Frankfort, KY 40602

Re: Salt River Electric – 2019 DSM Program Changes

Dear Ms. Pinson:

Please find enclosed for filing with the Commission the above-referenced Salt River Electric's revised tariffs for the following Demand Side Management ("DSM") Programs:

- Touchstone Energy Home
- Direct Load Control Program – Residential
- Heat Pump Retrofit Program

Over the last year, Salt River Electric has worked diligently with East Kentucky Power Cooperative, Inc. ("EKPC") and its DSM Steering Committee ("the Committee"), a committee of EKPC and Owner-Member cooperative ("Owner-Member") staff and consultants, to re-evaluate the cost-effectiveness and need for all existing DSM programs. Salt River Electric relied upon the work of EKPC's consultants and Staff throughout this effort. The conclusions of the re-evaluation were shared with EKPC's executive leadership and the Owner-Members' Chief Executive Officers ("CEOs") and a consensus was achieved to recommend substantial changes to EKPC's portfolio of DSM programs. Salt River Electric is in agreement with the proposed changes to EKPC's DSM portfolio of programs and desires to make appropriate changes to its own DSM tariffs so that they continue to be consistent with EKPC's tariffs. Accordingly, please find attached the following materials related to the proposed DSM tariffs to be implemented:

### **1. Exhibit A – Proposed DSM Tariffs**

Copies of the proposed DSM tariffs are collectively filed herewith as Exhibit A. In instances where it is proposed for a tariff to be withdrawn, a tariff sheet will be designated as being reserved for future use, taking the place of the existing tariff provisions is being tendered.

**2. Exhibit B – Supporting Documents: Marked-Up Copies of Proposed DSM Tariffs**

Also included are copies of the modified DSM Program tariffs for each of the DSM programs listed above. The tariffs are tendered in a format showing the strike-throughs of the existing tariffs for convenience.

**3. Exhibit C – Supporting Documents: Customer Notice and Effective Date**

Pursuant to KRS 278.180(1), a utility must give at least 30-days' advance notice to the Commission before implementing a new tariff. Therefore, the proposed effective date of these tariff revisions will be March 1, 2019. Pursuant to 807 KAR 5:011, Salt River Electric has posted the requisite notice at its office located at 111 West Brashear, Kentucky and will post the requisite notice on its website, no later than five (5) business days from today's date, which will include a hyperlink to the Commission's website where the tariff can be found. Written notice has also been given to members by delivering a copy of the Customer Notice through publication in the February edition of *Kentucky Living* magazine. A copy of the Customer Notice is attached.

While Salt River Electric requests that these tariffs become effective on March 1, 2019, it recognizes that several of its members are still making economic decisions based upon the tariffs currently in effect. To minimize disruption and surprise to such customers, Salt River Electric intends to honor all requests for rebates, appliance pick-ups or other existing program benefits that were initiated by members prior to the effective date of these proposed tariffs. Thus, Salt River Electric anticipates that even when the revised DSM portfolio is approved and in effect, some legacy obligations will remain to be satisfied to fairly and reasonably wind-down the existing tariffed programs.

Please contact me if you have any questions.

Sincerely,

A handwritten signature in black ink, appearing to read 'Tim Sharp', with a large, stylized flourish at the end.

Tim Sharp, P.E.  
President and CEO

Enclosures

# CUSTOMER NOTICE

## Proposed Changes to Demand Side Management (DSM) Programs

---

Notice is hereby given to the members of: **Big Sandy RECC**, 504 Eleventh Street, Paintsville, KY 41240; **Blue Grass Energy Coop. Corp.**, 1201 Lexington Road, Nicholasville, KY40356; **Clark Energy Coop., Inc.**, 2640 Iron Works Road, Winchester, KY40391; **Cumberland Valley Electric, Inc.**, 6219 North U.S. Highway 25E, Gray, KY 40734; **Farmers RECC**, 504 South Broadway, Glasgow, KY 42141; **Fleming-Mason Energy Coop. Corp.**, 1449 Elizaville Road, Flemingsburg, KY 41041; **Grayson RECC**, 109 Bagby Park, Grayson, KY 41143; **Inter-County Energy Coop. Corp.**, 1009 Hustonville Road, Danville, KY 40422; **Licking Valley RECC**, 271 Main Street, West Liberty, KY 41472; **Nolin RECC**, 411 Ring Rd., Elizabethtown, KY 42701; **Owen Electric Coop., Inc.**, 8205 Highway 127 N, Owenton, KY 40359; **Salt River Electric Coop., Inc.**, 111 West Brashear Avenue, Bardstown, KY 40004; **Shelby Energy Coop., Inc.**, 620 Old Finchville Road, Shelbyville, KY 40065; **South Kentucky RECC**, 200 Electric Avenue, Somerset, KY 42502; **Taylor County RECC**, 625 West Main Street, Campbellsville, KY 42718.

