COMMONWEALTH OF KENTUCKY
BEFORE THE PUBLIC SERVICE COMMISSION

In the Matter of an Application of Duke)
Energy Kentucky, Inc. For an Order) Case No. 2018- 00416
Approving The Establishment of a)
Regulatory Asset)

VERIFIED APPLICATION OF DUKE ENERGY KENTUCKY, INC.

To the Honorable Kentucky Public Service Commission:

Duke Energy Kentucky, Inc. (Duke Energy Kentucky or the Company) respectfully petitions the Kentucky Public Service Commission (Commission) for an accounting order permitting Duke Energy Kentucky to accumulate and defer for recovery in rate proceedings before the Commission expenses incurred to repair damage and restore service to its customers caused by severe ice and wind conditions from November 15, 2018, through November 18, 2018 (November Ice Storm). In support of this Application, Duke Energy Kentucky states as follows:

Introduction

1. Duke Energy Kentucky is an investor-owned utility engaged in the business of furnishing natural gas and electric services to various municipalities and unincorporated areas in Boone, Bracken, Campbell, Gallatin, Grant, Kenton, and Pendleton Counties in the Commonwealth of Kentucky.

2. Pursuant to 807 KAR 5:001, Section 14(2), Duke Energy Kentucky is a Kentucky corporation originally incorporated on March 20, 1901, in good standing, and a public utility as that term is defined in KRS 278.010(3), and, therefore, is subject to the Commission's jurisdiction.

3. Pursuant to 807 KAR 5:001, Section 14(1), Duke Energy Kentucky's business address is 139 East Fourth Street, Cincinnati, Ohio 45202. Duke Energy Kentucky's local office in Kentucky is Duke Energy Envision Center, 4580 Olympic Boulevard, Erlanger, Kentucky 41018.

4. Copies of all orders, pleadings and other communications related to this proceeding should be sent to:

Rocco O. D'Ascenzo
Deputy General Counsel
Duke Energy Kentucky, Inc.
139 E. 4th St., Cincinnati, OH 45202
Rocco.D'Ascenzo@duke-energy.com
KYfilings@duke-energy.com

5. Pursuant to KRS 278.220, the Commission is authorized to prescribe accounting to be kept by utilities subject to its jurisdiction. By Order dated January 31, 2002, in Case No. 2001-00092, the Commission required Duke Energy Kentucky to obtain Commission approval to establish any new regulatory assets.

6. The November Ice Storm struck Duke Energy Kentucky's service territory in mid-November 2018, causing damage to the Company's electric delivery system that necessitated significant restoration efforts and expenses. The November Ice Storm began on or about November 15, 2018, and brought a mix of freezing rain and snow that covered trees, utility lines, and the ground with layers of ice. The ice and winds brought widespread damage to Duke Energy Kentucky's electric delivery system including, but not limited to, down tree limbs, wires and poles, and other equipment damage. In terms of system impact, Duke Energy Kentucky documented approximately 26,482 sustained outages (greater than five minutes in length), and 1,127 total events, due to the damage

caused by the November Ice Storm. In total, approximately 29,474 Duke Energy Kentucky customers were without power due to the November Ice Storm.¹

7. Because of the timing of the storm in relation to the need for Duke Energy Kentucky to file and request deferral of these costs prior to the end of the calendar year, Duke Energy Kentucky does not have final numbers regarding the extent of the damage to its system. Contractor and vendor invoices remain outstanding as the storm occurred less than thirty days ago, and indeed the Company does not expect the final invoices to be submitted and processed for approximately ninety days. Despite the best and diligent efforts of Duke Energy Kentucky's employees, contractors, and colleagues from its parent utility in Ohio and its sister utilities in North and South Carolina, service could not be fully restored to 100% of Duke Energy Kentucky's territory until November 18, 2018.

