not have to be bonded.

Where a customer's strand leaves a pole which carries other strands supporting communications cables, and the customer's strand continues to a pole carrying power facilities but no communication facilities of the Company, the customer's cable shall be:

Bonded to the other communications strands on the pole that it leaves, and

Bonded to an effective ground preferably within two spans but not greater than ten (10) spans, after leaving said pole, and

Bonded with a No. 6 solid, soft-drawn copper wire. The wire must be attached to the strand with an approved clamp, such as lashing wire clamp, designed for attachment to each specific size of strand involved (for example, Chance Lashing Wire Clamp, Catalog Number 9000, or equivalent).

Strands supporting drop wire shall be bonded to the cable suspension strand.

d) Clearances

The customer's attachments are subject to the same clearances as communications facilities and shall meet all of the pertinent clearance requirements of the Safety Code. Safety Code rules covering the most commonly encountered conditions are listed below.

	NESC 1981 Edition <u>General Rule</u>
Vertical clearance on poles jointly occupied by communication facilities and power facilities	235
Mid-span clearances between communication facilities and power facilities	238
Crossing clearances of facilities carried on different supports	233

e) Location and Spacing

The Company shall specify the location of the customer's attachments on each pole, including the location of the customer's riser cables.

The minimum vertical separation between the customer's suspension strand and the Company's suspension strand when located on the same side of the pole shall be twelve (12) inches. Where agreement with the power utility permits the placing of cables on both sides of the pole, the vertical separation between the strands may be reduced if the diagonal separation between strands will be twelve (12) inches or more. Separation between the bolt holes shall in any event be at least four (4) inches. The customer's suspension strand and cable shall be located above the Company's facilities unless the Company permits otherwise.

The minimum separation between the customer's and the Company's suspension strands specified herein also applies between the customer's strand and the suspension strand of another customer, and between two or more strands of the

customer; provided, however, that the customer may agree with another customer to reduce the separation between their respective strands. Separation between the bolt holes must in any event be at least four (4) inches.

When the customer's strand is above the Company's strand, the customer's strand-mounted equipment housings and cable drip loops shall be placed at least six inches above the Company's facilities.

Power supply cabinets and other pole-mounted equipment shall not be permitted below the Company's facilities on a pole where any of the following are present:

Underground riser cable or pipe.

Cross-connecting terminal.

Pole-mounted distribution terminal.

Pole-mounted closure.

Apparatus case.

Air dryer.

Other equipment of size that would impair climbing or working space if an additional pole-mounted facility was installed.

The customer shall be required to place all of its attachments, including amplifiers, power supplies, terminals, splitters and taps, so as not to interfere with climbing space, as defined in the National Electrical Safety Code (Rule 236).

Where by mutual agreement with the power utility, attachment of cables to both sides of the pole is permitted, two customers may employ a common through bolt

provided one customer accepts, in writing, the responsibility for maintaining the bolt. N.E.S.C. climbing space requirements must be maintained by all parties.

The customer shall not attach its facilities, except the termination of the bond wire when authorized, to the Company's strand or suspension bolt.

Through bolts may not be placed less than 10 inches from the top of the pole.

f) Loading

The customer shall furnish to the Company the details as to the ultimate strength tension at 60° and maximum tension in its suspension strand or conductor under the applicable storm loading specifications in the Code.

The customer shall furnish to the Company details as to the weight and size of its cables, suspension strands and/or conductors, with and without the ice loading, as specified by the National Electrical Safety Code (Rule 251) or appropriate local code for the loading area concerned. N.E.S.C. Rule 250 covers the degree of loading (light, medium, heavy) appropriate in different sections of the country. Where a local code designates a heavier degree of loading than the N.E.S.C., the local requirements shall govern.

The customer may lash its cable to the strand of another customer where this is acceptable to all other customers involved and to the Company. Maximum tension of the customer's strand shall not exceed 60% of the breaking strength under applicable storm loading, as defined by the National Electrical Safety Code (Rule 251). Where local codes designate a heavier degree of loading than the N.E.S.C., the local requirements shall govern.

1) Attachment to Poles and Anchors (Continued)

g) Guying and Stepping

Guying will be required on poles where the total unbalanced load, including the tension due to the customer's attachments under the appropriate storm loading prescribed by the National Electrical Safety Code (Rule 251), exceeds 200 pounds unless the pole was designed as an unguyed corner pole and the pole has adequate strength and stability, in the opinion of Licensor, to withstand the additional load.

Guys, when required, shall be of such material and dimensions as to provide adequate strength to withstand the transverse loads specified in the National Electrical Safety Code (Rule 252B), and the longitudinal load assumed in the Code (Rule 252C). Guys on poles which also support power facilities shall be in compliance with the National Electrical Safety Code (Rule 261C). On poles supporting communications facilities only, guying shall be in compliance with Grade C construction requirements of the Code.

Guy guards shall be installed in compliance with N.E.S.C. Rule 282E (Supplement 1).

The customer may attach its guy to the Company's anchor rods where the Company specifically authorizes it in writing.

More than one customer may use a common guy to sustain their combined load.

Guys shall be installed or grounded as specified in the Safety Code (Rules 282 and 283). The customer's guys shall not short circuit the Company's guy insulators.

Material used for guys shall be compatible from a corrosion standpoint with the hardware to which it is attached.

1. POLE AND ANCHOR ATTACHMENTS (Continued)

1.1 Regulations (Continued)

F. Construction, Maintenance and Removal of Customer Facilities (Continued)

1) Attachment to Poles and Anchors (Continued)

g) Guying and Stepping (Continued)

Where the Company determines that because of the customer's activity on a pole, the pole must be stepped, or if the customer requests that a pole be stepped for the customer's convenience, the Company will have the pole stepped at the customer's expense. The Company will determine the extent, method and manner of stepping required in view of the facilities located on the pole, safety requirements and the hazards of stepping any particular pole.

2) Inspections of Customer's Installations

The Company reserves the right to make periodic inspections of any part of the cable, equipment and facilities of the customer on its poles or anchors and in the vicinity of such cable, equipment and facilities. Inspections will not be made more often than once a year and upon notice to the customer unless, in the Company's judgment such inspections are required for reasons involving safety or are required because of a violation of the terms of this tariff by the customer.

If, upon inspection of the customer's pole or anchor attachments, the Company discovers substandard, incomplete or defective attachments, the customer shall, at its own expense, correct those attachments so identified by the Company. However, if the customer fails to correct such attachments, after having been reasonably notified of their substandard, incomplete or defective condition, the Company may correct these attachments without liability, and the expense of correcting these attachments shall be borne by the customer.

G. Unauthorized Attachment or Occupancy

If any of the customer's CATV facilities shall be found attached to a pole or anchor for which there is no authorization outstanding, the Company, without prejudice to its other rights or remedies under this tariff, including termination of authorization(s), may impose a charge equal to twice the amount of the tariff charges set forth

POLE AND ANCHOR ATTACHMENT TARIFF

Windstream Kentucky West, LLC

P.S.C. No. 7

Original Sheet 18

1. POLE AND ANCHOR ATTACHMENTS (Continued)

1.1 Regulations (Continued)

G. Unauthorized Attachment or Occupancy (Continued)

herein for such attachment and make-ready work, and require the customer to submit in writing, within (15) days after receipt of written notification from the Company of the unauthorized attachment, a pole or anchor attachment application. If such application is not received by the Company within the specified time period, the customer may be required to remove its unauthorized attachment within (30) days of the final date for submitting the required application, or the Company may at its option remove the customer's facilities without liability, and the expense of such removal shall be borne by the customer.

For the purpose of determining the applicable charge, all unauthorized pole or anchor attachments shall be treated as having existed since the first day following the most recent inspection and twice the amount of the rates specified in Section 1.2 following shall be due and payable forthwith.

H. Termination of Attachments

Upon notice from the Company to the customer that the use of the pole or anchor is not authorized by Federal, State, County or Municipal authorities or private property owners, the customer shall remove its cables, equipment and facilities at once from the affected poles or anchors, or shall make arrangements for the removal of its cable, equipment and facilities at the customer's expense.

The customer may at any time remove its facilities from any of the Company's poles or anchors, but shall immediately give the Company written notice of such removal. In the event the customer's cables, equipment and facilities shall be removed from any pole as provided by this tariff, no attachment, shall again be made to such pole unless the customer shall have first complied with all of the provisions of this tariff as though no such attachment had previously been made.

If the customer shall fail to comply with any of the terms or conditions of this tariff, or default in any of its obligations under this tariff, and fail within thirty (30) days after written notice from the Company to correct such default or noncompliance, the Company may, at its option, require the customer to forthwith remove all of its pole and anchor attachments.

In Case No. _____ Dated: _____

POLE AND ANCHOR ATTACHMENT TARIFF

Windstream Kentucky West, LLC

P.S.C. No. 7

Original Sheet 19

1. POLE AND ANCHOR ATTACHMENTS (Continued)

1.2 Rates and Charges

A. General

1) Computation

For the purpose of computing the total attachment fees due, the total fee shall be based upon the number of poles or anchors contacted, whether in service or not in service, on the first day of June and the first day of December of each year.

The first advance payment of the annual charge for attachments shall be prorated from the date that the attachment is made to the pole or anchor to the first regular payment date.

"Drop" contacts shall only be cumulatively reported on or before the first day of June and the first day of December for the preceding six (6) months. Applications for "drop" need not be submitted except on the above semi-annual dates.

Upon termination of an attachment, the applicable attachment fee shall be prorated for the period during which the attachment was made to the Company's pole or anchor during the final semi- annual period and shall be credited to the customer; provided, however, that there shall be no proration of an attachment fee if the attachment is terminated as a result of any act or omission of the customer in violation of this tariff.

2) Payment Dates

Attachment fees shall be due and payable semi-annually in advance, on the 30th day of January for the first half of the calendar year and on the 30th day of July for the last half of the calendar year. Failure to pay such fees within 30 days after presentment of the bill therefor or on the specified payment date, whichever is later, shall constitute a failure of the customer to comply with the provisions of this tariff and shall result in termination of authorization as specified in Section 1.1.B.3) of this tariff.

Date of Issue: July 7, 2016

Date Effective: July 17, 2016

Issued By: Chris Cranford

Title: Product Manager – Pricing & Tariffs

By Authority of Order of the Public Service Commission

In Case No. _____ Dated: _____

POLE AND ANCHOR ATTACHMENT TARIFF

Windstream Kentucky West, LLC

P.S.C. No. 7

Original Sheet 20

1. POLE AND ANCHOR ATTACHMENTS (Continued)

1.2 Rates and Charges (Continued)

B. Rates

	<u>Semi-Annual Rate</u>
Pole Attachments	
Two-User Poles, per pole	\$3.40
Three-User Poles, per pole	\$2.75
Anchor Attachments	
Two-User Anchors, per anchor	\$4.58
Three-User Anchor, per anchor	\$3.05

C. Other Charges

All charges for rearrangement or removal of the customer's facilities from the Company's poles and anchors, and any other work performed for the customer shall be based upon the full cost and expense to the Company for performing such work. The cost to the Company shall be determined in accordance with the regular and customary methods used by the Company in determining such costs.

The charge for replacement of poles shall include the total cost thereof, including the cost of transferring the Company's facilities from the old to the new poles, less the salvage value of any pole that is replaced.

All bills for such other charges shall be payable upon presentation to the customer, and shall be deemed delinquent if not paid within 30 days after presentation to the customer. Failure of the customer to pay such fees within 30 days after presentment of the bill therefor shall constitute a failure of the customer to comply with the provisions of this tariff and shall result in termination of authorization as specified in section 1.1.B.3) of this tariff.

Good morning, Anita-

Lexington is in the Windstream Kentucky East territory. I also prepared a Windstream Kentucky West agreement in case you wanted all of Kentucky covered. Also attached is our application in excel format for easier use. Please contact me after your review. I look forward to working with you as well.

Michelle

Anita:

Good to hear from you. The person that you want to speak with is Michelle McLaughlin. I have copied her on this response. She negotiates and manages our pole agreements and can provide you with our template for Kentucky.

I assume that you are asking so that MetroNet can begin the process of negotiating a pole attachment agreement with us in connection with its expansion into Lexington. Congratulations on the announcement.

Hope you have a great Thanksgiving!

Dan

Subject: RE: Pole Attachment

Michelle: Thanks again for sending the pole attachment agreements over. What is the process if we want to use the tariff instead of enter into the pole attachment agreement? Do we just sign a short form agreement? Is there than any regulatory approval needed?

Thanks,
Anita

Good morning, Anita-
Lexington is in the Windstream Kentucky East territory. I also prepared a Windstream Kentucky West agreement in case you wanted all of Kentucky covered. Also attached is our application in excel format for easier use. Please contact me after your review. I look forward to working with you as well.

Anita:

Good to hear from you. The person that you want to speak with is Michelle Mclaughlin. I have copied her on this response. She negotiates and manages our pole agreements and can provide you with our template for Kentucky.

I assume that you are asking so that MetroNet can begin the process of negotiating a pole attachment agreement with us in connection with its expansion into Lexington. Congratulations on the announcement.

Hope you have a great Thanksgiving!

Dan

In Case No. _____ Dated: _____

CATV POLE ATTACHMENT TARIFF

WINDSTREAM KENTUCKY EAST, LLC

**P.S.C. KY. No. 11
Original Page 1**

S1. CATV POLE ATTACHMENT AND CABLE DUCT ARRANGEMENT

S1.1 Application of Tariff

This tariff contains regulations and charges applicable to the provision of attachment space for cable television facilities on poles of the Telephone Company, and the provision of cable duct space for such facilities in underground conduits of the Company.

The terms and conditions contained herein apply where the CATV operator, as a customer of the Company, proposes to install coaxial or other types of television distribution cables, amplifiers and drop wires, wires and appliances together with associated cable messengers, anchors and other appurtenances (hereinafter sometimes collectively called the "equipment") and desires to attach such equipment to poles of the Company, and/or install such equipment in cable ducts of the Company.

S1.2 Definitions

Poles - All references to "poles" of the Company shall mean poles which are either solely owned by the Company, are jointly owned by the Company and another, or are owned by another who has granted the Company exclusive use and control of space upon its poles.

Pole Attachment - This term means any attachment by a CATV firm to a pole owned or controlled by the Company.

Cable Duct Space - This term shall mean individual cable ducts within a multiple-duct conduit system owned by the Company.

Equipment - The "equipment" referred to herein consist of coaxial or other types of television cables, amplifiers and drop wires, wires and appliances together with associated cable messengers, anchors and other appurtenances used in the provision of CATV service.

Joint User - All references herein to "joint user" shall mean a utility company or municipality which, together with the Company, jointly provides poles for common use in the provision of service of the respective entities, and shall also include a utility company or municipality which, together with the Company, owns a percentage of a pole, or which owns a pole upon which the Company has obtained exclusive use and control of specified space.

Date of Issue: July 7, 2016

Date Effective: July 17, 2016

Issued By: Chris Cranford

Title: Product Manager – Pricing & Tariffs

By Authority of Order of the Public Service Commission

In Case No. _____ Dated: _____

CATV POLE ATTACHMENT TARIFF

WINDSTREAM KENTUCKY EAST, LLC

**P.S.C. KY. No. 11
Original Page 2**

S1. CATV POLE ATTACHMENT AND CABLE DUCT ARRANGEMENT

S1.2 Definitions (Continued)

Cable Television Company or Operator (CATV) - All references herein to "CATV Company and/or Operator" shall mean a company which provides CATV service.

CATV Service - All references herein to "CATV service" shall mean the transmission, by means of coaxial or other types of distribution cables, of television audio and video signals from a central point within an exchange of the Company to subscribers of a CATV company within such exchange.

S1.3 Scope

Subject to the terms and conditions contained in this tariff, the Company will provide CATV pole attachment and cable duct space and permit a CATV operator, for the purpose of furnishing CATV service, to install its equipment upon or within such of the Company's poles and conduits as are available or can be made available, except for safety reasons.

References herein to CATV equipment placed in the Company's cable ducts shall mean only cables and wires. No right to place amplifiers, power supplies or other related equipment in manholes or cable ducts of the Company is conferred by this tariff.

The CATV company shall secure from the proper franchising authority, a franchise to erect and maintain its equipment within public streets, highways and other thoroughfare, provided such franchising authority exists, and shall secure any and all consents, permits, licenses, easements or rights-of-way that may be legally required for its operation hereunder. The CATV company shall provide to the Company documentation evidencing that all such franchises, consents, permits, licenses, easements and rights-of-way have been obtained. The CATV company shall additionally provide the Company a map depicting the franchised area in which pole attachments and cable duct arrangements may be applied for by the CATV company.

The CATV company shall assist in, and bear the expense of securing any additional consents, permits, or licenses that may be required by the Company because of CATV pole attachments or cable duct usage.

Date of Issue: July 7, 2016

Date Effective: July 17, 2016

Issued By: Chris Cranford

Title: Product Manager – Pricing & Tariffs

By Authority of Order of the Public Service Commission

In Case No. _____ Dated: _____

CATV POLE ATTACHMENT TARIFF

WINDSTREAM KENTUCKY EAST, LLC

**P.S.C. KY. No. 11
Original Page 3**

S1. CATV POLE ATTACHMENT AND CABLE DUCT ARRANGEMENT

S1.3 Scope (Continued)

The franchises, consents, permits, licenses, easements and rights-of-way of the Company are for its own facilities and the provision of its other services. No rights in such franchises, consents, permits, licenses, easements or rights-of-way are conferred upon any CATV company hereunder.

S1.4 Application for Permission to Install

At least forty-five (45) days prior to the time the CATV company desires to attach its equipment to any of the Company's poles, or to install any such equipment within a cable duct of the Company, the CATV operator shall make written application on the form prescribed to the Company. The Company shall in turn, notify the CATV company in writing of its permission to allow the installation.

Where the application for attachment involves joint-use poles, the CATV operator shall so indicate in its application, and provide a copy thereof to the joint user. Permission to attach to joint-use poles shall be subject to the Company obtaining approval from such joint user when necessary.

Upon notification by the Company of its permission for pole or cable duct space to be used by the CATV company, the CATV company shall have the right, subject to the SPECIFICATIONS contained herein, to install, maintain and use its equipment described in its application, upon the poles or in the cable ducts identified in its application. The CATV company shall complete each installation within a reasonable and mutually agreeable time frame; provided, however, that before commencing any such installation, the CATV company shall notify the Company of the time when it proposes to do such work sufficiently in advance so that the Company may arrange to have any necessary representative present when such work is performed. In the event the presence of a Company representative is required, the CATV company shall reimburse the Company for the cost and expense of such.

Date of Issue: July 7, 2016

S1. CATV POLE ATTACHMENT AND CABLE DUCT ARRANGEMENT

S1.4 Application for Permission to Install (Continued)

Where costs are involved in the rearrangement of the Company's facilities to accommodate the CATV company's equipment, the Company shall notify the CATV company, in writing, of the changes and rearrangements required and the cost for performing such. Approval of the application by the Company is subject to receiving authorization from the CATV company to make changes and rearrangements detailed by the Company, at the CATV company's expense.

The CATV company shall not have the right to place, nor shall it place, any additional equipment upon any pole or in any cable duct without first making application to do so, as provided for in this tariff; nor shall the CATV company change the position of any equipment attached to any such pole or installed in any cable duct without the Company's prior written approval. The Company will not refuse a CATV company permission to install or rearrange CATV equipment if pole attachment or conduit space is available or can be made available, except for safety reasons. The provisions of this paragraph shall not restrict the attachment of television drops to television crossarms or television cable messenger. Unauthorized attachments or installation in cable duct shall be subject to penalty and/or special "make-ready" charges set forth in this tariff.

S1.5 Attachment Specifications

The CATV company, at its own cost and expense, shall construct, maintain and replace its attachments on the Company's poles in accordance with (1) such requirements and specifications as the Company shall prescribe and have on file with the Commission, (2) EEI Publication M12 entitled "Specifications for the Construction and Maintenance of Jointly-Used Wood Pole Lines Carrying Supply and Communication Circuits", (3) the requirements and specifications of the National Electrical Safety Code, 1981 Edition, and any amendments or revisions of said specifications or code, and (4) in compliance with any rules or orders now in effect or that hereafter may be issued by the Public Service Commission of Kentucky or other authority having jurisdiction. The CATV company shall comply, at its sole risk and expense, with changes and revisions in the above specifications and requirements.

Original Page 5**

S1. CATV POLE ATTACHMENT AND CABLE DUCT ARRANGEMENT

S1.6 Installation and Maintenance of CATV Equipment

The exact location of the CATV company's attachments on poles and installation in cable ducts shall be determined by the Company in its sole discretion after a joint survey to be made, at such times as shall be mutually agreed upon, by representatives of the telephone company and the CATV company. The Company may make periodic inspections as conditions may warrant. Such inspections shall not operate to relieve the CATV company of any responsibility, obligation, or liability assumed under this tariff. When substandard installations are found which are created by the CATV operator, the Company shall give notice of such to the CATV company, and the CATV company shall remedy such conditions within a reasonable time. In the event the CATV company fails to remedy the condition within the agreed upon time, the Company may act to remedy it with the cost of such to be paid by the CATV company.

Whenever CATV equipment is to be installed, rearranged or removed on or from Company poles, such work will normally be performed by the CATV company at its expense. In such cases a Company representative may be required to observe the work, at the expense of the CATV company. Where consented to by the Company, the CATV company may elect to have such installation, rearrangement or removal performed by the Company; however, the CATV company will furnish all materials and equipment and will reimburse the Company for its costs in performing the work activity.

Whenever CATV equipment is to be installed, rearranged or removed in cable ducts, such work will usually be performed by the Company, at the CATV company's expense. If the CATV elects to perform the work activity, a Company representative may be required to observe the work at the expense of the CATV company. Work performed by the Company or the CATV firm, shall be performed in accordance with the Company's established practices, and all materials and equipment shall be supplied by the CATV company.

S1. CATV POLE ATTACHMENT AND CABLE DUCT ARRANGEMENT

S1.6 Installation and Maintenance of CATV Equipment (Continued)

Where the CATV company's equipment can be accommodated on Company poles or in Company cable ducts by rearranging or changing the Company's facilities, the CATV company shall pay the Company in advance the cost of making such rearrangements or changes. Strengthening of poles (guying) required to accommodate the attachments of the CATV company and the bonding of the CATV's strand to that of the Company shall be performed by the CATV company at its sole risk and expense. Such work may be performed by the Company when reasonable cause therefore exists, and the CATV company shall pay the Company in advance the cost of all such work.

After initial attachment, when the Company subsequently requires a change in its poles, attachments thereto or its conduit system for reasons unrelated to CATV operations, the CATV company shall be given reasonable notice of the changes required and sufficient time to accomplish the CATV related change. If the CATV operator is unable or unwilling to meet the Company's time schedule for changes in attachments, the Company may do the work and charge the CATV company its reasonable costs for performing the change of CATV equipment. In cases of emergency, the Company may, at the CATV company's expense, arrange to relocate or replace the facilities attached to Company poles by the CATV operator, transfer them to substituted poles or perform any other work in connection with said facilities that may be required in the maintenance, replacement, removal, or relocation of said poles, the facilities thereon or the equipment which may be placed thereon.

All required maintenance of CATV equipment shall be performed by the CATV operator. No entry shall be made into any facility housing or cable ducts without the prior written permission of the Company. The Company reserves the right to require the presence of its representative at the time of any such entry, with the cost thereof to be reimbursed by the CATV company. An estimate of such cost shall be furnished at the time the Company gives its written permission for entry.

S1. CATV POLE ATTACHMENT AND CABLE DUCT ARRANGEMENT

S1.6 Installation and Maintenance of CATV Equipment (Continued)

All tree trimming required on account of CATV company equipment shall be done by the CATV operator at its sole risk and expense and in a manner satisfactory to the Company.

The CATV company shall, at its sole risk and expense, maintain all of its equipment on Company poles or in Company cable ducts in safe condition and in thorough repair.

Nothing herein contained shall give to the CATV company the right to place a crossarm on any Company pole. If a crossarm is required to accommodate the facilities of the CATV company, the CATV company shall state the reasons in its application for attachment.

Written consent of the Company must be obtained by the CATV company prior to any additions to, or changes in the location of its attachments on poles or equipment in cable ducts, except in cases of emergency when oral permission has been obtained from the Company and subsequently confirmed in writing.

If the CATV company should require the location of its equipment upon any public thoroughfare or other public or private property in the conduct of its business and the Company does not have pole facilities so located to fulfill CATV requirements and has no immediate need for such for the Company's own use, the Company will notify the CATV operator whether the Company is willing to place such pole facilities. Special rates shall be agreed to by the CATV company prior to the Company's placement of such pole facilities, and the rates specified herein shall not apply. The special rates shall be based upon the total use of the pole facilities by the CATV company. In the event such pole facilities are subsequently used by the Company for the provision of its other services, the special rates shall no longer apply, and the rates specified in this tariff shall apply.

S1. CATV POLE ATTACHMENT AND CABLE DUCT ARRANGEMENT

S1.6 Installation and Maintenance of CATV Equipment (Continued)

Whenever, pursuant to this tariff, the CATV company shall be required to remove its equipment from any pole, such removal shall be made within a reasonable time unless safety considerations require immediate action. Upon failure of the CATV company to remove such equipment, the Company may make the removal and charge the CATV company all associated costs.

Whenever, pursuant to the tariff, CATV equipment in cable ducts shall be required to be removed, relocated or replaced, such work will usually be performed by the Company, after written notice to the CATV company, at the CATV company's expense. If the CATV company elects to perform the work, a Company representative may be required to observe the work at the expense of the CATV company. Any CATV equipment required for such work performed by the Company or the CATV firm, shall be supplied by the CATV company.

The CATV company shall not interset poles or locate guys or other facilities in pole lines of the Company, except where the CATV company has appropriate right-of-way and such will not inhibit access to poles and facilities of the Company or cause a safety hazard.

S1.7 Cost of Pole Replacements

Whenever the CATV company applies for permission to attach to a pole that is considered by the telephone company to be insufficient in height or strength for accommodation of CATV attachments, the Company shall notify the CATV operator of such fact and of the estimated cost to the CATV company of replacing such pole with a pole which will accommodate the attachments of the CATV company and the telephone company. Within thirty (30) days of such notification, the CATV company shall either notify the Company (1) of its approval of such replacement or (2) of its cancellation of the application with respect to such pole.

In the event of CATV's approval of such replacement, the Company shall replace the pole and the CATV operator shall pay to the Company in advance the charges computed as follows:

S1. CATV POLE ATTACHMENT AND CABLE DUCT ARRANGEMENT

S1.7 Cost of Pole Replacements (Continued)

- (1) The total cost of the new pole, the removal of the old pole, the transferring of the Company's attachments from the old to the new pole and such other costs, if any, necessitated by CATV requirements, less the total of the following: accrued depreciation on the old pole, salvage, if any, and the cost of such portion of the new pole, if any, which represents space reserved for the use of the Company greater than that provided for them on the old pole and appropriate contribution by any other company attached thereto.

S1.8 Rights of Way and Legal Authority

Upon application for attachment or use of cable ducts, the CATV company shall submit evidence satisfactory to the Company of its authority to erect and maintain its equipment within public streets, highways, and other thoroughfares and shall secure any necessary franchise, license, permit, consent, easement or rights-of-way from Federal, State or municipal authorities or owners of property now or hereafter required to construct and maintain such equipment at the location of facilities of the Company which it desires to use. In the event any such franchise, license, permit, consent, easement or rights-of-way is revoked or is thereafter denied to the CATV company for any reason, permission to attach to Company poles or to use Company cable ducts so affected shall immediately terminate, the CATV company shall forthwith remove its equipment from Company facilities.

Upon notice from the telephone company to the CATV company that the removal or cessation of the use of any pole or cable duct has been requested or directed by Federal, State or municipal authorities, or property owners, permission to attach to such pole or to use such cable duct shall immediately terminate and the CATV company shall forthwith remove its equipment therefrom.

S1. CATV POLE ATTACHMENT AND CABLE DUCT ARRANGEMENT

S1.9 Protection Against Claims for Libel and Slander, Copyright, and Patent Infringement

The CATV company shall indemnify, protect, and hold harmless the Company from and against any and all claims for libel and slander, copyright and/or patent infringement arising by reason of attachment of CATV equipment to Company poles or installation of CATV equipment in Company cable ducts, pursuant to this tariff.

S1.10 Limitations

No use, however extended, of the Company's poles or cable ducts under this tariff shall create or vest in the CATV company any ownership or property right in said poles or ducts. Nothing herein contained shall be construed to compel the Company to maintain any of its facilities for a period longer than that demanded by its other service requirements.

The Company reserves to itself, its successors and assigns the right to maintain its poles and conduit and to locate and operate its facilities in such manner as will best enable it to fulfill its other public service requirements. Except where caused by its own negligence the Company shall not be liable for any interruption to the service of the CATV company or for any interference with the operation of the equipment of the CATV company.

The Company reserves the right to provide pole attachment and cable duct space to more than one CATV company and to make such space available to other entities. This tariff shall not limit the rights and privileges previously granted to others to use any poles or cable ducts covered by this tariff, and the privileges provided by this tariff shall at all times be subject to such previously granted rights.

Failure to enforce or insist upon compliance with any of the terms or conditions of this tariff shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in effect.

S1. CATV POLE ATTACHMENT AND CABLE DUCT ARRANGEMENT

S1.10 Limitations (Continued)

The CATV company shall not assign, transfer or sublet any rights to make pole attachments or utilize cable ducts hereunder without the prior written consent of the Company; except that nothing contained herein shall be construed as depriving a CATV company of its property or the ability to dispose of its property in any manner it deems reasonable.

S1.11 Indemnity and Insurance

The CATV company shall indemnify, protect, and hold harmless the Company and other joint-users of said poles and conduit system from and against any and all loss, costs, claims, demands, damage and/or expense arising out of any demand, claim, suit or judgment for damages to property and injury to or death of persons, including the officers, agents, and employees of the CATV company, the Company and any joint user, including payment made under any Workmen's Compensation Law or under any plan for employees' disability and death benefits, which may arise out of or be caused by the installation, maintenance, presence, use or removal of said equipment or by the proximity of CATV equipment to the cables, wires, apparatus and appliances of the Company or any joint user, or arising out of any act, omission or negligence or alleged act, omission or negligence of the CATV operator or the joint negligence of the CATV operator and the Company and/or any joint users; provided, that the obligation of the CATV company under this paragraph does not include the indemnification of the Company or any joint user from or against the sole or joint negligence of the Company or any joint user.

The CATV company shall maintain in full force and effect the following insurance policies or bond in lieu thereof providing an equivalent protection: (1) Workers' Compensation and Occupational Disease covering the CATV company's full liability under the Workers' Compensation Laws of the Commonwealth of Kentucky. This shall include Employer's Liability insurance in the amount of \$100,000. (2) Comprehensive General Liability insurance, in the amounts of \$1,000,000 Combined Single Limits or \$1,000,000 each occurrence, and \$1,000,000 aggregate for any accident resulting in

bodily injuries to or the death of one or more persons and the consequential damages arising therefrom together with Property Damage Liability in the amount of \$500,000 each occurrence, with an aggregate total limit of \$500,000.

All policies of insurance shall contain written endorsements to the effect that the amount of coverage of the insurance provided thereby will not be reduced or terminated without thirty (30) days written notice first being given to the Company. Certificates of insurance, incorporating the above described endorsement, shall be delivered to a designated officer of the Company and shall be approved by the Company before the CATV firm is permitted to perform any work authorized pursuant to this tariff. Failure of the CATV company to provide notice of renewals, changes in carrier, or a reduction in or termination of insurance coverage will be just cause for the Company to terminate the CATV company's right to continue its pole attachments and/or use of cable ducts. If renewal premiums are not paid by the CATV company prior to said 30-day notice, the Company shall have the right to pay said premiums and be reimbursed by the CATV company upon demand.

The CATV operator shall promptly notify the Company of all claims and potential claims relating to damage to property or injury to or death of persons arising or alleged to have arisen in any manner by or associated with, directly or indirectly, the presence or use of the CATV company's equipment upon or within any facility of the Company.

The CATV company shall exercise special precautions to avoid damage to facilities of the Company on said poles and conduit and hereby assumes all responsibility for any and all loss for such damage. The CATV company shall make an immediate report to the telephone company of the occurrence of any such damage and shall reimburse the Company for the expense incurred in making repairs necessitated thereby.

S1. CATV POLE ATTACHMENT AND CABLE DUCT ARRANGEMENT

S1.12 Surety

The CATV company shall furnish a bond for each individual CATV system utilizing pole attachments or cable ducts under this tariff to guarantee the payment of any sum which may become due to the Company for rental, penalty, and make-ready charges and work performed by the Company, pursuant to this tariff, for the benefit of the CATV company or as a result of default or forfeiture by the CATV company. The amount of such bond shall be based upon the following:

- (1) For attachments to 500 poles or less, a bond of \$5,000 shall be furnished, except as provided in (4) below.
- (2) For attachments to poles in excess of 500, further surety in the amount of \$5,000 for each additional 500 poles, or any increment thereof, shall be furnished except as provided in (4) below.
- (3) Where cable ducts are provided, further surety in the amount of \$10,000 shall be furnished, except as provided in (4) below.
- (4) After one year following the completion of construction of an individual CATV system and its placement into operation, the CATV operator may request that the required amount of bond be reduced. Upon the Company's receipt of satisfactory evidence that all mechanics, workmen and material men who furnished services, labor or materials in the construction of such CATV system, and all taxing authorities, have been paid all amounts due them, the Company will reduce the amount of bond required to the following:
 - (a) For attachments to 500 poles or less, a bond of \$2,000 shall be furnished.
 - (b) For attachments to poles in excess of 500, further surety in the amount of \$2,000 for each 500 poles, or any increment thereof, shall be furnished.
 - (c) Where cable ducts are provided, further surety in the amount of \$5,000 shall be furnished.