On or about January 30, 2019, the Cooperatives will file proposed tariffs that revise or eliminate certain DSM programs that are currently in effect. The proposed effective date for the tariff changes is March 1, 2019. Each of the DSM tariffs are voluntary in nature. None of the Cooperatives have a DSM Rider in effect, so there will be no change in the rates charged for electric service to any customer class. However, if the proposed tariffs are approved:

- The Heat Pump Retrofit Program will add ductless mini-splits as an eligible primary heat source. Other eligibility criteria will change and incentives will no longer be tied to AHRI ratings.
- The Button-Up Weatherization Program will no longer apply to installing higher efficiency windows and doors and program levels will be abolished in favor of a single incentive. A new standard for measuring attic insulations will be adopted.
- The Touchstone Energy Home Program will increase the minimum efficiency eligibility standard while retaining only two eligibility paths (Blue Grass Energy also retains the option to provide additional services).
- The Residential Direct Load Control Program will no longer apply to new water heaters or any pool pumps and gives greater flexibility in providing the incentive to members.
- The Commercial Direct Load Control Program will now apply to heat pumps, but will no longer apply to new water heaters. Additional device communication requirements will apply.
- The ENERGY STAR® Manufactured Home Program will have a lower incentive payment now given directly to a qualifying member.

The Cooperatives also propose to eliminate the: (1) ENERGY STAR Appliance Program; (2) Appliance Recycling Program; (3) Commercial and Industrial Advance Lighting Program; (4) Industrial Compressed Air Program; and (5) HVAC Duct Seal Program, where applicable.

A person may examine this tariff filing at any of the Cooperatives' respective offices at the addresses listed above. A person may also examine this tariff filing at the Public Service Commission's offices, which are located at 211 Sower Boulevard, Frankfort, Kentucky, Monday through Friday, 8:00 a.m. to 4:30 p.m., or through the Commission's website at <http://psc.ky.gov>. Any comments regarding this tariff filing may be submitted to the Commission through its website or by mail to Kentucky Public Service Commission, Post Office Box 615, Frankfort, Kentucky 40602. The rates contained in this notice are the rates proposed by the Cooperatives, however, the Public Service Commission may order rates to be charged that differ from the proposed rates contained in this notice. A person may submit a timely written request for intervention to the Public Service Commission, at the address listed above, establishing the grounds for the request including the status and interest of the party. If the commission does not receive a written request for intervention within thirty (30) days of the initial publication of this notice, the Commission may take final action on the tariff filing.

TOUCHSTONE ENERGY HOME PROGRAMSch TEHP**Purpose**

In an effort to improve new residential home energy performance, Salt River Electric has designed the Touchstone (T) Energy Home Program. This program provides guidance during the building process to guarantee a home that is ~~>25-30~~ 15-20% more efficient than the Kentucky standard built home. The standard built new home in rural Kentucky typically receives a ~~400-105~~ on the Home Energy Rating System ("HERS") Index. ~~A HERS Index Score of 400 means the home is built to only moderate levels of efficiency generally the 2004 International Energy Conservation Code ("IECC").~~

**Availability**

This program is available to residential members served by Salt River Electric.

**Eligibility**

To qualify as a Touchstone Energy Home under Salt River Electric program, the participating single-family home must be located in the service territory of Salt River Electric and must meet the program guidelines following one of the ~~three-two~~ available paths of approval. Multi-family dwellings pre-approved by East Kentucky Power Cooperative, Inc. may be eligible.