8. Duke Energy Kentucky used its best available resources to monitor and respond to the November Ice Storm. Because this winter storm covered such a large footprint in the Midwest that impacted all regional utilities, Duke Energy Kentucky, along with its parent utility in Ohio and sister utility in Indiana, requested aid from its Carolina affiliates to assist in restoration efforts in the Midwest Service Area. Duke Energy customer call centers were alerted to anticipate increased call volume on anticipated outages as a result.

9. Duke Energy Kentucky and its parent utility, Duke Energy Ohio, Inc, (Duke Energy Ohio) coordinated their efforts and immediately began implementing their emergency plans to respond to the damage. With respect to the service territories of Duke Energy Kentucky and Duke Energy Ohio, the storm affected every part of the 3,000-

¹ Duke Energy Kentucky has 142,750 total electric customers.

square-mile service area in Northern Kentucky and Southwest Ohio. More than 1,200 Duke Energy employees and contractors responded to the storm by assessing damage, preparing material for the field, assigning jobs to crews, removing damaged vegetation, repairing down lines and equipment and providing support services. Duke Energy Kentucky and Duke Energy Ohio employed more than 300 call center employees to handle the call volume related to the initial outages on November 15th and 16th. Duke Energy Kentucky and Duke Energy Ohio worked together to retain approximately 350 employees and contractors from Duke Energy Carolinas to assist in the restoration effort for Kentucky and Ohio customers. Duke Energy Kentucky has tabulated a consolidated damage assessment for its Northern Kentucky service territory as depicted on Exhibit 1.

10. The estimated costs of restoration that Duke Energy Kentucky incurred due to the November Ice Storm are projected to significantly and materially exceed the Company's average annual storm-related costs. Duke Energy Kentucky presently has approximately \$1 million in base rates for major storm restoration. Prior to the occurrence of this November Ice Storm, Duke Energy Kentucky had already experienced major storm restoration expenses of \$719,000 for 2018. Duke Energy Kentucky estimates that its November Ice Storm-related expenses alone, most of which are operations and maintenance costs, will be approximately \$1.6 million. The current estimates for repair costs are attached hereto as Exhibit 2. These costs are based upon both actual and estimated costs incurred to date and reasonable estimates of contingencies.

11. Duke Energy Kentucky does not maintain property and casualty insurance that covers its distribution and transmission systems for damage caused by severe weather because of the cost of doing so. In fact, upon information and belief, such coverage has

not been available from general insurance carriers and has been specifically excluded from policies since the early 1990s. As a result, Duke Energy Kentucky has not and will not receive any insurance proceeds to offset the November Ice Storm damage expenses.

12. Duke Energy Kentucky asks the Commission for permission to record as a regulatory asset and defer for future recovery in appropriate accounts, the actual costs incurred due to the November Ice Storm in excess of major storm expense contained in base rates. The measures Duke Energy Kentucky took to restore service, and the costs related thereto, were reasonable and prudent and should therefore be recoverable as a necessary cost of providing service to Duke Energy Kentucky's customers. If approved, Duke Energy Kentucky will hold its deferred costs in Account No. 182.3, Other Regulatory Assets, until the Commission considers the method of recovery in a future rate proceeding.

13. The accounting treatment requested herein related to the November Ice Storm will only have a small impact on customers when the Commission subsequently approves amortization and rate recovery of the regulatory asset. For example, if in the next rate case, the Commission approves a five-year amortization of this regulatory asset to be included in revenue requirements, the overall impact on retail customers' monthly bills is expected to be significantly less than one percent (1%).

14. The Commission has exercised its discretion to approve a regulatory asset upon demonstration that the expenses to be deferred fall into one of four categories:

- (1) An extraordinary, nonrecurring expense which could not have reasonably been anticipated in the utility's planning;
- (2) An expense resulting from a statutory or administrative directive;
- (3) An expense in relation to an approved industry initiative; or

- (4) An extraordinary or nonrecurring expense that over time will result in a saving that fully offsets the cost.