S1. CATV POLE ATTACHMENT AND CABLE DUCT ARRANGEMENT

S1.13 Payment of Bills

All amounts payable by the CATV company to the Company under the provision of this tariff shall, unless otherwise specified, be payable within thirty (30) days after presentation of bills. Non-payment of any such amounts when due shall constitute grounds for termination of the pole attachment and cable duct usage rights under this tariff.

S1.14 Termination of Attachments and Cable Duct Usage

If the CATV company shall fail to comply with any of the provisions of this tariff, including compliance with the specifications previously referred to, the maintenance of required insurance coverage and surety bond requirements, and the timely payment of any amounts due, and shall fail for thirty (30) days after written notice from the Company to correct such non-compliance, the Company, at its option, may terminate the CATV company's right to continue any or all use of poles or cable ducts provided under this tariff and may act to remove the CATV equipment at the CATV company's expense.

Upon valid objection being made by or on behalf of any governmental authority properly asserting jurisdiction, the Company may without notice, or where circumstances permit, upon five (5) days written notice to the CATV company, terminate the provision of pole attachment and/or cable duct space as provided in this tariff.

The CATV company may at any time remove its equipment attached to any pole or poles of the Company and shall immediately give the Company written notice of such removal. The CATV company may at any time request the removal of its equipment in the cable duct of the Company. Removal of CATV equipment in cable ducts will usually be performed by the Company, at the CATV company's expense. If the CATV company elects to perform the work, a Company representative may be required to observe the removal at the expense of the CATV company. Removal work performed by the CATV company is to be made within a reasonable time, unless safety conditions require immediate action.

S1.15 Notices

Any notice required or authorized by this tariff to be given by the Company or the CATV company to the other party shall be deemed to have been fully given when made in writing and deposited in the United States mail, postage prepaid, and addressed to such other party's principal business address last furnished by such party.

S1.16 Rates

The CATV Company shall pay to the Company in advance the rates specified below. The Company shall render billing to the CATV Company on at least a quarterly basis. The Company will bill for CATV pole attachments or conduit usage from the date of CATV installation or from the date that space is reserved for CATV installation at an unspecified future time.

	<u>Monthly Rate</u>
Per 2-User Pole	\$ 1.01
Per 3-User Pole	.47
Per linear foot of cable duct space occupied	.07

S1.17 Penalty Charges

Where pole attachments have been made without respect of authorization from the Company, a penalty charge of twice the amount of the annual rate shall apply, in lieu of the annual rate, from the date of the last previous physical inventory of pole attachments or inspection required pursuant to the rules of the Kentucky Public Service Commission, whichever is most recent. Additionally, a special "make-ready" charge, equal to twice the amounts which would have been due and applicable if the attachment had been properly authorized, shall apply.

ATTACHED AND INCORPORATED EXHIBITS

EXHIBIT A – DEFINITIONS

EXHIBIT B – FORM APPLICATION FOR POLE LICENSE

EXHIBIT C – NOTIFICATION OF SURRENDER OF LICENSE

EXHIBIT D – SCHEDULE OF RATES, FEES AND CHARGES

EXHIBIT E – NOTICE CONTACTS AND ADDRESSES

1. PARTIES.

This Pole Attachment License Agreement (“Agreement”) is entered into as of the date last signed by all the parties (“Effective Date”) by and between [REDACTED], a Windstream company organized and existing under the State of [REDACTED] (“Licensor”), and [REDACTED], a company organized and existing under the State of [REDACTED] (“Licensee”). Licensor and Licensee may sometimes be referred to in this Agreement individually as a “party” and collectively as the “parties”.

2. SCOPE.

A. The purpose of this Agreement is to set forth the rates, terms, conditions, and procedures under which the Licensor will provide Licensee access to Licensor’s Poles (as defined herein) in the State of [REDACTED] for the purpose of Licensee attaching wireline facilities.

B. The parties acknowledge that Licensor is entering into this Agreement because Licensee has represented it is a regulated "telecommunications carrier" or “cable television system” provider as such terms are defined in the Communications Act of 1934, as amended (hereinafter the "Communications Act") and desires to provide telecommunications service or cable service (“Services”), as defined in the Communications Act; and that Licensee is authorized to provide these Services under its franchise or other lawful authority within its service area where Licensor owns Poles. In the event Licensee no longer has the status as a “telecommunications carrier” or “cable television system” provider or the authority to offer these Services in the state where the Poles are located, Licensor shall have the right to immediately terminate this Agreement and require Licensee to remove all of its facilities from Licensor’s Poles. **As a condition precedent to entering into this Agreement, Licensee shall submit to Licensor a copy of its certification evidencing its status as either a regulated telecommunication carrier or cable television system provider, and until such documentation is provided to Licensor, Licensor shall not be obligated to enter into this Agreement.**

C. Subject to the provisions of this Agreement, Licensor will issue to Licensee for any lawful communications purpose, revocable, nonexclusive Licenses authorizing the placement of Licensee’s Attachment to Licensor’s Poles.

D. No use, however extended, of Licensor’s Poles nor payment of any fees or charges required under this Agreement or License issued under this Agreement shall create or vest in Licensee any ownership or property rights in said Poles, but Licensee’s rights therein shall be and remain a mere license. Nothing herein contained shall be construed to compel Licensor to construct, retain, extend, place, or maintain any facilities not needed for its own service requirements, unless otherwise required by law. Nothing contained in this Agreement or in any License issued hereunder shall in any way affect, restrict or impair the right of Licensor to convey, transfer, mortgage, or assign to any other person or entity any interest in real or personal property, including any Poles in which Licensee has attached or placed Licensee’s Attachments pursuant to Licenses issued under this or other license agreements.

E. Licensee recognizes that Licensor has entered into, or may in the future enter into, agreements and arrangements with others which are not a party to this Agreement regarding the Poles covered by this Agreement. Nothing herein contained shall be construed as a limitation, restriction or prohibition against Licensor with respect to such other agreements or arrangements. The rights of Licensee shall at all times be subject to any present or future joint use or joint ownership arrangement between Licensor and any other party.

F. This Agreement does NOT create any right for Licensee to access or place facilities in Licensor central offices, conduit or to place wireless communication equipment on Poles. A separate agreement is required for any access to Licensor facilities other than those outlined in this Agreement.

3. DEFINITIONS.

Certain capitalized terms used in this Agreement are listed in and have the meaning as set forth in Exhibit A. Exhibit A is incorporated and made a part of this Agreement by reference.

4. TERM AND TERMINATION OF AGREEMENT

A. This Agreement shall become effective upon the Effective Date and if not terminated in accordance with the provisions of this Agreement, shall continue in effect for a term of one (1) year (“Initial Term”) and shall continue on a year –to – year basis. Notwithstanding the foregoing, any time after the Initial Term and anytime thereafter the rates, fees and charges set forth may be increased or decreased by written notice from Licensor to Licensee.

B. Either Party may terminate this Agreement for any reason after the Initial Term with at least thirty (30) day written notice to the other party. Licensor may terminate this Agreement in the event of default as set forth under Article 20 of this Agreement.

C. Upon termination of the Agreement in accordance with any of its terms, all outstanding Licenses in connection therewith shall terminate and shall be surrendered and Licensee shall immediately, and at its sole expense remove all Attachments located on Poles within sixty (60) days of date of termination.

5. TERMINATION OF LICENSES

A. In addition to other termination rights set forth in this Agreement, upon notice from Licensor to Licensee that Licensor has been advised by a governmental authority or private property owners that the use of any Poles is not authorized and is objected to by such governmental authority or private property owner, as the case may be or that any Poles is to be removed, sold or otherwise disposed of, Licensee shall, immediately remove its cables, equipment, and facilities at once from the affected Poles or shall make arrangements for the removal of its cable, equipment, and facilities from the affected portion of Licensor's Poles at Licensee's sole expense. If not so removed within sixty (60) days or such timeframe as stated on the Notice, Licensor shall have the right to remove Licensee's Attachments from Licensor's Poles at the cost and expense of Licensee and without any liability thereto.

B. Licensee may at any time remove its Attachments from any Poles of Licensor, but shall immediately give Licensor written notice of such removal and surrender of License in the form of a Notification of Surrender attached hereto as Exhibit C and incorporated by reference and made a part of this Agreement. If Licensee surrenders its License but fails to remove its Attachments from Licensor's Poles, Licensor shall have the right but not the obligation to remove Licensee's Attachments at Licensee's expense without any liability on the part of Licensor for damage or injury to Licensee's Attachments or interruption to Services. Licensee's obligations with regard to maintenance and fees continue until Attachments are removed from the Poles. In the event that Licensee's Attachments shall be removed from any Poles as provided by this Agreement, no Attachment shall again be made to such Poles unless

Licensee shall have first complied with all of the provisions of this Agreement as though no Attachment had previously been made.

6. RATES, FEES AND CHARGES.

A. All rates, charges and fees set forth in this Agreement and those shown in Exhibit D (Schedule of Rates, Fees, and Charges) shall be subject to and calculated in accordance with applicable law, and Licensor may in its sole discretion revise the rates, charges and fees as set forth in Exhibit D upon 30 day notice to Licensee. Exhibit D is incorporated and made a part of this Agreement by reference. The fees, rates and charges set forth in Exhibit D or elsewhere in this Agreement are effective during the term of this Agreement and subject to change as set forth herein.

B. Pole Attachment Fee. For the purpose of computing the annual Pole Attachment Fee due under this Agreement the Pole Attachment Fee shall be based each year upon the number of Poles where Licensor has issued a License as of the date of annual billing multiplied by the Attachment Rate set forth on Exhibit D, as may be modified by Licensor from time to time. If Licensee is a regulated cable system provider which begins to offer telecommunication Services, Licensee must notify Licensor within thirty (30) days of the change in use if it shall begin to use any attachment for telecommunication Services and Licensor may adjust the Attachment Rate and Pole Attachment Fee as appropriate consistent with the applicable FCC formula for telecommunication providers.

C. All charges for inspections, engineering, replacement or rearrangements of Licensee's Attachments from Licensor's Poles and, without limitation, any other work performed for Licensee shall be based upon the full cost and expense, including reasonable overhead, incurred by Licensor or its representative for performing such work for Licensee to include without limitation costs to transfer or moving of Licensor facilities and removal of old Poles. The cost to Licensee shall be determined in accordance with the regular and customary methods used by Licensor in determining such costs.

D. All other Attachment related inquiry, verification, application, administrative and miscellaneous rates, fees and charges shall be calculated and paid in accordance with Exhibit D and the terms of this Agreement.

E. Upon termination or surrender of a License granted hereunder, no refund of any Pole Attachment Fees shall be made and Licensee shall remain liable for all fees and charges set forth in this Agreement until Licensee has removed its Attachments.

7. PAYMENT, SECURITY BOND AND LIEN.

A. All bills for such other charges for work performed by Licensor and the fees set forth in the Agreement shall be payable upon presentment to Licensee, and shall be deemed delinquent if not paid within thirty (30) days after the date of the invoice.

B. Bond. Licensee shall furnish a bond or other security, and keep in place during the term of this Agreement, satisfactory to Licensor, the amount of \$5,000 or an amount equal to two (2) years of Pole Attachment Fees, whichever is greater, to guarantee the performance of Licensee obligations including payment of any such sums (including Unauthorized Attachment charges and liquidated damages) which may become due to Licensor arising out of this Agreement including, but not limited to rent, fees due hereunder or charges for work performed for the benefit of Licensee under this Agreement, including the

removal of Licensee's facilities upon termination of this Agreement by any of its provisions or upon termination of any License issued hereunder. Such bond shall include that Licensor received 30 days prior notice of cancellation. Cancellation of a bond shall be an event of default by Licensee. Upon signing this Agreement and prior to issuance of a License, Licensee shall furnish the bond to be sent to person identified in Exhibit E. Licensor may in its sole discretion change the bond amount or cancellation notice requirement from time to time upon at least thirty (30) day notice to Licensee. Licensor shall not be obligated to issue any License hereunder until Licensee has provided the bond as set forth herein.

C. Lien. Should Licensor under the terms and conditions of this Agreement remove Licensee's Attachments from Licensor's Poles, Licensor will deliver to Licensee the cable, equipment or facilities so removed upon payment by Licensee of the cost of removal, storage and delivery, and all other amounts due Licensor hereunder. Licensor is hereby given a lien on Licensee's cable, equipment or facilities attached to Licensor's Poles or removed therefrom, with power of public or private sale, to cover any amounts due Licensor under the provisions of this Agreement. Such liens shall not operate to prevent Licensor from pursuing, at its option, any other remedy in law, equity or otherwise, including any other remedy provided for in this Agreement.

8. ATTACHMENT REQUEST AND LICENSE PROCESS

A. Before Licensee shall have a right to place Attachments to any Poles of Licensor, Licensee shall make application for and receive a revocable, nonexclusive License which shall be in the form of a Licensor countersigned Application for Pole License (Exhibit B). Each Exhibit B Application for Pole License shall contain no more than twenty-five (25) Poles and Licensee may submit up to twelve (12) Exhibit B, Application for Pole License within a rolling thirty (30) day period. Licensor will process Applications for Pole Licenses in the order in which they are received; provided, however, that when Licensee has multiple Applications for Pole Licenses on file with Licensor, Licensee may designate its desired priority of completion with respect to all such Application for Pole Licenses. **Licensee shall not under any circumstances attach any equipment to any guy wires or anchors owned by Licensor.**

B. Application For Pole License and Engineering Survey. Licensee shall submit an Application for Pole License in the form of Exhibit B and shall include a drawing of the proposed route, the pole detail and contact information (name, telephone, facsimile, and email information). Upon receipt of a complete Application for Pole License, Licensor will conduct an engineering survey to determine whether and where Licensee's Attachment is feasible, and what Make Ready Work is required by Licensor or other existing attachers to accommodate Licensee's Attachment. Upon completion of the engineering survey, Licensor shall inform Licensee of its estimated make-ready charges for Licensor Make Ready Work ("Make Ready Estimate"). If during this process, Licensor determines the request is denied based on insufficient capacity or for reasons of safety, reliability and generally applicable engineering purpose Licensor shall inform Licensee that the Application for Pole License is denied together with the reason. All expenses incurred by Licensor in reviewing Licensee's Application for Pole License shall be borne by Licensee even if such request is denied by Licensor.

C. Advance Payment of Make Ready Work Estimate and Expedited Charges. If Licensee upon review of the Make Ready Estimate desires to proceed with the process to obtain a License from Licensor, Licensee shall submit payment in the amount of the Make Ready Estimate together with the Application Fee and engineering survey costs to Licensor within fourteen (14) days of receipt of the Make Ready Estimate and invoice for such amounts. Licensee shall be solely responsible for negotiating with existing attachers for Make-Ready Work relating to such other existing attacher facilities located on,

within or in Licensor's Poles and shall be responsible for paying all charges incurred in transferring or rearranging existing attacher facilities to accommodate the placement of Licensee's Attachment on, within or in Licensor's Poles. In the event, Licensee declines to proceed with the project Licensee shall reimburse Licensor any costs and expenses incurred by Licensor to date including but not limited to Application Fee, engineering and administrative expenses and costs.

D. Completion of Make Ready Work and Issuance of License. Licensor shall undertake to complete any Make Ready Work of its owned facilities upon receipt of Licensee's payment of the Make Ready Estimate. Upon completion of all Make Ready Work and receipt of all fees and charges due from Licensee to Licensor, Licensor shall issue Licensee an approved License which shall be in the form of a Licensor countersigned Application for Pole License. At that time Licensee will be considered to have been granted a License with respect to the Poles approved in the License and may attach to Licensor's Poles in accordance with the terms and conditions of this Agreement.

E. Licensee shall maintain a copy of all Application for Pole Licenses and approved Licenses. Licensor may provide upon request copies of the same to the extent available and Licensee shall reimburse Licensor for its costs in preparing and sending requested copies.

9. AUTHORITY FOR PLACEMENT OF ATTACHMENT

A. Before any placement of Attachments by Licensee, regardless of whether a License may have been issued, Licensee represents and warrants that it has the authority to maintain Attachments within public rights-of-way, or on private rights-of-way or on private property, and shall upon request provide a copy of documentation evidencing such right to Licensor. Licensee shall be solely responsible for obtaining all licenses, easements, authorizations, permits and consents from federal, state and local authorities or private land owners that may be required to place and maintain Attachments on Licensor's Poles.

B. Licensor and Licensee agree that neither party has the right to restrict or interfere with the other party's lawful access to and use of public right-of-way, including public right-of-way, which pass over property owned by either party. Except as otherwise specifically provided in this Agreement, Licensor and Licensee shall each be responsible for obtaining their own right-of-way and permission to use real or personal property owned or controlled by any governmental body or private entity or person.

C. Licensor may, without incurring any liability, remove Attachments of Licensee from Licensor's Poles, at Licensee's sole expense where in Licensor's sole judgment such removal is required in connection with the performance of Licensor's service obligation or the safety of Licensor's employees. Whenever such removal has been made, Licensee will be notified.

10. CONSTRUCTION AND MAINTENANCE

A. Licensee's Attachments shall be placed and maintained in accordance with the following:

- 1.** any and all Licensor requirements and specifications of Licensor, and
- 2.** the terms and conditions of this Agreement, and
- 3.** the National Electric Safety Code (most recent edition), and
- 4.** the National Electric Code (most recent edition), and

5. in compliance with any other rules or orders now in effect or that may hereafter be issued by any state utility commission or other authority (state, federal, local) having jurisdiction over including but not limited to Poles, rights-of-way, and Hazardous Materials.

Each of Section 10(A)(1-5) is incorporated by reference and made a part of this Agreement, and in the event of a conflict or difference between any of these specifications and requirements, the more stringent will apply. Licensee agrees to rearrange its Attachments, within a commercially reasonable timeframe, in accordance with changes in the standards referenced herein in this Section 10(A) of this Agreement, or if required by law.

B. Licensee shall, at its own expense, make and maintain its Attachments and use Licensor Poles in a safe condition and in thorough repair, and in a manner acceptable to Licensor, and so as not to conflict with the use of said Poles by Licensor or by other authorized users of said Poles, or interfere with other facilities thereon or which may from time to time be placed thereon. Licensee shall, at its sole expense, upon written notice from Licensor, relocate or replace its Attachments placed on said Poles or transfer them to substituted Poles that may be authorized by Licensor, or perform any other work in connection with said Attachments that may be required. Licensor shall give such written notice as is reasonable in the circumstances, provided, however, that in cases of emergency, as determined by Licensor in its sole discretion, Licensor may arrange to relocate, remove or replace Licensee Attachments placed on said Poles, transfer such Attachments to substituted Poles or perform any other work in connection with said Attachments that may be required in the maintenance, replacement, removal or relocation of said Poles or Licensor or existing attacher facilities thereon or which may be placed thereon, or for the service needs of Licensor, and Licensee shall reimburse Licensor for the expense thereby incurred. For the purpose of this Section, Licensee Attachments shall be understood to include Attachments of Licensee in space reserved for Licensor, or space which Licensor has the right to use, on poles of other companies with which Licensor now has or may hereafter have agreements for joint use and occupancy; and the use of such space by Licensee shall be subject to the terms and conditions of the agreements between Licensor and said other companies.

C. Licensee shall be responsible at all times for the condition of Licensee's Attachments and its compliance with the requirements, specifications, rules, regulations, ordinances and laws specified in this Agreement. Licensor shall have no duty to Licensee to inspect, monitor or maintain the condition of Licensee's Attachments (including, but not limited to, splices and other facilities connections) located on, within or in Licensor's Poles. Licensor may make periodic or spot inspections at any time of any part of Licensee's Attachments as Licensor determines reasonable or necessary in its sole judgment, pursuant to Section 16 of this Agreement.

D. Licensee shall not authorize any person or entity acting on Licensee's behalf ("Licensee Contractor") to perform any work on, within or in Licensor's Poles without first verifying, to the extent practicable, on each date when such work is to be performed and, that the condition of the Poles is suitable for the work to be performed. If Licensee or Licensee Contractor determines that the condition of the Poles is not suitable for the work to be performed, Licensee shall notify Licensor of the condition of the Poles in question and shall not proceed with construction activities until Licensee is satisfied that the work can be safely performed.

E. Licensee shall be solely responsible for paying all persons and entities that provide materials, labor, access to real or personal property, or other goods or services in connection with the construction and placement of Licensee's Attachments and for directing the activities of all Licensee Contractors while

they are physically present on, within or in the vicinity of Licensor's Poles. Licensee shall not permit any mechanic's lien, material man's lien, or any other lien, claim or security interest to attach to or encumber any of Licensor's real or personal property at any time.

F. Licensee's main line Attachments shall be tagged at maximum intervals of 300 feet so as to identify Licensee as the owner of the Attachment. Licensee shall place fiber wrap/ID at the specific Licensor Poles attaching point and at any aerial span splice location and/or slack loop. The tags shall be of sufficient size and lettering so as to be easily read from ground level.

11. OVERLASHING

A. Licensee may, upon notice to Licensor, overlash its own existing authorized Attachment and this does not constitute a separate Attachment, as it relates to the billing of Pole Attachment Fees, unless multiple/separate Attachment points are physically made at the Poles itself outside of the scope of a single Attachment. Such notice shall be in the form of an Exhibit B Application for Pole License, and any additional Attachments being installed on Poles, regardless of it being an overlash of existing Attachment or as a new Attachment, will require an engineering analysis to determine if the additional loading negatively impacts the Poles capacity. Any additional load which causes the Pole to exceed its rated capacity or no longer provides for ample ground clearance of the Attachments or other facilities will necessitate the need for the Licensee to pay any and all Make Ready Work necessary. Each overlash strand shall not exceed a 2" maximum diameter.

B. In no event shall Licensee allow a third party to overlash to Licensee's Attachments without prior notice to and consent from Licensor. Any third party must execute a License Agreement with Licensor and obtain a license thereunder.

12. MODIFICATIONS, ADDITIONS, REPLACEMENTS OR REARRANGEMENTS

A. Licensee shall not modify, overlash, add to, or replace Attachments on any Poles without first notifying Licensor in writing of the intended modification, addition or replacement at least thirty (30) days prior to the date the activity is scheduled to begin. The required notification shall include:

1. the date the activity is scheduled to begin including the Pole location and Pole number,
2. a description of the planned modification, addition, or replacement,
3. a representation that the modification, addition, or replacement will not require any space other than the space previously designated for Licensee's Attachments, and
4. a representation that the modification, addition, or replacement will not impair the structural integrity of the Poles involved.

B. Upon Licensor's receipt of a complete Exhibit B Application for Pole License, Licensor will perform, at Licensee's sole expense, a field check and if Licensor determine that the modification, addition, or replacement specified by Licensee in its notice will require more space than that allocated to Licensee or will require the rearrangements of, reinforcement of, replacement of, or an addition of support equipment to the Poles involved in order to accommodate Licensee's modification, addition, or replacement, Licensor will so notify Licensee and the parties will follow the Make Ready Work process

as set forth in Section 8 of this Agreement in order to obtain authorization for the modification, addition, or replacement of its Attachments.

C. Should Licensee request Licensor to expand capacity or purchase additional plant and should Licensor so agree, Licensee agrees to pay all cost and expenses thereby incurred by Licensor. If another party that has been granted a license joins in the request and will benefit from the expansion or purchase, Licensee agrees to pay a percentage of all costs proportionate to Licensee's share of the benefit received from the expansion or purchase, but Licensee shall be responsible for all costs and expenses not paid by the other party.

D. When multiple applications, including those of Licensee, are received by Licensor with respect to any Poles which must be replaced or rearranged to provide additional space prior to commencement of the work on such Poles, Licensor's facilities may need to be transferred in which case Licensee shall pay for all costs for such transfers.

E. In the event Licensor plans to modify or alter any Poles upon which Licensee has placed Attachments, Licensor, except in emergency situations, shall provide Licensee written notice of the proposed modification or alteration at least sixty (60) days prior to the time the proposed modification or alteration is scheduled to take place. Should Licensee decide to modify or alter Licensee's Attachments on Poles, Licensee shall so notify Licensor in writing at least thirty (30) days prior to the day the work is to begin. In such event, Licensee shall bear a proportionate share of the total costs incurred by Licensor to make Licensor Poles accessible.

F. In the event Licensor is required to move the location of, or replace, any Licensor Poles for reasons beyond its control, Licensee concurrently shall relocate Licensee's Attachments. Licensee shall be solely responsible for the costs of the relocation of Licensee's Attachments. When it is mutually agreed that it is in the best interest of Licensor and Licensee, Licensor may, after proper notification has been provided, transfer Licensee's Attachments at the same time that Licensor transfers its facilities and shall invoice Licensee for the actual costs incurred in performing the transfer of Licensee's Attachments.

13. EMERGENCY RESTORATION

A. In the event of an emergency, restoration procedures may be affected by the presence of Licensee's Attachments. While Licensor shall not be responsible for the repair of damaged Attachments, Licensor shall nonetheless control access to its Poles if the restoration is to be achieved in an orderly fashion.

B. Where Licensor and Licensee are involved in emergency restorations, access to Licensor's Poles will be controlled by Licensor according to the following guidelines.

1. Service Disruptions/Outages

- a) While exercising its right to first access, Licensor shall make all reasonable efforts to grant access to as many other entities with attachments as is reasonably safe.
- b) Where simultaneous access is not possible, Licensor will grant access on first come, first served basis.

2. Service Affecting Emergencies

- a) While exercising its right to first access, Licensor shall make all reasonable efforts to grant access to as many other entities with attachments as is reasonably safe.
- b) Where Licensor is unable to grant simultaneous access to all other entities with attachments, access will be granted according to the level of damage to the attachments of each entity and the likelihood that a given level of damage will result in service disruption. Where the likelihood that a service disruption will result is not clearly discernible, access will be on a first come, first served basis.

C. Without limiting any other indemnification or hold harmless provisions of this Agreement, Licensee agrees that any decision by Licensor regarding access to its Attachments, or any action or failure to act by Licensor, under this section shall not be the basis for any claim by Licensee against Licensor for any damage to Licensee's Attachments or disruption of Licensee's Services, or any other direct or indirect damages of any kind whatsoever incurred by Licensee.

14. FAILURE TO PLACE ATTACHMENTS

Once Licensee has been issued a License, Licensee shall have ninety (90) calendar days from the date of the License was issued to begin the placement of its Attachments on the Licensor Poles covered by the License. If Licensee has not begun placing its Attachments within the ninety (90) day period, Licensee shall so advise Licensor with a written explanation and notice for the delay. If Licensee fails to advise Licensor of its delay by notice thereof or if Licensee fails to act in good faith by not making a bona fide effort to begin placing its Attachments within the ninety (90) calendar days prescribed by this section, the License shall be automatically rescinded by Licensor and deemed null and void, and Licensee shall have no further right to place the Attachments pursuant to such voided License.

15. ABANDONMENT

Nothing in this Agreement shall prevent or be construed to prevent Licensor from abandoning, selling, assigning, or otherwise disposing of any Poles. Licensor shall notify Licensee of any sale, assignment, or other disposition of any Poles or other Licensor property used for Licensee's Attachments.

16. INSPECTIONS AND INVENTORIES

A. **Post construction and/or periodic inspection of Licensee Attachments.** Licensor shall have the right, but not the obligation, to make a post construction inspection and periodic inspections at any time of any part of Licensee's Attachments on Poles and any other associated facilities for the limited purpose of determining whether Licensee's Attachments are in compliance with the terms of this Agreement and any Licenses issued hereunder. Such inspections shall be conducted at Licensor's expense with the exception of (1) a post construction inspection, (2) follow-up inspection to confirm remedial action after an observed Licensee violation of the requirements of this Agreement; and (3) inspection of Licensee Facilities in compliance with a specific mandate of appropriate governmental authority, for which inspections the cost shall be borne solely by Licensee.

B. Inventories. Upon written notice to Licensee, the total number and location of Licensee's Attachments on Licensor's Poles may be determined, at Licensor's discretion, through a survey which may be made not more than once per calendar year by Licensor. If so requested, Licensee and /or any other entity owning or jointly using the Poles with Licensor may participate in the survey. The costs incurred by Licensor to conduct the survey shall be reimbursed to Licensor by Licensee upon demand by Licensor regardless of whether or not Licensee participates in the survey. If the Attachments of more than one licensee are surveyed, each such licensee shall contribute a proportionate share of the costs reimbursed to Licensor.

C. No Duty to Licensee. Neither the act of inspection or survey by Licensor of Licensee's Attachments nor any failure to inspect such Attachments shall operate to impose on Licensor any liability of any kind whatsoever or to relieve Licensee of any responsibility, obligations or liability under this Agreement, any License issued hereunder, or applicable law, or to any third party contractor, Licensee Contractor, or otherwise.

17. UNAUTHORIZED ATTACHMENTS

A. If any Licensee Attachment shall be found on Poles for which no License has been granted by Licensor pursuant to the terms of this Agreement ("Unauthorized Attachment"), Licensor, without prejudice to its other rights or remedies under this Agreement or otherwise, may:

1. impose charges as set forth herein, and
2. require Licensee to remove such Unauthorized Attachment or Licensor may remove such Unauthorized Attachment without liability and the expense of removal shall be borne by Licensee.

B. For the purpose of determining the charges, Licensee shall pay an amount per Unauthorized Attachment equal to the Pole Attachment Fee that would have applied if Licensee had properly obtained a License based upon the then current Attachment Rate for the number of years the Unauthorized Attachment have existed (or, if that cannot be determined, the number of years since the most recent inventory or five (5) years, whichever is less), plus interest at a rate the greater of 1.5% per month or the maximum allowed by law. In addition, if the Unauthorized Attachment is discovered during a survey where Licensee declined to participate an additional fee of \$100 per Unauthorized Attachment shall be charged to Licensee. Licensee agrees and acknowledges in the event of an Unauthorized Attachment actual damages would be difficult to determine and the charges described herein are liquidated damages, not penalties, and represent a fair and reasonable estimate of the damages which may be incurred by Licensor for Unauthorized Attachments on Licensor's Poles including wear and tear, lost revenue, increased maintenance and repair costs for having to work on a Pole where the owner of a facility is unknown, and the risk of liability for safety violations that may be the result of an Unauthorized Attachment.

C. Any such charge as set forth in Section 17(B) imposed by Licensor shall be in addition to its rights to any other sums due and payable, including without limitation Make Ready Work costs, the actual costs of any audit or survey which established the existence of the Unauthorized Attachment and to any claims to said fees.

D. No act by Licensor with regard to any unauthorized use shall be deemed as a ratification or the licensing of the unauthorized use, and if any License should subsequently be issued, after application and payment of all applicable fees therefore, said License shall not operate retroactively or constitute a waiver by Licensor of any of its rights or privileges under this Agreement or otherwise, and Licensee shall be subject to all liabilities, obligations and responsibilities of this Agreement in regard to said unauthorized use from its inception.

E. An Unauthorized Attachment shall include, but not limited to:

1. an Attachment to Poles which is not identified in any License issued in accordance with this Agreement;
2. an Attachment that occupies more space than that allocated to Licensee by Licensor in a License;
3. an Attachment that is not placed in accordance with the provisions of this Agreement or the appropriate License issued pursuant to this Agreement, unless Licensee can demonstrate to Licensor's reasonable satisfaction that said misplacement is not due to any act or omission of Licensee or Licensee's agents;
4. an addition or modification by Licensee to its pre-existing Attachment(s) that impairs the structural integrity of the involved Licensor Poles.
5. an Attachment that consists of facilities owned or controlled by, and for the use of a party other than Licensee that is overlashed to Licensee Attachments without approval by Licensor as required under this Agreement.

F. Once Licensor has notified Licensee of an Unauthorized Attachment. Licensee shall submit an Exhibit B Application for Pole License to request an authorization for the Attachment. An Exhibit B Application for Pole License submitted per this provision will be treated like any other Exhibit B Application for Pole License subject to this Agreement. Licensee will be responsible for all fees associated with an Exhibit B Application for Pole License (as identified in this Agreement). If an Exhibit B Application for Pole License is not received by Licensor within ten (10) days of Licensor's notice of an Unauthorized Attachment, Licensee has sixty (60) days from the date of the Unauthorized Attachment notification to vacate the Pole. If Licensee fails to remove Licensee's facilities within such sixty (60) day period, Licensor shall have the right to remove Licensee's facilities at Licensee's expense and without any liability on the part of Licensor for damage or injury to Licensee's facilities or disruption of Licensee's Services.

18. COMPLIANCE WITH LAW, ASSUMPTION OF RISK, AND DISCLAIMER OF WARRANTIES

A. Notwithstanding anything to the contrary in this Agreement, Licensee shall ensure that any and all activities it undertakes pursuant to this Agreement shall comply with all applicable laws, including, without limitation, all applicable provisions of:

1. Workers' compensation laws

2. Unemployment compensation laws
3. The Federal Social Security Law
4. The Fair Labor Standards Act, and
5. All laws, regulations, rules, guidelines, policies, orders, permits and approvals or any governmental authority relating to environmental matters including but not limited to Hazardous Materials and/or Occupational Safety and Health Act (“OSHA”).

B. LICENSEE ACKNOWLEDGES AND AGREES THAT LICENSOR DOES NOT MAKE ANY REPRESENTATION OR WARRANTIES AS TO THE CONDITION OR SAFETY OF LICENSOR’S POLES ANY ASSOCIATED FACILITIES AND EQUIPMENT ON, WITHIN OR SURROUNDING THE SAME, OR THE PREMISES SURROUNDING THE SAME, LICENSEE HEREBY ASSUMES ALL RISKS OF ANY DAMAGE. INJURY OR LOSS OF ANY NATURE WHATSOEVER CAUSED BY OR IN CONNECTION WITH THE USE OF POLES AND ASSOCIATED FACILITIES AND EQUIPMENT ON, WITHIN OR SURROUNDING THE SAME, AND THE PREMISES SURROUNDING THE SAME AND LICENSEE IS SOLELY RESPONSIBLE FOR ALL ALLEGED DAMAGES CLAIMED BY THIRD PARTIES ACCESSING OR WORKING ON OR NEAR LICENSOR’S POLES.