**Prescriptive Path:**

- Home must meet each efficiency value as prescribed by <Insert Coops Name>.
- Home must receive pre-drywall inspection and complete <Insert Coops Name>'s pre-drywall checklist (contact the Energy Advisor at Salt River Electric for a copy of the checklist)
- Home must receive a final inspection, pass a whole house air leakage test (<7 air changes per hour @50 pascals), and duct leakage test (<10% of the fan's rated capacity).

Commercial & Industrial Advanced Lighting Program

Purpose

~~The Commercial & Industrial Advanced Lighting Program is an energy efficiency program that encourages commercial and industrial customers to install high efficiency lamps and ballasts in their facilities.~~

Availability

~~This program is available to commercial and industrial facilities located in all service territory served by EKEC.~~

Eligibility

~~To qualify for the Commercial & Industrial Advanced Lighting Program the customer must be on a retail commercial or industrial rate. The business must have been in operations for at least two years prior to January 1, 2011, and be current on its power bill payment to the Member System. No empty buildings, inactive warehouses, or inactive storage areas shall qualify. The business must be open or have its normal lighting load on for at least 50 hours per week. Retrofits of parking lot lighting, provided on photocell control, are eligible.~~

Rebate

~~EKEC and its Member Systems will provide an incentive to the customer of \$17 for each kW of lighting load reduction for businesses open 50 hours a week or more. EKEC will reimburse the Member System an additional \$320 for each kW of lighting load reduction, which is to compensate for lost revenue. For commercial customers, rebates are limited to \$15,000 per upgrade (total of both customer and distribution system rebates) for any facility. For industrial customers, rebates are limited to \$30,000 per upgrade (total of both customer and distribution system rebates) for any facility.~~

Industrial Compressed Air Program

Purpose

~~The Industrial Advanced Compressed Air Program is a program designed to reduce electricity consumption through a comprehensive approach to efficient production and delivery of compressed air in industrial facilities. The program includes (1) training of plant staff; (2) a detailed system assessment of the plant's compressed air system including written findings and recommendations; and (3) incentives for capital intensive improvements.~~

Availability

~~This program is available to commercial and industrial facilities using electric compressed air applications located in all service territory served by EKPC.~~

Eligibility

~~To qualify for the Industrial Compressed Air Program, the customer must be on a retail industrial rate and must be a manufacturing operation with a compressed air system that is turned on during all the operating hours of the facility. The business must have been in operations for at least two years prior to January 1, 2011, and be current on its power bill payment to the Member System.~~

Rebate

~~If the customer reduces at least 60% of the compressed air leaks (ACMs), EKPC will reimburse through the Member System to the customer the cost of the original compressed air leakage audit up to \$5,000. The combination of the Member System lost revenue payment and the reimbursement of the compressed air leakage audit costs are limited to \$15,000 for any facility.~~

CLASSIFICATION OF SERVICE

~~Section DSM-6 (con't)~~

Term

~~The Industrial Compressed Air Program is an ongoing program.~~

Verification Procedures

~~Determination of the amount of leakage reduction:~~

- ~~1. The leakage reduction will be determined by the measured reduction in compressed air leakage.~~
- ~~2. An ultrasonic compressed air leakage audit shall be performed and the results of this audit provided to the customer and EKPC. The report will contain an estimate of the amount of excess load in kW that the leaks are causing. The report will include a detail of leaks detected. The detail of leaks and the excess kW load will be based on the criteria for leak reporting.~~
- ~~3. Upon completion of repairs to the system, a follow-up ultrasonic compressed air leakage audit will be conducted for the documented leaks to measure the difference in the kW leakage load. The follow-up audit report will show the net kW leakage saved and results provided to the customer and EKPC. A 10% revenue reimbursement will be paid to the Member System based on the difference in the kW leakage load and the cost of the original air leakage audit will be reimbursed to the customer if a 50% reduction in IIRs air leakage is achieved.~~

~~Criteria for leak reporting:~~

- ~~1. The criteria for reporting leaks shall be at the discretion of the auditor. At a minimum the report must detail the leak location, decibels measured, CFM of air leakage, and kW leakage load for each leak and summed for the facility.~~
- ~~2. The basic rule is that leaks that do not exceed 70 decibels in ultrasonic noise will not be reported or counted in the leakage kW load.~~

Heat Pump Retrofit Program

Sch Heat Pump Retrofit

Purpose

The Heat Pump Retrofit Program provides incentives for residential ~~customers and use cooperative members ("end-use members")~~ members to replace their existing resistance heat source with a high efficiency heat pump.

