RE: Jetta Operating Appalachia, LLC  
Response to Commission Staff's First Request for Information

Dear Ms. Pinson:

Please find enclosed one original and seven copies of Jetta Operating Appalachia, LLC's Response to Commission Staff's First Request for Information plus one additional copy that we would request be returned to our office in the enclosed self-addressed stamped envelope.

Should there be any questions or additional information needed, please do not hesitate to contact me.

Very truly yours,

Karen Greenwell

RECEIVED

COMMONWEALTH OF KENTUCKY  
BEFORE THE PUBLIC SERVICE COMMISSION

AUG 14 2018

PUBLIC SERVICE  
COMMISSION

In the Matter of:

Case No. 2018-00212

APPLICATION OF JETTA OPERATING  
APPALACHIA, LLC FOR INITIAL RULES,  
REGULATIONS, AND RATES FOR  
FURNISHING GAS SERVICE PURSUANT  
TO KRS 278.485

**JETTA'S RESPONSE TO COMMISSION  
STAFF'S FIRST REQUEST FOR INFORMATION**

Jetta Operating Appalachia, LLC ("Jetta") responds as follows to the Commission

Staff's First Request for Information:

1. Provide the number of farm tap customers to which Jetta currently serves natural gas pursuant to KRS 278.485.

Answer: Jetta currently provides 12 applicants access to natural gas from wells or gathering lines pursuant to KRS 278.480 ("Tariff Farm Taps").

2. Confirm that no customers are being provided with free natural gas.

Answer: Jetta does not provide any free gas pursuant to a Tariff Farm Tap.

3. Provide a list with the name and address of each farm tap customer.

Answer: The requested information is contained in the spreadsheet attached at Tab 1.

4. Provide how many farm tap customers Jetta anticipates to serve with natural gas.

Answer: Jetta's wells and pipelines are largely in remote areas with little existing population. Usually the areas where Jetta's wells and pipelines intersect significant populations are provided gas service by utilities. Consequently, Jetta does not anticipate receiving a significant number of additional applications for access to natural gas pursuant to KRS 278.480.

5. Provide a current map showing all producing natural gas wells and natural gas pipelines owned or leased by Jetta that will furnish gas to the farm tap customers. Include the system name, diameter, material, operating pressure, and installation date of all pipelines in the system. Further, include the well permit number from the Division of Oil and Gas Conservation on the map, as well as the interconnection point with other gathering or transmission pipelines. Label the interconnection point with the name of the interconnection operator of the pipeline. If there are any compressors on the gathering line system, indicate their locations on the maps.

Answer: The requested maps are attached at Tab 2.

6. Explain in full detail whether Jetta owns or leases any other natural gas pipelines in any other Kentucky county that furnishes natural gas to farm tap customers that are not part of this application.

Answer: Jetta does not own or lease any natural gas pipelines that furnish natural gas pursuant to KRS 278.480 that are not part of this application.

7. Explain whether Jetta sells natural gas into the interstate market. If so, provide the sales agreement.

Answer: Jetta produces and sells all of its natural gas within the Commonwealth of Kentucky.

8. Provide the name and address of any customer served by Jetta that is located beyond a one-half air-mile radius of Jetta's producing gas well(s) or gas gathering pipeline(s) in Kentucky.

Answer: Jetta does not provide access to natural gas pursuant to KRS 278.480 to any applicants that are further than one-half air-mile from its producing gas well(s) or gas gathering pipelines.

9. Provide cost support for the \$25 turn-on fee proposed by Jetta. Include all

work papers, calculations, and other supporting documentation.

Answer: The hourly rate shown in Jetta's Revised Schedule 1 ("Well Operator Cost") (attached at Tab 4) is \$24.00 per hour. Because of the remote location of most of Jetta's Tariff Farm Taps, Jetta anticipates that in most cases its field personnel would require more than an hour to travel to the location, restart the gas flow and return to their duties. The PSC's regulations at 807 KAR 5:026, Section 7 currently provide for a \$25 turn-on fee following termination of gas access for non-payment.

10. Provide the date that Jetta began providing natural gas farm tap service to customers.

Answer: See the spreadsheet attached at Tab 1.

11. Pursuant to KRS 278.485(1), gas service shall be furnished at rates and minimum monthly charges determined by the Commission. Jetta admits in its June 4, 2018 cover letter that it has been providing natural gas to multiple customers pursuant to a written agreement at \$8.00 per Mcf. Confirm that Jetta violated the above-referenced statute because it has been charging customers for natural gas service even though the Commission has not approved its rates and charges.

