Re: Case No. 2022-00066
Proposed Construction of Electric Transmission Line

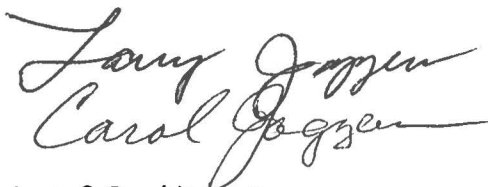

Dear Sir:

In regards to the transmission line proposed by Kentucky Utilities (KU), we want to state our objections to the line being placed in the center of a small parcel of land we own. Our land is identified as parcel number 190-00-00-032. The placement of this proposed line will severely limit the potential use of the balance of the parcel left to each side.

We have reviewed the alternate routes developed and proposed by the Brown family and ask that one of these routes be adopted as the final route of the proposed transmission line. Adoption of one of the alternative routes will prevent the need for the proposed transmission line to devastate the future use and value of our land.

Thank you for your consideration in this matter.

Thank you,