Availability

This program is available to residential ~~end-use~~ members served by ~~<Insert Coop Name>~~.

Eligibility

This program is targeted to retail members who currently heat their home with a resistance heat source; this program is targeted to site built homes, manufactured homes, and multi-family dwellings. Eligibility requirements are:

- Incentive only applies when homeowner's primary source of heat is an electric resistance heat furnace, ceiling cable heat, ~~or~~ baseboard heat, electric thermal storage.
- Existing heat source must be at least 2 years old.
- New manufactured homes are eligible for the incentive.
- ~~Air Conditioning, Heating, and Refrigeration Institute ("AHRI") ratings may range as follows: Seasonal Energy Efficiency Ratio ("SEER") minimum 13; Heating Seasonal Performance Factor ("HSPF") minimum 7.5.~~
- Two (2) maximum incentive payments per location, per lifetime for centrally ducted systems.
- Ducted and Ductless mini-splits applying for the incentive will be incentivized at a rate of \$250 per indoor head unit up to a maximum of three head units per location, per lifetime.
- Participants in the Heat Pump Retrofit Program are not eligible for participation in the ENERGY STAR<sup>®</sup> Manufactured Home Program

Direct Load Control Program - Residential

The Direct Load Control Program will encourage the reduction in growth of peak demand, enabling Salt River Electric to utilize its system more efficiently, manage market purchases, and defer the construction of new generation.

Availability

The Direct Load Control Program is available to residential ~~retail~~ members in the service territories of Salt River Electric and will include the control of *existing* water heaters, *existing and new* air conditioners and heat pumps, ~~and pool pumps.~~

Availability may be denied where, in the judgment of Salt River Electric, installation of the load control equipment is impractical.

Eligibility

To qualify for this program, the *new* participant must be located in the service territory of Salt River Electric and have:

- ~~• 40-gallon (minimum) electric water heating units, and/or~~
- Central air conditioning or heat pump units *with single-stage compressors.* ~~and/or~~
- ~~• Pool pumps.~~

The above appliances may be electrically cycled or interrupted in accordance with the rules of this Tariff.

The participant may either own or rent the residence where the qualifying appliances are located. The residence may be either a single-family structure or a multi-family apartment facility

The participant is responsible for obtaining the permission of the owner of the rented residence to participate in the load control program. Salt River Electric may require that a rental property agreement be executed between Salt River Electric and the owner of the rented residence.

**Program Incentives**

Salt River Electric will provide an incentive to the participants in this program for the following appliances:

**Water Heaters:** Salt River Electric will reimburse provide the existing participating residential member \$10.00 per water heater annually or provide the incentive via other payment means including, but not limited to, a check. The existing participant will receive this credit regardless of whether the water heater is actually controlled.

**Air Conditioners and Heat Pumps:** Salt River Electric will provide an incentive to the participants in this program. The participant may select one of two three alternatives. The participant will receive one of these incentives regardless of whether the air conditioner or heat pump is actually controlled during any program month.

**Alternative One:** For each direct load control switch, Salt River Electric will reimburse provide the participating residential member \$20.00 bill credit annually or provide the incentive via other payment means including, but not limited to, a check per air conditioner or heat pump. (~~\$5 per summer months, June, July, August and September.~~)

Alternative Two: When technically feasible, Salt River Electric may provide and install at no cost one or more digital *Wi-Fi enabled* thermostats as needed for control purposes or *Salt River Electric may provide a Wi-Fi enabled thermostat and a rebate up to \$100 to offset the member's cost to have the thermostat installed by the member's own heating and air-conditioning contractor. The member must sign-up each Salt River Electric provided thermostat within 60 days or return it to Salt River Electric or be invoiced by Salt River Electric for the cost of the thermostat. Wi-Fi enabled means any thermostat utilizing the Wi-Fi communication protocol or similar local networking communication protocols. The member must have a fixed location, reliable internet for communication. Salt River Electric will reimburse the participating member \$20 per qualifying Wi-Fi enabled thermostat annually. After the initial selection of one of the alternatives, the participant may change to the other alternative subject to the following conditions:*