C. EXCEPT AS OTHERWISE PROVIDED HEREIN, LICENSOR MAKES NO WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, ALL OF WHICH ARE HEREBY EXPRESSLY DISCLAIMED, WITH REGARD TO THIS AGREEMENT AND ANY LICENSE ISSUED HEREUNDER INCLUDING, WITHOUT LIMITATION, ACCESS TO LICENSOR’S POLES OR OTHER FACILITIES.

19. LICENSEE CONTRACTOR QUALIFICATIONS

- A.** The parties acknowledge that from time to time Licensee may use a Licensee Contractor to perform work for Licensee on, within or in Licensor’s Poles.
- B.** Licensee represents and warrants that any of its employees or Licensee Contractors shall not climb or work on any of Licensor’s Poles, or work within Licensor’s Right-Of-Way unless such person has the training, skill, and experience required to recognize potentially dangerous conditions relating to Poles and to perform the work safely.
- C.** Licensee assumes all risk of Licensee Contractors and agrees to indemnify, defend and hold harmless Licensor from all claims, losses, damages and liabilities, costs and expenses (including, but not limited to, reasonable attorney’s fees) associated thereto in accordance with the indemnification provision of this License Agreement.
- D.** When Licensee Contractors are working on, within or in the vicinity of any part of Licensor’s Poles or Right-Of-Way, all such Licensee Contractors shall follow procedures which Licensee deems appropriate for the protection of persons and property. Licensee shall be responsible at all times for determining and implementing the specific steps required to protect persons and property at the site. Licensee will provide all traffic control and warning devices required to protect pedestrian and vehicular

traffic, workers and property from danger. Licensee has sole responsibility for the safety of all its employees and Licensee Contractors, for the safety of bystanders, and for insuring that all operations conform to terms and conditions set forth in this Agreement. Licensor reserves the right to suspend Licensee's activities on, within or in the vicinity of Licensor's Poles or Right-Of-Way if, in Licensor's sole judgment, any hazardous condition arises due to the activity (including both acts and omissions) of any Licensee Contractor or Licensee employee, which suspension shall cease when the condition has been rectified.

E. Licensee represents and warrants that all Licensee Contractors shall maintain the same insurance coverage and limits as are required of Licensee under this Agreement, and if not Licensee's insurance will provide such coverage.

F. Licensee acknowledges that all Licensee Contractors are not Licensor's employees or agents and Licensee assumes full responsibility for their actions or omissions to act. Licensee shall be solely responsible for the payment of compensation of Licensee's employees, contractors or agents assigned to perform work hereunder and such employees, contractors and agents shall be informed that they are not entitled to the provision of any Licensor benefits. Licensor shall not be responsible for payment of workman's compensation, disability benefits, and unemployment insurance or for withholding or paying employment related taxes for any employee of Licensee, but such responsibility shall be solely that of Licensee. In the event that any federal, state or local government agency, any court or any other applicable entity determines that the personnel provided by Licensee or any permitted Licensee Contractor are employees of Licensor for any purpose, Licensee agrees to indemnify, defend and save harmless Licensor from all liabilities, costs, and expenses (including, but not limited to, reasonable attorney fees) associated with such determination in accordance with the indemnification provision of this License Agreement.

G. Any work by Licensee Contractors on, within or in Licensor's Poles or Right-Of-Way shall be done only when specific authorization for such work has been obtained in writing in advance from Licensor pursuant to the terms and conditions of this Agreement. The parties agree that all work shall be performed according to existing industry standards and practices and the requirements and specifications set forth in this Agreement and any License issued hereunder.

20. DEFAULT

A. In addition to other events of defaults defined anywhere else in this Agreement, any one of the following shall be deemed the occurrence of a default under this Agreement:

1. failure by Licensee to pay when due any fee or other sum required to be paid under the terms of this Agreement.
2. failure by either party to perform or observe any other term, condition, covenant, obligation, or provision of this Agreement and such default continues for a period of thirty (30) days after written notice thereof from the other party (provided that if such default is not curable within a thirty (30) day period, the period may be extended if the party substantially commences to cure such default and proceeds diligently thereafter to effect such cure).

3. the filing of any tax or lien against Poles because of any act or omission by Licensee which is not bonded or discharged within thirty (30) days of the date of notice to Licensee that such lien has been filed;
4. Licensee's voluntary or involuntary bankruptcy;
5. Licensee's use or maintenance of its Attachments in violation of any law or regulation, or in aid of any unlawful act or undertaking;
6. if any authorization which may be required of Licensee by any governmental or private authority for the placement, operation, or maintenance of Licensee's Attachments is denied or revoked.

B. In the event of a default and subject to any other applicable provision of this Agreement, the non-defaulting party, without any further notice to the defaulting party (except where expressly provided for below or required by applicable law), may do any one or more of the following:

1. perform on behalf and at the expense of the defaulting party, any obligation of the defaulting party under this Agreement which the defaulting party has failed to perform and of which the non-defaulting party shall have given the defaulting party notice, the cost of which performance shall be paid by the defaulting party to the non-defaulting party upon demand;
2. terminate this Agreement by giving sixty (60) days written notice of such termination to Licensee and remove Licensee's Attachments and store Licensee's facilities in a public warehouse or elsewhere at the expense of and for the account of Licensee without Licensor being deemed guilty of trespass or conversion, and without Licensor becoming liable for any loss or damages to Licensee occasioned thereby; or
3. exercise any other legal or equitable right or remedy that the non-defaulting party may have.

C. The defaulting party shall repay to the non-defaulting party upon demand any costs and expenses incurred by the non-defaulting party (including, without limitation, reasonable attorneys' fees) in successfully enforcing this Agreement.

D. Upon termination of this Agreement by the non-defaulting party, the defaulting party shall remain liable to the non-defaulting party for any and all fees, other payments and damages which may be due or sustained in accord with this Agreement prior to such termination, all reasonable costs, fees and expenses, including, without limitation, reasonable attorney' fees incurred by the non-defaulting party in pursuit of its remedies hereunder.

E. All rights and remedies of the non-defaulting party set forth in this Agreement shall be cumulative and none shall exclude any other right or remedy, now or hereafter allowed by or available under any statute, ordinance, rule of court, or the common law, either at law or in equity, or both.

21. INDEMNIFICATION AND LIMITATION OF LIABILITY

A. Licensee shall compensate Licensor for the full actual loss, damage or destruction of Licensor's property that in any way arises from or is related to this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation, or maintenance of Licensee's Attachments).

B. Licensee agrees to defend, indemnify, protect and hold harmless Licensor and its officers, directors, employees, shareholders, successors, assigns, agents, affiliates, representatives, partners, and contractors from and against any and all claims, actions, administrative proceedings (including, without limitation, informal proceedings), judgments, damages, penalties, fines, cost, liabilities, interests, or loss, including, without limitation, reasonable attorneys' fees and expenses, consultant fees, and expert fees, together with all other costs and expenses of any kind or nature suffered by or asserted against Licensor in any way arising out of or connected with this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation or maintenance of Licensee's Attachments, unless caused solely by the negligence or willful misconduct of Licensor or Licensor's affiliates, agents, officers, employees and assigns). Licensee expressly assumes all liability for actions by its affiliates, agents, officers, employees, or Licensee Contractors and expressly waives any immunity from the enforcement of this indemnification provision that might otherwise be provided by workers' compensation law or by other state or federal laws.

C. Without limiting any of the foregoing, Licensee assumes all risk of, and agrees to relieve Licensor of any and all liability for, loss or damage (and the consequences of loss or damage) to any facilities placed on Licensor's property and any other financial loss sustained by Licensee, except to the extent caused by the sole negligence or willful misconduct on the part of Licensor or Licensor's agents, officers, employees, and assigns.

D. Without limiting the foregoing, Licensee expressly agrees to indemnify, defend, and hold harmless Licensor and Licensor's agents, officers, employees and assigns from any and all claims asserted by end users/customers of Licensee in any way arising out of or in connection with this Agreement or Licensee's Attachments, except to the extent caused solely by the negligence or willful misconduct of Licensor or Licensor's agents, officers, employees, and assigns, or its contractors.

E. Notwithstanding anything to the contrary in this Agreement, Licensee further shall indemnify and hold harmless Licensor, its agents, officers, employees, and assigns from and against any claims, liabilities, losses, damages, fines, penalties, and costs (including, without limitation, reasonable attorneys' fees) whether foreseen or unforeseen, which the Licensor suffers or incurs because of:

1. any discharge of Hazardous Materials resulting from acts or omissions of Licensee, Licensee Contractors or Licensee's predecessor in interest;
2. acts or omissions of Licensee, its agents, employees, Licensees, or representatives in connection with any cleanup required by law, or
3. failure of Licensee or Licensee Contractors to comply with Environmental, Safety and Health Laws.

F. Licensee shall indemnify, protect, and hold harmless Licensor from and against any and all claims for libel and slander, copyright and/or patent infringement arising directly or indirectly by reason of installation of Licensee's Attachments pursuant to this Agreement.

G. In the event of any claim, demand or litigation specified the indemnity provision, the party to be indemnified (the "Indemnified Party") shall give prompt notice to the other party (the "Indemnifying Party") of such claim, demand or litigation. The Indemnifying Party shall have sole control of the defense of any action or litigation on such a claim or demand (including the selection of appropriate counsel) and all negotiations for the settlement or compromise of the same, except that the Indemnifying Party may not make any non-monetary settlement or compromise without the Indemnified Party's consent, which consent shall not be unreasonably withheld. The Indemnified Party shall cooperate with the Indemnifying Party in the defense and/or settlement of any claim, demand or litigation. Nothing herein shall be deemed to prevent the Indemnified Party from participating in the defense and/or settlement of any claim, demand or litigation by the Indemnified Party's own counsel at the Indemnified Party's own expense.

H. NOTWITHSTANDING ANYTHING TO THE CONTRARY CONTAINED IN THE AGREEMENT, NEITHER PARTY SHALL BE LIABLE TO THE OTHER PARTY FOR CONSEQUENTIAL, INCIDENTAL, PUNITIVE, EXEMPLARY OR INDIRECT DAMAGES SUFFERED BY SUCH PARTY OR BY ANY SUBSCRIBER, CUSTOMER OR PURCHASER OF SUCH PARTY FOR LOST PROFITS OR OTHER BUSINESS INTERRUPTION DAMAGES, WHETHER BY VIRTUE OF ANY STATUTE, IN TORT OR IN CONTRACT, UNDER ANY PROVISION OF INDEMNITY, OR OTHERWISE, REGARDLESS OF THE THEORY OF LIABILITY UPON WHICH ANY SUCH CLAIM MAY BE BASED OR WHETHER IT (a) HAS BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES OR (b) IS NEGLIGENT.

22. INSURANCE

A. Licensee shall obtain and maintain, in full force and effect at all times, during operations covered by this Agreement, such minimum insurance as will cover the obligations and liabilities of Licensee, its agents, and its employees which may arise from the operations under this Agreement. Insurance shall have limits of not less than Commercial General Liability policy of minimum limits of:

General Aggregate	\$ 2,000,000 per policy period
Products/Completed Operations Aggregate	\$ 2,000,000 per policy period
Personal Injury/Advertising	\$ 2,000,000 per occurrence
Each Occurrence	\$ 2,000,000 per occurrence
Fire Legal Liability	\$ 50,000 any one fire

B. The policy will be endorsed to show the above aggregate limits applying to "each" job site or, as an alternative, the General Aggregate will be increased to \$4,000,000 per policy period. Policy will also specifically state the coverage applies to all operations conducted by the Licensee, its employees, or agents on behalf of Licensee or subsidiary.

C. Where the performance of the work involves structural property, underground property, or blasting, Licensee's Commercial General Liability insurance policy shall provide coverage to the insured for legal liability arising from operations under this Agreement for property damage:

1. arising out of blasting,
2. arising out of collapse of, or structural injury to, any building or structure or
3. To underground facilities and utilities.

D. Other general liability forms are acceptable in lieu of the Commercial General Liability Form however they are not to be used without written approval from Licensor.

1. Business Automobile Liability policy with minimum limits of:

Bodily Injury	\$2,000,000 per accident
Property Damage	\$ 2,000,000 per accident
OR	
Combined Single Limit	\$ 2,000,000 per accident

The policy will be issued using symbol "1 - any auto" coverage.

2. Workers Compensation:

Part 1 - Medical Benefits Statutory

Part 2 - Employer's Liability as indicated:

Bodily Injury by Accident	\$ 1,000,000 each accident
Bodily Injury by Disease	\$ 1,000,000 each employee
Bodily Injury by Disease	\$ 1,000,000 policy limit

E. The policy will show the state in which operation on behalf of the Licensee and/or subsidiary is being conducted. For operations conducted within monopolistic (state fund) states, Licensee will furnish a certificate of compliance from the appropriate state fund administrator.

F. In each and every policy except workers' compensation, Licensor and its subsidiaries shall be named an "additional insured" with respect to activities performed on behalf of the Licensee and its subsidiaries.

G. Coverage provided by the policies listed in this paragraph will be issued by an insurance company, licensed in the state in which operations on behalf of the Licensee are to be conducted. It is acceptable to use both primary and excess/umbrella policies to obtain necessary limits. The worker's compensation policy must contain a waiver of subrogation clause.

H. Licensee will furnish to Licensor, a certificate evidencing insurance coverage under sub-paragraphs 22(A) and (D). Such certificate or Licensee shall provide for a thirty (30) day prior notice to the Licensor of any cancellation or material changes in coverage and shall be signed by a legal representative of the issuing insurance company. The certificate of insurance shall be sent to Licensor's contact identified in Exhibit E.

I. The provisions of sub-paragraphs 22 (A) and (D) shall also apply to all Licensee Contractors and Licensee shall be responsible for their compliance herewith.

23. NOTICES

Any and all notices to a party required or permitted under this Agreement shall be in writing and shall be: (a) delivered personally; (b) delivered by express overnight delivery service; (c) mailed, via certified mail or first class U.S. Postal Service, with postage prepaid, and a return receipt requested; or (d) delivered by electronic mail; provided that a paper copy is also sent via methods (a), (b), or (c) of this Section. Notices will be deemed given as of the earliest of: the date of actual receipt; the next business day when sent via express overnight delivery service; five (5) calendar days after mailing in the case of first class or certified U.S. Postal Service, or on the date set forth on the confirmation produced by the sent confirmation when sent prior to 5:00 p.m. in the recipient's time zone, but the next business day when delivered at 5:00 p.m. or later in the recipient's time zone. Notices will be addressed to the parties as set forth in Exhibit E as may be updated in writing by the parties from time to time in accordance with method set forth under this Section 23.

24. CONFIDENTIALITY

Neither party shall at any time disclose, provide, demonstrate or otherwise make available to any third party any of the terms or conditions of this Agreement or any materials provided by either party specifically marked as confidential, except upon written consent of the other party, or as may be required by applicable law or governmental authorities. Notwithstanding the foregoing, nothing in this Section shall prevent disclosure to a party's authorized legal counsel who shall be subject to this confidentiality section, nor shall it preclude the use of this Agreement by the parties to obtain financing, to make or report matters related to this Agreement in any securities statements, or to respond to any requests by governmental or judicial authorities; provided, however, that any such disclosure shall be limited to the extent necessary, and shall be made only after attempting to obtain confidentiality assurances. Notwithstanding the foregoing, prior to making any disclosure in response to a request of a governmental authority or legal process, the party called upon to make such disclosure shall provide notice to the other party of such proposed disclosure sufficient to provide the other with an opportunity to timely object to such disclosure. Notwithstanding the foregoing, Licensor may, without notice to Licensee: (i) negotiate or enter into any agreement with any other person(s) or entity(ies) that is identical or similar to this Agreement; and (ii) provide the text of all or part of this Agreement to any other party, so long as Licensor shall redact therefrom all references to Licensee and shall not associate such text with Licensee or identify Licensee as having agreed to such text or terms.

25. DISPUTE RESOLUTION

A. Except in the case of:

1. a suit, action, or proceeding by one party to compel the other party to comply with its obligation to indemnify the other party pursuant to this Agreement, or
2. a suit, action or proceeding to compel either party to comply with the dispute resolution procedures set forth in this section, the parties agree to use the following procedure to resolve any dispute, controversy, or claim arising out of or relating to this Agreement or its breach.

B. At the written request of a party, each party shall designate a knowledgeable, responsible representative to meet and negotiate in good faith to resolve any dispute, controversy, or claim arising

under this Agreement. The parties intend that these negotiations be conducted by non-lawyer, business representatives. The substance of the negotiations shall be left to the discretion of the representatives. Upon mutual agreement, the representatives may utilize other alternative nonbinding dispute resolution procedures such as mediation to assist in the negotiations. Discussions and correspondence between the representatives for the purposes of these negotiations shall be treated as confidential, undertaken for purposes of settlement, shall be exempt from discovery and production, and shall not be admissible in any subsequent proceeding without the concurrence of all parties. Documents identified in or provided during such negotiations, which are not prepared for purposes of the negotiations, shall not be so exempt and may, if otherwise admissible, be admitted as evidence in any subsequent proceeding.

C. If a resolution of the dispute, controversy or claim is not reached within ninety (90) days of the initial written request referred to in this Section 25, the dispute, controversy, or claim may be filed with the State utility commission or the Federal Communication Commission, if applicable, for review and determination, provided the party invoking the commission's intervention process has in good faith negotiated, or attempted to negotiate, with the other party pursuant to this Section 25.

D. Except as otherwise provided in this Agreement under the Indemnification or Default provision or elsewhere, each party shall bear its own costs, including attorneys' fee, incurred in connection with any of the foregoing procedures. A party seeking discovery shall reimburse the responding party the cost of reproducing documents (to include search time and reproduction time costs).

26. TAXES

Each party shall pay all taxes and assessments lawfully levied on its own property and services subject to this Agreement.

27. WAIVER

Failure by either party to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

28. NO THIRD PARTY BENEFICIARIES

Except as otherwise provided in this Agreement, this Agreement is intended to benefit only the parties and may be enforced solely by the parties, their successors in interest or permitted assigns. It is not intended to, and shall not, create rights, remedies or benefits of any character whatsoever in favor of any persons, corporations, associations, or entities other than the parties, except as provided herein.

29. FORCE MAJEURE

Neither party shall be liable for any delay or failure in performance of any part of this License Agreement or License issued hereunder from any cause beyond its reasonable control and without its fault, omission or negligence, such as acts of God, acts of civil or military authority, embargoes, epidemics, war, terrorist acts, riots, insurrections, fires, explosions, earthquakes, nuclear accidents, floods, power blackouts, labor strikes, lockouts or work stoppages or severe weather ("Force Majeure Event"). In the event of a Force Majeure Event, upon giving prompt notice to the other party, the due date for performance by the affected party of its original obligation(s) shall be extended by a term equal to the

time lost by reason of the Force Majeure Event. In the event that the affected party is able to partially perform its obligations, it shall perform its obligations at a performance level no less than that which it uses for its own operations.

30. ASSIGNMENT

Licensee shall not assign; transfer or sublet the privileges hereby granted, or sell, lease or otherwise permit the use of its facilities on or any part thereof (all of the foregoing being "Transfers"), without prior consent in writing of Licensor. No such consent granted by Licensor shall be effective until Licensee's assignee, sublessee or other transferee has agreed, on an enforceable separate document signed and delivered to Licensor, to assume all obligations and liabilities of Licensee under this Agreement. Licensor may condition such consent upon the assignee's sublessee's or transferee's agreement to reasonable additional or modified terms or conditions. If there is a change of control of Licensee, then Licensor shall have the right, in its reasonable discretion, immediately to terminate this Agreement in its entirety without further liability. Licensor may assign or otherwise transfer this Agreement or any of its rights and interests to any firm, corporation or individual, without the prior consent of Licensee.

31. APPLICABLE LAW

This Agreement, and the rights and obligations contained in it, shall be governed and construed under the laws of the state in which the Attachments hereunder are to be located. The terms and conditions of this Agreement shall be subject to any and all applicable laws, rules, regulations or guidelines now in effect and that subsequently may be prescribed by any federal, state or local governmental authority. To the extent required by any such prescribed law, rule, regulation or guideline, the Parties agree to modify, in writing, the affected term(s) and conditions(s) of this Agreement to bring them into compliance with such law, rule, regulation or guideline. Should any term of this Agreement be determined by a court or agency with competent jurisdiction to be unenforceable, all other terms of this Agreement shall remain in full force and effect.

32. WAIVER OF JURY TRIAL

Licensor and Licensee each expressly waive its right to a jury trial.

33. ENTIRE AGREEMENT, MODIFICATIONS, SURVIVAL AND CONFLICTS AND TARIFFS

A. This Agreement cancels and supersedes all previous agreements whether written or oral, except for any sums due thereunder, between Licensor and Licensee with respect to the Licensee's Attachments to Licensor's Poles; and there are no other provisions, terms or conditions to this Agreement except as expressed herein. All currently effective Licenses and authorizations for Attachments granted pursuant to such previous agreements shall continue in effect subject to the terms and conditions of this Agreement.

B. This Agreement may be amended or supplemented at any time only upon written agreement by the parties hereto. Notwithstanding the foregoing, all Exhibits, fees, Licensor procedures and specifications may be modified by Licensor upon thirty (30) day notice to Licensee.

C. Notwithstanding the termination of this Agreement for any reason, Section 18 Compliance with Laws, Assumption of Risk and Disclaimer of Warranties, Section 21 Indemnification and Limitation of

Liability, Section 22 Insurance, Section 24 Confidentiality and any other provision intended to survive, shall survive termination to the maximum extent permitted under applicable law. Notwithstanding any provisions to the contrary, all rights, remedies, or obligations which arose or accrued prior to the termination or expiration of the terms hereof shall survive and be fully enforceable for the applicable statute of limitations period.

D. It is the intent of the parties that the terms and conditions of this Agreement and any applicable Licensor's state tariffs be construed as being consistent where possible. However, in the event of a conflict or difference between the terms and conditions of this Agreement and Licensor's state tariff, the terms of the applicable state tariff shall control.

34. AUTHORITY AND COUNTERPARTS AND ELECTRONIC SIGNATURES

A. Each party represents and warrants that it is a corporation duly organized, validly existing and in good standing under the laws of the state in which the obligations under this License Agreement are to be performed. Each party warrants that it has full power and authority to execute and deliver this License Agreement and to perform its obligations hereunder.

B. This Agreement may be executed using facsimile or electronic signatures and such facsimile or electronic version of the Agreement shall have the same legally binding effect as an original paper version. This Agreement may be executed in counterparts, each of which shall be deemed an original.

EXHIBIT A **DEFINITIONS**

“Application for Pole License” - A written request submitted in the form of Exhibit B from Licensee to Licensor requesting authorization to attach Licensee owned facilities to Poles in accordance with this Agreement.

“Attachment(s)” – any facilities, cables or equipment attached to Poles or any other property owned or controlled by Licensor.

“Effective Date” - is the date this Agreement is last signed by the parties.

“Force Majeure Event” – shall have the meaning set forth in Section 29 of the Agreement.

“Hazardous Materials” -

Any substance, material or waste now or hereafter defined or characterized as hazardous, toxic or dangerous as defined by the Comprehensive Environmental Response, Compensation and Liability Act (“CERCLA”) of 1980, as amended, and other federal, state, and local health, safety, and environmental laws, ordinances, statutes, and rules, including but not limited to the Occupational Safety and Health Act (“OSHA”).

Any substance, material or waste now or hereafter classified as a contaminant or pollutant under any law, rules, ordinance, or authority.

Any other substance, material or waste, the manufacture, processing, distribution, use, treatment, storage, placement, disposal, removal or transportation of which is now or hereafter subject to regulation under any law, ordinance, statute, rule or regulation of any governmental body or authority.

“License” – is the specific nonexclusive and revocable permission from Licensor, in the form of a Licensor countersigned and returned Application for License, to Licensee authorizing Licensee to attach its facilities as applied for to Licensor Poles in accordance with this Agreement.

“Licensee Contractors” - shall have the meaning set forth in Section 10(D) of the Agreement.

“Make Ready Estimate” – is Licensor’s estimated cost to perform Make Ready Work on Licensor’s facilities on Poles to accommodate Licensee’s Attachment as requested in an Application for Pole License.

“Make Ready Work” - all Licensor, joint owner or other existing attacher work to prepare Licensor’s Poles and related facilities for the requested Attachment of Licensee’s facilities but not the actual placement of Attachments or administrative activities related to inquiries, verifications, requests or applications.

“Overlashing or overlashed” – lashing of an additional Licensee owned cable to Licensee’s own existing cable and/or strand attached to a Pole as set forth in Section 11 of this Agreement.

“Pole(s)” - a pole owned solely or jointly by Licensor or Poles owned by others to the extent that and for so long as Licensor has the right to permit others to be attached in the communications space.

“Pole Attachment Fee” - the fee paid annually per Attachment on a Pole. For billing purposes, a single Attachment includes the point of Attachment and all facilities located in the usable space on the Poles in the space assigned to Licensee (typically six inches above and six inches below the point of Attachment). If Licensee occupies more than one foot of usable space on Poles, separate Pole Attachment Fees shall apply to each one foot of space occupied.

“Right-of-Way” - right-of-way owned or controlled by Licensor.

“Unauthorized Attachment” – shall have the meaning set forth in Section 17(A) and 17(E) of the Agreement.

Anita:

Good to hear from you. The person that you want to speak with is Michelle McLaughlin. I have copied her on this response. She negotiates and manages our pole agreements and can provide you with our template for Kentucky.

I assume that you are asking so that MetroNet can begin the process of negotiating a pole attachment agreement with us in connection with its expansion into Lexington. Congratulations on the announcement.

Hope you have a great Thanksgiving!

ATTACHED AND INCORPORATED EXHIBITS

EXHIBIT A – DEFINITIONS

EXHIBIT B – FORM APPLICATION FOR POLE LICENSE

EXHIBIT C – NOTIFICATION OF SURRENDER OF LICENSE

EXHIBIT D – SCHEDULE OF RATES, FEES AND CHARGES

EXHIBIT E – NOTICE CONTACTS AND ADDRESSES

1. PARTIES.

This Pole Attachment License Agreement (“Agreement”) is entered into as of the date last signed by all the parties (“Effective Date”) by and between Windstream Kentucky East, LLC, a Windstream company organized and existing under the State of Delaware (“Licensor”), and [REDACTED], a company organized and existing under the State of [REDACTED] (“Licensee”). Licensor and Licensee may sometimes be referred to in this Agreement individually as a “party” and collectively as the “parties”.

2. SCOPE.

A. The purpose of this Agreement is to set forth the rates, terms, conditions, and procedures under which the Licensor will provide Licensee access to Licensor’s Poles (as defined herein) in the State of Kentucky for the purpose of Licensee attaching wireline facilities.

B. The parties acknowledge that Licensor is entering into this Agreement because Licensee has represented it is a regulated "telecommunications carrier" or “cable television system” provider as such terms are defined in the Communications Act of 1934, as amended (hereinafter the "Communications Act") and desires to provide telecommunications service or cable service (“Services”), as defined in the Communications Act; and that Licensee is authorized to provide these Services under its franchise or other lawful authority within its service area where Licensor owns Poles. In the event Licensee no longer has the status as a “telecommunications carrier” or “cable television system” provider or the authority to offer these Services in the state where the Poles are located, Licensor shall have the right to immediately terminate this Agreement and require Licensee to remove all of its facilities from Licensor’s Poles. **As a condition precedent to entering into this Agreement, Licensee shall submit to Licensor a copy of its certification evidencing its status as either a regulated telecommunication carrier or cable television system provider, and until such documentation is provided to Licensor, Licensor shall not be obligated to enter into this Agreement.**

C. Subject to the provisions of this Agreement, Licensor will issue to Licensee for any lawful communications purpose, revocable, nonexclusive Licenses authorizing the placement of Licensee's Attachment to Licensor's Poles.

D. No use, however extended, of Licensor's Poles nor payment of any fees or charges required under this Agreement or License issued under this Agreement shall create or vest in Licensee any ownership or property rights in said Poles, but Licensee's rights therein shall be and remain a mere license. Nothing herein contained shall be construed to compel Licensor to construct, retain, extend, place, or maintain any facilities not needed for its own service requirements, unless otherwise required by law. Nothing contained in this Agreement or in any License issued hereunder shall in any way affect, restrict or impair the right of Licensor to convey, transfer, mortgage, or assign to any other person or entity any interest in real or personal property, including any Poles in which Licensee has attached or placed Licensee’s Attachments pursuant to Licenses issued under this or other license agreements.

E. Licensee recognizes that Licensor has entered into, or may in the future enter into, agreements and arrangements with others which are not a party to this Agreement regarding the Poles covered by this Agreement. Nothing herein contained shall be construed as a limitation, restriction or prohibition against Licensor with respect to such other agreements or arrangements. The rights of Licensee shall at all times be subject to any present or future joint use or joint ownership arrangement between Licensor and any other party.

F. This Agreement does NOT create any right for Licensee to access or place facilities in Licensor central offices, conduit or to place wireless communication equipment on Poles. A separate agreement is required for any access to Licensor facilities other than those outlined in this Agreement.

3. DEFINITIONS.

Certain capitalized terms used in this Agreement are listed in and have the meaning as set forth in Exhibit A. Exhibit A is incorporated and made a part of this Agreement by reference.

4. TERM AND TERMINATION OF AGREEMENT

A. This Agreement shall become effective upon the Effective Date and if not terminated in accordance with the provisions of this Agreement, shall continue in effect for a term of one (1) year (“Initial Term”) and shall continue on a year –to – year basis. Notwithstanding the foregoing, any time after the Initial Term and anytime thereafter the rates, fees and charges set forth may be increased or decreased by written notice from Licensor to Licensee.

B. Either Party may terminate this Agreement for any reason after the Initial Term with at least thirty (30) day written notice to the other party. Licensor may terminate this Agreement in the event of default as set forth under Article 20 of this Agreement.

C. Upon termination of the Agreement in accordance with any of its terms, all outstanding Licenses in connection therewith shall terminate and shall be surrendered and Licensee shall immediately, and at its sole expense remove all Attachments located on Poles within sixty (60) days of date of termination.

5. TERMINATION OF LICENSES

A. In addition to other termination rights set forth in this Agreement, upon notice from Licensor to Licensee that Licensor has been advised by a governmental authority or private property owners that the use of any Poles is not authorized and is objected to by such governmental authority or private property owner, as the case may be or that any Poles is to be removed, sold or otherwise disposed of, Licensee shall, immediately remove its cables, equipment, and facilities at once from the affected Poles or shall make arrangements for the removal of its cable, equipment, and facilities from the affected portion of Licensor's Poles at Licensee's sole expense. If not so removed within sixty (60) days or such timeframe as stated on the Notice, Licensor shall have the right to remove Licensee's Attachments from Licensor's Poles at the cost and expense of Licensee and without any liability thereto.

B. Licensee may at any time remove its Attachments from any Poles of Licensor, but shall immediately give Licensor written notice of such removal and surrender of License in the form of a Notification of Surrender attached hereto as Exhibit C and incorporated by reference and made a part of this Agreement. If Licensee surrenders its License but fails to remove its Attachments from Licensor's Poles, Licensor shall have the right but not the obligation to remove Licensee's Attachments at Licensee's expense without any liability on the part of Licensor for damage or injury to Licensee's Attachments or interruption to Services. Licensee's obligations with regard to maintenance and fees continue until Attachments are removed from the Poles. In the event that Licensee's Attachments shall be removed from any Poles as provided by this Agreement, no Attachment shall again be made to such Poles unless

Licensee shall have first complied with all of the provisions of this Agreement as though no Attachment had previously been made.

6. RATES, FEES AND CHARGES.

A. All rates, charges and fees set forth in this Agreement and those shown in Exhibit D (Schedule of Rates, Fees, and Charges) shall be subject to and calculated in accordance with applicable law, and Licensor may in its sole discretion revise the rates, charges and fees as set forth in Exhibit D upon 30 day notice to Licensee. Exhibit D is incorporated and made a part of this Agreement by reference. The fees, rates and charges set forth in Exhibit D or elsewhere in this Agreement are effective during the term of this Agreement and subject to change as set forth herein.

B. Pole Attachment Fee. For the purpose of computing the annual Pole Attachment Fee due under this Agreement the Pole Attachment Fee shall be based each year upon the number of Poles where Licensor has issued a License as of the date of annual billing multiplied by the Attachment Rate set forth on Exhibit D, as may be modified by Licensor from time to time. If Licensee is a regulated cable system provider which begins to offer telecommunication Services, Licensee must notify Licensor within thirty (30) days of the change in use if it shall begin to use any attachment for telecommunication Services and Licensor may adjust the Attachment Rate and Pole Attachment Fee as appropriate consistent with the applicable FCC formula for telecommunication providers.

C. All charges for inspections, engineering, replacement or rearrangements of Licensee's Attachments from Licensor's Poles and, without limitation, any other work performed for Licensee shall be based upon the full cost and expense, including reasonable overhead, incurred by Licensor or its representative for performing such work for Licensee to include without limitation costs to transfer or moving of Licensor facilities and removal of old Poles. The cost to Licensee shall be determined in accordance with the regular and customary methods used by Licensor in determining such costs.

D. All other Attachment related inquiry, verification, application, administrative and miscellaneous rates, fees and charges shall be calculated and paid in accordance with Exhibit D and the terms of this Agreement.

E. Upon termination or surrender of a License granted hereunder, no refund of any Pole Attachment Fees shall be made and Licensee shall remain liable for all fees and charges set forth in this Agreement until Licensee has removed its Attachments.

7. PAYMENT, SECURITY BOND AND LIEN.

A. All bills for such other charges for work performed by Licensor and the fees set forth in the Agreement shall be payable upon presentment to Licensee, and shall be deemed delinquent if not paid within thirty (30) days after the date of the invoice.