Answer: When Jetta first acquired assets in Kentucky, there was one Tariff Farm Tap that had been installed and was serviced by the prior owner of the assets. It is Jetta's belief that the existing Tariff Farm Tap gas recipient paid \$8.00 per Mcf at that time. After its acquisition of the assets, Jetta applied that same price to the existing recipient and to subsequent applicants for gas access pursuant to KRS 278.485. As indicated by the Revised Schedules attached at Tab 4, Jetta's actual cost exceeds \$8.00, even at current gas prices.

12. Explain in full detail whether Jetta and its customers complied with KRS 278.485(3) which requires Commission supervision of the construction of each service line; the installation, type, and number of automatic gas regulators and gas meter or meters; and the connection thereof with the gas producing well or pipeline, and shall conform to

such standards of safety, location, and convenience as may be prescribed by said Commission.

Answer: All Tariff Farm Taps installed pursuant to an application to Jetta were inspected by representatives of the Kentucky Public Service Commission. Tariff Farm Tap applications and inspection reports are attached at Tab 3, and are also addressed in the spreadsheet attached at Tab 1.

13. Explain in full detail whether Jetta and its customers complied with 807 KAR 5:026 , Section 3, concerning the requirements for service under KRS 278.495.

Answer: See the materials attached at Tab 3.

14. Refer to Jetta's proposed tariff, Section 6, Payment of Bills; Other Default; Termination of Service. Jetta indicates that it will not send customers a bill if the amount of the bill is less than \$30. Instead, Jetta states that it will send a bill when a customer's aggregate bill is \$30 or more. 807 KAR 5:026, Section 7(1), requires that gas companies send bills to customers at regular monthly or bimonthly intervals. Given that requirement, indicate how Jetta will bill customers in compliance with 807 KAR 5:026, Section 7(1).

Answer: Jetta's proposal to only bill recipients of gas pursuant to Tariff Farm Taps when the amount of the bill reaches \$30.00 was an attempt to reduce the administrative costs associated with sending and processing very small bills during months of low gas use. However, Jetta will bill all customers monthly or bimonthly.

15. Refer to Schedule 1- Well Operator Cost. State if the total hours, per year and per customer, should be 8 rather than 12. If so, provide a revised Schedule 1.

Answer: See Revised Schedule 1 attached at Tab 4.

16. Refer to Schedule 2- Administrative Personnel Cost.

a. This schedule shows that Administrative Personnel spends approximately three hours per month preparing and reviewing invoices and processing cash

receipts. State if the three hours is for all of Jetta's customers, or is per customer.

Answer: The referenced expense is for all of Jetta's Tariff Farm Taps.

b. This schedule shows that Administrative Personnel spends approximately three hours per month on the duties listed above. However, in determining the rate per Mcf, Jetta divided by a 12-month average usage instead of a monthly average usage.

Provide an updated schedule using a monthly average usage.

Answer: See Revised Schedule 2 attached at Tab 4.

17. Refer to Schedules 1, 2, and 3. Explain how Jetta determined an average Mcf usage of six Mcf per month.

Answer: Jetta arrived at the average monthly gas usage shown in Schedule 1 based on the average of the gas usage of all of Jetta's Tariff Farm Tap gas recipients during the month of March. As a shoulder month between winter periods of relatively high gas use and summer periods of relatively low gas use, Jetta chose March as being indicative of a median usage.

CERTIFICATION

I, Jack Huxel, in my capacity as Senior Landman of Jetta Operating Company, Inc. which is the manager of Jetta Operating Appalachia, LLC, certify that I supervised the preparation of the forgoing responses to requests for information provided by Jetta Operating Appalachia, LLC, and that they are true and accurate to the best of my knowledge, information and belief, formed after reasonable inquiry.

Jack Huxel, Sr. Landman  
Jetta Operating Company, Inc., Manager  
Jetta Operating Appalachia, LLC

STATE OF TEXAS            )  
  ) :SS  
COUNTY OF TARRANT    )

The foregoing Certification was subscribed and sworn before me this 13<sup>th</sup> day of August, 2018, by Jack Huxel as Senior Landman of Jetta Operating Company, Inc. which is the manager of Jetta Operating Appalachia, LLC.

My commission expires: August 1, 2020