- ~~From bill credits to digital thermostats~~ The change in alternative will be permitted in any month except for the summer months of June through September. In addition, the participant will pay fifty percent (50%) of the installed cost of each digital thermostat.
- ~~From digital thermostats to bill credits~~ This change in alternative will be permitted in any month except for the summer months of June through September. In addition, the participant will either reimburse Salt River Electric, through the owner member, an amount equal to fifty percent (50%) of the originally installed cost of each digital thermostat that was initially installed if the participant keeps the thermostat or pay fifty percent (50%) of the cost to remove each digital thermostat that was initially installed.
- Only one change in incentive alternatives will be permitted during a 12-month period.

Alternative Three Pool Pumps: Salt River Electric will reimburse provide the participating residential member \$20.00 bill credit per pool pump qualifying *Wi-Fi enable thermostat provided by the retail member that controls an air conditioner or heat pump annually or provide the incentive via other payment means including, but not limited to, a check. Salt River Electric will provide a rebate up to \$100 to offset the member's cost to have the thermostat installed by the member's own heating and air-conditioning contractor. The member must have a fixed location, reliable internet for communication. (\$5.00 per summer month, June, July, August and September). The participant will receive this credit regardless of whether the pool pump is actually controlled.*

A landlord may be eligible for the same number of incentives per calendar year as a metered tenant end-use member.

PAYMENTS

Salt River Electric Cooperative Corporation will provide an incentive (rebate) payment to the end-use member as noted in the following table:

Appliances	End-Use Member Rebate
Refrigerator	\$100
Freezer	\$50
Dishwasher	\$50
Clothes Washer	\$75
Heat Pump Water Heater	\$300
Air Source Heat Pump	\$300
Air Conditioner (Central)	\$300

TERM

The program is an ongoing program.

Schedule ARR  
Appliance Recycling Program

PURPOSE

~~The Appliance Recycling Program ("ARP") offers an incentive for the removal and recycling of old energy inefficient refrigerators and freezers resulting in lower energy consumption at the participating residences.~~

AVAILABILITY

~~This program is available in all territories served by Salt River Electric Cooperative Corporation.~~

ELIGIBILITY

~~This program is targeted to existing single family, multi family, and manufactured homes that currently have old energy inefficient refrigerators or freezers. The residential end use cooperative member ("end use member") may be eligible for this incentive by offering an existing refrigerator or freezer, subject to detailed eligibility requirements, to be picked up and recycled. Detailed eligibility requirements are available at Salt River Electric Cooperative Corporation and on Salt River Electric Cooperative Corporation's website. General eligibility requirements are:~~

- ~~• Must be a residential end use member of Salt River Electric Cooperative Corporation.~~
- ~~• End use member must own the appliance(s) being turned in for recycling.~~
- ~~• End use member must be eligible for the incentive—maximum 2 per metered account per calendar year~~
- ~~• Appliance must be between 7.75 and 30 cubic feet~~
- ~~• Appliance must be plugged in, operational, working and cooling when collection team arrives~~
- ~~• Appliance must be empty and have a clear path for removal~~
- ~~• Appliance must be picked up from the service address on the end use member's billing account~~

TOUCHSTONE ENERGY HOME PROGRAM

Sch TEHP

**Purpose**

In an effort to improve new residential home energy performance, Salt River Electric has designed the Touchstone Energy Home Program. This program provides guidance during the building process to guarantee a home that is  $\geq$ 25-30% more efficient than the Kentucky standard built home. The standard built new home in rural Kentucky typically receives a 105 on the Home Energy Rating System (“HERS”) Index.

T  
T

**Availability**

This program is available to residential members served by Salt River Electric.