B. Bond. Licensee shall furnish a bond or other security, and keep in place during the term of this Agreement, satisfactory to Licensor, the amount of \$5,000 or an amount equal to two (2) years of Pole Attachment Fees, whichever is greater, to guarantee the performance of Licensee obligations including payment of any such sums (including Unauthorized Attachment charges and liquidated damages) which may become due to Licensor arising out of this Agreement including, but not limited to rent, fees due hereunder or charges for work performed for the benefit of Licensee under this Agreement, including the

removal of Licensee's facilities upon termination of this Agreement by any of its provisions or upon termination of any License issued hereunder. Such bond shall include that Licensor received 30 days prior notice of cancellation. Cancellation of a bond shall be an event of default by Licensee. Upon signing this Agreement and prior to issuance of a License, Licensee shall furnish the bond to be sent to person identified in Exhibit E. Licensor may in its sole discretion change the bond amount or cancellation notice requirement from time to time upon at least thirty (30) day notice to Licensee. Licensor shall not be obligated to issue any License hereunder until Licensee has provided the bond as set forth herein.

C. **Lien.** Should Licensor under the terms and conditions of this Agreement remove Licensee's Attachments from Licensor's Poles, Licensor will deliver to Licensee the cable, equipment or facilities so removed upon payment by Licensee of the cost of removal, storage and delivery, and all other amounts due Licensor hereunder. Licensor is hereby given a lien on Licensee's cable, equipment or facilities attached to Licensor's Poles or removed therefrom, with power of public or private sale, to cover any amounts due Licensor under the provisions of this Agreement. Such liens shall not operate to prevent Licensor from pursuing, at its option, any other remedy in law, equity or otherwise, including any other remedy provided for in this Agreement.

8. ATTACHMENT REQUEST AND LICENSE PROCESS

A. Before Licensee shall have a right to place Attachments to any Poles of Licensor, Licensee shall make application for and receive a revocable, nonexclusive License which shall be in the form of a Licensor countersigned Application for Pole License (Exhibit B). Each Exhibit B Application for Pole License shall contain no more than twenty-five (25) Poles and Licensee may submit up to twelve (12) Exhibit B, Application for Pole License within a rolling thirty (30) day period. Licensor will process Applications for Pole Licenses in the order in which they are received; provided, however, that when Licensee has multiple Applications for Pole Licenses on file with Licensor, Licensee may designate its desired priority of completion with respect to all such Application for Pole Licenses. **Licensee shall not under any circumstances attach any equipment to any guy wires or anchors owned by Licensor.**

B. **Application For Pole License and Engineering Survey.** Licensee shall submit an Application for Pole License in the form of Exhibit B and shall include a drawing of the proposed route, the pole detail and contact information (name, telephone, facsimile, and email information). Upon receipt of a complete Application for Pole License, Licensor will conduct an engineering survey to determine whether and where Licensee's Attachment is feasible, and what Make Ready Work is required by Licensor or other existing attachers to accommodate Licensee's Attachment. Upon completion of the engineering survey, Licensor shall inform Licensee of its estimated make-ready charges for Licensor Make Ready Work ("Make Ready Estimate"). If during this process, Licensor determines the request is denied based on insufficient capacity or for reasons of safety, reliability and generally applicable engineering purpose Licensor shall inform Licensee that the Application for Pole License is denied together with the reason. All expenses incurred by Licensor in reviewing Licensee's Application for Pole License shall be borne by Licensee even if such request is denied by Licensor.

C. **Advance Payment of Make Ready Work Estimate and Expedited Charges.** If Licensee upon review of the Make Ready Estimate desires to proceed with the process to obtain a License from Licensor, Licensee shall submit payment in the amount of the Make Ready Estimate together with the Application Fee and engineering survey costs to Licensor within fourteen (14) days of receipt of the Make Ready Estimate and invoice for such amounts. Licensee shall be solely responsible for negotiating with existing attachers for Make-Ready Work relating to such other existing attacher facilities located on,

within or in Licensor's Poles and shall be responsible for paying all charges incurred in transferring or rearranging existing attacher facilities to accommodate the placement of Licensee's Attachment on, within or in Licensor's Poles. In the event, Licensee declines to proceed with the project Licensee shall reimburse Licensor any costs and expenses incurred by Licensor to date including but not limited to Application Fee, engineering and administrative expenses and costs.

D. Completion of Make Ready Work and Issuance of License. Licensor shall undertake to complete any Make Ready Work of its owned facilities upon receipt of Licensee's payment of the Make Ready Estimate. Upon completion of all Make Ready Work and receipt of all fees and charges due from Licensee to Licensor, Licensor shall issue Licensee an approved License which shall be in the form of a Licensor countersigned Application for Pole License. At that time Licensee will be considered to have been granted a License with respect to the Poles approved in the License and may attach to Licensor's Poles in accordance with the terms and conditions of this Agreement.

E. Licensee shall maintain a copy of all Application for Pole Licenses and approved Licenses. Licensor may provide upon request copies of the same to the extent available and Licensee shall reimburse Licensor for its costs in preparing and sending requested copies.

9. AUTHORITY FOR PLACEMENT OF ATTACHMENT

A. Before any placement of Attachments by Licensee, regardless of whether a License may have been issued, Licensee represents and warrants that it has the authority to maintain Attachments within public rights-of-way, or on private rights-of-way or on private property, and shall upon request provide a copy of documentation evidencing such right to Licensor. Licensee shall be solely responsible for obtaining all licenses, easements, authorizations, permits and consents from federal, state and local authorities or private land owners that may be required to place and maintain Attachments on Licensor's Poles.

B. Licensor and Licensee agree that neither party has the right to restrict or interfere with the other party's lawful access to and use of public right-of-way, including public right-of-way, which pass over property owned by either party. Except as otherwise specifically provided in this Agreement, Licensor and Licensee shall each be responsible for obtaining their own right-of-way and permission to use real or personal property owned or controlled by any governmental body or private entity or person.

C. Licensor may, without incurring any liability, remove Attachments of Licensee from Licensor's Poles, at Licensee's sole expense where in Licensor's sole judgment such removal is required in connection with the performance of Licensor's service obligation or the safety of Licensor's employees. Whenever such removal has been made, Licensee will be notified.

10. CONSTRUCTION AND MAINTENANCE

A. Licensee's Attachments shall be placed and maintained in accordance with the following:

- 1.** any and all Licensor requirements and specifications of Licensor, and
- 2.** the terms and conditions of this Agreement, and
- 3.** the National Electric Safety Code (most recent edition), and
- 4.** the National Electric Code (most recent edition), and

5. in compliance with any other rules or orders now in effect or that may hereafter be issued by any state utility commission or other authority (state, federal, local) having jurisdiction over including but not limited to Poles, rights-of-way, and Hazardous Materials.

Each of Section 10(A)(1-5) is incorporated by reference and made a part of this Agreement, and in the event of a conflict or difference between any of these specifications and requirements, the more stringent will apply. Licensee agrees to rearrange its Attachments, within a commercially reasonable timeframe, in accordance with changes in the standards referenced herein in this Section 10(A) of this Agreement, or if required by law.

B. Licensee shall, at its own expense, make and maintain its Attachments and use Licensor Poles in a safe condition and in thorough repair, and in a manner acceptable to Licensor, and so as not to conflict with the use of said Poles by Licensor or by other authorized users of said Poles, or interfere with other facilities thereon or which may from time to time be placed thereon. Licensee shall, at its sole expense, upon written notice from Licensor, relocate or replace its Attachments placed on said Poles or transfer them to substituted Poles that may be authorized by Licensor, or perform any other work in connection with said Attachments that may be required. Licensor shall give such written notice as is reasonable in the circumstances, provided, however, that in cases of emergency, as determined by Licensor in its sole discretion, Licensor may arrange to relocate, remove or replace Licensee Attachments placed on said Poles, transfer such Attachments to substituted Poles or perform any other work in connection with said Attachments that may be required in the maintenance, replacement, removal or relocation of said Poles or Licensor or existing attacher facilities thereon or which may be placed thereon, or for the service needs of Licensor, and Licensee shall reimburse Licensor for the expense thereby incurred. For the purpose of this Section, Licensee Attachments shall be understood to include Attachments of Licensee in space reserved for Licensor, or space which Licensor has the right to use, on poles of other companies with which Licensor now has or may hereafter have agreements for joint use and occupancy; and the use of such space by Licensee shall be subject to the terms and conditions of the agreements between Licensor and said other companies.

C. Licensee shall be responsible at all times for the condition of Licensee's Attachments and its compliance with the requirements, specifications, rules, regulations, ordinances and laws specified in this Agreement. Licensor shall have no duty to Licensee to inspect, monitor or maintain the condition of Licensee's Attachments (including, but not limited to, splices and other facilities connections) located on, within or in Licensor's Poles. Licensor may make periodic or spot inspections at any time of any part of Licensee's Attachments as Licensor determines reasonable or necessary in its sole judgment, pursuant to Section 16 of this Agreement.

D. Licensee shall not authorize any person or entity acting on Licensee's behalf ("Licensee Contractor") to perform any work on, within or in Licensor's Poles without first verifying, to the extent practicable, on each date when such work is to be performed and, that the condition of the Poles is suitable for the work to be performed. If Licensee or Licensee Contractor determines that the condition of the Poles is not suitable for the work to be performed, Licensee shall notify Licensor of the condition of the Poles in question and shall not proceed with construction activities until Licensee is satisfied that the work can be safely performed.

E. Licensee shall be solely responsible for paying all persons and entities that provide materials, labor, access to real or personal property, or other goods or services in connection with the construction and placement of Licensee's Attachments and for directing the activities of all Licensee Contractors while

they are physically present on, within or in the vicinity of Licensor's Poles. Licensee shall not permit any mechanic's lien, material man's lien, or any other lien, claim or security interest to attach to or encumber any of Licensor's real or personal property at any time.

F. Licensee's main line Attachments shall be tagged at maximum intervals of 300 feet so as to identify Licensee as the owner of the Attachment. Licensee shall place fiber wrap/ID at the specific Licensor Poles attaching point and at any aerial span splice location and/or slack loop. The tags shall be of sufficient size and lettering so as to be easily read from ground level.

11. OVERLASHING

A. Licensee may, upon notice to Licensor, overlash its own existing authorized Attachment and this does not constitute a separate Attachment, as it relates to the billing of Pole Attachment Fees, unless multiple/separate Attachment points are physically made at the Poles itself outside of the scope of a single Attachment. Such notice shall be in the form of an Exhibit B Application for Pole License, and any additional Attachments being installed on Poles, regardless of it being an overlash of existing Attachment or as a new Attachment, will require an engineering analysis to determine if the additional loading negatively impacts the Poles capacity. Any additional load which causes the Pole to exceed its rated capacity or no longer provides for ample ground clearance of the Attachments or other facilities will necessitate the need for the Licensee to pay any and all Make Ready Work necessary. Each overlash strand shall not exceed a 2" maximum diameter.

B. In no event shall Licensee allow a third party to overlash to Licensee's Attachments without prior notice to and consent from Licensor. Any third party must execute a License Agreement with Licensor and obtain a license thereunder.

12. MODIFICATIONS, ADDITIONS, REPLACEMENTS OR REARRANGEMENTS

A. Licensee shall not modify, overlash, add to, or replace Attachments on any Poles without first notifying Licensor in writing of the intended modification, addition or replacement at least thirty (30) days prior to the date the activity is scheduled to begin. The required notification shall include:

1. the date the activity is scheduled to begin including the Pole location and Pole number,
2. a description of the planned modification, addition, or replacement,
3. a representation that the modification, addition, or replacement will not require any space other than the space previously designated for Licensee's Attachments, and
4. a representation that the modification, addition, or replacement will not impair the structural integrity of the Poles involved.

B. Upon Licensor's receipt of a complete Exhibit B Application for Pole License, Licensor will perform, at Licensee's sole expense, a field check and if Licensor determine that the modification, addition, or replacement specified by Licensee in its notice will require more space than that allocated to Licensee or will require the rearrangements of, reinforcement of, replacement of, or an addition of support equipment to the Poles involved in order to accommodate Licensee's modification, addition, or replacement, Licensor will so notify Licensee and the parties will follow the Make Ready Work process

as set forth in Section 8 of this Agreement in order to obtain authorization for the modification, addition, or replacement of its Attachments.

C. Should Licensee request Licensor to expand capacity or purchase additional plant and should Licensor so agree, Licensee agrees to pay all cost and expenses thereby incurred by Licensor. If another party that has been granted a license joins in the request and will benefit from the expansion or purchase, Licensee agrees to pay a percentage of all costs proportionate to Licensee's share of the benefit received from the expansion or purchase, but Licensee shall be responsible for all costs and expenses not paid by the other party.

D. When multiple applications, including those of Licensee, are received by Licensor with respect to any Poles which must be replaced or rearranged to provide additional space prior to commencement of the work on such Poles, Licensor's facilities may need to be transferred in which case Licensee shall pay for all costs for such transfers.

E. In the event Licensor plans to modify or alter any Poles upon which Licensee has placed Attachments, Licensor, except in emergency situations, shall provide Licensee written notice of the proposed modification or alteration at least sixty (60) days prior to the time the proposed modification or alteration is scheduled to take place. Should Licensee decide to modify or alter Licensee's Attachments on Poles, Licensee shall so notify Licensor in writing at least thirty (30) days prior to the day the work is to begin. In such event, Licensee shall bear a proportionate share of the total costs incurred by Licensor to make Licensor Poles accessible.

F. In the event Licensor is required to move the location of, or replace, any Licensor Poles for reasons beyond its control, Licensee concurrently shall relocate Licensee's Attachments. Licensee shall be solely responsible for the costs of the relocation of Licensee's Attachments. When it is mutually agreed that it is in the best interest of Licensor and Licensee, Licensor may, after proper notification has been provided, transfer Licensee's Attachments at the same time that Licensor transfers its facilities and shall invoice Licensee for the actual costs incurred in performing the transfer of Licensee's Attachments.

13. EMERGENCY RESTORATION

A. In the event of an emergency, restoration procedures may be affected by the presence of Licensee's Attachments. While Licensor shall not be responsible for the repair of damaged Attachments, Licensor shall nonetheless control access to its Poles if the restoration is to be achieved in an orderly fashion.

B. Where Licensor and Licensee are involved in emergency restorations, access to Licensor's Poles will be controlled by Licensor according to the following guidelines.

1. Service Disruptions/Outages

- a) While exercising its right to first access, Licensor shall make all reasonable efforts to grant access to as many other entities with attachments as is reasonably safe.
- b) Where simultaneous access is not possible, Licensor will grant access on first come, first served basis.

2. Service Affecting Emergencies

- a) While exercising its right to first access, Licensor shall make all reasonable efforts to grant access to as many other entities with attachments as is reasonably safe.
- b) Where Licensor is unable to grant simultaneous access to all other entities with attachments, access will be granted according to the level of damage to the attachments of each entity and the likelihood that a given level of damage will result in service disruption. Where the likelihood that a service disruption will result is not clearly discernible, access will be on a first come, first served basis.

C. Without limiting any other indemnification or hold harmless provisions of this Agreement, Licensee agrees that any decision by Licensor regarding access to its Attachments, or any action or failure to act by Licensor, under this section shall not be the basis for any claim by Licensee against Licensor for any damage to Licensee's Attachments or disruption of Licensee's Services, or any other direct or indirect damages of any kind whatsoever incurred by Licensee.

14. FAILURE TO PLACE ATTACHMENTS

Once Licensee has been issued a License, Licensee shall have ninety (90) calendar days from the date of the License was issued to begin the placement of its Attachments on the Licensor Poles covered by the License. If Licensee has not begun placing its Attachments within the ninety (90) day period, Licensee shall so advise Licensor with a written explanation and notice for the delay. If Licensee fails to advise Licensor of its delay by notice thereof or if Licensee fails to act in good faith by not making a bona fide effort to begin placing its Attachments within the ninety (90) calendar days prescribed by this section, the License shall be automatically rescinded by Licensor and deemed null and void, and Licensee shall have no further right to place the Attachments pursuant to such voided License.

15. ABANDONMENT

Nothing in this Agreement shall prevent or be construed to prevent Licensor from abandoning, selling, assigning, or otherwise disposing of any Poles. Licensor shall notify Licensee of any sale, assignment, or other disposition of any Poles or other Licensor property used for Licensee's Attachments.

16. INSPECTIONS AND INVENTORIES

A. **Post construction and/or periodic inspection of Licensee Attachments.** Licensor shall have the right, but not the obligation, to make a post construction inspection and periodic inspections at any time of any part of Licensee's Attachments on Poles and any other associated facilities for the limited purpose of determining whether Licensee's Attachments are in compliance with the terms of this Agreement and any Licenses issued hereunder. Such inspections shall be conducted at Licensor's expense with the exception of (1) a post construction inspection, (2) follow-up inspection to confirm remedial action after an observed Licensee violation of the requirements of this Agreement; and (3) inspection of Licensee Facilities in compliance with a specific mandate of appropriate governmental authority, for which inspections the cost shall be borne solely by Licensee.

B. Inventories. Upon written notice to Licensee, the total number and location of Licensee's Attachments on Licensor's Poles may be determined, at Licensor's discretion, through a survey which may be made not more than once per calendar year by Licensor. If so requested, Licensee and /or any other entity owning or jointly using the Poles with Licensor may participate in the survey. The costs incurred by Licensor to conduct the survey shall be reimbursed to Licensor by Licensee upon demand by Licensor regardless of whether or not Licensee participates in the survey. If the Attachments of more than one licensee are surveyed, each such licensee shall contribute a proportionate share of the costs reimbursed to Licensor.

C. No Duty to Licensee. Neither the act of inspection or survey by Licensor of Licensee's Attachments nor any failure to inspect such Attachments shall operate to impose on Licensor any liability of any kind whatsoever or to relieve Licensee of any responsibility, obligations or liability under this Agreement, any License issued hereunder, or applicable law, or to any third party contractor, Licensee Contractor, or otherwise.

17. UNAUTHORIZED ATTACHMENTS

A. If any Licensee Attachment shall be found on Poles for which no License has been granted by Licensor pursuant to the terms of this Agreement ("Unauthorized Attachment"), Licensor, without prejudice to its other rights or remedies under this Agreement or otherwise, may:

1. impose charges as set forth herein, and
2. require Licensee to remove such Unauthorized Attachment or Licensor may remove such Unauthorized Attachment without liability and the expense of removal shall be borne by Licensee.

B. For the purpose of determining the charges, Licensee shall pay an amount per Unauthorized Attachment equal to the Pole Attachment Fee that would have applied if Licensee had properly obtained a License based upon the then current Attachment Rate for the number of years the Unauthorized Attachment have existed (or, if that cannot be determined, the number of years since the most recent inventory or five (5) years, whichever is less), plus interest at a rate the greater of 1.5% per month or the maximum allowed by law. In addition, if the Unauthorized Attachment is discovered during a survey where Licensee declined to participate an additional fee of \$100 per Unauthorized Attachment shall be charged to Licensee. Licensee agrees and acknowledges in the event of an Unauthorized Attachment actual damages would be difficult to determine and the charges described herein are liquidated damages, not penalties, and represent a fair and reasonable estimate of the damages which may be incurred by Licensor for Unauthorized Attachments on Licensor's Poles including wear and tear, lost revenue, increased maintenance and repair costs for having to work on a Pole where the owner of a facility is unknown, and the risk of liability for safety violations that may be the result of an Unauthorized Attachment.

C. Any such charge as set forth in Section 17(B) imposed by Licensor shall be in addition to its rights to any other sums due and payable, including without limitation Make Ready Work costs, the actual costs of any audit or survey which established the existence of the Unauthorized Attachment and to any claims to said fees.

D. No act by Licensor with regard to any unauthorized use shall be deemed as a ratification or the licensing of the unauthorized use, and if any License should subsequently be issued, after application and payment of all applicable fees therefore, said License shall not operate retroactively or constitute a waiver by Licensor of any of its rights or privileges under this Agreement or otherwise, and Licensee shall be subject to all liabilities, obligations and responsibilities of this Agreement in regard to said unauthorized use from its inception.

E. An Unauthorized Attachment shall include, but not limited to:

1. an Attachment to Poles which is not identified in any License issued in accordance with this Agreement;
2. an Attachment that occupies more space than that allocated to Licensee by Licensor in a License;
3. an Attachment that is not placed in accordance with the provisions of this Agreement or the appropriate License issued pursuant to this Agreement, unless Licensee can demonstrate to Licensor's reasonable satisfaction that said misplacement is not due to any act or omission of Licensee or Licensee's agents;
4. an addition or modification by Licensee to its pre-existing Attachment(s) that impairs the structural integrity of the involved Licensor Poles.
5. an Attachment that consists of facilities owned or controlled by, and for the use of a party other than Licensee that is overlashed to Licensee Attachments without approval by Licensor as required under this Agreement.

F. Once Licensor has notified Licensee of an Unauthorized Attachment. Licensee shall submit an Exhibit B Application for Pole License to request an authorization for the Attachment. An Exhibit B Application for Pole License submitted per this provision will be treated like any other Exhibit B Application for Pole License subject to this Agreement. Licensee will be responsible for all fees associated with an Exhibit B Application for Pole License (as identified in this Agreement). If an Exhibit B Application for Pole License is not received by Licensor within ten (10) days of Licensor's notice of an Unauthorized Attachment, Licensee has sixty (60) days from the date of the Unauthorized Attachment notification to vacate the Pole. If Licensee fails to remove Licensee's facilities within such sixty (60) day period, Licensor shall have the right to remove Licensee's facilities at Licensee's expense and without any liability on the part of Licensor for damage or injury to Licensee's facilities or disruption of Licensee's Services.

18. COMPLIANCE WITH LAW, ASSUMPTION OF RISK, AND DISCLAIMER OF WARRANTIES

A. Notwithstanding anything to the contrary in this Agreement, Licensee shall ensure that any and all activities it undertakes pursuant to this Agreement shall comply with all applicable laws, including, without limitation, all applicable provisions of:

1. Workers' compensation laws

2. Unemployment compensation laws
3. The Federal Social Security Law
4. The Fair Labor Standards Act, and
5. All laws, regulations, rules, guidelines, policies, orders, permits and approvals or any governmental authority relating to environmental matters including but not limited to Hazardous Materials and/or Occupational Safety and Health Act (“OSHA”).

B. LICENSEE ACKNOWLEDGES AND AGREES THAT LICENSOR DOES NOT MAKE ANY REPRESENTATION OR WARRANTIES AS TO THE CONDITION OR SAFETY OF LICENSOR’S POLES ANY ASSOCIATED FACILITIES AND EQUIPMENT ON, WITHIN OR SURROUNDING THE SAME, OR THE PREMISES SURROUNDING THE SAME, LICENSEE HEREBY ASSUMES ALL RISKS OF ANY DAMAGE. INJURY OR LOSS OF ANY NATURE WHATSOEVER CAUSED BY OR IN CONNECTION WITH THE USE OF POLES AND ASSOCIATED FACILITIES AND EQUIPMENT ON, WITHIN OR SURROUNDING THE SAME, AND THE PREMISES SURROUNDING THE SAME AND LICENSEE IS SOLELY RESPONSIBLE FOR ALL ALLEGED DAMAGES CLAIMED BY THIRD PARTIES ACCESSING OR WORKING ON OR NEAR LICENSOR’S POLES.

C. EXCEPT AS OTHERWISE PROVIDED HEREIN, LICENSOR MAKES NO WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, ALL OF WHICH ARE HEREBY EXPRESSLY DISCLAIMED, WITH REGARD TO THIS AGREEMENT AND ANY LICENSE ISSUED HEREUNDER INCLUDING, WITHOUT LIMITATION, ACCESS TO LICENSOR’S POLES OR OTHER FACILITIES.

19. LICENSEE CONTRACTOR QUALIFICATIONS

- A.** The parties acknowledge that from time to time Licensee may use a Licensee Contractor to perform work for Licensee on, within or in Licensor’s Poles.
- B.** Licensee represents and warrants that any of its employees or Licensee Contractors shall not climb or work on any of Licensor’s Poles, or work within Licensor’s Right-Of-Way unless such person has the training, skill, and experience required to recognize potentially dangerous conditions relating to Poles and to perform the work safely.
- C.** Licensee assumes all risk of Licensee Contractors and agrees to indemnify, defend and hold harmless Licensor from all claims, losses, damages and liabilities, costs and expenses (including, but not limited to, reasonable attorney’s fees) associated thereto in accordance with the indemnification provision of this License Agreement.
- D.** When Licensee Contractors are working on, within or in the vicinity of any part of Licensor’s Poles or Right-Of-Way, all such Licensee Contractors shall follow procedures which Licensee deems appropriate for the protection of persons and property. Licensee shall be responsible at all times for determining and implementing the specific steps required to protect persons and property at the site. Licensee will provide all traffic control and warning devices required to protect pedestrian and vehicular

traffic, workers and property from danger. Licensee has sole responsibility for the safety of all its employees and Licensee Contractors, for the safety of bystanders, and for insuring that all operations conform to terms and conditions set forth in this Agreement. Licensor reserves the right to suspend Licensee's activities on, within or in the vicinity of Licensor's Poles or Right-Of-Way if, in Licensor's sole judgment, any hazardous condition arises due to the activity (including both acts and omissions) of any Licensee Contractor or Licensee employee, which suspension shall cease when the condition has been rectified.

E. Licensee represents and warrants that all Licensee Contractors shall maintain the same insurance coverage and limits as are required of Licensee under this Agreement, and if not Licensee's insurance will provide such coverage.

F. Licensee acknowledges that all Licensee Contractors are not Licensor's employees or agents and Licensee assumes full responsibility for their actions or omissions to act. Licensee shall be solely responsible for the payment of compensation of Licensee's employees, contractors or agents assigned to perform work hereunder and such employees, contractors and agents shall be informed that they are not entitled to the provision of any Licensor benefits. Licensor shall not be responsible for payment of workman's compensation, disability benefits, and unemployment insurance or for withholding or paying employment related taxes for any employee of Licensee, but such responsibility shall be solely that of Licensee. In the event that any federal, state or local government agency, any court or any other applicable entity determines that the personnel provided by Licensee or any permitted Licensee Contractor are employees of Licensor for any purpose, Licensee agrees to indemnify, defend and save harmless Licensor from all liabilities, costs, and expenses (including, but not limited to, reasonable attorney fees) associated with such determination in accordance with the indemnification provision of this License Agreement.

G. Any work by Licensee Contractors on, within or in Licensor's Poles or Right-Of-Way shall be done only when specific authorization for such work has been obtained in writing in advance from Licensor pursuant to the terms and conditions of this Agreement. The parties agree that all work shall be performed according to existing industry standards and practices and the requirements and specifications set forth in this Agreement and any License issued hereunder.

20. DEFAULT

A. In addition to other events of defaults defined anywhere else in this Agreement, any one of the following shall be deemed the occurrence of a default under this Agreement:

1. failure by Licensee to pay when due any fee or other sum required to be paid under the terms of this Agreement.
2. failure by either party to perform or observe any other term, condition, covenant, obligation, or provision of this Agreement and such default continues for a period of thirty (30) days after written notice thereof from the other party (provided that if such default is not curable within a thirty (30) day period, the period may be extended if the party substantially commences to cure such default and proceeds diligently thereafter to effect such cure).

3. the filing of any tax or lien against Poles because of any act or omission by Licensee which is not bonded or discharged within thirty (30) days of the date of notice to Licensee that such lien has been filed;
4. Licensee's voluntary or involuntary bankruptcy;
5. Licensee's use or maintenance of its Attachments in violation of any law or regulation, or in aid of any unlawful act or undertaking;
6. if any authorization which may be required of Licensee by any governmental or private authority for the placement, operation, or maintenance of Licensee's Attachments is denied or revoked.

B. In the event of a default and subject to any other applicable provision of this Agreement, the non-defaulting party, without any further notice to the defaulting party (except where expressly provided for below or required by applicable law), may do any one or more of the following:

1. perform on behalf and at the expense of the defaulting party, any obligation of the defaulting party under this Agreement which the defaulting party has failed to perform and of which the non-defaulting party shall have given the defaulting party notice, the cost of which performance shall be paid by the defaulting party to the non-defaulting party upon demand;
2. terminate this Agreement by giving sixty (60) days written notice of such termination to Licensee and remove Licensee's Attachments and store Licensee's facilities in a public warehouse or elsewhere at the expense of and for the account of Licensee without Licensor being deemed guilty of trespass or conversion, and without Licensor becoming liable for any loss or damages to Licensee occasioned thereby; or
3. exercise any other legal or equitable right or remedy that the non-defaulting party may have.

C. The defaulting party shall repay to the non-defaulting party upon demand any costs and expenses incurred by the non-defaulting party (including, without limitation, reasonable attorneys' fees) in successfully enforcing this Agreement.

D. Upon termination of this Agreement by the non-defaulting party, the defaulting party shall remain liable to the non-defaulting party for any and all fees, other payments and damages which may be due or sustained in accord with this Agreement prior to such termination, all reasonable costs, fees and expenses, including, without limitation, reasonable attorney' fees incurred by the non-defaulting party in pursuit of its remedies hereunder.

E. All rights and remedies of the non-defaulting party set forth in this Agreement shall be cumulative and none shall exclude any other right or remedy, now or hereafter allowed by or available under any statute, ordinance, rule of court, or the common law, either at law or in equity, or both.

21. INDEMNIFICATION AND LIMITATION OF LIABILITY

A. Licensee shall compensate Licensor for the full actual loss, damage or destruction of Licensor's property that in any way arises from or is related to this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation, or maintenance of Licensee's Attachments).

B. Licensee agrees to defend, indemnify, protect and hold harmless Licensor and its officers, directors, employees, shareholders, successors, assigns, agents, affiliates, representatives, partners, and contractors from and against any and all claims, actions, administrative proceedings (including, without limitation, informal proceedings), judgments, damages, penalties, fines, cost, liabilities, interests, or loss, including, without limitation, reasonable attorneys' fees and expenses, consultant fees, and expert fees, together with all other costs and expenses of any kind or nature suffered by or asserted against Licensor in any way arising out of or connected with this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation or maintenance of Licensee's Attachments, unless caused solely by the negligence or willful misconduct of Licensor or Licensor's affiliates, agents, officers, employees and assigns). Licensee expressly assumes all liability for actions by its affiliates, agents, officers, employees, or Licensee Contractors and expressly waives any immunity from the enforcement of this indemnification provision that might otherwise be provided by workers' compensation law or by other state or federal laws.

C. Without limiting any of the foregoing, Licensee assumes all risk of, and agrees to relieve Licensor of any and all liability for, loss or damage (and the consequences of loss or damage) to any facilities placed on Licensor's property and any other financial loss sustained by Licensee, except to the extent caused by the sole negligence or willful misconduct on the part of Licensor or Licensor's agents, officers, employees, and assigns.

D. Without limiting the foregoing, Licensee expressly agrees to indemnify, defend, and hold harmless Licensor and Licensor's agents, officers, employees and assigns from any and all claims asserted by end users/customers of Licensee in any way arising out of or in connection with this Agreement or Licensee's Attachments, except to the extent caused solely by the negligence or willful misconduct of Licensor or Licensor's agents, officers, employees, and assigns, or its contractors.

E. Notwithstanding anything to the contrary in this Agreement, Licensee further shall indemnify and hold harmless Licensor, its agents, officers, employees, and assigns from and against any claims, liabilities, losses, damages, fines, penalties, and costs (including, without limitation, reasonable attorneys' fees) whether foreseen or unforeseen, which the Licensor suffers or incurs because of:

1. any discharge of Hazardous Materials resulting from acts or omissions of Licensee, Licensee Contractors or Licensee's predecessor in interest;
2. acts or omissions of Licensee, its agents, employees, Licensees, or representatives in connection with any cleanup required by law, or
3. failure of Licensee or Licensee Contractors to comply with Environmental, Safety and Health Laws.

F. Licensee shall indemnify, protect, and hold harmless Licensor from and against any and all claims for libel and slander, copyright and/or patent infringement arising directly or indirectly by reason of installation of Licensee's Attachments pursuant to this Agreement.

G. In the event of any claim, demand or litigation specified the indemnity provision, the party to be indemnified (the "Indemnified Party") shall give prompt notice to the other party (the "Indemnifying Party") of such claim, demand or litigation. The Indemnifying Party shall have sole control of the defense of any action or litigation on such a claim or demand (including the selection of appropriate counsel) and all negotiations for the settlement or compromise of the same, except that the Indemnifying Party may not make any non-monetary settlement or compromise without the Indemnified Party's consent, which consent shall not be unreasonably withheld. The Indemnified Party shall cooperate with the Indemnifying Party in the defense and/or settlement of any claim, demand or litigation. Nothing herein shall be deemed to prevent the Indemnified Party from participating in the defense and/or settlement of any claim, demand or litigation by the Indemnified Party's own counsel at the Indemnified Party's own expense.

H. NOTWITHSTANDING ANYTHING TO THE CONTRARY CONTAINED IN THE AGREEMENT, NEITHER PARTY SHALL BE LIABLE TO THE OTHER PARTY FOR CONSEQUENTIAL, INCIDENTAL, PUNITIVE, EXEMPLARY OR INDIRECT DAMAGES SUFFERED BY SUCH PARTY OR BY ANY SUBSCRIBER, CUSTOMER OR PURCHASER OF SUCH PARTY FOR LOST PROFITS OR OTHER BUSINESS INTERRUPTION DAMAGES, WHETHER BY VIRTUE OF ANY STATUTE, IN TORT OR IN CONTRACT, UNDER ANY PROVISION OF INDEMNITY, OR OTHERWISE, REGARDLESS OF THE THEORY OF LIABILITY UPON WHICH ANY SUCH CLAIM MAY BE BASED OR WHETHER IT (a) HAS BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES OR (b) IS NEGLIGENT.