The Commission has previously approved accounting treatment for such extraordinary storm-related events and permitted deferral and amortization of significant and extraordinary expenses to the extent such costs exceed the amount of storm-related costs contained in base rates.² Duke Energy Kentucky respectfully submits that the costs incurred because of the November Ice Storm undeniably qualify as such extraordinary non-recurring expenses and that such expenses could not have been reasonably anticipated in the utility's planning.

15. The Commission has also recognized the impact of a late-occurring major event storm as it relates to the utility's fiscal year operations and the timing constraint placed upon seeking accounting orders from the Commission. As a result, the Commission has stated that it would "allow jurisdictional utilities to record expenses for Major Event storms occurring in the fourth quarter of the fiscal year as a deferred asset for accounting purposes only, subject to the utility's filing of an application within 90 days of the occurrence of the Major Event storm seeking Commission approval for such authority."³ With this Application, Duke Energy Kentucky is both informing the Commission of the need to establish this deferred asset and is also providing the best

² See e.g. *In the Matter of: An Adjustment of the Electric Rates, Terms and Conditions of Kentucky Utilities Company*, Case No. 2003-00434, Order at 39-41 (June 30, 2004), finding Kentucky Utilities' proposal to defer and amortize significant ice storm related expenses as reasonable; *In the Matter of General Adjustment of Rates of East Kentucky Power Cooperative*, Case No. 2006-472 (Order)(December 7, 2007) Permitting amortization of forced outage expenses over three years due to the significance and extraordinary nature of the event; *In the Matter of an Application of Duke Energy Kentucky, Inc for An Order Approving the Establishment of a Regulatory Asset*, Case No. 2008-476, (Order at 4)(January 7, 2009) Permitting deferral of storm restoration costs associated with Hurricane Ike.

³ *In the Matter of: Application of Kentucky Power Company for an Order Approving Accounting Practices to Establish Regulatory Assets and Liabilities Related to the Extraordinary Expenses Incurred by Kentucky Power Company in Connection with the Two 2015 Major Storm Events*, (Ky. P.S.C. December 12, 2016).

available information at this time in order for the Commission to consider the Company's deferral request.

16. Consistent with Statements of Financial Standards No. 71 codified as Accounting Standards Codification (ASC) 980, granting such treatment in this case will allow Duke Energy Kentucky to make appropriate adjustments to its books of account for the regulatory asset and prevent Duke Energy Kentucky from having to record extraordinary storm costs as expenses on its books. To comply with ASC 980, Duke Energy Kentucky respectfully requests the Commission to state explicitly in its order that it is authorizing Duke Energy Kentucky to accumulate in a regulatory asset and defer the actual amounts up to \$1.6 million of extraordinary expenses Duke Energy Kentucky incurred to repair damage and restore service to customers following the November Ice Storm, in a regulatory asset in Account No. 182.3, Other Regulatory Assets.

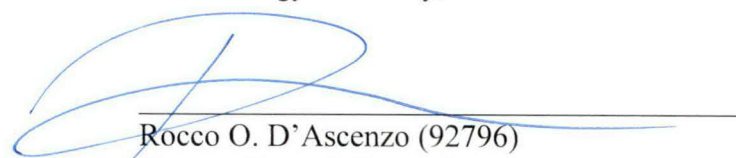

17. If the Commission approves Duke Energy Kentucky's requested regulatory asset treatment of its November Ice Storm related expenses, Duke Energy Kentucky will make the following journal entries:

Debit	182.3	Other Regulatory Assets
Credit	58X	Distribution Operation Expense
	59X	Distribution Maintenance Expense
	9XX	Administrative & General Expense
	408	Payroll Taxes

WHEREFORE, Duke Energy Kentucky prays that the Commission issue an order granting authority to accumulate in a regulatory asset and defer for future recovery the actual amounts up to \$1.6 million of extraordinary expenses Duke Energy Kentucky incurred to repair damage and restore service to customers following the November Ice Storm and to apply the proposed accounting treatment to make appropriate adjustments on its books of account for the year ending December 31, 2018.

Respectfully submitted,

Duke Energy Kentucky, Inc.