**Eligibility**

To qualify as a Touchstone Energy Home under Salt River Electric program, the participating single-family home must be located in the service territory of Salt River Electric and must meet the program guidelines following one of the two available paths of approval. Multi-family dwellings pre-approved by East Kentucky Power Cooperative, Inc. may be eligible.

T  
T

**Prescriptive Path:**

- Home must meet each efficiency value as prescribed by Salt River Electric.
- Home must receive pre-drywall inspection and complete Salt River Electric’s pre-drywall checklist (contact the Energy Advisor at Salt River Electric for a copy of the checklist).
- Home must receive a final inspection, pass a whole house air leakage test and duct leakage test.
- Primary source of heat must be an Air Source Heat Pump  $\geq$ current ENERGY STAR® specification for Seasonal Energy Efficiency Ratio “SEER” and Heating Season Performance Factor “HSPF” or Geothermal.
- Water Heater must be an electric storage tank water heater that is  $\geq$  current Energy and Water conservation standards established by the Federal Department of Energy “DOE”.

Heat Pump Retrofit Program

Sch Heat Pump Retrofit

Purpose

The Heat Pump Retrofit Program provides incentives for residential members to replace their existing resistance heat source with a heat pump.

T  
T

Availability

This program is available to residential members served by Salt River Electric.

T

Eligibility

This program is targeted to members who currently heat their home with a resistance heat source; this program is targeted to site built homes, manufactured homes, and multi-family dwellings. Eligibility requirements are:

T

- Incentive only applies when homeowner's primary source of heat is an electric resistance heat furnace, ceiling cable heat, baseboard heat, electric thermal storage.
- Existing heat source must be at least 2 years old.
- New manufactured homes are eligible for the incentive.
- Two (2) maximum incentive payments per location, per lifetime for centrally ducted systems.
- Ducted and Ductless mini-splits applying for the incentive will be incentivized at a rate of \$250 per indoor head unit up to a maximum of three head units per location, per lifetime.
- Participants in the Heat Pump Retrofit Program are not eligible for participation in the ENERGY STAR<sup>®</sup> Manufactured Home Program.

Section DSM - 3(a)Direct Load Control Program - ResidentialPurpose

The Direct Load Control Program will encourage the reduction in growth of peak demand, enabling Salt River Electric to utilize its system more efficiently, manage market purchases, and defer the construction of new generation.

Availability

The Direct Load Control Program is available to residential members in the service territories of Salt River Electric and will include the control of existing water heaters, existing and new air conditioners and heat pumps. T  
T

Availability may be denied where, in the judgment of Salt River Electric, installation of the load control equipment is impractical.

Eligibility

To qualify for this program, the new participant must be located in the service territory of Salt River Electric and have: T

- Central air conditioning or heat pump units with single stage compressors.

The above appliances may be electrically cycled or interrupted in accordance with the rules of this Tariff.

The participant may either own or rent the residence where the qualifying appliances are located. The residence may be either a single-family structure or a multi-family apartment facility.

The participant is responsible for obtaining the permission of the owner of the rented residence to participate in the load control program. Salt River Electric may require that a rental property agreement be executed between Salt River Electric and the owner of the rented residence.

**CLASSIFICATION OF SERVICE**

Section DSM - 3(a) (con't.)

**Program Incentives**

Salt River Electric will provide an incentive to the participants in this program for the following appliances:

**Water Heaters:** Salt River Electric will provide the existing participating residential member \$10.00 per water bill credit annually or provide the incentive via other payment means including, but not limited to, a check. The participating member will receive this credit regardless of whether the water heater is actually controlled.

**Air Conditioners and Heat Pumps:** Salt River Electric will provide an incentive to the participants in this program. The participant may select one of three alternatives. The participant will receive one of these incentives regardless of whether the air conditioner or heat pump is actually controlled during any program month.

**Alternative One:** For each direct load control switch Salt River Electric will provide the participating residential member \$20.00 bill credit annually or provide the incentive via other payment means including, but not limited to, a check per air conditioner or heat pump.