22. INSURANCE

A. Licensee shall obtain and maintain, in full force and effect at all times, during operations covered by this Agreement, such minimum insurance as will cover the obligations and liabilities of Licensee, its agents, and its employees which may arise from the operations under this Agreement. Insurance shall have limits of not less than Commercial General Liability policy of minimum limits of:

General Aggregate	\$ 2,000,000 per policy period
Products/Completed Operations Aggregate	\$ 2,000,000 per policy period
Personal Injury/Advertising	\$ 2,000,000 per occurrence
Each Occurrence	\$ 2,000,000 per occurrence
Fire Legal Liability	\$ 50,000 any one fire

B. The policy will be endorsed to show the above aggregate limits applying to "each" job site or, as an alternative, the General Aggregate will be increased to \$4,000,000 per policy period. Policy will also specifically state the coverage applies to all operations conducted by the Licensee, its employees, or agents on behalf of Licensee or subsidiary.

C. Where the performance of the work involves structural property, underground property, or blasting, Licensee's Commercial General Liability insurance policy shall provide coverage to the insured for legal liability arising from operations under this Agreement for property damage:

1. arising out of blasting,
2. arising out of collapse of, or structural injury to, any building or structure or
3. To underground facilities and utilities.

D. Other general liability forms are acceptable in lieu of the Commercial General Liability Form however they are not to be used without written approval from Licensor.

1. Business Automobile Liability policy with minimum limits of:

Bodily Injury	\$2,000,000 per accident
Property Damage	\$ 2,000,000 per accident
OR	
Combined Single Limit	\$ 2,000,000 per accident

The policy will be issued using symbol "1 - any auto" coverage.

2. Workers Compensation:

Part 1 - Medical Benefits	Statutory
---------------------------	-----------

Part 2 - Employer's Liability as indicated:

Bodily Injury by Accident	\$ 1,000,000 each accident
Bodily Injury by Disease	\$ 1,000,000 each employee
Bodily Injury by Disease	\$ 1,000,000 policy limit

E. The policy will show the state in which operation on behalf of the Licensee and/or subsidiary is being conducted. For operations conducted within monopolistic (state fund) states, Licensee will furnish a certificate of compliance from the appropriate state fund administrator.

F. In each and every policy except workers' compensation, Licensor and its subsidiaries shall be named an "additional insured" with respect to activities performed on behalf of the Licensee and its subsidiaries.

G. Coverage provided by the policies listed in this paragraph will be issued by an insurance company, licensed in the state in which operations on behalf of the Licensee are to be conducted. It is acceptable to use both primary and excess/umbrella policies to obtain necessary limits. The worker's compensation policy must contain a waiver of subrogation clause.

H. Licensee will furnish to Licensor, a certificate evidencing insurance coverage under sub-paragraphs 22(A) and (D). Such certificate or Licensee shall provide for a thirty (30) day prior notice to the Licensor of any cancellation or material changes in coverage and shall be signed by a legal representative of the issuing insurance company. The certificate of insurance shall be sent to Licensor's contact identified in Exhibit E.

I. The provisions of sub-paragraphs 22 (A) and (D) shall also apply to all Licensee Contractors and Licensee shall be responsible for their compliance herewith.

23. NOTICES

Any and all notices to a party required or permitted under this Agreement shall be in writing and shall be: (a) delivered personally; (b) delivered by express overnight delivery service; (c) mailed, via certified mail or first class U.S. Postal Service, with postage prepaid, and a return receipt requested; or (d) delivered by electronic mail; provided that a paper copy is also sent via methods (a), (b), or (c) of this Section. Notices will be deemed given as of the earliest of: the date of actual receipt; the next business day when sent via express overnight delivery service; five (5) calendar days after mailing in the case of first class or certified U.S. Postal Service, or on the date set forth on the confirmation produced by the sent confirmation when sent prior to 5:00 p.m. in the recipient's time zone, but the next business day when delivered at 5:00 p.m. or later in the recipient's time zone. Notices will be addressed to the parties as set forth in Exhibit E as may be updated in writing by the parties from time to time in accordance with method set forth under this Section 23.

24. CONFIDENTIALITY

Neither party shall at any time disclose, provide, demonstrate or otherwise make available to any third party any of the terms or conditions of this Agreement or any materials provided by either party specifically marked as confidential, except upon written consent of the other party, or as may be required by applicable law or governmental authorities. Notwithstanding the foregoing, nothing in this Section shall prevent disclosure to a party's authorized legal counsel who shall be subject to this confidentiality section, nor shall it preclude the use of this Agreement by the parties to obtain financing, to make or report matters related to this Agreement in any securities statements, or to respond to any requests by governmental or judicial authorities; provided, however, that any such disclosure shall be limited to the extent necessary, and shall be made only after attempting to obtain confidentiality assurances. Notwithstanding the foregoing, prior to making any disclosure in response to a request of a governmental authority or legal process, the party called upon to make such disclosure shall provide notice to the other party of such proposed disclosure sufficient to provide the other with an opportunity to timely object to such disclosure. Notwithstanding the foregoing, Licensor may, without notice to Licensee: (i) negotiate or enter into any agreement with any other person(s) or entity(ies) that is identical or similar to this Agreement; and (ii) provide the text of all or part of this Agreement to any other party, so long as Licensor shall redact therefrom all references to Licensee and shall not associate such text with Licensee or identify Licensee as having agreed to such text or terms.

25. DISPUTE RESOLUTION

A. Except in the case of:

1. a suit, action, or proceeding by one party to compel the other party to comply with its obligation to indemnify the other party pursuant to this Agreement, or
2. a suit, action or proceeding to compel either party to comply with the dispute resolution procedures set forth in this section, the parties agree to use the following procedure to resolve any dispute, controversy, or claim arising out of or relating to this Agreement or its breach.

B. At the written request of a party, each party shall designate a knowledgeable, responsible representative to meet and negotiate in good faith to resolve any dispute, controversy, or claim arising

under this Agreement. The parties intend that these negotiations be conducted by non-lawyer, business representatives. The substance of the negotiations shall be left to the discretion of the representatives. Upon mutual agreement, the representatives may utilize other alternative nonbinding dispute resolution procedures such as mediation to assist in the negotiations. Discussions and correspondence between the representatives for the purposes of these negotiations shall be treated as confidential, undertaken for purposes of settlement, shall be exempt from discovery and production, and shall not be admissible in any subsequent proceeding without the concurrence of all parties. Documents identified in or provided during such negotiations, which are not prepared for purposes of the negotiations, shall not be so exempt and may, if otherwise admissible, be admitted as evidence in any subsequent proceeding.

C. If a resolution of the dispute, controversy or claim is not reached within ninety (90) days of the initial written request referred to in this Section 25, the dispute, controversy, or claim may be filed with the State utility commission or the Federal Communication Commission, if applicable, for review and determination, provided the party invoking the commission's intervention process has in good faith negotiated, or attempted to negotiate, with the other party pursuant to this Section 25.

D. Except as otherwise provided in this Agreement under the Indemnification or Default provision or elsewhere, each party shall bear its own costs, including attorneys' fee, incurred in connection with any of the foregoing procedures. A party seeking discovery shall reimburse the responding party the cost of reproducing documents (to include search time and reproduction time costs).

26. TAXES

Each party shall pay all taxes and assessments lawfully levied on its own property and services subject to this Agreement.

27. WAIVER

Failure by either party to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

28. NO THIRD PARTY BENEFICIARIES

Except as otherwise provided in this Agreement, this Agreement is intended to benefit only the parties and may be enforced solely by the parties, their successors in interest or permitted assigns. It is not intended to, and shall not, create rights, remedies or benefits of any character whatsoever in favor of any persons, corporations, associations, or entities other than the parties, except as provided herein.

29. FORCE MAJEURE

Neither party shall be liable for any delay or failure in performance of any part of this License Agreement or License issued hereunder from any cause beyond its reasonable control and without its fault, omission or negligence, such as acts of God, acts of civil or military authority, embargoes, epidemics, war, terrorist acts, riots, insurrections, fires, explosions, earthquakes, nuclear accidents, floods, power blackouts, labor strikes, lockouts or work stoppages or severe weather ("Force Majeure Event"). In the event of a Force Majeure Event, upon giving prompt notice to the other party, the due date for performance by the affected party of its original obligation(s) shall be extended by a term equal to the

time lost by reason of the Force Majeure Event. In the event that the affected party is able to partially perform its obligations, it shall perform its obligations at a performance level no less than that which it uses for its own operations.

30. ASSIGNMENT

Licensee shall not assign; transfer or sublet the privileges hereby granted, or sell, lease or otherwise permit the use of its facilities on or any part thereof (all of the foregoing being "Transfers"), without prior consent in writing of Licensor. No such consent granted by Licensor shall be effective until Licensee's assignee, sublessee or other transferee has agreed, on an enforceable separate document signed and delivered to Licensor, to assume all obligations and liabilities of Licensee under this Agreement. Licensor may condition such consent upon the assignee's sublessee's or transferee's agreement to reasonable additional or modified terms or conditions. If there is a change of control of Licensee, then Licensor shall have the right, in its reasonable discretion, immediately to terminate this Agreement in its entirety without further liability. Licensor may assign or otherwise transfer this Agreement or any of its rights and interests to any firm, corporation or individual, without the prior consent of Licensee.

31. APPLICABLE LAW

This Agreement, and the rights and obligations contained in it, shall be governed and construed under the laws of the state in which the Attachments hereunder are to be located. The terms and conditions of this Agreement shall be subject to any and all applicable laws, rules, regulations or guidelines now in effect and that subsequently may be prescribed by any federal, state or local governmental authority. To the extent required by any such prescribed law, rule, regulation or guideline, the Parties agree to modify, in writing, the affected term(s) and conditions(s) of this Agreement to bring them into compliance with such law, rule, regulation or guideline. Should any term of this Agreement be determined by a court or agency with competent jurisdiction to be unenforceable, all other terms of this Agreement shall remain in full force and effect.

32. WAIVER OF JURY TRIAL

Licensor and Licensee each expressly waive its right to a jury trial.

33. ENTIRE AGREEMENT, MODIFICATIONS, SURVIVAL AND CONFLICTS AND TARIFFS

A. This Agreement cancels and supersedes all previous agreements whether written or oral, except for any sums due thereunder, between Licensor and Licensee with respect to the Licensee's Attachments to Licensor's Poles; and there are no other provisions, terms or conditions to this Agreement except as expressed herein. All currently effective Licenses and authorizations for Attachments granted pursuant to such previous agreements shall continue in effect subject to the terms and conditions of this Agreement.

B. This Agreement may be amended or supplemented at any time only upon written agreement by the parties hereto. Notwithstanding the foregoing, all Exhibits, fees, Licensor procedures and specifications may be modified by Licensor upon thirty (30) day notice to Licensee.

C. Notwithstanding the termination of this Agreement for any reason, Section 18 Compliance with Laws, Assumption of Risk and Disclaimer of Warranties, Section 21 Indemnification and Limitation of

Liability, Section 22 Insurance, Section 24 Confidentiality and any other provision intended to survive, shall survive termination to the maximum extent permitted under applicable law. Notwithstanding any provisions to the contrary, all rights, remedies, or obligations which arose or accrued prior to the termination or expiration of the terms hereof shall survive and be fully enforceable for the applicable statute of limitations period.

D. It is the intent of the parties that the terms and conditions of this Agreement and any applicable Licensor's state tariffs be construed as being consistent where possible. However, in the event of a conflict or difference between the terms and conditions of this Agreement and Licensor's state tariff, the terms of the applicable state tariff shall control.

34. AUTHORITY AND COUNTERPARTS AND ELECTRONIC SIGNATURES

A. Each party represents and warrants that it is a corporation duly organized, validly existing and in good standing under the laws of the state in which the obligations under this License Agreement are to be performed. Each party warrants that it has full power and authority to execute and deliver this License Agreement and to perform its obligations hereunder.

B. This Agreement may be executed using facsimile or electronic signatures and such facsimile or electronic version of the Agreement shall have the same legally binding effect as an original paper version. This Agreement may be executed in counterparts, each of which shall be deemed an original.

EXHIBIT A **DEFINITIONS**

“Application for Pole License” - A written request submitted in the form of Exhibit B from Licensee to Licensor requesting authorization to attach Licensee owned facilities to Poles in accordance with this Agreement.

“Attachment(s)” – any facilities, cables or equipment attached to Poles or any other property owned or controlled by Licensor.

“Effective Date” - is the date this Agreement is last signed by the parties.

“Force Majeure Event” – shall have the meaning set forth in Section 29 of the Agreement.

“Hazardous Materials” -

Any substance, material or waste now or hereafter defined or characterized as hazardous, toxic or dangerous as defined by the Comprehensive Environmental Response, Compensation and Liability Act (“CERCLA”) of 1980, as amended, and other federal, state, and local health, safety, and environmental laws, ordinances, statutes, and rules, including but not limited to the Occupational Safety and Health Act (“OSHA”).

Any substance, material or waste now or hereafter classified as a contaminant or pollutant under any law, rules, ordinance, or authority.

Any other substance, material or waste, the manufacture, processing, distribution, use, treatment, storage, placement, disposal, removal or transportation of which is now or hereafter subject to regulation under any law, ordinance, statute, rule or regulation of any governmental body or authority.

“License” – is the specific nonexclusive and revocable permission from Licensor, in the form of a Licensor countersigned and returned Application for License, to Licensee authorizing Licensee to attach its facilities as applied for to Licensor Poles in accordance with this Agreement.

“Licensee Contractors” - shall have the meaning set forth in Section 10(D) of the Agreement.

“Make Ready Estimate” – is Licensor’s estimated cost to perform Make Ready Work on Licensor’s facilities on Poles to accommodate Licensee’s Attachment as requested in an Application for Pole License.

“Make Ready Work” - all Licensor, joint owner or other existing attacher work to prepare Licensor’s Poles and related facilities for the requested Attachment of Licensee’s facilities but not the actual placement of Attachments or administrative activities related to inquiries, verifications, requests or applications.

“Overlashing or overlashed” – lashing of an additional Licensee owned cable to Licensee’s own existing cable and/or strand attached to a Pole as set forth in Section 11 of this Agreement.

“Pole(s)” - a pole owned solely or jointly by Licensor or Poles owned by others to the extent that and for so long as Licensor has the right to permit others to be attached in the communications space.

“Pole Attachment Fee” - the fee paid annually per Attachment on a Pole. For billing purposes, a single Attachment includes the point of Attachment and all facilities located in the usable space on the Poles in the space assigned to Licensee (typically six inches above and six inches below the point of Attachment). If Licensee occupies more than one foot of usable space on Poles, separate Pole Attachment Fees shall apply to each one foot of space occupied.

“Right-of-Way” - right-of-way owned or controlled by Licensor.

“Unauthorized Attachment” – shall have the meaning set forth in Section 17(A) and 17(E) of the Agreement.

ATTACHED AND INCORPORATED EXHIBITS

EXHIBIT A – DEFINITIONS

EXHIBIT B – FORM APPLICATION FOR POLE LICENSE

EXHIBIT C – NOTIFICATION OF SURRENDER OF LICENSE

EXHIBIT D – SCHEDULE OF RATES, FEES AND CHARGES

EXHIBIT E – NOTICE CONTACTS AND ADDRESSES

1. PARTIES.

This Pole Attachment License Agreement (“Agreement”) is entered into as of the date last signed by all the parties (“Effective Date”) by and between Windstream Kentucky West, LLC, a Windstream company organized and existing under the State of Delaware (“Licensor”), and [REDACTED], a company organized and existing under the State of [REDACTED] (“Licensee”). Licensor and Licensee may sometimes be referred to in this Agreement individually as a “party” and collectively as the “parties”.

2. SCOPE.

A. The purpose of this Agreement is to set forth the rates, terms, conditions, and procedures under which the Licensor will provide Licensee access to Licensor’s Poles (as defined herein) in the State of Kentucky for the purpose of Licensee attaching wireline facilities.

B. The parties acknowledge that Licensor is entering into this Agreement because Licensee has represented it is a regulated "telecommunications carrier" or “cable television system” provider as such terms are defined in the Communications Act of 1934, as amended (hereinafter the "Communications Act") and desires to provide telecommunications service or cable service (“Services”), as defined in the Communications Act; and that Licensee is authorized to provide these Services under its franchise or other lawful authority within its service area where Licensor owns Poles. In the event Licensee no longer has the status as a “telecommunications carrier” or “cable television system” provider or the authority to offer these Services in the state where the Poles are located, Licensor shall have the right to immediately terminate this Agreement and require Licensee to remove all of its facilities from Licensor’s Poles. **As a condition precedent to entering into this Agreement, Licensee shall submit to Licensor a copy of its certification evidencing its status as either a regulated telecommunication carrier or cable television system provider, and until such documentation is provided to Licensor, Licensor shall not be obligated to enter into this Agreement.**

C. Subject to the provisions of this Agreement, Licensor will issue to Licensee for any lawful communications purpose, revocable, nonexclusive Licenses authorizing the placement of Licensee’s Attachment to Licensor’s Poles.

D. No use, however extended, of Licensor’s Poles nor payment of any fees or charges required under this Agreement or License issued under this Agreement shall create or vest in Licensee any ownership or property rights in said Poles, but Licensee’s rights therein shall be and remain a mere license. Nothing herein contained shall be construed to compel Licensor to construct, retain, extend, place, or maintain any facilities not needed for its own service requirements, unless otherwise required by law. Nothing contained in this Agreement or in any License issued hereunder shall in any way affect, restrict or impair the right of Licensor to convey, transfer, mortgage, or assign to any other person or entity any interest in real or personal property, including any Poles in which Licensee has attached or placed Licensee’s Attachments pursuant to Licenses issued under this or other license agreements.

E. Licensee recognizes that Licensor has entered into, or may in the future enter into, agreements and arrangements with others which are not a party to this Agreement regarding the Poles covered by this Agreement. Nothing herein contained shall be construed as a limitation, restriction or prohibition against Licensor with respect to such other agreements or arrangements. The rights of Licensee shall at all times be subject to any present or future joint use or joint ownership arrangement between Licensor and any other party.

F. This Agreement does NOT create any right for Licensee to access or place facilities in Licensor central offices, conduit or to place wireless communication equipment on Poles. A separate agreement is required for any access to Licensor facilities other than those outlined in this Agreement.

3. DEFINITIONS.

Certain capitalized terms used in this Agreement are listed in and have the meaning as set forth in Exhibit A. Exhibit A is incorporated and made a part of this Agreement by reference.

4. TERM AND TERMINATION OF AGREEMENT

A. This Agreement shall become effective upon the Effective Date and if not terminated in accordance with the provisions of this Agreement, shall continue in effect for a term of one (1) year (“Initial Term”) and shall continue on a year –to – year basis. Notwithstanding the foregoing, any time after the Initial Term and anytime thereafter the rates, fees and charges set forth may be increased or decreased by written notice from Licensor to Licensee.

B. Either Party may terminate this Agreement for any reason after the Initial Term with at least thirty (30) day written notice to the other party. Licensor may terminate this Agreement in the event of default as set forth under Article 20 of this Agreement.

C. Upon termination of the Agreement in accordance with any of its terms, all outstanding Licenses in connection therewith shall terminate and shall be surrendered and Licensee shall immediately, and at its sole expense remove all Attachments located on Poles within sixty (60) days of date of termination.

5. TERMINATION OF LICENSES

A. In addition to other termination rights set forth in this Agreement, upon notice from Licensor to Licensee that Licensor has been advised by a governmental authority or private property owners that the use of any Poles is not authorized and is objected to by such governmental authority or private property owner, as the case may be or that any Poles is to be removed, sold or otherwise disposed of, Licensee shall, immediately remove its cables, equipment, and facilities at once from the affected Poles or shall make arrangements for the removal of its cable, equipment, and facilities from the affected portion of Licensor's Poles at Licensee's sole expense. If not so removed within sixty (60) days or such timeframe as stated on the Notice, Licensor shall have the right to remove Licensee's Attachments from Licensor's Poles at the cost and expense of Licensee and without any liability thereto.

B. Licensee may at any time remove its Attachments from any Poles of Licensor, but shall immediately give Licensor written notice of such removal and surrender of License in the form of a Notification of Surrender attached hereto as Exhibit C and incorporated by reference and made a part of this Agreement. If Licensee surrenders its License but fails to remove its Attachments from Licensor's Poles, Licensor shall have the right but not the obligation to remove Licensee's Attachments at Licensee's expense without any liability on the part of Licensor for damage or injury to Licensee's Attachments or interruption to Services. Licensee's obligations with regard to maintenance and fees continue until Attachments are removed from the Poles. In the event that Licensee's Attachments shall be removed from any Poles as provided by this Agreement, no Attachment shall again be made to such Poles unless

Licensee shall have first complied with all of the provisions of this Agreement as though no Attachment had previously been made.

6. RATES, FEES AND CHARGES.

A. All rates, charges and fees set forth in this Agreement and those shown in Exhibit D (Schedule of Rates, Fees, and Charges) shall be subject to and calculated in accordance with applicable law, and Licensor may in its sole discretion revise the rates, charges and fees as set forth in Exhibit D upon 30 day notice to Licensee. Exhibit D is incorporated and made a part of this Agreement by reference. The fees, rates and charges set forth in Exhibit D or elsewhere in this Agreement are effective during the term of this Agreement and subject to change as set forth herein.

B. Pole Attachment Fee. For the purpose of computing the annual Pole Attachment Fee due under this Agreement the Pole Attachment Fee shall be based each year upon the number of Poles where Licensor has issued a License as of the date of annual billing multiplied by the Attachment Rate set forth on Exhibit D, as may be modified by Licensor from time to time. If Licensee is a regulated cable system provider which begins to offer telecommunication Services, Licensee must notify Licensor within thirty (30) days of the change in use if it shall begin to use any attachment for telecommunication Services and Licensor may adjust the Attachment Rate and Pole Attachment Fee as appropriate consistent with the applicable FCC formula for telecommunication providers.

C. All charges for inspections, engineering, replacement or rearrangements of Licensee's Attachments from Licensor's Poles and, without limitation, any other work performed for Licensee shall be based upon the full cost and expense, including reasonable overhead, incurred by Licensor or its representative for performing such work for Licensee to include without limitation costs to transfer or moving of Licensor facilities and removal of old Poles. The cost to Licensee shall be determined in accordance with the regular and customary methods used by Licensor in determining such costs.

D. All other Attachment related inquiry, verification, application, administrative and miscellaneous rates, fees and charges shall be calculated and paid in accordance with Exhibit D and the terms of this Agreement.

E. Upon termination or surrender of a License granted hereunder, no refund of any Pole Attachment Fees shall be made and Licensee shall remain liable for all fees and charges set forth in this Agreement until Licensee has removed its Attachments.

7. PAYMENT, SECURITY BOND AND LIEN.

A. All bills for such other charges for work performed by Licensor and the fees set forth in the Agreement shall be payable upon presentment to Licensee, and shall be deemed delinquent if not paid within thirty (30) days after the date of the invoice.

B. Bond. Licensee shall furnish a bond or other security, and keep in place during the term of this Agreement, satisfactory to Licensor, the amount of \$5,000 or an amount equal to two (2) years of Pole Attachment Fees, whichever is greater, to guarantee the performance of Licensee obligations including payment of any such sums (including Unauthorized Attachment charges and liquidated damages) which may become due to Licensor arising out of this Agreement including, but not limited to rent, fees due hereunder or charges for work performed for the benefit of Licensee under this Agreement, including the

removal of Licensee's facilities upon termination of this Agreement by any of its provisions or upon termination of any License issued hereunder. Such bond shall include that Licensor received 30 days prior notice of cancellation. Cancellation of a bond shall be an event of default by Licensee. Upon signing this Agreement and prior to issuance of a License, Licensee shall furnish the bond to be sent to person identified in Exhibit E. Licensor may in its sole discretion change the bond amount or cancellation notice requirement from time to time upon at least thirty (30) day notice to Licensee. Licensor shall not be obligated to issue any License hereunder until Licensee has provided the bond as set forth herein.

C. Lien. Should Licensor under the terms and conditions of this Agreement remove Licensee's Attachments from Licensor's Poles, Licensor will deliver to Licensee the cable, equipment or facilities so removed upon payment by Licensee of the cost of removal, storage and delivery, and all other amounts due Licensor hereunder. Licensor is hereby given a lien on Licensee's cable, equipment or facilities attached to Licensor's Poles or removed therefrom, with power of public or private sale, to cover any amounts due Licensor under the provisions of this Agreement. Such liens shall not operate to prevent Licensor from pursuing, at its option, any other remedy in law, equity or otherwise, including any other remedy provided for in this Agreement.

8. ATTACHMENT REQUEST AND LICENSE PROCESS

A. Before Licensee shall have a right to place Attachments to any Poles of Licensor, Licensee shall make application for and receive a revocable, nonexclusive License which shall be in the form of a Licensor countersigned Application for Pole License (Exhibit B). Each Exhibit B Application for Pole License shall contain no more than twenty-five (25) Poles and Licensee may submit up to twelve (12) Exhibit B, Application for Pole License within a rolling thirty (30) day period. Licensor will process Applications for Pole Licenses in the order in which they are received; provided, however, that when Licensee has multiple Applications for Pole Licenses on file with Licensor, Licensee may designate its desired priority of completion with respect to all such Application for Pole Licenses. **Licensee shall not under any circumstances attach any equipment to any guy wires or anchors owned by Licensor.**

B. Application For Pole License and Engineering Survey. Licensee shall submit an Application for Pole License in the form of Exhibit B and shall include a drawing of the proposed route, the pole detail and contact information (name, telephone, facsimile, and email information). Upon receipt of a complete Application for Pole License, Licensor will conduct an engineering survey to determine whether and where Licensee's Attachment is feasible, and what Make Ready Work is required by Licensor or other existing attachers to accommodate Licensee's Attachment. Upon completion of the engineering survey, Licensor shall inform Licensee of its estimated make-ready charges for Licensor Make Ready Work ("Make Ready Estimate"). If during this process, Licensor determines the request is denied based on insufficient capacity or for reasons of safety, reliability and generally applicable engineering purpose Licensor shall inform Licensee that the Application for Pole License is denied together with the reason. All expenses incurred by Licensor in reviewing Licensee's Application for Pole License shall be borne by Licensee even if such request is denied by Licensor.

C. Advance Payment of Make Ready Work Estimate and Expedited Charges. If Licensee upon review of the Make Ready Estimate desires to proceed with the process to obtain a License from Licensor, Licensee shall submit payment in the amount of the Make Ready Estimate together with the Application Fee and engineering survey costs to Licensor within fourteen (14) days of receipt of the Make Ready Estimate and invoice for such amounts. Licensee shall be solely responsible for negotiating with existing attachers for Make-Ready Work relating to such other existing attacher facilities located on,

within or in Licensor's Poles and shall be responsible for paying all charges incurred in transferring or rearranging existing attacher facilities to accommodate the placement of Licensee's Attachment on, within or in Licensor's Poles. In the event, Licensee declines to proceed with the project Licensee shall reimburse Licensor any costs and expenses incurred by Licensor to date including but not limited to Application Fee, engineering and administrative expenses and costs.

D. Completion of Make Ready Work and Issuance of License. Licensor shall undertake to complete any Make Ready Work of its owned facilities upon receipt of Licensee's payment of the Make Ready Estimate. Upon completion of all Make Ready Work and receipt of all fees and charges due from Licensee to Licensor, Licensor shall issue Licensee an approved License which shall be in the form of a Licensor countersigned Application for Pole License. At that time Licensee will be considered to have been granted a License with respect to the Poles approved in the License and may attach to Licensor's Poles in accordance with the terms and conditions of this Agreement.

E. Licensee shall maintain a copy of all Application for Pole Licenses and approved Licenses. Licensor may provide upon request copies of the same to the extent available and Licensee shall reimburse Licensor for its costs in preparing and sending requested copies.

9. AUTHORITY FOR PLACEMENT OF ATTACHMENT

A. Before any placement of Attachments by Licensee, regardless of whether a License may have been issued, Licensee represents and warrants that it has the authority to maintain Attachments within public rights-of-way, or on private rights-of-way or on private property, and shall upon request provide a copy of documentation evidencing such right to Licensor. Licensee shall be solely responsible for obtaining all licenses, easements, authorizations, permits and consents from federal, state and local authorities or private land owners that may be required to place and maintain Attachments on Licensor's Poles.

B. Licensor and Licensee agree that neither party has the right to restrict or interfere with the other party's lawful access to and use of public right-of-way, including public right-of-way, which pass over property owned by either party. Except as otherwise specifically provided in this Agreement, Licensor and Licensee shall each be responsible for obtaining their own right-of-way and permission to use real or personal property owned or controlled by any governmental body or private entity or person.

C. Licensor may, without incurring any liability, remove Attachments of Licensee from Licensor's Poles, at Licensee's sole expense where in Licensor's sole judgment such removal is required in connection with the performance of Licensor's service obligation or the safety of Licensor's employees. Whenever such removal has been made, Licensee will be notified.

10. CONSTRUCTION AND MAINTENANCE

A. Licensee's Attachments shall be placed and maintained in accordance with the following:

- 1.** any and all Licensor requirements and specifications of Licensor, and
- 2.** the terms and conditions of this Agreement, and
- 3.** the National Electric Safety Code (most recent edition), and
- 4.** the National Electric Code (most recent edition), and

5. in compliance with any other rules or orders now in effect or that may hereafter be issued by any state utility commission or other authority (state, federal, local) having jurisdiction over including but not limited to Poles, rights-of-way, and Hazardous Materials.

Each of Section 10(A)(1-5) is incorporated by reference and made a part of this Agreement, and in the event of a conflict or difference between any of these specifications and requirements, the more stringent will apply. Licensee agrees to rearrange its Attachments, within a commercially reasonable timeframe, in accordance with changes in the standards referenced herein in this Section 10(A) of this Agreement, or if required by law.

B. Licensee shall, at its own expense, make and maintain its Attachments and use Licensor Poles in a safe condition and in thorough repair, and in a manner acceptable to Licensor, and so as not to conflict with the use of said Poles by Licensor or by other authorized users of said Poles, or interfere with other facilities thereon or which may from time to time be placed thereon. Licensee shall, at its sole expense, upon written notice from Licensor, relocate or replace its Attachments placed on said Poles or transfer them to substituted Poles that may be authorized by Licensor, or perform any other work in connection with said Attachments that may be required. Licensor shall give such written notice as is reasonable in the circumstances, provided, however, that in cases of emergency, as determined by Licensor in its sole discretion, Licensor may arrange to relocate, remove or replace Licensee Attachments placed on said Poles, transfer such Attachments to substituted Poles or perform any other work in connection with said Attachments that may be required in the maintenance, replacement, removal or relocation of said Poles or Licensor or existing attacher facilities thereon or which may be placed thereon, or for the service needs of Licensor, and Licensee shall reimburse Licensor for the expense thereby incurred. For the purpose of this Section, Licensee Attachments shall be understood to include Attachments of Licensee in space reserved for Licensor, or space which Licensor has the right to use, on poles of other companies with which Licensor now has or may hereafter have agreements for joint use and occupancy; and the use of such space by Licensee shall be subject to the terms and conditions of the agreements between Licensor and said other companies.

C. Licensee shall be responsible at all times for the condition of Licensee's Attachments and its compliance with the requirements, specifications, rules, regulations, ordinances and laws specified in this Agreement. Licensor shall have no duty to Licensee to inspect, monitor or maintain the condition of Licensee's Attachments (including, but not limited to, splices and other facilities connections) located on, within or in Licensor's Poles. Licensor may make periodic or spot inspections at any time of any part of Licensee's Attachments as Licensor determines reasonable or necessary in its sole judgment, pursuant to Section 16 of this Agreement.

D. Licensee shall not authorize any person or entity acting on Licensee's behalf ("Licensee Contractor") to perform any work on, within or in Licensor's Poles without first verifying, to the extent practicable, on each date when such work is to be performed and, that the condition of the Poles is suitable for the work to be performed. If Licensee or Licensee Contractor determines that the condition of the Poles is not suitable for the work to be performed, Licensee shall notify Licensor of the condition of the Poles in question and shall not proceed with construction activities until Licensee is satisfied that the work can be safely performed.

E. Licensee shall be solely responsible for paying all persons and entities that provide materials, labor, access to real or personal property, or other goods or services in connection with the construction and placement of Licensee's Attachments and for directing the activities of all Licensee Contractors while

they are physically present on, within or in the vicinity of Licensor's Poles. Licensee shall not permit any mechanic's lien, material man's lien, or any other lien, claim or security interest to attach to or encumber any of Licensor's real or personal property at any time.

F. Licensee's main line Attachments shall be tagged at maximum intervals of 300 feet so as to identify Licensee as the owner of the Attachment. Licensee shall place fiber wrap/ID at the specific Licensor Poles attaching point and at any aerial span splice location and/or slack loop. The tags shall be of sufficient size and lettering so as to be easily read from ground level.

11. OVERLASHING

A. Licensee may, upon notice to Licensor, overlash its own existing authorized Attachment and this does not constitute a separate Attachment, as it relates to the billing of Pole Attachment Fees, unless multiple/separate Attachment points are physically made at the Poles itself outside of the scope of a single Attachment. Such notice shall be in the form of an Exhibit B Application for Pole License, and any additional Attachments being installed on Poles, regardless of it being an overlash of existing Attachment or as a new Attachment, will require an engineering analysis to determine if the additional loading negatively impacts the Poles capacity. Any additional load which causes the Pole to exceed its rated capacity or no longer provides for ample ground clearance of the Attachments or other facilities will necessitate the need for the Licensee to pay any and all Make Ready Work necessary. Each overlash strand shall not exceed a 2" maximum diameter.

B. In no event shall Licensee allow a third party to overlash to Licensee's Attachments without prior notice to and consent from Licensor. Any third party must execute a License Agreement with Licensor and obtain a license thereunder.

