11/3/18 Comment on latest LG&E
rate hike:

As a customer, Louisville resident,
and normal middle class working
person, I have to say I'm very
tired of seeing my bills rickled
and dined up month after month.
LG&E isn't the only culprit in
this trend, but it seems to be
quite a frequent increaser of
rates to its customers. I
work in system that didn't

2/ offer me cost of living increase
this year. when do I get to
increase my rates or better
yet say "NO" to utility and
phone and ~~and~~ other entities
pillaging my tight budget?
My comment as customer,
taxpayer and voter is NO
on this increase. I'd rather pay a
few more pennies in taxes

3/ to fund a library or
infrastructure than fill
LGE's bank accounts. How
about a rate decrease for
a change? That would be
refreshing.