**Alternative Two:** When technically feasible, Salt River Electric may provide and install at no cost more Wi-Fi enabled thermostats as needed for control purposes or Salt River Electric may provide a Wi-Fi enabled thermostat and a rebate up to \$100 to offset the member's cost to have the thermostat installed by the member's own heating and air-conditioning contractor. The member must sign-up each Salt River Electric provided thermostat within 60 days or return it to Salt River Electric or be invoiced by Salt River Electric for the cost of the thermostat. Wi-Fi enabled means any thermostat utilizing the communication protocol or similar local networking communication protocols. The member must have a fixed location, reliable internet for communication. Salt River Electric will reimburse the participating member per qualifying Wi-Fi enabled thermostat annually.

**Alternative Three:** Salt River Electric will provide the participating residential member \$20.00 bill credit annually for a qualifying Wi-Fi enabled thermostat provided by the retail member that controls an air conditioner or heat pump annually or provide the incentive via other payment means including, but not limited to, a check. Salt River Electric will provide a rebate up to \$100 to offset the member's cost to have the thermostat installed by the member's own heating and air-conditioning contractor. The member must have a fixed location, reliable internet for communication.

When the qualifying appliances are located in rental residences, program incentives will be paid to the participant, regardless of whether the participant owns or rents the residence where the qualifying appliances are located.

**CLASSIFICATION OF SERVICE**

**Section DSM - 3(a) (con't.)**

Nothing contained in this Tariff will prohibit a further disposition of the program incentive between the participant and the owner of a rented residence.

**Program Special Incentives**

Salt River Electric will provide a special incentive up to \$25.00 for new participants that install a load switch on qualifying air conditioners and heat pumps, utility supplied Wi-Fi enabled thermostat or retail r supplied Wi-Fi enabled thermostat. This one-time incentive will be in the form of a bill credit on the ele following the switch installation or provided via other payment means including, but not limited to, a check.

**Time Periods for Direct Load Control Program**

Water Heaters: Existing load control switches may be electrically interrupted for a maximum time period of s hours per event during the May through September months indicated below and for a maximum time period of (4) hours per event during the October through April months indicated below.

EKPC will cycle the water heaters only during the hours listed below.

<u>Months</u>	<u>Hours Applicable for Demand Billing - EPT</u>
October through April	6:00 a.m. to 12:00 noon 4:00 p.m. to 10:00 p.m.
May through September	10:00 a.m. to 10:00 p.m.

Air Conditioners and Heat Pumps: A load control device (switch or Wi-Fi enabled thermostat) will be place each central air conditioning unit or heat pump that will allow the operating characteristics of the unit to be mo to reduce demand on the system. Communication to the load control device will be accomplished via AMR, Wi-Fi or similar communication technologies.

EKPC will control the air conditioning units and heat pumps only during its summer on-peak billing hours below and up to (4) four hours per event.

<u>Months</u>	<u>Hours Applicable for Demand Billing - EPT</u>
May through September	10:00 a.m. to 10:00 p.m.

**CLASSIFICATION OF SERVICE**

---

**Section DSM - 3(a) (con't.)****Terms and Conditions**

1. Prior to the installation of load control devices, Salt River Electric may inspect the participant's electrical equipment to ensure good repair and working condition, but Salt River Electric shall not be responsible for the repair or maintenance of the electrical equipment.
2. EKPC, on behalf of Salt River Electric, will install, in some cases, own, and maintain the load manager T devices controlling the participant's air conditioner or heat pump, for Alternatives One and Two as noted in T tariff. The participant must allow Salt River Electric, or their representative, reasonable access to install, maintain, inspect, test and remove load control devices. Inability of Salt River Electric to gain access to the load management device to perform any of the above activities for a period exceeding thirty (30) days may, at Salt River Electric's option, result in discontinuance of credits under this tariff until such time as Salt River Electric is able to gain the required access.
3. Participants may join the program at any time during the year. Participants with air conditioning or heat p T units who join during the months of June through September can select an incentive alternative as describ T this Tariff. If the incentive is selected, incentives will be provided annually.
4. If a participant decides to withdraw from the program or change incentive alternatives, Salt River Electric will endeavor to implement the change as soon as possible.
5. If a participant decides to withdraw from the program, the participant may not apply to rejoin the program for a period of six (6) months. Returning participants for air conditioning and heat pump units will be required to initially select the bill credit alternative, but may change alternatives later as described in this Tariff.