12. MODIFICATIONS, ADDITIONS, REPLACEMENTS OR REARRANGEMENTS

A. Licensee shall not modify, overlash, add to, or replace Attachments on any Poles without first notifying Licensor in writing of the intended modification, addition or replacement at least thirty (30) days prior to the date the activity is scheduled to begin. The required notification shall include:

1. the date the activity is scheduled to begin including the Pole location and Pole number,
2. a description of the planned modification, addition, or replacement,
3. a representation that the modification, addition, or replacement will not require any space other than the space previously designated for Licensee's Attachments, and
4. a representation that the modification, addition, or replacement will not impair the structural integrity of the Poles involved.

B. Upon Licensor's receipt of a complete Exhibit B Application for Pole License, Licensor will perform, at Licensee's sole expense, a field check and if Licensor determine that the modification, addition, or replacement specified by Licensee in its notice will require more space than that allocated to Licensee or will require the rearrangements of, reinforcement of, replacement of, or an addition of support equipment to the Poles involved in order to accommodate Licensee's modification, addition, or replacement, Licensor will so notify Licensee and the parties will follow the Make Ready Work process

as set forth in Section 8 of this Agreement in order to obtain authorization for the modification, addition, or replacement of its Attachments.

C. Should Licensee request Licensor to expand capacity or purchase additional plant and should Licensor so agree, Licensee agrees to pay all cost and expenses thereby incurred by Licensor. If another party that has been granted a license joins in the request and will benefit from the expansion or purchase, Licensee agrees to pay a percentage of all costs proportionate to Licensee's share of the benefit received from the expansion or purchase, but Licensee shall be responsible for all costs and expenses not paid by the other party.

D. When multiple applications, including those of Licensee, are received by Licensor with respect to any Poles which must be replaced or rearranged to provide additional space prior to commencement of the work on such Poles, Licensor's facilities may need to be transferred in which case Licensee shall pay for all costs for such transfers.

E. In the event Licensor plans to modify or alter any Poles upon which Licensee has placed Attachments, Licensor, except in emergency situations, shall provide Licensee written notice of the proposed modification or alteration at least sixty (60) days prior to the time the proposed modification or alteration is scheduled to take place. Should Licensee decide to modify or alter Licensee's Attachments on Poles, Licensee shall so notify Licensor in writing at least thirty (30) days prior to the day the work is to begin. In such event, Licensee shall bear a proportionate share of the total costs incurred by Licensor to make Licensor Poles accessible.

F. In the event Licensor is required to move the location of, or replace, any Licensor Poles for reasons beyond its control, Licensee concurrently shall relocate Licensee's Attachments. Licensee shall be solely responsible for the costs of the relocation of Licensee's Attachments. When it is mutually agreed that it is in the best interest of Licensor and Licensee, Licensor may, after proper notification has been provided, transfer Licensee's Attachments at the same time that Licensor transfers its facilities and shall invoice Licensee for the actual costs incurred in performing the transfer of Licensee's Attachments.

13. EMERGENCY RESTORATION

A. In the event of an emergency, restoration procedures may be affected by the presence of Licensee's Attachments. While Licensor shall not be responsible for the repair of damaged Attachments, Licensor shall nonetheless control access to its Poles if the restoration is to be achieved in an orderly fashion.

B. Where Licensor and Licensee are involved in emergency restorations, access to Licensor's Poles will be controlled by Licensor according to the following guidelines.

1. Service Disruptions/Outages

- a) While exercising its right to first access, Licensor shall make all reasonable efforts to grant access to as many other entities with attachments as is reasonably safe.
- b) Where simultaneous access is not possible, Licensor will grant access on first come, first served basis.

2. Service Affecting Emergencies

- a) While exercising its right to first access, Licensor shall make all reasonable efforts to grant access to as many other entities with attachments as is reasonably safe.
- b) Where Licensor is unable to grant simultaneous access to all other entities with attachments, access will be granted according to the level of damage to the attachments of each entity and the likelihood that a given level of damage will result in service disruption. Where the likelihood that a service disruption will result is not clearly discernible, access will be on a first come, first served basis.

C. Without limiting any other indemnification or hold harmless provisions of this Agreement, Licensee agrees that any decision by Licensor regarding access to its Attachments, or any action or failure to act by Licensor, under this section shall not be the basis for any claim by Licensee against Licensor for any damage to Licensee's Attachments or disruption of Licensee's Services, or any other direct or indirect damages of any kind whatsoever incurred by Licensee.

14. FAILURE TO PLACE ATTACHMENTS

Once Licensee has been issued a License, Licensee shall have ninety (90) calendar days from the date of the License was issued to begin the placement of its Attachments on the Licensor Poles covered by the License. If Licensee has not begun placing its Attachments within the ninety (90) day period, Licensee shall so advise Licensor with a written explanation and notice for the delay. If Licensee fails to advise Licensor of its delay by notice thereof or if Licensee fails to act in good faith by not making a bona fide effort to begin placing its Attachments within the ninety (90) calendar days prescribed by this section, the License shall be automatically rescinded by Licensor and deemed null and void, and Licensee shall have no further right to place the Attachments pursuant to such voided License.

15. ABANDONMENT

Nothing in this Agreement shall prevent or be construed to prevent Licensor from abandoning, selling, assigning, or otherwise disposing of any Poles. Licensor shall notify Licensee of any sale, assignment, or other disposition of any Poles or other Licensor property used for Licensee's Attachments.

16. INSPECTIONS AND INVENTORIES

A. **Post construction and/or periodic inspection of Licensee Attachments.** Licensor shall have the right, but not the obligation, to make a post construction inspection and periodic inspections at any time of any part of Licensee's Attachments on Poles and any other associated facilities for the limited purpose of determining whether Licensee's Attachments are in compliance with the terms of this Agreement and any Licenses issued hereunder. Such inspections shall be conducted at Licensor's expense with the exception of (1) a post construction inspection, (2) follow-up inspection to confirm remedial action after an observed Licensee violation of the requirements of this Agreement; and (3) inspection of Licensee Facilities in compliance with a specific mandate of appropriate governmental authority, for which inspections the cost shall be borne solely by Licensee.

B. Inventories. Upon written notice to Licensee, the total number and location of Licensee's Attachments on Licensor's Poles may be determined, at Licensor's discretion, through a survey which may be made not more than once per calendar year by Licensor. If so requested, Licensee and /or any other entity owning or jointly using the Poles with Licensor may participate in the survey. The costs incurred by Licensor to conduct the survey shall be reimbursed to Licensor by Licensee upon demand by Licensor regardless of whether or not Licensee participates in the survey. If the Attachments of more than one licensee are surveyed, each such licensee shall contribute a proportionate share of the costs reimbursed to Licensor.

C. No Duty to Licensee. Neither the act of inspection or survey by Licensor of Licensee's Attachments nor any failure to inspect such Attachments shall operate to impose on Licensor any liability of any kind whatsoever or to relieve Licensee of any responsibility, obligations or liability under this Agreement, any License issued hereunder, or applicable law, or to any third party contractor, Licensee Contractor, or otherwise.

17. UNAUTHORIZED ATTACHMENTS

A. If any Licensee Attachment shall be found on Poles for which no License has been granted by Licensor pursuant to the terms of this Agreement ("Unauthorized Attachment"), Licensor, without prejudice to its other rights or remedies under this Agreement or otherwise, may:

1. impose charges as set forth herein, and
2. require Licensee to remove such Unauthorized Attachment or Licensor may remove such Unauthorized Attachment without liability and the expense of removal shall be borne by Licensee.

B. For the purpose of determining the charges, Licensee shall pay an amount per Unauthorized Attachment equal to the Pole Attachment Fee that would have applied if Licensee had properly obtained a License based upon the then current Attachment Rate for the number of years the Unauthorized Attachment have existed (or, if that cannot be determined, the number or years since the most recent inventory or five (5) years, whichever is less), plus interest at a rate the greater of 1.5% per month or the maximum allowed by law. In addition, if the Unauthorized Attachment is discovered during a survey where Licensee declined to participate an additional fee of \$100 per Unauthorized Attachment shall be charged to Licensee. Licensee agrees and acknowledges in the event of an Unauthorized Attachment actual damages would be difficult to determine and the charges described herein are liquidated damages, not penalties, and represent a fair and reasonable estimate of the damages which may be incurred by Licensor for Unauthorized Attachments on Licensor's Poles including wear and tear, lost revenue, increased maintenance and repair costs for having to work on a Pole where the owner of a facility is unknown, and the risk of liability for safety violations that may be the result of an Unauthorized Attachment.

C. Any such charge as set forth in Section 17(B) imposed by Licensor shall be in addition to its rights to any other sums due and payable, including without limitation Make Ready Work costs, the actual costs of any audit or survey which established the existence of the Unauthorized Attachment and to any claims to said fees.

D. No act by Licensor with regard to any unauthorized use shall be deemed as a ratification or the licensing of the unauthorized use, and if any License should subsequently be issued, after application and payment of all applicable fees therefore, said License shall not operate retroactively or constitute a waiver by Licensor of any of its rights or privileges under this Agreement or otherwise, and Licensee shall be subject to all liabilities, obligations and responsibilities of this Agreement in regard to said unauthorized use from its inception.

E. An Unauthorized Attachment shall include, but not limited to:

1. an Attachment to Poles which is not identified in any License issued in accordance with this Agreement;
2. an Attachment that occupies more space than that allocated to Licensee by Licensor in a License;
3. an Attachment that is not placed in accordance with the provisions of this Agreement or the appropriate License issued pursuant to this Agreement, unless Licensee can demonstrate to Licensor's reasonable satisfaction that said misplacement is not due to any act or omission of Licensee or Licensee's agents;
4. an addition or modification by Licensee to its pre-existing Attachment(s) that impairs the structural integrity of the involved Licensor Poles.
5. an Attachment that consists of facilities owned or controlled by, and for the use of a party other than Licensee that is overlashed to Licensee Attachments without approval by Licensor as required under this Agreement.

F. Once Licensor has notified Licensee of an Unauthorized Attachment. Licensee shall submit an Exhibit B Application for Pole License to request an authorization for the Attachment. An Exhibit B Application for Pole License submitted per this provision will be treated like any other Exhibit B Application for Pole License subject to this Agreement. Licensee will be responsible for all fees associated with an Exhibit B Application for Pole License (as identified in this Agreement). If an Exhibit B Application for Pole License is not received by Licensor within ten (10) days of Licensor's notice of an Unauthorized Attachment, Licensee has sixty (60) days from the date of the Unauthorized Attachment notification to vacate the Pole. If Licensee fails to remove Licensee's facilities within such sixty (60) day period, Licensor shall have the right to remove Licensee's facilities at Licensee's expense and without any liability on the part of Licensor for damage or injury to Licensee's facilities or disruption of Licensee's Services.

18. COMPLIANCE WITH LAW, ASSUMPTION OF RISK, AND DISCLAIMER OF WARRANTIES

A. Notwithstanding anything to the contrary in this Agreement, Licensee shall ensure that any and all activities it undertakes pursuant to this Agreement shall comply with all applicable laws, including, without limitation, all applicable provisions of:

1. Workers' compensation laws

2. Unemployment compensation laws
3. The Federal Social Security Law
4. The Fair Labor Standards Act, and
5. All laws, regulations, rules, guidelines, policies, orders, permits and approvals or any governmental authority relating to environmental matters including but not limited to Hazardous Materials and/or Occupational Safety and Health Act (“OSHA”).

B. LICENSEE ACKNOWLEDGES AND AGREES THAT LICENSOR DOES NOT MAKE ANY REPRESENTATION OR WARRANTIES AS TO THE CONDITION OR SAFETY OF LICENSOR’S POLES ANY ASSOCIATED FACILITIES AND EQUIPMENT ON, WITHIN OR SURROUNDING THE SAME, OR THE PREMISES SURROUNDING THE SAME, LICENSEE HEREBY ASSUMES ALL RISKS OF ANY DAMAGE. INJURY OR LOSS OF ANY NATURE WHATSOEVER CAUSED BY OR IN CONNECTION WITH THE USE OF POLES AND ASSOCIATED FACILITIES AND EQUIPMENT ON, WITHIN OR SURROUNDING THE SAME, AND THE PREMISES SURROUNDING THE SAME AND LICENSEE IS SOLELY RESPONSIBLE FOR ALL ALLEGED DAMAGES CLAIMED BY THIRD PARTIES ACCESSING OR WORKING ON OR NEAR LICENSOR’S POLES.

C. EXCEPT AS OTHERWISE PROVIDED HEREIN, LICENSOR MAKES NO WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, ALL OF WHICH ARE HEREBY EXPRESSLY DISCLAIMED, WITH REGARD TO THIS AGREEMENT AND ANY LICENSE ISSUED HEREUNDER INCLUDING, WITHOUT LIMITATION, ACCESS TO LICENSOR’S POLES OR OTHER FACILITIES.

19. LICENSEE CONTRACTOR QUALIFICATIONS

- A.** The parties acknowledge that from time to time Licensee may use a Licensee Contractor to perform work for Licensee on, within or in Licensor’s Poles.
- B.** Licensee represents and warrants that any of its employees or Licensee Contractors shall not climb or work on any of Licensor’s Poles, or work within Licensor’s Right-Of-Way unless such person has the training, skill, and experience required to recognize potentially dangerous conditions relating to Poles and to perform the work safely.
- C.** Licensee assumes all risk of Licensee Contractors and agrees to indemnify, defend and hold harmless Licensor from all claims, losses, damages and liabilities, costs and expenses (including, but not limited to, reasonable attorney’s fees) associated thereto in accordance with the indemnification provision of this License Agreement.
- D.** When Licensee Contractors are working on, within or in the vicinity of any part of Licensor’s Poles or Right-Of-Way, all such Licensee Contractors shall follow procedures which Licensee deems appropriate for the protection of persons and property. Licensee shall be responsible at all times for determining and implementing the specific steps required to protect persons and property at the site. Licensee will provide all traffic control and warning devices required to protect pedestrian and vehicular

traffic, workers and property from danger. Licensee has sole responsibility for the safety of all its employees and Licensee Contractors, for the safety of bystanders, and for insuring that all operations conform to terms and conditions set forth in this Agreement. Licensor reserves the right to suspend Licensee's activities on, within or in the vicinity of Licensor's Poles or Right-Of-Way if, in Licensor's sole judgment, any hazardous condition arises due to the activity (including both acts and omissions) of any Licensee Contractor or Licensee employee, which suspension shall cease when the condition has been rectified.

E. Licensee represents and warrants that all Licensee Contractors shall maintain the same insurance coverage and limits as are required of Licensee under this Agreement, and if not Licensee's insurance will provide such coverage.

F. Licensee acknowledges that all Licensee Contractors are not Licensor's employees or agents and Licensee assumes full responsibility for their actions or omissions to act. Licensee shall be solely responsible for the payment of compensation of Licensee's employees, contractors or agents assigned to perform work hereunder and such employees, contractors and agents shall be informed that they are not entitled to the provision of any Licensor benefits. Licensor shall not be responsible for payment of workman's compensation, disability benefits, and unemployment insurance or for withholding or paying employment related taxes for any employee of Licensee, but such responsibility shall be solely that of Licensee. In the event that any federal, state or local government agency, any court or any other applicable entity determines that the personnel provided by Licensee or any permitted Licensee Contractor are employees of Licensor for any purpose, Licensee agrees to indemnify, defend and save harmless Licensor from all liabilities, costs, and expenses (including, but not limited to, reasonable attorney fees) associated with such determination in accordance with the indemnification provision of this License Agreement.

G. Any work by Licensee Contractors on, within or in Licensor's Poles or Right-Of-Way shall be done only when specific authorization for such work has been obtained in writing in advance from Licensor pursuant to the terms and conditions of this Agreement. The parties agree that all work shall be performed according to existing industry standards and practices and the requirements and specifications set forth in this Agreement and any License issued hereunder.

20. DEFAULT

A. In addition to other events of defaults defined anywhere else in this Agreement, any one of the following shall be deemed the occurrence of a default under this Agreement:

1. failure by Licensee to pay when due any fee or other sum required to be paid under the terms of this Agreement.
2. failure by either party to perform or observe any other term, condition, covenant, obligation, or provision of this Agreement and such default continues for a period of thirty (30) days after written notice thereof from the other party (provided that if such default is not curable within a thirty (30) day period, the period may be extended if the party substantially commences to cure such default and proceeds diligently thereafter to effect such cure).

3. the filing of any tax or lien against Poles because of any act or omission by Licensee which is not bonded or discharged within thirty (30) days of the date of notice to Licensee that such lien has been filed;
4. Licensee's voluntary or involuntary bankruptcy;
5. Licensee's use or maintenance of its Attachments in violation of any law or regulation, or in aid of any unlawful act or undertaking;
6. if any authorization which may be required of Licensee by any governmental or private authority for the placement, operation, or maintenance of Licensee's Attachments is denied or revoked.

B. In the event of a default and subject to any other applicable provision of this Agreement, the non-defaulting party, without any further notice to the defaulting party (except where expressly provided for below or required by applicable law), may do any one or more of the following:

1. perform on behalf and at the expense of the defaulting party, any obligation of the defaulting party under this Agreement which the defaulting party has failed to perform and of which the non-defaulting party shall have given the defaulting party notice, the cost of which performance shall be paid by the defaulting party to the non-defaulting party upon demand;
2. terminate this Agreement by giving sixty (60) days written notice of such termination to Licensee and remove Licensee's Attachments and store Licensee's facilities in a public warehouse or elsewhere at the expense of and for the account of Licensee without Licensor being deemed guilty of trespass or conversion, and without Licensor becoming liable for any loss or damages to Licensee occasioned thereby; or
3. exercise any other legal or equitable right or remedy that the non-defaulting party may have.

C. The defaulting party shall repay to the non-defaulting party upon demand any costs and expenses incurred by the non-defaulting party (including, without limitation, reasonable attorneys' fees) in successfully enforcing this Agreement.

D. Upon termination of this Agreement by the non-defaulting party, the defaulting party shall remain liable to the non-defaulting party for any and all fees, other payments and damages which may be due or sustained in accord with this Agreement prior to such termination, all reasonable costs, fees and expenses, including, without limitation, reasonable attorney' fees incurred by the non-defaulting party in pursuit of its remedies hereunder.

E. All rights and remedies of the non-defaulting party set forth in this Agreement shall be cumulative and none shall exclude any other right or remedy, now or hereafter allowed by or available under any statute, ordinance, rule of court, or the common law, either at law or in equity, or both.

21. INDEMNIFICATION AND LIMITATION OF LIABILITY

A. Licensee shall compensate Licensor for the full actual loss, damage or destruction of Licensor's property that in any way arises from or is related to this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation, or maintenance of Licensee's Attachments).

B. Licensee agrees to defend, indemnify, protect and hold harmless Licensor and its officers, directors, employees, shareholders, successors, assigns, agents, affiliates, representatives, partners, and contractors from and against any and all claims, actions, administrative proceedings (including, without limitation, informal proceedings), judgments, damages, penalties, fines, cost, liabilities, interests, or loss, including, without limitation, reasonable attorneys' fees and expenses, consultant fees, and expert fees, together with all other costs and expenses of any kind or nature suffered by or asserted against Licensor in any way arising out of or connected with this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation or maintenance of Licensee's Attachments, unless caused solely by the negligence or willful misconduct of Licensor or Licensor's affiliates, agents, officers, employees and assigns). Licensee expressly assumes all liability for actions by its affiliates, agents, officers, employees, or Licensee Contractors and expressly waives any immunity from the enforcement of this indemnification provision that might otherwise be provided by workers' compensation law or by other state or federal laws.

C. Without limiting any of the foregoing, Licensee assumes all risk of, and agrees to relieve Licensor of any and all liability for, loss or damage (and the consequences of loss or damage) to any facilities placed on Licensor's property and any other financial loss sustained by Licensee, except to the extent caused by the sole negligence or willful misconduct on the part of Licensor or Licensor's agents, officers, employees, and assigns.

D. Without limiting the foregoing, Licensee expressly agrees to indemnify, defend, and hold harmless Licensor and Licensor's agents, officers, employees and assigns from any and all claims asserted by end users/customers of Licensee in any way arising out of or in connection with this Agreement or Licensee's Attachments, except to the extent caused solely by the negligence or willful misconduct of Licensor or Licensor's agents, officers, employees, and assigns, or its contractors.

E. Notwithstanding anything to the contrary in this Agreement, Licensee further shall indemnify and hold harmless Licensor, its agents, officers, employees, and assigns from and against any claims, liabilities, losses, damages, fines, penalties, and costs (including, without limitation, reasonable attorneys' fees) whether foreseen or unforeseen, which the Licensor suffers or incurs because of:

1. any discharge of Hazardous Materials resulting from acts or omissions of Licensee, Licensee Contractors or Licensee's predecessor in interest;
2. acts or omissions of Licensee, its agents, employees, Licensees, or representatives in connection with any cleanup required by law, or
3. failure of Licensee or Licensee Contractors to comply with Environmental, Safety and Health Laws.

F. Licensee shall indemnify, protect, and hold harmless Licensor from and against any and all claims for libel and slander, copyright and/or patent infringement arising directly or indirectly by reason of installation of Licensee's Attachments pursuant to this Agreement.

G. In the event of any claim, demand or litigation specified the indemnity provision, the party to be indemnified (the "Indemnified Party") shall give prompt notice to the other party (the "Indemnifying Party") of such claim, demand or litigation. The Indemnifying Party shall have sole control of the defense of any action or litigation on such a claim or demand (including the selection of appropriate counsel) and all negotiations for the settlement or compromise of the same, except that the Indemnifying Party may not make any non-monetary settlement or compromise without the Indemnified Party's consent, which consent shall not be unreasonably withheld. The Indemnified Party shall cooperate with the Indemnifying Party in the defense and/or settlement of any claim, demand or litigation. Nothing herein shall be deemed to prevent the Indemnified Party from participating in the defense and/or settlement of any claim, demand or litigation by the Indemnified Party's own counsel at the Indemnified Party's own expense.

H. NOTWITHSTANDING ANYTHING TO THE CONTRARY CONTAINED IN THE AGREEMENT, NEITHER PARTY SHALL BE LIABLE TO THE OTHER PARTY FOR CONSEQUENTIAL, INCIDENTAL, PUNITIVE, EXEMPLARY OR INDIRECT DAMAGES SUFFERED BY SUCH PARTY OR BY ANY SUBSCRIBER, CUSTOMER OR PURCHASER OF SUCH PARTY FOR LOST PROFITS OR OTHER BUSINESS INTERRUPTION DAMAGES, WHETHER BY VIRTUE OF ANY STATUTE, IN TORT OR IN CONTRACT, UNDER ANY PROVISION OF INDEMNITY, OR OTHERWISE, REGARDLESS OF THE THEORY OF LIABILITY UPON WHICH ANY SUCH CLAIM MAY BE BASED OR WHETHER IT (a) HAS BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES OR (b) IS NEGLIGENT.

22. INSURANCE

A. Licensee shall obtain and maintain, in full force and effect at all times, during operations covered by this Agreement, such minimum insurance as will cover the obligations and liabilities of Licensee, its agents, and its employees which may arise from the operations under this Agreement. Insurance shall have limits of not less than Commercial General Liability policy of minimum limits of:

General Aggregate	\$ 2,000,000 per policy period
Products/Completed Operations Aggregate	\$ 2,000,000 per policy period
Personal Injury/Advertising	\$ 2,000,000 per occurrence
Each Occurrence	\$ 2,000,000 per occurrence
Fire Legal Liability	\$ 50,000 any one fire

B. The policy will be endorsed to show the above aggregate limits applying to "each" job site or, as an alternative, the General Aggregate will be increased to \$4,000,000 per policy period. Policy will also specifically state the coverage applies to all operations conducted by the Licensee, its employees, or agents on behalf of Licensee or subsidiary.

C. Where the performance of the work involves structural property, underground property, or blasting, Licensee's Commercial General Liability insurance policy shall provide coverage to the insured for legal liability arising from operations under this Agreement for property damage:

1. arising out of blasting,
2. arising out of collapse of, or structural injury to, any building or structure or
3. To underground facilities and utilities.

D. Other general liability forms are acceptable in lieu of the Commercial General Liability Form however they are not to be used without written approval from Licensor.

1. Business Automobile Liability policy with minimum limits of:

Bodily Injury	\$2,000,000 per accident
Property Damage	\$ 2,000,000 per accident
OR	
Combined Single Limit	\$ 2,000,000 per accident

The policy will be issued using symbol "1 - any auto" coverage.

2. Workers Compensation:

Part 1 - Medical Benefits	Statutory
---------------------------	-----------

Part 2 - Employer's Liability as indicated:

Bodily Injury by Accident	\$ 1,000,000 each accident
Bodily Injury by Disease	\$ 1,000,000 each employee
Bodily Injury by Disease	\$ 1,000,000 policy limit

E. The policy will show the state in which operation on behalf of the Licensee and/or subsidiary is being conducted. For operations conducted within monopolistic (state fund) states, Licensee will furnish a certificate of compliance from the appropriate state fund administrator.

F. In each and every policy except workers' compensation, Licensor and its subsidiaries shall be named an "additional insured" with respect to activities performed on behalf of the Licensee and its subsidiaries.

G. Coverage provided by the policies listed in this paragraph will be issued by an insurance company, licensed in the state in which operations on behalf of the Licensee are to be conducted. It is acceptable to use both primary and excess/umbrella policies to obtain necessary limits. The worker's compensation policy must contain a waiver of subrogation clause.

H. Licensee will furnish to Licensor, a certificate evidencing insurance coverage under sub-paragraphs 22(A) and (D). Such certificate or Licensee shall provide for a thirty (30) day prior notice to the Licensor of any cancellation or material changes in coverage and shall be signed by a legal representative of the issuing insurance company. The certificate of insurance shall be sent to Licensor's contact identified in Exhibit E.

I. The provisions of sub-paragraphs 22 (A) and (D) shall also apply to all Licensee Contractors and Licensee shall be responsible for their compliance herewith.

23. NOTICES

Any and all notices to a party required or permitted under this Agreement shall be in writing and shall be: (a) delivered personally; (b) delivered by express overnight delivery service; (c) mailed, via certified mail or first class U.S. Postal Service, with postage prepaid, and a return receipt requested; or (d) delivered by electronic mail; provided that a paper copy is also sent via methods (a), (b), or (c) of this Section. Notices will be deemed given as of the earliest of: the date of actual receipt; the next business day when sent via express overnight delivery service; five (5) calendar days after mailing in the case of first class or certified U.S. Postal Service, or on the date set forth on the confirmation produced by the sent confirmation when sent prior to 5:00 p.m. in the recipient's time zone, but the next business day when delivered at 5:00 p.m. or later in the recipient's time zone. Notices will be addressed to the parties as set forth in Exhibit E as may be updated in writing by the parties from time to time in accordance with method set forth under this Section 23.

24. CONFIDENTIALITY

Neither party shall at any time disclose, provide, demonstrate or otherwise make available to any third party any of the terms or conditions of this Agreement or any materials provided by either party specifically marked as confidential, except upon written consent of the other party, or as may be required by applicable law or governmental authorities. Notwithstanding the foregoing, nothing in this Section shall prevent disclosure to a party's authorized legal counsel who shall be subject to this confidentiality section, nor shall it preclude the use of this Agreement by the parties to obtain financing, to make or report matters related to this Agreement in any securities statements, or to respond to any requests by governmental or judicial authorities; provided, however, that any such disclosure shall be limited to the extent necessary, and shall be made only after attempting to obtain confidentiality assurances. Notwithstanding the foregoing, prior to making any disclosure in response to a request of a governmental authority or legal process, the party called upon to make such disclosure shall provide notice to the other party of such proposed disclosure sufficient to provide the other with an opportunity to timely object to such disclosure. Notwithstanding the foregoing, Licensor may, without notice to Licensee: (i) negotiate or enter into any agreement with any other person(s) or entity(ies) that is identical or similar to this Agreement; and (ii) provide the text of all or part of this Agreement to any other party, so long as Licensor shall redact therefrom all references to Licensee and shall not associate such text with Licensee or identify Licensee as having agreed to such text or terms.

25. DISPUTE RESOLUTION

A. Except in the case of:

1. a suit, action, or proceeding by one party to compel the other party to comply with its obligation to indemnify the other party pursuant to this Agreement, or
2. a suit, action or proceeding to compel either party to comply with the dispute resolution procedures set forth in this section, the parties agree to use the following procedure to resolve any dispute, controversy, or claim arising out of or relating to this Agreement or its breach.

B. At the written request of a party, each party shall designate a knowledgeable, responsible representative to meet and negotiate in good faith to resolve any dispute, controversy, or claim arising

under this Agreement. The parties intend that these negotiations be conducted by non-lawyer, business representatives. The substance of the negotiations shall be left to the discretion of the representatives. Upon mutual agreement, the representatives may utilize other alternative nonbinding dispute resolution procedures such as mediation to assist in the negotiations. Discussions and correspondence between the representatives for the purposes of these negotiations shall be treated as confidential, undertaken for purposes of settlement, shall be exempt from discovery and production, and shall not be admissible in any subsequent proceeding without the concurrence of all parties. Documents identified in or provided during such negotiations, which are not prepared for purposes of the negotiations, shall not be so exempt and may, if otherwise admissible, be admitted as evidence in any subsequent proceeding.

C. If a resolution of the dispute, controversy or claim is not reached within ninety (90) days of the initial written request referred to in this Section 25, the dispute, controversy, or claim may be filed with the State utility commission or the Federal Communication Commission, if applicable, for review and determination, provided the party invoking the commission's intervention process has in good faith negotiated, or attempted to negotiate, with the other party pursuant to this Section 25.

D. Except as otherwise provided in this Agreement under the Indemnification or Default provision or elsewhere, each party shall bear its own costs, including attorneys' fee, incurred in connection with any of the foregoing procedures. A party seeking discovery shall reimburse the responding party the cost of reproducing documents (to include search time and reproduction time costs).

26. TAXES

Each party shall pay all taxes and assessments lawfully levied on its own property and services subject to this Agreement.

27. WAIVER

Failure by either party to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

28. NO THIRD PARTY BENEFICIARIES

Except as otherwise provided in this Agreement, this Agreement is intended to benefit only the parties and may be enforced solely by the parties, their successors in interest or permitted assigns. It is not intended to, and shall not, create rights, remedies or benefits of any character whatsoever in favor of any persons, corporations, associations, or entities other than the parties, except as provided herein.

29. FORCE MAJEURE

Neither party shall be liable for any delay or failure in performance of any part of this License Agreement or License issued hereunder from any cause beyond its reasonable control and without its fault, omission or negligence, such as acts of God, acts of civil or military authority, embargoes, epidemics, war, terrorist acts, riots, insurrections, fires, explosions, earthquakes, nuclear accidents, floods, power blackouts, labor strikes, lockouts or work stoppages or severe weather ("Force Majeure Event"). In the event of a Force Majeure Event, upon giving prompt notice to the other party, the due date for performance by the affected party of its original obligation(s) shall be extended by a term equal to the

time lost by reason of the Force Majeure Event. In the event that the affected party is able to partially perform its obligations, it shall perform its obligations at a performance level no less than that which it uses for its own operations.

30. ASSIGNMENT

Licensee shall not assign; transfer or sublet the privileges hereby granted, or sell, lease or otherwise permit the use of its facilities on or any part thereof (all of the foregoing being "Transfers"), without prior consent in writing of Licensor. No such consent granted by Licensor shall be effective until Licensee's assignee, sublessee or other transferee has agreed, on an enforceable separate document signed and delivered to Licensor, to assume all obligations and liabilities of Licensee under this Agreement. Licensor may condition such consent upon the assignee's sublessee's or transferee's agreement to reasonable additional or modified terms or conditions. If there is a change of control of Licensee, then Licensor shall have the right, in its reasonable discretion, immediately to terminate this Agreement in its entirety without further liability. Licensor may assign or otherwise transfer this Agreement or any of its rights and interests to any firm, corporation or individual, without the prior consent of Licensee.

31. APPLICABLE LAW

This Agreement, and the rights and obligations contained in it, shall be governed and construed under the laws of the state in which the Attachments hereunder are to be located. The terms and conditions of this Agreement shall be subject to any and all applicable laws, rules, regulations or guidelines now in effect and that subsequently may be prescribed by any federal, state or local governmental authority. To the extent required by any such prescribed law, rule, regulation or guideline, the Parties agree to modify, in writing, the affected term(s) and conditions(s) of this Agreement to bring them into compliance with such law, rule, regulation or guideline. Should any term of this Agreement be determined by a court or agency with competent jurisdiction to be unenforceable, all other terms of this Agreement shall remain in full force and effect.

32. WAIVER OF JURY TRIAL

Licensor and Licensee each expressly waive its right to a jury trial.

33. ENTIRE AGREEMENT, MODIFICATIONS, SURVIVAL AND CONFLICTS AND TARIFFS

A. This Agreement cancels and supersedes all previous agreements whether written or oral, except for any sums due thereunder, between Licensor and Licensee with respect to the Licensee's Attachments to Licensor's Poles; and there are no other provisions, terms or conditions to this Agreement except as expressed herein. All currently effective Licenses and authorizations for Attachments granted pursuant to such previous agreements shall continue in effect subject to the terms and conditions of this Agreement.

B. This Agreement may be amended or supplemented at any time only upon written agreement by the parties hereto. Notwithstanding the foregoing, all Exhibits, fees, Licensor procedures and specifications may be modified by Licensor upon thirty (30) day notice to Licensee.

C. Notwithstanding the termination of this Agreement for any reason, Section 18 Compliance with Laws, Assumption of Risk and Disclaimer of Warranties, Section 21 Indemnification and Limitation of

Liability, Section 22 Insurance, Section 24 Confidentiality and any other provision intended to survive, shall survive termination to the maximum extent permitted under applicable law. Notwithstanding any provisions to the contrary, all rights, remedies, or obligations which arose or accrued prior to the termination or expiration of the terms hereof shall survive and be fully enforceable for the applicable statute of limitations period.

D. It is the intent of the parties that the terms and conditions of this Agreement and any applicable Licensor's state tariffs be construed as being consistent where possible. However, in the event of a conflict or difference between the terms and conditions of this Agreement and Licensor's state tariff, the terms of the applicable state tariff shall control.

34. AUTHORITY AND COUNTERPARTS AND ELECTRONIC SIGNATURES

A. Each party represents and warrants that it is a corporation duly organized, validly existing and in good standing under the laws of the state in which the obligations under this License Agreement are to be performed. Each party warrants that it has full power and authority to execute and deliver this License Agreement and to perform its obligations hereunder.

B. This Agreement may be executed using facsimile or electronic signatures and such facsimile or electronic version of the Agreement shall have the same legally binding effect as an original paper version. This Agreement may be executed in counterparts, each of which shall be deemed an original.

EXHIBIT A **DEFINITIONS**

“Application for Pole License” - A written request submitted in the form of Exhibit B from Licensee to Licensor requesting authorization to attach Licensee owned facilities to Poles in accordance with this Agreement.

“Attachment(s)” – any facilities, cables or equipment attached to Poles or any other property owned or controlled by Licensor.

“Effective Date” - is the date this Agreement is last signed by the parties.

“Force Majeure Event” – shall have the meaning set forth in Section 29 of the Agreement.

“Hazardous Materials” -

Any substance, material or waste now or hereafter defined or characterized as hazardous, toxic or dangerous as defined by the Comprehensive Environmental Response, Compensation and Liability Act (“CERCLA”) of 1980, as amended, and other federal, state, and local health, safety, and environmental laws, ordinances, statutes, and rules, including but not limited to the Occupational Safety and Health Act (“OSHA”).

Any substance, material or waste now or hereafter classified as a contaminant or pollutant under any law, rules, ordinance, or authority.

Any other substance, material or waste, the manufacture, processing, distribution, use, treatment, storage, placement, disposal, removal or transportation of which is now or hereafter subject to regulation under any law, ordinance, statute, rule or regulation of any governmental body or authority.

“License” – is the specific nonexclusive and revocable permission from Licensor, in the form of a Licensor countersigned and returned Application for License, to Licensee authorizing Licensee to attach its facilities as applied for to Licensor Poles in accordance with this Agreement.

“Licensee Contractors” - shall have the meaning set forth in Section 10(D) of the Agreement.

“Make Ready Estimate” – is Licensor’s estimated cost to perform Make Ready Work on Licensor’s facilities on Poles to accommodate Licensee’s Attachment as requested in an Application for Pole License.

“Make Ready Work” - all Licensor, joint owner or other existing attacher work to prepare Licensor’s Poles and related facilities for the requested Attachment of Licensee’s facilities but not the actual placement of Attachments or administrative activities related to inquiries, verifications, requests or applications.

“Overlashing or overlashed” – lashing of an additional Licensee owned cable to Licensee’s own existing cable and/or strand attached to a Pole as set forth in Section 11 of this Agreement.

“Pole(s)” - a pole owned solely or jointly by Licensor or Poles owned by others to the extent that and for so long as Licensor has the right to permit others to be attached in the communications space.

“Pole Attachment Fee” - the fee paid annually per Attachment on a Pole. For billing purposes, a single Attachment includes the point of Attachment and all facilities located in the usable space on the Poles in the space assigned to Licensee (typically six inches above and six inches below the point of Attachment). If Licensee occupies more than one foot of usable space on Poles, separate Pole Attachment Fees shall apply to each one foot of space occupied.

“Right-of-Way” - right-of-way owned or controlled by Licensor.

“Unauthorized Attachment” – shall have the meaning set forth in Section 17(A) and 17(E) of the Agreement.

Subject: RE: Pole data - MetroNet

Robert: My folks still have some questions. Would it be okay to put Dustin Wilson in contact with you directly? Unfortunately, I don't know enough about this to anticipate questions that he may have. If we could just put the two of you in contact, I won't have to keep bugging you. Let me know if that will work and I'll provide your email to him so he can email some times that might work to get on the phone.

Thanks,
Anita

Cc: Eastman, Andrew M <Andrew.Eastman@windstream.com>
Subject: RE: Pole data - MetroNet

Those fields can be a little confusing, I know. The Ownership field will tell us whether the pole is owned by a Windstream entity (Windstream proper or the REIT company that was spun off, and whether it is a CLEC or ILEC company), by a foreign company or by a customer. I was asked to provide the Windstream poles, so you will not see the FOREIGN or CUSTOMER designations in the data that I sent. Likewise, FGN_Owner should be null as this field is used to tell the name of the foreign company that owns the pole.

Dan: Thanks again for sending the attached. However, I'm being told that we need the entire "esri shapefile" and not just the .dbf file. I'm not sure what that is, but would you mind checking on it and forwarding it, too?

We appreciate it!

Thanks again!
Anita

Dan/Michelle/James: Thanks again for your time earlier this week. We look forward to our call next Tuesday. In the meantime, do you have a GIS of your poles in Lexington? Kentucky Utilities gave us theirs and it would be very helpful to have Windstream's, too. If you do have it and would send it over, it would be greatly appreciated.

Thanks,
Anita

Dan/Michelle/James: Thanks again for your time earlier this week. We look forward to our call next Tuesday. In the meantime, do you have a GIS of your poles in Lexington? Kentucky Utilities gave us theirs and it would be very helpful to have Windstream's, too. If you do have it and would send it over, it would be greatly appreciated.

Thanks,
Anita

Subject: RE: Windstream Contact for Pole Data Questions

Dustin,

All of the poles in the shapefile are supposed to be Windstream poles, but I've found that some of the data is suspect. There are values in the fgn_owner field when those should all be null for Windstream-owned poles. The problem is, which field is in error? The ownership or the fgn_owner? I would treat all of the poles that do not have a value in fgn_owner as Windstream, and any others as potentially Windstream but perhaps belonging to the company found in fgn_owner. For your purposes, the CLEC/ILEC distinction doesn't matter, nor does WINDTREAM/REIT.

If I can answer any further questions, don't hesitate to ask.

Rob

Subject: RE: Windstream Contact for Pole Data Questions

Thank you Anita.

Good morning Robert,

I'm working to identify which poles in the shapefile you sent over are Windstream owned files. Originally I assumed I needed to use the ownership column, but based on your email to Anita yesterday I'm now leaning more towards **all** of the poles in the shapefile being Windstream owned. Is that true? If so is there an operational difference between the ILEC/CLEC poles where Metronet is concerned? My number is below if you'd like to get together via phone, if not I'm also good with email.

Thanks so much for the data, and for your willingness to help.

Dustin: Robert Lee is the individual that has been providing information to us on Windstream's poles in KY. He indicated that he doesn't mind if you reach out to him directly with your questions. I have copied Robert on this email so you two can arrange a mutually convenient time to get on the phone.

Thanks again, Robert.

Thanks,
Anita

Subject: FW: Windstream KDL Invoice
Importance: High

John:

Were you able to confirm that the attached documentation was the response that you shared with me was going to be coming concerning the colocation space / power dispute between Windstream and nGenX / MetroNet?

Also, has Kevin had any success in getting a call set up with MetroNet, Windstream and Duke?

I have an internal call at 1:30 to talk about these issues, so any update you could provide me before then will be appreciated.

Subject: FW: Windstream KDL Invoice

John:

I just wanted to confirm that this was the response that you shared with me was going to be coming concerning the colocation space / power dispute between Windstream and nGenX / MetroNet. The reason why I am asking is because I expected it to come in the form of a net charge (i.e., Windstream said that MetroNet owed \$X, MetroNet says that Windstream owes \$Y, and when the two are netted out against each other the result is \$Z), instead of just coming

as a straight invoice. However, maybe you did tell me that it was going to be coming as a straight invoice, and I just didn't remember.

FYI. I will be in Little Rock early next week, so I expect to be able to share with you what our plans are for next steps on resolving this issue sometime next week.

Subject: FW: Windstream KDL Invoice
Importance: High

John:

Were you able to confirm that the attached documentation was the response that you shared with me was going to be coming concerning the colocation space / power dispute between Windstream and nGenX / MetroNet?

Also, has Kevin had any success in getting a call set up with MetroNet, Windstream and Duke?

I have an internal call at 1:30 to talk about these issues, so any update you could provide me before then will be appreciated.

Subject: FW: Windstream KDL Invoice

John:

I just wanted to confirm that this was the response that you shared with me was going to be coming concerning the colocation space / power dispute between Windstream and nGenX / MetroNet. The reason why I am asking is because I expected it to come in the form of a net charge (i.e., Windstream said that MetroNet owed \$X, MetroNet says that Windstream owes \$Y, and when the two are netted out against each other the result is \$Z), instead of just coming as a straight invoice. However, maybe you did tell me that it was going to be coming as a straight invoice, and I just didn't remember.

FYI. I will be in Little Rock early next week, so I expect to be able to share with you what our plans are for next steps on resolving this issue sometime next week.

Subject: Re: Windstream KDL Unpaid Make Ready

Dan

I apologize I'm traveling and just picked up your message. I talked to Kevin and he's going to try to get something scheduled soon. Duke has been radio silent recently on other requests to meet.

John and Anita:

I wanted to follow up with the two of you on the outstanding make ready invoice from Duke Energy. As Kevin requested, we asked Duke to reverse the make-ready invoices and bill them directly to MetroNet. Duke refused to do so, and we still have the outstanding balance on our books. Although we have not received any pressure from Duke concerning the outstanding invoice, we are continuing to get internal pressure to get this invoice off of our books.

Kevin agreed that if Duke would not agree to reverse the changes and bill MetroNet directly that the next step was for MetroNet to reach out to Duke to set up a three way call among the parties to discuss the matter. Do you think that is something MetroNet could get set up to take place next week?

James,

Thank you for your response back. Duke Energy will not reverse the invoices to Windstream KDL as per section 9 of the agreement 'KDL shall reimburse the applicable Operating Company for the cost of all such work'. Windstream KDL submitted the routes and is therefore responsible for all make ready and engineering cost associated with the projects. Any invoices to Windstream KDL should be paid upon receipt and not held up due to a side agreement between Windstream KDL and Metronet.

Thank you,
Jeremy

Jeremy,

In regards to your email below, and as we have shared before, we dispute the amounts being billed to us by Duke Energy. Since we are disputing these amounts, and since these invoices are for work that MetroNet will ultimately be responsible for paying, we would like for Duke Energy to consider reversing the invoices to Windstream and billing the amounts directly to MetroNet.

If this is not possible, please let us know as soon as possible.

Sincerely,

Sherry and Joe,

I wanted to follow up with you to see where Windstream KDL was on paying the unpaid make ready true up invoices from the Lafayette and Hanover routes. These invoices are still outstanding at this time. Last communication was back in March and we have not heard anything back in regards to these.

Please let me know when Duke can expect payment on these.

Thank you,

Windstream Communications
 Attn: Poles
 P. O. Box 25410
 Little Rock, AR 72221

Dear Sir or Madame:

Please find enclosed the invoices reflecting the final charges for make ready work for the Lafayette job. The table below lists the name of the projects, the total cost of the job and any payments that were received for the project. Listed are refunds that were subtracted from the invoices. Also listed is a credit for a payment of \$134,738.00 that we received for the Connersville Phase 1 – 5 job that Windstream was invoiced for and the invoice was paid, but the job was cancelled.

PROJECT	TOTAL COST	PAYMENT	NEW INVOICE #	TOTAL DUE
Lafayette Part 3 & 4	\$104,246.63	\$82,870.00	P1160888601	\$21,376.63
Lafayette Phase 10 Part 1 & 2	\$267,771.29	\$253,163.10	P1160901201	\$14,608.19
Lafayette Phase 12	\$46,565.35	\$32,747.00	P1160909801	\$13,818.35

From: King, Daniel
Sent: Thursday, June 01, 2017 10:16 AM
To: Anita Larson <Anita.Larson@metronetinc.com>; Richardson, Michael S <Michael.S.Richardson@windstream.com>
Subject: RE: Duke Invoices
Importance: High

Anita:

I wanted to follow up with you on this one again. We understand and appreciate MetroNet's desire to let sleeping dogs lie with Duke, but that approach causes financial issues for Windstream because we are the entity forced to carry an aging amount in our Accounts Payable and Accounts Receivable. If MetroNet doesn't object, and Duke would be willing to withdraw the Windstream invoice and issue it directly to MetroNet, we wouldn't have a concern with MetroNet's approach. However, I am not sure that Duke is going to be willing to invoice MetroNet directly since their Agreement is with Windstream.

Please let me know at your earliest convenience whether MetroNet is willing to allow Windstream to pursue having Duke withdraw the Windstream invoice and issue it directly to MetroNet.

Subject: RE: Duke Invoices

Anita:

I just wanted to check in with you and see if MetroNet has any follow-up meetings scheduled with Duke? I think that my internal business contacts are getting pressure to get this invoice off of our books.

Subject: Duke Invoices

Dan/Mike: I hope you are staying dry! I love rain, but a little sunshine is sure welcome. I want to let you know that we haven't heard anything from Duke with respect to backup for the invoices you sent over earlier this year. Just want you to know that we haven't forgotten you and will keep you in the loop going forward.

Have a great day!

Thanks,
Anita

Subject: Windstream KDL Unpaid Make Ready

Importance: High

Sherry and Joe,

I wanted to follow up with you to see where Windstream KDL was on paying the unpaid make ready true up invoices from the Lafayette and Hanover routes. These invoices are still outstanding at this time. Last communication was back in March and we have not heard anything back in regards to these.

Please let me know when Duke can expect payment on these.

Thank you,

Jeremy

Windstream Communications
 Attn: Poles
 P. O. Box 25410
 Little Rock, AR 72221

Dear Sir or Madame:

Please find enclosed the invoices reflecting the final charges for make ready work for the Lafayette job. The table below lists the name of the projects, the total cost of the job and any payments that were received for the project. Listed are refunds that were subtracted from the invoices. Also listed is a credit for a payment of \$134,738.00 that we received for the Connersville Phase 1 – 5 job that Windstream was invoiced for and the invoice was paid, but the job was cancelled.

PROJECT	TOTAL COST	PAYMENT	NEW INVOICE #	TOTAL DUE
Lafayette Part 3 & 4	\$104,246.63	\$82,870.00	P1160888601	\$21,376.63
Lafayette Phase 10 Part 1 & 2	\$267,771.29	\$253,163.10	P1160901201	\$14,608.19

From: King, Daniel
Sent: Thursday, June 01, 2017 10:16 AM
To: Anita Larson <Anita.Larson@metronetinc.com>; Richardson, Michael S <Michael.S.Richardson@windstream.com>
Subject: RE: Duke Invoices
Importance: High

Anita:

I wanted to follow up with you on this one again. We understand and appreciate MetroNet's desire to let sleeping dogs lie with Duke, but that approach causes financial issues for Windstream because we are the entity forced to carry an aging amount in our Accounts Payable and Accounts Receivable. If MetroNet doesn't object, and Duke would be willing to withdraw the Windstream invoice and issue it directly to MetroNet, we wouldn't have a concern with MetroNet's approach. However, I am not sure that Duke is going to be willing to invoice MetroNet directly since their Agreement is with Windstream.

Please let me know at your earliest convenience whether MetroNet is willing to allow Windstream to pursue having Duke withdraw the Windstream invoice and issue it directly to MetroNet.

Subject: RE: Duke Invoices

Anita:

I just wanted to check in with you and see if MetroNet has any follow-up meetings scheduled with Duke? I think that my internal business contacts are getting pressure to get this invoice off of our books.

Subject: Duke Invoices

Dan/Mike: I hope you are staying dry! I love rain, but a little sunshine is sure welcome. I want to let you know that we haven't heard anything from Duke with respect to backup for the invoices you sent over earlier this year. Just want you to know that we haven't forgotten you and will keep you in the loop going forward.

Have a great day!

Thanks,
Anita

John and Anita:

I wanted to follow up with the two of you on the outstanding make ready invoice from Duke Energy. As Kevin requested, we asked Duke to reverse the make-ready invoices and bill them directly to MetroNet. Duke refused to do so, and we still have the outstanding balance on our books. Although we have not received any pressure from Duke concerning the outstanding invoice, we are continuing to get internal pressure to get this invoice off of our books.

Kevin agreed that if Duke would not agree to reverse the changes and bill MetroNet directly that the next step was for MetroNet to reach out to Duke to set up a three way call among the parties to discuss the matter. Do you think that is something MetroNet could get set up to take place next week?

James,

Thank you for your response back. Duke Energy will not reverse the invoices to Windstream KDL as per section 9 of the agreement 'KDL shall reimburse the applicable Operating Company for the cost of all such work'. Windstream KDL submitted the routes and is therefore responsible for all make ready and engineering cost associated with the projects. Any invoices to Windstream KDL should be paid upon receipt and not held up due to a side agreement between Windstream KDL and Metronet.

Thank you,
Jeremy

Jeremy,

In regards to your email below, and as we have shared before, we dispute the amounts being billed to us by Duke Energy. Since we are disputing these amounts, and since these invoices are for work that MetroNet will ultimately be responsible for paying, we would like for Duke Energy to consider reversing the invoices to Windstream and billing the amounts directly to MetroNet.

If this is not possible, please let us know as soon as possible.

Sincerely,

James Lloyd

Sherry and Joe,

I wanted to follow up with you to see where Windstream KDL was on paying the unpaid make ready true up invoices from the Lafayette and Hanover routes. These invoices are still outstanding at this time. Last communication was back in March and we have not heard anything back in regards to these.

Please let me know when Duke can expect payment on these.

Thank you,

Jeremy

As Kevin requested, we asked Duke to reverse the make-ready invoices and bill them directly to MetroNet. Duke refused to do so, and we still have the outstanding balance on our books. Although we have not received any pressure from Duke concerning the outstanding invoice, we are continuing to get internal pressure to get this invoice off of our books.

Kevin agreed that if Duke would not agree to reverse the changes and bill MetroNet directly that the next step was for MetroNet to reach out to Duke to set up a three way call among the parties to discuss the matter. Do you think that is something MetroNet could get set up to take place next week?

James,

Thank you for your response back. Duke Energy will not reverse the invoices to Windstream KDL as per section 9 of the agreement 'KDL shall reimburse the applicable Operating Company for the cost of all such work'. Windstream KDL submitted the routes and is therefore responsible for all make ready and engineering cost associated with the projects. Any invoices to Windstream KDL should be paid upon receipt and not held up due to a side agreement between Windstream KDL and Metronet.

Thank you,
Jeremy

Jeremy,

In regards to your email below, and as we have shared before, we dispute the amounts being billed to us by Duke Energy. Since we are disputing these amounts, and since these invoices are for work that MetroNet will ultimately be responsible for paying, we would like for Duke Energy to consider reversing the invoices to Windstream and billing the amounts directly to MetroNet.

If this is not possible, please let us know as soon as possible.

Sincerely,

Sherry and Joe,

I wanted to follow up with you to see where Windstream KDL was on paying the unpaid make ready true up invoices from the Lafayette and Hanover routes. These invoices are still outstanding at this time. Last communication was back in March and we have not heard anything back in regards to these.

Please let me know when Duke can expect payment on these.

Thank you,

John and Anita:

I wanted to follow up with the two of you on the outstanding make ready invoice from Duke Energy. As Kevin requested, we asked Duke to reverse the make-ready invoices and bill them directly to MetroNet. Duke refused to do so, and we still have the outstanding balance on our books. Although we have not received any pressure from Duke concerning the outstanding invoice, we are continuing to get internal pressure to get this invoice off of our books.

Kevin agreed that if Duke would not agree to reverse the changes and bill MetroNet directly that the next step was for MetroNet to reach out to Duke to set up a three way call among the parties to discuss the matter. Do you think that is something MetroNet could get set up to take place next week?

Importance: High

Sherry and Joe,

I wanted to follow up with you to see where Windstream KDL was on paying the unpaid make ready true up invoices from the Lafayette and Hanover routes. These invoices are still outstanding at this time. Last communication was back in March and we have not heard anything back in regards to these.

Please let me know when Duke can expect payment on these.

Thank you,
Jeremy

Subject: Windstream Tariff

Dan: I hope you had a great weekend!

Were you able to catch up with Cesar about the tariff? Needless to say, we provide CATV too. Certainly under the definition of "Cable Television Company or Operator" in the tariff, we would be a company which provides CATV service.

Thanks,
Anita

Anita:

We are ready to speak with MetroNet about either moving forward with a Pole Attachment Agreement or proceeding under the tariff for attaching to poles in Kentucky. If you provide me some times when you and the MetroNet team would be available to talk next week, I will get a meeting set up. Myself, James Lloyd and Michelle McLaughlin will be attending for Windstream.

Anita:

I wanted to follow up with you on this one again. We understand and appreciate MetroNet's desire to let sleeping dogs lie with Duke, but that approach causes financial issues for Windstream because we are the entity forced to carry an aging amount in our Accounts Payable and Accounts Receivable. If MetroNet doesn't object, and Duke would be willing to withdraw the Windstream invoice and issue it directly to MetroNet, we wouldn't have a concern with MetroNet's approach. However, I am not sure that Duke is going to be willing to invoice MetroNet directly since their Agreement is with Windstream.

Please let me know at your earliest convenience whether MetroNet is willing to allow Windstream to pursue having Duke withdraw the Windstream invoice and issue it directly to MetroNet.

Subject: Metronet Update

John:

I spoke with Joyce Latham this morning about this week's call / meeting on Thursday. Joyce said that if we schedule a call / meeting of the decision makers from MetroNet and Windstream for sometime in August, that will give her time to prepare and confirm settlement parameters that she could work within. This will also give us time to determine if there are any other decision makers within Windstream that need to be included in the call / meeting. Joyce would not be available August 8 – 10 or August 21 – 23, but otherwise her August is open.

It is my understanding that even if we don't have the decision makers taking part in Thursday's meeting, we (MetroNet and Windstream) still plan to use the time we have set aside on Thursday morning to work on making whatever additional progress we can in getting the Duke Energy invoice and the nGenX colocation issues worked out. Also, we can still talk through the various MetroNet / Windstream agreements and see if there is anything else the

parties can do to position ourselves to reach final agreement on a go forward plan in August for these agreements. Let me know if your understanding is different.

Thanks.

Subject: RE: Metronet Update

Kevin,

I've seen the email but have not got to get updates as of yet. We cannot commit to a weekly update on this as it pulls the engineers off their jobs to give updates and this take a lot of time to get on a weekly basis. This continues to delay jobs even further. Due to the amount of companies we are dealing with we have stressed this to all of the companies that are asking for updates. Please keep this in mind for future updates. Also with the proposals in question we really need Metronet to be talking to Windstream. I have both companies asking me for updates instead of talking to each other which they are supposed to be doing. Again I'll get these updates, but moving forward Metronet will have to get these from Windstream to alleviate the duplicate work Duke is doing.

If you have any other questions please let me know.

Thank you,
Jeremy

Subject: FW: Metronet Update

Jeremy,
Attached is the latest which is for the most part the same as what I sent to you last week. Can you provide me with the updates that you sent to Windstream? This will allow me to ask them questions on why we have not received them yet.

Below is a snap shot of the data in the spread sheet and the average number of months we are currently at with each. Can you provide a status as to when there will be another contractor in place to help with the back log?

Total Poles Applications	78			
	Quantity	Average Days-Current	Average Months-Current	Notes
Make Ready Complete	10	201.00	6.70	
Waiting on Make Ready	5	220	7.33	
Invoices Paid	4	230	7.67	
Invoice Rec'd	1	269	8.97	
Waiting on Invoice	24	212	7.07	numbe
Make Ready Quote Rec'd	7	177	5.90	
Waiting on Make Ready Estimate	31	174	5.80	Over ha

One last item I think I asked about this a few weeks ago but if we could get the two applications below back as soon as possible this will allow us to turn up several thousand passes.

456	3 - Submitted	GN East Feeder 2	40	113485-2016	1603KDL0039DEI	2/10/2016	4/5/2016	\$3,133.75	9/1/2016	\$
457	3 - Submitted	GN East Feeder 3	37	113492-2016	1604KDL0089DEI	2/10/2016	4/5/2016		6/30/2016	\$21,350

As always Jeremy I appreciate your help.

Kevin,

I talked to the Windstream folks and they said they forwarded on the updates on this already. Do you still need these? Just let me know.

Thank you,
Jeremy

***** Exercise caution. This is an EXTERNAL email. DO NOT open attachments or click links from unknown senders or unexpected email. *****

Jeremy,

Please find attached the current spread sheet for all of our pole applications. I have also provided a summary below which provides the average length of time based on the current state an application is in. A high priority area for me is Greenwood East Feeder 2 and 3. I have a number passes and then customers that can be activated once these are complete. These are 2 of the 24 that we are waiting on an invoice.

When we met a few weeks back in Cincinnati it sounded like you guys were looking to add another contractor to help with all of the back log. Is that still moving forward? I appreciate your help with these Jeremy and would be happy to jump on a call to talk through any of these.

Thanks

Sam,

I have attached the files that were previously attached on this email chain. The customer statement shows outstanding invoices as of 1/31/2017. There was also a true-up invoice sent on 3/14/2017 (email attached).

Thanks,

Joe

Hi Sandy,

I pushed back to Duke asking for itemized costs and/or some sort of explanation of what appears to be costs exceeding the proposal amounts (after I was told by Duke that they do not provide itemized costs for any customer). I highlighted the age of the incurred expenses, the total amount of the incurred expenses, and what appears to be significant cost overruns (if the initial invoice paid was the proposal amount, again, the age of the expenses puts these pre-spans).

I will let you know their response.

Thanks,

Joe

Hey Joe!

Have you had a chance to look at this and get me any additional details? I know we are on a time crunch on getting this resolved.

Please get me something as soon as you can.

Thanks!

Sandy Gill

Joe,

I have been looking through these invoices and have gone back through the old invoices. It appears that the amount we paid is the amount we agreed to. I need you or Duke to provide me with a detailed list of what the difference is in the invoices, please.

Thank you!

Sandy Gill

To: Sandra Gill <Sandra.Gill@metronetinc.com>
Subject: RE: WIN – Cinergy Metronet (Duke Passthrough) - Invoice(s)

Sandra,

I sent what I received from Duke. Attached is the customer statement for Metronet for these types of invoices. The process seemed to change over time, but I see a lot of Duke PO#'s listed. The number next to the payment should be a check number or some kind of identifier that you may be able to track on your side. The PO#'s could be matched against the list of PO's that Duke provided.

Unfortunately, these charges for proposals were pre-SPANS. There is no effective way to search for the communications for the relevant proposals without some unique identifier attached to each invoice. Though, I believe the point of the Duke invoices is to pass along the charges that were in excess of the estimate on the proposal.

Let me know what concerns you have and if I could provide anything else.

Thanks,

Joe

Subject: WIN – Cinergy Metronet (Duke Passthrough) - Invoice(s)

Good morning,

Please see the attached invoices. I have also attached a spreadsheet with a list of “new” and “old” Duke invoices that the Windstream invoices are based. Please note, the credit detailed on the cover sheet on the Lafayette jobs were applied to Windstream invoice # 6046647.

I asked Duke to itemize the costs of these make-ready invoices; however, I was told that they do not provide that information. Please let me know if there is anything you would like me to provide.

Thanks,

Joe McClure

Attachments: True-up_to_MARS_Inv_6046647.xlsx; 6047094.pdf; 6023923_Paid_Already.pdf

Good morning,

Attached is a true-up invoice (invoice # 6047094) related to the invoices initially sent in this email thread. The reason for the need of a credit was that the initial Duke Energy invoice amount was assumed to have been given a 15% markup. Our research indicated that this was not the case. The attached spreadsheet shows how the true-up was calculated.

Let me know if you have any questions.

Thanks,

Joe

Subject: RE: WIN – Cinergy Metronet (Duke Passthrough) - Invoice(s)

Hi Sandy,

I pushed back to Duke asking for itemized costs and/or some sort of explanation of what appears to be costs exceeding the proposal amounts (after I was told by Duke that they do not provide itemized costs for any customer). I highlighted the age of the incurred expenses, the total amount of the incurred expenses, and what appears to be significant cost overruns (if the initial invoice paid was the proposal amount, again, the age of the expenses puts these pre-spans).

I will let you know their response.

Thanks,

Joe

Hey Joe!

Have you had a chance to look at this and get me any additional details? I know we are on a time crunch on getting this resolved.

Please get me something as soon as you can.

Thanks!

Sandy Gill

Joe,

I have been looking through these invoices and have gone back through the old invoices. It appears that the amount we paid is the amount we agreed to. I need you or Duke to provide me with a detailed list of what the difference is in the invoices, please.

Thank you!

Sandy Gill

Subject: RE: WIN – Cinergy Metronet (Duke Passthrough) - Invoice(s)

Sandra,

I sent what I received from Duke. Attached is the customer statement for Metronet for these types of invoices. The process seemed to change over time, but I see a lot of Duke PO#'s listed. The number next to the payment should be a check number or some kind of identifier that you may be able to track on your side. The PO#'s could be matched against the list of PO's that Duke provided.

Unfortunately, these charges for proposals were pre-SPANS. There is no effective way to search for the communications for the relevant proposals without some unique identifier attached to each invoice. Though, I believe the point of the Duke invoices is to pass along the charges that were in excess of the estimate on the proposal.

Let me know what concerns you have and if I could provide anything else.

Thanks,

Joe

Joe,

I am really struggling with the Lafayette and Hanover. Do you happen to know who would have sent you the invoices for approval to pay what has already been paid?

Thanks!

Sandy Gill

Sandra,

Sorry about that. I sent you the template I use for invoice generation. Attached is the list that was compiled of the old/new Duke invoices. It contains no new info, but it may help you in your analysis.

Thanks,

Joe

Subject: WIN – Cinergy Metronet (Duke Passthrough) - Invoice(s)

Good morning,

Please see the attached invoices. I have also attached a spreadsheet with a list of “new” and “old” Duke invoices that the Windstream invoices are based. Please note, the credit detailed on the cover sheet on the Lafayette jobs were applied to Windstream invoice # 6046647.

I asked Duke to itemize the costs of these make-ready invoices; however, I was told that they do not provide that information. Please let me know if there is anything you would like me to provide.

Thanks,

Joe McClure

 Little Rock, AR 72221

DEC 06 2016

Dear Sir or Madame:

Please find enclosed the invoices reflecting the final charges for make ready work for the Lafayette job. The table below lists the name of the projects, the total cost of the job and any payments that were received for the project. Listed are refunds that were subtracted from the invoices. Also listed is a credit for a payment of \$134,738.00 that we received for the Connersville Phase 1 – 5 job that Windstream was invoiced for and the invoice was paid, but the job was cancelled.

PROJECT	TOTAL COST	PAYMENT	NEW INVOICE #	TOTAL DUE
Lafayette Part 3 & 4	\$104,246.63	\$82,870.00	P1160888601	\$21,376.63
Lafayette Phase 10 Part 1 & 2	\$267,771.29	\$253,163.10	P1160901201	\$14,608.19
Lafayette Phase 12	\$46,565.35	\$32,747.00	P1160909801	\$13,818.35

Subject: FW: Tagging Strand

Nicole,

Good morning. Hope you had a great holiday and New Year's!

We are currently looking into this tagging complaint. Is there any correspondence you have where you were told by Windstream not to tag as MetroNet? Do you remember who from Windstream originally told you this?

Thanks for your help,

Sarah Hays

Subject: Tagging Strand

Hey there Brandie and Kim!

We have seen a complaint from Duke regarding us not tagging our strand. We were told originally by Windstream to not tag our stuff. Can you guys look into this and advise?

Thank you,

Nicole Sugg

Subject: RE: Windstream Make Ready

Nicole,

Windstream respectfully declines the offer from MetroNet to take care of the make ready work required on Windstream owned poles. We will continue to work with our contractors to complete the make ready required for approved MetroNet pole attachment applications.

Please let me know of any other questions or concerns.

Thank you,

Kim

Thank you Kim!

Who would I need to contact if I want to discuss taking the burden of dealing with the electrical make ready off of Windstream's plate? With KU, once they approve our applications, we are responsible for hiring an approved contractor chosen by them and completing the necessary work.

I am interested in discussing with the appropriate party the opportunity for us to take care of the make ready work for our applications we put in to you also.

Subject: RE: Windstream Make Ready

Kim,

Thank you so much for the below. I think this is going to help us immensely moving forward.

Only question I have is in regards to the Make Ready Recommendations. We received invoices but with no attachments itemizing what moves we would be paying for. Can you help me out with understanding that portion of the process?

I can't let my people approve an invoice if we don't know exactly what make ready needs to happen in Windstream's opinion. What would maybe help if you can't give us the breakdown for the invoice is if you can supply my Make Ready Engineer with a list of average costs per move etc. Is that a possibility?

Thanks again,

Nicole Sugg

Subject: FW: Windstream Make Ready

Good afternoon Nicole,

We met with the OSP Manager for Lexington, KY regarding the status of the initial applications received from MetroNet as well as to review the process in the field for processing the applications.

We have three packets (total of 75 poles) in which we are currently preparing the make ready invoices. These should be sent to MetroNet either late this afternoon or early morning tomorrow. We are also expecting the make ready estimates on 4 more packets for an additional 100 poles by the end of this week. The progress on the initial applications has been delayed slightly due to another large pole attachment project in the Lexington, KY area, however resources have been reallocated to mitigate additional delays.

The process in the field for the MetroNet applications is as follows:

- OSP receives the accepted pole attachment application packets from the Windstream Permitting Team
- OSP reviews each of the packets to determine what Windstream exchanges are impacted and to how many poles are impacted per exchange, they review the
- OSP send the application, print, exchange information to the engineering contractor
- The engineering contractor completes the field survey work for each application and create an OSP job for any applicable make ready work required
- The OSP Manager reviews the job and provides approval
- Once the job is fully approved the estimated make ready costs are sent to the Windstream Poles Team
- The Poles Team prepares a make ready invoice and sends to MetroNet
- Once confirmation of payment is received from the Windstream Poles Team – the field distributes the job and the make ready work is scheduled with the contractor.

We have asked the OSP Manager to join the bi-weekly MetroNet KY calls going forward to assist with any questions you may have for OSP Engineering regarding current status.

Please let me know of any questions or concerns.

Thank you,

Kim

Subject: RE: Windstream Make Ready

Nicole,

The Windstream make ready estimate provides the total costs associated with each package including labor, materials, engineering, etc. This is the same level of detail Windstream provides others attaching submitting pole attachment applications. The costs will vary for every package as they each have different work associated with Windstream lowering facilities as MetroNet has requested.

Please let me know of any further questions or concerns.

Thank you,

Kim

Good evening Mr. Mateyoke,

Please call me George. Yes, I will be there. Is there a time on Tuesday that works better for you?

I look forward to our meeting.

George Kemp, Ph.D.
Director, Safety & Quality Assurance
MetroNet, Inc

Good morning,

The information you are sharing with us is very concerning to us as well. As MetroNet's Director, Safety & Quality Assurance one of my goals is to help ensure we are doing everything we can to protect the facilities of other utilities.

I will be in Lexington next Monday and Tuesday. Who can I meet with to review these concerns? Do you have a field operations manager and a damage prevention manager or are there other people that would be better to meet with? Protecting your facilities is important to us!

Please let me know who, when and where and I will be there. This is important to me.

Best regards,
George

Tom/George/John, See below and please apply to all to address these concerns.

Kim,

We are adding our underground team to this email. We most definitely contact 811 and take every precaution to avoid any disturbances. I am unaware of the recent incident you describe. I am on the aerial permitting team, but can assure you the gentleman mentioned above will get back to you as soon as possible.

Thank you,

Lauren Sandefur

Lauren/Nicole,

Please see the email string below regarding Windstream cut cables – at 248 Catera Trace and another on Darlington Circle. Is the MetroNet contractor contacting 811 or taking normal precautions before digging? This is impacting

Windstream customers in the area and this is completely unacceptable. Windstream has escalating concerns on how many Windstream cables are being cut. What are the next steps to getting these issues addressed and to have the cuts Windstream has identified properly fixed? Will MetroNet please send notification of all cuts to Windstream for inspection and to properly resolve? We would like to have a meeting as soon as possible to discuss this in detail.

Please advise ASAP.

Thank you,

Kimberly Edwards

Subject: METRONET CONSTRUCTION

Just to update everyone Metro net has cut two more cables today. One at 248 Catera Trace a 200 pair cable in the East and one on Darlington Circle in the Lakeside was a 400 pair, possible dead cable though. The other thing that has come up is there are numerous buried drops that have been cut during this process as well. Metronet contractor is putting wire nuts on the pairs and then taping it up with electrical tape and then putting back in the ground and covering it up. We know of 4 – 5 drops, but do not know how many they have done that we do not know about. Without having the Ranger-seal closure on the splice, it will sooner or later go bad and will need replaced. I am not quite sure what steps should be taken either by Metronet to let us know a drop has been cut or to prevent them from splicing them together the way they are.

Subject: RE: Windstream KDL Unpaid Make Ready

James,

Thank you for your response back. Duke Energy will not reverse the invoices to Windstream KDL as per section 9 of the agreement 'KDL shall reimburse the applicable Operating Company for the cost of all such work'. Windstream KDL submitted the routes and is therefore responsible for all make ready and engineering cost associated with the projects. Any invoices to Windstream KDL should be paid upon receipt and not held up due to a side agreement between Windstream KDL and Metronet.

Thank you,
Jeremy

***** Exercise caution. This is an EXTERNAL email. DO NOT open attachments or click links from unknown senders or unexpected email. *****

Jeremy,

In regards to your email below, and as we have shared before, we dispute the amounts being billed to us by Duke Energy. Since we are disputing these amounts, and since these invoices are for work that MetroNet will ultimately be responsible for paying, we would like for Duke Energy to consider reversing the invoices to Windstream and billing the amounts directly to MetroNet.

If this is not possible, please let us know as soon as possible.

Sincerely,

James Lloyd

Sherry and Joe,

I wanted to follow up with you to see where Windstream KDL was on paying the unpaid make ready true up invoices from the Lafayette and Hanover routes. These invoices are still outstanding at this time. Last communication was back in March and we have not heard anything back in regards to these.

Please let me know when Duke can expect payment on these.

Thank you,

Jeremy

Good Afternoon Sarah,
Sorry to bug you, I know you were out of town last week and I'm sure you're catching up on everything. These two applications are needed to be submitted by the end of the week and I will be out of town tomorrow and Wednesday.
I was hoping you had some information on this process?
Thank you,

Lauren Sandefur

Good Morning Sarah,
I noticed that we are to fill out a Windstream Pole Attachment Data Sheet. We do provide OCALC's with our application, do we still need to fill out this form?
I can send you an example of our application package if you would like to tell me what all you need from it.
Thanks!

Good morning Lauren,

Windstream OSP has reviewed the information you provided and they will accept the Pole Inventory Report in replacement of the Pole Attachment Data Sheets, however they will require a signed standard Windstream Pole Attachment Application form – see attached.

There is a \$75.00 application processing fee – with a maximum of 25 poles/application and a \$50.00 post inspection fee/pole.

Please note: Windstream will accept up to 300/poles per 30 rolling calendar days.

Please let me know of any other questions or concerns.

Thank you,

Kim

Good morning Lauren,

The Windstream OSP Managers/Supervisors in the field are currently reviewing the application/inventory report you provided to determine if this is acceptable. Since these are not the Windstream standard forms for pole attachments, I will need their approval to accept.

As soon as they have reviewed and provide their feedback, I will let you know.

Thank you,

Kim

Subject: Re: FW: Pole Attachment Ex.

Hi Lauren,

This helps a little but I still have several questions. I noticed the proposed strand height on her example is only 37" from power and the antenna is higher than the tip of the proposed pole they will be placing.

Column 4: Should we use "WXM" to signify Windstream pole ownership. It would appear so based on her example.
Column 5: Is this actually the highest Telephone cable or highest comm attachment on the pole?
Column 10: Does Icon propose attachment height or Windstream?

Column 11: Does Icon propose MRE or Windstream?

For PLA do we model the pole as it is today (Existing) or with make ready and proposed Metronet plant installed?

Attachments: Example Standard Exhibit B.XLS; Pole Attachment Data Sheet.xlsx; Example of Windstream Proposal Form.xls

Good afternoon Lauren,

Attached is the Windstream Pole Attachment Application (Standard Exhibit B) and Pole Attachment Data Sheet. The Windstream Pole Attachment Application allows for 25 poles/application. A completed Pole Attachment Data Sheet is required for each pole listed on the application. Applications and pole data sheet can be submitted to windstream.jointuse@windstream.com for processing.

A Windstream Proposal Form should be submitted for any modification to an existing attachment only.

The Windstream Analyst II assigned to the Lexington, KY area for joint use permitting is Sarah Hays. Sarah's contact information is below and she should be your first point of contact for questions or concerns.

Sarah Hays
Office – 501-748-5864

Subject: Windstream Pole Application Lexington Market

Good Afternoon Kim,

I am needing to apply to poles for Windstream in our Lexington market. We have the form that we are supposed to use for our Indy Wreath, I wanted to make sure that this was the same one that we use for Lexington as well.

We do have an engineering company that is putting together a pole loading and engineering analysis sheet, we were unsure if we could use that. Also do we submit these applications to Windstream.jointuse@windstream.com?

Thank you,

Lauren Sandefur

Thank you Kim!

Who would I need to contact if I want to discuss taking the burden of dealing with the electrical make ready off of Windstream's plate? With KU, once they approve our applications, we are responsible for hiring an approved contractor chosen by them and completing the necessary work.

I am interested in discussing with the appropriate party the opportunity for us to take care of the make ready work for our applications we put in to you also.

Subject: RE: Windstream Make Ready

Kim,

Thank you so much for the below. I think this is going to help us immensely moving forward.

Only question I have is in regards to the Make Ready Recommendations. We received invoices but with no attachments itemizing what moves we would be paying for. Can you help me out with understanding that portion of the process?

I can't let my people approve an invoice if we don't know exactly what make ready needs to happen in Windstream's opinion. What would maybe help if you can't give us the breakdown for the invoice is if you can supply my Make Ready Engineer with a list of average costs per move etc. Is that a possibility?

Thanks again,

Nicole Sugg

Subject: FW: Windstream Make Ready

Good afternoon Nicole,

We met with the OSP Manager for Lexington, KY regarding the status of the initial applications received from MetroNet as well as to review the process in the field for processing the applications.

We have three packets (total of 75 poles) in which we are currently preparing the make ready invoices. These should be sent to MetroNet either late this afternoon or early morning tomorrow. We are also expecting the make ready estimates on 4 more packets for an additional 100 poles by the end of this week. The progress on the initial applications has been delayed slightly due to another large pole attachment project in the Lexington, KY area, however resources have been reallocated to mitigate additional delays.

The process in the field for the MetroNet applications is as follows:

- OSP receives the accepted pole attachment application packets from the Windstream Permitting Team
- OSP reviews each of the packets to determine what Windstream exchanges are impacted and to how many poles are impacted per exchange, they review the
- OSP send the application, print, exchange information to the engineering contractor
- The engineering contractor completes the field survey work for each application and create an OSP job for any applicable make ready work required
- The OSP Manager reviews the job and provides approval

- Once the job is fully approved the estimated make ready costs are sent to the Windstream Poles Team
- The Poles Team prepares a make ready invoice and sends to MetroNet
- Once confirmation of payment is received from the Windstream Poles Team – the field distributes the job and the make ready work is scheduled with the contractor.

We have asked the OSP Manager to join the bi-weekly MetroNet KY calls going forward to assist with any questions you may have for OSP Engineering regarding current status.

Please let me know of any questions or concerns.

Thank you,

Kim

Good morning Nicole,

We have an internal meeting scheduled for Monday - 06/04/2018 to discuss the MetroNet KY applications received and the current status.

I will provide you an update, after this internal meeting, including additional information on the process the field is utilizing for working the applications to complete the make ready estimates and point of contact information for Windstream OSP personnel.

Please let me know of any questions or concerns.

Thank you,

Kim

Hello Nicole,

I will get with the Poles Team and the field regarding the make ready invoice breakdown or list of average costs per move. More to come on this.

Thank you,

Kim

Kim,

Thank you so much for the below. I think this is going to help us immensely moving forward.

Only question I have is in regards to the Make Ready Recommendations. We received invoices but with no attachments itemizing what moves we would be paying for. Can you help me out with understanding that portion of the process?

I can't let my people approve an invoice if we don't know exactly what make ready needs to happen in Windstream's opinion. What would maybe help if you can't give us the breakdown for the invoice is if you can supply my Make Ready Engineer with a list of average costs per move etc. Is that a possibility?

Thanks again,

Nicole Sugg

Subject: FW: Windstream Make Ready

Good afternoon Nicole,

We met with the OSP Manager for Lexington, KY regarding the status of the initial applications received from MetroNet as well as to review the process in the field for processing the applications.

We have three packets (total of 75 poles) in which we are currently preparing the make ready invoices. These should be sent to MetroNet either late this afternoon or early morning tomorrow. We are also expecting the make ready estimates on 4 more packets for an additional 100 poles by the end of this week. The progress on the initial applications has been delayed slightly due to another large pole attachment project in the Lexington, KY area, however resources have been reallocated to mitigate additional delays.

The process in the field for the MetroNet applications is as follows:

- OSP receives the accepted pole attachment application packets from the Windstream Permitting Team
- OSP reviews each of the packets to determine what Windstream exchanges are impacted and to how many poles are impacted per exchange, they review the
- OSP send the application, print, exchange information to the engineering contractor
- The engineering contractor completes the field survey work for each application and create an OSP job for any applicable make ready work required
- The OSP Manager reviews the job and provides approval
- Once the job is fully approved the estimated make ready costs are sent to the Windstream Poles Team
- The Poles Team prepares a make ready invoice and sends to MetroNet
- Once confirmation of payment is received from the Windstream Poles Team – the field distributes the job and the make ready work is scheduled with the contractor.

We have asked the OSP Manager to join the bi-weekly MetroNet KY calls going forward to assist with any questions you may have for OSP Engineering regarding current status.

Please let me know of any questions or concerns.

Thank you,

Kim

NOTE TO ALL FIRMS: IF YOU CHOOSE NOT TO PROCEED WITH THE APPLICATION - YOU WILL BE BILLED FOR WINDSTREAM'S ENGINEERING TIME. THERE ARE NO EXCEPTIONS TO THIS POLICY!!!!

**EXHIBIT B
Windstream CORPORATION
APPLICATION FOR POLE LICENSE**

PROPOSAL #: LX132-01W

Submit in Duplicate

Name of Firm Applying: CMN, RUS, Inc Contact Name, Phone #: Lauren Sandefur 812.212.1328
 EMAIL ADDRESS: lauren.sandefur@metronetinc.com

Street Address, City, ST, ZIP of Firm Applying: 3701 Communications Way, Evansville, IN 47715 Authorized Signature & Date:

Lauren Sandefur

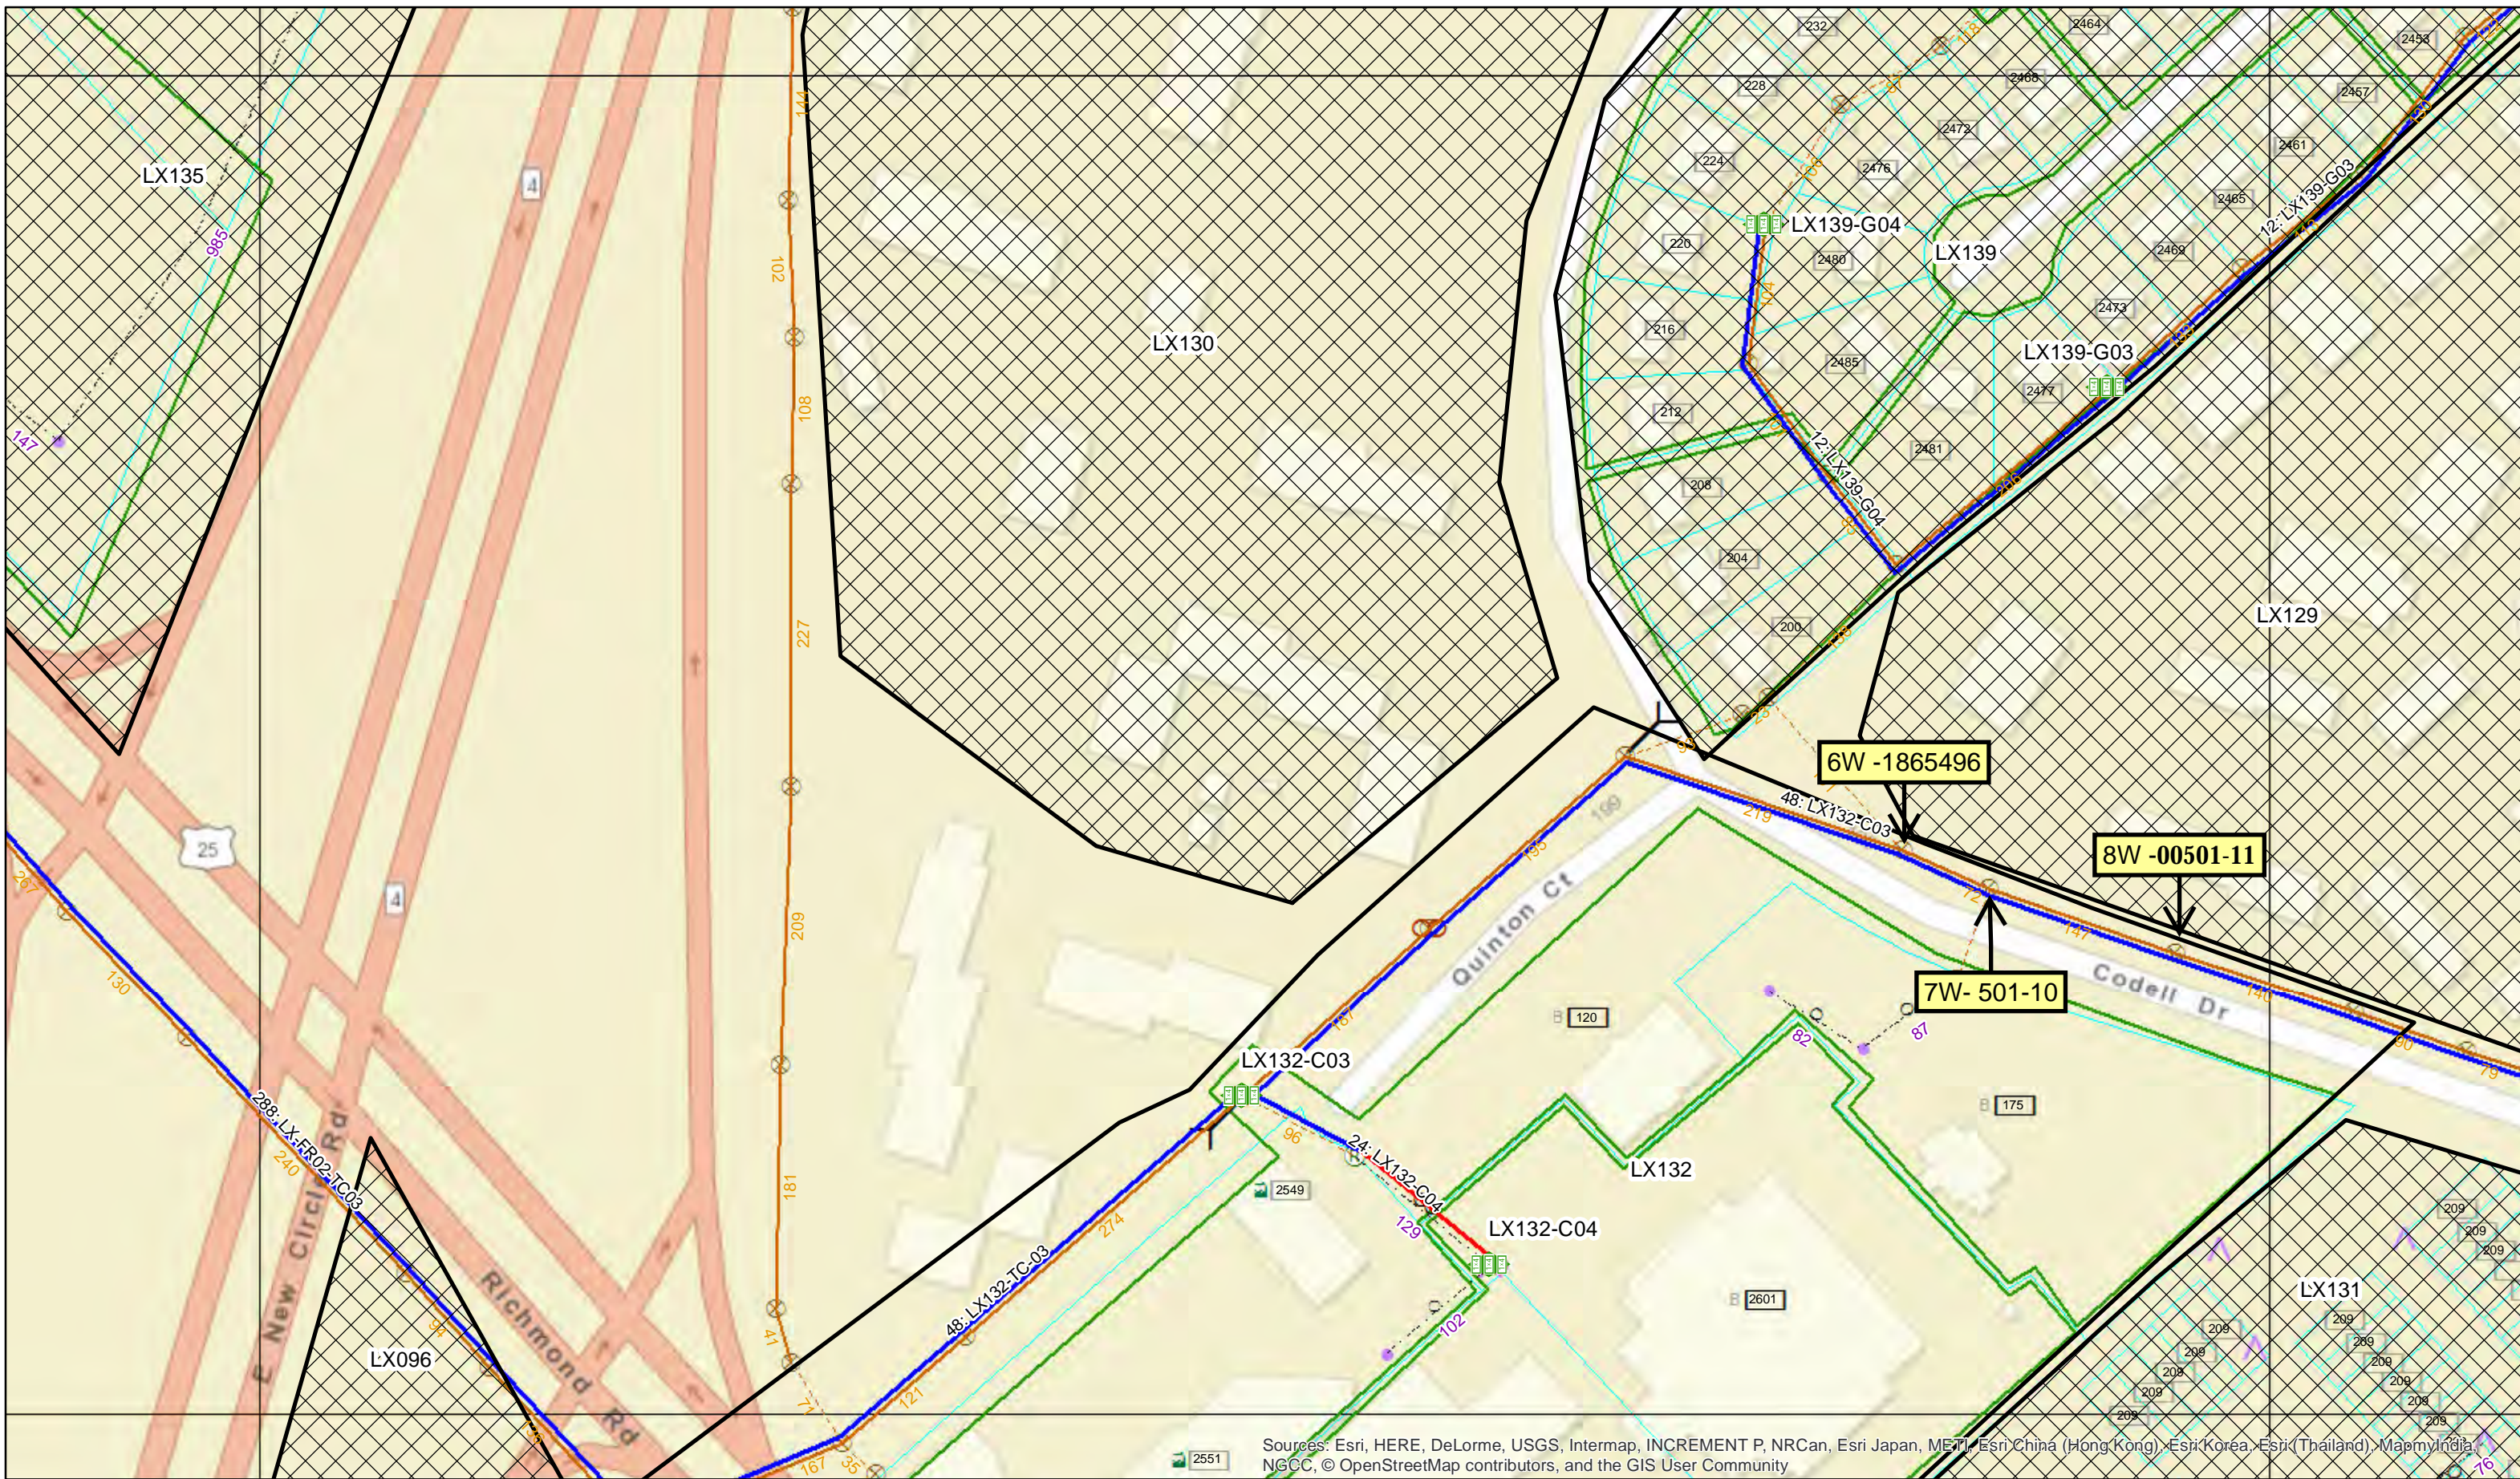

By this application & signature, my firm is agreeing to pay all engineering fees associated with this application if my firm chooses NOT to proceed with the project.
 If we choose to proceed all ESTIMATED fees, including engineering & makeready MUST BE PAID IN FULL UP FRONT.
NON PAYMENT OF FEES WILL RESULT IN ALL FUTURE APPLICATIONS BEING PLACED ON HOLD
NOTE: Final costs will be determined by actual time & material required to do the make-ready work. Any difference in charges will be billed accordingly.

METRONET

3701 Communications Way
Evansville, In 47715

1. ALL UNDERGROUND WILL BE STANDARD (2) 1-1/4" I.D. SDR-13.5 ROLLED DUCT UNLESS OTHERWISE SPECIFIED WITHIN DESIGN DRAWINGS OR APPROVED BY METRONET (MNT) CONSTRUCTION MANAGER. IF THERE IS NO DUCT / CONDUIT SYMBOL ALONG TRENCH LINE IN DESIGN, THE TRENCH FOOTAGE IS ONLY FOR REFERENCE FOR FUTURE GROWTH AND SHOULD NOT BE BUILT UNTIL A REVISION IS RELEASED.
2. ALL AERIAL STRAND WILL BE SHOWN IN DESIGN AS IN THE LEGEND (SOLID LINE WITH FOOTAGE). NON STRAND, OR BETWEEN DROP POLES WILL BE SHOWN IN DESIGN AS A SOLID LINE ONLY, WITHOUT FOOTAGE, AND SHALL NOT BE STRANDED UNLESS NOTED ON DRAWING FOR ANCHOR PLACEMENT.
3. THE CONTRACTOR SHALL BE RESPONSIBLE FOR LOCATING ALL UTILITIES 72-HOURS PRIOR TO CONSTRUCTION. IN CASES OF WILLFUL OR CARELESS DESTRUCTION, THE CONTRACTOR SHALL BE RESPONSIBLE FOR RESTORATION WITH FINAL APPROVAL FROM METRONET CONSTRUCTION MANAGER.
4. THE CONTRACTOR SHALL BE RESPONSIBLE FOR LOCATING ALL RAILROAD COMMUNICATION AND SIGNAL CABLES A MINIMUM OF 48-HOURS PRIOR TO CONSTRUCTION.
5. ALL HANDHOLES SHALL BE BURIED WITH THE COVER FLUSH TO THE GROUND ELEVATION.
6. SHORING MAY BE REQUIRED AND SHALL COMPLY WITH O.S.H.A. STANDARDS.
7. THE CONTRACTOR SHALL IMMEDIATELY NOTIFY THE METRONET CONSTRUCTION MANAGER OF ANY ACCIDENTS. THE CONTRACTOR SHALL BE SOLELY RESPONSIBLE FOR COMPLYING WITH ALL FEDERAL, STATE AND LOCAL SAFETY REQUIREMENTS INCLUDING THE OCCUPATIONAL SAFETY AND HEALTH ACT OF 1970. THE CONTRACTOR SHALL ALWAYS EXERCISE CAUTION FOR THE PROTECTION OF PERSONS (INCLUDING EMPLOYEES) AND PROPERTY. IT SHALL BE THE SOLE RESPONSIBILITY OF THE CONTRACTOR TO INITIATE, MAINTAIN AND SUPERVISE ALL SAFETY REQUIREMENTS, PRECAUTIONS AND PROGRAMS IN CONNECTION WITH THE WORK, INCLUDING THE REQUIREMENTS FOR CONFINED SPACES.
8. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ALL PROPERTY DAMAGE OR DISTURBED AREAS, BOTH RESIDENTIAL AND/OR COMMERCIAL DURING CONSTRUCTION. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ALL RESTORATIONS TO EQUAL OR BETTER CONDITION THAN EXISTED BEFORE CONSTRUCTION. ADDITIONALLY, NON-RUBBER TIERED VEHICLES SHALL NOT BE MOVED ON OR ACROSS PUBLIC STREETS OR HIGHWAYS WITHOUT WRITTEN PERMISSION OF METRONET.
9. THE CONTRACTOR WILL BE RESPONSIBLE FOR DAILY WORK SITE CLEANUP. TRACKING OR SPILLING MUD, DIRT OR DEBRIS UPON STREETS, RESIDENTIAL OR COMMERCIAL DRIVES, SIDEWALKS OR BIKE PATHS IS PROHIBITED. ANY SUCH OCCURRENCE SHALL BE CLEANED UP IMMEDIATELY BY THE CONTRACTOR AT NO COST TO METRONET. IF THE CONTRACTOR FAILS TO REMOVE SUCH MUD, DIRT, DEBRIS, OR SPILLAGE, METRONET RESERVES THE RIGHT TO REMOVE THESE MATERIALS AND CLEAN AFFECTED AREAS, THE COST OF WHICH SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR.
10. CONTRACTOR SHALL FOLLOW ALL D.O.T. SAFETY REQUIREMENTS. IN ADDITION, THE FOLLOWING SUPPLEMENTAL REFERENCED SPECIFICATIONS SHALL BE OBSERVED:
 - 10.1 Occupational Safety and Health Code (OSHA) - (latest edition).
 - 10.2 Applicable power and telephone pole attachment agreements.
 - 10.3 Applicable city, county and state ordinances.
 - 10.4 National Electric Safety Code (latest edition).
 - 10.5 National Electric Code (latest edition).
 - 10.6 Applicable government agencies for safety and health for the work force.
 - 10.7 Manufacturers specifications.
11. THE CONTRACTOR SHALL TRIM ONLY THE LIMBS THAT INHIBIT FIBER OPTIC CABLE PLACEMENT AND IN ACCORDANCE WITH LOCAL GOVERNING AGENCY. ALL SIGNS, LANDSCAPING, STRUCTURES OR OTHER APPURTENANCES WITHIN THE RIGHT-OF-WAY WHICH IS DISTURBED OR DAMAGED DURING CONSTRUCTION SHALL BE REPLACED OR REPAIRED TO THE SATISFACTION OF METRONET. THE COST OF THIS WORK SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR.
12. THE CONTRACTOR SHALL PLACE BARRICADES AROUND OPEN TRENCHES AND EQUIPMENT.
13. NO ADDITIONAL CABLE CUTS WILL BE ADDED WITHOUT PRIOR APPROVAL OF THE METRONET CONSTRUCTION MANAGER. SHOULD THE FIBER WORK NEED TO BE CONTINUED TO THE NEXT DAY AND THE FIBER LEFT OVERNIGHT, THE SECURITY OF THE FIBER SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR.
14. ALL WORK TO BE PERFORMED IN STRICT ACCORDANCE WITH ALL REQUIREMENTS OF ANY REGULATING GOVERNMENT AGENCY OR THE RIGHT OF WAY GRANTOR. MUNICIPAL, COUNTY, STATE OR FEDERAL REGULATIONS MAY ALTER CONSTRUCTION SPECIFICATIONS IN SOME AREAS. IF CONSTRUCTION SPECIFICATIONS ARE ALTERED FROM THESE STANDARDS, CONTRACTOR MUST REQUEST IN WRITING AND ALTERATIONS SHALL BE APPROVED BY METRONET IN ADVANCE.
15. THE OWNER RESERVES THE RIGHT TO CHANGE OR REVISE THE CONSTRUCTION SPECIFICATIONS TO ADAPT TO LOCAL CONDITIONS OR DATA NECESSARY TO SECURE COMPLETION OF THE WORK. IN SUCH CASE, THE CONTRACTOR SHALL BE NOTIFIED IN WRITING.
16. IN CASE OF DISCREPANCY OR OMISSIONS, METRONET SHALL BE CONSULTED FOR ADJUSTMENTS OF ANY COMPLICATIONS RESULTING FROM THE DISCREPANCY OR OMISSION.
17. THE CONTRACTOR'S WORK SHALL INCLUDE BUT IS NOT LIMITED TO, UNLOADING, HAULING, STORING, AND PROTECTING ALL METRONET FURNISHED MATERIAL FROM THE DELIVERY POINT THROUGH FINAL ACCEPTANCE OF THE WORK.
18. THE CONTRACTOR SHALL PROVIDE, CONSTRUCT AND MAINTAIN ALL ACCESS ROADS, ACCESS ROAD IMPROVEMENTS, FENCES AND GATES REQUIRED BY THE CONTRACTOR IN THE EXECUTION OF THE WORK.
19. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ALL LOADING AND UNLOADING REQUIRED TO RETURN ANY MATERIALS TO METRONET. METRONET SHALL ISSUE SPECIFIC INSTRUCTIONS FOR THE RETURN OF THE MATERIAL BY THE CONTRACTOR.
20. THE CONTRACTOR SHALL BE RESPONSIBLE FOR HAVING A SUPERVISOR ON-SITE AT ALL TIMES. METRONET RESERVES THE RIGHT TO INSPECT THE WORK FOR COMPLIANCE AND DEFECTS.

Lauren,

Here is the paraphrased answer from our engineer for the area.

"I'd be fine with the pole inventory report if it were filled out. However, if you open this one, column H for "Make Ready 1 = non, 2 = comms, 3 = elec, etc..." isn't populated and only some of the poles have column I populated for "Make Ready Remedies". (see snip below where I captured info on 2 of the poles). I'm fine with "attach to new pole" in column I on the 2nd pole on this example, but "unk" for make ready on both of them doesn't tell me what I need to know."

Let me know if this makes sense to you all.
